If the number of accounts in the hold request is less than or equal to the defer processing count (specified in the respective hold request type), the system immediately sets the postpone credit review until date to the system date for the respective accounts. However, if the number of accounts in the hold request is greater than the defer processing count, the system sets the postpone credit review until date to the system date for the respective accounts in the deferred mode when the **C1-HLMON** batch is executed.

Hold Refund

Oracle Revenue Management and Billing enables you to hold the refund process for an account through a hold request. If the refund process is kept on hold for an account, the system does not process the refund requests (if any) created for the account. Note that the system does not stop you from creating A/P adjustments for an account from the **Adjustment** screen when the refund process is kept on hold for the account.

Note:

The system allows you to select the **Refund** option in the hold request only when the entity level is set to **Account** and not when the entity level is set to **Person** or **Bill**.

While adding the refund process in a hold request, you need to specify the date range for which you want to hold the refund process for the accounts. The system enables you to hold the refund process by creating a hold request from the user interface or through the upload request feature. If you want to create a hold request to hold the refund process for an account through the upload request feature, you need to specify the following details in the CSV file:

- Whether you want to hold the refund process for the account (the valid values are **Y** or **N**)
- Hold refund start date (required if the hold refund is set to **Y**)
- Hold refund end date

You can also create, update, or release a hold request through an inbound web service. For more information, see Hold Request Creation, Modification, Release, and View Through Inbound Web Service on page 3311.

Refund Hold Activation

On activating a hold request for an account, the system sets the hold refund until date corresponding to the accounts whose date range falls within the refund process date range of the hold request. The hold refund until date is set to the hold entity end date or refund process end date whichever is earlier. This means that the system will allow to process the refund request for the accounts only after the respective hold refund until date. Note that if the start date of the hold request, hold entity, or hold process is earlier than the system date, the system sets the respective start date to the system date.

Let us understand how the hold refund until date is derived for an account that is kept on hold through a hold request.

Scenario		**Start Date**	**End Date**	**Hold Refund Until Date**
Scenario 1	Hold Request 1	01-Jan-2025	31-Jan-2025	-
	Refund Process	01-Jan-2025	31-Jan-2025	
	Account 1	01-Jan-2025	15-Jan-2025	15-Jan-2025
	Account 2	01-Jan-2025	20-Jan-2025	20-Jan-2025
Scenario 2	Hold Request 1	01-Jan-2025	31-Jan-2025	-
	Refund Process	01-Jan-2025	20-Jan-2025	
	Bill Generation Process	01-Jan-2025	25-Jan-2025	
	Account 1	01-Jan-2025	22-Jan-2025	20-Jan-2025
Scenario 3	Hold Request 2	01-Jan-2025	31-Jan-2025	-
	Refund Process	01-Jan-2025	31-Jan-2025	
	Account 3	01-Jan-2025	15-Jan-2025	15-Jan-2025
	Hold Request 3	05-Jan-2025	20-Jan-2025	-
	Refund Process	05-Jan-2025	20-Jan-2025	

Scenario		**Start Date**	**End Date**	**Hold Refund Until Date**
	Account 3	05-Jan-2025	20-Jan-2025	20-Jan-2025
	Hold Request 4	10-Jan-2025	25-Jan-2025	-
	Refund Process	10-Jan-2025	25-Jan-2025	
	Account 3	10-Jan-2025	25-Jan-2025	25-Jan-2025
Scenario 4	Hold Request 1	01-Jan-2025	31-Jan-2025	-
	Refund Process	01-Jan-2025	30-Jan-2025	
	Account 1	01-Jan-2025	-	30-Jan-2025
	Account 2	01-Jan-2025	-	30-Jan-2025
Scenario 5	Hold Request 1	01-Jan-2025	31-Jan-2025	-
	Refund Process	01-Jan-2025	-	
	Account 1	01-Jan-2025	-	31-Jan-2025
	Account 2	01-Jan-2025	-	31-Jan-2025
Scenario 6	Hold Request 1	01-Jan-2025	20-Jan-2025	-
	Refund Process	01-Jan-2025	-	-
	Account 1	01-Jan-2025	15-Jan-2025	15-Jan-2025
	Account 2	01-Jan-2025	-	20-Jan-2025

In the scenario 1, the hold refund until date for the Account 1 is set to 15-Jan-2025 and the hold refund until date for the Account 2 is set to 20-Jan-2025. This is because the entity end date is earlier than the refund process end date. However, in the scenario 2, the hold refund until date for the Account 1 is set to 20-Jan-2025. This is because the refund process end date is earlier than the entity end date.

In the scenario 3, three hold requests are created with different hold reasons to keep the Account 3 on hold for different duration. In this case, the hold refund until date of the Account 3 is updated every time a new hold request is created for the same account. On 1st Jan, the hold refund until date of the Account 3 is set to 15-Jan-2025 and then on 5th Jan, the hold refund until date of the Account 3 is updated to 20-Jan-2025, and finally, on 10th Jan, the hold refund until date of the Account 3 is updated to 25-Jan-2025.

In the scenario 4, the hold refund until date for the Account 1 and Account 2 is set to 30-Jan-2025. This is because the system sets the hold refund until date to the refund process end date when the entity end date is not specified in the hold request. In the scenario 5, the hold refund until date for the Account 1 and Account 2 is set to 31-Jan-2025. This is because the system sets the hold refund until date to hold request end date when both the entity end date and refund process end date are not specified in the hold request. In the scenario 6, the hold refund until date for the Account 1 and Account 2 is set to 15-Jan-2025 and 20-Jan-2025, respectively.

In all the above scenarios, the start date of the hold request, hold process, and hold entity is same. Therefore, the hold refund until date is derived for the entities either immediately or in the deferred mode (when the **C1-HLDRQ** batch is executed). However, if the start date of the refund process or hold entity is later than the hold request start date, the hold refund until date is derived for the respective entity in the deferred mode (when the **C1-HLMON** batch is executed on or after refund process or hold entity start date). For example,

Scenario		**Start Date**	**End Date**	**Hold Refund Until Date**
Scenario 1	Hold Request 1	01-Jan-2025	31-Jan-2025	-
	Refund Process	01-Jan-2025	31-Jan-2025	

Scenario		**Start Date**	**End Date**	**Hold Refund Until Date**
	Account 1	01-Jan-2025	15-Jan-2025	15-Jan-2025
	Account 2	05-Jan-2025	20-Jan-2025	20-Jan-2025
Scenario 2	Hold Request 1	01-Mar-2025	31-Mar-2025	-
	Refund Process	15-Mar-2025	31-Mar-2025	
	Bill Generation Process	01-Mar-2025	31-Mar-2025	
	Account 1	01-Mar-2025	31-Mar-2025	31-Mar-2025

In the scenario 1, the hold refund until date for the Account 1 is derived on 01-Jan-2025 (in the online mode), or on or after 01-Jan-2025 (in the deferred mode). However, the hold refund until date for the Account 2 is derived on or after 05-Jan-2025 (in the deferred mode). Similarly, in the scenario 2, the hold refund until date for the Account 1 is derived on or after 15-Mar-2025 (in the deferred mode) and not on 01-Mar-2025.

Note: The hold refund until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen.

If the number of accounts in the hold request is less than or equal to the defer processing count (specified in the respective hold request type), the system immediately sets the hold refund until date for the respective accounts. In addition, the system changes the status of the non-final refund request (if any) for the respective accounts to **Hold**. However, if the number of accounts in the hold request is greater than the defer processing count, the system sets the hold refund until date for the respective accounts in the deferred mode when the **C1-HLDRQ** batch is executed. In addition, the **C1-HLDRQ** batch changes the status of the non-final refund request (if any) for the respective accounts to **Hold**.

Refund Hold Release

On releasing a hold request for an account, the system sets the hold refund until date to the system date for the respective accounts. Let us understand how the hold refund until date is updated for an account when the hold is manually or automatically released.

Scenario		**Start Date**	**End Date**	**Manual Release**	**Automatic Release**	**Release Date**	**Hold Refund Until Date**
Scenario 1	Hold Request 1	01-Jan-2025	31-Jan-2025	Yes	No	10-Jan-2025 (System Date)	-
	Refund Process	01-Jan-2025	31-Jan-2025				
	Account 1	01-Jan-2025	15-Jan-2025				10-Jan-2025
	Account 2	01-Jan-2025	20-Jan-2025				10-Jan-2025
Scenario 2	Hold Request 1	01-Jan-2025	31-Jan-2025	No	Yes	20-Jan-2025 (Batch Business Date)	-
	Refund Process	01-Jan-2025	20-Jan-2025				
	Bill Generation Process	01-Jan-2025	25-Jan-2025				
	Account 1	01-Jan-2025	22-Jan-2025				20-Jan-2025

Scenario		Start Date	End Date	Manual Release	Automatic Release	Release Date	Hold Refund Until Date
Scenario 3	Hold Request 2	01-Jan-2025	31-Jan-2025	Yes	No	10-Jan-2025 (System Date)	-
	Refund Process	01-Jan-2025	31-Jan-2025				
	Account 3	01-Jan-2025	15-Jan-2025				25-Jan-2025
	Hold Request 3	05-Jan-2025	20-Jan-2025	Yes	No	20-Jan-2025 (System Date)	25-Jan-2025
	Refund Process	05-Jan-2025	20-Jan-2025				
	Account 3	05-Jan-2025	20-Jan-2025				25-Jan-2025
	Hold Request 4	10-Jan-2025	25-Jan-2025	Yes	No	21-Jan-2025 (System Date)	-
	Refund Process	10-Jan-2025	25-Jan-2025				
	Account 3	10-Jan-2025	25-Jan-2025				21-Jan-2025

In the scenario 1, the hold refund until date for the Account 1 and Account 2 is set to the system date when the hold request is manually released on 10-Jan-2025. In the scenario 2, the hold refund until date for the Account 1 is set to the batch business date (i.e., 20-Jan-2025) when the hold request is automatically released through the **C1-HLMON** batch.

In the scenario 3, the hold refund until date for the Account 3 is not set to the system date when the hold request 2 and 3 are manually released on 10-Jan-2025 and 20-Jan-2025, respectively. The hold refund until date for the Account 3 is set to the system date when the hold request 4 is manually released on 21-Jan-2025. This is because no more hold requests exist for the Account 3 in the system.

Note: The hold refund until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen.

If the number of accounts in the hold request is less than the defer processing count (specified in the respective hold request type), the system immediately sets the hold refund until date to the system date for the respective accounts. In addition, the system immediately changes the status of the refund request (if any) for the respective accounts from **Hold** to its previous status. However, if the number of accounts in the hold request is greater than the defer processing count, the system sets the hold refund until date to the system date for the respective accounts in the deferred mode when the **C1-HLMON** batch is executed. In addition, the **C1-HLMON** batch changes the status of the refund request (if any) for the respective accounts from **Hold** to its previous status.

Hold Mass Accounts Using Selection Criteria

Oracle Revenue Management and Billing enables you to add multiple accounts in a hold request by specifying their respective account ID. Alternatively, you can also specify the selection criteria to derive the list of accounts that you want to add in a hold request. The **Use Selection Criteria** option is available when you set the entity level to **Account** while creating a hold request. On selecting the **Use Selection Criteria** option, the **Hold Entities** section is removed from the **Hold Request** screen. Instead, a section named **Account Selection Criteria** appears in the **Hold Request** screen. This section enables you to specify the criteria for deriving accounts using the account, person, policy, or individual membership details. You can specify the criteria for deriving accounts using the policy or individual membership details only when the **Environment Type** option type of the **SYSDT** feature configuration is set to **H**.

On saving a hold request with the account selection criteria, the system does the following:

- Sets the **massHoldSw** field of the hold request to **Y**
- Creates the hold request in the **Entity Derivation Pending** status

Note: You cannot edit the account selection criteria when the hold request is in the **Entity Derivation Pending** status.

However, while saving a hold request without the account selection criteria, the system does the following:

- Sets the **massHoldSw** field of the hold request to **N**
- Creates the hold request in the **Draft** status

The **C1-HLDET** batch then checks whether there are any hold requests in the **Entity Derivation Pending** status. The system considers those hold requests whose start date is earlier than or equal to batch business date. If there is a hold request in the **Entity Derivation Pending** status, the batch derives the accounts based on the criteria defined for the hold request. The derived accounts are stored as the hold entities for the hold request in the **C1_HOLD_REQ_DTLS** table. The start date of all the hold entities is set to the system date and end date is set to null. Finally, the **massHoldSw** field of the hold request is set to **N** and the status of the hold request is changed from **Entity Derivation Pending** to **Draft**. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

Once the status of the hold request is changed to **Draft**, you can modify the required details of the hold request expect the filter criteria. You can add more accounts (if required) manually from the user interface. You can also edit or delete the accounts derived through the filter criteria from the hold request. On activating a hold request created using a selection criterion, the start date of the hold request, hold entity, or hold process is not changed when it is earlier than the system date.

How to define an account selection criteria	Defining an Account Selection Criteria for a Hold Request on page 1888

Hold Mass Persons Using Selection Criteria

Oracle Revenue Management and Billing enables you to add multiple persons in a hold request by specifying their respective person ID. Here, you can select the **Hierarchy** option corresponding to the person indicating that you want to hold the processes of the person, its immediate accounts, its child persons, and its child persons' accounts. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy.

Alternatively, you can also specify the selection criteria to derive the list of persons that you want to add in a hold request. The **Use Selection Criteria** option is available when you set the entity to **Person** while creating a hold request. On selecting the **Use Selection Criteria** option, the **Hold Entities** section is removed from the **Hold Request** screen. Instead, a section named **Person Selection Criteria** appears in the **Hold Request** screen. This section enables you to specify the criteria for deriving persons using the person details.

On saving a hold request with the person selection criteria, the system does the following:

- Sets the **massHoldSw** field of the hold request to **Y**
- Sets the **HIERARCHY_SW** field corresponding to each hold entity of the hold request to **N**
- Creates the hold request in the **Entity Derivation Pending** status

Note: You cannot edit the person selection criteria when the hold request is in the **Entity Derivation Pending** status.

However, while saving a hold request without the person selection criteria, the system does the following:

- Sets the **massHoldSw** field of the hold request to **N**

- Sets the **HIERARCHY_SW** field corresponding to each hold entity of the hold request to **Y** or **N** depending on whether the Hierarchy option is selected or not corresponding to the hold entity
- Creates the hold request in the **Draft** status

The **C1-HLDET** batch then checks whether there are any hold requests in the **Entity Derivation Pending** status. The system considers those hold requests whose start date is earlier than or equal to batch business date. If there is a hold request in the **Entity Derivation Pending** status, the batch derives the persons based on the criteria defined for the hold request. The derived persons are stored as the hold entities for the hold request in the **C1_HOLD_REQ_DTLS** table. The start date of all the hold entities is set to the system date and end date is set to null. Finally, the **massHoldSw** field of the hold request is set to**N** and the status of the hold request is changed from **Entity Derivation Pending** to **Draft**. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

Once the status of the hold request is changed to **Draft**, you can modify the required details of the hold request expect the filter criteria. You can also set the **Hierarchy** option corresponding to the hold entity in the hold request. You can add more persons (if required) manually from the user interface. You can also edit or delete the persons derived through the filter criteria from the hold request. On activating a hold request created using a selection criterion, the start date of the hold request, hold entity, or hold process is not changed when it is earlier than the system date.

Note: If you select the **Hierarchy** option corresponding to the person, the system will hold the processes of the person, its immediate accounts, its child persons, and its child persons' accounts. The system will consider only the child persons and not the grandchild persons from the person's hierarchy. However, if you do not select the **Hierarchy** option corresponding to the person, the system will hold the processes of the person and its immediate accounts.

Setting the C1-HOLDSRCH Feature Configuration

The **C1-HOLDSRCH** feature configuration enables you to set certain feature-specific options which are used while creating or viewing a hold request in the system.

Prerequisites

To set the **C1-HOLDSRCH** feature configuration, you should have:

- Foreign key references defined for different entities, such as person, account, and bill
- Required hold request types defined in the application

Procedure

To set the **C1-HOLDSRCH** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.
   A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.
   The **Feature Configuration Query** screen appears.
4. In the **Feature Configuration Search** zone, enter **C1-HOLDSRCH** in the **Feature Name** field.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all

input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of feature configurations that meet the search criteria appears in the search results.
6. In the **Search Results** section, click the link in the **Description** column corresponding to the feature configuration whose details you want to edit.

   The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Account FK Ref	Used to indicate the foreign key reference for account. The system then generates information string for the account using the specified foreign key reference and accordingly displays it in the **Hold Request** screen. **Note:** You must specify a foreign key reference which is already defined in the system. The **ACCT** foreign key reference for account is shipped with the product. You can also use a custom foreign key reference, if required.	Yes
Bill FK Ref	Used to indicate the foreign key reference for bill. The system then generates information string for the bill using the specified foreign key reference and accordingly displays it in the **Hold Request** screen. **Note:** You must specify a foreign key reference which is already defined in the system. The **C1-BILL** foreign key reference for bill is shipped with the product. You can also use a custom foreign key reference, if required.	Yes
Default Hold Request Type for IWS	Used to indicate the hold request type using which you want to create a hold request through an inbound web service. The system uses the specified hold request type when it is not received in the inbound request. **Note:** You must specify a hold request type which is already defined in the system. Here, you must specify an active hold request type where the approval process is not configured for activation and release.	Yes
Funding Exclusion Reason	Used to indicate the reason why the bill record was excluded from the funding request. The system stamps this reason corresponding to the bill record when you create a hold request for a bill via the **Funding Request** screen.	Yes
Person FK Ref	Used to indicate the foreign key reference for person. The system then generates information string for the person	Yes

Option Type	Description	Mandatory (Yes or No)
	using the specified foreign key reference and accordingly displays it in the **Hold Request** screen. **Note:** You must specify a foreign key reference which is already defined in the system. The **PERS** foreign key reference for person is shipped with the product. You can also use a custom foreign key reference, if required.	

7. Enter the values for the required option types in the **Feature Configuration** screen.
8. Click the **Save** button in the **Page Title** area.
   The changes made to the feature configuration are saved.

Setting the SYSDT Feature Configuration

The **SYSDT** feature configuration enables you to set certain environment options which will be used across features in the application.

Procedure

To set the **SYSDT** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.
   A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.
   The **Feature Configuration Query** screen appears.
4. In the **Feature Configuration Search** zone, enter **SYSDT** in the **Feature Name** field.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of feature configurations that meet the search criteria appears in the search results.
6. In the **Search Results** section, click the link in the **Description** column corresponding to the feature configuration whose details you want to edit.

   The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Environment Type	Used to indicate whether the environment will be used for the financial services or health insurance domain. The valid values are: • **B** - Used when you want to use the environment for the financial services domain.	Yes

Option Type	Description	Mandatory (Yes or No)
	• **H** - Used when you want to use the environment for the health insurance domain.	
Maximum Attachment Size	Used to specify the maximum size limit for a file that can be uploaded in the system. The size is interpreted in megabytes (MB). For example, if you want to set the maximum size limit of a file to 5 MB, then specify the value as 5 in this option type. **Note:** You must specify a value greater than zero. If you do not specify any value for this option type, the system would not enforce any limit while uploading a file in the system.	No
System Override Date	Used when you want to override the system date. The system will then use the specified date as the system date instead of retrieving the system date from the database. **Note:** You must specify the date in the YYYY-MM-DD format. This option type is valid only when an appropriate system property is set. It provides a way to override the system date for online operations of all the users in the region. See the online help (search for 'System Override Date') for more information about the system property and how to override the system date at the user level rather than at the system level.	No

7. Enter the values for the required option types in the **Feature Configuration** screen.
8. Click the **Save** button in the **Page Title** area.
   The changes made to the feature configuration are saved.

Algorithms Used in C1-HoldRequest

The following table lists the algorithms which are attached to the **C1-HoldRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-HOLD-INF	C1-HOLD-INF	Refer to C1-HOLD-INF on page 1849.
Validation	C1-HLDVALDN	C1-HLDVALDN	Refer to C1-HLDVALDN on page 1850.

The following table lists the algorithms which are used in the lifecycle of the **C1-HoldRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-HLDARCTRN	C1-HLDARCTRN	Refer to C1-HLDARCTRN on page 1850.

Status	System Event	Algorithm	Algorithm Type	Description
	Enter	C1-CKMSHLD	C1-CKMSHLD	Refer to C1-CKMSHLD on page 1851.
	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to F1-TODOCOMPL on page 1543.
Entity Derivation Pending	Monitor	C1-MASSHOLD	C1-MASSHOLD	Refer to C1-MASSHOLD on page 1851.
Submit	Enter	C1-HOLDSUBMT	C1-HOLDSUBMT	Refer to C1-HOLDSUBMT on page 1851.
Deferred Processing	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Activation Approval In Progress	Enter	C1-HOLDAPP	C1-HOLDAPP	Refer to C1-HOLDAPP on page 1852.
	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to F1-TODOCOMPL on page 1543.
Approved	Enter	C1-HOLDAPRVD	C1-HOLDAPRVD	Refer to C1-HOLDAPRVD on page 1852.
Return to Submitter	Enter	C1-HLDRESUBM	C1-HLDRESUBM	Refer to C1-HLDRESUBM on page 1853.
Rejected	-	-	-	-
Active	Enter	C1-HOLDACTV	C1-HOLDACTV	Refer to C1-HOLDACTV on page 1853.
Release Approval in Progress	Enter	C1-RELAPP	C1-RELAPP	Refer to C1-RELAPP on page 1854.
	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to F1-TODOCOMPL on page 1543.
Release Request Approved	Enter	C1-HRQ-TRANS	C1-HRQ-TRANS	Refer to C1-HRQ-TRANS on page 1854.
Return Release Request to Submitter	Enter	C1-RELRESUBM	C1-RELRESUBM	Refer to C1-RELRESUBM on page 1855.
Released	Enter	C1-RELENTITY	C1-RELENTITY	Refer to C1-RELENTITY on page 1855.
	Enter	C1-RLSHOLD	C1-RLSHOLD	Refer to C1-RLSHOLD on page 1856.
Discarded	-	-	-	-

C1-HOLD-INF

This algorithm generates the hold request information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

1. Hold Request Type Description
2. Entity Level (i.e., Person, Account, or Bill)

3. Hold Request Status Description
4. Hold Request ID

C1-HLDVALDN

This algorithm validates the following while creating or editing a hold request:

- At least one process is selected for the hold request.

  Note: Entity selection is optional.

- No duplicate entity and process are selected for the hold request.
- The same entity is not kept on hold with the same hold reason in multiple hold requests.
- The hold request end date is specified.
- The process start date is not earlier than the hold request start date.
- The entity start date is not earlier than the hold request start date.
- The process end date is not later than to the hold request end date.
- The entity end date is not later than the hold request end date.
- At least one process start date is earlier than or equal to the entity start date.
- At least one process end date is later than or equal to the entity end date.
- The **Overdue**, **Auto Pay**, and **Refund** processes are not selected when the entity level is set to **Person**.
- The **Bill Generation**, **Overdue**, **Auto Pay**, **Refund**, and **Delinquency** processes are not selected when the entity level is set to **Bill**.
- Both **Overdue** and **Delinquency** processes are not selected at a time in the hold request.

  Note: The **Overdue** process is valid for the financial services and health insurance domains but the **Delinquency** process is valid only for the health insurance domain.

- A bill with non-zero outstanding bill amount is added in the hold request.
- Each entity's start and end dates should fall within at least one process's start and end dates.
- The hold amount is less than or equal to the outstanding amount when the entity level is set to **Bill**.

In addition, this algorithm validates the following when changes are made to an active hold request:

- An existing process or entity is not deleted from the hold request.
- Any process details other than the end date is not modified in the hold request.
- The start date of the hold request, hold entity, or hold process is not modified in the hold request.
- The hold reason in the hold request is not modified.
- The end date of the hold request, hold entity, or hold process is not set to the date which is earlier than the system date.
- A new process is added with the start date later than or equal to the system date.
- A new entity is not added to an active hold request.
- A past end date of an entity or process is not changed in the hold request.

C1-HLDARCTRN

This algorithm is invoked when you create a hold request. If the hold request is created through the **Account Receivable Central** or **Delinquency Central** screen or through an inbound web service, it changes the status of the hold request to **Active**. However, if the hold request is created through the **Hold Request** screen, it changes the status of the hold request to **Draft**.

C1-CKMSHLD

This algorithm is invoked when the hold request is created in the **Draft** status. If the **massHoldSw** field is set to **Y** for the hold request, this algorithm changes the status of the hold request from **Draft** to **Entity Derivation Pending**.

Note: The system sets the **massHoldSw** field to **Y** when the **Use Selection Criteria** option is selected while creating a hold request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

  Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-MASSHOLD

This algorithm is invoked when the **C1-HLDET** batch is executed. If the **massHoldSw** field is set to **Y** for the hold request, this algorithm derives the filter criteria specified in the hold request. It then creates a dynamic SQL query to fetch the list of accounts or persons that meets the filter criteria depending on whether the entity level is set to **Account** or **Person**. The derived accounts or persons are then stored as the hold entities for the hold request in the **C1_HOLD_REQ_DTLS** table. This algorithm sets the start date of all the hold entities to the system date and end date to null. Once the hold request is updated, it then sets the **massHoldSw** field of the hold request to **N** and changes the status of the hold request from **Entity Derivation Pending** to **Draft**.

Note:

The system sets the **massHoldSw** field to **Y** when the **Use Selection Criteria** option is selected while creating a hold request.

The filters are stored in the XML format in the **BO_DATA_AREA** column of the **C1_HOLD_REQ** table. If the entity level is set to **Person**, the filter values are stored within the <personFilter> and </personFilter> tags. However, if the entity level is set to **Account**, the filter values are stored within the <acctFilter> and </acctFilter>, <policyFilter> and </policyFilter>, <personFilter> and </personFilter>, or <indMembershipFilter> and </indMembershipFilter> tags, respectively, depending on the search option used in the hold request.

Once the status of the hold request is changed to **Draft**, you can modify the required details of the hold request expect the filter criteria. You can add more accounts (if required) manually from the user interface. You can also edit or delete the accounts derived through the filter criteria from the hold request.

C1-HOLDSUBMT

This algorithm is invoked when you click the **Submit** button. It checks whether the **Activation Approval** option is selected in the respective hold request type. If the **Activation Approval** option is selected in the respective hold request type, it changes the status of the hold request to **Activation Approval In Progress**. However, if the

Activation Approval option is not selected in the respective hold request type, it checks whether the number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count. If the number of entities added in the hold request does not exceed the defer processing count, this algorithm changes the status of the hold request to **Active**. Note that the system does not allow you to activate a hold request when the hold request end date is earlier than the system date. However, if the number of entities added in the hold request exceeds the defer processing count, this algorithm changes the status of the hold request to **Deferred Processing**.

In addition, it displays a warning message while activating the hold request if the start date of hold request, hold process, or hold entity is earlier than the system date.

Note that if the **Delinquency** process is added in the hold request, this algorithm derives the entity level of the hold request. If the entity level is set to **Account**, it checks whether any individual or group membership is billed to the account. If an individual membership is billed to the account, it determines whether the number of entities in the hold request exceeds the defer processing count and accordingly changes the status of the hold request to either **Deferred Processing** or **Active**. However, if a group membership is billed to the account, this algorithm does not use the defer processing count. It directly changes the status of the hold request to **Deferred Processing**. Similarly, if the entity level is set to **Person**, it does not use the defer processing count. It directly changes the status of the hold request to **Deferred Processing**.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-HOLDAPP

This algorithm is invoked when the status of the hold request is changed to **Activation Approval In Progress**. It creates a To Do using the activation approval To Do type that is specified in the respective hold request type. Once a To Do is created, it is assigned to all the users with the activation approval To Do role that is specified in the respective hold request type. In addition, it creates a log entry for the hold request when the To Do is created for the approver.

C1-HOLDAPRVD

This algorithm is invoked when you click the **Approve** button. It checks whether the number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count. If the number of entities added in the hold request does not exceed the defer processing count, this algorithm changes the status of the hold request to **Active**. In addition, it changes the start date of the hold request, hold entities, and the hold processes to the system date. Note that the system does not allow you to activate a hold request when the hold request end date is earlier than the system date. However, if the number of entities added in the hold request exceeds the defer processing count, this algorithm changes the status of the hold request to **Deferred Processing**.

Note that if the **Delinquency** process is added in the hold request, this algorithm derives the entity level of the hold request. If the entity level is set to **Account**, it checks whether any individual or group membership is billed to the account. If an individual membership is billed to the account, it determines whether the number of entities in the hold request exceeds the defer processing count and accordingly changes the status of the hold request to either **Deferred Processing** or **Active**. However, if a group membership is billed to the account, this algorithm does not use the defer

processing count. It directly changes the status of the hold request to **Deferred Processing**. Similarly, if the entity level is set to **Person**, it does not use the defer processing count. It directly changes the status of the hold request to **Deferred Processing**.

C1-HLDRESUBM

This algorithm is invoked when you click the **Re Submit** button. It changes the status of the hold request to **Draft**. The submitter can then make the required changes and resubmit the hold activation request for approval.

In addition, it creates a To Do using the submitter To Do type that is specified in the respective hold request type. Once a To Do is created, it is assigned to all the users with the submitter To Do role that is specified in the respective hold request type. Note that the To Do is created for the submitter only when the submitter To Do type and submitter To Do role are specified in the respective hold request type. It also creates a log entry for the hold request when the To Do is created for the submitter.

Note:

While requesting a submitter to resubmit a hold activation request, the approver needs to specify the comments so that the submitter can make the required changes in the hold request.

The **Re Submit** button is not available to the approver when the hold request is created through the **Upload Request** feature or through an inbound web service.

C1-HOLDACTV

This algorithm is invoked when the status of the hold request is changed to **Active**. It validates the following on activation:

- The entity start date is not earlier than the hold request start date.
- The entity end date is not later than the hold request end date.
- The hold amount is less than or equal to the outstanding amount when the entity level is set to **Bill**.
- A bill with non-zero outstanding bill amount is added in the hold request.
- The entity end date or process end date is not earlier than the system date.

It also does the following (in the online mode):

- If the start date of the hold request, hold entity, or hold process is earlier than the system date, it sets the respective start date to the system date.
- If an active overdue process (if any) exists for the account which is kept on hold, it cancels the respective overdue process of the account. The status of the overdue process is changed to **Inactive**.

In addition, it does the following in the online or deferred (i.e., when the **C1-HLDRQ** or **C1-HLMON** batch is executed) mode depending on the defer processing count:

- If the hold request is created for the **Account** entity, the **Bill Generation** process is on hold, and the entity start date in the hold request is earlier than or equal to the system date or batch business date, it sets the bill after date to the hold entity end date or bill generation process end date whichever is earlier. In addition, it creates an entry for the hold request in the **CI_BILL_DEL_REQUEST** table.
- If the hold request is created for the **Account** entity, the **Overdue** process is on hold, and the entity start date in the hold request is earlier than or equal to the system date or batch business date, it sets the postpone credit review until date to the hold entity end date or overdue process end date whichever is earlier.
- If the hold request is created for the **Account** entity, the **Delinquency** process is on hold, and the entity start date in the hold request is earlier than or equal to the system date or batch business date, it sets the postpone credit review until date to the hold entity end date or delinquency process end date whichever is earlier.
- If the hold request is created for the **Person** entity, the **Delinquency** process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date, it sets the postpone credit review until date to the hold entity end date or delinquency process end date whichever is earlier. If the **Hierarchy** option is selected for the person, this algorithm sets the postpone credit review until date for the person, its immediate accounts, its

child persons, and for the child persons' accounts. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. However, if the **Hierarchy** option is not selected for the person, this algorithm sets the postpone credit review until date for the person and its immediate accounts (where the person is the main customer).

Note: This happens only in the deferred mode when the **C1-HLDRQ** or **C1-HLMON** batch is executed.) For more information, see Hold Delinquency on page 1815.

- If the hold request is created for the **Person** entity, the **Bill Generation** process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date, it sets the bill after date to the hold entity end date or bill generation process end date whichever is earlier. The bill after date is set either for all the accounts in the person's hierarchy or only for the persons' immediate accounts depending on whether the **Hierarchy** option is selected or not. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer.

  Note: This happens only in the deferred mode when the **C1-HLDRQ** or **C1-HLMON** batch is executed.) In addition, it creates an entry for the hold request in the **CI_BILL_DEL_REQUEST** table.
- If the hold request is created for the **Account** entity, the **Auto Pay** process is on hold, and the entity start date in the hold request is earlier than or equal to the system date or batch business date, it sets the defer auto pay date to the hold entity end date or auto pay process end date whichever is earlier.
- If the hold request is created for the **Account** entity, the **Auto Pay** process is on hold, and the entity end date in the hold request is earlier than or equal to the system date or batch business date, it updates the automatic payment details of the debit bills (if any) for the respective account in the **CI_BILL_ACH** table.
- If the hold request is created for the **Account** entity, the **Refund** process is on hold, and the entity start date in the hold request is earlier than or equal to the system date or batch business date, it sets the hold refund until date to the hold entity end date or refund process end date whichever is earlier. In addition, the status of the non-final refund request (if any) for the respective account is set to **Hold**.

Note:

If the hold entity end date is not specified, the system will consider the respective process end date while deriving the above dates. If both the hold entity end date and respective process end date are not specified, the system will consider the hold request end date while deriving the above dates.

This algorithm does not change the start date of the hold request, hold entity, or hold process when it is a future date.

This algorithm contains the following parameter:

- **Alert Type** – Used to indicate the alert type using which the alerts should be created in the dashboard whenever an account is kept on hold. You can then click on the hyperlink and navigate to the **Alerts** tab of the **Account** screen. Note that the start and end dates of the alert is set to the hold request start and end dates, respectively. The alert appears until the hold request for the account is released. This parameter is optional.

  Note: You need to specify the same alert type in both the **C1-HOLDACTV** and **C1-RELENTITY** algorithms.

C1-RELAPP

This algorithm is invoked when the status of the hold request is changed to **Release Approval in Progress**. It creates a To Do using the release approval To Do type that is specified in the respective hold request type. Once a To Do is created, it is assigned to all the users with the release approval To Do role that is specified in the respective hold request type. In addition, it creates a log entry for the hold request when the To Do is created for the approver.

C1-HRQ-TRANS

This algorithm is invoked when you click the **Approve** button. It changes the status of the hold request to **Released**.

C1-RELRESUBM

This algorithm is invoked when you click the **Re Submit** button. It changes the status of the hold request to **Active**. The submitter can then make the required changes and resubmit the hold release request for approval.

In addition, it creates a To Do using the submitter To Do type that is specified in the respective hold request type. Once a To Do is created, it is assigned to all the users with the submitter To Do role that is specified in the respective hold request type. Note that the To Do is created for the submitter only when the submitter To Do type and submitter To Do role are specified in the respective hold request type.

Note:

While requesting a submitter to resubmit a hold release request, the approver needs to specify the comments so that the submitter can make the required changes in the hold request.

The **Re Submit** button is not available to the approver when the hold request is created through the **Upload Request** feature or through an inbound web service.

C1-RELENTITY

This algorithm is invoked when you click the **Release** button. It checks whether the **Release Approval** option is selected in the respective hold request type. If the **Release Approval** option is selected in the respective hold request type, it changes the status of the hold request to **Release Approval in Progress**. However, if the **Release Approval** option is not selected in the respective hold request type, it changes the status of the hold request to **Released**. On releasing a hold request, it checks whether the number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count. If the number of entities added in the hold request does not exceed the defer processing count, this algorithm does the following (in the online mode):

- If the hold request is created for the **Account** entity, the **Bill Generation** process is on hold, and the entity end date in the hold request is earlier than or equal to the system date or batch business date, the bill after date is cleared for the respective account.
- If the hold request is created for the **Account** entity , the **Auto Pay** process is on hold, and the entity end date in the hold request is earlier than or equal to the system date or batch business date, the defer auto pay until date is set to the system date for the respective account. In addition, it updates the automatic payment details of the debit bills (if any) for the respective account in the **CI_BILL_ACH** table.
- If the hold request is created for the **Account** entity, the **Overdue** process is on hold, and the entity end date in the hold request is earlier than or equal to the system date or batch business date, the postpone credit review until date is set to the system date for the respective account.
- If the hold request is created for the **Account** entity, the **Delinquency** process is on hold, and the entity end date in the hold request is earlier than or equal to the batch business date, the postpone credit review until date is set to the system date for the respective account. (**Note**: This happens only in the deferred mode when the **C1-HLMON** batch is executed.)
- If the hold request is created for the **Account** entity, the **Refund** process is on hold, and the entity end date in the hold request is earlier than or equal to the system date or batch business date, the hold refund until date is set to the system date for the respective account. In addition, the status of the refund request (if any) for the respective accounts is changed from **Hold** to its previous status.
- If the hold request is created for the **Person** entity, the **Bill Generation** process is on hold, and the entity end date in the hold request is earlier than or equal to the batch business date, the bill after date is cleared either for all the accounts in the person's hierarchy or only for the persons' immediate accounts depending on whether the **Hierarchy** option is selected or not. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. (**Note**: This happens only in the deferred mode when the **C1-HLMON** batch is executed.)
- If the hold request is created for the **Person** entity, the **Delinquency** process is on hold, and the entity end date in the hold request is earlier than or equal to the batch business date, the postpone credit review until date is set to the system date either for all the accounts in the person's hierarchy or only for the persons' immediate accounts depending on whether the **Hierarchy** option is selected or not. Note that the system considers only the child

persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. (**Note**: This happens only in the deferred mode when the **C1-HLMON** batch is executed.)

Note:

The above dates are updated to the system date only when the entity end date or respective process end date is not earlier than the system date.

This algorithm is also invoked when the approver approves the hold release request.

However, if the number of entities added in the hold request exceeds the defer processing count, a log entry is created indicating that the hold request is manually released but the above-mentioned release process would be completed when the **C1-HLMON** batch is executed.

This algorithm also updates the alert end date on the respective account to the system date irrespective of whether the number of entities added in the hold request exceeds the defer processing count or not.

This algorithm contains the following parameter:

- **Alert Type** – Used to indicate the alert type. The system then considers the alerts of the respective alert type on the account and updates its end date when the hold request is released. This parameter is optional.

  Note: You need to specify the same alert type in both the **C1-HOLDACTV** and **C1-RELENTITY** algorithms.

C1-RLSHOLD

This algorithm is invoked when you click the **Release** button. If the hold entity end date and hold process end date is later than the system date, this algorithm sets the hold entity end date and hold process end date to the system date. In addition, it sets the hold request end date to the system date. Finally, it changes the status of the hold request to **Released**.

Hold Request Type

Oracle Revenue Management and Billing allows you to define a hold request type using which you can create a hold request. It is the hold request type which helps the system to determine the following:

- Business object using which the hold request should be created in the system
- Whether you can partially hold a bill through a hold request
- Whether a hold request must be activated or released in the deferred mode (i.e. in the background) or in the online mode (i.e. real time).
- Whether approval is required while activating or releasing a hold request
- Processes that you can keep on hold for an entity through a hold request

The **Hold Request Type** screen allows you to define, edit, delete, and copy a hold request type. It contains the following zones:

- Hold Request Type List on page 1856
- Hold Request Type on page 1857

Hold Request Type List

The **Hold Request Type List** zone lists the hold request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Hold Request Type	Displays the hold request type.
Description	Displays the description of the hold request type.
Edit	On clicking the **Edit** (✎) icon, the **Hold Request Type** screen appears where you can edit the details of the hold request type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Hold Request Type** screen appears where you can define a new hold request type using an existing hold request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the hold request type. **Note:** You can delete a hold request type only when a hold request is not yet created using the hold request type.

Note: Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a hold request type, the **Hold Request Type** zone appears with the details of the respective hold request type.

Hold Request Type

The **Hold Request Type** zone displays the details of the hold request type. It contains the following sections:

- **Main** - Displays the basic information about the hold request type. It contains the following fields:

Field Name	Field Description
Hold Request Type	Displays the hold request type.
Description	Displays the description of the hold request type.
Hold Request Business Object	Indicates the business object using which a hold request should be created. In addition, a context menu (⌄) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the hold request type.
Status	Indicates the status of the hold request type. The valid values are: • Active • Inactive
Allow Partial Hold for Bill	Indicates whether partial hold is allowed for a bill.

Field Name	Field Description
	Note: This field is applicable when you create a hold request (using the hold request type) where the entity level is set to **Bill**.
Defer Processing Count	Displays the count which helps to determine the following: • Whether a hold request must be activated or released in the deferred mode (i.e. in the background) or in the online mode (i.e. real time). • Whether the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date must be calculated in the deferred or online mode. • Whether the automatic payment details must be updated in the **CI_BILL_ACH** table in the deferred or online mode.
Activation Approval	Indicates whether approval is required while activating a hold request (created using the hold request type) for an entity.
Activation Approval To Do Type	Indicates that the To Do entry of the specified To Do type must be created when a hold activation request is submitted for approval. **Note:** This field appears when the **Activation Approval** option is selected. It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do Type.
Activation Approval To Do Role	Indicates that users with the specified To Do role can only approve a hold activation request which is submitted for approval. **Note:** This field appears when the **Activation Approval** option is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Release Approval	Indicates whether approval is required while releasing a hold request (created using the hold request type) of an entity.
Release Approval To Do Type	Indicates that the To Do entry of the specified To Do type must be created when a hold release request is submitted for approval. **Note:** This field appears when the **Release Approval** option is selected. It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do Type.
Release Approval To Do Role	Indicates that users with the specified To Do role can only approve a hold release request which is submitted for approval. **Note:** This field appears when the **Release Approval** option is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Submitter To Do Type	Indicates that the To Do entry of the specified To Do type must be created when the approver requests the submitter to resubmit a hold activation or release request for approval.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates that users with the specified To Do role can only receive the To Do that is created when the approver requests the submitter to resubmit a hold activation or release request for approval. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.

- **Hold Processes** - Lists the processes that you can keep on hold for an entity while creating a hold request. The valid values are:
  - Auto Pay
  - Bill Generation
  - Delinquency
  - Funding
  - Overdue
  - Refund
- **Record Actions** - Enables you to perform various actions on the hold request type. It contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the hold request type.
Delete	Used to delete the hold request type. **Note:** You can delete a hold request type when a hold request is not yet created using the hold request type.
Duplicate	Used to create a new hold request type using an existing hold request type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the hold request type is created. In addition, a context menu ( ) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics of the hold request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

By default, the **Hold Request Type** zone does not appear in the **Hold Request Type** screen. It appears when you click the **Broadcast** ( ) icon corresponding to the hold request type in the **Hold Request Type List** zone.

Defining a Hold Request Type

Prerequisites

To define a hold request type, you should have:

- Hold request type business objects defined in the application
- Hold request business objects defined in the application
- Required To Do role assigned to the **C1-HLDAP** and **C1-HOLSB** To Do types in the application

Procedure

To define a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Hold Request Type** sub-menu.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type Business Object	Used to indicate the business object using which you want to create the hold request type. The valid value is: • **Hold Request Type (i.e., C1-HoldRequestType)** - Enables you to maintain a hold request type. **Note:** The above business object is shipped with the product. The list includes those business objects which are created using the **Hold Request Type** (i.e., **C1-HOLDRQTY**) maintenance object.	Yes

   Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Hold Request Type** screen.

   Note: The **Select Business Object** screen appears when there are multiple hold request type business objects defined in the application. If there is only one hold request type business object defined in the application, the **Hold Request Type** screen appears.
4. Select the required hold request type business object from the respective field.
5. Click **OK**.

The **Hold Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details for the hold request type.
- **Hold Processes** - Used to lists the processes that you can keep on hold for an entity while creating a hold request.
- **Characteristics** - Used to define the characteristics for the hold request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Used to specify the hold request type.	Yes
Business Object	Indicates the business object using which you are defining the hold request type.	Not applicable
Description	Used to specify the description for the hold request type.	Yes
Hold Request Business Object	Used to indicate the business object using which you want to create the respective hold request. The valid values are: • **Hold Request - Display (i.e., C1-HoldReqDisplay)**- Enables you to display the details of a hold request. • **Hold Request - Maintenance (i.e., C1-HoldRequest)** - Enables you to maintain a hold request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Hold Request** (i.e., **C1-HOLDREQ**) maintenance object.	Yes
Detailed Description	Used to specify additional information about the hold request type. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇗) icon at the bottom right corner of the text box.	No
Status	Used to indicate the status of the hold request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a hold request type to **Inactive** when the corresponding hold request is in a status other than **Discarded**, **Rejected**, or **Released**.	Yes
Allow Partial Hold for Bill	Used to indicate whether partial hold is allowed for a bill.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field is applicable when you create a hold request (using the hold request type) where the entity level is set to **Bill**.	
Defer Processing Count	Used to specify the count which helps to determine the following: • Whether a hold request must be activated or released in the deferred mode (i.e. in the background) or in the online mode (i.e. real time). • Whether the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date must be calculated in the deferred or online mode. • Whether the automatic payment details must be updated in the**CI_BILL_ACH** table in the deferred or online mode. **Note:** You must specify a positive integer value in this field. By default, the value is set to 0. If you do not change the value, the system will consider the defer processing count as 50. The **Deferred** mode means in the background when the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is executed. You can configure the **Hold Request Periodic Monitor (C1-HLDRQ)** batch such that it is executed at regular intervals. For more information about this batch, refer to *Oracle Revenue Management and Billing Batch Guide*.	No
Activation Approval	Used to indicate whether approval is required while activating a hold request (created using the hold request type) for an entity.	No
Activation Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a hold activation request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Activation Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Activation Approval To Do Type** field. This field appears when the **Activation Approval** option is selected.	Yes (Conditional) **Note:** This field is required when the **Activation Approval** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
	The**C1-HLDAP** To Do type is shipped with the product. You can use the **C1-HLDAP** To Do type or a custom To Do type, if required.	
Activation Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a hold activation request which is submitted for approval. **Note:** The list includes only those To Do roles which are associated with the activation approval To Do type. This field appears when the **Activation Approval** option is selected.	Yes (Conditional) **Note:** This field is required when the **Activation Approval** option is selected.
Release Approval	Used to indicate whether approval is required while releasing a hold request (created using the hold request type) of an entity.	No
Release Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a hold release request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Release Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Release Approval To Do Type** field. This field appears when the **Release Approval** option is selected. The**C1-HLDAP** To Do type is shipped with the product. You can use the **C1-HLDAP** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required when the **Release Approval** option is selected.
Release Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a hold release request which is submitted for approval. **Note:** This field appears when the **Release Approval** option is selected. The list includes only those To Do roles which are associated with the release approval To Do type.	Yes (Conditional) **Note:** This field is required when the **Release Approval** option is selected.
Submitter To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when the approver requests the submitter to resubmit a hold activation or release request for approval.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field. The**C1-HOLSB** To Do type is shipped with the product. You can use the **C1-HOLSB** To Do type or a custom To Do type, if required.	
Submitter To Do Role	Used to indicate that users with the specified To Do role can only receive the To Do that is created when the approver requests the submitter to resubmit a hold activation or release request for approval. **Note:** The list includes only those To Do roles which are associated with the submitter To Do type.	Yes (Conditional) **Note:** This field is required when the submitter To Do type is specified in the respective field.

6. Enter the required details in the **Main** section.
7. Add the processes that you can keep on hold for an entity while creating the corresponding hold request.
8. Define characteristics for the hold request type, if required.
9. Click **Save**.
   The hold request type is defined.

Adding a Hold Process in a Hold Request Type

Prerequisites

To add a hold process in a hold request type, you should have:

- Values defined in the **HOLD_PROCESS_FLG** lookup field

Procedure

To add a hold process in a hold request type:

1. Ensure that the **Hold Processes** section is expanded when you are defining, editing, or copying a hold request type.

   The **Hold Processes** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Hold Process	Used to indicate the process that you want keep on hold for an entity through a hold request. The valid values are: • **Auto Pay** - Used when you want to hold the automatic payment process of an entity through a hold request. • **Bill Generation** - Used when you want to hold the bill generation process of an entity through a hold request. • **Delinquency** - Used when you want to hold the delinquency process of an entity through a hold request. • **Funding** - Used when you want to hold the funding process of an entity through a hold request. • **Overdue** - Used when you want to hold the overdue process of an entity through a hold request. • **Refund** - Used when you want to hold the refund process of an entity through a hold request. **Note:** When you create a hold request using a hold request type, the system will derive only those hold processes that are added in the hold request type in the respective list of the **Hold Request** screen. The list includes only those processes which are added in the **HOLD_PROCESS_FLG** lookup field. You must select at least one hold process while defining a hold request type.	Yes

2. Enter the required details in the **Hold Processes** section.
3. If you want to add more than one hold process for the hold request type, click the **Add** (+) icon and then repeat *s*tep 2.

Note: However, if you want to remove a hold process from the hold request type, click the **Delete** () icon corresponding to the hold process. Note that you cannot remove a process from the hold request type when one or more hold requests with the hold process is in a status other than **Discarded**, **Rejected**, or **Released**.

Defining a Characteristic for a Hold Request Type

Prerequisites

To define a characteristic for a hold request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Hold Request Type**)

Procedure

To define a characteristic for a hold request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a hold *r*equest type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Hold Request Type**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the hold request type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the hold request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the hold request type, click the **Add** (+) icon and then *r*epeat step *2*.

   Note: However, if you want to remove a characteristic from the hold request type, click the **Delete** (🗑) icon corresponding to the characteristic.

Editing a Hold Request Type

Prerequisites

To edit a hold request type, you should have:

- Hold request business objects defined in the application
- Required To Do role assigned to the **C1-HLDAP** and **C1-HOLSB** To Do types in the application

Procedure

To edit a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.
   The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the hold *r*equest type whose details you want to edit.

   The **Hold Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the hold request type.
   - **Hold Processes** - Used to lists the processes that you can keep on hold for an entity while creating a hold request.
   - **Characteristics** - Used to define the characteristics for the hold request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Displays the hold request type.	Not applicable
Business Object	Indicates the business object which is used while defining the hold request type.	Not applicable
Description	Used to specify the description for the hold request type.	Yes
Hold Request Business Object	Used to indicate the business object using which you want to create the respective hold request. The valid values are: • **Hold Request - Display (i.e., C1-HoldReqDisplay)**- Enables you to display the details of a hold request. • **Hold Request - Maintenance (i.e., C1-HoldRequest)** - Enables you to maintain a hold request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Hold Request** (i.e., **C1-HOLDREQ**) maintenance object.	Yes
Detailed Description	Used to specify additional information about the hold request type.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can resize the text box depending on your requirement by clicking the **Resize Handle** (⊿) icon at the bottom right corner of the text box.	
Status	Used to indicate the status of the hold request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a hold request type to **Inactive** when the corresponding hold request is in a status other than **Discarded**, **Rejected**, or **Released**.	Yes
Allow Partial Hold for Bill	Used to indicate whether partial hold is allowed for a bill. **Note:** This field is applicable when you create a hold request (using the hold request type) where the entity level is set to **Bill**.	Yes
Defer Processing Count	Used to specify the count which helps to determine the following: • Whether a hold request must be activated or released in the deferred mode (i.e. in the background) or in the online mode (i.e. real time). • Whether the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date must be calculated in the deferred or online mode. • Whether the automatic payment details must be updated in the**CI_BILL_ACH** table in the deferred or online mode. **Note:** You must specify a positive integer value in this field. By default, the value is set to 0. If you do not change the value, the system will consider the defer processing count as 50. The **Deferred** mode means in the background when the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is executed. You can configure the **Hold Request Periodic Monitor (C1-HLDRQ)** batch such that it is executed at regular intervals. For more information about this batch, refer to *Oracle Revenue Management and Billing Batch Guide*.	No

Field Name	Field Description	Mandatory (Yes or No)
Activation Approval	Used to indicate whether approval is required while activating a hold request (created using the hold request type) for an entity.	No
Activation Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a hold activation request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Activation Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Activation Approval To Do Type** field. This field appears when the **Activation Approval** option is selected. The**C1-HLDAP** To Do type is shipped with the product. You can use the **C1-HLDAP** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required when the **Activation Approval** option is selected.
Activation Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a hold activation request which is submitted for approval. **Note:** The list includes only those To Do roles which are associated with the activation approval To Do type. This field appears when the **Activation Approval** option is selected.	Yes (Conditional) **Note:** This field is required when the **Activation Approval** option is selected.
Release Approval	Used to indicate whether approval is required while releasing a hold request (created using the hold request type) of an entity.	No
Release Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a hold release request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Release Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Release Approval To Do Type** field. This field appears when the **Release Approval** option is selected.	Yes (Conditional) **Note:** This field is required when the **Release Approval** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
	The**C1-HLDAP** To Do type is shipped with the product. You can use the **C1-HLDAP** To Do type or a custom To Do type, if required.	
Release Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a hold release request which is submitted for approval. **Note:** This field appears when the **Release Approval** option is selected. The list includes only those To Do roles which are associated with the release approval To Do type.	Yes (Conditional) **Note:** This field is required when the **Release Approval** option is selected.
Submitter To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when the approver requests the submitter to resubmit a hold activation or release request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field. The**C1-HOLSB** To Do type is shipped with the product. You can use the **C1-HOLSB** To Do type or a custom To Do type, if required.	No
Submitter To Do Role	Used to indicate that users with the specified To Do role can only receive the To Do that is created when the approver requests the submitter to resubmit a hold activation or release request for approval. **Note:** The list includes only those To Do roles which are associated with the submitter To Do type.	Yes (Conditional) **Note:** This field is required when the submitter To Do type is specified in the respective field.

Tip: Alternatively, you can click the **Edit** button in the **Hold Request Type** zone to edit the details of the hold request type.

5. Modify the required details in the **Main** section.
6. Add or remove the hold processes from the hold request type, if required.

   Note: You cannot remove a process from the hold request type when one or more hold requests with the hold process is in a status other than **Discarded**, **Rejected**, or **Released**.
7. Define, edit, or remove characteristics of the hold request type, if required.
8. Click **Save**.
   The changes made to the hold request type are saved.

Copying a Hold Request Type

Instead of creating a hold request type from scratch, you can create a new hold request type using an existing hold request type. This is possible through copying a hold request type. On copying a hold request type, the details including the hold processes and characteristics are copied to the new hold request type. You can then edit the details, if required.

Prerequisites

To copy a hold request type, you should have:

- Hold request type (whose copy you want to create) defined in the application
- Hold request business objects defined in the application
- Required To Do role assigned to the **C1-HLDAP** and **C1-HOLSB** To Do types in the application

Procedure

To copy a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.
   The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column *c*orresponding to the hold request type whose copy you want to create.

   The **Hold Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the hold request type.
   - **Hold Processes** - Used to lists the processes that you can keep on hold for an entity while creating a hold request.
   - **Characteristics** - Used to define the characteristics for the hold request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Used to specify the hold request type.	Yes
Business Object	Indicates the business object using which you are defining the hold request type.	Not applicable
Description	Used to specify the description for the hold request type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Business Object	Used to indicate the business object using which you want to create the respective hold request. The valid values are: • **Hold Request - Display (i.e., C1-HoldReqDisplay)**- Enables you to display the details of a hold request. • **Hold Request - Maintenance (i.e., C1-HoldRequest)** - Enables you to maintain a hold request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Hold Request** (i.e., **C1-HOLDREQ**) maintenance object.	Yes
Detailed Description	Used to specify additional information about the hold request type. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇗) icon at the bottom right corner of the text box.	No
Status	Used to indicate the status of the hold request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a hold request type to **Inactive** when the corresponding hold request is in a status other than **Discarded**, **Rejected**, or **Released**.	Yes
Allow Partial Hold for Bill	Used to indicate whether partial hold is allowed for a bill. **Note:** This field is applicable when you create a hold request (using the hold request type) where the entity level is set to **Bill**.	Yes
Defer Processing Count	Used to specify the count which helps to determine the following: • Whether a hold request must be activated or released in the deferred mode (i.e. in the background) or in the online mode (i.e. real time). • Whether the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date must be calculated in the deferred or online mode. • Whether the automatic payment details must be updated in the**CI_BILL_ACH** table in the deferred or online mode.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You must specify a positive integer value in this field. By default, the value is set to 0. If you do not change the value, the system will consider the defer processing count as 50. The **Deferred** mode means in the background when the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is executed. You can configure the **Hold Request Periodic Monitor (C1-HLDRQ)** batch such that it is executed at regular intervals. For more information about this batch, refer to *Oracle Revenue Management and Billing Batch Guide*.	
Activation Approval	Used to indicate whether approval is required while activating a hold request (created using the hold request type) for an entity.	No
Activation Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a hold activation request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Activation Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Activation Approval To Do Type** field. This field appears when the **Activation Approval** option is selected. The**C1-HLDAP** To Do type is shipped with the product. You can use the **C1-HLDAP** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required when the **Activation Approval** option is selected.
Activation Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a hold activation request which is submitted for approval. **Note:** The list includes only those To Do roles which are associated with the activation approval To Do type. This field appears when the **Activation Approval** option is selected.	Yes (Conditional) **Note:** This field is required when the **Activation Approval** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
Release Approval	Used to indicate whether approval is required while releasing a hold request (created using the hold request type) of an entity.	No
Release Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a hold release request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Release Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Release Approval To Do Type** field. This field appears when the **Release Approval** option is selected. The**C1-HLDAP** To Do type is shipped with the product. You can use the **C1-HLDAP** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required when the **Release Approval** option is selected.
Release Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a hold release request which is submitted for approval. **Note:** This field appears when the **Release Approval** option is selected. The list includes only those To Do roles which are associated with the release approval To Do type.	Yes (Conditional) **Note:** This field is required when the **Release Approval** option is selected.
Submitter To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when the approver requests the submitter to resubmit a hold activation or release request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field. The**C1-HOLSB** To Do type is shipped with the product. You can use the **C1-HOLSB** To Do type or a custom To Do type, if required.	No
Submitter To Do Role	Used to indicate that users with the specified To Do role can only receive the To Do that is created when	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	the approver requests the submitter to resubmit a hold activation or release request for approval. **Note:** The list includes only those To Do roles which are associated with the submitter To Do type.	**Note:** This field is required when the submitter To Do type is specified in the respective field.

Tip: Alternatively, you can click the **Duplicate** button in the **Hold Request Type** zone to create a copy of the hold request type.

5. Enter the required details in the **Main** section.
6. Add or remove the hold processes from the hold request type, if required.
7. Define, edit, or remove characteristics of the hold request type, if required.
8. Click **Save**.
   The new hold request type is defined.

Deleting a Hold Request Type

Procedure

To delete a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.
   The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the *h*old request type that you want to delete.

   A message appears confirming whether you want to delete the hold request type.

   Note: You can delete a hold request type only when a hold request is not yet created using the hold request type.

   Tip: Alternatively, you can click the **Delete** button in the **Hold Request Type** zone to delete the hold request type.
5. Click **OK**.
   The hold request type is deleted.

Viewing the Hold Request Type Details

Procedure

To view the details of a hold request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.
   The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Broadcast** (ᯤ) icon corresponding to the hold request type *w*hose details you want to view.
   The **Hold Request Type** zone appears.
5. View the details of the hold request type in the **Hold Request Type** zone.

Hold Request (Used for Searching)

The **Hold Request** screen allows you to search for a hold request using various search criteria. It also allows you to create a hold request. It contains the following zone:

- Search Hold Request on page 1876

Through this screen, you can navigate to the following screen:

- Hold Request (Used for Viewing) on page 1903

Search Hold Request

The **Search Hold Request** zone allows you to search for a hold request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a hold request using the hold request or bill details. The valid values are: • Request Details • Bill Details **Note:** By default, the **Request Details** option is selected.	Yes
Hold Request Type	Used to search for hold requests which are created using a particular hold request type. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The list includes only those hold request types which are already defined in the system.	No
Entity	Used to search for hold requests which are created at a particular entity level. The valid values are: • Account • Bill • Person **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **HOLD_ENTITY_LVL_FLG** lookup field.	No
Hold Process	Used to search for hold requests which are created to hold a particular process of an entity. The valid values are: • Auto Pay • Bill Generation • Delinquency • Funding • Overdue • Refund **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The list includes only those values which are added in the **HOLD_PROCESS_FLG** lookup field.	No
User ID	Used to search for hold requests which are created by a particular user. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list.	No

Field Name	Field Description	Mandatory (Yes or No)
Hold Reason	Used to search for hold requests which are created due a particular reason. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **HOLD_REASON_FLG** lookup field.	No
Start Date	Used to search for hold requests which are created from a particular date onwards. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Status	Used to search for hold requests with a particular status. The valid values are: • Active • Activation Approval In Progress • Deferred Processing • Discarded • Draft • Entity Derivation Pending • Rejected • Released • Release Approval in Progress • Release Request Approved • Return Release Request to Submitter **Note:** This field appears when the **Request Details** option is selected from the **Search By** list.	No
End Date	Used to search for hold requests which are created till a particular date. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Account ID	Used to search for hold requests which are created for a particular account. **Note:**	No

Field Name	Field Description	Mandatory (Yes or No)
	This field appears when the **Request Details** option is selected from the **Search By** list. The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears.	
Person ID	Used to search for hold requests which are created for a particular person. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The **Search** (🔍) icon appears corresponding to the **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears.	No
Hold Request ID	Used to search for a particular hold request. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list.	No
Bill ID	Used to search for hold requests which are created for a particular bill. **Note:** This field appears when the **Bill Details** option is selected from the **Search By** list. The **Search** (🔍) icon appears corresponding to the **Bill ID** field. On clicking the **Search** icon, the **Bill Search** window appears.	No
Bill Date From	Used to search for hold requests created for bills that are completed on or after the specified date. **Note:** This field appears when the **Bill Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when the search criteria is specified in the **To** field.
To	Used to search for hold requests created for bills that are completed on or before the specified date. **Note:** This field appears when the **Bill Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when the search criteria is specified in the **Bill Date From** field.

Note: You must specify at least one search criterion while searching for a hold request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the hold request is created.
Hold Request Information	Displays information about the hold request. **Note:** It has a link. On clicking the link, the **Hold Request** screen appears where you can view the details of the respective hold request.
Status	Indicates the status of the hold request. The valid values are: • Active • Activation Approval In Progress • Deferred Processing • Discarded • Draft • Entity Derivation Pending • Rejected • Released • Release Approval in Progress • Release Request Approved • Return Release Request to Submitter
Start Date	Displays the date from when the hold request is effective.
End Date	Displays the date till when the hold request is effective.
Hold Processes	Indicates the processes which are kept on hold for the entity through the hold request. If multiple processes are selected in a hold request, the system concatenates and displays the hold processes separated by the **Comma** (,) symbol.
Hold Reason	Indicates the reason why the hold request is created for the entity.
Created By	Indicates the user who has created the hold request.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Hold Request

Prerequisites

To search for a hold request, you should have:

- Hold request types defined in the application
- Values defined in the **HOLD_REASON_FLG** lookup field

Procedure

To search for a hold request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Hold Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Hold Request** sub-menu.
   The **Hold Request** screen appears.
4. Enter the search criteria in the **Search Hold Request** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of hold requests that meet the search criteria appears in the **Search Results** section.

Creating a Hold Request

Prerequisites

To create a hold request, you should have:

- Hold request types defined in the application.
- Values defined in the **HOLD_REASON_FLG** lookup field

Procedure

To create a hold request:

1. Do either of the following:

If you want to...	Then...
Hold a bill through a hold request from the Account Receivable Central screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Account Receivable Central**. The **Account Receivable Central** screen appears. **c.** Search for a bill that you want to keep on hold in the **Search Bill** zone. A list of bills that meet the search criteria appears in the search results.

If you want to...	Then...
	d. In the **Search Results** section, select the check box corresponding to the required bill that you want keep on hold and then click **Hold**. **Note:** You can select only one bill at a time while creating a hold request from the **Account Receivable Central** screen. You can only select a bill with non-zero outstanding balance.
Hold a bill through a hold request from the Funding Request screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Funding Request**. The **Funding Request** screen appears. **c.** Search for the required draft funding request in the **Search Funding Request** zone. A list of funding request that meet the search criteria appears in the search results. **d.** In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit. The **Funding Request** screen appears. **e.** Click the **Bills** tab. **f.** Select the check box corresponding to the bills that you want to keep on hold in the **Selected Bills** zone. **g.** Click the **Hold** button. **Note:** Before clicking the **Hold** button, you must ensure that the **Funding Exclusion Reason** option type is set in the **C1-HOLDSRCH** feature configuration. You can select multiple bills at the same time while creating a hold request from the **Funding Request** screen. You can only select a bill with non-zero outstanding balance.
Hold an account through a hold request from the Delinquency Central screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Delinquency Management** and then click **Delinquency Central**. The **Delinquency Central** screen appears. **c.** Search for the overdue process of an account in the **Search Overdue Process** zone. A list of overdue processes that meet the search criteria appears in the search results. **d.** In the **Search Results** section, select the check box corresponding to the required overdue process of an account whose processes you want to keep on hold and then click **Create Hold Request**.

If you want to...	Then...
	Note: You can select only one overdue process at a time while creating a hold request for an account from the **Account Receivable Central** screen.
Create a hold request for a person, account, or bill from the Hold Request screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Hold Request**. A sub-menu appears. **c.** Click the **Add** option from the **Hold Request** sub-menu.

The **Add Hold Request** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Used to indicate the hold request type using which you want to create the hold request. **Note:** The list includes only those hold request types which are already defined in the system.	Yes

Tip: Alternatively, you can access the **Add Hold Request** screen by clicking the **Add** button in the **Page Title** area of the **Hold Request** screen.

2. Select the required hold request type from the respective field.
3. Click **OK**.

The **Hold Request** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details for the hold request.
- **Hold Entities** - Used to indicate the entity (such as, person, account, or bill depending on the specified entity level) that you want to keep on hold. This section appears only when the **Use Selection Criteria** option is not selected while creating a hold request for an account or a person.
- **Account Selection Criteria** - Used to specify a selection criteria to derive the list of accounts that you want to add in the hold request. This section appears only when the following conditions are met:
  - The **Account** option is selected from the **Entity** list.
  - The **Use Selection Criteria** option is selected.
- **Person Selection Criteria** - Used to specify a selection criteria to derive the list of persons that you want to add in the hold request. This section appears only when the following conditions are met:
  - The **Person** option is selected from the **Entity** list.
  - The **Use Selection Criteria** option is selected.
- **Hold Processes** - Used to indicate one or more processes of the entity that you want to keep on hold for a particular period.
- **Characteristics** - Used to define the characteristics for the hold request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Indicates the hold request type using which you want to create the hold request.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the hold request is effective. **Note:** The hold request start date cannot be later than the hold request end date. By default, this field is set to the system date. You can specify a future date, if required. However, when you specify a past date, the system will automatically reset it to the system date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
End Date	Used to specify the date till when the hold request is effective. **Note:** The hold request end date cannot be earlier than the hold request start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
Hold Reason	Used to indicate the reason why you want to hold the entity. **Note:** The list includes only those values which are defined in the **HOLD_REASON_FLG** lookup field.	Yes
Entity	Used to indicate the type of entity for which you want to create the hold request. The valid values are: • Account • Bill • Person **Note:** The list includes only those values which are defined in the **HOLD_ENTITY_LVL_FLG** lookup field. If you are creating a hold request for a bill via the **Account Receivable Central** or **Funding Request** screen, the system, by default, sets the entity to **Bill** and the field is non-editable. If you are creating a hold request for an account via the **Delinquency Central**	Yes

Field Name	Field Description	Mandatory (Yes or No)
	screen, the system, by default, sets the entity to **Account** and the field is non-editable.	
Use Selection Criteria	Used to indicate whether you want to specify a selection criteria to derive the list of accounts or persons that you want to add in the hold request. **Note:** This field appears when the **Account** or **Person** option is selected from the **Entity** list.	No
Comments	Used to specify additional information about the hold request. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	No

4. Enter the required details in the **Main** section.
5. Add the entities (such as, persons, accounts, or bills) that you want to keep on hold through the hold request.
6. Define the account or person selection criteria to derive the list of accounts or persons, respectively, that you want to add in the hold request.

   Note: This step is required only when the **Use Selection Criteria** option is selected while creating a hold request for an account or a person.
7. Add the processes of the entity that you want to keep on hold through the hold request.
8. Define characteristics for the hold request, if required.
9. Click **Save**.
   The hold request is created. The creation mode of the hold request is set to **Manual**.

   Note:

   If you create a hold request for a bill via the **Account Receivable Central** screen, the system sets the status of the hold request to either **Activation Approval In Progress** or **Active** depending on whether the approval process is configured in the respective hold request type. In addition, the **FROM_ARC_SW** field in the **C1_HOLD_REQ_DTLS** table is set to **Y**.

   If you create a hold request for an account via the **Delinquency Central** screen, the system sets the status of the hold request to either **Activation Approval In Progress** or **Active** depending on whether the approval process is configured in the respective hold request type. In addition, the **FROM_ARC_SW** field in the **C1_HOLD_REQ_DTLS** table is set to **Y**.

   If you create a hold request for a bill via the **Funding Request** screen, the system sets the status of the hold request to either **Activation Approval In Progress** or **Active** depending on whether the approval process is configured in the respective hold request type. In addition, the **FROM_ARC_SW** field in the **C1_HOLD_REQ_DTLS** table is set to **Y**. The status of the respective bill record in the funding request is set to **Excluded**. Also, the status reason is stamped corresponding to the excluded records. The system derives the status reason for the excluded records from the **Funding Exclusion Reason** option type of the **C1-HOLDSRCH** feature configuration.

   If you create a hold request for an account, person, or bill directly from the **Hold Request** screen, the system sets the status of the hold request to **Draft**. Note that if you create a hold request for an account or a person using the account selection criteria or person selection criteria, respectively, the system sets the status of the hold request to **Entity Derivation Pending**. In addition, a log entry is created indicating that the account or person derivation will happen after the Hold Request Entity Derivation Monitor batch

is executed. For more information, see Hold Mass Accounts Using Selection Criteria on page 1828 and Hold Mass Persons Using Selection Criteria on page 1829.

Adding an Entity in a Hold Request

Procedure

To add an entity in a hold request:

1. Ensure that the **Hold Entities** section is expanded when you are creating or editing a hold request.

   The **Hold Entities** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Entity ID	Used to indicate the entity (such as, person, account, or bill depending on the specified entity level) that you want to keep on hold. **Note:** The **Search** (🔍) icon appears corresponding to the **Hold Entity ID** field. Depending on the entity level selected, the system behaves in the following manner on clicking the **Search** icon: • If the entity level is set to **Account**, the **Account Search** window appears. • If the entity level is set to **Person**, the **Person Search** window appears. • If the entity level is set to **Bill**, the **Bill Search** window appears. If you are creating a hold request for a bill via the **Account Receivable Central** or **Funding Request** screen, the system, by default, displays the selected bill ID and the field is non-editable. You cannot remove this selected bill from the hold request throughout its lifestyle.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	If you are creating a hold request for an account via the **Delinquency Central** screen, the system, by default, displays the account ID (of the selected overdue process) and the field is non-editable. You cannot remove this account from the hold request throughout its lifestyle. If the entity level is set to **Bill**, you must specify a bill with non-zero outstanding bill amount and which is in the **Complete** status.	
Start Date	Used to specify the date from when you want to hold the entity. **Note:** The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates. The hold entity start date cannot be later than the hold entity end date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
End Date	Used to specify the date till when you want to hold the entity. **Note:** The hold entity end date must be between hold request start and end dates and between at least one process's start and end dates. The hold entity end date cannot be earlier than the hold entity start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Hold Amount	Used to specify the outstanding bill amount that you want to keep on hold. **Note:** This field appears when the **Bill** option is selected from the **Entity** list. This field is editable only when the **Allow Partial Hold for Bill** option is selected in the respective hold request type. By default, the system displays the amount which is outstanding on the bill. If the field is editable, you can change the hold amount, if required. However, ensure that you specify a non-zero value in this field	Yes

Field Name	Field Description	Mandatory (Yes or No)
	and the specified amount should not exceed the outstanding bill amount.	
Hierarchy	Used to indicate whether all the accounts in the person's hierarchy or only the persons' immediate accounts should be kept on hold. Note that the system considers only the child persons and not the grand child persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** This field appears when the **Person** option is selected from the **Entity** list.	No

Note: The **Hold Entities** section appears only when the **Use Selection Criteria** option is not selected while creating a hold request for an account or a person.

2. Enter the required details in the **Hold Entities** section.
3. If you want to add more than one entity in the hold request, click the **Add** (+) icon and then repeat *s*tep 2.

Note: However, if you want to remove an entity from the hold request, click the **Delete** (🗑) icon corresponding to the hold entity.

Defining an Account Selection Criteria for a Hold Request

Prerequisites

To define an account selection criteria for a hold request, you should have:

- Divisions, bill cycles, customer classes, states, health plans, membership identifier types, and policy types defined in the application
- Values defined in the **BILL_ADDR_SRCE_FLG**, **PRODUCT_TYPE_FLG**, **PRODUCT_HC_CAT_FLG**, **PRODUCT_LOB_FLG**, and **PRODUCT_LOB_CAT_FLG** lookup fields
- Required characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Required characteristic types defined in the application (where the characteristic entity is set to **Membership**)
- Required characteristic types defined in the application (where the characteristic entity is set to **Health Plan**)
- Required characteristic types defined in the application (where the characteristic entity is set to **Product**)
- Required characteristic types defined in the application (where the characteristic entity is set to **Person**)
- Required characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To define an account selection criteria for a hold request:

1. Ensure that the **Account Selection Criteria** section is expanded when you are creating or editing a hold request.

   The **Account Selection Criteria** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an account using the account, individual membership, person, or policy details. The valid values are: • Account Details • Individual Membership Details • Person Details • Policy Details **Note:** The **Individual Membership Details** and **Policy Details** options appear in the **Search By** list only when the **Environment Type** option type of the **SYSDT** feature configuration is set to **H**. For more information, see Setting the SYSDT Feature Configuration on page 1847.	Yes

Note:

The **Account Selection Criteria** section appears only when the following conditions are met in the **Main** section:

- The **Account** option is selected from the **Entity** list.
- The **Use Selection Criteria** option is selected. Note that this option appears only when the **Account** or **Person** option is selected from the **Entity** list.

2. Select the required option depending on which you want to search for the accounts from the **Search By** list.

The following fields appear in the **Account Selection Criteria** section:

Field Name	Field Description	Mandatory (Yes or No)
Address Source	Used to search for accounts where a particular address source is used to route the account's bills and/or quotes via the postal service. The valid values are: • Account Override • Bill • Main • Multiple Account Override • Person **Note:** This field appears when the **Account Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **BILL_ADDR_SRCE_FLG** lookup field.	No
Division	You can use this field while searching for an account using the account, individual membership, or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts which belong to a particular division.	No

Field Name	Field Description	Mandatory (Yes or No)
	• **Individual Membership Details** - This field enables you to search for individual membership's member persons' accounts that belong to a particular division. • **Policy Details** - This field enables you to search for policy persons' accounts that belong to a particular division. **Note:** This field appears when the **Account Details**, **Individual Membership Details**, or **Policy Details** option is selected from the **Search By** list. Note that in case of the latter two options (i.e., **Individual Membership Details** and **Policy Details**), this field appears only when you click the **Advanced Search** link available in the right side of the **Account Selection Criteria** section. The list includes only those divisions which are already defined in the system.	
State	You can use this field while searching for an account using the account, individual membership, person, or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts whose billing address belongs to a specific state. Note that this field is enabled while searching using the account details only when an option is selected from the **Address Source** list. • **Individual Membership Details** - This field enables you to search for accounts that belong to the individual membership's member persons who resides in a particular state. • **Person Details** - This field enables you to search for accounts belonging to persons (i.e., main customer) who reside in a particular state. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies issued in a particular state. **Note:** The **Search** (🔍) icon appears corresponding to the **State** field. On clicking the **Search** icon, the **State Search** window appears.	No
Bill Cycle	Used to search for accounts with a particular bill cycle. **Note:** This field appears when the **Account Details** option is selected from the **Search By** list. The list includes only those bill cycles which are already defined in the system.	No

Field Name	Field Description	Mandatory (Yes or No)
County	You can use this field while searching for an account using the account, individual membership, person, or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts whose billing address belongs to a specific county. Note that this field is enabled while searching using the account details only when an option is selected from the **Address Source** list. • **Individual Membership Details** - This field enables you to search for accounts that belong to the individual membership's member persons who resides in a particular county. • **Person Details** - This field enables you to search for accounts belonging to persons (i.e., main customer) who reside in a particular county. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies issued in a particular county. **Note:** You can specify comma-separated values in this field.	No
Customer Class	You can use this field while searching for an account using the account, individual membership, or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts which belong to a particular customer class. • **Individual Membership Details** - This field enables you to search for individual membership's member persons' accounts that belong to a particular customer class. • **Policy Details** - This field enables you to search for policy persons' accounts that belong to a particular customer class. **Note:** This field appears when the **Account Details**, **Individual Membership Details**, or **Policy Details** option is selected from the **Search By** list. Note that in case of the latter two options (i.e., **Individual Membership Details** and **Policy Details**), this field appears only when you click the **Advanced Search** link available in the right side of the **Account Selection Criteria** section. The list includes only those customer classes which are already defined in the system.	No
Postal	You can use this field while searching for an account using the account, individual membership, person,	No

Field Name	Field Description	Mandatory (Yes or No)
	or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts whose billing address belongs to a specific postal or zip code. Note that this field is enabled while searching using the account details only when an option is selected from the **Address Source** list. • **Individual Membership Details** - This field enables you to search for accounts that belong to the individual membership's member persons who resides in an area with a particular postal or zip code. • **Person Details** - This field enables you to search for accounts belonging to persons (i.e., main customer) who reside in an area with a particular postal or zip code. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies issued in an area with a particular postal or zip code. **Note:** You can specify comma-separated values in this field.	
Product Type	Used to search for accounts of persons that are linked to individual memberships of a particular health product type. The valid values are: • Exclusive Provider Organization • Health Maintenance Organization • Point-of-Service Plan • Preferred Provider Organization **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **PRODUCT_TYPE_FLG** lookup field.	No
Product Category	Used to search for accounts of persons that are linked to individual memberships of a particular health product category. The valid value is: • Medical **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **PRODUCT_HC_CAT_FLG** lookup field.	No

Field Name	Field Description	Mandatory (Yes or No)
Health Plan	Used to search for accounts of persons that are linked to individual memberships of a particular health plan. **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list. You must specify a health plan which is already defined in the system.	No
Start Date	You can use this field while searching for an account using the individual membership or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Individual Membership Details** - This field enables you to search for accounts of persons that are linked to individual memberships with a particular start date. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies with a particular start date. **Note:** This field appears when the **Individual Membership Details** or **Policy Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
End Date	You can use this field while searching for an account using the individual membership or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Individual Membership Details** - This field enables you to search for accounts of persons that are linked to individual memberships with a particular end date. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies with a particular end date. **Note:** This field appears when the **Individual Membership Details** or **Policy Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Membership Identifier Type	Used to search for accounts of persons that are linked to individual memberships using a particular membership identifier type.	Yes (Conditional) **Note:** If you specify the

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Individual Membership Details** option is selected from the **Search By** list. The list includes only those membership identifier types which are already defined in the system.	membership identifier as a search criteria, you have to select the membership identifier type.
Membership Identifier	Used to search for accounts of persons that are linked to a particular individual membership. **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you specify the membership identifier type as a search criteria, you have to enter the membership identifier.
Product LOB	Used to search for accounts of persons that are linked to individual memberships belonging to a particular health product LOB. **Note:** This field appears when the **Individual Membership Details** option is selected from the**Search By** list and the **Advanced Search** link available in the right side of the **Account Selection Criteria** section is clicked. The list includes only those values which are defined in the **PRODUCT_LOB_FLG** lookup field.	No
Product LOB Category	Used to search for accounts of persons that are linked to individual memberships belonging to a particular health product LOB category. The valid values are: • Commercial • Government • State Programs **Note:** This field appears when the **Individual Membership Details** option is selected from the**Search By** list and the **Advanced Search** link available in the right side of the **Account Selection Criteria** section is clicked. The list includes only those values which are defined in the **PRODUCT_LOB_CAT_FLG** lookup field.	No
Person ID	Used to search for accounts where a particular person is the main customer. **Note:**	Yes (Conditional) **Note:** This field is required when the **Include Person**

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to the **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears. This field appears when the **Person Details** option is selected from the **Search By** list. If you specify the person ID along with any other search criteria, the system gives high precedence to the person ID and ignores the other account selection criteria except **Include Person Hierarchy**.	**Hierarchy** option is selected.
Person Name	Used to search for accounts where the main customer have a particular name. **Note:** This field appears when the **Person Details** option is selected from the **Search By** list.	No
Include Person Hierarchy	Used to indicate whether all the accounts in the person's hierarchy or only the persons' immediate accounts should be kept on hold. Note that the system considers only the child persons and not the grand child persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** This field appears when the **Person Details** option is selected from the **Search By** list.	No
Policy Type	Used to search for accounts of persons that are linked to policies created using a particular policy type. **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list. The list includes only those policy types which are already defined in the system.	No
Policy Plan Number	Used to search for accounts of persons that are linked to policies having a particular policy plan. **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list.	No
Policy Number	Used to search for accounts of persons that are linked to a particular policy. **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list.	No
Source System	Used to search for accounts of persons that are linked to policies originated from a particular external system.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Policy Details** option is selected from the **Search By** list. The list includes only those source systems which are already defined in the system.	
Status	Used to search for accounts of persons that are linked to policies with a particular status. The valid values are: • Activate • In Force/Active • Cancel • Canceled • Pending Cancelation • Pending • Pending Reinstatement • Pending Termination • Post Run out • Reinstated • Renewed • Run out • Terminated **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list.	No

In addition, the following sub-sections appear in the **Account Selection Criteria** section:

- **Characteristics** - This section appears when the **Account Details**, **Person Details**, or **Policy Details** option is selected from the **Search By** list. Note that in case of the latter option (i.e., **Policy Details**), this section appears only when you click the **Advanced Search** link available in the right side of the **Account Selection Criteria** section. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search for accounts with a particular type of characteristic. **Note:** The **Search** (🔍) icon appears corresponding to the **Characteristic Type** field. On clicking the **Search** icon, the **Search Characteristic Value** window appears.	Yes (Conditional) **Note:** If you specify the characteristic value as a search criteria, you have to select the characteristic type.
Characteristic Value	Used to search for accounts with a particular characteristic.	Yes (Conditional) **Note:** If you specify the characteristic type as a search criteria, you

Field Name	Field Description	Mandatory (Yes or No)
		have to enter the characteristic value.

- **Membership Characteristics** - This section appears when the **Individual Membership Details** option is selected from the **Search By** list and the **Advanced Search** link available in the right side of the **Account Selection Criteria** section is clicked. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search for accounts of persons that are linked to individual memberships with a particular type of characteristic. **Note:** The **Search** (🔍) icon appears corresponding to the **Characteristic Type** field. On clicking the **Search** icon, the **Search Characteristic Value** window appears.	Yes (Conditional) **Note:** If you specify the characteristic value as a search criteria, you have to select the characteristic type.
Characteristic Value	Used to search for accounts of persons that are linked to individual memberships with a particular characteristic.	Yes (Conditional) **Note:** If you specify the characteristic type as a search criteria, you have to enter the characteristic value.

- **Health Product Characteristics** - This section appears when the **Individual Membership Details** option is selected from the **Search By** list and the **Advanced Search** link available in the right side of the **Account Selection Criteria** section is clicked. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search for accounts of persons that are linked to individual memberships of a health product with a particular type of characteristic. **Note:** The **Search** (🔍) icon appears corresponding to the **Characteristic Type** field. On clicking the **Search** icon, the **Search Characteristic Value** window appears.	Yes (Conditional) **Note:** If you specify the characteristic value as a search criteria, you have to select the characteristic type.
Characteristic Value	Used to search for accounts of persons that are linked to individual memberships of a health product with a particular characteristic.	Yes (Conditional) **Note:** If you specify the characteristic type as a search criteria, you have to enter the

Field Name	Field Description	Mandatory (Yes or No)
		characteristic value.

- **Health Plan Characteristics** - This section appears when the **Individual Membership Details** option is selected from the **Search By** list and the **Advanced Search** link available in the right side of the **Account Selection Criteria** section is clicked. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search for accounts of persons that are linked to individual memberships of a health plan with a particular type of characteristic. **Note:** The **Search** (🔍) icon appears corresponding to the **Characteristic Type** field. On clicking the **Search** icon, the **Search Characteristic Value** window appears.	Yes (Conditional) **Note:** If you specify the characteristic value as a search criteria, you have to select the characteristic type.
Characteristic Value	Used to search for accounts of persons that are linked to individual memberships of a health plan with a particular characteristic.	Yes (Conditional) **Note:** If you specify the characteristic type as a search criteria, you have to enter the characteristic value.

Note: You can specify multiple characteristics in the account selection criteria by clicking the **Add** (+) icon corresponding to the **Characteristic Type** field. If you specify multiple characteristics in the account selection criteria, the system uses the **AND** operator to derive the list of accounts that have all the specified characteristics. However, note that you cannot specify more than five characteristics in the account selection criteria.

3. Enter the required search criteria in the **Account Selection Criteria** section.

Note:

You must specify at least one search criterion while defining an account selection criteria for a hold request.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

Defining a Person Selection Criteria for a Hold Request

Prerequisites

To define a person selection criteria for a hold request, you should have:

- States defined in the application
- Required characteristic types defined in the application (where the characteristic entity is set to **Person**)

Procedure

To define a person selection criteria for a hold request:

1. Ensure that the **Person Selection Criteria** section is expanded when you are creating or editing a hold request.

   Note:

   The **Person Selection Criteria** section appears only when the following conditions are met in the **Main** section:

   - The **Person** option is selected from the **Entity** list.
   - The **Use Selection Criteria** option is selected. Note that this option appears only when the **Account** or **Person** option is selected from the **Entity** list.

   The **Person Selection Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search for a particular person. **Note:** The **Search** (🔍) icon appears corresponding to the **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears.	No
Person Name	Used to search for persons with a particular name.	No
State	Used to search for persons who reside in a particular state. **Note:** The **Search** (🔍) icon appears corresponding to the **State** field. On clicking the **Search** icon, the **State Search** window appears.	No
County	Used to search for persons who reside in a particular county. **Note:** You can specify comma-separated values in this field.	No
Postal	Used to search for persons who reside in an area with a particular postal or zip code. **Note:** You can specify comma-separated values in this field.	No

   In addition, the following sub-section appears in the **Person Selection Criteria** section:

   - **Characteristics** - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search for persons with a particular type of characteristic.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Characteristic Type** field. On clicking the **Search** icon, the **Search Person Characteristic Value** window appears.	**Note:** If you specify the characteristic value as a search criteria, you have to select the characteristic type.
Characteristic Value	Used to search for persons with a particular characteristic.	Yes (Conditional) **Note:** If you specify the characteristic type as a search criteria, you have to enter the characteristic value.

Note: You can specify multiple characteristics in the person selection criteria by clicking the **Add** (+) icon corresponding to the **Characteristic Type** field. If you specify multiple characteristics in the person selection criteria, the system uses the **AND** operator to derive the list of persons that have all the specified characteristics. However, note that you cannot specify more than five characteristics in the person selection criteria.

2. Enter the required search criteria in the **Person Selection Criteria** section.

Note:

You must specify at least one search criterion while defining a person selection criteria for a hold request.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

Adding a Process in a Hold Request

Prerequisites

To add a process in a hold request, you should have:

- Required applicable processes added in the respective hold request type

Procedure

To add a process in a hold request:

1. Ensure that the **Hold Processes** section is expanded when you are creating or editing a hold request.

   The **Hold Processes** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Process	Used to indicate the process that you want to keep on hold. The system then holds the selected process of those entities whose start and end dates fall with the process's start and end dates. **Note:** The list includes only those processes which are selected in the respective hold request type. Depending on the entity level selected, the system enables you to select the following processes: • If the entity level is set to **Account**, you can select the **Auto Pay**, **Bill Generation**, **Delinquency**, **Funding**, **Overdue**, and/or **Refund** option (if available) from the **Hold Process** list. However, note that you cannot select both the **Overdue** and **Delinquency** processes at a time in the hold request. • If the entity level is set to **Person**, you can select the **Bill Generation**, **Delinquency**, and/or **Funding** option (if available) from the **Hold Process** list. • If the entity level is set to **Bill**, you can only select the **Funding** option from the **Hold Process** list. The **Overdue** process is valid for the financial services and health insurance domains but the **Delinquency** process is valid only for the health insurance domain.	Yes
Start Date	Used to specify the date from when the process of an entity is kept on hold. **Note:** The hold process start date must be between the hold request start and end dates. The hold process start date cannot be later than the hold process end date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
End Date	Used to specify the date till when the process of an entity is kept on hold. **Note:** The hold process end date must be between the hold request start and end dates. The hold process end date cannot be earlier than the hold process start date.	No

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	

2. Enter the required details in the **Hold Processes** section.

   Note: You must specify at least one process while creating a hold request.

3. If you want to add more than one process in the hold request, click the **Add** (+) icon and then repeat *s*tep 2.

   Note: However, if you want to remove a process from the hold request, click the **Delete** (🗑) icon corresponding to the hold process.

Defining a Characteristic for a Hold Request

Prerequisites

To define a characteristic for a hold request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Hold Request**)

Procedure

To define a characteristic for a hold request:

1. Ensure that the **Characteristics** section is expanded when you are creating or editing a hold request.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the hold request. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the hold request.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Hold Request**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the hold request.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On	Yes (Conditional) **Note:** This field is required when you are defining a

Field Name	Field Description	Mandatory (Yes or No)
	clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	characteristic for the hold request.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the hold request, click the **Add** (+) icon and then repeat *s*tep 2.

Note: However, if you want to remove a characteristic from the hold request, click the **Delete** (🗑) icon corresponding to the characteristic.

Viewing the Hold Request Details

Procedure

To view the details of a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to view.

   The **Hold Request** screen appears. It contains following tabs:

   - Hold Request - Main on page 1904
   - Hold Request - Log on page 1922
3. Ensure that the **Main** tab is selected.
4. View the details of the hold request in the **Hold Request** zone.
5. View the entities (such as persons, accounts, or bills) whose processes are kept on hold through the hold request in the **Hold Entities** zone.

Hold Entities zone	Hold Entities on page 1907

Hold Request (Used for Viewing)

Once you create a hold request, the **Hold Request** screen allows you to:

- View the details of the hold request
- Add entities in the hold request
- Add processes in the hold request
- Edit the details of the hold request
- Edit the entity details of the hold request
- Edit the end dates of all the entities at once in the hold request (mass edit)
- Delete an entity from the hold request
- Delete the hold request
- Discard the hold request (i.e., future dated hold request)
- Submit the hold activation request for approval
- Approve or reject the hold activation request
- Request to resubmit the hold activation request for approval
- Release the hold request
- Approve the hold release request
- Request to resubmit the hold release request for approval
- View the log of the hold request
- Add a log entry for the hold request

This screen consists of the following tabs:

- Hold Request - Main on page 1904
- Hold Request - Log on page 1922

Hold Request - Main

The **Main** tab displays information about the hold request. It contains the following zones:

- Hold Request on page 1904
- Hold Entities on page 1907
- Search Account on page 1910

  Note:

  This zone appears when the following conditions are met:

  - The **Entity** field in the hold request is set to **Account**
  - The status of the hold request is set to **Draft**.
- Search Bill on page 1918

  Note:

  This zone appears when the following conditions are met:

  - The **Entity** field in the hold request is set to **Bill**
  - The status of the hold request is set to **Draft**.
- Search Person on page 1920

  Note:

  This zone appears when the following conditions are met:

  - The **Entity** field in the hold request is set to **Person**
  - The status of the hold request is set to **Draft**.

Hold Request

The **Hold Request** zone displays the details of the hold request. It contains the following sections:

- **Main** - Displays the basic information about the hold request. It contains the following fields:

Field Name	Field Description
Hold Request Information	Displays information about the hold request.
Hold Request Type	Indicates the hold request type using which the hold request is created. **Note:** It has a link. On clicking the link, the **Hold Request Type** screen appears where you can view the details of the respective hold request type.
Status	Indicates the status of the hold request. The valid values are: • Active • Activation Approval In Progress • Deferred Processing • Discarded • Draft • Entity Derivation Pending • Rejected • Released • Release Approval in Progress • Release Request Approved • Return Release Request to Submitter
Status Reason	Indicates the reason why the hold request is rejected or released. **Note:** This field appears when the hold request is in **Rejected** or **Released** status. It has a link. On clicking the link, the **Status Reason** screen appears where you can view the details of the respective status reason.
Start Date	Displays the date from when the hold request is effective.
End Date	Displays the date till when the hold request is effective.
Hold Reason	Indicates the reason why the entity is kept on hold.
Entity	Indicates the type of entity for which the hold request is created. The valid values are: • Account • Bill • Person
Comments	Displays additional information about the hold request. **Note:** This field appears when the comments are provided while adding or editing a hold request.

- **Hold Processes** - Lists the processes which are kept on hold for an entity through the hold request. It contains the following columns:

Column Name	Column Description
Hold Process	Indicates the process which is kept on hold. The valid values are: • Auto Pay

Column Name	Column Description
	• Bill Generation • Delinquency • Funding • Overdue • Refund
Start Date	Displays the date from when the process of an entity is kept on hold.
End Date	Displays the date till when the process of an entity is kept on hold.

- **Characteristics** - Lists the characteristics of the hold request. It contains the following columns:

Column Name	Column Description
Effective Date	Indicates the date from when the characteristic is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - Enables you to perform various actions on the hold request. It contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the hold request. **Note:** The **Edit** button appears when the hold request is in the **Draft** or **Active** status.
Delete	Used to delete the hold request. **Note:** The **Delete** button appears when the hold request is in the **Draft** status.
Submit	Used to submit the hold request. **Note:** The **Submit** button appears when the hold request is in the **Draft** status.
Re Submit	Used to re-submit the hold activation or release request. **Note:** The **Re Submit** button appears when the following conditions are met: • The hold request is in the **Activation Approval In Progress** or **Release Approval in Progress** status. • A user with the approval To Do role is reviewing the hold request.
Approve	Used to approve the hold activation or release request. **Note:** The **Approve** button appears when the following conditions are met: • The hold request is in the **Activation Approval In Progress** or **Release Approval in Progress** status. • A user with the approval To Do role is reviewing the hold request.
Reject	Used to reject the hold activation request. **Note:**

Button Name	Button Description
	The **Reject** button appears when the following conditions are met: • The hold request is in the **Activation Approval In Progress** status. • A user with the approval To Do role is reviewing the hold request.
Release	Used to release the hold request. **Note:** The **Release** button appears when the hold request is in the **Active** status.
Discard	Used to discard the future dated hold request. **Note:** The **Discard** button appears when the following conditions are met: • The hold request is future dated (i.e. when the hold request start date is later than the system date). • The hold request is in the **Active** status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the hold request is created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the hold request status is updated.
Create Date/Time	Displays the date and time when the hold request is created.

Hold Entities

The **Hold Entities** zone lists the entities which are added in the hold request. It contains the following columns:

Column Name	Column Description
Person Information	Displays information about the person. In addition, this column has a context menu (⌄) icon which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person. This column appears when the entity level in the hold request is set to **Person**.
Account Information	Displays information about the account. In addition, this column has a context menu (⌄) icon which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. This column appears when the entity level in the hold request is set to **Account**.
Bill Information	Displays information about the bill. In addition, this column has a context menu (⌄) icon which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill. This column appears when the entity level in the hold request is set to **Bill**.
Entity ID	Indicates the entity which is kept on hold through the hold request.
Start Date	Displays the date from when the entity is on hold.
End Date	Displays the date till when the entity is on hold. **Note:** Once the hold request is either manually or automatically released, the system updates the hold entity end date to the system date.
Hold Amount	Displays the bill amount which is kept on hold through the hold request. **Note:** This column appears when the entity level in the hold request is set to **Bill**.
Bill After Date	Displays the date after which bills can be generated for the account. **Note:** This column appears when the entity level in the hold request is set to **Account**. Once the hold request is either manually or automatically released, the bill after date is cleared (i.e., set to NULL) for the respective account.
Postpone Credit Review Until	Displays the date after which overdue debt can be monitored for the entity either through the **Overdue** or **Delinquency Management** process. **Note:** This column appears when the entity level in the hold request is set to **Account** or **Person**.

Column Name	Column Description
Defer Auto Pay Date	Displays the date till when you want to hold the automatic payment process for the account. **Note:** This column appears when the entity level in the hold request is set to **Account**.
Hierarchy	Indicates whether all the accounts in the person's hierarchy or only the persons' immediate accounts should be kept on hold through the hold request. The valid values are: • Y • N **Note:** This column appears when the entity level in the hold request is set to **Person**. The system considers only the child persons and not the grand child persons from the person's hierarchy and then derives the accounts where the child person is the main customer.
Hold Refund Until	Displays the date after which the refund request can be processed for the account. **Note:** This column appears when the entity level in the hold request is set to **Account**. The system does not stop you from creating A/P adjustments for an account from the **Adjustment** screen when the refund process is kept on hold for the account.

In addition, this zone contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the hold entity.
Delete	Used to delete the hold entity from the hold request.

Note:

The **Edit** and **Delete** buttons appear only when the hold request is in the **Draft** or **Active** status.

A check box appears corresponding to each hold entity. To update the details of a hold entity, select the check box corresponding to the hold entity and then click the **Edit** button. You can also select multiple hold entities at the same time. In addition, you can select the check box corresponding to the column header. This allows you to update the details of all the hold entities listed in the respective page. For more information, see Editing the Entity Details of a Hold Request on page 1927.

You can also mass update the end date of the hold entities in a hold request at once by clicking the **Edit All** link available in the upper right corner of this zone. The link appears only when the hold request is in the **Draft** or **Active** status. For more information, see Updating the End Date of All the Hold Entities (Mass Edit) on page 1929.

To delete a hold entity, select the check box corresponding to the hold entity and click the **Delete** button. You can also select multiple hold entities at the same time. In addition, you can select the check box corresponding to the column header. This allows you to delete all the hold entities listed in the respective page. For more information, see Deleting an Entity from a Hold Request on page 1931.

You can filter the list using the **Entity ID** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Search Account

The **Search Account** zone allows you to search for accounts using various search criteria. It also allows you to add the accounts in the hold request. It appears when the following conditions are met:

- The **Entity** field in the hold request is set to **Account**
- The status of the hold request is set to **Draft**.

It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an account using the account, policy, or individual membership details. The valid values are: • Account Details • Policy Details • Individual Membership Details **Note:** By default, the **Account Details** option is selected. The **Individual Membership Details** and **Policy Details** options appear in the **Search By** list only when the **Environment Type** option type of the **SYSDT** feature configuration is set to **H**. For more information, see Setting the SYSDT Feature Configuration on page 1847.	Yes
Account ID	Used to search for a particular account. **Note:** This field appears when the **Account Details** option is selected from the **Search By** list. The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears. On selecting the account, the respective information string appears corresponding to the **Account ID** field. It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.	No
Division	You can use this field while searching for an account using the account or individual membership details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts which belong to a particular division.	No

Field Name	Field Description	Mandatory (Yes or No)
	• **Individual Membership Details** - This field enables you to search for individual membership's member persons' accounts that belong to a particular division. **Note:** This field appears when the **Account Details** or**Individual Membership Details** option is selected from the **Search By** list. The list includes only those divisions which are already defined in the system.	
Address Source	Used to search for accounts where a particular address source is used to route the account's bills and/or quotes via the postal service. The valid values are: • Account Override • Bill • Main • Multiple Account Override • Person **Note:** This field appears when the **Account Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **BILL_ADDR_SRCE_FLG** lookup field.	Yes (Conditional) **Note:** This field is required when the search criteria is specified in the **State**, **County**, or **Postal** field.
Bill Cycle	Used to search for accounts with a particular bill cycle. **Note:** This field appears when the **Account Details** option is selected from the **Search By** list. The list includes only those bill cycles which are already defined in the system.	No
State	You can use this field while searching for an account using the account, policy, or individual membership details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts whose billing address belongs to a particular state. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies issued in a particular state. • **Individual Membership Details** - This field enables you to search for accounts that belong to the individual membership's member persons who resides in a particular state. **Note:** The **Search** (🔍) icon appears corresponding to the **State** field. On clicking the **Search** icon, the **State Search** window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	You can use this field while searching for an account using the account or individual membership details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts which belong to a particular customer class. • **Individual Membership Details** - This field enables you to search for individual membership's member persons' accounts that belong to a particular customer class. **Note:** This field appears when the **Account Details** or **Individual Membership Details** option is selected from the **Search By** list. The list includes only those customer classes which are already defined in the system.	No
County	You can use this field while searching for an account using the account, policy, or individual membership details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts whose billing address belongs to a particular county. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies issued in a particular county. • **Individual Membership Details** - This field enables you to search for accounts that belong to the individual membership's member persons who resides in a particular county. **Note:** You can specify comma-separated values in this field.	No
Postal	You can use this field while searching for an account using the account, policy, or individual membership details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts whose billing address belongs to a specific postal or zip code. • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies issued in an area with a particular postal or zip code. • **Individual Membership Details** - This field enables you to search for accounts that belong to the individual membership's member persons who resides in an area with a particular postal or zip code.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can specify comma-separated values in this field.	
Price Item	Used to search for accounts for which charges of a particular price item are created. **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list. The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears.	No
Policy Plan Number	Used to search for accounts of persons that are linked to policies having a particular policy plan. **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list.	No
Policy Type	Used to search for accounts of persons that are linked to policies created using a particular policy type. **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list. The list includes only those policy types which are already defined in the system.	Yes (Conditional) **Note:** This field is required if you are searching for accounts using the state, county, postal, start date, or end date as a search criteria.
Source System	Used to search for accounts of persons that are linked to policies originated from a particular external system. **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list. The list includes only those source systems which are already defined in the system.	Yes (Conditional) **Note:** This field is required if you are searching for accounts using the state, county, postal, start date, or end date as a search criteria.
Policy Number	Used to search for accounts of persons that are linked to a particular policy.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Policy Details** option is selected from the **Search By** list.	
Start Date	You can use this field while searching for an account using the policy or individual membership details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies with a particular start date. • **Individual Membership Details** - This field enables you to search for accounts of persons that are linked to individual memberships with a particular start date. **Note:** This field appears when the **Individual Membership Details** or **Policy Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
End Date	You can use this field while searching for an account using the policy or individual membership details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Policy Details** - This field enables you to search for accounts of persons that are linked to policies with a particular end date. • **Individual Membership Details** - This field enables you to search for accounts of persons that are linked to individual memberships with a particular end date. **Note:** This field appears when the **Individual Membership Details** or **Policy Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Status	Used to search for accounts of persons that are linked to policies with a particular status. The valid values are: • In Force/Active • Cancel • Canceled • Pending Cancelation • Pending • Pending Reinstatement	No

Field Name	Field Description	Mandatory (Yes or No)
	• Pending Termination • Post Run out • Reinstated • Run out • Terminated **Note:** This field appears when the **Policy Details** option is selected from the **Search By** list.	
Health Plan	Used to search for accounts of persons that are linked to individual memberships of a particular health plan. **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list. You must specify a health plan which is already defined in the system.	No
Membership Identifier Type	Used to search for accounts of persons that are linked to individual memberships using a particular membership identifier type. **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list. The list includes only those membership identifier types which are already defined in the system.	Yes (Conditional) **Note:** If you specify the membership identifier as a search criteria, you have to select the membership identifier type.
Membership Identifier	Used to search for accounts of persons that are linked to a particular individual membership. **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list.	Yes (Conditional) **Note:** If you specify the membership identifier type as a search criteria, you have to enter the membership identifier.
Product Type	Used to search for accounts of persons that are linked to individual memberships of a particular health product type. The valid values are: • Exclusive Provider Organization • Health Maintenance Organization • Point-of-Service Plan • Preferred Provider Organization	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Individual Membership Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **PRODUCT_TYPE_FLG** lookup field.	
Product Category	Used to search for accounts of persons that are linked to individual memberships of a particular health product category. The valid value is: • Medical **Note:** This field appears when the **Individual Membership Details** option is selected from the **Search By** list. The list includes only those values which are defined in the **PRODUCT_HC_CAT_FLG** lookup field.	No
Product LOB	Used to search for accounts of persons that are linked to individual memberships belonging to a particular health product LOB. **Note:** This field appears when the **Individual Membership Details** option is selected from the**Search By** list. The list includes only those values which are defined in the **PRODUCT_LOB_FLG** lookup field.	No
Product LOB Category	Used to search for accounts of persons that are linked to individual memberships belonging to a particular health product LOB category. The valid values are: • Commercial • Government • State Programs **Note:** This field appears when the **Individual Membership Details** option is selected from the**Search By** list. The list includes only those values which are defined in the **PRODUCT_LOB_CAT_FLG** lookup field.	No
Characteristic Type	You can use this field while searching for an account using the account, individual membership, or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts with a particular type of characteristic. Here, the system lists those characteristic types where the characteristic entity is set to **Account**.	Yes (Conditional) **Note:** If you specify the characteristic value as a search criteria, you have to select the

Field Name	Field Description	Mandatory (Yes or No)
	• **Individual Membership Details** - This field enables you to search for member persons' accounts of the individual memberships with a particular type of characteristic. Here, the system lists those characteristic types where the characteristic entity is set to **Membership**. • **Policy Details** - This field enables you to search for policy persons' accounts of the policies with a particular type of characteristic. Here, the system lists those characteristic types where the characteristic entity is set to **Policy**.	characteristic type.
Characteristic Value	You can use this field while searching for an account using the account, individual membership, or policy details. The context of this field changes depending on the respective option selected from the **Search By** list: • **Account Details** - This field enables you to search for accounts with a particular characteristic. • **Individual Membership Details** - This field enables you to search for member persons' accounts of the individual memberships with a particular characteristic. • **Policy Details** - This field enables you to search for policy persons' accounts of the policies with a particular characteristic. **Note:** This field appears when you select an option from the **Characteristic Type** list.	Yes (Conditional) **Note:** If you specify the characteristic type as a search criteria, you have to enter the characteristic value.

Note: You must specify at least one search criterion while searching for an account.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Account Information	Displays additional information about the account. In addition, this column has a context menu (⊙) icon which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Country	Displays the country in which the account's main customer resides.
State	Displays the state where the county is located.
County	Displays the county name.
Postal	Displays the postal or zip code of the address.
Customer Class	Indicates the customer class to which the account belongs.
Division	Indicates the division to which the account belongs.
Account ID	Displays the account ID.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

Button Name	Button Description
Add	Used to add an account to the hold request.

A check box appears corresponding to each account. On selecting the check box, you can add the account to the hold request. You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the accounts listed in the respective page to the hold request.

Note: The **Export** option is available in the **Explorer Zone** menu. On clicking the **Export** option, you can extract the search results in the CSV format. Two additional columns named **Account Identifier Type** and **Account Identifier** appear in the CSV file apart from the columns listed above in the **Search Results** section.

Search Bill

The **Search Bill** zone allows you to search for bills using various search criteria. It also allows you to add the bills in the hold request. It appears when the following conditions are met:

- The **Entity** field in the hold request is set to **Bill**
- The status of the hold request is set to **Draft**.

It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a bill using the bill details. The valid value is: • Bill Details **Note:** By default, the **Bill Details** option is selected.	Yes
Bill ID	Used to search for a particular bill. **Note:** The **Search** (🔍) icon appears corresponding to the **Bill ID** field. On clicking the **Search** icon, the **Bill Search** window appears. On selecting the bill, the respective information string appears corresponding to the **Bill ID** field. It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.	No
Alternate Bill ID	Used to search for a bill using its alternate bill ID.	No
Address Source	Used to search for bills which are routed using a particular address source. The valid values are: • Account Override	Yes (Conditional) **Note:** This field is

Field Name	Field Description	Mandatory (Yes or No)
	• Bill • Main • Multiple Account Override • Person **Note:** The list includes only those values which are defined in the **BILL_ADDR_SRCE_FLG** lookup field.	required if you are searching for bills using the state, country, or postal as a search criteria.
Bill Date From	Used to search for bills which are completed on or after the specified date. **Note:** By default, the current date appears in this field. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required if you have specified the value in the **To** field.
State	Used to search for bills where billing address belongs to a particular state. **Note:** The **Search** ( ) icon appears corresponding to the **State** field. On clicking the **Search** icon, the **State Search** window appears.	No
To	Used to search for bills which are completed on or before the specified date. **Note:** By default, the current date appears in this field. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required if you have specified the value in the **Bill Date From** field.
County	Used to search for bills where billing address belongs to a particular county.	No
Show All Bills	Used to indicate whether you want to search for all the bills or only the non-zero bills. **Note:** By default, this option is not selected and as a result, only the non-zero bills that meet the search criteria appears in the search results. However, if you select the **Show All Bills** option, the system lists all the bills including zero amount bills that meet the search criteria in the **Search Results** section.	No
Postal	Used to search for bills where billing address belongs to a particular postal or zip code.	No

Note:

You must specify at least one search criterion while searching for a bill.

The number of days between Bill From Date and Bill To Date should not exceed 60 days.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill Information	Displays additional information about the bill. In addition, this column has a context menu (⊙) icon which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.
Account Information	Indicates the account for which the bill is created. In addition, this column has a context menu (⊙) icon which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Country	Displays the country to which the bill is routed via the postal service.
State	Displays the state where the county is located.
County	Displays the county name.
Postal	Displays the postal or zip code of the address.
Entity ID	Displays the bill ID.

In addition, this section contains the following button:

Button Name	Button Description
Add	Used to add a bill to the hold request.

A check box appears corresponding to each bill. On selecting the check box, you can add the bill to the hold request. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the bills listed in the respective page to the hold request.

Note: The **Export** option is available in the **Explorer Zone** menu. On clicking the **Export** option, you can extract the search results in the CSV format. One additional column named **Account ID** appears in the CSV file apart from the columns listed above in the **Search Results** section.

Adding a Person in a Hold Request

Prerequisites

To add a person in a hold request, you should have:

- States defined in the application

Procedure

To add a person in a hold request:

1. Search for the draft hold request in the **Hold Request** screen where you want to add another person.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to edit.
   The **Hold Request** screen appears.
3. Expand the **Search Person** zone.
4. Enter the search criteria in the **Search Person** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of persons that meet the search criteria appears in the **Search Results** section.
6. Select the check box corresponding to the person that you want to add in the hold request.

   Note: You can also select multiple persons at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the persons listed in the respective page to the hold request.
7. Click the **Add** button in the **Search Person** zone.
   A message appears indicating that the selected person is successfully added in the hold request. Note that the person is added in the **Hold Entities** zone.

   Note: You cannot add a person in a hold request when it is created through the **Upload Request** feature.

Adding an Account in a Hold Request

Prerequisites

To add an account in a hold request, you should have:

- Divisions, bill cycles, customer classes, states, health plans, membership identifier types, and policy types defined in the application

- Values defined in the **BILL_ADDR_SRCE_FLG**, **PRODUCT_TYPE_FLG**, **PRODUCT_HC_CAT_FLG**, **PRODUCT_LOB_FLG**, and **PRODUCT_LOB_CAT_FLG** lookup fields
- Required characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Required characteristic types defined in the application (where the characteristic entity is set to **Membership**)
- Required characteristic types defined in the application (where the characteristic entity is set to **Policy**)

Procedure

To add an account in a hold request:

1. Search for the draft hold request in the **Hold Request** screen where you want to add another account.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to edit.
   The **Hold Request** screen appears.
3. Expand the **Search Account** zone.
4. Enter the search criteria in the **Search Account** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of accounts that meet the search criteria appears in the **Search Results** section.
6. Select the check box corresponding to the account that you want to add in the hold request.

   Note: You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the accounts listed in the respective page to the hold request.
7. Click the **Add** button in the **Search Account** zone.
   A message appears indicating that the selected account is successfully added in the hold request. Note that the account is added in the **Hold Entities** zone.

   Note: You cannot add an account in a hold request when it is created through the **Upload Request** feature.

Adding a Bill in a Hold Request

Prerequisites

To add a bill in a hold request, you should have:

- States defined in the application
- Values defined in the **BILL_ADDR_SRCE_FLG** lookup field

Procedure

To add a bill in a hold request:

1. Search for the draft hold request in the **Hold Request** screen where you want to add another bill.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to edit.
   The **Hold Request** screen appears.
3. Expand the **Search Bill** zone.
4. Enter the search criteria in the **Search Bill** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of bills that meet the search criteria appears in the **Search Results** section.
6. Select the check box corresponding to the bill that you want to add in the hold request.

   Note: You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the bills listed in the respective page to the hold request.
7. Click the **Add** button in the **Search Bill** zone.
   A message appears indicating that the selected bill is successfully added in the hold request. Note that the bill is added in the **Hold Entities** zone.

   Note:

   You cannot add a bill in the hold request if its outstanding amount is zero.

   You cannot add a bill in a hold request when it is created through the **Upload Request** feature.

Editing a Hold Request

Prerequisites

To edit a hold request, you should have:

- Values defined in the **HOLD_REASON_FLG** lookup field

Procedure

To edit a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to edit.

The **Hold Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Hold Request** zone.

   The **Hold Request** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the hold request.
   - **Hold Processes** - Used to indicate one or more processes of the entity that you want to keep on hold for a particular period.
   - **Characteristics** - Used to define the characteristics for the hold request.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Information	Displays information about the hold request.	Not applicable
Hold Request Type	Indicates the hold request type using which the hold request is created.	Not applicable
Start Date	Displays the date from when the hold request is effective.	Not applicable
End Date	Used to specify the date till when the hold request is effective. **Note:** The hold request end date cannot be earlier than the hold request start date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. You must specify a date which is equal to or later than the system date.	Yes
Hold Reason	Used to indicate the reason why you want to hold the entity. **Note:** The list includes only those values which are defined in the **HOLD_REASON_FLG** lookup field. You cannot change the hold reason when the hold request is in the **Active** status.	Yes
Entity	Indicates the type of entity for which the hold request is created. The valid values are: • Account • Bill • Person	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify additional information about the hold request. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** ( ) icon at the bottom right corner of the text box.	No

Note: The **Edit** button appears when the hold request is in the **Draft** or **Active** status.

5. Modify the required details in the **Main** section.
6. Add or remove the hold processes from the hold request, if required.

   Note:

   You cannot delete a process or modify the details of a process except the end date when the hold request is in the **Active** status. Note that you cannot specify a date which is earlier than the system date.

   A new process is added with the start date later than or equal to the system date.

   You cannot change the past end date of an entity or process in the hold request.

   You cannot add or remove a hold process from the hold request when it is created through the **Upload Request** feature.
7. Define, edit, or remove characteristics of the hold request, if required.
8. Click **Save**.
   The changes made to the hold request are saved.

Editing the Entity Details of a Hold Request

Procedure

To edit the entity details of a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to edit.
   The **Hold Request** screen appears.
3. Select the check box corresponding to the hold entity that you want to edit in the **Hold Entities** zone.

Note: You can also select multiple hold entities at the same time. In addition, you can select the check box corresponding to the column header. This allows you to update the details of all the hold entities listed in the respective page.

4. Click **Edit**.

The **Edit Hold Request Entities** screen appears. It contains the following fields:

Field Name	Field Description
Hold Request Information	Displays information about the hold request.
Start Date	Displays the date from when the hold request is effective.
End Date	Displays the date till when the hold request is effective.

In addition, this screen contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Entity ID	Displays the entity ID.	Not applicable
Entity Information	Displays the information about the entity.	Not applicable
Start Date	Used to specify the date from when you want to hold the entity. **Note:** This field is editable only when the hold request is in the **Draft** status. The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates. The hold entity start date cannot be later than the hold entity end date. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	Yes
End Date	Used to specify the date till when you want to hold the entity. **Note:** The hold entity end date must be between hold request start and end dates and between at least one process's start and end dates. The hold entity end date cannot be earlier than the hold entity start date or system date. You cannot update a past dated end date of a hold entity. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Hold Amount	Used to specify the outstanding bill amount that you want to keep on hold. **Note:**	Yes

Column Name	Column Description	Mandatory (Yes or No)
	This column appears when the **Bill** option is selected from the **Entity** list. This field is editable only when the **Allow Partial Hold for Bill** option is selected in the respective hold request type. You must specify a non-zero value in this field and the specified amount should not exceed the outstanding bill amount.	
Hierarchy	Used to indicate whether all the accounts in the person's hierarchy or only the persons' immediate accounts should be kept on hold. Note that the system considers only the child persons and not the grand child persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** This column appears when the **Person** option is selected from the **Entity** list. This column is editable only when the hold request is in the **Draft** status.	No

Note: The **Edit** button appears when the hold request is in the **Draft** or **Active** status.

5. Modify the details of the hold entities, if required.
6. Click **Save**.
   The changes made to the hold request are saved.

Note: After updating the end date of a hold entity, you need to execute the **Hold Request Monitor** (**C1-HLMON**) batch. On executing the batch, the system will accordingly update the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date, if required, for the respective entity.

Updating the End Date of All the Hold Entities (Mass Edit)

Procedure

To update the end date of all the hold entities at once in a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to edit.
   The **Hold Request** screen appears.

3. Click the **Edit All** link available in the upper right corner of the **Hold Entities** zone.

   The **Hold Request Information** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Displays the date from when the hold request is effective.	Not applicable
End Date	Displays the date till when the hold request is effective.	Not applicable
Hold Entity End Date	Used to specify the date till when you want to hold all the entities in the hold request. **Note:** The hold entity end date must be between hold request start and end dates and between at least one process's start and end dates. The hold entity end date cannot be earlier than the hold entity start date or system date. You cannot update a past dated end date of a hold entity. You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	Yes

   Note: The **Edit All** link appears when the hold request is in the **Draft** or **Active** status.

4. Enter the required date in the **Hold Entity End Date** field.
5. Click **Save**.

   The end date of the hold entities, hold processes, and the hold request is set to the specified date. For example, a hold request exists with the following hold processes and hold entities:

	Original Start Date	Original End Date
Hold Request	01-01-2021	12-31-2021
Hold Process: Billing	01-01-2021	12-31-2021
Hold Process: Auto Pay	01-01-2021	06-30-2021
Account 1	01-01-2021	12-31-2021
Account 2	01-20-2021	03-31-2021
Account 3	04-04-2021	10-30-2021

   Now, if you want to mass update the hold entity end date to 09-30-2021 on 04-01-2021, the system updates the hold entity, hold process, and hold request end dates as shown in the following table:

	Original Start Date	Original End Date
Hold Request	01-01-2021	09-30-2021
Hold Process: Billing	01-01-2021	09-30-2021
Hold Process: Auto Pay	01-01-2021	06-30-2021
Account 1	01-01-2021	09-30-2021

	Original Start Date	**Original End Date**
Account 2	01-20-2021	03-31-2021
Account 3	04-04-2021	09-30-2021

While updating the end date of a hold entity, the system checks whether the existing hold entity end date is earlier than the new hold entity end date. If the existing hold entity end date is earlier than the new hold entity end date, the system does not consider and update the end date of such hold entities. However, if the existing hold entity end date is later than the new hold entity end date, the system considers and updates the end date of such hold entities. Similarly, the system checks whether the existing hold process end date is earlier than the new hold entity end date. If the existing hold process end date is earlier than the new hold entity end date, the system does not consider and update the end date of such hold processes. However, if the existing hold process end date is later than the new hold entity end date, the system considers and updates the end date of such hold processes. Finally, the hold request end date is also set to the new hold entity end date.

A log is also created for the hold request indicating that mass update is done for the end date of the entities.

Note:

If the start date of any hold entity is later than the new hold entity end date, the system throws an appropriate error message and does not update the end date of the respective hold entity.

After updating the end date of a hold entity, you need to execute the **Hold Request Monitor** (**C1-HLMON**) batch. On executing the batch, the system will accordingly update the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date, if required, for the respective entity.

Deleting an Entity from a Hold Request

Procedure

To delete an entity from a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request whose details you want to edit.
   The **Hold Request** screen appears.
3. Select the check box corresponding to the hold entity that you want to delete in the **Hold Entities** zone.

   Note: You can also select multiple hold entities at the same time. In addition, you can select the check box corresponding to the column header. This allows you to delete all the hold entities listed in the respective page.
4. Click **Delete**.
   A message appears confirming whether you want to delete the hold entity.

   Note: The **Delete** button appears when the hold request is in the **Draft** or **Active** status. However, the system enables you to delete an entity from the hold request only when it is in the **Draft** status. Also, the entity (i.e., bill or account) added from the **Account Receivable Central**, **Funding Request**, or

Delinquency Central screen, respectively, cannot be deleted from the hold request even when it is in the **Draft** status.

5. Click **OK**.
   The hold entities are deleted from the hold request.

Note: You cannot remove an entity from a hold request when it is created through the **Upload Request** feature.

Deleting a Hold Request

Procedure

To delete a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request that you want to delete.
   The **Hold Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Hold Request** zone.
   A message appears confirming whether you want to delete the hold request.

Note: The **Delete** button appears when the hold request is in the **Draft** status.

5. Click **OK**.
   The hold request is deleted.

Discarding a Hold Request

Prerequisites

To discard a hold request, you should have:

- Reasons defined for the **Discarded** status of the **C1-HoldRequest** business object in the **Status Reason** screen

Procedure

To discard a hold request:

1. Search for a future dated active hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request that you want to discard.
   The **Hold Request** screen appears.
3. Click the **Discard** button in the **Hold Request** zone.

   The **Discard Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Discard Reason	Used to indicate the reason why you want to discard the hold request. **Note:** The list includes only those reasons which are defined for the **Discarded** status of the **C1-HoldRequest** business object through the **Status Reason** screen.	Yes
Comments	Used to specify additional information while discarding the hold request.	No

   Note:

   The **Discard** button appears when the following conditions are met:

   - The hold request is future dated (i.e. when the hold request start date is later than the system date).
   - The hold request is in the **Active** status.
4. Select the reason for discarding the hold request from the **Discard Reason** list.
5. Enter the comments (if any) while discarding the hold request in the respective field.
6. Click **Save**.
   The status of the hold request is changed to **Discarded**. Note that the hold request end date, hold entity end date, and the hold process end date are not changed to the date when the hold request is discarded.

Related Topics

For more information on...	See...
How to search for a hold request	Searching for a Hold Request on page 1880
Hold Request screen	Hold Request (Used for Viewing) on page 1903
Hold Request zone	Hold Request on page 1904

Submitting a Hold Activation Request

Prerequisites

To submit a hold activation request, you should have:

- At least one entity (such as, person, account, or bill depending on the specified entity level) added to the hold request

Procedure

To submit a hold activation request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request that you want to submit.
   The **Hold Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Submit** button in the **Hold Request** zone.

   The system behaves in the following manner:

If...	Then...
The **Activation Approval** option is selected in the respective hold request type	The status of the hold request is changed to **Activation Approval In Progress**. A To Do is created using the To Do type (i.e., **C1-HLDAP**) specified in the **Activation Approval To Do Type** field of the respective hold request type and then assigned to the users with the role specified in the **Activation Approval To Do Role** field of the respective hold request type. In addition, a log entry is created for the hold request when the To Do is created for the approver.
The **Activation Approval** option is not selected in the respective hold request type and the number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count (defined in the respective hold request type)	The status of the hold request is changed to **Deferred Processing**. **Note:** You need to execute the **Hold Request Periodic Monitor** (**C1-HLDRQ**) batch. It considers the hold requests which are in the **Deferred Processing** status and then changes its status to **Active**. Once the hold request is activated, you need to execute the following batches: • **C1-DELBI** - If the bill generation process is kept on hold for an account or person through a hold request, you need to execute the **C1-DELBI** batch which will delete the pending bills of the respective entities along with their bill segments. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*. • **C1-HLMON** - On executing the **C1-HLMON** batch, the system will set the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date, if required, for the respective entity.
The **Activation Approval** option is not selected in the respective hold request type and the number of entities added (either manually or via filter criteria) in the hold request does not exceed the defer processing count (defined in the respective hold request type)	The status of the hold request is changed to **Active**. In addition, the system does the following (in the online mode): • If the start date of the hold request, hold entity, or hold process is earlier than the system date, it sets the respective start date to the system date. • If an active overdue process (if any) exists for the account which is kept on hold, it cancels the respective overdue process of the account. The status of the overdue process is changed to **Inactive**. • An alert is created in the dashboard whenever an account is kept on hold through a hold request. Note that the start and end dates of the alert is set to the hold request start and end dates, respectively. The alert appears until the hold request for the account is released. **Note:** A warning message appears while activating the hold request if the start date of hold request, hold process, or hold entity is earlier than the system date. The system does not allow you to activate a hold request when the hold request end date is earlier than the system date. If the bill generation process is kept on hold for an account or person through a hold request, you need to execute the **C1-DELBI**

If...	Then...
	batch which will delete the pending bills of the respective entities along with their bill segments. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

Note:

If the **Delinquency** process is added in the hold request, this algorithm derives the entity level of the hold request. If the entity level is set to **Account**, it checks whether any individual or group membership is billed to the account. If an individual membership is billed to the account, it determines whether the number of entities in the hold request exceeds the defer processing count and accordingly changes the status of the hold request to either **Deferred Processing** or **Active**. However, if a group membership is billed to the account, this algorithm does not use the defer processing count. It directly changes the status of the hold request to **Deferred Processing**. Similarly, if the entity level is set to **Person**, it does not use the defer processing count. It directly changes the status of the hold request to **Deferred Processing**.

The **Submit** button appears when the hold request is in the **Draft** status.

On activating a hold request, the system checks whether the number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count. If the number of entities added in the hold request does not exceed the defer processing count, the system does the following (in the online mode):

If…	Then...
The hold request is created for an account, the bill generation process is on hold, and the entity start date in the hold request is earlier than or equal to the system date	The entity end date or process end date whichever is earlier is set as the bill after date for the respective account. In addition, the system creates an entry for the hold request in the **CI_BILL_DEL_REQUEST** table. **Note:** The bill after date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for an account, the overdue process is on hold, and the entity start date in the hold request is earlier than or equal to the system date	The entity end date or process end date whichever is earlier is set as the postpone credit review until date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the delinquency process is on hold, and the entity start date in the hold request is earlier than or equal to the system date	The entity end date or process end date whichever is earlier is set as the postpone credit review until date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the auto pay process is on hold, and the entity start date in the hold request is earlier than or equal to the system date	The entity end date or process end date whichever is earlier is set as the defer auto pay date for the respective account. **Note:** The defer auto pay date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Defer Auto Pay Date** field on the **Auto Pay** tab of the **Account** screen.
The hold request is created for an account, the refund process is on hold, and the entity start date in	The entity end date or process end date whichever is earlier is set as the hold refund until date for the respective account. In addition, the status

If…	Then...
the hold request is earlier than or equal to the system date	of the non-final refund request (if any) for the respective account is set to **Hold**. **Note:** The hold refund until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen.
The hold request is created for an account, the auto pay process is on hold, and the entity end date in the hold request is earlier than the system date	The automatic payment details of the debit bills (if any) for the respective account are updated in the **CI_BILL_ACH** table.
The hold request is created for a person, the bill generation process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the bill after date either for all the accounts in the person's hierarchy or only for the persons' immediate accounts depending on whether the **Hierarchy** option is selected or not. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. In addition, the system creates an entry for the hold request in the **CI_BILL_DEL_REQUEST** table. **Note:** In this scenario, the bill after date is always set in the deferred mode when the **C1-HLMON** batch is executed. The bill after date then appears in the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for a person, the delinquency process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the postpone credit review until date for the respective person and its immediate accounts (where the person is the main customer). If the **Hierarchy** option is selected for the person, the system sets the postpone credit review until date for the person, its immediate accounts, its child persons, and for the child persons' accounts. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** In this scenario, the postpone credit review until date is always set in the deferred mode when the **C1-HLMON** batch is executed. The postpone credit review until date then appears corresponding to the person in the **Hold Entities** zone of the **Hold Request** screen. In addition, the postpone credit review until date of the account appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.

Note:

If the hold entity end date is not specified, the system will consider the respective process end date while deriving the above dates. If both the hold entity end date and respective process end date are not specified, the system will consider the hold request end date while deriving the above dates.

The system does not change the start date of the hold request, hold entity, or hold process when it is a future date.

However, if the number of entities added in the hold request exceeds the defer processing count, the system behavior mentioned in the above table would be completed when the **C1-HLMON** batch is executed.

Approving a Hold Activation Request

You can view the number of hold requests for which activation is pending for approval from the **Hold Request** screen. The approver can review, and accordingly approve or reject the hold activation request based on the observations. In addition, the approver can request the submitter to resubmit the hold activation request for approval after making the necessary changes in it.

Note: The system will not allow you to approve, reject, or request to resubmit a hold activation request submitted by you.

To approve a hold activation request, you should have:

- Required activation approval To Do role assigned in the system

Procedure

To approve a hold activation request:

1. Do either of the following:

If you want to...	Then...
Review a hold activation request through the Hold Request screen	**a.** Search for the hold request with the **Approval In Progress** status in the **Hold Request** screen. A list of hold requests with the respective status appears in the search results. **b.** In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request which you want to review.
Review a hold activation request through the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** Click the **Search** (🔍) icon corresponding to the **To Do Type** field. The **To Do Type for User Search** window appears. **d.** Enter **C1-HLDAP** in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the hold request that you want to review.

The **Hold Request** screen appears.

2. Review the details in the **Hold Request** screen.
3. If the information in the hold request is accurate, click the **Approve** button in the **Hold Request** zone.

   The system behaves in the following manner:

If...	**Then...**
The number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count (defined in the respective hold request type)	The status of the hold request is changed to **Deferred Processing**. **Note:** You need to execute the **Hold Request Periodic Monitor** (**C1-HLDRQ**) batch. It considers the hold requests which are in the **Deferred Processing** status and then changes its status to **Active**. Once the hold request is activated, you need to execute the following batches: • **C1-DELBI** - If the bill generation process is kept on hold for an account or person through a hold request, you need to execute the **C1-DELBI** batch which will delete the pending bills of the respective entities along with their bill segments. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*. • **C1-HLMON** - On executing the **C1-HLMON** batch, the system will set the bill after date, postpone credit review until date, defer auto pay date, and hold refund until date, if required, for the respective entity.
The number of entities added (either manually or via filter criteria) in the hold request does not exceed the defer processing count (defined in the respective hold request type)	The status of the hold request is changed to **Active**. In addition, the system does the following (in the online mode): • If the start date of the hold request, hold entity, or hold process is earlier than the system date, it sets the respective start date to the system date. • If an active overdue process (if any) exists for the account which is kept on hold, it cancels the respective overdue process of the account. The status of the overdue process is changed to **Inactive**. • An alert is created in the dashboard whenever an account is kept on hold through a hold request. Note that the start and end dates of the alert is set to the hold request start and end dates, respectively. The alert appears until the hold request for the account is released. **Note:** A warning message appears while activating the hold request if the start date of hold request, hold process, or hold entity is earlier than the system date. The system does not allow you to activate a hold request when the hold request end date is earlier than the system date. If the bill generation process is kept on hold for an account or person through a hold request, you need to execute the **C1-DELBI** batch which will delete the pending bills of the respective entities along with their bill segments. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

Note:

If the **Delinquency** process is added in the hold request, this algorithm derives the entity level of the hold request. If the entity level is set to **Account**, it checks whether any individual or group membership is billed to the account. If an individual membership is billed to the account, it determines whether the number of entities in the hold request exceeds the defer processing count and accordingly changes the status of the hold request to either **Deferred Processing** or **Active**. However, if a group membership is billed to the account, this algorithm does not use the defer processing count. It directly changes the status of the hold request to **Deferred Processing**. Similarly, if the entity level is set to **Person**, it does not use the defer processing count. It directly changes the status of the hold request to **Deferred Processing**.

The **Approve** button appears when the hold request is in the **Activation Approval In Progress** status and when a user with the activation approval To Do role is reviewing the hold request.

On approving a hold activation request, the system does the following in the online or deferred (i.e., when the **C1-HLMON** batch is executed) mode depending on the defer processing count:

If…	**Then...**
The hold request is created for an account, the bill generation process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the bill after date for the respective account. In addition, the system creates an entry for the hold request in the **CI_BILL_DEL_REQUEST** table. **Note:** The bill after date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for an account, the overdue process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the postpone credit review until date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the delinquency process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the postpone credit review until date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the auto pay process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the defer auto pay date for the respective account. **Note:** The defer auto pay date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Defer Auto Pay Date** field on the **Auto Pay** tab of the **Account** screen.
The hold request is created for an account, the refund process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the hold refund until date for the respective account. In addition, the status of the non-final refund request (if any) for the respective account is set to **Hold**. **Note:** The hold refund until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen.
The hold request is created for an account, the auto pay process is on hold, and the entity end date in	The automatic payment details of the debit bills (if any) for the respective account are updated in the **CI_BILL_ACH** table.

If…	Then...
the hold request is earlier than the batch business date	
The hold request is created for a person, the bill generation process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the bill after date either for all the accounts in the person's hierarchy or only for the persons' immediate accounts depending on whether the **Hierarchy** option is selected or not. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. In addition, the system creates an entry for the hold request in the **CI_BILL_DEL_REQUEST** table. **Note:** In this scenario, the bill after date is always set in the deferred mode when the **C1-HLMON** batch is executed. The bill after date then appears in the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for a person, the delinquency process is on hold, and the entity start date in the hold request is earlier than or equal to the batch business date	The entity end date or process end date whichever is earlier is set as the postpone credit review until date for the respective person and its immediate accounts (where the person is the main customer). If the **Hierarchy** option is selected for the person, the system sets the postpone credit review until date for the person, its immediate accounts, its child persons, and for the child persons' accounts. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** In this scenario, the postpone credit review until date is always set in the deferred mode when the **C1-HLMON** batch is executed. The postpone credit review until date then appears corresponding to the person in the **Hold Entities** zone of the **Hold Request** screen. In addition, the postpone credit review until date of the account appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.

Note:

If the hold entity end date is not specified, the system will consider the respective process end date while deriving the above dates. If both the hold entity end date and respective process end date are not specified, the system will consider the hold request end date while deriving the above dates.

The system does not change the start date of the hold request, hold entity, or hold process when it is a future date.

Rejecting a Hold Activation Request

Prerequisites

To reject a hold activation request, you should have:

- Required activation approval To Do role assigned in the system
- Reasons defined for the **Rejected** status of the **C1-HoldRequest** business object in the **Status Reason** screen.

Note: The system will not allow you to approve, reject, or request to resubmit a hold activation request submitted by you.

Procedure

To reject a hold activation request:

1. Do either of the following:

If you want to...	Then...
Review a hold activation request through the Hold Request screen	**a.** Search for the hold request with the **Activation Approval In Progress** status in the **Hold Request** screen. A list of hold requests with the respective status appears in the search results. **b.** In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request which you want to review.
Review a hold activation request through the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** Click the **Search** (🔍) icon corresponding to the **To Do Type** field. The **To Do Type for User Search** window appears. **d.** Enter **C1-HLDAP** in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the hold request that you want to review.

   The **Hold Request** screen appears.
2. Review the details in the **Hold Request** screen.
3. If the information in the hold request is incorrect, click the **Reject** button in the **Hold Request** zone.

   The **Reject Hold Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the hold activation request. **Note:** The list includes only those reasons which are defined for the **Rejected** status of the	Yes

Field Name	Field Description	Mandatory (Yes or No)
	C1-HoldRequest business object through the **Status Reason** screen.	
Comments	Used to specify additional information while rejecting the hold activation request. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	No

Note: The **Reject** button appears when the following conditions are met:

- The hold request is in the **Activation Approval In Progress** status.
- A user with the activation approval To Do role is reviewing the hold request.

4. Select the reason for rejecting the hold activation request from the **Status Reason** list.
5. Enter the comments (if any) while rejecting the hold activation request in the respective field.
6. Click **Save**.
   The status of the hold request is changed to **Rejected**.

Requesting to Resubmit a Hold Activation Request for Approval

While reviewing a hold activation request, the approver can also request the submitter to resubmit the hold activation request for approval after making the necessary changes to it.

Prerequisites

To request to resubmit a hold activation request for approval, you should have:

- Required activation approval To Do role assigned in the system
- Submitter To Do type and submitter To Do role defined in the respective hold request type

Procedure

To request to resubmit a hold activation request for approval:

1. Do either of the following:

If you want to...	Then...
Review a hold activation request through the Hold Request screen	a. Search for the hold request with the **Activation Approval In Progress** status in the **Hold Request** screen. A list of hold requests with the respective status appears in the search results. b. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request which you want to review.

If you want to...	Then...
Review a hold activation request through the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** Click the **Search** (🔍) icon corresponding to the **To Do Type** field. The **To Do Type for User Search** window appears. **d.** Enter **C1-HLDAP** in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the hold request that you want to review.

The **Hold Request** screen appears.

2. Review the details in the **Hold Request** screen.
3. If the information in the hold request is incomplete and you want the submitter to make the required changes and resubmit the hold activation request for approval, click the **Re Submit** button in the **Hold Request** zone.

   The **Resubmit Hold Request** window appears. It contains following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes that the submitter should make in the hold request before resubmitting the activation request for approval. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	Yes

   Note: The **Re Submit** button appears when the following conditions are met:

   - The hold request is in the **Activation Approval In Progress** status.
   - A user with the activation approval To Do role is reviewing the hold request.

4. Enter the comments in the respective field.
5. Click **Save**.

The status of the hold request is changed to **Draft**. A To Do is created using the To Do type (i.e., **C1-HOLSB**) specified in the **Submitter To Do Type** field of the respective hold request type and then assigned to the users with the role specified in the **Submitter To Do Role** field of the respective hold request type. In addition, a log entry is created for the hold request when the To Do is created for the submitter.

Note:

The To Do is created for the submitter only when the submitter To Do type and submitter To Do role are specified in the respective hold request type.

The **Re Submit** button is not available to the approver when the hold request is created through the **Upload Request** feature or through an inbound web service.

Related Topics

For more information on...	See...
How to search for a hold request	Searching for a Hold Request on page 1880
Hold Request screen	Hold Request (Used for Viewing) on page 1903

Releasing a Hold Request

Prerequisites

To release a hold request, you should have:

- Reasons defined for the **Released** status of the **C1-HoldRequest** business object in the **Status Reason** screen

Procedure

To release a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request that you want to release.
   The **Hold Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Release** button in the **Hold Request** zone.

   The **Release Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Release Reason	Used to indicate the reason why you want to release the hold request. **Note:** The list includes only those reasons which are defined for the **Released** status of the **C1-HoldRequest** business object through the **Status Reason** screen.	Yes
Comments	Used to specify additional information while releasing the hold request. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	No

   Note: The **Release** button appears when the hold request is in the **Active** status.
5. Select the reason for releasing the hold request from the **Release Reason** list.
6. Enter the comments (if any) while releasing the hold request in the respective field.
7. Click **Save**.

   The system behaves in the following manner:

If...	Then...
The **Release Approval** option is selected in the respective hold request type	The status of the hold request is changed to **Release Approval in Progress**. A To Do is created using the To Do type (i.e., **C1-HLDAP**) specified in the **Release Approval To Do Type** field of the respective hold request type and then assigned to the users with the role specified in the **Release Approval To Do Role** field of the respective hold request type. In addition, a log entry is created for the hold request when the To Do is created for the approver.
The **Release Approval** option is not selected in the respective hold request type	The status of the hold request is changed to **Released**. If the hold entity end date and hold process end date is earlier than the system date, the system sets the hold entity end date and hold process end date to the system date. It also sets the hold request end date to the system date. In addition, the alert end date on the respective account is set to the system date.

On releasing a hold request, the system checks whether the number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count. If the number of entities added in the hold request does not exceed the defer processing count, the system does the following (in the online mode):

If…	Then…
The hold request is created for an account, the auto pay process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The defer auto pay until date is set to the system date for the respective account. In addition, the automatic payment details of the debit bills (if any) for the respective account are updated in the **CI_BILL_ACH** table. **Note:** The defer auto pay date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Defer Auto Pay Date** field on the **Auto Pay** tab of the **Account** screen.
The hold request is created for an account, the bill generation process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The bill after date is cleared for the respective account. This will enable the business to bill the account immediately on the same day when the hold is released. **Note:** The bill after date is cleared corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it is cleared from the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for an account, the overdue process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The postpone credit review until date is set to the system date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the delinquency process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The postpone credit review until date is set to the system date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the refund process is on hold, and the entity end date in	The hold refund until date is set to the system date for the respective account. In addition, the status of the refund request (if any) for the respective accounts is changed from **Hold** to its previous status.

If…	Then…
the hold request is earlier than or equal to the system date	**Note:** The hold refund until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen.
The hold request is created for a person, the bill generation process is on hold, and the entity end date in the hold request is earlier than or equal to the batch business date	The bill after date is cleared either for all the accounts in the person's hierarchy or only for the persons' immediate accounts depending on whether the **Hierarchy** option is selected or not. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** In this scenario, the bill after date is always cleared in the deferred mode when the **C1-HLMON** batch is executed. The bill after date is cleared from the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for a person, the delinquency process is on hold, and the entity end date in the hold request is earlier than or equal to the batch business date	The postpone credit review until date is set to the system date for the respective person and its immediate accounts (where the person is the main customer). If the Hierarchy option is selected for the person, the system sets the postpone credit review until date for the person, its immediate accounts, its child persons, and for the child persons' accounts. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** In this scenario, the postpone credit review until date is always set in the deferred mode when the **C1-HLMON** batch is executed. The postpone credit review until date then appears corresponding to the person in the **Hold Entities** zone of the **Hold Request** screen. In addition, the postpone credit review until date of the account appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.

Note: The above dates are updated to the system date only when the entity end date or respective process end date is not earlier than the system date.

However, if the number of entities added in the hold request exceeds the defer processing count, a log entry is created indicating that the hold request is manually released but the release process (i.e. system behavior mentioned in the above table) would be completed when the **C1-HLMON** batch is executed.

Approving a Hold Release Request

You can view the number of hold requests for which release is pending for approval from the **Hold Request** screen. The approver can review, and accordingly approve the hold release request based on the observations. In addition, the approver can request the submitter to resubmit the hold release request for approval after making the necessary changes in it.

Note: The system will not allow you to approve or request to resubmit a hold release request submitted by you.

To approve a hold release request, you should have:

- Release approval To Do role assigned in the system

Procedure

To approve a hold release request:

1. Do either of the following:

If you want to...	Then...
Review a hold release request through the Hold Request screen	**a.** Search for the hold request with the **Release Approval in Progress** status in the **Hold Request** screen. A list of hold requests with the respective status appears in the search results. **b.** In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request which you want to review.
Review a hold release request through the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** Click the **Search** (🔍) icon corresponding to the **To Do Type** field. The **To Do Type for User Search** window appears. **d.** Enter **C1-HLDAP** in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the hold request that you want to review.

   The **Hold Request** screen appears.
2. Review the details in the **Hold Request** screen.
3. If the information in the hold request is accurate, click the **Approve** button in the **Hold Request** zone.

   The status of the hold request is changed to **Released**. If the hold entity end date and hold process end date is earlier than the system date, the system sets the hold entity end date and hold process end date to the system date. It also sets the hold request end date to the system date. In addition, the alert end date on the respective account is set to the system date.

   Note: The **Approve** button appears when the hold request is in the **Release Approval in Progress** status and when a user with the release approval To Do role is reviewing the hold request.

On releasing a hold request, the system checks whether the number of entities added (either manually or via filter criteria) in the hold request exceeds the defer processing count. If the number of entities added in the hold request does not exceed the defer processing count, the system does the following (in the online mode):

If…	**Then…**
The hold request is created for an account, the auto pay process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The defer auto pay until date is set to the system date for the respective account. In addition, the automatic payment details of the debit bills (if any) for the respective account are updated in the **CI_BILL_ACH** table. **Note:** The defer auto pay date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Defer Auto Pay Date** field on the **Auto Pay** tab of the **Account** screen.
The hold request is created for an account, the bill generation process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The bill after date is cleared for the respective account. This will enable the business to bill the account immediately on the same day when the hold is released. **Note:** The bill after date is cleared corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it is cleared from the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for an account, the overdue process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The postpone credit review until date is set to the system date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the delinquency process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The postpone credit review until date is set to the system date for the respective account. **Note:** The postpone credit review until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen. In addition, it appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.
The hold request is created for an account, the refund process is on hold, and the entity end date in the hold request is earlier than or equal to the system date	The hold refund until date is set to the system date for the respective account. In addition, the status of the refund request (if any) for the respective accounts is changed from **Hold** to its previous status. **Note:** The hold refund until date then appears corresponding to the account in the **Hold Entities** zone of the **Hold Request** screen.
The hold request is created for a person, the bill generation process is on hold, and the entity end date in the hold request is earlier than or equal to the batch business date	The bill after date is cleared either for all the accounts in the person's hierarchy or only for the persons' immediate accounts depending on whether the **Hierarchy** option is selected or not. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** In this scenario, the bill after date is always cleared in the deferred mode when the **C1-HLMON** batch is executed.

If…	Then…
	The bill after date is cleared from the **Bill On** or **After Date** field on the **Main** tab of the **Account** screen.
The hold request is created for a person, the delinquency process is on hold, and the entity end date in the hold request is earlier than or equal to the batch business date	The postpone credit review until date is set to the system date for the respective person and its immediate accounts (where the person is the main customer). If the Hierarchy option is selected for the person, the system sets the postpone credit review until date for the person, its immediate accounts, its child persons, and for the child persons' accounts. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. **Note:** In this scenario, the postpone credit review until date is always set in the deferred mode when the **C1-HLMON** batch is executed. The postpone credit review until date then appears corresponding to the person in the **Hold Entities** zone of the **Hold Request** screen. In addition, the postpone credit review until date of the account appears in the **Postpone Credit Review Until** field on the **C & C** tab of the **Account** screen.

Note: The above dates are updated to the system date only when the entity end date or respective process end date is not earlier than the system date.

However, if the number of entities added in the hold request exceeds the defer processing count, a log entry is created indicating that the hold request is manually released but the release process (i.e. system behavior mentioned in the above table) would be completed when the **C1-HLMON** batch is executed.

Requesting to Resubmit a Hold Release Request for Approval

While reviewing a hold release request, the approver can also request the submitter to resubmit the hold release request for approval after making the necessary changes to it.

Prerequisites

To request to resubmit a hold release request for approval, you should have:

- Release approval To Do role assigned in the system
- Submitter To Do type and submitter To Do role defined in the respective hold request type

Procedure

To request to resubmit a hold release request for approval:

1. Do either of the following:

If you want to...	Then...
Review a hold release request through the Hold Request screen	**a.** Search for the hold request with the **Release Approval In Progress** status in the **Hold Request** screen. A list of hold requests with the respective status appears in the search results. **b.** In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request which you want to review.
Review a hold release request through the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** Click the **Search** (🔍) icon corresponding to the **To Do Type** field. The **To Do Type for User Search** window appears. **d.** Enter **C1-HLDAP** in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the hold request that you want to review.

The **Hold Request** screen appears.

2. Review the details in the **Hold Request** screen.
3. If the information in the hold request is incomplete and you want the submitter to make the required changes and resubmit the hold release request for approval, click the **Re Submit** button in the **Hold Request** zone.

   The **Resubmit Hold Request** window appears. It contains following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes that the submitter should make in the hold request before resubmitting the release request for approval. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	Yes

Note: The **Re Submit** button appears when the following conditions are met:

- The hold request is in the **Release Approval In Progress** status.
- A user with the release To Do role is reviewing the hold request.

4. Enter the comments in the respective field.
5. Click **Save**.

The status of the hold request is changed to **Active**. A To Do is created using the To Do type (i.e., **C1-HOLSB**) specified in the **Submitter To Do Type** field of the respective hold request type and then assigned to the users with the role specified in the **Submitter To Do Role** field of the respective hold request type. In addition, a log entry is created for the hold request when the To Do is created for the submitter.

Note:

The To Do is created for the submitter only when the submitter To Do type and submitter To Do role are specified in the respective hold request type.

The **Re Submit** button is not available to the approver when the hold request is created through the **Upload Request** feature or through an inbound web service.

Adding a Log Entry for a Hold Request

Procedure

To add a log entry for a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *h*old request for which you want to add a log entry.
   The **Hold Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Hold Request Log** zone.

The **Add Hold Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Information	Displays information about the hold request.	Not applicable
Log Details	Used to specify additional comments for the hold request. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⊿) icon at the bottom right corner of the text box.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Hold Request Log** zone.

Part XXX

Delinquency Central

Topics:

- Prerequisites
- Delinquency Central (Used for Viewing)
- Overdue Process Information for Account: {Account ID}

Oracle Revenue Management and Billing provides a complete overview of the overdue bills belonging to the delinquent accounts of a particular person using the **Delinquency Central**. User can review the overdue bills and perform following actions from the delinquency central:

- Initiate customer contact
- Initiate hold on overdue process
- Create payment arrangement for an account
- Create promise to pay for person's account

The Delinquency Central assists you in identifying all the overdue processes, overdue bills & delinquent accounts using an overdue monitoring process.

For more information on how to setup the delinquency central, see Prerequisites on page 1954.

Prerequisites

To setup delinquency central, you need to do the following:

- Define the required characteristic types where the characteristic entity is set to overdue event.
- Define the overdue event type and overdue process template in the system.
- Promise To Pay type defined in the application.
- Customer contact type defined in the application.
- Hold request type defined in the application.

Delinquency Central (Used for Viewing)

The **Delinquency Central** screen allows you to:

- Search for an overdue process
- View the details of an overdue process
- View the details of an overdue event
- Create customer contact
- Create a hold request for an overdue process
- Create a payment arrangement for an account
- Create a promise to pay for a person's account
- Create a payment agreement request for an account

This screen consists of the following zones:

- Search Overdue Process on page 1954
- Overdue Events on page 1959

Search Overdue Process

The **Search Overdue Process** zone allows you to search for overdue processes using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for overdue processes using person, account, bill or overdue process. The valid values are: • Person • Account • Bill • Overdue Process **Note:** By default, the **Person** option is selected.	No
Person ID	Used to search for overdue processes which belong to a particular person.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Person** option from the **Search By** list.	
Person Identifier Type	Used to search for overdue processes with a particular person identifier type. **Note:** This field appears when you select the **Person** option from the **Search By** list.	Yes (Conditional) **Note:** If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search for overdue processes with a specific value of the person identifier type. **Note:** This field appears when you select the **Person** option from the **Search By** list.	Yes
Account ID	Used to search for overdue processes created for a particular account. **Note:** This field appears when you select the **Account** option from the **Search By** list.	No
Account Identifier Type	Used to search for overdue processes with a particular account identifier type. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes (Conditional) **Note:** If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to search for overdue processes with a particular account identifier. **Note:** This field appears when you select the **Account** option from the **Search By** list.	Yes
Bill ID	Used to search for overdue processes with a particular bill. **Note:** This field appears when you select the **Bill** option from the **Search By** list.	No
Alternate Bill ID	Used to search for overdue processes using an alternate bill ID. **Note:** This field appears when you select the **Bill** option from the **Search By** list.	No
Characteristic Type / Value	Used to search for overdue processes with a particular characteristic type and its value. **Note:** This field appears when you select the **Bill** option from the **Search By** list.	No
Overdue Process Template	Used to search for overdue processes with a particular overdue process template.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Overdue Process** option from the **Search By** list.	
Start Date	Used to search for overdue processes with a particular start date. **Note:** This field appears when you select the **Overdue Process** option from the **Search By** list.	Yes
End Date	Used to search overdue process with a particular end date. **Note:** This field appears when you select the **Overdue Process** option from the **Search By** list.	Yes
Status	Used to search for overdue processes with a particular status. The valid values are: • Active • Inactive **Note:** This field appears when you select the **Overdue Process** option from the **Search By** list.	No
On Hold	Used to search for overdue processes that are on hold. **Note:** This field appears when you select the **Overdue Process** option from the **Search By** list.	No
Overdue Amount From	Used to search for overdue processes with a particular lower limit of the overdue amount. **Note:** This field appears when you select the **Overdue Process** option from the **Search By** list.	No
To	Used to search for overdue processes with a particular higher limit of the overdue amount. **Note:** This field appears when you select the **Overdue Process** option from the **Search By** list.	No
Characteristic Type / Value	Used to search for overdue processes with a particular characteristic type and value. **Note:** This field appears when you select the **Overdue Process** option from the **Search By** list.	No

- In addition to above search parameters, the screen consists of following fields in the **Person Details** or **Account Details** section:

Column Name	Column Description
Main Customer	Displays the name of the main customer to whom the account belongs. **Note:** This field appears when you select the **Account** option from the **Search By** list.
Person Name	Displays the name of the person to whom the account belongs. **Note:** This field appears when you select the **Person** option from the **Search By** list.
Person Identifier Type	Displays the person identifier type. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Person Identifier	Displays the value of the person identifier type. **Note:** This field appears when you select the **Person** or **Account**option from the **Search By** list.
Account Identifier Type	Displays the account identifier type. **Note:** This field appears when you select the **Account** option from the **Search By** list.
Account Identifier	Displays the value of the account identifier type. **Note:** This field appears when you select the **Account** option from the **Search By** list.
Overdue	Displays whether the person account(s)/bill(s) are overdue. The valid values are: • Yes • No **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Number of Active Overdue processes	Displays the number of overdue processes linked to the person's account that are in active status. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Number of Hold(s) on Account(s)	Displays the number of hold requests on the particular account.
Number of Overdue Bills	Displays the total number of bills that are overdue. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Total Overdue Amount	Displays the total overdue amount for an account.
Last Payment Date	Displays date of the last payment made by the person. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Last Payment Amount	Displays the amount last paid by the person.

Column Name	Column Description
	Note: This field appears when you select the **Person** or **Account** option from the **Search By** list.
Number Of Payment Arrangements	Displays the number of payment arrangements for the person's account. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Total Number of Overdue Process on Hold	Displays the total number of overdue process that are on hold. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Number of Promise To Pay	Displays the number of promise to pay belonging to the person. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.
Number of Broken Promise To Pay	Displays the total number of promise to pay that are broken. **Note:** This field appears when you select the **Person** or **Account** option from the **Search By** list.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Overdue Process	Display additional information about the overdue process. **Note:** It has a link. On clicking the link, the **Overdue Process** screen appears where you can view the details of the overdue process.
Overdue Process Template	Displays the template that was used to create overdue process's events.
Account Information	Display additional information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears with the details of the account.
Person Information	Display additional information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears with the details of the person.
Overdue Amount	Displays the overdue amount under that overdue process.
On Hold	Displays whether the overdue process is on hold.
Overdue Process Details	On clicking the **View** (🔗) icon, the **Overdue Process Details** screen appears where you can view details of the overdue process.

On clicking the **Broadcast** (📡) icon corresponding to the overdue process, the **Overdue Events** zone appears with the details of the respective overdue process.

Searching for an Overdue Process

Prerequisites

To search for an overdue process, you should have:

- Overdue process defined in the application.

Procedure

To search for an overdue process:

1. Click the **Menu** link in the **Application** toolbar
2. From the **Main** menu, select **Delinquency Management** and then click **Delinquency Central**.
   The **Delinquency Central** screen appears.
3. Enter the search criteria in the **Search Overdue Process** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of

the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of overdue processes that meet the search criteria appear in the **Search Results** section.

- Creating a Hold Request for an Overdue Process on page 1966
- Creating a Payment Arrangement for an Overdue Process on page 1966
- Defining a Promise To Pay for an Overdue Process on page 1967

Person Information

The **Person Information** zone displays details of the person whose account is linked to the overdue process. This zone contains following columns:

Column Name	Column Description
Person Name	Displays the name of the person whose account is linked to the overdue process.
Phone Number	Displays the phone number of the person.
Address	Displays the address of the person.

Account Information

The **Account Information** zone displays the details of the account that is linked with the overdue process. This zone contains following columns:

Column Name	Column Description
Account ID	Displays the account ID.

Column Name	Column Description
Account Identifier Type	Displays the account identifier type.
Account Identifier	Displays the value of the account identifier type.
Last Payment Date	Displays the date of the last payment made from the account that is linked with the overdue process.
Last Payment Amount	Displays the amount last paid from the account.

Customer Contact Details

The **Customer Contact Details** zone displays the contact details of the customer whose account is linked with the overdue process. This zone contains following columns:

Column Name	Column Description
Contact Date/Time	Displays the date and time when the customer was contacted.
Customer Contact Information	Displays additional information about the customer contact. **Note:** It has a link. On clicking the link, the **Customer Contact** screen appears where you can view the details of the respective customer contact.
Preferred Contact Method	Displays the preferred method of contacting the customer.
Comments	Displays the comments that are placed against each customer.

Promise To Pay

The **Promise To Pay** zone displays promise to pay created for an account which is linked to the overdue process. This zone contains following columns:

Column Name	Column Description
Promise To Pay Information	Displays additional information of promise to pay. **Note:** It has a link. On clicking the link, the **Promise To Pay** screen appears where you can view the details of promise to pay.
Scheduled Amount	Displays the amount to be paid on the **Scheduled Date**.
Scheduled Date	Displays the date when the payment is expected as per promise to pay.
Status	Displays the status of promise to pay.
Created By	Displays the user ID who has created the promise to pay.

Hold Details

The **Hold Details** zone displays the details of the person whose account is linked to the overdue process. This zone contains the following columns:

Column Name	Column Description
Hold Request Information	Displays additional information about the hold request. **Note:** It has a link. On clicking the link, the **Hold Request** screen appears where you can view the details of the hold request.
Status	Displays the status of the hold request.
Entity	Displays the hold request entity.
Entity Information	Displays the information about the entity on hold. **Note:** It has a link. On clicking the link, the **Account**, **Bill** or **Person** screen appears, where you can view details of the respective account, bill or person.
Start Date	Displays the date when the hold request is created.
End Date	Displays the end date of the hold request.

Overdue Bills

The **Overdue Bills** zone displays details of the overdue bills. This zone contains following columns:

Column Name	Column Description
Bill Information	Displays additional information about the bill. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.
Original Bill Amount	Displays the bill amount when the bill was generated.
Due Date	Displays the due date of the bill.
Overdue Amount	Displays the amount that is overdue in the bill.
Days Past Due	Displays the number of days past after the bill date.

Payment Arrangement

The **Payment Arrangement** zone displays the details of the payment arrangement that is created for an account linked to the overdue process. This zone contains following columns:

Column Name	Column Description
Contract Information	Displays the payment arrangement contract information . In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.
Payoff Balance	Displays the total amount that is paid against the payment arrangement contract.
Arrange Amount	Displays the amount that is paid in installments as per the payment arrangement contract.
Number of Installments	Displays the number of installments used to calculate the **Arrange Amount**.

Search Bill

The **Search Bill** zone allows you to search for a bill. This zone contains the following fields:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Used to specify the name of the person for whom the bill is generated.	No
Person ID	Used to specify the person ID.	No
Bills of Persons in Hierarchy	Used to indicate whether you want to search for a bills generated against a person's hierarchy.	No
Bill Cycle	Used to indicate bills where a particular bill cycle is defined.	No
Bill Currency	Used to indicate the bill currency.	No
Billing Method	Used to indicate the billing method. The valid values are: • Ad-Hoc Billing • Regular Billing	No
Bill ID	Used to specify the bill ID.	No
Alternate Bill ID	Used to search a particular bill using the alternate bill ID.	No
Account ID	Used to indicate the account against which the bill is generated.	No
On or After Bill Date	Used to specify the date when the bill was completed.	No
Account Identifier Type	Used to search for bills where the account against which it is generated, a particular account identifier type is defined.	No
Account Identifier	Used to search for a bill generated against an account with a particular account identifier.	No

Note: You must specify at least one search criterion while searching for the bill.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Name	Displays the name of the person against whom the bill is generated.
Bill ID	Displays the bill ID.
Bill Status	Displays the status of the bill. The valid values are: • Pending • Complete
Bill Date	Displays the date when the bill was completed.
Due Date	Displays the due date of the bill.

Column Name	Column Description
Current Charges	Displays the bill amount.
Bill Information	Displays additional information about the bill.

Searching for a Bill

Procedure

To search for a bill:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Delinquency Management** and then click **Delinquency Central**.
   The **Delinquency Central** screen appears.
3. Select the **Bill** option from the **Search By** list.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of bills that meet the search criteria appear in the **Search Results** section.

Creating a Hold Request for an Overdue Process

Procedure

To create a hold request for an overdue process:

1. Search for an overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to create a hold request for an overdue process.
3. Click **Create Hold Request** button.
   The **Add Hold Request** screen appears. It contains the following field:

Field Name	Field Description	Mandatory
Hold Request Type	Used to indicate the hold request type that is used for creating a hold request.	Yes

4. Select the required hold request type from the **Hold Request Type** field.
5. Click **OK**.
   The **Hold Request** screen appears.
6. Enter the required details for an overdue process.
7. Click **Save**.
   A hold request is defined for an overdue process where the status of the hold request is set as **Draft**.

Note:

The **Hold Request** screen appears where you can view the details of the hold request.

Creating a Payment Arrangement for an Overdue Process

Procedure

To create a payment arrangement for an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to create a payment arrangement for an overdue process.
3. Click the **Create Payment Arrangement** button.
   The **Payment Arrangement** screen appears. It contains the following tabs:
   - **Main**
   - **History**
4. Enter the required details in the **Payment Arrangement** screen.
5. Click the **Save** button in the **Page Title** area of the **Payment Arrangement** screen.

A payment arrangement is created with the respective payment arrangement contract.

Note: The **Payment Arrangement** screen appears with the details of the payment arrangement.

Defining a Promise To Pay for an Overdue Process

Procedure

To create a promise to pay for an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to define a promise to pay for an overdue process.
3. Click the **Create Promise To Pay** button.
   A message appears confirming that the promise to pay will be created for the account for which the overdue process is initiated.
4. Click **OK**.
   The **Promise To Pay** screen appears.
5. Enter the required details in the **Promise To Pay** screen.
6. Click the **Save** button in the **Page Title** area of the **Promise To Pay** screen.
   A promise to pay is created with the scheduled payment details.

Part XXXI

Upload Request

Topics:

- Upload Request (Without Approval) Status Transition
- Upload Request (With Approval) Status Transition
- Mass Accounts' Bill Cycle Update
- Mass Billable Charge Creation (Financial Services)
- Mass Hold Request Creation
- Mass Refund Request Creation
- Mass Write Off Request Creation
- Mass Payment Tender Cancellation
- Upload Request Type
- Upload Request (Used for Searching)
- Upload Request (Used for Viewing)

Oracle Revenue Management and Billing provides a generic upload feature that allows you to upload data to create or update multiple entities through an upload request. At present, the system supports only Comma-Separated Values (CSV) format and therefore you can upload the data only using the CSV file. Note that, at a time, a CSV file can have data to create or update a particular type of entities in the system. In other words, you cannot upload data for multiple types of entities (such as, hold request and billable charge) through a single CSV file.

Through an upload request, you can not only create or update the business object based entities but can also create or update the service-driven entities. If the lifecycle is defined for the entity business object, the status of entity is updated accordingly when the upload request is processed. If the approval process is configured for the upload request business object, the system will submit the upload request for approval before creating or updating the entities in the system. Similarly, if the approval process is configured for the entity business object, the system will submit the entity for approval once it is created using the uploaded data.

At present, the system allows you to upload data for creating the following entities - Billable Charges (for both the financial services and health insurance domains), Hold Requests, Refund Requests, Write Off Requests, Bill Group Sort Records, and Bill Group Derivation and Pricing Parameters Records. It also allows you to upload data for updating the following entities:

- Contract rider details of a contract
- Bill cycle of an account

Note: The above mentioned entities, such as Bill Group Sort Record, Bill Group Derivation and Pricing Parameters Record, and Contract Rider are applicable only for the health insurance business.

In addition, you can reinstate multiple fully insured group policies and cancel payment tenders through the **Upload Request** feature.

While uploading a CSV file, you need to specify distinct upload request type using which you want to create the upload request. For more information, see Upload Request Type. An upload request goes through various statuses in its lifecycle. Note that lifecycle of an upload request is driven by the business object using which the upload request is created. We have shipped the following upload request business objects:

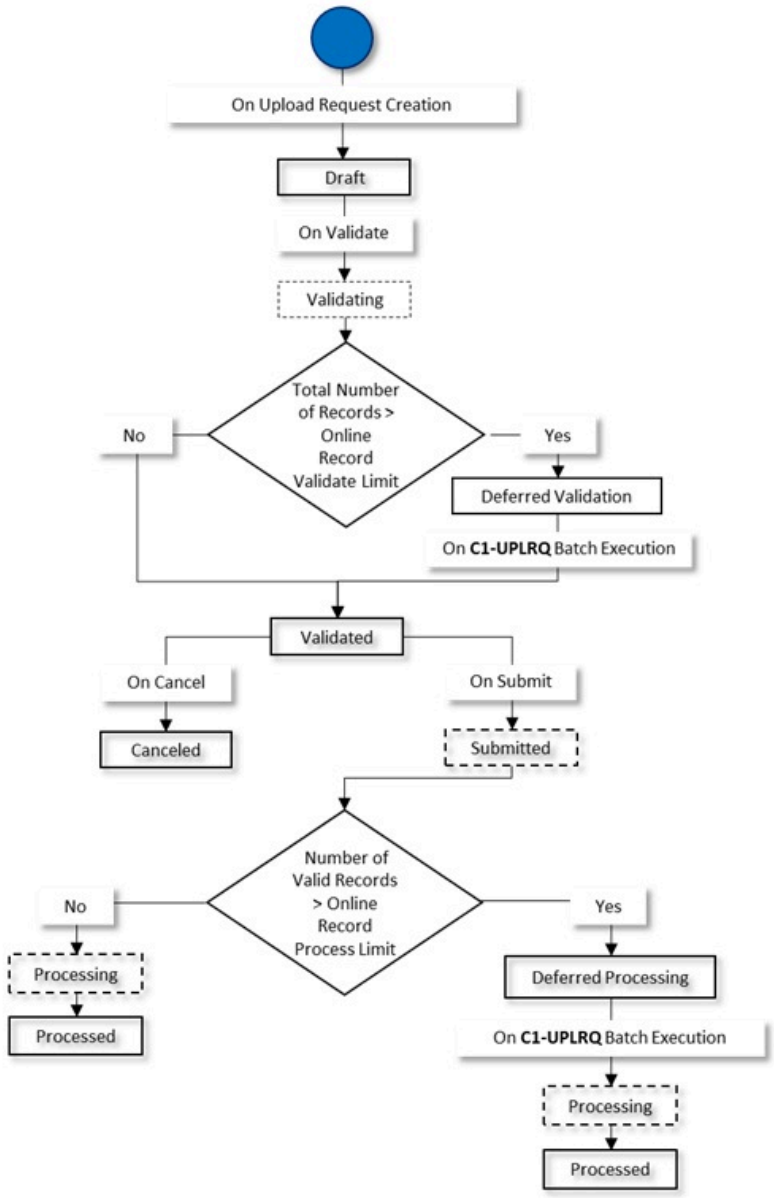
- Bill Cycle Update Upload (i.e., C1-BillCycleUpdateUplReq)
- Billable Charge Upload (i.e., C1-BillableChargeUploadRequest)
- Hold Request Upload (i.e., C1-HoldUploadRequest)
- Refund Request Upload (i.e., C1-RefundUploadRequest)
- Tender Cancelation Upload Request (i.e., C1-TndrCnclUploadRequest)

- Write Off Request Upload (i.e., C1-WriteOffUploadRequest)

Each upload request feature explained in this document is articulated based on the lifecycle and logic defined in the respective business object.

Upload Request (Without Approval) Status Transition

The following figure graphically indicates how an upload request moves from one status to another when the approval process is not configured in the upload request type:



Note:

The **Deferred Validation** mechanism is only supported in those upload requests which are created using the following business objects:

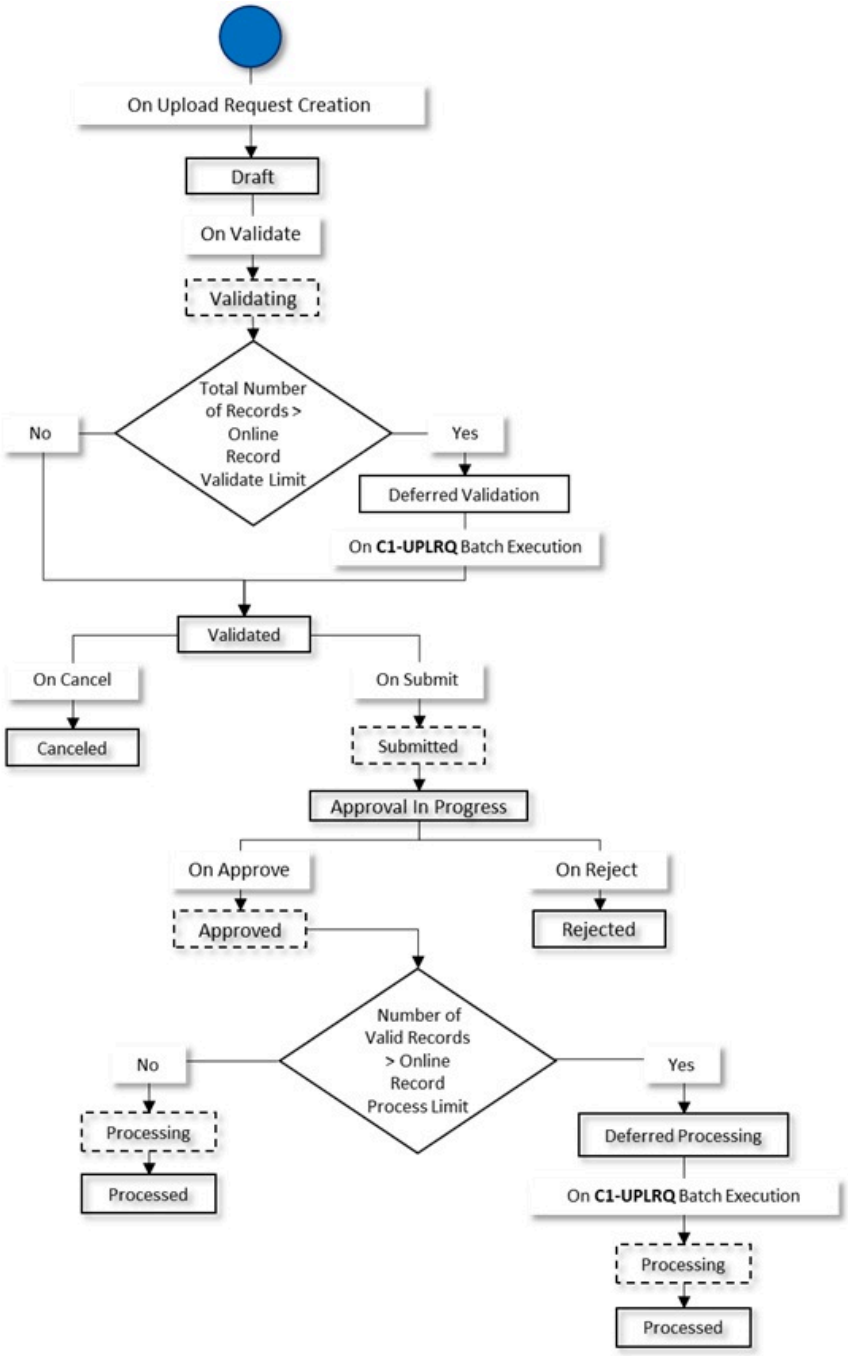
- C1-HoldUploadRequest
- C1-RefundUploadRequest
- C1-WriteOffUploadRequest
- C1-BillableChargeUploadRequest
- C1-TndrCnclUploadRequest

Therefore, these upload requests would transition from the **Draft** status to the **Validating** status and then to either the **Validated** or **Deferred Validation** status in its lifecycle. However, the upload requests created using the following business objects will directly move from the **Draft** status to the **Validated** status:

- C1-BillCycleUpdateUplReq

Upload Request (With Approval) Status Transition

The following figure graphically indicates how an upload request moves from one status to another when the approval process is configured in the upload request type:



Note:

The **Deferred Validation** mechanism is only supported in those upload requests which are created using the following business objects:

- C1-HoldUploadRequest
- C1-RefundUploadRequest
- C1-WriteOffUploadRequest
- C1-BillableChargeUploadRequest
- C1-TndrCnclUploadRequest

Therefore, these upload requests would transition from the **Draft** status to the **Validating** status and then to either the **Validated** or **Deferred Validation** status in its lifecycle. However, the upload requests created using the following business objects will directly move from the **Draft** status to the **Validated** status:

- C1-BillCycleUpdateUplReq

Mass Accounts' Bill Cycle Update

Oracle Revenue Management and Billing provides the ability to update the bill cycle of multiple accounts at once through the **Upload Request** feature. The **C1-BillCycleUpdateUplReq** business object enables you to create an upload request for mass accounts' bill cycle update.

You need to create an upload request type for the **C1-BillCycleUpdateUplReq** business object. You can then upload a mass accounts' bill cycle update file in the CSV format using the respective upload request type. The mass accounts' bill cycle update file should contain records with the following information – account identifier details or account ID and bill cycle. For more information, see Mass Accounts' Bill Cycle Update CSV Format.

On uploading a mass accounts' bill cycle update file, the system creates an upload request in the **Draft** status. The data records are created in the **Pending** status. The system validates the following for each record:

- Either the account ID or account identifier type and account identifier is specified in the record.
- Bill cycle is specified in the record.

If the account ID is not specified in the record, the system derives the account ID using the respective account identifier type and account identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record is changed to **Invalid**.

Note:

If the bill cycle is missing in any record of the file, the system will not allow you to create an upload request.

The system does not allow you to upload a file which exceeds 700 KB. Therefore, you must ensure that the file size is within the maximum limit.

On clicking the **Validate** button, the system validates the following:

- The account ID given in the record is valid.
- The bill cycle given in the record is valid.
- The given bill cycle is associated to the division of the account.
- The two or more records with the same account ID do not exist in the upload request.

Note:

If the account ID is invalid, the system derives the account ID using the respective account identifier type and account identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**.

If duplicate records exist in the upload request, the system validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record is changed to **Invalid**. However, if all the above validations are successful, the status of the record is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

On clicking the **Submit** button, the system checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

The approver can either approve or reject the upload request based on the observations. On approving an upload request, the status of the upload request is changed to **Approved**. However, on rejecting an upload request, the status of the upload request is changed to **Rejected**.

Once the status of the upload request is changed to **Submitted** or **Approved**, the system checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**.

However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**. The system then changes the status of the upload request from **Deferred Processing** to **Processing** when the **C1-UPLRQ** batch is executed.

Once the status of the upload request is changed to **Processing**, the system fetches a list of records which are in the **Valid** status. For each valid record, the system updates the bill cycle of the respective account.

Once the account is successfully updated, the status of the record is changed to **Processed**. However, if any error occurs while updating the account, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note:

The system updates the account using the entity business object specified in the respective upload request type.

This feature is tested and certified for both the financial services and health insurance domains.

Prerequisites

To setup the mass accounts' bill cycle update feature, you need to do the following:

- Define the required upload request type where the upload request business object is set to **C1-BillCycleUpdateUplReq**.
- Assign the **C1-BCUUR** To Do type to a To Do role whose users must receive a To Do while submitting an accounts' bill cycle update upload request for approval.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the required foreign key reference for account (if not available) in the system.
- Define the status reasons for the **Canceled** and **Rejected** statuses of the **C1-BillCycleUpdateUplReq** business object in the **Status Reason** screen.
- Define the required account identifier types and bill cycles in the system.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

Algorithms Used in C1-BillCycleUpdateUplReq

The following table lists the algorithms which are used in the lifecycle of the **C1-BillCycleUpdateUplReq** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-BCU-DERIV	C1-BCU-DERIV	Refer to C1-BCU-DERIV on page 1975.
Validated	Enter	C1-BCU-VALID	C1-BCU-VALID	Refer to C1-BCU-VALID on page 1976.

C1-BCU-DERIV

This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to **Pending**.

It validates the following:

- Either the account ID or account identifier type and account identifier is specified in the record.
- Bill cycle is specified in the record.

If the account ID is not specified in the record, it derives the account ID using the respective account identifier type and account identifier combination. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and

account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

This algorithm also derives the fields which can be used as search filters based on the mapping defined in the respective upload request type.

C1-BCU-VALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It validates the following:

- The account ID given in the record is valid.

  Note: If the account ID is invalid, it derives the account ID using the respective account identifier type and account identifier combination. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.
- The bill cycle given in the record is valid.
- The given bill cycle is associated to the division of the account.
- The two or more records with the same account ID do not exist in the upload request.

  Note: If duplicate records exist in the upload request, it validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. However, if all the above validations are successful, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

Note: If there are no pending records while validating an upload request, a message appears indicating that there are no records to be validated. In such case, you can only delete an upload request.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, it changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, it changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e., immediately). This parameter is mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.

- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-UPLAPPENT

This algorithm is invoked when the status of the upload request is changed to **Approval In Progress**. It creates a To Do using the approval To Do type that is specified in the respective upload request type. Once a To Do is created, it is assigned to all the users with the approval To Do role that is specified in the respective upload request type. In addition, it creates a log entry for the upload request when the To Do is created for the approver.

C1-UPLAPPEXT

This algorithm is invoked when the user clicks the **Approve** or **Reject** button. It checks whether the approver is associated with the approval To Do role specified in the respective upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-BCU-PROC

This algorithm is invoked when the status of the upload request is changed to **Processing**. It fetches a list of records which are in the **Valid** status. For each valid record, this algorithm updates the bill cycle of the account.

Note: The system updates the account using the entity business object specified in the respective upload request type.

If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Mass Accounts' Bill Cycle Update CSV Format

The following table lists and describes the columns that should be available in the CSV file while updating bill cycle of multiple accounts at once through an upload request:

Sr. No.	Column Name	Description	Mandatory (Yes or No)
1	Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional)

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		Note: You must specify an account identifier type which is already defined in the system.	**Note:** This data is required when the account ID is not specified in the record.
2	Account Identifier	Used to specify the account identifier. **Note:** The system derives the account using the given account identifier type and account identifier combination when the account ID is either not specified or is invalid in the record.	Yes (Conditional) **Note:** This data is required when the account ID is not specified in the record.
3	Account ID	Used to indicate the account whose bill cycle you want to update.	Yes (Conditional) **Note:** This data is required when the account identifier type and account identifier are not specified in the record.
4	Bill Cycle	Used to specify the bill cycle. **Note:** You must specify a bill cycle which is already defined in the system. In addition, you must ensure that the specified bill cycle is already associated with the division of the account.	Yes

Note:

The CSV file should contain the columns in the above mentioned sequence.

Before uploading the file, ensure that the column headers specified in the CSV file are mapped to the schema of the respective upload request business object through data mapping in the upload request type. Otherwise, erroneous results might occur. For more information, see Mapping Data and Configuring Filters for an Upload Request Type on page 1497.

Sample Mass Accounts' Bill Cycle Update CSV File

```
Account Identifier Type,Account Identifier,Account ID,Bill Cycle
,,6566765667,BC01
IBAN,XX 80 WEST 123456 98765432,,BC02
```

Mass Billable Charge Creation (Financial Services)

Oracle Revenue Management and Billing provides the ability to create multiple billable charges for the financial services business at once through the **Upload Request** feature. You can create adhoc pass-through and SQI based billable charges and regular pass-through and SQI based billable charges through an upload request. To create a

pass-through billable charge, you need to specify at least one pass-through charge line details. Similarly, to create an SQI based billable charge, you need to specify at least one SQI based charge details. The adhoc billable charges are considered during adhoc billing whereas the regular billable charges are considered during regular billing cycle. You can also create non-recurring (i.e., one-time) and recurring billable charges through an upload request.

Note: At present, you can only create new billable charges and not update existing billable charges through the **Upload Request** feature.

The **C1-BillableChargeUploadRequest** business object enables you to create an upload request for mass billable charge creation. You need to create an upload request type for the **C1-BillableChargeUploadRequest** business object. You can then upload a mass billable charge creation file in the CSV format using the respective upload request type. The mass billable charge creation file should contain records with the following information – Contract or account details, start date, end date, description on bill, recurring details, pass-through charge line details or SQI based charge details, pricing information, and characteristic details. For more information, see Mass Billable Charge Creation CSV Format (Financial Services).

Note:

You must specify either pass-through charge lines or SQI details in the record.

You can specify maximum 5 pass-through charge lines or SQIs in the record.

You can specify maximum 15 price item parameters in the record.

You can specify maximum 20 characteristics in the record.

On uploading a mass billable charge creation file, the system creates an upload request in the **Draft** status. The data records are created in the **Pending** status. The system validates the following for each record:

- Start date, end date, and description on bill are specified in the record.
- Price item is specified in the record.
- Either the account details or contract ID is specified in the record.
- Either the account ID or account identifier type and account identifier is specified in the record.

If the contract ID is not specified in the record, the system derives an active contract of the account which is effective for the given date range. It considers that contract which is created using the contract type where the payment priority is set to highest, and the **Eligible for Billing** option is selected. If there are multiple active effective contracts with the same priority, the system considers any one contract randomly. However, if no active contract exists for the account for the given date range with the required specifications, the status of the record is changed to **Invalid**.

If the contract ID and account ID are not specified in the record, the system derives the account ID using the respective account identifier type and account identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record is changed to **Invalid**.

Note: The system does not allow you to upload a file which exceeds 700 KB. Therefore, you must ensure that the file size is within the maximum limit.

On clicking the **Validate** button, the system checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, the system validates the following in the real time:

- The account ID given in the record is valid.
- The billable charge's start date is equal to or later than the contract start date and earlier than or equal to the contract end date.
- The billable charge's start date is equal to or earlier than the billable charge's end date.
- The billable charge's end date is equal to or later than the billable charge's start date.
- At least one pass-through charge line or SQ based charge details is specified in the record.
- The **Description on Bill**, **Amount**, and **Currency** are specified when the record contains pass-through charge line details.
- The **SQI** and **SQI Value** are specified when the record contains SQ based charge details.
- The distribution code is required when the **Memo Only** flag of the respective pass-through charge line is set to **N**.

- The distribution code is not specified when the **Memo Only** flag of the respective pass-through charge line is set to **Y**.
- The distribution code given in the record is valid.
- The currency code given in the record is valid.
- The amount matches the decimal positions of the respective currency.
- The SQI given in the record is valid.
- The same SQI is not repeated multiple times in the record.
- The contract ID given in the record is valid and is not in the **Canceled** status.
- If both the account ID and contract ID are given in the record, the contract belongs to the account.
- The charge type given in the record is valid.
- The price item given in the record is valid.
- The **Price Item Usage** flag of the price item is set to **Pricing and Billing**.
- The contract type considered for billing should match the contract type specified in the price item.
- If the **Use Calendar Billing** field in the contract type is not set to **Allow Advanced Billing**, then bill after date is not earlier than the contract start date.
- The recurring flag in the record is either set to **BP** or **FR**.
- If the recurring flag is set to **BP**, then the bill period given in the record is valid. However, if the recurring flag is set to **FR**, then the frequency given in the record is valid.
- If the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **TRUE**, then only the price item is given in the record.
- The price item parameters are not specified when the price item is not given in the record.
- The same price item parameter is not repeated multiple times in the record.
- The characteristic type given in the record is valid and its characteristic entity is set to **Billable Charge**.
- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.
- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.
- The mandatory parameter of the price item is included in the record when the billable charge start and end dates fall within the price item parameter date range.

  Note: If the billable charge start and end dates do not fall within the price item parameter date range, the billable charge can be created without the mandatory price item parameter.
- The adhoc, predefined, and reference price item parameter values are valid.
- The source entity of the price item parameter is set to **Transaction**.
- Both the price item parameter and its value are given in the record.
- The price item parameter should be valid for the price item in the given date range.
- The adhoc bill value in the record is either set to **Y** or **N**.

Note:

If the account ID is invalid, the system derives the account ID using the respective account identifier type and account identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**.

If duplicate records exist in the upload request, the system validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record is changed to **Invalid**. However, if all the above validations are successful, the status of the record is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

However, if the total number of records in the upload request exceeds the online record validate limit, the system changes the status of the upload request to **Deferred Validation**. The system then validates the records and changes the status of the upload request from **Deferred Validation** to **Validated** when the **C1-UPLRQ** batch is executed.

On clicking the **Submit** button, the system checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**.

However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

The approver can either approve or reject the upload request based on the observations. On approving an upload request, the status of the upload request is changed to **Approved**. However, on rejecting an upload request, the status of the upload request is changed to **Rejected**.

Once the status of the upload request is changed to **Submitted** or **Approved**, the system checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**. The system then changes the status of the upload request from **Deferred Processing** to **Processing** when the **C1-UPLRQ** batch is executed.

Once the status of the upload request is changed to **Processing**, the system fetches a list of records which are in the **Valid** status. For each valid record, the system creates a billable charge against the contract. The status of the billable charge is set to **Billable**.

Once the billable charge is successfully created, the status of the record is changed to **Processed**. However, if any error occurs while creating the billable charge, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note:

The system creates the billable charge using the entity business object specified in the respective upload request type.

This feature is tested and certified for the financial services domain.

Prerequisites

To setup the mass billable charge creation feature for the financial services business, you need to do the following:

- Define the required upload request type where the upload request business object is set to **C1-BillableChargeUploadRequest**.
- Assign the **C1-BCUR** To Do type to a To Do role whose users must receive a To Do while submitting a billable charge creation upload request for approval.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the required foreign key reference for billable charge (if not available) in the system.
- Define the status reasons for the **Canceled** and **Rejected** statuses of the **C1-BillableChargeUploadRequest** business object in the **Status Reason** screen.
- Define the required account identifier types, charge types, bill periods, invoice frequencies, currencies, distribution codes, price items, and SQIs in the system.
- Define the required pricing parameters where the source entity is set to **Transaction**.
- Associate the required pricing parameters with the price items in the system.
- Define the pricing for the required price item and price item parameters combinations in the system.
- Define the required exchange rates in the system.
- Set the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **TRUE**.
- Define the required characteristic types where the characteristic entity is set to **Billable Charge**.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language

- Email Address

For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

C1-CRTUPLDTL

This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to **Pending**.

C1-BC-DERIV

This algorithm validates the following:

- Start date, end date, and description on bill are specified in the record.
- Price item is specified in the record.
- Either the account details or contract ID is specified in the record.
- Either the account ID or account identifier type and account identifier is specified in the record.

If the contract ID is not specified in the record, this algorithm derives an active contract of the account which is effective for the given date range. It considers that contract which is created using the contract type where the payment priority is set to highest, and the **Eligible for Billing** option is selected. If there are multiple active effective contracts with the same priority, this algorithm considers any one contract randomly. Once the contract ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. However, if no active contract exists for the account for the given date range with the required specifications, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

If the contract ID and account ID are not specified in the record, this algorithm derives the account ID using the respective account identifier type and account identifier combination. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

This algorithm also derives the fields which can be used as search filters based on the mapping defined in the respective upload request type.

C1-DEFERVALD

This algorithm is invoked when the user clicks the **Validate** button. It checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, it changes the status of the upload request to **Validated**. However, if the total number of records in the upload request exceeds the online record validate limit, it changes the status of the upload request to **Deferred Validation**.

It contains the following parameter:

- **Online Record Validate Limit** - Used to indicate the maximum number of records you can validate in the real time (i.e., immediately). This parameter is mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.

- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-BC-VALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It validates the following:

- The account ID given in the record is valid.

  Note: If the account ID is invalid, it derives the account ID using the respective account identifier type and account identifier combination. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.
- The billable charge's start date is equal to or later than the contract start date and earlier than or equal to the contract end date.
- The billable charge's start date is equal to or earlier than the billable charge's end date.
- The billable charge's end date is equal to or later than the billable charge's start date.
- At least one pass-through charge line or SQ based charge details is specified in the record.
- The **Description on Bill**, **Amount**, and **Currency** are specified when the record contains pass-through charge line details.
- The **SQI** and **SQI Value** are specified when the record contains SQ based charge details.
- The distribution code is required when the **Memo Only** flag of the respective pass-through charge line is set to **N**.
- The distribution code is not specified when the **Memo Only** flag of the respective pass-through charge line is set to **Y**.
- The distribution code given in the record is valid.
- The currency code given in the record is valid.
- The amount matches the decimal positions of the respective currency.
- The SQI given in the record is valid.
- The same SQI is not repeated multiple times in the record.
- The contract ID given in the record is valid and is not in the **Canceled** status.
- If both the account ID and contract ID are given in the record, the contract belongs to the account.
- The charge type given in the record is valid.
- The price item given in the record is valid.
- The **Price Item Usage** flag of the price item is set to **Pricing and Billing**.
- The contract type considered for billing should match the contract type specified in the price item.
- If the **Use Calendar Billing** field in the contract type is not set to **Allow Advanced Billing**, then bill after date is not earlier than the contract start date.
- The recurring flag in the record is either set to **BP** or **FR**.
- If the recurring flag is set to **BP**, then the bill period given in the record is valid. However, if the recurring flag is set to **FR**, then the frequency given in the record is valid.
- If the **Multi Price Parameter** option type of the **C1_PPARM_FLG** feature configuration is set to **TRUE**, then only the price item is given in the record.
- The price item parameters are not specified when the price item is not given in the record.
- The same price item parameter is not repeated multiple times in the record.
- The characteristic type given in the record is valid and its characteristic entity is set to **Billable Charge**.
- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.
- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.

- The mandatory parameter of the price item is included in the record when the billable charge start and end dates fall within the price item parameter date range.

  Note: If the billable charge start and end dates do not fall within the price item parameter date range, the billable charge can be created without the mandatory price item parameter.
- The adhoc, predefined, and reference price item parameter values are valid.
- The source entity of the price item parameter is set to **Transaction**.
- Both the price item parameter and its value are given in the record.
- The price item parameter should be valid for the price item in the given date range.
- The adhoc bill value in the record is either set to **Y** or **N**.

If any of above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. However, if all the above validations are successful, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

Note: If there are no pending records while validating an upload request, a message appears indicating that there are no records to be validated. In such case, you can only delete an upload request.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, it changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, it changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e., immediately). This parameter is mandatory.

C1-UPLAPPENT

This algorithm is invoked when the status of the upload request is changed to **Approval In Progress**. It creates a To Do using the approval To Do type that is specified in the respective upload request type. Once a To Do is created, it is assigned to all the users with the approval To Do role that is specified in the respective upload request type. In addition, it creates a log entry for the upload request when the To Do is created for the approver.

C1-UPLAPPEXT

This algorithm is invoked when the user clicks the **Approve** or **Reject** button. It checks whether the approver is associated with the approval To Do role specified in the respective upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

  Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-BC-PROC

This algorithm is invoked when the status of the upload request is changed to **Processing**. It fetches a list of records which are in the **Valid** status.

This algorithm behaves differently when invoked from two different business objects - **C1-BillableChargeUploadRequest** and **C1-BillableChargeUploadFI**. It does the following when invoked from the respective business object:

- **C1-BillableChargeUploadRequest** - For each valid record, this algorithm creates a billable charge against the contract.
- **C1-BillableChargeUploadFI** - For each valid record, this algorithm checks whether the membership ID is available in the record. If so, it creates a billable charge against the contract at the respective group or individual membership level. It then stamps the membership ID as a characteristic on the billable charge. While stamping the characteristic, it considers the characteristic type specified in the **Membership ID Characteristic for Billable Charge** option type of the **C1-ASOBLLNG** feature configuration.

  However, if the membership ID is not available in the record, this algorithm checks whether the characteristic type specified in the **Plan Id Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration is available in the record. If so, it creates a billable charge against the contract at the respective policy plan level. It then stamps the policy plan ID as a characteristic on the billable charge. While stamping the characteristic, it considers the characteristic type specified in the **Plan Id Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration.

  If the characteristic type specified in the **Plan Id Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration is not available in the record but if the contract ID is available in the record, the system creates a billable charge against the contract.

Note: The system creates the billable charge using the entity business object specified in the respective upload request type.

Finally, the status of the billable charge is set to **Billable**. If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Mass Billable Charge Creation CSV Format

The following table lists and describes the columns that should be available in the CSV file while creating multiple billable charges for the financial services business at once through an upload request:

Sr. No.	Column Name	Description	Mandatory (Yes or No)
1	Account Identifier Type	Used to specify the account identifier type. **Note:** You must specify an account identifier type which is already defined in the system.	Yes (Conditional) **Note:** This data is required when the account ID and contract ID are

Sr. No.	Column Name	Description	Mandatory (Yes or No)
			not specified in the record.
2	Account Identifier	Used to specify the account identifier. **Note:** The system derives the account using the given account identifier type and account identifier combination when the account ID is either not specified or is invalid in the record.	Yes (Conditional) **Note:** This data is required when the account ID and contract ID are not specified in the record.
3	Account ID	Used to indicate the account for which you want to create the billable charge.	Yes (Conditional) **Note:** This data is required when the following conditions are met: • Account identifier type and account identifier are not specified in the record. • Contract ID is not specified in the record.
4	Contract ID	Used to indicate the contract against which you want to create the billable charge. **Note:** If you do not specify the contract ID in the record, the system creates the billable charge against the account's contract which is created using the contract type where: • The payment priority is set to highest. • The **Eligible for Billing** option is selected. In addition, the contract type considered for billing should match the contract type specified in the price item.	Yes (Conditional) **Note:** This data is required when you want to create the billable charge against a specific contract of the account.
5	Start Date	Used to specify the start date of billable charge.	Yes

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		Note: You must specify the date in the **YYYY-MM-DD** format. The start date cannot be later than the end date.	
6	End Date	Used to specify the end date of billable charge. **Note:** You must specify the date in the **YYYY-MM-DD** format. The end date cannot be earlier than the start date.	Yes
7	Charge Type	Used to indicate the type of billable charge. **Note:** You must specify a charge type which is already defined in the system.	No
8	Description On Bill	Used to specify the summarized information about the charge that you want to print on the bill.	Yes
9	Recurring Flag	Used to indicate whether you want to create recurring bill segments for the charge. The valid values are: • **BP** - Used when you want to create recurring bill segments at the intervals defined in the bill period. • **FR** - Used when you want to create recurring bill segments at the set invoice frequency.	No
10	Frequency	Used to indicate the invoice frequency using which the system determines the intervals at which the recurring bill segments should be created for the billable charge. **Note:** You must specify an invoice frequency which is already defined in the system.	Yes (Conditional) **Note:** This data is required when the recurring flag is set to **FR**.
11	Bill Period	Used to indicate the bill period using which the system determines the intervals at which the recurring bill segments should be created for the billable charge. **Note:** You must specify a bill period which is already defined in the system.	Yes (Conditional) **Note:** This data is required when the recurring flag is set to **BP**.
12	Bill After	Used to specify the date after which the charge can be billed to the account. **Note:** You must specify the date in the **YYYY-MM-DD** format.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
13	Adhoc Bill	Used to indicate whether the billable charge should be considered during adhoc or regular billing. The valid values are: • **Y** - Used when you want to consider the billable charge during adhoc billing. • **N** - Used when you want to consider the billable charge during regular billing.	No
14	Description on Bill1, Description on Bill2, ..., Description on Bill5	Used to specify the description for the pass-through charge line. **Note:** You can specify maximum 5 pass-through charge lines in the record.	Yes (Conditional) **Note:** This data is required while creating a pass-through billable charge.
15	Amount1, Amount2, ..., Amount5	Used to specify the charge amount. **Note:** You must specify a number with decimal positions less than or equal to the decimal positions defined for the respective currency.	Yes (Conditional) **Note:** This data is required while creating a pass-through billable charge.
16	Currency1, Currency2, ..., Currency5	Used to specify the currency in which the amount is charged. **Note:** You must specify a currency which is already defined in the system. If you specify a currency other than the account's invoice currency, the system will do the currency conversion if the appropriate exchange rate is available in the system.	Yes (Conditional) **Note:** This data is required while creating a pass-through billable charge.
17	Show On Bill1, Show on Bill2, ..., Show On Bill5	Used to indicate whether the charge should appear on the person's printed bill. The valid values are: • Y • N **Note:** If you do not specify this column value, by default, it is set to **Y**.	No
18	Memo Only1, Memo Only2, ..., Memo Only5	Used to indicate whether the charge should not be included in the bill amount. The valid values are: • Y • N **Note:** If you do not specify this column value, by default, it is set to **N**.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
19	Appears in Summary1, Appears in Summary2, ..., Appears in Summary5	Used to indicate whether the charge should be included in the summary line. The valid values are: • Y • N **Note:** If you do not specify this column value, by default, it is set to **N**.	No
20	Distribution Code1, Distribution Code2, ..., Distribution Code5	Used to specify the distribution code that indicates the GL account where the pass-through charge should be posted. **Note:** You must specify a distribution code which is already defined in the system.	Yes (Conditional) **Note:** This data is required when the memo only flag of the pass-through charge line is set to **N**.
49	Price Item	Used to indicate the price item for which you want to create the billable charge. **Note:** You must specify a price item which is already defined in the system.	Yes
50	Variance Parameter	Variance parameter (i.e., TOU) based pricing is deprecated and no longer supported in ORMB. Therefore, you should keep this column blank in the CSV file.	Not applicable
51	Price Item Parameter1, Price Item Parameter2, ..., Price Item Parameter15	Used to indicate the price item parameter that you want to use along with the price item for determining the price item pricing. **Note:** This column value should not contain the **Equal To** (=) or **Tilde** (~) symbol. You must specify the mandatory parameters of the price item when the billable charge start and end dates fall within the respective price item parameter date range. You must specify a parameter which is associated with the price item in the given date range. You can specify maximum 15 price item parameters in the record.	Yes (Conditional) **Note:** This data is required when the price item parameter value is specified in the record.
52	Price Item Parameter ValueSQI1, Price Item Parameter Value2, ..., Price Item Parameter Value15	Used to specify the parameter value. **Note:** This column value should not contain the **Equal To** (=) or **Tilde** (~) symbol.	Yes (Conditional) **Note:** This data is required when the price item parameter

Sr. No.	Column Name	Description	Mandatory (Yes or No)
			is specified in the record.
81	SQI1, SQI2, ..., SQI5	Used to indicate the service quantity identifier (SQI) using which you want to calculate the price item charge. **Note:** You must specify an SQI which is already defined in the system. You can specify maximum 5 SQIs in the record.	Yes (Conditional) **Note:** This data is required while creating an SQI based billable charge.
82	SQI Value1, SQI Value2, ..., SQI Value5	Used to specify the service quantity for which you want to create the charge. **Note:** You can specify a number with a maximum precision 36 and maximum scale 18 (i.e., Number(36, 18)).	Yes (Conditional) **Note:** This data is required while creating an SQI based billable charge.
91	Effective Date1, Effective Date2, ..., Effective Date20	Used to specify the date from when the characteristic is effective for the billable charge. **Note:** You must specify the date in the **YYYY-MM-DD** format.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.
92	Char Type1, Char Type2, ..., Char Type20	Used to specify the characteristic type. **Note:** You must specify a characteristic type where the characteristic entity is set to **Billable Charge**. You can specify maximum 20 characteristics in the record.	No
93	Char Value1, Char Value2, ..., Char Value20	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.

Note:

The CSV file should contain the columns in the above mentioned sequence. You can add five pass-through charge lines — each set containing Description on Bill, Amount, Currency, Show on Bill, Memo Only, Appears in Summary, and Distribution Code followed by the subsequent set (i.e., Description on Bill1, Amount1, Currency1, Show on Bill1, Memo Only1, Appears in Summary1, Distribution Code1, Description on Bill2, Amount2, Currency2, Show on Bill2, Memo Only2, Appears in Summary2, Distribution Code2, and so on). Similarly, you can add the following:

- 15 sets of pricing parameters — each set containing Price Item Parameter and Price Item Parameter Value followed by the subsequent set (i.e., Price Item Parameter1, Price Item Parameter Value1, Price Item Parameter2, Price Item Parameter Value2, and so on).
- 5 sets of SQ details — each set containing SQI and SQI Value followed by the subsequent set (i.e., SQI1, SQI Value1, SQI2, SQI Value2, and so on).
- 20 sets of characteristics — each set containing Effective Date, Char Type and Char Value followed by the subsequent set (i.e., Effective Date1, Char Type1, Char Val1, Effective Date2, Char Type2, Char Val2, and so on).

You must specify either pass-through charge lines or SQI details in the record.

Before uploading the file, ensure that the column headers specified in the CSV file are mapped to the schema of the respective upload request business object through data mapping in the upload request type. Otherwise, erroneous results might occur. For more information, see Mapping Data and Configuring Filters for an Upload Request Type on page 1497.

```

You cannot put partial hold on a bill through an upload request. The entire outstanding amount of the bill will be kept on hold.

On uploading a mass hold request creation file, the system creates an upload request in the **Draft** status. The data records are created in the **Pending** status. The system validates the following for each record:

- Hold request type, hold request start date, hold request end date, hold reason, and hold entity are specified in the record.
- If the hold entity is **ACCT**, either the account ID or account identifier type and account identifier is specified in the record.
- If the hold entity is **PERS**, either the person ID or person identifier type and person identifier is specified in the record.
- If the hold entity is **BILL**, the bill ID is specified in the record.

If the hold entity is **ACCT** and the entity ID is not specified in the record, the system derives the account ID using the respective account identifier type and account identifier combination. Similarly, if the hold entity is **PERS** and the entity ID is not specified in the record, the system derives the person ID using the respective person identifier type and person identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination or if the system could not derive the person ID using the person identifier type and person identifier combination, the status of the record is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record is changed to **Invalid**.

Note:

If the mandatory data is missing in any record of the file, the system will not allow you to create an upload request.

The system does not allow you to upload a file which exceeds 700 KB. Therefore, you must ensure that the file size is within the maximum limit.

On clicking the **Validate** button, the system checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, the system validates the following in the real time:

- The hold request type given in the record is valid and active in the system.
- The hold reason is a valid and active value of the **HOLD_REASON_FLG** lookup field.
- The hold entity is a valid and active value of the **HOLD_ENTITY_LVL_FLG** lookup field.
- The account ID given in the record is valid when the hold entity is **ACCT**.
- The person ID given in the record is valid when the hold entity is **PERS**.
- The bill ID given in the record is valid when the hold entity is **BILL**, and the outstanding amount of the bill is not equal to zero.
- The process's start and end dates are within the hold request start and end dates.
- The entity's start and end dates are within the hold request start and end dates.
- The entity's start and end dates should fall within at least one process's start and end dates.
- At least one process is kept on hold for the entity in the record.
- The value of each hold process in the record is set to either **Y** or **N**.
- The hold request start and end dates are set to either the system date or a future date.
- The start dates are not later than the end dates and the end dates are not earlier than the start dates.
- The same entity is not already kept on hold with the same hold reason through an existing draft or active hold request.
- The **Overdue**, **Auto Pay**, and **Refund** processes are not set to **Y** when the hold entity is set to **PERS**.
- The **Bill Generation**, **Overdue**, **Auto Pay**, **Refund**, and **Delinquency** processes are not set to **Y** when the hold entity is set to **BILL**.
- Both the **Overdue** and **Delinquency** processes are not set to **Y** at the same time in the record.

  Note: The **Overdue** process is valid for the financial services and health insurance domains, but the **Delinquency** process is valid only for the health insurance domain.
- The characteristic type given in the record is valid and its characteristic entity is set to **Hold Request**.

- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.
- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.
- The two or more records with the same entity ID do not exist in the upload request.

Note:

If the account ID is invalid, the system derives the account ID using the respective account identifier type and account identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**.

If the person ID is invalid, the system derives the person ID using the respective person identifier type and person identifier combination. If the system could not derive the person ID using the person identifier type and person identifier combination, the status of the record is changed to **Invalid**.

If duplicate records exist in the upload request, the system validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record is changed to **Invalid**. However, if all the above validations are successful, the status of the record is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

However, if the total number of records in the upload request exceeds the online record validate limit, the system changes the status of the upload request to **Deferred Validation**. The system then validates the records and changes the status of the upload request from **Deferred Validation** to **Validated** when the **C1-UPLRQ** batch is executed.

On clicking the **Submit** button, the system checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

The approver can either approve or reject the upload request based on the observations. On approving an upload request, the status of the upload request is changed to **Approved**. However, on rejecting an upload request, the status of the upload request is changed to **Rejected**.

Once the status of the upload request is changed to **Submitted** or **Approved**, the system checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**. The system then changes the status of the upload request from **Deferred Processing** to **Processing** when the **C1-UPLRQ** batch is executed.

Once the status of the upload request is changed to **Processing**, the system fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the hold request type, hold request start date, hold request end date, hold reason, hold entity, hold entity start date, hold entity end date, comments, hold process details, and hold characteristic details, the system creates a hold request for the entity (i.e., person, account, or bill). However, if there are multiple entity IDs with the same combination, the system adds all the entities in the same hold request.

Note: If the **Include Hierarchy** flag is set to **Y** in the record where the entity level is set to **Person**, the system includes all the accounts of the person's hierarchy in the hold request. Note that the system considers only the child persons and not the grandchild persons from the person's hierarchy and then derives the accounts where the child person is the main customer. However, if the **Include Hierarchy** flag is set to **N** in the record where the entity level is set to **Person**, the system includes only the persons' immediate accounts in the hold request.

If the **Activation Approval** option is selected in the respective hold request type, the status of the hold request is set to **Activation Approval In Progress**. However, if the **Activation Approval** option is not selected in the respective hold request type, the system checks the number of entities added in the hold request. If the number of entities added in the hold request does not exceed the defer processing count (specified in the hold request type), the status of the hold request is set to **Active**. However, if the number of entities added in the hold request exceeds the defer processing count, the status of the hold request is set to **Deferred Processing**.

Once the hold request is successfully created, the status of the record is changed to **Processed**. However, if any error occurs while creating the hold request, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note:

The system creates the hold request using the entity business object specified in the respective upload request type.

This feature is tested and certified for both the financial services and health insurance domains.

You cannot add entities and processes in the hold request from the user interface when it is created through the **Upload Request** feature.

While creating a hold request through the **Upload Request** feature, the system sets the creation mode of the hold request to **Automatic**.

The approver does not have the option to request the submitter to resubmit the hold activation request when the hold request is created through the **Upload Request** feature. Therefore, if an approver finds some invalid data in the hold request (created via an upload request), the approver must reject such hold request.

Prerequisites

To setup the mass hold request creation feature, you need to do the following:

- Define the required upload request type where the upload request business object is set to **C1-HoldUploadRequest**.
- Assign the **C1-HLDUR** To Do type to a To Do role whose users must receive a To Do while submitting a hold request creation upload request for approval.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the required foreign key reference for hold request (if not available) in the system.
- Define the status reasons for the **Canceled** and **Rejected** statuses of the **C1-HoldUploadRequest** business object in the **Status Reason** screen.
- Define the required hold request types in the system.
- Define the required person or account identifier types in the system.
- Ensure that the entities (i.e., person, account, or bill) that you want to keep on hold through a hold request should exist in the system.
- Define the required values for the **HOLD_REASON_FLG**, **HOLD_ENTITY_LVL_FLG**, and **HOLD_PROCESS_FLG** lookup fields.
- Define the required characteristic types where the characteristic entity is set to **Hold Request**.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

Algorithms Used in C1-HoldUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-HoldUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-HLD-DERIV	C1-HLD-DERIV	Refer to C1-HLD-DERIV on page 1996.
Validating	Enter	C1-DEFERVALD	C1-DEFERVALD	Refer to C1-DEFERVALD on page 1983.
Deferred Validation	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Validated	Enter	C1-HLD-VALID	C1-HLD-VALID	Refer to C1-HLD-VALID on page 1997.

C1-HLD-DERIV

This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to **Pending**.

It validates the following:

- Hold request type, hold request start date, hold request end date, hold reason, and hold entity are specified in the record.
- If the hold entity is **ACCT**, either the account ID or account identifier type and account identifier is specified in the record.
- If the hold entity is **PERS**, either the person ID or person identifier type and person identifier is specified in the record.

- If the hold entity is **BILL**, the bill ID is specified in the record.

If the hold entity is **ACCT** and the entity ID is not specified in the record, this algorithm derives the account ID using the respective account identifier type and account identifier combination. Similarly, if the hold entity is **PERS** and the entity ID is not specified in the record, it derives the person ID using the respective person identifier type and person identifier combination. Once the account ID or person ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination or if the system could not derive the person ID using the person identifier type and person identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

This algorithm also derives the fields which can be used as search filters based on the mapping defined in the respective upload request type.

C1-DEFERVALD

This algorithm is invoked when the user clicks the **Validate** button. It checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, it changes the status of the upload request to **Validated**. However, if the total number of records in the upload request exceeds the online record validate limit, it changes the status of the upload request to **Deferred Validation**.

It contains the following parameter:

- **Online Record Validate Limit** - Used to indicate the maximum number of records you can validate in the real time (i.e., immediately). This parameter is mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-HLD-VALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It validates the following:

- The hold request type given in the record is valid and active in the system.
- The hold reason is a valid and active value of the **HOLD_REASON_FLG** lookup field.
- The hold entity is a valid and active value of the **HOLD_ENTITY_LVL_FLG** lookup field.
- The account ID given in the record is valid when the hold entity is **ACCT**.

Note: If the account ID is invalid, it derives the account ID using the respective account identifier type and account identifier combination. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

- The person ID given in the record is valid when the hold entity is **PERS**.

Note: If the person ID is invalid, it derives the person ID using the respective person identifier type and person identifier combination. Once the person ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the person ID using the person identifier

type and person identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

- The bill ID given in the record is valid when the hold entity is **BILL**, and the outstanding amount of the bill is not equal to zero.
- The process's start and end dates are within the hold request start and end dates.
- The entity's start and end dates are within the hold request start and end dates.
- The entity's start and end dates should fall within at least one process's start and end dates.
- At least one process is kept on hold for the entity in the record.
- The value of each hold process in the record is set to either **Y** or **N**.
- The hold request start and end dates are set to either the system date or a future date.
- The start dates are not later than the end dates and the end dates are not earlier than the start dates.
- The same entity is not already kept on hold with the same hold reason through an existing draft or active hold request.
- The **Overdue**, **Auto Pay**, and **Refund** processes are not set to **Y** when the hold entity is set to **PERS**.
- The **Bill Generation**, **Overdue**, **Auto Pay**, **Refund**, and **Delinquency** processes are not set to **Y** when the hold entity is set to **BILL**.
- Both the **Overdue** and **Delinquency** processes are not set to **Y** at the same time in the record.

Note: The **Overdue** process is valid for the financial services and health insurance domains, but the **Delinquency** process is valid only for the health insurance domain.

- The characteristic type given in the record is valid and its characteristic entity is set to **Hold Request**.
- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.
- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.
- The two or more records with the same entity ID do not exist in the upload request.

Note: If duplicate records exist in the upload request, it validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. However, if all the above validations are successful, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

Note: If there are no pending records while validating an upload request, a message appears indicating that there are no records to be validated. In such case, you can only delete an upload request.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, it changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, it changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e., immediately). This parameter is mandatory.

C1-UPLAPPENT

This algorithm is invoked when the status of the upload request is changed to **Approval In Progress**. It creates a To Do using the approval To Do type that is specified in the respective upload request type. Once a To Do is created, it is assigned to all the users with the approval To Do role that is specified in the respective upload request type. In addition, it creates a log entry for the upload request when the To Do is created for the approver.

C1-UPLAPPEXT

This algorithm is invoked when the user clicks the **Approve** or **Reject** button. It checks whether the approver is associated with the approval To Do role specified in the respective upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-HLD-PROC

This algorithm is invoked when the status of the upload request is changed to **Processing**. It fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the hold request type, hold request start date, hold request end date, hold reason, hold entity, hold entity start date, hold entity end date, comments, hold process details, and hold characteristic details, it creates one hold request using the entity business object specified in the upload request type. However, if there are multiple entity IDs with the same combination, it adds all the entities in the same hold request.

Note: The system creates the hold request using the entity business object specified in the respective upload request type.

If the **Activation Approval** option is selected in the respective hold request type, the status of the hold request is set to **Activation Approval In Progress**. However, if the **Activation Approval** option is not selected in the respective hold request type, the system checks the number of entities added in the hold request. If the number of entities added in the hold request does not exceed the defer processing count, the status of the hold request is set to **Active**. However, if the number of entities added in the hold request exceeds the defer processing count, the status of the hold request is set to **Deferred Processing**.

If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Mass Hold Request Creation CSV Format

The following table lists and describes the columns that should be available in the CSV file while creating mass hold requests through an upload request:

Sr. No.	Column Name	Description	Mandatory (Yes or No)
1	Hold Request Type	Used to specify the hold request type using which you want to create the hold request. **Note:** You must specify a hold request type which is already defined in the system. It should be in the **Active** status.	Yes
2	Start Date	Used to specify the date from when the hold request is effective. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold request start date should be set to the system date or a future date. It cannot be a past date. The hold request start date cannot be later than the hold request end date.	Yes
3	End Date	Used to specify the date till when the hold request is effective. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold request end date should be set to the system date or a future date. It cannot be a past date. The hold request end date cannot be earlier than the hold request start date.	Yes
4	Hold Reason	Used to indicate the reason why you want to hold the entity. **Note:** You must specify a value which is already defined in the **HOLD_REASON_FLG** lookup field. It should be in the **Active** status.	Yes
5	Hold Entity	Used to indicate the type of the entity for which you want to create the hold request. The valid values are: • ACCT • BILL • PERS **Note:** You must specify a value which is already defined in the **HOLD_ENTITY_LVL_FLG** lookup field. It should be in the **Active** status.	Yes
6	Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional)

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		Note: You must specify an account identifier type which is already defined in the system.	**Note:** This data is required when the hold entity is set to **ACCT** and the hold entity ID is not specified in the record.
7	Account Identifier	Used to specify the account identifier. The system will derive the account using the given account identifier type and account identifier combination and then create a hold request for the respective account.	Yes (Conditional) **Note:** This data is required when the hold entity is set to **ACCT** and the hold entity ID is not specified in the record.
8	Person Identifier Type	Used to specify the person identifier type. **Note:** You must specify a person identifier type which is already defined in the system.	Yes (Conditional) **Note:** This data is required when the hold entity is set to **PERS** and the hold entity ID is not specified in the record.
9	Person Identifier	Used to specify the person identifier. The system will derive the person using the given person identifier type and person identifier combination and then create a hold request for the respective person.	Yes (Conditional) **Note:** This data is required when the hold entity is set to **PERS** and the hold entity ID is not specified in the record.
10	Hold Entity ID	Used to indicate the entity (such as, person, account, or bill) that you want to keep on hold. **Note:** If the hold entity is set to **ACCT**, you must specify the account ID in this column. If the hold entity is set to **PERS**, you must specify the person ID in this column. And, if the hold entity is set to **BILL**, you must specify the bill ID in this column. If you do not specify the account ID, the system derives the account ID using the account identifier type and account identifier combination. Similarly, if you do not specify the person ID, the system derives the person ID using the person identifier type and person identifier combination.	Yes (Conditional) **Note:** This data is required when the hold entity is set to **BILL**.
11	Comments	Used to specify additional information about the hold request.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
12	Hold Entity Start Date	Used to specify the date from when you want to hold the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates. The hold entity start date cannot be later than the hold entity end date.	Yes
13	Hold Entity End Date	Used to specify the date till when you want to hold the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold entity end date must be between hold request start and end dates and between the process's start and end dates. The hold entity end date cannot be earlier than the hold entity start date.	No
14	Include Hierarchy	Used to indicate whether all the accounts in the person's hierarchy or only the persons' immediate accounts should be kept on hold. The valid values are: • **Y** - Used when you want to keep all the accounts in the person's hierarchy on hold through the hold request. • **N** - Used when you want to keep only the persons' immediate accounts on hold through the hold request. **Note:** The system considers only the child persons and not the grand child persons from the person's hierarchy and then derives the accounts where the child person is the main customer. This column is applicable only when the hold entity is set to **PERS**. If you do not specify the value, by default, it is set to **N**.	No
15	Hold Funding	Used to indicate whether you want to hold the funding process for the entity. The valid values are:	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		• Y • N **Note:** You can hold the funding process when the hold entity is set to **ACCT**, **PERS**, or **BILL**. If you do not specify the value, by default, it is set to **N**.	
16	Hold Funding Start Date	Used to specify the date from when you want to hold the funding process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold funding start date must be between the hold request start and end dates. The hold funding start date cannot be later than the hold funding end date.	Yes (Conditional) **Note:** This data is required when the hold funding is set to **Y** in the record.
17	Hold Funding End Date	Used to specify the date till when you want to hold the funding process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold funding end date must be between the hold request start and end dates. The hold funding end date cannot be earlier than the hold funding start date.	No
18	Hold Overdue	Used to indicate whether you want to hold the overdue process for the entity. The valid values are: • Y • N **Note:** You can hold the overdue process when the hold entity is set to **ACCT**. Note that you cannot set both hold overdue and hold delinquency to **Y** for an account in the same duration. The **Overdue** process is valid for the financial services and health insurance domains but the **Delinquency** process is valid only for the health insurance domain.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		If you do not specify the value, by default, it is set to **N**.	
19	Hold Overdue Start Date	Used to specify the date from when you want to hold the overdue process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold overdue start date must be between the hold request start and end dates. The hold overdue start date cannot be later than the hold overdue end date.	Yes (Conditional) **Note:** This data is required when the hold overdue is set to **Y** in the record.
20	Hold Overdue End Date	Used to specify the date till when you want to hold the overdue process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold overdue end date must be between the hold request start and end dates. The hold overdue end date cannot be earlier than the hold overdue start date.	No
21	Hold Bill Generation	Used to indicate whether you want to hold the bill generation process for the entity. The valid values are: • Y • N **Note:** You can hold the bill generation process when the hold entity is set to **ACCT** or **PERS**. If you do not specify the value, by default, it is set to **N**.	No
22	Hold Bill Generation Start Date	Used to specify the date from when you want to hold the bill generation process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold bill generation start date must be between the hold request start and end dates.	Yes (Conditional) **Note:** This data is required when the hold bill generation is set to **Y** in the record.

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		The hold bill generation start date cannot be later than the hold bill generation end date.	
23	Hold Bill Generation End Date	Used to specify the date till when you want to hold the bill generation process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold bill generation end date must be between the hold request start and end dates. The hold bill generation end date cannot be earlier than the hold bill generation start date.	No
24	Hold Auto Pay	Used to indicate whether you want to hold the automatic payment process for the entity. The valid values are: • Y • N **Note:** You can hold the automatic payment process when the hold entity is set to **ACCT**. If you do not specify the value, by default, it is set to **N**.	No
25	Hold Auto Pay Start Date	Used to specify the date from when you want to hold the automatic payment process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold auto pay start date must be between the hold request start and end dates. The hold auto pay start date cannot be later than the hold auto pay end date.	Yes (Conditional) **Note:** This data is required when the hold auto pay is set to **Y** in the record.
26	Hold Auto Pay End Date	Used to specify the date till when you want to hold the automatic payment process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		The hold auto pay end date must be between the hold request start and end dates. The hold auto pay end date cannot be earlier than the hold auto pay start date.	
27	Hold Refund	Used to indicate whether you want to hold the refund process for the entity. The valid values are: • Y • N **Note:** You can hold the refund process when the hold entity is set to **ACCT**. If you do not specify the value, by default, it is set to **N**.	No
28	Hold Refund Start Date	Used to specify the date from when you want to hold the refund process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold refund start date must be between the hold request start and end dates. The hold refund start date cannot be later than the hold refund end date.	Yes (Conditional) **Note:** This data is required when the hold refund is set to **Y** in the record.
29	Hold Refund End Date	Used to specify the date till when you want to hold the refund process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold refund end date must be between the hold request start and end dates. The hold refund end date cannot be earlier than the hold refund start date.	No
30	Hold Delinquency	Used to indicate whether you want to hold the delinquency process for the entity. The valid values are: • Y • N **Note:** You can hold the delinquency process when the hold entity is set to **PERS** or	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		ACCT. Note that you cannot set both hold overdue and hold delinquency to **Y** for an account in the same duration. The **Overdue** process is valid for the financial services and health insurance domains but the **Delinquency** process is valid only for the health insurance domain. If you do not specify the value, by default, it is set to **N**.	
31	Hold Delinquency Start Date	Used to specify the date from when you want to hold the delinquency process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold delinquency start date must be between the hold request start and end dates. The hold delinquency start date cannot be later than the hold delinquency end date.	Yes (Conditional) **Note:** This data is required when the hold delinquency is set to **Y** in the record.
32	Hold Delinquency End Date	Used to specify the date till when you want to hold the delinquency process for the entity. **Note:** You must specify the date in the **YYYY-MM-DD** format. The hold delinquency end date must be between the hold request start and end dates. The hold delinquency end date cannot be earlier than the hold delinquency start date.	No
33	Effective Date1, Effective Date2, ..., Effective Date5	Used to specify the date from when the characteristic is effective for the hold request. **Note:** You must specify the date in the **YYYY-MM-DD** format.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.
34	Char Type1, Char Type2, ..., Char Type5	Used to specify the characteristic type. **Note:** You must specify a characteristic type where the characteristic entity is set to **Hold Request**. You can specify maximum 5 characteristics in the record.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
35	Char Val1, Char Val2, ..., Char Val5	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.

Note:

The CSV file should contain the columns in the above mentioned sequence. You can add five sets of characteristics — each set containing Effective Date, Char Type, and Char Val followed by the subsequent set (i.e., Effective Date1, Char Type1, Char Val1, Effective Date2, Char Type2, Char Val2, Effective Date3, Char Type3, Char Val3, Effective Date4, Char Type4, Char Val4, Effective Date5, Char Type5, Char Val5).

Before uploading the file, ensure that the column headers specified in the CSV file are mapped to the schema of the respective upload request business object through data mapping in the upload request type. Otherwise, erroneous results might occur. For more information, see Mapping Data and Configuring Filters for an Upload Request Type on page 1497.

Mass Refund Request Creation

Oracle Revenue Management and Billing provides the ability to create multiple refund requests at once through the **Upload Request** feature. The system allows you to refund a credit bill, a credit bill line item (i.e., a bill segment or an adjustment), a specific payment, all the payments of a payment event, and/or a credit adjustment of an account through a refund request. The **C1-RefundUploadRequest** business object enables you to create an upload request for mass refund request creation.

Note: At present, you can only create new refund requests and not update existing refund requests through the **Upload Request** feature.

You need to create an upload request type for the **C1-RefundUploadRequest** business object. You can then upload a mass refund request creation file in the CSV format using the respective upload request type. The mass refund request creation file should contain records with the following information – refund request type, account details, entity type, entity ID, refund adjustment type, refund amount, comments, and refund characteristics. For more information, see Mass Refund Request Creation CSV Format.

Note: You can specify maximum 5 characteristics in the record.

On uploading a mass refund request creation file, the system creates an upload request in the **Draft** status. The data records are created in the **Pending** status. The system validates the following for each record:

- Either the account ID or account identifier type and account identifier is specified in the record.
- Refund request type, entity type, entity ID and refund amount are specified in the record.
- If the entity type is **Adjustment**, then the adjustment ID given in the record is valid.
- If the entity type is **Bill**, then the bill ID given in the record is valid.
- If the entity type is **Bill Segment**, then the bill segment ID given in the record is valid.
- If the entity type is **Payment Event**, then the payment event ID given in the record is valid.
- If the entity type is **Payment**, then the payment ID given in the record is valid.

Based on the entity type and entity ID, the system derives the original amount and currency of the respective entity. If the adjustment type is not specified in the record, the system derives the adjustment type from the respective refund request type. Similarly, if the account ID is not specified in the record, the system derives the account ID using the respective account identifier type and account identifier combination.

If the system could not derive the adjustment type, or account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record is changed to **Invalid**.

Note:

If the mandatory data is missing in any record of the file, the system will not allow you to create an upload request.

The system does not allow you to upload a file which exceeds 700 KB. Therefore, you must ensure that the file size is within the maximum limit.

On clicking the **Validate** button, the system checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, the system validates the following in the real time:

- The account ID given in the record is valid.
- The entity type is a valid and active value of the **REF_WO_ENTITY_FLG** lookup field.
- The entity type given in the record for the entity ID is correct.
- The entity (i.e., adjustment, bill, bill segment, payment event, or payment) exists for the respective account in the system.
- The payment ID given in the record is in the **Frozen** status and is matched against the suspense or excess credit contract.
- The bill ID given in the record is in the **Complete** status.
- The bill segment ID given in the record is in the **Frozen** status.
- The adjustment ID given in the record is in the **Freezable** or **Frozen** status.
- The refund request type given in the record is valid and in the **Active** status. Its action flag is set to **Refund**.
- The refund amount is greater than zero.
- The refund amount is not greater than the eligible refund amount and the eligible refund amount is not equal to zero.
- The adjustment type given in the record is valid and its **A/P Request Type Code** flag is set to **Refund**.
- One record with a bill (for example, B01) and another record with the bill segment (for example, BS01) or adjustment (for example, AD01) of the same bill (i.e., B01) are not present in the upload request.
- One record with a payment event (for example, PE01) and another record with the payment (for example, PY01) of the same payment event (i.e., PE01) are not present in the upload request.
- The amount matches the decimal positions of the respective currency.
- The entity is not already included in any refund request that is in the non-final status.
- The characteristic type given in the record is valid and its characteristic entity is set to **Refund/Write Off Request**.

- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.
- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.
- The two or more records with the same entity type and entity ID combination do not exist in the upload request.

Note:

If the account ID is invalid, the system derives the account ID using the respective account identifier type and account identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**.

If duplicate records exist in the upload request, the system validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record is changed to **Invalid**. However, if all the above validations are successful, the status of the record is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

However, if the total number of records in the upload request exceeds the online record validate limit, the system changes the status of the upload request to **Deferred Validation**. The system then validates the records and changes the status of the upload request from **Deferred Validation** to **Validated** when the **C1-UPLRQ** batch is executed.

On clicking the **Submit** button, the system checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

The approver can either approve or reject the upload request based on the observations. On approving an upload request, the status of the upload request is changed to **Approved**. However, on rejecting an upload request, the status of the upload request is changed to **Rejected**.

Once the status of the upload request is changed to **Submitted** or **Approved**, the system checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**. The system then changes the status of the upload request from **Deferred Processing** to **Processing** when the **C1-UPLRQ** batch is executed.

Once the status of the upload request is changed to **Processing**, the system fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the refund request type and account ID, the system creates a refund request for the account. However, if there are multiple entity IDs with the same combination, it adds all the entities in the same refund request.

If the **Approval Required** option is selected in the respective refund request type, the status of the refund request is set to **Approval In Progress**. However, if the **Approval Required** option is not selected in the respective refund request type, the system checks the number of entities added in the refund request. If the number of entities added in the refund request does not exceed the online record process limit, the system creates the refund adjustments using the refund adjustment type and then changes the status of the refund request to **Processed**. However, if the number of entities added in the refund request exceeds the online record process limit, the status of the refund request is set to **Deferred Processing**.

Once the refund request is successfully created, the status of the record is changed to **Processed**. However, if any error occurs while creating the refund request, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note:

The system creates the refund request using the entity business object specified in the respective upload request type.

This feature is tested and certified for both the financial services and health insurance domains.

Prerequisites

To setup the mass refund request creation feature, you need to do the following:

- Define the required upload request type where the upload request business object is set to **C1-RefundUploadRequest**.
- Assign the **C1-REFUR** To Do type to a To Do role whose users must receive a To Do while submitting a refund request creation upload request for approval.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the required foreign key reference for refund request (if not available) in the system.
- Define the status reasons for the **Canceled** and **Rejected** statuses of the **C1-RefundUploadRequest** business object in the **Status Reason** screen.
- Define the required refund request types where the **Action** flag is set to **Refund**.
- Define the required account identifier types in the system.
- Define the required adjustment types where the **A/P Request Type Code** flag is set to **Refund**.
- Define the required characteristic types where the characteristic entity is set to **Refund/Write Off Request**.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

Algorithms Used in C1-RefundUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-RefundUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-RF-DERIV	C1-RF-DERIV	Refer to C1-RF-DERIV on page 2012.
Validating	Enter	C1-DEFERVALD	C1-DEFERVALD	Refer to C1-DEFERVALD on page 1983.
Deferred Validation	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Validated	Enter	C1-RF-VALID	C1-RF-VALID	Refer to C1-RF-VALID on page 2013.
Canceled	-	-	-	-
Submitted	Enter	C1-UPLSUBENT	C1-UPLSUBENT	Refer to C1-UPLSUBENT on page 1976.
	Enter	C1-DEFERUPLD	C1-DEFERUPLD	Refer to C1-DEFERUPLD on page 1976.
	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Enter	C1-UPLAPPENT	C1-UPLAPPENT	Refer to C1-UPLAPPENT on page 1977.
	Exit	C1-UPLAPPEXT	C1-UPLAPPEXT	Refer to C1-UPLAPPEXT on page 1977.
	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to F1-TODOCOMPL on page 1543.
Approved	Enter	C1-DEFERUPLD	C1-DEFERUPLD	Refer to C1-DEFERUPLD on page 1976.

	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Processed	-	-	-	-

C1-RF-DERIV

This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to **Pending**.

It validates the following:

- Either the account ID or account identifier type and account identifier is specified in the record.
- Refund request type, entity type, entity ID and refund amount are specified in the record.
- If the entity type is **Adjustment**, then the adjustment ID given in the record is valid.
- If the entity type is **Bill**, then the bill ID given in the record is valid.
- If the entity type is **Bill Segment**, then the bill segment ID given in the record is valid.
- If the entity type is **Payment Event**, then the payment event ID given in the record is valid.
- If the entity type is **Payment**, then the payment ID given in the record is valid.

Based on the entity type and entity ID, this algorithm derives the original amount and currency of the respective entity from the system. If the adjustment type is not specified in the record, this algorithm derives the adjustment type from the respective refund request type. Similarly, if the account ID is not specified in the record, it derives the account ID using the respective account identifier type and account identifier combination.

Once the adjustment type and/or account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the adjustment type, or account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

This algorithm also derives the fields which can be used as search filters based on the mapping defined in the respective upload request type.

C1-DEFERVALD

This algorithm is invoked when the user clicks the **Validate** button. It checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number

of records in the upload request does not exceed the online record validate limit, it changes the status of the upload request to **Validated**. However, if the total number of records in the upload request exceeds the online record validate limit, it changes the status of the upload request to **Deferred Validation**.

It contains the following parameter:

- **Online Record Validate Limit** - Used to indicate the maximum number of records you can validate in the real time (i.e., immediately). This parameter is mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-RF-VALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It validates the following:

- The account ID given in the record is valid.

  Note: If the account ID is invalid, it derives the account ID using the respective account identifier type and account identifier combination. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.
- The entity type is a valid and active value of the **REF_WO_ENTITY_FLG** lookup field.
- The entity type given in the record for the entity ID is correct.
- The entity (i.e., adjustment, bill, bill segment, payment event, or payment) exists for the respective account in the system.
- The payment ID given in the record is in the **Frozen** status and is matched against the suspense or excess credit contract.
- The bill ID given in the record is in the **Complete** status.
- The bill segment ID given in the record is in the **Frozen** status.
- The adjustment ID given in the record is in the **Freezable** or **Frozen** status.
- The refund request type given in the record is valid and in the **Active** status. Its action flag is set to **Refund**.
- The refund amount is greater than zero.
- The refund amount is not greater than the eligible refund amount and the eligible refund amount is not equal to zero.
- The adjustment type given in the record is valid and its **A/P Request Type Code** flag is set to **Refund**.
- One record with a bill (for example, B01) and another record with the bill segment (for example, BS01) or adjustment (for example, AD01) of the same bill (i.e., B01) are not present in the upload request.
- One record with a payment event (for example, PE01) and another record with the payment (for example, PY01) of the same payment event (i.e., PE01) are not present in the upload request.
- The amount matches the decimal positions of the respective currency.
- The entity is not already included in any refund request that is in the non-final status.
- The characteristic type given in the record is valid and its characteristic entity is set to **Refund/Write Off Request**.
- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.

- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.
- The two or more records with the same entity type and entity ID combination do not exist in the upload request.

Note: If duplicate records exist in the upload request, it validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. However, if all the above validations are successful, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

Note: If there are no pending records while validating an upload request, a message appears indicating that there are no records to be validated. In such case, you can only delete an upload request.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, it changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, it changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e., immediately). This parameter is mandatory.

C1-UPLAPPENT

This algorithm is invoked when the status of the upload request is changed to **Approval In Progress**. It creates a To Do using the approval To Do type that is specified in the respective upload request type. Once a To Do is created, it is assigned to all the users with the approval To Do role that is specified in the respective upload request type. In addition, it creates a log entry for the upload request when the To Do is created for the approver.

C1-UPLAPPEXT

This algorithm is invoked when the user clicks the **Approve** or **Reject** button. It checks whether the approver is associated with the approval To Do role specified in the respective upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion (F1-EXLTD)** characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-RF-PROC

This algorithm is invoked when the status of the upload request is changed to **Processing**. It fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the refund request type and account ID, this algorithm creates a refund request for the account. However, if there are multiple entity IDs with the same combination, it adds all the entities in the same refund request.

Note: The system creates the refund request using the entity business object specified in the respective upload request type.

If the **Approval Required** option is selected in the respective refund request type, the status of the refund request is set to **Approval In Progress**. However, if the **Approval Required** option is not selected in the respective refund request type, the system checks the number of entities added in the refund request. If the number of entities added in the refund request does not exceed the online record process limit, the system creates the refund adjustments using the refund adjustment type and then changes the status of the refund request to **Processed**. However, if the number of entities added in the refund request exceeds the online record process limit, the status of the refund request is set to **Deferred Processing**.

If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Mass Refund Request Creation CSV Format

The following table lists and describes the columns that should be available in the CSV file while creating multiple refund requests at once through an upload request:

Sr. No.	Column Name	Description	Mandatory (Yes or No)
1	Refund Request Type	Used to specify the refund request type using which you want to create the refund request. **Note:** You must specify a refund request type which is already defined in the system. It should be in the **Active** status.	Yes
2	Account Identifier Type	Used to specify the account identifier type. **Note:** You must specify an account identifier type which is already defined in the system.	Yes (Conditional) **Note:** This data is required when the account ID is not specified in the record.
3	Account Identifier	Used to specify the account identifier. **Note:** The system derives the account using the given account identifier type and account identifier combination when the	Yes (Conditional) **Note:** This data is required when the account ID is not specified in the record.

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		account ID is either not specified or is invalid in the record.	
4	Account ID	Used to indicate the account for which you want to create the refund request.	Yes (Conditional) **Note:** This data is required when the account identifier type and account identifier are not specified in the record.
5	Entity Type	Used to specify the entity type. The valid values are: • **Adjustment** - Used when you want to refund a credit adjustment of an account through a refund request. • **Bill** - Used when you want to refund a credit bill of an account through a refund request. • **Bill Segment** - Used when you want to refund a credit bill segment of an account through a refund request. • **Payment Event** - Used when you want to refund all the payments of a payment event created for a payor account through a refund request. • **Payment** - Used when you want to refund a specific payment of an account through a refund request. **Note:** You must specify a value which is already defined in the **REF_WO_ENTITY_FLG** lookup field. It should be in the **Active** status.	Yes
6	Entity ID	Used to specify the entity ID. **Note:** Here, you can specify the adjustment ID, bill ID, bill segment ID, payment event ID, or payment ID depending on the specified entity type. The specified payment should be in the **Frozen** status and matched against the suspense or excess credit contract. The specified bill should be in the **Complete** status.	Yes

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		The specified bill segment should be in the **Frozen** status. The specified adjustment should be in the **Freezable** or **Frozen** status.	
7	Adjustment Type	Used to specify the adjustment type using which you want to create the refund adjustment for the entity. **Note:** You must specify an adjustment type which is already defined in the system. Its **A/P Request Type Code** flag should be set to **Refund**. If you do not specify the adjustment type, the system considers the refund adjustment type specified in the respective refund request type.	No
8	Refund Amount	Used to specify the amount that you want to refund. **Note:** You must specify a number greater than zero but less than or equal to the eligible refund amount. You must specify a number with decimal positions less than or equal to the decimal positions defined for the respective currency.	Yes
9	Comments	Used to specify additional information about the refund request.	No
10	Effective Date1, Effective Date2, ..., Effective Date5	Used to specify the date from when the characteristic is effective for the refund request.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.
11	Char Type1, Char Type2, ..., Char Type5	Used to specify the characteristic type. **Note:** You must specify a characteristic type where the characteristic entity is set to **Refund/Write Off Request**. You can specify maximum 5 characteristics in the record.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
12	Char Val1, Char Val2, ..., Char Val5	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.

Note:

The CSV file should contain the columns in the above mentioned sequence. You can add five sets of characteristics — each set containing Effective Date, Char Type, and Char Val followed by the subsequent set (i.e., Effective Date1, Char Type1, Char Val1, Effective Date2, Char Type2, Char Val2, Effective Date3, Char Type3, Char Val3, Effective Date4, Char Type4, Char Val4, Effective Date5, Char Type5, Char Val5).

Before uploading the file, ensure that the column headers specified in the CSV file are mapped to the schema of the respective upload request business object through data mapping in the upload request type. Otherwise, erroneous results might occur. For more information, see Mapping Data and Configuring Filters for an Upload Request Type on page 1497.

Sample Mass Refund Request Creation CSV File

```
Refund Request Type,Account Identifier Type,Account Identifier,Account ID,Entity Type,Entity ID,Adjustment Type,Refund Amount,Comments,Effective
Date1,Char Type1,Char Val1,Effective Date2,Char Type2,Char Val2,Effective Date3,Char Type3,Char Val3,Effective Date4,Char Type4,Char Val4,Effective
Date5,Char Type5,Char Val5,

```

Mass Write Off Request Creation

Oracle Revenue Management and Billing provides the ability to create multiple write off requests at once through the **Upload Request** feature. The system allows you to write off a debit bill or a debit bill line item (i.e., a bill segment or an adjustment) of an account through a write off request. The **C1-WriteOffUploadRequest** business object enables you to create an upload request for mass write off request creation.

Note: At present, you can only create new write off requests and not update existing write off requests through the **Upload Request** feature.

You need to create an upload request type for the **C1-WriteOffUploadRequest** business object. You can then upload a mass write off request creation file in the CSV format using the respective upload request type. The mass write off request creation file should contain records with the following information – write off request type, account details, entity type, entity ID, write off adjustment type, write off amount, comments, and write off characteristics. For more information, see Mass Write Off Request Creation CSV Format.

Note: You can specify maximum 5 characteristics in the record.

On uploading a mass write off request creation file, the system creates an upload request in the **Draft** status. The data records are created in the **Pending** status. The system validates the following for each record:

- Either the account ID or account identifier type and account identifier is specified in the record.
- Write off request type, entity type, entity ID and write off amount are specified in the record.
- If the entity type is **Bill**, then the bill ID given in the record is valid.
- If the entity type is **Bill Segment**, then the bill segment ID given in the record is valid.
- If the entity type is **Adjustment**, then the adjustment ID given in the record is valid.

Based on the entity type and entity ID, the system derives the original amount and currency of the respective entity. If the adjustment type is not specified in the record, the system derives the adjustment type from the respective write off request type. Similarly, if the account ID is not specified in the record, the system derives the account ID using the respective account identifier type and account identifier combination.

If the system could not derive the adjustment type, or account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record is changed to **Invalid**.

Note:

If the mandatory data is missing in any record of the file, the system will not allow you to create an upload request.

The system does not allow you to upload a file which exceeds 700 KB. Therefore, you must ensure that the file size is within the maximum limit.

On clicking the **Validate** button, the system checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, the system validates the following in the real time:

- The account ID given in the record is valid.
- The entity type is a valid and active value of the **REF_WO_ENTITY_FLG** lookup field.
- The entity type given in the record for the entity ID is correct.
- The entity (i.e., bill, bill segment, or adjustment) exists for the respective account in the system.
- The bill ID given in the record is in the **Complete** status.
- The bill segment ID or adjustment ID given in the record is in the **Frozen** status.
- The given adjustment is present on any bill of the respective account.
- The write off request type given in the record is valid and in the **Active** status. Its action flag is set to **Write Off** .
- The write off amount is less than zero.
- The write off amount is not greater than the eligible write off amount and the eligible write off amount is not equal to zero.
- The adjustment type given in the record is valid and its **A/P Request Type Code** flag is set to **Refund**.
- One record with a bill (for example, B01) and another record with the bill segment (for example, BS01) or adjustment (for example, AD01) of the same bill (i.e., B01) are not present in the upload request.
- The amount matches the decimal positions of the respective currency.
- The entity is not already included in any write off request that is in the non-final status.
- The characteristic type given in the record is valid and its characteristic entity is set to **Refund/Write Off Request**.
- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.
- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.
- The two or more records with the same entity type and entity ID combination do not exist in the upload request.

Note:

If the account ID is invalid, the system derives the account ID using the respective account identifier type and account identifier combination. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record is changed to **Invalid**.

If duplicate records exist in the upload request, the system validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record is changed to **Invalid**. However, if all the above validations are successful, the status of the record is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

However, if the total number of records in the upload request exceeds the online record validate limit, the system changes the status of the upload request to **Deferred Validation**. The system then validates the records and changes the status of the upload request from **Deferred Validation** to **Validated** when the **C1-UPLRQ** batch is executed.

On clicking the **Submit** button, the system checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

The approver can either approve or reject the upload request based on the observations. On approving an upload request, the status of the upload request is changed to **Approved**. However, on rejecting an upload request, the status of the upload request is changed to **Rejected**.

Once the status of the upload request is changed to **Submitted** or **Approved**, the system checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**. The system then changes the status of the upload request from **Deferred Processing** to **Processing** when the **C1-UPLRQ** batch is executed.

Once the status of the upload request is changed to **Processing**, the system fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the write off request type and account ID, the system creates a write off request for the account. However, if there are multiple entity IDs with the same combination, it adds all the entities in the same write off request.

If the **Approval Required** option is selected in the respective write off request type, the status of the write off request is set to **Approval In Progress**. However, if the **Approval Required** option is not selected in the respective write off request type, the system checks the number of entities added in the write off request. If the number of entities added in the write off request does not exceed the online record process limit, the system creates the write off adjustments using the write off adjustment type and then changes the status of the write off request to **Processed**. However, if the number of entities added in the write off request exceeds the online record process limit, the status of the write off request is set to **Deferred Processing**.

Once the write off request is successfully created, the status of the record is changed to **Processed**. However, if any error occurs while creating the write off request, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note:

The system creates the write off request using the entity business object specified in the respective upload request type.

This feature is tested and certified for both the financial services and health insurance domains.

Prerequisites

To setup the mass write off request creation feature, you need to do the following:

- Define the required upload request type where the upload request business object is set to **C1-WriteOffUploadRequest**.
- Assign the **C1-WOUR** To Do type to a To Do role whose users must receive a To Do while submitting a write off request creation upload request for approval.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the required foreign key reference for write off request (if not available) in the system.
- Define the status reasons for the **Canceled** and **Rejected** statuses of the **C1-WriteOffUploadRequest** business object in the **Status Reason** screen.
- Define the required write off request types where the **Action** flag is set to **Write Off**.

- Define the required account identifier types in the system.
- Define the required adjustment types where the **A/P Request Type Code** flag is not set to **Refund**.
- Define the required characteristic types where the characteristic entity is set to **Refund/Write Off Request**.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

Algorithms Used in C1-WriteOffUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-WriteOffUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-WO-DERIV	C1-WO-DERIV	Refer to C1-WO-DERIV on page 2022.
Validating	Enter	C1-DEFERVALD	C1-DEFERVALD	Refer to C1-DEFERVALD on page 1983.
Deferred Validation	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Validated	Enter	C1-WO-VALID	C1-WO-VALID	Refer to C1-WO-VALID on page 2023.
Canceled	-	-	-	-
Submitted	Enter	C1-UPLSUBENT	C1-UPLSUBENT	Refer to C1-UPLSUBENT on page 1976.
	Enter	C1-DEFERUPLD	C1-DEFERUPLD	Refer to C1-DEFERUPLD on page 1976.
	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Approval In Progress	Enter	C1-UPLAPPENT	C1-UPLAPPENT	Refer to C1-UPLAPPENT on page 1977.
	Exit	C1-UPLAPPEXT	C1-UPLAPPEXT	Refer to C1-UPLAPPEXT on page 1977.
	Exit	F1-TODOCOMPL	F1-TODOCOMPL	Refer to F1-TODOCOMPL on page 1543.
Approved	Enter	C1-DEFERUPLD	C1-DEFERUPLD	Refer to C1-DEFERUPLD on page 1976.

Status	System Event	Algorithm	Algorithm Type	Description
Processing	Enter	C1-WO-PROC	C1-WO-PROC	Refer to C1-WO-PROC on page 2024.
	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Processed	-	-	-	-

C1-WO-DERIV

This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to **Pending**.

It validates the following:

- Either the account ID or account identifier type and account identifier is specified in the record.
- Write off request type, entity type, entity ID and write off amount are specified in the record.
- If the entity type is **Bill**, then the bill ID given in the record is valid.
- If the entity type is **Bill Segment**, then the bill segment ID given in the record is valid.
- If the entity type is **Adjustment**, then the adjustment ID given in the record is valid.

Based on the entity type and entity ID, this algorithm derives the original amount and currency of the respective entity from the system. If the adjustment type is not specified in the record, this algorithm derives the adjustment type from the respective write off request type. Similarly, if the account ID is not specified in the record, it derives the account ID using the respective account identifier type and account identifier combination.

Once the adjustment type and/or account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the adjustment type, or account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

This algorithm also derives the fields which can be used as search filters based on the mapping defined in the respective upload request type.

C1-DEFERVALD

This algorithm is invoked when the user clicks the **Validate** button. It checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, it changes the status of the upload request to **Validated**. However, if the total number of records in the upload request exceeds the online record validate limit, it changes the status of the upload request to **Deferred Validation**.

It contains the following parameter:

- **Online Record Validate Limit** - Used to indicate the maximum number of records you can validate in the real time (i.e., immediately). This parameter is mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-WO-VALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It validates the following:

- The account ID given in the record is valid.

  Note: If the account ID is invalid, it derives the account ID using the respective account identifier type and account identifier combination. Once the account ID is derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.
- The entity type is a valid and active value of the **REF_WO_ENTITY_FLG** lookup field.
- The entity type given in the record for the entity ID is correct.
- The entity (i.e., bill, bill segment, or adjustment) exists for the respective account in the system.
- The bill ID given in the record is in the **Complete** status.
- The bill segment ID or adjustment ID given in the record is in the **Frozen** status.
- The given adjustment is present on any bill of the respective account.
- The write off request type given in the record is valid and in the **Active** status. Its action flag is set to **Write Off** .
- The write off amount is less than zero.
- The write off amount is not greater than the eligible write off amount and the eligible write off amount is not equal to zero.
- The adjustment type given in the record is valid and its **A/P Request Type Code** flag is set to **Refund**.
- One record with a bill (for example, B01) and another record with the bill segment (for example, BS01) or adjustment (for example, AD01) of the same bill (i.e., B01) are not present in the upload request.
- The amount matches the decimal positions of the respective currency.
- The entity is not already included in any write off request that is in the non-final status.
- The characteristic type given in the record is valid and its characteristic entity is set to **Refund/Write Off Request**.
- The adhoc characteristic values are validated as per the validations defined in the respective algorithm.
- The predefined characteristic value is already defined for the characteristic type.
- The foreign key reference characteristic value is valid.
- The two or more records with the same entity type and entity ID combination do not exist in the upload request.

  Note: If duplicate records exist in the upload request, it validates and changes the status of one record to **Valid** and the status of the remaining records to **Invalid**.

If any of above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. However, if all the above validations are successful, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

Note: If there are no pending records while validating an upload request, a message appears indicating that there are no records to be validated. In such case, you can only delete an upload request.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the number of valid records in the upload request does not exceed the online record process limit, it changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, it changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e., immediately). This parameter is mandatory.

C1-UPLAPPENT

This algorithm is invoked when the status of the upload request is changed to **Approval In Progress**. It creates a To Do using the approval To Do type that is specified in the respective upload request type. Once a To Do is created, it is assigned to all the users with the approval To Do role that is specified in the respective upload request type. In addition, it creates a log entry for the upload request when the To Do is created for the approver.

C1-UPLAPPEXT

This algorithm is invoked when the user clicks the **Approve** or **Reject** button. It checks whether the approver is associated with the approval To Do role specified in the respective upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-WO-PROC

This algorithm is invoked when the status of the upload request is changed to **Processing**. It fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the write off request type and account ID, this algorithm creates a write off request for the account. However, if there are multiple entity IDs with the same combination, it adds all the entities in the same write off request.

Note: The system creates the write off request using the entity business object specified in the respective upload request type.

If the **Approval Required** option is selected in the respective write off request type, the status of the write off request is set to **Approval In Progress**. However, if the **Approval Required** option is not selected in the respective write off request type, the system checks the number of entities added in the write off request. If the number of entities added in the write off request does not exceed the online record process limit, the system creates the write off adjustments using the write off adjustment type and then changes the status of the write off request to **Processed**. However, if the number of entities added in the write off request exceeds the online record process limit, the status of the write off request is set to **Deferred Processing**.

If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Mass Write Off Request Creation CSV Format

The following table lists and describes the columns that should be available in the CSV file while creating multiple write off requests at once through an upload request:

Sr. No.	Column Name	Description	Mandatory (Yes or No)
1	Write Off Request Type	Used to specify the write off request type using which you want to create the write off request. **Note:** You must specify a write off request type which is already defined in the system. It should be in the **Active** status.	Yes
2	Account Identifier Type	Used to specify the account identifier type. **Note:** You must specify an account identifier type which is already defined in the system.	Yes (Conditional) **Note:** This data is required when the account ID is not specified in the record.
3	Account Identifier	Used to specify the account identifier. **Note:** The system derives the account using the given account identifier type and account identifier combination when the account ID is either not specified or is invalid in the record.	Yes (Conditional) **Note:** This data is required when the account ID is not specified in the record.
4	Account ID	Used to indicate the account for which you want to create the write off request.	Yes (Conditional) **Note:** This data is required when the account identifier type and account identifier are not specified in the record.
5	Entity Type	Used to specify the entity type. The valid values are: • **Bill** - Used when you want to write off a debit bill of an account through a write off request. • **Bill Segment** - Used when you want to write off a debit bill segment of a bill through a write off request. • **Adjustment** - Used when you want to write off a debit adjustment of a bill through a write off request.	Yes

Sr. No.	Column Name	Description	Mandatory (Yes or No)
		Note: You must specify a value which is already defined in the **REF_WO_ENTITY_FLG** lookup field. It should be in the **Active** status.	
6	Entity ID	Used to specify the entity ID. **Note:** Here, you can specify the bill ID, bill segment ID, or adjustment ID depending on the specified entity type. The specified bill should be in the **Complete** status. The specified bill segment should be in the **Frozen** status. The specified adjustment should be in the **Frozen** status.	Yes
7	Adjustment Type	Used to specify the adjustment type using which you want to create the write off adjustment for the entity. **Note:** You must specify an adjustment type which is already defined in the system. Its **A/P Request Type Code** flag should not be set to **Refund**. If you do not specify the adjustment type, the system considers the write off adjustment type specified in the respective write off request type.	No
8	Write Off Amount	Used to specify the amount that you want to write off. **Note:** You must specify a number greater than zero but less than or equal to the eligible write off amount. You must specify a number with decimal positions less than or equal to the decimal positions defined for the respective currency.	Yes
9	Comments	Used to specify additional information about the write off request.	No

Sr. No.	Column Name	Description	Mandatory (Yes or No)
10	Effective Date1, Effective Date2, ..., Effective Date5	Used to specify the date from when the characteristic is effective for the write off request.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.
11	Char Type1, Char Type2, ..., Char Type5	Used to specify the characteristic type. **Note:** You must specify a characteristic type where the characteristic entity is set to **Refund/Write Off Request**. You can specify maximum 5 characteristics in the record.	No
12	Char Val1, Char Val2, ..., Char Val5	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.

Note:

The CSV file should contain the columns in the above mentioned sequence. You can add five sets of characteristics — each set containing Effective Date, Char Type, and Char Val followed by the subsequent set (i.e., Effective Date1, Char Type1, Char Val1, Effective Date2, Char Type2, Char Val2, Effective Date3, Char Type3, Char Val3, Effective Date4, Char Type4, Char Val4, Effective Date5, Char Type5, Char Val5).

Before uploading the file, ensure that the column headers specified in the CSV file are mapped to the schema of the respective upload request business object through data mapping in the upload request type. Otherwise, erroneous results might occur. For more information, see Mapping Data and Configuring Filters for an Upload Request Type on page 1497.

```

Mass Payment Tender Cancellation

Oracle Revenue Management and Billing provides the ability to cancel multiple payment tenders at once through the **Upload Request** feature. As a result, the payments associated with each payment tender are automatically canceled without stating their respective payment event ID or payment ID. The system derives the payment event associated with the payment tender and then accordingly cancels the payment tender and all the payments associated with the payment tender. The **C1-TndrCnclUploadRequest** business object enables you to create an upload request for mass payment tender cancellation.

You need to create an upload request type for the **C1-TndrCnclUploadRequest** business object. You can then upload a mass payment tender cancellation file in the CSV format using the respective upload request type. The mass

payment tender cancellation file should contain records with the following information – external reference ID or check number, external source ID, tender type, tender amount, cancel reason, bank code, bank account and tender characteristics. For more information, see Mass Payment Tender Cancellation CSV Format.

Note:

You can specify maximum 5 characteristics in the record.

Through an upload request, you cannot cancel those payment tenders where both the external reference ID and check number are not specified in the system. You can cancel such payment tenders manually from the user interface.

On uploading a mass payment tender cancellation file, the system creates an upload request in the **Draft** status. The data records are created in the **Pending** status. The system validates the following for each record:

- Either the external reference ID or check number is specified in the record.
- Cancel reason is specified in the record.

The system then derives the payment tender using the external reference ID or check number and the payment event associated with the respective payment tender. It also considers additional filters, such as external source ID, tender type, and/or tender amount, if any, given in the record while deriving the payment tender. Note that if both the external reference ID and check number are given in the record, the system considers only external reference ID and not check number while deriving the payment tender. If the system could not derive the payment tender and payment event, the status of the record is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record is changed to **Invalid**.

Note: The system does not allow you to upload a file which exceeds 700 KB. Therefore, you must ensure that the file size is within the maximum limit.

On clicking the **Validate** button, the system checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, the system validates the following in the real time:

- The derived payment event ID is valid.
- The derived payment event does not have multiple payment tenders associated with it.
- The payment cancel reason given in the record is valid.
- The payment tender is not in the **Canceled** status.
- Any payment of the payment event is not in the **Incomplete**, **Freezable**, **Error**, or **Canceled** status.
- Any payment of the payment event is either not partially or fully refunded to the customer.
- The bank code given in the record is valid.
- The bank account is defined for the respective bank code in the system.
- The bank code is available when the bank account is specified in the record and vice versa.

If any of above validations fail, the status of the record is changed to **Invalid**. However, if all the above validations are successful, the status of the record is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

However, if the total number of records in the upload request exceeds the online record validate limit, the system changes the status of the upload request to **Deferred Validation**. The system then validates the records and changes the status of the upload request from **Deferred Validation** to **Validated** when the **C1-UPLRQ** batch is executed.

On clicking the **Submit** button, the system checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

The approver can either approve or reject the upload request based on the observations. On approving an upload request, the status of the upload request is changed to **Approved**. However, on rejecting an upload request, the status of the upload request is changed to **Rejected**.

Once the status of the upload request is changed to **Submitted** or **Approved**, the system checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the

number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**. The system then changes the status of the upload request from **Deferred Processing** to **Processing** when the **C1-UPLRQ** batch is executed.

Once the status of the upload request is changed to **Processing**, the system fetches a list of records which are in the **Valid** status. For each valid record, the system cancels the payment tender and all the payments of the associated payment event. It changes the status of the payment tender and its associated payments to **Canceled**. While canceling a payment tender, it requires the cancel reason that indicates the reason why the payment tender and its associated payments are canceled. In addition, the system stamps the characteristics given in the record on the respective payment tender after canceling it.

Once the payment tender and its associated payments are successfully canceled, the status of the record is changed to **Processed**. However, if any error occurs while canceling the payment tender and its associated payments, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note: This feature is tested and certified for both the financial services and health insurance domains.

Prerequisites

To setup the mass payment tender cancellation feature, you need to do the following:

- Define the required upload request type where the upload request business object is set to **C1-TndrCnclUploadRequest**.
- Assign the **C1-TNDCL** To Do type to a To Do role whose users must receive a To Do while submitting a payment tender cancellation upload request for approval.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the required foreign key reference for payment event (if not available) in the system.
- Define the status reasons for the **Canceled** and **Rejected** statuses of the **C1-TndrCnclUploadRequest** business object in the **Status Reason** screen.
- Define the required tender types, payment cancel reasons, bank codes, and bank accounts in the system.
- Define the required characteristic types where the characteristic entity is set to **Payment Tender**.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about this batch, see *Oracle Revenue Management and Billing Batch Guide*.

Algorithms Used in C1-TndrCnclUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-TndrCnclUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-TND-DERIV	C1-TND-DERIV	Refer to C1-TND-DERIV.
Validating	Enter	C1-DEFERVALD	C1-DEFERVALD	Refer to C1-DEFERVALD.

Status	System Event	Algorithm	Algorithm Type	Description
Deferred Validation	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer toF1-AT-RQJ on page 1664.

	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to F1-AT-RQJ on page 1664.
Processed	-	-	-	-

C1-TND-DERIV

This algorithm reads the data in the BO_DATA_AREA column of the C1_UPL_REQUEST table and accordingly inserts the records in the C1_UPLOAD_REQ_DTLS table. In addition, the status of each record in the C1_UPLOAD_REQ_DTLS table is set to **Pending**.

It validates the following:

- Either the external reference ID or check number is specified in the record.
- Cancel reason is specified in the record.

It then derives the payment tender using the external reference ID or check number and the payment event associated with the respective payment tender. It also considers additional filters, such as external source ID, tender type, and/or tender amount, if any, given in the record while deriving the payment tender. Note that if both the external reference ID and check number are given in the record, the system considers only external reference ID and not check number while deriving the payment tender.

Once the payment tender and payment event are derived, the corresponding record is updated in the C1_UPLOAD_REQ_DTLS table. If the system could not derive the payment tender and payment event, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. In addition, if any of the above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**.

This algorithm also derives the fields which can be used as search filters based on the mapping defined in the respective upload request type.

C1-DEFERVALD

This algorithm is invoked when the user clicks the **Validate** button. It checks whether the upload request must be validated in the real time (i.e., immediately) or in the deferred mode (i.e., in the background). If the total number of records in the upload request does not exceed the online record validate limit, it changes the status of the upload request to **Validated**. However, if the total number of records in the upload request exceeds the online record validate limit, it changes the status of the upload request to **Deferred Validation**.

It contains the following parameter:

- **Online Record Validate Limit** - Used to indicate the maximum number of records you can validate in the real time (i.e., immediately). This parameter is mandatory.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-TND-VALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It validates the following:

- The derived payment event ID is valid.
- The derived payment event does not have multiple payment tenders associated with it.
- The payment cancel reason given in the record is valid.
- The payment tender is not in the **Canceled** status.
- Any payment of the payment event is not in the **Incomplete**, **Freezable**, **Error**, or **Canceled** status.
- Any payment of the payment event is either not partially or fully refunded to the customer.
- The bank code given in the record is valid.
- The bank account is defined for the respective bank code in the system.
- The bank code is available when the bank account is specified in the record and vice versa.

If any of above validations fail, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Invalid**. However, if all the above validations are successful, the status of the record in the C1_UPLOAD_REQ_DTLS table is changed to **Valid**. Once all the pending records in the upload request are validated, the status of the upload request is changed to **Validated**.

Note: If there are no pending records while validating an upload request, a message appears indicating that there are no records to be validated. In such case, you can only delete an upload request.

C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for the upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for the upload request, the status of the upload request is changed to **Submitted**.

C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e., immediately) or in the deferred mode (i.e., in the

background). If the number of valid records in the upload request does not exceed the online record process limit, it changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, it changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e., immediately). This parameter is mandatory.

C1-UPLAPPENT

This algorithm is invoked when the status of the upload request is changed to **Approval In Progress**. It creates a To Do using the approval To Do type that is specified in the respective upload request type. Once a To Do is created, it is assigned to all the users with the approval To Do role that is specified in the respective upload request type. In addition, it creates a log entry for the upload request when the To Do is created for the approver.

C1-UPLAPPEXT

This algorithm is invoked when the user clicks the **Approve** or **Reject** button. It checks whether the approver is associated with the approval To Do role specified in the respective upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

  Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-TND-PROC

This algorithm is invoked when the status of the upload request is changed to **Processing**. It fetches a list of records which are in the **Valid** status. For each valid record, this algorithm cancels the payment tender and all the payments of the associated payment event. It changes the status of the payment tender and its associated payments to **Canceled**. While canceling a payment tender, it requires the cancel reason that indicates the reason why the payment tender and its associated payments are canceled. In addition, this algorithm stamps the characteristics given in the record on the respective payment tender after canceling it.

If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Mass Payment Tender Cancellation CSV Format

The following table lists and describes the columns that should be available in the CSV file while canceling multiple payment tenders at once through an upload request:

Sr. No.	Column Name	Column Description	Mandatory (Yes or No)
1	External Source ID	Used to indicate the external system from where the payment tenders are received.	No
2	External Reference ID	Used to specify the payment external reference ID. It is used to track payment transaction across multiple systems.	Yes (Conditional) **Note:** This data is required when the check number is not specified in the record.
3	Check Number	Used to specify the check number if the payment is received through a check.	Yes (Conditional) **Note:** This data is required when the external reference ID is not specified in the record.
4	Tender Type	Used to indicate the type of tender through which the payment is received. **Note:** You must specify a tender type which is already defined in the system.	No
5	Tender Amount	Used to specify the tender amount. **Note:** You must specify a number which is greater than 0. You must specify a number with decimal positions less than or equal to the decimal positions defined for the respective currency.	No
6	Cancel Reason	Used to indicate the reason why you want to cancel the payment tender and its associated payments. **Note:** You must specify a payment cancel reason which is already defined in the system.	Yes
7	Bank Code	Used to indicate the bank code where the payment tender source's money will be deposited. It indicates the distribution code used to build the GL details for the payment. **Note:** You must specify a bank code which is already defined in the system. If you specify the bank code, the system will override the bank code of the tender control.	Yes (Conditional) **Note:** This data is required when the bank account is specified in the record.
8	Bank Account	Used to specify the bank account through which payment tender is received.	Yes (Conditional)

Sr. No.	Column Name	Column Description	Mandatory (Yes or No)
		Note: You must specify a bank account which is already defined for the given bank code. If you specify the bank account, the system will override the existing bank account of the tender control.	**Note:** This data is required when the bank code is specified in the record.
9	Char Type1, Char Type2, ..., Char Type5	Used to specify the characteristic type. **Note:** You must specify a characteristic type where the characteristic entity is set to **Payment Tender**. You can specify maximum 5 characteristics in the record.	No
10	Char Val1, Char Val2, .., Char Val5	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when the characteristic type is specified in the record.

Note:

The CSV file should contain the columns in the above mentioned sequence. You can add five sets of characteristics — each set containing Char Type and Char Val followed by the subsequent set (i.e., Char Type 1, Char Val1, Char Type 2, Char Val2, Char Type 3, Char Val3, Char Type 4, Char Val4, Char Type 5, Char Val5).

Before uploading the file, ensure that the column headers specified in the CSV file are mapped to the schema of the respective upload request business object through data mapping in the upload request type. Otherwise, erroneous results might occur. For more information, see Mapping Data and Configuring Filters for an Upload Request Type on page 1497.

Upload Request Type

Oracle Revenue Management and Billing allows you to define an upload request type using which you can upload a CSV file and thereby create an upload request. Note that you can upload a single CSV file at a time. The system provides the following two business objects to create distinct upload request types:

- **Adjustment Upload Request Type (i.e., C1-AdjRequestType)** - Enables you to maintain an adjustment upload request type. While creating an upload request type using the **C1-AdjRequestType** business object, you need

to specify the **Adjustment Upload Request (i.e., C1-ADJUPLD)** business object. It enables you to create an adjustment upload request through which you can create adjustments against the contracts.

- **Upload Request Type (i.e., C1-UplRequestType)** - Enables you to maintain an upload request type. While creating an upload request type using the **C1-UplRequestType** business object, you can specify either of the following business object to create the respective upload request:
  - **Bill Cycle Update Upload (i.e., C1-BillCycleUpdateUplReq)** - Enables you to maintain an accounts' bill cycle update upload request through which you can update the bill cycle of the accounts.
  - **Billable Charge Upload (i.e., C1-BillableChargeUploadRequest)** - Enables you to maintain a billable charge creation upload request through which you can create the billable charges for the accounts. Note that this business object is only applicable for the financial services domain.
  - **Hold Request Upload (i.e., C1-HoldUploadRequest)** - Enables you to maintain a hold request creation upload request through which you can create a hold request for the accounts.
  - **Refund Request Upload (i.e., C1-RefundUploadRequest)** - Enables you to maintain a refund request creation upload request through which you can create a refund request for the accounts.
  - **Tender Cancelation Upload Request (i.e., C1-TndrCnclUploadRequest)** - Enables you to maintain a payment tender cancellation upload request through which you can cancel payment tenders.
  - **Write Off Request Upload (i.e., C1-WriteOffUploadRequest)** - Enables you to maintain a write off request creation upload request through which you can create a write off request for the accounts.
  - **Bill Cycle Rule Characteristic Upload (i.e., C1-BillCycleRuleCharUpdUplReq)** - Enables you to maintain a bill cycle rule characteristic creation or modification upload request through which you can maintain the bill cycle rule characteristic of the accounts.

It is the upload request type which helps the system to determine the following:

- Business object using which the upload request should be created in the system.
- Business object using which you want to create or update the entities through an upload request.
- Whether an adjustment upload request must be processed in the deferred mode (i.e., in the background) or in the online mode (i.e., real time).

  Note: You can configure whether the other upload requests must be validated or processed in the deferred or online mode by setting the parameter in the **C1-DEFERVALD** and **C1-DEFERUPLD** algorithm, respectively, attached to the lifecycle of the respective upload request business object.
- Whether approval is required while submitting an upload request for further processing (i.e., before creating or updating the entities in the system).
- Whether you want to display information about the entity once it is created through an upload request using the respective foreign key reference.
- Map the CSV columns with the schema of the upload request business object so that the data is stored in the respective tags.
- Configure the search filters for an upload request type using which you can filter the data records while viewing details of the respective upload request.
- Associate match types using which the system derives the contract and creates an adjustment against the respective contract.

Some of the above functions are common for the upload request types created using the **C1-AdjRequestType** and **C1-UplRequestType** business objects, whereas some are specific to the respective business object. For more information, see Defining an Upload Request Type on page 1474.

The **Upload Request Type** screen allows you to define, edit, delete, and copy an upload request type. It contains the following zones:

- Upload Request Type List on page 1470
- Upload Request Type on page 1471

The following table lists the upload request types which are shipped with the product:

Upload Request Type	Description
BILL_CYCLE_UPD_UPL_REQ_TYPE	Bill Cycle Update Upload
HOLD_UPL_REQ_TYPE	Hold Request Upload
REFUND_UPL_REQ_TYPE	Refund Request Upload
WO_UPL_REQ_TYPE	Write Off Request Upload
BC_UPL_REQ_TYPE	Billable Charge Upload
TNDR_CNCL_UPL_REQ_TYPE	Tender Cancellation Request Upload

You can use the above shipped upload request types to create the respective upload requests or use a custom upload request type based on the requirements.

Upload Request Type List

The **Upload Request Type List** zone lists the upload request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Upload Request Type	Displays the upload request type.
Description	Displays the description of the upload request type.
Edit	On clicking the **Edit** (✎) icon, the **Upload Request Type** screen appears where you can edit the details of the upload request type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Upload Request Type** screen appears where you can define a new upload request type using an existing upload request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the upload request type. **Note:** You can delete an upload request type only when an upload request is not yet created using the upload request type.
Mapping	On clicking the **Mapping** (🔗) icon, the **Upload Request Mapping** screen appears where you can do the following: • Map the data of the CSV file to the schema of the respective upload request business object. The system will then store the data in the respective tags of the upload request business object schema. • Configure the search filters for the upload request type. The system will then display the search filters (in the specified sequence) in the **Data Records** zone of the **Upload Request** screen while viewing the details of the respective upload requests. **Note:** This column is applicable only for an upload request type which is created using the **C1-UplRequestType** business object and not for an upload request type which is created using the**C1-AdjRequestType** business object.
Status	Indicates the status of the upload request type. The valid values are: • ACTIVE • INACTIVE

On clicking the **Broadcast** (📡) icon corresponding to an upload request type, the **Upload Request Type** zone appears with the details of the respective upload request type.

Upload Request Type

The **Upload Request Type** zone displays the details of the upload request type. It contains the following sections:

- **Main** - Displays the basic information about the upload request type. It contains the following fields:

Field Name	Field Description
Upload Request Type	Displays the upload request type.
Upload Request Business Object	Indicates the business object using which an upload request should be created. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Description	Displays the description of the upload request type.
Detailed Description	Displays additional information about the upload request type.
Status	Indicates the status of the upload request type. The valid values are: • Active • Inactive
File Size (KB)	Indicates the maximum file size limit (in kilobytes) while uploading files using the upload request type. **Note:** This field appears when the upload request type is created using the **C1-AdjRequestType** business object.
Defer Algorithm	Indicates the algorithm that will be triggered when you click the **Create Adjustment** or **Approve** button. **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm. This field appears when the upload request type is created using the **C1-AdjRequestType** business object.

Field Name	Field Description
Entity Business Object	Indicates the business object using which you want to create or update the entities through the respective upload request. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object. This field appears when the upload request type is created using the **C1-UplRequestType** business object.
Approval Required	Indicates whether approval is required while creating or updating entities through the respective upload request.
Approval To Do Type	Indicates that the To Do entry of the specified To Do type must be created when an upload request is submitted for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Approval To Do Role	Indicates that users with the specified To Do role can only approve an upload request which is submitted for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
FK Reference Code	Indicates the foreign key reference using which you want to display information about the entity once it is created through an upload request. **Note:** It has a link. On clicking the link, the **Foreign Key Reference** screen appears where you can view the details of the respective foreign key reference. This field appears when the upload request type is created using the **C1-UplRequestType** business object.

- **Adjustment Match Type** - Lists the match types using which you want to create adjustments for the respective adjustment upload requests. This section appears when the upload request type is created using the **C1-AdjRequestType** business object. It contains the following columns:

Column Name	Column Description
Match Type	Indicates the match type for which the algorithm is associated. The valid values are: • Contract • Contract Type
Algorithm	Indicates the algorithm that will be triggered to derive the contract. **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm.

- **Characteristics** - Lists the characteristics of the upload request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - Enables you to perform various actions on the upload request type. It contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the upload request type.
Delete	Used to delete the upload request type. **Note:** You can delete an upload request type when an upload request is not yet created using the upload request type.
Duplicate	Used to create a new upload request type using an existing upload request type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which an upload request type is created. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Upload Request Type** zone does not appear in the **Upload Request Type** screen. It appears when you click the **Broadcast** ( ) icon corresponding to the upload request type in the **Upload Request Type List** zone.

Defining an Upload Request Type

Prerequisites

To define an upload request type, you should have:

If you want to create...	Then, you should have...
An adjustment upload request type	• Upload request type business objects defined in the application • Upload request business objects defined in the application • A defer algorithm created using the **C1-UPLDEFEVL** algorithm type in the application • Required To Do role assigned to the **C1-ADJUP** To Do type in the application • An algorithm created using the **C1-MTCIALG** or **C1-MTCTALG** algorithm type in the application depending on the match type using which you want to create the adjustments
An accounts' bill cycle update upload request type	• Upload request type business objects defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-BCUUR** To Do type in the application • Required entity business object (for example, C1-AccountBO) defined in the application • Required foreign key reference for the account (for example, C1-ACCT) defined in the application
A billable charge creation upload request type (for the financial services business)	• Upload request type business objects defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-BCUR** To Do type in the application • Required entity business object (for example, C1-BILLCHARGE) defined in the application • Required foreign key reference for the billable charge (for example, C1-BCHIN) defined in the application
A hold request creation upload request type	• Upload request type business objects defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-HLDUR** To Do type in the application • Required entity business object (for example, C1-HoldRequest) defined in the application • Required foreign key reference for the hold request (for example, C1-HLDRE) defined in the application
A refund request creation upload request type	• Upload request type business objects defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-REFUR** To Do type in the application • Required entity business object (for example, C1-RefundReq) defined in the application • Required foreign key reference for the refund request (for example, C1-REFWO) defined in the application
A payment tender cancellation upload request type	• Upload request type business objects defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-TNDCL** To Do type in the application

If you want to create...	Then, you should have...
	• Required foreign key reference for the payment event (for example, C1-PEVT) defined in the application
A write off request creation upload request type	• Upload request type business objects defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-WOUR** To Do type in the application • Required entity business object (for example, C1-WORequest) defined in the application • Required foreign key reference for the write off request (for example, C1-REFWO) defined in the application

Procedure

To define an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Upload Request Type** sub-menu.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type Business Object	Used to indicate the business object using which you want to create the upload request type. The valid values are: • **Adjustment Upload Request Type (i.e., C1-AdjRequestType)** - Enables you to maintain an adjustment upload request type. • **Upload Request Type (i.e., C1-UplRequestType)** - Enables you to maintain an upload request type. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Upload Request Type** (i.e., **C1-UPLREQTYP**) maintenance object.	Yes

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Upload Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple upload request type business objects defined in the application. If there is only one upload request type business object defined in the application, the **Upload Request Type** screen appears.

4. Select the required upload request type business object from the respective field.
5. Click **OK**.

   The **Upload Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the upload request type.
   - **Adjustment Match Type** - Used to specify the match type using which you want to create adjustments for the respective adjustment upload requests.

Note: This section appears when you are creating an upload request type using the **C1-AdjRequestType** business object.

- **Characteristics** - Used to define the characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the business object using which you are defining the upload request type.	Not applicable
Upload Request Business Object	Used to indicate the business object using which you want to create the respective upload request. If you are creating an upload request type using the **C1-AdjRequestType** business object, the valid value is: • **Adjustment Upload Request (i.e., C1-ADJUPLD)** - Enables you to maintain an adjustment upload request. However, if you are creating an upload request type using the **C1-UplRequestType** business object, the valid values are: • **Bill Cycle Update Upload (i.e., C1-BillCycleUpdateUplReq)** - Enables you to maintain an accounts' bill cycle update upload request. • **Billable Charge Upload (i.e., C1-BillableChargeUploadRequest)** - Enables you to maintain a billable charge creation upload request. Note that this business object is only applicable for the financial services domain. • **Hold Request Upload (i.e., C1-HoldUploadRequest)** - Enables you to maintain a hold request creation upload request. • **Refund Request Upload (i.e., C1-RefundUploadRequest)** - Enables you to maintain a refund request creation upload request. • **Tender Cancelation Upload Request (i.e., C1-TndrCnclUploadRequest)** - Enables you to maintain a payment tender cancellation upload request. • **Write Off Request Upload (i.e., C1-WriteOffUploadRequest)** - Enables you to maintain a write off request creation upload request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Upload Request (Adjustment Upload)** (i.e.,	Yes

Field Name	Field Description	Mandatory (Yes or No)
	C1-UPLREQ) or **Upload Request** (i.e., **C1-UPLOADREQ**) maintenance object depending on the business object used to create the upload request type.	
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	No
Status	Used to indicate the status of the upload request type. The valid values are: • Active • Inactive	Yes
File Size (KB)	Used to indicate the maximum file size limit (in kilobytes) while uploading files using the upload request type. **Note:** You must specify a positive integer value in this field. This field appears when you are creating an upload request type using the **C1-AdjRequestType** business object. By default, the maximum file size limit is set to 700 KB in all the business objects which are created using the **Upload Request** (i.e., **C1-UPLOADREQ**) maintenance object. Therefore, you don't need to explicitly set the maximum file size limit while defining an upload request type using the **C1-UplRequestType** business object.	Yes
Defer Algorithm	Used to attach an algorithm that will be triggered when you click the **Create Adjustment** or **Approve** button. **Note:** The **Search** (🔍) icon appears corresponding to the **Defer Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears. You need to attach an algorithm created using the **C1-UPLDEFEVL** algorithm type to this field. This algorithm checks whether the number of records in the	Yes

Field Name	Field Description	Mandatory (Yes or No)
	uploaded file exceeds the specified online record process limit. If the number of records in the uploaded file does not exceed the online record process limit, the system creates the adjustments in the real time (i.e., immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the adjustments in the deferred mode. The **Deferred** mode means in the background when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is executed. You can configure the **Upload Request Periodic Monitor (C1-UPLRQ)** batch such that it is executed at regular intervals. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*. This field appears when you are creating an upload request type using the **C1-AdjRequestType** business object.	
Entity Business Object	Used to indicate the business object using which you want to create or update the entities through the respective upload request. You must use the following entity business object for the respective upload request type: • While defining an accounts' bill cycle update upload request type, you must set the entity business object to **C1-AccountBO**. • While defining a billable charge creation upload request type, you must set the entity business object to **C1-BILLCHARGE**. • While defining a hold request creation upload request type, you must set the entity business object to **C1-HoldRequest**. • While defining a refund request creation upload request type, you must set the entity business object to **C1-RefundReq**. • While defining a write off request creation upload request type, you must set the entity business object to **C1-WORequest**. **Note:** The **Search** (🔍) icon appears corresponding to the **Entity Business Object** field. On clicking the **Search** icon, the **Business Object Search** window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
	This field appears when you are creating an upload request type using the **C1-UplRequestType** business object. The **Upload Request** feature enables you to upload business object based entities and non business object based entities in the system. If you want to create business object based entities through the respective upload request, you need to specify the entity business object in the upload request type. However, if you want to create non business object based entities (i.e., entities created via any business service) through the respective upload request, you do not need to specify the entity business object in the upload request type. For example, while defining a payment tender cancellation upload request type, you do not need to specify the entity business object.	
Approval Required	Used to indicate whether approval is required while creating or updating entities through the respective upload request.	No
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when an upload request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** option is selected. You can use the respective To Do type mentioned in the prerequisites or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve an upload request which is submitted for approval. **Note:**	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
	The list includes only those To Do roles which are associated with the approval To Do type. This field appears when the **Approval Required** option is selected.	
FK Reference Code	Used to indicate the foreign key reference using which you want to display information about the entity once it is created through an upload request. **Note:** If the foreign key reference is specified in the upload request type, the system displays the entity information for the respective upload requests in the **Data Records** zone of the **Upload Request** screen once the entity is created (i.e., once the upload request is processed). However, if the foreign key reference is not specified in the upload request type, the system does not display the entity information for the respective upload requests. The **Search** (🔍) icon appears corresponding to the **FK Reference Code** field. On clicking the **Search** icon, the **Foreign Key Search** window appears. This field appears when you are creating an upload request type using the **C1-UplRequestType** business object.	No

6. Enter the required details in the **Main** section.
7. Associate a match type with the adjustment upload request type.
8. Define characteristics for the upload request type, if required.
9. Click **Save**.
   The upload request type is defined.

How to define a characteristic for an upload request type	Defining a Characteristic for an Upload Request Type on page 1482

Associating a Match Type with an Adjustment Upload Request Type

Prerequisites

To associate a match type with an adjustment upload request type, you should have:

- Required algorithm defined for the selected match type

Note:

The following algorithms are shipped with the product for the respective match type:

Match Type	Algorithm Type	Algorithm	Algorithm Description
Contract	C1-MTCIALG	C1-MTCIALG	This algorithm derives the contract for each adjustment record where the match type is set to **CONT**.
Contract Type	C1-MTCTALG	C1-MTCTALG	This algorithm derives the contract using the contract type and account details for each adjustment record where the match type is set to **CNTY**. If there are multiple active contracts of the specified contract type on the account, the contract with the latest start date is considered.

Procedure

To associate a match type with an adjustment upload request type:

1. Ensure that the **Adjustment Match Type** section is expanded when you are defining, editing, or copying an adjustment upload *r*equest type.

   The **Adjustment Match Type** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type for which you want to associate the algorithm. The valid values are: • Contract • Contract Type	Yes (Conditional) **Note:** This field is required when you are creating an upload request type using the **C1-AdjRequestType** business object.
Algorithm	Used to attach an algorithm that will be triggered to derive the contract. The system will then create an adjustment against the respective contract. **Note:** The **Search** (🔍) icon appears corresponding to the **Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears. You must specify an algorithm which is already defined in the system.	Yes (Conditional) **Note:** This field is required when you are creating an upload request type using the **C1-AdjRequestType** business object.

   Note: This section appears when an upload request type is created using the **C1-AdjRequestType** business object.

2. Enter the required details in the **Adjustment Match Type** section.

3. If you want to define more than one match type for the adjustment upload request type, click the **Add** (+) icon and then *r*epeat step 2.

Note: However, if you want to remove a match type from the adjustment upload request type, click the **Delete** (🗑) icon corresponding to the match type.

Defining a Characteristic for an Upload Request Type

Prerequisites

To define a characteristic for an upload request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Upload Request Type**)

Procedure

To define a characteristic for an upload request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an upload *r*equest type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Upload Request Type**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the upload request type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the upload request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the upload request type, click the **Add** (+) icon and then *r*epeat step 2.

Note: However, if you want to remove a characteristic from the upload request type, click the **Delete** ( ) icon corresponding to the characteristic.

Editing an Upload Request Type

Prerequisites

To edit an upload request type, you should have:

If you want to create...	Then, you should have...
An adjustment upload request type	• Upload request business objects defined in the application • A defer algorithm created using the **C1-UPLDEFEVL** algorithm type in the application • Required To Do role assigned to the **C1-ADJUP** To Do type in the application • An algorithm created using the **C1-MTCIALG** or **C1-MTCTALG** algorithm type in the application depending on the match type using which you want to create the adjustments
An accounts' bill cycle update upload request type	• Upload request business objects defined in the application • Required To Do role assigned to the **C1-BCUUR** To Do type in the application • Required entity business object (for example, C1-AccountBO) defined in the application • Required foreign key reference for the account (for example, C1-ACCT) defined in the application
A billable charge creation upload request type (for the financial services business)	• Upload request business objects defined in the application • Required To Do role assigned to the **C1-BCUR** To Do type in the application • Required entity business object (for example, C1-BILLCHARGE) defined in the application • Required foreign key reference for the billable charge (for example, C1-BCHIN) defined in the application
A hold request creation upload request type	• Upload request business objects defined in the application • Required To Do role assigned to the **C1-HLDUR** To Do type in the application • Required entity business object (for example, C1-HoldRequest) defined in the application • Required foreign key reference for the hold request (for example, C1-HLDRE) defined in the application

If you want to create...	Then, you should have...
A refund request creation upload request type	• Upload request business objects defined in the application • Required To Do role assigned to the **C1-REFUR** To Do type in the application • Required entity business object (for example, C1-RefundReq) defined in the application • Required foreign key reference for the refund request (for example, C1-REFWO) defined in the application
A payment tender cancellation upload request type	• Upload request business objects defined in the application • Required To Do role assigned to the **C1-TNDCL** To Do type in the application • Required foreign key reference for the payment event (for example, C1-PEVT) defined in the application
A write off request creation upload request type	• Upload request business objects defined in the application • Required To Do role assigned to the **C1-WOUR** To Do type in the application • Required entity business object (for example, C1-WORequest) defined in the application • Required foreign key reference for the write off request (for example, C1-REFWO) defined in the application

Procedure

To edit an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Upload Request Type** sub-menu.
   The **Upload Request Type** screen appears.
4. In the **Upload Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the *u*pload request type whose details you want to edit.

   The **Upload Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the upload request type.
   - **Adjustment Match Type** - Used to specify the match type using which you want to create adjustments for the respective adjustment upload requests.

     Note: This section appears when you are creating an upload request type using the **C1-AdjRequestType** business object.
   - **Characteristics** - Used to define the characteristics for the upload request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Displays the upload request type.	Not applicable
Upload Request Type Business Object	Indicates the business object which is used while defining the upload request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Business Object	Used to indicate the business object using which you want to create the respective upload request. If you are creating an upload request type using the **C1-AdjRequestType** business object, the valid value is: • **Adjustment Upload Request (i.e., C1-ADJUPLD)** - Enables you to maintain an adjustment upload request. However, if you are creating an upload request type using the **C1-UplRequestType** business object, the valid values are: • **Bill Cycle Update Upload (i.e., C1-BillCycleUpdateUplReq)** - Enables you to maintain an accounts' bill cycle update upload request. • **Billable Charge Upload (i.e., C1-BillableChargeUploadRequest)** - Enables you to maintain a billable charge creation upload request. Note that this business object is only applicable for the financial services domain. • **Hold Request Upload (i.e., C1-HoldUploadRequest)** - Enables you to maintain a hold request creation upload request. • **Refund Request Upload (i.e., C1-RefundUploadRequest)** - Enables you to maintain a refund request creation upload request. • **Tender Cancelation Upload Request (i.e., C1-TndrCnclUploadRequest)** - Enables you to maintain a payment tender cancellation upload request. • **Write Off Request Upload (i.e., C1-WriteOffUploadRequest)** - Enables you to maintain a write off request creation upload request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Upload Request (Adjustment Upload)** (i.e., **C1-UPLREQ**) or **Upload Request** (i.e., **C1-UPLOADREQ**) maintenance object depending on the business object used to create the upload request type.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	
Status	Used to indicate the status of the upload request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of an upload request type to **Inactive** when the corresponding upload request is in a status other than **Canceled**, **Rejected**, or **Processed**.	Yes
File Size (KB)	Used to indicate the maximum file size limit (in kilobytes) while uploading files using the upload request type. **Note:** You must specify a positive integer value in this field. This field appears when you are creating an upload request type using the **C1-AdjRequestType** business object. By default, the maximum file size limit is set to 700 KB in all the business objects which are created using the **Upload Request** (i.e., **C1-UPLOADREQ**) maintenance object. Therefore, you don't need to explicitly set the maximum file size limit while defining an upload request type using the **C1-UplRequestType** business object.	Yes
Defer Algorithm	Used to attach an algorithm that will be triggered when you click the **Create Adjustment** or **Approve** button. **Note:** The **Search** (🔍) icon appears corresponding to the **Defer Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears. You need to attach an algorithm created using the **C1-UPLDEFEVL** algorithm type to this field. This algorithm checks whether the number of records in the uploaded file exceeds the specified online record process limit. If the number of records in the uploaded file does not exceed the online record process limit,	Yes

Field Name	Field Description	Mandatory (Yes or No)
	the system creates the adjustments in the real time (i.e., immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the adjustments in the deferred mode. The **Deferred** mode means in the background when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is executed. You can configure the **Upload Request Periodic Monitor (C1-UPLRQ)** batch such that it is executed at regular intervals. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*. This field appears when you are creating an upload request type using the **C1-AdjRequestType** business object.	
Entity Business Object	Used to indicate the business object using which you want to create or update the entities through the respective upload request. You must use the following entity business object for the respective upload request type: • While defining an accounts' bill cycle update upload request type, you must set the entity business object to **C1-AccountBO**. • While defining a billable charge creation upload request type, you must set the entity business object to **C1-BILLCHARGE**. • While defining a hold request creation upload request type, you must set the entity business object to **C1-HoldRequest**. • While defining a refund request creation upload request type, you must set the entity business object to **C1-RefundReq**. • While defining a write off request creation upload request type, you must set the entity business object to **C1-WORequest**. **Note:** The **Search** (🔍) icon appears corresponding to the **Entity Business Object** field. On clicking the **Search** icon, the **Business Object Search** window appears. This field appears when you are creating an upload request type using the **C1-UplRequestType** business object. The **Upload Request** feature enables you to upload business object based entities and non business object based entities	No

Field Name	Field Description	Mandatory (Yes or No)
	in the system. If you want to create business object based entities through the respective upload request, you need to specify the entity business object in the upload request type. However, if you want to create non business object based entities (i.e., entities created via any business service) through the respective upload request, you do not need to specify the entity business object in the upload request type. For example, while defining a payment tender cancellation upload request type, you do not need to specify the entity business object.	
Approval Required	Used to indicate whether approval is required while creating or updating entities through the respective upload request.	No
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when an upload request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** option is selected. You can use the respective To Do type mentioned in the prerequisites or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve an upload request which is submitted for approval. **Note:** The list includes only those To Do roles which are associated with the approval To Do type. This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
FK Reference Code	Used to indicate the foreign key reference using which you want to display information about the entity once it is created through an upload request.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: If the foreign key reference is specified in the upload request type, the system displays the entity information for the respective upload requests in the **Data Records** zone of the **Upload Request** screen once the entity is created (i.e., once the upload request is processed). However, if the foreign key reference is not specified in the upload request type, the system does not display the entity information for the respective upload requests. The **Search** (🔍) icon appears corresponding to the **FK Reference Code** field. On clicking the **Search** icon, the **Foreign Key Search** window appears. This field appears when you are creating an upload request type using the **C1-UplRequestType** business object.	

Tip: Alternatively, you can click the **Edit** button in the **Upload Request Type** zone to edit the details of the upload request type.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove a match type from the adjustment upload request type, if required.
7. Define, edit, or remove characteristics of the upload request type, if required.
8. Click **Save**.
   The changes made to the upload request type are saved.

Copying an Upload Request Type

Instead of creating an upload request type from scratch, you can create a new upload request type using an existing upload request type. This is possible through copying an upload request type. On copying an upload request type, the details including the match types (only for adjustments) and characteristics are copied to the new upload request type. You can then edit the details, if required.

Note: While copying an upload request type, the system does not copy the mapping details from the original upload request type to the new upload request type. You need to manually define the mapping details for the new upload request type.

Prerequisites

To copy an upload request type, you should have:

If you want to copy...	Then, you should have...
An adjustment upload request type	• An adjustment upload request type (whose copy you want to create) defined in the application • Upload request business objects defined in the application • A defer algorithm created using the **C1-UPLDEFEVL** algorithm type in the application • Required To Do role assigned to the **C1-ADJUP** To Do type in the application • An algorithm created using the **C1-MTCIALG** or **C1-MTCTALG** algorithm type in the application depending on the match type using which you want to create the adjustments
An accounts' bill cycle update upload request type	• An accounts' bill cycle update upload request type (whose copy you want to create) defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-BCUUR** To Do type in the application • Required entity business object (for example, C1-AccountBO) defined in the application • Required foreign key reference for the account (for example, C1-ACCT) defined in the application
A billable charge creation upload request type (for the financial services business)	• A billable charge creation upload request type (whose copy you want to create) defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-BCUR** To Do type in the application • Required entity business object (for example, C1-BILLCHARGE) defined in the application • Required foreign key reference for the billable charge (for example, C1-BCHIN) defined in the application
A hold request creation upload request type	• A hold request creation upload request type (whose copy you want to create) defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-HLDUR** To Do type in the application • Required entity business object (for example, C1-HoldRequest) defined in the application • Required foreign key reference for the hold request (for example, C1-HLDRE) defined in the application
A refund request creation upload request type	• A refund request creation upload request type (whose copy you want to create) defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-REFUR** To Do type in the application

If you want to copy...	Then, you should have...
	• Required entity business object (for example, C1-RefundReq) defined in the application • Required foreign key reference for the refund request (for example, C1-REFWO) defined in the application
A payment tender cancellation upload request type	• A payment tender cancellation upload request type (whose copy you want to create) defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-TNDCL** To Do type in the application • Required foreign key reference for the payment event (for example, C1-PEVT) defined in the application
A write off request creation upload request type	• A write off request creation upload request type (whose copy you want to create) defined in the application • Upload request business objects defined in the application • Required To Do role assigned to the **C1-WOUR** To Do type in the application • Required entity business object (for example, C1-WORequest) defined in the application • Required foreign key reference for the write off request (for example, C1-REFWO) defined in the application

Procedure

To copy an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Upload Request Type** sub-menu.
   The **Upload Request Type** screen appears.
4. In the **Upload Request Type List** zone, click the **Duplicate**() icon in the **Duplicate** column corresponding to the upload request type whose copy you want to create.

   The **Upload Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the upload request type.
   - **Adjustment Match Type** - Used to specify the match type using which you want to create adjustments for the respective adjustment upload requests.

     Note: This section appears when you are creating an upload request type using the **C1-AdjRequestType** business object.
   - **Characteristics** - Used to define the characteristics for the upload request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the business object using which you are defining the upload request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Business Object	Used to indicate the business object using which you want to create the respective upload request. If you are creating an upload request type using the **C1-AdjRequestType** business object, the valid value is: • **Adjustment Upload Request (i.e., C1-ADJUPLD)** - Enables you to maintain an adjustment upload request. However, if you are creating an upload request type using the **C1-UplRequestType** business object, the valid values are: • **Bill Cycle Update Upload (i.e., C1-BillCycleUpdateUplReq)** - Enables you to maintain an accounts' bill cycle update upload request. • **Billable Charge Upload (i.e., C1-BillableChargeUploadRequest)** - Enables you to maintain a billable charge creation upload request. Note that this business object is only applicable for the financial services domain. • **Hold Request Upload (i.e., C1-HoldUploadRequest)** - Enables you to maintain a hold request creation upload request. • **Refund Request Upload (i.e., C1-RefundUploadRequest)** - Enables you to maintain a refund request creation upload request. • **Tender Cancelation Upload Request (i.e., C1-TndrCnclUploadRequest)** - Enables you to maintain a payment tender cancellation upload request. • **Write Off Request Upload (i.e., C1-WriteOffUploadRequest)** - Enables you to maintain a write off request creation upload request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Upload Request (Adjustment Upload)** (i.e., **C1-UPLREQ**) or **Upload Request** (i.e., **C1-UPLOADREQ**) maintenance object depending on the business object used to create the upload request type.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	
Status	Used to indicate the status of the upload request type. The valid values are: • Active • Inactive	Yes
File Size (KB)	Used to indicate the maximum file size limit (in kilobytes) while uploading files using the upload request type. **Note:** You must specify a positive integer value in this field. This field appears when you are creating an upload request type using the **C1-AdjRequestType** business object. By default, the maximum file size limit is set to 700 KB in all the business objects which are created using the **Upload Request** (i.e., **C1-UPLOADREQ**) maintenance object. Therefore, you don't need to explicitly set the maximum file size limit while defining an upload request type using the **C1-UplRequestType** business object.	Yes
Defer Algorithm	Used to attach an algorithm that will be triggered when you click the **Create Adjustment** or **Approve** button. **Note:** The **Search** (🔍) icon appears corresponding to the **Defer Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears. You need to attach an algorithm created using the **C1-UPLDEFEVL** algorithm type to this field. This algorithm checks whether the number of records in the uploaded file exceeds the specified online record process limit. If the number of records in the uploaded file does not exceed the online record process limit, the system creates the adjustments in the real time (i.e., immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the adjustments	Yes

Field Name	Field Description	Mandatory (Yes or No)
	in the deferred mode. The **Deferred** mode means in the background when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is executed. You can configure the **Upload Request Periodic Monitor (C1-UPLRQ)** batch such that it is executed at regular intervals. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*. This field appears when you are creating an upload request type using the **C1-AdjRequestType** business object.	
Entity Business Object	Used to indicate the business object using which you want to create or update the entities through the respective upload request. You must use the following entity business object for the respective upload request type: • While defining an accounts' bill cycle update upload request type, you must set the entity business object to **C1-AccountBO**. • While defining a billable charge creation upload request type, you must set the entity business object to **C1-BILLCHARGE**. • While defining a hold request creation upload request type, you must set the entity business object to **C1-HoldRequest**. • While defining a refund request creation upload request type, you must set the entity business object to **C1-RefundReq**. • While defining a write off request creation upload request type, you must set the entity business object to **C1-WORequest**. **Note:** The **Search** (🔍) icon appears corresponding to the **Entity Business Object** field. On clicking the **Search** icon, the **Business Object Search** window appears. This field appears when you are creating an upload request type using the **C1-UplRequestType** business object. The **Upload Request** feature enables you to upload business object based entities and non business object based entities in the system. If you want to create business object based entities through the respective upload request, you need to specify the entity business object in the upload request type. However, if you	No

Field Name	Field Description	Mandatory (Yes or No)
	want to create non business object based entities (i.e., entities created via any business service) through the respective upload request, you do not need to specify the entity business object in the upload request type. For example, while defining a payment tender cancellation upload request type, you do not need to specify the entity business object.	
Approval Required	Used to indicate whether approval is required while creating or updating entities through the respective upload request.	No
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when an upload request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** option is selected. You can use the respective To Do type mentioned in the prerequisites or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve an upload request which is submitted for approval. **Note:** The list includes only those To Do roles which are associated with the approval To Do type. This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
FK Reference Code	Used to indicate the foreign key reference using which you want to display information about the entity once it is created through an upload request. **Note:** If the foreign key reference is specified in the upload request type, the system displays the entity information for the	No

Field Name	Field Description	Mandatory (Yes or No)
	respective upload requests in the **Data Records** zone of the **Upload Request** screen once the entity is created (i.e., once the upload request is processed). However, if the foreign key reference is not specified in the upload request type, the system does not display the entity information for the respective upload requests. The **Search** (🔍) icon appears corresponding to the **FK Reference Code** field. On clicking the **Search** icon, the **Foreign Key Search** window appears. This field appears when you are creating an upload request type using the **C1-UplRequestType** business object.	

Tip: Alternatively, you can click the **Duplicate** button in the **Upload Request Type** zone to create a copy of the upload request type.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove a match type from the adjustment upload request type, if required.
7. Define, edit, or remove characteristics of the upload request type, if required.
8. Click **Save**.
   The new upload request type is defined.

Mapping Data and Configuring Filters for an Upload Request Type

The **Upload Request Mapping** screen enables you to do the following:

- **Map the Data of the CSV File** - To read the data from a Comma-Separated Values (CSV) file, you need to map its columns with the schema of the upload request business object. The system will then store the data in the respective tags of the upload request business object schema. While mapping the columns with the schema, you need to specify the column headers that would appear in the CSV file. The system will then create the XML tags by converting the column header into camelCase after removing the spaces from the column header. For example, if the header in the CSV file is Account Id, then the corresponding XML tag formed by the system is accountId.

The system will then store the data from the column in the respective tag of the upload request business object schema.

Note: You need to map the columns of the CSV file in the sequence as mentioned in the respective CSV format.

- **Configure the Search Filters** - The system enables you to configure maximum 10 search filters for an upload request type. It then displays the search filters (in the specified sequence) in the **Data Records** zone of the **Upload Request** screen while viewing the details of the respective upload requests.

Once an upload request is created using an upload request type, you cannot change the mapping details and search filters of the upload request type. In addition, while copying an upload request type, the system does not copy the mapping details and search filters from the original upload request type to the new upload request type. You need to manually define the mapping details and search filters for the new upload request type.

Note: This screen is applicable only for an upload request type which is created using the **C1-UplRequestType** business object and not for an upload request type which is created using the**C1-AdjRequestType** business object.

Procedure

To map the data and configure search filters for an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Upload Request Type** sub-menu.
   The **Upload Request Type** screen appears.
4. In the **Upload Request Type List** zone, click the **Mapping**(🔗) icon in the **Mapping** column corresponding *t*o the upload request type whose details you want to edit.

   The **Upload Request Mapping** screen appears. It contains the following field:

Field Name	Field Description
Upload Request Type	Displays the description of the upload request type.

   In addition, it contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
CSV Column Header	Used to specify the column header of a CSV file that you would upload using the upload request type.	Yes
Searchable	Used to indicate whether you want to create a field for the column header and provide the ability to filter the data records using it. The system will then accordingly display the fields and columns in the **Data Records** zone of the **Upload Request** screen. **Note:** You can select this option for maximum 10 column headers in the upload request type.	Yes (Conditional) **Note:** This field is required when you are configuring a search filter for the upload request type.
Sequence	Used to indicate the order in which you want to display the corresponding fields and columns in the **Data Records** zone of the **Upload Request** screen. **Note:** You must specify a positive integer value in this field.	Yes

5. Enter the required details in **Upload Request Mapping** screen.

Note: If you want to add more than one column header, click the **Add** (+) icon and then specify the details. However, if you want to remove a column header, click the **Delete** (🗑) icon corresponding to the column header.

6. Click **Save**.
   The mapping details are saved for the upload request type.

Deleting an Upload Request Type

Procedure

To delete an upload request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Upload Request Type** sub-menu.
   The **Upload Request Type** screen appears.
4. In the **Upload Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the *u*pload request type that you want to delete.

   A message appears confirming whether you want to delete the upload request type.

   Note: You can delete an upload request type only when an upload request is not yet created using the upload request type.

   Tip: Alternatively, you can click the **Delete** button in the **Upload Request Type** zone to delete the upload request type.
5. Click **OK**.
   The upload request type is deleted.

Upload Request (Used for Searching)

The **Upload Request** screen allows you to search for an upload request using various search criteria. It also allows you to create an upload request. It contains the following zone:

- Search Upload Request on page 2065

Through this screen, you can navigate to the following screen:

- Upload Request (Used for Viewing) on page 2072

Search Upload Request

The **Search Upload Request** zone allows you to search for an upload request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an upload request using the request details. The valid value is: • Request Details **Note:** By default, the **Request Details** option is selected.	Yes
Upload Date From	Used to search for upload requests which are created from a particular date onwards. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
Status	Used to search for upload requests with a particular status. The valid values are: • Approval In Progress • Canceled • Deferred Processing • Deferred Validation • Draft • Processed • Rejected • Validated • Validating	No
To	Used to search for upload requests which are created till a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field.	No
User ID	Used to search for upload requests which are created by a particular user.	No
Upload Request Type	Used to search for upload requests which are created using a particular upload request type. **Note:** The list includes only those upload request types which are created using the **C1-UplRequestType** business object and are in the **Active** status.	No
File Name	Used to search for an upload request through which a particular file is uploaded.	No
Upload Request ID	Used to search for a particular upload request.	No

Note: You must specify at least one search criterion while searching for an upload request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Upload Date	Displays the date and time when the upload request is created.
Upload Request Information	Displays information about the upload request. **Note:** It has a link. On clicking the link, the **Upload Request** screen appears where you can view the details of the respective upload request. This information string is generated through the **C1-UPLRQ-INF** algorithm attached to the **Information** system event of the **C1-UPLOADREQ** maintenance object. It concatenates the following fields — Upload Request Type Description, Upload Request Status Description, Upload Request ID.
Status	Indicates the status of the upload request. The valid values are: • Approval In Progress • Canceled • Deferred Processing • Deferred Validation • Draft • Processed • Rejected • Validated • Validating
Upload Request Type	Indicates the upload request type using which the upload request is created.
Entity Business Object	Indicates the business object using which the entities should be created or updated through the upload request. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
File Name	Indicates the file uploaded through the upload request.
Total Records	Indicates the total number of records uploaded through the CSV file.
Created By	Indicates the user who has created the upload request.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

Searching for an Upload Request

Prerequisites

To search for an upload request, you should have:

- Upload request types created using the **C1-UplRequestType** business object in the **Active** status

Procedure

To search for an upload request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Upload Request** sub-menu.
   The **Upload Request** screen appears.
4. Enter the search criteria in the **Search Upload Request** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of upload requests that meet the search criteria appears in the **Search Results** section.

Viewing the Upload Request Details

Procedure

To view the details of an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to *t*he upload request whose details you want to view.

   The **Upload Request** screen appears. It contains following tabs:

   - Upload Request - Main on page 2073
   - Upload Request - Log on page 2077
3. Ensure that the **Main** tab is selected.
4. View the details of the upload request in the **Upload Request** zone.
5. View the records uploaded through the CSV file in the **Data Records** zone.

Creating an Upload Request

Prerequisites

To create an upload request, you should have:

If you want to create...	Then, you should have...
An accounts' bill cycle update upload request	• An upload request type which is created using the **C1-UplRequestType** business object and where the upload request business object is set to **Bill Cycle Update Upload (i.e., C1-BillCycleUpdateUplReq)** and the status is set to **Active** • An accounts' bill cycle update file in the required CSV format
A billable charge creation upload request (for the financial services business)	• An upload request type which is created using the **C1-UplRequestType** business object and where the upload request business object is set to **Billable Charge Upload (i.e., C1-BillableChargeUploadRequest)** and the status is set to **Active** • A billable charge creation file in the required CSV format **Note:** Note that this upload request type would be applicable only for the financial services domain.
A hold request creation upload request	• An upload request type which is created using the **C1-UplRequestType** business object and where the upload request business object is set to **Hold Request Upload (i.e., C1-HoldUploadRequest)** and the status is set to **Active** • A hold request creation file in the required CSV format
A refund request creation upload request	• An upload request type which is created using the **C1-UplRequestType** business object and where the upload request business object is set to **Refund Request Upload (i.e., C1-RefundUploadRequest)** and the status is set to **Active** • A refund request creation file in the required CSV format
A payment tender cancellation upload request	• An upload request type which is created using the **C1-UplRequestType** business object and where the upload request business object is set to **Tender Cancelation Upload Request (i.e., C1-TndrCnclUploadRequest)** and the status is set to **Active** • A payment tender cancellation file in the required CSV format
A write off request creation upload request	• An upload request type which is created using the **C1-UplRequestType** business object and where the upload request business object is set to **Write Off Request Upload (i.e., C1-WriteOffUploadRequest)** and the status is set to **Active**

If you want to create...	Then, you should have...
	• A write off request creation file in the required CSV format

Procedure

To create an upload request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.
   A sub-menu appears.
3. Click the **Add** option from the **Upload Request** sub-menu.

   The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request. **Note:** The list includes only those upload request types which are created using the **C1-UplRequestType** business object and are in the **Active** status.	Yes

   Tip: Alternatively, you can access the **Select Upload Request Type** screen by clicking the **Upload** button in the **Page Title** area of the **Upload Request** screen.
4. Select the required upload request type from the respective field.
5. Click **OK**.

   The **Upload Request** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the upload request.
   - **Characteristics** - Used to define the characteristics for the upload request.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which you want to create the upload request.	Not applicable
File Name	Used to specify the Comma Separated Values (CSV) file that you want to upload. **Note:** You can click the **Choose File** button corresponding to the **File Name** field to browse and select the file that you want to upload. Note that you can upload a file from a local machine and not from the server location. The system does not allow you to upload a file which exceeds 700 KB. Therefore, you must ensure that the file size is within the maximum limit.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	The file name must be unique and should not exceed 60 characters. At least one record should be present in the file along with the column headers.	
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this option when you want to upload the same file once again. **Note:** You can upload a file once again only when the upload request with the same file is in the **Rejected** or **Canceled** status.	No
Comments	Used to specify additional information about the upload request.	No

6. Enter the required details in the **Main** section.
7. Click the **Choose File** button corresponding to the **File Name** field.
   The **Open** dialog box appears.
8. Browse to the location where the file that you want to upload is available in the system.
9. Click **Open**.
   The file name appears in the **File Name** field.
10. Select the **Replace Existing File** option depending on whether you want to upload the same file once again in the system.
11. Define characteristics for the upload request, if required.
12. Click **Save**.
    A message appears indicating the number of records which are successfully uploaded. Then, the **Upload Request** screen appears where you can view the details of the upload request which is created in the **Draft** status. The status of the records is set to **Pending**. Note that if the mandatory data is missing in the record, the status of the record is set to **Invalid**.

How to define a characteristic for an upload request	Defining a Characteristic for an Upload Request on page 2071

Defining a Characteristic for an Upload Request

Prerequisites

To define a characteristic for an upload request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Upload Request**)

Procedure

To define a characteristic for an upload request:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an upload request.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the upload request. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the upload request.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Upload Request**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the upload request.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the upload request.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the upload request, click the **Add** (+) icon and then *r*epeat step *2*.

Note: However, if you want to remove a characteristic from the upload request, click the **Delete** (🗑) icon corresponding to the characteristic.

Upload Request (Used for Viewing)

Once you create an upload request, the **Upload Request** screen allows you to:

- Edit the details of the upload request
- Delete the upload request
- View the details of the upload request
- Validate the upload request

- Cancel the upload request
- Submit the upload request
- Approve or reject the upload request
- View the details of a data record
- View the log of the upload request
- Add a log entry for the upload request

This screen consists of the following tabs:

- Upload Request - Main on page 2073
- Upload Request - Log on page 2077

Upload Request - Main

The **Main** tab displays information about the upload request. It contains the following zones:

- Upload Request on page 2073
- Data Records on page 2075

Upload Request

The **Upload Request** zone displays the details of the upload request. It contains the following sections:

- **Main** - Displays the basic information about the upload request. It contains the following fields:

Field Name	Field Description
Upload Request Information	Displays information about the upload request.
Upload Request Type	Indicates the upload request type using which the upload request is created. **Note:** It has a link. On clicking the link, the **Upload Request Type** screen appears where you can view the details of the respective upload request type.
Status	Indicates the status of the upload request. The valid values are: • Approval In Progress • Canceled • Deferred Processing • Deferred Validation • Draft • Processed • Rejected • Validated • Validating
File Name	Indicates the file uploaded through the upload request.

- **Statistics** - Displays statistics related to the records of the upload request. It contains the following fields:

Field Name	Field Description
Total Records	Displays the total number of records uploaded from the CSV file through the upload request.
Pending Records	Displays the number of records where the mandatory data is available or successfully derived by the system.

Field Name	Field Description
Valid Records	Displays the number of records which are successfully validated by the system.
Invalid Records	Displays the number of records which could not be successfully validated by the system.
Error Records	Displays the number of records for which the respective entity could not be created in the system.
Processed Records	Displays the number of records for which the respective entity is successfully created in the system.

- **Record Actions** - Enables you to perform various actions on the upload request. It contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the upload request. **Note:** The **Edit** button appears when the upload request is in the **Draft** or **Validated** status.
Delete	Used to delete the upload request. **Note:** The **Delete** button appears when the upload request is in the **Draft** status.
Validate	Used to validate the upload request. **Note:** The **Validate** button appears when the upload request is in the **Draft** status.
Cancel	Used to cancel the upload request. **Note:** The **Cancel** button appears when the upload request is in the **Validated** status.
Submit	Used to submit the upload request. **Note:** The **Submit** button appears when the upload request is in the **Validated** status.
Approve	Used to approve the upload request. **Note:** The **Approve** button appears when the following conditions are met: • The upload request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the upload request.
Reject	Used to reject the upload request. **Note:** The **Reject** button appears when the following conditions are met: • The upload request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the upload request.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the upload request is created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the upload request status is updated.
Create Date/Time	Displays the date and time when the upload request is created.

- **Characteristics** - Lists the characteristics of the upload request. It contains the following columns:

Column Name	Column Description
Effective Date	Indicates the date from when the characteristic is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Data Records

The **Data Records** zone lists the records uploaded from the CSV file through the upload request. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search Criteria 1, Search Criteria 2, ..., Search Criteria 10 **Note:** We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective	Used to filter the records of the upload request.	No

Field Name	Field Description	Mandatory (Yes or No)
upload request type.		
Record Status	Used to search for data records with a particular status. The valid values are: • Error • Invalid • Pending • Processed • Valid	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
View	On clicking the **View** (🔗) icon, the **Data Record Details** window appears where you can view the details of the data record.
Search Result 1, Search Result 2, ..., Search Result 10 **Note:** We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective upload request type.	Displays the data of the record.
Record Status	Indicates the status of the data record. The valid values are: • Error • Invalid • Pending • Processed • Valid
Messages	Indicates the error that occurred while validating or processing the data record. **Note:** The data appears in this column only when the data record is in the **Invalid** or **Error** status.
Entity ID	Indicates the entity that is created for the data record through the upload request. **Note:** This column appears only when the upload request is created using an upload request type where the upload request business object is set to the **C1-BillableChargeUploadRequest** business object. The data appears in this column only when the following conditions are met: • The data record is in the **Processed** status.

Column Name	Column Description
	• The FK reference code is specified in the respective upload request type
Entity Information	Indicates the entity that is created for the data record through the upload request. **Note:** This column appears only when the upload request is created using an upload request type where the upload request business object is set to the **C1-HoldUploadRequest**, **C1-RefundUploadRequest**, **C1-WriteOffUploadRequest**, **C1-TndrCnclUploadRequest**, or **C1-BillCycleUpdateUplReq** business object. The data appears in this column only when the following conditions are met: • The data record is in the **Processed** status. • The FK reference code is specified in the respective upload request type It has a link. On clicking the link, the respective entity screen appears where you can view the details of the entity.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

Upload Request - Log

The **Log** tab contains the following zone:

- Upload Request Log on page 2077

Upload Request Log

The **Upload Request Log** zone lists the complete trail of actions performed on the upload request. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the upload request.
Details	Displays the details about the action performed on the upload request.
User	Indicates the user who has performed the action on the upload request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the upload request.

Column Name	Column Description
	Note: At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the upload request is rejected or canceled.

Note: You can manually add a log entry for the upload request by clicking the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

Editing an Upload Request

Procedure

To edit an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to *t*he upload request whose details you want to edit.
   The **Upload Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Upload Request** zone.

   The **Upload Request** screen appears. It contains the following sections:

   - **Main** - Used to specify the basic details for the upload request.
   - **Characteristics** - Used to define the characteristics for the upload request.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the upload request is created.	Not applicable
File Name	Indicates the file uploaded through the upload request.	Not applicable
Comments	Used to specify additional information about the upload request.	No

   Note: The **Edit** button appears when the upload request is in the **Draft** or **Validated** status.
5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the upload request, if required.
7. Click **Save**.
   The changes made to the upload request are saved.

Deleting an Upload Request

Procedure

To delete an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to *t*he upload request that you want to delete.
   The **Upload Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Upload Request** zone.
   A message appears confirming whether you want to delete the upload request.

   Note: The **Delete** button appears when the upload request is in the **Draft** status.
5. Click **OK**.
   The upload request is deleted.

Validating an Upload Request

Procedure

To validate an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to *t*he upload request that you want to validate.
   The **Upload Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Validate** button in the **Upload Request** zone.

   If any validation fails, the status of the data record is changed to **Invalid**. However, if all the validations are successful, the status of the data record is changed to **Valid**. Once all the pending data records in the upload request are validated, the status of the upload request is changed to **Validated**.

Note:

The **Validate** button appears when the upload request is in the **Draft** status.

If there are no pending records while validating an upload request, a message appears indicating that there are no records to be validated. In such case, you can only delete an upload request.

Canceling an Upload Request

There might be situations when an incorrect CSV file is uploaded in the system. In such case, the system provides you with the ability to cancel the upload request. However, note that you can cancel an upload request only when it is in the **Validated** status.

Prerequisites

To cancel an upload request, you should have:

- Reasons defined for the **Canceled** status of the **C1-BillableChargeUploadRequest**, **C1-BillCycleUpdateUplReq**, **C1-HoldUploadRequest**, **C1-RefundUploadRequest**, **C1-TndrCnclUploadRequest**, and **C1-WriteOffUploadRequest** business objects in the **Status Reason** screen.

Procedure

To cancel an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to cancel.
   The **Upload Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Cancel** button in the **Upload Request** zone.

   The **Cancel Reason** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Cancel Reason	Used to indicate the reason why you want to cancel the upload request. **Note:** The list includes only those reasons which are defined for the **Canceled** status of the respective business object (i.e., **C1-BillableChargeUploadRequest**, **C1-BillCycleUpdateUplReq**, **C1-HoldUploadRequest**, **C1-RefundUploadRequest**, **C1-TndrCnclUploadRequest**, and **C1-WriteOffUploadRequest**) through the **Status Reason** screen.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify additional information while canceling the upload request.	No

Note: The **Cancel** button appears when the upload request is in the **Validated** status.

5. Select the reason for canceling the upload request from the **Cancel Reason** list.
6. Enter the comments (if any) while canceling the upload request in the respective field.
7. Click **Save**.
   The status of the upload request is changed to **Canceled**.

Submitting an Upload Request

Procedure

To submit an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to *t*he upload request that you want to submit.
   The **Upload Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Submit** button in the **Upload Request** zone.

   The system behaves in the following manner:

If...	Then...
The **Approval Required** option is selected in the respective upload request type	The status of the upload request is changed to **Approval In Progress**. A To Do is created using the To Do type (i.e., **C1-BCUUR**, **C1-BCUR**, **C1-HLDUR**, **C1-REFUR**, **C1-TNDCL**, or **C1-WOUR** depending on the upload request) specified in the **Approval To Do Type** field of the respective upload request type. It is then assigned to the users with the role specified in the **Approval To Do Role** field of the respective upload request type. In addition, a log entry is created for the upload request when the To Do is created for the approver.
The **Approval Required** option is not selected in the respective upload request type and the number of valid records in the upload request does not exceed the online record process limit (defined in the **C1-DEFERUPLD** algorithm)	The following entities are created or updated for the respective upload request: • **Accounts' Bill Cycle Update Upload Request** - On processing this upload request, the bill cycle of the respective accounts is updated.

If...	Then...
	• **Billable Charge Creation Upload Request (Financial Services)** - On processing this upload request, the billable charge is created against the contract. • **Hold Request Creation Upload Request** - On processing this upload request, the hold request is created for the respective entity. • **Refund Request Creation Upload Request** - On processing this upload request, the refund request is created for the respective account. • **Payment Tender Cancellation Upload Request** - On processing this upload request, the respective payment tenders, payments, and payment events are canceled. • **Write Off Request Creation Upload Request** - On processing this upload request, the write off request is created for the respective account. If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.
The **Approval Required** option is not selected in the respective upload request type and the number of valid records in the upload request exceeds the online record process limit (defined in the **C1-DEFERUPLD** algorithm)	The status of the upload request is changed to **Deferred Processing**. **Note:** You need to execute the **Upload Request Periodic Monitor** (**C1-UPLRQ**) batch. It considers the upload requests which are in the **Deferred Processing** status and then accordingly creates or updates the entities depending on the upload request (as mentioned above). If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note:

The **Submit** button appears when the upload request is in the **Validated** status.

Approving an Upload Request

You can view the number of upload requests which are pending for approval from the **Upload Request** screen. The approver can review, and accordingly approve or reject the upload request based on the observations.

Note: The system will not allow you to approve or reject an upload request submitted by you.

To approve an upload request, you should have:

- Required approval To Do role assigned in the system

Procedure

To approve an upload request:

1. Do either of the following:

If you want to...	Then...
Review an upload request through the Upload Request screen	**a.** Search for the upload request with the **Approval In Progress** status in the **Upload Request** screen. A list of upload requests with the respective status appears in the search results. **b.** In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request which you want to review.
Review an upload request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** Click the **Search** (🔍) icon corresponding to the **To Do Type** field. The **To Do Type for User Search** window appears. **d.** Enter the required To Do type in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the upload request that you want to review.

   The **Upload Request** screen appears.
2. Review the details in the **Upload Request** screen.
3. If the information in the upload request is accurate, click the **Approve** button in the **Upload Request** zone.

   The system behaves in the following manner:

If...	Then...
The number of valid records in the upload request does not exceed the online record process limit (defined in the **C1-DEFERUPLD** algorithm)	The following entities are created or updated for the respective upload request: • **Accounts' Bill Cycle Update Upload Request** - On processing this upload request, the bill cycle of the respective accounts is updated. • **Billable Charge Creation Upload Request (Financial Services)** - On processing this upload request, the billable charge is created against the contract.

If...	Then...
	• **Hold Request Creation Upload Request** - On processing this upload request, the hold request is created for the respective entity. • **Refund Request Creation Upload Request** - On processing this upload request, the refund request is created for the respective account. • **Payment Tender Cancellation Upload Request** - On processing this upload request, the respective payment tenders, payments, and payment events are canceled. • **Write Off Request Creation Upload Request** - On processing this upload request, the write off request is created for the respective account. If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.
The number of valid records in the upload request exceeds the online record process limit (defined in the **C1-DEFERUPLD** algorithm)	The status of the upload request is changed to **Deferred Processing**. **Note:** You need to execute the **Upload Request Periodic Monitor** (**C1-UPLRQ**) batch. It considers the upload requests which are in the **Deferred Processing** status and then accordingly creates or updates the entities depending on the upload request (as mentioned above). If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

Note:

The **Approve** button appears when the following conditions are met:

- The upload request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the upload request.

Rejecting an Upload Request

Prerequisites

To reject an upload request, you should have:

- Required approval To Do role assigned in the system.
- Reasons defined for the **Rejected** status of the **C1-BillableChargeUploadRequest**, **C1-BillCycleUpdateUplReq**, **C1-HoldUploadRequest**, **C1-RefundUploadRequest**, **C1-TndrCnclUploadRequest**, and **C1-WriteOffUploadRequest** business objects in the **Status Reason** screen.

Note: The system will not allow you to approve or reject an upload request submitted by you.

Procedure

To reject an upload request:

1. Do either of the following:

If you want to...	Then...
Review an upload request through the Upload Request screen	**a.** Search for the upload request with the **Approval In Progress** status in the **Upload Request** screen. A list of upload requests with the respective status appears in the search results. **b.** In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request which you want to review.
Review an upload request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** Click the **Search** (🔍) icon corresponding to the **To Do Type** field. The **To Do Type for User Search** window appears. **d.** Enter the required To Do type in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the upload request that you want to review.

   The **Upload Request** screen appears.
2. Review the details in the **Upload Request** screen.
3. If the information in the upload request is incorrect, click the **Reject** button in the **Upload Request** zone.

   The **Reject Upload Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the upload request. **Note:** The list includes only those reasons which are defined for the **Rejected** status of the respective business object (i.e., **C1-BillableChargeUploadRequest**, **C1-BillCycleUpdateUplReq**, **C1-HoldUploadRequest**, **C1-RefundUploadRequest**, **C1-TndrCnclUploadRequest**,	Yes

Field Name	Field Description	Mandatory (Yes or No)
	and **C1-WriteOffUploadRequest**) through the **Status Reason** screen.	
Comments	Used to specify additional information while rejecting the upload request.	No

Note:

The **Reject** button appears when the following conditions are met:

- The upload request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the upload request.

4. Select the reason for rejecting the upload request from the **Status Reason** list.
5. Enter the comments (if any) while rejecting the upload request in the respective field.
6. Click **Save**.
   The status of the upload request is changed to **Rejected**.

Viewing the Details of a Data Record

Procedure

To view the details of a data record:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to *t*he upload request whose details you want to view.
   The **Upload Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Filter the data records (if required) in the **Data Records** zone.
5. In the **Search Results** section, click the **View** (🔗) icon in the **View** column corresponding to the data record *w*hose details you want to view.

   The **Data Record Details** window appears. It contains the following columns:

Column Name	Column Description
Sr. No.	Indicates the order in which the data is received in the record.
CSV Column Header	Displays the column name of the CSV file.
CSV Column Value	Indicates the data received in the respective column.

6. View the details of the data record in the **Data Record Details** window.
7. Click **Close**.

Viewing the Log of an Upload Request

Procedure

To view the log of an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the *u*pload request whose details you want to view.
   The **Upload Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. View the complete trail of actions performed on the upload request in the **Upload Request Log** zone.

Adding a Log Entry for an Upload Request

Procedure

To add a log entry for an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the *u*pload request for which you want to add a log entry.
   The **Upload Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

   The **Add Upload Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Information	Displays information about the upload request.	Not applicable
Log Details	Used to specify additional comments for the upload request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can resize the text box depending on your requirement by clicking the **Resize Handle** (⇲) icon at the bottom right corner of the text box.	

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Upload Request Log** zone.

Part XXXII

General Ledger (GL) Accounting Template

Topics:

- GL Accounting Template (Without Approval) Status Transition
- GL Accounting Template (With Approval) Status Transition
- Algorithms Used in C1- GLAT
- Prerequisites
- GL Accounting Template (Used for Searching)
- GL Accounting Template (Used for Viewing)

Oracle Revenue Management and Billing until now created FT GL entries while generating the financial transactions for adjustments, payments, and bill segments. The FT GL entries were created using the distribution codes from the adjustment type, rate component, billable charge pass through line, or contract type depending on the type of financial transaction. Now, the system enables you to override the distribution code used for creating FT GL entries using the GL Accounting Template feature.

The system allows you to define a GL Accounting template for each process and sub processes combination for a date range. Based on the parameters defined in the **FT Generation** algorithms, the system either uses the standard process or GL Accounting Template for FT GL creation. The GL Accounting template for the specified process and sub processes combination which is effective on the accounting date is used for FT GL creation.

There should be at least one debit and credit lines in the GL Accounting template. You can define maximum 10 lines in the GL Accounting template. Each line should contain the following information:

- Whether the line should be used to create a debit FT GL entry or credit FT GL entry
- Conditional algorithm (created using the **C1-GLATLC** algorithm type) to indicate whether the line should be used to create the FT GL entry or not
- Distribution code to indicate the GL Account against which the FT GL entry should be created
- User defined amount, such as Amount 01, Amount 02, or Amount 03

The line with the Amount 01 user defined amount is used to create balancing FT GL entry against the contract type. The line with the Amount 02, Amount 03, …, and Amount 10 user defined amount is used to create FT GL entries for bill segment calculation lines, non-calculated adjustments, adjustment calculation lines, or payments. In case of bill segments and calculated adjustments, the lines with the Amount 02, Amount 03, …, Amount 10 user defined amount are mapped to calculation line amounts based on the rate component sequence.

You can optionally configure the system to use the approval workflow process while activating or deactivating the GL Accounting templates. If you want to enable the approval workflow process, you need to define algorithms using the following algorithm types:

- C1-GLATAPPEN
- C1-GLATSUB

If the **Approval Required (Y or N)** parameter in an algorithm created using the **C1-GLATSUB** algorithm type is set to **Y**, then on submitting or deactivating the GL Accounting template, the approval workflow process

creates a To Do for the approver to review the GL Accounting template. Once the approver approves a GL Accounting template, the status of the GL Accounting template is set to **Active** or **Inactive**.

We are supporting the following process and sub processes combinations while creating the GL Accounting template:

Process	**BS**	**AD**	**PS**
Sub Process 1	Contract Type	Adjustment Type	Bank Account
Sub Process 2	Division	Contract Type	Contract Type
Sub Process 3	Rate Schedule	Division	Division
Sub Process 4	-	-	-
Sub Process 5	-	-	-

For example, you can define the following the GL Accounting templates using the above supported process and sub processes combinations:

GL Accounting Template	**Process**	**Sub Process 1**	**Sub Process 2**	**Sub Process 3**
GLAT1	BS	CT1	D1	RS1
GLAT2	BS	CT2	D1	RS1
GLAT3	BS	CT3	D2	RS2
GLAT4	PS	BA1	CT1	D1
GLAT5	PS	BA2	CT2	D2
GLAT6	AD	AT1	CT1	D1
GLAT7	AD	AT1	CT2	D2

While creating the GL Accounting template for BS and AD processes, you need to ensure that the line with the Amount 1 user defined amount is a debit line. However, while creating the GL Accounting template for PS process, you need to ensure that the line with the Amount 1 user defined amount is a credit line.

Based on the customer requirements, you can define GL Accounting template for various custom process and sub processes combinations.

The **Create Additional FT GL Entries** parameter is added in the **Assign GL Account to Financial Transaction (C1-GLASN)** and **Assign GL Account to Financial Transaction (GLASSGN2)** batches. If you set this parameter to **Y**, the **C1-GLCE** algorithm is invoked. Based on the parameters defined in the algorithm, the system checks whether there is a GL Accounting template which is effective on the accounting date for the specified process and sub processes combination. If the effective GL Accounting template is available, the system creates additional FT GL entries for the financial transactions. If the financial transaction's currency is different from the division's base currency, the algorithm will create FT GL extension for the respective financial transaction.

Two new parameters are added in the **ADJT-NM**, **ADJT-AC**, **ADJT-TA**, **ADJT-TC**, **ADJT-AD**, **ADJT-GL**, **PSEG-NM**, **PSEG-AC**, **PSEG-CA**, **BSBF-BA**, **BSBF-LO** algorithm types:

- **Use GL Accounting Template (Y or N)** - Indicates whether the FT GL entries should be created using the lines in the GL Accounting template. The valid values are **Y** and **N**.
- **Show the GL Accounting Template Error When Header Record Not Found (Y or N)** - Indicates whether you want to show error message when the effective GL Accounting template is not available for the process and sub processes combination. If you set the value of this parameter to **N**, the algorithm uses the standard process for FT GL creation when the effective GL Accounting template is not available.

The following table explains how the algorithms created using the following algorithm types create FT GL entries:

Algorithm Type	**Use GL Accounting Template (Y or N)**	**Calculated Adjustment Distribution Code Source (AT - Adjustment Type, CL - Calc Lines)**	**Algorithm Behaviour**
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	N	CL	Creates FT GL for the adjustment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	Y	CL	Creates debit and credit FT GL entries using the lines in the GL Accounting template.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	N	AT	Creates FT GL for the adjustment using the distribution code on the respective adjustment type and the balancing FT GL using the distribution code on contract type.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	Y	AT	Creates debit and credit FT GL entries using the lines in the GL Accounting template.

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **PSEG-NM**, **PSEG-AC**, and **PSEG-CA** algorithm types, the system creates FT GL for the payment segment using the distribution code on the respective payment segment type and the balancing

FT GL using the distribution code on contract type. However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y**, the system creates debit and credit FT GL entries using the lines in the GL Accounting template.

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

If the bill segment is...	**Then, the system...**
Created from a billable charge with SQI and/or price item details	Creates FT GL for the bill segment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.
Created from a pass through billable charge	Creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type.
Created from a billable charge with pass through charges, SQI, and price item details	Creates... • FT GL for the bill segment calculation line using the distribution code on the respective rate component • FT GL for the pass through line using the distribution code on the respective pass through line • Balancing FT GL using the distribution code on contract type
A post processing bill segment	Creates FT GL for the post processing FT using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.

However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

If the bill segment is...	**Then, the system...**
Created from a billable charge with SQI and/or price item details	Creates debit and credit FT GL entries using the lines in the GL Accounting template.
Created from a pass through billable charge	Does not use the GL Accounting template. It creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type.
Created from a billable charge with pass through charges, SQI, and price item details	Creates... • FT GL for bill segment calculation line using the lines in the GL Accounting template.

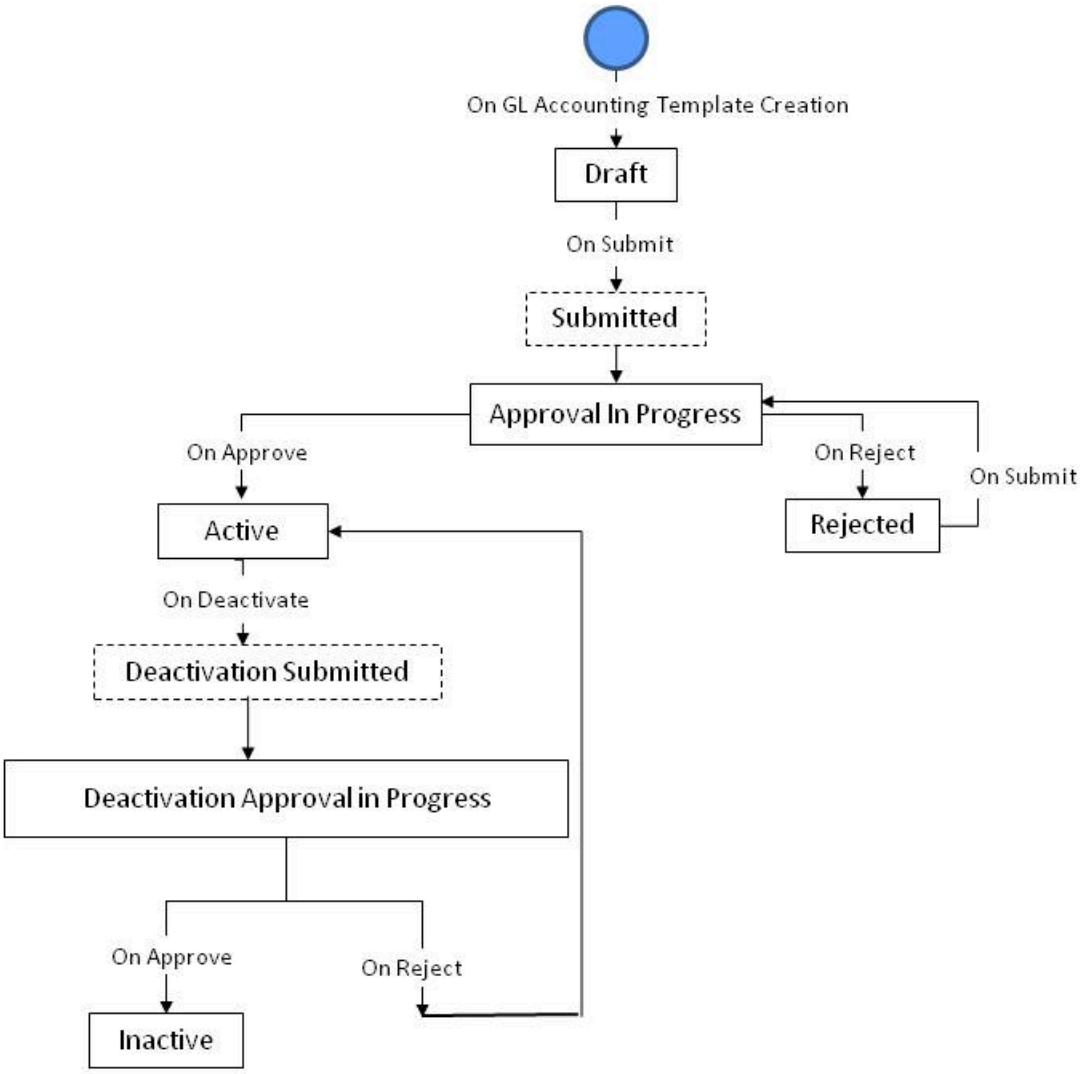
If the bill segment is...	Then, the system...
	• FT GL for the pass through line using the distribution code on the respective pass through line. • Balancing FT GL using the line in the GL Accounting template.
A post processing bill segment	Creates debit and credit FT GL entries using the lines in the GL Accounting template.

GL Accounting Template (Without Approval) Status Transition

The following figure graphically indicates how a GL accounting template moves from one status to another when the Approval Required (Y or N) parameter in the C1-GLATSUB algorithm is set to N.

GL Accounting Template (With Approval) Status Transition

The following figure graphically indicates how a GL accounting template moves from one status to another when the Approval Required (Y or N) parameter in the C1-GLATSUB algorithm is set to Y.



Algorithms Used in C1- GLAT

The following table lists the algorithms which are attached to the **C1-GLAT** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-GLAT-INF	C1-GLAT-INF	This algorithm generates the GLAT information string which appears throughout the application. This algorithm concatenates the following fields: • GLAT Description • GLAT Status Description • GLAT ID

The following table lists the algorithms which are used in the lifecycle of the **C1-GLAT** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Submitted	Enter	C1-GLATSUB	C1-GLATSUB	This algorithm checks the following: • If soft parameter value is set to Y then approval workflow will be triggered.
Approval in Progress	Enter	C1-GLATAPPEN	C1-GLATAPPEN	This algorithm creates the To Do based on the Approval To Do Type configured in algorithm.
Approval in Progress	Exit	C1-GLATAPPEX	C1-GLATAPPEX	This algorithm checks whether an approver is associated with the approval To Do Role specified in the **C1-GLATAAPEN** Algorithm. It does not allow the submitter to approve or reject the GLAT request.
Approval in Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Active	-	-	-	-

Status	System Event	Algorithm	Algorithm Type	Description
Deactivation Submitted	Enter	C1-GLATSUB	C1-GLATSUB	This algorithm checks the following: • If soft parameter value is set to Y then approval workflow will be triggered.
Deactivation Approval In Progress	Enter	C1-GLATAPPEN	C1-GLATAPPEN	This algorithm creates the To Do based on the Approval To Do Type configured in algorithm.
Deactivation Approval In Progress	Exit	C1-GLATAPPEX	C1-GLATAPPEX	This algorithm checks whether an approver is associated with the approval To Do Role specified in the **C1-GLATAAPEN** Algorithm. It does not allow the submitter to approve or reject the GLAT request.
Deactivation Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Rejected	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Inactive	-	-	-	-

Prerequisites

To setup the GL Accounting Template, you need to do the following:

- Define rejected status reasons for the **C1-GLAT** business object
- Define deactivated status reasons for the **C1-GLAT** business object
- Assign the **C1-GLAT** To Do type to a To Do role whose users must receive To Do generated while submitting a template for approval

- Define the required algorithms, for approval and To Do type role and configurations

GL Accounting Template (Used for Searching)

The **GL Accounting Template** screen allows you to search for a template using various search criteria. It also allows you to create template. Through this screen, you can navigate to the following screen:

- GL Accounting Template (Used for Viewing) on page 2103

This screen consists of the following zones:

- Search GL Accounting Template on page 2098
- GL Accounting Template Lines on page 2099

Search GL Accounting Template

The **Search GL Accounting Template** zone allows you to search for GL accounting templates using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template ID	Used to search a particular template.	No
Description	Used to specify the description of a template.	No
Status	Used to indicate the status of the template. The valid values are: • Draft • Approval In Progress • Deactivation Approval In Progress • Active • Inactive • Rejected	No
Process	Used to search a particular process.	No
Sub Process 1	Used to search a particular Sub Process 1.	No
Sub Process 2	Used to search a particular Sub Process 2.	No
Sub Process 3	Used to search a particular Sub Process 3.	No
Sub Process 4	Used to search a particular Sub Process 4.	No
Sub Process 5	Used to search a particular Sub Process 5.	No
Effective Start Date	Used to search templates which are effective from a particular date.	No
Effective End Date	Used to search templates which are effective till a particular date.	No

Note: You must specify at least one search criterion while searching for a template.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Process	Displays the process.
GL Accounting Template Request Information	Displays information about the template. **Note:** It has a link. On clicking the link, the **GL Accounting Template** screen appears where you can view the details of the respective template.
Description	Displays the description of process.
Sub Process 1	Displays the Sub Process 1.
Sub Process 2	Displays the Sub Process 2.
Sub Process 3	Displays the Sub Process 3.
Sub Process 4	Displays the Sub Process 4.
Sub Process 5	Displays the Sub Process 5.
Effective Start Date	Displays the date from when the template is effective.
Effective End Date	Displays the date till when the template is effective.
Status	Displays the status of template.

GL Accounting Template Lines

The **GL Accounting Template Lines** zone displays the details of the template lines. This zone contains the following columns:

Column Name	Column Description
Credit/Debit	Displays whether the template lines are of credit or debit.
Conditional Algorithm	Displays the algorithm that specified that template line is valid or not.
Distribution Code	Displays the distribution code which indicates the template associated with the charge.
User Defined Amount Field	Displays the amount to be used in a template line.

Note: By default, the **GL Accounting Template Lines** zone does not appear in the **GL Accounting Template** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to the template in the **Search Results** section.

Searching for a GL Accounting Template

Procedure

To search for a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.
   The **GL Accounting Template** screen appears.
3. Enter the search criteria in the **Search GL Accounting Template** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of templates that meet the search criteria appears in the **Search Results** section.

Creating a GL Accounting Template

Prerequisites

To create a GL Accounting template, you should have:

- Conditional Algorithms and Distribution codes defined in the application.

Procedure

To create a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.
   The **GL Accounting Template** screen appears.

3. Click the **Add** button in the **Page Title** area of the **GL Accounting Template** screen.

   The **GL Accounting Template** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the template. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Process	Used to specify a particular process.	Yes
Description	Used to indicate the description of a process.	Yes
Sub Process 1	Used to specify a Sub Process 1.	Yes (Conditional) **Note:** This field is required if **Process** is **Bill Segment or Payment Segment or Adjustments**
Sub Process 2	Used to specify a Sub Process 2.	Yes (Conditional) **Note:** This field is required if **Process** is **Bill Segment or Payment Segment or Adjustments**
Sub Process 3	Used to specify a Sub Process 3.	Yes (Conditional) **Note:** This field is required if **Process** is **Bill Segment or Payment Segment or Adjustments.**
Sub Process 4	Used to specify a Sub Process 4.	No
Sub Process 5	Used to specify a Sub Process 5.	No
Effective Start Date	Used to specify date for a template which is effective from a particular date.	Yes
Effective End Date	Used to specify date for a template which is effective till a particular date.	No

   - **GL Accounting Template Lines** -Used to specify the template lines in a GL accounting template. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No	Used to specify the sequence number.	Yes
Credit/Debit	Used to indicate whether template lines are of credit or debit.	Yes
Conditional Algorithm	Used to specify the algorithm which specifies that template line is valid or not.	No
Distribution Code	Used to indicate the distribution code which indicates the template associated with the charge.	Yes

Column Name	Column Description	Mandatory (Yes or No)
User Defined Amount Field	Used to indicate the amount to be used in a template line.	Yes

4. Enter the required details

   Note:

   You can search for a conditional algorithm and distribution code by clicking the **search** (🔍) icon corresponding to the respective field.

   At least one credit and one debit line is required while defining a template.

   System will not allow to add a template having same set of process, sub processes and effective date. If there is a template already created and its status is Inactive, then only template can be created with same set of process, sub processes and effective date.

   Each conditional line must have unique User Defined Amount Field value.

5. Add template lines for a template defined.
6. Click **Save**.
   The GL Accounting template is created and the status of the template is set to **Draft**. The **GL Accounting Template** screen appears with the details of template.

Viewing the GL Accounting Template Details

Procedure

To view the details of a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to view.

   The **GL Accounting Template** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the template. It contains the following zone:
     - **GL Accounting Template** - Displays the details of the template.
   - **Log** - Lists the complete trail of actions performed on the template. This tab contains the following zone:
     - **GL Accounting Template Log** - Displays the trail of actions performed on the particular template.
3. View the details of the template in the **GL Accounting Template** zone.

GL Accounting Template (Used for Viewing)

Once you create a template, the **GL Accounting Template** screen allows you to:

- View the details of a template
- Edit the details of a template
- Delete a template
- Submit a template for approval
- Approve or reject a template
- Deactivate a template

This screen consists of the following tabs:

- **Main** - Displays information about the template. It contains the following zone:
  - **GL Accounting Template** - Displays the details of the template.
- **Log** - Lists the complete trail of actions performed on the template. This tab contains the following zone:
  - **GL Accounting Template Log** - Displays the trail of actions performed on the particular template.

GL Accounting Template - Main

The **Main** tab on the **GL Accounting Template** contains the following zone:

GL Accounting Template on page 2104

GL Accounting Template

The **GL Accounting Template** zone displays the details of the template. This zone contains the following sections:

- **Main** - This section provides basic information about the GL Accounting template. It contains the following fields:

Field Name	Field Description
GL Accounting Template Information	Displays information about the template
Status	Indicates the status of the template.
Process	Displays the process.
Description	Displays the description of the process.
Sub Process 1	Displays the Sub Process 1.
Sub Process 2	Displays the Sub Process 2.
Sub Process 3	Displays the Sub Process 3.
Sub Process 4	Displays the Sub Process 4.
Sub Process 5	Displays the Sub Process 5.
Effective Start Date	Displays the date from when the template is effective.
Effective End Date	Displays the date till when the template is effective.

- **GL Accounting Template Lines** - Lists the GL Accounting template lines. It contains the following columns:

Column Name	Column Description
Sequence No	Displays the sequence number.
Credit/Debit	Displays whether the template lines are of credit or debit.
Conditional Algorithm	Displays the algorithm that specified that template line is valid or not.
Distribution Code	Displays the distribution code which indicates the template associated with the charge.
User Defined Amount Field	Displays the amount to be used in a template line.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the template. **Note:** The **Edit** button appears when the template is in the **Draft** or **Rejected** status.
Delete	Used to delete the template. **Note:** The **Delete** button appears when the template is in the **Draft** or **Rejected** status.
Submit	Used to activate the template.

Button Name	Button Description
	Note: The **Submit** button appears when the template is in the **Draft** or **Rejected** status.
Approve	Used to approve the template. **Note:** the **Approve** button appears when the template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.
Reject	Used to reject the template. **Note:** the **Reject** button appears when the template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.
Deactivate	Used to deactivate the active template. **Note:** The **Deactivate** button appears when the template is in the **Active** status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

GL Accounting Template - Log

The **Log** tab on the **GL Accounting Template** screen contains the following zone:

GL Accounting Template Log on page 2105

GL Accounting Template Log

The **GL Accounting Template Log** zone on the **GL Accounting Template** screen lists the complete trail of actions performed on the GL Accounting template. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the template.
Details	Displays the details about the action performed on the template.
User	Indicates the user who has performed the action on the template.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the template.
Status Reason	Displays the status reason of action performed on the template.

Note: You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

The **Add GL Accounting Template Log** window appears. Enter **Log Details** and click **Save**. The GL Accounting Template log is added.

Editing a GL Accounting Template

Procedure

To edit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to edit.
   The **GL Accounting Template** screen for editing appears.
3. Click the **Edit** button in the **GL Accounting Template** zone.

   Note: The **Edit** button appears when the template is in the **Draft** or **Rejected** status.

   The **GL Accounting Template** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the template. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Process	Used to specify a particular process.	Yes
Description	Used to indicate the description of a process.	Yes
Sub Process 1	Used to specify a Sub Process 1.	Yes (Conditional) **Note:** This field is required if **Process** is **Bill Segment or Payment Segment or Adjustments**
Sub Process 2	Used to specify a Sub Process 2.	Yes (Conditional) **Note:** This field is required if **Process** is **Bill Segment or Payment Segment or Adjustments**
Sub Process 3	Used to specify a Sub Process 3.	Yes (Conditional) **Note:** This field is required if **Process** is **Bill Segment or Payment Segment or Adjustments.**

Field Name	Field Description	Mandatory (Yes or No)
Sub Process 4	Used to specify a Sub Process 4.	No
Sub Process 5	Used to specify a Sub Process 5.	No
Effective Start Date	Used to specify date for a template which is effective from a particular date.	Yes
Effective End Date	Used to specify date for a template which is effective till a particular date.	No

- **GL Accounting Template Lines** - Used to specify the template lines in a GL accounting template. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No	Used to specify the sequence number.	Yes
Credit/Debit	Used to indicate whether template lines are of credit or debit.	Yes
Conditional Algorithm	Used to specify the algorithm which specifies that template line is valid or not.	No
Distribution Code	Used to indicate the distribution code which indicates the template associated with the charge.	Yes
User Defined Amount Field	Used to indicate the amount to be used in a template line.	Yes

Note:

If you want to specify more than one template lines, click the **Add** (+) icon corresponding to the sequence No and then specify the details.

However, if you want to remove a template line from the template, click the **Delete** (🗑) icon corresponding to the sequence No.

You can search for a conditional algorithm and distribution code by clicking the **search** (🔍) icon corresponding to the respective field.

At least one credit and one debit line is required while defining a template.

4. Modify the details of the template, if required.
5. Click **Save**.
   The changes made to the GL Accounting template are saved.

Deleting a GL Accounting Template

Procedure

To delete a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column *c*orresponding to the template that you want to delete.
   The **GL Accounting Template** screen appears.
3. Click the **Delete** button in the **GL Accounting Template** zone.
   A message appears confirming whether you want to delete the template.

   Note: The **Delete** button appears when the template is in the **Draft** or **Rejected** status.
4. Click **OK**.
   The GL Accounting template is deleted.

   Note:

   You can delete a template when its status is **Draft**.

Submitting a GL Accounting Template

Prerequisites

To submit a GL Accounting Template, you should have:

- Process and GL Accounting template lines defined in the template.

Procedure

To submit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column *c*orresponding to the template that you want to submit.
   The **GL Accounting Template** screen appears.
3. Click the **Submit** button in the **GL Accounting Template** zone.
   The system behaves in the following manner:

If...	Then...
Approval Required Flag is set to Yes in the **C1-GLATSUB** algorithm.	A To Do of the **C1-GLAT** To Do type is created and sent to the approver and the status of the template is changed to **Approval In Progress**.
Approval Required Flag is set to No in the **C1-GLATSUB** algorithm.	The template is created using the specified process and the status of the template is changed to **Active** .

Note:

The **Submit** button appears when the template is in the **Draft** or **Rejected** status.

Approving a GL Accounting Template

You can view the number of GL Accounting templates which are pending for approval in the **GL Accounting Template** screen. The approver can review, and accordingly approve or reject the template based on the observations.

Note: The system will not allow you to approve or reject a template submitted by you.

Procedure

To approve a template:

1. Do either of the following:

If you want to...	Then...
Approve a GL Accounting Template through the GL Accounting template screen	**a.** Search for the template in the **GL Accounting template** screen. **b.** In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template which you want to review.
Approve a GL Accounting Template from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-GLAT** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the GL Accounting template that you want to review.

   The **GL Accounting Template** screen appears.
2. Review the template details.

3. Click the **Approve** button in the **GL Accounting Template** zone.

   The system behaves in the following manner:

If you are...	Then...
Approving a GL Accounting template	The status of the template is changed to **Active** as specified in the GL Accounting template.

Note: The **Approve** button appears when the template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.

Related Topics

Rejecting a GL Accounting Template

Prerequisites

To reject a GL Accounting template, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a GL Accounting template, you need to specify the reason why you want to reject the template. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-GLAT** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a template submitted by you.

Procedure

To reject a GL Accounting template

1. Do either of the following:

If you want to	Then
Reject a GL Accounting template through the GL Accounting Template screen	**a.** Search for the template in the **GL Accounting Template** screen. **b.** In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template which you want to review.
Reject a GL Accounting template from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears.

If you want to	Then
	c. Enter **C1-GLAT** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the template that you want to review.

The **GL Accounting Template** screen appears.

2. Review the template details.
3. Click the **Reject** button in the **GL Accounting Template** zone.

The **Reject GLAT Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the template	Yes
Comments	Used to specify additional information while rejecting the template.	No

Note: The **Reject** button appears when:

- The template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.
- A user with the approval To Do role is reviewing the template.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.
The status of the template is changed to **Rejected**.

Deactivating a GL Accounting Template

Prerequisites

To deactivate a GL Accounting template, you should have:

- Deactivation reasons defined in the application.

Note:

While deactivating a GL Accounting template, you need to specify the reason why you want to deactivate the template. You can select the appropriate deactivation reason when you have defined the reasons for the deactivation status of the **C1-GLAT** business object in the **Status Reason** screen.

Procedure

To deactivate a GL Accounting template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column *c*orresponding to the template that you want to deactivate.
   The **GL Accounting Template** screen appears.
3. Click the **Deactivate** button in the **GL Accounting Template** zone.

   Note: The **Deactivate** button appears when the template is in the **Active** status.

   The **Deactivate GLAT Request** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason for deactivating a template	Yes
Comments	Used to specify the additional comments for the deactivation of template.	No

4. Click **OK**.
   The GL Accounting template status is changed to **Deactivation Approval In Progress** .

Viewing the Log of a GL Accounting Template

Procedure

To view the log of a GL Accounting template:

1. Search for the template in the **GL Accounting template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column *c*orresponding to the template whose log you want to view.

   The **GL Accounting Template** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the template. It contains the following zone:
     - **GL Accounting Template** - Displays the details of the template.
   - **Log** - Lists the complete trail of actions performed on the template. This tab contains the following zone:
     - **GL Accounting Template Log** - Displays the trail of actions performed on the particular template.
3. Click the **Log** tab.

The **GL Accounting Template Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the template.
Details	Displays the details about the action performed on the template.
User	Indicates the user who has performed the action on the template.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the template.
Status Reason	Indicates the reason why the template was rejected or voided.

Note: You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

Related Topics

Adding a Log Entry for a GL Accounting Template

Procedure

To add a log entry for a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose log you want to edit.

   The **GL Accounting Template** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the template. It contains the following zone:
     - **GL Accounting Template** - Displays the details of the template.
   - **Log** - Lists the complete trail of actions performed on the template. This tab contains the following zone:
     - **GL Accounting Template Log** - Displays the trail of actions performed on the particular template.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

   The **Add GL Accounting Template Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
GL Accounting Template Information	Displays information about the template.	Not applicable
Log Details	Used to specify additional comments for the template.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **GL Accounting Template Log** zone.

Part XXXIII

Accrual

Topics:

- Accrual Created through UI (Without Approval) Status Transition
- Accrual Created through UI (With Approval) Status Transition
- Accrual Created through Batch (Without Approval) Status Transition
- Accrual Created through Batch (With Approval) Status Transition
- Accrual Processes
- Accrual Cycle (Used for Searching)
- Accrual Cycle (Used for Viewing)
- Accrual Type (Used for Searching)
- Accrual Type (Used for Viewing)
- Accrual (Used for Searching)
- Accrual (Used for Viewing)

Oracle Revenue Management and Billing enables you to calculate and create accrual for accounts. An accrual allows an entity to record expenses and revenues for which it expects to expend cash or receive cash, respectively, in a future reporting period.

The accrual is an adjustment which is created for the following:

- Revenues that have been earned but are not yet recorded in the books of accounts.
- Expenses that have been incurred but are not yet recorded in the book of accounts.

The system also enables you to reverse the accrual for accounts. You need to define whether the accounts belonging to a division are eligible for accrual or not. If a division is eligible for accrual, by default, all accounts belonging to the division are eligible for accrual. However, you can exclude an account from accrual, if required. To enable the accruals feature, you need to define the following:

- **Accrual Cycle** - You must specify the following information in the accrual cycle:
  - Dates when accrual should be calculated and created for the accounts where the accrual cycle is defined.
  - Accrual reversal period for each accrual date.

  If a division is eligible for accrual, you need to specify the accrual cycle for the division. By default, all accounts belonging to a division will inherit the accrual cycle of the division. However, you can override the accrual cycle of an account
- **Accrual Type** - You must specify the following information in the accrual type:
  - Type of the accrual object that you want to create for posting the accrual amount. At present, the product enables you to create adjustments to record accruals for accounts in the system.
  - Whether you want to calculate the accrual based on the historical or actual data. If you want to calculate the accrual based on the historical data, you need to specify the number of historical bills that you want to consider for accrual calculation. The system will only consider the completed historical bills during accrual calculation. Besides specifying the historical bill count, you also need to specify the type of day (i.e. Business Day or Calendar Day) which is used to calculate the accrual amount. However, if you want to calculate the accrual based on the actual data, you need to specify whether trial bill or unbilled pass through billable charges created through the Transaction Feed

Management process should be considered to calculate the accrual amount.
- Whether you want to calculate accrual at the bill or bill segment level.
- Cancel reason that you want to use while reversing the accrual
- Algorithms that you want to use during the accrual calculation, creation, and reversal
- Whether any objects, such as adjustments created using a particular adjustment type, bill segments created for a particular price item, or adjustments' or bill segments' financial transactions where a particular distribution code is used, must be excluded during the accrual calculation.
- Divisions to which you want to associate the accrual type.

The accrual process includes the following sub-processes:

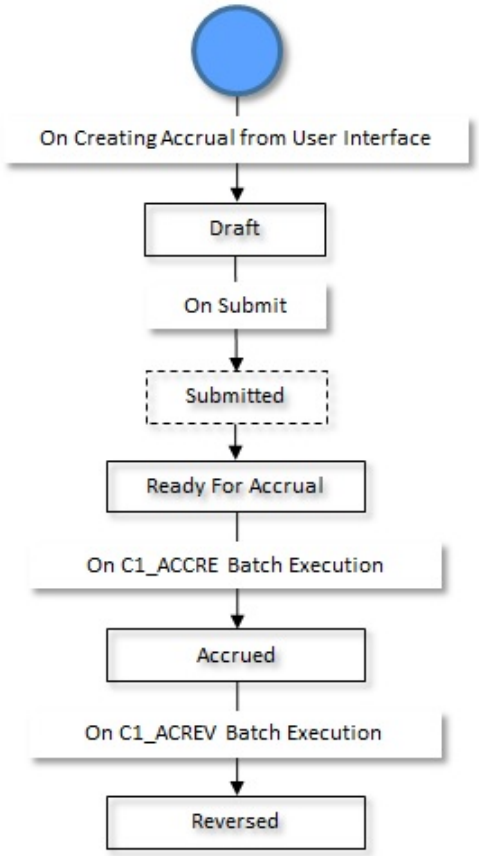
- **Accrual Calculation** - In this process, accounts that are eligible for accrual will have its accrual amount calculated on the basis of the accrual type configuration.
- **Accrual Creation** - In this process, on the basis of the calculated accrual amount and information configured on the accrual type, the accrual adjustment will be created.
- **Accrual Reversal** - In this process, reversal of accrual adjustments will be done to prevent double posting of revenue, once billing is done. On the basis of the accrual reversal schedule, an account with accrual adjustments will be selected for accrual reversal processing. For every frozen adjustment, a cancellation is done in order to reverse journal entries.

During the accrual process, an accrual goes through various statuses in its lifecycle. You can execute accrual process either using user interface (UI), or batch. For more information about the accrual statuses, see, Accrual Created through UI (Without Approval) Status Transition on page 2117, Accrual Created through UI (With Approval) Status Transition on page 2117, Accrual Created through Batch (Without Approval) Status Transition on page 2118, and Accrual Created through Batch (With Approval) Status Transition on page 2119

Note that the lifecycle of an accrual is driven by the business object using which the accrual is created. An accrual business object named **C1_ACCRUALS** is shipped with the product. The accrual feature explained in this document is articulated based on the lifecycle and logic defined in the **C1_ACCRUALS** business object.

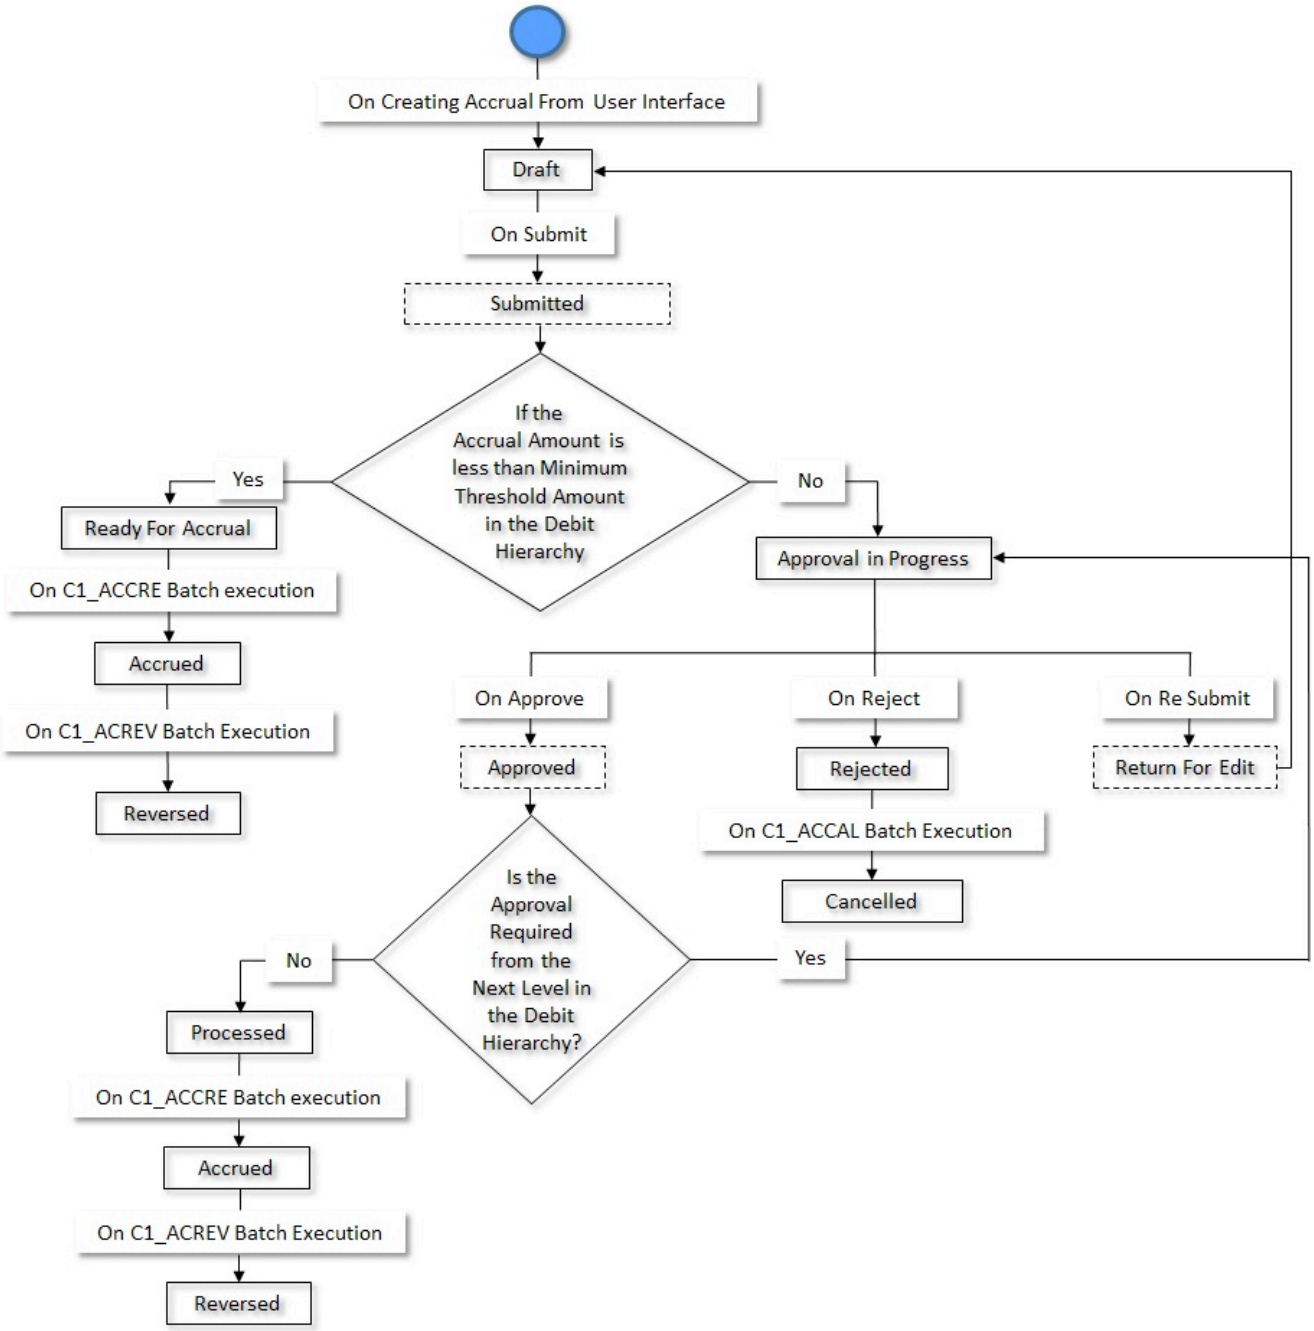
Accrual Created through UI (Without Approval) Status Transition

The following figure graphically indicates how an accrual created from the user interface moves from one status to another when approval workflow is off:



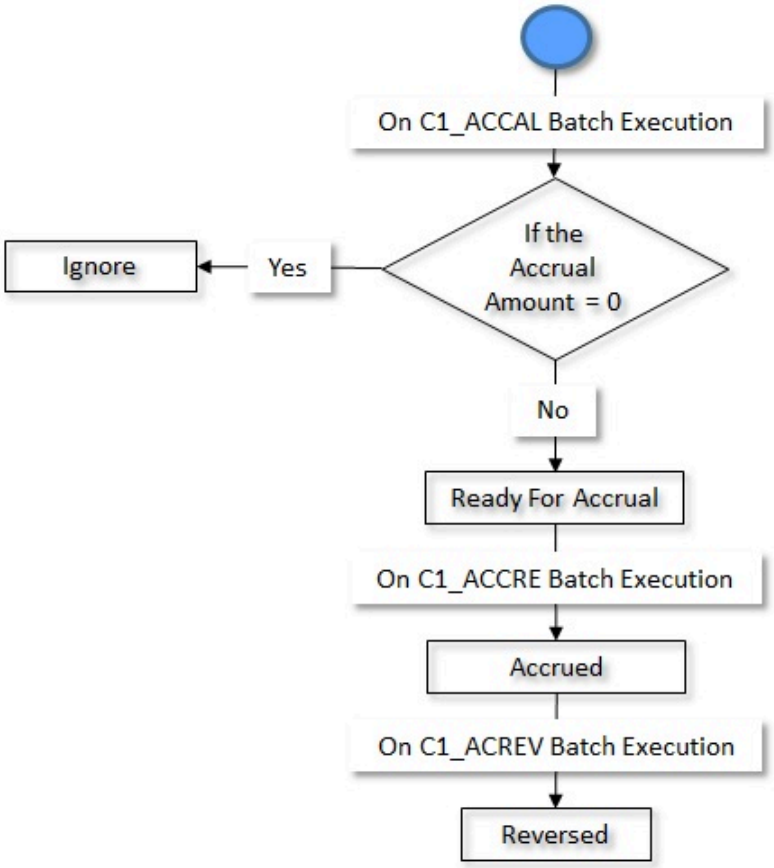
Accrual Created through UI (With Approval) Status Transition

The following figure graphically indicates how an accrual created from the user interface moves from one status to another when the approval workflow is on:



Accrual Created through Batch (Without Approval) Status Transition

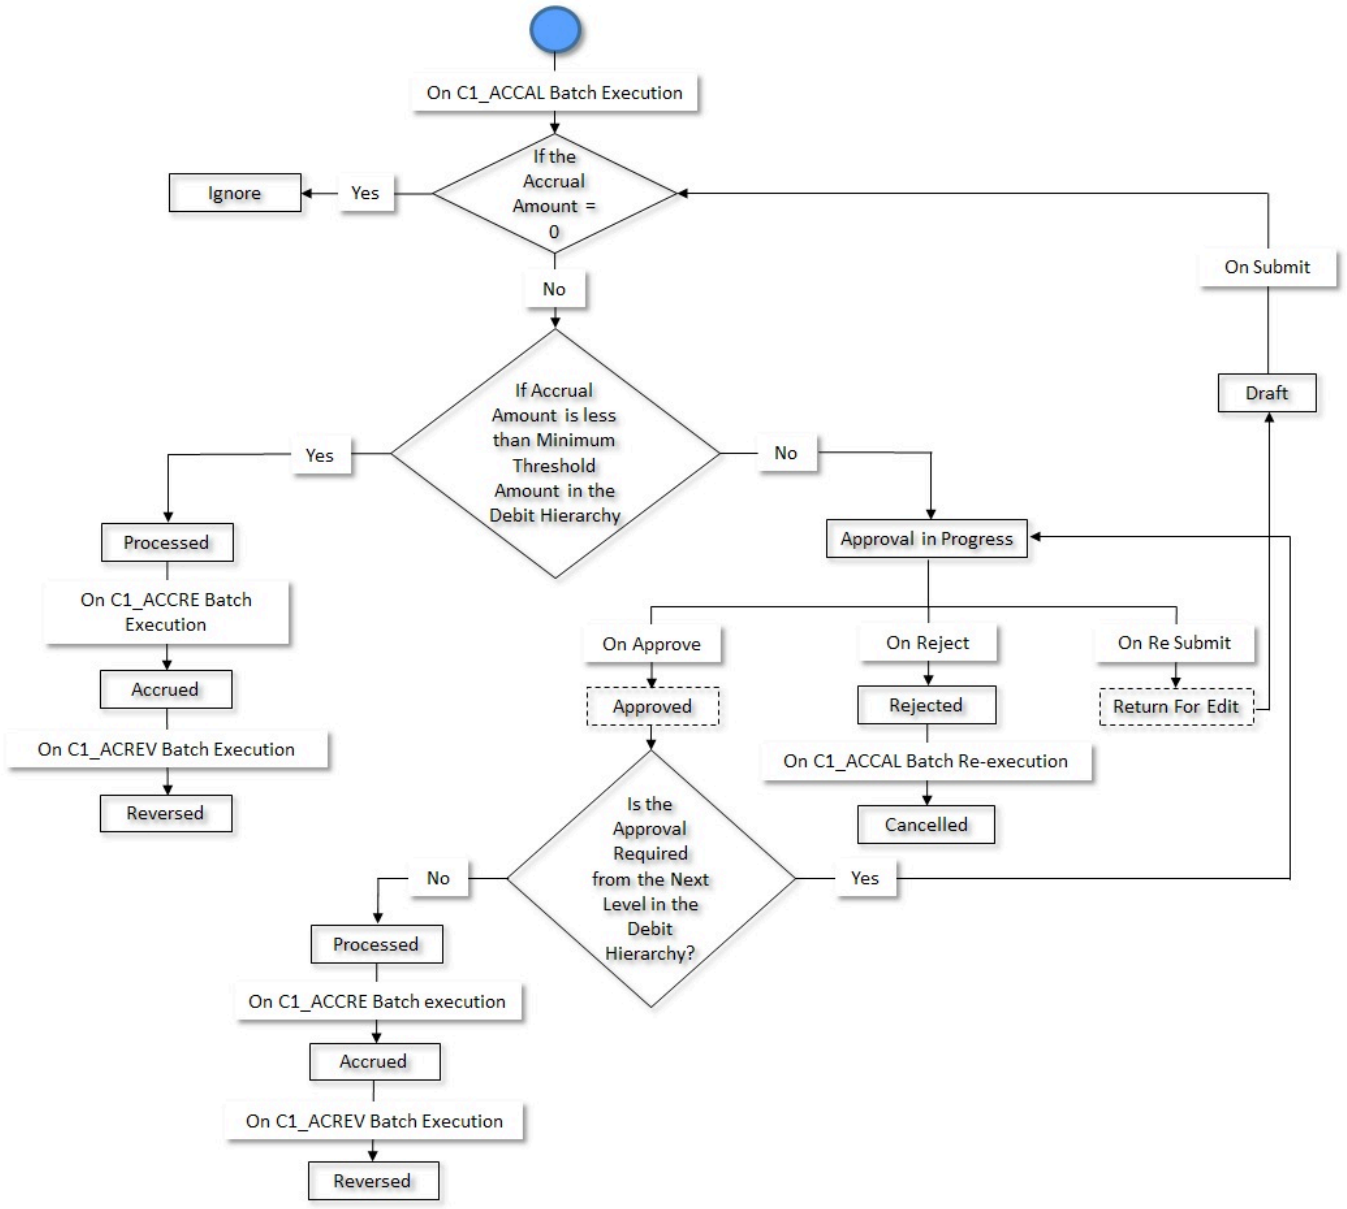
The following figure graphically indicates how an accrual created through the batch moves from one status to another when the approval workflow is off:



Note: For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

Accrual Created through Batch (With Approval) Status Transition

The following figure graphically indicates how an accrual created through the batch moves from one status to another when the approval workflow is on:



Note: For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

Accrual Processes

An accrual allows an entity to record expenses and revenues for which it expects to expend cash or receive cash, respectively, in a future reporting period. Following are the accrual processes to implement accrual in the application:

- Account's Eligibility Check for Accrual on page 2121
- Accrual Calculation on page 2121
- Accrual Creation on page 2122
- Accrual Reversal on page 2123

Account's Eligibility Check for Accrual

The accrual eligibility process checks a number of account attributes to ensure that the accounts are eligible for accrual. The following table lists the internal process that identifies an account's eligibility for accrual. There will be a switch/indicator in the division and account levels that captures the information as given below:

Division Accrual (Yes/ No)	Account Accrual (Yes/ No)	Eligibility for Accrual (Yes/No)	Description
Yes	No	No	Account has the highest priority over division.
Yes	Blank	Yes	Division has the highest priority in the absence of account information.
Yes	Yes	Yes	Account has the highest priority over division.
No	Yes	No	If the division is set to no, ignore the account level switch.
No	No	No	If the division is set to no, ignore the account level switch.
No	Blank	No	If the division is set to no, ignore the account level switch.

Following accounts are considered for accrual eligibility:

1. The Invoicing Group's (IG) Master Account is the only account which is eligible for accrual.
2. The Invoice Construct Usage Account is not eligible for accrual.
3. You can only process the accrual eligible accounts for calculation purposes.

Accrual Calculation

The accrual calculation process calculates the accrual amount of only those accounts that are eligible for accrual. Depending upon the accrual type of those eligible accounts, an algorithm is created to calculate the accrual amount that is based on the following parameters:

- Calculate Accrual at the Bill Level Based on Historical Data on page 2121
- Calculate Accrual at the Price Item Level Based on Historical Data on page 2122
- Calculate Accrual at the Bill Level Based on Actual Data on page 2122
- Calculate Accrual at the Price Item Level Based on Actual Data on page 2122

Note: By default, all the adjustments (for bill level and bill segment level) are included in the accrual calculation. However, some adjustments from the calculation lines are excluded, through the look up references provided in the application.

Calculate Accrual at the Bill Level Based on Historical Data

The accounts eligible for accrual have their accrual amount calculated at the bill level based on the historical data. The number of historical bills to be considered for accrual calculation is based on the value configured in the accrual type of the eligible account.

For example, if there are two historical bills, the system considers the last two completed bills for accrual calculation. The accrual amount is the average of the bill segments and frozen adjustments on the last two bills. If the option from the Type of Day field is set as Business Day, the system does not consider the weekends and holidays during the accrual calculation. However, if the option from the Type of Day field is set as Calendar Day, the system considers the weekends and holidays during the accrual calculation.

Calculate Accrual at the Price Item Level Based on Historical Data

The accounts eligible for accrual have their accrual amount calculated at the price item level based on the historical data. The number of historical bills to be considered for accrual calculation is based on the value configured in the accrual type of the eligible account.

For example, if there are two historical bills, then the system considers the last two completed bills for accrual calculation. The accrual amount is the average of price items on the last two bills. If the option from the **Type of Day** field is set as **Business Day**, the system does not consider the weekends and holidays during the accrual calculation. However, if the option from the **Type of Day** is set as **Calendar Day**, the system considers the weekends and holidays during the accrual calculation.

Calculate Accrual at the Bill Level Based on Actual Data

The accounts eligible for accrual have their accrual amount calculated at the bill level based on the actual data. The actual data can be sourced from a trial bill or rated Transaction Feed Management transaction. The accrual source to be considered is based on the value configured in the accrual type of the account.

Following scenarios indicate how the accrual amount is calculated:

- If the accrual source is transaction feed and accrual amount is calculated at bill level; the accrual amount is the sum of unbilled pass through billable charges created for the account either manually or automatically through the Transaction Feed Management process and frozen adjustments of the account.
- If the accrual source is transaction feed and accrual amount is calculated at bill segment level; the accrual amount is the sum of unbilled pass through billable charges created for the account automatically through the Transaction Feed Management process.

Calculate Accrual at the Price Item Level Based on Actual Data

The accounts eligible for accrual have their accrual amount calculated at the price item level based on the actual data. The actual data can be sourced from a trial bill or rated Transaction Feed Management transaction. The accrual source to be considered is based on the value configured in the accrual type of the account.

Following scenarios indicate how the accrual amount is calculated:

- If the accrual source is trial bill and accrual amount is calculated at bill level; the accrual amount is the sum of price items and frozen adjustments on the latest trial bill.
- If the accrual source is trial bill and accrual amount is calculated at price item level; the accrual amount is the sum of price items on the latest trial bill.

Accrual Creation

The accrual creation takes place based on the calculated accrual amount and accrual type information which is used to create an accrual adjustment. You can create the adjustments for accruals through the **C1_ACCRE** batch process. The accruals which are either in the **Ready for Accrual** or **Processed** status are considered in this batch process. Based on the adjustment type defined in the accrual type, the system accordingly creates the accrual adjustment for the account. The status of the accrual is changed to **Accrued**.

Note:

For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

The system also enables you to manually create the accrual for an account. You can optionally configure the approval workflow process for accruals. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. The debit approval hierarchy is used for approving the accrual. You can define an approval hierarchy where users with different To Do role at each level can approve or reject the accrual. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the accrual, the status of the accrual is changed to **Processed**. However, if an approver at any level in the hierarchy rejects the accrual, the status of the accrual is changed to **Rejected**.

Accrual Reversal

The reversal of accrual adjustments is done to prevent double posting of revenue, once the billing is done. On the basis of the accrual reversal schedule, an account with accrual adjustments is selected for the accrual reversal processing. For every frozen adjustment, a cancellation is done in order to reverse journal entries.

You can reverse the accrual through the **C1_ACREV** batch process. On reversing the accrual, the accrual adjustments are cancelled and the status of the accrual is changed to **Reversed**.

Note: For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Accrual Cycle (Used for Searching)

The **Accrual Cycle** screen allows you to search for an accrual cycle using various search criteria. It also allows you to define an accrual cycle. It contains the following zone:

- Search Accrual Cycle on page 2123

Search Accrual Cycle

The **Search Accrual Cycle** zone allows you to search for an accrual cycle using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to search a particular accrual cycle.	No
Description	Used to search an accrual cycles with a particular description.	No

Note: You must specify at least one search criterion while searching for an accrual cycle.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Cycle	Displays the name of accrual cycle.
Accrual Cycle Information	Displays information about the accrual cycle. **Note:** It has a link. On clicking the link, the **Accrual Cycle** screen appears where you can view the details of the respective accrual cycle.

Related Topics

Searching for an Accrual Cycle

Prerequisites

To search for an accrual cycle, you should have:

- Accrual cycles defined in the application

Procedure

To search for an accrual cycle:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Cycle**.
   The **Accrual Cycle** screen appears.
3. Enter the search criteria in the **Search Accrual Cycle** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of accrual cycles that meet the search criteria appear in the **Search Results** section.

Defining an Accrual Cycle

Prerequisites

To define an accrual cycle, you should have:

- Accrual business object defined in the application.

Procedure

To define an accrual cycle:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Cycle**.
   The **Accrual Cycle** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Accrual Cycle** screen.

   The **Accrual Cycle** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the accrual cycle.
   - **Schedule Periods** - Used to specify the schedule period of an accrual cycle for which the accrual is calculated.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to specify the accrual cycle.	Yes
Description	Used to specify the description for the accrual cycle.	Yes

4. Enter the required details in the **Main** section.
5. Add the schedule periods for the accrual cycle.
6. Click **Save**.
   The accrual cycle is defined.

Adding a Schedule Period in an Accrual Cycle

Prerequisites

To add a schedule period in an accrual cycle, you should have:

- Accrual cycles (in which you want to add a schedule period) defined in the application

Procedure

To add a schedule period in an accrual cycle:

1. Ensure that the **Schedule Periods** section is expanded when you are defining or editing an accrual cycle.

   The **Schedule Periods** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Date	Used to specify the date from when the accrual creation process for an applicable account is initiated.	Yes
Reversal Start Date	Used to specify the date from when the accrual reversal process starts. **Note:** The **Reversal Start Date** must be later than the **Accrual Date**. The **Reversal Start Date** cannot be later than the **Reversal End Date**.	Yes
Reversal End Date	Used to specify the date till when the accrual reversal process ends. **Note:** The **Reversal End Date** cannot be earlier than the **Reversal Start Date**.	Yes

2. Enter the required details in the **Schedule Periods** section.
3. If you want to add more than one schedule period in an accrual cycle, click the **Add** (+) icon and then repeat step 2.

   Note: However, if you want to remove a schedule period from an accrual cycle, click the **Delete** (🗑) icon corresponding to the **Accrual Date** field.
4. Click **Save**.
   The schedule period is added in the accrual cycle.

Accrual Cycle (Used for Viewing)

The **Accrual Cycle** screen allows you to view the details of an accrual cycle. It also allows you to define, edit, or delete an accrual cycle. It contains the following zone:

- Accrual Cycle on page 2126

Accrual Cycle

The **Accrual Cycle** zone displays the details of an accrual cycle. It contains the following sections:

- **Main** - Displays basic information about the accrual cycle. It contains the following fields:

Field Name	Field Description
Accrual Cycle	Displays the accrual cycle.
Description	Displays the description of the accrual cycle.

- **Schedule Periods** - Displays information about when the accrual creation process is initiated for the applicable accounts. It contains the following columns:

Column Name	Column Description
Accrual Date	Displays the date from when the accrual creation process for an applicable account is initiated.
Reversal Start Date	Displays the date from when the accrual reversal process starts.
Reversal End Date	Displays the date till when the accrual reversal process ends.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of an accrual cycle.
Delete	Used to delete an accrual cycle.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the accrual cycle is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Editing an Accrual Cycle

Procedure

To edit an accrual cycle:

1. Search for the accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the *a*ccrual cycle whose details you want to edit.
   The **Accrual Cycle** screen appears.
3. Click the **Edit** button in the **Accrual Cycle** zone.

   The **Accrual Cycle** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the accrual cycle.
- **Schedule Periods** - Used to specify the schedule period of an accrual cycle for which the accrual is calculated.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to specify the accrual cycle.	Yes
Description	Used to specify the description for the accrual cycle.	Yes

4. Modify the required details in the **Main** section.
5. Add, edit, or remove the schedule period information from the accrual cycle.
6. Click **Save**.
   The changes made to the accrual cycle are saved.

Note: You can edit an accrual cycle only when the accrual cycle is not referenced to an accrual type for creating an accrual.

Deleting an Accrual Cycle

Procedure

To delete an accrual cycle:

1. Search for the accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the accrual cycle that you want to delete.
   The **Accrual Cycle** screen appears.
3. Click the **Delete** button in the **Accrual Cycle** zone.
   A message appears confirming whether you want to delete the accrual cycle.
4. Click **OK**.
   The accrual cycle is deleted.

Note: You can delete an accrual cycle only when the accrual cycle is not referenced to an accrual type for creating an accrual.

Accrual Type (Used for Searching)

The **Accrual Type** screen allows you to search for an accrual type using various search criteria. It also allows you to define an accrual type. t contains the following zone:

- Search Accrual Type on page 2129

Search Accrual Type

The **Search Accrual Type** zone allows you to search an accrual type using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to search a particular accrual type.	No
Description	Used to search accrual types having a particular description.	No
Accrual Criteria	Used to search accrual types which are created to calculate accruals based on a particular bill criteria. The valid values are: • **Actual** - Used to search accrual types which are created to calculate accruals based on the actual bill data. • **Historical** - Used to search accrual types which are created to calculate accruals based on the historical bill data.	No
Posting Method	Used to search accrual types which are created to calculate accruals at a particular level. The valid values are: • **Bill Level** - Used to search accrual types which are created to accrue the bill segments and adjustments of bills at the bill level. • **Bill Distribution Code Level** - Used to search accrual types which are created to accrue the bill segments and adjustments of bills at the distribution code level. • **Price Item Level** - Used to search accrual types which are created to accrue the bill segments and adjustments of bills at the price item level. • **Price Item Distribution Code Level** - Used to search accrual types which are created to accrue the bill segments of a particular price item at the distribution code level.	No

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search accrual types which are associated to a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list.	No

Note: You must specify at least one search criterion while searching for an accrual type.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Type	Displays the accrual type.
Accrual Type Information	Displays information about the accrual type. **Note:** It has a link. On clicking the link, the **Accrual Type** screen appears where you can view the details of the respective accrual type.
Accrual Criteria	Indicates the bill criteria which is used to calculate the accrual.
Posting Method	Indicates the bill level at which the accrual is calculated.
Type of Day	Indicates the type of day which is used as a reference for calculating the accruals.
Division	Indicates the division to which the accrual type is associated.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for an Accrual Type

Procedure

To search for an accrual type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Type**.
   The **Accrual Type** screen appears.
3. Enter the search criteria in the **Search Accrual Type** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of

the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of accrual types that meet the search criteria appears in the **Search Results** section.

Defining an Accrual Type

Prerequisites

To define an accrual type, you should have:

- Accrual type business object defined in the application.
- Accrual business object defined in the application.
- Adjustment types defined in the application (where the **Print by Default** and **Influence Next Bill Balance** check box is not selected).

Procedure

To define an accrual type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Type**.
   The **Accrual Type** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Accrual Type** screen.

   The **Accrual Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the accrual type.
- **Algorithms** - Used to associate algorithms with the accrual type.
- **Objects to Exclude** - Used to specify the entities that you want to exclude while accrual calculation.
- **Divisions** - Used to specify the divisions to which the accrual type can be associated.
- **Characteristics** - Used to define a list of characteristics for the accrual type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to specify the accrual type.	Yes
Description	Used to specify the description for the accrual type.	Yes
Accrual Object	Used to indicate the type of accrual object that you want to create while posting the accrual details. The valid values are: • Adjustment • Custom **Note:** At present, you can only create adjustments to record the accruals for the accounts in the application.	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created while posting the accrual details.. **Note:** The **Search** (🔍) icon appears corresponding to the **Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Adjustment Type** field. The **Adjustment Type** field appears only when you select the **Adjustment** option from the **Accrual Object** field.	No
Accrual Criteria	Used to indicate the bill criteria using which you want to calculate the accrual. The valid values are: • **Actual** - Used to indicate whether you want to calculate accruals based on the actual bill data. • **Historical** - Used to indicate whether you want to calculate accruals based on the historical bill data.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Accrual Source	Used to indicate the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are: • Transaction Feed • Trial Bill **Note:** This field appears only when you select the **Actual** option from the **Accrual Criteria** field.	Yes (Conditional) **Note:** This field is required for calculating accruals using the actual data.
Historical Bill Count	Used to specify the number of historical bills that you want to consider for calculating the accrual. **Note:** This field appears only when you select the **Historical** option from the **Accrual Criteria** field.	Yes (Conditional) **Note:** This field is required for calculating accruals using the historical data.
Accrual Request Business Object	Used to indicate the business object using which you want to create the accrual request. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Business Object Search** window appears. On specifying the business object, the description of the business object appears corresponding to the **Accrual Request Business Object** field.	Yes
Approval Required	Used to indicate whether approval is required for the accruals which are created using the accrual type.	No
Approval Profile	Used to indicate the approval profile which you want to use for approving the accruals which are created using the accrual type. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the accruals.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required for the accruals which are created using the accrual type. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for specifying the hierarchy using which you want to approve the accruals.
Submitter To Do Type	Used to indicate the To Do task assigned to the To Do type for the approver who can resubmitting the accrual for approval	Yes (Conditional) **Note:** This field is required for

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the submitter To Do type, the description of the submitter To Do type appears corresponding to the **Submitter To Do Type** field. The **Submitter To Do Type** field appears only when the **Approval Required** check box is selected.	approving the accruals.
Submitter To Do Role	Used to indicate the To Do role of the approver who can resubmit the accrual for approval. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the accruals.
Type of Day	Used to indicate the type of day for which you want to calculate the accrual amount. • Business Day • Calendar Day **Note:** If the **Business Day** option is selected, the system calculates the accrual amount using the following formula: Accrual amount = (Sum of resulting bill amount / Total number of business days from previous bills) * Number of business days for the current billing cycle. If the **Calendar Day** option is selected, the system calculates the accrual amount using the following formula: Accrual amount = (Sum of bill amount / Total number of calendar days of previous bills) * Number of calendar days for the current billing cycle.	Yes
Posting Method	Used to indicate the level at which you want to calculate the accruals. The valid values are: • **Bill Level** - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the bill level. • **Bill Distribution Code Level** - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.	Yes

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>• Price Item Level - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.
• Price Item Distribution Code Level - Used to indicate that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.</td><td></td></tr>
<tr><td>Proration Required</td><td>Used to indicate whether you want to prorate the accrual amount for the trail bills and historical bill segments for the recurring and non-recurring charges using different posting methods. It is calculated using the below formula:

Expected accrual amount for each price item = (Sum of resulting bill segment amount / Total number of days) * Number of days in the accrual cycle

Note: This field appears in the following scenarios:
• When the Actual and the Trial Bill options are selected from the Accrual Criteria and the Accrual Source fields respectively.
• When the Historical option is selected from the Accrual Criteria field.</td><td>No</td></tr>
<tr><td>Calculation Lines Required</td><td>Used to indicate whether you want to view the bill segments and adjustments which are used for calculating the accrual amount.

Note:

You can view the accrual calculation lines in the Accrual screen only when the following conditions are satisfied:
• Accrual is created using the batch process and not manually from the user interface.
• Accrual is created using an accrual type with either of the following combinations:

<table><tr><th>Accrual Criteria</th><th>Accrual Source</th><th>Posting Method</th></tr><tr><td>Historical</td><td>-</td><td>Bill Level</td></tr><tr><td>Historical</td><td>-</td><td>Price Item Level</td></tr><tr><td>Actual</td><td>Trial Bill</td><td>Bill Level</td></tr></table></td><td>No</td></tr>
</table>

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>
<table>
<tr><th>Accrual Criteria</th><th>Accrual Source</th><th>Posting Method</th></tr>
<tr><td>Actual</td><td>Trial Bill</td><td>Price Item Level</td></tr>
</table>
When the Do you want to insert detail level calculation? parameter in the Accrual Calculation (C1_ACCR_CAL) algorithm is set to Y.
The Calculation Lines Required check box is by default selected and cannot be unchecked if you select the Bill Distribution Code Level or the Price Item Distribution Code Level option from the Posting Method field.
</td><td></td></tr>
<tr><td>Price Item Accrual Criteria Required</td><td>Used to indicate whether accrual criteria is required for calculating accrual at the price item level.</td><td>No</td></tr>
<tr><td>Cancel Reason</td><td>Used to indicate the cancel reason that you want to use while reversing the accrual. The valid values are:
Broken Payment Arrangement
Credit Note
Enter
Note: The list includes only those values which are specified in the ACCR_CAN_RSN_CD lookup field.</td><td>No</td></tr>
<tr><td>Contract Type</td><td>Used to indicate the contract type whose contract exists on the accounts.
Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Contract Type Search window appears where you can select the required contract type.</td><td>Yes</td></tr>
<tr><td>Applicable for Account</td><td>Used to indicate whether the Accrual Type is used to calculate accruals at the account level.
Note: If you do not select the Applicable for Account check box, the system will consider the accrual type to calculate accruals at the division level.</td><td>Yes (Conditional)
Note: This field is required for indicating the accrual type can be associated to an account and not the division for calculating accruals.</td></tr>
</table>

4. Enter the required details in the **Main** section.
5. Associate algorithms with the accrual type in the **Algorithms** section, if required.

6. Exclude the entities which are not required for calculating the accrual using the accrual type in the **Objects to Exclude** section, if required.
7. Associate a list of divisions to which you want to associate the accrual type in the **Divisions** section, if required.
8. Define a list of characteristics for the accrual type in the **Characteristics** section, if required.
9. Click **Save**.
   The accrual type is defined.

Associating an Algorithm with an Accrual Type

Prerequisites

To associate an algorithm with an accrual type, you should have:

- System events defined in the application
- Algorithms defined for the system events

Procedure

To associate an algorithm with an accrual type:

1. Ensure that the **Algorithms** section is expanded in the **Accrual Type** screen when you are defining, editing, or copying an **Accrual Type**.
   The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event for which the algorithm is executed. The valid values are: • **Accrual Calculation** - Used to attach an algorithm which is triggered for calculating an accrual. • **Accrual Creation** - Used to attach an algorithm which is triggered for creating an accrual request. • **Accrual Eligibility** - Used to attach an algorithm which is triggered to verify the eligibility of the accrual.	Yes (Conditional) **Note:** This field is required while associating an algorithm with the accrual type.

Field Name	Field Description	Mandatory (Yes or No)
	• **Accrual Post Calculation** - Used to attach an algorithm which is triggered for undertaking the post calculation activities for the accrual amount. • **Accrual Post Processing** - Used to attach an algorithm which is triggered for undertaking some postprocessing activities on the accrual amount. • **Accrual Pre Processing** - Used to attach an algorithm which is triggered for undertaking some preprocessing activities on the accrual amount. • **Accrual Reversal** - Used to attach an algorithm which is triggered for the accrual reversal process. • **Accrual Reversal Post Processing** - Used to attach an algorithm which is triggered for undertaking some postprocessing activities on the accrual reversal process. • **Accrual Reversal Pre Processing** - Used to attach an algorithm which is triggered for undertaking some preprocessing activities on the accrual reversal process.	
Sequence	Used to specify the order in which the algorithms with the same system event must be executed.	Yes (Conditional) **Note:** This field is required while associating an algorithm with the accrual type.
Algorithm	Used to specify the algorithm that you want to execute on the system event. **Note:** The **Search** (🔍) icon appears corresponding to the **Algorithm** field. On clicking the **Search** (🔍) icon, the **Algorithm Search** window appears. On specifying the algorithm, the description of the algorithm appears corresponding to the **Algorithm** field.	Yes (Conditional) **Note:** This field is required while associating an algorithm with the accrual type.

2. Enter the required details in the **Algorithms** section.
3. If you want to associate more than one algorithm to the accrual type, click the **Add** (+) icon and then repeat step 2.

   Note: However, if you want to disassociate an algorithm from the accrual type, click the **Delete** (🗑) icon corresponding to the algorithm.
4. Click **Save**.
   The algorithm is associated with an accrual type.

Excluding an Entity from an Accrual Type

Procedure

To exclude an entity from an accrual type:

1. Ensure that the **Objects To Exclude** section is expanded in the **Accrual Type** screen when you are defining, editing, or copying an **Accrual Type**.
   The **Objects To Exclude** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the type of entity. The valid values are: • Adjustment Type • Distribution Code • Price Item	Yes (Conditional) **Note:** This field is required while excluding an entity from the accrual type.
Sequence	Used to specify the order in which the entities must be excluded from the accrual type.	Yes (Conditional) **Note:** This field is required while excluding an entity from the accrual type.
Entity	Used to indicate the value for the selected entity type. **Note:** On selecting a predefined entity type, the **Search** (🔍) icon appears corresponding to the **Entity** field. On clicking the **Search** (🔍) icon, you can search for a predefined entity value. On specifying the entity, the description of the entity appears corresponding to the **Entity** field. By default, the **Entity** field is disabled. It is enabled only when you select a predefined entity type from the **Entity Type** field.	Yes (Conditional) **Note:** This field is required while excluding an entity from the accrual type.

2. Enter the required details in the **Objects To Exclude** section.
3. If you want to exclude more than one entity from the accrual type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove an excluded entity from the accrual type, click the **Delete** (🗑) icon corresponding to the entity.

4. Click **Save**.
   The entity is excluded from the accrual type.

Associating a Division with an Accrual Type

Prerequisites

To associate a division with an accrual type, you should have:

- Divisions defined in the application.

Procedure

To associate a division with an accrual type:

1. Ensure that the **Divisions** section is expanded in the **Accrual Type** screen when you are defining, editing, or copying an **Accrual Type**.
   The **Divisions** section contains the following fields in a grid:

Fields Name	Fields Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the accrual type is effective for the division.	Yes (Conditional) **Note:** This field is required while associating a division with an accrual type.
Division	Used to indicate division to which you want to associate the accrual type.	Yes (Conditional) **Note:** This field is required while associating a division with an accrual type.

2. Enter the required details in the **Divisions** section.
3. If you want to associate more than one division with the accrual type, click the **Add** (+) icon and then repeat step 2.

   Note: However, if you want to disassociate a division from the accrual type, click the **Delete** (🗑) icon corresponding to the division.
4. Click **Save**.
   The division is associated with the accrual type.

Accrual Type (Used for Viewing)

The **Accrual Type** screen allows you to view the details of an accrual type. It also allows you to define, edit, copy, or delete an accrual type. It contains the following zone:

- Accrual Type on page 2141

Accrual Type

The **Accrual Type** zone displays the details of an accrual type. It contains the following sections:

- **Main** - Displays basic information about the accrual type. It contains the following fields:

Field Name	Field Description
Accrual Type	Displays the accrual type.
Description	Displays the description of the accrual type.
Accrual Object	Indicates the type of accrual object that you want to create while posting the accrual details. The valid values are: • Adjustment • Custom
Adjustment Type	Indicates the adjustment type using which the adjustment must be created while posting the accrual details. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.
Accrual Criteria	Indicates the bill criteria using which you want to calculate the accrual. The valid values are: • **Actual** - Indicates whether you want to calculate accruals based on the actual bill data. • **Historical** - Indicates whether you want to calculate accruals based on the historical bill data.
Accrual Source	Indicates the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are: • Transaction Feed • Trial Bill
Historical Bill Count	Displays the number of historical bills that you want to consider for calculating the accrual.
Accrual Request Business Object	Indicates the business object using which you want to create the accrual request.
Approval Required	Indicates whether approval is required for the accruals which are created using the accrual type.

Field Name	Field Description
Approval Profile	Indicates the approval profile which you want to use for approving the accruals which are created using the accrual type.
Hierarchical Approval	Indicates whether multi-level or single-level approval is required for the accruals which are created using the accrual type.
Submitter To Do Type	Indicates the To Do task assigned to the To Do type for the approver who can resubmitting the accrual for approval
Submitter To Do Role	Indicates the To Do role of the approver who can resubmit the accrual for approval.
Type of Day	Indicates the type of day for which you want to calculate the accrual amount. • Business Day • Calendar Day
Posting Method	Indicates the level at which you want to calculate the accruals. The valid values are: • **Bill Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the bill level. • **Bill Distribution Code Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level. • **Price Item Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the price item level. • **Price Item Distribution Code Level** - Indicates that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.
Proration Required	Indicates whether you want to prorate the accrual amount for the trail bills which have recurring bill segments.
Calculation Lines Required	Indicates whether you want to view the bill segments and adjustments which are used for calculating the accrual amount.
Price Item Accrual Criteria Required	Indicates whether accrual criteria is required for calculating accrual at the price item level.
Cancel Reason	Indicates the cancel reason that you want to use while reversing the accrual. The valid values are: • Broken Payment Arrangement • Credit Note • Enter
Contract Type	Indicates the contract type whose contract exists on the accounts.
Applicable for Account	Indicates whether the **Accrual Type** is used to calculate accruals at the account level.

- **Algorithms** - Lists the algorithms that are associated with the accrual type. It contains the following columns:

Column Name	Column Description
System Event	Indicates the system event for which the algorithm is executed. The valid values are:

Column Name	Column Description
	• **Accrual Calculation** - Used to indicate the algorithm which is triggered for calculating an accrual. • **Accrual Creation** - Used to indicate the algorithm which is triggered for creating an accrual request. • **Accrual Eligibility** - Used to indicate the algorithm which is triggered to verify the eligibility of the accrual. • **Accrual Post Calculation** - Used to indicate the algorithm which is triggered for undertaking the post calculation activities for the accrual amount. • **Accrual Post Processing** - Used to indicate the algorithm which is triggered for undertaking some postprocessing activities on the accrual amount. • **Accrual Pre Processing** - Used to indicate the algorithm which is triggered for undertaking some preprocessing activities on the accrual amount. • **Accrual Reversal** - Used to indicate the algorithm which is triggered for the accrual reversal process. • **Accrual Reversal Post Processing** - Used to indicate the algorithm which is triggered for undertaking some postprocessing activities on the accrual reversal process. • **Accrual Reversal Pre Processing** - Used to indicate the algorithm which is triggered for undertaking some preprocessing activities on the accrual reversal process.
Sequence	Displays the order in which the algorithms with the same system event must be executed.
Algorithm	Displays the algorithm that is executed on the system event. **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm.

- **Objects to Exclude** - Lists the entities that are excluded from the accrual type for calculating the accrual. It contains the following columns:

Column Name	Column Description
Entity Type	Indicates the type of entity. The valid values are: • Adjustment Type • Distribution Code • Price Item
Sequence	Displays the order in which the entities are excluded from the accrual type.
Entity	Indicates the value for the selected entity type.

- **Divisions** - Lists the divisions which are associated with the accrual type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the accrual type is effective for the division.
Division	Indicates the division which you want to associate with the accrual type.

- **Characteristics** - Lists the characteristics of the accrual type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the accrual type.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the accrual type.
Delete	Used to delete the accrual type.
Duplicate	Used to create a new accrual type using an existing accrual type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the accrual type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Editing an Accrual Type

Prerequisites

To edit an accrual type, you should have:

- Accrual type business object defined in the application.
- Accrual business object defined in the application.
- Adjustment types defined in the application (where the **Print by Default** and **Influence Next Bill Balance** check box is not selected).

Procedure

To edit an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the *a*ccrual type whose details you want to edit.
   The **Accrual Type** screen appears.
3. Click the **Edit** button in the **Accrual Type** zone.

The **Accrual Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the accrual type.
- **Algorithms** - Used to associate algorithms with the accrual type.
- **Objects to Exclude** - Used to specify the entities that you want to exclude while accrual calculation.
- **Divisions** - Used to specify the divisions to which the accrual type can be associated.
- **Characteristics** - Used to define a list of characteristics for the accrual type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to specify the accrual type.	Not applicable
Description	Used to specify the description for the accrual type.	Yes
Accrual Object	Used to indicate the type of accrual object that you want to create while posting the accrual details. The valid values are: • Adjustment • Custom **Note:** At present, you can only create adjustments to record the accruals for the accounts in the application.	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created while posting the accrual details.. **Note:** The **Search** (🔍) icon appears corresponding to the **Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Adjustment Type** field. The **Adjustment Type** field appears only when you select the **Adjustment** option from the **Accrual Object** field.	No
Accrual Criteria	Used to indicate the bill criteria using which you want to calculate the accrual. The valid values are: • **Actual** - Used to indicate whether you want to calculate accruals based on the actual bill data. • **Historical** - Used to indicate whether you want to calculate accruals based on the historical bill data.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Accrual Source	Used to indicate the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are: • Transaction Feed • Trial Bill **Note:** This field appears only when you select the **Actual** option from the **Accrual Criteria** field.	Yes (Conditional) **Note:** This field is required for calculating accruals using the actual data.
Historical Bill Count	Used to specify the number of historical bills that you want to consider for calculating the accrual. **Note:** This field appears only when you select the **Historical** option from the **Accrual Criteria** field.	Yes (Conditional) **Note:** This field is required for calculating accruals using the historical data.
Accrual Request Business Object	Used to indicate the business object using which you want to create the accrual request. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Business Object Search** window appears. On specifying the business object, the description of the business object appears corresponding to the **Accrual Request Business Object** field.	Yes
Approval Required	Used to indicate whether approval is required for the accruals which are created using the accrual type.	No
Approval Profile	Used to indicate the approval profile which you want to use for approving the accruals which are created using the accrual type. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the accruals.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required for the accruals which are created using the accrual type. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for specifying the hierarchy using which you want to approve the accruals.
Submitter To Do Type	Used to indicate the To Do task assigned to the To Do type for the approver who can resubmitting the accrual for approval	Yes (Conditional) **Note:** This field is required for

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the submitter To Do type, the description of the submitter To Do type appears corresponding to the **Submitter To Do Type** field. The **Submitter To Do Type** field appears only when the **Approval Required** check box is selected.	approving the accruals.
Submitter To Do Role	Used to indicate the To Do role of the approver who can resubmit the accrual for approval. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the accruals.
Type of Day	Used to indicate the type of day for which you want to calculate the accrual amount. • Business Day • Calendar Day **Note:** If the **Business Day** option is selected, the system calculates the accrual amount using the following formula: Accrual amount = (Sum of resulting bill amount / Total number of business days from previous bills) * Number of business days for the current billing cycle. If the **Calendar Day** option is selected, the system calculates the accrual amount using the following formula: Accrual amount = (Sum of bill amount / Total number of calendar days of previous bills) * Number of calendar days for the current billing cycle.	Yes
Posting Method	Used to indicate the level at which you want to calculate the accruals. The valid values are: • **Bill Level** - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the bill level. • **Bill Distribution Code Level** - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.	Yes

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>• Price Item Level - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.
• Price Item Distribution Code Level - Used to indicate that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.</td><td></td></tr>
<tr><td>Proration Required</td><td>Used to indicate whether you want to prorate the accrual amount for the trail bills and historical bill segments for the recurring and non-recurring charges using different posting methods. It is calculated using the below formula:

Expected accrual amount for each price item = (Sum of resulting bill segment amount / Total number of days) * Number of days in the accrual cycle

Note: This field appears in the following scenarios:
• When the Actual and the Trial Bill options are selected from the Accrual Criteria and the Accrual Source fields respectively.
• When the Historical option is selected from the Accrual Criteria field.</td><td>No</td></tr>
<tr><td>Calculation Lines Required</td><td>Used to indicate whether you want to view the bill segments and adjustments which are used for calculating the accrual amount.

Note:

You can view the accrual calculation lines in the Accrual screen only when the following conditions are satisfied:
• Accrual is created using the batch process and not manually from the user interface.
• Accrual is created using an accrual type with either of the following combinations:

<table><tr><th>Accrual Criteria</th><th>Accrual Source</th><th>Posting Method</th></tr><tr><td>Historical</td><td>-</td><td>Bill Level</td></tr><tr><td>Historical</td><td>-</td><td>Bill Segment Level</td></tr><tr><td>Actual</td><td>Trial Bill</td><td>Bill Level</td></tr></table></td><td>No</td></tr>
</table>

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>
<table>
<tr><th>Accrual Criteria</th><th>Accrual Source</th><th>Posting Method</th></tr>
<tr><td>Actual</td><td>Trial Bill</td><td>Bill Segment Level</td></tr>
</table>
When the Do you want to insert detail level calculation? parameter in the Accrual Calculation (C1_ACCR_CAL) algorithm is set to Y.
The Calculation Lines Required check box is by default selected and cannot be unchecked if you select the Bill Distribution Code Level or the Price Item Distribution Code Level option from the Posting Method field.
</td><td></td></tr>
<tr><td>Price Item Accrual Criteria Required</td><td>Used to indicate whether accrual criteria is required for calculating accrual at the price item level.</td><td>No</td></tr>
<tr><td>Cancel Reason</td><td>Used to indicate the cancel reason that you want to use while reversing the accrual. The valid values are:
Broken Payment Arrangement
Credit Note
Enter
Note: The list includes only those values which are specified in the ACCR_CAN_RSN_CD lookup field.</td><td>No</td></tr>
<tr><td>Contract Type</td><td>Used to indicate the contract type whose contract exists on the accounts.
Note: The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Contract Type Search window appears where you can select the required contract type.</td><td>Yes</td></tr>
<tr><td>Applicable for Account</td><td>Used to indicate whether the Accrual Type is used to calculate accruals at the account level.
Note:
If you do not select the Applicable for Account check box, the system will consider the accrual type to calculate accruals at the division level.
This field is disabled when you are editing an account level accrual type (i.e. when the Applicable for Account field check box is selected).</td><td>Yes (Conditional)
Note: This field is required for indicating the accrual type can be associated to an account and not the division for calculating accruals.</td></tr>
</table>

4. Modify the required details in the **Main** section.
5. Associate or disassociate algorithms from the accrual type.
6. Add, edit, or remove the excluded entities from the accrual type.
7. Associate or disassociate divisions from the accrual type.
8. Define, edit, or remove characteristics from the accrual type.
9. Click **Save**.
   The changes made to the accrual type are saved.

Note: You can edit an accrual type only when the accrual type is not yet used for creating an accrual.

Deleting an Accrual Type

Procedure

To delete an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the *a*ccrual type that you want to delete.
   The **Accrual Type** screen appears.
3. Click the **Delete** button in the **Accrual Type** zone.
   A message appears confirming whether you want to delete the accrual type.
4. Click **OK**.
   An accrual type is deleted.

Note: You can delete an accrual type only when the accrual type is not yet used for creating an accrual.

Copying an Accrual Type

Instead of creating an accrual type from scratch, you can create a new accrual type using an existing accrual type. This is possible through copying an accrual type. On copying an accrual type, the details including the algorithms, objects to exclude, divisions, and characteristics are copied to the new accrual type. You can then edit the details, if required.

Prerequisites

To copy an accrual type, you should have:

- Accrual type (whose copy you want to create) defined in the application
- Accrual type business object defined in the application.
- Accrual business object defined in the application.
- Adjustment types defined in the application (where the **Print by Default** and **Influence Next Bill Balance** check box is not selected).

Procedure

To copy an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the *a*ccrual type whose copy you want to create.
   The **Accrual Type** screen appears.
3. Click the **Duplicate** button in the **Accrual Type** zone.

   The **Accrual Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the accrual type.
   - **Algorithms** - Used to associate algorithms with the accrual type.
   - **Objects to Exclude** - Used to specify the entities that you want to exclude while accrual calculation.
   - **Divisions** - Used to specify the divisions to which the accrual type can be associated.
   - **Characteristics** - Used to define a list of characteristics for the accrual type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to specify the accrual type.	Yes
Description	Used to specify the description for the accrual type.	Yes
Accrual Object	Used to indicate the type of accrual object that you want to create while posting the accrual details. The valid values are: • Adjustment • Custom **Note:** At present, you can only create adjustments to record the accruals for the accounts in the application.	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created while posting the accrual details..	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Adjustment Type** field. The **Adjustment Type** field appears only when you select the **Adjustment** option from the **Accrual Object** field.	
Accrual Criteria	Used to indicate the bill criteria using which you want to calculate the accrual. The valid values are: • **Actual** - Used to indicate whether you want to calculate accruals based on the actual bill data. • **Historical** - Used to indicate whether you want to calculate accruals based on the historical bill data.	Yes
Accrual Source	Used to indicate the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are: • Transaction Feed • Trial Bill **Note:** This field appears only when you select the **Actual** option from the **Accrual Criteria** field.	Yes (Conditional) **Note:** This field is required for calculating accruals using the actual data.
Historical Bill Count	Used to specify the number of historical bills that you want to consider for calculating the accrual. **Note:** This field appears only when you select the **Historical** option from the **Accrual Criteria** field.	Yes (Conditional) **Note:** This field is required for calculating accruals using the historical data.
Accrual Request Business Object	Used to indicate the business object using which you want to create the accrual request. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Business Object Search** window appears. On specifying the business object, the description of the business object	Yes

Field Name	Field Description	Mandatory (Yes or No)
	appears corresponding to the **Accrual Request Business Object** field.	
Approval Required	Used to indicate whether approval is required for the accruals which are created using the accrual type.	No
Approval Profile	Used to indicate the approval profile which you want to use for approving the accruals which are created using the accrual type. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the accruals.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required for the accruals which are created using the accrual type. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for specifying the hierarchy using which you want to approve the accruals.
Submitter To Do Type	Used to indicate the To Do task assigned to the To Do type for the approver who can resubmitting the accrual for approval **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the submitter To Do type, the description of the submitter To Do type appears corresponding to the **Submitter To Do Type** field. The **Submitter To Do Type** field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the accruals.
Submitter To Do Role	Used to indicate the To Do role of the approver who can resubmit the accrual for approval. **Note:** This field appears only when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required for approving the accruals.
Type of Day	Used to indicate the type of day for which you want to calculate the accrual amount. • Business Day • Calendar Day **Note:**	Yes

Field Name	Field Description	Mandatory (Yes or No)
	If the **Business Day** option is selected, the system calculates the accrual amount using the following formula: Accrual amount = (Sum of resulting bill amount / Total number of business days from previous bills) * Number of business days for the current billing cycle. If the **Calendar Day** option is selected, the system calculates the accrual amount using the following formula: Accrual amount = (Sum of bill amount / Total number of calendar days of previous bills) * Number of calendar days for the current billing cycle.	
Posting Method	Used to indicate the level at which you want to calculate the accruals. The valid values are: • **Bill Level** - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the bill level. • **Bill Distribution Code Level** - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level. • **Price Item Level** - Used to indicate that the accrual is created to calculate the bill segments and adjustments of bills at the price item level. • **Price Item Distribution Code Level** - Used to indicate that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.	Yes
Proration Required	Used to indicate whether you want to prorate the accrual amount for the trail bills and historical bill segments for the recurring and non-recurring charges using different posting methods. It is calculated using the below formula: Expected accrual amount for each price item = (Sum of resulting bill segment amount / Total number of days) * Number of days in the accrual cycle **Note:** This field appears in the following scenarios: • When the **Actual** and the **Trial Bill** options are selected from the **Accrual Criteria** and the **Accrual Source** fields respectively.	No

<table>
<tr><th>Field Name</th><th>Field Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>• When the Historical option is selected from the Accrual Criteria field.</td><td></td></tr>
<tr><td>Calculation Lines Required</td><td>Used to indicate whether you want to view the bill segments and adjustments which are used for calculating the accrual amount.
Note:
You can view the accrual calculation lines in the Accrual screen only when the following conditions are satisfied:
• Accrual is created using the batch process and not manually from the user interface.
• Accrual is created using an accrual type with either of the following combinations:
<table><tr><th>Accrual Criteria</th><th>Accrual Source</th><th>Posting Method</th></tr><tr><td>Historical</td><td>-</td><td>Bill Level</td></tr><tr><td>Historical</td><td>-</td><td>Bill Segment Level</td></tr><tr><td>Actual</td><td>Trial Bill</td><td>Bill Level</td></tr><tr><td>Actual</td><td>Trial Bill</td><td>Bill Segment Level</td></tr></table>• When the Do you want to insert detail level calculation? parameter in the Accrual Calculation (C1_ACCR_CAL) algorithm is set to Y.
The Calculation Lines Required check box is by default selected and cannot be unchecked if you select the Bill Distribution Code Level or the Price Item Distribution Code Level option from the Posting Method field.</td><td>No</td></tr>
<tr><td>Price Item Accrual Criteria Required</td><td>Used to indicate whether accrual criteria is required for calculating accrual at the price item level.</td><td>No</td></tr>
<tr><td>Cancel Reason</td><td>Used to indicate the cancel reason that you want to use while reversing the accrual. The valid values are:
• Broken Payment Arrangement
• Credit Note
• Enter</td><td>No</td></tr>
</table>

Field Name	Field Description	Mandatory (Yes or No)
	Note: The list includes only those values which are specified in the **ACCR_CAN_RSN_CD** lookup field.	
Contract Type	Used to indicate the contract type whose contract exists on the accounts. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Contract Type Search** window appears where you can select the required contract type.	Yes
Applicable for Account	Used to indicate whether the **Accrual Type** is used to calculate accruals at the account level. **Note:** If you do not select the **Applicable for Account** check box, the system will consider the accrual type to calculate accruals at the division level.	Yes (Conditional) **Note:** This field is required for indicating the accrual type can be associated to an account and not the division for calculating accruals.

4. Enter the required details in the **Main** section.
5. Associate or disassociate algorithms from the accrual type.
6. Add, edit, or remove the excluded entities from the accrual type.
7. Associate or disassociate divisions from the accrual type.
8. Define, edit, or remove characteristics from the accrual type.
9. Click **Save**.
   The new accrual type is defined.

Accrual (Used for Searching)

The **Accrual** screen allows you to search for an accrual using various search criteria. It also allows you to define an accrual manually. It contains the following zone:

- Search Accrual on page 2157

Search Accrual

The **Search Accrual** zone allows you to search for an accrual. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an accrual using the accrual details. The valid value is: • **Accrual Details**	Not applicable
Account ID	Used to indicate whether you want to search for accruals belonging to a particular account. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** window appears where you can specify the account whose accrual details you want to view.	No
Division	Used to indicate whether you want to search for accruals associated with a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list.	No
Accrual Type	Used to search for accruals which are created using a particular accrual type.	No
Posting Method	Used to indicate whether you want to search for accruals which are calculated at a particular level. The valid values are: • **Bill Level** - Used to indicate whether you want to search for accruals whose bill segments and adjustments of bills are calculated at the bill level. • **Bill Distribution Code Level** - Used to indicate whether you want to search for accruals whose bill segments and adjustments of bills are calculated at the distribution code level. • **Price Item Level** - Used to indicate whether you want to search for accruals	No

Field Name	Field Description	Mandatory (Yes or No)
	whose bill segments and adjustments of bills are calculated at the at the price item level. • **Price Item Distribution Code Level** - Used to indicate whether you want to search for accruals whose bill segments of a particular price item are calculated at the distribution code level.	
Accrual Cycle	Used to search for accruals which are created using a particular accrual cycle.	No
Creation Date From	Used to indicate whether you want to search for accruals which are created from a particular date onwards.	No
Accrual Creation Mode	Used to indicate whether you want to search for accruals which are created using a particular mode. The valid values are: • **Batch** - Used to indicate whether you want to search for accruals which are created in the system using the batch mode. • **Manual** - Used to indicate whether you want to search for accruals which are created manually in the system.	No
Creation Date To	Used to search accruals which are created till a particular date.	No
Status	Used to search for accruals with a particular status. The valid values are: • **Ready For Accrual** • **Accrued** • **Reversed** • **Approval In Progress** • **Cancelled** • **Draft** • **Ignore** • **Processed** • **Rejected**	No

Note: You must specify at least one search criterion while searching for an accrual.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Information	Displays the concatenated string of information about the accrual separated by a comma (,). **Note:** It has a link. On clicking the link, the **Accrual** screen appears where you can view the details of the respective accrual.

Column Name	Column Description
Division	Indicates the division to which the accrual account belongs.
Accrual Type	Indicates the accrual type using which the accrual is created for the account in the system.
Posting Method	Indicates the level at which the accrual is calculated for the account.
Accrual Creation Mode	Indicates the creation mode using which the accrual is created for the account in the system.
Status	Displays the current status of the accrual.
Create Date/Time	Displays the date and time when the accrual is created is created in the system.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for an Accrual

Procedure

To search for an accrual :

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Accrual**.
   A sub-menu appears.
3. Click the **Search** option from the **Accrual** sub-menu.
   The **Accrual** screen appears.
4. Enter the search criteria in the **Search Accrual** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of accruals that meet the search criteria appears in the **Search Results** section.

Viewing the Accrual Details

Procedure

To view the details of an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the *a*ccrual whose details you want to view.
   The **Accrual** screen appears. It contains the following tabs:
   - Accrual - Main on page 2165
   - Accrual - Log on page 2170
3. Ensure that the **Main** tab is selected.
4. View the details of the accrual in the **Accrual** zone.

Defining an Accrual

Prerequisites

To define an accrual, you should have:

- Account (for which you want to define the accrual) defined in the application.
- Accrual-specific active contract associated with the account.
- Batch **C1_ACCRE** defined in the application, if an accrual creation takes place through a batch.
- Algorithm **C1_ACCR_CRE** defined for accrual creation in the application.
- Algorithm **C1_ACCR_CAL** defined for accrual calculation in the application.
- Algorithm **C1_ACCR_REV** defined for accrual reversal in the application.
- Accrual type associated with the division to which the account belongs or accrual type associated with the account for accrual calculation.
- Characteristic types defined in the application (where the characteristic entity is set to **Accrual**).

Procedure

To define an accrual:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Accrual**.
   A sub-menu appears.
3. Click the **Add** option from the **Accrual** sub menu.

   The **Accrual** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the accrual.
   - **Characteristics** - Used to specify the detail-specific characteristics for an accrual.

- **Accrual Details** - Used to specify the accrual details for an accrual.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the account for which you want to define an accrual. **Note:** The **Search** (🔍) icon appears corresponding to the this field. On clicking the **Search** icon, the **Account Search** window appears. On specifying the account, the description of the account appears corresponding to the **Account ID** field.	Yes
Contract	Indicates the accrual-specific active contract that is associated with the account. **Note:** This field is populated automatically when you specify the account in the **Account ID** field. It is a read-only field and cannot be edited.	Not applicable
Reversal Start Date	Used to specify the date from when the accrual reversal process starts. **Note:** The **Reversal Start Date** must be later than the **Accrual Date**. The **Reversal Start Date** cannot be later than the **Reversal End Date**.	Yes
Reversal End Date	Used to specify the date till when the accrual reversal process ends. **Note:** The **Reversal End Date** cannot be earlier than the **Reversal Start Date**.	Yes
Posting Method	Indicates the level at which the accrual is calculated for the account. The valid values are: • **Bill Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the bill level. • **Bill Distribution Code Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	• **Price Item Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the price item level. • **Price Item Distribution Code Level** - Indicates that the accrual is created to calculate the bill segments of a particular price item at the distribution code level. **Note:** This field is populated automatically when you specify the account in the **Account ID** field. It is a read-only field and cannot be edited.	
Accrual Type	Indicates the accrual type associated with the account. **Note:** This field is populated automatically when you specify the account in the **Account ID** field. It is a read-only field and cannot be edited.	Not applicable
Accrual Creation Mode	Indicates the method using which the accrual is created for the account in the system. The valid values are: • **Batch** - Indicates whether the accrual is created using the batch mode. • **Manual** - Indicates whether the accrual is created manually in the system. **Note:** This field is populated automatically when you specify the account in the **Account ID** field. It is a read-only field and cannot be edited.	Not applicable
Currency	Indicates the currency using which the accrual is calculated for the account in the system. **Note:** This field is populated automatically when you specify the account in the **Account ID** field. It is a read-only field and cannot be edited.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify additional information about the accrual.	No

Tip: Alternatively, you can access the **Accrual** screen by clicking the **Add** button in the **Page Title** area of the **Accrual** screen.

4. Define detail-specific characteristics for the accrual, if required.
5. Add details about the accrual, if required.
6. Click **Save**.
7. The accrual is defined.

Defining a Characteristic for an Accrual

Prerequisites

To define a characteristic for an accrual, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Accrual**).

Procedure

To define a characteristic for an accrual:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an accrual.

   The **Characteristics** section contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Accrual Detail Sequence	Used to specify the sequence in which the accrual processing must be executed. **Note:** It is a read-only field and cannot be edited.	Not applicable
Effective Date	Used to specify the date from when the characteristic is effective for an accrual.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for an accrual.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Accrual**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for an accrual.

Column Name	Column Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for an accrual.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for an accrual., click the **Add** (+) icon and then repeat step 2.

   Note: However, if you want to remove a characteristic from an accrual, click the **Delete** (🗑) icon corresponding to the characteristic.
4. Click **Save**.
   The characteristics are defined for an accrual..

Adding the Details for an Accrual

Procedure

To add the details for an accrual:

1. Ensure that **Accrual Details** section is expanded when you are defining or editing an accrual.

   The **Accrual Details** section contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item for an accrual. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears.	Yes (Conditional) **Note:** This field is required when the price item information is not defined for the accrual contract.
Amount	Used to specify the accrual amount.	Yes

Column Name	Column Description	Mandatory (Yes or No)
Override Reason	Used to specify the override reason for the accrual.	No

2. Enter the required details in the **Accrual Details** section.
3. Click **Save**.
   The accrual details are defined for an accrual.

Accrual (Used for Viewing)

The **Accrual** screen allows you to do the following:

- View the details of an accrual
- Define an accrual manually
- Edit an accrual
- Submit an accrual for approval
- Approve, Reject, and Re-Submit an accrual
- Delete an accrual
- View the accrual calculation lines

The **Accrual** screen contains the following tabs:

- Accrual - Main on page 2165
- Accrual Log on page 2170

Accrual - Main

The **Main** tab displays information about the accrual. It contains the following zones:

- Accrual on page 2165
- Accrual Details on page 2168
- Accrual Calculation Lines on page 2169

Accrual

The **Accrual** zone displays the details of an accrual. It contains the following sections:

- **Main** - Displays basic information about the accrual. It contains the following fields:

Field Name	Field Description
Accrual Information	Displays the concatenated string of information about the accrual separated by a comma (,).
Account Information	Displays the concatenated string of information about the account for which the accrual is created separated by a comma (,). In addition,

Field Name	Field Description
	a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Contract Information	Displays the accrual-specific active contract that is associated with the account. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.
Division	Indicates the division which is associated with the accrual.
Status	Indicates the current status of the accrual. The valid values are: • Draft • Approval In Progress • Ready For Accrual • Accrued • Accrual Reversed • Rejected • Processed • Ignore • Cancelled
Accrual Cycle	Indicates the accrual cycle associated with the deal type which is used for creating the accrual.
Accrual Date	Displays the date on which the accrual is processed for the account.
Reversal Start Date	Displays the date from when the accrual reversal process starts for the account.
Reversal End Date	Displays the date till when the accrual reversal process ends for the account.
Accrual Type	Indicates the accrual type using which the accrual is calculated for the account.
Accrual Creation Mode	Displays the creation mode using which the accrual is calculated. • **Batch** - Indicates whether the accrual is created using the batch mode. • **Manual** - Indicates whether the accrual is created manually in the system.
Posting Method	Displays the level at which the accrual is calculated for the account. The valid values are: • **Bill Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the bill level. • **Bill Distribution Code Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the distribution code level. • **Price Item Level** - Indicates that the accrual is created to calculate the bill segments and adjustments of bills at the price item level.

Field Name	Field Description
	• **Price Item Distribution Code Level** - Indicates that the accrual is created to calculate the bill segments of a particular price item at the distribution code level.
Accrual Amount	Displays the accrual amount.

- **Characteristics** - Lists the detail-specific characteristics defined for the accrual. It contains the following fields:

Field Name	Field Description
Accrual Detail Sequence	Displays the sequence of the accrual detail.
Effective Date	Displays the date from when the characteristic is effective for the accrual detail.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of an accrual. **Note:** The **Edit** button appears only when the accrual is in the **Draft** or **Ready for Accrual** status.
Delete	Used to delete an accrual. **Note:** The **Delete** button appears only when the accrual is in the **Draft** or **Ready for Accrual** status.
Return to Draft	Used to send the accrual in the **Draft** status for editing. **Note:** The **Return to Draft** button appears only when the accrual is in the **Ready for Accrual** status.
Submit	Used to submit an accrual for approval. **Note:** The **Submit** button appears only when the accrual is in the **Draft** status.
Approve	Used to approve the accrual. **Note:** The **Approve** button appears only when the accrual is in the **Approval in Progress** status.
Reject	Used to reject the accrual. **Note:** The **Reject** button appears only when the accrual is in the **Approval in Progress** status.
Re Submit	Used to resubmit the accrual for specific changes. **Note:** The **Re Submit** button appears only when the accrual is in the **Approval in Progress** status.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the accrual is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the accrual status is updated in the system.
Create Date/Time	Displays the date and time when the accrual is created in the system.

Accrual Details

The **Accrual Details** zone displays the details of an accrual. It contains the following columns:

Column Name	Column Description
Sequence Number	Displays the sequence in which the accrual detail is considered for accrual calculation.
Price Item	Displays the price item that is defined for the accrual calculation. **Note:** It contains a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective accrual adjustment.
Amount	Displays the accrual amount.
Override Reason	Displays the reason why the price item or the accrual amount is overridden in case if the accrual is edited.
Adjustment Information	Displays information about the adjustment that is created using the accrual creation batch. **Note:** It contains a link. On clicking the link, the **Adjustment** screen appears where you can view the details of the respective adjustment.

On clicking the **Broadcast** (⦾) icon corresponding to an accrual detail, the **Accrual Calculation Lines** zone appears where you can view a list of calculation lines for the respective accrual detail.

Note:

The **Accrual Calculation Lines** zone appears only when the following conditions are satisfied:

- The **Calculation Lines Required** check box is selected for the accrual type which is associated with the accrual.
- Accrual is created using the batch process and not manually from the user interface.
- Accrual is created using an accrual type with either of the following combinations:

Accrual Criteria	Accrual Source	Posting Method
Historical	-	Bill Level
Historical	-	Price Item Level
Actual	Trial Bill	Bill Level
Actual	Trial Bill	Price Item Level

- When the **Do you want to insert detail level calculation?** parameter in the **Accrual Calculation (C1_ACCR_CAL)** algorithm is set to **Y**.

Accrual Calculation Lines

The **Accrual Calculation** zone displays the calculation lines generated after the accrual creation batch is executed for a particular accrual detail. It contains the following columns:

Column Name	Column Description
Entity Information	Displays the concatenated string of information about the entity separated by a comma (,) for which the calculation line is created.
Entity Type	Indicates the type of the entity.
Inclusion Amount	Displays the amount calculated for the specific entity for accrual.
Bill Cycle Days	Displays the number of days after which the accrual calculation is done for the entity.
Historical Calculation Days	Displays the historical days for which the accrual calculation is done for the entity.
Bill Information	Displays the concatenated string of information about the bill separated by a comma (,). In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.
Recurring Charge Calculation Days	Displays the number of days after which the recurring charge is calculated for the entity.
Recurring Charge Total Days	Displays the total number of days for which the recurring charge is calculated for the entity.

By default, the **Accrual Calculation Lines** zone does not appear in the **Accrual** screen. It appears when you click the **Broadcast** (⌔) icon corresponding to the accrual detail in the **Accrual Details** zone.

Editing an Accrual

Prerequisites

To edit an accrual, you should have:

- Account (for which you want to define the accrual) defined in the application.
- Accrual-specific active contract associated with the account.
- Batch **C1_ACCRE** defined in the application, if an accrual creation takes place through a batch.
- Algorithm **C1_ACCR_CAL** defined for accrual calculation in the application.
- Algorithm **C1_ACCR_REV** defined for accrual reversal in the application.
- Accrual type associated with the division to which the account belongs or accrual type associated with the account for accrual calculation.
- Characteristic types defined in the application (where the characteristic entity is set to **Accrual**).

Procedure

To edit an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to edit.
   The **Accrual** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Accrual** zone
   The **Accrual** screen appears. It contains the following sections:
   - **Main** - Used to specify basic details about the accrual. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search a particular account. **Note:** It is a read-only field and cannot be edited.	Yes
Contract	Used to specify the accrual contract of the account. **Note:** It is a read-only field and cannot be edited.	Not applicable
Accrual Cycle	Used to specify the accrual cycle for the account. **Note:** It is a read-only field and cannot be edited.	Not applicable
Posting Method	Used to specify the posting method used for an accrual. **Note:** It is a read-only field and cannot be edited.	Not applicable
Accrual Type	Used to specify the type of an accrual. **Note:** It is a read-only field and cannot be edited.	Not applicable
Accrual Creation Mode	Used to specify the creation method of an accrual. **Note:** It is a read-only field and cannot be edited.	Not applicable
Currency	Used to specify the currency used for calculating the accrual. **Note:** It is a read-only field and cannot be edited.	Not applicable
Comments	Used to specify the comments for an accrual.	No

5. Add, edit, or remove the detail-specific characteristics from the accrual, if required.
6. Add, edit, or remove the details of the accrual.
7. Click **Save**.
   The changes made to the accrual are saved.

Note:

You can edit n accrual only when it is in the **Ready for Accrual** status.

While editing an accrual which is created through a batch process, the system allows you to edit only the accrual amount of the bill or the price item in the **Accrual Details** zone. Whereas, if you are editing an accrual which is created manually, the system allows you to edit the price item code as well as the accrual amount of the price item or the bill in the **Accrual Details** zone. The override reason is mandatory when you are editing a manually created accrual in the system.

Deleting an Accrual

Procedure

To delete an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual *t*hat you want to delete.
   The **Accrual** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Accrual** zone.
   A message appears confirming whether you want to delete the accrual.
5. Click **OK**.
   The accrual is deleted.

Note: You can delete an accrual only when it is created manually in the system and is in the **Draft** or **Ready for Accrual** status.

Part XXXIV

Payment Agreement Request

Topics:

- Payment Agreement Request (Without Approval) Status Transition
- Payment Agreement Request (With Approval) Status Transition
- Prerequisites
- Algorithms Used in C1-PaymentAgreementRequest
- Payment Agreement Request Type
- Payment Agreement Request (Used for Searching)
- Payment Agreement Request (Used for Viewing)

Oracle Revenue Management and Billing provides the ability to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. Let us understand this with the help of an example. The following bills of the account A1 are unpaid:

- B1 (Bill Amount - 100$, Unpaid Amount - 75$)
- B2 (Bill Amount - 250$, Unpaid Amount - 125$)
- B3 (Bill Amount - 150$, Unpaid Amount - 150$)

Through a payment agreement request, you can schedule payments for these three bills in various installments. For example, you can schedule the following payments for the account A1:

Schedule Date	Schedule Amount
01-Jan-2017	100
15-Jan-2017	100
01-Feb-2017	100
15-Feb-2017	50

While creating a payment agreement request, you need to specify the payment agreement request type using which you want to create the payment agreement request. It is the payment agreement request type which helps the system to determine:

- The business object using which the payment agreement request should be created
- Whether the approval is required for the payment agreement request

You can only add completed bills of the account which are unpaid in a payment agreement request. Once a payment agreement request is created for an account, the status of the payment agreement request is set to **Draft**. You can then edit or delete the payment agreement request, if required. Once you add the unpaid bills of the account, you can submit the payment agreement request. On submitting a payment agreement request, the status of the payment agreement request is set to **Active**.

You can optionally configure the system to use the approval workflow process for a payment agreement request. If the **Approval Required** flag is set to **Yes** in a payment agreement request type, then on submitting the respective payment agreement request, the approval workflow process creates a To Do for the approver to review the payment agreement request. Once the approver approves the payment agreement request, the status of the payment agreement request is set to **Active**. The approver can approve, reject, or resubmit the payment agreement request. When the payment agreement

request is resubmitted to the submitter, the status of the payment agreement request is set to **Draft**.

Even if the approval workflow is configured for a payment agreement request type, you can skip the approval workflow for a payment agreement request. The system enables you to skip the approval workflow for a payment agreement request until you exceed the maximum limit defined in the **C1-PASUBMIT** algorithm. You can define the following parameters in the **C1-PA-SUBMIT** algorithm:

- Number of days to consider in past to check whether any payment agreement request with a particular status exist in the specified duration (for example, 365)
- Maximum number of payment agreement requests which can be activated without approval (for example, 1)
- Status in which payment agreement request should exists in the specified duration (for example, Broken Promise)

In the above example, on clicking the **Submit** button, the system will check how many payment agreement requests for the account in the last 365 days exists in the **Broken Promise** status. If the system finds one or more than one payment agreement requests in the **Broken Promise** status in the last 365 days, the approval workflow process creates a To Do for the approver to review the payment agreement request. However, if the system does not find any payment agreement request in the **Broken Promise** status in the last 365 days, the payment agreement request is not sent for approval and the status of the payment agreement request is directly changed to **Active**.

When the **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If there is a payment agreement request in the **Active** status, the system checks whether the total unpaid amount of the bills is equal to zero and whether each bill is fully matched. If so, the status of the payment agreement request is changed to **Kept Promise**. However, if the total unpaid amount of the bills is not equal to zero, the system checks whether the current date is later than the schedule date and does not fall within the grace period. If so, the system checks whether total unpaid amount is greater than the total future schedule amount. If so, the status of the payment agreement request is changed to **Broken Promise**. However, if the current date is earlier than the schedule date or falls within the grace period, or the total unpaid amount is less than the total future schedule amount, the status of payment agreement request remains in **Active**. The system enables you to edit a payment agreement request which is in the **Active** status.

While defining a payment agreement request, you need to specify the payment method through which the payment will be done and whether the payment will be done through the payor or third party payor account. If the **Auto Pay** flag is set to **Yes** for a payment method, you need to also specify the automatic payment option using which the automatic payment should be created on the schedule date. One more batch named **Generate Auto Pay for Payment Agreement (C1-APPAB)** is introduced in this release. When the **Generate Auto Pay for Payment Agreement (C1-APPAB)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If so, whether the account for which the payment agreement request is created is eligible for automatic payment and the defer auto pay date (if any) defined for the account is earlier than the batch business date. If so, the system checks whether the extract date of the unpaid bill (with the earliest due date) is earlier than the schedule date.

If so, the system creates the automatic payment for the unpaid bill on the schedule date. However, if the account is not eligible for automatic payment, or the defer auto pay date is equal to or later than batch business date, or the extract date is equal to or later than the schedule date, the automatic payment is not generated for the account.

During the payment agreement request process, a payment agreement request creation goes through various statuses in its lifecycle. For more information about the payment agreement request statuses, see Payment Agreement Request (Without Approval) Status Transition on page 2180 and Payment Agreement Request (With Approval) Status Transition on page 2181.
If the payment agreement request type is without approval then payment agreement status will automatically move from draft to active. The approval configuration algorithm **C1-PA-APPEXT** decides whether the request will be sent for approval or not. If the payment agreement request type is with approval then payment agreement will be sent for approval depending on:

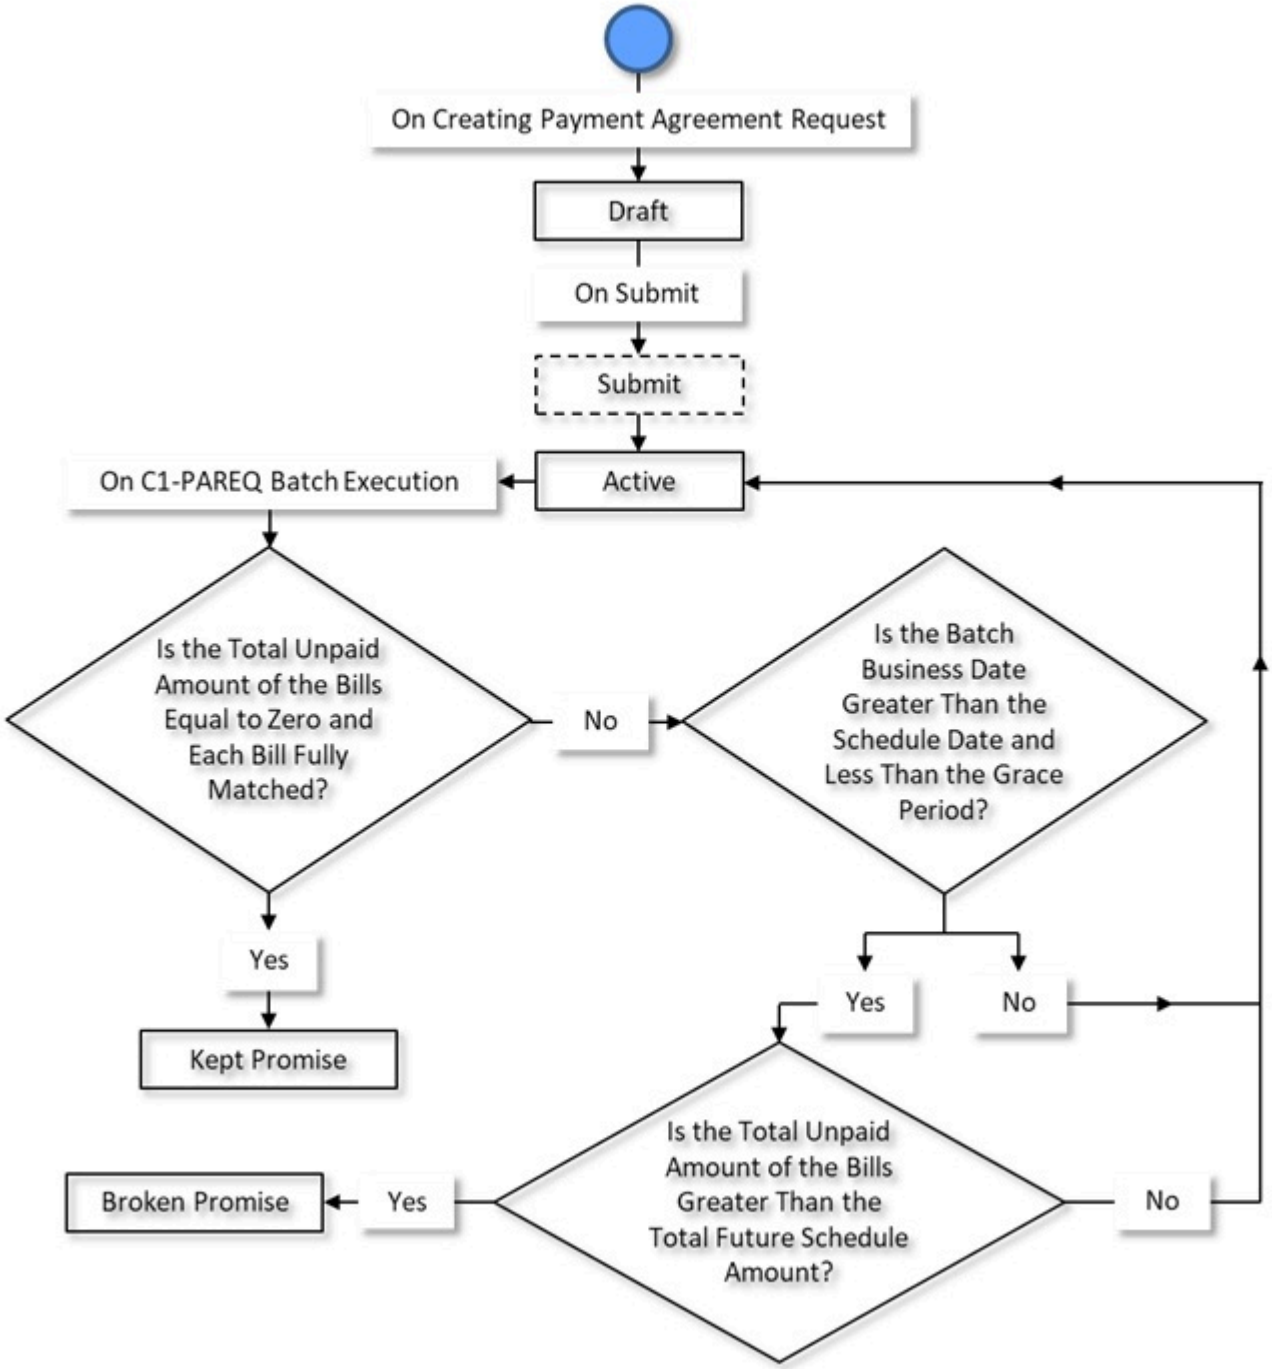
- The number of days checked for approval workflow
- Payment agreement statuses (active, broken, kept) to be considered
- The maximum number of payment agreements allowed

Note: The lifecycle of a payment agreement request creation is driven by the respective business object using which the request is created. The payment agreement request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the payment agreement request process, see Prerequisites on page 2182.

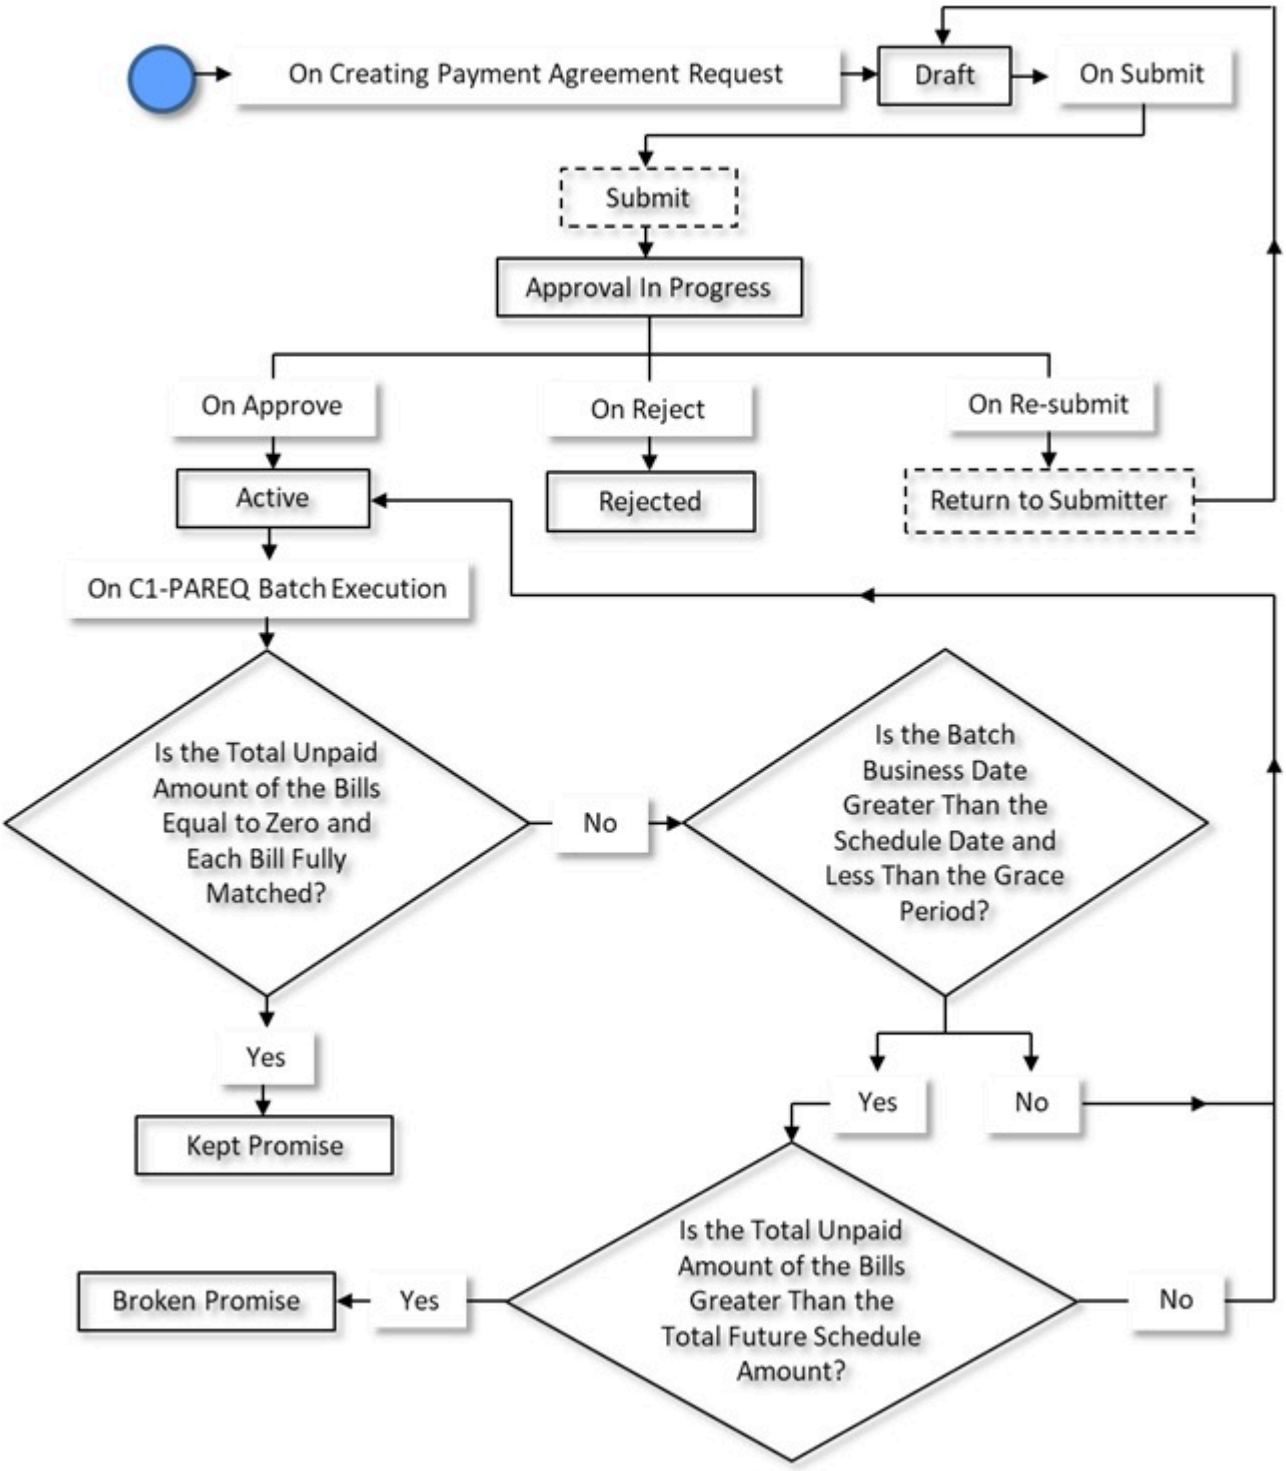
Payment Agreement Request (Without Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is off:



Payment Agreement Request (With Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is on:



Prerequisites

To setup the payment agreement request process, you need to do the following:

- Define the required payment agreement request types in the system.

- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request**.
- Define the required payment methods and third party payors for **Payment Agreement Request**.
- Create an algorithm using the **C1-PA-INFO** algorithm type if you want to create the payment agreement requests using the payment agreement request information.
- Define the kept promise status reason for the **C1-PaymentAgreementRequest** business object
- Define the broken promise status reason for the **C1-PaymentAgreementRequest** business object
- Defined rejected status reason for the **C1-PaymentAgreementRequest** business object
- Assign the **C1-PAREQ** To Do type to a To Do role whose users must receive To Do generated while submitting or resubmitting a payment agreement request for approval
- Configure the automatic process for respective payment methods in the **Pay Method** screen.

Algorithms Used in C1-PaymentAgreementRequest

The following table lists the algorithms which are attached to the **C1-PaymentAgreementRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-PA-INFO	C1-PA-INFO	Refer to C1-PA-INFO on page 2184
Pre-Processing	C1-PA-PRE	C1-PA-PRE	Refer to C1-PA-PRE on page 2184
Validation	C1-PA-VAL	C1-PA-VAL	Refer to C1-PA-VAL on page 2184

The following table lists the algorithms which are used in the lifecycle of the **C1-PaymentAgreementRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-PA-DRAFT	C1-PA-DRAFT	Refer to C1-PA-DRAFT on page 2184
Submit	Enter	C1-PA-SUBMIT	C1-PA-SUBMIT	Refer to C1-PA-SUBMIT on page 2184

	Enter	C1-BPADMTR	C1-BPADMTR	Refer to C1-BPADMTR on page 2186

C1-PA-INFO

This algorithm generates the payment agreement request information string which appears throughout the application. This algorithm concatenates the following fields:

- Payment Agreement Request Type Description
- Payment Agreement Request Status Description
- Payment Agreement Request ID

C1-PA-PRE

This algorithm is used to avoid the concurrency issue for payment agreement. This algorithm also validate the duplicate bill, schedule, and characteristic on the edit screen.

C1-PA-VAL

This algorithm is used to validate payment agreement request.

C1-PA-DRAFT

This algorithm is invoked when the **Payment Agreement Request** is created in the **DRAFT** status. It validates if the linked delinquency process is valid and not in the **CANCELLED**, **TERMINATED**, and **COMPLETED** status. This algorithm also adds the unpaid bills to the payment agreement request details table.

C1-PA-SUBMIT

This algorithm used to perform following task:

- Used to validate payment agreement request on submitting.
- If request type is **without approval** then PA status will move from **Draft** to **Active** automatically
- If request type is **with approval** then PA will be sent for approval depending on following parameters defined at this algorithm.
  - **Number of days before to consider in calculation** - This parameter is used to search payment agreement specified days back to calculate number of Payment Agreement.
  - **Maximum Payment Agreement allowed without approval** - If this parameter is less than calculated value then it will go without approval, otherwise with approval.

- **Status** - One status at a time like **Active**. These defined status are used in the calculation of the number of payment agreement

C1-PA-APPENT

This algorithm creates **To Do** based on the **Approval To Do Type** configured in payment agreement request type.

C1-PA-APPEXT

This algorithm checks whether an approver is associated with the approval **To Do Role** specified in the payment agreement request type. It does not allow the submitter to approve or reject the payment agreement request.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

C1-PA-RESUB

This algorithm is invoked on **Re-Submit** button. It moves the status of payment agreement request into **Draft**. A **To Do** will be generated for the user as submitter whose **To Do Type** and **To Do Role** are fetched from payment agreement request type.

C1-ACTENT

This algorithm will validate Payment Agreement Request before activation.

C1-PAUSRNTFY

This algorithm will generate **To Do** whenever payment agreement status will change to **Active**, **Kept Promise**, and **Broken Promise** for configure **To Do Type**.

C1-PASDTODO

This algorithm is invoked by monitor batch. This will send **To Do** notification to the user for configurable number of days(X-days) in advance of the scheduled payment date.

C1-PA-MONTR

This algorithm is invoked from the **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch. It changes the status of the payment request from **Active** to **KP** (Kept Promise) or **BP** (Broken Promise) based on payment received.

C1-BPADMTR

This algorithm creates a record in CI_ADM_RVW_SCH for a person or account depending on which entity type/ entity id payment agreement has been created, and this record gets added when a payment agreement is broken. This is configured on the business object lifecycle for payment agreement request on the **Broken Promise** status.

Payment Agreement Request Type

Oracle Revenue Management and Billing allows you to define, edit, copy, and delete a payment agreement request type using which you can pay current unpaid debt bills in multiple installments whose payment amount is greater than zero. A payment agreement request provides flexibility in payment of installment amount and schedule of payment.

The **Payment Agreement Request Type** screen consists of the following zones:

- Payment Agreement Request Type List on page 2186
- Payment Agreement Request Type on page 2187

Payment Agreement Request Type List

The **Payment Agreement Request Type List** zone lists payment agreement request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Payment Agreement Request Type	Displays the payment agreement request type.
Description	Displays the description of the payment agreement request type.
Edit	On clicking the **Edit** (✎) icon, the **Payment Agreement Request Type** screen appears where you can edit the details of the payment agreement request type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Payment Agreement Request Type** screen appears where you can define a payment agreement request type using an existing payment agreement request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the payment agreement request type. **Note:** You can delete a payment agreement request type only when a payment agreement request is not yet created using the payment agreement request type.

On clicking the **Broadcast** (📡) icon corresponding to a payment agreement request type, the **Payment Agreement Request Type** zone appears with the details of the respective payment agreement request type.

Payment Agreement Request Type

The **Payment Agreement Request Type** zone displays the details of the payment agreement request type. This zone contains the following sections:

- **Main** - Displays the basic information about the payment agreement request type. It contains the following fields:

Field Name	Field Description
Payment Agreement Request Type	Displays the payment agreement request type.
Description	Displays the description of the payment agreement request type.
Payment Agreement Request Business Object	Indicates the business object that will be used to create the payment agreement request. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the payment agreement request type.
Status	Indicates the status of the payment agreement request type. The valid values are: • Active • Inactive
Status Change Notification Type	Indicates the notification type when the status of the payment agreement request type is changed. The valid values are: • Alert • Both • To Do
Approval Required	Indicates whether approval is required while creating the payment agreement request using the payment agreement request type.

Field Name	Field Description
Approval To Do Type	Indicates that the To Do entry of the specified To Do type must be created when the payment agreement request is submitted for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Approval To Do Role	Indicates that users with the specified To Do role can only approve a payment agreement request which is submitted for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Submitter To Do Type	Indicates that the To Do entry of the specified To Do type must be created when the approver requests the submitter to resubmit a payment agreement request for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates that users with the specified To Do role can only receive the To Do that is created when the approver requests the submitter to resubmit a payment agreement request for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Allow Partial Amount	Indicates whether partial amount is allowed while creating the payment agreement request using the payment agreement request type.

- **Characteristics** - Lists the characteristics of the payment agreement request type. It contains the following columns:

Column Name	Column Description	Mandatory (Yes Or No)
Characteristic Type	Indicates the characteristic type.	No
Characteristic Value	Displays the value of the characteristic type.	No

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the payment agreement request type.
Delete	Used to delete the payment agreement request type.

Button Name	Button Description
	Note: You can delete a payment agreement request type when you have not created a payment agreement request using the payment agreement request type.
Duplicate	Used to create a new payment agreement request type using an existing payment agreement request type.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the payment agreement request type is created. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Payment Agreement Request Type** zone does not appear in the **Payment Agreement Request Type** screen. It appears when you click the **Broadcast** ( ) icon corresponding to a payment agreement request type in the **Payment Agreement Request Type List** zone.

Defining a Payment Agreement Request Type

Prerequisites

To define a payment agreement request type, you should have:

- Payment agreement request type business objects defined in the application.
- Payment agreement request business objects defined in the application.
- Payment agreement request information algorithm defined using the **C1-PA-INFO** algorithm type.
- Required To Do role assigned to the **C1-PAREQ** To Do type in the application.

Procedure

To define a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Payment Agreement Request Type** sub-menu.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type Business Object	Used to indicate the business object using which you want to create the payment agreement request type. The valid value is: • **Payment Agreement Request Type (i.e. C1-PARequestType)** - Enables you to maintain a payment agreement request type. **Note:** The above business object is shipped with the product. The list includes those business objects which are created using the **Payment Agreement Request Type (i.e., C1-PARQTY)** maintenance object.	Yes

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Payment Agreement Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple payment agreement request type business objects defined in the application. If there is only one payment agreement request type business object defined in the application, the **Payment Agreement Request Type** screen appears.

4. Select the required payment agreement request type business object from the respective field.
5. Click **OK**.

   The **Payment Agreement Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the payment agreement request type.
   - **Characteristics** - Used to define the characteristics for the payment agreement request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to specify the payment agreement request type.	Yes
Business Object	Indicates the business object used while defining the payment agreement request type.	Not applicable
Description	Used to specify the description for the payment agreement request type.	Yes
Payment Agreement Request Business Object	Used to indicate the business object using which you want to create the respective payment agreement request. The valid values are: • **Payment Agreement Request - Display (i.e., C1-PARequestType)** - Enables you to display the details of a payment agreement request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Payment Agreement Request - Maintenance (i.e., C1-PARQTY)** - Enables you to maintain a payment agreement request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Payment Agreement Request (i.e., C1-PAREQ)** maintenance object.	
Detailed Description	Used to specify additional information about the payment agreement request type.	No
Status	Used to indicate the status of the payment agreement request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a payment agreement request type to **Inactive** when the corresponding payment agreement request is in a status other than **Draft**, **Approval In Progress**, and **Active**.	Yes
Status Change Notification Type	Used to indicate the type of notification that you want to generate when the status of the payment agreement request type is changed. The valid values are: • Alert • To Do • Both **Note:** The list includes only those values which are defined in the **PA_STS_CHNG_NOT_TYPE** lookup field.	No
Approval Required	Used to indicate whether approval is required while creating a payment agreement request using the payment agreement request type.	No
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a payment agreement request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
	The **C1-PAREQ** To Do type is shipped with the product. You can use the **C1-PAREQ** To Do type or a custom To Do type, if required.	
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a payment agreement request which is submitted for approval. **Note:** This field appears when the **Approval Required** check box is selected. The list will include only those To Do roles which are associated with the To Do type specified in the **Approval To Do Type** field.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Submitter To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when the approver resubmits a payment agreement request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Submitter To Do Role	Used to indicate that the users with the specified To Do role must receive a To Do when the approver resubmits a payment agreement request for approval. **Note:** This field appears when the **Approval Required** check box is selected. The list will include only those To Do roles which are associated with the To Do type specified in the **Submitter To Do Type** field.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Allow Partial Amount	Used to indicate whether partial amount is allowed while creating the payment agreement request using the payment agreement request type.	No

6. Enter the required details in the **Main** section.
7. Define characteristics for the payment agreement request type, if required.
8. Click **Save**.
   The new payment agreement request type is defined.

How to define a characteristic for a payment agreement request type	Defining a Characteristic for a Payment Agreement Request Type on page 2193

Defining a Characteristic for a Payment Agreement Request Type

Prerequisites

To define a characteristic for a payment agreement request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Payment Agreement Request Type**).

Procedure

To define a characteristic for a payment agreement request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a payment agreement request type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to Payment Agreement Request Type.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the payment agreement request type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the payment agreement request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the payment agreement request type, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a characteristic from the payment agreement request type, click the ***D*elete** (🗑) icon corresponding to the characteristic.

Editing a Payment Agreement Request Type

Prerequisites

To edit a payment agreement request type, you should have:

- Payment agreement request business objects defined in the application.
- Payment agreement request information algorithm defined using the **C1-PA-INFO** algorithm type.
- Required To Do role assigned to the **C1-PAREQ** To Do type in the application.

Procedure

To edit a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request Type** sub-menu.
   The **Payment Agreement Request Type** screen appears.
4. In the **Payment Agreement Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column *c*orresponding to the payment agreement request type whose details you want to edit.

   The **Payment Agreement Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the payment agreement request type.
   - **Characteristics** - Used to define the characteristics for the payment agreement request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Displays the payment agreement request type.	Not applicable
Business Object	Indicates the business object which is used while defining the payment agreement request type.	Not applicable
Description	Used to specify the description for the payment agreement request type.	Yes
Payment Agreement Request Business Object	Used to indicate the business object using which you want to create the respective payment agreement request. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Payment Agreement Request - Display (i.e., C1-PARequestType)** - Enables you to display the details of a payment agreement request. • **Payment Agreement Request - Maintenance (i.e., C1-PARQTY)** - Enables you to maintain a payment agreement request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Payment Agreement Request (i.e., C1-PAREQ)** maintenance object.	
Detailed Description	Used to specify additional information about the payment agreement request type.	No
Status	Used to indicate the status of the payment agreement request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a payment agreement request type to **Inactive** when the corresponding payment agreement request is in a status other than **Draft**, **Approval In Progress**, and **Active**.	Yes
Status Change Notification Type	Used to indicate the type of notification that you want to generate when the status of the payment agreement request type is changed. The valid values are: • Alert • To Do • Both **Note:** The list includes only those values which are defined in the **PA_STS_CHNG_NOT_TYPE** lookup field.	No
Approval Required	Used to indicate whether approval is required while creating a payment agreement request using the payment agreement request type.	Yes
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a payment agreement request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.

Field Name	Field Description	Mandatory (Yes or No)
	This field appears when the **Approval Required** check box is selected. The **C1-PAREQ** To Do type is shipped with the product. You can use the **C1-PAREQ** To Do type or a custom To Do type, if required.	
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a payment agreement request which is submitted for approval. **Note:** This field appears when the **Approval Required** check box is selected. The list will include only those To Do roles which are associated with the To Do type specified in the **Approval To Do Type** field.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Submitter To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when the approver resubmits a payment agreement request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Submitter To Do Role	Used to indicate that the users with the specified To Do role must receive a To Do when the approver resubmits a payment agreement request for approval. **Note:** This field appears when the **Approval Required** check box is selected. The list will include only those To Do roles which are associated with the To Do type specified in the **Submitter To Do Type** field.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Allow Partial Amount	Used to indicate whether partial amount is allowed while creating the payment agreement request using the payment agreement request type.	No

Tip: Alternatively, you can click the **Edit** button in the **Payment Agreement Request Type** zone to edit the details of the payment agreement request type.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the payment agreement request type, if required.

7. Click **Save**.
   The changes made to the payment agreement request type are saved.

Copying a Payment Agreement Request Type

Instead of creating a payment agreement request type from scratch, you can create a new payment agreement request type using an existing payment agreement request type. This is possible through copying a payment agreement request type. On copying a payment agreement request type, the details including the characteristics are copied to the new payment agreement request type. You can then edit the details, if required.

Prerequisites

To copy a payment agreement request type, you should have:

- Payment agreement request type (whose copy you want to create) defined in the application
- Payment agreement request business objects defined in the application
- Payment agreement request information algorithm defined using the **C1-PA-INFO** algorithm type.
- Required To Do role assigned to the **C1-PAREQ** To Do type in the application.

Procedure

To copy a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request Type** sub-menu.
   The **Payment Agreement Request Type** screen appears.
4. In the **Payment Agreement Request Type List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column corresponding to the payment agreement request type whose copy you want to create.

   The **Payment Agreement Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the payment agreement request type.
   - **Characteristics** - Used to define the characteristics for the payment agreement request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to specify the payment agreement request type.	Yes
Business Object	Indicates the business object used while defining the payment agreement request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the payment agreement request type.	Yes
Payment Agreement Request Business Object	Used to indicate the business object using which you want to create the respective payment agreement request. The valid values are: • **Payment Agreement Request - Display (i.e., C1-PARequestType)** - Enables you to display the details of a payment agreement request. • **Payment Agreement Request - Maintenance (i.e., C1-PARQTY)** - Enables you to maintain a payment agreement request. **Note:** The above mentioned business objects are shipped with the product. The list includes those business objects which are created using the **Payment Agreement Request (i.e., C1-PAREQ)** maintenance object.	Yes
Detailed Description	Used to specify additional information about the payment agreement request type.	No
Status	Used to indicate the status of the payment agreement request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a payment agreement request type to **Inactive** when the corresponding payment agreement request is in a status other than **Draft**, **Approval In Progress**, and **Active**.	Yes
Status Change Notification Type	Used to indicate the type of notification that you want to generate when the status of the payment agreement request type is changed. The valid values are: • Alert • To Do • Both **Note:** The list includes only those values which are defined in the **PA_STS_CHNG_NOT_TYPE** lookup field.	No
Approval Required	Used to indicate whether approval is required while creating a payment agreement request using the payment agreement request type.	Yes
Approval To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when a payment agreement request is submitted for approval. **Note:**	Yes (Conditional) **Note:** This field is required when the **Approval Required**

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** check box is selected. The **C1-PAREQ** To Do type is shipped with the product. You can use the **C1-PAREQ** To Do type or a custom To Do type, if required.	check box is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve a payment agreement request which is submitted for approval. **Note:** This field appears when the **Approval Required** check box is selected. The list will include only those To Do roles which are associated with the To Do type specified in the **Approval To Do Type** field.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Submitter To Do Type	Used to indicate that the To Do entry of the specified To Do type must be created when the approver resubmits a payment agreement request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Submitter To Do Role	Used to indicate that the users with the specified To Do role must receive a To Do when the approver resubmits a payment agreement request for approval. **Note:** This field appears when the **Approval Required** check box is selected. The list will include only those To Do roles which are associated with the To Do type specified in the **Submitter To Do Type** field.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.

Field Name	Field Description	Mandatory (Yes or No)
Allow Partial Amount	Used to indicate whether partial amount is allowed while creating the payment agreement request using the payment agreement request type.	No

Tip: Alternatively, you can click the **Duplicate** button in the **Payment Agreement Request Type** zone to create a copy of the payment agreement request type.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics of the payment agreement request type, if required.
7. Click **Save**.
   The new payment agreement request type is defined.

Deleting a Payment Agreement Request Type

Procedure

To delete a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request Type** sub-menu.
   The **Payment Agreement Request Type** screen appears.
4. In the **Payment Agreement Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the payment agreement request type that you want to delete.
   A message appears confirming whether you want to delete the payment agreement request type.

Note: You can delete a payment agreement request type only when you have not created a payment agreement request using the payment agreement request type.

Tip: Alternatively, you can click the **Delete** button in the **Payment Agreement Request Type** zone to delete the payment agreement request type.

5. Click **OK**.
   The payment agreement request type is deleted.

Payment Agreement Request (Used for Searching)

The **Payment Agreement Request** screen allows you to search for a payment agreement request through various search criteria. It also allows you to create a hold request. It contains the following zone:

- Search Payment Agreement Request on page 2202

Through this screen, you can navigate to the following screen:

- Payment Agreement Request (Used for Viewing) on page 2212

Search Payment Agreement Request

The **Search Payment Agreement Request** zone allows you to search for a payment agreement request using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a payment agreement request using request or bill details. The valid values are: • Request Details • Bill Details **Note:** By default, the **Request Details** option is selected.	Yes
Payment Agreement Request ID	Used to search a particular payment agreement request. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Payment Agreement Request Type	Used to search payment agreement requests which are created using a particular payment agreement request type. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Status	Used to search payment agreement requests with a particular status. The valid values are: • Active • Approval In Progress • Broken Promise • Draft • Kept Promise • Rejected **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Entity Type	Used to search for payment agreement requests which are created for a particular entity type. The valid values are: • Account • Person **Note:** This field appears when you select the **Request Details** option from the **Search By** list. The list includes only those values which are defined in the **PA_ENTITY_TYPE_FLG** lookup field. By default, the **Account** option is selected.	No

Field Name	Field Description	Mandatory (Yes or No)
Created From	Used to search for payment agreement requests which are created on or after the specified date. **Note:** This field appears when you select the **Request Details** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. Simultaneously, you can also specify the time or select it using the **Time Picker** ( ) icon corresponding to the field. The creation from date cannot be later than the created to date.	Yes
Entity ID	Used to search for payment agreement requests which are created for a particular entity. **Note:** This field appears when you select the **Request Details** option from the **Search By** list. The **Search** ( ) icon appears corresponding to the **Entity ID** field. On clicking the **Search** icon, the **Account Search** window appears.	
Created To	Used to search for payment agreement requests which are created till a particular date. **Note:** This field appears when you select the **Request Details** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. Simultaneously, you can also specify the time or select it using the **Time Picker** ( ) icon corresponding to the field. The creation to date cannot be earlier than the created from date.	No
Delinquency Process ID	Used to search for payment agreement requests which are created for a particular delinquency process. **Note:** This field appears when you select the **Request Details** option from the **Search By** list. The **Search** ( ) icon appears corresponding to the **Delinquency Process ID** field. On clicking the **Search** icon, the **Delinquency Process Search** window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Bill ID	Used to search for payment agreement requests which are created for a particular bill ID. **Note:** You can search for a bill by clicking the **Search** (🔍) icon corresponding to the field. This field appears when you select the **Bill Details** option from the **Search By** list.	No
Bill Date From	Used to search bills which are created from a particular date onwards. **Note:** This field appears when you select the **Bill Details** option from the **Search By** list.	No
Alternate Bill ID	Used to search a particular bill using the alternate bill ID. **Note:** This field appears when you select the **Bill Details** option from the **Search By** list.	No
Bill Date To	Used to search bills which are created till a particular date. **Note:** This field appears when you select the **Bill Details** option from the **Search By** list.	No

Note: You must specify at least one search criterion while searching for a payment agreement request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the payment agreement request is created.
Payment Agreement Request Information	Displays information about the payment agreement request. **Note:** It has a link. On clicking the link, the **Payment Agreement Request** screen appears where you can view the details of the respective payment agreement request.
Schedule Amount	Displays the amount which is scheduled for payment. **Note:** This column appears only when you select the **Bill Details** option from the **Search By** list.
Status	Indicates the status of the payment agreement request. The valid values are: • Active • Approval In Progress • Broken Promise • Draft • Kept Promise • Rejected
Last Updated Date Time	Displays the most recent date and time when the payment agreement request is updated.

Column Name	Column Description
Total Unpaid Amount	Displays the remaining balance of all the debit bills which are not been fully paid or matched against the corresponding credit bills. **Note:** This column appears only when you select the **Request Details** option from the **Search By** list.
Entity Type	Indicates the entity type for which the payment agreement request is created.
Entity Information	Displays information about the account or person. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. If you have created a payment agreement request for an account entity, the system displays the link of the **Account** screen else the system displays the link of the **Person** screen where you can view the details of the respective entity.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

Bill Details

The **Bill Details** zone lists the details of the unpaid debit bills. This zone contains the following columns:

Column Name	Column Description
Bill Information	Indicates the bill against which the payment agreement request is created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears with the details of the respective bill.
Bill Amount	Displays the initial amount of a bill before any subsequent bill revisions are applied.
Unpaid Amount	Displays the outstanding amount owed on a bill.
Due Date	Displays the date when the payment must be made for the billed amount.

By default, the **Bill Details** zone does not appear in the **Payment Agreement Request** screen. It appears when you click the **Broadcast** (⊙) icon corresponding to the payment agreement request in the **Search Payment Agreement Request** zone.

You can change the layout of this zone. For more information on how to change the layout, see Changing the Layout on page 4616.

Searching for a Payment Agreement Request

Prerequisites

To search for a payment agreement request, you should have:

- Payment agreement request types defined in the application.

Procedure

To search for a payment agreement request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Delinquency Management** and then click **Payment Agreement Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request** sub-menu.
   The **Payment Agreement Request** screen appears.
4. Enter the search criteria in the **Search Payment Agreement Request** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of payment agreement requests that meet the search criteria appears in the **Search Results** section.

Creating a Payment Agreement Request

Prerequisites

To create a payment agreement request, you should have:

- Payment agreement request types defined in the application.

Procedure

To create a payment agreement request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Delinquency Management** and then click **Payment Agreement Request**.
   A sub-menu appears.
3. Click the **Add** option from the **Payment Agreement Request** sub-menu.

   The **Add Payment Agreement Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to indicate the payment agreement request type using which you want to create the payment agreement request.	Yes
Entity Type	Used to indicate the entity type for payment agreement request. The valid values are: • Account • Person **Note:** The list includes only those values which are defined in the **PA_ENTITY_TYPE_FLG** lookup field. By default, the **Account** option is selected.	Yes
Entity ID	Used to indicate the account for which you want to create the payment agreement request. **Note:** The **Search** (🔍) icon appears corresponding to the **Entity ID** field. On clicking the **Search** icon, the **Account Search** window appears. On specifying the account, the description of the account appears corresponding to the **Account** field.	Yes
Linked to Delinquency Process	Used to indicate whether the payment agreement request should be linked with the delinquency process.	No
Delinquency Process ID	Used to indicate the delinquency process which should be linked with the payment agreement request. **Note:** This field appears only when the **Linked to Delinquency Process** option is selected. The **Search** (🔍) icon appears corresponding to the **Delinquency Process ID** field. On clicking the **Search** icon, the **Delinquency Process Search** window appears. On specifying the delinquency process ID, the description of the delinquency process ID appears corresponding to the **Delinquency Process ID** field.	Yes (Conditional) **Note:** This field is required when the **Linked to Delinquency Process** option is selected.

Tip: Alternatively, you can access the **Add Payment Agreement Request** screen by clicking the **Add** button in the **Page Title** area of the **Payment Agreement Request** screen.

4. Enter the required fields.

5. Click **OK**.
   The payment agreement request is created and the status of the payment agreement request is set to **Draft**. The **Payment Agreement Request** screen appears with the details of the payment agreement request.

   Note:

   You cannot create a payment agreement request for a delinquency process when the same delinquency process is associated with another payment agreement request.

   You can associate a delinquency process with a payment agreement request only when the delinquency process is not in any of the following statuses:

   - **Canceled**
   - **Terminated**
   - **Completed**

Defining a Characteristic for a Payment Agreement Request

Prerequisites

To define a characteristic for a payment agreement request:

- Characteristic types defined in the application (where the characteristic entity is set to **Payment Agreement Request**).

Procedure

To define a characteristic for a payment agreement request:

1. Ensure that the **Characteristics** section is expanded when you are editing, submitting, approving, rejecting or *r*esubmitting a payment agreement.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the characteristic is effective for the payment agreement request. **Note:** You can either manually specify the date or select it using the **Date Picker** (calendar) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the payment agreement request.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **payment agreement request**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic

Field Name	Field Description	Mandatory (Yes or No)
		for the payment agreement request.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the payment agreement request.

2. Enter the required details.
3. If you want to define more than one characteristic for the payment agreement request, click the **Add** (+) icon *a*nd then repeat step 2.

Note: However, if you want to remove a characteristic from the payment agreement request, click the **Delete** (🗑) icon corresponding to the characteristic.

Defining a Payment Schedule for a Payment Agreement Request

Prerequisites

To define a payment schedule for a payment agreement request, you should have:

- The auto pay process defined for the respective account in the application.

Procedure

To define a payment schedule for a payment agreement request:

1. Ensure that the **Payment Schedule** section is expanded when you *a*re editing, submitting, approving, rejecting, or resubmitting a payment agreement request.

   The **Payment Schedule** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule Date	Used to specify the date on which the payment is scheduled. **Note:**	Yes (Conditional) **Note:** This field is required when you specify

Field Name	Field Description	Mandatory (Yes or No)
	You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The schedule date must be later than the system date.	the amount in the **Schedule Amount** field. The schedule date must be later than the system date.
Schedule Amount	Used to specify the amount of the unpaid bills which is scheduled to be paid in installments.	Yes (Conditional) **Note:** This field is required when you specify the date in the **Schedule Date** field.
Auto Pay ID	Used to indicate the auto pay ID of the payor. **Note:** This field is enabled when you select an option from the **Pay Method** list in the **Main** section of the **Payment Agreement Request** screen for which the automatic payment process is applicable. You must set the **Grace Days** option to zero in the **Pay Method** screen against a respective payment method for which you want the automatic payment process to take place. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Auto Pay ID Search** window appears.	Yes (Conditional) **Note:** This field is required when you select an option from the **Pay Method** list in the **Main** section of the **Payment Agreement Request** screen.

2. Enter the required details.
3. If you want to define more than one payment schedule for the payment agreement request, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a payment schedule from the payment agreement *r*equest, click the **Delete** (🗑) icon corresponding to the payment schedule.

- Delete a payment agreement request
- Delete a bill from a payment agreement request
- Submit a payment agreement request for approval
- Approve or reject a payment agreement request
- Resubmit a payment agreement request
- Filter an overdue bill of an account
- Add an overdue bill in a payment agreement request
- View the log of a payment agreement request
- Add a log entry for a payment agreement request

It consists of the following tabs:

- Payment Agreement Request - Main on page 2212
- Payment Agreement Request - Bills on page 2216
- Payment Agreement Request - Log on page 2217

Payment Agreement Request - Main

The **Main** tab displays information about the payment agreement request. It contains the following zones:

- Payment Agreement Request on page 2212
- Bill Details on page 2214
- Payment Schedule on page 2215

Payment Agreement Request

The **Payment Agreement Request** zone displays the details of the payment agreement request. It contains the following sections:

- **Main** - Displays basic information about the payment agreement request. It contains the following fields:

Field Name	Field Description
Payment Agreement Request Information	Displays information about the payment agreement request.
Payment Agreement Request Type	Indicates the payment agreement request type using which the payment agreement request is created. **Note:** It has a link. On clicking the link, the **Payment Agreement Request Type** screen appears where you can view the details of the payment agreement request type.
Entity Information	Displays information about the account or person.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Entity Type	Indicates the entity type for which the payment agreement request is created. The valid values are: • Account • Person
Status	Indicates the status of the payment agreement request. The valid values are: • Active • Approval In Progress • Broken Promise • Draft • Kept Promise • Rejected
Third Party Payor	Indicates an external party who is responsible for paying the amount on behalf of the payor account.
Description	Indicates the description of the third party payor.
Payor Account ID	Displays the payment agreement requests which are created for a particular payor account. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective payor account.
Pay Method	Displays the method using which the payment is made.
Total Unpaid Amount	Displays the remaining balance of all the debit bills which are not been fully paid or matched by the corresponding credit bills.
Total Future Schedule Amount	Displays the total remaining balance which is scheduled for payment.
Total Payment Agreement Amount	Displays the total amount of the payment which is made against the payment agreement.

- **Record Actions** - Enables you to perform various actions on the payment agreement request. It contains the following buttons:

Column Name	Column Description
Edit	Used to edit the details of the payment agreement request. **Note:** The **Edit** button appears when the payment agreement request is in the **Active** or **Draft** status.
Delete	Used to delete the payment agreement request. **Note:** The **Delete** button appears when the payment agreement request is in the **Draft** status.
Submit	Used to submit the payment agreement request for approval. **Note:** The **Submit** button appears when the payment agreement request is in the **Draft** status.

Column Name	Column Description
Approve	Used to approve the payment agreement request. **Note:** The **Approve** button appears when: • The payment agreement request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the payment agreement request.
Reject	Used to reject the payment agreement request. **Note:** The **Reject** button appears when: • The payment agreement request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the payment agreement request.
Resubmit	Used to request the user for resubmitting the payment agreement request for approval. **Note:** The **Resubmit** button appears when: • The payment agreement request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the payment agreement request.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the payment agreement request is created. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the payment agreement request status is updated.
Create Date/Time	Displays the date and time when the payment agreement request is created.

- **Characteristics** - This section lists the characteristics of the payment agreement request. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the payment agreement request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Bill Details

The **Bill Details** zone displays the bills that are added in the payment agreement request. This zone contains the following columns:

Column Name	Column Description
Bill Information	Displays information about the bill. In addition, a context menu (⌄) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.
Original Bill Amount	Displays the initial amount of a bill before any revisions or adjustments are applied.
Due Date	Displays the date when the payment must be made for the billed amount.
Current Bill Balance	Displays the outstanding amount owed on a bill.
Overdue Process Information	Displays information about the overdue process. In addition, a context menu (⌄) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Overdue Process** screen appears where you can view the details of the respective overdue process.

Note:

The **Delete** button appears only when the payment agreement request is in the **Draft** status.

To delete a bill, select the check box corresponding to the bill and click the **Delete** button. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to delete all the bills listed in the respective page.

Pagination is used to display limited number of records in the **Bill Details** zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Bill Details** zone only when the records exceed 20.

Bills which are added in the payment agreement request must have the same currency.

Payment Schedule

The **Payment Schedule** zone displays the payments scheduled for the bills which are added in the payment agreement request. It contains the following columns:

Column Name	Column Description
Schedule Date	Displays the date on which the payment is made for the outstanding bill.
Schedule Amount	Displays the amount of the bill which is scheduled for payment in installments.
Auto Pay ID	Indicates the automatic payment ID of the payor.
Payment Event	Indicates the payment event whose frozen payment you want to transfer. **Note:** It has a link. On clicking the link, the **Payment Event** screen appears where you can view the details of the respective payment event.

Note: Pagination is used to display limited number of records in the **Payment Schedule** zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Payment Schedule** zone only when the records exceed 20.

Payment Agreement Request - Bills

The **Bills** tab contains the following zone:

- Search Bills on page 2216

Note: The **Bills** tab appears only when the payment agreement request is in the **Draft** status.

Search Bills

The **Search Bills** zone allows you to search for overdue bills (of an account) using various search criteria. It also allows you to add the overdue bills in the payment agreement request. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for overdue bills using the bill details. The valid value is: • Bill Details **Note:** By default, the **Bill Details** option is selected.	Yes
Bill ID	Used to search for a particular bill. **Note:** The **Search** (🔍) icon appears corresponding to the **Bill ID** field. On clicking the **Search** icon, the **Bill Search** window appears.	No
Bill Date From	Used to search the overdue bills which are created from a particular date onwards.	No
Bill Date To	Used to search the overdue bills which are created till a particular date.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears with the details of the respective bill.
Unpaid Amount	Displays the remaining balance of the respective debit bill which is not been fully paid or matched by the corresponding credit bill.
Person Name	Displays the name of the person to whom the account belongs.
Account	Displays information about the account. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Overdue Process Information	Displays information about the overdue process. In addition, a context menu ( ) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Overdue Process** screen appears where you can view the details of the respective overdue process.

In addition, this section contains the following button:

Button Name	Button Description
Add	Used to add a bill to the payment agreement request.

A check box appears corresponding to each bill. On selecting the check box, you can add the bill to the payment agreement request. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the bills listed in the respective page to the payment agreement request.

Note: Pagination is used to display limited number of records in the **Bill Details** zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Bill Details** zone only when the records exceed 20.

Payment Agreement Request - Log

The **Log** tab contains the following zone:

- Payment Agreement Request Log on page 2217

Payment Agreement Request Log

The **Payment Agreement Request Log** zone on the **Payment Agreement Request** screen lists the complete trail of actions performed on the payment agreement request. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the payment agreement request.
Details	Displays the details about the action performed on the payment agreement request.

Column Name	Column Description
User	Indicates the user who has performed the action on the payment agreement request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the payment agreement request.
Status Reason	Displays the status reason of action performed on the payment agreement request.
Old Payment Schedule	Displays the details of old payment schedule.

Note: You can manually add a log entry for the payment agreement request by clicking the **Add Log Entry** link in the upper right corner of the **Payment Agreement Request Log** zone.

The **Add Payment Agreement Request Log** window appears. Enter **Log Details** and click **Save**. The payment agreement request log is added.

Editing a Payment Agreement Request

Procedure

To edit a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose details you want to edit.
   The **Payment Agreement Request** screen appears.
3. Click the **Edit** button in the **Payment Agreement Request** zone.

   The **Payment Agreement Request** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the payment agreement request.
   - **Bill Details** - Used to specify the bill details in the payment agreement request.
   - **Payment Schedule** - Used to specify the payment schedule details in the payment agreement request.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Information	Displays information about the payment agreement request.	Not applicable
Payment Agreement Request Type	Indicates the payment agreement request type using which the payment agreement request is created.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Entity Information	Used to indicate the entity for which the payment agreement request is created.	Not applicable
Entity Type	Used to indicate the entity type for which the payment agreement request is created. The valid values are: • Account • Person	No
Third Party Payor	Used to indicate the external party who is responsible for paying the amount on behalf of the payor account. **Note:** The **Third Party Payor** list is enabled only when the option *c*orresponding to the **Third Party Payor** list is selected. By default, the **Third Party Payor** list is disabled.	Yes (Conditional) **Note:** This field is required when you specify a value for the **Auto pay ID** field in the **Payment Schedule** section.
Payor Account ID	Displays the third party payor's account ID. **Note:** By default, this field is disabled. On clicking the option corresponding to the **Third Party Payor** list, the payor account ID is set to blank. On specifying the respective third party payor, the payor account ID of third party payor appears in the **Payor Account ID** field.	Not applicable
Pay Method	Used to indicate the method using which the payment is made. **Note:** The valid values differ with respect to the description added for respective pay method in the **Pay Method** screen.	Yes
Comments	Used to specify additional details about the payment agreement request.	No
Total Unpaid Amount	Displays the sum of unpaid amount of the bills.	Not applicable
Total Future Schedule Amount	Displays the sum of future schedule amount.	Not applicable

4. Add or modify the details of the payment agreement request, if required.
5. Define, edit, or remove characteristics of the payment agreement request, if required.
6. Define or remove a bill from the payment agreement request, if required.
7. Click **Save**.
   The changes made to the payment agreement request are saved.

Note: You cannot edit a payment agreement request if the current date is later than the date derived by adding the latest schedule date to the grace days specified in the **Pay Method** screen.

Adding an Additional Overdue Bill of an Account in a Payment Agreement Request

Procedure

To add an additional overdue bill of an account in a payment agreement request:

1. Ensure that the **Bill Details** section is expanded when you are editing a payment agreement request which is in the **Active** status.

   The **Bill Details** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bill ID	Used to indicate the bill which is added in the payment agreement request. **Note:** The **Search** (🔍) icon appears corresponding to the **Bill ID** field. On clicking the **Search** icon, the **Bill Search** window appears. On specifying the value for a bill, the description of the bill appears corresponding to the **Bill ID** field. You cannot add a bill in the payment agreement request which does not belong to the respective account.	Yes

2. If you want to define more than one bill for the payment agreement request, click the **Add** (+) icon *a*nd then repeat step 2.

Note: However, if you want to remove a bill from the payment agreement request, click the **Delete** (🗑) icon corresponding to the bill.

Submitting a Payment Agreement Request

Prerequisites

To submit a payment agreement request, you should have:

- At least one overdue bill added to the payment agreement request which is in the **Complete** status.
- Payment schedule defined for the payment agreement request.

Procedure

To submit a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column *c*orresponding to the payment agreement request that you want to submit.
   The **Payment Agreement Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Submit** button in the **Payment Agreement Request** zone.
   The system behaves in the following manner:

If...	Then
The **Approval Required** check box is selected in the respective payment agreement request type.	The status of the payment agreement request is changed to **Approval In Progress**. A To Do is created using the To Do type (i.e. **C1-PAREQ**) specified in the **Approval To Do Type** field of the respective payment agreement request and then assigned to the users with the role specified in the **Approval To Do Role** field of the respective payment agreement request. In addition, a log entry is created for the payment agreement request when the To Do is created for the approver.
The **Approval Required** check box is not selected in the respective payment agreement request type.	The status of the payment agreement request is changed to **Active**.

Note: The **Submit** button appears when the payment agreement request is in the **Draft** status.

Removing an Overdue Bill from a Payment Agreement Request

Prerequisites

To remove an overdue bill from a payment agreement request, you should have:

- At least one overdue bill added to the payment agreement request

Procedure

To remove an overdue bill from a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose details you want to view.
   The **Payment Agreement Request** screen appears.
3. Select the check box corresponding to the overdue bill that you want to delete in the **Bill Details** zone.

   Note: You can also select multiple overdue bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to delete all the overdue bills listed in the respective page.
4. Click **Delete**.

A message appears indicating that the selected overdue bill has been successfully removed from the payment agreement request. The removed overdue bill appears in the **Search Bills** zone of the **Bills** tab.

5. Click **OK**.
   The **Delete** button appears when the payment agreement request is in the **Draft** status.

Approving a Payment Agreement Request

You can view the number of payment agreement requests which are pending for approval in the **Payment Agreement Request** screen. The approver can review, and accordingly approve or reject the payment agreement request based on the observations.

Note: The system will not allow you to approve or reject a payment agreement request submitted by you.

Procedure

To approve a payment agreement request:

1. Do either of the following:

If you want to...	Then...
Approve a payment agreement request through the Payment Agreement Request screen	**a.** Search for the payment agreement request in the **Payment Agreement Request** screen. **b.** In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request which you want to review.
Approve a payment agreement request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** In the **To Do List** screen, click the **Search** (🔍) icon corresponding to the **To Do Type** field. On clicking the **Search** icon, the **To Do Type for User Search** window appears. **d.** Enter the **C1-PAREQ** in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the payment agreement request that you want to review.

The **Payment Agreement Request** screen appears.

2. Review the payment agreement request details.
3. Click the **Approve** button in the **Payment Agreement Request** zone.
   The status of the payment agreement request is changed to **Active**.

Note:

The **Approve** button appears when:

- The payment agreement request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment agreement request.

You cannot approve a payment agreement request for a delinquency process when the delinquency process is either in the **Canceled**, **Completed**, or **Terminated** status.

Rejecting a Payment Agreement Request

Prerequisites

To reject a payment agreement request, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a payment agreement request, you need to specify the reason why you want to reject the payment agreement request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-PaymentAgreementRequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a payment agreement request submitted by you.

Procedure

To reject a payment agreement request:

1. Do either of the following:

If you want to	Then
Reject a payment agreement request through the Payment Agreement Request screen	**a.** Search for the payment agreement request in the **Payment Agreement Request** screen. **b.** In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment request which you want to review.

If you want to	Then
Reject a payment agreement request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do List** screen appears. **c.** In the **To Do List** screen, click the **Search** (🔍) icon corresponding to the **To Do Type** field. On clicking the **Search** icon, the **To Do Type for User Search** window appears. **d.** Enter the **C1-PAREQ** in the **To Do Type** field. **e.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **f.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **g.** Click the link in the **Message** column corresponding to the To Do of the payment agreement request that you want to review.

The **Payment Agreement Request** screen appears.

2. Review the payment agreement request details.
3. Click the **Reject** button in the **Payment Agreement Request** zone.

   The **Reject Payment Agreement Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the payment agreement request. **Note:** If you are rejecting the payment agreement request, this list includes only those reasons which are defined for the **Rejected** status of the **C1-PaymentAgreementRequest** business object through the **Status Reason** screen.	Yes
Comments	Used to specify additional information while rejecting the payment agreement request.	No

Note: The **Reject** button appears when:

- The payment agreement request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment agreement request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.
   The status of the payment agreement request is changed to **Rejected**.

Resubmitting a Payment Agreement Request

Prerequisites

To resubmit a payment agreement request, you should have:

- At least one overdue bill added to the payment agreement request
- Payment schedule defined for the payment agreement request

Procedure

To resubmit a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request that you want to resubmit.
   The **Payment Agreement Request** screen appears.
3. Click the **Resubmit** button in the **Payment Agreement Request** zone.

   The **Resubmit Payment Agreement Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes that the submitter should make in the payment agreement request before resubmitting the payment agreement request for approval. **Note:** You can resize the text box depending on your requirement by clicking the **Resize Handle** (⟋) icon at the bottom right corner of the text box.	Yes

   Note: The **Re Submit** button appears when the following conditions are met:

   - The payment agreement request is in the **Approval In Progress** status.
   - A user with the approval To Do role is reviewing the payment agreement request.
4. Enter the comments in the respective field.
5. Click **Save**.
   The status of the payment agreement request is changed to **Draft**. A To Do is created of the To Do type (i.e. **C1-PAREQ**) specified in the **Submitter To Do Type** field of the respective payment agreement request type and then assigned to the users with the role specified in the **Submitter To Do Role** field of the respective payment agreement request type. In addition, a log entry is created for the payment agreement request when the To Do is created for the submitter.

   Note: The To Do is created for the submitter only when the submitter To Do type and submitter To Do role are specified in the respective payment agreement request type.

Activating a Payment Agreement Request

Prerequisites

To activate a payment agreement request, you should have:

- At least one overdue bill added to the payment agreement request.
- Payment schedule defined for the payment agreement request.

Procedure

To activate a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.

   Note: The payment agreement request must be in the **Broken Promise** status.

2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request that you want to activate.
   The **Payment Agreement Request** screen appears.
3. Click the **Activate** button in the **Payment Agreement Request** zone.
   The status of the payment agreement request is changed to **Active**.

Filtering an Overdue Bill of an Account

Prerequisites

To filter an overdue bill of an account, you should have:

- Overdue bill available for the respective account.

Procedure

To filter an overdue bill of an account:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.

   Note: The payment request must be in the **Draft** status.

2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment request which you want to review.
   The **Payment Agreement Request** screen appears.
3. Ensure that the **Bills** tab is selected.
   The **Search Bills** zone appears.

   Note: If there is any overdue bill existing for an account, then that bill appears in the **Search Results** section of the **Search Bills** zone.

4. Click the **Expand Filter** button to view the filter area.

   Note: You can filter the list using the **Bill ID**, **Bill Date From**, and **Bill Date To** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

5. Enter the search criteria in the **Search Bills** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.
   A filtered list of overdue bills that meet the search criteria appear in the **Search Results** section.

   Note:

Adding an Overdue Bill in a Payment Agreement Request

Prerequisites

To add an overdue bill in a payment agreement request, you should have:

- Overdue bills that are in the **Complete** status for an account where the outstanding amount is greater than zero.

Procedure

To add an overdue bill in a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.

   Note: The payment request must be in the **Draft** status.

2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose details you want to view.
   The **Payment Agreement Request** screen appears.
3. Ensure that the **Bills** tab is selected.
   The **Search Bills** zone appears.

   Note: If an overdue bill for an account is already listed in the **Search Results** section, you can directly proceed to step 6, else you can resume from step 4.

4. Click the **Expand Filter** button and enter the search criteria in the **Search Bills** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

   A list of overdue bills that meet the search criteria appears in the **Search Results** section.

6. In the **Search Bills** zone, select the check box corresponding to the overdue bill that you want to add in a payment agreement request.

   Note: You can add more than one overdue bill to the payment agreement request at the same time.

7. Click the **Add** button in the **Search Bills** zone.
   A message appears indicating that selected bills have been successfully added to the payment agreement request.
8. Click **OK**.
   The respective overdue bill appears in the **Bill Details** section of the **Payment Agreement Request** zone.

   Note:

   You cannot add a bill in the payment agreement request if its outstanding balance is less than or equal to zero.

   You cannot add a bill to the payment agreement request when the bill is a part of another payment agreement request and is not in the **Complete** status.

Viewing the Log of a Payment Agreement Request

Procedure

To view the log of a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose log you want to view.
   The **Payment Agreement Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears
4. View the complete trail of actions performed on the payment agreement request in the **Payment Agreement Request Log** zone.

Adding a Log Entry for a Payment Agreement Request

Procedure

To add a log entry for a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose log you want to edit.
   The **Payment Agreement Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Payment Agreement Request Log** zone.

   The **Add Payment Agreement Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Information	Displays information about the payment agreement request.	Not applicable
Log Details	Used to specify additional comments for the payment agreement request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can resize the text box depending on your requirement by clicking the **Resize Handle** ( ) icon at the bottom right corner of the text box.	

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Payment Agreement Request Log** zone.

Part XXXV

Dispute Request

Topics:

- Dispute Request (Without Approval) Status Transition
- Dispute Request (With Approval) Status Transition
- Prerequisites
- Algorithms Used in C1-DisputeRequest
- Dispute Request Type
- Dispute Request (Used for Searching)
- Dispute Request (Used for Viewing)

Oracle Revenue Management and Billing allows you to create a dispute request for an account. Through a dispute request, the dispute against a particular bill, bill segment, and/or adjustment is tracked and closed. While creating a dispute request, you need to specify the dispute request type using which you want to create the dispute request. It is the dispute request type which helps the system to determine:

- The business object using which the dispute request should be created
- Whether the dispute request must be approved before creating adjustments to settle a dispute against a bill, bill segment, or adjustment
- Approval profile using which the dispute request must be approved
- Whether multi-level or single-level approval is required for a dispute request
- Whether debit or credit hierarchy must be used for approval when the dispute request amount is zero
- Default adjustment type using which adjustments must be created

You can add completed bills, its bill segments, and adjustments in the dispute request. In other words, at present, the system enables you to resolve the dispute against a bill, bill segment, and adjustment. If the dispute is against a bill, the system, by default, sets the dispute amount and does not allow you to change the dispute amount. The dispute amount is set to the original bill amount because the original bill amount and dispute amount must be equal. However, if the original bill amount is positive, then the dispute amount is set to negative, and vice versa. If the dispute is against a bill segment or adjustment, you can change the dispute amount, if required.

Once a dispute request is created, the status of the dispute request is set to Draft. You can then edit or delete the dispute request, if required. Once you add the bills, bill segments, or adjustments in a dispute request, you can submit the dispute request. On submitting a dispute request, the system behaves in the following manner:

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Bill	Fully Paid	Not applicable	The system does the following: **1.** Creates the adjustment using the specified adjustment type for the bill. **2.** Swaps the adjustment onto the next bill.
Bill	Unpaid	Yes	The system does the following:

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
			1. Stops the automatic payment created for the current bill. **2.** A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the **Overdue Monitor (C1-ADMOV)** batch. **Note:** The above step (2) occurs when the approval is required for the dispute request. **3.** Reopens the current bill of the account. **4.** Creates the adjustment using the specified adjustment type for the bill and swaps the adjustment onto the current bill. **5.** Completes and freeze the current bill.
Bill	Unpaid	No	The system does the following: **1.** Creates the adjustment using the specified adjustment type for the bill. **2.** Swaps the adjustment onto the current or next bill depending on the value defined for the **Adjustment on Next Bill** parameter in an algorithm created using the **C1- ENTERADJ** algorithm type.
Bill	Partially Paid	Not applicable	The system does the following: **1.** Creates two adjustments using the specified adjustment type for the bill. **2.** Swaps one adjustment onto the current bill and another adjustment onto the next bill. **Example:** A dispute is raised against a bill (Bill Amount - 100, Dispute Amount - 100, and Unpaid Amount - 50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.
Bill Segment	Fully Paid	Not applicable	The system does the following:

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
			1. Creates the adjustment using the specified adjustment type for the bill segment. 2. Swaps the adjustment onto the next bill.
Bill Segment	Unpaid	Yes	The system does the following: 1. Stops the automatic payment created for the current bill. 2. A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the **Overdue Monitor (C1-ADMOV)** batch. **Note:** The above step (2) occurs when the approval is required for the dispute request. 3. Reopens the current bill of the account. 4. Creates the adjustment using the specified adjustment type for the bill segment and swaps the adjustment onto the current bill. 5. Completes and freeze the current bill.
Bill Segment	Unpaid	No	The system does the following: 1. Creates the adjustment using the specified adjustment type for the bill segment. 2. Swaps the adjustment onto the current or next bill depending on the value defined for the **Adjustment on Next Bill** parameter in an algorithm created using the **C1- ENTERADJ** algorithm type.
Bill Segment	Partially Paid	Not applicable	The system does the following: 1. Creates two adjustments using the specified adjustment type for the bill segment. 2. Swaps one adjustment onto the current bill and another adjustment onto the next bill. **Example:** A dispute is raised against a bill segment (Bill Segment Amount - 100, Dispute Amount - 100, and Unpaid Bill Segment Amount -

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
			50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.
Adjustment	Fully Paid	Not applicable	The system does the following: **1.** Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute). **2.** Swaps the adjustment onto the next bill.
Adjustment	Unpaid	Yes	The system does the following: **1.** Stops the automatic payment created for the current bill. **2.** A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the **Overdue Monitor (C1-ADMOV)** batch. **Note:** The above step (2) occurs when the approval is required for the dispute request. **3.** Reopens the current bill of the account. **4.** Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute) and swaps the adjustment onto the current bill. **5.** Completes and freeze the current bill.
Adjustment	Unpaid	No	The system does the following: **1.** Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute). **2.** Swaps the adjustment onto the current or next bill depending on the value defined for the **Adjustment on Next Bill** parameter in an algorithm created using the **C1- ENTERADJ** algorithm type.

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Adjustment	Partially Paid	Not applicable	The system does the following: **1.** Creates two adjustments using the specified adjustment type for the adjustment (against which you have raised a dispute). **2.** Swaps one adjustment onto the current bill and another adjustment onto the next bill. **Example:** A dispute is raised against an adjustment (Adjustment Amount - 100, Dispute Amount - 100, and Unpaid Adjustment Amount - 50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.

Finally, the status of the dispute request is changed to **Processed**. You can optionally configure the system to use the approval workflow process for a dispute request. If the **Approval Required** flag is set to **Yes** in a dispute request type, then on submitting the respective dispute request, the approval workflow process creates a To Do for the approver to review the dispute request. Once the approver approves the dispute request, the system behaves as mentioned in the above table. The approver can approve, reject, or resubmit the dispute request. When the dispute request is resubmitted to the submitter, the submitter can edit, cancel, or submit the dispute request.

The approval process is configured through the approval profile. The approval profile allows you to define the debit and credit hierarchy. If the dispute request amount is negative, the credit hierarchy in the approval profile is used for approval. However, if the dispute request amount is positive, the debit hierarchy in the approval profile is used for approval. You can either opt to use single-level or multi-level approval for the dispute requests.

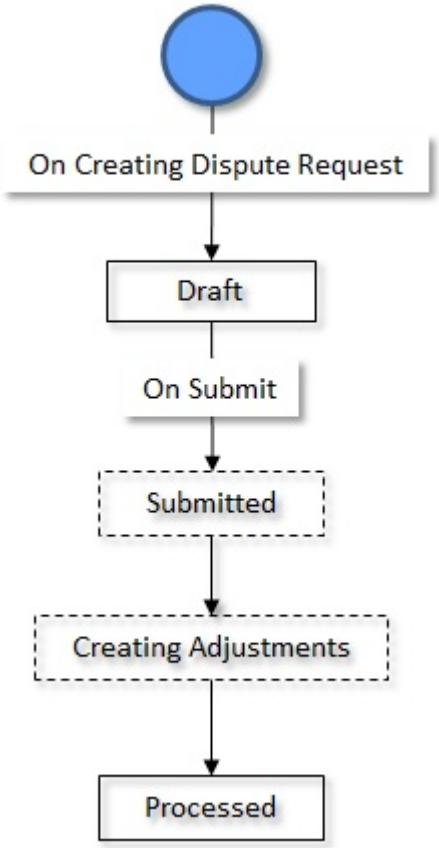
During the dispute request process, a dispute request creation goes through various statuses in its lifecycle. For more information about the dispute request statuses, see Dispute Request (Without Approval) Status Transition on page 2238 and Dispute Request (With Approval) Status Transition on page 2238.

Note: The lifecycle of a dispute request creation is driven by the respective business object using which the request is created. The dispute request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the dispute request process, see Prerequisites on page 2239.

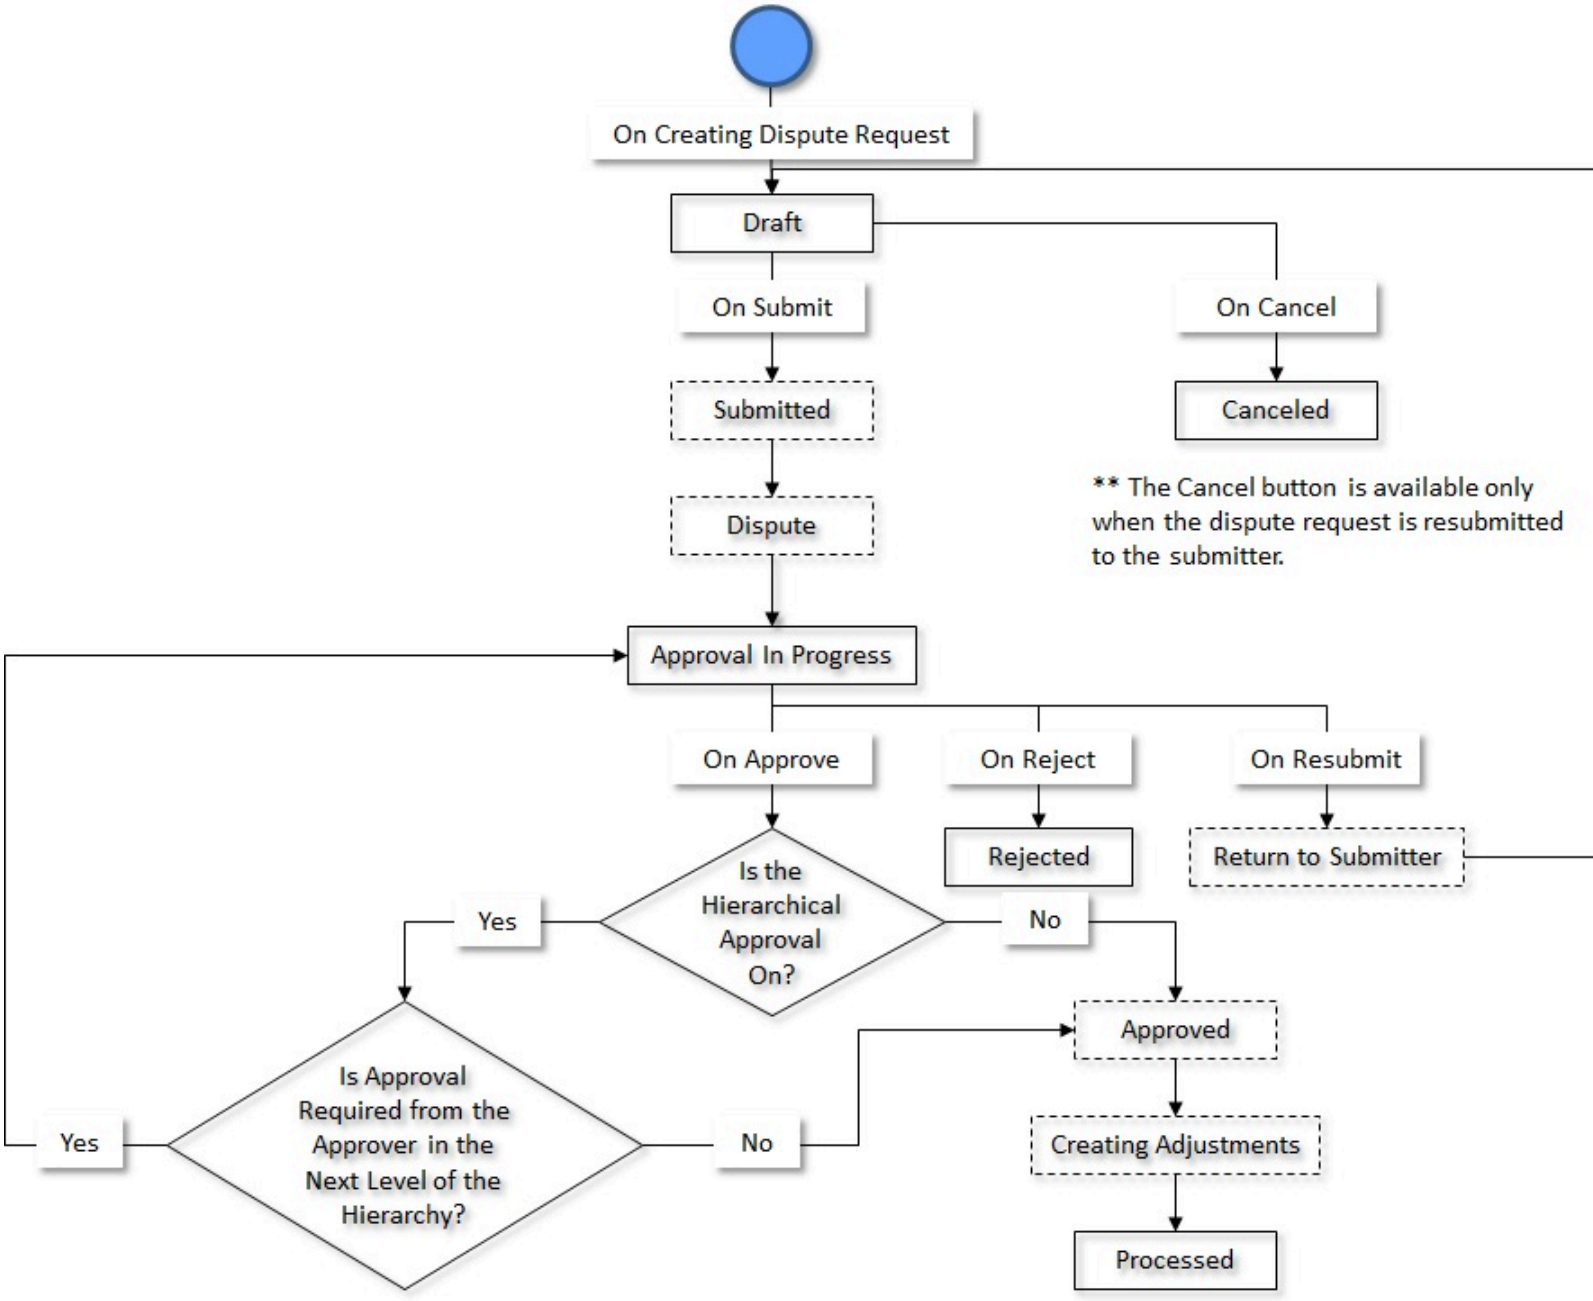
Dispute Request (Without Approval) Status Transition

The following figure graphically indicates how a dispute request moves from one status to another when approval workflow is off:



Dispute Request (With Approval) Status Transition

The following figure graphically indicates how a dispute request moves from one status to another when approval workflow is on:



Prerequisites

To setup the dispute request process, you need to do the following:

- Define the required refund request types in the system
- Define the required adjustment types (for creating dispute adjustments) where A/P request type is defined
- Define the required characteristic types where the characteristic entity is set to **Dispute Request Type**
- Define the required characteristic types where the characteristic entity is set to **Dispute Request**
- Define rejected status reasons for the **C1-DisputeRequest** business object
- Assign the **C1-DSPSB** To Do type to a To Do role whose users must receive To Do generated while submitting a dispute request for approval

- Define the required approval profiles with the credit/debit hierarchy and **C1_DISAP** To Do type
- Create an algorithm using the **C1-DSPTRQINF** algorithm type if you want to create Dispute Requests using the dispute request information.
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen

Algorithms Used in C1-DisputeRequest

The following table lists the algorithms which are attached to the **C1-DisputeRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-DSPTRQINF	C1-DSPTRQINF	This algorithm generates the dispute request information string which appears throughout the application. It concatenates the following fields: • Dispute Request Type Description • Dispute Request Status Description • Dispute Request ID
Validation	C1-DSPTVADN	C1-DSPTVADN	This algorithm validates following: **Draft** status validations: • At-least one entity should be selected to submit a dispute. **Dispute Request** with at-least one **Bill** or **Bill Line Item** should be added for submission • Dispute amount cannot be zero or null • If a bill is already present in dispute request and request is not in final status then user should not be allowed to add same bill in another dispute request • Disputed Amount should be equal to bill outstanding amount if bill Line item contain multiple contracts

The following table lists the algorithms which are used in the lifecycle of the **C1-DisputeRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-DISPUTSUB	C1-DISPUTSUB	This algorithm checks the following: • Whether the approval is required for the dispute request. If the approval is required for a dispute request, the status of the dispute request is changed to **Approval In Progress**. However, if the approval is not required for a dispute request, the status of the dispute request is changed to **Creating Adjustment**. • At least one entity, such as payment event, payment, or credit bill line item (such as credit bill segment or adjustment) is selected in the dispute request.

Status	System Event	Algorithm	Algorithm Type	Description
				• Whether the approval profile attached to the **Dispute Request Type**has the credit hierarchy and **To Do Type** defined.
Submitted	Enter	C1-DPTSTAUPY	C1-DPTSTAUPY	This algorithm is used to stop auto pay on bill. **Parameter - Characteristic Type** Characteristic Type is used to add the characteristic which is stamped on the bill to postpone overdue process
Dispute	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input **Next Status** or to the status related to the input **Next Transition Condition**. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Dispute	Enter	C1-DPTSTAUPY	C1-DPTSTAUPY	This algorithm is used to stop auto pay on bill. **Parameter - Characteristic Type** Characteristic Type is used to add the characteristic which is stamped on the bill to postpone overdue process
Creating Adjustments	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input **Next Status** or to the status related to the input **Next Transition Condition**. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Creating Adjustments	Enter	C1-ENTERADJS	C1-ENTERADJ	This algorithm is executed on submit or on approve of an dispute request. It creates the adjustments which will be swapped on the current or next bill. Adjustment are created with below logic **Unpaid Bill logic** • If stop auto pay switch is **No** and auto pay exist then create adjustment on next bill • If stop auto pay switch is **Yes** then perform below step • If bill cannot be reopen or adjustment need to be created on next bill then create adjustment on next bill

Status	System Event	Algorithm	Algorithm Type	Description

				• If approval is configured then create to do for manual creation of auto pay (Auto Pay is stopped while submitting the request)
				• Else
				  • create adjustment on current bill
				  • if approval is configured then
				  • Bill reopen and complete (Auto Pay is stopped while submitting the request)
				  • Delete overdue char from bill

Status	System Event	Algorithm	Algorithm Type	Description

				• Else
				  • Stop auto pay
				  • Reopen and complete
				Paid Bill logic
				• Adjustment will be created on next bill
				Partial Bill Logic
				• Adjustment will be created to balance current bill and another adjustment will be created for remaining amount and it will be stamped on next bill.
				• If dispute adjustment will increase the debit or credit balance then adjustment will be stamped on next bill.
				There are four parameters for this algorithm.
				Parameter 1 - Adjustment on Next Bill (Required)
				• Adjustments should be swapped on the current or next bill. It is used only for unpaid bill.
				Parameter 2 - Match Type Entity Flag (Required)
				• Valid values for this parameter are **BILL**, **BSEG** and **SA**. This parameter defines the open item at which the match events are to be created. For bills which are not paid yet, new match events will be created based on the value of this parameter.
				• Based on the flag defined **Match Events** are created as follows,

Status	System Event	Algorithm	Algorithm Type	Description
				• If the **Match Type Flag** is **BILL**, then all FTs on a bill have the same Match Event. • If the **Match Type Flag** is **BSEG**, then each line item (bill segment or adjustment) on the bill will have a unique match event. • If the **Match Type Flag** is **SA**, then line items belonging to the same contract within a bill will have the same match event. **Parameter 3 - To Do Type** • To Do will be sent to the user if bill can't be reopen and auto pay has been stopped.

Status	System Event	Algorithm	Algorithm Type	Description
				Parameter 4 - Characteristic Type • Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process
Approval In Progress	Enter	C1-DSPTAPP	C1-DSPTAPP	This algorithm creates the following: • A To Do using the To Do type specified in the approval profile which is attached to the dispute request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not. • A log entry is added when a To Do is created using the To Do type.
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an **Exclude To Do Type Characteristic Type** indicating that it should not be automatically completed.
Approved	Enter	C1-DSPAPPRVD	C1-DSPAPPRVD	This algorithm is triggered when the approver clicks the **Approve** button. It checks whether the approval is required from users at the next level in the approval hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the dispute request is changed to **Approval In Progress** and the algorithm attached to the Approval In Progress

Status	System Event	Algorithm	Algorithm Type	Description
				status is invoked. If further approval is not required, the status of the dispute request is changed to **Creating Adjustment**.
Return to Submitter	Enter	C1-DSPTRESUB	C1-DSPTRESUB	This algorithm is invoked on **Re-Submit** button. It moves the status of **Dispute Request** into **Draft**. A **To Do** will be generated for the user as submitter whose **To Do Type** and **To Do Role** are fetched from **Dispute Request Type**.
Rejected	Enter	C1-DSPTREJT	C1-DSPTREJT	This algorithm is executed when on reject. **Parameter 1 - To Do Type** • To Do will be sent to the user if bill can't be reopen and auto pay has been stopped. **Parameter 2 - Characteristic Type** • Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process
Canceled	Enter	C1-DSPTREJT	C1-DSPTREJT	This algorithm is executed when on reject. **Parameter 1 - To Do Type** • To Do will be sent to the user if bill can't be reopen and auto pay has been stopped. **Parameter 2 - Characteristic Type** • Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process

Dispute Request Type

Oracle Revenue Management and Billing allows you to define:

- **Dispute Request Type** - It is used to create a dispute request. You can define multiple dispute request types in the system. A dispute request type helps the system to determine:
  - Whether the dispute request must be approved before creating dispute adjustments in the system
  - Approval profile using which the dispute request must be approved
  - Whether multi-level or single-level approval is required while creating dispute adjustments in the system
  - Adjustment type using which the dispute adjustment must be created when the total dispute amount is less than the minimum dispute amount
  - Default adjustment type using which dispute adjustments must be created

While defining a dispute request type where approval workflow is required, you need to select the **Approval Required** check box. If the **Approval Required** check box is selected, the dispute request (which is created using the dispute request type) is sent for approval before creating the dispute adjustments. However, if the **Approval Required** check box is not selected, the dispute adjustments are created immediately on submitting a dispute request. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. You can define a debit and credit hierarchy in the approval profile using the threshold amount.

The debit approval hierarchy and credit approval hierarchy is used for approving dispute request. Therefore, while defining an approval profile for dispute, you need to define credit and debit hierarchy and set the To Do Type to **C1-DISAP**.

You can define an approval hierarchy where users with different To Do role at each level can approve or reject the dispute request. For example, you can define an approval profile called A1 with two levels of approval. At the first level, a user with the `Manager` To Do role will approve or reject the dispute request, and at the second level, a user with the `Senior Manager` To Do role will approve or reject the dispute request. On submitting a dispute request where approval is required, a notification in the form of To Do is sent to all users with the To Do role defined at the first level in the hierarchy. Once the request is approved at the first level, a notification is sent to all users with the To Do role defined at the next level in the hierarchy. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the dispute request, the dispute adjustments are created. However, if an approver at any level in the hierarchy rejects the request, the dispute adjustments are not created.

The approval hierarchy is controlled by the threshold amount. For example, you define an approval profile called A1 with two levels of approval - First Level (Threshold Amount: 300, To Do Role: `Manager`) and Second Level (Threshold Amount: 500, To Do Role: `Senior Manager`). Now, if the total dispute amount is equal to 300 or less than 500, then the approval is required only from the first level in the hierarchy and not from the second level in the hierarchy. However, if the total dispute amount is equal to or greater than 500, then the approval is required from the first level and then from the second level in the hierarchy. But, if the total dispute amount is less than 300, then the approval is not required from any levels in the hierarchy. The system will automatically approve the dispute request and create the dispute adjustments.

The system supports both single-level and multi-level approval process while approving dispute request. If the **Hierarchical Approval** check box is selected while defining a dispute request type, the approval hierarchy defined in the approval profile is followed based on the threshold limit. However, if the **Hierarchical Approval** check box is not selected while defining a dispute request type, the approval is required only from the approval level where the total dispute amount falls within the threshold limit. Let us understand this with the help of some examples.

<table>
<tr><th>Dispute Request Type</th><th>Approval Profile</th><th>Approval Hierarchy</th><th>Hierarchical Approval</th></tr>
<tr><td>D1</td><td>Dispute Analyst</td><td><u>Credit Hierarchy</u><table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$500</td><td>Senior Analyst</td></tr><tr><td>$750</td><td>Manager</td></tr><tr><td>$1500</td><td>Senior Manager</td></tr></table></td><td>Yes</td></tr>
<tr><td>D2</td><td>Dispute Analyst</td><td><u>Credit Hierarchy</u><table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$500</td><td>Senior Analyst</td></tr><tr><td>$750</td><td>Manager</td></tr><tr><td>$1500</td><td>Senior Manager</td></tr></table></td><td>No</td></tr>
<tr><td>D3</td><td>Dispute Analyst</td><td><u>Debit Hierarchy</u><table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$100</td><td>Senior Analyst</td></tr><tr><td>$200</td><td>Manager</td></tr></table></td><td>Yes</td></tr>
</table>

<table>
<tr><th>Dispute Request Type</th><th>Approval Profile</th><th>Approval Hierarchy</th><th>Hierarchical Approval</th></tr>
<tr><td></td><td></td><td><table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$300</td><td>Senior Manager</td></tr></table></td><td></td></tr>
<tr><td>D4</td><td>Dispute Analyst</td><td><u>Debit Hierarchy</u><table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$100</td><td>Senior Analyst</td></tr><tr><td>$200</td><td>Manager</td></tr><tr><td>$300</td><td>Senior Manager</td></tr></table></td><td>No</td></tr>
</table>

The following table indicates how the system will behave in different dispute scenarios:

Dispute Request	Dispute Request Type	Total Refund Amount ($)	Comments
DR1	D1	200	This dispute request is automatically approved by the system because the total dispute amount is less than $500.
DR2	D1	750	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role This is because the total dispute amount is either equal to $750 or less than $1500 and hierarchical approval is required.
DR3	D1	2000	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role **3.** Users with the `Senior Manager` To Do role This is because the total dispute amount is greater than $1500 and hierarchical approval is required.
DR4	D2	200	This dispute request is automatically approved by the system because the total dispute amount is less than $500.
DR5	D2	750	The To Do is sent for approval to users with the `Manager` To Do role. This is because the total dispute amount is either equal to $750 or less than $1500 and hierarchical approval is not required.
DR6	D2	2000	The To Do is sent for approval to users with the `Senior Manager` To Do role. This is because the total dispute amount is greater than $1500 and hierarchical approval is not required.

Dispute Request	Dispute Request Type	Total Refund Amount ($)	Comments
DR7	D3	90	This dispute request is automatically approved by the system because the total dispute amount is less than $100.
DR8	D3	250	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role This is because the total dispute amount is either equal to $200 or less than $300 and hierarchical approval is required.
DR9	D3	500	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role **3.** Users with the `Senior Manager` To Do role This is because the total dispute amount is greater than $300 and hierarchical approval is required.
DR10	D4	90	This dispute request is automatically approved by the system because the total dispute amount is less than $100.
DR11	D4	250	The To Do is sent for approval to users with the `Manager` To Do role. This is because the total dispute amount is either equal to $200 or less than $300 and hierarchical approval is not required.
DR12	D4	500	The To Do is sent for approval to users with the `Senior Manager` To Do role. This is because the total dispute amount is greater than $300 and hierarchical approval is not required.

The **Dispute Request Type** screen allows you to define, edit, delete, and copy a dipsute request type. This screen consists of the following zones:

- Dispute Request Type List on page 2247
- Dispute Request Type on page 2248

Dispute Request Type List

The **Dispute Request Type List** zone lists dispute request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Dispute Request Type	Displays the dispute request type.
Description	Displays the description of the dispute request type.
Edit	On clicking the **Edit** (✎) icon, the **Dispute Request Type** screen appears where you can edit the details of the dispute request type.

Column Name	Column Description
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Dispute Request Type** screen appears where you can define a dispute request type using an existing dispute request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the dispute request type. **Note:** You can delete a dispute request type when you have not created a dispute request using the dispute request type.

On clicking the **Broadcast** (📡) icon corresponding to dispute request type, the **Dispute Request Type** zone appears with the details of the respective dispute request type.

Dispute Request Type

The **Dispute Request Type** zone displays the details of the dispute request type. This zone consists of the following sections:

- **Main** - This section provides basic information about the dispute request type. It contains the following fields:

Field Name	Field Description
Dispute Request Type	Displays the dispute request type.
Description	Displays the description of the dispute request type.
Dispute Request Business Object	Indicates the business object that will be used to create the dispute request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the dispute request type.
Status	Indicates the status of the dispute request type. The valid values are: • Active • Inactive
Default Adjustment Type	Indicates the adjustment type using which the dispute adjustment must be created. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.

Field Name	Field Description
Approval Required	Indicates whether approval is required while creating the dispute adjustments using the dispute request type.
Approval Profile	Indicates the approval profile which must be used to define approval hierarchy for the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected. It has a link. On clicking the link, the **Approval Profile** screen appears where you can view the details of the respective approval profile.
Hierarchical Approval	Indicates whether multi-level or single approval is required while creating the dispute adjustments using the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected.
Zero Threshold Amount Hierarchy	Indicates that based on the approval profile hierarchy, To Do Type from the hierarchy (credit/debit) will be picked up.
Submitter To Do Type	Indicates the To Do type for the submitter when the dispute request type is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected. It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates the To Do role for the submitter when the dispute request type is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.

- **Characteristics** - This section lists the characteristics of the dispute request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the dispute request type.

Button Name	Button Description
Delete	Used to delete the dispute request type. **Note:** You can delete a dispute request type when you have not created a dispute request using the dispute request type.
Duplicate	Used to create a new dispute request type using an existing dispute request type.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the dispute request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Dispute Request Type** zone does not appear in the **Dispute Request Type** screen. It appears when you click the **Broadcast** ( ) icon corresponding to the dispute request type in the **Dispute Request Type List** zone.

Defining a Dispute Request Type

Prerequisites

To define a dispute request type, you should have:

- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

Procedure

To define a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Dispute Request Type** sub-menu.

   The **Select Business Object** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type Business Object	Used to indicate the business object that you want to use to create the dispute request type.	Yes

Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Dispute Request Type** screen.

Note: The **Select Business Object** screen appears when there are multiple dispute request type business objects defined in the application. If there is only one dispute request type business object defined in the application, the **Dispute Request Type** screen appears.

4. Select the required dispute request type business object from the respective field.
5. Click **OK**.

The **Dispute Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the dispute request type.
- **Characteristics** - Used to define the characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Used to specify the dispute request type.	Yes
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No
Status	Used to indicate the status of the dispute request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a dispute request type to **Inactive** if there are dispute requests which are created using the dispute request type and are currently in the **Draft** or **Approval In Progress** status.	Yes
Default Adjustment Type	Used to indicate the adjustment type using which the dispute adjustment must be created. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search**	Yes

Field Name	Field Description	Mandatory (Yes or No)
	icon, the **Adjustment Type Search** window appears.	
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected.	No
Zero Threshold Amount Hierarchy	Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy will be selected. The valid values are: • Credit • Debit	No
Submitter To Do Type	Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.

Note:

When the threshold amount is equal to zero for the request then based on the value in **Zero Threshold Amount Hierarchy**, the to do type will be picked from the **Approval Profile** hierarchy to send notification.

Only when the **Approval Required** checkbox is selected, you will be able to select **Hierarchical Approval** and **Approval Profile** to be used. If hierarchical approval is not selected, the request has to be approved by a single approver (highest level approver determined by the dispute amount and approval profile.

6. Enter the required details depending on whether you want to define dispute request type.
7. Define characteristics for the dispute request type, if required.
8. Click **Save**.
   The dispute request type is defined.

Defining a Characteristic for a Dispute Request Type

Prerequisites

To define a characteristic for a dispute request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Dispute Request Type**)

Procedure

To define a characteristic for a dispute request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a dispute *r*equest type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Dispute Request Type**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dispute request type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dipsute request type.

Field Name	Field Description	Mandatory (Yes or No)
	corresponding to the **Characteristic Value** field.	

2. Enter the required details.

Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the dispute request type, click the **Add** (+) icon and *t*hen repeat step 2.

Note: However, if you want to remove a characteristic from the dispute request type, click the **Delete** (🗑) icon corresponding to the characteristic.

Editing a Dispute Request Type

Prerequisites

To edit a dispute request type, you should have:

- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

Procedure

To edit a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Dipsute Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Dipsute Request Type** sub-menu.
   The **Dispute Request Type** screen appears.
4. In the **Dispute Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the *d*ispute request type whose details you want to edit.

   The **Dispute Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the dispute request type.
   - **Characteristics** - Used to define the characteristics for the dispute request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Displays the dispute request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No
Status	Used to indicate the status of the dispute request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a dispute request type to **Inactive** if there are dispute requests which are created using the dispute request type and are currently in the **Draft** or **Approval In Progress** status.	Yes
Default Adjustment Type	Used to indicate the adjustment type using which the dispute adjustment is created. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	Yes
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected.	No

Field Name	Field Description	Mandatory (Yes or No)
Zero Threshold Amount Hierarchy	Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy is selected. The valid values are: • Credit • Debit	No
Submitter To Do Type	Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.

Tip: Alternatively, you can click the **Edit** button in the **Dispute Request Type** zone to edit the details of the dispute request type.

5. Modify the details, if required.
6. Define, edit, or remove characteristics of the dispute request type, if required.
7. Click **Save**.
   The changes made to the dispute request type are saved.

Copying a Dispute Request Type

Instead of creating a dispute request type from scratch, you can create a new dispute request type using an existing dispute request type. This is possible through copying a dispute request type. On copying a dispute request type, the details including the characteristics are copied to the new dispute request type. You can then edit the details, if required.

Prerequisites

To copy a dispute request type, you should have:

- Dispute request type (whose copy you want to create) defined in the application
- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

Procedure

To copy a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Dispute Request Type** sub-menu.
   The **Dispute Request Type** screen appears.
4. In the **Dispute Request Type List** zone, click the **Duplicate** () icon in the **Duplicate** column *c*orresponding to the dispute request type whose copy you want to create.

   The **Dispute Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the dispute request type.
- **Characteristics** - Used to define the characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Used to specify the dispute request type.	Yes
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No
Status	Used to indicate the status of the dispute request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a dispute request type to **Inactive** if there are dispute requests which are created using the dispute request type and are currently in the **Draft** or **Approval In Progress** status.	Yes
Default Adjustment Type	Used to indicate the adjustment type using which the dispute adjustment must be created. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	Yes
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.

Field Name	Field Description	Mandatory (Yes or No)
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type. **Note:** This field appears when the **Approval Required** check box is selected.	No
Zero Threshold Amount Hierarchy	Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy will be selected. The valid values are: • Credit • Debit	No
Submitter To Do Type	Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver. **Note:** This field appears when the **Approval Required** check box is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** check box is selected.

Tip: Alternatively, you can click the **Duplicate** button in the **Dispute Request Type** zone to create a copy of the dispute request type.

5. Enter the required details.
6. Define, edit, or remove characteristics of the dispute request type, if required.
7. Click **Save**.
   The new dispute request type is defined.

Dispute Request (Used for Searching)

The **Dispute Request** screen allows you to search for a dispute request using various search criteria. It also allows you to create a dispute request. Through this screen, you can navigate to the following screen:

- Dispute Request (Used for Viewing) on page 2268

This screen consists of the following zone:

- Search Dispute Request on page 2260

Search Dispute Request

The **Search Dispute Request** zone allows you to search for dispute requests using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a dispute request using request, person, account or bill details. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• **Request Details** - Used when you want to search for dispute requests. • **Person, Account, or Bill Details** - Used when you want to search for person, account, or bill requests. **Note:** By default, the **Request Details** option is selected.	
Dispute Request Type	Used to search dispute requests which are created using a particular dispute request type. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Status	Used to search dispute requests with a particular status. The valid values are: • Approval In Progress • Cancelled • Draft • Processed • Rejected **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
User ID	Used to search dispute requests which are created by a particular user. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Created From	Used to search dispute requests which are created from a particular date onwards. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
To	Used to search dispute requests which are created till a particular date. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Dispute Request ID	Used to search a particular dispute request. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Account ID	Used to search dispute requests which are created for a particular account.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the field. On clicking the **Search** icon, the **Account Search** window appears.	
Dispute Reason	Used to search dispute requests which are created using a particular dispute reason for the bill. **Note:** This field appears only when you select the **Request Details** option from the **Search By** list.	No
Person ID	Used to search dispute requests which are created for a particular person. **Note:** This field appears when you select the **Person, Account, or Bill Details** option from the **Search By** list. The **Search** (🔍) icon appears corresponding to the field. On clicking the **Search** icon, the **Person Search** window appears.	No
Bill ID	Used to search dispute requests which includes bill segments or adjustments of a particular bill. **Note:** This field appears only when you select the **Person, Account, or Bill Details** option from the **Search By** list. The **Search** (🔍) icon appears corresponding to the field. On clicking the **Search** icon, the **Bill Search** window appears.	No
Alternate Bill ID	Used to search dispute requests which are created for a particular bill using the alternate bill ID. **Note:** This field appears when you select the **Person, Account, or Bill Details** option from the **Search By** list.	No
Bill Date From	Used to search dispute requests which includes bill segments or adjustments of bills which are created from a particular date onwards. **Note:** This field appears when you select the **Person, Account, or Bill Details** option from the **Search By** list.	No
To	Used to search dispute requests which includes bill segments or adjustments of bills which are created till a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Person, Account, or Bill Details** option from the **Search By** list.	

Note: You must specify at least one search criterion while searching for a dispute request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Create Date Time	Displays the date and time when the dispute request is created.
Dispute Request Information	Displays information about the dispute request. **Note:** It has a link. On clicking the link, the **Dispute Request** screen appears depending on whether the request is for dispute.
Status	Indicates the status of the dispute request.
Account Information	Displays additional information about the account for which the dispute request is created. **Note:** It has a link. On clicking the link, the **Account** screen appears with the details of the respective account.
Created By	Indicates the user who has created the dispute request.

Searching for a Dispute Request

Prerequisites

To search for a dispute request, you should have:

- Dispute request types defined in the application

Procedure

To search for a dispute request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Dispute Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Dispute Request** sub-menu.
   The **Dispute Request** screen appears.
4. Enter the search criteria in the **Search Dispute Request** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of dispute requests that meet the search criteria appears in the **Search Results** section.

Viewing the Dispute Request Details

Procedure

To view the details of a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to view.

   The **Dispute Request** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the dispute request. It contains the following zones:
     - **Dispute Request** - Displays the details of the dispute request.
     - **Dispute Details** - Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
     - **Dispute Adjustments** - Displays the adjustment details of dispute request.

       Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.
     - **Previous Dispute Requests** - Displays the details of the bill which must be disputed.

       Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.
   - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute.
   - **Log** - Lists the complete trail of actions performed on the dispute request.
3. View the details of the dispute request in the **Dispute Request** zone.
4. View the entities such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed in the **Dispute Details** zone.
5. View the adjustment details of dispute request in the **Dispute Adjustments** zone.
6. View the details of the bill which must be disputed in the **Previous Dispute Requests** zone.

Creating a Dispute Request

Prerequisites

To create a dispute request, you should have:

- Dispute request types defined in the application

Procedure

To create a dispute request:

1. Do either of the following:

If you want to	Then
Define a dispute request from the Account Receivable Central screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Account Receivable Central**. The **Account Receivable Central** screen appears. **c.** Search for the bill in the **Account Receivable Central** screen. **d.** In the **Search Results** section, select the required bill and then click **Dispute**. **Note:** Only one bill at a time is allowed to select for **Dispute Request** from the **Account Receivable Central** screen.
Define a dispute request from the Dispute Request screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Dispute Request**. A sub-menu appears. **c.** Click the **Add** option from the **Dispute Request** sub-menu.

The **Select Dispute Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Used to indicate the request type using which you want to create the dispute request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search dispute requests which are created for a particular account. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** window appears.	Yes
Dispute Reason	Used to indicate the dispute requests which are created using a particular dispute reason for the bill.	Yes

Tip: Alternatively, you can access the **Select Dispute Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Dispute Request** screen.

2. Select the required dispute request type from the respective field.
3. Click **Save**.

   The dispute request is defined and the status of the dispute request is set to **Draft**. The **Dispute Request** screen appears where you can view the details of the dispute request. It contains the following tabs:

   Note: The dispute request can be created only for bill with zero outstanding amount.

   - **Main** - Displays information about the dispute request. It contains the following zones:
     - **Dispute Request** - Displays the details of the dispute request.
     - **Dispute Details** - Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
     - **Dispute Adjustments** - Displays the adjustment details of dispute request.

       Note: This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.
     - **Previous Dispute Requests** - Displays the details of the bill which must be disputed.

       Note: This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.
   - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute.
   - **Log** - Lists the complete trail of actions performed on the dispute request.
4. Add auto payment events, or credit bill line items that you want to dispute.
5. Edit the dispute amount of each entity, if required.
6. Define characteristics for the dispute request, if required.

Defining a Characteristic for a Dispute Request

Prerequisites

To define a characteristic for a dispute request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Dispute Request**)

Procedure

To define a characteristic for a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to edit.
   The **Dispute Request** screen appears.
3. Click the **Edit** button in the **Dispute Request** zone.
   The **Dispute Request** screen appears.

   Note: The **Edit** button appears when the dispute request is in the **Draft** status.
4. Ensure that the **Characteristics** section is expanded when you are editing the dispute request.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the dispute request.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dispute request.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Dispute Request**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dispute request.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dispute request.

5. Enter the required details in the **Characteristics** section.

   Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.
6. If you want to define more than one characteristic for the dispute request, click the **Add** (+) icon and then repeat step 5.

   Note: However, if you want to remove a characteristic from the dispute request, click the **Delete** (🗑) icon corresponding to the characteristic.

Dispute Request (Used for Viewing)

Once you create a dispute request, the **Dispute Request** screen allows you to:

- Edit and delete a dispute request
- View the details of a dispute request
- Submit a dispute request for approval
- Approve or reject a dispute request
- View the log of a dispute request
- Add a log entry for a dispute request

This screen consists of the following tabs:

- Dispute Request - Main on page 2268
- Dispute Request - Bills on page 2272
- Dispute Request - Log on page 2275

Dispute Request - Main

The **Main** tab displays information about the dispute request. It contains the following zones:

- Dispute Request on page 2268
- Dispute Details on page 2270
- Dispute Adjustments on page 2271

  Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.
- Previous Dispute Requests on page 2272

  Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

Dispute Request

The **Dispute Request** zone displays the details of the dispute request. This zone contains the following sections:

- **Main** - This section provides basic information about the dispute request. It contains the following fields:

Field Name	Field Description
Dispute Request Information	Displays information about the dispute request.
Dispute Request Type	Indicates the dispute request type using which the dispute request is created. **Note:** It has a link. On clicking the link, the **Dispute Request Type** screen appears where you can view the details of the dispute request type.

Field Name	Field Description
Status	Indicates the status of the refund request. The valid values are: • Draft • Approval In Progress • Cancelled • Rejected • Processed
Dispute Reason	Indicates the reason why the dispute request is rejected.
Account Information	Indicates the account for which the dispute request is created. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Comments	Displays additional information about the dispute request.

- **Characteristics** - Lists the characteristics defined for the dispute request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the dispute request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the dispute request. **Note:** The **Edit** button appears when the dispute request is in the **Draft** status.
Delete	Used to delete the dispute request. **Note:** The **Delete** button appears when the dispute request is in the **Draft** status.
Submit	Used to submit the dispute request for approval. **Note:** The **Submit** button appears when the dispute request is in the **Draft** status.
Cancel	Used to cancel the dispute request resubmitted for approval. **Note:** The **Cancel** button appears when the dispute request is in the **Draft** status.
Approve	Used to approve the dispute request. **Note:** The **Approve** button appears when: • The dispute request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the dispute request.
Reject	Used to reject the dispute request.

Button Name	Button Description
	Note: The **Reject** button appears when: • The dispute request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the dispute request.
Re Submit	Used to resubmit the dispute request to the submitter. **Note:** The **Re-Submit** button appears when the dispute request is in the **Approval In Progress** status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the dispute request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the dispute request status is updated
Create Date/Time	Displays the date and time when the dispute request is created.

Dispute Details

The **Dispute Details** zone lists the credit/debit bill line items (such as bill segments and adjustments) that you have added to the dispute request. This zone contains the following columns:

Column Name	Column Description
Entity Type	Indicates whether the entity is a bill, bill segment, or an adjustment.
Entity ID	Displays the entity ID.
Currency	Indicates the currency in which the entity was created.
Dispute Amount	Displays the entity amount.
Adjustment Type	Indicates the adjustment type using which the dispute adjustment must be created. **Note:** By default, the adjustment type specified in the dispute request type appears in this column. You can change the adjustment type, if required, by editing the dispute request. It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment.
Stop Auto Pay	Displays whether to stop auto payment or not. The valid values are: • Yes • No

Column Name	Column Description
Entity Information	Displays information about the entity. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the respective entity screen appears with the details of the respective entity.

Note:

On clicking the Broadcast ( ) icon corresponding to the entity type as **Bill**, the **Dispute Adjustments** and **Previous Dispute Requests** zones appears with the details of the respective bill.

The **Dispute Details** zone appears when the status is **Processed**.

Dispute Amount currency will be same as bill or invoice currency. It cannot be zero or null. It will be less than or equal to the original, outstanding bill amount, or bill line item amount if the bill line item contains multiple contract.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

Dispute Adjustments

The **Dispute Adjustments** zone lists the adjustment details of dispute request. This zone contains the following columns:

Column Name	Column Description
Adjustment Information	Displays information about the adjustments in dispute request. **Note:** It has a link. On clicking the link, the respective **Adjustment** screen appears with the details of adjustment for respective entity.
Adjustment Amount	Displays the adjustment amount.

Note:

On clicking the Broadcast ( ) icon corresponding to the entity type as **Bill**, the **Dispute Adjustments** zone appears with the details of the respective bill.

The **Dispute Adjustments** zone appears when the status is **Processed**.

Dispute **Adjustment Amount** cannot be zero or null, it should be delta amount.

Dispute Request - Bills

The **Bills** tab allows you to search bills with credit/debit line items, such as credit/debit bill segments and adjustments, that you want to dispute. It contains the following zones:

- Search Bills on page 2273
- Bill Line Items on page 2274

Search Bills

The **Search Bills** zone lists completed bills of the account which are either with credit/debit balance or have one or more credit/debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a bill using the bill details. The valid values are: • Bill Details • Bill and Price Item Details **Note:** By default, the **Bill Details** option is selected.	Yes
Bill ID	Used to search a particular bill. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Bill Search** window appears.	No
Price Item	Used to search bills which are created for a particular price item. **Note:** This field appears when you select **Bill and Price Item Details** option from the **Search By** list. You can search for a price item by clicking the **Search** (🔍) icon corresponding to the field. On clicking the **Search** icon, the **Price Item Search** window appears.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears with the details of the respective bill.
Bill Amount	Displays the total bill amount.

If you want to dispute a bill with credit/debit balance and all credit/debit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All credit/debit bill

segments and adjustments of the bill are added in the **Dispute Details** zone on the **Main** tab. However, if you select a bill (with credit/debit balance) which contains one or more credit/debit line items or if you select a bill (with credit/debit balance) which contains one or more credit/debit line items, the system will not allow you to add the credit/debit line items by directly adding the bill. In such case, you need to individually select the credit/debit bill segments and adjustments of the bill and then add them to the dispute request.

Note:

If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

Multiple bill of same account can be added to the dispute request. Multiple bill line items of any bill can also be added to the dispute request.

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application. **Note:** It has a link. If the entity is a bill segment then on clicking the link, the **Bill Segment** screen appears with the details of the respective bill segment. However, if the entity is an adjustment then on clicking the link, the **Adjustment** screen appears where you can view the details of the respective adjustment.
Entity Amount	Displays the bill segment or adjustment amount.
Currency	Displays the currency in which the amount is billed.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.

You can select one or more credit/debit bill segments or adjustments and click the **Add** button in this zone to add selected credit/debit bill segments or adjustments to the dispute request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** ( ) icon corresponding to the bill in the **Search Bills** zone.

Editing a Dispute Request

Prerequisites

To edit a dispute request, you should have:

- Adjustment types with A/P request type defined in the application

Procedure

To edit a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to edit.
   The **Dispute Request** screen appears.
3. Click the **Edit** button in the **Dispute Request** zone.

The **Dispute Request** screen appears. It contains the following section:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Displays information about the dispute request.	Not applicable
Dispute Reason	Used to indicate the dispute requests which are created using a particular dispute reason for the bill.	Yes
Account Information	Indicates the account for which the dispute request is created.	Not applicable
Comments	Used to specify additional information about the dispute request.	No

In addition, this screen contains the following two sections:

- **Characteristics** - Used to define the characteristics for the dispute request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the dispute request.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dispute request.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Dispute Request**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dispute request.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the dispute request.

4. Modify the details of the dispute request, if required.

   Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Define, edit, or remove characteristics of the dispute request, if required.
6. Click **Save**.
   The changes made to the dispute request are saved.

Submitting a Dispute Request

Prerequisites

To submit a dispute request, you should have:

- Credit/debit bill line items added in the dispute request

Procedure

To submit a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request that you want to submit.
   The **Dispute Request** screen appears.
3. Click the **Submit** button in the **Dispute Request** zone.

   The system behaves in the following manner:

If...	Then
The **Approval Required** and **Hierarchical Approval** check boxes are selected in the dispute request type using which the dispute request is created	A To Do of the **C1-DSPSB** To Do type is created and sent to the approver at the first level in the approval hierarchy, and the status of the dispute request is changed to **Approval In Progress**.
The **Approval Required** check box is selected, but the **Hierarchical Approval** check box is not selected in the dispute request type using which the dispute request is created	A To Do of the **C1-DSPSB** To Do type is created and sent to the approver at the hierarchy level where the total dispute amount falls within the threshold limit. In addition, the status of the dispute request is changed to **Approval In Progress**.
The **Approval Required** check box is not selected in the dispute request type using which the dispute request is created	The dispute adjustments are created using the specified adjustment types and the status of the dispute request is changed to **Processed**.

Note:

The **Submit** button appears when the dispute request is in the **Draft** status.

Dispute request with atleast one bill or bill line item has to be added for submission.

Approving a Dispute Request

You can view the number of dispute requests which are pending for approval in the **Dispute Request** screen. The approver can review, and accordingly approve or reject the dispute request based on the observations.

Note: The system will not allow you to approve or reject a dispute request submitted by you.

Procedure

To approve a dispute request:

1. Do either of the following:

If you want to	Then
Approve a dispute request through the Dispute Request screen	**a.** Search for the dispute request in the **Dispute Request** screen. **b.** In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request which you want to review.
Approve a dispute request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears.

If you want to	Then
	b. From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1_DISAP** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the dispute request that you want to review.

The **Dispute Request** screen appears.

2. Review the dispute request details.
3. Click the **Approve** button in the **Dispute Request** zone.

The system behaves in the following manner:

If...	Then
The **Hierarchical Approval** check box is not selected in the dispute request type using which the dispute request is created	The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to **Processed**.

Note: The **Approve** button appears when:

- The dispute request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the dispute request.

Rejecting a Dispute Request

Prerequisites

To reject a dispute request, you should have:

- Rejection reasons defined in the application

Note:

While rejecting a dispute request, you need to specify the reason why you want to reject the dispute request. You can select the appropriate rejection reason when you have defined the reasons for the **Rejected** status of the **C1-DisputeRequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a dispute request submitted by you.

Procedure

To reject a dispute request:

1. Do either of the following:

If you want to	Then
Reject a dispute request through the Dispute Request screen	**a.** Search for the dispute request in the **Dispute Request** screen. **b.** In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request which you want to review.
Reject a dispute request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-DISAP** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the dispute request that you want to review.

   The **Dispute Request** screen appears.
2. Review the dispute request details.
3. Click the **Reject** button in the **Dispute Request** zone.

   The **Reject Dispute Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the dispute request.	Yes
Comments	Used to specify additional information while rejecting the dispute request.	No

   Note: The **Reject** button appears when:
   - The dispute request is in the **Approval In Progress** status.
   - A user with the approval To Do role is reviewing the dispute request.
4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.
   The status of the dispute request is changed to **Rejected**.

Resubmitting a Dispute Request

Prerequisites

To resubmit a dispute request, you should have:

- Entities added in the dispute request which is submitted for approval.

Procedure

To resubmit a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request that you want to resubmit.
   The **Dispute Request** screen appears.
3. Click the **Re Submit** button in the **Dispute Request** zone.

   The **Resubmit Dispute Request** screen appears.

   Note: The **Resubmit** button appears when the dispute request is in the **Approval In Progress** status.

   A To Do of the **C1-DSPSB** To Do type is created and sent to the request submitter using the submitter TO DO Role and the status of the dispute request is changed to **Draft**.
4. Enter the comments in the respective field and click **Save**.

Note: While resubmitting, To Do will be sent to the submitter of the request using the submitter To Do Role mapped on the dispute request type and the request will be moved to Draft status. The submitter can do necessary changes and re-submit the request. Log will be maintained when the approver sends the request back to submitter.

Editing the Dispute Details

Prerequisites

To edit the dispute details, you should have:

- Adjustment types with A/P request type defined in the application

Procedure

To edit the dispute details:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose bill line item details you want to edit.
   The **Dispute Request** screen appears.
3. Select the bill whose details you want to edit in the **Dispute Details** zone and click the **Edit** button available in the upper left corner of this zone.
   The **Edit Dispute Details** screen appears.

   Note: A bill line item from the dispute request can be edited when the dispute request is in the **Draft** status.

   The **Edit Dispute Details** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request ID	Displays the dispute request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable

   In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are • Adjustments • Bill • Bill Segment
Entity ID	Displays the entity ID.
Entity Information	Displays the entity information.
Dispute Amount	Indicates the amount that must be disputed.
Currency	Displays the currency in which the entity was created.
Adjustment Type	Displays the adjustment type using which the dispute adjustment must be created.
Stop Auto Pay	Displays whether auto pay needs to be stopped for the entity of the dispute request.

4. Modify the details of the bill line items.
5. Click **Save**.
   The changes made to the dispute bill line items are saved.

Deleting a Bill from the Dispute Request

Procedure

To delete a bill from the dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to *t*he dispute request whose bill you want to delete.
   The **Dispute Request** screen appears.
3. In the **Dispute Details** zone, select the bills and click the **Delete** button available in the upper left corner of *t*his zone.
   A message appears confirming whether you want to delete the bill from the dispute request.

   Note: You can delete bill from the dispute request when the request is in the **Draft** status.
4. Click **OK**.
   The selected bill gets deleted from the dispute request.

Viewing the Bill Line Items

Procedure

To view the bill line items of a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to *t*he dispute request whose log you want to view.

   The **Dispute Request** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the dispute request. It contains the following zones:
     - **Dispute Request** - Displays the details of the dispute request.
     - **Dispute Details** - Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
     - **Dispute Adjustments** - Displays the adjustment details of dispute request.

       Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.
     - **Previous Dispute Requests** - Displays the details of the bill which must be disputed.

       Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.
   - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
     - **Search Bills** - Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.

       Note: Filter the bills, if required, in the **Search Bills** zone.
     - **Bill Line Items** - Lists the debit and credit bill segments and adjustments of the bill.

Note: This zone appears when you click the Broadcast (📡) icon corresponding to the entity type as **Bill** in the **Search Bills** zone.

This tab appears when the dispute request is in the **Draft** status.

- **Log** - Lists the complete trail of actions performed on the dispute request.

3. View the details of the bill line items in the **Bill Line Items** zone.

Adding a Bill to the Dispute Request

You can dispute the credit/debit bills to the account.

Prerequisites

To add a credit/debit bill to the dispute request, you should have:

- Completed bills for the account with one or more credit/debit line items

Procedure

To add a credit/debit bill to the dispute request:

1. Click the **Bills** tab in the **Dispute Request** screen.
   The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

   Note: If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone.
3. Do either of the following:

If...	Then...
A bill has all credit/debit line items and you want to add the credit/debit bill to the dispute request	a. In the **Search Bills** zone, select the bills that you want to dispute. b. Click the **Add** button available at the upper left corner of the **Search Bills** zone.
A bill has credit balance and one or more debit line items and you want to add the credit bill to the dispute request	a. In the **Search Bills** zone, select the bills that you want to dispute. b. Click the **Add** button available at the upper left corner of the **Search Bills** zone.

4. Click **Add**.
   A message appears indicating that the selected bills are added to the dispute request.

   Note: If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to

add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the dispute request.

5. Click **OK**.

   Note that all the credit/debit bill segments or adjustments of the bills are added in the **Dispute Details** zone on the **Main** tab.

   Note: Irrespective of whether you select a credit/debit bill, or credit/debit bill segments or adjustments, the credit/debit bill segments or adjustments are added in the **Dispute Details** zone. The credit/debit bill is not added to the **Dispute Details** zone.

Adding a Bill Line Item to the Dispute Request

You can dispute the credit/debit bill line items, such as bill segments and adjustments, to the account. While adding a credit/debit bill line item to the dispute request, you can either:

- Directly add all credit/debit line items of a bill to the dispute request by adding the bill which has all bill segments and adjustments in credit
- Individually add a credit bill segment or adjustment of a bill (with one or more credit/debit line items) to the dispute request

Prerequisites

To add a credit/debit bill line item to the dispute request, you should have:

- Completed bills for the account with one or more credit/debit line items

Procedure

To add a credit/debit bill line item to the dispute request:

1. Click the **Bills** tab in the **Dispute Request** screen.
   The **Bills** tab appears.
2. Filter the bills, if required, in the **Search Bills** zone.

   Note: If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.
3. Do either of the following:

If...	Then...
A bill has all credit line items and you want to add a particular credit bill line item to the dispute request	**a.** In the **Search Bills** zone, click the **Broadcast** icon corresponding to the bill whose line items you want to view. The **Bill Line Items** zone appears. **b.** Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.
A bill has credit balance and one or more debit line items	**a.** In the **Search Bills** zone, click the **Broadcast** icon corresponding to the bill whose line items you want to view. The **Bill Line Items** zone appears.

If...	Then...
	b. Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.
A bill has debit balance and one or more credit line items	**a.** In the **Search Bills** zone, click the **Broadcast** icon corresponding to the bill whose line items you want to view. The **Bill Line Items** zone appears. **b.** Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.

4. Click **Add**.
   A message appears indicating that the selected bill segments or adjustments are added to the dispute request.

   Note: If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the dispute request.
5. Click **OK**.

   Note that the credit bill segments or adjustments are added in the **Dispute Details** zone on the **Main** tab.

   Note:

   Irrespective of whether you select a credit/debit bill, or credit/debit bill segments or adjustments, the credit/debit bill segments or adjustments are added in the **Dispute Details** zone. The credit bill is not added to the **Dispute Details** zone.

   The system will not allow you to add a debit line item to the **Dispute Details** zone.

Viewing the Log of a Dispute Request

Procedure

To view the log of a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose log you want to view.

   The **Dispute Request** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the dispute request. It contains the following zones:
     - **Dispute Request** - Displays the details of the dispute request.
     - **Dispute Details** - Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
     - **Dispute Adjustments** - Displays the adjustment details of dispute request.

       Note: This zone appears when you click the Broadcast icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.
     - **Previous Dispute Requests** - Displays the details of the bill which must be disputed.

Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
  - **Search Bills** - Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** - Lists the debit and credit bill segments and adjustments of the bill.

  This tab appears when the dispute request is in the **Draft** status.
- **Log** - Lists the complete trail of actions performed on the dispute request.

3. Click the **Log** tab.
4. View the log of the dispute request in the **Dispute Request Log** zone.

Note: You can manually add a log entry for the dispute request by clicking the **Add Log Entry** link in the upper right corner of the **Dispute Request Log** zone.

Adding a Log Entry for a Dispute Request

Procedure

To add a log entry for a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose log you want to edit.

   The **Dispute Request** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the dispute request. It contains the following zones:
     - **Dispute Request** - Displays the details of the dispute request.
     - **Dispute Details** - Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
     - **Dispute Adjustments** - Displays the adjustment details of dispute request.

       Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and when the status is **Processed**.
     - **Previous Dispute Requests** - Displays the details of the bill which must be disputed.

       Note: This zone appears when you click the Broadcast (ᯤ) icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.
   - **Bills** - Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
     - **Search Bills** - Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.

- **Bill Line Items** - Lists the debit and credit bill segments and adjustments of the bill.

  This tab appears when the dispute request is in the **Draft** status.
- **Log** - Lists the complete trail of actions performed on the dispute request.

3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Dispute Request Log** zone.

   The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the dispute request.	Not applicable
Log Details	Used to specify additional comments for the dispute request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Dispute Request Log** zone.

Earnings Credit Rate

Topics:

- Prerequisites
- Financial Transaction Distribution Object Status Transition
- Algorithms Used in C1-FTDIST
- Earnings Credit Rate Eligibility
- Financial Transaction Distribution Type
- Financial Transaction Distribution Rule
- Expiration Cycle Extendable Lookup
- Extendable Lookup (Expiration Cycle)
- Distribution Hierarchy Extendable Lookup
- Extendable Lookup (Distribution Hierarchy)
- Financial Transaction Distribution Object Extendable Lookup
- Extendable Lookup (Financial Transaction Distribution Object)
- Financial Transaction Distribution (Used for Searching)
- Financial Transaction Distribution (Used for Viewing)

Oracle Revenue Management and Billing enables you to generate the earnings credit rate (ECR) when the account is eligible for earnings credit rate and is associated with a contract of a contract type where the **Financial Transaction Distribution Object** characteristic is defined. In other words, the system enables you to create the financial transaction distribution (ECR) object when the adjustment and/or bill segment financial transaction created against an ECR contract is frozen. The status of the financial transaction distribution object is set to **Pending**.

To enable the Earnings Credit Rate (ECR) feature, you need to setup the following:

- **Financial Transaction Distribution Type** - A financial transaction distribution type is an object which controls the distribution of a credit and debit bill segment or adjustment financial transaction. It is associated to a contract type through a financial transaction distribution object. It helps the system to determine:
  - Whether it is defined for adjustment or bill segment financial transactions whose credit or debit amount should be distributed.
  - The type of adjustment (such as transfer adjustment) should be created when the credit or debit amount on the financial transaction distribution object is distributed.
  - The financial transaction distribution rule using which the credit or debit amount on the financial transaction distribution object should be distributed.
  - Whether the credit or debit amount on the financial transaction distribution object should be used to offset an adjustment or bill segment of the same account (where ECR is earned), another account of the customer (for whom ECR is earned), or the account identified as per the distribution hierarchy.
  - Whether the credit or debit amount on the financial transaction distribution object should be written off when it is equal to or less than the write off threshold amount.
  - The type of adjustment that should be created when the credit or debit amount on the financial transaction distribution object is written off.
  - The type of adjustment that should be created when the credit or debit amount on the financial transaction distribution object is expired.
  - The type of adjustment that should be created when the excess credit amount on the financial transaction distribution object is refunded at the end of the year.
  - The business object using which the financial transaction distribution object should be created.

- **Financial Transaction Distribution Rule** - A financial transaction distribution rule is associated with one or more financial transaction distribution types. It helps the system to determine:
  - The method using which the credit or debit amount on the financial transaction distribution object should be distributed. If the distribution method is set to **Fee Based**, the system will distribute the credit or debit amount on the financial transaction distribution object to offset fees starting from the highest to lowest amount. If the distribution method is set to **Priority Based**, the system will distribute the credit or debit amount on the financial transaction distribution object to the accounts in the order of their account distribution priority. If the distribution method is set to **Weighted Average**, the system will distribute the credit or debit amount on the financial transaction distribution object to the accounts in the weighted average ratio.
  - The distribution hierarchy using which the accounts, to which the credit or debit amount on the financial transaction distribution object should be distributed, should be derived.
  - The priority in which the objects, such as adjustments of a particular adjustment type or bill segments created for a particular price item, should be offset using the credit or debit amount on the financial transaction distribution object.
  - The objects, such as adjustments of a particular adjustment type or bill segments created for a particular price item, should be excluded from offsetting.
  - Algorithms that should be used to select the accounts, interpret the order of distribution, and then distribute the credit or debit amount.
- **Expiration Cycle** - An expiration cycle is an extendable lookup reference object which indicates the frequency at which the financial transaction distribution object created for the account should be expired (i.e. after two months or 45 days from the date of creation). You can associate an expiration cycle with one or more accounts.
- **Distribution Hierarchy** - A distribution hierarchy is an extendable lookup reference object which indicates the list of hierarchies that should be considered while deriving accounts for offsetting the credit or debit amount on the financial transaction distribution object. The valid hierarchy lists are:
  - **IGA Member Accounts Same Division** - If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against other member accounts of an invoicing group in which the source account is also a member account.
  - **Person Relationship (Child) Same Division** - If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the child persons' accounts who are related to the parent person (i.e. source customer) using a particular relationship type and belongs to the same division.
  - **Person Relationship (Child) Other Division** - If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the child persons' accounts who are related to the parent person (i.e. source

customer) using a particular relationship type and belongs to a different division.

- **Person Relationship (Parent) Same Division** - If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the parent persons' accounts who are related to the child person (i.e. source customer) using a particular relationship type and belongs to the same division.
- **Person Relationship (Parent) Other Division** - If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the parent persons' accounts who are related to the child person (i.e. source customer) using a particular relationship type and belongs to a different division.

You can associate a distribution hierarchy with one or more financial transaction distribution rules.

- **Financial Transaction Distribution Object** - A financial transaction distribution type is associated to a contract type through a financial transaction distribution object. You can include multiple financial transaction distribution types in a financial transaction distribution object. You can associate a financial transaction distribution object to one or more contract types.
- **Earnings Credit Rate Eligibility** - You can define earnings credit rate eligibility for each account in the system. It helps the system to determine:
  - Whether the account is eligible for generating earnings credit rate (i.e. financial transaction distribution object).
  - Whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.
  - The priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.
  - The expiration cycle for the account.

The following two batches are introduced in this release:

- **Financial Transaction Distribution Monitor (C1-FTDPR)** - It is used to monitor or check whether there are any financial transaction distribution objects in the Pending status. If there is a financial transaction distribution object in the Pending status, the system validates the financial transaction distribution object and changes the status of the financial transaction distribution object to Validated. From the Validated status, the status of the financial transaction distribution object is changed to either of the following:
  - **Refund** (when there is excess credit amount on the financial transaction distribution object at the end of the year and the source account belongs to a particular customer class where is refund is allowed).
  - **Write Off** (when the credit or debit amount on the financial transaction distribution object is equal to or less than the write off threshold amount)

- **Expire** (when the credit or debit amount on the financial transaction distribution object is expired)

Accordingly, the refund, write off, and expire adjustments are created. However, if none of the above conditions are met, the status of the financial transaction distribution object remains as **Validated**.

- **FT Distribution Single Threaded Transition Batch (C1-FTDTS)** - It is used to monitor or check whether there are any financial transaction distribution objects in the Validated status. If there is a financial transaction distribution object in the Validated status, the system changes the status of the financial transaction distribution object to **Apply Rule** and executes the algorithm attached to the **Apply Rule** system event on the financial transaction distribution rule version which is effective on the batch business date. Once the credit or debit distribution array of accounts is created, the status of the financial transaction distribution object is changed to **Distributed** and then the algorithm attached to the Distribute system event on the financial transaction distribution rule version which is effective on the batch business date is executed. On the credit or debit amount distribution, two adjustments are created - one against the source contract and another against the bill segment or adjustment's contract to which the amount is distributed. Once the credit or debit amount on the financial transaction distribution object is fully distributed, the status of the financial transaction distribution object is changed to **Complete**. However, if the credit or debit amount on the financial transaction distribution object is not yet fully distributed, the status of the financial transaction distribution object is changed to **Validated**.

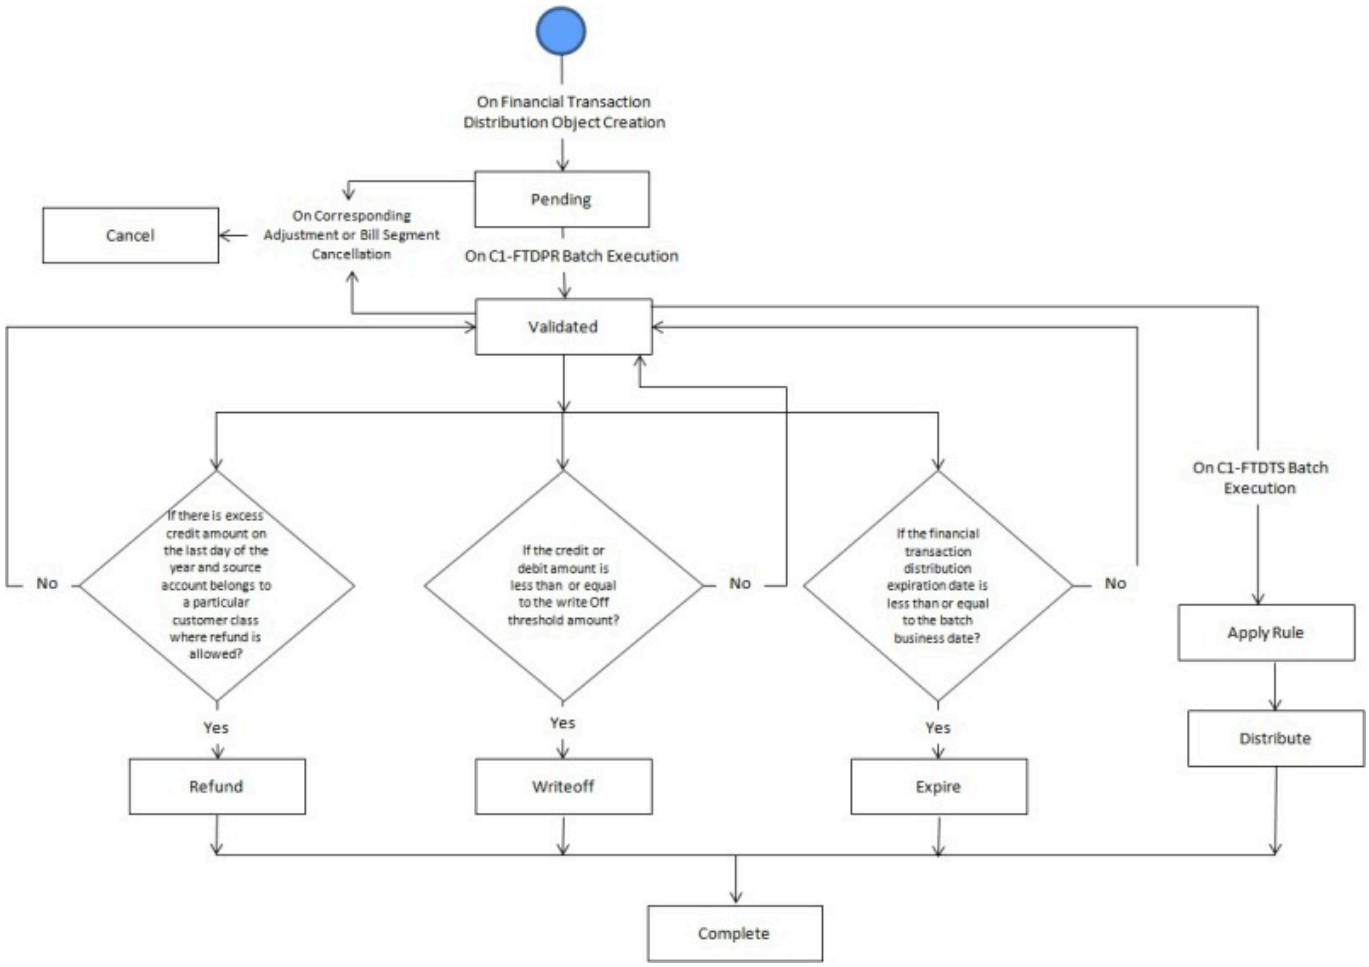
Prerequisites

To setup the earnings credit rate process, you need to do the following:

- Add the earnings credit rate to the eligible accounts.
- Define the required financial transaction distribution types in the system.
- Define the required financial transaction distribution rules in the system.
- Define the following extendable lookup reference objects in the system:
  - Expiration Cycle
  - Distribution Hierarchy
  - Financial transaction distribution object

Financial Transaction Distribution Object Status Transition

The following figure graphically indicates how an financial transaction distribution object is created in the system:



Note: For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

Algorithms Used in C1-FTDIST

The following table lists the algorithms which are attached to the **C1-FTDIST** business object:

<table>
<tr><th>System Event</th><th>Algorithm</th><th>Algorithm Type</th><th>Description</th></tr>
<tr><td>Information</td><td>C1-FTDISTINF</td><td>C1-FTDISTINF</td><td>This algorithm formats the FT Distribution that appears throughout the system. It concatenates the fields and separator specified as algorithm parameters. Possible fields are:
<table>
<tr><th>Field</th><th>Description</th></tr>
<tr><td>ACCT_ID</td><td>Account ID</td></tr>
<tr><td>ADJ_ID</td><td>Adjustment ID</td></tr>
<tr><td>BO_STATUS_CD</td><td>Status</td></tr>
<tr><td>BO_STATUS_REASON_CD</td><td>Status Reason</td></tr>
<tr><td>BSEG_ID</td><td>Bill Segement ID</td></tr>
<tr><td>BUS_OBJ_CD</td><td>Business Object</td></tr>
<tr><td>CRE_DTTM</td><td>Creation Date/ Time</td></tr>
<tr><td>EXPIRATION_DT</td><td>Expiration Date</td></tr>
<tr><td>FT_DISTRIBUTION_ID</td><td>FT Distribution</td></tr>
<tr><td>FT_DIST_TYPE_CD</td><td>FT Distribution Type</td></tr>
<tr><td>FT_ID</td><td>FT ID</td></tr>
<tr><td>ILM DT</td><td>ILM Date</td></tr>
<tr><td>SA_ID</td><td>SA ID</td></tr>
<tr><td>STATUS_UPD_DTTM</td><td>Status Update Date/Time</td></tr>
<tr><td>TOT_AMT</td><td>Payoff Amount</td></tr>
</table></td></tr>
<tr><td>Validation</td><td>C1-VALFTDIST</td><td>C1-VALFTDIST</td><td>This algorithm validates the Business Object - Financial Transaction Distribution, which includes:
Adjustment ID or Bill Segment ID must be supplied.</td></tr>
</table>

The following table lists the algorithms which are used in the lifecycle of the **C1-FTDIST** business object:

Status	System Event	Algorithm	Algorithm Type	Description
In Progress	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition

Status	System Event	Algorithm	Algorithm Type	Description
				Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Validate	Monitor	C1-FTDVALIDT	C1-FTDVALIDT	This algorithm transitions the FT Distribution record from validate to any of the following statuses based on certain conditions: • It transitions to **Expire** status (based on Parameter Expire Status Transition Condition) when the credit is not fully distributed and process date is before or on the same day as the Expiration Date defined in the record. • It transitions to **Write Off** status (based on Parameter Write Off Status Transition Condition) when the Total Amount is less than or equal to the Write Off Threshold defined in the FT Distribution Type linked to the record. It also uses Parameter Handle Negative or Positive for Write Off. If the Parameter is Negative and the Payoff Amount of the record is negative or the Parameter is Positive and the Payoff Amount of the record is positive, then proceed with Write Off. • It transitions to **Refund status** (based on Parameter Refund Status Transition Condition) when the Parameter Refund at End of Year is Y and the record's source account's customer class is equal to Parameter Applicable Customer Class for Refund. If none of the conditions are met, the record remains at Validate status. If none of the conditions are met, the record remains at **Validate** status.
Apply Rule	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the

Status	System Event	Algorithm	Algorithm Type	Description
				input Next Status or to the status related to the input Next Transition Condition. Either of the one soft parameters may be specified. If both the soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Apply Rule	Enter	C1-FTDAPRL	C1-FTDAPRL	This algorithm will call the pre-processing and apply rule algorithms that are configured in the effective rule version of the FT Distribution Rule of the Financial Transaction Distribution record's FT Distribution Type.
Distributed	Enter	C1-FTDDIST	C1-FTDDIST	This algorithm will trigger the distribute algorithms configured in the effective rule version of the FT Distribution Rule linked to the FT Distribution Type of the Financial Transaction Distribution record. After invoking the algorithms, the FT Distribution amount is compared to the sum of the distribution amounts with frozen transfer adjustments in the list. If the amounts are equal, the FT Distribution record is transitioned to **Complete** (based on the Parameter Complete Status Transition Condition). Otherwise, it is transitioned back to **Validate** (based on the Validate Status Transition Condition).
Expire	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Expire	Enter	C1-FTDEXP	C1-FTDEXP	This algorithm expires credit amount by creating an expiration adjustment

Status	System Event	Algorithm	Algorithm Type	Description
				defined in the FT Distribution Type. The Expiration Adjustment created will have a characteristic of type Parameter Financial Transaction Distribution Characteristic Type and value equal to the FT Distribution ID. The FT Distribution record will have a characteristic of type Write off Adjustment with value equal to the Expiration Adjustment ID.
Refund	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either of the one soft parameters may be specified. If both the soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Refund	Enter	C1-FTDREFUND	C1-FTDREFUND	This algorithm refunds the credit amount by creating a refund adjustment defined in the FT Distribution Type. The Refund Adjustment will be linked to the Refund Contract (with type equal to Parameter Refund Contract Type) attached to the source Account of the FT Distribution. The Refund Adjustment will be linked to the FT Distribution via a characteristic with type Parameter Financial Transaction Distribution Characteristic Type. Also, the FT Distribution record will have a characteristic of type Refund Adjustment with value equal to the Refund Adjustment ID.
Write Off	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined

Status	System Event	Algorithm	Algorithm Type	Description
				for any business object status as its monitor algorithm.
Write Off	Enter	C1-FTDWRTOFF	C1-FTDWRTOFF	This algorithm writes off the credit amount by creating a write off adjustment defined in the FT Distribution Type. The Write off Adjustment created will have a characteristic of type Parameter Financial Transaction Distribution Characteristic Type and value equal to the FT Distribution ID. The FT Distribution record will have a characteristic of type Write Off Adjustment with value equal to the Write Off Adjustment ID.
Cancel	Enter	C1-FTDCANCEL	C1-FTDCANCEL	This algorithm will cancel all the transfer adjustments listed in the Financial Transaction Distribution record's Distribution List. The cancel reason code will be copied or taken from the original Distribution Object's cancel reason. If it is not provided, it will use the parameter Default Cancel Reason.
Complete	Enter	C1-FTDCOMP	C1-FTDCOMP	This algorithm will trigger the post-processing algorithms configured in the effective rule version of the FT Distribution Rule linked to the FT Distribution Type of the Financial Transaction Distribution record.

Earnings Credit Rate Eligibility

This screen allows you to add earnings credit rate eligibility for each account in the system and helps you to determine the following:

- Whether the account is eligible for generating earnings credit rate (i.e. financial transaction distribution object).
- Whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.
- The priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.
- The expiration cycle for the account.

This screen contains the following zone:

- Earnings Credit Rate Eligibility on page 2299

Earnings Credit Rate Eligibility

The **Earnings Credit Rate Eligibility** zone allows you to add earnings credit rate eligibility for each account in the system.

This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Earnings Credit Rate ID	Displays the earnings credit rate ID.	Not applicable
Account ID	Used to search for a particular account. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** window appears.	Yes
Earnings Credit Rate Eligible	Used to define whether an earned credit rate can be calculated and created for the account or not.	No
Offset Eligibility	Used to define whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.	No
Offset Distribution Type	Used to search the financial transaction distribution type which would be used to offset the credit or debit amount from another account. If this field is left blank, then the financial transaction distribution type for the earning credit rate source account will be used. **Note:** This field is enabled when the **Offset Eligibility** check box is selected. This field is enabled when the **Offset Eligibility** check box is selected. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Financial Transaction Offset Distribution Type FK Search** window appears.	No
Account Distribution Priority	Used to indicate the priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.	No
Expiration Cycle	Used to indicate the expiration cycle for the account.	Yes

Defining Earnings Credit Rate Eligibility for an Account

Prerequisites

To define an earnings credit rate eligibility for an account, you should have:

- Accounts defined in the application.
- Expiration cycle defined in the application.
- Financial transaction distribution type defined in the application.

Procedure

To define earnings credit rate eligibility for an account:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Earnings Credit Rate Eligibility**.
   The **Earnings Credit Rate Eligibility** screen appears. It contains the following section:
   - **Main** - Used to add the basic details about the earnings credit rate eligibility for an account. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Earnings Credit Rate ID	Displays the earnings credit rate ID.	Not applicable
Account ID	Used to search for a particular account. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** window appears.	Yes
Earnings Credit Rate Eligible	Used to define whether an earned credit rate can be calculated and created for the account or not.	No
Offset Eligibility	Used to define whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.	No
Offset Distribution Type	Used to search the financial transaction distribution type which would be used to offset the credit or debit amount from another account. If this field is left blank, then the financial transaction distribution type for the earning credit rate source account will be used. **Note:** This field is enabled when the **Offset Eligibility** check box is selected. This field is enabled when the **Offset Eligibility** check box is selected. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Financial**	No

Field Name	Field Description	Mandatory (Yes or No)
	Transaction Offset Distribution Type FK Search window appears.	
Account Distribution Priority	Used to indicate the priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.	No
Expiration Cycle	Used to indicate the expiration cycle for the account.	Yes

3. Enter the required details.
4. Click **Save**.
   The earnings credit rate eligibility is defined for the account.

Financial Transaction Distribution Type

The **Financial Transaction Distribution Type** screen allows you to define, edit, copy, and delete a financial transaction distribution object type.

This screen contains the following zones:

- Financial Transaction Distribution Type List on page 2301
- Financial Transaction Distribution Type on page 2302

Financial Transaction Distribution Type List

The **Financial Transaction Distribution Type List** zone allows you to view the list of financial transaction distribution types that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
FT Distribution Type	Displays the financial transaction distribution type.
Description	Displays the description of the financial transaction distribution type. **Note:** It has a link. On clicking the link, the **Financial Transaction Distribution Type** zone appears with the details of the respective financial transaction distribution type.
Related Transaction BO	Displays the corresponding transaction business object. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears with the details of the respective business object.

Column Name	Column Description
FT Adjustment Type	Displays the adjustment type used in the financial transaction adjustment.
Distribution Object Type	Displays the financial transaction object type used in distributing the credit.
Edit	On clicking the **Edit** (✎) icon, the **FT Distribution Type** screen appears where you can edit the details of the financial transaction distribution type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **FT Distribution Type** screen appears where you can define a financial transaction distribution type using an existing financial transaction distribution type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the financial transaction distribution type.

On clicking the **Broadcast** (📡) icon corresponding to the financial transaction distribution type, the **Financial Transaction Distribution Type** zone appears with the details of the respective financial transaction distribution type.

You can filter the list using the **Financial Transaction Distribution Type**, **Description**, or **Financial Transaction Object Type** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Financial Transaction Distribution Type

The **Financial Transaction Distribution Type** zone displays the details of the financial transaction distribution types that are already defined in the system. This zone contains the following sections:

- **Main** - This section provides basic information about the financial transaction distribution type. It contains the following fields:

Field Name	Field Description
FT Distribution Type	Displays the financial transaction distribution type.
Description	Displays the description of the financial transaction distribution type.

Field Name	Field Description
FT Object Type	Indicates the business object that will be used to create the financial transaction distribution type. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
FT Adjustment Type	Displays the adjustment type used in the financial transaction adjustment.
Distribution Object Type	Displays the financial transaction object type used in distributing the credit.
Distribution Adjustment Type	Displays the adjustment type which is used for distribution if the **Transfer Adjustment** option is selected from the **Distribution Object Type** list. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.
FT Distribution Rule	Displays the financial transaction distribution rule to be used for distributing the credit or debit in an account. **Note:** It has a link. On clicking the link, the **Financial Transaction Distribution Rule** screen appears where you can view the details of the respective financial transaction distribution rule.
Write Off Threshold Amount	Displays the minimum credit amount for write off. Any amount specified in this field is assumed to be negative. For example, a value of "2" is treated as "-2". Such that if the credit is only "-2", then this will written off instead of distributing it to offset.
Write Off Adjustment Type	Displays the adjustment type used for write off. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.
Expiration Adjustment Type	Displays the adjustment type used for expiration. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.
Refund Adjustment Type	Displays the adjustment type used for refund. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.
Offset Indicator	Displays whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.
Related Transaction BO	Displays the object using which financial transaction object is created. In addition, this column has a context menu which helps in navigating to other screens in the application.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- **Characteristics** - This section lists the characteristics of the financial transaction distribution type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the financial transaction distribution type.
Delete	Used to delete the financial transaction distribution type.
Duplicate	Used to create a new financial transaction distribution type using an existing financial transaction distribution type.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Financial Transaction Distribution Type** zone does not appear in the **Financial Transaction Distribution Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the financial transaction distribution type in the **Financial Transaction Distribution Type List** zone.

Defining a Financial Transaction Distribution Type

Prerequisites

To define a financial transaction distribution type, you should have:

- Financial transaction distribution objects defined in the application.
- Adjustment types defined in the application.
- Financial transaction distribution rule defined in the application.
- Required characteristics defined in the application.

Procedure

To define a financial transaction distribution type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Financial Transaction Distribution Type** sub-menu.

   The **Financial Transaction Distribution Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details of the financial transaction distribution type.
   - **Characteristics** - Used to define the characteristics for the financial transaction distribution type.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to specify the financial transaction distribution type.	Yes
Description	Used to specify the description of the financial transaction distribution type.	Yes
FT Object Type	Used to indicate the business object that will be used to create the financial transaction distribution type. The valid values are: • Adjustment • Bill Segment	Yes
FT Adjustment Type	Used to indicate the adjustment type used in the financial transaction adjustment. **Note:** By default, this field is disabled. This field gets enabled when you select **Adjustment** option from the **FT Object Type** list.	Yes (Conditional) **Note:** This field is required when you are selecting the **Adjustment** option for the **FT Object Type** list.
Distribution Object Type	Used to indicate the financial transaction object type used in distribution.	Yes
Distribution Adjustment Type	Used to indicate the adjustment type which is used for distribution if the	No

Field Name	Field Description	Mandatory (Yes or No)
	Transfer Adjustment option is selected from the **Distribution Object Type** list.	
FT Distribution Rule	Used to indicate the financial transaction distribution rule to be used for distributing the credit or debit in an account. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Financial Transaction Offset Distribution Type FK Search** window appears.	No
Offset Indicator	Used to indicate whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.	No
Write Off Threshold Amount	Used to specify the minimum credit amount for write off.	Yes (Conditional) **Note:** This field is required when you do not check the **Offset Indicator** check box.
Write Off Adjustment Type	Used to indicate the adjustment type used for write off. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	Yes (Conditional) **Note:** This field is required when you do not check the **Offset Indicator** check box.
Expiration Adjustment Type	Used to indicate the adjustment type used for expiration. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	Yes (Conditional) **Note:** This field is required when you do not check the **Offset Indicator** check box.
Refund Adjustment Type	Used to indicate the adjustment type used for refund. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	Yes (Conditional) **Note:** This field is required when you do not check the **Offset Indicator** check box.

Field Name	Field Description	Mandatory (Yes or No)
Related Transaction BO	Used to indicate the object using which financial transaction object is created. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Financial Transaction Business Object Search** window appears.	Yes

Characteristics - This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the financial transaction distribution type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the financial transaction distribution type.

Tip: Alternatively, you can access the **Financial Transaction Distribution Type** screen by clicking the **Add** button in the **Page Title** area of the **Financial Transaction Distribution Type** screen.

4. Enter the required details.
5. Define characteristics for the financial transaction distribution type, if required.
6. Click **Save**.
   The financial transaction distribution type is defined.

Defining a Characteristic for a Financial Transaction Distribution Type

Procedure

To define a characteristic for a financial transaction distribution type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a financial *t*ransaction distribution type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the financial transaction distribution type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the financial transaction distribution type.

2. Enter the required details.

   Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the financial transaction distribution type, click the **Add** (+) icon and then *r*epeat step *2*.

   Note: However, if you want to remove a characteristic from the financial transaction distribution type, click the **Delete** (🗑) icon corresponding to the characteristic.

Copying a Financial Transaction Distribution Type

Instead of creating a financial transaction distribution type from scratch, you can create a new financial transaction distribution type using an existing financial transaction distribution type. This is possible through copying a financial transaction distribution type. On copying a financial transaction distribution type, the details including the characteristics are copied to the new financial transaction distribution type. You can then edit the details, if required.

Prerequisites

To copy a financial transaction distribution type, you should have:

- Financial transaction distribution type (whose copy you want to create) defined in the application
- Financial transaction distribution type business objects defined in the application

Procedure

To copy a financial transaction distribution type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Type** sub-menu.
   The **Financial Transaction Distribution Type** screen appears.
4. In the **Financial Transaction Distribution Type List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column corresponding to the financial transaction distribution type whose copy you want to create.

   The **Financial Transaction Distribution Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the financial transaction distribution type.
   - **Characteristics** - Used to define the characteristics for the financial transaction distribution type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to specify the financial transaction distribution type.	Yes
Description	Used to specify the description of the financial transaction distribution type.	Yes
FT Object Type	Used to indicate the business object that will be used to create the financial transaction distribution type. The valid values are: • Adjustment • Bill Segment	Yes
FT Adjustment Type	Used to indicate the adjustment type used in the financial transaction adjustment. **Note:** By default, this field is disabled. This field gets enabled when you select **Adjustment** option from the **FT Object Type** list.	Yes (Conditional) **Note:** This field is required when you are selecting the **Adjustment** option for the **FT Object Type** list.
Distribution Object Type	Used to indicate the financial transaction object type used in distribution.	Yes
Distribution Adjustment Type	Used to indicate the adjustment type which is used for distribution if the **Transfer Adjustment** option is selected from the **Distribution Object Type** list.	No
FT Distribution Rule	Used to indicate the financial transaction distribution rule to be used for distributing the credit or debit in an account. **Note:** The **Search** (🔍) icon appears corresponding	No

Field Name	Field Description	Mandatory (Yes or No)
	to this field. On clicking the **Search** icon, the **Financial Transaction Offset Distribution Type FK Search** window appears.	
Offset Indicator	Used to indicate whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.	No
Write Off Threshold Amount	Used to specify the minimum credit amount for write off.	Yes (Conditional) **Note:** This field is required when you do not check the **Offset Indicator** check box.

Financial Transaction Distribution Rule List

The **Financial Transaction Distribution Rule List** zone allows you to view the list of financial transaction distribution rules that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
FT Distribution Rule	Displays the financial transaction distribution rule.
Description	Displays the description of the financial transaction distribution rule.
Distribution Method	Indicates the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: • Fee Based • Priority Based • Weighted Average
Distribution Hierarchy	Indicates the hierarchy of accounts in which the distribution needs to be made.
Edit	On clicking the **Edit** (✎) icon, the **Financial Transaction Distribution Rule** screen appears where you can edit the details of the financial transaction distribution rule.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Financial Transaction Distribution Rule** screen appears where you can define a financial transaction distribution rule using an existing financial transaction distribution rule.

Column Name	Column Description
Delete	On clicking the **Delete** (🗑) icon, you can delete the financial transaction distribution rule.

On clicking the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule, the **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zones appear with the details of the respective financial transaction distribution rule and financial transaction distribution rule version.

You can filter the list using the **FT Distribution Rule**, **Description** , **Effective Date**, and **Distribution Method** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Financial Transaction Distribution Rule

The **Financial Transaction Distribution Rule** zone allows you to view the details of financial transaction distribution rule. This zone contains the following sections:

- **Main** - This section displays the details of the financial transaction distribution rule. It contains the following columns:

Column Name	Column Description
FT Distribution Rule	Displays the financial transaction distribution rule.
Description	Displays the description of the financial transaction distribution rule.
Detailed Description	Displays the additional information about the financial transaction distribution rule.
Distribution Method	Indicates the principle for distributing credit for the accounts other than the credit or debit source account. The valid values are: • Fee Based • Priority Based • Weighted Average
Distribution Hierarchy	Indicates the hierarchy of accounts in which the distribution needs to be made.

Column Name	Column Description
Edit	On clicking the **Edit** (✎) icon, the **Financial Transaction Distribution Rule** screen appears where you can edit the details of the financial transaction distribution rule.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Financial Transaction Distribution Rule** screen appears where you can define a financial transaction distribution rule using an existing financial transaction distribution rule.
Delete	On clicking the **Delete** (🗑) icon, you can delete the financial transaction distribution rule.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the financial transaction distribution rule
Delete	Used to delete the financial transaction distribution rule.
Duplicate	Used to create a new financial transaction distribution rule using an existing financial transaction distribution rule.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution rule is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Financial Transaction Distribution Rule** zone does not appear in the **Financial Transaction Distribution Rule** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule of the **Financial Transaction Distribution Rule List** zone.

Financial Transaction Distribution Rule Version

The **Financial Transaction Distribution Rule Version** zone allows you to view the details of the financial transaction distribution rule version. This zone contains the following sections:

- **Main** - This section displays the details of the financial transaction distribution rule version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.
Version Description	Displays the description of the financial transaction distribution rule version.
Detailed Description	Displays the additional information about the financial transaction distribution rule version.

- **Included Objects** - This section displays the list of object that are included for credit distribution. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence in which the objects should be included in the financial transaction distribution rule version.
Priority	Displays the sequence of objects for the credit or debit distribution within an account.
Object Type	Displays the type of object.
Value	Displays the value of the object type. **Note:** It has a link. On clicking the link, respective object type screen appears with the details of the respective object type. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.
Bill Status	Displays the status of the bill.

- **Excluded Objects** - This section displays the list of object that are excluded from credit distribution. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence in which the objects should be excluded from the financial transaction distribution rule version.
Object Type	Displays the type of object.
Value	Displays the value of the object type. **Note:** It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.

Column Name	Column Description
	The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Financial Transaction Business Object Search** window appears.

- **Algorithms** - This section displays the list of algorithms that are included. It contains the following columns:

Column Name	Column Description
System Event	Indicates the system event on which the algorithm must be executed.
Sequence	Displays the order in which the algorithms for each system event must be executed.
Algorithm	Displays the algorithm code. **Note:** It has a link. On clicking the link, **Algorithm** screen appears with the details of the respective algorithm.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the financial transaction distribution rule version.
Delete	Used to delete the financial transaction distribution rule version.
Duplicate	Used to create a new financial transaction distribution rule version using an existing financial transaction distribution rule version.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution rule version is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears with the details of the respective business object.

By default, the **Financial Transaction Distribution Rule Version** zone does not appear in the **Financial Transaction Distribution Rule** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to the financial transaction distribution rule version of the **Financial Transaction Distribution Rule Version List** zone.

Defining a Financial Transaction Distribution Rule

Prerequisites

To define a financial transaction distribution rule, you should have:

- Distribution method and hierarchy defined in the application.

Procedure

To define a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.
   A sub-menu appears.
3. Click the **Add** option from the **Financial Transaction Distribution Rule** sub-menu.

   The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the financial transaction distribution rule.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: • Fee Based • Priority Based • Weighted Average	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

   Tip: Alternatively, you can access the **Financial Transaction Distribution Rule** screen by clicking the **Add** button in the **Page Title** area of the **Financial Transaction Distribution Rule** screen.
4. Enter the required details.
5. Click **Save**.
   The financial transaction distribution rule is defined.

Editing a Financial Transaction Distribution Rule

Procedure

To edit a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.
   A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.
   The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the financial transaction distribution rule whose details you want to edit.
   The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the financial transaction distribution rule.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: • Fee Based • Priority Based • Weighted Average	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

   Tip: Alternatively, you can click the **Edit** button in the **Financial Transaction Distribution Rule** zone to edit the details of the financial transaction distribution rule.
5. Modify the details of the financial transaction distribution rule.
6. Click **Save**.

The changes made to the financial transaction distribution rule are saved.

Copying a Financial Transaction Distribution Rule

Instead of creating a financial transaction distribution rule from scratch, you can create a new financial transaction distribution rule using an existing financial transaction distribution rule. This is possible through copying a financial transaction distribution rule. On copying a financial transaction distribution rule, the details are copied to the new financial transaction distribution rule. You can then edit the details, if required.

Prerequisites

To copy a financial transaction distribution rule, you should have:

- Financial transaction distribution rule (whose copy you want to create) defined in the application

- Financial transaction distribution rule business objects defined in the application

Procedure

To copy a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.
   A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.
   The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** *c*olumn corresponding to the financial transaction distribution rule whose copy you want to create.

   The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the financial transaction distribution rule.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: • Fee Based • Priority Based • Weighted Average	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

   Tip: Alternatively, you can click the **Duplicate** button in the **Financial Transaction Distribution Rule** zone to create a copy of the financial transaction distribution rule.
5. Enter the required details.
6. Click **Save**.
   The new financial transaction distribution rule is defined.

Defining a Financial Transaction Distribution Rule Version

Prerequisites

To define a financial transaction distribution rule version, you should have:

- Financial transaction distribution rule defined in the application.
- Object types and algorithms defined in the application.

Procedure

To define a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.
   A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.
   The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (⦾) icon corresponding to *t*he financial transaction distribution rule whose details you want to edit.
   The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. Click the **Add** link in the upper right corner of the **Financial Transaction Distribution Rule Version List** *z*one.
   The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the financial transaction distribution rule version.
   - **Included Objects** - Used to include the objects in financial transaction distribution rule version.
   - **Excluded Objects** - Used to exclude the objects in financial transaction distribution rule version.
   - **Algorithms** - Used to define the algorithms that are added for financial transaction distribution rule version.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

The **Included Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type. **Note:** It has a link. On clicking the link, respective object type screen appears with the details of the respective object type. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	No
Bill Status	Used to indicate the status of the bill.	No

Note: If you include object, then all the fields are mandatory.

The **Excluded Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type. **Note:** It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.	No

Column Name	Column Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	

Note: If you exclude object, then all the fields are mandatory.

The **Algorithms** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	Used to specify the algorithm code. **Note:** It has a link. On clicking the link, **Algorithm** screen appears with the details of the respective algorithm. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Algorithm Search** window appears.	No

Note: While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Enter the required details.
7. Include or exclude the object types, if required.
8. Add the algorithms, if required.
9. Click **Save**.
   The financial transaction distribution rule version is defined.

	version is effective for the respective financial transaction distribution rule.	
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

The **Included Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type. **Note:** It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.	No
Bill Status	Used to indicate the status of the bill.	No

Note: If you include object, then all the fields are mandatory.

The **Excluded Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type. **Note:** It has a link. On clicking the link, respective object type	No

Column Name	Column Description	Mandatory (Yes or No)
	screen appears with the details of the respective object type.	

Note: If you exclude object, then all the fields are mandatory.

The **Algorithms** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	Used to specify the algorithm code. **Note:** It has a link. On clicking the link, **Algorithm** screen appears with the details of the respective algorithm.	No

Note: While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Modify the details of the financial transaction distribution rule version.
7. Modify the included or excluded objects from the financial transaction distribution rule version, if required.
8. Edit the algorithms, if required
9. Click **Save**.
   The changes made to the financial transaction distribution rule version are saved.

Deleting a Financial Transaction Distribution Rule Version

Procedure

To delete a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.
   A sub-menu appears.

3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.
   The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to *t*he financial transaction distribution rule whose details you want to edit.
   The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Delete** (🗑) icon in the **Delete** *c*olumn corresponding to the financial transaction distribution rule version that you want to delete.
   A message appears confirming whether you want to delete the financial transaction distribution rule version.
6. Click **OK**.
   The financial transaction distribution rule version is deleted.

Copying a Financial Transaction Distribution Rule Version

Instead of creating a financial transaction distribution rule version from scratch, you can create a new financial transaction distribution rule version using an existing financial transaction distribution rule version. This is possible through copying a financial transaction distribution rule version. On copying a financial transaction distribution rule version, the details are copied to the new financial transaction distribution rule. You can then edit the details, if required.

Prerequisites

To copy a financial transaction distribution rule, you should have:

- Financial transaction distribution rule version (whose copy you want to create) defined in the application
- Financial transaction distribution rule version business objects defined in the application

Procedure

To copy a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.
   A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.
   The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to *t*he financial transaction distribution rule whose details you want to edit.
   The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Duplicate** (📋) icon in the **Duplicate** column *c*orresponding to the financial transaction distribution rule version whose copy you want *t*o create.

The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the financial transaction distribution rule version.
- **Included Objects** - Used to include the objects in financial transaction distribution rule version.
- **Excluded Objects** - Used to exclude the objects in financial transaction distribution rule version.
- **Algorithms** - Used to define the algorithms in the financial transaction distribution rule version.

Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

Note: If you include object, then all the fields are mandatory.

Included Objects - This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type. **Note:** It has a link. On clicking the link, respective object type screen appears with the details of the respective object type. The **Search** (🔍) icon appears corresponding to this field.	No

Column Name	Column Description	Mandatory (Yes or No)
	On clicking the **Search** icon, the **Adjustment Type Search** window appears.	
Bill Status	Used to indicate the status of the bill.	No

Excluded Objects - This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type. **Note:** It has a link. On clicking the link, respective object type screen appears with the details of the respective object type. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	No

Note: If you exclude object, then all the fields are mandatory.

Algorithms - This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	Used to specify the algorithm code. **Note:** It has a link. On clicking the link, **Algorithm** screen appears with the details of the respective algorithm. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the	No

Column Name	Column Description	Mandatory (Yes or No)
	Algorithm Search window appears.	

Note: While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Enter the required details.
7. Define, edit, or remove objects from the financial transaction distribution rule version , if required.
8. Associate or dissociate the algorithms from the financial transaction distribution rule version, if required
9. Click **Save**.
   The new financial transaction distribution rule version is defined.

Viewing the Financial Transaction Distribution Rule Version Details

Procedure

To view the details of a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.
   A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.
   The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast** (📡) icon corresponding to *t*he financial transaction distribution rule whose details you want to view.
   The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Broadcast** (📡) icon *c*orresponding to the financial transaction distribution rule version whose details you want to view.
   The **Financial Transaction Distribution Rule Version** zone appears.
6. View the details of the financial transaction distribution rule version in the **Financial Transaction *D*istribution Rule Version** zone.

Expiration Cycle Extendable Lookup

The **Expiration Cycle Extendable Lookup** screen allows you to search for an expiration cycle. An expiration cycle is an extendable lookup reference object which indicates the frequency at which the financial transaction distribution object created for the account should be expired (i.e. after two months or 45 days from the date of creation). You can associate an expiration cycle with one or more accounts. This screen contains the following zone:

- Extendable Lookup Search on page 2338

Extendable Lookup Search

The **Extendable Lookup Search** zone allows you to search the details of expiration cycle business object. This zone contains the following two sections:

- **Search Criteria** - This section contains the following fields:

Field Name	Field Description
Business Object	Used to search the expiration cycle business object.
Description	Used to search the expiration cycle business object with a particular description.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Business Object	Displays the business objects.
Description	Displays description of the business object. **Note:** It has a link. On clicking the link, the **Extendable Lookup** screen appears where you can view the details of the respective business object.

Note: You must specify at least one search criterion while searching for the expiration cycle business object.

Searching for an Expiration Cycle Extendable Lookup

Prerequisites

To search for an expiration cycle extended lookup, you should have:

- Expiration cycle extended lookup defined in the application.

Procedure

To search for an expiration cycle extended lookup:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **E** and then click **Extendable Lookup**.
   The **Extendable Lookup Query** screen appears.
3. Search for **C1-EXPCYCLE** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business *o*bject.
   The **Extended Lookup** screen appears.
5. View the list of expiration cycle extended lookup values in the **Extendable Lookup Value List** zone.

Note:

You must specify at least one search criterion while searching for an expiration cycle extended lookup.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

Extendable Lookup (Expiration Cycle)

Once you create an expiration cycle, the **Extendable Lookup** (Expiration Cycle) screen allows you to:

- Edit the details of an expiration cycle
- Copy an expiration cycle
- Delete an expiration cycle
- View the details of an expiration cycle

This screen contains the following zones:

- Extendable Lookup Value List on page 2340
- Extendable Lookup Value on page 2340

Extendable Lookup Value List

The **Extendable Lookup Value List** zone allows you to view the list of expiration cycle extended lookup values that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
Value	Displays the expiration cycle extended lookup value.
Description	Displays the description of the expiration cycle extended lookup value.
Detailed Description	Displays the additional information about the expiration cycle extended lookup value.
Owner	Displays the owner of the expiration cycle extended lookup value.
Edit	On clicking the **Edit** (✎) icon, the **Expiration Cycle** screen appears where you can edit the details of the expiration cycle extended lookup value.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Expiration Cycle** screen appears where you can define a expiration cycle extended lookup value using an existing expiration cycle extended lookup value.
Delete	On clicking the **Delete** (🗑) icon, you can delete the expiration cycle extended lookup value.

On clicking the **Broadcast** (📡) icon corresponding to the expiration cycle extended lookup value, the **Extendable Lookup Value** zone appear with the details of the respective expiration cycle extended lookup value.

You can filter the list using the **Value** or **Description** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Extendable Lookup Value

The **Extendable Lookup Value** zone allows you to view the details of the expiration cycle extended lookup value. This zone contains the following section:

- **Main** - This section allows you to view the details of the expiration cycle extended lookup value. It contains the following fields:

Field Name	Field Description
Expiration Cycle	Displays the expiration cycle extended lookup value.

Field Name	Field Description
Description	Displays the description of the expiration cycle extended lookup value.
Override Description	Displays the overridden description of the expiration cycle extended lookup value.
Detailed Description	Displays the additional information about the expiration cycle extended lookup value.
Status	Displays the status of expiration cycle extended lookup value.
Duration Unit	Displays the duration unit of the expiration cycle extended lookup value.
Duration Value	Displays the period till when the expiration cycle extended lookup value is active.
Consider Holiday	Displays whether to consider holidays or not while calculating the duration value.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the expiration cycle extended lookup value.
Delete	Used to delete the expiration cycle extended lookup value.
Duplicate	Used to create a new expiration cycle extended lookup value using an existing expiration cycle extended lookup value.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the expiration cycle extended lookup value is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears with the details of the respective business object.
Owner	Indicates the person or entity that created the expiration cycle business object.

By default, the **Extendable Lookup Value** zone does not appear in the **Extendable Lookup** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the extendable lookup value of the **Extendable Lookup Value List** zone.

Defining an Expiration Cycle

Procedure

To define an expiration cycle:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.
   The **Extended Lookup Query** screen appears.
3. Search for **C1-EXPCYCLE** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business *o*bject.
   The **Extended Lookup** screen appears.
5. Click the **Add** button in the **Page Title** area of the **Extended Lookup** screen.
   The **Expiration Cycle** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the expiration cycle.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Expiration Cycle	Used to specify the value of expiration cycle.	Yes
Description	Used to specify the description of the expiration cycle.	Yes
Override Description	Used to specify the override description of the expiration cycle.	No
Detailed Description	Used to specify the additional information about the expiration cycle.	No
Status	Used to indicate the status of the expiration cycle.	No
Duration Unit	Used to indicate the duration unit of the expiration cycle.	Yes
Duration Value	Used to indicate the period till when the expiration cycle is active.	Yes
Consider Holiday	Used to indicate whether to consider the holiday while calculating the duration value.	No

6. Enter the required details.
7. Click **Save**.
   The expiration cycle is defined.

Extendable Lookup Value

The **Extendable Lookup Value** zone allows you to view the details of the distribution hierarchy extended lookup value. This zone consists of the following section:

- **Main** - This section lists the distribution hierarchy extended lookup values. It contains the following fields:

Field Name	Field Description
Hierarchy Code	Displays the unique hierarchy code.
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.
Description	Displays the description of the distribution hierarchy extended lookup value.
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.
Status	Displays the status of the distribution hierarchy extended lookup value.

- **Hierarchy List** - This section lists the hierarchy of the distribution. It contains the following columns:

Column Name	Column Description
Sequence	Displays the order of priority according to which the distribution will be made in hierarchy.
Value	Displays the value of hierarchy.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the distribution hierarchy extended lookup value.
Delete	Used to delete the distribution hierarchy extended lookup value.
Duplicate	Used to create a new distribution hierarchy extended lookup value using an existing distribution hierarchy extended lookup value.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the distribution hierarchy extended lookup value is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears with the details of the respective business object.
Owner	Indicates the person or entity that created the distribution hierarchy business object.

By default, the **Extendable Lookup Value** zone does not appear in the **Extendable Lookup** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the extendable lookup value of the **Extendable Lookup Value List** zone.

Defining a Distribution Hierarchy

Procedure

To define a distribution hierarchy:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.
   The **Extended Lookup Query** screen appears.
3. Search for **C1-HIERARCHY** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-HIERARCHY** business *o*bject.
   The **Extended Lookup** screen appears.
5. Click the **Add** button in the **Page Title** area of the **Extended Lookup** screen.
   The **Hierarchy** screen appears. It contains the following sections:
   - **Main** - Used to specify basic details about the distribution hierarchy.
   - **Hierarchy List** - Used to specify the hierarchy of the distribution.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Code	Displays the unique hierarchy code.	Yes
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.	No
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.	No
Description	Displays the description of the distribution hierarchy extended lookup value.	Yes
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.	No
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.	No
Status	Displays the status of the distribution hierarchy extended lookup value.	No

   Hierarchy List - This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order of priority according to which the distribution will be made in hierarchy.	Yes
Value	Used to specify the value of hierarchy.	Yes

Note:

You must specify at least one hierarchy list while defining a distribution hierarchy.

If you want to specify more than one hierarchy within the hierarchy list, click the **Add** (+) icon in the **Hierarchy List** section and then specify the details. However, if you want to remove a hierarchy from the hierarchy list, click the **Delete** (🗑) icon corresponding to the hierarchy.

6. Enter the required details.
7. Click **Save**.
   The distribution hierarchy is defined.

Editing a Distribution Hierarchy

Procedure

To edit a distribution hierarchy:

1. Search for the **C1-HIERARCHY** business object in the **Extended Lookup Query** screen.
2. In the **Search Results** section, click the **Description** link corresponding to the **C1-HIERARCHY** business *o*bject.
   The **Extended Lookup** screen appears.
3. In the **Extended Lookup Value List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the *e*xtended lookup value whose details you want to edit.
   The **Hierarchy** screen appears. It contains the following sections:
   - **Main** - Used to specify basic details about the distribution hierarchy.
   - **Hierarchy List** - Used to specify the hierarchy of the distribution.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Code	Displays the unique hierarchy code.	Yes
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.	No
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.	No
Description	Displays the description of the distribution hierarchy extended lookup value.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.	No
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.	No
Status	Displays the status of the distribution hierarchy extended lookup value.	No

Hierarchy List - This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order of priority according to which the distribution will be made in hierarchy.	Yes
Value	Used to specify the value of hierarchy.	Yes

Note:

You must specify at least one hierarchy list while defining a distribution hierarchy.

If you want to specify more than one hierarchy within the hierarchy list, click the **Add** (+) icon in the **Hierarchy List** section and then specify the details. However, if you want to remove a hierarchy from the hierarchy list, click the **Delete** (🗑) icon corresponding to the hierarchy.

Tip: Alternatively, you can click the **Edit** button in the **Extended Lookup Value** zone to edit the details of the distribution hierarchy.

4. Modify the details, if required.
5. Add to the hierarchy list, if required.
6. Click **Save**.
   The changes made to the distribution hierarchy are saved.

Copying a Distribution Hierarchy

Instead of creating a distribution hierarchy from scratch, you can create a new distribution hierarchy using an existing distribution hierarchy This is possible through copying a distribution hierarchy. On copying a distribution hierarchy, the details are copied to the new distribution hierarchy. You can then edit the details, if required.

Prerequisites

To copy a distribution hierarchy, you should have:

- Distribution hierarchy(whose copy you want to create) defined in the application
- Distribution hierarchy business object defined in the application

Procedure

To copy a distribution hierarchy:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.
   The **Extended Lookup Query** screen appears.
3. Search for **C1-HIERARCHY** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-HIERARCHY** business *o*bject.
   The **Extended Lookup** screen appears.
5. In the **Extended Lookup Value List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column *c*orresponding to the distribution hierarchy whose copy you want to create.

   The **Hierarchy** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the distribution hierarchy.
   - **Hierarchy List** - Used to specify the hierarchy list of distribution.

   Main - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Code	Displays the unique hierarchy code.	Yes
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.	No
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.	No
Description	Displays the description of the distribution hierarchy extended lookup value.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.	No
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.	No
Status	Displays the status of the distribution hierarchy extended lookup value.	No

Hierarchy List - This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order of priority according to which the distribution will be made in hierarchy.	Yes
Value	Used to specify the value of hierarchy.	Yes

Note:

You must specify at least one hierarchy list while defining a distribution hierarchy.

If you want to specify more than one hierarchy within the hierarchy list, click the **Add** (+) icon in the **Hierarchy List** section and then specify the details. However, if you want to remove a hierarchy from the hierarchy list, click the **Delete** (🗑) icon corresponding to the hierarchy.

Tip: Alternatively, you can click the **Duplicate** button in the **Extended Lookup Value** zone to create a copy of the distribution hierarchy.

6. Enter the required details.
7. Add to the hierarchy list, if required.
8. Click **Save**.
   The new distribution hierarchy is defined.

Searching for a Financial Transaction Distribution Object

Prerequisites

To search for a financial transaction distribution, you should have:

- Financial transaction distribution types defined in the application.

Procedure

To search for a financial transaction distribution:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.

2. From the **Main** menu, select **Accounting and Receivable** and then click **Financial Transaction Distribution**. The **Financial Transaction Distribution** screen appears.
3. Enter the search criteria in the **Financial Transaction Distribution Search** zone depending on whether you want to search for a financial transaction distribution.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required. In case of **Financial Transaction Distribution ID**, wild card search is not supported.

To view the details of a financial transaction distribution :

1. Search for the financial transaction distribution in the **Financial Transaction Distribution** screen.
2. In the **Search Results** section, click the link in the **Information** column corresponding to the financial transaction distribution whose details you want to view.
   The **Financial Transaction Distribution** screen appears. It consists of the following tabs:
   - **Main** - Displays information about the financial transaction distribution. It contains the following zone:
     - **Financial Transaction Distribution** - Displays the details of the financial transaction distribution object.
   - **Log** - Lists the complete trail of actions performed on the financial transaction distribution object.
3. View the details of the financial transaction distribution in the **Financial Transaction Distribution** zone.

Financial Transaction Distribution (Used for Viewing)

The **Financial Transaction Distribution** screen allows you to view the details of the financial transaction distribution. This screen consists of the following tabs:

- Financial Transaction Distribution - Main on page 2367
- Financial Transaction Distribution - Log on page 2369

Financial Transaction Distribution - Main

The **Main** tab on the **Financial Transaction Distribution** screen contains the following zone:

- Financial Transaction Distribution on page 2367

Financial Transaction Distribution

The **Financial Transaction Distribution** zone displays the details of the financial transaction distribution types that are already defined in the system. This zone consists of the following sections:

- **Main** - This section provides basic information about the financial transaction distribution type. It contains the following fields:

Field Name	Field Description
Information	Indicates the information about the financial transaction distribution object.
FT Distribution Type	Displays the financial transaction distribution type. **Note:** It has a link. On clicking the link, the **Financial Transaction Distribution Type** screen appears with the details of the respective financial transaction distribution type. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Financial Transaction Distribution Type FK Search** window appears.
Account	Indicates the account on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Contract	Indicates the contract on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective account. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Contract Search** window appears.
Status	Indicates the status of the financial transaction distribution object.
Financial Transaction ID	Displays the financial transaction ID.

Field Name	Field Description
Bill segment	Indicates the bill segment information on which the financial transaction distribution object is distributed. a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill Segment** screen appears where you can view the details of the respective bill segment.
Amount	Displays the distributed amount.
Expiration Date	Displays the expiration date of the financial transaction distribution object.

- **Distribution List** - This section displays the distribution list of the financial transaction distribution object. It contains the following columns:

Column Name	Column Description
Account	Indicates the account on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Contract	Indicates the contract on which the financial transaction distribution object is distributed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective account.
Transfer Adjustment	Indicates the transfer adjustments made on the financial transaction distribution object.
Distribution Amount	Displays the distributed amount.

- **Characteristics** - This section lists the characteristics of the financial transaction distribution type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the financial transaction distribution object.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution object is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Field Name	Field Description
Status Date/Time	Displays the date and time when the financial transaction distribution object status is updated.
Create Date/Time	Displays the date and time when the financial transaction distribution object is created.

Financial Transaction Distribution - Log

The **Log** tab contains the following zone:

- Financial Transaction Distribution Log on page 2369

Financial Transaction Distribution Log

The **Financial Transaction Distribution Log** zone on the **Financial Transaction Distribution** screen lists the complete trail of actions performed on the financial transaction distribution object. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the financial transaction distribution object.
Details	Displays the details about the action performed on the financial transaction distribution object.
User	Indicates the user who has performed the action on the financial transaction distribution object.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the financial transaction distribution object.
Status Reason	Displays the status reason of action performed on the financial transaction distribution object.

Note: You can manually add a log entry for the financial transaction distribution object by clicking the **Add Log Entry** link in the upper right corner of the **Financial Transaction Distribution** zone.

The **Add Log Entry** window appears. Enter **Log Details** and click **Save**. The financial transaction distribution object log is added.

How to view the log of a financial transaction distribution	Viewing the Log of a Financial Transaction Distribution on page 2370

Viewing the Log of a Financial Transaction Distribution

Procedure

To view the log of a financial transaction distribution:

1. Search for the financial transaction distribution object in the **Financial Transaction Distribution** screen.
2. In the **Search Results** section, click the link in the **Information** column *c*orresponding to the financial *t*ransaction distribution object whose log you want to view.

   The **Financial Transaction Distribution** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the financial transaction distribution. It contains the following zone:
     - **Financial Transaction Distribution** - Displays information about the financial transaction distribution object.
   - **Log** - Lists the complete trail of actions performed on the financial transaction distribution object. This tab contains the following zone:
     - **Financial Transaction Distribution Log** - Displays the trail of actions performed on the particular financial transaction distribution object.
3. Click the **Log** tab.
4. View the log of a financial transaction distribution in the **Financial Transaction Distribution Log** zone.

Adding a Log Entry for a Financial Transaction Distribution

Procedure

To add a log entry for a financial transaction distribution:

1. Search for the financial transaction distribution object in the **Financial Transaction Distribution** screen.
2. In the **Search Results** section, click the link in the **Information** column corresponding to the financial *t*ransaction distribution whose log you want to edit.

   The **Financial Transaction Distribution** screen appears. It consists of the following tabs:

   - **Main** - Displays information about the financial transaction distribution. It contains the following zone:
     - **Financial Transaction Distribution** - Displays information about the financial transaction distribution object.
   - **Log** - Lists the complete trail of actions performed on the financial transaction distribution object. This tab contains the following zone:
     - **Financial Transaction Distribution Log** - Displays the trail of actions performed on the particular financial transaction distribution object.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Financial Transaction Distribution Log** zone.

The **Add Log Entry** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution	Displays information about the financial transaction distribution object.	Not applicable
Log Details	Used to specify additional comments for the financial transaction distribution object.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Financial Transaction Distribution Log** zone.

Part XXXVII

Deferred Revenue Recognition

Topics:

- Prerequisites
- Deferred Revenue Recognition Status Transition
- Algorithms Used in Deferred Revenue Recognition
- Deferred Revenue Recognition Template (Used for Searching)
- Deferred Revenue Recognition Template (Used for Viewing)
- Deferred Revenue Recognition (Used for Searching)
- Deferred Revenue Recognition (Used for Viewing)

Most often, insurance company bill policies in installments, but Accounts Receivable (AR) and revenue for the total premium are booked as new business in the beginning of the policy term. Regulations, restrictions, or company policies may require that revenue for the total premium must be initially booked to the general ledger as deferred revenue. As time passes, the deferred revenue is realized as earned revenue. For example, the total premium for six months auto-policy (July 1 to Dec 31) is $1200. When this new business is booked, the revenue of $1200 is initially booked as deferred revenue. However, on July 31, August 31, September 30, October 31, November 30, and December 31, $200 must be transferred from deferred revenue GL to earned revenue GL. In order to manage this process, adjustments are created that transfer amount from deferred revenue GL to earned revenue GL.

A deferred revenue recognition schedule determines when these deferred revenue recognition adjustments must be created and posted. On the recognition date, the deferred revenue recognition adjustment is created to transfer a portion of deferred revenue to earned revenue. The corresponding financial transaction does not impact customer's account balance.

You need to create a deferred revenue recognition template for each distribution code and contract type combination for which you want to create a deferred revenue recognition (when the bill segment and adjustment financial transactions created against the respective contracts are frozen). It is the deferred revenue recognition template which helps the system to determine:

- Adjustment type using which the adjustment should be created when the deferred revenue is recognized
- Whether the recognition amount and date in the deferred revenue recognition schedule are editable until recognized
- Whether the deferred revenue recognition schedule must be generated automatically or manually
- Whether the deferred revenue must be recognized daily, weekly, or monthly
- Whether the deferred revenue amount must be prorated when the recognition schedule is set to Monthly
- Algorithm using which the recognition lines in the deferred revenue recognition schedule should be created
- Algorithm using which the adjustment must be generated when the deferred revenue is recognized

During the deferred revenue recognition process, a deferred revenue recognition creation goes through various statuses in its lifecycle. For more

information about the deferred revenue recognition statuses, see Deferred Revenue Recognition Status Transition on page 2375.

Note: The lifecycle of a deferred revenue recognition creation is driven by the respective business object using which the deferred revenue recognition is generated. The deferred revenue recognition feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the deferred revenue recognition process, see Prerequisites on page 2375.

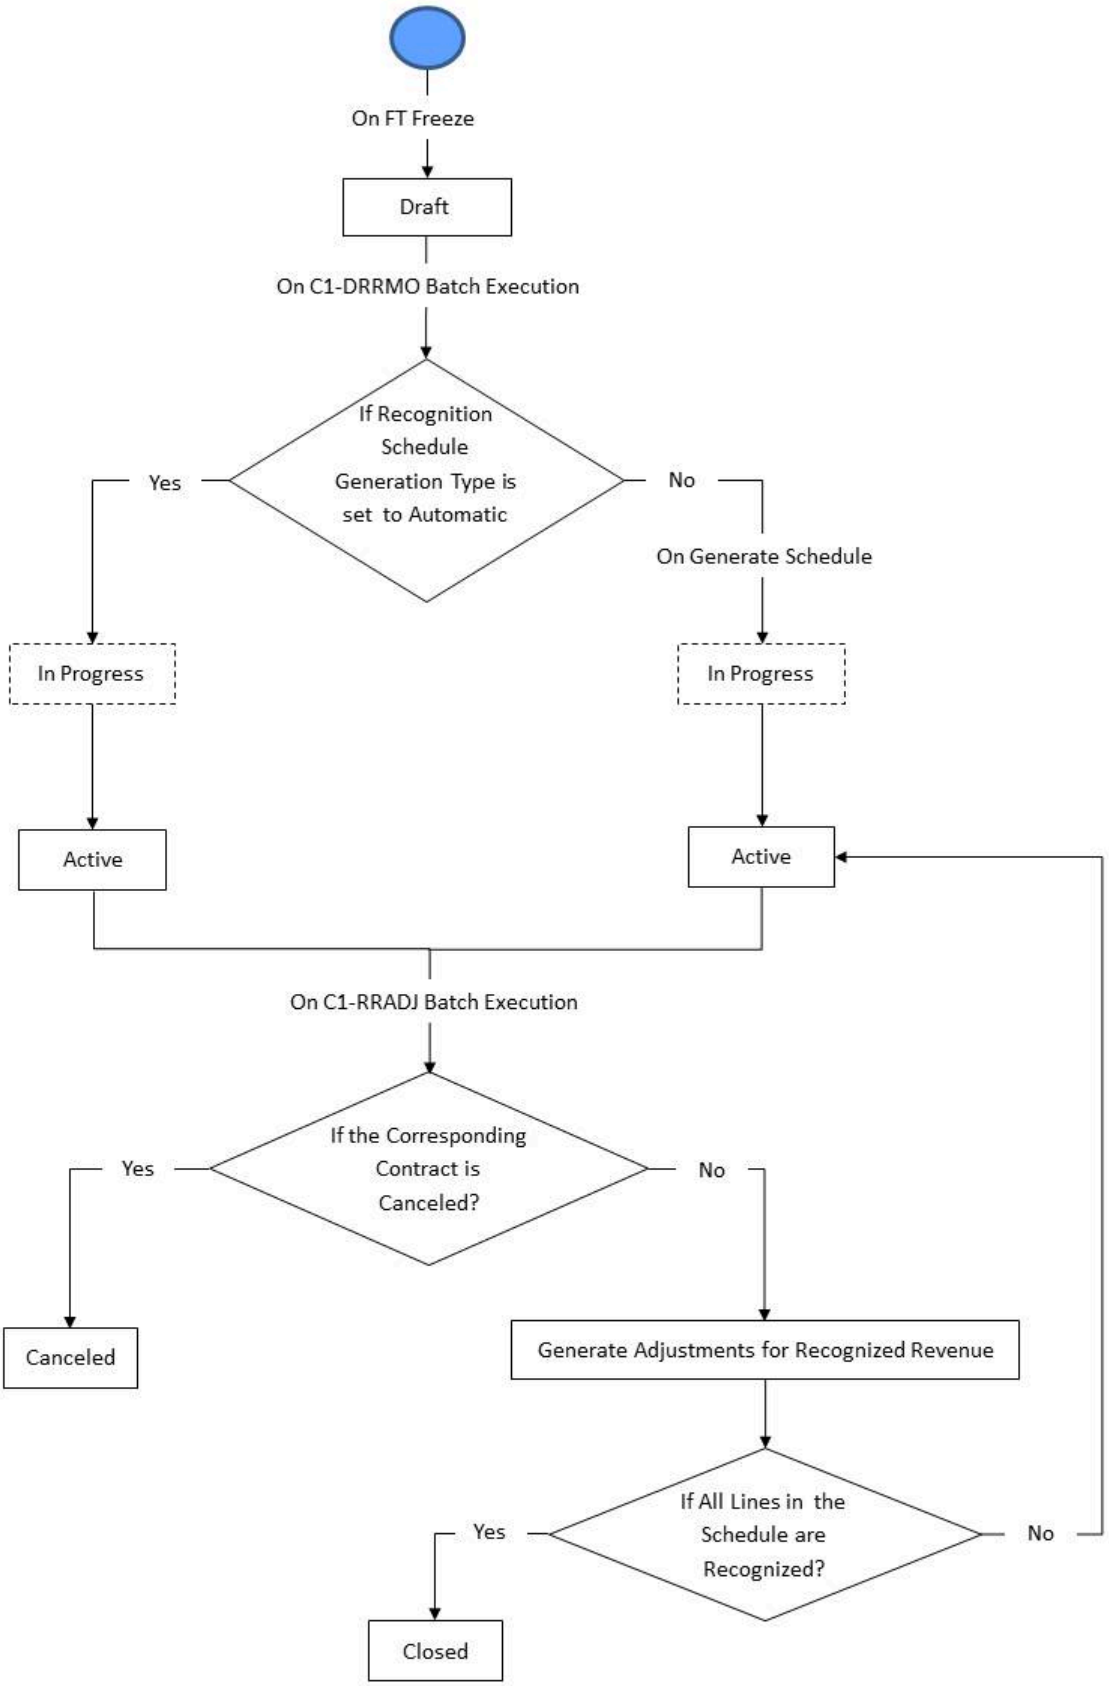
Prerequisites

To setup the deferred revenue recognition feature, you need to do the following:

- Define the required deferred revenue recognition templates in the system.
- Define the required characteristic types where the characteristic entity is set to **Deferred Revenue Recognition**.
- Define the values for the following parameters in the **C1-REVRECITM** algorithm:
  - Use Calendar or Business Days (C or B)
  - Override Default Recognition Date (Y or N)
  - Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun)
  - Override Default Monthly Recognition Date (1-31)
- Define the value for the **Use Contract Expiration Date (Y or N)** parameter in the **C1-REVRECSCH** algorithm.
- Define the value for the **Create Adjustments (Y or N)** parameter in the **C1-REVITMREC** algorithm.
- Set the batch control type of the **Deferred Revenue Recognition Periodic Monitor (C1-RRSMO)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

Deferred Revenue Recognition Status Transition

The following figure graphically indicates how a deferred revenue recognition status transition moves from one status to another:



On FT Freeze
Draft
On C1-DRRMO Batch Execution
If Recognition Schedule Generation Type is set to Automatic
Yes
No
On Generate Schedule
In Progress
In Progress
Active
Active
On C1-RRADJ Batch Execution
If the Corresponding Contract is Canceled?
Yes
No
Canceled
Generate Adjustments for Recognized Revenue
If All Lines in the Schedule are Recognized?
Yes
No
Closed

Algorithms Used in Deferred Revenue Recognition

The following table lists the algorithms which are used in the lifecycle of the business object:

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVRECSCH	C1-REVRECSCH	This algorithm is invoked when the status of the bill segment and adjustment financial transactions created against the contracts (of the contract type to which the algorithm is attached) is set to Frozen. It checks whether an active deferred revenue recognition template exists for the distribution code and contract type combination. If so, it creates a deferred revenue recognition using the template and sets the status of the deferred revenue recognition to Draft. It then checks whether the type of the corresponding financial transaction is Bill Segment or Adjustment. If the type of the corresponding financial transaction is Bill Segment, it sets the valid until date of the deferred revenue recognition to the bill segment end date. However, if the type of the corresponding financial transaction is Adjustment, it checks whether the Use Contract Expiration Date (Y or N) parameter is set to Y or N. If the Use Contract Expiration Date (Y or N) parameter is set to Y, it sets the valid until date of the deferred revenue recognition to the contract expiration date. However, if the Use Contract Expiration Date (Y or N) parameter is set to N, it sets the valid until date of the deferred revenue recognition to the financial transaction arrears date. In addition, on creating the deferred revenue recognition, an appropriate log entry is added which you can view in the Deferred Revenue Recognition Log zone. It contains the following parameter: • Use Contract Expiration Date (Y or N) - Used to indicate whether the valid until date must be set to the contract expiration date when the type of the corresponding financial transaction is Adjustment. The valid values are Y and N. This parameter is mandatory.
		C1-REVRECITM	C1-REVRECITM	This algorithm creates schedule for the deferred revenue recognition. It considers the valid until date and accordingly creates the recognition lines within the schedule.

Status	System Event	Algorithm	Algorithm Type	Description
				If the recognition schedule is Weekly, by default, the recognition day is set to Mon (which means Monday of each week). However, if the recognition schedule is Monthly, by default, the recognition date is set to the last day of the month (i.e. 28, 29, 30, or 31) It contains the following parameters: • **Use Calendar or Business Days (C or B)** - Used to indicate whether you want to use the calendar or business days while generating the recognition schedule. The business days are derived using the work calendar defined on the financial transaction. If you do not specify any value for this parameter, by default, it is set to C. This parameter is mandatory. • **Override Default Recognition Date (Y or N)** - Used to indicate whether you want to override the default weekly or monthly recognition date. The valid values are Y and N. This parameter is mandatory. • **Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun)** - Used to indicate the day of the week when you want to recognize the deferred revenue. The valid values are Mon, Tue, Wed, Thu, Fri, Sat, and Sun. This parameter is required when you want to override the default weekly recognition day. • **Override Default Monthly Recognition Date (1-31)** - Used to indicate the day of the month when you want to recognize the deferred revenue. The valid values are 1, 2, 3, …, 31. This parameter is required when you want to override the default monthly recognition date.
		C1-REVRECADJ	C1-REVRECADJ	This algorithm creates deferred revenue recognition adjustment using the adjustment type defined on the respective deferred revenue recognition template. Before creating the deferred revenue recognition adjustment, it checks whether the contract for which the deferred revenue recognition is created is cancelled. If so, the status of the deferred revenue recognition is set to Canceled. If all lines in the recognition schedule are recognized, the

Status	System Event	Algorithm	Algorithm Type	Description
				status of the deferred revenue recognition is set to Closed.
		C1-REVITMREC	C1-REVITMREC	If this algorithm is attached in the deferred revenue recognition template, it is invoked while executing the C1-RRADJ batch. It contains the following parameter: • **Create Adjustments (Y or N)** - Used to indicate whether the deferred revenue recognition adjustment must be created or not when the recognition date is earlier than or equal to the batch business date. The valid values are Y and N. This parameter is mandatory.
		C1-DRRTM-INF	C1-DRRTM-INF	This algorithm generates the deferred revenue recognition template information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order: **1.** Deferred Revenue Recognition Template **2.** Description
		C1-DRRTMPVAL	C1-DRRTMPVAL	This algorithm validates the deferred revenue recognition template. It checks the following: • Whether the data is specified in the mandatory fields, such as Deferred Revenue Recognition Template, Description, Status, Distribution Code, Contract Type, Adjustment Type, Recognition Schedule Generation Type, and Recognition Schedule. • Whether an algorithm is attached to the Create Deferred Revenue Recognition Schedule and Generate Deferred Revenue Recognition Adjustment system events. • Whether a deferred revenue recognition template already exists for the specified distribution code and contract type combination. • Whether special characters except underscore are specified in the Deferred Revenue Recognition Template field. • Whether the high proration limit is between 0 to 31 and is greater than the low proration limit.>> Whether the low proration limit is between 0 to 31 and is less than the high proration limit.

Status	System Event	Algorithm	Algorithm Type	Description
				In addition, it does not allow you to: • Delete a deferred revenue recognition template when it is used to create a deferred revenue recognition. • Edit a deferred revenue recognition template when the corresponding deferred revenue recognition is in the Draft status. • Inactivate a deferred revenue recognition template when the corresponding deferred revenue recognition is not in the Closed status. You must attach this validation algorithm to the custom business object which is used to create a deferred revenue recognition template. Otherwise, erroneous results might occur.
		C1-DRRSC-INF	C1-DRRSC-INF	This algorithm generates the deferred revenue recognition information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order: **1.** Deferred Revenue Recognition Template **2.** Deferred Revenue Recognition Status **3.** Distribution Code **4.** Deferred Revenue Recognition ID
		C1-REVMON	C1-REVMON	This algorithm is invoked when the C1-DRRMO batch is executed. It checks whether there are any deferred revenue recognitions in the Draft status. If there is any deferred revenue recognition in the Draft status, it checks whether the recognition schedule generation type in the respective deferred revenue recognition template is set to Automatic or Manual. If the recognition schedule generation type is set to Automatic, the status of the deferred revenue recognition is changed to In Progress. However, if the recognition schedule generation type is set to Manual, the status of the deferred revenue recognition remains as Draft.
		C1-REVRECINP	C1-REVRECINP	This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to In Progress. It invokes the algorithm attached to the Create Deferred Revenue Recognition Schedule system event of the respective deferred revenue recognition

Status	System Event	Algorithm	Algorithm Type	Description
				template. Once the recognition schedule is successfully created, the status of the deferred revenue recognition is changed to Active.
		C1-REVRECACT	C1-REVRECACT	This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters: • Next Status • Next Transition Condition At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle. This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to Active.

Deferred Revenue Recognition Template (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition template using various search criteria. Through this screen, you can navigate to the following screen:

- Deferred Revenue Recognition Template (Used for Viewing) on page 2388

This screen consists of the following zone:

- Search Deferred Revenue Recognition Template on page 2381

Search Deferred Revenue Recognition Template

The **Search Deferred Revenue Recognition Template** zone allows you to search for a deferred revenue recognition template using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition Template	Used to search the basic information about the deferred revenue recognition template.	Yes
Description	Used to search the description of the deferred revenue recognition template.	No
Recognition Schedule	Used to search deferred revenue recognition with a particular schedule. The valid values are: • Daily	No

Field Name	Field Description	Mandatory (Yes or No)
	• Monthly • Weekly	
Status	Used to indicate the deferred revenue recognition template with a particular status. The valid values are: • Active • Inactive	No

Note: You must specify at least one search criterion while searching for a deferred revenue recognition template.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Template	Displays the deferred revenue recognition. **Note:** It has a link. On clicking the link, the **Deferred Revenue Recognition Template** screen appears where you can view the details of the respective deferred revenue recognition template.
Distribution Code	Indicates the distribution code associated with the rate component.
Contract Type	Displays the contract which is generated against a particular type of contract.
Recognition Schedule	Displays the schedule when the deferred revenue is recognized.

Searching for a Deferred Revenue Recognition Template

Prerequisites

To search for a deferred revenue recognition template, you should have:

- Deferred revenue recognition template defined in the system.
- Deferred Revenue Recognition Schedule defined in the system.

Procedure

To search for a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.
   The **Deferred Revenue Recognition Template** screen appears.
3. Enter the search criteria in the **Search Deferred Revenue Recognition Template** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of deferred revenue recognition templates that meet the search criteria appears in the **Search Results** section.

Defining a Deferred Revenue Recognition Template

Prerequisites

To define a deferred revenue recognition template, you should have:

- Contract types defined in the system

Procedure

To define a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.
   The **Deferred Revenue Recognition Template** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Deferred Revenue Recognition Template** screen.

   The **Deferred Revenue Recognition Template** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the deferred revenue recognition template.
   - **Parameters** - Used to specify the various parameters for the deferred revenue recognition template.
   - **Algorithms** - Used to associate algorithms with the deferred revenue recognition template.
   - **Divisions** - Used to associate a deferred revenue recognition template with a division.
   - **Characteristics** - Used to define the characteristics for the deferred revenue recognition template.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition Template	Used to specify the deferred revenue recognition template.	Yes
Description	Used to specify the description of the deferred revenue recognition template.	No
Status	Used to indicate the status of the deferred revenue recognition template. The valid values are: • Active	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Inactive	

The **Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Distribution Code	Used to indicate the distribution code associated with the deferred revenue recognition. **Note:** The **Search** (icon appears corresponding to this field. On clicking the **Search** icon, the **Distribution Code Search** window appears.	Yes
Contract Type	Used to indicate a particular type of contract. **Note:** The **Search** (icon appears corresponding to this field. On clicking the **Search** icon, the **Contract Type Search** window appears.	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created. **Note:** The **Search** ( ) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	No
Allow Editing	Used to allow editing of recognition schedule.	No
Generation Type	Used to indicate the type of deferred revenue recognition generation. The valid values are: • Automatic • Manual	Yes (Conditional)
Recognition Schedule	Used to indicate the schedule of deferred revenue recognition generation. The valid values are: • Daily • Monthly • Weekly	Yes
Allow Proration	Used to allow proration. **Note:** The **Allow Proration** field appears when you select **Recognition Schedule** as **Monthly**.	Yes
High Proration Limit (Days)	Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated. **Note:** This field appears when you check the tick-box for **Allow Proration**.	Yes (Conditional) **Note:** This field is required when the recognition schedule is selected as monthly and when the **Allow**

Field Name	Field Description	Mandatory (Yes or No)
		Proration check box is selected.
Low Proration Limit (Days)	Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is less than the specified limit, then the amount is prorated. **Note:** This field appears when you check the tick-box for **Allow Proration**.	Yes (Conditional) **Note:** This field is required when the recognition schedule is selected as monthly and when the **Allow Proration** check box is selected.

4. Enter the required details.
5. Associate algorithms with the deferred revenue recognition template, if required.
6. View the division to which the deferred revenue recognition template is associated in the **Divisions** section.
7. Define the characteristics specific to division to which the deferred revenue recognition template is associated in the **Characteristics** section.
8. Click **Save**.
   The deferred revenue recognition template is created.

How to associate algorithms with the deferred revenue recognition template	Associating Algorithms with a Deferred Revenue Recognition Template on page 2385

Associating Algorithms with a Deferred Revenue Recognition Template

Procedure

To associate algorithms with a deferred revenue recognition template:

1. Ensure that the **Algorithms** section is expanded when you are defining or editing a deferred revenue *r*ecognition template.

   The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event for an algorithm.	Yes
Sequence	Used to specify the sequence number. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Algorithm	Used to associate an algorithm to the system event that you have selected. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Algorithm Search** window appears. On specifying the algorithm for a system event, the description of the algorithm appears corresponding to the **Algorithm** field.	Yes

2. Enter the required details in the **Algorithms** section.
3. If you want to define more than one algorithm for the deferred revenue recognition template, click the **Add** (+) icon, and then repeat 2.

Note: However, if you want to remove an algorithm from the deferred revenue recognition template, click the **Delete** (🗑) icon corresponding to the algorithm.

Associating Deferred Revenue Recognition Template With A Division

Prerequisites

To associate deferred revenue recognition template with a division, you should have:

- Divisions defined in the application

Procedure

To associate deferred revenue recognition template with a division:

1. Ensure that the **Divisions** section is expanded when you are creating or *e*diting a deferred revenue recognition template.

   The **Divisions** section appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the deferred revenue recognition template. **Note:** You can only view those divisions to which you have access in the **Division** list.	No

2. Select the required division from the list.
3. If you want to associate the deferred revenue recognition template with more than one division, click the **Add** (+) icon and then repeat step *2*.

Note: However, if you want to remove the deferred revenue recognition template from a division, click the **Delete** (🗑) icon corresponding to the division.

4. Click **Save**.
   The deferred revenue recognition template is associated with the divisions.

Defining a Characteristic for a Deferred Revenue Recognition Template

Prerequisites

To define a characteristic for a deferred revenue recognition template, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition Template**)

Procedure

To define a characteristic for a deferred revenue recognition template:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a deferred revenue recognition template.

   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the deferred revenue recognition template.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value**d field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the deferred revenue recognition template.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the deferred revenue recognition template, click the **Add** (+) icon *a*nd then repeat step 2.

Note: However, if you want to remove a characteristic from the deferred revenue recognition template, click the **Delete** (🗑) icon corresponding to the characteristic.

Viewing the Deferred Revenue Recognition Template Details

Procedure

To view the details of a deferred revenue recognition template:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.
   The **Deferred Revenue Recognition Template** screen appears.
3. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
4. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to view.

   The **Deferred Revenue Recognition Template** screen appears.
5. View the details of the deferred revenue recognition template in the **Deferred Revenue Recognition Template** zone.

Deferred Revenue Recognition Template (Used for Viewing)

Once the deferred revenue recognition templates are created, the **Deferred Revenue Recognition Template** screen allows you to:

- Generate the deferred revenue recognition schedule
- View the details of a deferred revenue recognition template
- Edit a deferred revenue recognition template
- Delete a deferred revenue recognition template

This screen consists of the following zone:

- Deferred Revenue Recognition Template on page 2389

Deferred Revenue Recognition Template

The **Deferred Revenue Recognition Template** zone displays the details of the deferred revenue recognition template. It contains the following sections:

- **Main** - Displays basic information about the deferred revenue recognition template. It contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Template	Displays the deferred revenue recognition template
Description	Used to specify the description of the deferred revenue recognition template
Status	Used to indicate the status of the deferred revenue recognition template. The valid values are: • Active • Inactive

- **Parameters** - Displays the parameters used in the deferred revenue recognition template.

Field Name	Field Description
Distribution Code	Indicates the distribution code. **Note:** It has a link. On clicking the link, the **Distribution Code** screen appears where you can view the details of the respective distribution code.
Contract Type	Displays the **Deferred Revenue Recognition Template** which are generated against a particular type of contract.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.
Generation Type	Displays the type of deferred revenue recognition template. The valid values are: • Manual • Automatic
Allow Editing	Indicates the editing of recognition schedule.
Recognition Schedule	Indicates the schedule when the deferred revenue is recognized. The valid values are: • Daily • Monthly • Weekly
Allow Proration	Used to allow proration. **Note:** The **Allow Proration** field appears when you select **Recognition Schedule** as **Monthly**.

Field Name	Field Description
High Proration Limit (Days)	Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated. **Note:** This field appears when you check the tick-box for **Allow Proration**.
Low Proration Limit (Days)	Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is less than the specified limit, then the amount is prorated. **Note:** This field appears when you check the tick-box for **Allow Proration**.

- **Divisions** - Displays the associated deferred revenue recognition template with one or more divisions. It contains the following column:

Column Name	Column Description
Division	Displays the division to which you want to associate the deferred revenue recognition template.

- **Algorithms** - Lists the algorithms associated with the deferred revenue recognition template. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Indicates the system event on which the algorithm must be executed	No
Sequence	Displays the sequence number.	No
Algorithm	Displays an algorithm that needs to be attached to the selected system event. **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm.	No

- **Characteristics** - Lists the characteristics defined for the deferred revenue recognition template. It contains the following fields:

Column Name	Column Description
Characteristic Type	Displays the characteristic type.
Characteristic Type	Displays the value of the characteristic type.

- **Record Actions** -This section contains the following buttons:

Button Name	Button Description
Edit	Used to define, edit, and remove algorithms of the deferred revenue recognition template.

Button Name	Button Description
	Note: The **Edit** button appears when the deferred revenue recognition template is in the **Active** status.
Delete	Used to delete the deferred revenue recognition template.

-
- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the deferred revenue recognition template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Editing a Deferred Revenue Recognition Template

Procedure

To edit a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to edit.
   The **Deferred Revenue Recognition Template** screen appears.
3. Click the **Edit** button in the **Deferred Revenue Recognition Template** zone.
   The **Deferred Revenue Recognition Template** screen appears.

   Note: The **Edit** button appears when the deferred revenue recognition template is in the **Active** status.
4. Associate, edit, or remove algorithms from the deferred revenue recognition template, if required.
5. Define, edit, or remove characteristics of the deferred revenue recognition template, if required.
6. Associate deferred revenue recognition template with a division, if required.
7. Click **Save**.
   The changes made to the deferred revenue recognition template are saved.

Deleting a Deferred Revenue Recognition Template

Procedure

To delete a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template that you want to delete.
   The **Deferred Revenue Recognition Template** screen appears.
3. Click the **Delete** button in the **Deferred Revenue Recognition Template** zone.
   A message appears confirming whether you want to delete the deferred revenue recognition template.
4. Click **OK**.
   The deferred revenue recognition template is deleted.

Deferred Revenue Recognition (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition using various search criteria. Through this screen, you can navigate to the following screen:

- Deferred Revenue Recognition (Used for Viewing) on page 2398

This screen consists of the following zone:

- Search Deferred Revenue Recognition on page 2393

Search Deferred Revenue Recognition

The **Search Deferred Revenue Recognition** zone allows you to search for a deferred revenue recognition using various search criteria. It contains the following two sections:

- **Search Criteria** - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a deferred revenue recognition using the deferred revenue recognition, person, account, or policy details. The valid values are: • Account Details • Person Details • Deferred Revenue Recognition Details • Financial Transaction Details • Policy Details **Note:** By default, the **Account Details** option is selected.	Yes
Person ID	Used to search deferred revenue recognition which are assigned to a particular person. **Note:** This field appears when you select the **Person Details** option from the **Search By** list.	No
Account ID	Used to search the account ID. **Note:** This field appears only when you select the **Account Details** option from the **Search By** list.	No
Person Identifier Type	Used to select the identifier type based on which you want to search deferred revenue recognition through which the person's record is created or updated in the system.	Yes (Conditional) **Note:** If you specify the person identifier as a search criteria, you have to select the person identifier type.

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier	Used to specify the value for the person identifier type.	Yes (Conditional) **Note:** If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Account Identifier Type	Used to specify the account identifier type of the account whose details you want to search. **Note:** This field appears when you select the **Account Details** option from the **Search By** list.	Yes (Conditional) **Note:** If you specify the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the value of the account identifier. **Note:** This field appears when you select the **Account Details** option from the **Search By** list.	Yes (Conditional) **Note:** If you specify the account identifier type as a search criteria, you have to specify the account identifier.
Contract ID	Used to specify the contract ID linked to the account. **Note:** This field appears when you select the **Account Details** option from the **Search By** list.	No
Person Hierarchy	Used to indicate whether to display hierarchy of the person linked to a particular bill. **Note:** This field appears when you select the **Person Details** option from the **Search By** list.	No
Status	Used to search deferred revenue recognition with a particular status. The valid values are: • Active • Closed • Canceled • Draft **Note:** This field appears when you select the **Person Details**, **Account Details**, or **Deferred Revenue Recognition Details** option from the **Search By** list.	No
Deferred Revenue Recognition Template	Used to indicate the template used for deferred revenue recognition. **Note:** This field appears when you select the **Person Details**, **Account Details**, or **Deferred**	No

Field Name	Field Description	Mandatory (Yes or No)
	Revenue Recognition Details option from the **Search By** list.	
Valid Until Date	Used to specify the date till which the deferred revenue recognition is valid. **Note:** This field appears when you select the **Person Details** or **Account Details** option from the **Search By** list.	No
Deferred Revenue Recognition ID	Used to search a particular deferred revenue recognition **Note:** This field appears when you select the **Deferred Revenue Recognition Details** option from the **Search By** list.	No
Description	Used to specify the description of the deferred revenue recognition. **Note:** This field appears when you select the **Deferred Revenue Recognition Details** option from the **Search By** list.	No
Recognition Schedule	Used to search deferred revenue recognition with a particular schedule. The valid values are: • Daily • Monthly • Weekly **Note:** This field appears when you select the **Deferred Revenue Recognition Details** option from the **Search By** list.	No
Financial Transaction ID	Used to search deferred revenue recognition which are assigned to a particular financial transaction. **Note:** This field appears only when you select the **Financial Transaction Details** option from the **Search By** list.	
Policy Type	Used to indicate the type of policy. **Note:** This field appears when you select the **Policy Details** option from the **Search By** list.	Yes
Policy Number	Used to indicate the policy number. **Note:** This field appears when you select the **Policy Details** option from the **Search By** list.	No
Plan Number	Used to indicate the plan number of the policy. **Note:** This field appears when you select the **Policy Details** option from the **Search By** list.	No
Source System	Used to indicate the name of the external system from where the policy originated.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Policy Details** option from the **Search By** list.	
Start Date	Used to indicate the date from when the policy is effective. **Note:** This field appears when you select the **Policy Details** option from the **Search By** list.	No
End Date	Used to indicate the date till when the policy is effective. **Note:** This field appears when you select the **Policy Details** option from the **Search By** list.	No

Note: You must specify at least one search criterion while searching for a deferred revenue recognition.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition. **Note:** It has a link. On clicking the link, the **Deferred Revenue Recognition** screen appears where you can view the details of the respective deferred revenue recognition.
Contract Information	Displays the basic information about the contract corresponding to the deferred revenue recognition. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition. **Note:** It has a link. On clicking the link, the **Financial Transaction** screen appears where you can view the details of the respective financial transaction.

Searching for a Deferred Revenue Recognition

Prerequisites

To search for a deferred revenue recognition, you should have:

- Deferred Revenue Recognition Template defined in the application.
- Person identifier types defined in the application
- Account identifier types defined in the application
- Recognition Schedules defined in the application
- Source Systems defined in the application

Procedure

To search for a deferred revenue recognition:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Accounting and Receivable**.
   A sub-menu appears.
3. Click the **Search** option from the **Deferred Revenue Recognition** sub-menu.
   The **Deferred Revenue Recognition** screen appears.
4. Enter the search criteria in the **Search Deferred Revenue Recognition** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of deferred revenue recognition that meet the search criteria appears in the **Search Results** section.

Viewing the Deferred Revenue Recognition Details

Procedure

To view the details of a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose details you want to view.

   The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

   - Deferred Revenue Recognition - Main on page 2398
   - Deferred Revenue Recognition - Log on page 2401
3. Ensure that the **Main** tab is selected.
4. View the details of the deferred revenue recognition in the **Deferred Revenue Recognition** zone.

Deferred Revenue Recognition (Used for Viewing)

The **Deferred Revenue Recognition** screen allows you to:

- View the details of a deferred revenue recognition
- Edit a deferred revenue recognition
- Generate the deferred revenue recognition schedule
- Add related deferred revenue recognitions
- Edit the details of a deferred revenue recognition schedule
- View the log of a deferred revenue recognition
- Add a log entry for a deferred revenue recognition

This screen consists of the following tabs:

- Deferred Revenue Recognition - Main on page 2398
- Deferred Revenue Recognition - Log on page 2401

Deferred Revenue Recognition - Main

The **Main** tab displays information about the deferred revenue recognition. It contains the following zones:

- Deferred Revenue Recognition on page 2398
- Associated Deferred Revenue Recognitions on page 2400
- Recognition Schedule on page 2400
- Revenue Recognition Items on page 2401

Deferred Revenue Recognition

The **Deferred Revenue Recognition** zone displays the details of the deferred revenue recognition. It contains the following sections:

- **Main** - Displays basic information about the deferred revenue recognition. It contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.
Deferred Revenue Recognition Template Information	Displays information about the deferred revenue recognition template. **Note:** It has a link. On clicking the link, the **Deferred Revenue Recognition Template** screen appears where you can view the details of the deferred revenue recognition template.
Distribution Code	Displays the distribution code which indicates the template associated with the deferred revenue recognition.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Financial Transaction Information** screen appears where you can view the details of the financial transaction.
Total Revenue Deferred	Displays the total revenue deferred.
Total Revenue Recognized	Displays the total revenue recognized.
Status	Indicates the status of the deferred revenue recognition. The valid values are: • Active • Closed • Canceled • Draft

- **Related Deferred Revenue Recognitions** - Lists the related deferred revenue recognitions. It contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays the basic information of the related Deferred Revenue Recognition Schedules (i.e. DRR Schedule of the BS/AD, corresponding to the BX/AX)
Create Date Time	Displays the date and time when the deferred revenue recognition is created.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to define, edit and remove characteristics, related deferred revenue recognitions of the deferred revenue recognition. **Note:** The **Edit** button appears when the deferred revenue recognition is in the **Active** status.
Generate Schedule	Used to generate the deferred revenue recognition schedule. **Note:** The **Generate Schedule** button appears only when the deferred revenue recognition is in the **Draft** status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the deferred revenue recognition is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Create Date/Time	Displays the date and time when the deferred revenue recognition schedule is created.

Field Name	Field Description
Status Date/Time	Displays the date and time when the deferred revenue recognition status is updated.

- **Characteristics** - Lists the characteristics defined for the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the deferred revenue recognition.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Associated Deferred Revenue Recognitions

The **Associated Deferred Revenue Recognitions** zone Displays the basic information of the other schedules linked to the same **FT** having a separate **Schedule** due to the different **Distribution Code**. Purpose of this section is to show all the associated **Schedules** generated for a single **FT**. It contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition. **Note:** It has a link. On clicking the link, the **Deferred Revenue Recognition** screen appears where you can view the details of the deferred revenue recognition.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition. **Note:** It has a link. On clicking the link, the **Financial Transaction** screen appears where you can view the details of the respective deferred revenue recognition.
Distribution Code	Displays the distribution code which indicates the template associated with the deferred revenue recognitions.
Deferred Revenue Recognition Template Information	Displays information about the deferred revenue recognition template. **Note:** It has a link. On clicking the link, the **Deferred Revenue Recognition Template** screen appears where you can view the details of the deferred revenue recognition template.
Status	Indicates the status of the associated deferred revenue recognition. The valid values are: • Active • Closed • Canceled

Recognition Schedule

The **Recognition Schedule** zone lists the adjustment information and the recognition amount of the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Recognition Date	Displays the date on which the recognition is scheduled.
Recognition Amount	Displays the amount of the recognition scheduled.
Adjustment Information	Displays information about the adjustments in recognition schedule.

This zone contains the **Edit** button. It is used to edit the details of recognition schedule

Note: This zone appears when the deferred revenue recognition is in the **Active** status.

Revenue Recognition Items

The **Revenue Recognition Items** zone displays the adjustment information about the recognition items. It contains the following columns:

Column Name	Column Description
Recognition Date	Displays the date on which the recognition is scheduled.
Recognition Amount	Displays the amount of the recognition scheduled.
Adjustment Information	Displays information about the adjustments in recognition schedule. " **Note:** It has a link. On clicking the link, the **Adjustment** screen appears where you can view the details of the deferred revenue recognition.

Deferred Revenue Recognition - Log

The **Log** tab contains the following zone:

- Deferred Revenue Recognition Log on page 2401

Deferred Revenue Recognition Log

The **Deferred Revenue Recognition Log** zone lists the complete trail of actions performed on the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the deferred revenue recognition
Details	Displays the details about the action performed on the deferred revenue recognition
User	Indicates the user who has performed the action on the deferred revenue recognition
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the deferred revenue recognition. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the deferred revenue recognition is changed. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

Note: You can manually add a log entry for the deferred revenue recognition by clicking the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.

Editing a Deferred Revenue Recognition

Procedure

To edit a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column \orresponding to the deferred revenue recognition whose details you want to edit.
   The **Deferred Revenue Recognition** screen appears.
3. Click the **Edit** button in the **Deferred Revenue Recognition** zone.
   The **Deferred Revenue Recognition** screen appears.

   Note: The **Edit** button appears when the deferred revenue recognition is in the **Active** status.
4. Modify the required details in the **Main** section.
5. Define, edit, or remove related deferred revenue recognitions from the deferred revenue recognition, if required.
6. Define, edit, or remove characteristics of the deferred revenue recognition, if required.
7. Click **Save**.
   The changes made to the deferred revenue recognition are saved.

Creating the Deferred Revenue Recognition Schedule

Prerequisites

To create the deferred revenue recognition schedule, you should have:

- Should have **Revenue Recognition Schedule Creation Algorithm** attached in the **DRR Template**

Procedure

To create the deferred revenue recognition schedule:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose recognition schedule you want to generate.
   The **Deferred Revenue Recognition** screen appears.
3. Click the **Generate Schedule** button in the **Deferred Revenue Recognition** zone.

   Note: The **Generate Schedule** button appears when the deferred revenue recognition is in the **Draft** status.

   The status of the deferred revenue recognition is changed to **Active**.

Defining a Characteristic for a Deferred Revenue Recognition

Prerequisites

To define a characteristic for a deferred revenue recognition, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition**)

Procedure

To define a characteristic for a deferred revenue recognition:

1. Ensure that the **Characteristics** section is expanded when you are editing a deferred revenue recognition.

   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deferred revenue recognition.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the deferred revenue recognition.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Deferred Revenue Recognition**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the

Field Name	Field Description	Mandatory (Yes or No)
		deferred revenue recognition.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the deferred revenue recognition.

2. Enter the required details in the **Characteristics** section.

   Note: If you select a characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a characteristic value.

3. If you want to define more than one characteristic for the deferred revenue recognition, click the **Add** (+) icon *a*nd then repeat step 2.

   Note: However, if you want to remove a characteristic from the deferred revenue recognition, click the **Delete** (🗑) icon corresponding to the characteristic.

Related Topics

How to edit a deferred revenue recognition	Editing a Deferred Revenue Recognition on page 2402

Adding Related Deferred Revenue Recognitions

Prerequisites

To add related deferred revenue recognitions, you should have:

- Deferred revenue recognition template defined in the system.

Procedure

To add related deferred revenue recognitions:

1. Ensure that the **Related Deferred Revenue Recognitions** section is expanded when you are editing a deferred *r*evenue recognition.

   The **Related Deferred Revenue Recognitions** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition ID	Used to specify the ID of the deferred revenue recognition. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Deferred Revenue Recognition Search** window appears.	Yes
Create Date Time	Used to indicate the creation date and time of the deferred revenue recognition.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction ID	Used to specify the ID of the financial transaction corresponding to the deferred revenue recognition. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Financial Transactions Search** window appears.	Yes

2. Enter the required details in the **Related Deferred Revenue Recognitions** section.
3. If you want to add more than one related deferred revenue recognition for the deferred revenue recognition, click the **Add** (+) icon and then repeat step 2.

Note: However, if you want to remove a related deferred revenue recognition from the deferred revenue recognition, click the **Delete** (🗑) icon corresponding to the related deferred revenue recognition.

Editing the Deferred Revenue Recognition Schedule Details

Prerequisites

To edit the details of the deferred revenue recognition schedule, you should have:

- Should have **Allow Editing Switch** as **Yes** on deferred revenue recognition template.

Procedure

To edit the details of the deferred revenue recognition schedule:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose deferred revenue recognition schedule details you want to edit.

   The **Deferred Revenue Recognition** screen appears.
3. Select the recognition whose details you want to edit in the **Recognition Schedule** zone and click the **Edit** button available in the upper left corner above the table in this zone.
   The **Edit Recognition Schedule** screen appears.

   Note: A recognition schedule from the deferred revenue recognition can be edited when the deferred revenue recognition is in the **Active** status.

   The **Edit Recognition Schedule** screen contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Information	Displays the information about the deferred revenue recognition.
Financial Transaction Information	Displays the information of the financial transaction corresponding to the deferred revenue recognition.

In addition to these fields, this screen contains following columns:

Column Name	Column Description	Mandatory (Yes or No)
Recognition Date	Used to display the date on which the deferred revenue is recognized.	Yes
Recognition Amount	Used to display the amount of the deferred revenue.	Yes
Adjustment ID	Used to display the adjustment id.	Not applicable

4. Modify the details of the recognition schedule.
5. If you want to define more than one recognition schedule for the deferred revenue recognition, click the **Add** (+) icon and then repeat step 4.

   Note: However, if you want to remove a recognition schedule from the deferred revenue recognition, click the **Delete** (🗑) icon corresponding to the recognition schedule.
6. Click **Save**.
   The changes made to the recognition schedule are saved.

Viewing the Log of a Deferred Revenue Recognition

Procedure

To view the log of a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose log you want to view.

   The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

   - Deferred Revenue Recognition - Main on page 2398
   - Deferred Revenue Recognition - Log on page 2401
3. Click the **Log** tab.
   The **Log** tab appears.
4. View the complete trail of actions performed on the deferred revenue recognition in the **Deferred Revenue Recognition Log** zone.

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the dispute request.
Details	Displays the details about the deferred revenue recognition log
User	Indicates the user who has performed deferred revenue recognition
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the deferred revenue recognition
Status Reason	Displays the status reason of action performed on the deferred revenue recognition

Adding a Log Entry for a Deferred Revenue Recognition

Procedure

To add a log entry for a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column *c*orresponding to the deferred revenue recognition whose log you want to edit.

   The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:.

   - Deferred Revenue Recognition - Main on page 2398
   - Deferred Revenue Recognition - Log on page 2401
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click on the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.
   The **Add Deferred Revenue Recognition Schedule Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes Or No)
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.	Not applicable
Log Details	Used to specify additional comments for the deferred revenue recognition.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Deferred Revenue Recognition Log** zone.

Product Lifecycle Management

Topics:

- Prerequisites
- Product Status Transition through User Interface
- Product Status Transition through a Batch Process
- Product Version Status Transition
- Product Enrollment Status Transition through User Interface
- Product Enrollment Status Transition through a Batch Process
- Product Service (Used for Searching)
- Product Service (Used for Viewing)
- Product (Used for Searching)
- Product Version (Used for Viewing)
- Product (Used for Viewing)
- Product Enrollment (Used for Searching)
- Product Enrollment (Used for Viewing)

Oracle Revenue Management and Billing facilitates a process of managing the entire lifecycle of a product from inception to service and then to retirement. The system allows you to create the following types of products:

- **Standard** - This type of product is a standalone product.
- **Packaged** - This type of a product is a bundle or group of products.
- **Informational** - This type of a product is used in the product hierarchy, but does not have its own pricing.

On creating a product, the status of the product is set to **Draft**. You can associate a product to one or more divisions. You can create a product to product relationship in the system. You can add product versions in the product. A product version is the entity which holds the following information:

- Product services which are offered with the product
- Price list from where the pricing for offered product services should be obtained.
- Eligibility criteria which must be satisfied when the account enrolls for the product.

The above information is captured when you create a product version for a standard product. However, when you create a product version for a packaged product, it holds the following information:

- Standard products which are offered in the packaged product.

  Note: Some of these products might be compulsorily offered with the packaged product while some of the products might be optional.
- Standard products' services which are offered in the packaged product.

  Note: Some of these product services might be compulsorily offered with the standard product while some of the product services might be optional.
- Add-on product services which are offered in the packaged product.
- Price list from where the pricing for offered product services and add-on product services should be obtained.
- Eligibility criteria which must be satisfied when the account enrolls for the packaged product.

A product version is effective from a particular date and its effective date must fall within the product date range. On creating a product version, the status of the product version is set to **In Progress**. You can activate a product when at least one of its product versions is in the **Finalized** status.

A product service can be associated to one or more price items. A product service can be offered with a product when it is associated with at least one price item in the system.

Once the product is activated, you can enroll the account for the product. On enrolling for a product, the system retrieves the product details from the product version which is effective on the system date. While enrolling for a standard product, you cannot remove mandatory product services from the product. However, you can enroll for optional product services which are offered with the product.

Similarly, while enrolling for a packaged product, you cannot remove mandatory products and product services from the packaged product. However, you can enroll for optional products and product services which are offered with the packaged product. While enrolling an account for a product, you can set the product enrollment priority for the account.

Once you create the product enrollment, the status of the enrollment is set to **Pending**. On submitting the product enrollment, the validation process is initiated. If all conditions are met, the status of the product enrollment is changed to **Enrolled**. You can unenroll for the product, whenever required.

You can retire a product, whenever required. The product, product version, and product enrollment goes through various statuses in their lifecycle.

The following batches are newly introduced for the Product Lifecycle Management feature:

- Product BO Monitor (C1-PRTRN)
- Product Enrollment Monitor (C1-ENTRN)

For more information on how to setup the product lifecycle management feature, see Prerequisites on page 2411.

Prerequisites

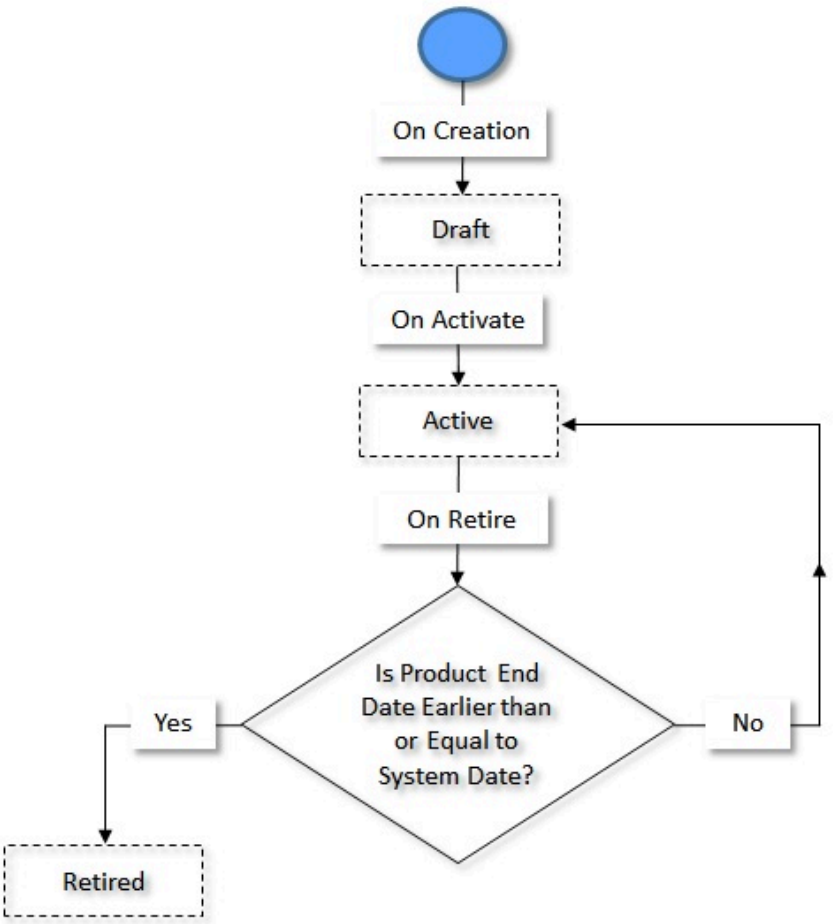
To setup the product lifecycle management feature, you need to do the following:

- Define the required customer and account in the system.
- Create a approval workflow group with a group name **PRODUCTPLM** for the product and product version.
- Define the feature configuration as **C1-PRODCH**.
- Define the sequence of execution of **C1-PROD-TDCC**, **C1-TRAN-RETR**, and **C1-PROD-ACTV** algorithms, in the **ACTIVE** status of the **C1_PRODUCT_BO** business object.
- Define the following parameters for the predefined **C1-PROD-TDCC** algorithm-type.
  - To Do Type1
  - Number of Days
  - Customer Contact
- Define the parameters for the predefined **C1-PRTRN** batch control.

  Note: If the batch date is not defined while creating the batch control, system date is assigned as the batch date.
- Define at least one packaged or standard product for product enrollment purposes.
- Associate at least one price list with a product, when you are defining single or multiple product versions.

Product Status Transition through User Interface

The following figure graphically indicates how a product moves from one status to another through the user interface:



Product Status Transition through a Batch Process

The following figure graphically indicates how a product moves from one status to another through the **Product BO Monitor** batch:

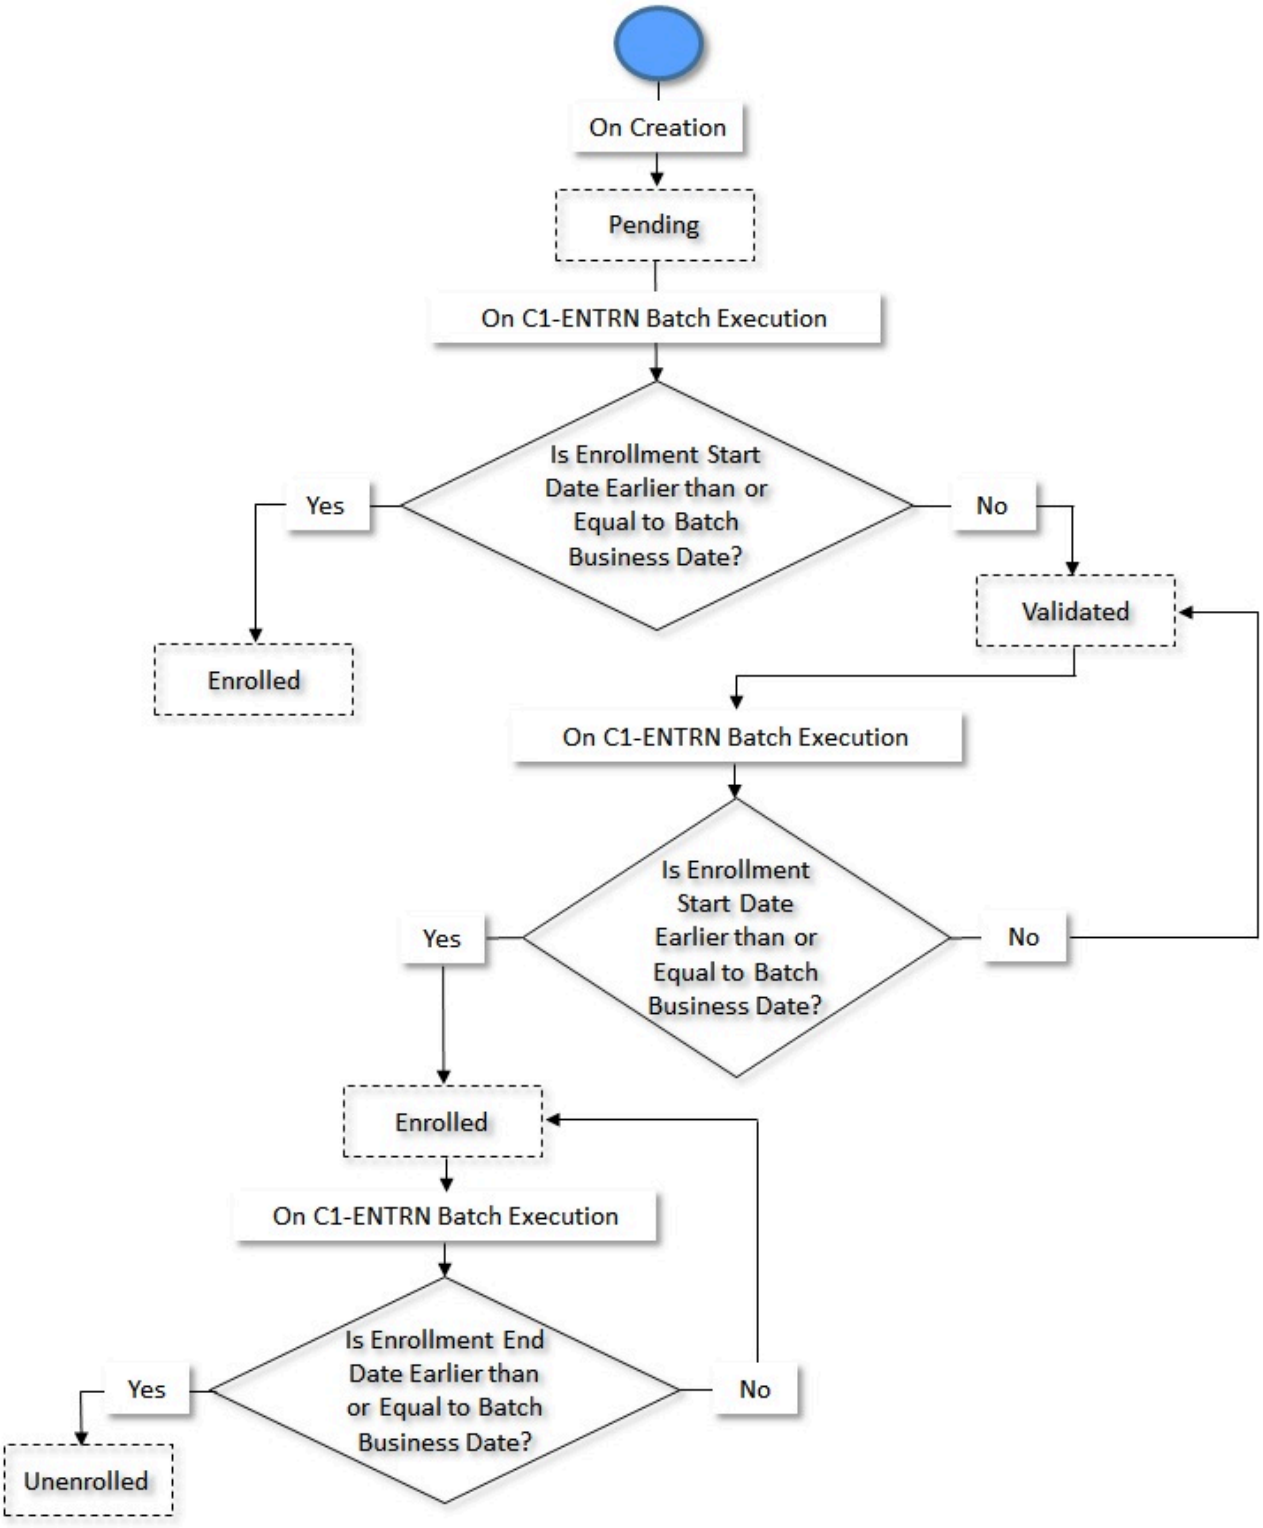
The following figure graphically indicates how a product enrollment moves from one status to another through the **Product Enrollment Monitor (C1-ENTRN)** batch:



Product Service (Used for Searching)

The **Product Service** screen allows you to search for a product service using various search criteria. Through this screen, you can navigate to the following screen:

- Product Service (Used for Viewing) on page 2424

This screen consists of the following zone:

- Search Product Service on page 2418

For more information on...	See...
How to search for a product service	Searching for a Product Service on page 2419
How to view the details of a product service	Viewing the Product Service Details on page 2424

Search Product Service

The **Product Service Search** zone allows you to search for a product service using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to search for a product service based on the unique user-defined product service.	No
Description	Used to specify the description of a product service.	No
Start Date	Used to search for product service which starts from a particular date onwards.	No
End Date	Used to search for product service which is created till a particular date.	No
Price Item Information	Used to search for product service for which a price item information is created or updated in the system.	No

Note: You must specify at least one search criterion while searching for a product service.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Product Service	Displays the service code of a product service.
Description	Displays the description of product service. **Note:** It has a link. On clicking the link, the **Product Service** screen appears where you can view the details of the respective product service.
Start Date	Displays the date from when the product service is effective.
End Date	Displays the date till when the product service is effective.

On clicking the **Broadcast** (((•))) icon corresponding to a service code, the **Price Items** zone appears with the details of the respective product service.

Searching for a Product Service

Prerequisite

To search for a product service, you should have:

- Product Service defined in the application.
- Price Item defined in the application.

Procedure

To search for a product service:

1. From the **Main** menu, select **Pricing Management** and then click **Product Service**.
   A sub-menu appears.
2. Click the **Search** option from the **Product Service** sub-menu.
   The **Product Service** screen appears.
3. Enter the search criteria in theSearch Product Service on page 2418 zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of product services that meet the search criteria appear in the **Search Results** section.

Viewing the Product Service Price Items

Procedure

To view the price items of the product:

1. Search for a product service in the **Product Service** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to a service code whose details you want to view.

   The **Price Items** zone appears. It contains the following columns:

Column Name	Column Description
Price Item	Displays the price item code that is set for each product service. **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

Defining a Product Service

Prerequisites

To define a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)
- Price Item business object defined in the application.

Procedure

To define a product service:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product Service**.
   The sub-menu appears.
3. Click the **Add** option from the **Product Service** sub-menu.

   The **Product Service** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details of the product service.
   - **Characteristics** - Used to define the characteristics for a product service.
   - **Price Items** - Used to define price item for a product service.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to specify the product service. **Note:** While defining a product service, ensure that at least one price item is associated with the product service.	Yes
Description	Used to specify the description of a product service.	Yes
Start Date	Used to specify the date from when the product service is effective. **Note:** The product service end date cannot be earlier than the product service start date.	Yes
End Date	Used to specify the date till when the product service is effective. **Note:** The product service end date cannot be earlier than the product service start date.	Yes

   Note:

   If the product service is used in one or more product versions, the product service's end date cannot be earlier than the product version's effective date.
4. Enter the required details in the **Main** section.

   Note:

   The Start Date field is mandatory.
5. Define the characteristics for a product service, if required.
6. Define the price item for a product service.
7. Click **Save**.
   The product service is defined.

Related Topics

Defining the characteristics for a product service	Defining a Characteristics for a Product Service on page 2423
Associating the product service with a Price Item	Associating a Product Service with a Price Item on page 2422

Associating a Product Service with a Price Item

Prerequisites

To associate a product service with a price item, you should have:

- Price Item business object defined in the application.

Procedure

To associate a product service with a price item:

1. Ensure that the **Price Items** section is expanded when you are defining, editing, or copying a product service.

   The Price Item section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item which is associated with this product service. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Price Item Search** window appears.	No
Start Date	Used to specify the date from when the product service is effective.	No
End Date	Used to specify the date till when the product service is effective. **Note:** The price item end date cannot be earlier than the price item start date.	No

2. Enter the required details in the **Price Items** section.

   Note: The product service is used in one or more product versions, and therefore the product service's start date cannot be later than the product version's effective date.

3. If you want to associate one or more price items with the product service, click the **Add** (+) *i*con and then repeat step 2. However, if you want to remove the price items from the product service, click the **Delete** (🗑) icon corresponding to the price item.
4. Click **Save**.

   Note:

   You cannot associate the same price item multiple times with the product service.

   You can remove a price item from the product service even though the product version is in the Finalized status. A To Do Type named **C1-SVCU1** gets created whenever any modifications are made to the product service.

   You can associate a price item with a product service when the price item's date range is within the product service's date range.

   If there are changes with respect to the price items associated with the product service, then you must create a new version for that product.

   The product service is associated with the price item.

Defining a Characteristics for a Product Service

Prerequisites

To define a characteristic for a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)

Procedure

To define a characteristic for a product service:

1. Ensure that the **Characteristics** section is expanded when you are *d*efining, editing, or copying a product service.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the product service.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the product service.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Product Service**	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the product service.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the product service.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the product service, click the **Add** (+) *I*con and then repeat step 2. However, if you want to remove a characteristic from the product service, *c*lick the **Delete** (🗑) icon corresponding to the characteristic.
4. Select an appropriate characteristic type from the **Characteristic Type** list.

Product Service (Used for Viewing)

The **Product Service** screen allows you to:

- View the details and characteristics of the product service
- Edit, Delete, and Copy the details of the product service
- View the product service business object
- View the price items that are associated with the product service

The **Product Service** screen consists of the following zones:

- Product Service on page 2425
- Price Items on page 2425

Product Service

The **Product Service** zone displays the details of the product service. It contains the following sections:

- **Main** - Displays the basic information about the product service. It contains the following fields:

Field Name	Field Description
Product Service	Displays the product service that is assigned to a product service.
Description	Displays the description of the product service.
Start Date	Displays the date when the product service starts.
End Date	Displays the date when the product service ends.

- **Characteristics** - Lists the characteristics defined for the product service. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the product service.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the product service.
Delete	Used to delete the product service.
Duplicate	Used to create a new product service using an existing product service information.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product service is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

Price Items

The **Product Service Price Item** zone lists various price items that are associated with a service. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays the price item information that is associated with a service. **Note:** It has a link. On clicking the link, the **Price Item** screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

Editing a Product Service

Procedure

To edit a product service:

1. Search for the product service in the **Product Service**.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the product service whose details you want to edit.
   The **Product Service** screen appears.
3. Click the **Edit** button in the **Product Service** zone.
   The **Product Service** screen appears.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Modify the details of the product service in the main section, if required.
5. Modify the characteristics for a product service, if required.
6. Associate the price items with a product service, if required.
7. Click **Save**.
   The changes made to the product service are saved.

Deleting a Product Service

Procedure

To delete a product service:

1. Search for the product service in the **Product Service**.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. In the **Search Results** section, click the link in the **Description** column *c*orresponding to the product service whose details you want to delete.
   The **Product Service** screen appears.
3. Click the **Delete** button in the **Product Service** zone.
   A message appears confirming whether you want to delete the product service.

   Note: If the product service is associated with the product version, then the product service cannot be deleted.
4. Click **OK**.
   The product service is deleted.

Copying a Product Service

Instead of creating a product service from scratch, you can create a new product service using an existing product service. This is possible through copying a product service. On copying a product service, the details including the algorithms and characteristics are copied to the new product service. You can then edit the details, if required.

Prerequisites

To define a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)
- Price Item business object defined in the application.

Procedure

To define a product service:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product Service**.
   The sub-menu appears.
3. Click the **Search** option from the **Product Service** sub-menu.

   The **Product Service** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details of the product service.
   - **Characteristics** - Used to define the characteristics for a product service.
   - **Price Items** - Used to define price item for a product service.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to specify the product service.	Yes
Description	Used to specify the description of a product service.	Yes
Start Date	Used to specify the date from when the product service is effective.	Yes
End Date	Used to specify the date till when the product service is effective.	Yes

Tip: Alternatively, you can click the **Duplicate** button in the **Record Actions** section, in the **Product Service** zone to create a copy of the product service.

4. Enter the required details in the **Main** section.
5. Define the characteristics for a product service, if required.
6. Define the price item for a product service, if required.
7. Click **Save**.
   The new product service is defined.

Searching for a Product

Prerequisite

To search for a product, you should have:

- Product Type defined in the application.
- Product Category defined in the application.
- Division defined in the application.
- Relationship Type defined in the application.

Procedure

To search for a product:

1. From the **Main** menu, select **Pricing Management** and then click **Product**.
   A sub-menu appears.
2. Click the **Search** option from the **Product** sub-menu.
   The **Product** screen appears.
3. Enter the search criteria in the **Search Product** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of products that meet the search criteria appear in the **Search Results** section.

Defining a Product

Prerequisites

To define a product, you should have:

- Product Type should be defined in the application.
- Product Category should be defined in the application.

Procedure

To define a product:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. From the **Menu** list, select **Pricing Management**, and then click **Product**.
The sub-menu appears.
3. Click the **Add** option from the **Product** sub-menu.

The **Product** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product.
- **Divisions** - Used to define the characteristics for a product.
- **Product to Product Relationship** - Used to define product to product relationship for a product.
- **Characteristics** - Used to define the characteristics for a product.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product.	Yes
Description	Used to specify the description of a product.	Yes
Status	Displays the status of the product. **Note:** Whenever a new product is added, it will have the status as **Draft**.	Yes
Product Type	Used to indicate the type of a product.	Yes
Product Category	Used to indicate the category of a product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Compliance Number	Used to specify the compliance number received from the legal department.	No
Product Manager To Do Role	Used to specify all the To Do raised against this product that are further assigned to this product manager To Do role.	No

4. Enter the required details in the **Main** section.

Note:

You cannot add or edit a product version when the product is in the Retired status.

The Start Date field is mandatory.

5. Associate a division with a product, if required.
6. Define the characteristics for a product, if required.

Note:

Ensure that the value is specified for the characteristic type option type in the C1-PRODCH feature configuration.

Ensure that a valid value is specified for the characteristic type.

7. Define the price item for a product, if required.
8. Click **Save**.
The product is defined.

Associating a Product with a Division

Prerequisites

To associate product with a division, you should have:

- Division defined in the application.

Procedure

To associate product with a division:

1. Ensure that the **Divisions** section is expanded when you are defining, editing, or copying a product.

   The Division section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division of the product.	Yes

2. Enter the required details in the **Divisions** section.

   Note:

   At least one division must be associated with the product.

3. If you want to associate one or more divisions with the product, click the **Add** (+) icon and then repeat step 2.

   Note:

   However, if you want to remove the divisions from the product, click the **Delete** (🗑) icon corresponding to the product.

4. Click **Save**.

   Note:

   Ensure that the division associated with the product is associated to the price list.

   You cannot remove the division from the product because the price list associated to the product version which is effective on (mention date) is associated to the division.

   The divisions are associated with the product.

Product Version - Main

The **Product Version - Main** tab displays information about the product version and services. It contains the following zones:

- Product Version on page 2447
- Services on page 2450
- Add-on Product Services on page 2450
- Price Items on page 2425
- Eligibility Criteria on page 2451

Product Version

The **Product Version** zone displays the details of the product version. It contains the following sections:

- **Main** - Displays the basic information about the product version. It contains the following fields:

Field Name	Field Description
Product	Displays information about the product.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Product** screen appears where you can view the details of the product.
Effective Date	Displays the date from when the product version will be effective.
Product Type	Displays the type of product for which the product version is created.
Status	Displays the status of the product version.
Description	Displays the description of the product version.
Terms and Conditions	Displays the terms and conditions that are applicable for the product version.

- **Record Actions** - This section contains the following fields:

Button Name	Button Description
Edit	Used to edit the details of the product version. **Note:** The **Edit** button appears when the product version status is **In Progress, Finalized, and Draft**.
Delete	Used to delete the details of the product version. **Note:** The **Delete** button appears when the product version status is **In Progress, Finalized, and Draft**.
Duplicate	Used to create a new version using an existing product version. **Note:** The **Duplicate** button appears when the product version status is **In Progress, Finalized, and Draft**.
Finalized	Used to finalize all the changes and make the product **Active**.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product version is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the product version is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- Enter the required details in the Products on page 2449 zone.
- Enter the required details in the Product Services on page 2449 zone.

Note: Products and Product Services section is displayed when the product type is selected as **Packaged** product from the Search Product on page 2428 zone in the **Product** screen.

- Enter the required details in the Add-on Product Services on page 2450 zone.
- Enter the required details in the Services on page 2450 zone.

Note: The services section appear when the product type is selected as a **Standard** product from the Search Product on page 2428 zone in the **Product** screen.

- Enter the required details in the Price List on page 2451 zone.
- Enter the required details in the Eligibility Criteria on page 2451 zone.

Products

The **Products** zone displays the details of the product. It contains the following fields:

Field Name	Field Description
Product	Displays the product service that is assigned to a product.
Effective Date	Displays the date from when the product is effective.
Description	Displays the description of the product

Product Version - Log

The **Product Version - Log** tab contains the following zone:

- Product Version Log on page 2453

Product Version Log

The **Product Version - Log** zone lists the complete trail of actions performed on the product version. It contains the following columns:

Column Name	Column Description
Date Time	Displays the date and time when the action was performed on the product version.
Details	Displays the details about the action performed on the product version.
User	Displays the user who has performed the action on the product version.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed on the product version.
Status Reason	Displays the status reason of action performed on the product version.

Editing a Product Version

Procedure

To edit a product version:

1. Search for the product in the **Search Product** zone.
2. In the **Search Results** section, click the **Broadcast** (📡) icon, corresponding to the product column.
   The **Product Version List** zone appears.
3. Click the link in the **Description** column, corresponding to the status column.
   The **Product Version** screen appears.
4. Click the **Edit** button in the **Product Version** zone.
   The **Product Version** screen appears.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all

input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Modify the details of the product version in the main section, if required.

   Note:

   The effective date of a product version cannot be later than the product end date.

6. Define, edit, or remove the products and/or services for a product version, if required.

   Note:

   You must select the Inclusion check box when the product service is defined as mandatory in the effective product version.

7. Modify the price list for a product version, if required.
8. Define, edit, or remove the eligibility for a product version, if required.
9. Define, edit, or remove the characteristics for a product version, if required.
10. Click **Save**.

    Note:

    You cannot edit the details of the product version except the characteristics when the product version is in the Finalized status.

    The changes made to the product version are saved.

Deleting a Product Version

Procedure

To delete a product version:

1. Search for the product in the **Search Product** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. In the **Search Results** section, click the **Broadcast** (ᯤ) icon, corresponding to the product column.
   The **Product Version List** zone appears.
3. Click the link in the **Description** column, corresponding to the status column.
   The **Product Version** screen appears.
4. Click the **Delete** button in the **Product Version** zone.
   A message appears confirming whether you want to delete the product version.
5. Click **OK**.

   Note:

   You cannot delete the product version which is in the Finalized status.

   The product version is deleted.

Copying a Product Version

Instead of creating a product version from scratch, you can create a new product version using an existing product version. This is possible through copying a product version. On copying a product version, the details including the algorithms and characteristics are copied to the new product version. You can then edit the details, if required.

Prerequisites

To copy a product version, you should have:

- Product and Product Type defined in the application.
- Product Status and Service Code defined in the application.
- Product Category, Division, and Product To Do Role defined in the application.
- Eligibility Type, Characteristic Type, Price List, and Terms and Conditions defined in the application.
- Parameter, Operator, Parameter Value Type, Is True, Is False, and Is Sufficient defined in the application.

Procedure

To copy a product version:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product**.
   The sub-menu appears.
3. Click the **Search** option from the **Product** sub-menu.
   The **Product** screen appears.
4. In the **Search Results** section, click the **Broadcast** (ᯤ) icon corresponding to the product column *w*hose version you want to copy.
   The **Product Version List** zone appears.
5. Click the link in the **Description** column, to view the details of the product version.
   The **Product Version** screen appears.
6. Click the **Duplicate** button in the **Record Actions** section.
   The **Product Version** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details of the product version.
   - **Products and Services** - Used to define the products and services for a product version.
   - **Price List**

- Used to define the Price List for the product version.

- **Eligibility**

  - Used to define the Eligibility for the product version.

- **Characteristics**

  - Used to define the Characteristics for the product version.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Type	Displays the product type.	Not applicable
Product	Displays the product code.	Not applicable
Effective Date	Used to specify the effective date from when the product version will be effective.	Yes
Status	Used to specify the status of the version. **Note:** It is a read-only field, and cannot be edited.	Yes
Description	Used to specify the description for the version.	No
Terms and Conditions	Used to specify the terms and conditions for the version. **Note:** Click the **Search** (🔍) icon appearing corresponding to the **Terms and Conditions** field. On clicking the **Search** icon, you can search for a predefined terms and conditions.	Yes

7. Enter the required details in the **Products and Services** and/or **Product Services** section.

   Note: If the product type is **Packaged** then **Products and Services** section appears. If the product type is **Standard** then **Product Services** section appears. If the product type is **Information Only** neither of these sections are displayed.

8. Enter the required details in the **Price List** section.
9. Enter the required details in the **Eligibility** section.
10. Enter the required details in the **Characteristics** section.
11. Click **Save**.
    The new product service is defined.

Finalizing a Product Version

Prerequisites

To finalize a product version, you should have:

- Product Version status as In Progress

Procedure

To finalize a product version:

1. Search for the product in the **Product Search** screen.
2. In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the product *w*hose details you want to view.
   The **Product Version List** screen appears.
3. In the **Product Version List** zone, click the link in the **Description** column, for that product version, *w*hose product version log you want to view.
   The **Product Version** screen appears.
4. Click the **Finalize** button in the **Product Version** zone.
   The status of the product version is changed to **Finalized**.

Note:

You cannot finalize the product version when its effective date is earlier than the product start date.

Note:

The **Finalize** button appears when the product version is in the **In Progress** status.

Editing a Product

Procedure

To edit a product:

1. Search for the product in the **Search Product** zone.
2. In the **Search Results** section, click the link in the **Description** column, corresponding *t*o the product column whose details you want to edit.
   The **Product** screen appears.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
3. Click the **Edit** button in the **Record Actions** zone.
   The **Product** screen appears.
4. Modify the details of the product in the main section, if required.

   Note:

   The product start date cannot be later than its product version's effective date.

   The product end date cannot be earlier than its product version's effective date.

   You cannot update the product type field because a product version is already defined for the product.

   You cannot add or edit a product version when the product is in the Retired status.
5. Define, edit, or remove the divisions for a product, if required.

   Note:

   You cannot remove the division from the product because an account from this division is already enrolled to the product.

You cannot remove the division from the packaged product because the child product is associated to the division.

6. Define, edit, or remove the product to product relationship for a product, if required.
7. Define, edit, or remove the characteristics for a product, if required.

Note:

You cannot change the value of the characteristic when the product is in the Active status. To change the value of the characteristic, the characteristic type should not be of **C1-STOPE** type.

8. Click **Save**.
   The changes made to the product are saved.

Copying a Product

Instead of creating a product from scratch, you can create a new product using an existing product. This is possible through copying a product. On copying a product, the details including the algorithms and characteristics are copied to the new product. You can then edit the details, if required.

Prerequisites

To copy a product, you should have:

- Product, Product Type, Product Category, and Product Manager's To Do Role defined in the application.
- Division defined in the application.
- Relationship Type and Characteristic Type defined in the application.

Procedure

To copy a product:

1. Search for a product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding *to* the product column, whose details you want to copy.
   The **Product** screen appears.
3. Click the **Duplicate** button in the **Record Actions** section.
   The **Product** screen appears.
4. Enter the required product details in the **Main** section, if required.
5. Define, edit, or remove the divisions for a product, if required.
6. Define, edit, or remove the product to product relationship for a product, if required.
7. Define, edit, or remove the characteristics for a product, if required.
8. Click **Save**.
   The new product is defined.

Activating a Product

Prerequisites

To activate a product, you should have:

- Product must have the status as Draft.
- Product Version Status should be Finalized.

Procedure

To activate a product:

1. Search for a product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding *t*o the product column that needs to be activated.
   The **Product** screen appears.
3. Click the **Active** button in the **Record Actions** section.

   Note:

   You can activate a product when there is at least one product version in the Finalized status.

   The product is activated, as the status is changed from **Draft** to **Active**.

How to retire a product	Retiring a Product on page 2463

Retiring a Product

Prerequisites

To retire a product, you should have:

- Product Status must be Active.
- Product End Date less than equal to current date.

Procedure

To retire a product:

1. Search for a product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding *t*o the product column that needs to be activated.
   The **Product** screen appears.
3. Click the **Retire** button in the **Record Actions** section.
   The **Retire Product** screen appears.
4. Mention the **End Date** of the product.

   Note:

   The enrollments for the product, which you are retiring, are still effective.
5. Click **Save**.

   The product is retired, as the status is changed from **Active** to **Retired**.

   Note:

   On retiring the product, the end date of the effective product enrollments is set to the system date.

Viewing the Log of a Product

Procedure

To view the log of a Product:

1. Search for the product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding *t*o the product, whose log you want to view.
   The **Product** screen appears. It consists of the following tabs:
   - Product - Main on page 2458
   - Product - Log on page 2461
3. Click the **Log** tab.
   The **Log** tab appears.
4. View the complete trail of actions performed on the product version in the **Product Log** zone.

Search Enrollment

The **Search Enrollment** zone allows you to search for the enrolled products using various search criteria. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an enrolled product using the option of Product Enrollment. The valid values are: • Product Enrollment **Note:** By default, the **Product Enrollment** option is selected.	Yes
Enrollment ID	Used to search an enrollment, based on the enrollment ID.	No
Account ID	Used to search an enrollment, based on the account ID.	No
Person ID	Used to search an enrollment, based on the person ID.	No
Product	Used to search an enrollment, based on the product ID.	No
Status	Used to search an enrollment with a particular status. The valid values are: • Canceled • Enrolled • Error • Pending • Unenrolled • Validated	No
Start Date	Used to search enrollments which are initiated from a specific date.	No
Enrollment Channel	Used to search enrollments based on a enrollment source. The valid values are:	No

Field Name	Field Description	Mandatory (Yes or No)
	• Oracle Revenue Management and Billing	
End Date	Used to search enrollments which are initiated till a specific date.	No

Note: You must specify at least one search criterion while searching for an enrollment.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product. **Note:** It has a link. On clicking the link, the **Product Enrollment** screen appears where you can view the details of the respective enrolled product.
Account Information	Displays the account ID of the enrolled product. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Start Date	Displays the date from when the enrolled product is effective.
End Date	Displays the date till when the enrolled product is effective.

On clicking the **Broadcast** icon corresponding to an enrollment ID, the **Enrolled Products** zone appears with the details of the products that are enrolled.

- **Enrolled Products** - The **Enrolled Products** section contains the following columns:

Column Name	Column Description
Product Type	Displays the type of product which is enrolled.
Product	Displays the name of the enrolled product.
Version Description	Displays the description of the enrolled product version. **Note:** It has a link. On clicking the link, the **Product Version** screen appears where you can view the details of the respective enrolled product.
Start Date	Displays the date from when the enrolled product is effective.
End Date	Displays the date till when the enrolled product is effective.

- **Enrolled Services** - The **Enrolled Services** section contains the following columns:

Column Name	Column Description
Service Code	Displays the type of service which is enrolled.
Description	Displays the description of the enrolled service. **Note:** It has a link. On clicking the link, the **Product Service** screen appears where you can view the details of the respective enrolled service.
Start Date	Displays the date from when the enrolled service is effective.
End Date	Displays the date till when the enrolled service is effective.

Searching for a Product Enrollment

Prerequisite

To search for a product enrollment, you should have:

- Enrollment Details defined in the application.
- Account ID and Person ID defined in the application.
- Product and Status defined in the application.
- Enrollment defined in the application.

Procedure

To search for a product enrollment:

1. From the **Main** menu, select **Pricing Management** and then click **Product Enrollment**.
   A sub-menu appears.
2. Click the **Search** option from the **Product Enrollment** sub-menu.
   The **Product Enrollment** screen appears.
3. Enter the search criteria in the Search Enrollment on page 2465 zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
4. Click **Search**.
   A list of enrolled products that meet the search criteria appear in the **Search Results** section.

   Note: If you have specified any other search criterion other than the product enrollment ID, the system generates a message saying that the product enrollment ID is invalid.

Enrolling an Account for One or More Products and Services

Prerequisites

To enroll an account for one or more products and services, you should have:

- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

Procedure

To enroll an account for one or more products and services:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.

2. From the **Menu** list, select **Pricing Management**, and then click **Product Enrollment**.
   The sub-menu appears.
3. Click the **Add** option from the **Product Enrollment** sub-menu.

   The **Product Enrollment** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details of the account for product enrollment. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Used to specify the enrollment ID once the product is defined for an enrollment. **Note:** Enrollment ID is displayed when the product is added for enrollment.	Yes
Account ID	Used to specify the account ID. **Note:** You can search for an account by clicking the **Search** (🔍) icon corresponding to the **Account Information** field.	Yes
Status	Displays the status of the product. **Note:** The product enrollment will always have the status as **Pending**.	No
Start Date	Used to specify the date from when the product enrollment is effective.	Yes
End Date	Used to specify the date till when the product enrollment is effective.	Yes
Enrollment Channel	Used to specify the source for product enrollment.	Yes
Comments	Used to specify the comments for product enrollment.	No

   - **Product and Services** - Used to define products and services for a product. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product for enrollment. **Note:** You can search for a product by clicking the **Search** (🔍) icon corresponding to the **Product** field.	No
Start Date	Used to specify the date from when the product is effective.	No
End Date	Used to specify the date till when the product is effective.	No
Inclusion	Used to indicate whether the product is used for enrollment.	No
Standard Product	Displays the standard product which is included within the main product.	No
Start Date	Used to specify the date from when the standard product is effective.	No
End Date	Used to specify the date till when the standard product is effective.	No

Field Name	Field Description	Mandatory (Yes or No)
Inclusion	Used to indicate whether the standard product is used for enrollment.	No
Services	Displays the service that is a part of the standard product.	No
Start Date	Used to specify the date from when the service is effective.	No
End Date	Used to specify the date till when the service is effective.	No
Inclusion	Used to indicate whether the service is used for enrollment. **Note:** The inclusion check-box is already checked, if the service has been marked as **Mandatory** in the **Product Version** zone.	No
Add on Services	Displays the add-on service which is a part of the packaged product.	No
Start Date	Used to specify the date from when the add-on service is effective.	No
End Date	Used to specify the date till when the add-on service is effective.	No
Inclusion	Used to indicate whether the add-on service is used for enrollment.	No

- **Product Priority** - Used to define the product priority for product enrollment.

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Displays the enrollment ID.	No
Packaged Products	Displays the packaged product which is added for enrollment.	No
Standard Products	Displays the standard product which is added for enrollment.	No
Product Enrolled Start Date	Displays the date from when the product's enrolled date is effective.	No
Product Enrolled End Date	Displays the date till when the product's enrolled date is effective.	No
Priority	Displays the priority of the product in terms of enrollment.	No

- **Characteristics** - Used to define the characteristics for a product enrollment.

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic will be effective.	No
Characteristics Type	Used to indicate the characteristic type for a characteristic.	No
Characteristics Value	Used to indicate the characteristic value.	No

4. Enter the required details in the **Main** section.

Note:

The Start Date field is mandatory.

5. Enter the required details in the **Product and Services** section.

   Note:

   At least one product service must be added in the product version.

6. Enter the required details in the **Product Priority** section.

   Note:

   Ensure that priority for the product is specified.

7. Enter the required details in the **Characteristics** section.
8. Click **Save**.

   Note:

   You cannot enroll for a product where none of its product versions are effective within the enrollment date range.

   You cannot enroll for a product where the product start date is later than the enrollment start date.

   The enrollment start and end dates should be within the start and end dates of the product.

   At least one product must be selected while enrolling products for an account.

   At least one price item associated with the product service must be effective during enrollment.

   The account is added for enrollment.

Enrolled Add-on Product Services

The **Enrolled Add-on Product Services** zone displays the standard products that have been enrolled. It contains the following columns:

Columns Name	Column Description
Product Service	Displays the add-on product enrolled service.
Description	Displays the description of the add-on product enrolled service. **Note:** It has a link. On clicking the link, the **Product Service** screen appears with the service details of the respective product.
Start Date	Displays the date from when the enrolled add-on product service is effective.
End Date	Displays the date till when the enrolled add-on product service is effective.

Note: By default, the **Enrolled Add-on Product Services** zone does not appear. It appears when the product type is **Packaged**, and the **Broadcast** (ᯤ) icon is clicked, corresponding to the product type column.

Product Priority

The **Product Priority** zone displays the products that have been assigned a priority for enrollment. It contains the following columns:

Columns Name	Column Description
Product Type	Displays the add-on product enrolled service.
Priority	Displays the priority assigned to the product in terms of enrollment.
Product	Displays the product that has an enrollment priority. **Note:** It has a link. On clicking the link, the **Product** screen appears with the product details of the respective product.

Columns Name	Column Description
Start Date	Displays the date from when the product priority is effective.
End Date	Displays the date till when the product priority is effective.

Product Enrollment - Log

The **Product Enrollment - Log** tab contains the following zone:

- Enrollment Log on page 2480

Enrollment Log

The **Enrollment Log** zone lists the complete trail of actions performed in the product enrollment. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed in the product enrollment.
Details	Displays the details about the action performed in the product enrollment.
User	Displays the user who has performed the action in the product enrollment.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed in the product enrollment.
Status Reason	Displays the status reason of action performed in the product enrollment.

Viewing the Standard Products Included in an Enrolled Product

Procedure

To view the standard product included in an enrolled product:

1. Search for an enrolled product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Enrollment ID** column whose details you want to view.

   The **Product Enrollment** screen appears.

Note: To view the standard products that are included in an enrolled product, the product must be a **Packaged** product.

3. In the **Enrolled Products** zone, click the **Broadcast** ( ) icon corresponding to the product type, *w*hose enrolled standard products you want to view.

   The **Enrolled Standard Products** zone appears.

4. View the list of the standard products that are enrolled in the **Enrolled Standard Products** screen.

Note: The **Enrolled Standard Products** zone appears when the product is of **Business** type, displayed in the **Enrolled Products** zone.

Editing a Product Enrollment

Procedure

To edit a product enrollment:

1. Search for the product in the **Search Enrollment** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.
   The **Product Enrollment** screen appears.
3. Click the **Edit** button in the **Product Enrollment** zone.
   The **Product Enrollment** screen appears.
4. Modify the details of the product version in the main section, if required.
5. Define, edit, or remove the products and/or services for a product enrollment, if required.
6. Modify the product priority for a product enrollment, if required.

Note:

The priority for the enrolled product must be greater than zero (0).

7. Define, edit, or remove the characteristics for a product enrollment, if required.
8. Click **Save**.

Note:

You cannot edit the details of the product enrollment when it is in the enrolled status.

The changes made to the product enrollment are saved.

You cannot enroll for more than one product with the same product type and priority combination.

Copying a Product Enrollment

Instead of creating a product enrollment from scratch, you can create a new product enrollment using an existing enrollment. This is possible through copying a product enrollment. On copying a product enrollment, the details including the algorithms and characteristics are copied to the new product. You can then edit the details, if required.

Prerequisites

To copy a product enrollment, you should have:

- Account ID, Account Start and End Date, and Enrollment Channel defined in the application.
- Product and Characteristic Type defined in the application.

Procedure

To copy a product enrollment:

1. Search for a product in the **Product Enrollment** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column, *w*hose details you want to copy.
   The **Product Enrollment** screen appears.
3. Click the **Duplicate** button in the **Record Actions** section.
   The **Product Enrollment** screen appears.
4. Enter the required product details in the **Main** section, if required.
5. Define, edit, or remove the products and services, if required.
6. Define, edit, or remove the product priority, if required.
7. Define, edit, or remove the characteristics, if required.
8. Click **Save**.
   The new product enrollment is defined.

Enrolling a Product Enrollment

Prerequisites

To enroll a product for an enrollment, you should have:

- Status of the product defined as Pending or Validated.
- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

Procedure

To enroll a product for an enrollment:

1. Search for the product in the **Search Enrollment** zone.
2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.
   The **Product Enrollment** screen appears.
3. Click the **Submit** button in the **Product Enrollment** zone.
   The product status gets changed to **Enroll**.

Note: Once the submit button is clicked the ORMB application validates the account information, enrollment channel, product, and characteristic type field to ensure that they contain appropriate data. If any information is missing then an error message is displayed.

Unenrolling a Product Enrollment

Prerequisites

To unenroll a product for an enrollment, you should have:

- Status of the product defined as enrolled.
- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

Procedure

To unenroll a product for an enrollment:

1. Search for the product in the **Search Enrollment** zone.
2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.
   The **Product Enrollment** screen appears.
3. Click the **Unenroll** button in the **Product Enrollment** zone.

   The Unenroll Product Enrollment Pre Transition window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Displays the enrollment ID of the enrolled product.	Not applicable
Status	Displays the status of the enrolled product.	Not applicable
Start Date	Displays the start date of the enrolled product.	Not applicable
End Date	Displays the end date of the enrolled product.	No

Note: If the user manually performs the unenrollment process, the application will simply change the product enrollment status from **Enroll** to **Unenroll**. If in-case the **End Date** is not mentioned during the enrollment, the application keeps the **End Date** in an **Open** state. If the user does not performs the

unenrollment process, then a batch named **C1-EXTRN** gets executed. This batch performs a check to ensure that the product end date and the business date make a match. If they both match, then all of the enrollments with relation to the product are unenrolled.

4. Click **Save**.
   The product enrollment status is changed to **Unenroll**.

Viewing the Log of a Product Enrollment

Procedure

To view the log of a Product Enrollment:

1. Search for the product enrollment in the **Product Enrollment** screen.
2. In the **Search Results** section, click the **Enrollment ID** link corresponding to the broadcast icon, *w*hose product enrollment log you want to view.
   The **Product Enrollment** screen appears. It consists of the following tabs:
   - Product Enrollment - Main on page 2476
   - Product Enrollment - Log on page 2480
3. Click the **Log** tab.
   The **Log** tab appears.
4. View the complete trail of actions performed on the product enrollment in the **Product Enrollment Log** zone.

Part XXXIX

Subscription Billing

Topics:

- Prerequisites
- Subscription Type (Used for Searching)
- Subscription Type (Used for Viewing)
- Account Subscription (Used for Searching)
- Account Subscription (Used for Viewing)

Oracle Revenue Management and Billing (ORMB) facilitates the service based billing wherein the customers pay a subscription price to have access to a product or service. For example, the customer may subscribe for newspaper service, cable service, internet service, video service (like Netflix, Amazon Prime Video), cloud service, and so on. The consumers may have to pay one or more charges with respect to the subscribed service. These charges can be one-time or recurring charges in nature.

In **ORMB**, you can carry out service based billing for an account by creating subscription on the account. While creating an account subscription, you need to specify the subscription type using which you want to create the account subscription. It is the subscription type which helps the system to determine:

- The business object using which the account subscription must be created in the system.
- The division and contract type for which the subscription type is created.
- The default duration for which the account subscription or service charge must be renewed when the automatic renewal option is selected.
- Whether the service charges should be prorated when the account subscription is suspended for a particular duration, or when one or more services or the entire account subscription is terminated.
- Whether already billed charges should be adjusted on the next bill in case of suspension and termination.
- The adjustment type using which the adjustments must be created when the account subscription is edited, suspended, or resumed.
- The adjustment type using which the adjustments must be created when one or more services or the entire account subscription is terminated.
- The services which the consumer can subscribe when the account subscription is created using the subscription type.
- The charges which can be charged when the consumer subscribes for a particular service.
- The distribution code for each charge which indicates the GL account to which the corresponding financial transaction must be posted.
- Whether the monthly recurring revenue is exempted for the service.
- The algorithm which must be executed when the account subscription is terminated, suspended, or resumed.

While creating an account subscription, the system allows you to use only those subscription types for the account which are defined for the division to which the account belongs and which are associated with the contract type whose contract exists on the account. You can specify whether the account subscription must be automatically renewed for the default duration (which is specified in the subscription type). In case of subscription renewal, you can specify whether there is any cost escalation at the time of renewal. You

can add services and its charges in the account subscription depending on the subscription type. The system allows you to indicate whether the charge is a one-time charge or a recurring charge. You can specify the frequency at which the recurring charges should be created for the subscribed services. In case of service charge renewal, you can specify whether there is any cost escalation at the time of renewal.

Once an account subscription is created, the status of the account subscription is set to **Draft**. You can then edit, delete, submit, or cancel the account subscription, if required. You can optionally configure approval workflow for the account subscription. On submitting an account subscription when the approval workflow is off, the status of the account subscription is changed to Active. However, on submitting an account subscription when the approval workflow is on, an approval transaction is created for the account subscription. Only when the approver approves the approval transaction, the status of the account subscription is changed to Active. Note that the status of the account subscription is changed to Active when the subscription start date is past dated. However, if the subscription start date is a future date, the status of the account subscription is changed to **Validated** irrespective of whether the approval workflow is on or off.

A new batch named **Account Subscription Periodic Monitor (C1-ASUBM)** batch is introduced in this release. It monitors or checks whether there are any account subscriptions in the **Validated** status. If there is an account subscription in the **Validated** status and its subscription start date is earlier than or equal to batch business date, the status of the account subscription is changed to **Active**. You can then edit the details, if required. However, while editing, you can only change end dates and add the services and charges in the account subscription. You cannot remove a service or charge from the account subscription once it is in the Active status. For more information on batch, see **Oracle Revenue Management and Billing Batch Guide**.

The system allows you to suspend the account subscription for a particular duration. While suspending the account subscription, you need to specify the suspension reason and suspension condition indicating whether fees should be charged or not for the suspended period. Based on the suspension condition and proration options defined, the system will accordingly update or cancel billable charges.

The system also allows you to terminate a particular service or all services at the same time. While terminating a service, you can specify the termination charges, if any. If the termination charges are specified, the adjustments will be created and posted accordingly on the next bill.

Prerequisites

To setup the subscription billing feature, you need to do the following:

- Define the required subscription billing types in the system.
- Define the required characteristic types where the characteristic entity is set to **Subscription Type**.
- Define the required characteristic types where the characteristic entity is set to **Account Subscription**.
- Define values for the option types in the feature configuration.
- Define values for the lookup field.
- Define predefined values for the characteristic type.
- Adjustment Type will be validated based on the adjustment type profile attached on the Contract Type.
- At least one subscription charge is mandatory, for each subscription service.
- An account with a division same as the division of the selected subscription type.
- An account with a unique contract ID on the contract type.
- At least one subscription service is mandatory, for each subscription type.

Subscription Type (Used for Searching)

The **Subscription Type** screen allows you to search for the subscription type details using various search criteria. It contains the following zone:

- Search Subscription Type on page 2487

Through this screen, you can navigate to the following screen:

- Subscription Type (Used for Viewing) on page 2493

Search Subscription Type

The **Search Subscription Type** zone allows you to search for a subscription type using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to search by a subscription type.	Yes
Description	Used to search a subscription type with a particular description.	No
Division	Used to search a subscription type which is associated with a particular division.	No
Contract Type	Used to specify the contract type to which the contract to which the subscription type belongs.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Contract Type Search** window appears.	
Status	Used to search the subscription type with a particular status. The valid values are: • Active • Inactive	No

Note: You must specify at least one search criterion while searching for a subscription type.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Subscription Type Information	Displays the basic information about the subscription type. **Note:** It has a link. On clicking the link, the **Subscription Type** screen appears where you can view the details of the respective subscription type.
Status	Indicates the status of the subscription type. The valid values are: • Active • Inactive
Division	Displays the division to which the subscription type belongs.
Contract Type	Displays the contract type that you want to associate with the subscription type.

Searching for a Subscription Type

Prerequisites

To search for a subscription type, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

Procedure

To search for a subscription type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **S** and then click **Subscription Type**.

The **Subscription Type** screen appears.

3. Enter the search criteria in the **Search Subscription Type** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.
   A list of subscription types that meet the search criteria appears in the **Search Results** section.

Note: You must specify at least one search criterion while searching for a subscription type.

Defining a Subscription Type

Prerequisites

To define a subscription type, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

Procedure

To define a subscription type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.

2. From the **Admin** menu, select **S** and then click **Subscription Type**.
   The **Subscription Type** screen appears.
3. Enter the search criteria in the **Search Subscription Type** zone.
4. Click **Add** button in the page title area of the **Subscription Type** screen.
   The **Subscription Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the subscription services.
   - **Subscription Services** - Used to specify the details of the subscription services.
   - **Algorithms** - Used to specify the algorithms used in the subscription type.
   - **Characteristics** - Used to define the characteristics for the subscription type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the **Contract Type** to which you want to associate the subscription type. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Contract Type Search** window appears.	Yes
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: • Day • Month • Week • Year	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes
Status	Used to indicate the status of the subscription type. The valid values are: • Active • Inactive	Yes
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Indicates the billed charges adjusted. **Note:** This field appears when you check the **Prorate Charges** check box.	No
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you check the **Prorate Charges** and **Adjust Billed Charges** check box.	
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	No

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue (MRR) Exempted	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Distribution Code Search** window appears.	No

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Algorithm Search** window appears.	Yes

5. Enter the required details in the **Main** section.
6. Add algorithms for the subscription type, if required.
7. Define characteristics for the subscription type, if required.
8. Click **Save**.
   The subscription type is defined.

How to define a characteristic for a subscription type	Defining a Characteristic for a Subscription Type on page 2492

Defining a Characteristic for a Subscription Type

Prerequisites

To define a characteristic for a subscription type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Subscription Type**)

Procedure

To define a characteristic for a subscription type:

1. Ensure that the **Characteristics** section is expanded when you are defining, *e*diting, or copying a subscription type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for a subscription type.
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for a subscription type.
Characteristic Value	Used to specify the value of characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for a subscription type.

2. Enter the required details in the **Characteristics** section.

   Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the subscription type, click the **Add** (+) icon and *t*hen repeat step 2.

   Note: However, if you want to remove a characteristic from the subscription type, click the **Delete** (🗑) icon corresponding to the characteristic.

How to copy a subscription type	Copying a Subscription Type on page 2497

Subscription Type (Used for Viewing)

The **Subscription Type** screen allows you to define, edit, copy, and delete subscription type. It contains the following zone:

- Subscription Type on page 2493

Subscription Type

The **Subscription Type** zone displays the details of the subscription type. It contains the following sections:

- **Main** - Displays basic information about the subscription type. It contains the following fields:

Field Name	Field Description
Subscription Type	Displays the subscription type.
Description	Displays the description for the subscription type.
Account Subscription Business Object	Indicates the business object using which you want to create a person when the corresponding account subscription is processed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the subscription type.
Division	Indicates the division to which you want to associate the subscription type. **Note:** It has a link. On clicking the link, the **Division** screen appears where you can view the details of the respective division.
Contract Type	Indicates the **Contract Type** to which you want to associate the subscription type.
Renewal Duration Type	Indicates the renewal cycle. The valid values are: • Day • Month • Week • Year

Field Name	Field Description
Renewal Duration	Displays the duration of the renewal of the subscription.
Status	Indicates the status of the subscription type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a **Subscription Type** to **Inactive** if there are account subscriptions that are created using the **Subscription Type** and are currently in the **Draft** or **Approval In Progress** status.
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.
Adjust Billed Charges	Indicates the billed charges adjusted. **Note:** This field appears when you check the **Prorate Charges** check box.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created. **Note:** This field appears when you check the **Prorate Charges** and **Adjust Billed Charges** check box. It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective business object.
Termination Adjustment Type	Indicates the adjustment type used for termination of the subscription service.

- The **Subscription Services** section contains the following columns:

Column Name	Column Description
Subscription Service	Displays the type of the subscription service.
Monthly Recurring Revenue (MRR) Exempted	Indicates whether the service type is exempted from MRR calculation.
Subscription Charge	Indicates the charges related to the subscription service.
Distribution Code	Indicates the distribution code linked to the service that will be used on the billable charge.

- **Characteristics** - Lists the characteristics defined for the subscription type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the subscription is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the subscription type.
Delete	Used to delete the subscription type. **Note:** You can delete an subscription type when you have not created an subscription type using the subscription type.
Duplicate	Used to create a new subscription type using an existing subscription type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the subscription type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

- The **Algorithms** section contains the following columns:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Displays the system event.	Yes
Sequence	Displays the sequence number.	Yes
Algorithm	Displays an algorithm associated to the system event that you have selected. **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective subscription type.	Yes

Editing a Subscription Type

Procedure

To edit a subscription type:

1. Search for the subscription type in the **Subscription Type** screen.
2. In the **Search Results** section, click the link in the **Subscription Type Information** column corresponding *t*o the subscription type whose details you want to edit.

The **Subscription Type** screen appears.

3. Click the **Edit** button in the **Subscription Type** zone.
The **Subscription Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription services.
- **Subscription Services** - Used to specify the details of the subscription services.
- **Algorithms** - Used to specify the algorithms used in the subscription type.
- **Characteristics** - Used to define the characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the **Contract Type** to which you want to associate the subscription type.	Yes
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: • Day • Month • Week • Year	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes
Status	Used to indicate the status of the subscription type. The valid values are: • Active • Inactive	Yes
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Indicates the billed charges adjusted. **Note:** This field appears when you check the **Prorate Charges** check box.	No
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created. **Note:** This field appears when you check the **Prorate Charges** and **Adjust Billed Charges** check box.	No

Field Name	Field Description	Mandatory (Yes or No)
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service.	No

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue (MRR) Exempted	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge.	No

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Algorithm Search** window appears.	Yes

4. Add algorithms for the subscription type, if required.
5. Define, edit, or remove characteristics of the subscription type, if required.
6. Click **Save**.
   The changes made to the subscription type are saved.

Copying a Subscription Type

Prerequisites

To copy a subscription type, you should have:

- Subscription type (whose copy you want to create) defined in the application
- Account Subscription business objects defined in the application

Procedure

To copy a subscription type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **S** and then click **Subscription Type**.
   The **Subscription Type** screen appears.
3. Enter the search criteria in the **Search Subscription Type** zone.
4. In the **Search Results** section, click the link in the **Subscription Type Information** column *w*hose details you want to view.
5. Click the **Duplicate** button in the **Subscription Type** zone.
   The **Subscription Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the subscription services.
   - **Subscription Services** - Used to specify the details of the subscription services.
   - **Algorithms** - Used to specify the algorithms used in the subscription type.
   - **Characteristics** - Used to define the characteristics for the subscription type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the **Contract Type** to which you want to associate the subscription type.	Yes
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: • Day • Month • Week • Year	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes
Status	Used to indicate the status of the subscription type. The valid values are: • Active • Inactive	Yes

Field Name	Field Description	Mandatory (Yes or No)
Prorate Charges	Used to indicate whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Used to indicate the billed charges adjusted. **Note:** This field appears when you check the **Prorate Charges** check box.	No
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created. **Note:** This field appears when you check the **Prorate Charges** and **Adjust Billed Charges** check box.	No
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service.	No

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue (MRR) Exempted	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge.	No

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Algorithm Search** window appears.	Yes

6. Enter the required details in the **Main** section.
7. Add algorithms for the subscription type, if required.
8. Define characteristics for the subscription type, if required.
9. Click **Save**.
   The new subscription type is defined.

Column Name	Column Description
Account Subscription Information	Displays the basic information about the account subscription. **Note:** It has a link. On clicking the link, the **Account Subscription** screen appears where you can view the details of the respective upload request.
Subscription Type Information	Displays the basic information about the subscription type.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Subscription Type** screen appears where you can view the details of the respective upload request.
Account Information	Displays the basic information about the account. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective upload request.

Searching for an Account Subscription

Prerequisites

To search for an account subscription, you should have:

- Subscription type defined in the application
- Subscription Services defined in the application

Procedure

To search for an account subscription:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Customer Management** and then click **Account Subscription**.
   A sub-menu appears.
3. Click the **Search** option from the **Account Subscription** sub-menu.
   The **Account Subscription** screen appears.
4. Enter the search criteria in the **Search Account Subscription** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of account subscriptions that meet the search criteria appears in the **Search Results** section.

   Note: You must specify at least one search criterion while searching for an account subscription.

How to define a characteristic for a subscription type	Defining a Characteristic for an Account Subscription on page 2505

Defining a Characteristic for an Account Subscription

Prerequisites

To define a characteristic for an account subscription, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Account Subscription**)

Procedure

To define a characteristic for an account subscription:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an account subscription.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for an account subscription.
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional)

Field Name	Field Description	Mandatory (Yes or No)
		Note: This field is required when you are defining a characteristic for an account subscription.
Characteristic Value	Used to specify the value of characteristic type. **Note:** On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for an account subscription.

2. Enter the required details in the **Characteristics** section.

   Note: If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for an account subscription, click the **Add** (+) icon and *t*hen repeat step 2.

   Note: However, if you want to remove a characteristic from an account subscription, click the **Delete** (🗑) icon corresponding to the characteristic.

Account Subscription (Used for Viewing)

Once the subscription type is created, the **Account Subscription** screen allows you to:

- View the details of an account subscription
- View Edit the details of the subscription services
- Define, Edit and Delete the subscription services
- Suspend an account subscription
- Terminate an account subscription
- View the account subscription suspension history
- View the account subscription termination charges
- View the log of an account subscription
- Add a log entry an account subscription

This screen consists of the following tabs:

- Account Subscription - Main on page 2507
- Account Subscription - Log on page 2510

Account Subscription - Main

The **Main** tab displays information about the account subscription and subscription services. It contains the following zones:

- Account Subscription on page 2507
- Subscription Services on page 2508
- Account Subscription Suspension History on page 2510
- Account Subscription Termination Charges on page 2510

Account Subscription

The **Account Subscription** zone displays the details of the account subscription. It contains the following sections:

- **Main** - Displays the basic details of the account subscription. It contains the following fields:

Field Name	Field Description
Account Subscription Information	Displays the basic information about the account subscription.
Subscription Type Information	Displays the basic details of the subscription type. **Note:** It has a link. On clicking the link, the **Subscription Type** screen appears where you can view the details of the respective subscription type.
Account Information	In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Subscription Start Date	Displays the subscription start date.
Subscription End Date	Displays the subscription end date.
Automatic Renewal	Indicates whether the automatic renewal of the subscription is opted.
Status	Displays the status of the account subscription. The valid values are: • Active • Canceled • Expired • Draft • Renewed • Suspended • Validated • Terminated
Comments	Displays the additional information about the account subscription.

- **Characteristics** - This section lists the characteristics of the account subscription. It contains the following columns:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the account subscription.
Characteristic Type	Indicates the characteristic type.

Field Name	Field Description
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Field Name	Field Description
Edit	Used to edit the details of the account subscription. **Note:** The **Edit** button appears when the account subscription is in the **Active** or **Draft** status.
Suspend	Used to suspend the account subscription. **Note:** The **Suspend** button appears when the account subscription is in the **Active** status.
Terminate	Used to terminate the account subscription service. Used to suspend the account subscription. **Note:** The **Terminate** button appears when the account subscription is in the **Active** or **Suspended** status.
Delete	Used to delete the account subscription. **Note:** The **Delete** button appears when the account subscription is in the **Active** or **Suspended** status.
Submit	Used to submit the account subscription details. **Note:** The **Submit** button appears when the account subscription is in the **Draft** status.
Cancel	Used to cancel the account subscription. **Note:** The **Cancel** button appears when the account subscription is in the **Draft** and **Validated** status.
Resume	Used to resume the account subscription service. **Note:** The **Resume** button appears when the account subscription is in the **Suspended** status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the account subscription is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date Time	Displays the date and time when the account subscription status is updated.
Creation Date Time	Displays the date and time when the account subscription is created.

Subscription Services

The **Subscription Services** zone displays the details of the subscription services. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence number.
Subscription Service	Displays the type of subscription service.
Service Start Date	Displays the date from when the subscription service is effective.
Service End Date	Displays the date till when the subscription service is effective.
Termination Date	Displays the date on which the subscription service is terminated.
Termination Reason	Displays the reason for the termination of subscription service.
Edit	Used to edit the details of the subscription service.
Delete	Used to delete the subscription service.

Subscription Service Charges

The **Subscription Service Charges** zone displays the details of the charges related to the subscription services. It contains the following columns:

Column Name	Column Description
Subscription Charge	Displays the charges related to the subscription service.
Charge Amount	Displays the charges related to the subscription charge.
Charge Start Date	Displays the date from when the charges are effective.
Charge End Date	Displays the date till when the charges are effective.
One-Time Charge	Indicates the one-time charges related to the subscription services. The valid values are: • Yes • No
Recurring Charge Frequency	Indicates the recurring charges paid for the subscription service. **Note:** It appears when one-time charge option is selected.
Automatic Renewal	Indicates whether the subscription service charges are set to automatic renewal. The valid values are: • Yes • No
Cost Escalation (in Percentage)	Displays the percentage in which the subscription charge amount must increase when the automatic renewal of the subscription is triggered. **Note:** This field appears when **Automatic Renewal** check box is set to **Yes**.
Description on Bill	Displays the description on the bill.

Subscription Service Charge Entities

The **Subscription Service Charge Entities** zone displays the details of the subscription service charge entities. It contains the following columns:

Column Name	Column Description
Entity Type	Indicates the entity type used in the subscription service charge.
Entity Information	Displays the basic entity information. **Note:** It has a link. On clicking the link, the **Billable Charge ID** screen appears where you can view the details of the respective contract.

Account Subscription Suspension History

The **Account Subscription Suspension History** zone displays the details of the account subscriptions which are suspended. It contains the following columns:

Column Name	Column Description
Suspension Start Date	Displays the suspension start date of the account subscription.
Suspension End Date	Displays the suspension end date of the account subscription.
Suspension Condition	Displays the condition for account subscription suspension.
Suspension Reason	Displays the reason for account subscription suspension.
Resume Date	Displays the date on which the account subscription is resumed.

Account Subscription Termination Charges

The **Account Subscription Termination Charges** zone displays the details of the termination charges of the account subscription. It contains the following columns:

Column Name	Column Description
Termination Charge Type	Indicates the type of account subscription termination charges.
Charge Amount	Indicates the charges for the termination of the account subscription.
Adjustment Information	Displays the information about the adjustment that is created using the adjustment record. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** screen appears.

Account Subscription - Log

The **Log** tab contains the following zone:

- Account Subscription Log on page 2510

Account Subscription Log

The **Account Subscription Log** zone lists the complete trail of actions performed on the account subscription. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the account subscription.
Details	Displays the details about the action performed on the account subscription.

Column Name	Column Description
User	Indicates the user who has performed the action on the account subscription.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the account subscription. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the account subscription is changed. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

How to search for an account subscription	Searching for an Account Subscription on page 2502

Deleting an Account Subscription

Procedure

To delete an account subscription:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding *to* an account subscription whose details you want to delete.
   The **Account Subscription** screen appears.
3. Click the **Delete** button in the **Account Subscription** zone.
   A message appears confirming whether you want to delete an account subscription.
4. Click **OK**.
   An account subscription is deleted.

Note: You can delete only those account subscriptions whose status is in **Draft** status.

Activating an Account Subscription

Procedure

To activate an account subscription:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding *to* an account subscription whose details you want to edit.
   The **Account Subscription** screen appears.
3. Click the **Submit** button in the **Account Subscription** zone.
   The **Account Subscription** screen gets activated.

Canceling an Account Subscription

Procedure

To cancel an account subscription:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding *t*o an account subscription whose details you want to edit.
   The **Account Subscription** screen appears.
3. Click the **Cancel** button in the **Account Subscription** zone.
   A message appears confirming whether you want to cancel an account subscription.
4. Click **OK**.
   An account subscription is canceled.

Note: You can cancel only those account subscriptions whose status is in **Draft** status.

Editing the Subscription Service Details

Procedure

To edit the subscription service details:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding *t*o an account subscription whose details you want to edit.
   The **Account Subscription** screen appears.
3. Click the **Edit** (✎) icon in the **Subscription Services** zone.
   The **Account Subscription Service Charges** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Displays the type of subscription service.	Not applicable
Service Start Date	Displays the start date of the subscription service.	Not applicable
Service End Date	Used to indicate end date of the subscription service.	Yes
Termination Date	Displays the date on which the subscription service is terminated.	Not applicable
Termination Reason	Displays the reason for which the account subscription is terminated.	Not applicable

In addition, this section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Subscription Charge	Displays the subscription charge.	Not applicable
Charge Amount	Displays the charges related to the of the subscription service.	Not applicable
Charge Start Date	Displays the start date of the subscription charges.	Not applicable
Charge End Date	Used to indicate the end date of the subscription charges.	Yes
One-Time Charge	Displays whether the charges are one-time.	Not applicable
Recurring Charge Frequency	Displays the frequency of the recurring charges, if opted.	Not applicable

4. Click **Save**.
   The changes made to the subscription service details are saved.

Terminating an Account Subscription

Procedure

To terminate an account subscription:

1. Search for an account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding *t*o an account subscription whose details you want to edit.
   The **Account Subscription** screen appears.
3. Click the **Terminate** button in the **Account Subscription** zone.
   The **Account Subscription Service Termination** window appears. It contains the following sections:
   - **Main**

     - Used to specify basic details about the subscription services.
   - **Termination Charges** - Used to specify the charges related to the termination of the account subscription services.

   The **Main** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to indicate the type of subscription service.	Yes
Termination Date	Used to specify date of the termination subscription service.	Yes
Termination Reason	Used to specify reason of the termination subscription service.	Yes

The **Termination Charges** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Termination Charge Type	Used to indicate the type of account subscription termination charges.	Yes
Charge Amount	Used to indicate the charges for the termination of the account subscription.	Yes
Termination Adjustment Type	Used to specify termination adjustment type. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **Adjustment Type Search** screen appears.	Yes

4. Click **Save**.
   An account subscription is terminated.

Note: You can terminate only those account subscriptions whose status is in **Active** or **Suspended** status.

Mass Pricing Update

Topics:

- Prerequisites
- Mass Pricing Update Request (Without Approval) Status Transition
- Mass Pricing Update Request (With Approval) Status Transition
- Algorithms Used in C1-MassPricingReq
- Request Type
- Mass Pricing Update Request (Used for Searching)
- Mass Pricing Update Request (Used for Viewing)
- Mass Pricing Update Request

Oracle Revenue Management and Billing provides the ability for mass price item pricing update. In other words, the system enables you to update multiple active price item pricing assigned to a person, account, price list, or product at the same time. You can search for the price assignments which you want to update using the following fields:

- Price Item
- Price Item Parameters
- Account ID
- Person ID
- Division
- Update Date
- Pricing Entity Type

On specifying the search criteria, the system fetches the number of entities on which the price item pricing is defined and the number of price assignments on a particular type of pricing entity. Once you select one or more price item pricing, you can create the mass pricing update request by clicking the **Mass Pricing Update** button. While creating a mass pricing update request, you need to specify the mass pricing update request type using which you want to create the mass pricing update request. It is the mass pricing update request type which helps the system to determine:

- The business object using which the mass pricing update request should be created in the system.
- Whether the approval is required for the mass pricing update request.
- Whether the mass pricing update must be performed in the deferred mode when the number of price assignments in the mass pricing update request exceeds the defer processing count.

Once the mass pricing update request type is selected, you need to specify the mass pricing update criteria, mass pricing update type, and rate value. Once a mass pricing update request is created in the **Draft** status, you can submit the mass pricing update request. On submitting a mass pricing update request, the status of the mass pricing update request is changed to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count. If the status is changed to **Deferred Processing**, you need to click the **Submit Batch** button. On clicking the **Submit Batch** button, the system automatically creates a batch job using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined for the **Thread Count** and **Thread Pool Name** option types in the **C1-MASPRI** feature configuration.

Once the batch job is executed, the status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred

in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to Error. Finally, the status of the mass pricing update request is changed to **Processed**.

You can optionally configure the approval workflow for the mass pricing update request. If the **Approval Required** field is set to **Yes** in the mass pricing update request type, the status of the mass pricing update request is changed to **Approval In Progress** when you submit the mass pricing update request. Once the approver approves the mass pricing update request, the status of the mass pricing update request is changed to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count. However, if the approver rejects a mass pricing update request, the status of the mass pricing update request is changed to **Rejected**.

For more information on how to setup the mass pricing update process, see Prerequisites on page 2525.

Prerequisites

To setup the mass pricing update feature, you need to do the following:

- Define the required mass pricing update request types in the system.
- Set the **Mass Pricing Update (C1-MASPRI)** feature configuration
- Attach a currency conversion algorithm to the **Currency Conversion For Bill Segments** algorithm spot of the required divisions
- Define one To Do type for submitter and another To Do type for approver when the approval is required for a mass pricing update request
- Assign a To Do role to the required To Do types in the application

C1-REQST-INF

This algorithm generates the request information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

1. Request Type Description
2. Request Status
3. Request ID

C1-MPRIVALDN

This algorithm is invoked when you create a mass pricing update request. It checks the following:

- Whether the mass pricing update criteria is specified.
- Whether the mass pricing update type is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
- Whether the rate value is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
- Whether the currency is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price** and the mass pricing update type is set to **Absolute**.
- If any of the above conditions are not met, the system does not allow you to create the mass pricing update request.

C1-MPRISUBMT

This algorithm is invoked when you submit a mass pricing update request. If the approval workflow is configured on the respective mass pricing update request type, it changes the status of the mass pricing update request to **Approval in Progress**. However, if the approval workflow is not configured on the respective mass pricing update request type, it changes the status of the mass pricing update request to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count.

C1-MPRIAPTD

This algorithm is invoked when the status of the mass pricing update request is changed to **Approval in Progress**. It creates a To Do using the approval To Do type which is specified in the respective mass pricing update request type. Once a To Do is created, it is assigned to all users with an approval To Do role which is specified in the respective mass pricing update request type.

F1-TODOCOMPL

This algorithm completes the To Do entries that are linked to an object when the object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** (**F1-EXLTD**) characteristic is set to **Y** for a To Do type, the system does not automatically complete the respective To Do entry.

This algorithm contains the following parameter:

- **'Do Not Complete To Do Type' Char Type** – Used to specify the characteristic type that indicates whether the To Do entries should be automatically completed or not.

Note: The **F1-EXLTD** characteristic type is shipped with the product. You can either use the **F1-EXLTD** characteristic type or a custom characteristic type, if required. Note that you must specify a predefined characteristic type where the characteristic entity is set to **To Do Type** and the predefined values are set to **Y** or **N**.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-MPRIDEFER

This algorithm is invoked when the status of the mass pricing update request is changed to **Running C1-GENRQ Batch**. It creates a batch job using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined in the **Thread Count** and **Thread Pool Name** option types of the **Mass Pricing Update (C1-MASPRI)** feature configuration. It also creates a log for the mass pricing update request which indicates the batch job ID.

C1-MPRIAPRD

This algorithm is invoked when you approve a mass pricing update request. If the number of price assignments in the mass pricing update request exceeds the defer processing count, the status of the mass pricing update request is changed to **Deferred Processing**. However, if the number of price assignments in the mass pricing update request does not exceed the defer processing count, the status of the mass pricing update request is changed to **Updating Price Assignments**.

C1-MPRIUPDPA

This algorithm is invoked when the status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred in past, this algorithm ends the existing price assignment and creates a new price assignment. However, if a price assignment is not yet referred in the system, this algorithm updates the existing price assignment. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to **Error**. Note that if a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.

C1-MPRIRJTD

This algorithm is invoked when the status of the mass pricing update request is changed to **Rejected**. It creates a To Do using the submitter To Do type which is specified in the respective mass pricing update request type. Once a To Do is created, it is assigned to all users with a submitter To Do role which is specified in the respective mass pricing update request type.

Request Type

Oracle Revenue Management and Billing allows you to define a mass pricing update request type using which you can create mass pricing update requests. It is the mass pricing request type which helps the system to determine:

- The business object using which the mass pricing update request should be created in the system.
- Whether the approval is required for the mass pricing update request.
- Whether the mass pricing update must be performed in the deferred mode when the number of price assignments in the mass pricing update request exceeds the defer processing count.

The **Request Type** screen allows you to define, edit, copy, and delete a mass pricing update request type. It contains the following zones:

- Request Type List on page 2530
- Request Type on page 2531

Request Type List

The **Request Type List** zone lists the mass pricing update request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Request Type	Displays the mass pricing update request type.
Description	Displays the description of the mass pricing update request type.
Edit	On clicking the **Edit** (✎) icon, the **Mass Pricing Request Type** screen appears where you can edit the details of the mass pricing update request type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Mass Pricing Request Type** screen appears where you can define a new mass pricing update request type using an existing mass pricing update request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the mass pricing update request type. **Note:** You can delete the mass pricing update request type when you have not created a mass pricing update request using the mass pricing update request type.

On clicking the **Broadcast** (📡) icon corresponding to a mass pricing update request type, the **Request Type** zone appears with the details of the respective mass pricing update request type.

You can define a new mass pricing update request type by clicking the **Add**link in the upper right corner of the **Request Type List** zone.

Related Topics

For more information on...	See...
How to edit a mass pricing update request type	Editing a Mass Pricing Update Request Type on page 2537
How to copy a mass pricing update request type	Copying a Mass Pricing Update Request Type on page 2539
How to delete a mass pricing update request type	Deleting a Mass Pricing Update Request Type on page 2542
How to view the details of a mass pricing update request type	Viewing the Mass Pricing Update Request Type Details on page 2543

Request Type

The **Request Type** zone displays the details of the mass pricing update request type. It contains the following sections:

- **Main** - Displays the basic information about the mass pricing update request type. It contains the following fields:

Field Name	Field Description
Request Type	Displays the mass pricing update request type.
Request Business Object	Indicates the business object using which you want to create a mass pricing update request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Description	Displays the description for the mass pricing update request type.
Detailed Description	Displays the additional information about the mass pricing update request type.
Status	Indicates the status of the mass pricing update request type. The valid values are: • Active • Inactive
Defer Processing Count	Indicates whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count. **Note:** Deferred mode means in the background when the **Generic Request Periodic Monitor (C1-GENRQ)** batch is invoked. You can configure the **Generic Request Periodic Monitor (C1-GENRQ)** batch such that it is executed at regular intervals. For more information about the **Generic Request Periodic Monitor (C1-GENRQ)** batch, refer to *Oracle Revenue Management and Billing Batch Guide*. If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).
Approval Required	Indicates whether approval is required before updating the price item pricing through a mass pricing update request.
Approval Type	Indicates the type of approval. The valid value is: • Request Level Approval
Approval To Do Type	Indicates that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of respective To Do type.
Approval To Do Role	Indicates that the users with the specified To Do role will receive the mass pricing update request when it is submitted for approval. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of respective To Do role.
Submitter To Do Type	Indicates that To Do entry of the specified To Do type must be created when an approver rejects a mass pricing update request. **Note:** This field appears when the **Approval Required** option is selected.

Field Name	Field Description
	It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of respective To Do type.
Submitter To Do Role	Indicates that the users with the specified To Do role will receive the mass pricing update request when it is rejected by an approver. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of respective To Do role.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the mass pricing update request type.
Delete	Used to delete the mass pricing update request type. **Note:** You can delete a mass pricing update request type when you have not created a mass pricing update request using the mass pricing update request type.
Duplicate	Used to create a new mass pricing update request type using an existing mass pricing update request type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the mass pricing update request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Request Type** zone does not appear in the **Request Type** screen. It appears when you click the **Broadcast** ( ) icon corresponding to a mass pricing update request type in the **Request Type List** zone.

You can define a new mass pricing update request type by clicking the **Add**link in the upper right corner of this zone.

Defining a Mass Pricing Update Request Type

Prerequisites

To define a mass pricing update request type, you should have:

- Mass pricing update request type business objects defined in the application.
- Mass pricing update request business objects defined in the application.
- One To Do type defined for submitter and another To Do type defined for approver when the approval is required for a mass pricing update request
- A To Do role assigned to the required To Do types in the application

Procedure

To define a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Request Type** sub-menu.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Request Type Business Object	Used to indicate the business object using which you want to create the mass pricing update request type. **Note:** You can create a mass pricing update request type using the **Mass Pricing Request Type (C1-MassPricingReqType)** business object.	Yes

   Note: Alternatively, you can access this screen by clicking the **Add** link in the upper right corner of the **Request Type List** zone.
4. Select the **Mass Pricing Request Type** business object from the respective field.
5. Click **OK**.

   The **Mass Pricing Update Request Type** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: • Mass Pricing Request	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: • Active • Inactive	Yes
Defer Processing Count	Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count. **Note:** Deferred mode means in the background when the **Generic Request Periodic Monitor (C1-GENRQ)** batch is invoked. You can configure the **Generic Request Periodic Monitor (C1-GENRQ)** batch such that it is executed at regular intervals. For more information about the **Generic Request Periodic Monitor (C1-GENRQ)** batch, refer to *Oracle Revenue Management and Billing Batch Guide*. If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).	No
Approval Required	Used to indicate whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	Used to indicate the type of approval. The valid value is: • Request Level Approval **Note:** This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. The **Approval To Do Type** field appears when the **Approval Required** option is selected.	
Approval To Do Role	Used to indicate that the users with the specified To Do role must receive the mass pricing update request for approval. **Note:** This field appears when the **Approval Required** option is selected. The list includes only those To Do roles which are associated to the specified approval To Do type.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Submitter To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request. **Note:** The **Search** icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. The **Submitter To Do Type** field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Submitter To Do Role	Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request. **Note:** This field appears when the **Approval Required** option is selected. The list includes only those To Do roles which are associated to the specified submitter To Do type.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

6. Enter the required details in the **Main** section.
7. Click **Save**.
   The mass pricing update request type is defined.

Editing a Mass Pricing Update Request Type

Prerequisites

To edit a mass pricing update request type, you should have:

- Mass pricing update request business objects defined in the application.

Procedure

To edit a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Request Type** sub-menu.
   The **Request Type** screen appears.
4. In the **Request Type List** zone, click the **Edit** ( ) icon in the **Edit** column corresponding *t*o the mass pricing update request type whose details you want to edit.

   The **Mass Pricing Update Request Type** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: • Mass Pricing Request	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: • Active • Inactive	Yes
Defer Processing Count	Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price	No

Field Name	Field Description	Mandatory (Yes or No)
	assignments in a mass pricing update request exceeds the defer processing count. **Note:** Deferred mode means in the background when the **Generic Request Periodic Monitor (C1-GENRQ)** batch is invoked. You can configure the **Generic Request Periodic Monitor (C1-GENRQ)** batch such that it is executed at regular intervals. For more information about the **Generic Request Periodic Monitor (C1-GENRQ)** batch, refer to *Oracle Revenue Management and Billing Batch Guide*. If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).	
Approval Required	Indicates whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	Indicates the type of approval. The valid value is: • Request Level Approval **Note:** This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Type	Indicates that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval. **Note:** The **Search** icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. The **Approval To Do Type** field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Role	Indicates that the users with the specified To Do role must receive the mass pricing update request for approval. **Note:** This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
	The list includes only those To Do roles which are associated to the specified approval To Do type.	
Submitter To Do Type	Indicates that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request. **Note:** The **Search** icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. The **Submitter To Do Type** field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Submitter To Do Role	Indicates that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request. **Note:** This field appears when the **Approval Required** option is selected. The list includes only those To Do roles which are associated to the specified submitter To Do type.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

Tip: Alternatively, you can edit the details of a mass pricing update request type by clicking the **Edit** button in the **Request Type** zone.

5. Modify the required details in the **Main** section.
6. Click **Save**.
   The changes made to the mass pricing update request type are saved.

Copying a Mass Pricing Update Request Type

Instead of creating a mass pricing update request type from scratch, you can create a new mass pricing update request type using an existing mass pricing update request type. This is possible through copying a mass pricing update request type. On copying a mass pricing update request type, the details including the characteristics are copied to the new mass pricing update request type. You can then edit the details, if required.

Prerequisites

To copy a mass pricing update request type, you should have:

- Mass pricing update request type (whose copy you want to create) defined in the application.
- Mass pricing update request business objects defined in the application.

Procedure

To copy a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Request Type** sub-menu.
   The **Request Type** screen appears.
4. In the **Request Type List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column corresponding to *t*he request type whose copy you want to create.

   The **Mass Pricing Update Request Type** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: • Mass Pricing Request	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: • Active • Inactive	Yes
Defer Processing Count	Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count. **Note:** Deferred mode means in the background when the **Generic Request Periodic Monitor (C1-GENRQ)** batch is invoked. You can configure the **Generic Request Periodic Monitor**	No

Field Name	Field Description	Mandatory (Yes or No)
	(C1-GENRQ) batch such that it is executed at regular intervals. For more information about the **Generic Request Periodic Monitor (C1-GENRQ)** batch, refer to *Oracle Revenue Management and Billing Batch Guide*. If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).	
Approval Required	Used to indicate whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	Used to indicate the type of approval. The valid value is: • Request Level Approval **Note:** This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. The **Approval To Do Type** field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Approval To Do Role	Used to indicate that the users with the specified To Do role must receive the mass pricing update request for approval. **Note:** This field appears when the **Approval Required** option is selected. The list includes only those To Do roles which are associated to the specified approval To Do type.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Submitter To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request. **Note:**	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon, the **To Do Type Search** window appears. The **Submitter To Do Type** field appears when the **Approval Required** option is selected.	
Submitter To Do Role	Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request. **Note:** This field appears when the **Approval Required** option is selected. The list includes only those To Do roles which are associated to the specified submitter To Do type.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.

Tip: Alternatively, you can copy a mass pricing update request type by clicking the **Duplicate** button in the **Request Type** zone.

5. Enter the required details in the **Main** section.
6. Click **Save**.
   The new mass pricing update request type is defined.

Deleting a Mass Pricing Update Request Type

Procedure

To delete a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Request Type** sub-menu.
   The **Request Type** screen appears.
4. In the **Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the mass pricing update request type that you want to delete.
   A message appears confirming whether you want to delete the mass pricing update request type.

Note: You can delete a mass pricing update request type when you have not created a mass pricing update request using the mass pricing update request type.

Tip: Alternatively, you can delete a mass pricing update request type by clicking the **Delete** button in the **Request Type** zone.

5. Click **OK**.
   The mass pricing update request type is deleted.

Search Mass Pricing Update Request

The **Search Mass Pricing Update Request** zone allows you to search for a mass pricing update request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Created From	Used to search mass pricing update requests which are created from a particular date onwards.	No
Status	Used to search mass pricing update requests with a particular status. The valid values are: • Approval in Progress • Deferred Processing • Draft • Processed • Rejected • Running C1-GENRQ Batch	No
Created Until	Used to search mass pricing update requests which are created till a particular date.	No
User ID	Used to search mass pricing update requests which are created by a particular user.	No
Request Type	Used to search mass pricing update requests which are created using a particular mass pricing update request type.	No
Request ID	Used to search a particular mass pricing update request.	No

Note: You must specify at least one search criterion while searching a mass pricing update request.

- **Search Result** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Result** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the mass pricing update request is created.
Request Information	Displays information about the mass pricing update request.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Mass Pricing Update Request** screen appears where you can view the details of the respective mass pricing update request.
Status	Indicates the status of the mass pricing update request. The valid values are: • Approval in Progress • Deferred Processing • Draft • Processed • Rejected • Running C1-GENRQ Batch
Created By	Indicates the user who has created the mass pricing update request.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Searching for a Mass Pricing Update Request

Prerequisites

To search for a mass pricing update request, you should have:

- Mass pricing update request types defined in the application

Procedure

To search for a mass pricing update request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Mass Pricing Update Request** sub-menu.
   The **Mass Pricing Update Request** screen appears.
4. Enter the search criteria in the **Search Mass Pricing Update Request** zone.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of mass pricing update requests that meet the search criteria appears in the **Search Results** section.

Creating a Mass Pricing Update Request

Prerequisites

To define a mass pricing update request, you should have:

- Mass pricing update request types defined in the application
- A currency conversion algorithm attached to the **Currency Conversion For Bill Segments** algorithm spot of the respective division

Procedure

To define a mass pricing update request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.

A sub-menu appears.

3. Click the **Add** option from the **Mass Pricing Update Request** sub-menu.
   The **Mass Pricing Update Request** screen appears.
4. Search for the required price assignments which you want to update in the **Search Price Assignments** zone.
5. Do either of the following:

If you want to...	Then...
Update all price assignments of a particular pricing entity type	**a.** Select the check box corresponding to the respective pricing entity type. **b.** Click **Mass Pricing Update**.
Update all price assignments of one or more pricing entity type	**a.** Select the check box corresponding to the respective pricing entity types. **b.** Click **Mass Pricing Update**.
Update all price assignments of all pricing entity types	**a.** Select the check box corresponding to all pricing entity types. **b.** Click **Mass Pricing Update**.
Update the price item pricing assigned to a particular person	**a.** Select the check box corresponding to the **Customer Agreed** pricing entity type. The **Customer Agreed Price Assignments** zone appears. **b.** Select the check box corresponding to the required price item pricing that you want to update in the **Customer Agreed Price Assignments** zone. **c.** Click **Mass Pricing Update**.
Update the price item pricing assigned to a particular account	**a.** Select the check box corresponding to the **Account Agreed** pricing entity type. The **Account Agreed Price Assignments** zone appears. **b.** Select the check box corresponding to the required price item pricing that you want to update in the **Account Agreed Price Assignments** zone. **c.** Click **Mass Pricing Update**.
Update the price item pricing assigned to a particular price list	**a.** Select the check box corresponding to the **Price List** pricing entity type. The **Price list Price Assignments** zone appears. **b.** Select the check box corresponding to the required price item pricing that you want to update in the **Price list Price Assignments** zone. **c.** Click **Mass Pricing Update**.
Update the price item pricing assigned to a particular price list associated to a particular product	**a.** Select the check box corresponding to the **Product** pricing entity type. The **Product Price list Price Assignments** zone appears.

If you want to...	Then...
	b. Select the check box corresponding to the required price item pricing that you want to update in the **Product Price list Price Assignments** zone. **c.** Click **Mass Pricing Update**.

The **Select Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Mass Pricing Update Request Type	Used to indicate the mass pricing update request type using which you want to create a mass pricing update request.	Yes

6. Select the required mass pricing update request type from the respective field.
7. Click **OK**.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: • Decrease Price • End Date Price • Increase Price	Yes
Mass Pricing Update Type	Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: • Absolute • Percentage **Note:** This field appears when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.	Yes (Conditional) **Note:** This field is required when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
Rate Value	Used to specify the rate by which you want to increase or decrease the price. **Note:** This field appears when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**. You cannot specify a negative value or zero in the **Rate Value** field.	Yes (Conditional) **Note:** This field is required when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
Currency	Used to indicate the currency in which the rate is specified. **Note:**	Yes (Conditional) **Note:** This field is required when the mass

Field Name	Field Description	Mandatory (Yes or No)
	This field appears when the mass pricing update type is set to **Absolute**. If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the **Currency Conversion For Bill Segments** algorithm spot of the respective division.	pricing update type is set to **Absolute**.
Update Date	Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner: • If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. • If a price assignment is not yet referred in the system, the existing price assignment is updated. **Note:** You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.	Not applicable

8. Enter the required details in the **Mass Pricing Update Request** screen.
9. Click **Save**.
   The mass pricing update request is defined in the **Draft** status. And, the status of all price assignment records in the mass pricing update request is set to **Pending**.

Mass Pricing Update Request

The **Mass Pricing Update Request** zone displays the details of the mass pricing update request. It contains the following sections:

- **Main** - Displays basic information about the mass pricing update request. It contains the following fields:

Field Name	Field Description
Request Information	Displays information about the mass pricing update request.
Mass Pricing Update Request Type	Indicates the mass pricing update request type using which the mass pricing update request is created. **Note:** It has a link. On clicking the link, the **Request Type** screen appears where you can view the details of the respective mass pricing update request type.
Status	Indicates the status of the mass pricing update request. The valid values are: • Approval in Progress • Deferred Processing • Draft • Processed • Rejected • Running C1-GENRQ Batch
Mass Pricing Update Criteria	Indicates whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: • Decrease Price • End Date Price • Increase Price
Mass Pricing Update Type	Indicates whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: • Absolute • Percentage **Note:** This field appears when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.

Field Name	Field Description
Rate Value	Displays the rate by which you want to increase or decrease the price. **Note:** This field appears when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
Currency	Indicates the currency in which the rate is specified. **Note:** This field appears when the mass pricing update type is set to **Absolute**.
Update Date	Displays the date when you want to update the price assignments.

- **Statistics** - Displays summarized information about the records which are included in the mass pricing update request. It contains the following fields:

Field Name	Field Description
Total Records	Displays the total number of price assignments which are included in the mass pricing update request.
Processed Records	Displays the total number of price assignments which are successfully updated through the mass pricing update request.
Error Records	Displays the total number of price assignments which could not be updated through the mass pricing update request.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the mass pricing update request. **Note:** The **Edit** button appears when the mass pricing update request is in the **Draft** status.
Delete	Used to delete the mass pricing update request. **Note:** The **Delete** button appears when the mass pricing update request is in the **Draft** status.
Submit	Used to submit the mass pricing update request for updating the price assignments. **Note:** The **Submit** button appears when the mass pricing update request is in the **Draft** status.
Submit Batch	Used to generate a batch job using the **Generic Request Periodic Monitor (C1-GENRQ)** batch control. **Note:** The **Submit Batch** button appears when the mass pricing update request is in the **Deferred Processing** status.
Approve	Used to approve the mass pricing update request. **Note:** The **Approve** button appears when: • The mass pricing update request is in the **Approval in Progress**status. • A user with the approval To Do role is reviewing the mass pricing update request.
Reject	Used to reject the mass pricing update request. **Note:** The **Reject** button appears when:

Button Name	Button Description
	• The mass pricing update request is in the **Approval in Progress**status. • A user with the approval To Do role is reviewing the mass pricing update request.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the mass pricing update request is created. In addition, a context menu appears corresponding to the **Business Object**field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date Time	Displays the date and time when the mass pricing update request status is updated.
Creation Date Time	Displays the date and time when the mass pricing update request is created.

Price Assignments

The **Price Assignments** zone lists the price assignments which you want to update through the mass pricing update request. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays information about the price item pricing. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of the respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined. **Note:** The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).
Entity ID	Indicates the entity to which the price item pricing is assigned.
Pricing Entity Type	Indicates the type of entity on which the price assignment is done. The valid values are: • Account Agreed • Customer Agreed • Price List • Product
Mass Pricing Update Status	Indicates the status of the price assignment record which is included in the mass pricing update request. The valid values are: • Pending • Processed • Error

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

Mass Pricing Update Request - Log

The **Log** tab contains the following zone:

- Mass Pricing Update Request Log on page 2553

Mass Pricing Update Request Log

The **Mass Pricing Update Request Log** zone lists the complete trail of actions performed on the mass pricing update request. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the mass pricing update request.
Details	Displays the details of the action performed on the mass pricing update request.
User	Indicates the user who has performed the action on the mass pricing update request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the mass pricing update request. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the mass pricing update request is changed. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

Note: You can manually add a log entry for the mass pricing update request by clicking the **Add Log Entry** link in the upper right corner of the **Mass Pricing Update Request Log** zone.

Editing a Mass Pricing Update Request

Procedure

To edit a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request whose details you want to edit.
   The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Mass Pricing Update Request** zone.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: • Decrease Price • End Date Price • Increase Price	Yes
Mass Pricing Update Type	Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: • Absolute • Percentage **Note:** The **Mass Pricing Update Type** field appears when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.	Yes (Conditional) **Note:** The **Mass Pricing Update Type** field is required when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
Rate Value	Used to specify the rate by which you want to increase or decrease the price. **Note:** The **Rate Value** field appears when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**. You cannot specify a negative value or zero in the **Rate Value** field.	Yes (Conditional) **Note:** The **Rate Value** field is required when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
Currency	Used to indicate the currency in which the rate is specified. **Note:** The **Currency** field appears when the mass pricing update type is set to **Absolute**. If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the **Currency Conversion For Bill Segments** algorithm spot of the respective division.	Yes (Conditional) **Note:** The **Currency** field is required when the mass pricing update type is set to **Absolute**.
Update Date	Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
	price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner: • If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. • If a price assignment is not yet referred in the system, the existing price assignment is updated. **Note:** You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.	

Note: The **Edit** button appears when the mass pricing update request is in the **Draft** status.

5. Modify the required details in the **Mass Pricing Update Request** screen.
6. Click **Save**.
   The changes made to the mass pricing update request are saved.

Deleting a Mass Pricing Update Request

Procedure

To delete a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request that you want to delete.
   The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Mass Pricing Update Request** zone.
   A message appears confirming whether you want to delete the mass pricing update request.

Note: The **Delete** button in the **Mass Pricing Update Request** zone appears when the mass pricing update request is in the **Draft** status.

Note: The **Delete** button appears when the mass pricing update request is in the **Draft** status.

5. Click **OK**.
   The mass pricing update request is deleted.

Submitting a Mass Pricing Update Request

Procedure

To submit a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to *t*he mass pricing update request that you want to submit.
   The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Submit** button in the **Mass Pricing Update Request** zone.

   The system behaves in the following manner:

If...	Then...
The **Approval Required** option is selected in the mass pricing update request type using which the mass pricing update request is created	The status of the mass pricing update request is changed to **Approval in Progress**. A To Do is created using the approval To Do type which is specified in the mass pricing update request type. Once a To Do is created, it is assigned to all users with an approval To Do role which is specified in the mass pricing update request type.
The **Approval Required** option is not selected in the mass pricing update request type and the number of price assignments in the mass pricing update request exceeds the defer processing count	The status of the mass pricing update request is changed to **Deferred Processing**.
The **Approval Required** option is not selected in the mass pricing update request type and the number of price assignments in the mass pricing update request does not exceed the defer processing count	The status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to **Error**. Finally, the status of the mass pricing update request is changed to **Processed**.

If...	Then...
	Note: If a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.

Note: The **Submit** button appears when the mass pricing update request is in the **Draft** status.

Generating a Batch Job for a Mass Pricing Update Request

Procedure

To generate a batch job for a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request for which you want to submit a batch job.
   The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Submit Batch** button in the **Mass Pricing Update Request** zone.

   A batch job is created using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined in the **Thread Count** and **Thread Pool Name** option types of the **Mass Pricing Update (C1-MASPRI)** feature configuration. In addition, a log is created for the mass pricing update request which indicates the batch job ID. Finally, the status of the mass pricing update request is changed to **Running C1-GENRQ Batch**.

   Note: The **Submit Batch** button appears when the mass pricing update request is in the **Deferred Processing** status.

Approving a Mass Pricing Update Request

Procedure

To approve a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the *m*ass pricing update request whose details you want to review.
   The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Approve** button in the **Mass Pricing Update Request** zone.

   The system behaves in the following manner:

If...	Then...
The number of price assignments in the mass pricing update request exceeds the defer processing count	The status of the mass pricing update request is changed to **Deferred Processing**.
The number of price assignments in the mass pricing update request does not exceed the defer processing count	The status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to **Error**. Finally, the status of the mass pricing update request is changed to **Processed**. **Note:** If a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.

Note:

The mass pricing update request is in the **Approval In Progress** status.

A user with the approval To Do role is reviewing the mass pricing update request.

The system will not allow you to approve or reject a mass pricing update request submitted by you.

Rejecting a Mass Pricing Update Request

Procedure

To reject a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request whose details you want to review.
   The **Mass Pricing Update Request** screen appears.
3. Ensure that the **Main** tab is selected.
4. Click the **Reject** button in the **Mass Pricing Update Request** zone.

   The status of the mass pricing update request is changed to **Rejected**. A To Do is created using the submitter To Do type which is specified in the mass pricing update request type. Once a To Do is created, it is assigned to all users with a submitter To Do role which is specified in the mass pricing update request type.

Note:

The mass pricing update request is in the **Approval In Progress** status.

A user with the approval To Do role is reviewing the mass pricing update request.

The system will not allow you to approve or reject a mass pricing update request submitted by you.

Adding a Log Entry for a Mass Pricing Update Request

Procedure

To add a log entry for a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to *t*he mass pricing update request whose log you want to edit.
   The **Mass Pricing Update Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of this zone.

   The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Log Details	Used to specify additional comments for the mass pricing update request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.
   The log entry is added in the **Mass Pricing Update Request Log** zone.

Mass Pricing Update Request

The **Mass Pricing Update Request** screen allows you to search for price assignments using various search criteria. The search results (i.e. price assignments) are grouped based on the pricing entity type, such as **Account Agreed**, **Customer Agreed**, **Price List**, and **Product**. You can then create a mass pricing update request for the following:

- All price assignments of a particular pricing entity type
- All price assignments of one or more pricing entity type
- All price assignments of all pricing entity types
- A price item pricing assigned to a particular person, account, or price list
- A price item pricing assigned to a price list which is associated to a product
- One or more price assignments of a person, account, or price list
- One or more price assignments of a price list which is associated to a product

It contains the following zones:

- Search Price Assignments on page 2561
- Account Agreed Price Assignments on page 2563
- Customer Agreed Price Assignments on page 2564
- Price List Price Assignments on page 2565
- Product Price List Price Assignments on page 2565

Search Price Assignments

The **Search Price Assignments** zone allows you to search for active price assignments on different pricing entity type. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search pricing which is defined for a particular price item. **Note:** The **Search** (🔍) icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, the **Price Item Search** window appears.	Yes
Account ID	Used to search pricing which is assigned to a particular account. **Note:** The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears.	No
Person ID	Used to search pricing which is assigned to a particular person. **Note:** The **Search** (🔍) icon appears corresponding to the **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search pricing which belongs to a particular division. **Note:** You can only view those divisions to which you have access in the **Division** list.	Yes
Update Date	Used to search pricing which is effective on a particular date. **Note:** By default, this field is set to the current date. The update date cannot be earlier than the system date.	Yes
Pricing Entity Type	Used to search pricing which is defined on a particular type of entity. The valid values are: • Account Agreed • Customer Agreed • Price List • Product **Note:** This field appears when you click the **Advanced Search** link available in the right side of the **Search Price Assignments** zone.	No

In addition, it contains the **Price Item Parameters** section which has the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search pricing which is defined using a particular parameter. **Note:** The **Search** (🔍) icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, the **Parameter Search** window appears.	No
Parameter Value	Used to search pricing which is defined using a particular parameter value. **Note:** If the value type of the parameter is **Adhoc** or **Predefined**, the **Search** (🔍) icon appears corresponding to the **Parameter Value** field. On clicking the **Search** icon, the **Parameter Value Search** window appears.	Yes (Conditional) **Note:** This field is required when you are searching for price assignments which are created using a particular parameter.

Note: If you want to add more than one parameter while searching for price assignments, click the **Add** (+) icon and then specify the parameter and parameter value. However, if you want to remove a parameter and parameter value combination from the search criteria, click the **Delete** (🗑) icon corresponding to the parameter and parameter value combination.

- **Search Result** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Result** section contains the following columns:

Column Name	Column Description
Pricing Entity Type	Indicates the type of entity on which the price item pricing is defined. The valid values are: • Account Agreed • Customer Agreed • Price List • Product
Pricing Entity Count	Indicates the number of entities on which the price item pricing is defined.
Price Assignment Count	Indicates the number of price assignments on a particular type of pricing entity.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

On clicking the **Broadcast** icon corresponding to a pricing entity type, the **Account Agreed Price Assignments**, **Customer Agreed Price Assignments**, **Price List Price Assignments**, or **Product Price List Price Assignments** zone appears depending on the pricing entity type.

A check box appears corresponding to each pricing entity type. On selecting the check box, you can create a mass pricing update request for all price assignments which are done on the respective pricing entity type. You can also create a mass pricing update request for all price assignments which are done on one or more pricing entity types at the same time. In addition, you can select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are done on all pricing entity types.

Account Agreed Price Assignments

The **Account Agreed Price Assignments** zone lists the active pricing of a price item which is assigned to an account. It contains the following columns:

Column Name	Column Description
Account Information	Indicates the account to which the price item pricing is assigned. In addition, the **Account Information** column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Account Identifier Type	Indicates the primary identifier type of the account.
Account Identifier	Indicates the account to which the price item pricing is assigned.
Pricing Information	Displays information about the price item pricing. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of respective price item pricing.

Column Name	Column Description
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined. **Note:** The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined at the account level.

Customer Agreed Price Assignments

The **Customer Agreed Price Assignments** zone lists the active pricing of a price item which is assigned to a person. It contains the following columns:

Column Name	Column Description
Person Information	Indicates the person to whom the price item pricing is assigned. In addition, the **Person Information** column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.
Person Identifier Type	Indicates the primary identifier type of a person.
Person Identifier	Indicates the person to whom the price item pricing is assigned.
Pricing Information	Displays information about the price item pricing. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined. **Note:** The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined at the person level.

Price List Price Assignments

The **Price List Price Assignments** zone lists the active pricing of a price item which is assigned to a price list. It contains the following columns:

Column Name	Column Description
Price List Information	Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of the respective price list.
Pricing Information	Displays information about the price item pricing. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined. **Note:** The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined in the price lists.

Product Price List Price Assignments

The **Product Price List Price Assignments** zone lists the active pricing of a price item which is added in the price lists associated with the products. It contains the following columns:

Column Name	Column Description
Product	Displays information about the product.
Product Version	Displays information about the effective product version.
Price List Information	Indicates the price list associated with the product to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Price List** screen appears where you can view the details of respective price list.
Pricing Information	Displays information about the price item pricing. **Note:** It has a link. On clicking the link, the **Price Item Pricing** screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined. **Note:** The order in which parameter values appear in the **Pricing Parameters** field is controlled by the display order (which is defined while associating a parameter with a price item).

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined in the price lists associated with the products.

Searching for Price Assignments on a Pricing Entity

Prerequisites

To search for price assignments on a pricing entity, you should have:

- Price items, accounts, persons, and divisions defined in the application
- Price item associated with the required division
- Access to the required division

Procedure

To search for price assignments on a pricing entity:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.
   A sub-menu appears.
3. Click the **Add** option from the **Mass Pricing Update Request** sub-menu.
   The **Mass Pricing Update Request** screen appears.

4. Enter the search criteria in the **Search Price Assignments** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

   The number of price assignments on the following types of pricing entity are listed in the **Search Results** section:

   - Account Agreed
   - Customer Agreed
   - Price List
   - Product

Part XLI

Price Item, Parameter, and SQI Upload

Topics:

- Uploading a Price Item File in the XML Format
- Uploading a Price Item File in the CSV Format
- C1-PRCITM-PR
- C1-PRICEUPL
- XML File Format for Uploading Price Items
- Sample XML Format for Uploading Price Items
- CSV File Format for Uploading Price Items
- Sample CSV Format for Uploading Price Items
- Uploading a Parameter File in the XML Format
- Uploading a Parameter File in the CSV Format
- XML File Format for Uploading Parameters
- Sample XML Format for Uploading Parameters
- CSV File Format for Uploading Parameters
- Sample CSV Format for Uploading Parameters
- Uploading an SQI File in the XML Format
- Uploading an SQI File in the CSV Format
- XML File Format for Uploading Service Quantity Identifiers (SQIs)
- Sample XML Format for Uploading Service Quantity Identifiers (SQIs)

There might be situations when the customer wants to move the price item, parameter, and service quantity identifier information from the legacy system to Oracle Revenue Management and Billing (ORMB). In such situations, you can use the **Price Item, Parameter, and SQI Upload** feature in ORMB to create new price items or edit the existing price items using the **File Upload Interface** utility. You can also use the **Price Item, Parameter, and SQI Upload** feature to create new parameters and SQIs using the **File Upload Interface** utility. However, at present, you cannot edit the existing parameters and SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters and SQIs from the respective user interface.

Note: If you want to edit an existing price item in the system, you must provide all details of the price item and not just the details which you want to update. This is because the **File Upload Interface** utility supports the **Replace** operation and not the **Edit** operation while editing the price item.

You can upload the price item, parameter, and SQI files in the XML or CSV format using the **File Upload Interface** utility. You can specify the following in the XML and CSV files along with the basic details of the price item:

- Parameters and divisions which you want to associate with the price item
- Characteristics for the price item
- Division-specific characteristics for the price item
- Division-specific SQIs for the price item
- Details of the price item relationship

Note: While uploading the price item file, you need to ensure that the parameters and service quantity identifiers mentioned in the price item file are already present in the system.

You can upload the price items, parameters, and SQIs from the same file or from individual files based on the business requirements. For more information, refer to Uploading Price Items, Parameters, and SQIs from the Same File on page 2630.

At present, the system does not allow you to configure the approval process for the **Price Item, Parameter, and SQI Upload** feature. Therefore, you must ensure that the files are pre-approved before uploading them in the system.

- CSV File Format for Uploading Service Quantity Identifiers (SQIs)
- Sample CSV Format for Uploading SQIs
- Uploading Price Items, Parameters, and SQIs from the Same File

Uploading a Price Item File in the XML Format

To upload a price item file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading price items in the XML format
2. Upload the price item file
3. Create or update the price items in the system

Related Topics

For more information on...	See...
How to define a file request type for uploading price items in the XML format	Defining a File Request Type for Uploading Price Items in the XML Format on page 2571
How to upload a price item file	Uploading a Price Item File on page 2572
How to create or update the price items in the system	Creating or Updating Price Items on page 2572

Defining a File Request Type for Uploading Price Items in the XML Format

Procedure

To define a file request type for uploading price items in the XML format:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.
   The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Object** option from the **Service Type** list.
9. Enter the **C1_PRICEITEM_BO** business object or custom price item business object in the **Service Name** *f*ield.
10. Attach an algorithm created using the **C1-PRCITM-PR** algorithm type to the **Pre-Processing Algorithm** field *c*orresponding to the price item business object.

    Note: For more information about the **C1-PRCITM-PR** algorithm, refer to C1-PRCITM-PR on page 2574.
11. Select the **Add** or **Replace** option from the **Operation** list depending on whether you want to create new price *i*tems or edit the existing price items using the file request type.
12. Click **Save**.
    The file request type is defined for uploading price items in the XML format.

Uploading a Price Item File

You can upload a price item file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Creating or Updating Price Items

You can create or edit the price items in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Uploading a Price Item File in the CSV Format

To upload a price item file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading price items in the CSV format
2. Upload the price item file
3. Create or update the price items in the system

Related Topics

For more information on...	See...
How to define a file request type for uploading price items in the CSV format	Defining a File Request Type for Uploading Price Items in the CSV Format on page 2572
How to upload a price item file	Uploading a Price Item File on page 2573
How to create or update the price items in the system	Creating or Updating Price Items on page 2573

Defining a File Request Type for Uploading Price Items in the CSV Format

Procedure

To define a file request type for uploading price items in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.
   The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.
   The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter `csv` in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.

10. In the **Services** section, enter the required sequence number.
11. Select the **Business Object** option from the **Service Type** list.
12. Enter the **C1_PRICEITEM_BO** business object or custom price item business object in the **Service Name** field.
13. Attach an algorithm created using the **C1-PRCITM-PR** algorithm type to the **Pre-Processing Algorithm** *f*ield corresponding to the price item business object.

    Note: For more information about the **C1-PRCITM-PR** algorithm, refer to C1-PRCITM-PR on page 2574.
14. Select the **Add** or **Replace** option from the **Operation** list depending on whether you want to create new *p*rice items or edit the existing price items using the file request type.
15. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** *s*ection.
16. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** *s*ection.
17. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	PRICEITEMCODE	C1_PRICEITEM_BO/priceItemCode
2	DESCRIPTION	C1_PRICEITEM_BO/description

18. Click **Save**.
    The file request type is defined for uploading price items in the CSV format.

Uploading a Price Item File

You can upload a price item file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Creating or Updating Price Items

You can create or edit the price items in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

C1-PRCITM-PR

The **C1-PRCITM-PR** algorithm does the following:

- Defaults the following fields which are required to create the price item, but are not provided by the legacy system:

Field Name	Condition	Default Value	Default Value Description
Price Item Usage	-	PRBL	Pricing and Billing
Price Item Type	Price Item Usage = PRBL	FEES	Fees
Bundle	-	No	No
Bundle Type	Price Item Usage = PRIC, Price Item Type = FEES and Bundle = Yes	REGU	Regular
Price Item Status	-	ACTV	Active
Global Price List	-	No	No

- Generates the price item parameter group using the parameter codes and parameter values for each of the price item relationship.
- Validates whether the division, SQI, price item characteristic types, division-specific price item characteristic type, and parameters are already defined in the system.

C1-PRICEUPL

The **C1-PRICEUPL** algorithm does the following:

- Defaults the following fields which are required to create the parameter, but are not provided by the legacy system:

Field Name	Condition	Default Value
Parameter Usage	Source Entity = TRN	Price Item

XML File Format for Uploading Price Items

Before uploading a price item file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1_PRICEITEM_BO	Used to specify the details of the price item or price item bundle whose record you want to create or update in the system.	Yes
priceItemCode	Used to specify the price item or price item bundle.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
description	Used to specify the description for the price item or price item bundle.	Yes
priceItemAvailFor	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: • **PRIC** - Enables you to use the price item or price item bundle for only pricing. • **PRBL** - Enables you to use the price item or price item bundle for pricing and billing.	Yes
priceItemType	Used to indicate the type of the price item or price item bundle. If the price item or price item bundle is used for only pricing, the valid values are: • FEES • RATE However, if the price item or price item bundle is used for the pricing and billing, the valid value is: • FEES	Yes
piStatusFlag	Used to indicate the status of the price item or price item bundle. The valid values are: • **ACTV** - Enables you to set the price item or price item bundle to **Active**. • **INAC** - Enables you to set the price item or price item bundle to **Inactive**.	Yes
bundleSw	Used to indicate whether you want to define a price item bundle. The valid values are: • Y • N	Yes
bundleTypeFlg	Used to indicate the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: • **PHAN** - Enables you to create a phantom price item bundle. • **REGU** - Enables you to create a regular price item bundle. • **RTIO** - Enables you to create a ratio price item bundle. However, if the price item bundle is available for only pricing and the price item type is set to **FEES**, the valid value is: • **REGU** - Enables you to create a regular price item bundle. **Note:** You cannot define a price item bundle when it is available for only pricing and when the price item type is set to **RATE**.	Yes (Conditional) **Note:** This data is required when you are creating a price item bundle.

<table>
<tr><th>Tag Name</th><th>Tag Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td>asgnGlobalPlSw</td><td>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:
Y
N</td><td>Yes</td></tr>
<tr><td>saType</td><td>Used to indicate the contract type that you want to associate with the price item or price item bundle.</td><td>Yes (Conditional)
Note: This data is required when the price item or price item bundle is used for pricing and billing.</td></tr>
<tr><td>priceItemParm</td><td>Used to specify the details of the parameter which you want to associate with the price item or price item bundle.</td><td>No</td></tr>

<tr><td>priceItemRelCharacteristic</td><td>Used to specify the value for the characteristic type when you are defining a relationship-specific characteristic for the price item or price item bundle.</td></tr>
</table></td><td>Yes (Conditional)
 Note: This data is required when you want to do the following:
Define a characteristic for the price item or price item bundle
Define a division-specific characteristic for the price item or price item bundle
Define a relationship-specific characteristic for the price item or price item bundle</td></tr>
<tr><td>priceItemChar</td><td>Used to specify a list of characteristics for the price item or price item bundle.</td><td>No</td></tr>
</table>

Tag Name	Tag Description	Mandatory (Yes or No)
priceItemRel	Used to specify a list of price items or price item bundles that you want to associate with the parent price item or add to the price item bundle.	No
priceItemChildCd	Used to indicate the price item or price item bundle that you want to associate with the parent price item or add to the price item bundle.	Yes (Conditional) **Note:** This data is required when you want to do either of the following: • Associate a price item or price item bundle with the parent price item • Add a price item or price item bundle to the price item bundle
startDate	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	Yes (Conditional) **Note:** This data is required when you want to do either of the following: • Associate a price item or price item bundle with the parent price item • Add a price item or price item bundle to the price item bundle
endDate	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	No
priceItemReTypeFlg	Used to indicate how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: • **BNDL** - Enables you to set the relationship type to **Bundle**. • **CG** - Enables you to set the relationship type to **Custom**.	Yes (Conditional) **Note:** This data is required when you want to do either of the following:

Tag Name	Tag Description	Mandatory (Yes or No)
	• **DENB** - Enables you to set the relationship type to **Denominator**. • **NUMB** - Enables you to set the relationship type to **Numerator**. • **OTHR** - Enables you to set the relationship type to **Other**. • **PROD** - Enables you to set the relationship type to **Price Item**. • **SVC** - Enables you to set the relationship type to **Service**. • **SVCG** - Enables you to set the relationship type to **Service Group**. **Note:** You must use the **OTHR**, **CG**, **PROD**, **SVC**, or **SVCG** relationship type while associating a price item or price item bundle to the parent price item. However, you must use the **BNDL** relationship type while adding a price item or price item bundle in the regular and phantom price item bundles. However, you can use the **DENB** and **NUMB** relationship type while adding a price item or price item bundle in the ratio price item bundles.	• Associate a price item or price item bundle with the parent price item • Add a price item or price item bundle to the price item bundle
priceItemParmGroup	Used to specify the parameter and its value based on which you want to determine pricing for the price item or price item bundle.	No
priceParmCode	Used to specify the parameter using which you want to determine the pricing for the price item or price item bundle. **Note:** You must specify a parameter which is associated with the price item or price item bundle and whose parameter usage is set to **Pricing**. You cannot specify any special character except underscore (_) in the parameter name.	Yes (Conditional) **Note:** This data is required when you want to determine the pricing for the price item or price item bundle using a parameter.
priceParmVal	Used to specify the parameter value using which you want to determine the pricing for the price item or price item bundle. **Note:** You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.	Yes (Conditional) **Note:** This data is required when you want to determine the pricing for the price item or price item bundle using a parameter.
priceItemRelCharacteristic	Used to specify a list of relationship-specific characteristics for the price item or price item bundle.	No

Note: When you want to edit the existing price items using the **File Upload Interface** utility, you need to provide all details of the price item and not just the details which you want to update. This is because the system supports replace operation and not the edit operation while editing the price items.

Sample XML Format for Uploading Price Items

The following table lists the price items that you want to upload using the XML format:

Price Item	Related Price Item	Relationship Type
Overdraft Returned	-	-
Additional Negative Balance Fees	-	-
Overdraft Assistance	Overdraft Returned	Service
	Additional Negative Balance Fees	Service Group

Note: The system will create the above price items when the required contract types, parameters, predefined parameter values, divisions, SQIs, characteristic types, predefined characteristic values are defined in the application.

CSV File Format for Uploading Price Items

Before uploading a price item file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: • **PRIC** - Enables you to use the price item or price item bundle for only pricing. • **PRBL** - Enables you to use the price item or price item bundle for pricing and billing.	Yes
Price Item Type	Used to indicate the type of the price item or price item bundle. If the price item or price item bundle is used for only pricing, the valid values are: • FEES • RATE However, if the price item or price item bundle is used for the pricing and billing, the valid value is: • FEES	Yes
Status	Used to indicate the status of the price item or price item bundle. The valid values are: • **ACTV** - Enables you to set the price item or price item bundle to **Active**. • **INAC** - Enables you to set the price item or price item bundle to **Inactive**.	Yes
Bundle	Used to indicate whether you want to define a price item bundle. The valid values are: • Y • N	Yes

Column Name	Description	Mandatory (Yes or No)
Bundle Type	Used to indicate the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: • **PHAN** - Enables you to create a phantom price item bundle. • **REGU** - Enables you to create a regular price item bundle. • **RTIO** - Enables you to create a ratio price item bundle. However, if the price item bundle is available for only pricing and the price item type is set to **FEES**, the valid value is: • **REGU** - Enables you to create a regular price item bundle. **Note:** You cannot define a price item bundle when it is available for only pricing and when the price item type is set to **RATE**.	Yes (Conditional) **Note:** This data is required when you are creating a price item bundle.
Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: • Y • N	Yes
Contract Type	Used to indicate the contract type that you want to associate with the price item or price item bundle.	Yes (Conditional) **Note:** This data is required when the price item or price item bundle is used for pricing and billing.
Price Item Parameter Information		
Effective Start Date	Used to specify the date from when the parameter is effective for the price item or price item bundle.	Yes (Conditional) **Note:** This data is required when you want to associate a parameter with the price item or price item bundle.
Effective End Date	Used to specify the date till when the parameter is effective for the price item or price item bundle.	No

Column Name	Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item or price item bundle. **Note:** You must specify a parameter which is already defined in the system. The system allows you to specify only those parameters where the parameter usage is set to **Price Item**.	Yes (Conditional) **Note:** This data is required when you want to associate a parameter with the price item or price item bundle.
Business Label	Used to specify a business label for the parameter. If the business label is defined for a parameter, the business label appears instead of the parameter name.	No
Display Order	Used to indicate the order in which the parameter and its value should be displayed in the price item parameter information string across the application.	Yes (Conditional) **Note:** This data is required when you want to associate a parameter with the price item or price item bundle.
Parameter Usage	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: • **AGG** - Indicates that you want to use the parameter for aggregating transactions. • **PRI** - Indicates that you want to use the parameter for aggregating transactions and defining the price item pricing.	Yes (Conditional) **Note:** This data is required when you want to associate a parameter with the price item or price item bundle.
Mandatory	Used to indicate whether the parameter is mandatory while defining the price item pricing. The valid values are: • Y • N	No
Priority	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.	Yes (Conditional) **Note:** This data is required when you want to associate an optional parameter with the price item or price item bundle.
Predefined Parameter Values for Price Item		

Column Name	Description	Mandatory (Yes or No)
Predefined Parameter Value for Price Item	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional) **Note:** This data is required when you want to define valid predefined parameter values for the price item or price item bundle.
Division Information		
Division	Used to indicate the division to which you want to associate the price item or price item bundle.	Yes
Division-Specific SQIs for Price Item		
SQI	Used to indicate the SQI to which you want to associate the price item or price item bundle in the division.	Yes (Conditional) **Note:** This data is required when you want to define a division-specific SQI for the price item or price item bundle.
Division-Specific Characteristics for Price Item		
Characteristic Type	Used to specify the characteristic type. **Note:** You must specify a characteristic type which is already defined in the system. You must specify a characteristic type where the characteristic entity is set to **Division/ Price Item Combination**.	Yes (Conditional) **Note:** This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	Yes (Conditional) **Note:** This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
Price Item Characteristics		

Column Name	Description	Mandatory (Yes or No)
Characteristic Type	Used to specify the characteristic type. **Note:** You must specify a characteristic type which is already defined in the system. You must specify a characteristic type where the characteristic entity is set to **Price Item**.	Yes (Conditional) **Note:** This data is required when you are defining a characteristic for the price item or price item bundle.
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional) **Note:** This data is required when you are defining a characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when you are defining a characteristic for the price item or price item bundle.
Price Item Relationship		
Price Item	Used to indicate the price item or price item bundle that you want to associate with the parent price item or add to the price item bundle.	Yes (Conditional) **Note:** This data is required when you want to do either of the following: • Associate a price item or price item bundle with the parent price item • Add a price item or price item bundle to the price item bundle
Effective Start Date	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	Yes (Conditional) **Note:** This data is required when you want to do either of the following: • Associate a price item or price item bundle with the parent price item • Add a price item or price item bundle to the price item bundle

Column Name	Description	Mandatory (Yes or No)
Effective End Date	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	No
Relationship Type	Used to indicate how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: • **BNDL** - Enables you to set the relationship type to **Bundle**. • **CG** - Enables you to set the relationship type to **Custom**. • **DENB** - Enables you to set the relationship type to **Denominator**. • **NUMB** - Enables you to set the relationship type to **Numerator**. • **OTHR** - Enables you to set the relationship type to **Other**. • **PROD** - Enables you to set the relationship type to **Price Item**. • **SVC** - Enables you to set the relationship type to **Service**. • **SVCG** - Enables you to set the relationship type to **Service Group**. **Note:** You must use the **OTHR**, **CG**, **PROD**, **SVC**, or **SVCG** relationship type while associating a price item or price item bundle to the parent price item. However, you must use the **BNDL** relationship type while adding a price item or price item bundle in the regular and phantom price item bundles. However, you can use the **DENB** and **NUMB** relationship type while adding a price item or price item bundle in the ratio price item bundles.	Yes (Conditional) **Note:** This data is required when you want to do either of the following: • Associate a price item or price item bundle with the parent price item • Add a price item or price item bundle to the price item bundle

Column Name	Description	Mandatory (Yes or No)
Price Item Parameter=Parameter Value	Used to specify the parameter and its value using which you want to determine the pricing for the child price item or price item bundle. **Note:** You must specify a parameter which is associated with the price item or price item bundle and whose parameter usage is set to **Pricing**. You cannot specify any special character except underscore (_) in the parameter name. You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value. You cannot specify more than 50 parameter and parameter value combinations while uploading the price item file in the CSV format.	Yes (Conditional) **Note:** This data is required when you want to determine the pricing for the child price item or price item bundle using a parameter.
Relationship-Specific Characteristics for Price Item		
Characteristic Type	Used to specify the characteristic type. **Note:** You must specify a characteristic type which is already defined in the system. You must specify a characteristic type where the characteristic entity is set to **Price Item Relationship**.	Yes (Conditional) **Note:** This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.
Effective Date	Used to specify the date from when the relationship-specific characteristic is effective for the price item or price item bundle.	Yes (Conditional) **Note:** This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) **Note:** This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.

Sample CSV Format for Uploading Price Items

The following table lists the price items that you want to create using the CSV format:

Price Item	Related Price Item	Relationship Type
Overdraft Returned	-	-
Additional Negative Balance Fees	-	-
Overdraft Assistance	Overdraft Returned	Service
	Additional Negative Balance Fees	Service Group

Note: The system will create the above price items when the required contract types, parameters, predefined parameter values, divisions, SQIs, characteristic types, predefined characteristic values are defined in the application.

The following table lists the field transformation details that you need to specify in the file request type using which you want to upload price items in the system:

Sequence	Field Name	Map Field XPath
1	Price Item	C1_PRICEITEM_BO/priceItemCode

Uploading a Parameter File in the XML Format

To upload a parameter file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading parameters in the XML format
2. Upload the parameter file
3. Create the parameters in the system

Related Topics

For more information on...	See...
How to define a file request type for uploading parameters in the XML format	Defining a File Request Type for Uploading Parameters in the XML Format on page 2606
How to upload a parameter file	Uploading a Parameter File on page 2607
How to create the parameters in the system	Creating Parameters on page 2607

Defining a File Request Type for Uploading Parameters in the XML Format

Procedure

To define a file request type for uploading parameters in the XML format:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.
   The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Object** option from the **Service Type** list.
9. Enter the **C1_PRICE_PARM** business object or custom parameter business object in the **Service Name** field.
10. Attach an algorithm created using the **C1-PRICEUPL** algorithm type to the **Pre-Processing Algorithm** field corresponding to the parameter business object.

    Note: For more information about the **C1-PRICEUPL** algorithm, refer to C1-PRICEUPL on page 2574.

11. Select the **Add** option from the **Operation** list.

    Note: At present, you cannot edit the existing parameters using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters from the user interface.

12. Click **Save**.
    The file request type is defined for uploading parameters in the XML format.

Uploading a Parameter File

You can upload a parameter file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Creating Parameters

You can create the parameters in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Uploading a Parameter File in the CSV Format

To upload a parameter file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading parameters in the CSV format
2. Upload the parameter file
3. Create the parameters in the system

How to create the parameters in the system	Creating Parameters on page 2608

Defining a File Request Type for Uploading Parameters in the CSV Format

Procedure

To define a file request type for uploading parameters in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.
   The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.
   The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter `csv` in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.

10. In the **Services** section, enter the required sequence number.
11. Select the **Business Object** option from the **Service Type** list.
12. Enter the **C1_PRICE_PARM** business object or custom parameter business object in the **Service Name** field.
13. Attach an algorithm created using the **C1-PRICEUPL** algorithm type to the **Pre-Processing Algorithm** field corresponding to the parameter business object.

    Note: For more information about the **C1-PRICEUPL** algorithm, refer to C1-PRICEUPL on page 2574.
14. Select the **Add** option from the **Operation** list.

    Note: At present, you cannot edit the existing parameters using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters from the user interface.
15. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** section.
16. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** section.
17. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	PRICEPARMCODE	C1_PRICE_PARM/priceParmCode
2	DESCRIPTION	C1_PRICE_PARM/description

18. Click **Save**.
    The file request type is defined for uploading parameters in the CSV format.

Uploading a Parameter File

You can upload a parameter file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Creating Parameters

You can create the parameters in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

XML File Format for Uploading Parameters

Before uploading a parameter file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

<table>
<tr><th>Tag Name</th><th>Tag Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td>C1_PRICE_PARM</td><td>Used to specify the details of the parameter whose record you want to create or update in the system.</td><td>Yes</td></tr>
<tr><td>pricingEligibilitySw</td><td>Used to indicate whether the parameter can be used while defining the pricing eligibility criteria. The valid values are:
Y
N Note: You must ensure that this tag contains N when the sourceEntityFlg tag contains TRN.</td><td>No</td></tr>
<tr><td>priceItemSw</td><td>Used to indicate whether the parameter can be associated with a price item or price item bundle. The valid values are:
Y
N Note:
You must ensure that this tag contains N when a parameter is defined using the following source entity and source type combinations:<table><tr><th>Source Entity</th><th>Source Type</th></tr><tr><td>ACCT</td><td>BAL</td></tr><tr><td>ACCT</td><td>CNT</td></tr><tr><td>PERS</td><td>BAL</td></tr><tr><td>PERS</td><td>CNT</td></tr><tr><td>ALGO</td><td>-</td></tr><tr><td>SQI</td><td>-</td></tr></table></td><td>No</td></tr>
<tr><td>priceListEligibilitySw</td><td>Used to indicate whether the parameter can be used while defining the price list eligibility criteria. The valid values are:
Y
N Note: You must ensure that this tag contains N when the sourceEntityFlg tag contains TRN.</td><td>No</td></tr>
</table>

Tag Name	Tag Description	Mandatory (Yes or No)
productEligibilitySw	Used to indicate whether the parameter can be used while defining the product eligibility criteria. The valid values are: • Y • N **Note:** You must ensure that this tag contains **N** when the **sourceEntityFlg** tag contains **ALGO**, **SQI**, or **TRN**.	No
priceParmCode	Used to specify the parameter name. **Note:** You cannot specify any special character except underscore (_) in the parameter name.	Yes
description	Used to specify the description for the parameter.	Yes
priceParmTypeFlag	Used to indicate the type of value that you want to store in the parameter. The valid values are: • **ADV** - Enables you to store an adhoc value in the parameter. • **DFV** - Enables you to store a predefined value in the parameter. • **FKV** - Enables you to store a reference value in the parameter.	Yes
sourceEntityFlg	Used to indicate the entity from where the parameter value should be derived. The valid values are: • **ACCT** - Enables you to derive the parameter value from the account. • **ALGO** - Enables you to derive the parameter value from an algorithm. • **PERS** - Enables you to derive the parameter value from the person. • **PRD** - Enables you to derive the parameter value from the product. • **SQI** - Enables you to derive the parameter value from a service quantity identifier. • **TRN** - Enables you to derive the parameter value from a transaction.	Yes
sourceTypeCode	Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived. **Note:** You must ensure that this tag contains no value when the **sourceEntityFlg** tag contains **TRN**.	Yes

<table>
<tr><th>Tag Name</th><th>Tag Description</th><th>Mandatory (Yes or No)</th></tr>
<tr><td></td><td>You must ensure that this tag contains the following information depending on the source entity and source type combination:
<table>
<tr><th>Source Entity</th><th>Source Type</th><th>Source Type Code</th></tr>
<tr><td>ACCT</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to Account.</td></tr>
<tr><td>ACCT</td><td>FLD</td><td>A field from the CI_ACCT table.</td></tr>
<tr><td>ACCT</td><td>BAL</td><td>A value from the BAL_FLG lookup field.</td></tr>
<tr><td>ACCT</td><td>CNT</td><td>A value from the CNT_FLG lookup field.</td></tr>
<tr><td>PERS</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to Person.</td></tr>
<tr><td>PERS</td><td>FLD</td><td>A field from the CI_PER table.</td></tr>
<tr><td>PERS</td><td>BAL</td><td>A value from the BAL_FLG lookup field.</td></tr>
<tr><td>PERS</td><td>CNT</td><td>A value from the CNT_FLG lookup field.</td></tr>
<tr><td>PRD</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to Product.</td></tr>
<tr><td>PRD</td><td>FLD</td><td>A field from the C1_PRODUCT table.</td></tr>
<tr><td>SQI</td><td>-</td><td>A service quantity identifier which is already defined in the system.</td></tr>
</table></td><td></td></tr>
<tr><td>sourceTypeFlg</td><td>Used to indicate the type of source from where the parameter value should be derived. The valid values are:
• CHAR - Enables you to derive the parameter value from a characteristic.</td><td>Yes</td></tr>
</table>

Tag Name	Tag Description	Mandatory (Yes or No)
	• **FLD** - Enables you to derive the parameter value from a field. • **BAL** - Enables you to derive the parameter value from a usage amount. • **CNT** - Enables you to derive the parameter value from a usage counter. **Note:** You must ensure that this tag contains no value when the **sourceEntityFlg** tag contains **ALGO**, **SQI**, or **TRN**. You must ensure that this tag does not contain **BAL** or **CNT** when the **sourceEntityFlg** tag contains **PRD**.	
validationAlgoCd	Used to indicate the algorithm using which you want to validate the adhoc parameter value. **Note:** You must ensure that this tag contains value when the **priceParmTypeFlag** tag contains **ADV**.	No
referredTable	Used to indicate the table whose primary key (column) you want to set as the reference entity.	Yes (Conditional) **Note:** This data is required when the **priceParmTypeFlag** tag contains **FKV**.
referredField	Used to indicate the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.	Yes (Conditional) **Note:** This data is required when the **priceParmTypeFlag** tag contains **FKV**.
priceParmValue	Used to specify a list of predefined values for the parameter.	Yes (Conditional) **Note:** This data is required when the **priceParmTypeFlag** tag contains **DFV**.
priceParmVal	Used to specify the parameter value. **Note:** You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes (Conditional) **Note:** This data is required when the **priceParmTypeFlag** tag contains **DFV**.
descr	Used to specify the description for the parameter value.	Yes (Conditional) **Note:** This data is required when the **priceParmTypeFlag** tag contains **DFV**.

CSV File Format for Uploading Parameters

Before uploading a parameter file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following columns:

Parameter	Used to specify the parameter name. **Note:** You cannot specify any special character except underscore (_) in the parameter name.	Yes
Description	Used to specify the description for the parameter.	Yes
Value Type	Used to indicate the type of value that you want to store in the parameter. The valid values are: • **ADV** - Enables you to store an adhoc value in the parameter. • **DFV** - Enables you to store a predefined value in the parameter. • **FKV** - Enables you to store a reference value in the parameter.	Yes

Source Entity	Used to indicate the entity from where the parameter value should be derived. The valid values are: • **ACCT** - Enables you to derive the parameter value from the account. • **ALGO** - Enables you to derive the parameter value from an algorithm. • **PERS** - Enables you to derive the parameter value from the person. • **PRD** - Enables you to derive the parameter value from the product. • **SQI** - Enables you to derive the parameter value from a service quantity identifier. • **TRN** - Enables you to derive the parameter value from a transaction.	Yes
Source Type	Used to indicate the type of source from where the parameter value should be derived. The valid values are: • **CHAR** - Enables you to derive the parameter value from a characteristic. • **FLD** - Enables you to derive the parameter value from a field. • **BAL** - Enables you to derive the parameter value from a usage amount. • **CNT** - Enables you to derive the parameter value from a usage counter. **Note:** You must not specify the source type when the source entity is set to **ALGO**, **SQI**, or **TRN**. You must not specify the source type as **BAL** or **CNT** when the source entity is set to **PRD**.	Yes

<table>
<tr><td></td><td></td><td></td></tr>
<tr><td>Source Type Code</td><td>Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.

Note:

You must not specify the source type code when the source entity is set to TRN.

You must specify the source type code depending on the following source entity and source type combination:

<table>
<tr><th>Source Entity</th><th>Source Type</th><th>Source Type Code</th></tr>
<tr><td>ACCT</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to Account.</td></tr>
<tr><td>ACCT</td><td>FLD</td><td>A field from the CI_ACCT table.</td></tr>
<tr><td>ACCT</td><td>BAL</td><td>A value from the BAL_FLG lookup field.</td></tr>
<tr><td>ACCT</td><td>CNT</td><td>A value from the CNT_FLG lookup field.</td></tr>
<tr><td>PERS</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to Person.</td></tr>
<tr><td>PERS</td><td>FLD</td><td>A field from the CI_PER table.</td></tr>
<tr><td>PERS</td><td>BAL</td><td>A value from the BAL_FLG lookup field.</td></tr>
<tr><td>PERS</td><td>CNT</td><td>A value from the CNT_FLG lookup field.</td></tr>
<tr><td>PRD</td><td>CHAR</td><td>A characteristic type where the characteristic entity is set to Product.</td></tr>
<tr><td>PRD</td><td>FLD</td><td>A field from the C1_PRODUCT table.</td></tr>
<tr><td>SQI</td><td>-</td><td>A service quantity identifier which is already defined in the system.</td></tr>
</table>
</td><td>Yes</td></tr>
<tr><td>Validation Algorithm</td><td>Used to indicate the algorithm using which you want to validate the adhoc parameter value.

Note: You must specify a validation algorithm when the value type is set to Adhoc.</td><td>No</td></tr>
</table>

Reference Entity	Used to indicate the table whose primary key (column) you want to set as the reference entity.	Yes (Conditional) **Note:** This data is required when the value type is set to **Reference**.
Field Name	Used to indicate the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.	Yes (Conditional) **Note:** This data is required when the value type is set to **Reference**.
Predefined Parameter Values		
Parameter Value	Used to specify the parameter value. **Note:** You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes (Conditional) **Note:** This data is required when the value type is set to **Predefined**.
Description	Used to specify the description for the parameter value.	Yes (Conditional) **Note:** This data is required when the value type is set to **Predefined**.
Parameter Usage Information		
Price Item	Used to indicate whether the parameter can be associated with a price item or price item bundle. The valid values are: • Y • N **Note:** You must specify the value as **N** when a parameter is defined using the following source entity and source type combinations: **Source Entity** / **Source Type** ACCT / BAL ACCT / CNT PERS / BAL PERS / CNT ALGO / - SQI / -	No

Pricing Eligibility Criteria	Used to indicate whether the parameter can be used while defining the pricing eligibility criteria. The valid values are: • Y • N	No
Price List Eligibility Criteria	Used to indicate whether the parameter can be used while defining the price list eligibility criteria. The valid values are: • Y • N **Note:** You must specify the value as **N** when the source entity is set to **TRN**.	No
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria. The valid values are: • Y • N **Note:** You must specify the value as **N** when the source entity is set to **ALGO**, **SQI**, or **TRN**.	No

Sample CSV Format for Uploading Parameters

Using the below example, you can create the following parameters:

- Country
- Currency

Note: The system will create the above parameters when the required fields, characteristic types, usage amount, usage counter, validation algorithm, referenced tables, and referenced fields are defined in the application.

The following table lists the field transformation details that you need to specify in the file request type using which you want to upload parameters in the system:

Sequence	Field Name	Map Field XPath
1	Parameter	C1_PRICE_PARM_BO/priceParmCode
2	Description	C1_PRICE_PARM_BO/description
3	Value Type	C1_PRICE_PARM_BO/priceParmTypeFlag
4	Source Entity	C1_PRICE_PARM_BO/sourceEntityFlg
5	Source Type	C1_PRICE_PARM_BO/sourceTypeFlg
6	Source Type Code	C1_PRICE_PARM_BO/sourceTypeCode

Sequence	Field Name	Map Field XPath
7	Validation Algorithm	C1_PRICE_PARM_BO/validationAlgoCd
8	Reference Entity	C1_PRICE_PARM_BO/referredTable
9	Field Name	C1_PRICE_PARM_BO/referredField
10	Parameter Values	C1_PRICE_PARM_BO/0/priceParmValue/priceParmVal
11	Description	C1_PRICE_PARM_BO/0/priceParmValue/descr
12	Parameter Values	C1_PRICE_PARM_BO/1/priceParmValue/priceParmVal

Uploading an SQI File in the XML Format

To upload an SQI file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading SQIs in the XML format
2. Upload the SQI file
3. Create the SQIs in the system

Related Topics

For more information on...	See...
How to define a file request type for uploading SQIs in the XML format	Defining a File Request Type for Uploading SQIs in the XML Format on page 2625

How to create the SQIs in the system	Creating SQIs on page 2626

Defining a File Request Type for Uploading SQIs in the XML Format

Procedure

To define a file request type for uploading SQIs in the XML format:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.
   The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Service** option from the **Service Type** list.
9. Enter the **C1-SQIUPLOAD** business service or custom SQI business service in the **Service Name** field.
10. Select the **Add** option from the **Operation** list.

Note: At present, you cannot edit the existing SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing SQIs from the user interface.

11. Click **Save**.
    The file request type is defined for uploading SQIs in the XML format.

Uploading an SQI File

You can upload an SQI file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Creating SQIs

You can create the SQIs in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Uploading an SQI File in the CSV Format

To upload an SQI file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading SQIs in the CSV format
2. Upload the SQI file
3. Create the SQIs in the system

Defining a File Request Type for Uploading SQIs in the CSV Format

Procedure

To define a file request type for uploading SQIs in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.
   The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.
   The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter `csv` in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
10. In the **Services** section, enter the required sequence number.
11. Select the **Business Service** option from the **Service Type** list.
12. Enter the **C1-SQIUPLOAD** business service or custom SQI business service in the **Service Name** field.
13. Select the **Add** option from the **Operation** list.

Note: At present, you cannot edit the existing SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing SQIs from the user interface.

14. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** *s*ection.
15. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** *s*ection.
16. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	DECIMALPOSITIONS	C1-SQIUPLOAD/decimalPositions
2	DESCRIPTION	C1-SQIUPLOAD/description

17. Click **Save**.
The file request type is defined for uploading SQIs in the CSV format.

Uploading an SQI File

You can upload an SQI file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

Creating SQIs

You can create the SQIs in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

XML File Format for Uploading Service Quantity Identifiers (SQIs)

Before uploading an SQI file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-SQIUPLOAD	Used to specify the details of the SQI whose record you want to create or update in the system.	Yes
serviceQuantityIdentifier	Used to specify the service quantity identifier (SQI).	Yes (Conditional) **Note:** This data is required when you want to define an SQI.
description	Used to specify the description for the SQI.	Yes (Conditional) **Note:** This data is required when you want to define an SQI.
decimalPositions	Used to specify the appropriate number of decimal positions for the SQI. **Note:** If you do not specify the value in this tag, by default, it is set to zero (0). You can specify maximum precision of 18 decimal positions for an SQI.	No

Sample XML Format for Uploading Service Quantity Identifiers (SQIs)

Using the below example, you can create the following SQIs:

- ACCTBAL
- AVGDBAL
- OVDLMT

```
<root>
<request>
<payload>
<C1-SQIUPLOAD>
    <serviceQuantityIdentifier>ACCTBAL</serviceQuantityIdentifier>
    <description>Account Balance</description>
    <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
<C1-SQIUPLOAD>
    <serviceQuantityIdentifier>AVGDBAL</serviceQuantityIdentifier>
    <description>Average Daily Balance</description>
```

```
    <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
<C1-SQIUPLOAD>
    <serviceQuantityIdentifier>OVDLMT</serviceQuantityIdentifier>
    <description>Overdraft Limit</description>
    <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
</payload>
</request>
</root>
```

Sample CSV Format for Uploading SQIs

Using the below example, you can create the following SQIs:

- ACCTBAL
- AVGDBAL
- OVDLMT

Note: The system will create the above SQIs when the required value types, source entities, source types, source type codes, algorithms, and reference entity values are defined in the application.

The following table lists the field transformation details that you need to specify in the file request type using which you want to upload SQIs in the system:

1	SQI	C1-SQIUPLOAD/serviceQuantityIdentifier
2	Description	C1-SQIUPLOAD/description
3	Decimal Positions	C1-SQIUPLOAD/decimalPositions
4	SQI	C1-SQIUPLOAD/serviceQuantityIdentifier
5	Description	C1-SQIUPLOAD/description
6	Decimal Positions	C1-SQIUPLOAD/decimalPositions
7	SQI	C1-SQIUPLOAD/serviceQuantityIdentifier
8	Description	C1-SQIUPLOAD/description
9	Decimal Positions	C1-SQIUPLOAD/decimalPositions

Sample CSV

```
ACCTBAL,Account Balance,18,AVGDBAL,Average Daily Balance,18,OVDLMT,Overdraft Limit,18
```

Uploading Price Items, Parameters, and SQIs from the Same File

If the price item, parameter, and SQI information is given in the same file, you need to use a file request type where the following business objects and business service are added in the **Services** section:

- C1_PRICE_PARM
- C1-SQIUPLOAD
- C1_PRICEITEM_BO

Note that the **C1_PRICE_PARM** business object and the **C1-SQIUPLOAD** business service should have higher sequence compared to the **C1_PRICEITEM_BO** business object in such file request type. Otherwise, erroneous results might occur.

Part XLII

Product and Product Version Upload

Oracle Revenue Management and Billing enables you to create new products and edit the existing products using the **File Upload Interface** utility. You can upload the product file in the XML or CSV format using the **File Upload Interface** utility. You can specify the following in the XML and CSV files along with the basic details of the product:

- Divisions which you want to associate with the product
- Characteristics for the product
- Details of the product to product relationship

The system also enables you to create new product versions and edit the existing product versions using the **File Upload Interface** utility. You can upload product versions along with the product or separately based on the requirements. You can specify the following in the XML and CSV files along with the basic details of the product version:

- Characteristics for the product version
- Eligibility criteria for the product version
- Services and price list which you want to add in the product version
- Standard products and their services which you want to add in the product version (in case of packaged product)

Part XLIII

Price List and Price Item Pricing Upload

Oracle Revenue Management and Billing enables you to create new price lists and edit the existing price lists using the **File Upload Interface** utility. You can upload the price list file in the XML or CSV format using the **File Upload Interface** utility.

You can specify the following in the XML and CSV files along with the basic details of the price list:

- Divisions which you want to associate with the price list
- Characteristics for the price list
- Eligibility criteria for the price list
- Hierarchy details for the price list

To upload the price list file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
    - Set the**File Format** field to **Extensible Markup Language**.
    - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
    - Add the **C1_PRICEASSIGN_SERVICE** business service in the **Services** section.
    - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price lists or edit the existing price lists using the file request type.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price list file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price lists in the system.

Note: For more information about the XML file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide.*

To upload the price list file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
    - Set the **File Format** field to **Comma Separated Values**.
    - Select the **Data Transformation Required** option.
    - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
    - Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.

- Add the **C1_PRICEASSIGN_SERVICE** business service in the **Services** section.
- Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price lists or edit the existing price lists using the file request type.
- Specify the following details in the Field Transformation section:
  - **Sequence** - Used to specify the data field in the CSV record which should be uploaded in the system.
  - **Field Name** - Used to indicate the field for which the data is uploaded in the system.
  - **Map Field XPath** - Used to specify the XPath of the field where you want to store the data field from the CSV record.

  For example,

Sequence	Field Name	Map Field XPath
1	PRICELISTID	C1_PRICEASSIGN_SERVICE/0/pricelist/priceListId
2	DESCRIPTION	C1_PRICEASSIGN_SERVICE/0/pricelist/description

  This means that the system should upload the first value (i.e. price list ID) and second value (i.e. price list description) from the CSV record in the **priceListId** and **description** fields using the **C1_PRICEASSIGN_SERVICE** business service.

2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price list file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price lists in the system.

Note: For more information about the CSV file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

The system also enables you to create new price item pricing for an account, customer, or price list and edit the existing price item pricing assigned to an account, customer, or price list using the **File Upload Interface** utility. You can upload price item pricing along with the price list or separately based on the requirements.

You can specify the following in the XML and CSV files along with the basic details of price item pricing:

- Person, account, or price list to which you want to assign the price item pricing
- Characteristics for the price item pricing
- Price item parameters based on which you want to define the price item pricing
- Basic details for the price components
- Tiering criteria for the price component (if the **Tiering Type** of the corresponding rate component is set to **STEP** or **Threshold**)
- Eligibility criteria for the price component (if the **Tiering Type** of the corresponding rate component is set to **STEP** or **Threshold**)

To upload the price assignments file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
   - Set the **File Format** field to **Extensible Markup Language**.
   - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
   - Add the **C1_PRICEASSIGN_SERVICE** business service in the **Services** section.
   - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price item pricing or edit the existing price item pricing using the file request type.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price assignments file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price item pricing in the system.

Note: For more information about the XML file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

To upload the price assignments file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
   - Set the **File Format** field to **Comma Separated Values**.
   - Select the **Data Transformation Required** option.
   - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
   - Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
   - Add the **C1_PRICEASSIGN_SERVICE** business service in the **Services** section.
   - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price item pricing or edit the existing price item pricing using the file request type.
   - Specify the following details in the Field Transformation section:
     - **Sequence** - Used to specify the data field in the CSV record which should be uploaded in the system.
     - **Field Name** - Used to indicate the field for which the data is uploaded in the system.
     - **Map Field XPath** - Used to specify the XPath of the field where you want to store the data field from the CSV record.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price assignments file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price item pricing in the system.

Note: For more information about the CSV file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

Part XLIV

Invoice Request

Topics:

- Prerequisites
- Types of Invoice Request
- Invoice Request Manual Trial Bill Generation (Without Approval) Status Transition
- Invoice Request Manual Regular Bill Generation (Without Approval) Status Transition
- Invoice Request Manual Regular Bill Generation (With Approval) Status Transition
- Invoice Request Type
- Invoice Request (Used for Searching)
- Invoice Request (Used for Viewing)

Oracle Revenue Management and Billing enables you to generate an adhoc regular or trial bill for an account through an invoice request. The system enables you to create an invoice request manually. It enables you to create an invoice request for a person or an account. You can create an invoice request for an account where the **Eligible For Invoice Request Creation (INVRACTE)** characteristic is set to **Y**.

If you create an invoice request for a person, the system will consider all those accounts of the person where the **Eligible For Invoice Request Creation (INVRACTE)** characteristic is set to **Y**. You can then exclude an account from the invoice request, if required. The system also enables you to consider all accounts of the person and its child persons where the **Eligible For Invoice Request Creation (INVRACTE)** characteristic is set to **Y**.

Note: The system searches for the characteristic type which is specified in the **Invoice Request Account Eligibility Char Type** option type of the **C1-INVREQ** feature configuration. By default, this option type is set to **INVRACTE**. You can change the characteristic type, if required.

In other words, the system enables you to create the following types of invoice request:

- **Manual Regular Bill Generation Invoice Request** - It is used to generate an adhoc regular bill for an account. You can create a manual regular bill generation invoice request for a person or an account from the user interface.
- **Manual Trial Bill Generation Invoice Request** - It is used to generate an adhoc trial bill for an account. You can create a manual trial bill generation invoice request for a person or an account from the user interface.

While creating an invoice request, you need to specify an invoice request type using which you want to create the invoice request. The system enables you to create the invoice request types with the following combinations:

Invoice Mode	Bill Generation Type	Approval Process
Manual	Regular	On
Manual	Regular	Off
Manual	Trial	Off

It is the invoice request type which helps the system to determine:

- The business object using which the invoice request should be created in the system

Note: Two invoice request business objects named **Invoice Request - Regular Bill Generation** (**C1-InvoiceRequest**) and **Invoice Request - Trial Bill Generation** (**C1-InvoiceRequestTrial**) are introduced in this release. If the **Bill Generation Type** field is set to **Regular**, you must select the **Invoice Request - Regular Bill Generation** business object from the **Invoice Request Business Object** list. However, if the **Bill Generation Type** field is set to **Trial**, you must select the **Invoice Request - Trial Bill Generation** business object from the **Invoice Request Business Object** list.

- Whether a regular or trial bill generation invoice request should be created in the system
- Whether a manual regular bill generation invoice request for an account should be processed in the online or deferred mode

  Note:

  The system will process a manual regular bill generation invoice request for an account in the deferred mode when the number of billable charges of the account exceeds the defer processing billable charge count.

  The defer processing billable charge count is not considered when a manual regular bill generation invoice request is created for a person.

  You can specify the defer processing billable charge count when the invoice mode is set to **Manual** and bill generation type is set to **Regular**.
- Whether the approval is required for the invoice request

  Note: You can only set the **Approval Required** flag when the invoice mode is set to **Manual** and bill generation type is set to **Regular**.
- The wait days which is used to calculate the processing date for an invoice request

  Note:

  If the invoice request is processed in the online mode, the system will process the invoice request when the processing date is earlier than or equal to the system date. However, if the invoice request is processed in the deferred mode, the system will process the invoice request when the processing date is earlier than or equal to the batch business date.

  If required, you can configure the system such that the processing date does not fall on a holiday. To implement this requirement you need to specify the work calendar which helps to determine the working day.

While creating a manual invoice request, you need to specify the following - invoice request type, entity (i.e. person or account for which the invoice request should be created), cutoff date, accounting date, and bill date.

For more information about the types of invoice request, see Types of Invoice Request on page 2641.

For more information on how to setup the invoice request feature, see Prerequisites on page 2641.

Prerequisites

To setup the invoice request process, you need to do the following:

- Define the required invoice request types in the system.
- Define the required characteristic types where the characteristic entity is set to **Invoice Request Type**
- Define the required characteristic types where the characteristic entity is set to **Invoice Request**
- Assign the **C1-INVRA** To Do type to a To Do role whose users must receive To Do generated while submitting an invoice request for approval
- Assign the **C1-INVRS** To Do type to a To Do role whose users must receive To Do generated while resubmitting an invoice request
- Set the batch control type of the **Invoice Request Periodic Monitor (C1-INVRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about the **Invoice Request Periodic Monitor (C1-INVRQ)** batch, see *Oracle Revenue Management and Billing Batch Guide*.
- Set the batch control type of the **Pending Bill Generation (BILLOPEN)**, **Bill Segment Generation (BSGENREG)**, and **Bill Completion (POSTPROC)** batches to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

  For more information about these batches, see *Oracle Revenue Management and Billing Batch Guide*.

Set the following feature configuration in the system:

- **Invoice Request Configuration (C1-INVREQ)**

Types of Invoice Request

The system allows you to create the following types of invoice requests:

- Manual Regular Bill Generation Invoice Request on page 2641
- Manual Trial Bill Generation Invoice Request on page 2643

Manual Regular Bill Generation Invoice Request

Once a manual regular bill generation invoice request is created in the **Draft** status, the system checks whether it is created for a person or an account. If a manual regular bill generation invoice request is created for an account, you can submit the invoice request. On submitting the invoice request, the system checks whether the number of the billable charges of the account exceed the defer processing billable charge count. If the number of the billable charges of the account exceed the defer processing billable charge count, the status of the invoice request is changed to **Defer Processing Batch**. However, if the number of the billable charges of the account does not exceed the defer processing

billable charge count, the system checks whether the processing date of the invoice request is earlier than or equal to the system date. If the processing date is later than the system date, the status of the invoice request is changed to **Defer Processing**. On the **C1-INVRQ** batch execution, the system checks whether there are any invoice requests in the **Defer Processing** status. If there is an invoice request in the **Defer Processing** status, the system checks whether the processing date of the invoice request is earlier than or equal to the system date. If the processing date is later than the system date, the status of the invoice request remains as **Defer Processing**.

Note: The system enables you to cancel an invoice request which is in the **Defer Processing Batch** or **Defer Processing** status.

However, if the processing date is earlier than or equal to the system date, the system checks whether the pending bill already exists for the account. If the pending bill does not exist for the account, the system checks whether the cutoff date is later than the bill after date. If cutoff date is later than the bill after date, the system checks whether the accounting calendar is open for the accounting date. If the accounting calendar is open for the accounting date, the system creates the adhoc regular bill for the account in the online mode. Finally, the status of the invoice request is changed to **Processed**.

However, if the pending bill exists for the account, or if the cutoff date is earlier than or equal to the bill after date, or if the accounting calendar is not open for the accounting date, or if an error occurs while creating adhoc regular bill or its bill segments, the status of the invoice request is changed to **Error**. The system enables you to move such erroneous invoice request back to the **Draft** status.

However, if a manual regular bill generation invoice request is created for a person, the system checks whether the number of accounts of the person (if the **Include Person Hierarchy** option is not selected) or the number of accounts of the person and its child persons (if the **Include Person Hierarchy** option is selected) exceeds the limit defined in the **Account Limit** option type of the **C1-INVREQ** feature configuration. If the number of accounts does not exceed the account limit, the system derives the account of the person or the person and its child persons. Once the accounts are successfully derived, the status of the invoice request is changed to **Defer Processing Batch**.

However, if the number of accounts exceeds the account limit, the status of the invoice request is changed to **Account Derivation Pending**. On the **C1-INVRQ** batch execution, the system checks whether there are any invoice requests in the **Account Derivation Pending** status. If there is an invoice request in the **Account Derivation Pending** status, the system derives the accounts of the person or the person and its child persons. Once the accounts are successfully derived, the status of the invoice request is changed to **Defer Processing Batch**.

When you execute the **BILLOPEN** batch with the **Off Cycle Switch** parameter set to **Y**, the system checks whether the account that meets the search criteria is included in any invoice request which is in the **Defer Processing Batch** status. If the account is included in the invoice request, the system checks whether the processing date of the invoice request is earlier than or equal to the batch business date. If processing date is earlier than or equal to the batch business date, the system checks whether there is any record in the **Processing** status for the account in the invoice request. If so, the system checks whether the pending bill already exists for the account. If the pending bill does not exist for the account, the system checks whether the cutoff date is later than the bill after date. If cutoff date is later than the bill after date, the system checks whether the accounting calendar is open for the accounting date. If the accounting calendar is open for the accounting date, the system creates the adhoc regular bill for the account in the **Pending** status. When you execute the **BSGENREQ** batch with the **Off Cycle Switch** parameter set to **Y**, the system creates the bill segments for the adhoc regular bill. When you execute the **POSTPROC** batch with the **Off Cycle Switch** parameter set to **Y**, the system creates the post-processing bill segments (if any) and completes the adhoc regular bill of the account. Finally, the status of the invoice request is changed to **Processed**.

However, if the pending bill exists for the account, or if the cutoff date is earlier than or equal to the bill after date, or if the accounting calendar is not open for the accounting date, or if an error occurs while creating adhoc regular bill or its bill segments, or if a To Do is generated for the bill review, the status of the record in the invoice request is changed to **Error**. If all records in the invoice request are in the **Error** status, the status of the invoice request is changed to **Error**. The system enables you to move such erroneous invoice request back to the **Draft** status.

You can optionally configure the approval process for the manual regular bill generation invoice request. If the **Approval Required** flag is set to **Yes** in the invoice request type, the status of the manual regular bill generation invoice request is changed to **Approval In Progress** when you submit the invoice request. The approver can then approve or reject the manual regular bill generation invoice request based on the observations.

Manual Trial Bill Generation Invoice Request

The manual regular bill generation invoice request and manual trial bill generation invoice request are created and processed identically with the following exceptions:

- On submitting the manual trial bill generation invoice request for an account, the system does not check whether the number of the billable charges of the account exceed the defer processing billable charge count. Therefore, the manual trial bill generation invoice request is always processed in the deferred mode.
- You need to specify the following parameters while executing the **BILLOPEN**, **BSGENREQ**, and **POSTPROC** batches:
  - Bill Generation Type (set to **Trial**)
  - Description for Trial Billing Batch Run
  - Off Cycle Switch (set to **Y**)
- The **BSGENREQ** batch will not freeze and complete a trail bill for the account.
- At present, a To Do is not generated for a trial bill review, and therefore the system does not check whether a To Do is generated for a trial bill review.

Invoice Request Manual Trial Bill Generation (Without Approval) Status Transition

The following figure graphically indicates how an invoice request in the manual trial bill generation process moves from one status to another when the approval process is not configured in the invoice request type:

Invoice Request Type

Oracle Revenue Management and Billing enables you to configure an invoice request type using which you can create an invoice request. The invoice request type helps the system to determine:

- The invoice request business object for which the invoice request should be created in the system
- The mode in which the invoice should be created in the system
- The bill generation type using which the invoice should be created in the system
- Whether a manual regular bill generation invoice request for an account should be processed in the online or deferred mode
- The date calculation algorithm which is used to calculate the processing date for an automatic regular bill generation invoice request
- Whether the approval is required for the invoice request
- The submitter To Do role for resubmitting the invoice request for approval
- The wait days which is used to calculate the invoice request processing date

Note: The automatic invoice request is designed to work only for the fully-insured group and individual health insurance businesses and not for the financial services or self-funded health insurance businesses.

The **Invoice Request Type** screen allows you to define, edit, copy, delete, and view the details of an invoice request type. It contains the following zones:

- Invoice Request Type List on page 2659
- Invoice Request Type on page 2659

Invoice Request Type List

The **Invoice Request Type List** zone lists the invoice request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Invoice Request Type	Displays the invoice request type.
Description	Displays the description of the invoice request type.
Edit	On clicking the **Edit** (✎) icon, the **Invoice Request Type** screen appears where you can edit the details of the invoice request type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Invoice Request Type** screen appears where you can define a new invoice request type using an existing invoice request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the invoice request type. **Note:** You can delete an invoice request type only when an invoice request is not yet created using the invoice request type.

On clicking the **Broadcast** (📡) icon corresponding to an invoice request type, the **Invoice Request Type** zone appears with the details of the respective invoice request type.

How to edit an invoice request type	Editing an Invoice Request Type on page 2667
How to copy an invoice request type	Copying an Invoice Request Type on page 2671
How to delete an invoice request type	Deleting an Invoice Request Type on page 2671
How to view the details of an invoice request type	Viewing the Invoice Request Type Details on page 2675

Invoice Request Type

The **Invoice Request Type** zone displays the details of the invoice request type. It contains the following sections:

- **Main** - The **Main** section displays basic information about the invoice request type. It contains the following fields:

Field Name	Field Description
Invoice Request Type	Displays the invoice request type.
Description	Displays the description of the invoice request type.
Invoice Request Business Object	Indicates the business object using which the invoice request should be created in the system. In addition, the context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the invoice request type.
Status	Indicates the current status of the invoice request type. The valid values are: • Active • Inactive
Invoice Mode	Indicates the mode in which the invoice request is created in the system using the invoice request type. The valid values are: • Automatic • Manual
Bill Generation Type	Indicates the type of bill that is generated for the invoice request in the system. The valid values are: • Regular • Trial
Defer Processing Billable Charge Count	Displays the count which helps to determine whether the invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately). **Note:** This field appears only when the **Invoice Mode** is set to**Manual** and the **Bill Generation Type** is set to **Regular**. If you set the defer processing billable charge count to zero (0), the system resets the default value to 500.
Date Calculation Algorithm	Indicates the algorithm using which the date is calculated for processing the billable charges created for the bills in the invoice request. **Note:** It has a link. On clicking the link, the **Algorithm** screen appears where you can view the details of the respective algorithm. This field appears only when the **Invoice Mode** is set to **Automatic**.
Approval Required	Indicates whether approval is required for approving the bills generated through the invoice request. **Note:** This field appears only when the **Invoice Mode** is set to**Manual** and the **Bill Generation Type** is set to **Regular**.
Approval To Do Type	Indicates that the To Do task of the specified To Do type must be created when the invoice request is submitted for approval. **Note:**

Field Name	Field Description
	It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type. This field appears only when the **Approval Required** option is selected.
Approval To Do Role	Indicates the user and/or group of users who can approve the invoice request. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role. This field appears only when the **Approval Required** option is selected.
Submitter To Do Type	Indicates that the To Do task of the specified To Do type is created for re-submitting the invoice request for approval. **Note:** It has a link. On clicking the link, the **To Do Type** screen appears where you can view the details of the respective To Do type.
Submitter To Do Role	Indicates the user and/or group of users who can re-submit the invoice request for approval. **Note:** It has a link. On clicking the link, the **To Do Role** screen appears where you can view the details of the respective To Do role.
Wait Days	Displays the maximum wait period (in days) after which the bills of the invoice request are processed. **Note:** You cannot specify a negative value in the **Wait Days** field.

- **Characteristics** - The **Characteristics** section lists the characteristics defined for the invoice request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the invoice request type.
Delete	Used to delete the invoice request type. **Note:** You can delete an invoice request type only when an invoice request is not yet created using the invoice request type.
Duplicate	Used to create a new invoice request type using an existing invoice request type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the invoice request type is created in the system. In addition, the context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application.

Field Name	Field Description
	Note: It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Invoice Request Type** zone does not appear in the **Invoice Request Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to an invoice request type in the **Invoice Request Type List** zone.

Defining an Invoice Request Type

Prerequisites

To define an invoice request type, you should have:

- Invoice request type business object defined in the application.
- Invoice request business objects defined in the application.
- Date calculation algorithm defined using the **C1-INVREDTCA** algorithm type.
- Required To Do role assigned to the **C1-INVRA** and **C1-INVRS** To Do types in the application

Procedure

To define an invoice request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **I** and then click **Invoice Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Invoice Request Type** sub-menu.

   The **Invoice Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the invoice request type.
   - **Characteristics** - Used to define a list of characteristics for the invoice request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Used to specify the invoice request type.	Yes
Business Object	Indicates the business object using which you want to define the invoice request type.	Not applicable
Description	Used to specify the description for the invoice request type.	Yes
Invoice Request Business Object	Used to indicate the invoice request business object for which you want to define the invoice request type. The valid values are:	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Invoice Request - Regular Bill Generation • Invoice Request - Trial Bill Generation	
Detailed Description	Used to specify additional information about the invoice request type.	No
Status	Used to indicate the current status of the invoice request type. The valid values are: • Active • Inactive	Yes
Invoice Mode	Used to indicate the mode in which the invoice request should be created in the system using the invoice request type. The valid values are: • Automatic **Note:** The automatic mode is not supported while creating an invoice request type for the financial services domain. • Manual	Yes
Bill Generation Type	Used to indicate the type of bill that should be generated for the invoice request in the system using the invoice request type. The valid values are: • Regular • Trial **Note:** By default, this field is set to **Regular** when the **Invoice Mode** is set to **Automatic**.	Yes
Defer Processing Billable Charge Count	Used to specify the count which helps to determine whether the invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately). **Note:** You cannot specify a negative value in this field. Deferred mode means, in the background, when the **Generic Request Periodic Monitor (C1-GENRQ)** batch is invoked. You can configure the **Generic Request Periodic Monitor (C1-GENRQ)** batch such that it is executed at regular intervals. For more information about the **Generic Request Periodic Monitor (C1-**	No

Field Name	Field Description	Mandatory (Yes or No)
	GENRQ) batch, refer to *Oracle Revenue Management and Billing Batch Guide*.	
Date Calculation Algorithm	Used to indicate the algorithm using which the date is calculated for processing the billable charges created for the bills in the invoice request. **Note:** The **Search** (🔍) icon appears corresponding to the **Date Calculation Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears. On specifying the date calculation algorithm, the description of the date calculation algorithm appears corresponding to the **Date Calculation Algorithm** field. You can specify the date calculation algorithm only when the **Invoice Mode** is set to **Automatic**.	Yes (Conditional) **Note:** This field is required for creating an invoice request in the automatic mode.
Approval Required	Used to indicate whether approval is required for approving the bills generated through the invoice request. **Note:** This field appears only when the **Invoice Mode** is set to**Manual** and the **Bill Generation Type** is set to **Regular**.	No
Approval To Do Type	Used to indicate that the To Do task of the specified To Do type must be created when the invoice request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears only when the **Approval Required** option is selected. The **C1-INVRA** To Do type is shipped with the product. You can use the **C1-INVRA** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required for approving the invoice request which is created using the invoice request type.
Approval To Do Role	Used to indicate the user and/or group of users who can approve the invoice request. **Note:** The list includes only those To Do roles which are associated with the approval To Do type.	Yes (Conditional) **Note:** This field is required for approving the invoice request

Field Name	Field Description	Mandatory (Yes or No)
	This field appears only when the **Approval Required** option is selected.	which is created using the invoice request type.
Submitter To Do Type	Used to indicate that the To Do task of the specified To Do type is created for re-submitting the invoice request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field. The **C1-INVRS** To Do type is shipped with the product. You can use the **C1-INVRS** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required for resubmitting the invoice request for approval.
Submitter To Do Role	Used to indicate the user and/or group of users who can re-submit the invoice request for approval. **Note:** The list includes only those To Do roles which are associated with the submitter To Do type.	Yes (Conditional) **Note:** This field is required for resubmitting the invoice request for approval. Once the it is defined and saved, it cannot be changed as it is linked to request(s) which are under processing.
Wait Days	Used to specify the maximum wait period (in days) after which the bills in the invoice request are processed. **Note:** You cannot specify a negative value in the **Wait Days** field.	No

4. Enter the required details in the **Main** section.
5. Define a list of characteristics for the invoice request type, if required.
6. Click **Save**.
   The invoice request type is defined.

How to define a characteristic for an invoice request type	Defining a Characteristic for an Invoice Request on page 2694

Defining a Characteristic for an Invoice Request Type

Prerequisites

To define a characteristic for an invoice request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Invoice Request Type**)

Procedure

To define a characteristic for an invoice request type:

1. Ensure that the **Characteristics** section is expanded when you *a*re defining, editing, or copying an invoice request type.

   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Invoice Request Type**.	Yes (Conditional) **Note:** This field is required while defining a characteristic for an invoice request type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required while defining a characteristic for an invoice request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the invoice request type, click the **Add** (+) icon and *t*hen repeat step *2*.

   Note: However, if you want to remove a characteristic from the invoice request type, click the **Delete** (🗑) icon corresponding to the characteristic.

Editing an Invoice Request Type

Prerequisites

To edit an invoice request type, you should have:

- Invoice request type business object defined in the application.
- Invoice request business objects defined in the application.
- Date calculation algorithm defined using the **C1-INVREDTCA** algorithm type.
- Required To Do role assigned to the **C1-INVRA** and **C1-INVRS** To Do types in the application

Procedure

To edit an invoice request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **I** and then click **Invoice Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Invoice Request Type** sub-menu.
   The **Invoice Request Type** screen appears.
4. In the **Invoice Request Type List** zone, click the **Edit**( ) icon in the **Edit** column corresponding *t*o the invoice request type whose details you want to edit.

   The **Invoice Request Type** screen appears. It contains the following section:

   - **Main** - Used to specify basic details about the invoice request type.
   - **Characteristics** - Used to define a list of characteristics for the invoice request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Displays the invoice request type.	Not applicable
Business Object	Indicates the business object using which you want to define the invoice request type.	Not applicable
Description	Used to specify the description for the invoice request type.	Yes
Invoice Request Business Object	Used to indicate the invoice request business object for which you want to define the invoice request type. The valid values are: • Invoice Request - Regular Bill Generation • Invoice Request - Trial Bill Generation	Yes
Detailed Description	Used to specify additional information about the invoice request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the current status of the invoice request type. The valid values are: • Active • Inactive	Yes
Invoice Mode	Used to indicate the mode in which the invoice request should be created in the system using the invoice request type. The valid values are: • Automatic **Note:** The automatic mode is not supported while creating an invoice request type for the financial services domain. • Manual	Yes
Bill Generation Type	Used to indicate the type of bill that should be generated for the invoice request in the system using the invoice request type. The valid values are: • Regular • Trial **Note:** By default, this field is set to **Regular** when the **Invoice Mode** is set to **Automatic**.	Yes
Defer Processing Billable Charge Count	Used to specify the count which helps to determine whether the invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately). **Note:** You cannot specify a negative value in this field. Deferred mode means, in the background, when the **Generic Request Periodic Monitor (C1-GENRQ)** batch is invoked. You can configure the **Generic Request Periodic Monitor (C1-GENRQ)** batch such that it is executed at regular intervals. For more information about the **Generic Request Periodic Monitor (C1-GENRQ)** batch, refer to *Oracle Revenue Management and Billing Batch Guide*.	No
Date Calculation Algorithm	Used to indicate the algorithm using which the date is calculated for processing the billable charges created for the bills in the invoice request.	Yes (Conditional) **Note:** This field is

Field Name	Field Description	Mandatory (Yes or No)
	Note: The **Search** (🔍) icon appears corresponding to the **Date Calculation Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears. On specifying the date calculation algorithm, the description of the date calculation algorithm appears corresponding to the **Date Calculation Algorithm** field. You can specify the date calculation algorithm only when the **Invoice Mode** is set to **Automatic**.	required for creating an invoice request in the automatic mode.
Approval Required	Used to indicate whether approval is required for approving the bills generated through the invoice request. **Note:** This field appears only when the **Invoice Mode** is set to**Manual** and the **Bill Generation Type** is set to **Regular**.	No
Approval To Do Type	Used to indicate that the To Do task of the specified To Do type must be created when the invoice request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears only when the **Approval Required** option is selected. The **C1-INVRA** To Do type is shipped with the product. You can use the **C1-INVRA** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required for approving the invoice request which is created using the invoice request type.
Approval To Do Role	Used to indicate the user and/or group of users who can approve the invoice request. **Note:** The list includes only those To Do roles which are associated with the approval To Do type. This field appears only when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required for approving the invoice request which is created using the invoice request type.

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	Used to indicate that the To Do task of the specified To Do type is created for re-submitting the invoice request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field. The **C1-INVRS** To Do type is shipped with the product. You can use the **C1-INVRS** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required for resubmitting the invoice request for approval.
Submitter To Do Role	Used to indicate the user and/or group of users who can re-submit the invoice request for approval. **Note:** The list includes only those To Do roles which are associated with the submitter To Do type.	Yes (Conditional) **Note:** This field is required for resubmitting the invoice request for approval. Once the it is defined and saved, it cannot be changed as it is linked to request(s) which are under processing.
Wait Days	Used to specify the maximum wait period (in days) after which the bills in the invoice request are processed. **Note:** You cannot specify a negative value in the **Wait Days** field.	No

Tip: Alternatively, you can access this screen by clicking the **Edit** button in the **Invoice Request Type** zone.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics from the invoice request type, if required.
7. Click **Save**.
   The changes made to the invoice request type are saved.

Deleting an Invoice Request Type

Procedure

To delete an invoice request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **I** and then click **Invoice Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Invoice Request Type** sub-menu.
   The **Invoice Request Type** screen appears.
4. In the **Invoice Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to *t*he invoice request type that you want to delete.

   A message appears confirming whether you want to delete the invoice request type.

   Note: You can delete an invoice request type only when an invoice request is not yet created using the invoice request type.
5. Click **OK**.
   The invoice request type is deleted.

   Tip: Alternatively, you can delete an invoice request type by clicking the **Delete** button in the **Invoice Request Type** zone.

Copying an Invoice Request Type

Instead of creating an invoice request type from scratch, you can create a new invoice request type using an existing invoice request type. This is possible through copying an invoice request type. On copying an invoice request type, the details including the characteristics are copied to the new invoice request type. You can then edit the details, if required.

Prerequisites

To copy an invoice request type, you should have:

- Invoice request type (whose copy you want to create) defined in the application.
- Invoice request type business object defined in the application.

- Invoice request business objects defined in the application.
- Date calculation algorithm defined using the **C1-INVREDTCA** algorithm type.
- Required To Do role assigned to the **C1-INVRA** and **C1-INVRS** To Do types in the application

Procedure

To copy an invoice request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **I** and then click **Invoice Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Invoice Request Type** sub-menu.
   The **Invoice Request Type** screen appears.
4. In the **Invoice Request Type List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column corresponding to the invoice request type whose copy you want to create.

   The **Invoice Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the invoice request type.
   - **Characteristics** - Used to define a list of characteristics for the invoice request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Used to specify the invoice request type.	Yes
Business Object	Indicates the business object using which you want to define the invoice request type.	Not applicable
Description	Used to specify the description for the invoice request type.	Yes
Invoice Request Business Object	Used to indicate the invoice request business object for which you want to define the invoice request type. The valid values are: • Invoice Request - Regular Bill Generation • Invoice Request - Trial Bill Generation	Yes
Detailed Description	Used to specify additional information about the invoice request type.	No
Status	Used to indicate the current status of the invoice request type. The valid values are: • Active • Inactive	Yes
Invoice Mode	Used to indicate the mode in which the invoice request should be created in the system using the invoice request type. The valid values are: • Automatic **Note:** The automatic mode is not supported while creating an invoice request type for the financial services domain. • Manual	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bill Generation Type	Used to indicate the type of bill that should be generated for the invoice request in the system using the invoice request type. The valid values are: • Regular • Trial **Note:** By default, this field is set to **Regular** when the **Invoice Mode** is set to **Automatic**.	Yes
Defer Processing Billable Charge Count	Used to specify the count which helps to determine whether the invoice request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately). If the number of billable charges created for the bills which are selected in the invoice request exceeds the defer processing billable charge count, the system processes the invoice request in the deferred mode. However, if the number of billable charges created for the bills which are selected in the invoice request does not exceed the defer processing billable charge count, the system processes the invoice request in real time (i.e. immediately). **Note:** You cannot specify a negative value in this field. Deferred mode means, in the background, when the **Generic Request Periodic Monitor (C1-GENRQ)** batch is invoked. You can configure the **Generic Request Periodic Monitor (C1-GENRQ)** batch such that it is executed at regular intervals. For more information about the **Generic Request Periodic Monitor (C1-GENRQ)** batch, refer to *Oracle Revenue Management and Billing Batch Guide*.	No
Date Calculation Algorithm	Used to indicate the algorithm using which the date is calculated for processing the billable charges created for the bills in the invoice request. **Note:** The **Search** (🔍) icon appears corresponding to the **Date Calculation Algorithm** field. On clicking the **Search** icon, the **Algorithm Search** window appears. On specifying the date calculation algorithm, the description of the date calculation algorithm appears corresponding to the **Date Calculation Algorithm** field. You can specify the date calculation algorithm only when the **Invoice Mode** is set to **Automatic**.	Yes (Conditional) **Note:** This field is required for creating an invoice request in the automatic mode.

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required for approving the bills generated through the invoice request. **Note:** This field appears only when the **Invoice Mode** is set to**Manual** and the **Bill Generation Type** is set to **Regular**.	No
Approval To Do Type	Used to indicate that the To Do task of the specified To Do type must be created when the invoice request is submitted for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Approval To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Approval To Do Type** field. This field appears only when the **Approval Required** option is selected. The **C1-INVRA** To Do type is shipped with the product. You can use the **C1-INVRA** To Do type or a custom To Do type, if required.	Yes (Conditional) **Note:** This field is required for approving the invoice request which is created using the invoice request type.
Approval To Do Role	Used to indicate the user and/or group of users who can approve the invoice request. **Note:** The list includes only those To Do roles which are associated with the approval To Do type. This field appears only when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required for approving the invoice request which is created using the invoice request type.
Submitter To Do Type	Used to indicate that the To Do task of the specified To Do type is created for re-submitting the invoice request for approval. **Note:** The **Search** (🔍) icon appears corresponding to the **Submitter To Do Type** field. On clicking the **Search** icon, the **To Do Type Search** window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the **Submitter To Do Type** field.	Yes (Conditional) **Note:** This field is required for resubmitting the invoice request for approval.

Field Name	Field Description	Mandatory (Yes or No)
	The **C1-INVRS** To Do type is shipped with the product. You can use the **C1-INVRS** To Do type or a custom To Do type, if required.	
Submitter To Do Role	Used to indicate the user and/or group of users who can re-submit the invoice request for approval. **Note:** The list includes only those To Do roles which are associated with the submitter To Do type.	Yes (Conditional) **Note:** This field is required for resubmitting the invoice request for approval. Once the it is defined and saved, it cannot be changed as it is linked to request(s) which are under processing.
Wait Days	Used to specify the maximum wait period (in days) after which the bills in the invoice request are processed. **Note:** You cannot specify a negative value in the **Wait Days** field.	No

Tip: Alternatively, you can copy an invoice request type by clicking the **Duplicate** button in the **Invoice Request Type** zone.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics from the invoice request type, if required.
7. Click **Save**.
   The new invoice request type is defined.

Invoice Request (Used for Searching)

The **Invoice Request** screen allows you to search for an invoice request using various search criteria. It also allows you to manually create an invoice request. It contains the following zone:

- Search Invoice Request on page 2676

Through this screen, you can navigate to the following screen:

- Invoice Request (Used for Viewing) on page 2684

Search Invoice Request

The **Search Invoice Request** zone allows you to search for an invoice request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an invoice request created for an account or a person. The valid values are: • Invoice Requests for Accounts • Invoice Requests for Persons **Note:** By default, the **Invoice Requests for Accounts** option is selected.	Yes
Invoice Request ID	Used to search a particular invoice request.	No
Creation From Date	Used to search invoice requests which are created from a particular date onwards.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **Creation From Date** cannot be later than the **Created To** date.	
Created To	Used to search invoice requests which are created till a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The **Created To** date cannot be earlier than the **Creation From Date**.	No
Cutoff From	Used to indicate the date from when the billable charges are considered for processing the invoice request. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The cutoff from date cannot be later than the cutoff to date.	No
Cutoff To	Used to indicate the date till when the billable charges are considered for processing the invoice request. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field. The cutoff to date cannot be earlier than the cutoff from date.	No
Invoice Request Type	Used to search invoice requests which are created using a particular invoice request type.	No
Status	Used to search invoice requests which are in a particular status. The valid values are: • Account Derivation Pending • Approved • Approval In Progress • Canceled • Deferred Processing • Deferred Processing Batch • Draft	No

Field Name	Field Description	Mandatory (Yes or No)
	• Error • Processed • Rejected	
Person ID	Used to search invoice requests which include bills of a particular person. **Note:** The **Search** (🔍) icon appears corresponding to the **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears where you can search for a particular person.	No
Account ID	Used to search invoice requests which include bills of a particular account. **Note:** The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears where you can search for a particular account. This field appears only when the **Invoice Requests for Accounts** option is selected from the **Search By** list.	No
Bill Generation Type	Used to indicate the bill generation type using which the bills of the invoice request are created in the system. The valid values are: • Regular • Trial	No
External Reference Type	Used to indicate the external reference type using which the invoice request is created in the system. The valid values are: • Membership • Policy **Note:** This field appears only when the **Invoice Requests for Accounts** option is selected from the **Search By** list. This field is not applicable for the banking business.	No
External Reference ID	Used to specify the external reference ID of the account for which the invoice request is created in the system. **Note:** The **Search** (🔍) icon appears corresponding to the **External Reference ID** field. On clicking the **Search** icon, the **Search**	Yes (Conditional) This field is required when you specify the external reference type.

Field Name	Field Description	Mandatory (Yes or No)
	Membership or the **Search Policy** window appears depending upon the option selected from the **External Reference Type** list. This field appears only when the **Invoice Requests for Accounts** option is selected from the **Search By** list. This field is not applicable for the banking business.	

Note: You must specify at least one search criterion while searching for an invoice request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the invoice request is created in the system.
Invoice Request Information	Displays information about the invoice request. **Note:** It has a link. On clicking the link, the **Invoice Request** screen appears where you can view the details of the respective invoice request.
Created By	Indicates the user who has created the invoice request.
Cutoff Date	Displays the date till when all the billable charges are considered for processing the invoice request.
Account Information	Displays information about the account for which the invoice request is processed in the system. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. This column appears only when the **Invoice Requests for Accounts** option is selected from the **Search By** list.
Person Information	Displays information about the person for whose accounts the invoice request is processed in the system. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears with the details of the respective person. This column appears when the **Invoice Requests for Persons** option is selected from the **Search By** list.
Status	Indicates the current status of the invoice request. The valid values are: • Account Derivation Pending • Approved • Approval In Progress • Canceled

<table>
<tr><th>Column Name</th><th>Column Description</th></tr>
<tr><td></td><td>• Deferred Processing
• Deferred Processing - Batch
• Draft

How to search for an invoice request	Searching for an Invoice Request on page 2681

Searching for an Invoice Request

Prerequisites

To search for an invoice request, you should have:

- Invoice requests defined in the application

Procedure

To search for an invoice request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Billing Management** and then click **Invoice Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Invoice Request** sub-menu.
   The **Invoice Request** screen appears.
4. Enter the search criteria in the **Search Invoice Request** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of invoice requests that meet the search criteria appears in the **Search Results** section.

Manually Creating an Invoice Request

Prerequisites

To manually create an invoice request, you should have:

- Invoice request types defined in the application
- Entity (i.e., person or account for which you want to create the invoice request) defined in the application
- Bills generated for the entity (i.e., person or account) in the application

Procedure

To manually create an invoice request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Billing Management** and then click **Invoice Request**.

A sub-menu appears.

3. Click the **Add** option from the **Invoice Request** sub-menu.

   The **Add Invoice Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Used to indicate the invoice request type using which you want to create the invoice request in the system.	Yes

4. Select the required invoice request type from the **Invoice Request Type** list.
5. Click **OK**.

   The **Invoice Request** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the invoice request.
   - **Characteristics** - Used to define a list of characteristics for the invoice request.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Type	Indicates the invoice request type using which you want to create the invoice request.	Not applicable
Entity	Used to indicate the entity for which you want to create the invoice request. The valid values are: • Account • Person **Note:** By default, the **Account** option is selected.	Yes
Account ID	Used to indicate the invoice request which includes the bills of a particular account. **Note:** The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears where you can search for the respective account. This field appears only when you select the **Account** option from the **Entity** list.	Yes (Conditional) This field is required while specifying the account for which you want to create the invoice request.
Person ID	Used to indicate the invoice request which includes the bills of a particular person. **Note:** The **Search** (🔍) icon appears corresponding to **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears where you can search for the respective person. This field appears only when you select the **Person** option from the **Entity** list.	Yes (Conditional) This field is required while specifying the person for whose accounts you want to create the invoice request.
Include Person Hierarchy	Used to specify whether you want to include the accounts of all the child persons of the main person for creating the invoice request.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select the **Person** option from the **Entity** list.	
Cutoff Date	Used to specify the date till when all the billable charges are considered for processing the invoice request. **Note:** By default, the current date appears in this field. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Accounting Date	Used to specify the accounting date for which the financial transaction of the bill is created. **Note:** By default, the current date appears in this field. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Bill Date	Used to specify the date on which the bill is generated for the entity. **Note:** The bill date cannot be on or earlier than the last bill date of the account. By default, the current date appears in this field. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Comments	Used to specify additional information about the invoice request.	No

6. Enter the required details in the **Main** section.
7. Define a list of characteristics for the invoice request in the **Characteristics** section, if required.
8. Click **Save**
   The invoice request is created in the **Draft** status and the status of all the records (in the invoice request) is set to **Pending**.

Tip: Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Invoice Request** screen.

Invoice Request (Used for Viewing)

The **Invoice Request** screen allows you to:

- View the details of the invoice request
- Edit the details of the invoice request
- Delete the invoice request
- Submit the invoice request for processing
- Approve or reject the invoice request
- Cancel the invoice request
- View the log of the invoice request
- Add a log entry for the invoice request

The **Invoice Request** screen contains the following tabs:

- Invoice Request - Main on page 2684
- Invoice Request - Log on page 2691

Invoice Request - Main

The **Main** tab displays information about the invoice request. It contains the following zones:

- Invoice Request on page 2684
- Invoice Request Details on page 2689
- Account List on page 2689
- Excluded Accounts on page 2690

Invoice Request

The **Invoice Request** zone displays the details of the invoice request. It contains the following sections:

- **Main** - The **Main** section displays basic information about the invoice request. It contains the following fields:

Field Name	Field Description
Invoice Request Information	Displays information about the invoice request.
Invoice Request Type	Indicates the invoice request type using which the invoice request is created in the system. **Note:** It has a link. On clicking the link, the **Invoice Request Type** screen appears where you can view the details of the respective invoice request type.
Entity	Indicates the entity for which the invoice request is created in the system. The valid values are: • Account • Person
Account Information	Displays information about the account for which the invoice request is created in the system. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account. This field appears only when you are viewing the invoice request details of an account.
Person Information	Displays information about the person for whose accounts the invoice request is created in the system. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person. This field appears only when you are viewing the invoice request details of a person.
Include Person Hierarchy	Indicates whether the accounts of the child persons of the main person are included for processing the invoice request. **Note:** This field appears only when you are viewing the invoice request details of a person.
Cutoff Date	Displays the date till when all the billable charges are considered for processing the invoice request.
Accounting Date	Displays the accounting date for which the financial transaction of the bill is created.
Bill Date	Displays the date on which the bill is generated. **Note:** The bill date must not be equal to or earlier than the last bill date of the account for which the invoice request is generated.
Processing Date	Indicates the date when the invoice request is processed.

Field Name	Field Description
	Note: `Processing Date = Invoice Request Creation Date + Wait Day + Work Days`
Status	Indicates the current status of the invoice request. The valid values are: • Account Derivation Pending • Approved • Approval In Progress • Cancelled • Deferred Processing • Deferred Processing - Batch • Draft • Error • Processed • Rejected • Submitted • Processing • Return to Submitter
Status Reason	Indicates the reason why the status of the invoice request is changed. **Note:** It has a link. On clicking the link, the **Status Reason** screen appears where you can view the details of the respective status. This field appears only when you select **canceled** option from the status list.
Comments	Displays additional information about the invoice request. **Note:** This field appears only when the invoice request is in the **Processed** status.

- **Characteristics** - The **Characteristics** section lists the characteristics defined for the invoice request. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the invoice request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the invoice request. **Note:** The **Edit** button appears only when the invoice request is in the **Draft** status.
Delete	Used to delete the invoice request.

Button Name	Button Description
	Note: The **Delete** button appears only when the invoice request is in the **Draft** status.
Submit	Used to submit the invoice request for approval. **Note:** The **Submit** button appears only when the invoice request is in the **Draft** status.
Cancel	Used to cancel the invoice request. **Note:** The **Cancel** button appears when the invoice request is in the **Deferred Processing Batch** status.
Approve	Used to approve the invoice request. **Note:** The **Approve** button appears when: • The invoice request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the invoice request.
Reject	Used to reject the invoice request. **Note:** The **Reject** button appears when: • The invoice request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the invoice request.
Re Submit	Used to request the user for resubmitting the invoice request for approval. **Note:** The **Re Submit** button appears when: • The invoice request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the invoice request.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the invoice request is created in the system. In addition, this column has a context menu (⊙) icon appears corresponding to this column which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the invoice request status is updated.
Create Date/Time	Displays the date and time when the invoice request is created.

- **External Reference** - The **External Reference** section lists the external references using which the invoice request is created in the system. It contains the following columns:

Column Name	Column Description
External Reference Type	Indicates the external reference type using which the invoice request is created for the external references. The valid values are:

Column Name	Column Description
	• Membership • Policy **Note:** The value in this field appears only when you are viewing the invoice request details of an account which belongs to the health insurance business and is created using an external reference.
External Reference Information	Displays information about the external reference for the invoice request. **Note:** It has a link. On clicking the link, the **Policy** screen appears with the details of the respective policy. The value in this field appears only when you are viewing the invoice request details of an account which belongs to the health insurance business and is created using an external reference.

- **Statistics** - The **Statistics** section displays information about the records generated while processing the invoice request. It contains the following fields:

Field Name	Field Description
Total Records	Displays the total number of records that were considered for processing the invoice request.
Processed Records	Displays the number of records that were processed while processing the invoice request.
Total Bills Created	Displays the total number of bills generated for the accounts considered for processing the invoice request.
Excluded Records	Displays the number of records that were excluded from the invoice request generation process.
Error Records	Displays the number of records which are in the error status.
Processing Records	Displays the number of records in the invoice request which are still under the generation process.
Pending Records	Displays the number of records that are pending to be processed for the invoice request generation process.

Invoice Request Details

The **Invoice Request Details** zone lists the persons whose accounts are added to the invoice request. It contains the following columns:

Column Name	Column Description
Person Information	Indicates the person for which the invoice request is created. In addition, this column has a context menu (⊙) icon appears corresponding to this column which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.
Record Status	Indicates the status of the bills in the invoice request. The valid values are: • Pending • Error • Processing
Bill Information	Indicates the bill which is added to the invoice request. In addition, this column has a context menu (⊙) icon appears corresponding to this column which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.
Error Message	Displays the error message indicating the error that occurred while processing the bills in the invoice request.
Recent Billed Date	Displays the date of the bill that has been recently processed from the invoice request.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The **Filter** icon appears when the zone is **Account List**.

You can filter the list using various search criteria (such as, **Record Status**, **Account ID**, and **Person ID**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Account List

The **Account List** zone lists the accounts of the entity whose bills are considered for creating the invoice request. It contains the following columns:

Column Name	Column Description
Account Information	Indicates the account for which the invoice request is created in the system. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Person Information	Indicates the person for which the invoice request is created in the system. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.
Record Status	Indicates the status of the bills in the invoice request. The valid values are: • Pending • Error • Processing
Bill Information	Indicates the bill which is added to the invoice request. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears where you can view the details of the respective bill.
Error Message	Displays the error message indicating the error that occurred while processing the bills in the invoice request for the account.
Recent Billed Date	Displays the date of the bill that has been recently processed from the invoice request for the account.

A check-box appears corresponding to each account when the invoice request is in the **Draft** status. On selecting the check-box, and clicking the **Exclude** button, you can exclude the account from the invoice request process. You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header to exclude all the accounts from the invoice request process.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Record Status**, **Account ID**, and **Person ID**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Excluded Accounts

The **Excluded Accounts** zone lists the accounts of the main person whose bills are not considered for processing the invoice request. It contains the following columns:

Column Name	Column Description
Account Information	Indicates the account whose bills are excluded from the invoice request process. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Person Information	Indicates the person to which the account belongs. In addition, this column has a context menu (⊙) which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Person** screen appears where you can view the details of the respective person.

A check-box appears corresponding to each account when the invoice request is in the **Draft** status. On selecting the check-box, and clicking the **Include** button, you can include the account to the invoice request process. You can also select multiple accounts at the same time. In addition, you can select the check box corresponding to the column header to include all the accounts of the person to the invoice request process.

Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Record Status**, **Account ID**, and **Person ID**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

The **Excluded Accounts** zone appears when **Invoice Requests for Persons** option is selected from the **Search By list** in the **Search Invoice Request** zone.

Invoice Request - Log

The **Log** tab contains the following zone:

- Invoice Request Log on page 2691

Invoice Request Log

The **Invoice Request Log** zone lists the complete trail of actions performed on the invoice request. It contains the following columns:

Column Name	Column Description
Creation Date/Time	Displays the date and time when the action was performed on the invoice request.
Details	Displays the details of the action performed on the invoice request.
User	Indicates the user who has performed the action on the invoice request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the invoice request. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the invoice request was changed.

Note: You can manually add a log entry for the invoice request by clicking the **Add Log Entry** link in the upper right corner of the **Invoice Request Log** zone.

Editing an Invoice Request

Prerequisites

To edit an invoice request, you should have:

- Invoice request types defined in the application
- Bills created in the application
- Account and Person entities defined in the application

Procedure

To edit an invoice request:

1. Search for the invoice request in the **Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to *t*he invoice request whose details you want to edit.
   The **Invoice Request** screen appears.
3. Click the **Edit** button in the **Invoice Request** zone.

   The **Invoice Request** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details about the invoice request.
   - **Characteristics** - Used to define a list of characteristics for the invoice request.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Invoice Request Information	Displays information about the invoice request.	Not applicable
Invoice Request Type	Indicates the invoice request type using which the invoice request is created in the system.	Not applicable
Entity	Indicates the entity for which the invoice request is created in the system. The valid values are: • Account • Person	Not applicable
Account ID	Used to edit the invoice request which includes the bills of a particular account. **Note:** The **Search** (🔍) icon appears corresponding to the **Account ID** field. On clicking the **Search** icon, the **Account Search** window appears where you can search for the respective account. This field appears only when the **Account** option is selected from the **Entity** list.	Yes
Person ID	Used to edit the invoice request which includes the bills of a particular person. **Note:** The **Search** (🔍) icon appears corresponding to **Person ID** field. On clicking the **Search** icon, the **Person Search** window appears where you can search for the respective person. This field appears only when the **Person** option is selected from the **Entity** list.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Include Person Hierarchy	Used to specify whether you want to include the accounts of all the child persons of the main person for creating the invoice request. **Note:** This field appears only when the **Person** option is selected from the **Entity** list.	No
Cutoff Date	Used to specify the date till when all the billable charges are considered for processing the invoice request. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Accounting Date	Used to specify the accounting date for which the financial transaction of the bill is created. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Bill Date	Used to specify the date on which the bill is generated for the entity. **Note:** The bill date cannot be on or earlier than the last bill date of the account. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
Processing Date	Displays the date when the invoice request is processed in the system.	No
Comments	Used to specify additional information about the invoice request.	No

Note: The **Edit** button appears when the invoice request is in the **Draft** status.

4. Modify the details of the invoice request, if required.
5. Define, edit, or remove characteristics from the invoice request, if required.
6. Click **Save**.
   The changes made to the invoice request are saved.

How to define a characteristic for an invoice request	Defining a Characteristic for an Invoice Request on page 2694

Defining a Characteristic for an Invoice Request

Prerequisites

To define a characteristic for an invoice request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Invoice Request**)

Procedure

To define a characteristic for an invoice request:

1. Ensure that the **Characteristics** section is expanded when you *a*re manually creating or editing an invoice request.

   The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the invoice request. **Note:** You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the invoice request.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Invoice Request**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the invoice request.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the invoice request.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the invoice request, click the **Add** (+) icon and then *r*epeat step *2*.

   Note: However, if you want to remove a characteristic from the invoice request, click the **Delete** icon corresponding to the characteristic.
4. Click **Save**.
   The characteristic is defined for the invoice request.

Deleting an Invoice Request

Procedure

To delete an invoice request:

1. Search for the invoice request in the **Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to *t*he invoice request that you want to delete.
   The **Invoice Request** screen appears.
3. Click the **Delete** button in the **Invoice Request** zone.
   A message appears confirming whether you want to delete the invoice request.

   Note: The **Delete** button appears when the invoice request is in the **Draft** status.
4. Click **OK**.
   The invoice request is deleted.

Canceling an Invoice Request

Prerequisites

To cancel an invoice request, you should have:

- Reasons defined for the **Canceled** status of the **C1-InvoiceRequest** business object in the **Status Reason** screen

Procedure

To cancel an invoice request:

1. Search for the invoice request in the **Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to *t*he invoice request that you want to cancel.
   The **Invoice Request** screen appears.
3. Click the **Cancel** button in the **Invoice Request** zone.

   The **Invoice Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to cancel the invoice request. **Note:** The list includes only those reasons which are defined for the **Canceled** status of the **C1-InvoiceRequest** business object in the **Status Reason** screen.	Yes

Note: The **Cancel** button appears when the invoice request is in the **Deferred Processing** or **Deferred Processing - Batch** status.

4. Select the reason for canceling the invoice request from the **Status Reason** list.
5. Click **Save**.
   The status of the invoice request (along with the bills within the invoice request) is changed to **Canceled**.

Submitting an Invoice Request

Prerequisites

To submit an invoice request, you should have:

- The status of the invoice request in the **Draft** status.
- The invoice request type as **Manual**.

Procedure

To submit an invoice request:

1. Search for the invoice request in the **Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to *t*he invoice request that you want to submit.
   The **Invoice Request** screen appears.
3. Click the **Submit** button in the **Invoice Request** zone.

   The system behaves in the following manner:

If...	Then...
The **Approval Required** option is selected in the respective invoice request type	The status of the invoice request is changed to **Approval In Progress**. In this status, you can perform various actions on the invoice request, such as, **Approve** or **Reject** or **Return To Submitter**. If the approver clicks the **Approve** button, the status of the invoice request is changed to **Approved**. If the approver clicks the **Reject** button, the status of the invoice request is changed

If...	Then...
	to **Rejected**. If the approver clicks the **Return To Submitter** button, a To Do is generated and the invoice request status is changed to **Draft**. The submitter updates the invoice request and redirects it back to the approver for approval purposes.
The **Approval Required** option is not selected in the respective invoice request type and the entity type is **Person**	The status of the invoice request is changed to **Processed**, or **Deferred Processing** or **Deferred Processing Batch**.
The **Approval Required** option is not selected in the respective invoice request type, and the entity type is **Account**, and the billable charge count exceeds the defer processing billable charge count	The status of the invoice request is changed to **Deferred Processing Batch**.
The **Approval Required** option is not selected in the respective invoice request type, and the entity type is **Account**, and the billable charge count does not exceed the defer processing billable charge count, and the invoice processing date does not exceed the system date	The status of the invoice request is changed to **Processed** else it is changed to **Deferred Processing**.

Note:

The **Submit** button appears when the invoice request is in the **Draft** status and invoice request type is **Manual**.

Approving an Invoice Request

You can view the number of invoice requests which are pending for approval in the **Invoice Request** screen. The approver can review, and accordingly approve, reject, or ask the submitter to resubmit the invoice request based on the observations.

Note: The system will not allow you to approve, reject, or resubmit an invoice request submitted by you.

Prerequisites

To approve an invoice request, you should have:

- Approval To Do role assigned in the system

Procedure

To approve an invoice request:

1. Do either of the following:

If you want to...	Then...
Approve an invoice request through the Invoice Request screen	**a.** Search for the invoice request in the **Invoice Request** screen. **b.** In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to the invoice request which you want to review.
Approve an Invoice request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-INVRATODO** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the invoice request that you want to review.

The **Invoice Request** screen appears.

2. Review the details in the **Invoice Request** screen.
3. If the information in the invoice request is accurate, then click the **Approve** button in the **Invoice Request** zone.

   The system behaves in the following manner:

If...	Then...
The status of the invoice request is changed to **Approved**	A To Do entry is created using the To Do type **F1-TODOCOMPL** specified in the approval profile and is assigned back to the submitter to complete the invoice request.

Note: The **Approve** button appears when:

- The invoice request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the invoice request.

Rejecting an Invoice Request

Prerequisites

To reject an invoice request, you should have:

- Reasons defined for the **Rejected** status of the **C1-InvoiceRequest** business object in the **Status Reason** screen.

Note: The system will not allow you to approve, reject, or resubmit an invoice request submitted by you.

Procedure

To reject an invoice request:

1. Do either of the following:

If you want to...	Then...
Reject an invoice request through the Invoice Request screen	**a.** Search for the invoice request in the **Invoice Request** screen. **b.** In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to the invoice request which you want to review.
Reject an invoice request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-INVRATODO** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the invoice request that you want to review.

   The **Invoice Request** screen appears.
2. Review the details in the **Invoice Request** screen.
3. If the information in the invoice request is incorrect, then click the **Reject** button in the **Invoice Request** zone.
   The **Reject Invoice Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the invoice request. **Note:** The list includes only those reasons which are defined for the **Rejected** status of the **C1-InvoiceRequest** business object in the **Status Reason** screen.	Yes
Comments	Used to specify additional information for rejecting the invoice request.	No

   Note: The **Reject** button appears when:
   - The invoice request is in the **Approval In Progress** status.
   - A user with the approval To Do role is reviewing the invoice request.
4. Select the reason for rejecting the invoice request from the **Status Reason** list.
5. Click **Save**.
   The status of the invoice request is changed to **Rejected**.

Requesting the Submitter to Resubmit the Invoice Request for Approval

Procedure

To request the submitter to resubmit the invoice request for approval:

1. Do either of the following:

If you want to...	Then...
Request for resubmitting an invoice request through the Invoice Request screen	**a.** Search for the invoice request in the **Invoice Request** screen. **b.** In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to the invoice request which you want to review.
Request for resubmitting an invoice request from the To Do List screen	**a.** Click the **Menu** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **To Do** and then click **To Do List**. The **To Do Type for User Search** window appears. **c.** Enter **C1-INVRATODO** in the **To Do Type** field. **d.** Click the **Search** button corresponding to the **To Do Type** field. The **To Do List** screen appears. **e.** Select the **Open** option from the **Filter by** list to view all unassigned To Dos. **f.** Click the link in the **Message** column corresponding to the To Do of the invoice request that you want to review.

   The **Invoice Request** screen appears.
2. Review the details in the **Invoice Request** screen.
3. If the information in the invoice request is incomplete and you want the submitter to make the required changes *a*nd resubmit the invoice request for approval, then click the **Resubmit** button in the **Invoice Request** zone. The **Resubmit Invoice Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes which the submitter should make in the invoice request before resubmitting it for approval.	Yes

   Note: The **Resubmit** button appears when:
   - The invoice request is in the **Approval In Progress** status.
   - A user with the approval To Do role is reviewing the invoice request.
4. Specify the changes in the **Comments** field and then click **Save**.

A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the invoice request type. In addition, the status of the invoice request is changed to **Draft**.

Viewing the Log of an Invoice Request

Procedure

To view the log of an invoice request:

1. Search for the invoice request in the **Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to *t*he invoice request whose log you want to view.
   The **Invoice Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. View the complete trail of actions performed on the invoice request in the **Invoice Request Log** zone.

Adding a Log Entry for an Invoice Request

Procedure

To add a log entry for an invoice request:

1. Search for the invoice request in the **Invoice Request** screen.
2. In the **Search Results** section, click the link in the **Invoice Request Information** column corresponding to *t*he invoice request for which you want to add a log entry.
   The **Invoice Request** screen appears.
3. Click the **Log** tab.
   The **Log** tab appears.
4. Click the **Add Log Entry** link in the upper right corner of the **Invoice Request Log** zone.

   The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the invoice request.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Log Details	Used to specify the reason for adding a log entry for the invoice request.	Yes

5. Enter the required details in the **Log Details** field.
6. Click **Save**.
   The log entry is added for the **Invoice Request Log** zone.

Refund/Write Off Request

Topics:

- Prerequisites
- Setting the C1_REFWO Feature Configuration
- Refund Request (Without Approval) Status Transition
- Refund Request (With Approval) Status Transition
- Write Off Request (Without Approval) Status Transition
- Write Off Request (With Approval) Status Transition
- Account Level Refund/Write Off
- Refund/Write Off Adjustment at Bill Level
- Algorithms Used in C1-RefundReq
- Algorithms Used in C1-WORequest
- Refund/Write Off Request Type
- Refund/Write Off Request (Used for Searching)
- Refund Request (Used for Viewing)
- Write Off Request (Used for Viewing)

Oracle Revenue Management and Billing allows you to refund and write off amount to the account. If the amount received from the payor account is matched against the suspense or excess credit contract, the system facilitates you to refund the amount to the payor. In addition, you can refund the amount of a credit bill line item, such as credit bill segment or adjustment, if required. To refund the amount to the account holder, you need to create refund adjustments through a refund request. While creating a refund request, you need to specify the refund request type using which you want to create the refund request. It is the refund request type which helps the system to determine:

- Whether the refund request must be approved before creating refund adjustments in the system
- Approval profile using which the refund request must be approved
- Whether multi-level or single-level approval is required while creating refund adjustments in the system
- Tolerance limit for refund (i.e. minimum refund amount)
- Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
- Default adjustment type using which refund adjustments must be created

The system allows you to create refund adjustments only using those adjustment types where A/P request type is defined. Once the refund adjustments are created, the A/P Extract process will extract the information and accordingly refund the amount to the payor. During the refund request process, a refund request goes through various statuses in its lifecycle. For more information about the refund request statuses, see Refund Request (Without Approval) Status Transition on page 2707 and Refund Request (With Approval) Status Transition on page 2710.

Note that the lifecycle of a refund request is driven by the business object using which the refund request is created. A refund request business object named **C1-RefundReq** is shipped with the product. The refund request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-RefundReq** business object.

Similarly, the system facilitates you to write off the amount to the account through a write off request. While creating a write off request, you need to specify the write off request type using which you want to create the write off request. It is the write off request type which helps the system to determine:

- Whether the write off request must be approved before creating write off adjustments in the system
- Approval profile using which the write off request must be approved
- Whether multi-level or single-level approval is required while creating write off adjustments in the system

- Default adjustment type using which write off adjustments must be created

The system allows you to create write off adjustments only using those adjustment types where A/P request type is not defined. During the write off request process, a write off request goes through various statuses in its lifecycle. For more information about the write off request statuses, see Write Off Request (Without Approval) Status Transition on page 2713 and Write Off Request (With Approval) Status Transition on page 2715.

Note that the lifecycle of a write off request is driven by the business object using which the write off request is created. A write off request business object named **C1-WORequest** is shipped with the product. The write off request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-WORequest** business object.

For more information on how to setup the refund and write off request processes, see Prerequisites on page 2705.

Prerequisites

To setup the refund request process, you need to do the following:

- Define the required adjustment types (for creating refund adjustments) where A/P request type is defined
- Define the required adjustment types (for creating write up adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define voided and rejected status reasons for the **C1-RefundReq** business object
- Assign the **C1-REFRQ** To Do type to a To Do role whose users must receive To Do generated while submitting a refund request for approval
- Define the required approval profiles with the credit hierarchy and **C1-REFRQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen
- Define the required refund request types in the system

To setup the write off request process, you need to do the following:

- Define the required adjustment types (for creating write off adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define cancelled and rejected status reasons for the **C1-WORequest** business object
- Assign the **C1-WOREQ** To Do type to a To Do role whose users must receive To Do generated while submitting a write off request for approval
- Define the required approval profiles with the debit hierarchy and **C1-WOREQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen
- Define the required write off request types in the system

Setting the C1_REFWO Feature Configuration

The **C1_REFWO** feature configuration enables the system to determine the following:

- How the refund/write off adjustment should be created for a refund/write off request when the adjustment level is not specified while defining the refund/write off request.
- Automatic refund/write off preference for the fully-insured group and individual lines of business.

Note: If the system is used for both the fully insured group and individual lines of business, you need to define two separate preferences with the **Automatic Refund/Write-Off** preference category – one for each line of business (i.e., fully insured group business and fully insured individual business).

Procedure

To set the **C1_REFWO** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.
   A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.
   The **Feature Configuration Query** screen appears.
4. In the **Feature Configuration Search** zone, enter **C1_REFWO** in the **Feature Name** field.

Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of feature configurations that meet the search criteria appears in the search results.
6. In the **Search Results** section, click the link in the **Description** column corresponding to the feature configuration whose details you want to edit.

   The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Default Adjustment Level	Used to control how the refund/write off adjustment should be created for the refund/write off request. The system considers this option type in the following scenarios: • When the value is not specified in the **Adjustment Level** field while defining a refund/write off request. • When the **Adjustment Level For Credit Bill** parameter is not defined in the **C1-IMREFCRET** algorithm attached to the respective account's division. The valid values are: • **ACCT** – Used when you want to create the refund/write off request at the account level. Here, the refund/write off adjustment is created against the netting contract of the account. • **BILL** – Used when you want to create the refund/write off request for a bill. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the financial services domain. • **SEGT** – Used when you want to create the refund/write off request for a bill, bill segment, adjustment, or payment of an account. Here, the refund/write off adjustment is created against the bill segment, adjustment, or payment segment, respectively. If you select this option, the system behaves in the traditional manner.	Yes (Conditional) **Note:** This data is required when you want to do the following: • Create refund/ write off request manually • Enable the automatic refund process for the account
Field Mapping Preference for Individual Membership	Used to indicate the automatic refund/write off preference that you want to use for the fully insured individual business. The system considers the various attributes of the automatic refund/write off preference for: • Automatic Refund/Write Off Creation on Terminating an Individual Membership • Automatic Refund/Write Off Rollback on Reinstating an Individual Membership **Note:** You must specify a preference where the preference category is set to **Automatic Refund/ Write-Off**.	Yes (Conditional) **Note:** This data is required when you want to enable the automatic refund/write off creation feature for the fully insured

Option Type	Description	Mandatory (Yes or No)
	This option type is only applicable for the health insurance domain and not for the financial services domain.	individual business.
Field Mapping Preference for Policy (Small Group)	Used to indicate the automatic refund/write off preference that you want to use for the fully insured group business. The system considers the various attributes of the automatic refund/write off preference for: • Automatic Refund/Write Off Creation on Terminating a Group Policy • Automatic Refund/Write Off Rollback on Reinstating a Group Policy **Note:** You must specify a preference where the preference category is set to **Automatic Refund/ Write-Off**. This option type is only applicable for the health insurance domain and not for the financial services domain.	Yes (Conditional) **Note:** This data is required when you want to enable the automatic refund/write off creation feature for the fully insured group business.

7. Enter the values for the required option types in the **Feature Configuration** screen.
8. Click the **Save** button in the **Page Title** area.
   The changes made to the feature configuration are saved.

Account Level Refund/Write Off

Oracle Revenue Management and Billing enables you to create a refund/write off request at the account level. A new field named **Adjustment Level** is available while defining a refund/write off request. It allows you to control how the refund/write off adjustment should be created for the refund/write off request. It supports the following values:

- **Account** - Used when you want to create the refund/write off request at the account level. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the health insurance domain.
- **Bill** - Used when you want to create the refund/write off request for a bill. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the financial services domain.
- **Segment** - Used when you want to create the refund/write off request for a bill, bill segment, adjustment, or payment of an account. Here, the refund/write off adjustment is created against the bill segment, adjustment, or payment segment, respectively. If you select this option, the system behaves in the traditional manner.

If you do not specify the value for the **Adjustment Level** field, the system considers the value defined in the **Default Adjustment Level** option type of the **C1_REFWO** feature configuration. If you select the **Account** option from the **Adjustment Level** list, the system checks the account balance while creating the refund/write off request. If the account balance is zero, the system throws an appropriate error message and does not allow you to create the refund/write off request at the account level. However, if the account balance is in credit, the system allows you to create a refund request for the account. Similarly, if the account balance is in debit, the system allows you to create a write off request for the account.

While creating a refund/write off request at the account level, the system, by default, sets the total refund/write off amount to the account balance. You cannot edit the refund/write off amount. Even, the post processing algorithms cannot update the refund/write off amount in the refund/write off request.

Note: The **Bills** and **Payments and Adjustments** tabs do not appear in the **Refund Request** and **Write Off Request** screens when the refund/write off request is created at the account level.

Before creating the refund/write off request at the account level, you need to do the following:

- Attach the **C1-NTACBAL** algorithm to the **Netting Account Balance** system event in the **Algorithms** tab of the **Installation Options - Framework** screen
- Set the netting contract type on the respective refund/write off request type

The system invokes the **C1-NTACBAL** algorithm while processing the refund/write off request where the adjustment level is set to **Account**. The **C1-NTACBAL** algorithm creates transfer adjustments on the netting contract of the account. The transfer adjustment creation process slightly varies depending on the adjustment level that is selected while defining a refund/write off request.

If the adjustment level is set to **Account**, the system checks whether a netting contract created using the netting contract type (specified in the refund/write off request type) exists for the account. If so, the system considers the unmatched financial transactions of the account and then creates a transfer adjustment against each of them on the netting contract. However, if the netting contract does not exist for the account, then the system does the following:

1. Creates a netting contract using the netting contract type specified in the refund/write off request type
2. Considers the unmatched financial transactions of the account and then creates a transfer adjustment against each of them on the netting contract

You can opt to exclude unmatched financial transactions of contracts created using a particular contract type by setting the **Excluded Contract types for netting** option type of the **C1_CMO** feature configuration. You can exclude multiple contract types by defining the **Excluded Contract types for netting** option type multiple times (with unique sequence number) in the feature configuration. This option type is considered only when the adjustment level is set to **Account**.

On submitting or approving a refund/write off request at the account level, the system validates whether the refund/write off amount matches the current account balance. If the refund/write off amount does not match the current account balance, the system does not allow you to process the refund/write off request. However, if the refund/write

off amount matches the current account balance, the system creates the transfer adjustments and refund/write off adjustment on the netting contract of the account.

On voiding a refund request where the adjustment level is set to **Account**, the system cancels the transfer adjustments and refund adjustment on the netting contract of the account. And, on canceling a write off request where the adjustment level is set to **Account**, the system cancels the transfer adjustments and write off adjustment on the netting contract of the account.

Refund/Write Off Adjustment at Bill Level

Until now, you were able to create the refund/write off request for a bill or bill line item (i.e. bill segment or adjustment) of an account. On processing the refund/write off request, the system used to create refund/write off adjustment against the bill line item irrespective of whether the refund/write off is done at the bill or bill line item level. There was a requirement wherein the system should allow to create the refund/write off adjustment against the bill and not against the bill line items when the refund/write off is done at the bill level.

Now, Oracle Revenue Management and Billing enables you to create a refund/write off adjustment at the bill level. A new field named **Adjustment Level** is available while defining a refund/write off request. It allows you to control how the refund/write off adjustment should be created for the refund/write off request. It supports the following values:

- **Account** - Used when you want to create the refund/write off request at the account level. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the health insurance domain.
- **Bill** - Used when you want to create the refund/write off request for a bill. Here, the refund/write off adjustment is created against the netting contract of the account. This option is only applicable for the financial services domain.
- **Segment** - Used when you want to create the refund/write off request for a bill, bill segment, adjustment, or payment of an account. Here, the refund/write off adjustment is created against the bill segment, adjustment, or payment segment, respectively. If you select this option, the system behaves in the traditional manner.

By default, the adjustment level is set to **Segment**. If you select the **Bill** option from the **Adjustment Level** list, the system checks the account balance while creating the refund/write off request. If the account balance is zero, the system throws an appropriate error message and does not allow you to create the refund/write off request for the account. However, if the account balance is in credit, the system allows you to create a refund request for the account. Similarly, if the account balance is in debit, the system allows you to create a write off request for the account.

Note: The **Payments and Adjustments** tab does not appear in the **Refund Request** screen when the adjustment level is set to **Bill** in the refund request.

Before creating the refund/write off request where the adjustment level is set to **Bill**, you need to do the following:

- Attach the **C1-NTACBAL** algorithm to the **Netting Account Balance** system event in the **Algorithms** tab of the **Installation Options - Framework** screen
- Set the netting contract type on the respective refund/write off request type

The system invokes the **C1-NTACBAL** algorithm while processing the refund/write off request where the adjustment level is set to **Bill**. The **C1-NTACBAL** algorithm creates transfer adjustments on the netting contract of the account. The transfer adjustment creation process slightly varies depending on the adjustment level that is selected while defining a refund/write off request.

If the adjustment level is set to **Bill**, then the system checks whether a netting contract created using the netting contract type (specified in the refund/write off request type) exists for the account and its contract balance is equal to zero. If both the conditions are met, the system considers the unpaid bill segments and adjustments of the bill and then creates a transfer adjustment against each of them on the netting contract. However, if the netting contract does not exist for the account, then the system does the following:

1. Creates a netting contract using the netting contract type specified in the refund/write off request type
2. Considers the unpaid bill segments and adjustments of the bill and then creates a transfer adjustment against each of them on the netting contract

And, if the netting contract exists for the account, but its contract balance is not equal to zero, the system throws an appropriate error message on the user interface.

On voiding a refund request where the adjustment level is set to **Bill**, the system cancels the transfer adjustments and refund adjustment on the netting contract of the account. And, on canceling a write off request where the adjustment level is set to **Bill**, the system cancels the transfer adjustments and write off adjustment on the netting contract of the account.

Algorithms Used in C1-RefundReq

The following table lists the algorithms which are attached to the **C1-RefundReq** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-REFREQINF	C1-REFREQINF	Refer to C1-REFREQINF on page 2720
Post-Processing	C1-REFWOPOSP	C1-REFWOPOSP	Refer to C1-REFWOPOSP on page 2720
Pre-Processing	C1-REFWOPRE	C1-REFWOPRE	Refer to C1-REFWOPRE on page 2720
Validation	C1-REFUNDVAL	C1-REFUNDVAL	Refer to C1-REFUNDVAL on page 2720

The following table lists the algorithms which are used in the lifecycle of the **C1-RefundReq** business object:

Status	System Event	Algorithm	Algorithm Type	Description

C1-REFREQINF

This algorithm generates the refund and write off request information string which appears throughout the application. It concatenates the following fields:

- Refund or Write Off Request Type Description
- Refund or Write Off Request Status Description
- Refund or Write Off Request ID

C1-REFWOPOSP

This algorithm recalculates and updates the total refund amount in the **Refund Request** zone when you change the refund amount against an entity while editing a refund request.

C1-REFWOPRE

This algorithm is used to avoid the concurrency issue for refund and write off.

C1-REFUNDVAL

This algorithm validates the following for each entity that you have selected in the refund request:

- The mandatory data, such as refund amount and adjustment type, is specified.
- The refund amount is not less than zero.
- The refund amount is not greater than the entity amount.
- The refund amount is not greater than the eligible refund amount.
- The partial refund is not done at the payment event or bill level.

C1-REF-DFT

This algorithm fetches the account's main customer's name and address and displays in the **Refund Request** zone. In addition, when you refund the payments from the **Payment Event Summary** screen, this algorithm does the following:

- The total eligible refund amount is calculated and accordingly displayed in the **Refund Request** screen.
- The default refund adjustment type specified in the refund request type is fetched and displayed against the selected payment event or payments.
- On selecting a payment event for refund, if all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

C1-REFUNDSUB

This algorithm checks the following:

- Whether the approval is required for the refund request. If the approval is required for a refund request, the status of the refund request is changed to **Approval In Progress**. However, if the approval is not required for a refund request, the status of the refund request is changed to **Creating Adjustment**.
- If the account on which the refund request is created is on an active hold request, then the status of the refund request is changed to **Hold**.
- At least one entity, such as payment event, payment, or credit bill line item (such as credit bill segment or adjustment) is selected in the refund request.
- Whether the approval profile attached to the refund request type has the credit hierarchy and **C1-REFRQ** To Do type is defined.

C1-DEFERREF

This algorithm is invoked when the status of the refund request is changed to **Submitted** or **Approved**. It checks whether the refund request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the refund request does not exceed the online record process limit, the system changes the status of the refund request to **Processing**. However, if the number of valid records in the refund request exceeds the online record process limit, the system changes the status of the refund request to **Deferred Processing**.

This algorithm contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).

C1-REFUNDAPP

This algorithm creates the following:

- A To Do using the To Do type specified in the approval profile which is attached to the refund request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.
- A log entry is added when a To Do is created using the To Do type.

C1-REFAPPRVD

This algorithm creates the following:

- A To Do using the To Do Type specified in the approval profile which is attached to the refund request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.
- A log entry is added when a To Do is created using the To Do Type.

C1-REFAPPREJ

This algorithm is executed when the refund request is rejected. It contains the following parameter:

- **To Do Type** - A To Do using the To Do type specified in the algorithm is created. The To Do is sent to the request submitter once the request is rejected by the approver.

C1-REFCKHLD

This new algorithm is triggered by the monitor batch on the **Deferred Processing** status of the refund request business object. It checks if the account getting processed is on hold for refund process. If yes, then it will move the refund request status to **Hold** or else it will move to **Creating Adjustments** status.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-REFADJCRI

This algorithm does the following:

- Creates the refund adjustments for the refund request. These refund adjustments are created in the **Frozen** status. The adjustment ID is displayed corresponding to the entity in the **Refund Details** zone.
- Stamps the bill ID of credit line item on the adjustment and the corresponding financial transaction.
- If a match event is present for the credit bill line item and for payments which are matched against the excess credit contract, the existing match event is stamped on the refund or write up adjustment and the corresponding financial transaction. However, when a match event is not present for payments which are matched against the suspense contract or if the match event does not exist, a new match event is created and stamped on the refund or write up adjustment and the corresponding financial transaction.
- The details of the refund adjustments are added in the **A/P Check Request (CI_ADJ_APREQ)** table.
- If a write up adjustment is created, the write up adjustment type specified in the refund request type is displayed corresponding to the entity in the **Refund Details** zone.
- If you are doing a partial refund for payment, it will cancel original payment and create two new partial payments.
- Original payment will be cancelled using the cancel reason passed as algorithm soft parameter.
- Match Event Id of cancelled payment will be stamped on refund adjustment and the match event will be balanced.

C1-DEFERVOID

This algorithm is invoked when the status of the refund request is changed from **Processed** to **Deferred Void**. It checks whether the refund request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of distinct adjustments in the refund request does not exceed the online record process limit, the system changes the status of the refund request to **Void**. However, if the number of valid records in the refund request exceeds the online record process limit, the system keeps the status of the refund request as **Deferred Void**.

This algorithm contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of distinct adjustments in a refund write off request you can process in the real time (i.e. immediately).

C1-REFVOID

This algorithm is invoked on click of void button for a processed refund request. t cancels all frozen adjustments created for the request. The algorithm looks for the adjustment cancel reason required for cancelling the adjustments in the status reason characteristics (**F1_BUS_OBJ_STATUS_RSN_CHAR** table). If it is not found, it will use the status reason as selected by the user.

Algorithms Used in C1-WORequest

The following table lists the algorithms which are attached to the **C1-WORequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-REFREQINF	C1-REFREQINF	Refer to C1-REFREQINF on page 2720
Post-Processing	C1-WOPOSP	C1-WOPOSP	Refer to C1-WOPOSP on page 2724
Pre-Processing	C1-REFWOPRE	C1-REFWOPRE	Refer to C1-REFWOPRE on page 2720
Validation	C1-WOBOVAL	C1-WOBOVAL	Refer to C1-WOBOVAL on page 2724

The following table lists the algorithms which are used in the lifecycle of the **C1-WORequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-WODRAFT	C1-WODRAFT	Refer to C1-WODRAFT on page 2724
Submitted	Enter	C1-WOSUBMIT	C1-WOSUBMIT	Refer to C1-WOSUBMIT on page 2724
	Enter	C1-DEFERWO	C1-DEFERWO	Refer to C1-DEFERWO on page 2725
Approval In Progress	Enter	C1-WOAPPROVL	C1-WOAPPROVL	Refer to C1-WOAPPROVL on page 2725
	Enter	C1-DEFERWO	C1-DEFERWO	Refer to C1-DEFERWO on page 2725
Approved	Enter	C1-WOAPPROVD	C1-WOAPPROVD	Refer to C1-WOAPPROVD on page 2725
	Enter	C1-DEFERWO	C1-DEFERWO	Refer to C1-DEFERWO on page 2725
Rejected	Enter	C1-WOAPPREJ	C1-WOAPPREJ	Refer to C1-WOAPPREJ on page 2725

Creating Adjustment	Enter	C1-WOADJCRT	C1-WOADJCRT	Refer to C1-WOADJCRT on page 2726
Processed	-	-	-	-

Status	System Event	Algorithm	Algorithm Type	Description
Deferred Cancel	Enter	C1-DEFERVOID	C1-DEFERVOID	Refer to C1-DEFERVOID on page 2722
	Monitor	F1-AT-RQJ	F1-AT-RQJ	Refer to F1-AT-RQJ on page 1664
Cancelled	Enter	C1-WOCANCEL	C1-WOCANCEL	Refer to C1-WOCANCEL on page 2726

C1-REFREQINF

This algorithm generates the refund and write off request information string which appears throughout the application. It concatenates the following fields:

- Refund or Write Off Request Type Description
- Refund or Write Off Request Status Description
- Refund or Write Off Request ID

C1-WOPOSP

This algorithm validates the following for each entity that you have selected in the write off request:

- The mandatory data, such as write off amount and adjustment type, is specified.
- The write off amount is not less than zero.
- The write off amount is not greater than the entity amount.
- The write off amount is not greater than the eligible write off amount.
- The partial write off is not done at the bill level.
- The A/P Request Type is not defined in the selected adjustment type.

C1-REFWOPRE

This algorithm is used to avoid the concurrency issue for refund and write off.

C1-WOBOVAL

This algorithm performs validations for a write off request when the user clicks the **Edit** or **Save** button. It validates the write off amount to ensure that it is less than or equal to the eligible write off amount.

C1-WODRAFT

This algorithm is invoked when a new write off request is created on click of **Save** button and status is **Draft**.

C1-WOSUBMIT

This algorithm checks the following:

- Whether the approval is required for the write off request. If the approval is required for a write off request, the status of the write off request is changed to **Approval In Progress**. However, if the approval is not required for a write off request, the status of the write off request is changed to **Creating Adjustment**.

- At least one debit bill line item (such as debit bill segment or adjustment) is selected in the write off request.
- Whether the approval profile attached to the write off request type has the debit hierarchy and C1-WOREQ To Do type defined.

C1-DEFERWO

This algorithm is invoked when the status of the write off request is changed to **Submitted** or **Approved**. It checks whether the write off request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the write off request does not exceed the online record process limit, the system changes the status of the write off request to **Processing**. However, if the number of valid records in the write off request exceeds the online record process limit, the system changes the status of the write off request to **Deferred Processing**. This algorithm contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).

C1-WOAPPROVL

This algorithm creates the following:

- A To Do using the To Do type specified in the approval profile which is attached to the write off request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.
- A log entry is added when a To Do is created using the To Do type.

C1-WOAPPROVD

This algorithm is triggered when the approver clicks the **Approve** button. It checks whether the approval is required from users at the next level in the approval hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the write off request is changed to **Approval In Progress** and the algorithm attached to the **Approval In Progress** status is invoked. If further approval is not required, the status of the write off request is changed to **Creating Adjustment**.

C1-WOAPPREJ

This algorithm is executed when the refund request is rejected. It contains the following parameter:

- **To Do Type** - A To Do using the To Do type specified in the algorithm is created. The To Do is sent to the request submitter once the request is rejected by the approver.

C1-REJREQ

This algorithm will Update refund/Write off instruction with the reason codes for request rejection when approver rejects a request.

F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.

- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

C1-WOADJCRT

This algorithm does the following:

- Creates the write off adjustments for the write off request. These write off adjustments are created in the **Frozen** status. The adjustment ID is displayed corresponding to the entity in the **Write Off Details** zone.
- Stamps the bill ID of debit line item on the adjustment and the corresponding financial transaction.
- If a match event is present for the debit bill line item, the existing match event is stamped on the write off adjustment and the corresponding financial transaction. However, if the match event does not exist, a new match event is created and stamped on the write off adjustment and the corresponding financial transaction.
- If you are doing a partial write off for any entity, the corresponding match event status is set to **Open**. However, if the entire eligible amount is written off, the corresponding match event status is set to **Balanced**.

C1-WOCANCEL

This algorithm is invoked on click of the **Cancel** button for a write off request which is in the **Processed** state. It cancels all the frozen adjustments created for the write off request. The algorithm extracts the adjustment cancel reason required for cancelling the adjustments in the status reason characteristics (**F1_BUS_OBJ_STATUS_RSN_CHAR** table). If the reason is not found, it will use the status reason selected by the user.

Refund/Write Off Request Type

Oracle Revenue Management and Billing allows you to define:

- **Refund Request Type** - It is used to create a refund request. You can define multiple refund request types in the system. A refund request type helps the system to determine:
  - Whether the refund request must be approved before creating refund adjustments in the system
  - Approval profile using which the refund request must be approved
  - Whether multi-level or single-level approval is required while creating refund adjustments in the system
  - Tolerance limit for refund (i.e. minimum refund amount)
  - Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
  - Default adjustment type using which refund adjustments must be created
- **Write Off Request Type** - It is used to create a write off request. You can define multiple write off request types in the system. A write off request type helps the system to determine:
  - Whether the write off request must be approved before creating write off adjustments in the system
  - Approval profile using which the write off request must be approved
  - Whether multi-level or single-level approval is required while creating write off adjustments in the system
  - Default adjustment type using which write off adjustments must be created

While defining a refund or write off request type where approval workflow is required, you need to select the **Approval Required** check box. If the **Approval Required** check box is selected, the refund or write off request (which is created using the refund or write off request type) is sent for approval before creating the refund or write

off adjustments. However, if the **Approval Required** check box is not selected, the refund or write off adjustments are created immediately on submitting a refund or write off request. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. You can define a debit and credit hierarchy in the approval profile using the threshold amount. The debit approval hierarchy is used for approving write off request and credit approval hierarchy is used for approving refund request. Therefore, while defining an approval profile for refund, you need to define credit hierarchy and set the To Do Type to **C1-REFRQ**. However, while defining an approval profile for write off, you need to define debit hierarchy and set the To Do Type to **C1-WOREQ**.

You can define an approval hierarchy where users with different To Do role at each level can approve or reject the refund or write off request. For example, you can define an approval profile called A1 with two levels of approval. At the first level, a user with the `Manager` To Do role will approve or reject the refund or write off request, and at the second level, a user with the `Senior Manager` To Do role will approve or reject the refund or write off request. On submitting a refund or write off request where approval is required, a notification in the form of To Do is sent to all users with the To Do role defined at the first level in the hierarchy. Once the request is approved at the first level, a notification is sent to all users with the To Do role defined at the next level in the hierarchy. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the refund or write off request, the refund or write off adjustments are created. However, if an approver at any level in the hierarchy rejects the request, the refund or write off adjustments are not created.

The approval hierarchy is controlled by the threshold amount. For example, you define an approval profile called A1 with two levels of approval - First Level (Threshold Amount: 300, To Do Role: `Manager`) and Second Level (Threshold Amount: 500, To Do Role: `Senior Manager`). Now, if the total refund or write off amount is equal to 300 or less than 500, then the approval is required only from the first level in the hierarchy and not from the second level in the hierarchy. However, if the total refund or write off amount is equal to or greater than 500, then the approval is required from the first level and then from the second level in the hierarchy. But, if the total refund or write off amount is less than 300, then the approval is not required from any levels in the hierarchy. The system will automatically approve the refund or write off request and create the refund or write off adjustments.

The system supports both single-level and multi-level approval process while approving refund or write off request. If the **Hierarchical Approval** check box is selected while defining a refund or write off request type, the approval hierarchy defined in the approval profile is followed based on the threshold limit. However, if the **Hierarchical Approval** check box is not selected while defining a refund or write off request type, the approval is required only from the approval level where the total refund or write off amount falls within the threshold limit. Let us understand this with the help of some examples.

Example 1

<table>
<tr><th>Refund Request Type</th><th>Approval Profile</th><th>Approval Hierarchy</th><th>Hierarchical Approval</th></tr>
<tr><td>R1</td><td>Refund Analyst</td><td>Credit Hierarchy<table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$500</td><td>Senior Analyst</td></tr><tr><td>$750</td><td>Manager</td></tr><tr><td>$1500</td><td>Senior Manager</td></tr></table></td><td>Yes</td></tr>
<tr><td>R2</td><td>Refund Analyst</td><td>Credit Hierarchy<table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$500</td><td>Senior Analyst</td></tr><tr><td>$750</td><td>Manager</td></tr></table></td><td>No</td></tr>
</table>

Refund Request Type	Approval Profile	Approval Hierarchy		Hierarchical Approval
		Threshold Amount	**To Do Role**	
		$1500	Senior Manager	

The following table indicates how the system will behave in different refund scenarios:

Refund Request	Refund Request Type	Total Refund Amount ($)	Comments
RR1	R1	200	This refund request is automatically approved by the system because the total refund amount is less than $500.
RR2	R1	750	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role This is because the total refund amount is either equal to $750 or less than $1500 and hierarchical approval is required.
RR3	R1	2000	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role **3.** Users with the `Senior Manager` To Do role This is because the total refund amount is greater than $1500 and hierarchical approval is required.
RR4	R2	200	This refund request is automatically approved by the system because the total refund amount is less than $500.
RR5	R2	750	The To Do is sent for approval to users with the `Manager` To Do role. This is because the total refund amount is either equal to $750 or less than $1500 and hierarchical approval is not required.
RR6	R2	2000	The To Do is sent for approval to users with the `Senior Manager` To Do role. This is because the total refund amount is greater than $1500 and hierarchical approval is not required.

Example 2

Write Off Request Type	Approval Profile	Approval Hierarchy		Hierarchical Approval
W1	Write Off Analyst	**Debit Hierarchy**		Yes
		Threshold Amount	**To Do Role**	
		$100	Senior Analyst	

<table>
<tr><th>Write Off Request Type</th><th>Approval Profile</th><th>Approval Hierarchy</th><th>Hierarchical Approval</th></tr>
<tr><td></td><td></td><td><table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$200</td><td>Manager</td></tr><tr><td>$300</td><td>Senior Manager</td></tr></table></td><td></td></tr>
<tr><td>W2</td><td>Write Off Analyst</td><td><u>Debit Hierarchy</u><table><tr><th>Threshold Amount</th><th>To Do Role</th></tr><tr><td>$100</td><td>Senior Analyst</td></tr><tr><td>$200</td><td>Manager</td></tr><tr><td>$300</td><td>Senior Manager</td></tr></table></td><td>No</td></tr>
</table>

The following table indicates how the system will behave in different write off scenarios:

Write Off Request	Write Off Request Type	Total Write Off Amount ($)	Comments
WO1	W1	90	This write off request is automatically approved by the system because the total write off amount is less than $100.
WO2	W1	250	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role This is because the total write off amount is either equal to $200 or less than $300 and hierarchical approval is required.
WO3	W1	500	The To Do is sent for approval to the following users in the specified order: **1.** Users with the `Senior Analyst` To Do role **2.** Users with the `Manager` To Do role **3.** Users with the `Senior Manager` To Do role This is because the total write off amount is greater than $300 and hierarchical approval is required.
WO4	W2	90	This write off request is automatically approved by the system because the total write off amount is less than $100.
WO5	W2	250	The To Do is sent for approval to users with the `Manager` To Do role. This is because the total write off amount is either equal to $200 or less than $300 and hierarchical approval is not required.
WO6	W2	500	The To Do is sent for approval to users with the `Senior Manager` To Do role. This is because the total write off amount is greater than $300 and hierarchical approval is not required.

The **Refund/Write Off Request Type** screen allows you to define, edit, delete, and copy a refund and write off request type. This screen consists of the following zones:

- Refund/Write Off Request Type List on page 2730
- Refund/Write Off Request Type on page 2730

Refund/Write Off Request Type List

The **Refund/Write Off Request Type List** zone lists the refund and write off request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Refund/Write Off Request Type	Displays the refund or write off request type.
Description	Displays the description of the refund or write off request type.
Edit	On clicking the **Edit** (✎) icon, the **Refund/Write Off Request Type** screen appears where you can edit the details of the refund and write off request type.
Duplicate	On clicking the **Duplicate** (⧉) icon, the **Refund/Write Off Request Type** screen appears where you can define a refund and write off request type using an existing refund and write off request type.
Delete	On clicking the **Delete** (🗑) icon, you can delete the refund or write off request type. **Note:** You can delete a refund or write off request type only when a refund or write off request is not yet created using the refund or write off request type.

On clicking the **Broadcast** (📡) icon corresponding to refund or write off request type, the **Refund/Write Off Request Type** zone appears with the details of the respective refund or write off request type.

Refund/Write Off Request Type

The **Refund/Write Off Request Type** zone displays the details of the refund or write off request type. It contains the following sections:

- **Main** - Displays the basic information about the refund or write off request type. It contains the following fields:

Field Name	Field Description
Refund/Write Off Request Type	Displays the refund or write off request type.
Refund/Write Off Request Business Object	Indicates the business object using which the refund or write off request should be created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Description	Displays the description of the refund or write off request type.
Detailed Description	Displays additional information about the refund or write off request type.
Status	Indicates the status of the refund or write off request type. The valid values are: • Active • Inactive
Action	Indicates the action which is performed on the refund or write off request using the refund or write off request type. The valid values are: • Refund • Write Off
Minimum Refund Amount	Displays the tolerance limit defined for a refund. **Note:** This field appears when the **Refund** option is selected from the **Action** list.
Write Up Adjustment Type	Indicates the adjustment type using which the write up adjustment is created when the total refund amount is less than the minimum refund amount. **Note:** This field appears when the **Refund** option is selected from the **Action** list. It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view details of the respective write off adjustment type.
Approval Required	Indicates whether approval is required while creating the refund or write off adjustments using the refund or write off request type.
Approval Profile	Indicates the approval profile which must be used to define approval hierarchy for the refund or write off request type. **Note:** This field appears when the **Approval Required** option is selected. It has a link. On clicking the link, the **Approval Profile** screen appears where you can view details of the respective approval profile.
Hierarchical Approval	Indicates whether single-level or multi-level approval is required while defining a refund or write off request type. **Note:** This field appears when the **Approval Required** option is selected.

Field Name	Field Description
Adjustment Type	Indicates the adjustment type using which the refund or write off adjustments must be created. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view details of the respective adjustment type.
Netting Contract Type	Indicates the contract type used for netting transactions while processing the refund or write-offs.

- **Characteristics** - This section lists the characteristics of the refund or write off request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the refund or write off request type.
Delete	Used to delete the refund or write off request type. **Note:** You can delete a refund or write off request type when you have not created a refund or write off request using the refund or write off request type.
Duplicate	Used to create a new refund or write off request type using an existing refund or write off request type.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the refund or write off request type is created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.

By default, the **Refund/Write Off Request Type** zone does not appear in the **Refund/Write Off Request Type** screen. It appears when you click the **Broadcast** (ᯤ) icon corresponding to the refund or write off request type in the **Refund/Write Off Request Type List** zone.

Defining a Refund or Write Off Request Type

Prerequisites

To define a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without the A/P request type code defined in the application

Procedure

To define a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.
   A sub-menu appears.
3. Click the **Add** option from the **Refund/Write Off Request Type** sub-menu.

   The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type Business Object	Used to indicate the business object using which you want to create the refund or write off request type. The valid value is: • **Refund/Write Off Request Type (i.e. C1-RefWoReqType)** - Enables you to maintain a refund or write off request type. **Note:** The above business object is shipped with the product. The list includes those business objects which are created using the **Refund/ Write Off Request Type (i.e., C1-RFWORQTY)** maintenance object.	Yes

   Tip: Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request Type** screen.

   Note: The **Select Business Object** screen appears when there are multiple refund and write off request type business objects defined in the application. If there is only one refund and write off request type business object defined in the application, the **Refund/Write Off Request Type** screen appears.
4. Select the required refund and write off request type business object from the respective field.
5. Click **OK**.

   The **Refund/Write Off Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details for the refund or write off request type.

- **Characteristics** - Used to define the characteristics for the refund or write off request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Used to specify the refund or write off request type.	Yes
Business Object	Indicates the refund and write off request type business object using which you are defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object using which you want to create the respective refund or write off request. The valid values are: • **Refund Request (i.e. C1-RefundReq)** - Enables you to refund the bills and payments using a refund request type. • **Refund Request - Display BO (i.e. C1-RefundReq2** - Enables you to display the details of a refund request type. • **Write Off Request (i.e. C1-WORequest)** - Enables you to write off the bills using a write off request type. • **Write Off Request - Display BO (i.e. C1-WORequest2)** - Enables you to display the details of a write off request type.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	Used to indicate the status of the refund or write off request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a refund or write off request type to **Inactive** if there are refund or write off requests which are created using the refund or write off request type and are currently in the **Draft** or **Approval In Progress** status.	Yes
Action	Used to indicate whether the request type is created for refund or write off. The valid values are: • Refund • Write Off	Yes
Minimum Refund Amount	Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Refund** option is selected from the **Action** list.	
Write Up Adjustment Type	Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount. **Note:** The **Search** (🔍) icon appears corresponding to the **Write Up Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Write Up Adjustment Type** field. This field appears when the **Refund** option is selected from the **Action** list. You can create the write up adjustments (only using those adjustment types) where the **A/P Request Type Code** option is not set to **Refund**.	Yes
Approval Required	Used to indicate whether approval is required while creating a refund or write off adjustment using the refund or write off request type.	No
Approval Profile	Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the refund or write off amount of the debit or credit bill falls within the threshold limit. **Note:** This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while adding or updating a refund or write off adjustment using the refund or write off request type. **Note:** This field appears when the **Approval Required** option is selected.	No
Refund Adjustment Type	Used to indicate the adjustment type using which refund adjustment must be created. By default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request. **Note:** The **Search** (🔍) icon appears corresponding to the **Refund Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Refund Adjustment Type** field. This field appears when the **Refund** option is selected from the **Action** list. You can create refund adjustments (only using those adjustment types) where the **A/P Request Type Code** option is set to **Refund**.	
Write Off Adjustment Type	Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change the adjustment type, if required, while editing a write off request. **Note:** The **Search** (🔍) icon appears corresponding to the **Refund Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Refund Adjustment Type** field. This field appears when the **Write Off** option is selected from the **Action** list. You can create write off adjustments (only using those adjustment types) where the **A/P Request Type Code** option is not set to **Refund**.	Yes
Netting Contract Type	Used to indicate the contract type used for netting transactions while processing refunds or write-offs.	No

6. Enter the required details in the **Main** section.
7. Define characteristics for the refund or write off request type, if required.
8. Click **Save**.
   The refund or write off request type is defined.

How to define a characteristic for a refund or write off request type	Defining a Characteristic for a Refund or Write Off Request Type on page 2736

Defining a Characteristic for a Refund or Write Off Request Type

Prerequisites

To define a characteristic for a refund or write off request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund/Write Off Request Type**)

Procedure

To define a characteristic for a refund or write off request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a refund or *w*rite off request type.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Refund/Write Off Request Type**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the refund or write off request type.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the refund or write off request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the refund or write off request type, click the **Add** (+) *i*con and then repeat step *2*.

   Note: However, if you want to remove a characteristic from the refund or write off request type, click the **Delete** (🗑) icon corresponding to the characteristic.

Editing a Refund or Write Off Request Type

Prerequisites

To edit a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type code defined in the application

Procedure

To edit a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.
   The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding *t*o the refund or write off request type whose details you want to edit.

   The **Refund/Write Off Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details for the refund or write off request type.
   - **Characteristics** - Used to define the characteristics for the refund or write off request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Displays the refund or write off request type.	Not applicable
Business Object	Indicates the business object which is used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object using which you want to create the respective refund or write off request. The valid values are: • **Refund Request (i.e. C1-RefundReq)** - Enables you to refund the bills and payments using a refund request type. • **Refund Request - Display BO (i.e. C1-RefundReq2** - Enables you to display the details of a refund request type. • **Write Off Request (i.e. C1-WORequest)** - Enables you to write off the bills using a write off request type. • **Write Off Request - Display BO (i.e. C1-WORequest2)** - Enables you to display the details of a write off request type.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	Used to indicate the status of the refund or write off request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a refund or write off request type to **Inactive** if there are refund or write off requests which are created using the refund or write off request type and are currently in the **Draft** or **Approval In Progress** status.	Yes
Action	Indicates whether the request type is created for refund or write off. The valid values are: • Refund • Write Off **Note:** It is a read-only field.	Not applicable
Minimum Refund Amount	Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment. **Note:** This field appears when the **Refund** option is selected from the **Action** list.	Yes
Write Up Adjustment Type	Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount. **Note:** The **Search** (🔍) icon appears corresponding to the **Write Up Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Write Up Adjustment Type** field. This field appears when the **Refund** option is selected from the **Action** list. You can create the write up adjustments (only using those adjustment types) where the **A/P Request Type Code** option is not set to **Refund**.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required while creating a refund or write off adjustment using the refund or write off request type.	No
Approval Profile	Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the refund or write off amount of the debit or credit bill falls within the threshold limit. **Note:** This field appears when the **Approval Required** option is selected.	Yes (Conditional) **Note:** This field is required when the **Approval Required** option is selected.
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while adding or updating a refund or write off adjustment using the refund or write off request type. **Note:** This field appears when the **Approval Required** option is selected.	No
Refund Adjustment Type	Used to indicate the adjustment type using which refund adjustment must be created. By default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request. **Note:** The **Search** (🔍) icon appears corresponding to the **Refund Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Refund Adjustment Type** field. This field appears when the **Refund** option is selected from the **Action** list. You can create refund adjustments (only using those adjustment types) where the **A/P Request Type Code** option is set to **Refund**.	Yes
Write Off Adjustment Type	Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change the adjustment type, if required, while editing a write off request. **Note:** The **Search** (🔍) icon appears corresponding to the **Refund Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
	On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Refund Adjustment Type** field. This field appears when the **Write Off** option is selected from the **Action** list. You can create write off adjustments (only using those adjustment types) where the **A/P Request Type Code** option is not set to **Refund**.	
Netting Contract Type	Used to indicate the contract type used for netting transactions while processing refunds or write-offs.	No

Tip: Alternatively, you can click the **Edit** button in the **Refund/Write Off Request Type** zone to edit the details of the refund or write off request type.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the refund or write off request type, if required.
7. Click **Save**.
   The changes made to the refund or write off request type are saved.

Copying a Refund or Write Off Request Type

Instead of creating a refund or write off request type from scratch, you can create a new refund or write off request type using an existing refund or write off request type. This is possible through copying a refund or write off request type. On copying a refund or write off request type, the details including the characteristics are copied to the new refund or write off request type. You can then edit the details, if required.

Prerequisites

To copy a refund or write off request type, you should have:

- Refund or Write Off request type (whose copy you want to create) defined in the application
- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type code defined in the application

Procedure

To copy a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.
   A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.
   A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.
   The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Duplicate** (⧉) icon in the **Duplicate** column corresponding to the refund or write off request type whose copy you want to create.

   The **Refund/Write Off Request Type** screen appears. It contains the following sections:

   - **Main** - Used to specify basic details for the refund or write off request type.
   - **Characteristics** - Used to define the characteristics for the refund or write off request type.

   The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Used to specify the refund or write off request type.	Yes
Business Object	Indicates the business object which is used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object using which you want to create the respective refund or write off request. The valid values are: • **Refund Request (i.e. C1-RefundReq)** - Enables you to refund the bills and payments using a refund request type. • **Refund Request - Display BO (i.e. C1-RefundReq2** - Enables you to display the details of a refund request type. • **Write Off Request (i.e. C1-WORequest)** - Enables you to write off the bills using a write off request type. • **Write Off Request - Display BO (i.e. C1-WORequest2)** - Enables you to display the details of a write off request type.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	Used to indicate the status of the refund or write off request type. The valid values are: • Active • Inactive **Note:** You cannot change the status of a refund or write off request type to **Inactive** if there are refund or write off requests which are created using the refund or write off request type and are currently in the **Draft** or **Approval In Progress** status.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Action	Used to indicate whether the request type is created for refund or write off. The valid values are: • Refund • Write Off	Yes
Minimum Refund Amount	Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment. **Note:** This field appears when the **Refund** option is selected from the **Action** list.	Yes
Write Up Adjustment Type	Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount. **Note:** The **Search** (🔍) icon appears corresponding to the **Write Up Adjustment Type** field. On clicking the **Search** icon, the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Write Up Adjustment Type** field. This field appears when the **Refund** option is selected from the **Action** list. You can create the write up adjustments (only using those adjustment types) where the **A/P Request Type Code** option is not set to **Refund**.	Yes
Approval Required	Used to indicate whether approval is required while creating a refund or write off adjustment using the refund or write off request type.	No

Refund/Write Off Request (Used for Searching)

The **Refund/Write Off Request** screen allows you to search for a refund or write off request using various search criteria. It also allows you to create a refund or write off request. It contains the following zone:

- Search Refund/Write Off Request on page 2746

Through this screen, you can navigate to the following screens:

- Refund Request (Used for Viewing) on page 2758
- Write Off Request (Used for Viewing) on page 2795

Search Refund/Write Off Request

The **Search Refund/Write Off Request** zone allows you to search for a refund and write off request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a refund or write off request using the request, payment, or bill details. The valid values are: • Request Details • Payment Details • Bill Details **Note:** By default, the **Request Details** option is selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Action	Used to indicate whether you want to search for a refund or write off request. The valid values are: • Refund • Write Off **Note:** This field appears when the **Request Details** or **Bill Details** option is selected from the **Search By** list.	No
Refund/Write Off Request Type	Used to search for refund or write off requests which are created using a particular refund or write off request type. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The list includes only those refund or write off requests types which are already defined in the system. The values appear in this list when the respective refund or write off type is selected from the **Action** list.	No
Status	Used to search for refund or write off requests with a particular status. The valid values are: • Approval In Progress • Cancelled • Deferred Cancel • Deferred Processing • Deferred Void • Draft • Hold • Processed • Rejected • Voided **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. **Tip:** The **Voided** status is applicable when you want to search a refund request whereas the **Cancelled** status is applicable when you want to search a write off request.	No
User ID	Used to search for refund or write off requests which are created by a particular user. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The **Search**( ) icon appears corresponding to this field. On clicking the **Search** icon the **User Search** window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request ID	Used to search a particular refund or write off request. **Note:** This field appears when you select the **Request Details** option from the **Search By** list.	No
Creation From Date	Used to search for refund or write off requests which are created on or after the specified date. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field. Simultaneously, you can also specify the time or select it using the **Time Picker** icon corresponding to the field. The creation from date cannot be later than the created to date.	No
Account ID	Used to search for refund or write off requests which include the bills of a particular account. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. The **Search** icon appears corresponding to this field. On clicking the Search icon the **Account Search** window appears.	No
Created To	Used to search for refund or write off requests which are created till a specified date. **Note:** This field appears when the **Request Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** icon corresponding to the field. Simultaneously, you can also specify the time or select it using the **Time Picker** icon corresponding to the field. The created to date cannot be earlier than the creation from date.	No
Payment Event ID	Used to search for refund requests (through which a payment event is created) for refund purposes. **Note:** This field appears when the **Payment Details** option is selected from the **Search By** list.	No

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon the **Payment Event Search** window appears.	
Payor Account ID	Used to search for refund requests which are created for a particular payor account. **Note:** This field appears when the **Payment Details** option is selected from the **Search By** list. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon the **Account Search** window appears.	No
Payor Name	Used to search for refund requests which are created for a particular payor. **Note:** This field appears when the **Payment Details** option is selected from the **Search By** list.	No
Payment Date	Used to search for refund requests which include payments made on a particular date. **Note:** This field appears when the **Payment Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	No
MICR ID	Used to search for refund requests which include payments made with a particular MICR code. **Note:** This field appears when the **Payment Details** option is selected from the **Search By** list.	No
Check Number	Used to search for refund request which include payments made through a particular check number. **Note:** This field appears when the **Payment Details** option is selected from the **Search By** list.	No
Bill ID	Used to search for refund or write off requests which include bill segments or adjustments of a particular bill. **Note:** This field appears when the **Bill Details** option is selected from the **Search By** list. The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon the **Bill Search** window appears.	No
Bill Date From	Used to search for refund or write off requests which include bill segments or adjustments which are generated on or after the specified date.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when the **Bill Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The bill date from date cannot be later than the bill date to date.	
Bill Date To	Used to search for refund or write off requests which include bill segments or adjustments which are created till a specified date. **Note:** This field appears when the **Bill Details** option is selected from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The bill date to date cannot be earlier than the bill date from date.	No

Note: You must specify at least one search criterion while searching for a refund or write off request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the refund or write off request is created.
Refund/Write Off Request Information	Displays information about the refund or write off request. **Note:** It has a link. On clicking the link, the **Refund Request** or **Write Off Request** screen appears where you can view the details of the respective request.
Status	Indicates the status of the refund or write off request. The valid values are: • Approval In Progress • Cancelled • Deferred Cancel • Deferred Processing • Deferred Void • Draft • Hold • Processed • Rejected • Voided
Action	Indicates whether the request is created for refund or write off. The valid values are:

Column Name	Column Description
	• Refund • Write Off **Note:** This column appears when the **Request Details** or **Bill Details** option is selected from the **Search By** list.
Refund/Write Off Amount	Displays the total refund or write off amount. **Note:** This column appears when the **Request Details** or **Bill Details** option is selected from the **Search By** list.
Refund Amount	Displays the total amount available for refund. **Note:** This column appears when the **Payment Details** option is selected from the **Search By** list.
Account Information	Displays additional information about the account for which the refund or write off request is created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Created By	Indicates the user who has created the refund or write off request.

Note: Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

Searching for a Refund or Write Off Request

Prerequisites

To search for a refund or write off request, you should have:

- Refund or Write Off request types defined in the application

Procedure

To search for a refund or write off request:

1. Click the **Menu** link in the **Application** toolbar.
   A list appears.
2. From the **Main** menu, select **Accounting and Receivable** and then click **Refund/Write Off Request**.
   A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request** sub-menu.
   The **Refund/Write Off Request** screen appears.
4. Enter the search criteria in the **Search Refund/Write Off Request** zone depending on whether you want to *s*earch for a refund or write off request.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of refund or write off requests that meet the search criteria appears in the **Search Results** section.

Creating a Refund Request

Prerequisites

To create a refund request, you should have:

- Refund request types defined in the application.
- Adjustment types defined in the application where the **A/P Request Type Code** flag is set to **Refund**.

Procedure

To create a refund request:

1. Do either of the following:

If you want to...	Then...
Define a refund request from the Account Receivable Central screen	**a.** Click the **Main** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Account Receivable Central**. **c.** Search for the bill in the **Account Receivable Central** screen. **d.** In the **Search Results** section, select the respective bill and then click the **Refund** button. **Note:** You can select only one bill at a time (where the outstanding balance is non-zero) while creating a refund request from the **Account Receivable Central** screen.
Define a refund request from the Refund Request screen	**a.** Click the **Main** link in the **Application** toolbar. A list appears.

If you want to...	Then...
	b. From the **Main** menu, select **Accounting and Receivable** and then click **Refund/Write Off Request**. A sub-menu appears. **c.** Click the **Add** option from the **Refund/Write Off Request** sub-menu.
Define a refund request from the Payment Event Summary screen	**a.** Click the **Main** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Payments** and then click **Payment Event Summary**. **c.** Search for the payment event (whose payments you want to refund) in the **Payment Event Summary** screen. **d.** In the **Search Results** section, click the **Broadcast** (ᯤ) icon corresponding to the payment event whose payments you want to view. The **Payments** zone appears. **e.** Select the option corresponding to the payments that you want to refund. **f.** Click the **Refund** button in the **Payments** zone. **Note:** The system allows you to refund only those payments which are in the **Frozen** status and are matched against the suspense or excess credit contract.

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	Used to indicate the type of request that you want to create. The valid values are: • Refund • Write Off **Note:** If you are creating a refund request (for a bill or payment) through the **Account Receivable Central** or **Payment Event Summary** screen, the system by default sets the action to **Refund** and the field is non-editable. This field is editable only when the refund request is created from the **Refund/Write Off Request** screen.	Not applicable
Refund/Write Off Request Type	Used to indicate the request type using which you want to create the refund request. **Note:** The refund request types appear only when the **Refund** option is selected from the **Action** list. On selecting the respective action from the **Action** list, the **Refund or Write Off Request Type** list is populated.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account	Used to indicate the account for which you want to create the refund request. **Note:** If you are creating a refund request (for a bill or payment) via the **Account Receivable Central** or **Payment Event Summary** screen, the system by default sets the action to **Refund** and the field is non-editable. This field is editable if the refund request is created from the **Refund/Write Off Request** screen. The **Search** icon appears corresponding to this field. On clicking the **Search** icon the **Account Search** window appears. On specifying the account, the description of the account appears corresponding to the **Account** field.	Yes
Adjustment Level	Used to indicate the adjustment level for which you want to create the refund request. **Note:** If you are creating a refund request (for a bill or payment) via the **Account Receivable Central** or **Payment Event Summary** screen, the system by default sets the action to **Refund** and the field is non-editable. By default, this field is disabled.	No

Tip: Alternatively, you can access the **Select Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request** screen.

2. Select the required refund request type from the respective field.
3. Click **Save**.
   The refund request is created and the status of the refund request is set to **Draft**. The **Refund/Write Off Request** screen appears with the details of the refund request.

   Note: The refund request is created only for those outstanding bills where the outstanding amount is less than zero.
4. Override the address if you want to send the refund amount to a different address other than the address of the account's main customer, if required.
5. Add the payments, payment events, or credit bill line items which you want to refund, if required.
6. Edit the refund amount of the respective entity, if required.
7. Define characteristics for the refund request, if required.

Creating a Write Off Request

Prerequisites

To create a write off request, you should have:

- Write off request types defined in the application.
- Adjustment types defined in the application where the **A/P Request Type Code** flag is not set to **Refund**.

Procedure

To create a write off request:

1. Do either of the following:

If you want to...	Then...
Define a write off request from the Account Receivable Central screen	**a.** Click the **Main** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Account Receivable Central**. **c.** Search for the bill in the **Account Receivable Central** screen. **d.** In the **Search Results** section, select the respective bill and then click **Write Off** button. **Note:** You can select only one bill at a time (where the outstanding balance is non-zero) while creating a write off request from the **Account Receivable Central** screen.
Define a write off request from the Write Off Request screen	**a.** Click the **Main** link in the **Application** toolbar. A list appears. **b.** From the **Main** menu, select **Accounting and Receivable** and then click **Refund/Write Off Request**.

If you want to...	Then...
	A sub-menu appears. **c.** Click the **Add** option from the **Refund/Write Off Request** sub-menu.

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	Used to indicate the type of request which you want to create. The valid values are: • Refund • Write Off **Note:** If you are creating a write off request for a bill through the **Account Receivable Central** screen, the system by default sets the action to **Write Off** and the field is non-editable. This field is editable only when the write off request is created from the **Refund/Write Off Request** screen.	Yes
Refund/Write Off Request Type	Used to indicate the request type using which you want to create the write off request. **Note:** The write off request types appear only when the **Write Off** option is selected from the **Action** list. On selecting the respective action from the **Action** list, the **Refund or Write Off Request Type** list is populated.	Yes
Account	Used to indicate the account for which you want to create the write off request. **Note:** If you are creating a write off request for a bill through the **Account Receivable Central** screen, the system by default sets the action to **Write Off** and the field is non-editable. This field is editable only when the write off request is created from the **Refund/Write Off Request** screen. The **Search** (🔍) icon appears corresponding to the respective field. On clicking the **Search** icon the **Account Search** window appears. On specifying the account, the description of the account appears corresponding to the **Account** field.	Yes
Adjustment Level	Used to indicate the adjustment level for which you want to create the write off request.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: If you are creating a write off request for a bill through the **Account Receivable Central** screen, the system by default sets the action to **Write Off** and the field is non-editable. By default, this field is disabled.	

Tip: Alternatively, you can access the **Select Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request** screen.

2. Select the required write off request type and account from the respective field.
3. Click **Save**.

   The write off request is defined and the status of the write off request is set to **Draft**. The **Write Off Request** screen appears with the details of the write off request.

   Note: The write off request is created only for those outstanding bills where the outstanding amount is greater than zero.
4. Edit or delete the write off details or debit bill line items from the write off request, if required.
5. Edit the adjustment level for the write off request, if required.
6. Define characteristics for the write off request, if required.

Refund Request (Used for Viewing)

Once you create a refund request, the **Refund Request** screen allows you to:

- Edit and delete a refund request
- View the details of a refund request
- Submit a refund request for approval
- Approve or reject a refund request
- View the log of a refund request
- Add a log entry for a refund request
- Void a refund request

This screen consists of the following tabs:

- Refund Request - Main on page 2759
- Refund Request - Bills on page 2764

Note: The **Bills** tab appears only when the refund request is in the **Draft** status.

- Refund Request - Payments and Adjustments on page 2767

Note: The **Payments and Adjustments** tab appears only when the refund request is in the **Draft** status.

- Refund Request - Log on page 2772

Refund Request - Main

The **Main** tab displays information about the refund request. It contains the following zones:

- Refund Request on page 2759
- Refund Details on page 2761

Note: The **Refund Details** zone appears when the refund request is in **Draft** status and the total refund amount is greater than zero.

- Bill Line Items on page 2763

Refund Request

The **Refund Request** zone displays the details of the refund request. This zone contains the following sections:

- **Main** - Displays the basic information about the refund request. It contains the following fields:

Field Name	Field Description
Refund Request Information	Displays information about the refund request.
Refund Request Type	Indicates the refund request type using which the refund request is created. **Note:** It has a link. On clicking the link, the **Refund/Write Off Request Type** screen appears where you can view the details of the respective refund request type.
Status	Indicates the status of the refund request. The valid values are: • Approval In Progress • Cancelled • Deferred Cancel • Deferred Processing • Deferred Void • Draft • Hold • Processed • Rejected • Voided
Status Reason	Indicates the reason why the refund request is rejected or voided. **Note:** It has a link. On clicking the link, the **Status Reason** screen appears where you can view the details of the rejected or voided reason. This field appears when the refund request is in either **Rejected** or **Voided** status.

Field Name	Field Description
Adjustment Level	Indicates the adjustment level for which you want to create the refund request.
Account Information	Indicates the account for which the refund request is created. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective account.
Person Name	Indicates the person for whom the refund request is created.
Override Address	Indicates whether the account's mailing address is overridden.
Address 1	Displays the house number and apartment name.
Address 2	Displays the street name.
Address 3	Indicates the landmark, if available.
Address 4	Displays the village or town name.
City	Displays the city name.
State	Displays the state name.
Country	Displays the country name.
Postal	Displays the postal or zip code.
Comments	Displays additional information about the refund request.
Total Refund Amount	Displays the total refund amount.

- **Characteristics** - Lists the characteristics defined for the refund request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the refund request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the refund request. **Note:** The **Edit** button appears when the refund request is in the **Draft** status.
Delete	Used to delete the refund request. **Note:** The **Delete** button appears when the refund request is in the **Draft** status.
Submit	Used to submit the refund request for approval. **Note:** The **Submit** button appears when the refund request is in the **Draft** status.
Approve	Used to approve the refund request. **Note:** The **Approve** button appears when: • The refund request is in the **Approval In Progress** status.

Button Name	Button Description
	• A user with the approval To Do role is reviewing the refund request.
Reject	Used to reject the refund request. **Note:** The **Reject** button appears when: • The refund request is in the **Approval In Progress** status. • A user with the approval To Do role is reviewing the refund request.
Void	Used to void the refund request. **Note:** The **Void** button appears when the refund request is in the **Processed** status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the refund request is created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Business Object** screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the refund request status is updated
Create Date/Time	Displays the date and time when the refund request is created.

- **Characteristics** - Lists the characteristics of the refund request. It contains the following columns:

Column Name	Column Description
Effective Date	Indicates the date from when the characteristic is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Refund Details

The **Refund Details** zone lists the payment events, payments, and credit bill line items (such as bill segments and adjustments) that you have added to the refund request. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the entity ID.
Entity Type	Indicates whether the entity is a payment, payment event, bill, bill segment, or an adjustment.
Currency	Indicates the currency in which the entity was created.
Entity Amount	Displays the entity amount.
Refund Amount	Displays the amount that must be refunded. **Note:** By default, the amount which is eligible for refund appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount.

Column Name	Column Description
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created or against which the payment is matched. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created. **Note:** By default, the adjustment type specified in the refund request type appears in this column. You can change the adjustment type, if required, by editing the refund request.
Adjustment Information	Displays additional information about the refund adjustment. **Note:** It has a link. On clicking the link, the **Adjustment** screen appears where you can view the details of the respective adjustment. Data in this column appears only when the refund request is in the **Processed** status. The information string appears when an algorithm of the **C1-ADI-INFO** algorithm type is attached to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
Bill Information	Displays additional information about the bill. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Bill** screen appears with the details of the respective bill. Data in this column appears only when the refund request is in the **Processed** status and the entity type is **Bill**.
Payment Refunded	Displays the refunded amount. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Payment** screen appears with the details of the respective bill. Data in this column appears only when the refund request is in the **Processed** status and the entity type is either **Payment** or **Payment Event**.

In addition, this section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

A check box appears corresponding to each refund record. To update the details of a refund record, select the check box corresponding to the refund record and then click the **Edit** button. You can also select multiple refund records at the same time. You can select one or more refund records and click either the **Edit** or **Delete** button in this zone to perform the respective action. In addition, you can select the check box corresponding to the column header. This allows you to select all the refund records listed in the respective zone.

To delete a refund request, select the check box corresponding to the refund record and click the **Delete** button. You can also select multiple refund records at the same time.

You can filter the list using the **Entity Type** and **Entity Amount** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (⩛) icon in the upper right corner of this zone.

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill, bill segment, or an adjustment.
Currency	Displays the currency in which the entity was created.
Entity Amount	Displays the bill segment or adjustment amount.
Request Amount	Displays the bill segment or adjustment amount which is eligible for refund. The system calculates the request amount using the following formula: `Request Amount = Entity Amount-Refund Amount` **Note:** In case the bill segment or adjustment has a debit balance, the eligible amount for refund would be zero.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created. **Note:** It has a link. On clicking the link, the **Adjustment Type** screen appears where you can view the details of the respective adjustment type.
Adjustment Information	Displays information about the write off adjustment. **Note:** It has a link. On clicking the link, the **Adjustment** screen appears where you can view the details of the respective adjustment.

Column Name	Column Description
	The data appears in this column only when the status of the write off request is **Processed**. The information string appears when an algorithm of the **C1-ADI-INFO** algorithm type is attached to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

By default, the **Bill Line Items** zone does not appear in the **Refund Request** screen. It appears only when you click the **Broadcast** (⌔) icon in the **Refund Details** zone corresponding to the entity type where the entity type is set to **Bill**.

A check box appears corresponding to each bill line item. To add a bill line item to the refund request, click the check box corresponding to the bill line item and click the **Add** button. You can also select multiple bill line items at the same time. In addition, you can select the check box corresponding to the column header. This allows you to select all the bill line items listed in the respective zone. For more information, see Adding a Credit Bill Line Item to the Refund Request on page 2779

You can filter the list using the **Entity Type** and **Entity Amount** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (⍒) icon in the upper right corner of this zone.

Refund Request - Bills

The **Bills** tab allows you to search bills with credit line items such as credit bill segments and adjustments that you want to refund. It contains the following zones:

- Search Bills on page 2764
- Bill Line Items on page 2766

Search Bills

The **Search Bills** zone allows you to search for bills using various search criteria. It also lists the completed bills of the account which either have a credit balance or one or more credit line items, such as bill segments and adjustments. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a bill using bill or bill and price item details. The valid values are: • Bill Details	Yes

Field Name	Field Description	Mandatory (Yes or No)
	• Bill and Price Item Details **Note:** By default, the **Bill Details** option is selected.	
Bill ID	Used to search a particular bill. **Note:** The **Search** icon appears corresponding to the **Bill ID** field. On clicking the **Search** icon the **Bill Search** window appears.	No
Bill Date From	Used to search for bills which are created on or after the specified date. **Note:** You can either manually specify the date or select it using the **Date Picker** (icon) corresponding to the field. The bill date from date cannot be later than the bill date to date.	No
Bill Date To	Used to search for bills which are created till a particular date. **Note:** You can either manually specify the date or select it using the **Date Picker** (icon) corresponding to the field. The bill date to date cannot be earlier than the bill date from date.	No
Price Item	Used to search for bills which are created for a particular price item. **Note:** This field appears when you select **Bill and Price Item Details** option from the **Search By** list. You can search for a price item by clicking the **Search** (icon) corresponding to the **Price Item** field. On clicking the **Search** icon the **Price Item Search** window appears.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, a context menu (icon) appears corresponding to this field which helps in navigating to other screens in the application.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Bill** screen appears with the details of the respective bill.
Amount	Displays the total amount of the bill.

In addition to above columns, this screen contains following button:

Button Name	Button Description
Add	Used to add a bill to the refund request.

Note:

On clicking the **Broadcast** ( ) icon corresponding to the bill, the **Bill Line Items** zone appears where you can view the details of the respective bill.

A check box appears corresponding to each bill. To add a bill to the refund request, click the check box corresponding to the payment and click the **Add** button. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to select all the bills listed in the respective zone. For more information, see Adding a Credit Bill to the Refund Request on page 2777

If you want to refund a bill with a credit balance (including all the credit line items of the respective bill) you need to select the check box corresponding to the bill and click the **Add** button in the **Search Results** section. The system adds all the credit bill segments and bill adjustments to the **Refund Details** zone in the **Main** tab of the **Refund Request** screen. However, if you select a bill (with a credit balance) which contains one or more debit line items or if you select a bill (with a debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items in the refund request directly by adding the bill. In such case, you need to individually select the credit bill segments and bill adjustments, and add them in the **Refund Details** zone in the **Main** tab of the **Refund Request** screen.

If a debit bill appears in the **Search Results** section which contains one or more debit line items where the eligible amount is zero, the system does not add such a bill to the **Refund Details** zone in the **Main** tab of the **Refund Request** screen.

If a refund request is currently in progress for a credit bill segment or adjustment of a bill, then the bills of the respective account do not appear in the **Search Bills** zone. In addition, a bill with all debit line items do not appear in the **Search Bills** zone.

Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments, and the adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. In addition, a context menu ( ) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** The content menu appears only when the entity is a bill segment.

Column Name	Column Description
	It has a link. If the entity is a bill segment, the **Bill Segment** screen appears where you can view the details of the respective bill segment. However, if the entity is an adjustment, the **Adjustment** screen appears where you can view the details of the respective adjustment.
Entity Amount	Displays the bill segment or adjustment amount.
Eligible Amount	Displays the bill segment or adjustment amount which is eligible for refund. The system calculates the eligible amount using the following formula: `Eligible Amount = Entity Amount-Amount Refunded` **Note:** If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Amount Refunded	Displays the amount which is already refunded to the account.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, a context menu (⌄) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Contract** screen appears where you can view the details of the respective contract.

Button Name	Button Description
Add	Used to add a bill line item to the refund request.

Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

A check-box appears corresponding to each bill line item. To add a bill line item to the refund request, click the check box corresponding to the bill line item and click the **Add** button. You can also select multiple bill line items at the same time. In addition, you can select the check box corresponding to the column header. This allows you to select all the bill line items listed in the respective zone. For more information, see Adding a Credit Bill Line Item to the Refund Request on page 2779

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast** (⌔) icon corresponding to the bill in the **Search Bills** zone.

You can filter the list using the **Bill Segment Date From** and **To** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Refund Request - Payments and Adjustments

The **Payments and Adjustments** tab allows you to search for payment events or individual payments that you want to refund using various search criteria. It contains the following zones:

- Search Payment Events and Adjustments on page 2768
- Payments and Adjustments on page 2771

Search Payment Events and Adjustments

The **Search Payment Events and Adjustments** zone allows you to search for payment events and adjustments using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for payment events or adjustments using the payment or adjustment details. The valid values are: • Payment Details • Adjustment Details **Note:** By default, the **Payment Details** option is selected.	Yes
Payment Event ID	Used to search for payment events which are created using a particular payment event ID. **Note:** This field appears when you select **Payment Details** option from the **Search By** list.	No
Suspense/Excess Credit Contract	Used to search for payment events which include payments that are made against a particular suspense or excess credit contract. **Note:** The suspense and excess credit contracts appear in the **Suspense/Excess Credit Contract** list only when these contracts are associated with the account. This field appears when you select **Payment Details** option from the **Search By** list.	No
Check Number	Used to search for a payment event which includes a payment made through a particular check. **Note:** This field appears when you select **Payment Details** option from the **Search By** list.	No
Payment Date From	Used to search for payment events which include payments created from a particular date onwards. **Note:** This field appears when you select **Payment Details** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The payment date from date cannot be later than the payment date to date.	No
MICR ID	Used to search for payment events which include payments which contain a particular MICR code.	No

Field Name	Field Description	Mandatory (Yes or No)
	Note: This field appears when you select **Payment Details** option from the **Search By** list.	
Payment Date To	Used to search for payment events which include payments created till a particular date. **Note:** This field appears when you select **Payment Details** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The payment date to date cannot be earlier than the payment date from date.	No
Adjustment ID	Used to search for adjustments with a particular adjustment ID. **Note:** This field appears when you select **Adjustment Details** option from the **Search By** list. The **Search** icon appears corresponding to this field. On clicking the **Search** icon the **Adjustment Search** window appears.	No
Adjustment Type	Used to search for adjustments which are created using a particular adjustment type. **Note:** This field appears when you select **Adjustment Details** option from the **Search By** list.	Yes
Account ID	Used to search for adjustments which are created for a particular account ID. **Note:** This field appears when you select **Adjustment Details** option from the **Search By** list. The **Search** icon appears corresponding to this field. On clicking the Search icon the **Account Search** window appears.	No
Contract ID	Used search for adjustments which are created for an account linked with a particular contract ID. **Note:** This field appears when you select **Adjustment Details** option from the **Search By** list. The **Search** icon appears corresponding to this field. On clicking the Search icon the **Contract Search** window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Creation Date From	Used to search for adjustments which include refund adjustments created from a particular date onwards. **Note:** This field appears when you select the **Adjustment Details** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The creation date from date cannot be later than the creation date to date.	No
Creation Date To	Used to search adjustment which include refund adjustments created till a particular date. **Note:** This field appears when you select the **Adjustment Details** option from the **Search By** list. You can either manually specify the date or select it using the **Date Picker** ( ) icon corresponding to the field. The creation date to date cannot be earlier than the creation date from date.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Payment Event	Indicates the payment event whose frozen payments you want to refund. **Note:** It has a link. On clicking the link, the **Payment Event** screen appears where you can view the details of the respective payment event. This column appears when you select the **Payment Details** option from the **Search By** list.
Payment Date	Displays the date when the payment event was created. **Note:** This column appears when you select the **Payment Details** option from the **Search By** list.
Tender Amount	Displays the tender amount associated with the payment event. **Note:** This column appears when you select the **Payment Details** option from the **Search By** list.
Payment Event ID	Displays the event ID associated with each payment event ID. **Note:** This column appears when you select the **Payment Details** option from the **Search By** list.
Adjustment ID	Display the adjustment ID associated with each adjustment transaction.

Column Name	Column Description
	Note: This column appears when you select the **Adjustment Details** option from the **Search By** list.
Creation Date	Displays the date when the adjustment is created. **Note:** This column appears when you select the **Adjustment Details** option from the **Search By** list.
Adjustment Information	Displays the additional information about the adjustment. **Note:** This column appears when you select the **Adjustment Details** option from the **Search By** list. It has a link. On clicking the link, the **Adjustment** screen appears with the details of the respective adjustment.
Current Amount	Displays the adjustment amount. **Note:** This column appears when you select the **Adjustment Details** option from the **Search By** list.

Button Name	Button Description
Add	Used to add a payment event to the refund request.

On clicking the **Broadcast** (((•))) icon corresponding to the payment event, the **Payments and Adjustment** zone appears where you can view the details of the respective payment event.

Note:

A check box appears corresponding to each payment event. To add the payments of a payment event to the refund request, select the check box corresponding to the payment event and then click the **Add** button. You can also select multiple payment events at the same time. You can select one or more payment events and click the **Add** button in this zone to add selected payment events to the refund request. In addition, you can select the check box corresponding to the column header. This allows you to select all the payment events listed in the respective zone. For more information, see Adding a Payment Event to the Refund Request on page 2774

Once you click the **Add** button, the system checks whether all the payments in the payment event are matched against the same suspense or excess credit contract, then the respective payment event is added in the **Refund Details** zone on the **Main** tab of the **Refund Request** screen. However, if the payments in the payment event are matched against different suspense or excess credit contracts, then all the payments of the payment event are added in the **Refund Details** zone on the **Main** tab of the **Refund Request** screen

If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account do not appear in the **Search Payment Event** zone.

Payments and Adjustments

The **Payments and Adjustments** zone lists only those payments which are created through the payment event and are currently in the **Frozen** status. This zone contains the following columns:

Column Name	Column Description
Payment ID	Indicates the payment to which the payment event is associated.

Column Name	Column Description
	Note: It has a link. On clicking the link, the **Payment** screen appears where you can view the details of the respective payment.
Payee Account	Indicates the account through which the payment is made. In addition, a context menu (⊙) icon appears corresponding to this field which helps in navigating to other screens in the application. **Note:** It has a link. On clicking the link, the **Account** screen appears where you can view the details of the respective payee account.
Payment Amount	Displays the amount which is applied on the suspense or excess credit contracts.
Payment Currency	Indicates the currency in which the payment was made.
Payment Status	Indicates the status of the payment. The valid values are: • Incomplete • Error • Freezable • Frozen • Canceled
Match Type	Indicates the match type using which the payment is matched.
Match Value	Indicates the entity (such as bill, bill segment, or contract) against which the payment is matched.
Amount Refunded	Displays the amount which is already refunded to the payor account.

Button Name	Button Description
Add	Used to add a payment or an adjustment to the refund request.

Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages. Note that the navigation links appear in the **Search Results** section only when the records in the search results exceed 20.

A check box appears corresponding to each payment. To add a payment to the refund request, click the check box corresponding to the payment and click the **Add** button. You can also select multiple payments at the same time. You can select one or more payments and click the **Add** button in this zone to add the selected payments to the refund request. In addition, you can select the check box corresponding to the column header. This allows you to select all the payments listed in the respective zone. For more information, see Adding a Payment to the Refund Request on page 2776

By default, the **Payments** zone does not appear in the **Payments** tab. It appears when you click the **Broadcast** (📡) icon corresponding to the payment event in the **Search Payment Events and Adjustments** zone.

You can filter the list using the **Payee Name** and **Payment Amount** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (▽) icon in the upper right corner of this zone.

Refund Request - Log

The **Log** tab contains the following zone:

- Refund Request Log on page 2773

Refund Request Log

The **Refund Request Log** zone lists the complete trail of actions performed on the refund request. This zone contains the following columns:

Column Name	Column Description
Creation Date/Time	Displays the date and time when the action was performed on the refund request.
Details	Displays the details about the action performed on the refund request.
User	Indicates the user who has performed the action on the refund request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the refund request. **Note:** At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the refund request is rejected.

Note: You can manually add a log entry for the refund request by clicking the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

Defining a Characteristic for a Refund Request

Prerequisites

To define a characteristic for a refund request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund/Write Off Request**)

Procedure

To define a characteristic for a refund request:

1. Ensure that the **Characteristics** section is expanded when you are editing the refund request.

   The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the refund request. **Note:** You can either manually specify the date or select it using the **Date Picker** (📅) icon corresponding to the field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic

Field Name	Field Description	Mandatory (Yes or No)
		for the refund request.
Characteristic Type	Used to indicate the characteristic type. **Note:** The list includes only those characteristic types where the characteristic entity is set to **Refund Write Off Request**.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the refund request.
Characteristic Value	Used to specify the value for the characteristic type. **Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, the **Predefined Characteristic Search** window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the **Characteristic Value** field.	Yes (Conditional) **Note:** This field is required when you are defining a characteristic for the refund request.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the refund request, click the **Add** (+) icon and *t*hen repeat step 2.

Note: However, if you want to remove a characteristic from the refund request, click the **Delete** (🗑) icon corresponding to the characteristic.

Adding a Payment Event to the Refund Request

Prerequisites

To add a payment event to the refund request, you should have:

- Payment and payment events created in the application.

Procedure

To add a payment event to the refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.

Note: The refund request must be in the **Draft** status.

2. In the **Search Results** section, click the link in the **Refund/Write Off Request** column corresponding to the refund request whose details you want to edit.
   The **Refund Request** screen appears.
3. Ensure that the **Payments and Adjustments** tab is selected.

   Note: If the payment events are already listed in the **Search Results** section, you can directly navigate to step 6, else resume as follows:
4. Click the **Expand Filter** button and enter the search criteria in the **Search Payment Events and Adjustments** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.
5. Click **Search**.
   A list of payment events that meet the search criteria appears in the **Search Results** section.
6. Select the check box corresponding to the payment event that you want to add in the refund request.

   Note: You can also select multiple payment events at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the payment events listed in the **Search Results** section in the refund request.
7. Click the **Add** button in the **Search Payment Events and Adjustments** zone.
   The **Confirm Adjustment Type** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the refund request	Not applicable
Adjustment Type	Used to indicate the adjustment type using which the refund adjustment should be created. **Note:** The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Adjustment Type Search** field.	No

8. Modify the adjustment type, if required.
9. Click **OK**.
   A message appears indicating that the selected payment events are successfully added in the refund request.

   Note:

   To view the payment event details, click the **Broadcast** (📡) icon corresponding to the payment event in the **Search Results** section.

   You can add only those payment events (in the refund requests) which are in the **Frozen** status.

   If all the payments of a payment event are matched against the same suspense or excess credit contract, the system adds the respective payment event in the refund request. However, if all the payments of a payment event are matched against different suspense or excess credit contracts, the system only adds the payments of the respective payment event in the refund request.

Adding a Payment to the Refund Request

Prerequisites

To add a payment to the refund request, you should have:

- Payments created in the application.

Procedure

To add a payment to the refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.

   Note: The refund request must be in the **Draft** status.

2. In the **Search Results** section, click the link in the **Refund/Write Off Request** column corresponding to the refund request whose details you want to edit.
   The **Refund Request** screen appears.
3. Ensure that the **Payments and Adjustments** tab is selected.

   Note: If the payment events are already listed in the **Search Results** section, you can directly navigate to step 6, else resume as follows:

4. Click the **Expand Filter** button and enter the search criteria in the **Search Payment Events and Adjustments** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of payment events that meet the search criteria appears in the **Search Results** section.
6. In the **Search Results** section, click the **Broadcast** (ᯤ) icon corresponding to the payment *e*vent whose payments you want to view.
   The **Payments and Adjustment** zone appears.
7. Select the check box corresponding to the payment that you want to add to the refund request.

   Note: You can also select multiple payments at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all the payment listed in the respective zone.

8. Click the **Add** button in the **Payments and Adjustment** zone.
   The **Confirm Adjustment Type** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the refund request	Not applicable
Adjustment Type	Used to indicate the adjustment type using which the refund adjustment should be created. **Note:**	No

Field Name	Field Description	Mandatory (Yes or No)
	The **Search** (🔍) icon appears corresponding to this field. On clicking the **Search** icon the **Adjustment Type Search** window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the **Adjustment Type Search** field.	

9. Click **OK**.
   A message appears indicating that the selected payment events are successfully added to the refund request.

Note: You can add only those payments (to the refund requests) which are in the **Frozen** status.

Adding a Credit Bill to the Refund Request

You can refund the credit bills to an account.

Prerequisites

To add a credit bill to the refund request, you should have:

- Bills that are in the **Complete** status for an account with one or more credit line items.

Procedure

To add a credit bill to the refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.

   Note: The refund request must be in the **Draft** status.

2. In the **Search Results** section, click the link in the **Refund/Write Off Request** column corresponding to the refund request whose details you want to edit.
   The **Refund Request** screen appears.
3. Ensure that the **Bills** tab is selected.

   Note: If the bills are already listed in the **Search Results** section, you can directly begin from step 6, else resume from step 4.

4. Click the **Expand Filter** button and enter the search criteria in the **Search Bills** zone.

   Note: ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.
   A list of bills that meet the search criteria appears in the **Search Results** section.
6. Do either of the following:

If...	Then...
