Sample Code

Oracle may provide sample code in SuiteAnswers, the Help Center, User Guides, or elsewhere through help links. All such sample code is provided “as is” and “as available”, for use only with an authorized NetSuite Service account, and is made available as a SuiteCloud Technology subject to the SuiteCloud Terms of Service at www.netsuite.com/tos.

Oracle may modify or remove sample code at any time without notice.

No Excessive Use of the Service

As the Service is a multi-tenant service offering on shared databases, Customer may not use the Service in excess of limits or thresholds that Oracle considers commercially reasonable for the Service. If Oracle reasonably concludes that a Customer's use is excessive and/or will cause immediate or ongoing performance issues for one or more of Oracle's other customers, Oracle may slow down or throttle Customer's excess use until such time that Customer's use stays within reasonable limits. If Customer's particular usage pattern requires a higher limit or threshold, then the Customer should procure a subscription to the Service that accommodates a higher limit and/or threshold that more effectively aligns with the Customer's actual usage pattern.

Beta Features

Oracle may make available to Customer certain features that are labeled “beta” that are not yet generally available. To use such features, Customer acknowledges and agrees that such beta features are subject to the terms and conditions accepted by Customer upon activation of the feature, or in the absence of such terms, subject to the limitations for the feature described in the User Guide and as follows: The beta feature is a prototype or beta version only and is not error or bug free and Customer agrees that it will use the beta feature carefully and will not use it in any way which might result in any loss, corruption or unauthorized access of or to its or any third party's property or information. Customer must promptly report to Oracle any defects, errors or other problems in beta features to support@netsuite.com or other designated contact for the specific beta feature. Oracle cannot guarantee the continued availability of such beta features and may substantially modify or cease providing such beta features without entitling Customer to any refund, credit, or other compensation. Oracle makes no representations or warranties regarding functionality or use of beta features and Oracle shall have no liability for any lost data, incomplete data, re-run time, inaccurate input, work delay, lost profits or adverse effect on the performance of the Service resulting from the use of beta features. Oracle's standard service levels, warranties and related commitments regarding the Service shall not apply to beta features and they may not be fully supported by Oracle's customer support. These limitations and exclusions shall apply until the date that Oracle at its sole option makes a beta feature generally available to its customers and partners as part of the Service without a “beta” label.
Send Us Your Feedback

We'd like to hear your feedback on this document. Answering the following questions will help us improve our help content:

- Did you find the information you needed? If not, what was missing?
- Did you find any errors?
- Is the information clear?
- Are the examples correct?
- Do you need more examples?
- What did you like most about this document?

SuiteApp Marketplace in NetSuite

The SuiteApp Marketplace is a location in NetSuite where you can find and install SuiteApps created using the SuiteCloud Development Framework (also referred to as SDF SuiteApps). SuiteApps can include customizations and configuration settings useful to your organization. This documentation is directed at NetSuite administrators and users who have permission to install SuiteApps on their accounts.

If you are a developer interested in creating SDF SuiteApps, see the help topic SuiteApp Projects.

For information about using the SuiteApp Marketplace, see the following topics:

- Viewing SuiteApps in the SuiteApp Marketplace
- SuiteApp Installation

Viewing SuiteApps in the SuiteApp Marketplace

The following is an example of how SuiteApps can be listed in the SuiteApp Marketplace:
Each SuiteApp is represented by a SuiteApp tile that contains the following information:

- **SuiteApp Name** – is the name of the SuiteApp, as provided by the publisher or solution provider. You can search for a SuiteApp by entering its name or publisher name in the Search Apps field.
- **Publisher** – is the publisher name that identifies the SuiteApp publisher or solution provider.
- **First Release Date** – is the date of the first SuiteApp release to the SuiteApp Marketplace.

You can also sort the SuiteApp tiles by SuiteApp Name, Publisher, or Latest Release Date.

You can click a SuiteApp tile to view its details. The following is an example of the SuiteApp details page in the SuiteApp Marketplace:

---

**SuiteApp Name**

**Publisher**

**First Release Date**
Viewing SuiteApps in the SuiteApp Marketplace

The following information is available on the SuiteApp details page for each SuiteApp:

- **Action** – are the following actions that can be performed for the SuiteApp:
  - **Install** – initiates the process to install the SuiteApp on your account. For more information, see *Installing from the SuiteApp Marketplace*.
  - **Upgrade** – initiates the process to upgrade the SuiteApp version in your account. For more information, see *Upgrading from the SuiteApp Marketplace*.

- **Installation Status** – is the current state of the SuiteApp installation or uninstallation. The installation status first appears on the SuiteApp details page after you click Install. For the list of possible states, see *Viewing SuiteApp Installation or Uninstallation Status*.

- **Additional Information** – shows the following details for the SuiteApp:
  - **Publisher** – is the publisher name that identifies the SuiteApp publisher or solution provider.
  - **First Release Date** – is the date of the first SuiteApp release to the SuiteApp Marketplace.
  - **Installed Version** – is the version of the SuiteApp that is currently installed in your account.
  - **Latest Version** – is the latest version of the SuiteApp that is available for installation.
  - **Upgrades** – specifies the upgrade type of the SuiteApp, it can be one of the following:
    - **Unmanaged** – means that you can manually upgrade the SuiteApp in your account.
    - **Managed** – means that upgrades for the SuiteApp are managed by the publisher or solution provider at any time.

**Note:** The SuiteApp thumbnail images that appear in the SuiteApp tiles and on the SuiteApp details page are synchronized from the Advanced Partner Center (APC) record.
SuiteApp Installation

From the SuiteApp Marketplace, you can install any SuiteApp that is both shared to your account and supports your NetSuite account version.

For information about installation, see the following topics:

- Installing from the SuiteApp Marketplace
- Upgrading from the SuiteApp Marketplace
- Viewing SuiteApp Installation or Uninstallation Status
- Uninstalling SuiteApps Obtained from the SuiteApp Marketplace

Installing from the SuiteApp Marketplace

You can install SuiteApps to your account, to make use of the customizations and configuration settings that are useful to your organization.

**Important:** Some SuiteApps installed from the SuiteApp Marketplace can be managed SuiteApps. By installing the managed SuiteApp, you give permission for the SuiteApp to be upgraded by the publisher or solution provider at any time. Upgrades for managed SuiteApps are pushed out automatically to your account.

Consider the following information regarding SuiteApp installation:

- The most recent applicable version of the SuiteApp is installed to your account.
- If you no longer want a SuiteApp after it is installed, you can uninstall it from the Installed SuiteApps page.
- Objects included in the SuiteApp are created in your NetSuite account.
- Validation is performed prior to installation. For more information, see the help topic SDF Project Validation.
- Installations can be started for additional SuiteApps while existing installations are in progress. SuiteApps install in the order you click Install for each of them.

**To install a SuiteApp from the SuiteApp Marketplace:**

2. From the listed SuiteApps, identify the SuiteApp that you intend to install, and click the SuiteApp tile. The SuiteApp details page appears.
3. Navigate to the top right area of the SuiteApp details page and click **Install**. The installation process begins.

   Installation of a SuiteApp may take some time.

   To view the installation status, see Viewing SuiteApp Installation or Uninstallation Status.

Note that you may encounter the following messages being displayed instead of the Install action:

- If you see the message Not Compatible instead of the Install action, it means that your NetSuite account does not support the SuiteApp. A SuiteApp may be incompatible if it does not support the NetSuite version of your account.
- If you see the message Limited Access instead of the Install action, it means that you do not have permission to install the SuiteApp.
Upgrading from the SuiteApp Marketplace

You can upgrade the SuiteApps that have been installed to your account when a new SuiteApp version is available. You can upgrade only the SuiteApps that are both shared to your account and support your NetSuite account version. Upgrading a SuiteApp can provide you with new customizations and configuration settings that are useful to your organization.

Note: For managed SuiteApps, upgrades are managed by the publisher or solution provider at any time. Upgrades are pushed out automatically and you cannot manually initiate the upgrade. The Upgrade action is not available for managed SuiteApps.

To upgrade a SuiteApp from the SuiteApp Marketplace:

1. Go to SuiteApps.
2. From the listed SuiteApps, identify the SuiteApp that you intend to upgrade, and click the SuiteApp tile. The SuiteApp details page appears.
   For information about the SuiteApp details page, see Viewing SuiteApps in the SuiteApp Marketplace.
3. Navigate to the top right area of the SuiteApp details page and click Upgrade.
   Note that you may encounter a choice of SuiteApp versions under the following conditions:
   ■ There are two released versions of the SuiteApp and both SuiteApp versions support your current NetSuite version.
   ■ Both available versions are newer than the current SuiteApp version you have installed.
   The upgrade installation process begins.
   Installation of a SuiteApp may take some time.
   To view the installation status, see Viewing SuiteApp Installation or Uninstallation Status.

Viewing SuiteApp Installation or Uninstallation Status

The SuiteApp status is the current state of the SuiteApp workflow after an install, upgrade, or uninstall has been initiated.

Some states of the SuiteApp can be viewed in the SuiteApp Marketplace, and all of the states can be viewed on the Installed SuiteApps page.

To view the SuiteApp installation status in the SuiteApp Marketplace, go to SuiteApps. The SuiteApp Marketplace appears. For the desired SuiteApp, click the SuiteApp tile. The SuiteApp details page appears, and the status can be viewed in the top right area of the page.

Only the following states can appear on the SuiteApp details page of the SuiteApp Marketplace:

- **Installation Failed** – The SuiteApp failed to install. Consult the installation log for information. For more information, see the help topic Deployment Logs.
- **Installing** – The SuiteApp installation is currently in progress.
- **Installed** – The SuiteApp is successfully installed in the account. If an upgrade fails validation, this state still displays because the previous version of the SuiteApp still functions.
**Validation Failed** – The SuiteApp has failed validation, and consequently did not proceed with the installation. If it is a new installation, the target account is unchanged and there is no SuiteApp installed. If it is an upgrade, the previous version of the SuiteApp is still installed and functioning. Consult the installation log for more information. For more information, see the help topic Deployment Logs.

Additional intermediate states can be viewed on the Installed SuiteApps page by going to Customization > SuiteCloud Development > Installed SuiteApp List. For more information, see the help topics Viewing and Uninstalling SDF SuiteApps in Your NetSuite Account and Deployment Logs.

For information about possible states, see:
- SuiteApp Workflow
- SuiteApp States

**SuiteApp Workflow**

The following states are possible for a SuiteApp during the installation, upgrade, or uninstallation process:

Uninstalling SuiteApps Obtained from the SuiteApp Marketplace

SuiteApps can be uninstalled when they are no longer needed. In order to uninstall a SuiteApp, you must be logged into the account in which the SuiteApp is installed.
To uninstall a SuiteApp:

1. Go to Customization > SuiteCloud Development > Installed SuiteApp List.
2. From the Installed SuiteApps list, identify the SuiteApp you intend to uninstall.
3. For the desired SuiteApp, select Uninstall from its action menu. The uninstallation process begins.

   Uninstallation of a SuiteApp may take some time. To view the status, see Viewing SuiteApp Installation or Uninstallation Status.

   When the uninstallation completes, the SuiteApp is removed from the Installed SuiteApps list.
