Preface

Oracle Big Data Discovery is a set of end-to-end visual analytic capabilities that leverage the power of Apache Spark to turn raw data into business insight in minutes, without the need to learn specialist big data tools or rely only on highly skilled resources. The visual user interface empowers business analysts to find, explore, transform, blend and analyze big data, and then easily share results.

Contacting Oracle Customer Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. This includes important information regarding Oracle software, implementation questions, product and solution help, as well as overall news and updates from Oracle.

You can contact Oracle Customer Support through Oracle's Support portal, My Oracle Support at <https://support.oracle.com>.

Known Issues

This section includes the list of known issues for this release.

This release includes the following known issues:

Issue List

This release includes the following known issues:

- Although it is installed to all BDA nodes, the Big Data Discovery Shell (BDD Shell) is not compatible with BDDCS deployments as it requires a Python version that is unsupported with BDDCS. If you access a node directly, do not use the BDD Shell tool.
