Preface

This Preface introduces the guides, online help, and other information sources available to help you more effectively use Oracle Fusion Applications.

Oracle Fusion Applications Help

You can access Oracle Fusion Applications Help for the current page, section, activity, or task by clicking the help icon.

With a local installation of help, you can add custom help files to replace or supplement the provided content. Help content patches are regularly made available to ensure you have access to the latest information. Patching does not affect your custom content.

Oracle Fusion Applications Guides

Oracle Fusion Applications guides are a structured collection of the help topics, examples, and FAQs from the help system packaged for easy download and offline reference, and sequenced to facilitate learning.

Guides are designed for specific audiences:

- **User Guides** address the tasks in one or more business processes. They are intended for users who perform these tasks, and managers looking for an overview of the business processes. They are organized by the business process activities and tasks.
- **Implementation Guides** address the tasks required to set up an offering, or selected features of an offering. They are intended for implementors. They are organized to follow the task list sequence of the offerings, as displayed within the Setup and Maintenance work area provided by Oracle Fusion Functional Setup Manager.
- **Concept Guides** explain the key concepts and decisions for a specific area of functionality. They are intended for decision makers, such as chief financial officers, financial analysts, and implementation consultants. They are organized by the logical flow of features and functions.
- **Security Reference Manuals** describe the predefined data that is included in the security reference implementation for one offering. They are intended for implementors, security administrators, and auditors. They are organized by role.

These guides cover specific business processes and offerings. Common areas are addressed in the guides listed in the following table:

Guide	Intended Audience	Purpose
Common User Guide	All users	Explains tasks performed by most users.
Common Implementation Guide	Implementors	Explains tasks within the Define Common Applications Configuration task list, which is included in all offerings.
Functional Setup Manager User's Guide	Implementors	Explains how to use Oracle Fusion Functional Setup

Guide	Intended Audience	Purpose
		Manager to plan, manage, and track your implementation projects, migrate setup data, and validate implementations.
Technical Guides	System administrators, application developers, and technical members of implementation teams	Explain how to install, patch, administer, and customize Oracle Fusion Applications. Note: Limited content applicable to Oracle Cloud implementations.

My Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/support/contact.html> or visit <http://www.oracle.com/accessibility/support.html> if you are hearing impaired. Use the My Oracle Support Knowledge Browser to find documents for a product area. You can search for release-specific information, such as patches, alerts, white papers, and troubleshooting tips. Other services include health checks, guided lifecycle advice, and direct contact with industry experts through the My Oracle Support Community.

Oracle Enterprise Repository for Oracle Fusion Applications

Oracle Enterprise Repository for Oracle Fusion Applications provides details on service-oriented architecture assets to help you manage the lifecycle of your software from planning through implementation, testing, production, and changes.

In Oracle Fusion Applications, you can use Oracle Enterprise Repository at <http://fusionappsoer.oracle.com> for:

- Technical information about integrating with other applications, including services, operations, composites, events, and integration tables. The classification scheme shows the scenarios in which you use the assets, and includes diagrams, schematics, and links to other technical documentation.
- Other technical information such as reusable components, policies, architecture diagrams, and topology diagrams.

Introduction

Security Reference Manuals describe the Oracle Fusion Applications security reference implementation. This manual includes descriptions of all the predefined data that is included in the security reference implementation for an offering. The reference implementation can be customized to fit divergent enterprise requirements.

Security Reference Implementation

The Oracle Fusion Applications security approach supports a reference implementation that addresses common business security needs and consists of roles, policies, and templates for generating data roles.

Oracle Fusion Applications Security Reference Manuals present the following information about the predefined security reference implementation.

- The abstract and job roles for an offering
- Duty roles and the role hierarchy for each job role and abstract role
- Privileges required to perform each duty defined by a duty role
- Data security policies for each job role, abstract role, or data role
- Policies that protect personally identifiable information
- Data security policies on fact and dimension to ensure enforcement across tools and access methods
- Segregation of duties policies respected in the design of duties for the job role
- Segregation of duties conflicts in some job role definitions
- Templates for generating data roles and data security policies defined for those data roles

For a mapping of duties and privileges to roles across all offerings, see *Document ID 1459828.1* on My Oracle Support.

For information about how duty roles and privileges map to top-level menus, see *Document ID 1460486.1* on My Oracle Support.

For an overview and detailed information about the Oracle Fusion Applications security approach, including an explanation of role types, enforcement, and how to implement and administer security for your deployment, see the *Oracle Fusion Applications Security Guide*.

How to Use this Security Reference Manual

Enterprises address needs specific to their organization by changing or extending the role definitions, role hierarchies, and data security and segregation of duties policies of the reference implementation.

For each job or abstract role, review the duties, role hierarchy, and policies that it carries so you understand which users should be provisioned with the role, or which adjustments your enterprise requires before the role can be provisioned.

Note:

All information presented in this manual can be accessed in the various user interface pages of Oracle Fusion Applications provided for security setup, implementation customizations, and administration. The advantage of reviewing the security reference implementation as it is presented in this manual is that you can more easily compare and plan your customizations.

Review which duty roles a job role inherits. Before making changes, consider the segregation of duties policies defined for the role. Violations may be introduced by or may dictate a change in included duties.

Tip:

From the entitlement of a role as expressed by privileges, you can deduce the function security enforced by a role. If your enterprise needs certain functions removed from access by certain roles, change the data security policies or duties carried by the role.

Review the data security policies conferred on job roles by their inherited duty roles. Review data role templates to determine what data roles are generated when you setup the dimensions of your enterprise such as business units or inventory organization.

Review the privacy in effect for a job or abstract role based on its data security policies. Privacy is additionally protected by security components, as described in the Oracle Fusion Applications Security Guide.

Important:

As you make changes to the security reference implementation for an Oracle Fusion Applications deployment, the predefined implementation as delivered remains available. Upgrade and maintenance patches to the security reference implementation preserve your changes to the implementation.

Offering: Value Chain Planning

Configure your promising, sales and operations planning, and integrated demand and supply planning processes to plan and collaborate across your entire supply chain.

This manual describes the security reference implementation for the Value Chain Planning offering.

There is a set of common roles that are required to set up and administer an offering. For information about these common roles, see the *Oracle Fusion Applications Common Security Reference Manual*.

Note:

Privileges granted to Business Intelligence duties are not described in this manual. For information about these privileges, see the My Oracle Support document *Oracle Business Intelligence Applications Duty Role Security Assignments for Oracle Fusion Applications (Doc ID 1333454.1)*.
