## Contents

### Preface

- Audience .................................................................................................................................................. xxiii
- Documentation Accessibility .................................................................................................................... xxiii
- Conventions ............................................................................................................................................. xxiii

### 1 Getting Started with Oracle Social Network

**Getting Started with Oracle Social Network** ................................................................. 1-1
- Why should I care about social networking in my application? ...................................................... 1-1
- What does social networking have to do with my job? ........................................................................ 1-1
- How do I use the Oracle Social Network user interface? ................................................................. 1-2
- How do I get to Oracle Social Network? ............................................................................................. 1-3
- How do I set up or change my profile? ................................................................................................. 1-4
- How would someone typically use Oracle Social Network? ............................................................. 1-4
- Next Steps ......................................................................................................................................... 1-5

### 2 Common Actions

**Common Actions** ...................................................................................................................... 2-1
- How do I work with messages? ............................................................................................................. 2-1
- How do I post a document? .................................................................................................................. 2-1
- How do I view or edit an item’s membership? ....................................................................................... 2-1
- How do I make an item public or restrict access to members-only? .................................................. 2-3
- How do I add or remove a related or referring item? ......................................................................... 2-3
- How do I mute or unmute an item? ...................................................................................................... 2-4
- How do I show or hide membership messages? .................................................................................. 2-4
- How do I close, reopen, or discard an item? ......................................................................................... 2-5
- How do I rename an item? .................................................................................................................... 2-5
- How do I set the language for an item? ............................................................................................... 2-5
- How do I start a conference? ................................................................................................................. 2-6
- How do I download an archive of an item? ........................................................................................... 2-6

### 3 Social Objects

**Social Objects** ............................................................................................................................. 3-1
- What are Social Objects? ..................................................................................................................... 3-1
- What does sharing or joining a Social Object do for me? ..................................................................... 3-1
- How do I share or join a Social Object in the social network? ......................................................... 3-2
# Conversations

<table>
<thead>
<tr>
<th>How do I view a Social Object?</th>

<tr>
<td>How do I manage Conversations?</td>
<td>5-5</td>
</tr>
</tbody>
</table>
How do I create a new Conversation from an old one? ................................................................. 5-6

6 People

People .................................................................................................................................................. 6-1
What social features are available in the social network? .............................................................. 6-1
What happens when I follow someone? .......................................................................................... 6-3
How do I follow people or add contacts? ...................................................................................... 6-3
How do I view a person’s profile or interact with someone in Oracle Social Network? .............. 6-4
How do I post a message on someone’s wall? ............................................................................... 6-4
How do I start a one-on-one Conversation with someone? ......................................................... 6-5
How do I invite people to join the social network? ...................................................................... 6-5

7 Documents and Folders

Documents and Folders .................................................................................................................. 7-1
How do I upload a document? ........................................................................................................ 7-1
What is document presence? .......................................................................................................... 7-2
How do I view a file? ....................................................................................................................... 7-2
How do I download a file to my computer? ................................................................................... 7-3
How do I copy a file from Oracle Social Network to a cloud document store? ............................ 7-3
How do I print a file? ...................................................................................................................... 7-3
How do I delete a file? .................................................................................................................... 7-3
How do I annotate a document? ..................................................................................................... 7-3
How do I view document annotations? .......................................................................................... 7-5
What is document co-browsing? .................................................................................................... 7-5
How do I co-browse a file with others? ......................................................................................... 7-6
How do I create a folder? ............................................................................................................... 7-6
How do I rename a folder? ............................................................................................................. 7-6
How do I download a folder? ......................................................................................................... 7-6
How do I delete a folder? ................................................................................................................. 7-6

8 Flags

Flags .................................................................................................................................................... 8-1
What do the flag icons mean? ............................................................................................................ 8-1
How do I assign flags to others? ...................................................................................................... 8-2
How do I manage flags assigned to me? ........................................................................................ 8-3
How do I view my flags? ................................................................................................................ 8-3

9 Collections

Collections ........................................................................................................................................... 9-1
What are collections? ....................................................................................................................... 9-1
How do I create a collection? ......................................................................................................... 9-2
How do I add or remove related or referring items? .................................................................... 9-2
How do I join a collection? ............................................................................................................. 9-3
Why can’t I see some items in a collection? .................................................................................. 9-3
How do I view or edit a collection’s membership? ....................................................................... 9-3
How do I make a collection public or restrict access to members-only? ...........................................9-3
How do I mute or unmute a collection? ..............................................................................................9-3
How do I show or hide membership messages in a collection? .........................................................9-4
How do I close, reopen, or discard a collection? .................................................................................9-4
How do I rename a collection? ...........................................................................................................9-4
How do I change a collection’s language? ............................................................................................9-4
How do I start a conference in a collection? .......................................................................................9-4
How do I download an archive of a collection? ....................................................................................9-4

10 Working with Groups

<table>
<thead>
<tr>
<th>Groups</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>What are groups?</td>
<td>10-1</td>
</tr>
<tr>
<td>How do I view groups?</td>
<td>10-1</td>
</tr>
<tr>
<td>How do I create group?</td>
<td>10-2</td>
</tr>
<tr>
<td>How do I manage members in a group?</td>
<td>10-2</td>
</tr>
<tr>
<td>How do I edit a group’s name, description, or picture?</td>
<td>10-3</td>
</tr>
<tr>
<td>How do I post, edit, reply to, or delete a message on a group’s wall?</td>
<td>10-3</td>
</tr>
<tr>
<td>How do I start a Conversation with a group?</td>
<td>10-3</td>
</tr>
<tr>
<td>How do I mute or unmute a group?</td>
<td>10-3</td>
</tr>
<tr>
<td>How do I deactivate or reactivate a group?</td>
<td>10-4</td>
</tr>
</tbody>
</table>

11 Conferences

<table>
<thead>
<tr>
<th>Conferences</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>What are conferences?</td>
<td>11-1</td>
</tr>
<tr>
<td>Which conference applications are supported?</td>
<td>11-1</td>
</tr>
<tr>
<td>How do I configure conference account settings?</td>
<td>11-1</td>
</tr>
<tr>
<td>How do I start or end a conference?</td>
<td>11-2</td>
</tr>
<tr>
<td>How do I join a conference?</td>
<td>11-2</td>
</tr>
</tbody>
</table>

12 Finding Content

<table>
<thead>
<tr>
<th>Finding Content</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>How do I perform a global search?</td>
<td>12-1</td>
</tr>
<tr>
<td>How do I search within a Conversation or wall?</td>
<td>12-2</td>
</tr>
<tr>
<td>How does search work?</td>
<td>12-2</td>
</tr>
<tr>
<td>What are hashtags (#) and how do I use them?</td>
<td>12-3</td>
</tr>
<tr>
<td>How do I mark a wall, Conversation, or message as a favorite?</td>
<td>12-4</td>
</tr>
</tbody>
</table>

13 Settings and Accessibility

<table>
<thead>
<tr>
<th>Settings and Accessibility</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>How do I change my preferences?</td>
<td>13-1</td>
</tr>
<tr>
<td>How do I set up or change my notifications?</td>
<td>13-2</td>
</tr>
<tr>
<td>How can I connect to my documents in the cloud?</td>
<td>13-2</td>
</tr>
<tr>
<td>How is the social network accessible?</td>
<td>13-3</td>
</tr>
<tr>
<td>What keyboard shortcuts are available to the social network?</td>
<td>13-3</td>
</tr>
</tbody>
</table>
14 Tips and Tricks

Tips and Tricks

How can I see usage information about my session? ................................................................. 14-1
How do I access the administration features? ............................................................... 14-1
I'm a developer. How do I get to the developer's website? .................................................. 14-1
Where can I find additional tips and troubleshooting information or report a problem? ..... 14-1
How do I get support? .................................................................................................................. 14-2
How do I find out more about the Oracle Social Network product? ................................. 14-2
One of my colleagues has left the company, yet his name and avatar still appear in
Conversations. Is there a way to remove him? ............................................................... 14-2
How can I search for a term within a single Conversation? .................................................. 14-2
How can I flag a group? ................................................................................................................ 14-3
How can I link to a particular post in a Conversation? ......................................................... 14-3
I created a group and would like others to be able to request membership to it. Is this possible?
........................................................................................................................................... 14-3
I'm a member of a group that frequently gets added to a lot of Conversations I have no interest
in. I'm also a member of a collection that spawns a lot of Conversations I don't care about.
What can I do to stop this? ........................................................................................................ 14-3
How can I work offline? ............................................................................................................. 14-3
How do I know what version I'm using? .................................................................................. 14-3

Getting Started with the Oracle Social Network Add-In for Outlook .................................. 15-1
What is the Oracle Social Network add-in for Outlook? ......................................................... 15-1
How do I download and install the add-in for Outlook? ...................................................... 15-2
How do I log-in to the add-in for Outlook? ................................................................. 15-2
Understanding add-in panel and action icons ..................................................................... 15-2
What do the icons next to items mean? .................................................................................. 15-4
How do I increase the add-in's accessibility? .................................................................... 15-5
How do I enable screen reader mode? .................................................................................. 15-5
What keyboard shortcuts are available for navigating the add-in for Outlook? .................. 15-5
What keyboard shortcuts are available in Conversations and walls? ................................. 15-6
Disabling and Re-Enabling the Add-In for Outlook .............................................................. 15-6
How do I disable the add-in for Outlook in Outlook 2007? .................................................. 15-6
How do I disable the add-in for Outlook in Outlook 2010 or 2013? ..................................... 15-7
How do I re-enable the add-in for Outlook in Outlook 2007? .............................................. 15-7
How do I re-enable the add-in for Outlook 2010 or 2013? .................................................. 15-8
Managing Your Oracle Social Network Account in the Add-In for Outlook ......................... 15-8
What are Oracle Social Network accounts? ........................................................................... 15-8
How do I set up a new account? ............................................................................................ 15-8
How can I see my account status? .......................................................................................... 15-9
How do I switch between add-in accounts? .......................................................................... 15-9
How do I disconnect from an account? .................................................................................... 15-10
How do I delete an account? .................................................................................................. 15-10
How can I troubleshoot my accounts? ................................................................................... 15-10
Configuring Your Settings for the Add-In for Outlook ......................................................... 15-10
How do I set my add-in preferences? .................................................................................... 15-10
Where do I specify whether to enable screen reader mode? .................................................. 15-11
How do I hide message tooltips? ............................................................................................. 15-11
How do I set the options for marking messages as read? ...................................................... 15-11
How do I get notified about new messages in my One-on-One Conversations? ................. 15-12
How do I hide membership messages by default? ................................................................. 15-12
How do I set up how to post messages? ................................................................................ 15-12
How do I control who can post to my wall? .......................................................................... 15-12
How do I set a web conference user name and password? .................................................. 15-13
How do I connect to my documents in the cloud? ................................................................. 15-13
How do I set my add-in for Outlook notification options? .................................................... 15-14
How do I tell Outlook to prompt me to use Oracle Social Network? .................................... 15-14
How do I set offline preferences? .......................................................................................... 15-15

**Setting Up Your Profile in the Add-In for Outlook** ................................................................. 15-16
How do I view my profile? ........................................................................................................ 15-16
How do I edit my profile? .......................................................................................................... 15-16
How can I see other people’s profiles? .................................................................................... 15-17
How do I post a message to someone’s wall? ........................................................................ 15-17

**Using Flags in the Add-In for Outlook** ............................................................................... 15-17
What are flags? .......................................................................................................................... 15-17
How can I see all flags assigned to me or by me? .................................................................. 15-18
How do I assign or clear flags? .............................................................................................. 15-18

**Using Conversations in the Add-In for Outlook** ................................................................. 15-19
What Conversation tabs are available? .................................................................................. 15-19
How do I view Conversation messages? ................................................................................ 15-19
How do I view a list of Conversation documents? .................................................................. 15-19
How do I view a list of Conversation members? ..................................................................... 15-19
How can I view a list of all Conversations I’m a member of? ................................................. 15-19
How can I view a list of Conversations I can join? .................................................................. 15-20
How can I view my list of favorite Conversations? ............................................................... 15-20
How can I view my list of muted Conversations? ................................................................. 15-20
How can I view a list of closed Conversations? ..................................................................... 15-20
How can I view a list of open Conversations? ........................................................................ 15-20
How do I start a Conversation? ............................................................................................... 15-20
How do I start a Conversation with a group? .......................................................................... 15-21
How do I join a public Conversation? .................................................................................... 15-21
How do I start a One-on-One Conversation? ........................................................................ 15-21
How do I add members to a Conversation? ............................................................................ 15-21
How do I remove members from a Conversation? .................................................................. 15-22
How do I make a private Conversation public? ..................................................................... 15-23
How do I change a public Conversation to members-only? .................................................. 15-23
How do I close a Conversation? .............................................................................................. 15-23
How do I reopen a closed Conversation? ............................................................................... 15-23
How do I delete a Conversation? ........................................................................................... 15-23
How do I change a Conversation name? ................................................................................ 15-24
What are referring items? ....................................................................................................... 15-24
How do I add an existing item to a list of referring items? .................................................... 15-24
How do I add a new item to a list of referring items? ............................................................ 15-24

How do I split a Conversation off from a group’s wall? ............................................................. 16-45
How do I mute or unmute a group? .............................................................................................. 16-45
How do I deactivate or reactivate a group? .................................................................................. 16-45
How do I download an archive of a group? ................................................................................... 16-46
How do I add a group to my Offline Briefcase? .......................................................................... 16-46
How do I view a group in the web version of Oracle Social Network? ...................................... 16-46

**Using Social Objects in Oracle Social Network Desktop** ....................................................... 16-46
Where can I see a list of Social Objects? ....................................................................................... 16-46
How do I show or hide message previews and summary information in my list of Social Objects? .......................................................................................................................... 16-48
How do I open a Social Object? .................................................................................................. 16-48
How do I mark a Social Object as a favorite? .............................................................................. 16-48
How do I create a Social Object? ................................................................................................ 16-48
How do I view and manage Social Object members? ................................................................. 16-48
How do I work with messages on a Social Object’s wall? ...................................................... 16-49
How do I work with a Social Object’s documents and folders? .......................................... 16-49
How do I work with a Social Object’s related and referring items? ....................................... 16-49
How do I share a link to a Social Object? ................................................................................. 16-49
How do I rename a Social Object? ............................................................................................ 16-49
How do I split a Conversation off from a Social Object’s wall? ........................................... 16-49
How do I mute or unmute a Social Object? .............................................................................. 16-49
How do I close or reopen a Social Object? .............................................................................. 16-50
How do I discard a Social Object? ............................................................................................ 16-50
How do I download an archive of a Social Object? ............................................................... 16-50
How do I add a Social Object to my Offline Briefcase? ......................................................... 16-50
How do I view a Social Object in the web version of Oracle Social Network? ....................... 16-51

Working Offline in Oracle Social Network Desktop ................................................................. 16-51
How can I see items when I’m offline? ....................................................................................... 16-51
Understanding the Offline Briefcase ....................................................................................... 16-51
What’s the difference between online and offline items? .................................................... 16-52
How do I add an item to my Offline Briefcase? ....................................................................... 16-52
How do I view an item offline from my Offline Briefcase? .................................................... 16-52
How do I refresh items in my Offline Briefcase? ..................................................................... 16-53
How do I post the changes I made offline? ............................................................................. 16-53
How do I remove an item from my Offline Briefcase? ........................................................... 16-53

Using Notifications in Oracle Social Network Desktop ......................................................... 16-53
What are notifications? ........................................................................................................... 16-53
What are pop-up alerts? ........................................................................................................... 16-54
How do I configure my notification settings? ......................................................................... 16-54
How do I turn notifications on or off? ..................................................................................... 16-54
How do I turn pop-up alerts on or off? .................................................................................... 16-54
How do I select the events that trigger notifications? ............................................................ 16-54
Where can I see my notifications? .......................................................................................... 16-55
How do I filter my view of notifications in the sidebar? .......................................................... 16-55
How do I delete notifications? ................................................................................................. 16-56

Managing Your Account in Oracle Social Network Desktop .................................................. 16-56
What are Oracle Social Network accounts? .......................................................................... 16-56
How do I enable account switching when I start Oracle Social Network Desktop? .............. 16-57
Where can I see my account details? ....................................................................................... 16-57
How do I add an account in Oracle Social Network Desktop? ............................................. 16-57
How can I see my account status in Oracle Social Network Desktop? ................................ 16-57
How do I switch between accounts in Oracle Social Network Desktop? ............................. 16-57
How do I save my password in Oracle Social Network Desktop? ........................................ 16-58
How do I disconnect from an account in Oracle Social Network Desktop? ......................... 16-58
How do I delete an account in Oracle Social Network Desktop? ......................................... 16-58
How do I work offline in Oracle Social Network Desktop? ................................................ 16-58

Configuring Your Settings for Oracle Social Network Desktop ............................................. 16-58
How do I get to my desktop settings? ..................................................................................... 16-58
How do I configure my general settings? .............................................................................. 16-59
How do I get Oracle Social Network Desktop to start when I log in to my computer? ......... 16-59
How do I prevent my previously opened tabs from showing up when I reconnect? .......... 16-60
How do I set the time interval for changing my status to away? .................................. 16-60
How do I set my time and date format? ......................................................................... 16-60
Where can I choose a docking position for the sidebar? ................................................ 16-60
How do I configure Conversations settings? .................................................................... 16-61
How do I set up when to mark messages as read? .............................................................. 16-61
How do I set the time to delay before a snapshot is taken? ............................................... 16-61
How do I set up how to post messages? ............................................................................ 16-61
How do I get One-on-Ones to open automatically when new messages are posted? ...... 16-62
How do I control whether other people can post or reply to messages and documents on my
wall? ........................................................................................................................................ 16-62
How do I automatically log in to conferences? ................................................................... 16-62
How do I allow Oracle Social Network to access my cloud documents? ......................... 16-63
How do I configure my notification settings? ................................................................... 16-63
How do I restore default settings in Oracle Social Network Desktop? ............................ 16-63

Getting Help, Support, and Updates for Oracle Social Network Desktop.......................... 16-63
How can I get help with Oracle Social Network Desktop? .............................................. 16-63
How do I save my Oracle Social Network activity logs? ................................................ 16-64
How do I check for updates to Oracle Social Network Desktop? ...................................... 16-64

This preface describes the document accessibility features and conventions used in this document.

**Audience**

This guide is written for people who use Oracle Social Network in their day-to-day work.

**Documentation Accessibility**

**Access to Oracle Support**

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit [http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info](http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info) or visit [http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs](http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs) if you are hearing impaired.

**Conventions**

The following text conventions are used in this document:

<table>
<thead>
<tr>
<th>Convention</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>boldface</strong></td>
<td>Boldface type indicates graphical user interface elements associated with an action.</td>
</tr>
<tr>
<td><em>italic</em></td>
<td>Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values. It also highlights new terms that are explained in context.</td>
</tr>
<tr>
<td><code>monospace</code></td>
<td>Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.</td>
</tr>
</tbody>
</table>
Getting Started with Oracle Social Network

These topics introduce basic features in Oracle Social Network and describe how to use them:

- "Getting Started with Oracle Social Network"

Getting Started with Oracle Social Network

Why should I care about social networking in my application?
Wouldn’t it be great if you could instantly share an aspect of your application with everyone who plays a part in getting the job done? Without having to start an untold number of email threads that then get forwarded to other people, until it’s impossible to know who’s in charge of what?

When you share a business object with the social network—like a Sales Opportunity or a Purchase Order—you create a Social Object. With the Social Object, you can bring all your stakeholders together in a single place to get the collaborative ball rolling—and keep a record of everything that’s transpired so new folks can easily jump in and come up to speed.

What does social networking have to do with my job?
Social networking isn't just for social situations anymore. Here are some key reasons for using social networking in your business applications:

- In a business object, open Conversations on the spot and discuss details while looking at them.
  No worries about keeping two sets of data in sync. The details you see in your social network are the same you see in your business application.

- All communications are organized automatically by business object, so no wasted time with filing and searching through emails.

- Quickly engage resources as needed to address issues and solve problems.
  Invite new members to the Conversation so they can easily see the complete history.

- Share presentations and other documents and get input from other team members.
  Web conference not required. Juggling email responses not required.

- Get real-time notifications about updates to key Conversations.
Develop and expand your professional network.

Connect and engage with others covering the same industry, product specialization, or geography.

How do I use the Oracle Social Network user interface?

When you open Oracle Social Network, you see the Overview page, which shows the most recent messages in the Conversations and walls you are a member of.

The Overview page, like most of the pages that include a list of items, provides easy access to several features:

- Filter options—The Show menu enables you to filter the items in the list view.
  - **Yours**—Shows items you are a member of.
  - **Available**—Shows public items that are available for you to join.
  - **Favorites**—Shows items you’ve marked as favorites.
  - **Muted**—Shows items you’ve muted. Muting an item hides it in list views and stops messages about it from appearing in your email digest and within Oracle Social Network. It's still there; you just won’t hear about it anymore. However, you will still be notified if someone assigns a flag to you in a muted item.
  - **Open/Closed**—Shows items that are open/closed. A closed item prevents people from adding new messages to the item and removes the item from list views and email digests.

- Sort options—The Sort By menu enables you to sort the items in the list view.

- Favorite—Click the star icon (⭐) to add the item as a favorite. For more information, see How do I mark a wall, Conversation, or message as a favorite?

- Flags—The flag icon (合规) shows you if the item has been marked for someone’s information or response, and enables you to add a flag for yourself or someone else. For more information, see How do I assign flags to others?

- Unread message count—The number in the blue box (14) shows the number of unread messages in the Conversation or wall. Click the unread message count to mark all messages in the Conversation or wall as read.

**Tip:** By default all the items in the list are expanded to show each item’s most recent messages. You can collapse an item (to show only the names of the items) by clicking next to the item. To collapse all the items, click .

You can access other pages, such as your wall, Flags, Favorites, and such, from the menu on the left.

The right side of Oracle Social Network includes the following sections:

- **Recent Activity**—Displays the most recent messages from the Conversations and walls you’re a member of.

- **Trending**—Displays the Conversations, collections, hashtags, Social Objects, and walls with the most people in them at the moment. It also shows any conferences running in Conversations you’re a member of. Click to join the conference.

- **Contacts**—Displays your list of contacts and their presence. Click a contact to quickly open a one-on-one Conversation or view the person’s profile.

**Note:** If you don’t see the sections on the right, your browser window is not wide enough. Expand your browser window to see it.
When viewing the full-view of Oracle Social Network, you also see a banner with quick access to your flags and a user menu from which you can access the following areas:

- **Administration**—Available to users with administrative privileges. Use Administration to manage general settings (such as branding and global settings), users, collaboration (such as enabling external users), apps, features (JavaScript libraries), Social Definitions, conferencing services, cloud document services, and federated authentication. For more information, see *Administering Oracle Social Network*.

- **Settings**—

- **Downloads**—Download other Oracle Social Network clients: iPhone/iPad app, Android app, Oracle Social Network Desktop, or the Add-In for Outlook. For more information, see *Using Oracle Social Network on Your iPhone*, *Using Oracle Social Network on Your iPad*, *Using Oracle Social Network on Your Android Device*, *Working from Your Desktop*, or *Using Oracle Social Network with Microsoft Outlook*.

- **Analytics**—This option is not available to all instances of Oracle Social Network, but if you see it, you can click it to see your personal usage statistics. If you’re an administrator, you’ll see more global information about the Oracle Social Network instance, as well as individual user information.

- **Community**—The Oracle Social Network Community Forum is the place to go to get more information about real-world use cases, tips, and troubleshooting. Share info with your peers, or get advice from the people who helped to design and build Oracle Social Network.

- **Developers**—Available to users with the Developer option. The developer website provides tools for building Social Definitions, apps, and Social Plugins, and also helps developers learn and implement the REST API by providing an API Explorer. For more information, see *Editing General Properties*.

- **Support**—Learn how to log a service request with Oracle support.

- **Product News**—View the Oracle Social Network Facebook page that includes product news.

- **About**—Shows version and copyright information.

### How do I get to Oracle Social Network?

You can access Oracle Social Network from the following applications and devices:

- **Your Oracle application**—Oracle Social Network is integrated with your Oracle application.

  To view the all Social Objects, Conversations, and walls that are available to you, open the Social panel. While viewing the landing page, click the *Social* icon. Alternatively, in the Navigator, click *Social*.

  To view the social activity surrounding a particular Social Object, open the Social Object, then click the *Social* icon or link.

- **Full view in web browser**—You can access the full view of Oracle Social Network from a URL (for example, you might be emailed a link to Oracle Social Network), by clicking the full view button in an Oracle Social Network client, or by opening a document in an Oracle Social Network client.
Add-In for Microsoft Outlook—You can use the add-in that displays Oracle Social Network in a panel on the right side of Outlook. For more information, see Using Oracle Social Network with Microsoft Outlook.

Android or iOS apps—You can use the mobile apps to access Oracle Social Network on the go. For more information, see Using Oracle Social Network on Your Android Device, Using Oracle Social Network on Your iPhone, or Using Oracle Social Network on Your iPad.

Desktop client—You can use the standalone application that runs on your desktop. For more information, see Working from Your Desktop.

You can download the Add-In for Outlook, mobile apps, or Desktop client from Oracle Social Network's full view by clicking the arrow next to your name at the top of the application, then clicking Downloads. Follow the directions from there.

Note: Depending on the Oracle application you use, you might not have access to all of these options.

How do I set up or change my profile?

To edit your personal information or picture on your social network profile:

1. From the navigation menu on the left, select My Wall.
2. On your profile, click Edit Profile.
3. Edit your personal information. Don't forget to add a bit about what you do in the Description box under Basic Information and your contact information in the boxes under Contact Information.

   Note: Some information is read only. If you need to change the read-only information, contact your administrator.

4. To change your profile picture, click it, then select Upload Photo. Select a .gif, .png, or .jpg file. After you select a picture, you can use the crop tools to re-size it. Your picture is scaled to 150x150 pixels square.

   Note: If you use Mozilla Firefox and JAWS, you must disable pop-ups before you upload a profile picture. If you don't disable pop-ups, the upload dialog won't appear.

Who can see my information?

Oracle Social Network is completely secure. Only people with log-in credentials can see and interact with Oracle Social Network content and view user's profiles.

Your profile also has a wall, where you can post messages and documents for everyone to see. People who follow you can also post content to your wall if you allow them to.

For more information, see How do I change my preferences?

How would someone typically use Oracle Social Network?

Here's how someone might use Oracle Social Network in a typical day, just to give you an idea. This is only an example—you might find that you don't do all these tasks, or you don't do them in this order.
Now that you have a general understanding of what you can do with Oracle Social Network, you might want to start with one of the following tasks:

- Share or join a Social Object or Conversation. See What does sharing or joining a Social Object do for me?
- Post to a Social Object wall or Conversation. See How do I post a message?
- Edit your profile. See How do I set up or change my profile?
- Follow people and add contacts. See What happens when I follow someone?

### Table 1–1  Example Workflow in Oracle Social Network

<table>
<thead>
<tr>
<th>Step</th>

</tr>
<tr>
<td>15.</td>
<td>Create a collection of Conversations related to the new Social Object.</td>
<td>How do I create a collection?</td>
</tr>
</tbody>
</table>
These actions are common to most Oracle Social Network objects.

- "Common Actions"

**Common Actions**

**How do I work with messages?**

To post a new message to an item, enter your text in the text box, and use the buttons below the text box to format your text or add a reference to an item or upload a document.

You can reply to, like, edit, or delete an existing message, as well as add a flag to it or add it as a favorite.

For more information, see Messages.

**How do I post a document?**

Next to the message text box in an item, click , select where to upload the file from, then select a file. For more information, see How do I upload a document?

**How do I view or edit an item's membership?**

1. Open the item.

   Tip: The membership bar shows the item’s members and their presence status (online, idle, offline). To quickly remove a member (including yourself), click the person’s picture in the membership bar, then select Remove from <item>. If you want to add people or remove multiple people, continue with step 3.

2. Click in the membership bar to open the list of current members.

   Note: You can’t add people to the personal wall that is part of a profile.

3. Click Manage to open the Manage Members dialog.

   Note: If you don’t see the Manage button, the membership is locked and can’t be changed.

4. Optionally, change its visibility, either Only visible to members (members-only Conversation) or Visible to any user (public Conversation).
5. Move groups and people to the right column to add them or to the left column to remove them. Use Ctrl+Click to select more than one person or group.

Note: You can add outside users to Conversations, but not to Social Objects or collections. Outside users' names appear in purple text, and they have icons after their names. For more information on outside users, see Outside Users.

You can also search by entering part of a person’s or group’s name, and select them from the list that pops up.

If your administrator has configured the system to allow you to invite users, you can add someone who isn’t an Oracle Social Network user. Enter the person’s email address in the search box, then click Invite email_address. When asked if you want to send an invitation, click OK. When you save your changes an email will be sent to the person inviting the person to join Oracle Social Network.

By default, you see a list of recommended members. Click a tab to change your view:

- **Recommendations**—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add to a Conversation—the person is one of your contacts, similar Conversations the person is a member of, and other common actions.
- **Contacts**—View a list of your contacts.
- **Groups**—View a list of your groups.

Tip: Groups make it easy to add several people in one action. For information about creating groups, see How do I create group?

Notes:

- If you remove yourself from a members-only Conversation, you can't add yourself back. Ask someone who's a member of the Conversation to re-add you.
- If someone was added to a Conversation as part of a group, you can't remove the person directly from the Conversation. You might be able to remove the person from the group, but that removes you the person from all Conversations the group belongs to.

In-Line Recommendations

You can also add members to an item by accepting the recommendations that are sometimes shown in the list of messages (under Add to this <Object>). Oracle Social Network recommends people to add to an item based on people you frequently add to items and actions you have in common with others (such as being members of the same Conversations).

Each recommendation includes the person's name and the reason they were recommended. You can perform the following actions:

- Click the person’s name to view their profile.
- Click Add to accept the recommendation and add the person as a member of the item.
- Click Ignore to decline the recommendation.

Note: When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.
- Click the left or right arrow keys or the arrows on either side of the current recommendation to see the previous or next recommendation.
When you accept or ignore a recommendation, the next recommendation appears.

**Note:** The recommendations appear near where you entered the Conversation or wall. If you scroll up or down, the **Add to this <Object>** section might move out of view. Just scroll up or down to find it.

### How do I make an item public or restrict access to members-only?

Anyone who’s a member of an item can change its membership model.

To change an item from public to members-only:

1. Open the item.
2. Click ☰, then click **Make <Object> Publicly Available** or **Make <Object> Members-Only**.

When making an item members-only, everyone who has already joined the item is kept as a member.

### How do I add or remove a related or referring item?

*Related* items are items that have direct relevance to the item you’re viewing. Think of them as *child* items, where the child item is related to a parent item along with other child items. For example, the *Related* list for a Social Object might contain Conversations about planning, financing, ownership, and other types of topics surrounding the Social Object. The list could include collections of relevant items, groups comprised of the people involved in fulfilling the Social Object’s goal, or other Social Objects that are relevant to this Social Object.

*Referring* items are the Social Object and collections that the item you’re viewing has been added to (as a related item). Think of them as *parent* items, where the parent item refers to one or more child items.

**To add a related item:**

1. Open the item, then click the **Related** tab.
2. Click + Add.
3. Select whether to create a new item or add an existing item:
   - **To create a new item:**
     a. Click **New Conversation** or **New Collection**.
     b. Enter a name for the Conversation.
     c. Set its visibility, either **Only visible to members** (members-only) or **Visible to any user** (public).
     d. Select additional members (move from left column to right) or remove members (move from right column to left).
   - **Note:** When you create a new Conversation related to an item, the Conversation membership is taken from the referring item’s membership.
   - **To add an existing item:**
     a. Click **Related Item**.
     b. Search for an item or select one from one of the tabs (**Recent** or **Favorites**).
     c. Click Select.
To add a referring item:
1. Open the item, then click the Referring tab.
2. Click + Add.
3. Search for an item or select one from one of the tabs (Recent or Favorites).
4. Click Select.

To remove a related or referring item:
1. Open the item, then click the Related tab or the Referring tab.
2. Click Edit.
3. Click Remove next to the item, then click Done.

How do I mute or unmute an item?

If you have items in your object lists that you never look at (for example a Conversation that doesn't apply to you), or you're seeing updates in your recent activities or in your email digests about items you don't care about, you can mute those items. Muting an item hides it and its activity from your view. It's still there; you just won't hear about it anymore. (The only exception is if you're flagged on a message in a muted item, for which you will still be alerted by email based on your notification settings.)

To mute an item:
1. Open the item.
2. Click , then select Mute <Object>.
   A banner appears at the top, showing that the item is muted.

To unmute an item:
1. From the navigation menu on the left, select the type of item you want to view (for example, Conversations).
2. In the Show menu, select Muted.
3. Click an item to open it.
4. In the banner showing that the item is muted, click Unmute.
   If you dismissed the banner, click , then select Unmute <Object>.

How do I show or hide membership messages?

When a user is added to or removed from an item a membership message is posted to the item (for example, The Conversation is now accessible to: John Doe). If you'd prefer not to see those messages, you can hide them.

1. Open the item.
2. Click , then select Hide Membership Messages or Show Membership Messages.

Note: You can set the default view of membership messages for all walls and Conversations through your preferences. For more information, see How do I change my preferences?
How do I close, reopen, or discard an item?

You can close any item you belong to, even if you didn’t create it. Closing an item prevents people from adding new messages to it and removes it from item lists.

**To close an item:**
1. Open the item.
2. Click 📄, then click Close <Object>.
3. Optionally, enter a summary statement.
4. Click Close.

**To reopen an item:**
1. From the navigation menu on the left, select the type of object you want to reopen.
2. In the Show menu, select Closed.
3. Click an item to open it.
4. Click 📄, then select Reopen <Object>.

**To discard an item:**
You can discard an item only if you’re the sole member. A discarded item is removed from all lists, including collections and Social Objects it’s related to.
1. Open the item.
2. If necessary, remove all other members except yourself.
3. Click 📄, then select Discard <Object>.

How do I rename an item?
1. Open the item.
2. Click 📄, then click Rename <Object>.
   
   **Note:** Social Objects can be renamed in the business application, not in Oracle Social Network.

   3. Enter a new name, then click OK.

How do I set the language for an item?
If you want system messages in a Conversation or wall to appear in a language other than the default language, you can change the language setting. The language setting affects all members’ views of the Conversation or wall.

Any system messages posted after you change the language will appear in the new language. System messages that were there before the language change, however, remain in the language that was in place when they were posted. Messages and files posted to the Conversation or wall are unaffected; that is, they appear in the language they were written in.

To change the language setting for an item:
1. Open the item.
2. Click 📄, then select Set Language.
3. Select the language you want.
**Note:** The language used for field labels, button labels, banner headings, and so on, is determined by your preferences in the full view of Oracle Social Network. For more information, see How do I change my preferences?

**How do I start a conference?**

While viewing an item, click 🗯️, then select **Start Conference**. For more information, see How do I start or end a conference?

**How do I download an archive of an item?**

Suppose you’re heading for the airport and want to catch up on what’s been going on with an item while on the plane. Maybe you want to keep a record of the content in a Conversation or wall at a certain point. You can save an archive of an item to your local drive.

The archive is in the form of a .zip file (named after the item). It contains the list of members, messages, and replies in an HTML file (named by default `index.html`) and all the documents added to the item.

To download an archive of an item:

1. Open the item.
2. Click 🗯️, then select **Download** and save the file.

To work with an archive:

1. Unzip the files to your computer.
2. Open `index.html`.

   Clicking a document link opens the copy of the document that is included in the .zip file. All other links in `index.html` (user names, like, reply, and so on) open the full version of Oracle Social Network in the browser.

**Note:** You can’t make changes to an archive (though you can click a link to open the item in a browser and make changes there).
3
Social Objects

These topics offer information about records from your business applications or business processes—such as Oracle's Fusion Applications CRM and HCM systems—that are integrated with Oracle Social Network. Such records in Oracle Social Network are called Social Objects.

"Social Objects"

Social Objects

What are Social Objects?

Social Objects are records within a business application or business process that are mapped into Oracle Social Network. When records like these appear in Oracle Social Network, they are called Social Objects.

Your application administrator might set things up so that all business objects of a given type are automatically made Social Objects, while other types require that you click a Share button to explicitly turn them into Social Objects.

Now, why should you care? Imagine an opportunity named BigSale in your Oracle Applications Cloud CRM system. You expose the BigSale opportunity record as a Social Object in Oracle Social Network. Here you can add discussions, decisions, and plans directly to BigSale's list of related items, making them easy to find.

You can post to the Conversation associated with the Social Object—its wall—to report your progress, let everyone know your status, or anything else relevant to the object.

You can also advance the account from one state to the next, for example from open to pending to closed, through a collaborative process that includes all involved teams.

In addition to people who have access to the record through the Oracle Applications Cloud, you can add people who don’t have that access to the Social Object’s membership. This way, you extend the pool of talent contributing to the discussions, decisions, and plans associated with the Social Object.

What does sharing or joining a Social Object do for me?

Once you share or join a Social Object, you can:

- View updates to the Social Object instantly from any view of your social network, including your browser, mobile device, desktop, and Microsoft Outlook application.
See and navigate to items related to the Social Object.

Tip: You see just those Conversations you’re a member of or those that are public, which anyone can join.

- Post messages and files that all members of the Social Object will see.
- Join web conferences from the Conversations list or from a Conversation.
- See everyone else who’s a member of the Social Object, and collaborate with them in Conversations.
- Manage Conversation and wall memberships.
- Keep object details in view while you participate in related Conversations

How do I share or join a Social Object in the social network?

Before you can collaborate on your business object you share it with your social network. Business objects that are shared with your social network are called Social Objects, and Social Objects have access to all kinds of social networking features, like Conversations and easy document collaboration.

You can share a business object by opening it, clicking the Social icon or link, then clicking Share in the Social panel.

One of your co-workers might have already shared the business object. If that’s the case, you’ll see a Join button instead of a Share button. Click it to become a member of the Social Object.

Sharing or joining a Social Object lets you participate in social activities having to do with the object. For example, you can have online Conversations with others about the object while looking at the object’s details.

How do I view a Social Object?

1. From the Social Object menu, select the type of Social Object you want to see.
2. On the list of Social Objects, click the one you want to see.

How do I create a new Social Object?

Some Social Objects have been configured to prevent new ones from being created through Oracle Social Network. The way to find out which ones can be created is to try to create them following these steps.

1. Go to the Social Object’s page, and click the New <Social_Object_Type> button on the left to open the new Social Object's wall.
2. Fill in the required data for the Social Object, if any.
3. Under Membership, move groups and people to the right column to add them or to the left column to remove them. Use Ctrl+Click to select more than one person or group.
   You can also search by entering part of a person’s or group’s name, and select them from the list that pops up.
   By default, you see a list of recommended members. Click a tab to change your view:
   - Recommendations—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might
Social Objects

affect who you add to a Conversation—the person is one of your contacts, similar Conversations the person is a member of, and other common actions.

- Contacts—View a list of your contacts.
- Groups—View a list of your groups.

Note: You can’t add outside users (people outside your company) to a Social Object. Outside users’ names appear in purple text, and they have icons (OLLOW) after their names.

4. Click OK.

How do I work with messages?
To post a new message, enter your text in the text box, and use the buttons below the text box to format your text or add a reference to an item or upload a document.

You can reply to, like, edit, or delete an existing message, as well as add a flag to it or add it as a favorite.

For more information, see Messages.

How do I post a document?
Next to the message text box, click , select where to upload the file from, then select a file. For more information, see How do I upload a document?

How do I view or edit a Social Object’s membership?
The membership bar shows the Social Object’s members and their presence status (online, idle, offline). To edit a Social Object’s membership, click in the membership bar, then click Manage. For more information, see How do I view or edit an item’s membership?

How do I make a Social Object public or restrict access to members-only?
Click , then click Make <Social Object> Publicly Available or Make <Social Object> Members-Only. For more information, see How do I make an item public or restrict access to members-only?

How do I add or remove related or referring items?
Related items are the items that have been added to the Social Object you’re viewing. They can include Conversations, people’s walls, group walls, Social Objects, or other collections.

Referring items are the Social Object and other collections that the Social Object you’re viewing has been added to (as a related item). Think of them as parent items, where the parent item refers to one or more child items.

To add related item, on the Related tab, click + Add, and select whether to create a new item or add an existing item.

To add referring item, on the Referring tab, click + Add, and select an existing item.

To remove a related item, on the Related tab, click Edit, then click Remove next to the item you want to remove.

For more information, see How do I add or remove a related or referring item?
How do I mute or unmute a Social Object?

If you have items in your object lists that you never look at (for example a Social Object that doesn't apply to you), or you're seeing updates in your recent activities or in your email digests about items you don't care about, you can mute those items. Muting an item hides it and its activity from your view. It's still there; you just won't hear about it anymore. (The only exception is if you're flagged on a message in a muted item, for which you will still be alerted by email based on your notification settings.)

To mute a Social Object, click ⏰, then select Mute <Social Object>.

To unmute a Social Object, from the navigation menu, select the type of Social Object you want to view. In the Show menu, select Muted, then open the Social Object. Click ⏰, then select Unmute <Social Object>

For more information, see How do I mute or unmute an item?

How do I show or hide membership messages in a Social Object?

When a user is added to or removed from an item a membership message is posted to the Social Object (for example, The Social Object is now accessible to: John Doe). If you’d prefer not to see those messages, you can hide them.

Click ⏰, then select Hide Membership Messages or Show Membership Messages.

For more information, see How do I show or hide membership messages?

How do I close, reopen, or discard a Social Object?

You can close any Social Object you belong to, even if you didn’t create it. Closing a Social Object prevents people from adding new messages to it and removes it from people's list of Social Objects.

To close a Social Object, click ⏰, then select Close <Social Object>.

To reopen a Social Object, from the navigation menu, select <Social Object>. In the Show menu, select Closed, then open the Social Object. Click ⏰, then select Reopen <Social Object>.

You can discard a Social Object only if you’re the sole member. A discarded Social Object is removed from all lists, including collections and Social Objects it's related to.

To discard a Social Object, click ⏰, then select Discard <Social Object>.

For more information, see How do I close, reopen, or discard an item?

How do I rename a Social Object?

Click ⏰, then click Rename <Social Object>. For more information, see How do I rename an item?

Note: Some Social Objects can be renamed only in the business application, not in Oracle Social Network.

How do I change a Social Object’s language?

If you want system messages in a Social Object to appear in a language other than the default language, you can change the language setting. The language setting affects all members’ views of the Social Object.
Click ⦿, then select Set Language. For more information, see How do I set the language for an item?

How do I start a conference in a Social Object?

Click ⦿, then select Start Conference. For more information, see How do I start or end a conference?

How do I download an archive of a Social Object?

You can download an archive of a Social Object to view the Social Object offline or to save the content at a certain point.

To download an archive of a Social Object, click ⦿, then select Download and save the file.

To work with the archive, unzip the files to your computer, and open index.html.

For more information, see How do I download an archive of an item?
These topics discuss how to work with messages:

■ "Messages"

### Messages

#### How do I post a message?

1. Open the **Messages** tab of the Conversation or the **Wall** tab of the wall.
   
   For walls, there is a text box at the top of the wall. For Conversations, there is a text box at the bottom of the Conversation.
   
   **Note:** If you don’t see the text box at the top of a person’s wall, you aren’t following the person or the person doesn’t allow other people to post to his or her wall.

2. In the text box, type your message.

   Formatting options are available beneath the text box to help you; hover over the icons to see what they do.

   To remove formatting, click 🔫. To remove only some of the formatting, select text before clicking 🔫.

   If you plan to write a long message (or find that the message becomes long while typing), click ☑️ to open the Note Editor, which provides even more formatting controls, plus a roomy text area.

   **Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see **What are hashtags (#) and how do I use them?**

3. Click **Post** or press Enter, depending on how you set up your Preferences (see **How do I change my preferences?**).

#### How do I add a link to another item?

While writing a message, you might find it handy to link to a Conversation, Social Object, document, or other item. Here’s how:

1. While writing your message, click ☐️ under the text box to open the Insert Reference dialog.

2. Select a source:
Messages

- **Recent Items**—To select from items you’ve visited recently
- **Viewed Documents**—To select from files you’ve opened recently
- **Favorites**—To select from items you’ve marked as a favorite
- **Search Results**—Type text into the search box, then press Enter to search for an item

3. Select the item you want to refer to.
4. Click **Insert** to add a link to your selection to the message field.
5. Optionally, enter text before or after the reference link.
6. Click **Post**.

**How do I post a document?**

Next to the message text box, click 📄, select where to upload the file from, then select a file. For more information, see **How do I upload a document?**

**How do I mark a message as read or unread?**

Within a Conversation, unread messages are marked 🔄 to the left of the message. Click the blue dot to mark a single message as read.

To mark all the messages in a Conversation as read, click the blue icon that contains a number, like this: 🔄 14. You’ll find this unread message count in many places throughout Oracle Social Network.

To mark a message as unread, click More under the message, then click **Mark as Unread**.

**How do I reply to a message?**

Click 🔄 Reply under the message.

**Note:** If you don’t see 🔄 Reply under a personal wall post in recent activities (from the navigation menu on the left, select **Overview**) or on someone’s wall, the person doesn’t allow other people to reply to his or her wall posts.

**How do I like a message?**

Click ⬤ Like under the message.

**Tip:** To see who has liked a message, click the link that shows the number of people who have liked it.

**How do I add a message as a favorite?**

To mark a message as a favorite, click ⭐ next to the message; click the star again to unmark it. For more information on favorites, see **How do I mark a wall, Conversation, or message as a favorite?**

**How do I alert people to an important message?**

You can assign a flag to the message by clicking the flag icon next to the message. For more information, see **How do I assign flags to others?**
How do I edit a message?

Click More under the message, then click Edit.

All edited messages show Edited at the bottom of the message. You can click this to see the earlier versions of that message.

Notes:
- You can edit only your own messages.
- Any special markup on a message is lost when you edit the message.

How do I delete a message?

You can delete messages you posted or messages on your profile wall.

Note: If you are a service administrator, you can delete any message.

Click More under the message, then click Delete.

When you delete a message, appears where the message used to be. You can mouse over this icon to find out who deleted the message, who posted it originally, and the date and time the message was deleted.

To restore a deleted message, locate the deleted message icon ( ) where the message used to be, click , then confirm that you want to restore the message.

Note: Only a service administrator, the person who posted the message, or the person who deleted the message can restore the deleted message.
Conversations

These topics describe the kinds of Conversations you can create and participate in and how to work with them:

- "Conversations"

**Conversations**

**What types of Conversations are available?**

There are lots of options available for sharing information, depending what you want to achieve through the interaction:

- A *one-on-one* Conversation is one that only you and the person you’re talking to can see. You can’t add other members to a one-on-one Conversation. You might use one-on-one Conversations for private comments or questions before you share information with a larger group.

- A *private* Conversation is one that only you can see. You might use a private Conversation to store your private notes and comments, or as a staging ground where you gather content until you’re ready to share it with others.

- A *members-only* Conversation can be seen only by the people who are explicitly added to the Conversation by other members.

- A *public* Conversation is open enrollment; anyone who is logged in can join. While you can see posts in a public Conversation, you can’t actually post anything until you’ve clicked the Join button to become a member.

- A *scoped* Conversation is the most tightly controlled type of Conversation. Scoped Conversations are created under a *scoping Social Object* in an application that has been integrated with Oracle Social Network. When the scoping Social Object is created, a list of people is defined. Only those people are eligible to be added to Conversations about that scoping Social Object.

  **Note:** For information about Social Objects, see [Social Objects](#)

- While a Social Object’s wall isn’t really a Conversation, it is another place where people can exchange information. If you’ve joined a Social Object, you can see posts, make posts, and invite others to the wall, provided that they have a login to the same instance of Oracle Social Network that you use.

  Think of a wall as a common area for the Social Object, where people who might not have access to your application can still collaborate with you on a particular Social Object. For example, suppose you want to consult with someone in Legal,
who doesn’t have access to the business object. All you have to do is add the Legal employee to the Social Object in question, and start your online discussion—either on the wall itself, or in a new Conversation.

What’s the difference between Conversations and walls?
It might be useful to know what they have in common first: All of them are pages where you can post messages and other types of content that other members can read and reply to. All of them preserve this information so that it can be revisited anytime, anywhere.

A Conversation is an online discussion typically about a specific topic. A Conversation can have a restricted membership or be open to any person with a login to the social network.

A wall is a page associated with a business object, group, or user. All members of the object can post to a wall and read what other members have posted, so the information posted there is usually more general, such as announcements.

While walls are meant for announcements, Conversations are more like discussions. That means that new wall posts are presented at the top, to make the latest information easy to see, while new Conversation posts are at the bottom, to continue the discussion.

How do I start a Conversation?

Note: For information on starting a one-on-one Conversation, see How do I start a one-on-one Conversation with someone?

1. Open the Create New Conversation dialog:
   - To create a Conversation that is not associated with another item (such as a business object), on the Overview or Conversations page, click New Conversation.
   - To create a Conversation that is associated with another item (such as a business object or group), open the item, click , then select Create New Conversation.
     A link to this related Conversation appears on the Related tab of the item.

2. Enter a name for the Conversation.

3. Set its visibility, either Only visible to members (members-only Conversation) or Visible to any user (public Conversation).

4. Select groups and people, and move them to the Members list to add them to the Conversation. Use Ctrl+Click to select more than one person or group.
   You can also search by entering part of a person’s or group’s name, and select them from the list that pops up.
   By default, you see a list of recommended members. Click a tab to change your view:
   - Recommendations—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add to a Conversation—the person is one of your contacts, similar Conversations the person is a member of, and other common actions.
   - Contacts—View a list of your contacts.
   - Groups—View a list of your groups.
Notes:

- If this Conversation is related to a Social Object or collection, the membership is inherited from that Social Object or collection. To remove members, select them from the Members list, and click the left arrow.
- Everyone in your company's LDAP directory appears in the Create New Conversation dialog. If you add someone who has never logged in to Oracle Social Network before, he or she will receive an email inviting them to join.
- You can add people to a public Conversation, and/or people can add themselves. Other people see your public Conversations when they apply the Available filter on their Conversations display. They can then click the Join button to add themselves.
- People outside your company have a special avatar ( ) and their names are in purple text. If you add an outside user to a Conversation, a banner stating “Visible to outside users.” appears at the top of the Conversation and any associated message dialogs. Be careful not to post any sensitive information to Conversations that include outside users.

How do I join a Conversation?

If the Conversation you want to join is members-only, ask someone who is already a member to add you. To see all the public Conversations you can join:

1. Click Conversations along the top of your screen.
2. Click Available on the left to see all the public Conversations.
3. Click the Conversation you want to join.
4. Click the Join button.

How do I work with messages in a Conversation?

To post a new message, enter your text in the text box, and use the buttons below the text box to format your text or add a reference to an item or upload a document.

You can reply to, like, edit, or delete an existing message, as well as add a flag to it or add it as a favorite.

For more information, see Messages.

How do I post a document to a Conversation?

Next to the message text box, click , select where to upload the file from, then select a file. For more information, see How do I upload a document?

How do I view or edit a Conversation's membership?

The membership bar shows the Conversation's members and their presence status (online, idle, offline). To edit a Conversation's membership, click in the membership bar, then click Manage. For more information, see How do I view or edit an item's membership?

How do I make a Conversation public or restrict access to members-only?

Click , then click Make Conversation Publicly Available or Make Conversation Members-Only. For more information, see How do I make an item public or restrict
access to members-only?

**How can I limit Conversation membership to only certain people?**

Membership can be tightly controlled through *scoping Social Objects*. When a scoping Social Object is created, a list of approved members is defined. When someone then creates a Conversation from that Social Object, only people defined in the membership list can be added—no one else. This ensures that sensitive or private information is not inadvertently shared with others who might not have a need to know.

Not all deployments of Oracle Social Network have scoping Social Objects. Your application administrator can tell you if yours does.

1. Open a scoping Social Object.
2. Next to *Scoped Conversation*, click ![add symbol] and select Create and add a new Conversation to open a new Conversation.
3. Continue as you would with any other Conversation.

**How do I add a Conversation to a collection or Social Object?**

A Conversation can be related to a collection or Social Object. For example, you might have separate Conversations for planning, financing, ownership, and other types of topics surrounding a Social Object. You can group all these Conversations together, making all the relevant content easier to find, by adding the Conversations to the collection or Social Object. You can set up these relationships from the collection’s or Social Object’s Related tab, or from the Conversation’s Referring tab.

To add the Conversation to a referring collection or Social Object, click the Referring tab, then click ![add symbol] + Add, and select an item. For more information, see How do I add or remove a related or referring item?

**How do I mute or unmute a Conversation?**

If you have items in your object lists that you never look at (for example a Conversation that doesn’t apply to you), or you’re seeing updates in your recent activities or in your email digests about items you don’t care about, you can mute those items. Muting an item hides it and its activity from your view. It’s still there; you just won’t hear about it anymore. (The only exception is if you’re flagged on a message in a muted item, for which you will still be alerted by email based on your notification settings.)

To mute a Conversation, click ![mute symbol], then select Mute Conversation.

To unmute a Conversation, from the navigation menu, select Conversations. In the Show menu, select Muted, then open the Conversation. Click ![mute symbol], then select Unmute Conversation.

For more information, see How do I mute or unmute an item?

**How do I show or hide membership messages in a Conversation?**

When a user is added to or removed from an item a membership message is posted to the Conversation (for example, The Conversation is now accessible to: John Doe). If you’d prefer not to see those messages, you can hide them.

Click ![mute symbol], then select Hide Membership Messages or Show Membership Messages.

For more information, see How do I show or hide membership messages?
How do I close, reopen, or discard a Conversation?

You can close any Conversation you belong to, even if you didn't create it. Closing a Conversation prevents people from adding new messages to it and removes it from people's list of Conversations.

To close a Conversation, click 🗸, then select Close Conversation.

To reopen a Conversation, from the navigation menu, select Conversations. In the Show menu, select Closed, then open the Conversation. Click 🗸, then select Reopen Conversation.

You can discard a Conversation only if you're the sole member. A discarded Conversation is removed from all lists, including collections and Social Objects it's related to.

To discard a Conversation, click 🗸, then select Discard Conversation.

For more information, see How do I close, reopen, or discard an item?

How do I rename a Conversation?

Click 🗸, then click Rename Conversation. For more information, see How do I rename an item?

How do I change a Conversation's language?

If you want system messages in a Conversation to appear in a language other than the default language, you can change the language setting. The language setting affects all members' views of the Conversation.

Click 🗸, then select Set Language. For more information, see How do I set the language for an item?

How do I start a conference in a Conversation?

Click 🗸, then select Start Conference. For more information, see How do I start or end a conference?

How do I download an archive of a Conversation?

You can download an archive of a Conversation to view the Conversation offline or to save the content at a certain point.

To download an archive of a Conversation, click 🗸, then select Download and save the file.

To work with the archive, unzip the files to your computer, and open index.html.

For more information, see How do I download an archive of an item?

How do I manage Conversations?

If a very long Conversation becomes slow to load, or if the topic naturally diverges to a new concern, consider branching off into a new Conversation. Both the old and new Conversations will have links to each other, so you can move between them easily. See How do I create a new Conversation from an old one? for more information.

If you have a long list of Conversations, here are some tips for managing them:
- Use *collections* to gather related Conversations together, like those that focus on a common topic. Rather than scrolling through your Conversations list, you can go directly to your Collections list instead. See Collections.

- Mark the Conversations you really need to pay attention to as favorites (click the star next to the Conversation name), then use the **Favorites** filter on your Conversations list to focus on them (or click the star icon in the banner).

- Use the **Sort By** menu at the top right of the Conversations list to arrange the Conversations alphabetically, by the date of the last update, and so on.

**How do I create a new Conversation from an old one?**

You might want to create a new Conversation from an old one when the topic changes, or when the discussion logically moves to a next step. For example, suppose you're in a Conversation about Milestone I and the group is ready to start talking about the next phase. You create a new Conversation, Milestone II, from the Milestone I Conversation. A link to the Milestone II Conversation is automatically posted to Milestone I, and vice versa. In this way, you maintain a chain of linked Conversations that enable people to move easily back and forth among them.

While in the original Conversation, click 📝 below the message field and add the required information. Membership from the original Conversation is automatically copied over to the new, but you can change that if you want.

**Note:** Any Conversation you create from a collection or Social Object’s wall is added by default to the collection or Social Object’s list of Referring Conversations.
These topics provide information about people in Oracle Social Network. They describe how to invite people to join Oracle Social Network, how to add people and groups to Conversations and walls, how to make someone your contact, follow someone, and other types of people-related tasks. It includes the following sections:

- "People"

**Note:** For information about accessing and developing your personal profile, see How do I set up or change my profile?

### People

#### What social features are available in the social network?

You can invite anyone who has a login to your social network to collaborate in any Conversation you’re a member of. If your company has enabled *extended collaboration*, the person doesn’t even have to have access to your business applications. For example, you can invite people to a Conversation about an Opportunity Social Object, even if they don’t have access to your business application.

While social networking features are there to assist you in effectively conducting business, lots of business involves socializing. Your social network also has features that support social activities. For example, people can add their own avatars to represent themselves, you can write on someone’s wall, you can add people as contacts, and you can like things that people post.

#### Avatars

Everyone has an avatar (picture). The picture lets you know what people look like or how they want to represent themselves.

The colored circle around a person’s picture signifies the person’s presence:

- 🌱 - A full green circle around the person’s picture shows that the person is available (logged into and currently interacting with Oracle Social Network).
- 🌿 - A three-quarter yellow circle around the person’s picture shows that the person is idle (logged into but not currently interacting with Oracle Social Network).
- 🌳 - A half gray circle around the person’s picture shows that the person is offline (not logged into Oracle Social Network).
People outside your company with limited access to Oracle Social Network (outside users) have a special avatar ( comunica ) and their names are in purple text, so it’s clear when someone from the outside is present. For more information on outside users, see Outside Users.

Tip: An animated pencil icon in the lower right corner indicates that the person is entering content in the current Conversation or on the current wall.

Profiles and Walls
Everyone who is a member of your social network has their own profile, and (other than outside users) has a wall that you can post to. You can go to a person's profile by clicking the linked name or picture on anything they posted throughout the social network.

A person’s profile includes the following information:

- At the top of the person’s profile is the person’s picture and some general information such as their name, title, and whether the person is active.
  
  Click One-on-One to start a private conversation with the person. For more information, see How do I start a one-on-one Conversation with someone?
  
  Click Follow to add the person to your contacts and follow the person's activity.

- Wall tab—View or post messages, replies, and documents for the person. For information on posting to a person's wall, see How do I post a message on someone’s wall?
  
  Note: You must follow the person before you can post to the person’s wall. Some people might not allow other people to post to his or her wall.

- Profile tab—View additional details about the person, such as contact information.
  
  If you’re viewing your own profile, click Edit Profile to edit your personal details or your picture.

- Following tab—View the people the person follows. The number in the tab shows the number of people the person follows.

- Followers tab—View the people following the person. The number in the tab shows the number of people following the person.

- Documents tab—View any documents uploaded to the person’s wall.

- Referring tab—View any items the person has been added to as a related resource.
  
  Note: Depending on how many people are following a person, you might not see all the tabs. To see hidden tabs, click More.

Outside Users

Users with limited access are called outside users. There are indicators throughout your social network that show you outside users and their presence. For example, outside users' names appear in purple text and have icons ( comunica ) after their names so you know who they are and can keep confidential information out of the Conversations they belong to. In a Conversation with outside users, you see a banner stating “Visible to outside users.” at the top of the Conversation and any associated message dialogs. Be careful not to post any sensitive information to Conversations that include outside users.

Notes:

- Outside users have profiles like other users, but they don’t have walls.
You can’t follow outside users, but you can add them as contacts. (Outside users can’t make contacts of their own.)

You can invite outside users to Conversations but not to groups, collections, or Social Objects.

What happens when I follow someone?

Following someone adds them as a contact, which means you can post messages to their wall and track activity on their wall. The wall activity shows up on the Overview page, in the Recent Activity panel on the right, and in your daily email digest.

Note: You can’t follow outside users (people outside your company), but you can add them to your contacts. Outside users’ names appear in purple text, and they have icons ( ) after their names.

For more information, see How do I follow people or add contacts?

How do I follow people or add contacts?

Following someone lets you track their wall activity and adds them to your list of contacts.

- To follow someone and add them to your list of contacts, click Follow on the person’s profile, on the Recommendations tab on the People page, or on the Followers tab on the People page or on your profile.

For more information, see How do I view a person's profile or interact with someone in Oracle Social Network?, Viewing Your Recommendations, or Viewing Your Followers.

- To stop following someone, click Unfollow on the person’s profile or next to the person’s name on the Following tab of the People page or on your profile.

For more information, see Viewing the People You Follow.

You’ll be asked if you also want to remove the person from your contacts. Unfollowing someone means you won’t see their wall activity. If you want to continue to post to their wall and see them in your list of contacts (making it easy to have one-on-one Conversations with them), don’t remove them from your contacts.

Viewing Your Contacts

You can add users to your list of contacts to make them easier to find, and more importantly, easier to start a one-on-one Conversation with. You add contacts by following them (see How do I follow people or add contacts?)

Your contacts are listed in the Contacts panel on the right and on the Contacts tab of the People page.

Viewing Your Recommendations

You can find people you might want to follow in Conversations you participate in, but you can also see a list of recommended people on the Recommendations tab of the People page. Oracle Social Network generates the recommendations list based on actions you have in common with others—documents you’ve both read, Conversations you’re both members of, and other common actions.

To view your recommendations, from the navigation menu on the left, select People, then click the Recommendations tab.
Each recommendation includes the person’s name, the reason they were recommended, a Follow button, and an Ignore button.

**Note:** When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

### Viewing the People You Follow
There are several ways to see who you’re following:

- From the navigation menu on the left, select People, then click the Following tab.
- Open your profile page, then click the Following tab.

  **Note:** The number on the Following tab shows how many people you follow.

### Viewing Your Followers
There are several ways to see who’s following you:

- From the navigation menu on the left, select People, then click the Followers tab.
- Open your profile page, then click the Followers tab.

  You can easily see which of your followers you follow, because the button on the right of someone you follow says Unfollow, whereas the button next to someone you don’t follow, says Follow. Click the button to change whether you follow the person or not.

  **Note:** The number on the Followers tab shows how many people are following you.

### How do I view a person’s profile or interact with someone in Oracle Social Network?
Throughout Oracle Social Network you'll see people’s pictures and names. To view a person's profile or interact with someone, click the picture or name. Depending on where you are in Oracle Social Network, when you click the picture or name, you can add the person as a contact, start a one-on-one conversation with the person, or, if the person works in your company, you can follow the person.

For more information, see:

- How do I follow people or add contacts?
- How do I post a message on someone’s wall?
- How do I start a one-on-one Conversation with someone?
- How do I invite people to join the social network?

### How do I post a message on someone's wall?

**Note:** Outside users (people outside your company) have profiles, but they don’t have walls. Outside users’ names appear in purple text, and they have icons ( ) after their names. If you want to post something to an outside user, you can do so through a one-on-one conversation. For more information, see How do I start a one-on-one Conversation with someone?

When you post on someone's wall, the post is visible to other users (unlike a one-on-one Conversation).

To post a message someone’s wall:

1. Click the person’s picture or name to get to their profile. Their profile opens to their wall.
2. Working with posts on someone’s wall is like any other Conversation. For information about working with posts in a Conversation, see the topics under Messages.

Notes:
- You must be following the person to post to their wall.
- If you don’t see the text box at the top of a person’s wall, you aren’t following the person or the person doesn’t allow other people to post to his or her wall.

To learn how to control who can post to your wall, see How do I change my preferences?

How do I start a one-on-one Conversation with someone?

There are several ways to start a one-on-one Conversation with someone:
- In your Contacts list, next to the person, click (If you don’t see the person you want in this list, see How do I follow people or add contacts?)
- On your Contacts page, next to the person, click One-on-One.
- In an item’s membership bar, click the person’s profile picture, then click Open One-on-One.
- Anywhere else you see a person’s name or picture, click it to open their profile. At the top of their profile, click One-on-One.

One-on-one Conversations automatically open in a minimized view at the bottom of your screen.
- To view the one-on-one Conversation in the main window, click
- To hide minimized view, click in the banner. The view collapses and the banner turns gray. If your partner posts to you, the banner turns blue again. Click the banner to re-display minimized view.
- To close the minimized view, click in the banner.

How do I invite people to join the social network?

You can invite unregistered users, and, if your company has enabled extended collaboration, you can also invite new people to join your social network. You invite people when adding members to a Conversation or wall.

Unregistered users are people who are in your company’s directory but are not yet members of Oracle Social Network. When you add people to a Conversation or wall, the word unregistered appears next to the names of unregistered users and a warning dialog alerts you to their unregistered status.

When you add an unregistered person to a Conversation, they receive an email with a link to set up their account.

New users are added using their email address. Depending on the person’s email domain and how your administrator has configured user access, the user might get access to all of Oracle Social Network or might be granted limited access.
Documents and Folders

These topics step you through document-related features in Oracle Social Network. They include the following information:

- "Documents and Folders"

Documents and Folders

How do I upload a document?

You can add files from your local file systems and, if you have an account with a cloud document store (for example, Google Drive), you can add a file from the cloud.

Notes:

- Before you can add files from your cloud document store, your administrator must enable this action.
- You can upload files of all kinds and sizes to Oracle Social Network, but file previews show only the first 100 pages, and not all file types show a preview.
- If you add a document with the same name as one that was previously added from a local file system, a new version is created. However, if the document of the same name was added from a cloud document store, you receive an error. You must rename your local document or add the new version to the cloud document store.
- When you bring Google documents (Google proprietary format) into Oracle Social Network, they are automatically converted to PDF format. When you copy them back to Google Drive, they are copied as PDF documents.
- Annotation marks and comments added to any file type in Oracle Social Network are not included when you copy files back to your cloud document store (for more information, see How do I copy a file from Oracle Social Network to a cloud document store?).

To share a document with others:

1. Open the business object or Conversation you want to associate the document with.

   Note: If the Conversation or wall you select is visible to outside users, you see a banner stating "Visible to outside users." at the top of the dialog. Be careful not to post any sensitive information to Conversations or walls that include outside users. For more information on outside users, see Outside Users.
2. On the Messages or Wall tab, click 📩 next to the text box, or, on the Documents tab, click Add, then select an option and a file:

- Select Upload Document to add a file from your local file system, then browse to and select a file.
- Select Add from Cloud Document Store to add a file from the cloud, select your cloud document store provider, then browse to and select a file.

**Note:** If you haven't already authorized Oracle Social Network to access your cloud document store account, you'll be asked to do so before you can upload a document.

3. Optionally, in the text box add a message to post with the document.

**Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?

4. Click Upload.

Your document, with any message you added, is posted to the wall or Conversation.

**What is document presence?**

Document presence lets you see who is looking at a document. You can see document presence information in your list of contacts, in the Social Bar under Trending, on a profile page, and in someone's activity status in the item's membership bar.

Document presence information also appears above a document preview, where the profile picture of everyone who is looking at a document appears. You can click a profile picture in this row to see options for co-browsing with this person, opening a One-on-One Conversation with them, or navigating to their profile.

**How do I view a file?**

There are several ways to view a file:

- To open a preview of the file in Oracle Social Network, click the file's thumbnail.
  
  To see a full-screen preview of the file, click Expanded View under the document.

  **Notes:**
  
  - When you preview the file in Oracle Social Network, you can add annotations to the file. For more information, see How do I annotate a document?
  
  - Document previews are limited to the first 100 pages of a document.
  
  - The list of file types you can preview is long, but there are some file types you can't preview, like an archive or executable file. Oracle Social Network supports adding these types of files but not previewing them. For these file types, you can download the file and open it on your computer.

- If the file was added from a cloud document store, you can open the file in the cloud document store's viewer. Under the document, click Open Document in Cloud Document Store, where Cloud Document Store is the name of the cloud document store.

  **Note:** To open the file, you must have permission to the file in the cloud document store. If you don't have permission, you get an error when you try to open it.
To download a file and open it on your computer, click **Download** under the document.

**Note:** If the document is from a cloud document store, a browser window opens, where you can download the file or view the online preview of the file. To download the file, you must have permission to the file in the cloud document store. If you don’t have permission, you get an error when you try to download it.

To view a list of all documents and folders in a Conversation or wall, click the **Documents** tab.

---

**How do I download a file to my computer?**

To download a document, click **Download** under the file.

**Note:** If the document is from a cloud document store, a browser window opens, where you can download the file or view the online preview of the file.

---

**How do I copy a file from Oracle Social Network to a cloud document store?**

1. Navigate to the file you want to copy.
2. While viewing the file in a list, click **Copy**, then select **Copy to Cloud Document Store**.
3. Select a cloud document store from the list, then click **Copy**.
   
   A status message appears briefly at the top of the add-in.

---

**How do I print a file?**

Download the file and print it like you would any other file (see **How do I download a file to my computer?**).

---

**How do I delete a file?**

You can delete documents you posted or documents on your profile wall.

**Notes:**

- If you are a service administrator, you can delete any document.
- If a document has multiple versions, and you delete the document from the messages list (rather than from the **Documents** tab), you delete only the selected version.

To delete a file, on the Conversation’s or wall’s **Documents** tab, under the document you want to delete, click **More**, then select **Delete**. Both the document and the associated message are deleted.

To restore a deleted file, in the messages list, locate the deleted message icon ( ∈) where the document message used to be, click ∈, then confirm that you want to restore the message. The message and document are restored.

**Note:** Only a service administrator, the person who posted the file, or the person who deleted the file can restore the deleted file.

---

**How do I annotate a document?**

Annotations are graphic markers and review remarks you can add to a document preview. You can place annotations in a document preview wherever you want them.
For example, using annotations you can add a pushpin marker to a document preview, and enter a comment about the document right where the pushpin is placed. Each person's annotations appear in a unique color, making it easy to follow who said what.

1. Open the document preview (see How do I view a file?).
   
   Note: Document previews are limited to the first 100 pages of a document.

2. Select a tool from the Tools menu.

   **Table 7–1 Annotation Tools**

<table>
<thead>
<tr>
<th>Tool</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>Select None when you want to move through the document without annotating text. Use the Pushpin tool to post an annotation to a pinpointed location. Use the Pen tool to create a free-form mark on the material you're annotating. Use the Highlighter tool to highlight one line of the material you're annotating. Use the Rectangle tool to draw a rectangle over the material you're annotating. Use the Ellipse tool to draw a circle over the material you're annotating.</td>
</tr>
</tbody>
</table>

   Notes:
   
   - The icon to the left of the Tools menu shows the tool that is currently selected.
   - If you don’t see the Tools menu at the top of a document on a person’s wall, the person does not allow other people to post annotations to his or her personal documents.

3. Click or highlight the text you want to annotate.
   
   - For the pushpin, click the location you want to annotate.
   - For the drawing tools, drag them to surround or highlight the text you want to annotate. Drawing tools include the pen, the highlighter, the rectangle, and the ellipse.

   A dialog opens where you can enter your remarks.

4. In the dialog, enter a remark.

5. Click Continue to continue annotating the document.

6. When you're finished adding annotations, at the top of the preview, click Publish.

**Associating Multiple Annotations**

You can mark several disconnected sections of text and combine them into a single annotation. After adding the first mark, with the annotation box still open, use the selected tool to make additional marks on the same page (you can’t join marks on multiple pages). After you add an annotation message and click Continue, the application draws a larger box around all the marks, and ties the single annotation message to all of them.
How do I view document annotations?

Annotations provide a way to comment on a document. You can view annotations when previewing the document.

1. Open the document preview. For more information, see How do I view a file?
   Note: Document previews are limited to the first 100 pages of a document.

2. Optionally, filter your view of annotations by user. Click the annotations drop-down list to select All Annotations, No Annotations, or a particular person.
   Each person who adds annotations is automatically assigned a color. When viewing all annotations, you can tell which annotations were added by the same person because they are all in the same color.

3. Click an annotation to view it.
   While viewing the annotation, you can reply to it, like it, add it as a favorite, or add a flag to it, just like any other message.

   Document annotations are also listed in the Conversation or on the wall where the document was uploaded. From there you can click the annotation to navigate to it in the document preview.

What is document co-browsing?

Document co-browsing lets you see another person’s browsing activity in a document preview. For example, you can use co-browsing to go through a slide presentation with others who are previewing the same document.

In Oracle Social Network for browsers, a row of profile pictures appears above a document preview. These are the people who are viewing the same document you are. You can click one of these pictures and select Browse With to follow that person’s movement through the document.

Others can click your picture to see what you are seeing. So, if you’re browsing, they see your movement, and if you’re following someone else, they see that person’s movement.

Here’s an example of document co-browsing among three people:

Meet John and Jane. Both of them work in different satellite offices. They are on a phone conference, and each is looking at a preview of the fourth quarter projections document in their web version of Oracle Social Network.

John is on page 1 of the preview, and Jane is on page 5. John clicks Jane’s profile picture above the preview, and selects Browse With. John’s preview now shows page 5, the page Jane is on at the moment. As Jane scrolls through the document, John’s view mirrors her movement.

In John’s view, Jane’s profile picture gets bigger than his and moves to the front of the row, before John’s. This tells him that he is seeing Jane’s view of the file preview.

John messages Otis, inviting him to join the teleconference and sending him a link to the file he and Jane are previewing. Otis dials in, opens his browser, and navigates to the file preview that John and Jane are viewing. He clicks John’s profile picture above the preview and selects Browse With. In Otis’ view, John’s profile picture gets bigger than Otis’ and Jane’s and moves to the front of the row. Otis sees what John sees; so, like John, Otis sees Jane’s movement through the file.

Note: If Otis wanted to, he could have clicked Jane’s picture. Multiple people can co-browse with the same person.
The three of them discuss the document and come to an agreement about projection changes. When the next steps are decided, they each leave the teleconference. Otis clicks John’s picture again and selects **Stop Browsing With** to leave the co-browsing session. John clicks Jane’s picture and does the same.

For more information, see **How do I co-browse a file with others?**

**How do I co-browse a file with others?**

To co-browse is to follow someone else's browsing session in a document preview. Multiple people can co-browse the same file (see **What is document co-browsing?**).

1. Open the document preview (see **How do I view a file?**).
2. In the row of profile pictures above the document preview, click the profile picture of the person you want to co-browse with.
3. Select **Browse With**.

   The selected profile picture gets bigger and moves to the front of the row to show it is selected, and your view of the document preview mirrors that person's view.

To return to your own view, click the enlarged profile picture, and from the resulting menu, select **Stop Browsing With**.

**How do I create a folder?**

1. On the Conversation’s or wall’s **Documents** tab, click **Add**, then select **New Folder**.
2. Enter a name for the folder name, then click **OK**.
   
   **Tip:** Folder names should be no longer than 256 characters.

**How do I rename a folder?**

1. On the Conversation’s or wall’s **Documents** tab, under the folder you want to rename, click **More**, then select **Rename Folder**.
2. Edit the folder name, then click **OK**.
   
   **Tip:** Folder names should be no longer than 256 characters.

**How do I download a folder?**

On the Conversation’s or wall’s **Documents** tab, under the folder you want to download, click **Download**.

**Note:** Downloading a folder downloads the folder and all its contents.

**How do I delete a folder?**

You can delete folders you created (as long as they don't contain anyone else's documents or folders) or folders on your profile wall.

**Notes:**

- If you are a service administrator, you can delete any folder.
- Deleting a folder also deletes all the files and subfolders it contains.
- Deleting a folder deletes it for all members of the Conversation or wall.
To delete a folder, on the Conversation's or wall's **Documents** tab, click **More**, then select **Delete**. The folder, its contents, and the associated message are deleted.

Alternatively, delete the message that includes the folder by clicking 🗑.

To restore a deleted folder and its contents, in the Messages list, locate the deleted message icon (🗑) where the folder message used to be, click 🗑, then confirm that you want to restore the folder. The message, folder, and folder contents are restored.

**Note:** Only a service administrator, the person who created the folder, or the person who deleted the folder can restore the deleted folder.
These topics discuss how to use flags:

- "Flags"

Flags

What do the flag icons mean?

Every message posted to a Conversation or wall shows a flag icon that tells you instantly whether a flag is assigned on the message. For example:

- If the flag icon is hollow ( ), then no flag is assigned on the message.
- If the flag icon is not hollow ( ), then one or more flags are assigned on the message. Flags assigned to you are red, flags assigned to others are blue.

A flag’s priority level reflects its urgency. Here's what the priorities mean and how their associated flags look:

- 🔄️ **For Your Information** (flag with "i")—Look at this when you have time.
- 🔄️ **Please Reply** (flag with black arrow)—Look at this, and let me know what you think.
- 🔄️ **Please Reply - Urgent** (flag with red arrow)—Look at this now, and let me know what you think immediately. (An email notification is always sent for Please Reply - Urgent flags.)

To get more information about a flag, you can either mouse over the flag to see a tooltip (for example, "For Your Information flag for another from Name.") or click the flag icon to see all the flag assignments.

Table 8–1 explains what each flag icon means.

<table>
<thead>
<tr>
<th>Flag Icon</th>
<th>Priority Level</th>
<th>Assigned To</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔄️</td>
<td>No flag assigned</td>
<td>No one</td>
</tr>
<tr>
<td>🔄️</td>
<td>Please Reply - Urgent</td>
<td>You</td>
</tr>
<tr>
<td>🔄️</td>
<td>Please Reply</td>
<td>You</td>
</tr>
</tbody>
</table>
### How do I assign flags to others?

1. Click the flag icon next to the message.
2. Assign flags using the following options:
   - To quickly assign a For Your Information flag to someone, click the flag next to the person.
   - To assign a particular flag to someone, select the type of flag in the drop-down list next to the person.
   - To quickly flag everyone, click **Flag All** (in the Not Flagged section), and select the type of flag you want to assign.
     
     **Note:** If you use the Flag All option, you might see a confirmation dialog asking you to verify that you really want to flag that many people. Your administrator determines when this dialog is triggered, depending on how many other people would be flagged by the action. If the number is very large, your administrator might choose to suppress notifications for the group; flags will be set, but no one will receive a notification.
   - To search for someone, enter part of the person’s name in the search box.

**Notes:**

- The person you flag might get an email, depending on what they’ve set up through their notifications. (Everyone gets an email when a **Please Reply - Urgent** flag is assigned; that can’t be controlled through the **Notifications** page.)
- When you change a flag priority level, the flag shows that it was assigned by you, even if someone else assigned the original flag.

**Tip:** To ensure flags say look at this now!, use them thoughtfully. A flood of flag notifications all at once or all the time can reduce their impact.

### To clear others’ flags:

1. Click the flag icon next to the message.
2. Assign flags using the following options:

---

#### Table 8–1 (Cont.) Flag Icons and Their Meanings

<table>
<thead>
<tr>
<th>Flag Icon</th>
<th>Priority Level</th>
<th>Assigned To</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔄</td>
<td>For Your Information</td>
<td>You</td>
</tr>
<tr>
<td>🔄</td>
<td>Please Reply - Urgent</td>
<td>You and others</td>
</tr>
<tr>
<td>🔄</td>
<td>Please Reply</td>
<td>You and others</td>
</tr>
<tr>
<td>🔄</td>
<td>For Your Information</td>
<td>You and others</td>
</tr>
<tr>
<td>🔄</td>
<td>Please Reply - Urgent</td>
<td>Someone other than you</td>
</tr>
<tr>
<td>🔄</td>
<td>Please Reply</td>
<td>Someone other than you</td>
</tr>
<tr>
<td>🔄</td>
<td>For Your Information</td>
<td>Someone other than you</td>
</tr>
<tr>
<td>🔄</td>
<td>Flags assigned to multiple people, but not you</td>
<td>Others, but not you</td>
</tr>
</tbody>
</table>
- To quickly remove all flags (whether assigned by you or not), click **Clear All** (in the Others Flagged section).

- To remove a particular flag, click **X** next to the person.

- To search for someone, enter part of the person’s name in the search box.

**Note:** When you clear a flag, the person who set the flag might get an email, depending on what they’ve set up through their notifications.

**How do I manage flags assigned to me?**

You can see all the flags assigned to you on the **Flags** page—from the navigation menu on the left, select **Flags**. From there you can view the flagged message (and document, if there is one), reply to the message, and clear your flag.

To clear a flag assigned to you, click the flag icon next to the message, and then click **X** next to your name (at the top of the flag pop-up).

**Note:** When you clear a flag, the person who set the flag might get an email, depending on what they’ve set up through their notifications.

**How do I view my flags?**

To view your flags, from the navigation menu on the left, select **Flags**.

You can filter or sort the flags to change your view.

- To view flags you assigned to yourself or others, click **Flags You Assigned**. To return to the flags assigned to you, click **Flags for You**.

- To filter the flags by type, select an option from the **Show** menu: **All**, **For Your Information**, **Please Reply**, or **Please Reply - Urgent**.

- To sort the flags, select options in the **Sort by** menu: sort by options (**Flag Date** or **Message Date**), and the order you want them sorted in (**Ascending** or **Descending**).

You can manage flags on the Flags page, the same as you would on an individual message. For more information, see **How do I assign flags to others?**
These topics describe collections and provide information about how to use them.

- "Collections"

Collections

What are collections?

As your lists of Conversations, Social Objects, people, and groups grow, you can organize the ones that focus on a common topic, project, or issue into an easy-access list, called a collection. A collection is a list of links that you create for navigating to Conversations and walls that relate to a common idea, goal, project, or other common interest.

Imagine that you’re working toward solving a supply-chain issue. One of your vendors was acquired by a significantly larger company, and it’s causing unexpected delays in component deliveries. You begin a series of Conversations covering possible ways to work around it: Expediting Deliveries, Alternate Sources, Designing Around Dependencies. As your list grows, you find you need a way to keep these related Conversations from getting swallowed up in the exponential increase of Conversations created by your co-workers.

Here’s where collections come in. You create a collection (Resourcing) and add to it the relevant Conversations you’ve created. You add members from your product team and key people from procurement. You post a message on its wall—Let’s get what we need on time!— and flag your new membership to bring it to their attention. Other colleagues create their own related Conversations and add them to the collection: Going Overseas; Local Sources; Redesign Roundtable.

Now when you want to review all relevant discussions, you can go to your collection and access every single Conversation relating to your project in one convenient location.

When you create your collections, you can give them meaningful names so it’s easy to identify their purposes. You can add Conversations and walls (including people’s walls and group walls) to a collection. You can also add Social Objects and other collections to a collection to create a hierarchy.

As you, your team, and other interested parties work towards solving resource issues, it becomes apparent that there are three main working areas:

- Helping your original source succeed
• Finding another source
• Redesigning around the dependency

The heads of each of these efforts create their own collections under Resourcing—Outreach, Re-Sourcing, and Exploring Redesign. They add the Conversations and walls that relate to their particular effort, and remove them from Resourcing. So now, when you open the Resourcing collection, you see three sub-collections, each containing links to all the Conversations and walls that are relevant to their area.

There is no limit to the levels of hierarchy you can create.

How do I create a collection?

To create a new collection:

1. From the navigation menu on the left, select Collections.
2. Click New Collection.
3. Enter a name for your collection, with a meaningful name that describes the purpose, common interest, or organizing principle of the collection.
4. Set its visibility, either Only visible to members (members-only collection) or Visible to any user (public collection).
5. Move groups and people to the right column to add them or to the left column to remove them. Use Ctrl+Click to select more than one person or group.

You can also search by entering part of a person’s or group’s name, and select them from the list that pops up.

If your administrator has configured the system to allow you to invite users, you can add someone who isn’t an Oracle Social Network user. Enter the person’s email address in the search box, then click Invite email_address. When asked if you want to send an invitation, click OK. When you save your changes an email will be sent to the person inviting the person to join Oracle Social Network.

By default, you see a list of recommended members. Click a tab to change your view:

• 📍 Recommendations—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add to a Conversation—the person is one of your contacts, similar Conversations the person is a member of, and other common actions.
• 🗄 Contacts—View a list of your contacts.
• 🔄 Groups—View a list of your groups.

Note: You can’t add outside users (people outside your company) to a collection. Outside users’ names appear in purple text, and they have icons (/at/) after their names. For more information on outside users, see Outside Users.

Continue by adding related items to your collection as described in How do I add or remove related or referring items?

How do I add or remove related or referring items?

Related items are the items that have been added to the collection you’re viewing. They can include Conversations, people’s walls, group walls, Social Objects, or other collections.
Referring items are the Social Object and other collections that the collection you’re viewing has been added to (as a related item). Think of them as parent items, where the parent item refers to one or more child items.

To add related item, on the Related tab, click + Add, and select whether to create a new item or add an existing item.

To add referring item, on the Referring tab, click + Add, and select an existing item.

To remove a related item, on the Related tab, click Edit, then click Remove next to the item you want to remove.

For more information, see How do I add or remove a related or referring item?

How do I join a collection?

1. From the navigation menu on the right, click Collections.
2. In the Show menu, select Available.
3. Open the collection you want to join.
4. Click the Join button at the top of the collection.

Why can't I see some items in a collection?

Collection members see only the Conversations, profile and group walls, Social Objects, and other collections they can access. For example, Jane has access to the Conversations Incident Reports, Incident Statistics, and Incident Cost Analysis. Jane’s coworker John has access only to the Incident Reports Conversation. All of the incidents Conversations are part of the collection Incidents. Jane and John are both members of this collection. In the Incidents collection, John can see only the Conversation Incident Reports, while Jane can see Incident Reports, Incident Statistics, and Incident Cost Analysis.

How do I view or edit a collection's membership?

The membership bar shows the collection’s members and their presence status (online, idle, offline). To edit a collection’s membership, click in the membership bar, then click Manage. For more information, see How do I view or edit an item’s membership?

How do I make a collection public or restrict access to members-only?

Click , then click Make Collection Publicly Available or Make Collection Members-Only. For more information, see How do I make an item public or restrict access to members-only?

How do I mute or unmute a collection?

If you have items in your object lists that you never look at (for example a collection that doesn’t apply to you), or you’re seeing updates in your recent activities or in your email digests about items you don’t care about, you can mute those items. Muting an item hides it and its activity from your view. It’s still there; you just won’t hear about it anymore. (The only exception is if you’re flagged on a message in a muted item, for which you will still be alerted by email based on your notification settings.)

To mute a collection, click , then select Mute Collection.

To unmute a collection, from the navigation menu, select Collections. In the Show menu, select Muted, then open the collection. Click , then select Unmute Collection.
Collections

For more information, see How do I mute or unmute an item?

**How do I show or hide membership messages in a collection?**

When a user is added to or removed from a collection a membership message is posted to the collection (for example, *The collection is now accessible to: John Doe*). If you’d prefer not to see those messages, you can hide them.

Click ⚒️, then select **Hide Membership Messages** or **Show Membership Messages**.

For more information, see How do I show or hide membership messages?

**How do I close, reopen, or discard a collection?**

You can close any collection you belong to, even if you didn’t create it. Closing a collection prevents people from adding new messages to it and removes it from people’s list of collections.

To close a collection, click ⚠️, then select **Close Collection**.

To reopen a collection, from the navigation menu, select **Collections**. In the **Show** menu, select **Closed**, then open the collection. Click ⚠️, then select **Reopen Collection**.

You can discard a collection only if you’re the sole member. A discarded collection is removed from all lists, including other collections and Social Objects it's related to.

To discard a collection, click ⚡️, then select **Discard Collection**.

For more information, see How do I close, reopen, or discard an item?

**How do I rename a collection?**

Click ⚡️, then click **Rename Collection**. For more information, see How do I rename an item?

**How do I change a collection's language?**

If you want system messages in a collection to appear in a language other than the default language, you can change the language setting. The language setting affects all members’ views of the collection.

Click ⚡️, then select **Set Language**. For more information, see How do I set the language for an item?

**How do I start a conference in a collection?**

Click ⚡️, then select **Start Conference**. For more information, see How do I start or end a conference?

**How do I download an archive of a collection?**

You can download an archive of a collection to view the collection offline or to save the content at a certain point.

To download an archive of a collection, click ⚡️, then select **Download** and save the file.

To work with the archive, unzip the files to your computer, and open **index.html**.

For more information, see How do I download an archive of an item?
These topics provide information about groups in Oracle Social Network. They describe how to create a group, manage group membership, and other types of people and group-related tasks. It includes the following sections:

- "Groups"

## Groups

### What are groups?

A group is a set of users that have a common position, goal, or concern. Using groups makes it easy to ensure that you include the right people in new conversations or when posting new documents and such. For example, you probably want to create groups for each department in your organization, but also for each project or committee, or for other designations that fit your company.

The great thing about using groups is that you can make sure no one is accidentally left out of a discussion. And, if someone new needs to be included, you can add them to the group rather than tediously adding them to each conversation, social object, and such that they need to know about.

### How do I view groups?

To view your groups:

1. From the navigation menu on the left, select **Groups**.
2. In the **Show** menu, select a filter to adjust your view:
   - **Yours**—The groups you’re a member of
   - **Favorites**—The groups you have marked as favorites
   - **Muted**—The groups you’ve muted

   For more information, see [How do I mute or unmute a group?](#)

3. Optionally, select options in the **Sort by** menu to change how the groups are sorted and whether they are sorted in ascending or descending order.
4. Click a listed group to open its wall. For information on posting to a group wall, see [How do I post, edit, reply to, or delete a message on a group’s wall?](#)

**Tip:** A group can be deactivated to prevent it from being added to more Conversations and to disable new posts to its wall. A deactivated group is *not* removed from the
Groups

Conversations it already belongs to. To view Deactivated Groups, select **Deactivated** in the **Show** menu. For more information, see **How do I deactivate or reactivate a group?**

Click a listed group to open its wall. You can also view the following details about a group:

- To see which items the group belongs to, click **Member Of**.
  
  Optionally, select an object type in the **Show** menu (for example, Conversations or collections) and select sort options in the **Sort By** menu.

- To see the documents posted to the group’s wall, click **Documents**.

- To see who’s in a group, scroll through the members in the membership bar, or click .

- To see any items the group has been added to as a related resource, click **Referring**.

**How do I create a group?**

To create a group:

1. From the navigation menu on the left, select **Groups**.
2. Click **New Group**.
3. In the **Group Name** box, enter a name for the group.
4. Under **Search for and Add New Members**, move groups and people to the right column to add them. For more information about adding members, see **How do I manage members in a group?**

To add a group description and profile picture, see **How do I edit a group’s name, description, or picture?**

**How do I manage members in a group?**

To add or remove members from a group:

1. Open the Group, click , then click **Manage**.

   **Note:** If you don’t see the **Manage** button, the group is managed externally (for example, through LDAP), so you can’t change the membership through Oracle Social Network.

2. In the Manage Members dialog, move groups and people to the right column to add them or to the left column to remove them. Use **Ctrl+Click** to select more than one person or group.

   You can also search by entering part of a person’s or group’s name, and select them from the list that pops up.

   If your administrator has configured the system to allow you to invite users, you can add someone who isn’t an Oracle Social Network user. Enter the person’s email address in the search box, then click **Invite email_address**. When asked if you want to send an invitation, click **OK**. When you save your changes an email will be sent to the person inviting the person to join Oracle Social Network.

   By default, you see a list of your contacts. Click a tab to change your view:

   - **Contacts**—View a list of your contacts.
   - **Groups**—View a list of your groups.
Notes:

- You can’t add outside users to a group. Outside users’ names appear in purple text, and they have icons ( (∞) after their names. For more information on outside users, see Outside Users.

- Some system configurations prevent you from removing yourself from a group. For example, you can’t remove yourself from a group that is synced up with a group in your LDAP directory.

- If you remove yourself from a group, you also remove yourself from every item the group is a member of. After you remove yourself from an item, you can’t add yourself back in. You must ask another member to do that for you.

How do I edit a group’s name, description, or picture?

To edit a group:

1. Open the group.
2. Click ✎, then click Edit Profile.
3. Edit the group’s name or description as desired.
4. To change the group’s picture, click the picture, then select Upload Photo. Select a .gif, .png, or .jpg file. After you select a picture, you can use the crop tools to re-size it. The picture is scaled to 150x150 pixels.

Note: If you use Mozilla Firefox and JAWS, you must disable pop-ups before you upload a profile picture. If you don’t disable pop-ups, the upload dialog won’t appear.

If you want to remove the group’s picture and just use the default avatar, click then picture, then select Remove Photo.

How do I post, edit, reply to, or delete a message on a group’s wall?

Like individual people, groups have their own identities, which include their own walls. On a group wall, group members can post messages and content of interest to the group.

You work with group wall messages like any other message. For more information, see Messages.

How do I start a Conversation with a group?

1. Open the group.
2. Click ✎, then click Create New Conversation.
3. Enter a title for the Conversation, and, optionally, change the visibility or membership of the Conversation. For more information, see How do I start a Conversation?

How do I mute or unmute a group?

When you mute a group, it affects only your view. Muting hides the group from your list of groups and prevents the group’s recent activities from appearing in your daily email digest, in the Recent Activities panel, and on the Overview page. Here are some more facts about muting:

- Muting hides the group from the Yours and Favorites lists on the Groups page.
Flags assigned on a message in a muted group wall still appear in your daily email digest (for information about the daily email digest, see How do I set up or change my notifications?).

You can continue to post messages to a muted group's wall.

**To mute a group:**
Open the group, click , then select Mute Group.

**To view muted groups:**
From the navigation menu on the left, select Groups, then, in the Show menu, select Muted.

**To unmute a group:**
Open the muted group, click , then select Unmute Group.

**How do I deactivate or reactivate a group?**
You can deactivate a group you belong to, even if you didn't create it. Deactivating a group prevents it from being added to more Conversations, disables new posts to its wall, and moves the group to the Deactivated list in the Groups panel. A deactivated group is not removed from the Conversations it already belongs to.

**To deactivate a group:**
Open the group, click , then select Deactivate Group.

**To view deactivated groups:**
From the navigation menu on the left, select Groups, then, in the Show menu, select Deactivated.

**To reactivate a group:**
Open the deactivated group, click , then select Activate Group.
These topics describe how to use conferences:

- "Conferences"

## Conferences

### What are conferences?

A conference is simply a web conference that you start from a Conversation or wall within Oracle Social Network. You can configure your system to use any of the supported web conference applications. When you start a conference from Oracle Social Network, users can see that the conference has started and click a button to join the conference. Additionally, if you record the conference, the recording is posted to the Conversation or wall from which you started to conference.

### Which conference applications are supported?

Conversations include a conference feature that you can use to start and join web conferences. Both WebEx and Avaya conference applications are supported in Oracle Social Network.

You need an account with your conference provider, like WebEx, to start a conference. But you do not need an account to join one.

Whenever a Conversation or wall is hosting a conference, ![icon] appears to the left of the Conversation name.

### How do I configure conference account settings?

Conference account settings let you pre-populate your conference application with your name and password in Oracle Social Network. Then, when you start conferences from Oracle Social Network, the conference login dialog opens with all fields filled out.

1. Go to the **Conferencing** page under **Settings**.

   **Note:** The fields that you see on the **Conferencing** page are read dynamically from the server and might not be the same as the fields described in the next steps. The fields are described here for example only.

2. In the **Site Name** field, enter the name of your conference instance.

   For example, enter **acmeweb**. You can get this name from your administrator.
3. In the **User Name** field, enter your conference account user name.

4. In the **Password** field, enter your conference account password.

5. Click **Save Changes**.

### How do I start or end a conference?

Before you can start a web conference:

- The server you are connected to must support web conferences.
- You must have an account with a supported web conference service.

1. Open the Conversation, Social Object, collection, or group where you're going to start the web conference.

   **Note:** You can't start a web conference from a user wall.

2. Click , then select **Start Conference**.

3. In the Start Conference dialog, select your conference service, set the values as necessary, then click **Start**.

   **Note:** If you want to save your conference settings, select **Remember Conference Settings**.

   Your web conference application opens.

To end the conference, click , then select **End Conference**.

**Note:** If you record your conference, shortly after the conference has ended, a link to the recording is posted to the Conversation or wall where the conference was started.

### How do I join a conference?

While viewing a list of Conversations, Social Objects, collections, or groups, click next to the item name. The item opens and takes you right into the conference.

Alternatively, while viewing a Conversation or wall, click **Join** in the banner.

**Note:** If the conference is held in a public item that you haven't joined, clicking takes you to the item where you must join the item before you can join the conference.

To leave the conference, close the conference window.

To rejoin the conference, return to the Conversation or wall and click **Rejoin** in the banner.

**Notes:**

- Your administrator might hide web conferencing in your application instance.
- If the conference is recorded, shortly after the conference has ended, a link to the recording is posted to the Conversation or wall where you joined the conference.
Finding Content

This section talks about finding content through search, hashtags, and favorites.

- "Finding Content"

Finding Content

How do I perform a global search?

1. Enter at least two characters in the search box at the top of the Social panel, then press Enter or click Q.
2. Optionally, select a filter from the Show menu to show a particular result type (for example, Conversations or documents).
3. After filtering by a result type, you see some additional sort and filter options:
   - **Sort By**: Select how to sort your results.
   - **Posted By**: Limit your search to messages or documents posted by a particular person.
   - **Posted When**: Limit your search to messages or documents posted within a particular period.
   - **Updated By**: Limit your search to Conversations, collections, hashtags, or Social Objects updated by a particular user.
   - **Updated When**: Limit your search to Conversations, collections, hashtags, or Social Objects updated within a particular period.
   - **Created By**: Limit your search to Conversations, collections, groups, or Social Objects created by a particular user.
   - **Created When**: Limit your search to Conversations, groups, or Social Objects created within a particular period.
   - **Includes Member**: Limit your search to Conversations, collections, groups, or Social Objects with a particular member.
   - **Favorites Only**: Limit your search to only your favorite Conversations, collections, or Social Objects.
   - **Include Public**: Control whether to show public Conversations, collections, or Social Objects in your results.
Finding Content

- **Include Closed**: Control whether to show closed Conversations, collections, or Social Objects in your results.

- **Document Type**: If you filter your results to show documents, you can select which types of documents to show.

- **Include Deactivated**: Control whether to show deactivated groups in your results.

Click a result to open it.

**How do I search within a Conversation or wall?**

- To find unread messages, click the unread messages count ( ) in the toolbar, and use the up and down arrows ( ) to navigate through the unread messages.

- To find flags assigned to you, click the flag count ( ) in the toolbar, and use the up and down arrows ( ) to navigate through your flags.

- To find text in the messages or documents, click the search icon in the toolbar, enter the text you want to search for, then press Enter. The matching text is highlighted in the messages. Use the up and down arrows ( ) to navigate through the results.

**How does search work?**

Search is full-text: It looks in titles as well as in content.

Search looks for terms, phrases, and excluded terms. For example:

- **brown cow** (no quotes) finds all results that contain both "brown" and "cow." A result is treated as more relevant if the search terms appear together in order ("brown cow"). A result is also more relevant if it's in the object's title. The result set also includes stemmed variants, like "browned cows."

- "brown cow" (quotes) finds all results that contain the exact phrase "brown cow." It doesn't find "brown cows" or "the cow is brown."

- **brown cow -dairy** (no quotes) finds all results that contain the words "brown" and "cow" but do not contain the word "dairy."

Global search provides two types of search results: *substring* and *keyword*.

Substring search results appear in the search results pop-up and include items with names that match your search terms. In substring search results, you can click a result type, like Conversations, to view just the results for that type.

Keyword search results:

- Include items with names or content that match some or all of your search terms, or variations on some or all of your search terms (like run, runs, ran, running).

- Are listed by default according to how relevant they are to your search terms. You can change the sorting to date order. After changing your sort to date order, you can click the Sort by menu again, to change the sort from Descending to Ascending (to see the oldest results first).
On the search results page, you can use filters to narrow your results to just the type of items you want to see. For example, click **Documents** to see only the documents that were returned by your search.

After you select a filter, you can sort or further filter by the user who posted the item or the date it was posted. In the **Posted By** box, enter the user whose posts you want to see in the results. Select the user from the drop-down list. You can combine the Posted By filter with item type filters to narrow your results further.

**What are hashtags (#) and how do I use them?**

You can use a hashtag (#) in a message to call out a meaningful term or topic, making it easy to find all content associated with that term or topic. For example, imagine *discounts* is a popular topic in your group, but the discounts can come in the form of dealer incentives, cash-back deals, seasonal discounts, or any other number of forms. How do you find what everyone is saying about all those things? You use a hashtag. Every time you or your colleagues say something about some form of discount, you include the hashtag `#discounts`.

You can then click a `#discounts` hashtag link to view a list of all messages in otherwise unrelated Conversations and walls that contain the hashtagged term.

**Adding Hashtags**

You can add one or more hashtags to any message (comments, replies, annotations, and document messages) simply by typing `#` before a term. When you start typing a hashtag by typing `#` plus at least one letter, existing hashtags (ones that have been used before) appear for you to select from.

**Tips:**

- You can include the following characters in a hashtag: A through Z, a through z, 0 through 9 and `_`.
- A hashtag can be a maximum of 25 characters (not including the `#`).

**Searching for and Viewing Hashtags**

When you perform a search, available hashtags are included in the results. You can limit your search results to hashtagged messages by starting your search term with a hashtag (`#`).

Wherever you see them, hashtagged terms are clickable and will open a hashtag page where all messages that include that hashtag are shown. So clicking `#discounts` in any Conversation opens a `#discounts` page which shows any message (in a Conversation, document annotation, wall, or such) that you have access to that includes the discounts hashtag.

On the hashtag page, you can filter the messages to show all messages that include the hashtag (All Results) or just those messages posted by people you are following (By People You Follow).

**Following Hashtags**

You can also follow hashtags. When you follow a hashtag, messages in public Conversations and walls that contain that hashtag appear in recent activities (from the navigation menu on the left, select **Overview**), even if you are not a member of those Conversations or walls.

To follow a hashtag, click the hashtag to open the hashtag page, then click **Follow** at the top of the page. To stop following the hashtag, click **Unfollow**.
How do I mark a wall, Conversation, or message as a favorite?

Marking an item as a favorite is an easy way to keep track of the items you use most frequently. To mark an item as a favorite, click ⭐ next to the item; click the star again to unmark it.

While viewing a list of objects (Conversations, collections, groups, or Social Objects), you can limit the list to your favorites by clicking Show, then clicking Favorites.

To view all your favorites, including messages, from the navigation menu on the left, select Favorites.

You can filter or sort your favorites to change your view.

- To filter your favorites by object type (for example, messages, documents, or groups), select an option from the Show menu.

- To sort your favorites, select options in the Sort by menu: sort by options (Date Added or Name), and the order you want them sorted in (Ascending or Descending).
These topics discuss how to customize your settings and use accessibility in Oracle Social Network settings:

- "Settings and Accessibility"

## Settings and Accessibility

### How do I change my preferences?

You can customize your Oracle Social Network experience by using the Settings option in your browser.

1. Click the arrow next to your name at the top of the application, then click **Settings**.

2. Click **Preferences**.

   Use the options on the Preferences page to:
   - Change your interface language or date format.
     - If you change the primary language, all the buttons, labels, and so on are changed to the language you choose. The things you supply, like messages and documents, are in the language used when you posted the message or when the file was created.
     - **Note:** You can also specify a language for just a single Conversation. See **How do I set the language for an item?**
   - Specify whether to use the Enter key or the Post key to post messages.
   - Control whether you see a message every time someone joins or leaves a Conversation or wall.
   - Control whether your followers or only you can post to your wall
   - Control whether your followers or only you can reply to messages and annotate documents on your wall
   - Mark all messages in every Conversations as read, so you don’t have to do it on a Conversation-by-Conversation basis.

3. To change your password, click **Password**. If you get a message saying you can’t change your password, that means your company has a policy that prohibits you from changing it.
How do I set up or change my notifications?

Notifications let you know when certain events occur in Oracle Social Network, like when someone flags you, or when someone clears a flag that you have set. When you’re using Oracle Social Network in your browser, notifications are sent via email. You can set up your notifications to send emails just for the events you’re interested in.

1. Click the arrow next to your name at the top of the application, then click Settings.
2. Make sure Notifications is selected on the left.
3. In the Email field, type the address where you want your notifications to be sent.
4. Use the check boxes to indicate the events you want to be notified about. Set the time and date stamp format, if desired.

   Note: Regardless of the options you set, when a Please Reply - Urgent flag is assigned to you, you’ll always receive an email notifying you of the assignment.

5. If needed, you can turn off notifications to your mobile devices. This is useful if your device is misplaced, lost, or stolen. Note that this disconnects all of the mobile devices you connect to Oracle Social Network, so you’ll need to reconnect each one if you want to use it again.

   To turn off some or all of your notifications to a specific mobile device, log in to your mobile application and change your notifications in your account settings. (See Using Oracle Social Network on Your iPhone: How do I change notification settings for a selected Conversation or wall?, Using Oracle Social Network on Your iPad: How do I change notification settings for a selected Conversation or wall?, or Using Oracle Social Network on Your Android Device: How do I change notification settings for a selected Conversation or wall?)

How can I connect to my documents in the cloud?

Assuming your administrator has enabled the use of a cloud document service, like Google Drive, all you have to do is associate your account information with Oracle Social Network to be able to add those documents to your Conversations and walls.

   Note: Documents formatted in Google's proprietary format are automatically converted to PDF when downloaded to Oracle Social Network. You can't copy Google proprietary format documents back to Google Drive, but you can copy the PDF version of these documents. Unlike other file types, Google proprietary documents converted to PDF are not automatically returned to their original location in Google Drive.

Annotation marks and comments are not included when you copy from Oracle Social Network back to a cloud document service.

1. Click the arrow next to your name at the top of the application, then click Settings.
2. Click Cloud Documents.
3. In the section for your cloud document service, supply your account information.
   - For Dropbox or Google Drive, click Authorize, log in to your account, then click Accept.
   - For other cloud document services, enter your username and password, then click Save.

The next time you add a document in Oracle Social Network, you’ll be able to access your documents in the cloud in the file picker.
How is the social network accessible?

You can use your keyboard to navigate your social network. To see a list of keyboard shortcuts, make sure focus is in the social network area of your application, and press the question mark key (?). For more information, see What keyboard shortcuts are available to the social network?

Tips

- To navigate between list items and messages, use up and down arrow keys.
- To navigate into the elements of a listed item, like a Conversation, press Shift+Enter.
- To manage flags in the Manage Flags pop-up, press Enter to assign or change a flag, or press Delete to clear a flag.
- When you press Esc to close a dialog, focus moves to the button used to open the dialog, even if you used a keyboard shortcut to open the dialog.

Notes:

- The supported screen reader browser is Mozilla Firefox 26 or later with the latest version of your screen reader software.
- If you use a Mac, by default Tab moves to the next object that isn’t a link. Therefore, to move to the next tappable element, you must use Option+Tab or change your browser preferences to switch the behavior.

There are a few known issues with screen readers:

- When you search in the Manage Membership dialog, your screen reader might not indicate that focus has moved from search results to the Groups and Contacts list. You also might not be able to select the first listed result.
- Your screen reader will read annotation messages in a Conversation or on a wall, but it can’t also describe where it is placed in a document preview. An annotated document preview is essentially a picture of a document with marks on it, and screen readers do not read pictures.

For information about accessibility in the Add-In for Microsoft Outlook, see How do I increase the add-in’s accessibility?

For information about Oracle and accessibility, visit the Oracle Accessibility Program at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

What keyboard shortcuts are available to the social network?

Your social network offers keyboard shortcuts and support for keyboard navigation. To see a list of keyboard shortcuts, make sure focus is in the social network area of your application, and press the question mark key (?).

Note: If you’re using a screen reader, the social network keyboard shortcuts work only if your focus is in application mode (for example, in a list of messages in a Conversation or on a wall), so they won’t otherwise interfere with your screen reader’s keyboard shortcuts. However, you can use your screen reader’s pass-through or bypass functionality if you want to use the social network keyboard shortcuts outside of application mode.

Keyboard shortcuts are available for the following types of actions:

- **Application**—Use these shortcuts anywhere they are relevant in the application. For example, pressing ESC works when you’re in a menu or dialog, and doesn’t
work when you’re not; pressing "j" or "k" works in a list, but doesn’t work outside a list.

- **Jumping**—Use these shortcuts anywhere in the application. They jump you to a different view or to the current view’s navigation actions.

  **Notes:**
  - Jumping shortcuts are available only when the navigation menu is in view. When the navigation menu is not in view, the social network does not respond when you use jumping shortcuts.
  - A Social Object’s wall does not show the navigation menu when you open it from its details page.

- **List Actions**—Use these shortcuts with the list item that currently has focus.

- **Conversation/Wall Actions**—Use these shortcuts within Conversations and on walls.

  **Note:** Some of these shortcuts work regardless of the current focus, for example, "t," "b," "o," "u." Some of them operate differently depending on the current focus, for example, in a Conversation "m" and "v" mark all messages as read and mark/unmark the Conversation as a favorite; on a message, "m" and "v" mark the message as read and mark/unmark it as a favorite.

- **Message Actions**—Use these shortcuts with the message that currently has focus.

- **Post and Reply Entry Actions**—Use these shortcuts within the post and reply entry areas.

  You can add one or more hashtags to any message (comments, replies, annotations, and document messages) simply by typing "#" before a term. When you start typing a hashtag by typing "#" plus at least one letter, existing hashtags (ones that have been used before) appear for you to select from. Use the up and down arrows to select an existing hashtag, then press Enter or Tab to use the selected hashtag. For more information, see What are hashtags (#) and how do I use them?

- **In-Line Recommendation Actions**—Click the left or right arrow keys within the in-line recommendation area to see the previous or next recommendation.
Here are some suggestions for using Oracle Social Network more effectively.

**Tips and Tricks**

**How can I see usage information about my session?**

If you click the arrow next to your name at the top of the application, you might see an option called **Analytics**. This option is not available to all instances of Oracle Social Network, but if you see it, you can click it to see your personal usage statistics. If you're an administrator, you'll see more global information about the Oracle Social Network instance, as well as individual user information.

**How do I access the administration features?**

If you're an administrator, you can manage the Oracle Social Network instance by clicking the arrow next to your name at the top of the application, and selecting **Administration**.

*Note:* The **Administration** option is displayed only if you are logged in as a user with administrator privileges.

**I'm a developer. How do I get to the developer's website?**

If you're a developer and the developer site is enabled for your company, you can access that site by clicking the arrow next to your name at the top of the application, then clicking **Developers**.

**Where can I find additional tips and troubleshooting information or report a problem?**

The Oracle Social Network Community Forum is the place to go to get more information about real-world use cases, tips, and troubleshooting. Share info with your peers, or get advice from the people who helped to design and build Oracle Social Network.

If you're in a browser, click the arrow next to your name at the top of the application, then select **Community**, or go there directly with this URL:

If you’re using Outlook, Desktop, or mobile, look for a Community option on the Help, Settings, or About menus.

**How do I get support?**

Click the arrow next to your name at the top of the application, then click Support. Then follow the numbered steps on the Support page.

You can also visit the Oracle Social Network Community Forum (see Where can I find additional tips and troubleshooting information or report a problem?).

**How do I find out more about the Oracle Social Network product?**

The Oracle Social Network has a Facebook presence that includes product news. You can view the Facebook feed by clicking the arrow next to your name at the top of the application, and selecting Product News.

**One of my colleagues has left the company, yet his name and avatar still appear in Conversations. Is there a way to remove him?**

You can remove anyone from a Conversation’s membership bar by clicking Add People to display the Update Members dialog. However, you can’t remove the name and avatar from posts someone made before leaving the company, because that person might have been assigned flags or assigned flags to others. Leaving the person’s posts in Conversations allows other Conversation participants to decide how to deal with those flags; for example, reassigning or simply clearing them. (Note that the person’s account is disabled, so the avatar should be in permanent offline status.) In addition, although someone might have left the company, his or her posts might still supply valuable information, and they also provide an accurate historical record of what transpired within the Conversation(s). Stripping the person’s name and avatar from those posts would essentially leave those posts unattributed, likely causing a great deal of confusion for anyone reading the Conversation end to end.

**How can I search for a term within a single Conversation?**

The Outlook add-in provides controls for this:

1. Open the Conversation you want to search.
2. Click Find messages in Conversation, which is the icon that looks like a magnifying glass.
3. In the Find drop-down, select Messages.
4. Enter the search term in the Text field.
5. Use the up and down arrows to step through the search results.

If you’re using Oracle Social Network in your browser, it’s still possible to search for individual keywords across all Conversations:

1. Enter the search term in the search field at the top.
2. Press Enter or click the search icon to display the full-text search results.
3. In the search results, click Conversations on the left.
4. Find the Conversation you want, then click Show more messages to see all the messages containing the keyword.
How can I flag a group?
Because you’ll typically want to set a different priority level for each member of a group individually, based on each person’s level of responsibility relative to the post, Oracle Social Network does not currently provide the ability to flag all members of a group simultaneously.

How can I link to a particular post in a Conversation?
Although there’s no formal support for this in Oracle Social Network, here’s a handy workaround:
1. In your browser, find the message you want to link to.
2. Click ⭐ to mark it as a favorite.
3. Click the post you marked in step 2 to go to it.
4. In the browser address bar, copy the URL, then paste it where you want the link to appear.

I created a group and would like others to be able to request membership to it. Is this possible?
Not formally, but consider starting a public Conversation called something like “Group Access Requests”, where you can announce the creation of groups and allow interested parties to post a message requesting membership. Then you can go through and add those folks to the requested groups explicitly.

I’m a member of a group that frequently gets added to a lot of Conversations I have no interest in. I’m also a member of a collection that spawns a lot of Conversations I don’t care about. What can I do to stop this?
Although you can remove yourself from a group or collection at any time, do so only after careful consideration. Once you’re outside the group or collection, you can be added back in only by someone on the inside, and you might miss out on valuable information in the meantime. A better alternative is to simply mute the Conversations you don’t want to keep track of. By default those Conversations will no longer appear in your Conversations list, although you can see them at any time by applying the Muted filter. (And if you’re flagged in a Conversation that you’ve muted, you’ll still be notified.)

How can I work offline?
You have several options:

- If you’ve downloaded the Desktop application, you can take advantage of its Offline Briefcase feature. Before you go offline, scan through your Conversations and choose the ones you want to download into your virtual briefcase. When offline, bring up the Desktop application and open your briefcase. Open a Conversation, then make new posts, respond to posts, add documents—in other words, interact just as you would if you were online. When you get back online, just click a button to upload all Conversations with the changes you’ve made.

- While in a Conversation, you can click More, then click Download to download the Conversation to your hard drive. The resulting zip file contains a directory for documents belonging to the Conversation, as well as an index.html file with all the Conversation’s posts. (The Offline Briefcase, by contrast, has everything integrated
for you.) When you open the index file, you can use the Reply link to respond to a post via email. As soon as you’re back online and open your email client, your messages are posted to the Conversation(s).

- If you’ve set your notifications to send an email digest at the end of each day, you can also view that while offline, provided that your email application provides such a mode.

**How do I know what version I’m using?**

Version information is available on the About page, which appears in different places depending on if you’re using the web, Outlook, Desktop, or a mobile client:

<table>
<thead>

Getting Started with the Oracle Social Network Add-In for Outlook

What is the Oracle Social Network add-in for Outlook?

The add-in is the Oracle Social Network client that is integrated with your Microsoft Outlook application. Use the add-in to access your Oracle Social Network Conversations, collections, documents, flags, Social Objects, and other features within Outlook.

The add-in supports both 32 and 64 bit versions of Microsoft Outlook 2007, 2010, and 2013.
For more information, see:

- How do I download and install the add-in for Outlook?
- How do I increase the add-in’s accessibility?
- What keyboard shortcuts are available for navigating the add-in for Outlook?

How do I download and install the add-in for Outlook?

2. Get the .exe installation file from the Downloads page in the full version of Oracle Social Network (in your browser):
   a. Log in to Oracle Social Network in your browser.
   b. Click the arrow next to your name at the top of the application, then click Downloads.
   c. On the Downloads page, click the link under Add-in for Microsoft Outlook to start the download.
3. Run the .exe installation file.
4. Follow the instructions in the install wizard.

How do I log-in to the add-in for Outlook?

**Important:** If you received an email invite to join Oracle Social Network, you must log in through the web client and change your temporary password before you use the add-in for Outlook. Click the link in the invite to open the web client.

After you install the add-in, the first time you open Outlook, you’ll be prompted for your Oracle Social Network login information:

1. If necessary, in the **Server** field, enter the URL to your Oracle Social Network client.
   
   For example, if your Oracle Social Network URL is acme.social.us1.oraclecloud.com/osn then you would enter acme.social.us1.oraclecloud.com/client.

2. In the **User Name** field, enter your Oracle Social Network user name.
3. In the **Password** field, enter your Oracle Social Network password.
4. To log in automatically in future sessions, select **Remember password**.
5. To give yourself the option of selecting a different account at login, select **Ask for an account at startup**.
6. Click **Sign In**.

You can pre-configure one or more Oracle Social Network accounts and easily switch between them. For more information, see:

- How do I set up a new account?
- How do I switch between add-in accounts?

Understanding add-in panel and action icons

In addition to labels, the add-in for Outlook uses many icons to make destinations, object types, and actions easy to discover. For example, the navigation bar at the top of
the add-in uses icons to represent the add-in's main destinations. Your add-in instance might show all or a selection of these icons.

This table catalogs the main add-in icons and explains what they're for.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Overview</td>
<td>Shows the latest actions of the people you follow, the latest posts in the Conversations and walls you’re a member of, and messages that include hashtags you follow (from public Conversations and walls, even those you are not a member of).</td>
</tr>
<tr>
<td></td>
<td>New Conversation</td>
<td>On the Overview panel, these icons are available for creating a new Conversation and accessing Overview panel options. Options include creating a new Conversation and filtering your list of messages.</td>
</tr>
<tr>
<td></td>
<td>Options</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Flags</td>
<td>Shows a list of flags assigned to you or that you assigned, depending on the filter you apply. For more information, see Using Flags in the Add-In for Outlook.</td>
</tr>
<tr>
<td></td>
<td>Options</td>
<td>The Options menu on the Flags panel has filtering and sorting options for your list of flag assignments.</td>
</tr>
<tr>
<td></td>
<td>Favorites</td>
<td>Shows the items you marked as a favorite. The list can include messages, documents, Conversations, walls, Social Objects, and collections. For more information, see Liking and Adding Favorites in the Add-In for Outlook.</td>
</tr>
<tr>
<td></td>
<td>Options</td>
<td>The Options menu on the Favorites panel has filtering and sorting options for your list of favorites.</td>
</tr>
<tr>
<td></td>
<td>Conversations</td>
<td>Shows the Conversations you’re a member of or that are available to you to join (public Conversations), depending on how you filtered and sorted the list. For more information, see Using Conversations in the Add-In for Outlook.</td>
</tr>
<tr>
<td></td>
<td>New Conversation</td>
<td>On the Conversations panel, these icons are available for creating a new Conversation and accessing Conversation panel options. Options include creating a new Conversation, viewing active conferences, and filtering, sorting, and arranging your list of Conversations.</td>
</tr>
<tr>
<td></td>
<td>Options</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Collections</td>
<td>Shows the collections you created or are a member of. For more information, see Using Collections in the Add-In for Outlook.</td>
</tr>
</tbody>
</table>
At the bottom of the panel, icons are available for opening three menus:

- **Accounts** — The Accounts menu has options for switching your view to additional Oracle Social Network accounts, opening the Manage Accounts dialog to create or delete accounts, and working offline or reconnecting to the server. (For more information, see What are Oracle Social Network accounts? and Working Offline.)

- **Help** — The Help menu has options for opening Oracle Social Network Help Center, contacting Oracle Support, navigating to discussion forums about Oracle Social Network (Community), and accessing the About dialog with its links to the latest versions of the add-in and troubleshooting help (see How can I troubleshoot my accounts?).

- **Settings** — The Settings menu has options for navigating to your wall or your preferences, editing your profile, displaying message fragments or full view, monitoring file transfer progress, or opening the full view of Oracle Social Network. (For more information, see Configuring Your Settings for the Add-In for Outlook.)

### What do the icons next to items mean?

When item names appear in selection lists, they are accompanied by small icons that identify the item’s type. Here’s what they mean.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Create a new Collection]</td>
<td>Create a new Collection</td>
<td>On the Collections panel, these icons are available for creating a new collection and accessing Collections panel options. Options include creating a new collection and filtering, sorting, and arranging your list of collections.</td>
</tr>
<tr>
<td>![Options]</td>
<td>Options</td>
<td></td>
</tr>
<tr>
<td>![Find documents]</td>
<td>Find documents</td>
<td>On the Documents panel, these icons are available for searching exclusively for documents, adding documents from your local file system or your cloud document store, and accessing Documents panel options. Options include finding, adding, and filtering documents.</td>
</tr>
<tr>
<td>![Add Documents]</td>
<td>Add Documents</td>
<td></td>
</tr>
<tr>
<td>![Options]</td>
<td>Options</td>
<td></td>
</tr>
<tr>
<td>![People and Groups]</td>
<td>People and Groups</td>
<td>Depending on which tab you select, the People and Groups panel shows your list of contacts; a list of the groups you are a member of; and lists of people who follow you, who you follow, and people recommended to you as contacts. For more information, see Working with People and Groups in the Add-In for Outlook.</td>
</tr>
<tr>
<td>![Contacts]</td>
<td>Contacts</td>
<td></td>
</tr>
<tr>
<td>![Groups]</td>
<td>Groups</td>
<td></td>
</tr>
<tr>
<td>![People You Follow]</td>
<td>People You Follow</td>
<td></td>
</tr>
<tr>
<td>![Your Followers]</td>
<td>Your Followers</td>
<td></td>
</tr>
<tr>
<td>![Recommendations]</td>
<td>Recommendations</td>
<td></td>
</tr>
<tr>
<td>![Social Objects]</td>
<td>Social Objects</td>
<td>Shows all the Social Objects you are a member of. Click this icon to open a selection list of all types of Social Objects. For more information, see Using Social Objects in the Add-In for Outlook.</td>
</tr>
</tbody>
</table>
How do I increase the add-in's accessibility?

When the default setting Enable Screen Reader is enabled in the add-in for Outlook, messages are accessible (this view is called compact view). In compact view, you can access the full text of any message by navigating to the message, which automatically opens the full message in a tooltip. In compact view, you can also navigate to any message that you posted and press Enter to open the full message in an editor.

**Note:** To ensure your screen reader delivers the entire message, be sure to set it to its most verbose level.

For more information, see:
- How do I enable screen reader mode?
- What keyboard shortcuts are available for navigating the add-in for Outlook?

**How do I enable screen reader mode?**

Click 🌞 at the bottom of the panel, then click **Enable Screen Reader Mode**.

Messages are now shown in compact view (where no more than two lines of any message are shown), and the add-in for Outlook is switched to accessibility mode.

Alternatively, you can enable screen reader mode in Preferences:

1. Click 🌞 at the bottom of the panel, then click **Preferences** to open the User Profile dialog.
2. Under **Conversation View**, select **Enable Screen Reader Mode**.
3. Click OK.

**What keyboard shortcuts are available for navigating the add-in for Outlook?**

- Ctrl+Alt+Shift+T—Toggle the add-in panel between open and closed
Disabling and Re-Enabling the Add-In for Outlook

How do I disable the add-in for Outlook in Outlook 2007?

The Oracle Social Network add-in for Outlook is like any other Outlook add-in. The steps you take to disable it are the same for all types of add-ins.
1. From the **Tools** menu, select **Trust Center** to open the Trust Center dialog.
2. Click **Add-ins** to show the list of Outlook add-ins.
3. Verify that **Oracle Social Network Add-In for Outlook** is included in the list.
4. At the bottom of the dialog, ensure that **COM Add-Ins** is selected next to **Manage**.
5. Clear the check box **Apply macro security settings to installed add-ins**.
6. Click **Go** to open the COM add-ins dialog.
7. Clear the check box next to **Oracle Social Network Add-In for Outlook**.
8. Click **OK**.

**How do I disable the add-in for Outlook in Outlook 2010 or 2013?**

The Oracle Social Network add-in for Outlook is like any other Outlook add-in. The steps you take to disable it are the same for all types of add-ins.

1. From the **File** menu, select **Options** then **add-ins** to open the Trust Center dialog with add-ins selected.
2. Verify that **Oracle Social Network Add-In for Outlook** is on the list of add-ins.
3. At the bottom of the dialog, ensure that **COM Add-ins** is selected next to **Manage**.
4. Clear the check box, **Apply macro security settings to installed add-ins**.
5. Click **Go** to open the COM add-ins dialog.
6. Clear the check box next to **Oracle Social Network Add-In for Outlook**.
7. Click **OK**.

**How do I re-enable the add-in for Outlook in Outlook 2007?**

If you have disabled the add-in for Outlook, in Outlook 2007, you can re-enable it as you would any other Outlook add-in.

1. First check whether Outlook has added the add-in to their **Disabled Items** list:
   - **a.** On the **Help** menu, select **Disabled Items** to open the Disabled Items dialog.
   - **b.** If the add-in is listed in the dialog, go to step **c**. Otherwise, go to step **2**.
   - **c.** Select **Oracle Social Network Add-In for Outlook**, and click **Enable**.
2. From the **Tools** menu, select **Trust Center** to open the Trust Center dialog.
3. Click **Add-ins** to show your current list of Outlook add-ins.
4. Verify that **Oracle Social Network Add-In for Outlook** is included on the list.
5. Next to **Manage**, select **COM Add-ins**.
6. Clear the check box **Apply macro security settings to installed add-ins**.
7. Click **Go** to open the COM add-ins dialog.
8. In the dialog, select the check box **Oracle Social Network Add-In for Outlook**.
9. Click **OK**.
How do I re-enable the add-in for Outlook 2010 or 2013?

Once you have disabled the add-in for Outlook, in Outlook 2010 or 2013, you can re-enable it as you would any other Outlook add-in.

1. First check whether Outlook has added the add-in to their Disabled Items list:
   a. On the Help menu, select Disabled Items to open the Disabled Items dialog.
   b. If the add-in is listed, go to step c. Otherwise, go to step 2.
   c. Select Oracle Social Network Add-In for Outlook, and click Enable.

2. From the File menu, select Options then Add-Ins to open the Trust Center dialog.

3. Verify that Oracle Social Network Add-In for Outlook is included on the list.

4. Next to Manage, select COM Add-ins.

5. Clear the Apply macro security settings to installed add-ins check box.

6. Click Go to open the COM add-ins dialog.

7. In the dialog, select the check box Oracle Social Network Add-In for Outlook.

8. Click OK.

Managing Your Oracle Social Network Account in the Add-In for Outlook

What are Oracle Social Network accounts?

An Oracle Social Network account is your connection to a server that is hosting an instance of Oracle Social Network. Your organization might have multiple servers, each offering its own instance of Oracle Social Network. If you can log on to two or more of these, then you can say you have multiple accounts.

Note: In the add-in for Outlook, you can interact with only one Oracle Social Network account at a time.

Your system administrator will likely set up your system to automatically connect to the necessary accounts. However, you might be required to supply your name and password at the start of every session.

The first time you start the add-in for Outlook, the Manage Accounts dialog opens with options for configuring this and future sessions. There are options for:

- Hiding the Manage Accounts dialog at future start-ups
- Selecting the account you want to use in this session
- Saving your password for future sessions
- Working offline (for more information, see Working Offline)

If you have only one account, you might want to save your password and hide the Manage Accounts dialog. Or, you might want to save your password, but continue to open this dialog so that you always have the option to select the account to use in this session.

How do I set up a new account?

When your company has multiple Oracle Social Network accounts, you can preset connections to all of them in the add-in for Outlook.
Tip: Switching between accounts is as simple as selecting an account from the Accounts menu (see How do I switch between add-in accounts?).

1. If necessary, click Show Panel in the Outlook ribbon to open the add-in panel.

2. At the bottom of the panel, open the Accounts menu, and select Manage Accounts.

3. In the Manage Accounts dialog, click ☰ to the right of the Account field.

4. In the Account field, enter a name for the account to appear on the Accounts menu.

5. In the Server URL field, enter the URL to the server that hosts the new Oracle Social Network account, then click Next.

   Enter server name, port number, and instance. For example:
   acme.social.us1.oraclecloud.com:443/client

   If you don't provide a port number, a default value for the connection type is used.

6. If your company uses federated authentication, your newly created account is selected in the Manage Accounts dialog. Click OK, then enter your login information as requested.

   If your company doesn't use federated authentication, skip to the next step.

7. If necessary, enter the Identity Domain.

8. In the User Name field, enter your Oracle Social Network user name.

9. In the Password field, enter your Oracle Social Network password.

10. To save your user name and password and log in automatically in future sessions, select Remember password.

11. Click OK.

How can I see my account status?

Account status tells you which account you are using and whether you are active, inactive, or offline. In the add-in for Outlook, account status is shown at the bottom of the add-in.

A colored ball to the left of the Accounts menu and a line of text to the right show whether you are active (green), inactive (yellow), or offline (gray).

How do I switch between add-in accounts?

In the add-in for Outlook, open the Accounts menu and select the account you want to use. You might be prompted to log in.
How do I disconnect from an account?

From the Accounts menu, either select another account or click Work Online to deselect it (for more information about Work Online, see Working Offline).

How do I delete an account?

1. From the Accounts menu, select Manage Accounts.
2. From the Account list, select the account to delete.
3. Click to the right of the Account list.
4. In the confirmation dialog, click Yes.

How can I troubleshoot my accounts?

The Support dialog provides access to reports and logs to help you troubleshoot (with the help of My Oracle Support) issues you might encounter.

1. Click , select Support.
2. Click one of the buttons at the bottom of the dialog to view reports or logs:
   - Click Reports to generate a report about activities in your social network’s code over a selected period.
   - Click Logging to set a logging level, configure log output, and to save your log to a file.

You can then send the reports or logs to My Oracle Support.

The Oracle Social Network Community Forum is a discussion forum where you can talk with experts and fellow users. Click , and select Community.

Configuring Your Settings for the Add-In for Outlook

How do I set my add-in preferences?

1. Click , and select Preferences.
2. On the General tab, set preferences for messages.
   - Where do I specify whether to enable screen reader mode?
   - How do I hide message tooltips?
   - How do I set the options for marking messages as read?
   - How do I get notified about new messages in my One-on-One Conversations?
   - How do I hide membership messages by default?
   - How do I set up how to post messages?
3. On the Walls tab, select who can post to and reply on your wall.
   - How do I control who can post to my wall?
4. On the Conferences tab, enter your account information for web conference providers.
   - How do I set a web conference user name and password?
5. On the Cloud Documents tab, enter your account information for cloud document services.
   - How do I connect to my documents in the cloud?

6. On the Notifications tab, select when to receive email notifications about activities in Oracle Social Network.
   - How do I set my add-in for Outlook notification options?

7. On the Posting Email tab, select whether you want to be prompted to post email messages to Oracle Social Network and what happen when you do post those messages.
   - How do I tell Outlook to prompt me to use Oracle Social Network?

8. On the Offline tab, select what gets downloaded when you mark a Conversation for offline use and the location the offline data is saved to.
   - How do I set offline preferences?

Where do I specify whether to enable screen reader mode?

If you want messages to be accessible to a screen reader, select Enable Screen Reader Mode. For more information, see How do I increase the add-in's accessibility?

1. Click ⚙, and select Preferences.

2. On the General tab, select or clear display options under Message View:
   - Select Enable Screen Reader Mode to show messages in compact view. In compact view, no more than two lines of text is shown with a given message. Screen readers can read the entire message in the message's tooltip.
   - Clear Enable Screen Reader Mode to show the full text of all messages.

How do I hide message tooltips?

1. Click ⚙, and select Preferences.

2. On the General tab, select or clear tooltip options under Conversation View:
   - Select Hide Tooltips to prevent tooltips from appearing when you mouse over a message and over icons and options in banners.
   - Clear Hide Tooltips to show tooltips when you mouse over a message and over icons and options in banners.

Note: If you want messages to be accessible—for example, to a screen reader—do not select this option.

How do I set the options for marking messages as read?

1. Click ⚙, and select Preferences.

2. On the General tab, select or clear options under Message View:
   - Mark items as read when viewed in a tooltip—Select this option so that, when you view a message in a tooltip for the specified amount of time, it’s marked as read. Specify the number of seconds in the field that follows the label Mark item as read when viewed for (seconds).
In Outlook, when you mouse over a message, a tooltip opens showing the full text of the message. If you specify that a view is 2 seconds, then after the tooltip is open for 2 seconds, the item is marked as read.

**Note:** When *Enable Screen Reader Mode* is selected, *Mark items as read when viewed in a tooltip* affects only Overview and flags views.

- **Mark items as read when selection changes**—A message is marked as read when you move from it to another item.

### How do I get notified about new messages in my One-on-One Conversations?

1. Click ⚙, and select *Preferences*.
2. On the **General** tab, under **Message View**, select *Alert me to new messages in One-on-One Conversations* to trigger three flashes in Outlook when someone posts a message to a One-on-One Conversation with you and the Outlook window is not in focus.

### How do I hide membership messages by default?

When a user is added to or removed from an item a membership message is posted to the item (for example, *This Conversation is now accessible to: Jane Doe*). If you’d prefer not to show those messages, you can hide them.

1. Click ⚙, and select *Preferences*.
2. Select or clear hide membership options under **Message View**:
   - Select *Hide membership messages by default* to prevent membership messages from showing in all items.
   - Clear *Hide membership messages by default* to allow membership messages to show in all items.

You can override this setting on individual items (see *How do I hide membership messages?*).

### How do I set up how to post messages?

1. Click ⚙, and select *Preferences*.
2. On the **General** tab, select or clear submit message options under **Message Posting Behavior**:
   - Select *Use Post button* to post messages by clicking **Post**. Enter line breaks in your messages using the Enter key
   - Select *Use Enter key* to post messages by pressing the Enter key. Enter line breaks in your messages using Shift+Enter.

### How do I control who can post to my wall?

Use Walls preferences to control whether other people can post or reply to messages and documents on your wall:

1. Click ⚙, then click *Preferences*.
2. Click *Walls*.
3. Under **Post to Your Wall**, specify whether other people (your followers) can post messages on your wall.
4. Under **Reply on Your Wall**, specify whether other people (your followers) can reply to messages or annotate documents on your wall.

**How do I set a web conference user name and password?**

Entering your conference user name and password lets you start or join conferences without having to enter this information each time. The Start or Join dialog opens pre-populated with the information you enter here.

**Note:** To start a conference, you must have an account with your conference application. You can join a conference whether or not you have an account.

1. Click 🗓, then click **Preferences**.
2. Click **Conferences**.
   
   **Note:** The fields that you see on the **Conferences** panel come from the server and might not be the same as the fields described in the next steps. The fields described here are for example only.
3. From the **Service Name** drop-down list, select your conference application.
4. In the **Site Name** field, enter the name of your conference instance. For example, enter acmeweb.
5. In the **User Name** field, enter your conference account user name.
6. In the **Password** field, enter your conference account password.
7. Click **OK**.

**How do I connect to my documents in the cloud?**

Assuming your administrator has enabled the use of a cloud document service, like Google Drive, all you have to do is associate your account information with Oracle Social Network to be able to add those documents to your Conversations and walls.

**Note:** Documents formatted in Google's proprietary format are automatically converted to PDF when downloaded to Oracle Social Network. You can't copy Google proprietary format documents back to Google Drive, but you can copy the PDF version of these documents. Unlike other file types, Google proprietary documents converted to PDF are not automatically returned to their original location in Google Drive.

Annotation marks and comments are not included when you copy from Oracle Social Network back to a cloud document service.

1. Click 🗓, then click **Preferences**.
2. Click **Cloud Documents**.
3. In the **Service Name** list, select the type of cloud document service you want to connect to.
4. In the **Settings** section, supply your account information:
   - For **Google Drive**, click **Configure**. The full version of Oracle Social Network opens. Click **Authorize**, log in to your account, then click **Accept**.
   - For other cloud document services, enter your username and password, then click **OK**.

The next time you add a document in Oracle Social Network, you'll be able to access your documents in the cloud in the file picker.
How do I set my add-in for Outlook notification options?

1. Click , then click Preferences.
2. Click Notifications.
3. Set your notification options:
   - Select **Send me an email when someone** to get an email when one or more of the following options is selected:
     - Assigns a Please Reply Urgent flag to me
       - Note: This option is grayed-out because you always receive a notification email when someone assigns one to you.
     - Assigns a Please Reply flag to me
     - Assigns a For Your Information Flag to me
     - Clears a Please Reply Urgent flag assigned to or by me
     - Clears a Please Reply flag assigned to or by me
     - Clears a For Your Information flag assigned to or by me
     - Posts on my wall—When someone posts a message to your wall
     - Posts to a One-on-One Conversation with me when I am offline
     - Adds me to a Conversation, collection, or other item
   - Select **Send me a daily summary of the activity of all the people and content I care about** to get an email that summarizes your day’s flags, messages, and memberships.
   - Select your time zone.

How do I tell Outlook to prompt me to use Oracle Social Network?

If you start to send an email to at least one user who is part of your social network, the add-in for Outlook can prompt you to create a new Conversation or post to an existing Conversation or wall in Oracle Social Network to improve collaboration. You can control the prompt and the default action in your preferences.

1. Click , then click Preferences.
2. Click Posting Email.
3. Under **When sending email to Oracle Social Network members**, select what you want to happen when you start to send an email to users who are part of your social network:
   - Select **Prompt to post outgoing email to Conversation** if you want to be prompted to post to your social network each time you start to send an email to users who are part of your social network. If you select this option, when you click Send, you’ll be asked if you want to create a Conversation.
     When prompted, click Post Message to post to Oracle Social Network or click Send Email to just send an email.
     - Note: In the prompt, you can select **Do not show me this again**, which changes your preference setting.
   - Select the default option for where the message should be posted/sent:
     - Post to a Conversation instead of sending email
- **Send email and also post to a Conversation**
  
  **Note:** This option is useful if your message includes some users who are not part of your social network. You would generally want to use this for simple posted information, not messages that will spark a discussion, otherwise the email thread and the Conversation will become out of sync. For example, you might want to send meeting details such as location and agenda to a user who is not part of your social network, and copy it to a Conversation in your social network so that you have a record of the communication along with other related information for internal use, like documents for the meeting.

- **Do not post to a Conversation (always send email)**

  **Note:** If you select this option, the Prompt to Post option becomes grayed out. You won’t be prompted to post to a Conversation.

  **Tip:** You can change this option for a particular message in the “ribbon” of the email message. Changing the option in the email message applies only to that message. For more information, see How do I add email, meeting details, or tasks to a Conversation or wall?

4. In the **Ignore Emails and Domains** box, you see a list of any email addresses or domain names you’ve asked to be ignored when adding email messages to Oracle Social Network (for example, distribution lists or support email addresses). The ignored email addresses and domain names don’t show up in the **Recipients** list when you’re adding an email to a Conversation or wall. Also, if you’re prompted to post outgoing email messages to Oracle Social Network (see How do I tell Outlook to prompt me to use Oracle Social Network?), the ignored email addresses and domain names won’t generate a prompt.

You can edit the list in the following ways:

- To add an email address or domain name, click **Add**, then enter the email address or domain name (in the form @example.com) you want to be ignored.

- To change an entry, select it in the list, then click **Edit**.

- To get rid of an entry, select it in the list, then click **Remove**.

  **Note:** You can also add entries to the ignore list when adding an email to Oracle Social Network. For more information, see How do I tell Oracle Social Network to ignore particular email addresses or domains when posting email messages to a Conversation or wall?

### How do I set offline preferences?

When you mark a Conversation for offline use, the data from that Conversation is saved to your computer. You can set Offline preferences to select what data is saved, whether changes are published automatically or manually, and where the data is saved to:

1. Click 🌙, then click **Preferences**.

2. Click **Offline**.

3. Under **When marking a Conversation for offline**, select what kind of data you want to see while viewing a Conversation offline:

   - **Download the avatars of its members**—Select this option to see people's pictures next to their posts and on the **Members** tab.
Setting Up Your Profile in the Add-In for Outlook

How do I view my profile?

On the Outlook ribbon, click Your Wall, and on your wall’s banner, click 🔄. Your profile details appear in the User Profile dialog.

How do I edit my profile?

In the User Profile dialog, edit your profile information as desired:

- To change your profile picture, on the General tab, click Change, then navigate to and select the picture (a .gif, .jpg, or .png file) to upload.

  The Crop Picture dialog shows your image with a circle over the area that will show in Oracle Social Network. You can drag the corners of the crop area to change the size of your picture, or drag your picture to change the position of the crop area. When you’re happy with the size and position, click Crop.

  Note: Oracle Social Network scales your profile picture up or down as needed to display it within 60 by 60 pixels and places it in a circle showing your online status.

- To change your name and other general information, on the General tab, enter the information in the editable fields.
To set the language for your user interface, on the General tab, select an option from the Language drop-down list.

To change your address, click the Contact tab, then enter the information in the fields.

To add a phone number:
1. Click the Contact tab.
2. Next to the Phone numbers area, click Add.
3. Enter a label for the number, like home or cell.
4. Select the country or region from the list to add the appropriate country code.
   Note: The country/region information is available only if you have previously opened the Check Phone Number dialog in an Outlook contact.
5. Enter the city/area code and local number.
6. Optionally, enter an extension.

How can I see other people's profiles?

One way to navigate to a profile is to click the person's profile picture wherever you see it in the add-in for Outlook. Another way is to double-click the person's name in the People and Groups panel. Here is a third way to navigate to a profile:

1. On the navigation bar, click .
2. Click a tab to select a view .
3. Click the person's or group's picture to open the person's or group's wall.
4. On the wall's banner, click to open the person's or group's profile.

How do I post a message to someone's wall?

Before you can post messages to another person's wall, you must first follow the person who owns the wall. For information about how to follow someone, see How do I follow people and add them as contacts?

1. On the navigation bar, click .
2. Click a tab to select a view .
3. Right-click a person or group, and select Go To <name>'s Wall.
4. Post a message in the text box at the top of the wall as you would to any other Conversation (see How do I post messages to a Conversation?).
   Note: If you don’t see a text box at the top of someone's wall, you aren’t following the person or the person doesn’t allow other people to post to his or her wall.

Using Flags in the Add-In for Outlook

What are flags?

Flags (formerly follow-ups) provide a way to bring someone's attention to a message in a Conversation or on a wall. When you assign flags, the people you assign them to are flagged in the application, and, depending on their notifications settings, receive an
Using Flags in the Add-In for Outlook

email (see How do I set my add-in for Outlook notification options?).

When you flag someone, you also select a priority level. Flag priority levels let the people you assign flags to know whether or not the flag is urgent. There are three levels of priority:

- **For Your Information**—Least urgent. Asks recipients to look at the item when they have time.
- **Please Reply**—Moderately urgent. Asks recipients to post a reply to the item.
- **Please Reply - Urgent**—Asks recipients to look at the item now and reply immediately. An email notification is sent automatically to anyone assigned a Please Reply - Urgent flag.

For an explanation of all the flag icons, see Table 8–1, "Flag Icons and Their Meanings”

To make sure flags send the message *look at this now!* use them thoughtfully. A flood of flag notifications all at once or all the time can reduce their impact.

**How can I see all flags assigned to me or by me?**

1. On the navigation bar, click ![flags_icon]
2. Click ![flags_icon] on the Flags banner, and select to show:
   - Flags for You
   - Flags You Assigned

Select the type of flags to show:

- All flags
- Flags of a selected type: Please Reply - Urgent, Please Reply, or For Your Information

Select Flagged By then a name.

Select Sort, then:

- Ascending, to show flagged items from 0 to 9 then A to Z
- Descending to show flagged items from Z to A then 9 to 0

**How do I assign or clear flags?**

1. Go to a message you want to flag, click ![flags_icon]
2. Assign or clear flags:
   - To remove a flag assigned to you, click ![flags_icon]
   - To quickly assign a For Your Information flag to someone, click the flag next to the person.
   - To assign a particular flag to someone, select the type of flag in the drop-down list next to the person.
   - To quickly flag everyone, click Flag All (in the Others Not Flagged section), and select the type of flag you want to assign.
   - To quickly remove all flags (whether assigned by you or not), click Clear All (in the Others Flagged section).
   - To remove a particular flag, click ![flags_icon] next to the person.
To search for someone, enter part of the person’s name in the search box.

Using Conversations in the Add-In for Outlook

What Conversation tabs are available?

In a Conversation, use tabs to navigate its views:

- **Posts**— View everything added to the Conversation.
- **Documents**— View just the documents.
- **Members**— View and manage the Conversation’s membership.
- **Referring Items**— Navigate to the items that link to this Conversation.

How do I view Conversation messages?

By default, the add-in for Outlook is configured to show messages in full view. If you like, you can double-click a message or select it and press Enter to see it in a separate dialog. If you posted the message, it opens in an editor.

*Note:* People outside your company can sometimes be given limited access to Conversations in the Oracle Social Network. If there are outside users in the Conversation, a banner appears near the top of the page to let you know. All outside users have the same avatar ( ) and their names are in purple text. For more information, see What are “outside users”?

1. On the navigation bar, click  
2. Click , and select a filter to show the types of Conversations you want to see.
3. Double-click a Conversation to open it.

How do I view a list of Conversation documents?

1. On the navigation bar, click  
2. Click , and select a filter to show the types of Conversations you want to see.
3. Double-click a Conversation to open it.
4. Click  to view the Conversation’s list of documents.

How do I view a list of Conversation members?

1. On the navigation bar, click  
2. Open the Conversation with members you want to show.
3. Click  to view the Conversation’s list of members.

*Note:* All outside users show the same avatar ( ) and their names are in purple text. For more information, see What are “outside users”?

How can I view a list of all Conversations I’m a member of?

On the navigation bar, click  . The on the Conversations banner, click  and select **Yours**.
How can I view a list of Conversations I can join?

On the navigation bar, click 💬. Then click ▾ and select Available.

To join a Conversation, open it, then, at the top of the Conversation, click Join Conversation.

How can I view my list of favorite Conversations?

1. On the navigation bar, click 💬.
2. On the banner above the list of Conversations, click ▾ and select Favorites.

How can I view my list of muted Conversations?

When you view a list of muted Conversations, you see only those Conversations you have muted. The Conversations others have muted show only in their views of this list.

On the navigation bar, click 💬, click ▾, and select Muted.

How can I view a list of closed Conversations?

When you view closed Conversations, you see all the Conversations that are closed, no matter who closed them.

On the navigation bar, click 💬, click ▾, and select either Yours, Available, Favorites, or Muted. Click Closed to show all closed Conversations included in the selected view.

How can I view a list of open Conversations?

When you view open Conversations, you see all open Conversations that you are a member of or that are available to you to join.

On the navigation bar, click 💬, click ▾, and select either Yours, Available, Favorites, or Muted. Click Open to show all open Conversations included in the selected view.

How do I start a Conversation?

Here’s how to start a Conversation from the Conversations panel. You can also start a Conversation the same way (starting with Step 2) from the Outlook ribbon and from the Overview panel.

1. On the navigation bar, click 💬.
2. On the Conversations banner, click 💬.
3. Enter a name for the Conversation in the Name field.
4. Select the options to apply to the new Conversation:
   - Make publicly available—Make this Conversation available to all. Anyone with a user name and password can join this Conversation.
   - Add to favorites—Add this Conversation to your favorites list.
5. Click OK to create and open the new Conversation.
How do I start a Conversation with a group?

Starting a Conversation with a group automatically adds all members of the group to the Conversation.

1. On the navigation bar, click 
2. Click to show the list of groups you are a member of.
3. Select the group to start a Conversation with.
4. Right-click the group, and select Start New Conversation.
5. In the Name field, enter a name for the Conversation.
6. Select the options you want to apply to the new Conversation:
   - Make publicly available—Make this Conversation available to all to join.
     Note: All members of the group are automatically added to the Conversation, but, when you select this option, anyone with a user name and password can join it.
   - Add to favorites—Add this Conversation to your favorites list.
7. Click OK.

How do I join a public Conversation?

1. On the navigation bar, click 
2. Set the Conversations list to show available Conversations (see How can I view a list of Conversations I can join?).
3. In the list of Conversations, right-click the Conversation you want to join, and select Join Conversation.
   Alternatively, open the Conversation, then, at the top of the Conversation, click Join Conversation.

How do I start a One-on-One Conversation?

1. Navigate to the wall of the person you want to converse with.
   For example, in a Conversation, right-click the person’s profile picture and select Go To <name>’s Wall.
2. On the wall, click the Start One-on-One Conversation icon.
3. Add messages as you would to any Conversation.
   For more information, see How do I post messages to a Conversation?

How do I add members to a Conversation?

1. On the navigation bar, click 
2. Open the Conversation to add members to.
3. Click  to view the Conversation’s list of members.

4. Click  to open the Select Members dialog.

5. In the Select Members dialog, select groups and people you want to add as members. Use Ctrl+Click to select more than one person or group.
   Double-click a name to add it to the Select list at the bottom of the dialog, or select names, then click Select to add all selections.

   By default, you see a list of recommended members. Click a tab to change your view:
   - **Recommendations**—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add as a member—the person is one of your contacts, the person is a member of similar items, and other common actions.
   - **Contacts**—View a list of your contacts.
   - **Groups**—View a list of your groups.
   - **Current Members**—View a list of current members.

   Alternatively, you can enter part of a person’s or group’s name, and select them from the list that pops up.

6. Click OK to add your selections to the Conversation.

**In-Line Recommendations**
You can also add members to a Conversation by accepting the recommendations that are sometimes shown in the list of messages (under Add to this Conversation). Oracle Social Network recommends people to add to a Conversation based on people you frequently add to Conversations and actions you have in common with others (such as being members of the same Conversations).

Each recommendation includes the person’s name and the reason they were recommended. You can perform the following actions:

- Click the person’s name to view their profile.
- Click Add to accept the recommendation and add the person to the Conversation.
- Click Ignore to decline the recommendation.

**Note:** When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

- Click the arrows on either side of the current recommendation to see the previous or next recommendation.

When you accept or ignore a recommendation, the next recommendation appears.

**Note:** The recommendations appear near where you entered the Conversation. If you scroll up or down, the Add to this Conversation section might move out of view. Just scroll up or down to find it.

**How do I remove members from a Conversation?**

1. On the navigation bar, click  .
2. Open the Conversation to remove members from.
3. Click  to view the Conversation’s list of members.
4. On the list, right-click the person you want to remove, and select Remove from Membership.
5. In the confirmation dialog, click Yes.
6. Repeat these steps until you remove everyone you want.

How do I make a private Conversation public?
   1. On the navigation bar, click 🗯️.
   2. Right-click the Conversation, then select Modify.
   3. In the dialog, select the Make publicly available check box.
   4. Click OK.

How do I change a public Conversation to members-only?
   Public Conversations that are converted to members-only retain the members who had already joined the public Conversation.
   1. On the navigation bar, click 🗯️.
   2. Right-click the Conversation, then select Modify to open the Modify dialog.
   3. In the dialog, clear the Make publicly available check box.
   4. Click OK.

How do I close a Conversation?
   1. On the navigation bar, click 🗯️.
   2. Right-click the Conversation, then select Modify.
   3. Select Mark as closed to open the Close Conversation dialog.
   4. Enter a reason for closing the Conversation, and click OK.
   5. In the Modify dialog, click OK.
   The Conversations panel is refreshed to show the list of closed Conversations.

How do I reopen a closed Conversation?
   1. On the navigation bar, click 🗯️.
   2. From the Options menu on the Conversations banner, select Closed to show a list of closed Conversations.
   3. Right-click the closed Conversation, and select Modify.
   4. Clear the Mark as closed check box.
   5. In the confirmation dialog, click Yes.
   6. In the Modify dialog, click OK.

How do I delete a Conversation?
   Before you can delete a Conversation, you must remove all members of the Conversation, except you. Once you are the only member of a Conversation, you can delete it. (For information about removing others from a Conversation, see How do I remove members from a Conversation?)
1. On the navigation bar, click 💌.
2. Right-click the Conversation to delete, and select Discard.
3. In the confirmation dialog, click Yes.

**How do I change a Conversation name?**

1. On the navigation bar, click 💌.
2. Right-click the Conversation, and select Modify.
3. Rename the Conversation.
4. Click OK.

**What are referring items?**

A Conversation or wall’s Referring list includes links to the Social Objects and collections that link to that Conversation or wall. This provides a convenient way to navigate between a Conversation and a collection of Conversations with related content or a Conversation and a Social Object that it discusses. You can set up these relationships from a Social Object or a collection, or from the Conversation or wall itself.

**How do I add an existing item to a list of referring items?**

1. Go to the Conversation, and click 💌.
2. On the Referring Items banner, click 🔄.
3. Select a source for the Social Object:
   - **Recent Social Objects**—Select from a list of Social Objects that you recently viewed.
   - **Favorites**—Select from a list of Social Objects that you have marked as a favorite.
   - **Search**—Enter a search term, and select from results or click 🔍. When you click 🔍, results appear on this tab.
4. Select a Social Object, and click OK.

**Note:** For information about creating a new item to add to a Conversation’s list of referring items, see How do I add a new item to a list of referring items?

**How do I add a new item to a list of referring items?**

1. Go to the Conversation, and click 💌.
2. Click 🔄, then select the type of Social Object you want to create.
3. In the Name field, enter a name for the Social Object.
4. Select or clear the Add to favorites check box.
5. Click OK.

**Note:** For information about adding an existing item, see How do I add an existing item to a list of referring items?
How do I change a Conversation's language?

When you change a Conversation language, new system messages, like The Conversation attributes changed, appear in the selected language. System messages that were present before the language change continue to appear in the language in place when they were posted. Messages and files posted to the Conversation are unaffected. They appear in the language that was used to write them.

The language used for user interface elements in the add-in for Outlook, like field labels, button labels, dialog box names, banner headings, and other user interface elements, is determined by your Microsoft Office settings and your Operating System.

Changing a Conversation language affects everyone’s view of the Conversation.

1. On the navigation bar, click.
2. Right-click the Conversation to configure, and select Modify.
3. Select Modify to open the Modify dialog.
4. Expand the Language menu, and select a language
5. Click OK.

How do I mute a Conversation?

On the navigation bar, click, then right-click the Conversation you want to mute, and select Mute.

Muting affects only your view of a Conversation. You can mute a Conversation so it does not appear to you in the Conversations panel when the filter Yours, Available, or Favorites is applied.

Messages posted to a muted Conversation don't appear on the Overview panel or in your daily email digest. Flags assigned on a message in a muted Conversation do appear in your daily email digest (for information about the daily email digest, see How do I set my add-in for Outlook notification options?).

How do I copy a Conversation URL to my clipboard?

On the navigation bar, click, then right-click the Conversation, and select Copy Link. The Conversation URL is added to your clipboard. You can paste it anywhere you like. When clicked, it opens the Conversation in standalone mode in your browser.

How do I download an archive a Conversation?

In the add-in for Outlook, the Download Archive option saves a Conversation to a .zip file. So, whether you are online or off, you can unzip the file to your local drive to read its messages and replies and view the documents added to it. The .zip file (named after the Conversation) contains the Conversation’s list of members, messages, and replies in an HTML file (named by default index.html).

To download and work with an archive of a Conversation:

1. Open the Conversation, click, then click Download Archive.
2. Unzip the files to your computer.
3. Open index.html.

Clicking a document link opens the copy of the document that is included in the .zip file. All other links in index.html (user names, like, reply, and so on) open Oracle Social Network in the browser.
Note: You can’t make changes to an archive of a Conversation (though you can click a link to open the Conversation in a browser and make changes there). If you want to be able to make offline changes, instead download an offline copy of the Conversation (see How do I download an Offline Copy of an item?)

How do I view recent messages?

The Overview panel ( ) shows the latest messages posted to the Conversations and walls you’re a member of and public Conversations you’ve joined.

A red dot appears on the icon when you have unread messages in any of the listed Conversations.

To view recent messages, click . If tooltips are enabled (see How do I hide message tooltips?), mouse over a message in the list to view its details in a tooltip.

Double-click a message to view it in the Conversation or wall.

Click the Conversation or wall name to go to the bottom of the Conversation or the top of the wall.

Right-click a message to access a menu of useful actions.

How do I post messages to a Conversation?

This describes how to post messages to a Conversation when the default setting to show messages in full view is selected.

1. On the navigation bar, click  .
2. Click , and select a filter to show the types of Conversations you want to see.
3. Double-click the Conversation to open it.
4. Click  to open a view of all of the selected Conversation’s messages.
5. Enter a message in the field at the bottom of the panel, and click Post or press Enter, depending on your Preferences (see How do I set up how to post messages?).

How do I hide membership messages?

When a user is added to or removed from a Conversation, collection, group, or Social Object a membership message is posted to the item (for example, This Conversation is now accessible to: Jane Doe). If you’d prefer not to show those messages in an item, you can hide them.

1. On the navigation bar, click the type of object you want to open (for example, click for Conversations).
2. Double-click an item to open it.
3. Click in the group banner, and select Hide Membership Messages.

For information about hiding membership messages for all items, see How do I hide membership messages by default?

How do I navigate from a message to its Conversation?

When you view messages somewhere other than in a Conversation, for example, when you view messages in the Overview panel, you have a few ways to navigate to its home Conversation:
Click the link to the Conversation included in the message.

Double-click the message.

Right-click the message and select Go To Item.

**How do I post a message through the note editor?**

The Note Editor provides options for formatting your messages. Use the method described here to post messages to a Conversation when the default setting to show messages in full view is selected.

1. On the navigation bar, click 📘.
2. Click 🔽, and select a filter to show the types of Conversations you want to see.
3. Double-click the Conversation to open it.
4. Click 📘 to show all messages posted to this Conversation.
5. At the bottom of the panel, click ✒️ to open the Note Editor.
6. Enter and format your message in the editor.
7. Click OK.

**How do I edit my messages and replies?**

You can edit the messages you post. You can’t edit other people’s messages.

1. Navigate to the message or reply you want to edit.
2. Right-click the message, then select Edit Message (or Edit Reply); or click More, then select Edit Message (or Edit Reply).
3. Make your revisions, and click OK.

**How can I view earlier versions of an edited message?**

1. Navigate to the message or reply you want to edit.
2. Right-click the message, then select Edit Message (or Edit Reply).
3. Select a version to show in the dialog’s message area.
4. Click Cancel to close the dialog.

**How do I reply to a message?**

In the add-in panel, you can reply to flags and Social Object, wall, and Conversation messages. When your add-in instance is configured to show messages in full view (the default setting), the reply area appears below the currently selected item. When messages are not configured to display in full view, the reply area appears at the bottom of the add-in panel.

For more information, see How do I set my add-in preferences?

1. Navigate to the message you want to reply to.
2. Click 🔄 Reply under the message to open a reply entry field.
3. Enter your reply.
4. Optionally, click ✒️ to open the Note Editor to enter and format your reply.
5. Click the Post button or OK, whichever applies.
Note: If you don’t see Reply under a personal wall post shown on the Overview panel or on a person’s wall, the person doesn’t allow other people to reply to his or her wall posts.

How do I find items in a Conversation or wall?

Search and navigation tools enable you to find unread messages, flags assigned to you, or text within the Conversation or wall.

While viewing a Conversation or a wall, you can use the search and navigation tools:

- To find unread messages, click the unread messages count in the Posts header, and use the up and down arrows to navigate through the unread messages.

![Unread Messages](image)

- To find flags assigned to you, click the flag count in the Posts header, and use the up and down arrows to navigate through your flags.

![Flags Assigned to You](image)

- To find messages or documents that include specific text or posted by a particular person, click the search icon in the Posts header, enter the text or poster you want to search for, press Enter, and use the up and down arrows to navigate through the results.

![Search](image)

How do I mark a message as read or unread?

To the left of the message, click the blue bullet to remove it and to mark the message as read; right-click the message, then select Mark as Read; or click More, then select Mark as Read.

Note: See also, How do I mark all messages in a Conversation as read?

If you want a message status to be unread, but you’ve already marked it as read, you can return the message to unread by right-clicking it and selecting Mark as Unread. This works only with messages others have posted and not your own posts.

How do I mark all messages in a Conversation as read?

In the list of Conversations or in the Conversation title bar, click the unread message count in the blue box.
Note: See also, How do I mark a message as read or unread?

How do I copy a message URL to my clipboard?

1. On the navigation bar, click 📩.
2. Click ⬇️, and select a filter to show the types of Conversations you want to see.
3. Double-click the Conversation to open it.
4. Right-click the message, and select Copy Message Link to add the message's URL to your clipboard.

You can paste the URL wherever you like. When clicked, it opens the Conversation in your browser.

How do I delete a message?

You can delete messages you posted or messages on your profile wall.

Note: If you are a service administrator, you can delete any message.

Right-click the message, then click Delete Message; or click More, then select Delete Message.

To restore a deleted message, locate the deleted message icon (:image) where the message used to be, click 📩, then confirm that you want to restore the message.

Note: Only a service administrator, the person who posted the message, or the person who deleted the message can restore the deleted message.

Using Conferences in the Add-In for Outlook

How do I start a web conference?

Before you can start a conference, you must first have an account with a conference provider, like WebEx or Avaya (for more information, see Which conference applications are supported?). You must also set your web conference preferences (see How do I set a web conference user name and password?).

1. Go to the Conversation or wall where you want to start a conference.
2. If necessary, click 📩 to show the messages panel.
3. Click ⬇️, and select Start Conference to open the Conference Service Details dialog.

   Alternatively, click 📩 in the message area.
4. Fill out the conference details:
   a. From the Service Name menu, select your conference application.
   b. In the Site Name field, enter the name of your conference instance.
      For example, enter acmeweb.
   c. In the User Name field, enter your conference account user name.
   d. In the Password field, enter your conference account password.
   e. Select Remember Details to save these values to your personal settings.
Using Collections in the Add-In for Outlook

5. Click OK to log in to your conference provider and start a conference.

How do I join a web conference?

Go to the Conversation where the conference was started, then, at the top of the Conversation, click Join Conference.

Alternatively, from the Overview panel, if the conference started notification is the newest message in the Conversation, click Join Conference.

How can I see a list of current web conferences?

On the navigation bar, click , then click ▼, and select Running Conferences to open a list of all currently active conferences.

Using Collections in the Add-In for Outlook

What are collections?

As your lists of Conversations, Social Objects, people, and groups grow, it might be useful to organize those that focus on a common topic, project, or issue into an easy-access list, called a collection. Use collections to create your own lists of related Conversations, collections, profile and group walls, and Social Objects.

You can give the collection a meaningful name so it's easy to identify its purpose. You can add Conversations and walls (including people's walls and group walls) to a collection. You can also add Social Objects and other collections to a collection to create a hierarchy. There is no limit to the levels of hierarchy you can create.

In the add-in for Outlook navigation bar, click the Collections icon to open the list of collections.

For more information, see How do I create a collection?

How do I create a collection?

1. On the navigation bar, click .
2. Click to open the New Collection dialog.
3. In the Name field, enter a name for the collection.
4. Select check boxes to enable collection options:
   - Make publicly available—Make this a public collection that anyone with an Oracle Social Network account can join.
   - Add to favorites—Add this collection to your Favorites list.
5. Click OK.
How do I add members to a collection?

1. On the navigation bar, click .
2. Double-click a listed collection to open it.
3. Click to open the collection’s list of members.
   Tip: To see how many members a collection has, mouse over the Members tab.
4. Click to open the Select Members dialog.
5. In the Select Members dialog, select groups and people you want to add as members. Use Ctrl+Click to select more than one person or group.

   Double-click a name to add it to the Select list at the bottom of the dialog, or select names, then click Select to add all selections.

   By default, you see a list of recommended members. Click a tab to change your view:
   - Recommendations—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add as a member—the person is one of your contacts, the person is a member of similar items, and other common actions.
   - Contacts—View a list of your contacts.
   - Groups—View a list of your groups.
   - Current Members—View a list of current members.

   Alternatively, you can enter part of a person’s or group’s name, and select them from the list that pops up.
6. Click OK to add your selection to the collection’s membership.

How do I remove members from a collection?

1. On the navigation bar, click .
2. Double-click a listed collection to open it.
3. Click to open the collection’s list of members.
4. Right-click the person or group, and select Remove from Membership.
5. In the confirmation dialog, click Yes.

How do I add an existing item to a collection?

1. On the navigation bar, click .
2. Double-click a listed collection to open it.
3. Click to show the items in this collection.
4. Click .
5. In the Browse Items dialog, select one or more items to add to the collection, then click OK. Use Ctrl+Click to select more than one item.

   By default, you see a list of recent items. Click a tab to change your view:
   - Recent Items—Select from items you have visited recently.
   - Favorites—Select from items you have marked as a favorite.
Alternatively, you can enter part of an item’s name, and select it from the list that pops up. When you select from the search’s pop-up results, the dialog closes and your selection is added to the collection.

How do I add a new item to a collection?

1. On the navigation bar, click .
2. Double-click a listed collection to open it.
3. Click to show the related items in this collection.
4. Click , and select:
   ■ Add New Conversation—To create a new Conversation and add it to the collection.
   ■ New Collection—To create a new collection and add it to the current collection.
5. Enter a name for the item in the Name field.
6. Select the options you want to apply to the new item:
   ■ Make publicly available—Make this a publicly available item that anyone with an Oracle Social Network account can join.
   ■ Add to favorites—Add this item to your favorites list.
7. Click OK to add the new item to the collection.

How do I remove an item from a collection?

When you remove an item from a collection, there’s no confirmation dialog—the item is simply removed. If you decide removal was a mistake, you can always add it back (see How do I add an existing item to a collection?).

1. On the navigation bar, click .
2. Double-click a listed collection to open it.
3. Click to show the related items in this collection.
4. Right-click the item, and select Remove Item from the Collection.

How can I rearrange a list of collections?

You can select the type of collections you want to appear on the collections list (Yours, Available, Favorites, Muted), then arrange that view so that it appears in the order you find the most useful.

1. On the navigation bar, click .
2. On the Collections banner, click , then select the type of collection you want to see.
3. Click Arrange By, then select your preferred sort order.

Tip: In a collection, you can choose to see different types of content in the panel. Use the tabs at the top of a collection to navigate to each type:

■ Posts—View all messages and documents added to the collection’s wall.
■ Documents—View just the documents added to the collection’s wall.
■ Members—View and manage the collection’s membership.
Using Documents and Folders in the Add-In for Outlook

How do I hide membership messages in a collection?
When a user is added to or removed from an item a membership message is posted to the item (for example, *This wall is now accessible to: Jane Doe*). If you’d prefer not to show those messages, you can hide them. See How do I hide membership messages?

How do I rename a collection?
1. On the navigation bar, click .
2. Right-click a listed collection, and select Modify.
3. In the Modify dialog, rename the collection and click OK.

Using Documents and Folders in the Add-In for Outlook

How do I add files to a Conversation or wall?
You can upload files from your local file systems and, if you have an account with a cloud document store (for example, Google Drive), you can also add files from your cloud document store account.

Notes:
- Before you can copy files from your cloud document store, your administrator must enable this action and you must provide your cloud document store login (for more information, see How do I connect to my documents in the cloud?).
- Documents formatted in Google’s proprietary format are automatically converted to PDF when added to Oracle Social Network. You can’t copy Google proprietary format documents back to Google Drive, but you can copy the PDF version of these documents. Unlike other file types, Google proprietary documents converted to PDF are not automatically returned to their original location in Google Drive.
- If you add a document with the same name as one that was previously added from a local file system, a new version is created. However, if the document of the same name was added from a cloud document store, you receive an error. You must rename your local document or add the new version to the cloud document store.

To add documents:
1. Open the Conversation or wall you want to add the file to.
2. On the Posts or Documents tab, click .
   **Tip:** On the Documents tab, the Add Documents icon ( ) appears on the banner. On the Posts tab, the Add Documents icon appears on the banner in compact-view mode and next to the Post button in full-view mode.
3. Select where to add the document from:
   - Upload from Desktop
- **Add from Cloud Document Store**, then select the appropriate cloud document store

4. Browse to and select one or more files.
   Once you make your selection, an upload area opens at the bottom of the panel.

5. Optionally, to prevent people from downloading or copying this file select **Disable download and copy**.

6. Optionally, enter a description where it says [Optional] **Enter a description about the document(s)**.

7. Click **Post** or press Enter to start the upload.

**Note:** There are no restrictions on the file types you can upload.

**How do I view files from the add-in for Outlook?**

Wherever you see the file, click **Open** to open the file in the native viewer, or click the file name or thumbnail to open the file in the web client.

**Note:** If the document is from a cloud document store, clicking **Open** will open the file in the cloud document store’s viewer.

**How do I download a file from the add-in for Outlook?**

**Note:** For information on copying a file to your cloud document store, see **How do I copy a file from Oracle Social Network to my cloud document store?**

1. Navigate to the file you want to download.

2. Under the file, click **Download**.
   This option isn’t available if downloading and copying were disabled when the file was uploaded.

3. Select a destination, and click **Save**.

**Note:** If the document is from a cloud document store, a browser window opens, where you can download the file or view the online preview of the file.

**How do I copy a file from one Conversation to another?**

1. Navigate to the file you want to copy.

2. Right-click the file, select **Copy**, then select **Copy to Items**.
   Alternatively, on the **Documents** tab ( ) of the Conversation or wall, click **More** under the document, select **Copy**, then select **Copy to Items**.
   This option isn’t available if downloading and copying were disabled when the file was uploaded.

3. Select a way to locate the target Conversation or wall:
   - **Recent Items**—For a list of Conversations and walls you have visited recently
   - **Favorites**—For a list of Conversations and walls you have marked as a favorite
   - **Search**—To use search to locate the Conversation or wall
   - **New**—To create a new Conversation

4. For all but **New**, select the destination Conversation or wall.
5. Click **OK** to copy the file to the selected Conversation or wall.

**How do I copy a file from Oracle Social Network to my cloud document store?**

1. Navigate to the file you want to copy.
2. Right-click the file, select **Copy**, select **Copy to Cloud Document Store**, then select a cloud document store from the list.

   Alternatively, on the **Documents** tab ( ) of the Conversation or wall, click **More** under the document, select **Copy**, then select **Copy to Cloud Document Store**, then select a cloud document store from the list.
3. Click **Copy**.

   A status message appears briefly at the top of the add-in.

**How do I navigate from a document to its location in the Conversation or wall?**

When viewing the list of documents in the **Documents** tab, right-click the document, then select **Go to Comment** to get to the place in the Conversation or wall where the document was posted.

Alternatively, click **More** under the document, then select **Go to Comment**.

**How do I edit a document?**

1. Navigate to the file you want to edit.
2. Under the document, click **Edit**, then select an option:

   - **Edit Document** opens the file in its native application. This is determined by the file's extension.
   - **Edit Document With** lets you choose the editor you want to use. When you select this option, you must also select an editor.

3. Edit the file, and save, keeping the same file name and same default directory.
4. In the add-in panel, right-click the file, select **Document**, then select **Publish Changes**.
5. Finish uploading the new version as you would any other file.

   For more information, see, **How do I add files to a Conversation or wall?**

   **Note:** If you use **Edit Document With**, you might need to select **Stop Editing** from the file's **Options** menu. This is necessary when the file continues to appear highlighted.

**How do I view document annotations?**

The add-in for Outlook provides a pathway to document annotations in your browser.

1. Navigate to the file.
2. Right-click the file, then select **View Annotations**.
3. If prompted to, log in to your web version of Oracle Social Network.

   A detailed view of the document opens, showing its annotations.
How can I find a file on a Conversation or wall's Documents tab?

The **Documents** tab in a Conversation or on a wall has a search feature for locating a file by its name.

1. Go to the Conversation or wall and click **Documents**.
2. On the **Documents** banner, click **Search**.
   
   This opens a search field with other controls, like an **Options** menu.
3. Optionally, to return only the files that match your search terms that you have marked as a favorite, click **Favorite Only**.
4. In the search field, enter all or part of the file's name.
   
   Search results appear in a pop-up. Click a result to highlight it in the documents list.
5. Click **Search** to leave search mode.

How can I view a document's access history?

You can see the types of actions that have been taken on a given document in the add-in for Outlook.

1. Navigate to the document in the **Documents** tab ( **Documents** ) of the Conversation or wall.
2. Right-click the document, and select **Access History**; or click **More**, then select **Access History**.
   
   The Document Activity dialog shows when the document was:
   - **Added**
   - **Copied from a cloud document store**
   - **Copied to a cloud document store**
   - **Downloaded**
   - **Updated**
   - **Removed**
   - **Unremoved**
   - **Viewed**

How do I show or hide a document's versions?

1. Navigate to the document in the **Documents** tab ( **Documents** ) of the Conversation or wall.
2. Right-click the document, and select **View All Versions**; or click **More**, then select **View All Versions**.

How do I copy a file URL to the clipboard?

When you copy a file URL to your clipboard, you can paste it anywhere you like. When clicked, it goes to a preview of the document in your browser.

1. Navigate to the file.
2. Right-click the file, and select **Copy Document Link**.
How do I send a document as an email?

When you send a file as an email, a new email opens. It includes an attachment to the file and a link to the Conversation or wall the file is posted to. Everyone who receives the email can see the file link, but only those who are also members of the Conversation or who have access to the wall can open the file.

1. Navigate to the file.
2. Right-click the file, and select Send As E-Mail.

How do I delete a document?

You can delete documents you posted or documents on your profile wall.

Notes:
- If you are a service administrator, you can delete any document.
- Deleting a document or document version deletes it for all members of the Conversation or wall.

To delete a specific version of a file:
1. Navigate to the file in the Conversation or wall.
2. Right-click the file, and select Delete Version; or click More, then select Delete Version.

To delete all versions of a file:
1. Navigate to the file in the Documents tab of the Conversation or wall.
2. Right-click the file, and select Delete; or click More, then select Delete.

To restore a deleted file:
1. On the Posts tab, locate the deleted message icon where the file message used to be.
2. Click , then confirm that you want to restore the file.
   The message and file are restored.

Note: Only a service administrator, the person who posted the file, or the person who deleted the file can restore the deleted file.

How do I create a folder?

You can create a folder on the Documents tab of any Conversation or wall. Look for on the Documents banner.

1. Go to the Conversation or wall, and click .
2. On the Documents banner, click to open the New Folder dialog.
3. In the Name field, enter a name for the folder.
4. Click OK.

Note: When you open a folder, a breadcrumb appears at the top of the Documents tab to show you where you are in the folder structure. To return to a parent folder, click the folder name in the breadcrumb.
How do I rename a folder?

1. Go to the Conversation or wall with the folder you want to rename, and click 📁.
2. Right-click the folder you want to rename, and select Rename to open the Edit Folder dialog.
3. In the Name field, enter a new name for the folder.

How do I copy a folder?

Copying a folder copies the folder and all of its files from one Conversation or wall to another or duplicates it within the same Conversation or wall. Because the folder is a copy, it's independent of the original folder. This means, for example, the copied folder is not affected if you delete the original folder or add more files to it.

1. Go to the Conversation or wall with the folder you want to copy, and click 📁.
2. Right-click the folder you want to copy, and select Share to open the Browse Conversations dialog.
3. In the dialog, select a way to locate the destination folder, Conversation, or wall.
   - Click Recent Items to select from destinations that have recently been active.
   - Click Favorites to select from your favorite destinations.
   - Click Search to select from search results for the destination.
4. Select the destination, and click OK.

How do I move a folder?

1. Go to the Conversation or wall that has a folder you want to move, and click 📁.
2. Right-click the folder you want to move, then select Move.
3. In the Move Items dialog, select a destination for the moved folder, and click OK.

How do I add new documents to a folder?

1. Go to the Conversation or wall that has a folder you want to add new files to, and click 📁.
2. Double-click the folder you want to add a new file to, to open it.
3. Click 📁.
4. Add the file as you would to any Conversation or wall (see How do I add files to a Conversation or wall?).

How do I move documents into a folder?

1. Go to the Conversation or wall with a folder you want to move files to, and click 📁.
2. Right-click the file you want to add to a folder, and select Move to open the Move Items dialog. Select an existing folder for the file, or click New Folder to create a folder for the file.
   Alternatively, to move documents and folders to a subfolder, drag them to the new folder.
How do I move documents out of a folder?

1. Go to the Conversation or wall with a folder you want to move files out of.
2. Click .
3. Double-click the folder to open it.
4. Right-click the file you want to move, and select Move.
5. Select a destination for the file, and click OK.

How do I download a folder from the add-in for Outlook?

Downloading a folder downloads a .zip file of the folder and its content. The .zip file is named after the folder. For example, if you download an All Business folder, you get a .zip file named All Business.zip.

1. Go to the Conversation or wall with a folder you want to download.
2. Click .
3. Right-click the folder you want to download, and select Download to open a save dialog.
4. Select a destination for the folder, and click Save.

The folder and its contents are saved as a .zip file to the destination you selected.

How do I copy a folder URL to the clipboard?

1. Go to the Conversation or wall with the folder.
2. Click .
3. Right-click the folder, and select Copy Folder Link to add the folder's URL to your system's clipboard.
4. Paste the link wherever you like.

How do I open a folder in the add-in, in the web version of Oracle Social Network?

1. Go to the Conversation or wall with a folder you want to open in your browser.
2. Click .
3. Right-click the folder you want to open, and select Open in Web Browser to open the folder in the browser version of Oracle Social Network.

How do I delete a folder?

You can delete folders you created (as long as they don't include anyone else's documents or folders) or folders on your profile wall.

Notes:

- If you are a service administrator, you can delete any folder.
- Deleting a folder also deletes all the files and subfolders it contains.
- Deleting a folder deletes it for all members of the Conversation or wall.
- There's no undelete, so be sure about deleting the folder before you act.

To delete a folder:
1. Go to the Conversation or wall with a folder you want to delete.
2. Click 
3. Right-click the folder you want to delete, and select Remove.
4. In the confirmation dialog, click Yes.

To restore a deleted folder and its contents:
1. On the Posts tab, locate the deleted message icon ( ) where the folder message used to be.
2. Click , then confirm that you want to restore the folder.

The message, folder, and its contents are restored.

Note: Only a service administrator, the person who created the folder, or the person who deleted the folder can restore the deleted folder.

Working with People and Groups in the Add-In for Outlook

What is the People and Groups panel?

The People and Groups panel gives you quick access to your entire social network. Your network includes your contacts, the people you follow, the people who follow you, and the groups you are a member of. There's also a list of recommended people you might care to add to your contacts.

To open the People and Groups panel, click in the navigation bar.

The People and Groups panel has five tabs:

- **Contacts** ( )—People you selected as contacts
- **Groups** ( )—The groups you belong to
- **People You Follow** ( )—People you have selected to follow
- **Your Followers** ( )—People who have selected to follow you
- **Recommendations** ( )—People recommended to you as contacts

What are “outside users”?

Outside users are people who don't work for your company, but who collaborate with you and your co-workers in Oracle Social Network. They are members of Oracle Social Network with limited privileges. For example, outside users can be contacts but they can't have contacts in Oracle Social Network. They can participate in Conversations only when they are added by you or some other member of the Conversation.

Note: One outside user can’t add another to a Conversation.

Wherever an outside user is a member of a Conversation, a banner appears at the top of the page to alert you. All outside users have the same avatar ( ) and their names are in purple text so you can easily tell who they are.

When you open an outside user's wall, you'll notice that you can't post to it. However, you can still view profile information (if the user has added any).
Since outside users do not have walls they can post to, you won’t see Follow or Following buttons on their profile page. Instead, you’ll see Add as Contact or Remove from Contacts options.

What are "unregistered users"?

Unregistered users are people who are in your company’s directory but are not yet members of Oracle Social Network. When you add people to a Conversation or wall, the word unregistered appears next the names of the unregistered in the Manage Members dialog. When you try to add an unregistered user, a warning alerts you to their unregistered status.

When you add an unregistered person to a Conversation, they receive an email with a link to set up their account.

How do I navigate to a person’s profile?

Wherever you see a person’s picture or name, you can click it to go to the person’s profile.

Alternatively, you can right-click a person and select Go To <name>’s Wall. You can also open a contact in Outlook, and click Go to Wall in the ribbon.

How can I view my list of contacts?

1. On the navigation bar, click .
2. Click the Contacts tab ( ).
3. Optionally, arrange your list of contacts. Click ▼, then select your options:
   - Select or clear Show Offline Contacts to either show (select) or hide (clear) your contacts who are currently offline.
   - Select Arrange By then either Name, to arrange your list of contacts by a contact’s first name, or Presence Status, to arrange the list by the person’s online status: active, away, and offline.
   - Select Sort and choose from either Ascending (from 0 to 9 and A to Z or active to offline) or Descending (from Z to A and 9 to 0 or offline to active).

How do I add new contacts?

You can add a new contact on the Contacts tab of the People and Groups panel or by following them (see How do I follow people and add them as contacts?).

Note: You can add an outside user as a contact, but outside users can’t add you. Outside users can’t have contacts in Oracle Social Network.

1. On the navigation bar, click .
2. Click the Contacts tab ( ).
3. On the Contacts banner, click to open the Select Members dialog.
4. Add users in any of the following ways:
   - To search for a particular person, enter a name in the Search field, then select from the results.
   - To add a recommended contact, double-click a person on the Recommendations tab.
If your administrator has configured the system to allow you to invite users, you can invite people from your Outlook address book.

To add a contact from your Outlook address book, click Outlook Contacts, then double-click the person you want to add.

**Note:** Only contacts that include email addresses appear on the Outlook Contacts tab.

Confirm that you want to invite the person. When you click OK, an email is sent to the contact inviting them to join Oracle Social Network.

**Note:** You can also invite someone from the Outlook ribbon while viewing the contact's card. See How do I invite my contacts from my Outlook address book to join Oracle Social Network?

5. Click **OK** to add the people you selected as your contacts.

### How do I invite my contacts from my Outlook address book to join Oracle Social Network?

If your administrator has configured the system to allow you to invite users, you can invite people from your Outlook address book. Inviting users to join Oracle Social Network makes it easier to collaborate with them.

1. From your Outlook address book, open the contact you want to add to Oracle Social Network.
   
   **Note:** The contact must include an email address.

2. In the Outlook ribbon, click **Invite** from the Oracle Social Network actions.

   An email is sent to the contact inviting them to join Oracle Social Network.

   **Note:** If the contact is already an Oracle Social Network user, you see Go to Wall in the Outlook ribbon.

Alternatively, you can invite multiple Outlook contacts from the Contacts tab of the People and Groups panel. See How do I add new contacts?

### How do I remove a contact?

1. On the navigation bar, click 📞.

2. Click the **Contacts** tab (Contacts).

3. Right-click the person, and select **Remove from Contacts**.

4. If you're also following the person, specify whether to also stop following them.
   - Click **Yes** to also stop following the person.
   - Click **No** to remove the person as a contact but continue to follow them.

### How do I follow people and add them as contacts?

Following someone:

- Adds them to your list of contacts
- Lets you post messages to their wall
- Includes information about their wall activity on the Overview panel
- Includes information about the activity on their walls in your daily email digest.
1. On the navigation bar, click .

2. Select the Recommendations tab ( ) or Your Followers tab ( ) to view a list of people you are not already following.

3. Then either:
   - Click , next to the person; or
   - Right-click the person, and select Follow <name>.

   **Note:** To temporarily remove a person from the list of recommendations, click . The person might be recommended again based on future actions.

**How can I view a list of the people I follow?**

1. On the navigation bar, click .

2. Click the People You Follow tab ( ).

**How can I view a list of the people who follow me?**

1. On the navigation bar, click .

2. Click the Your Followers tab ( ).

**How can I view a list of the people recommended to me?**

1. On the navigation bar, click .

2. Click the Recommendations tab ( ).

   Each recommendation includes the person’s name, title, the reason they were recommended, a follow button ( ), and an ignore button ( ).

   **Note:** When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

**What are groups?**

Groups provide a way to organize a set of people into one entity: the group. All members of a group can be added to a Conversation, collection, or Social Object in one operation.

Every group has its own wall where group members can post content of interest to the group (for more information, see How do I create a group? and How do I navigate to a group’s wall?).

Just as each person has a profile in Oracle Social Network, a group has a profile with its own unique set of details: its name and description and a group image or avatar. Any member of the group can revise a group’s profile details and image.

**How do I view a group’s details?**

On the navigation bar, click , then click .

Double-click a group to see its details, like its wall, its members, the Conversations and walls it belongs to, and so on. The area at the top of a group has tabs you can use to navigate to these views:

- **Posts**—View everything posted to the group’s wall.
■ **Documents**—View the documents posted to the group’s wall.

■ **Members**—View all members of the group.

■ **Member Of**—View a list of the Conversations and walls this group is a member of.

■ **Belongs To**—View a list of the other groups that this group is a member of.

■ **Referring Items**—View a list of the items that link to this group.

**How do I navigate to a group’s wall?**

Whenever a group is created, it is automatically given its own wall. Here group members can post information of particular interest to the group.

1. On the navigation bar, click , then click .
2. Double-click a group, or right-click a group and select Go To <name>’s Wall.
3. Post content to the group’s wall as you would to any Conversation or wall.

**How can I view a group’s membership?**

1. On the navigation bar, click , then click .
2. Double-click a group to open its wall.
3. In the tab bar above the wall, click the Members tab to see who’s in the group.

**How do I create a group?**

1. On the navigation bar, click , then click .
2. On the Groups banner, click 📌.
3. In the Name field, enter a name for the group, and click OK.

**How do I add people to a group?**

1. On the navigation bar, click 📌, then click 📌.
2. Double-click a group to open its wall.
3. Click the Members tab.
4. On the Members banner, click 📌.
5. Select a source of potential members.
   - Click Groups & Contacts to select from your contacts and other groups.
     In this dialog, you can expand a group and pick individual members.
   - Click Search to enter search terms; click the Search icon to show all results.
6. Double-click a person or a group to add them to the Select list.
7. Click OK to add your selections to the group membership.

**How do I revise a group’s membership?**

1. On the navigation bar, click 📌, then click 📌.
2. Double-click a group to open its wall.
3. Click the Members tab.
4. Revise the group:
   - To add members, start with step 5 in How do I add people to a group?
   - To remove members, right-click a person or group, and select Remove from Membership.

**How do I hide membership messages on a group wall?**

When a user is added to or removed from an item a membership message is posted to the item (for example, *This wall is now accessible to: Jane Doe*). If you’d prefer not to show those messages, you can hide them. See How do I hide membership messages?

**How do I rename a group or revise its description?**

1. On the navigation bar, click 📌, then click 📌.
2. Double-click a group, or right-click a group and select Go To <name>’s Wall.
3. Click , and select Edit Profile.
4. In the Group Profile dialog, revise the group’s name and description.
How do I add or change a group's profile picture?

1. On the navigation bar, click , then click .
2. Double-click a group, or right-click a group and select Go To <name>'s Wall.
3. Click , and select Edit Profile.
4. In the Group Profile dialog, click Change.
5. Navigate to and select a group profile picture.

How do I deactivate a group?

When you deactivate a group, the group keeps its memberships in Conversations and walls, but it can’t be added to additional Conversations and walls. Deactivating a group also prevents further additions to the group’s wall. When deactivated, a group’s icon and name are grayed out (the group name is grayed out on membership lists and on the Groups tab).

Note: You can reactivate a deactivated group at any time. For more information, see Is there a way to reactivate a deactivated group?

1. On the navigation bar, click , then click .
2. Double-click a group to open its wall.
3. In the groups banner, click , then select Deactivate.
4. In the confirmation dialog, click Yes.

Is there a way to reactivate a deactivated group?

Enabling a deactivated group makes the group available for adding to Conversation and other types of membership lists.

1. On the navigation bar, click , then click .
2. In the groups banner, click , then select Deactivated to show all deactivated groups.
3. Double-click the deactivated group to open its wall.
4. Click , then select Activate.

Using Social Objects in the Add-In for Outlook

Understanding Social Objects

Social Objects are business objects in a business application or business process that are shared with Oracle Social Network. A shared business object is called a Social Object in Oracle Social Network.

A Social Object has its own wall for messages and documents and its own membership. A Social Object’s membership includes all of the people involved in projects centering around that object. For example, the membership for a customer Social Object that comes from your CRM system, could include someone from your sales team, product management, fulfillment, and other lines of business.

Your implementation of Oracle Social Network might use Social Objects from your own systems-of-record.
How can I arrange a list of Social Objects?

1. On the navigation bar, click ☐️ and select a type of Social Object to show.
2. Click ▾ on the Social Object banner, select Arrange By, then select the sorting option to apply.

How do I view the details of a Social Object?

1. On the navigation bar, click ☐️ and select a type of Social Object to show.
2. In the panel, double-click the object you want to view to open its details.

In the details of a selected Social Object, you can switch between the following views using the tabs that appear above the details:

- **Posts**— View all messages and documents added to this object’s wall.
- **Documents**— View just the documents added to this object’s wall.
- **Members**— View and manage the object’s membership.
- **Related Items**— View a list of the items related to this object.
- **Referring Items**— View the other Social Objects that refer to this Social Object (see What are referring items?).

**Tip:** A Social Object might include a link back to the associated record in the source system (for example, customer relationship management, enterprise resource planning, or human capital management). If available, you can open the source record by clicking View Details in the options menu (click ▾ on the Social Object banner) or at the bottom of the list of the Social Object’s attributes.

What are referring items?

Referring items are items that link to the current item. For example, the Acme collection includes the Conversation Wiley. The Wiley Conversation, in turn, lists the Acme collection on its list of referring items.

How do I add an existing item to a list of related items?

1. On the navigation bar, click ☐️ and select a type of Social Object to show.
2. Double-click the object to open it.
3. Click ✖️.
4. Click the Add Existing Item icon in the Social Object banner.
5. Select a way to locate the item, for example, select:
   - **Recent Items**—For a list of items you have visited recently
   - **Favorites**—For a list of items you have marked as a favorite
   - **Search**—To use search to locate the item

   When you select from the pop-up results, the dialog closes and your selection is added to the list of related items. You can skip the next step.
6. Select one or more items.
7. Click OK to add your selections to the Social Object's list of related items.

How do I add a new Conversation to a Social Object's list of related items?

1. On the navigation bar, click and select a type of Social Object to show.
2. Double-click the object to open it.
3. Click .
4. Click the New Conversation icon to open the New dialog.
5. Enter details as you would for any other item.
6. To copy the Social Object's membership list to the new item, select Copy membership of source Social Object.
7. Click OK to add the item to the object's list of related items.

How do I view the members of a Social Object?

1. On the navigation bar, click and select a type of Social Object to show.
2. Double-click the object to open it.
3. Click .

How can I view the messages posted to a Social Object's wall?

1. On the navigation bar, click and select a type of Social Object to show.
2. Double-click the object to open it.
3. Click .

How do I hide membership messages on a Social Object's wall?

When a user is added to or removed from an item a membership message is posted to the item (for example, This <Social Object> is now accessible to: Jane Doe). If you'd prefer not to show those messages, you can hide them. See How do I hide membership messages?

Interacting with Microsoft Outlook in the Add-In

What kinds of shared activities are there between Outlook and the add-in for Outlook?

You can add Microsoft Outlook emails, meeting details, and tasks to an Oracle Social Network Conversation or wall; and, in the Oracle Social Network add-in for Microsoft Outlook, you can initiate Outlook-related activities. For example, you can add an Oracle Social Network contact to your Outlook Contacts list; create an Outlook task; send an email with links and attachments from the add-in; schedule an Outlook calendar meeting, and select participants from Oracle Social Network as well as your Outlook address book and your other usual sources.
How do I add email, meeting details, or tasks to a Conversation or wall?

You can add Outlook email, meeting details, and tasks to an Oracle Social Network Conversation through the Oracle Social Network add-in for Microsoft Outlook. Additionally, you can add the item's recipients and attachments. You can edit the item to leave out some or all of its content, recipients, and attachments. You can add more content, people, and files along with the originals.

Be thoughtful about which items you add and how much of their content you include. Depending on their length, added Outlook items can quickly clutter a Conversation. Before finalizing an addition, you can edit it to sanitize and simplify it. Consider removing header information, signatures, and any other unnecessary or unwanted parts.

1. Perform one of the following actions to add an Outlook item (email, meeting, or task) to a Conversation or wall:
   - Select an Outlook item, then click **Add To Oracle Social Network** in the Outlook ribbon.
   - Right-click an Outlook item, then click **Add To Oracle Social Network**.
   - Select an Outlook item, then go to the Conversation or wall you want to add the email to, and in its top-most banner, click ▼, then select **Add To Oracle Social Network**.
   - Open the target Conversation or wall, then drag and drop the Outlook item into the open Conversation or wall.
   - In a meeting or task, click **Add to** in the item's ribbon at the top of the form.
   - In an email's ribbon, select one of the following options under **When sending**:
     - **Move to**—Post the message to a Conversation or wall, rather than sending the email.
     - **Copy to**—Post the message to a Conversation or wall, but also send the email.

This option is useful if your message includes some users who are not part of your social network. You would generally want to use this for simple posted information, not messages that will spark a discussion, otherwise the email thread and the Conversation will become out of sync. For example, you might want to send meeting details such as location and agenda to a user who is not part of your social network, and copy it to a Conversation in your social network so that you have a record of the communication along with other related information for internal use, like documents for the meeting.

The email is moved or copied to the Conversation or wall when you click **Send**.

**Note:** If you don’t want to post the email to a Conversation or wall, select **No Post** to just send the email.

2. In the resulting dialog, the **Conversation** is populated with the Conversation or wall you targeted or with the title of the email, meeting, or task (which will be the title of the new Conversation). To select another Conversation, click **Conversation**, then select a recent Conversation or a favorite Conversation, or, to create a new Conversation with a different name, click **New**.

**Note:** For more information about creating a new Conversation, see How do I start a Conversation?
3. Any people included in the email, meeting, or task who are Oracle Social Network users are added to the **Invites**. To select other people to invite, click **Invites**, then, in the Select Members dialog, select groups and people you want to add as members.

Double-click a name to add it to the **Select** list at the bottom of the dialog, or select names, then click **Select** to add all selections. Use **Ctrl+Click** to select more than one person or group.

By default, you see a list of email recipients. Click a tab to change your view:

- **Recipients**—View the list of people who received the email.
- **Recommendations**—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add as a member—the person is one of your contacts, the person is a member of similar items, and other common actions.
- **Contacts**—View a list of your contacts.
- **Groups**—View a list of your groups.
- **Current Members**—If you are adding the email to an existing Conversation, you can see the people and groups that are members of the Conversation.

Alternatively, you can enter part of a person’s or group’s name, and select them from the list that pops up.

**Note:** You can hide unwanted email recipients by telling Oracle Social Network to ignore particular email addresses or domain names when adding an email to Oracle Social Network. For more information, see How do I tell Oracle Social Network to ignore particular email addresses or domains when posting email messages to a Conversation or wall?

4. Any documents that were part of the email, meeting, or task are added to the **Attachments**. To add more attachments, click **Attachments**, then, in the dialog, click **Add**, select documents to attach, and add descriptions of the selected documents.

**Note:** The documents you select are uploaded to the Conversation or wall, but they are not also attached as additional documents to the email, meeting, or task.

5. Click **Post As** to select how the text should be posted:

- **Top-Level Messages**—Post the email as one or more individual messages. Message splits mark the end of each message. See Step 6 for more information on message splits.

- **Single Message with Replies**—Post the first email message in the dialog as a top-level message in the Conversation or wall, and post all other messages as replies to the top-level message. Message splits mark the end of each message. See Step 6 for more information on message splits. This option is useful for email threads.

- **Word Document**—Post the email as a Microsoft Word document. Formatting and inline images will be preserved. Message splits aren’t supported.

- **HTML Document**—Post email as an HTML document. Formatting and inline images will be preserved. Message splits aren’t supported.

6. Any text in the email, meeting, or task is included in the dialog’s editor. You can edit the text and formatting, add or remove links, insert references to Oracle Social Network items, and change how the messages are split up.
Oracle Social Network automatically adds message splits ("End of Message" indicators) based on the messages in the email, but you can also manually add or remove message splits to control how the email is posted to the Conversation or wall:

- To remove a message split, delete the whole "End of Message" line.
- To add a message split, place your cursor where you want to split the messages, then click Add Message Split.

If you’re adding an email with multiple messages, the newest message appears in the dialog first (at the top), the same as it does in the email. When the messages are added to Oracle Social Network, the first message in the dialog is posted to the Conversation or wall first, followed by the remaining messages.

If you want to reverse the order of the messages in the dialog (to show the oldest message first), click Sort Messages, then select Last Message on Top.

**Note:** The sort order has no effect if there are no message splits.

7. Click Post.

**How do I tell Oracle Social Network to ignore particular email addresses or domains when posting email messages to a Conversation or wall?**

You might send or receive email from addresses or domain names that are part of Oracle Social Network but that you don’t want to include when posting email messages to Conversations or walls (for example, distribution lists or support email addresses). You can tell Oracle Social Network to ignore these email addresses and domain names so they don’t show up in the Recipients list when you’re adding an email to a Conversation or wall. Also, if you’re prompted to post outgoing email messages to Oracle Social Network (see How do I tell Outlook to prompt me to use Oracle Social Network?), the ignored email addresses and domain names won’t generate a prompt.

You can add email addresses or domain names to the ignore list in the following ways:

- When adding an email to a Conversation or wall:
  1. In the Add to Oracle Social Network dialog, click Invites.
  2. In the Select Members dialog, on the Recipients tab, right-click the recipient whose email address/domain name you want to ignore.
  3. Select Add Invitee to Ignore List or Add Invitee's Domain to Ignore List.

Recipients that match the ignored email addresses/domain names are immediately removed from the list.

- Add, edit, or remove entries in your Posting Email preferences. For more information, see How do I tell Outlook to prompt me to use Oracle Social Network?, step 4.

**How do I add an Oracle Social Network contact to my Microsoft Outlook Contacts list?**

You can accomplish this task wherever people or groups are listed, like on a Conversation or wall’s membership list or on one of the tabs on the View people and groups panel. This describes how to add an Outlook Contact from the add-in’s View people and groups panel.

1. In the navigation bar, click `Contacts`.

Using Oracle Social Network with Microsoft Outlook 15-51
2. Click a tab to open it.

Tip: On the Groups tab, double-click a group to open its wall, then click the Members tab to see its members.

3. Right-click someone on the list, and select Add to Outlook Contacts.

How do I schedule a Microsoft Outlook Calendar meeting through the add-in for Outlook?

1. Right-click a message, person, Conversation, wall, or other item, and select Schedule Meeting to open an Outlook Calendar Meeting scheduler.

You can also invite multiple people or groups in one action:

a. On the People and Groups tab, use Ctrl+Click to select multiple people or groups.

b. Right-click, and select Schedule Meeting from the context menu.

The people or groups you selected are added to the meeting’s list of invitees.

2. Finish setting up the meeting as you would for any Outlook Calendar entry.

Note: You can add meeting details from your Outlook Calendar to a Conversation or wall. For more information, see How do I add email, meeting details, or tasks to a Conversation or wall?

Where you initiate a new meeting in the add-in affects who is automatically invited to the meeting and what is included in the invitation. For example:

- Right-click a message, and the person who posted the message is automatically added to the To field in the meeting scheduler. Additionally, a link to the message is included in the body of the invitation.

- Right-click a document, and the person who uploaded the document is added to the To field in the meeting scheduler. Additionally, a link to the document is added to the body of the invitation.

- Right-click a listed Conversation, wall, collection, or Social Object, and no one is automatically added to the To field in the meeting scheduler. But a link to the item that you right-clicked is included in the body of the message.

Tip: You can invite people who use Oracle Social Network using the scheduler’s Attendees list. Select Invite Attendees, then Attendees, and Address Book. In the Select Attendees and Resources dialog in Outlook Calendar, open the Address Book menu and select Oracle Social Network under Outlook Address Book (or Other Address Books).

How do I create a Microsoft Outlook Task from the add-in for Outlook?

You can accomplish this wherever people or groups are listed, like on a Conversation or wall’s list of members or on one of the tabs on the View people and groups panel. This describes how to create an Outlook Task from the add-in’s View people and groups panel.
1. In the navigation bar, click 🌐.

2. Click a tab to open it.

3. Right-click someone on the list, and select Create Task.
   
   Note: For groups, double-click a group, open its Members tab, then right-click a group member.

4. Fill out and save the Task form like you would with any other Outlook task.

How do I send an email from the add-in for Outlook?

You can send an Outlook email from just about anywhere in the add-in for Outlook, like the list of messages in a Conversation, on a person or a group on the View people and groups panel, on a document on the Documents panel or on the Documents tab of any Conversation or wall.

Note: You can also add an Outlook email to a Conversation or wall. For more information, see How do I add email, meeting details, or tasks to a Conversation or wall?

1. Right-click an item, person, or group, and select Send Email or Send As Email (depending on your starting point).

2. Write and send the message like you would any other Outlook email.

The person, group, or type of item you initiate this action from determines what you are sending. Table 15–3 lists people, groups, and item types and describes what occurs when you select Send Email or Send As Email.

<table>
<thead>
<tr>
<th>Send (As) Email From a</th>
<th>An Email Form Opens With …</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conversation</td>
<td>The name of the Conversation in the Subject field and a link to the Conversation in the body of the email</td>
</tr>
<tr>
<td>Collection</td>
<td>The name of the collection in the Subject field and a link to the collection in the body of the email</td>
</tr>
<tr>
<td>Message</td>
<td>The email address of the person who posted the message in the To field; the name of the Conversation where the message was posted in the Subject field; and the message and a link to the message in the body of the email When recipients click the link, it opens the Conversation where the message was posted in the web version of Oracle Social Network</td>
</tr>
<tr>
<td>Document</td>
<td>The person who uploaded the document in the To field; the name of the Conversation where the documents was posted in the Subject field; and the document added as an attachment</td>
</tr>
<tr>
<td>Person</td>
<td>The person’s name in the To field</td>
</tr>
<tr>
<td>Group</td>
<td>All members of the group in the To field</td>
</tr>
</tbody>
</table>

Liking and Adding Favorites in the Add-In for Outlook
What are Likes and Favorites?

Liking something communicates to others that you approve or support a posted item. Once you like something, a You like this link appears on the item. As likes accumulate, the link text changes to, for example, You and 1 person like this, You and 2 people like this, or 2 people like this, as the case might be. Click the link to open a dialog showing who has liked the item.

When you unlike something, the check mark that appears next to You like this is removed and the message’s like count is reduced, or, if you were the only person to like the item, the like link is removed entirely.

Marking an item as a favorite makes it easy to locate—you can find it on the Favorites panel or filter many panels to show only favorites. The Overview, Collections, Conversations, Social Objects, and Documents panels all provide a Favorites filter, which you can use to filter out all items except those you have marked as a favorite. When you show groups on the People and Groups page, you can filter your list of groups by favorites, too.

How do I find out who likes an item?

Click the like link text below the message—for example, You and 1 person like this—to open the View Like dialog. The View Like dialog lists the people who like the message.

How do I like an item?

1. Navigate to the item you want to like.
2. Click the Like link at the bottom of the message or reply.
   A link appears on the item, for example, You and 1 person like this, which you can click to see who has liked the item.

How do I unlike an item?

The quick way to unlike an item is to click its Unlike link. Here is another way to unlike an item:
1. Navigate to the item you want to unlike.
2. Right-click the item, select Like <item_type>, then You like this.

How do I mark an item as a favorite?

Click the item’s ★, or right-click the item, then select Mark as Favorite.

How do I unmark a favorite?

Click the item’s ★, or right-click the item, then select Mark as Favorite.

How can I see all my favorites?

On the navigation bar, click ★.

Using Search in the Add-In for Outlook
What do hashtags (#) have to do with search?

You can add hashtags to meaningful terms in messages so all messages containing your hashtagged term can be collected together in a list of search results. For example, imagine you're writing about discounts. This topic comes up in a few unrelated Conversations and walls. Every time you or your colleagues say something about discounts, you all write discounts as a hashtag (#discounts). You can search for #discounts and return a list of all messages in otherwise unrelated Conversations and walls that contain the hashtagged term.

Tip: You can include the following characters in a hashtag: A through Z, a through z, 0 through 9 and _.

With any search, available hashtags are suggested when you enter your search term. Selecting one of these takes you to the Hashtags panel where all messages that include that hashtag are shown.

Hashtagged terms are clickable wherever they appear. So clicking #discounts in any Conversation takes you to the Hashtags panel, where all messages that include the hashtagged term are returned.

You can also follow hashtags. When you follow a hashtag, messages in public Conversations and walls that contain that hashtag appear on the Overview page, even if you are not a member of those Conversations or walls.

To follow a hashtag, click it wherever you see it to go to the Hashtags panel, then click # at the top of the page. To stop following the hashtag, click # again.

How do I run a search?

1. Enter at least two characters in the search box at the top of the add-in.
   Top rated results appear in a drop-down list. Click a result to open the item.

2. To see all results, press Enter or click .
   To see only a particular result type (for example, Conversations or documents), click , then select a filter.
   The search results open in the Search Results panel.
   Note: You can also filter the results after running your search by selecting a filter from the Options menu on the Search Results banner.

3. If you filtered by a result type, additional sort options are available. Click the Options menu on the Search Results banner, select Sort, then select a sort option.

How do I rerun a recent search?

To rerun a recent search, open , select Recent Searches, then select the term you want to reuse.

Tip: To clear your Recent Searches list, open , select Recent Searches, then Clear.

Working Offline
How do I work offline?

Suppose you’re heading for the airport and want to catch up on your Conversations while on the plane. Before you leave, you can download an offline copy of the Conversation; or you can save a Conversation to a .zip file, then unzip the file on your local drive. Both versions contain all Conversation content available at the time you created the archive, including messages, replies, and files. However, when you download an offline copy, you can make changes to the Conversation to be published the next time you’re online.

■ For information on downloading an offline copy of a Conversation, collection, social object, or wall, see How do I download an Offline Copy of an item?
■ For information on downloading an archive of a Conversation, see How do I download an archive a Conversation?

How do I download an Offline Copy of an item?

To download an offline copy of a Conversation, collection, social object, or wall, open the item, click , then click Download for Offline. An icon ( ) appears next to the item to indicate that it has been downloaded.

Alternatively, you can right-click the item, then click Download for Offline.

Note: You can set Offline preferences to select what data gets downloaded for offline use. See How do I set offline preferences?

What’s the difference between online and offline items?

An offline copy of an item has a few differences from an online item:

■ The Insert Reference button is disabled.
■ You can’t see referring items.

How can I view a list of my offline Conversations while I’m online?

When you’re online, you can view a list of the Conversations you’ve downloaded for offline use by clicking on the navigation bar.

Alternatively, on the navigation bar, click , click , and select Offline.

How can I view an offline copy of an item?

You can view an offline copy of an item while you’re offline or online:

Offline
Double-click a listed item to open it.
A banner at the top of the window reminds you that you are viewing this item offline.
Note: To work offline, at the bottom of the panel, in the Accounts menu, clear the check mark next to Work Online.

Online
To preview the changes you made to an offline copy of an item, right-click the item, click Offline Copy, then click Preview.
Alternatively, if you are viewing the item you changed offline, click , select Offline Copy, then click Preview.
How do I clear changes I made offline?

When you are online (connected to your account), you can remove the changes you made to items offline.

- To remove changes for a specific item, right-click the item, click **Offline Copy**, then click **Clear Changes**.
- To remove all your offline changes at the same time, at the bottom of the panel, click , click **Offline Copy**, then click **Clear Changes**.

How do I refresh an offline copy of an item?

When you connect to your account, your offline copies are automatically refreshed periodically. However, you can also manually refresh offline copies while you’re connected.

- To refresh the offline copy of a specific item, right-click the item, click **Offline Copy**, then click **Refresh**.
- To refresh all offline copies at the same time, at the bottom of the panel, click , click **Offline Copy**, then click **Refresh**.

How do I post the changes I made offline to an online item?

If you have made changes to an offline item, the next time you go online (connect to your account) a banner appears saying that there are changes pending.

You can set Offline preferences to select whether your changes are published automatically when you go online or if you’d rather publish them manually. See How do I set offline preferences?

If you select to automatically publish your changes, the changes are posted when you connect to your account, and the banner disappears.

If you choose to publish your changes manually, you can preview the change to an item, by right-clicking the item, clicking **Offline Copy**, then clicking **Preview**.

Use one of the following methods to manually publish those changes for others to see.

- To publish changes to all items at the same time, in the banner, click **Publish**.
- To publish changes for a specific item, right-click the item, click **Offline Copy**, then select **Publish Changes**.

  Alternatively, while viewing the item, click in the title bar, click **Offline Copy**, then click **Publish Changes**.

Changes are posted to the live versions of the selected items, and the banner disappears.

How do I remove an offline copy of an item?

Right-click the item, click **Offline Copy**, then click **Remove**.

Alternatively, to remove all offline copies at the same time, when you are online, at the bottom of the panel, click , click **Offline Copy**, then click **Remove**.
These topics introduce the features of Oracle Social Network Desktop and describe how to use them:

Getting Started with Oracle Social Network Desktop

What is Oracle Social Network Desktop?

Oracle Social Network Desktop provides easy access to Oracle Social Network from your computer desktop. Use it for quick access to your contacts and groups; to participate in and view Conversations; and to stay notified of important activity.
Oracle Social Network Desktop is available for both Windows and Mac OS.

**How do I install Oracle Social Network Desktop?**

1. Get the installation file from the Downloads page in the web version of Oracle Social Network:
   a. Log in to the web version of Oracle Social Network.
   b. Click the arrow next to your name at the top of the application, then click Downloads.
   d. On the resulting page, click the link to download the appropriate installer for your operating system.

2. Install the application:
   - **In Microsoft Windows**, locate the installation file (social_network_desktop_setup.exe), open it, and follow the instructions in the install wizard.
   - **On a Mac**, locate the installation file (oracle_social_network_desktop.dmg), and open it. The disk image window should open with a representation of Oracle Social Network Desktop on one side and a representation of your Applications home on the other. Drag Oracle Social Network Desktop to Applications, and drop it there.

**How do I Open Oracle Social Network Desktop?**

- **In Microsoft Windows**, use one of the following options:
  - On your desktop, double-click .
  - From the Start menu, select All Programs, Oracle Social Network, Oracle Social Network.

- **On a Mac**, use one of the following options:
  - In the Dock, click .
  - From the Go menu, select Applications, then double-click Oracle Social Network.

  **Note:** The icon appears in the Dock only if you put it there.

  - From the Go menu, select Applications, then double-click Oracle Social Network.

  The Oracle Social Network Desktop icon ( ) appears in the system tray (for Microsoft Windows) or in the Dock (Mac).

  **Note:** A green dot on the icon means you have unread notifications. See Using Notifications in Oracle Social Network Desktop.

**How do I log in to Oracle Social Network Desktop?**

**Important:** If you received an email invite to join Oracle Social Network, you must log in through the web client and change your temporary password before you use the Oracle Social Network Desktop. Click the link in the invite to open the web client.

After you install Oracle Social Network Desktop, the first time you open it, you’ll be prompted for your Oracle Social Network login information:

1. Your system administrator likely set up your system to automatically connect to the necessary accounts, but, if not, in the Server URL field, enter the URL to your Oracle Social Network account, then click Next.
For example, enter: https://acme.social.us1.oraclecloud.com/client.

2. If your company uses federated authentication, your newly created account is selected in the Manage Accounts dialog. Click OK, then enter your login information as requested.

If your company doesn't use federated authentication, skip to the next step.

3. If necessary, enter the Identity Domain.

4. In the User Name field, enter your Oracle Social Network user name.

5. In the Password field, enter your Oracle Social Network password.

6. To log in automatically in future sessions, select Remember password.

7. Click Finish.

You can configure one or more Oracle Social Network accounts and easily switch between them. For more information, see:

- What are Oracle Social Network accounts?
- How do I enable account switching when I start Oracle Social Network Desktop?

**What is the sidebar?**

The sidebar is a panel on your desktop with tabs for accessing the main features of Oracle Social Network. In Microsoft Windows, you can dock the sidebar to the right or left side of your screen, or leave the sidebar undocked.

Use the icons on the sidebar to navigate and take action in Oracle Social Network Desktop.

<table>
<thead>

</table>
What is the Detail window?

The Detail window provides a tabbed view of all the items (Conversations, collections, people, groups, Social Objects, and hashtag pages) you have open. Each tab includes an icon representing the type of item, the item name, and, when appropriate, a number showing how many unread messages you have in the Conversation or wall.

Note: The tab flashes when a new message is added to the Conversation or wall.

The plus sign to the right of the tabs enables you to open existing items or create a new Conversation.

You can right-click a tab to perform the following actions:

- **Close This Tab**—Closes the tab you right-clicked.
- **Close Other Tabs**—Closes all tabs other than the one you right-clicked.
- **Close All Tabs**—Closes the Detail window and all tabs.
- **Mark All as Read**—Marks all the messages in the tab you right-clicked as read.
- **Mute/Unmute <Item>**—Mutes or unmutes the item displayed on the tab you right-clicked. For more information, see How do I mute or unmute an item?
- **Add to/Remove from Favorites**—Adds or removes the item displayed on the tab you right-clicked as a favorite. For more information, see How do I add an item as a favorite?
- **Rename <Item>**—Lets you rename the item displayed on the tab you right-clicked. For more information, see How do I rename an item?
- **View in Web Browser**—Open the item displayed on the tab you right-clicked in the web version of Oracle Social Network. For more information, see How do I view an item in the web version of Oracle Social Network?

When many tabs are open in the Detail window, an overflow menu appears, which you can click to see additional open items. To the right of the overflow menu, the number in the blue box indicates the total number of all unread messages in all overflow Conversations and walls.
The controls on a tab vary depending on the type of item displayed:

- **Membership bar**—shows pictures of the item members and an icon for managing the list of members. For more information, see *How do I view and manage an item's members?*
  
  Appears on Conversations, collections, groups, and Social Objects tabs.

- **Find and navigate tools**—enable you to find unread messages, flags assigned to you, or text within the Conversation or Social Object.
  
  - To find unread messages, click the unread messages count in the tab bar, and use the up and down arrows to navigate through the unread messages.

- **Options menu**—enables you to perform actions on the item, like adding the item as a favorite or changing the item's settings.
  
  Appears on all tabs except hashtag page tabs, but the options on each menu vary according to the item type.

- **Tabs**—shows lists of associated items (such as messages and documents), but the tabs vary according to the item type:
  
  - **Messages** (Conversations) or **Wall** (all other items)—Shows the messages relating to the item you’re viewing.
  
  - **Documents**—Shows the documents added to the item you’re viewing and any folders that exist.
  
  - **Followers** (people)—Shows who is following the person you’re viewing.
  
  - **Following** (people)—Shows who the person you’re viewing is following.
  
  - **Member Of** (groups)—Shows what items the group you’re viewing is a member of.
  
  - **Related Items**—Shows the items added to the item you’re viewing.
– **Referring Items**—Shows the items that include the item you’re viewing in their list of related items.

**How do I set up or change my profile?**

1. Click your picture in the upper left corner to display your wall. Your profile information is at the top of your wall. (You can get to anyone’s wall and profile by clicking their name or picture almost anywhere you see them in Oracle Social Network.)

2. Click **Edit Profile**.

3. Edit your profile information as desired. Some information is read-only and can’t be edited.

4. To change your profile picture, click **Change Picture**. Select a .gif, .png, or .jpg file. Your picture is scaled to 150x150 pixels and placed in a circle showing your online status.

   The Crop Picture dialog shows your image with a circle over the area that will show in Oracle Social Network. You can drag the corners of the crop area to change the size of your picture, or drag your picture to change the position of the crop area. When you’re happy with the size and position, click **Crop**.

   If you want to remove your profile picture and just use the default avatar, click **Clear Picture**.

   **Note:** Your wall is a place where you can post messages and other types of content for everyone to see. Other people can also post content to your wall, but only if they’re following you. You can turn off the ability for others to post to your wall through **Settings** (see **How do I control whether other people can post or reply to messages and documents on my wall?**).

**How do I close and exit Oracle Social Network Desktop?**

You have a couple of options:

**Close**

You can close Oracle Social Network Desktop but leave it running in the background to continue seeing pop-up alerts:

- **In Microsoft Windows:** Click the **Close** icon in the top right of the sidebar.

- **On a Mac:** Click the red close button in the top left of each window.

**Exit**

You can exit Oracle Social Network Desktop, closing all its windows and discontinuing pop-up alerts in this session:

- **In Microsoft Windows:** In the system tray, click the **Oracle Social Network** icon and select **Exit**. Click **OK** in the confirmation dialog.

- **On a Mac:** From the application menu, select **Quit Oracle Social Network**. Click **OK** in the confirmation dialog. Alternatively, right-click the **Dock** icon, and select **Quit**.
What You Can Do in Oracle Social Network Desktop

Most tasks you perform in Oracle Social Network Desktop are similar no matter what type of object you’re working with.

How do I open an item?

Click the item wherever you see it linked. The item opens in the Detail window. For more information, see What is the Detail window?

To open an item from the object panel:
1. Click the appropriate icon in the sidebar to open the object panel. For example, click to open the Conversations panel.
   For a description of the icons in the sidebar, see What is the sidebar?
2. Click the item.

To open an item from the Detail window:
1. While viewing an item in the Detail window, click , then select Open Conversation.
2. Enter the name of the item in the Search Conversations field, or click a filter to select from a list:
   - Click Recent to select from a list of items you’ve visited recently.
   - Click Favorites to select from a list of your favorite items.
   - Search Results opens automatically when search results are returned.
3. Click the item.

How do I add an item as a favorite?
To mark an item as a favorite, click next to the item. Click the star again to unmark it. For more information, see Using Favorites in Oracle Social Network Desktop.

How do I create an item?
1. Click the appropriate icon in the sidebar to open the object panel. For example, click to open the Conversations panel.
   For a description of the icons in the sidebar, see What is the sidebar?
2. Click .
   For contacts, enter at least two characters to search for people, then click a person to add them as a contact.
   For Social Objects, select the type of object to create.
3. Enter a name for the item.
4. Select whether the item is private (only visible to members) or public (visible to everyone).
   Note: This setting doesn’t appear for groups.
5. Select members by moving groups and people to the right column to add them or to the left column to remove them. Use Ctrl+Click to select more than one person or group.
You can also search by entering part of a person’s or group’s name, and select them from the list that pops up.

By default, you see a list of recommended members. Click a tab to change your view:

- **Recommendations**—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add as a member—the person is one of your contacts, the person is a member of similar items, and other common actions.
  
  **Tip:** You can view the reason for the recommendation by placing your cursor over the recommendation.

- **Contacts**—View a list of your contacts.

- **Groups**—View a list of your groups.

Alternatively, you can create a new Conversation from the Detail window.

1. While viewing an item in the Detail window, click **+**, then select **New Conversation**.
2. Enter a name for the Conversation.

### How do I view and manage an item’s members?

1. Open the item. For more information, see **How do I open an item?**
   
   At the top of the item’s tab is a membership bar with pictures of all the people who are members of that item.

2. In the membership bar, click **…”** to open the Update Members dialog.

   **Notes:**

   - If you don’t see the manage members button (**…”**) when viewing a group, the group is managed externally (for example, through LDAP), so you can’t change the membership through Oracle Social Network.

   - If you’re viewing a public item that you haven’t joined, you can view the members by clicking the Options menu (**…”**), then selecting **Show Membership**.

3. In the Update Members dialog, move groups and people to the right column to add them or to the left column to remove them. Use **Ctrl+Click** to select more than one person or group.

   If your administrator has configured the system to allow you to invite users, you can add someone who isn’t an Oracle Social Network user. Enter the person’s email address in the search box, then click **Invite email_address**. When asked if you want to send an invitation, click **Yes**. When you save your changes an email will be sent to the person inviting them to join Oracle Social Network.

   You can also search by entering part of a person’s or group’s name, and select them from the list that pops up.

   By default, you see a list of recommended members. Click a tab to change your view:

   - **Recommendations**—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add as a member—the person is one of your contacts, the person is a member of similar items, and other common actions.
Tip: You can view the reason for the recommendation by placing your cursor over the recommendation.

- Contacts—View a list of your contacts.
- Groups—View a list of your groups.

Alternatively, you can remove a member (that was not added as part of a group) by right-clicking the member in the membership bar, then clicking Remove from <item type>.

Note: The Remove from <item type> option isn't available if you right-click a member that was added as part of a group. To remove a member who was added as part of a group, you must remove the whole group through the Update Members dialog (as described above).

In-Line Recommendations
You can also add members to a Conversation, collection wall, or Social Object wall by accepting the recommendations that are sometimes shown in the list of messages (under Add to this <item type>). Oracle Social Network recommends people to add to an item based on people you frequently add to other items and actions you have in common with others (such as being members of the same Conversations).

Each recommendation includes the person’s name and the reason they were recommended. You can perform the following actions:
- Click the person’s name to view their profile.
- Click Add to accept the recommendation and add the person to the Conversation.
- Click Ignore to decline the recommendation.

  Note: When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

- Click the arrows on either side of the current recommendation to see the previous or next recommendation.

When you accept or ignore a recommendation, the next recommendation appears.

Note: The recommendations appear near where you entered the Conversation. If you scroll up or down, the Add to this Conversation section might move out of view. Just scroll up or down to find it.

How do I hide an item's membership messages?
When a user is added to or removed from an item a membership message is posted to the item (for example, This Conversation is now accessible to: Jane Doe). If you’d prefer not to show those messages, you can hide them.

1. Open the item. For more information, see How do I open an item?
2. Click ☰, select <Object Type> Settings, then select Hide Membership Messages.

Note: User walls have followers rather than members, so this setting doesn’t apply to user walls.

How do I share a link to an item?
Let’s say you want to share a link to an item (for example, a Conversation) in an email or while you’re instant messaging. Open the item, click the Options menu (☞), then
select **Copy Link**. The link to the item is copied to your clipboard, and you can paste it anywhere you like.

**Note:** When people click the link, they are taken to Oracle Social Network in their browser.

**How do I rename an item?**

1. Open the item. For more information, see How do I open an item?
2. In the Detail window, click the Options menu ( ), click **Conversation Settings**, then select **Rename <Object>**.
3. Enter the new name.

**How do I split a Conversation off from an existing Conversation or wall?**

If one your messages start going off-topic or a new question or idea is raised, you might want to split that discussion into a new Conversation.

1. Open the Conversation or wall, see How do I open an item?
2. Under the text box, click ▪.
3. In the New Conversation dialog box, enter a name, select the visibility, and add members. For more information, see How do I create an item?

When you create the new Conversation, messages are posted in both the new and the original Conversations showing a link to the other Conversation.

**How do I mute or unmute an item?**

If you have items in your object lists that you never look at (for example a Conversation that doesn't apply to you), or you're seeing updates on the **Overview** panel or in your email digests about items you don't care about, you can mute those items. Muting an item hides it and its activity from your view. It's still there; you just won't hear about it anymore. (The only exception is if you're flagged on a message in a muted item, for which you will still be alerted by email.)

**To mute an item:**

1. Click the appropriate icon in the sidebar to open the object panel. For example, click to open the **Conversations** panel.

   For a description of the icons in the sidebar, see What is the sidebar?

2. Right-click the item and select **Mute <Object>**.

   Alternatively, open the item, click the Options menu ( ), then select **Mute <Object>**.

**To unmute an item:**

1. Click the appropriate icon in the sidebar to open the object panel. For example, click to open the **Conversations** panel.

   For a description of the icons in the sidebar, see What is the sidebar?

2. Click the Options menu ( ), and select **Muted** to show all muted items.
3. Right-click the item and select **Mute <Object>** to clear the check mark.

   Alternatively, open the item, click the Options menu ( ), then select **Mute <Object>** to clear the check mark.
How do I close or reopen an item?

You can close any item you belong to, even if you didn't create it. Closing an item prevents people from adding new content to it and moves the item to the list of closed items in everyone's object panel.

To close an item:
1. Open the item. For more information, see How do I open an item?
2. In the Detail window, click the Options menu ( ), click <Object> Settings, then select Close <Object>.
3. Optionally, add an explanation about why you closed the item.

To reopen an item:
1. Click the appropriate icon in the sidebar to open the object panel. For example, click to open the Conversations panel.
   For a description of the icons in the sidebar, see What is the sidebar?
2. Click the Options menu ( ), then select Closed to show a list of all the closed items.
3. Open the closed item.
4. In the Detail window, click the Options menu ( ), click <Object> Settings, then select Reopen <Object>.

How do I discard an item?

You can discard an item if you are the only member and it's private. The item, its messages, and its documents are deleted. Although the relationships between the discarded item and any related and referring items are deleted, the related and referring items aren't affected in any other way.

Note: All content is retained on the system for legal or forensic purposes, but only an application administrator can recover discarded content.

1. Click the appropriate icon in the sidebar to open the object panel. For example, click to open the Conversations panel.
   For a description of the icons in the sidebar, see What is the sidebar?
2. Right-click the item, and select Discard <Object>.

Alternatively, open the item, click the Options menu ( ), click <Object> Settings, then select Discard <Object>.

How do I download an archive of an item?

At some point you might want to download an archive of an item, possibly to view when you're offline or maybe to keep a record of the item's content at a certain point.

The archive is in the form of a .zip file (named after the item). It contains the item's list of members, messages, and replies in an HTML file (named by default index.html) and all the documents added to the item.

To download an archive of an item:
1. Open the item. For more information, see How do I open an item?
2. In the Detail window, click the Options menu ( ), then click Download Archive.
A progress window opens showing the download progress. After the download is done, you can double-click the archive to open it, or you can right-click it and select to open the containing folder or remove it from the progress window list.

To work with an archive of an item:
1. Unzip the files to your computer.
2. Open index.html.

Clicking a document link opens the copy of the document that is included in the .zip file. All other links in index.html (user names, like, reply, and so on) open Oracle Social Network in the browser.

Notes:
- You can’t make changes to an archive of an item (though you can click a link to open the item in a browser and make changes there). If you want to be able to make offline changes, instead add the item to your Offline Briefcase (see Working Offline in Oracle Social Network Desktop).
- You can get back to the progress window after you’ve closed it by clicking in the system tray for Microsoft Windows, or by clicking the Action Menu for Mac, then clicking File Transfer Progress.

How do I add an item to my Offline Briefcase?

Tip: For information about offline briefcases, see Understanding the Offline Briefcase.
1. Click the appropriate icon in the sidebar to open the object panel. For example, click to open the Conversations panel.
   For a description of the icons in the sidebar, see What is the sidebar?
2. Right-click the item, and select Add to Offline Briefcase.
   Alternatively, open the item, click the Options menu ( ), then click Add to Offline Briefcase.

How do I view an item in the web version of Oracle Social Network?
1. Open the item. For more information, see How do I open an item?
2. In the Detail window, click the Options menu ( ), then click View in Web Browser.
   Your browser opens to the selected item.

Other Common Tasks
Here is a list of other things you can do in Oracle Social Network Desktop:

**Working with Messages**

**How do I post a message?**

1. Open the Conversation or wall. For more information see How do I open an item?
   
   A Conversation has the message text box at the bottom of the window. A wall has the message text box at the top of the window.
   
   **Note:** If you don’t see a text box at the top of someone’s wall, you aren’t following the person or the person doesn’t allow other people to post to his or her wall.
   
2. In the text box, enter your message.
   
   **Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?
Controls below the text box offer more options:

- Select text and click `B` to format your selection as bold.
- Select text and click `I` to format your selection as italic.
- Select text and click `U` to underline your selection.
- Select text and click `X` to remove formatting.
  For example, when you cut-and-paste content, it can carry over undesirable formatting from the source. You can easily remove that formatting by selecting it and clicking `X`.
- Click `✍` to enter your message in the Rich Text Editor.
  The Rich Text Editor offers a richer set of text formatting tools—for example, bullets and numbering options—to post a more formally formatted message.
- Click `🔗` to add a link to an Oracle Social Network Conversation, wall, or document.
  For more information, see How do I post a link to a Conversation, wall, or document?
- Click `💻` to start a web conference with your web conference client.
  For more information, see How do I start a web conference?
- Click `📷` to take a screen shot of your desktop and post it.
  For more information, see How do I post a snapshot of my screen?
- Click `_document` to add a document.
  For more information, see How do I add documents from the Messages or Wall tab?

**Note:** Under the text box there's also a control to create a new Conversation, split off from the existing item (`>Create`). For more information, see How do I split a Conversation off from an existing Conversation or wall?

### How do I check for unread messages?

1. Click the appropriate icon in the sidebar to open the object panel. For example, click `✉` to open the Conversations panel.
   For a description of the icons in the sidebar, see What is the sidebar?
   The number of unread messages in each object appears in a blue box (` unread`) next to the object name.
2. Filter the view to show only items with unread messages. Click `垾`, select Only Unread.
3. Optionally, sort the objects by the number of unread posts. Click ` אהבתי`, select Sort By, then select Unread Posts.
   By default, the list is sorted in descending order (objects with the most unread posts are listed first).

**Note:** Your sort settings are saved and applied whenever you view the Conversations panel.
How do I quickly navigate through the messages in a Conversation or wall?

While viewing a Conversation or wall, you can scroll up or down but you can also use a couple features to quickly navigate a Conversation or wall.

- To jump directly to the previous or next unread message, click the unread messages count in the tab bar, and use the up and down arrows to navigate through the unread messages.

- To jump to the top or bottom of a Conversation or wall:
  - On Microsoft Windows, press Ctrl+Home (top) or Ctrl+End (bottom).
  - On Macintosh, press Cmd+Ctrl+Up (top) or Cmd+Ctrl+Down (bottom).

How do I mark messages as read or unread?

In an object panel you can mark all messages for a particular object as read by clicking the number of unread messages in the blue box (1) next to the object.

Open the Conversation or wall, use the following methods to mark messages as read or unread:

- To mark a message as read, click the dot to the left of it, right-click the message and select Mark Message as Read, or click More and select Mark Message as Read.

- To mark all messages as read, click in the header.

  This number shows how many unread messages there are in the current Conversation. Once you click this number, it resets to zero and all messages in the current Conversation are marked as read.

  You can also click , and select Mark All as Read.

- If you want a message status to be unread, but you’ve already marked it as read, you can right-click the message and select Mark Message as Unread, or click More and select Mark Message as Unread. This works only with messages others have posted and not your own posts.

  Tip: For information on marking messages as read automatically when you view them, see How do I set up when to mark messages as read?

How do I like or unlike a message?

Open the Conversation or wall, click Like under the message to like it. Click the like icon again to unlike it.

You can also like an item from the Overview panel (click in the sidebar).

  Tip: To see who has liked a message, click the link that shows the number of people who have liked it.

How do I mark or remove a message as a favorite?

Open the Conversation or wall, click next to the message to mark it as a favorite. Click the star icon again to unmark it.
For information on viewing your favorites, see How do I view my favorites?

**How do I flag a message for someone?**
Open the Conversation or wall, click the flag icon next to the message to manage flags. For more information, see How do I assign or clear flags?
For information on viewing your flags, see Where can I see all my flags?

**How do I reply to a message?**
1. Open the Conversation or wall. For more information see How do I open an item?
   You can also reply to an item from the Overview panel (click ▶ in the sidebar).
2. Click ▶️ Reply under the message (or right-click the message, then click Reply) to open a reply entry field.
3. Add your reply.
   **Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?
   **Note:** If you don’t see ▶️ Reply under a post on a person’s wall, the person doesn’t allow other people to reply to his or her wall posts.

**How do I edit a message I posted?**
Right-click the message you posted (you can edit only your own messages) and click Edit, or click More and select Edit, to open a text editor and revise the message.
All edited messages show 📋 at the bottom of the message. You can click this to see the earlier versions of that message and to open the message for editing.
**Notes:** For information about the message text editor, see How do I post a message?

**How do I delete a message?**
You can delete messages you posted or messages on your profile wall.
**Note:** If you are a service administrator, you can delete any message.
Right-click the message, then click Delete, or click More and select Delete.
To restore a deleted message, locate the deleted message icon (☐) where the message used to be, click 🔄, then confirm that you want to restore the message.
**Note:** Only a service administrator, the person who posted the message, or the person who deleted the message can restore the deleted message.

**How do I post a link to a Conversation, wall, or document?**
1. Open the Conversation or wall. For more information see How do I open an item?
2. Under the text box, click 🛳️.
3. In the resulting dialog, select a source for the Conversation, wall, or document.
   ■ Recent Items—Select from a list of items you have recently interacted with.
   ■ Recent Documents—Select from a list of documents you have recently viewed.
Working with Messages

- **Favorites**—Select from the items you have marked as a favorite.
- **Search Results**—Enter a search term in the Search field at the top of the dialog; results appear on the Search Results tab.

4. Select the item you want to link to, and click **OK**.
5. Optionally, add your own text to the message.
   
   **Tip:** You can add text before you add the link and after.

**How do I post a snapshot of my screen?**

You can take a picture of your screen and post it to a Conversation or wall.

1. Open the Conversation or wall. For more information see **How do I open an item?**
2. Bring the windows that you want to capture forward.
3. Under the text box, click \( \text{ } \) to open an image of your entire desktop in the Snapshot Editor.
   
   This minimizes all Oracle Social Network Desktop windows, and provides you with, by default, five seconds to arrange your desktop for the snapshot. You can configure the waiting period in your settings. For more information, see **How do I set the time to delay before a snapshot is taken?**

   To skip the waiting period, click **Grab Now**.

4. Select the region to snapshot by clicking and dragging over the area you want to use.
5. Optionally, in the text box at the bottom of the Snapshot Editor, enter a message to include with the image.

   **Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see **What are hashtags (#) and how do I use them?**

**How do I add documents from the Messages or Wall tab?**

You can add files from your local file systems and from your cloud document store account (for example, Google Drive). For instructions, see **How do I add documents?**

**How do I split a Conversation off from an existing Conversation or wall?**

If your messages start going off-topic or a new question or idea is raised, you might want to split that discussion into a new Conversation.

Open the Conversation or wall, click \( \text{ } \) (under the text box), then complete the information in the dialog. For more information, see **How do I split a Conversation off from an existing Conversation or wall?**

When you create the new Conversation, messages are posted in both the new and the original Conversations showing a link to the other Conversation.

**How do I select the language for system messages for a Conversation or wall?**

Imagine that you and your colleagues post messages and documents in one language, but system messages keep appearing in another. You can easily change the language for these messages.

1. Open the Conversation or wall. For more information see **How do I open an item?**
2. Click the Options menu ( ), click <Object> Settings, click Change <Object> Language, then select a new language.

When you change the language for an item, new system messages appear in the new language. System messages posted before the language change remain in the language they were in when posted. Messages, files, button labels, and links are not affected by an item language change.

Note: Selecting a language for system messages affects all members’ views of the item.

Working with Documents

How do I view a document?

From wherever you see the document (for example, in the Overview panel, in a list of messages, on the Documents tab for an item), you can open the document in one of the following ways:

■ Click the document image to open the document in the web version of Oracle Social Network.

■ Under the document, click Open; or right-click the document, then select Open Document to open the document in its native application.

If the document is from a cloud document store, the right-click option might be Open Document in Cloud Document Store, where Cloud Document Store is the name of the cloud document store, and the document opens in the cloud document store’s viewer.

Note: If Oracle Social Network can't find an application associated with the file type, you are prompted to select an application (for Windows) or you are taken to the file in Finder (for Mac).

How do I create or delete a folder?

To create a folder:
1. Open the item that you want to add the folder to or remove the folder from. For more information see How do I open an item?
2. Click the Documents tab.
3. Click .
4. Enter a name and click Create.

Note: When you open a folder, a breadcrumb appears at the top of the Documents tab to show you where you are in the folder structure. To return to a parent folder, click the folder name in the breadcrumb.

To delete a folder:
You can delete folders you created (so long as it doesn't include anyone else’s documents or folders) or folders on your profile wall.

Note: If you are a service administrator, you can delete any folder.

To delete a folder, right-click the folder, then click Delete.
To restore a deleted folder:
To restore a deleted folder and its contents, on the Messages tab, locate the deleted message icon (🗑️) where the folder message used to be, click 🔄, then confirm that you want to restore the folder.

Note: Only a service administrator, the person who created the folder, or the person who deleted the folder can restore the deleted folder.

How do I add documents?
You can upload files from your local file systems and, if you have an account with a cloud document store (for example, Google Drive), you can also add files from your cloud document store account.

Notes:
- Before you can copy files from your cloud document store, your administrator must enable this action and you must provide your cloud document store login (for more information, see How do I allow Oracle Social Network to access my cloud documents?).
- Documents formatted in Google’s proprietary format are automatically converted to PDF when added to Oracle Social Network. You can’t copy Google proprietary format documents back to Google Drive, but you can copy the PDF version of these documents. Unlike other file types, Google proprietary documents converted to PDF are not automatically returned to their original location in Google Drive.
- If you add a document with the same name as one that was previously added from a local file system, a new version is created. However, if the document of the same name was added from a cloud document store, you receive an error. You must rename your local document or add the new version to the cloud document store.

To add documents:
1. Open the item that you want to add the document to. For more information see How do I open an item?
2. On the Messages tab, click 📧 under the text box. Alternatively, on the Documents tab, navigate to the folder where you want to add documents, then click 📧 at the top of the tab.
3. Select where to add the document from:
   - Upload from Desktop
   - Add from Cloud Document Store, then select the appropriate cloud document store
4. Select one or more documents, then click OK.
5. If you’re uploading a document from your desktop you can prevent people from downloading or copying the file by selecting Disable download and copy.
6. Optionally, enter a message to accompany the file.

Tips:
- If you selected multiple files, click ✍️ to the left of a file to open a message entry area.
- When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see
What are hashtags (#) and how do I use them?
When you click **Post**, you see the progress of the upload.

**How do I delete a document?**

You can delete documents you posted or documents on your profile wall.

**Notes:**
- If you are a service administrator, you can delete any document.
- Deleting a document or document version deletes it for all members of the Conversation or wall. There’s no undelete, so be sure about deleting the file before you act.

**To delete a document and all its versions:**
1. Open the item that includes the document you want to delete. For more information see **How do I open an item?**
2. Click the **Documents** tab.
3. Click **More** under the document, or right-click the document, then click **Delete**.

**To delete a specific version of a document:**
1. Navigate to the message associated with the document version you want to delete.
   
   You can browse for the message or you can get to the document version message from the **Documents** tab. To get to the document version message from the **Documents** tab:
   
   a. Click the version number link next to the document name, or right-click the document, then select **Show All Versions**.
   
   b. Right-click the version you want to delete, then click **Go to Comment**.
2. Right-click the document version message, then click **Delete**.

**To restore a document:**

To restore a deleted document, on the **Messages** tab, locate the deleted message icon ( ) where the document message used to be, click , then confirm that you want to restore the document.

**Note:** Only a service administrator, the person who posted the document, or the person who deleted the document can restore the deleted document.

**How do I copy documents or folders to another item?**

1. Open the item that includes the documents or folders you want to copy. For more information see **How do I open an item?**
2. Click the **Documents** tab.
3. Select one or more documents and folders.
4. Right-click your selection, select **Copy**, then select whether to copy the selected documents and folders to a new Conversation or an existing Conversation.
5. If you selected **Copy to New Conversation**, enter the information for the new Conversation. If you selected **Copy to Existing Conversation**, select the Conversation you want to copy the documents and folders to.
How do I move documents or folders to another folder?

1. Open the item that includes the documents or folders you want to move. For more information see How do I open an item?
2. Click the Documents tab.
3. Select one or more documents and folders.
4. Right-click your selection, then select Move. In the dialog, select the folder you want to move the documents and folders to, or click New Folder to create a new folder.

   Alternatively, to move documents and folders to a subfolder, drag them to the new folder.

How do I download documents or folders?

Note: For information on copying a file to your cloud document store, see How do I copy files from Oracle Social Network to my cloud document store?

1. Open the item that includes the documents or folders you want to download. For more information see How do I open an item?
2. Click the Documents tab.
3. Select one or more documents and folders, right-click your selection, then select Download.

   Note: If you select a folder or more than one document, the selected items are downloaded as a .zip file.

   Alternatively, to download a single file, click Download under the file.

A progress window opens showing the download progress. After the download is done, you can double-click the document to open it, or right-click it and select to open the containing folder or remove it from the progress window list.

Note: If the document is from a cloud document store, a browser window opens, where you can download the file or view the online preview of the file.

Alternatively, while viewing messages, right-click a document, then select Download Document, or click More and select Download Document.

Note: You can get back to the progress window after you’ve closed it by clicking in the system tray for Microsoft Windows, or by clicking the Action Menu for Mac, then clicking File Transfer Progress.

How do I copy files from Oracle Social Network to my cloud document store?

1. Open the item that includes the files you want to copy. For more information see How do I open an item?
2. Click the Documents tab.
3. Right-click the files, select Copy, then select Copy to Cloud Document Store, select a cloud document store from the list, then select a location, and click OK.

   Alternatively, if you originally copied the document from a cloud storage provider, you can select Copy Back to <Cloud Document Store> to copy the file back to the location it came from.

A progress bar at the top of the Detail window shows the upload progress.
How do I view other versions of a document?

When a document has more than one version, it displays a link in brackets ([x versions]) that indicates the number of versions.

1. Open the item that includes the document you want to view. For more information see How do I open an item?
2. Click the Documents tab.
3. Click the version number link, or right-click the document, then select Show All Versions.
4. Click the version to open it, or right-click it for additional options.

To hide the versions, click the version number link again; or right-click the document, then select Show Latest Version.

How do I see who has accessed a document?

You can look at a document’s access history to see who has viewed or performed other actions on the document.

1. Open the item that includes the document for which you want to see the access history. For more information see How do I open an item?
2. Click the Documents tab.
3. Click More under the document, or right-click the document, then select Access History.
   
   The Access History dialog you see who viewed, copied, or added new versions of the document along with the date and time they did so.
4. To filter the list by a type of activity, click All Activity and select an activity type.

How do I navigate from a document to its location in the Conversation or wall?

You can get from a document in the Documents tab to the place in the Conversation or wall where the document was posted.

1. Open the Conversation or wall. For more information see How do I open an item?
2. Click the Documents tab.
3. Click More under the document, or right-click the document, then select Go to Comment.

How do I view an annotation on a document?

When you see a message stating that someone has added an annotation to a document, click the name of the document to navigate to the annotation. The document opens in the web version of Oracle Social Network and displays the annotation.

Alternatively, right-click the document, then select View Annotation, or click More and select View Annotation.
What are related and referring items?

Related items are the items that have been added to the item you’re viewing. They can include Conversations, Social Objects, people’s walls, group walls, and other collections.

Referring items are the items that the item you’re viewing has been added to. They can include Social Objects and collections.

How do I view an item’s related items?

1. Open the collection or Social Object. For more information see How do I open an item?
2. In the Detail window, if the tab isn’t already open, click the Related Items tab to show the list of items that has been added to the item you’re viewing.

How do I view an item’s referring items?

1. Open the item. For more information see How do I open an item?
2. In the Detail window, click the Referring Items tab to show the list of items that the item you’re viewing has been added to.

How do I add an existing item as a related or referring item?

1. Open the item to which you want to add the related or referring item. For more information see How do I open an item?
2. Click the appropriate tab (Related Items or Referring Items) tab, then click .
   Note: Referring items are available only for collections and Social Objects.
3. In the dialog, select a source:
   - Recent—Select from a list of items you have recently interacted with.
   - Favorites—Select from the items you have marked as a favorite.
   - Search Results—Enter a search term in the Search field at the top of the dialog; results appear on the Search Results tab.
4. Select the desired related or referring item.

How do I add a new item as a related or referring item?

1. Open the item to which you want to add the related or referring item. For more information see How do I open an item?
2. Click the appropriate tab (Related Items or Referring Items) tab, click , then select the type of item you want to create.
   Note: Referring items are available only for collections and Social Objects.
3. In the dialog, enter a name, set the visibility, and add members.

Using Hashtags and Search in Oracle Social Network Desktop
What are hashtags (#) and how do I use them?

You can use a hashtag (#) in a message to call out a meaningful term or topic, making it easy to search for all content associated with that term or topic. For example, imagine *discounts* is a popular topic in your group, but the discounts can come in the form of dealer incentives, cash-back deals, seasonal discounts, or any other number of forms. How do you find what everyone is saying about all those things? You use a hashtag. Every time you or your colleagues say something about some form of discount, you include the hashtag `#discounts`. You can then search for `#discounts` and get a list of all messages in otherwise unrelated Conversations and walls that contain the hashtagged term.

Adding Hashtags

You can add one or more hashtags to any message (comments, replies, annotations, and document messages) simply by typing `#` before a term. When you start typing a hashtag by typing `#` plus at least one letter, existing hashtags (ones that have been used before) appear for you to select from.

Tips:

- You can include the following characters in a hashtag: A through Z, a through z, 0 through 9 and `_`.
- A hashtag can be a maximum of 25 characters (not including the `#`).

Searching for and Viewing Hashtags

When you perform a search, available hashtags are included in the results. If your search term starts with a hashtag (#), one of two things will happen. If the hashtag exists, the hashtag page opens. If the hashtag doesn’t exist, you see search results that contain any tags similar to the hashtag you searched for.

Wherever you see them, hashtagged terms are clickable and will open a hashtag tab page where all messages that include that hashtag are shown. So clicking `#discounts` in any Conversation opens a `#discounts` tab which shows any message (in a Conversation, document annotation, wall, or such) that you have access to that includes the discounts hashtag.

On the hashtag tab, you can filter the messages to show all messages that include the hashtag (*All Results*) or just those messages posted by people you are following (*By People You Follow)*.

Following Hashtags

You can also follow hashtags. When you follow a hashtag, messages in public Conversations and walls that contain that hashtag appear on the *Overview* panel, even if you are not a member of those Conversations or walls.

To follow a hashtag, click the hashtag to open the hashtag tab, then click *Follow* at the top of the tab. To stop following the hashtag, click *Stop Following*.

How do I search?

1. Enter at least two characters in the search box at the top of the sidebar. Top rated results appear in a drop-down list. Click a result to open the item in the Detail window.

2. To see all results, press Enter or click `🔍`. The search results open in the Detail window.
Using the Overview Panel in Oracle Social Network Desktop

3. Optionally, select a filter from the Show menu to show a particular result type (for example, Conversations or documents).

4. After filtering by a result type, you see some additional sort and filter options:
   - **Sort By:** Select how to sort your results.
   - **Posted By:** Limit your search to messages or documents posted by a particular person.
   - **Posted When:** Limit your search to messages or documents posted within a particular period.
   - **Document Type:** If you filter your results to show documents, you can select which types of documents to show.
   - **Updated By:** Limit your search to Conversations, collections, or Social Objects updated by a particular user.
   - **Updated When:** Limit your search to Conversations updated within a particular period.
   - **Created By:** Limit your search to Conversations or groups created by a particular user.
   - **Created When:** Limit your search to Conversations or groups created within a particular period.
   - **Favorites Only:** Limit your search to only your favorite Conversations.
   - **Include Public:** Control whether to show public Conversations in your results.
   - **Include Closed:** Control whether to show closed Conversations in your results.
   - **Include Deactivated:** Control whether to show deactivated groups in your results.
   - **With Member:** Limit your search to Conversations or groups with a particular member.

   If you don't see an option that applies to your selected item type, click \( \text{Show More} \) to show more options.

   Click a result to open it, or right-click a result to see additional actions.

To edit your search term, click \( \text{Edit} \), then press Enter or click \( \text{Cancel} \).

Using the Overview Panel in Oracle Social Network Desktop

The Overview panel provides a view of recent activity across Oracle Social Network. On the Overview panel, you see only the information you’re interested in (that you have access to). For example, you see messages only from Conversations that you’re a member of and walls of people you’re following.

1. Click \( \text{Overview} \) in the sidebar to open the Overview panel.

2. Use the Options menu (\( \text{Options} \)) to adjust your view:
   - **Only Unread**—When selected, view only the Conversations and walls you’re a member of that have unread messages.
   - **Message Preview**—When selected, shows a preview of the latest message posted to each Conversation and wall you’re a member of.

   **Note:** These options are saved and applied whenever you view the Overview.
Double-click a message or reply to view it in the Conversation or wall.

Click the Conversation or wall name to go to the bottom of the Conversation or the top of the wall.

Right-click a message to access a menu of useful actions.

---

**Using Flags in Oracle Social Network Desktop**

**What are flags?**

*Note:* For detailed information about flags, including explanations of what the different flag icons mean, see [What do the flag icons mean?](#).

Every message posted to a Conversation or wall shows a flag icon that tells you instantly whether a flag is assigned on the message. For example:

- If the flag icon is hollow (-hole), then no flag is assigned on the message.
- If the flag icon is not hollow (solid)—that is, it's a solid color, possibly with secondary marker on it—then one or more flags are assigned on the message.

There are several types of flags:

- **For Your Information**—Look at this when you have the time.
- **Please Reply**—Look at this, and let me know what you think.
- **Please Reply - Urgent**—Look at this now, and let me know what you think immediately. (An email notification is always sent for Please Reply - Urgent flags.)

To get more information about a flag, you can either mouse over the flag to see a tooltip (for example, "For Your Information flag for another from Name.") or click the flag icon, then click **Manage Flags** to see all the flag assignments.

**Where can I see all my flags?**

1. Click ![flag icon](flag-icon.png) in the sidebar to open the **Flags** panel, where you can see a list of all the flags assigned to you, all the flags you assigned, or a subset of these.

   *Note:* The number displayed on the flag icon in the sidebar shows how many flags are assigned to you.

2. Use the Options menu (gear) to filter and sort the list:

   - **Flags for You**—Flags assigned to you.
   - **Flags You Assigned**—Flags assigned by you.
   - **Please Reply - Urgent, Please Reply, and For Your Information**—Filter by flag type. The number to the right of the flag type shows how many of that type of flag is on the list.
   - **Sort By**—Sort the messages by message date in ascending or descending order. For flags assigned to you, you can also sort by the date the flag was assigned.

   *Note:* Your sort settings are saved and applied whenever you view the **Flags** panel.

   - **Flagged For/Flagged By**—Filter by the person you assigned the flag to or who assigned the flag to you.
Click a message to view it in its associated Conversation or wall.

How do I assign or clear flags?

To manage flags on an individual message:
1. While viewing the message in the Overview panel (click  in the sidebar), the Flags panel (click  in the sidebar), or the Detail window (see How do I open an item?), click the flag icon next to the message.
2. Assign or clear flags:
   - To remove a flag assigned to you, click Clear.
   - To quickly assign a For Your Information flag to someone, click the flag next to the person.
   - To assign a particular flag to someone, select the type of flag in the drop-down list next to the person.
   - To quickly flag everyone, click Flag All (in the Not Flagged section), and select the type of flag you want to assign.
   - To quickly remove all flags (whether assigned by you or not), click Clear All (in the Others Flagged section).
   - To remove a particular flag, click  next to the person.
   - To search for someone, enter part of the person’s name in the search box.

Note: Although you can remove existing Please Reply and Please Reply - Urgent flags in closed Conversations, you can’t assign new ones. You can assign only For Your Information flags in closed Conversations. For information on closing or reopening a Conversation, see How do I close or reopen an item?

To clear flags assigned to you on one or more messages from the Flags panel:
1. Click  in the sidebar to open the Flags panel.
2. If necessary, select a view from the Options menu ( ): Flags for You or Flags You Assigned.
3. Select the flags you want to clear (using Ctrl-click or Shift-click), then click  (at the top of the Flags panel).
   Any flags assigned to you in the selected messages are cleared.

Using Favorites in Oracle Social Network Desktop

How do I mark an item as a favorite?

Marking an item as a favorite is an easy way to keep track of the items you use most frequently.

To mark an item as a favorite, click  next to the item. Click the star again to unmark it.
How do I view my favorites?

1. Click ⭐️ in the sidebar to open the **Favorites** panel, where you can see a list of items you've marked as favorites.

2. Use the Options menu (⬇️) to filter the list by item type (for example, messages or Conversations).

   You can also sort the list by the date the favorite was added or by the item name, in ascending or descending order.

   **Note:** Your sort settings are saved and applied whenever you view the **Favorites** panel.

Alternatively, you can view your favorites in an object panel:

1. Click the appropriate icon in the sidebar to open the object panel. For example, click ⬆️ to open the **Conversations** panel.

   For a description of the icons in the sidebar, see *What is the sidebar?*

2. In the Options menu (⬇️), select **Favorites**.

Using Conversations in Oracle Social Network Desktop

How can I browse Conversations?

1. Click ⬆️ in the sidebar to open the **Conversations** panel, where you can see all the Conversations you have access to.

2. Use the Options menu (⬇️) to change the view of the **Conversations** panel:

   - **Yours**—View all Conversations you are a member of
   - **Available**—View all Conversations that are available to you to join (also called *public* Conversations)
   - **Favorites**—View all Conversations you have marked as a favorite
   - **Muted**—View all Conversations you have muted
   - **Open**—View all Conversations that are open for additions and posts
   - **Closed**—View all Conversations that are closed to additions and posts
   - **Sort By: Name**—Arrange the Conversations on the list alphabetically by name
   - **Sort By: Last Updated**—Arrange the Conversations on the list by when a Conversation was last updated
   - **Sort By: Active Members**—Arrange the Conversations on the list by the number of currently active members
   - **Sort By: Unread Posts**—Arrange the Conversations on the list by the number of unread posts
   - **Sort By: Ascending**—Arrange the Conversations on the list from 0 to 9 and A to Z
   - **Sort By: Descending**—Arrange the Conversations on the list from Z to A and 9 to 0
   - **Only Unread**—When selected, shows only items with unread messages.
- **Message Preview**—When selected, shows a preview of the latest message posted to each Conversation's wall.

**Note:** Your sort and message preview settings are saved and applied whenever you view the Conversations panel.

**How do I open a Conversation?**

Click the Conversation name. The Conversation opens in the Detail window. For more information, see How do I open an item?

**Note:** People outside your company can sometimes be given limited access to Conversations in Oracle Social Network. If there are outside users in the Conversation, a banner appears near the top of the page to let you know. All outside users have the same avatar and their names are in purple text. For more information, see What are “outside users”?

**How do I join a public Conversation?**

Open the public Conversation, and click **Join Conversation** in the yellow banner at the top of the Conversation.

**Note:** If people outside your company are members of the Conversation, a purple banner appears near the top of the page to let you know. All outside users have the same avatar and their names are in purple text.

**How do I mark a Conversation as a favorite?**

Marking a Conversation as a favorite is an easy way to keep track of the Conversations you use most frequently.

To mark a Conversation as a favorite, click next to the Conversation. Click the star again to unmark it.

**How do I start a One-on-One Conversation?**

A one-on-one Conversation is between you and one other person.

There are several ways to open a one-on-one Conversation with someone:

- Anywhere you see a person's picture (except in the Overview panel), right-click it, then select **Open One-on-One Conversation**.

- On the People panel, select someone, then click.

- While viewing a person's profile, click **Open One-on-One**.

When someone starts a one-on-one Conversation with you, it opens a new tab in the Detail window. If you’re already looking at another Conversation, the tab with the one-on-one opens in the background so you can keep working in the current Conversation. For information, see How do I get One-on-Ones to open automatically when new messages are posted?

**How do I start a Conversation?**

In the Conversations panel (click in the sidebar), click , and complete the information in the dialog.

For more information, see How do I create an item?
How do I view and manage Conversation members?

Open the Conversation. At the top of the Conversation's tab is a membership bar with pictures of all the people who are members of the Conversation.

**Note:** If you’re viewing a public Conversation that you haven’t joined, you can view the members by clicking the Options menu ( ), then selecting **Show Membership**.

To manage members, in the membership bar, click 🔄 to open the Update Members dialog. For more information, see How do I view and manage an item's members?

How do I work with messages in the Conversation?

See Working with Messages.

How do I work with documents and folders in the Conversation?

Open the Conversation, click the **Documents** tab. For more information, see Working with Documents.

How do I work with related and referring items in the Conversation?

Open the Conversation, click the **Related Items** or **Referring Items** tab. For more information, see Working with Related and Referring Items.

How do I share a link to a Conversation?

Let’s say you want to share a link to a Conversation in an email or while you’re instant messaging. Open the Conversation, click the Options menu ( ), then select **Copy Link**. The link to the Conversation is copied to your clipboard, and you can paste it anywhere you like.

**Note:** When people click the link, they are taken to Oracle Social Network in their browser.

How do I start a web conference?

Before you can start a web conference:

- The server you are connected to must support web conferences.
- You must have an account with a supported web conference service.
- You must enter and save your web conference account information in the web version of Oracle Social Network. For more information, see How do I configure conference account settings?

1. Open the Conversation or wall where you’re going to start a web conference.
2. Click the Options menu ( ), then select **Start Conference**.
   Or click 🕹️ under the text box.
3. In the Start Conference dialog, correct the values as necessary, then click **Start**.
   Your web conference application opens.

How do I join a web conference?

In the message that says a conference has started or in the banner at the top of the Conversation or wall, click **Join Conference**.
Note: The banner at the top of the Conversation or wall appears while the conference is running. You can join (or rejoin) the conference from the banner, or you can dismiss the banner.

How do I end a web conference?

1. Open the Conversation where the conference was started.
2. Click , and select **End Conference**.
   Ending a conference from a Conversation disconnects everyone in the Conversation from the conference, but it doesn’t end the conference application.
3. End the meeting from your web conference application.

How do I rename a Conversation?

Open the Conversation, click the Options menu ( ), click **Conversation Settings**, select **Rename Conversation**, then enter a new name.
For more information, see How do I rename an item?

How do I split a Conversation off from an existing Conversation or wall?

If your messages start going off-topic or a new question or idea is raised, you might want to split that discussion into a new Conversation.

Open the Conversation, click (under the text box), then complete the information in the dialog. For more information, see How do I split a Conversation off from an existing Conversation or wall?
When you create the new Conversation, messages are posted in both the new and the original Conversations showing a link to the other Conversation.

How do I mute or unmute a Conversation?

If you have items in your Conversation lists that you never look at (for example a Conversation that doesn’t apply to you), or you’re seeing updates on the **Overview** panel or in your email digests about Conversations you don’t care about, you can mute those Conversations. Muting a Conversation hides it and its activity from your view. It’s still there; you just won’t hear about it anymore. (The only exception is if you’re flagged on a message in a muted Conversation, for which you will still be alerted by email.)

To mute a Conversation, in the **Conversations** panel (click in the sidebar), right-click the Conversation, then select **Mute Conversation**.

To unmute a Conversation, view the **Muted** Conversations in the **Conversations** panel, right-click the Conversation you want to unmute, then select **Mute Conversation** to clear the check mark.
For more information, see How do I mute or unmute an item?

How do I close or reopen a Conversation?

You can close any Conversation you belong to, even if you didn’t create it. Closing a Conversation prevents people from adding new content to it and moves the Conversation to the list of closed Conversations in everyone’s **Conversations** panel.
To close a Conversation, open the Conversation, click the Options menu (), click **Conversation Settings**, then select **Close Conversation**.

To reopen a Conversation, open the closed Conversation, click the Options menu (), click **Conversation Settings**, then select **Reopen Conversation**.

For more information, see **How do I close or reopen an item?**

**How do I discard a Conversation?**

You can discard a Conversation if you are the only member and it's private. The Conversation, its messages, and its documents are deleted. Although the relationships between the discarded Conversation and any related and referring items are deleted, the related and referring items aren't affected in any other way.

**Note:** All content is retained on the system for legal or forensic purposes, but only an application administrator can recover discarded content.

In the **Conversations** panel (click in the sidebar), right-click the Conversation, then select **Discard Conversation**.

For more information, see **How do I discard an item?**

**How do I download an archive of a Conversation?**

At some point you might want to download an archive of a Conversation, possibly to view when you’re offline or maybe to keep a record of the Conversation's content at a certain point.

The archive is in the form of a .zip file (named after the Conversation). It contains the Conversation's list of members, messages, and replies in an HTML file (named by default `index.html`) and all the documents added to the Conversation.

Open the Conversation, click the Options menu (), then click **Download Archive**.

For more information, see **How do I download an archive of an item?**

**Note:** You can’t make changes to an archive of a Conversation (though you can click a link to open the Conversation in a browser and make changes there). If you want to be able to make offline changes, instead add the item to your Offline Briefcase (see **Working Offline in Oracle Social Network Desktop**).

**How do I add a Conversation to my Offline Briefcase?**

**Tip:** For information about offline briefcases, see **Understanding the Offline Briefcase**.

In the **Conversations** panel (click in the sidebar), right-click the Conversation, then select **Add to Offline Briefcase**.

For more information, see **How do I add an item to my Offline Briefcase?**

**How do I view a Conversation in the web version of Oracle Social Network?**

Open the Conversation, click the Options menu (), then click **View in Web Browser**. Your browser opens to the selected Conversation.

For more information, see **How do I view an item in the web version of Oracle Social Network?**
Using Collections in Oracle Social Network Desktop

How do I view my list of collections?

In Oracle Social Network Desktop, you can view collections, create new collections, post messages to a collection’s wall, view the items added to a collection (related), and view the items the collection has been added to (referring).

Note: To learn about collections, see Collections.

To see your list of collections, click in the sidebar.

The Options menu under the Collections banner () has filters for adjusting your view of the collections list.

<table>
<thead>
<tr>
<th>Filter or Sorting Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yours</td>
<td>View all collections you are a member of</td>
</tr>
<tr>
<td>Available</td>
<td>View all collections that are available to you to join (also called public collections)</td>
</tr>
<tr>
<td>Favorites</td>
<td>View all collections you have marked as a favorite</td>
</tr>
<tr>
<td>Muted</td>
<td>View all collections you have muted</td>
</tr>
<tr>
<td>Open</td>
<td>View all collections that are open for additions and posts</td>
</tr>
<tr>
<td>Closed</td>
<td>View all collections that are closed to additions and posts</td>
</tr>
<tr>
<td>Sort By: Name</td>
<td>Arrange the collections on the list alphabetically by name</td>
</tr>
<tr>
<td>Sort By: Last Updated</td>
<td>Arrange the collections on the list by when a collection was last updated</td>
</tr>
<tr>

<td>Arrange the collections on the list by the number of currently active members</td>
</tr>
<tr>
<td>Sort By: Unread Posts</td>
<td>Arrange the collections on the list by the number of unread posts</td>
</tr>
<tr>
<td>Sort By: Ascending</td>
<td>Arrange the collections on the list from 0 to 9 and A to Z</td>
</tr>
<tr>
<td>Sort By: Descending</td>
<td>Arrange the collections on the list from Z to A and 9 to 0</td>
</tr>
<tr>
<td>Only Unread</td>
<td>When selected, shows only collections with unread messages</td>
</tr>
<tr>
<td>Message Preview</td>
<td>When selected, shows a preview of the latest message posted to each collection’s wall</td>
</tr>
</tbody>
</table>

Note: Your sort and message preview settings are saved and applied whenever you view the Collections panel.

How do I open a collection?

Click the collection name. The collection opens in the Detail window. For more information, see How do I open an item?

How do I mark a collection as a favorite?

Marking a collection as a favorite is an easy way to keep track of the collections you use most frequently.

To mark a collection as a favorite, click next to the collection. Click the star again to unmark it.
How do I create a collection?

In the Collections panel (click  in the sidebar), click +, and complete the information in the dialog.

For more information, see How do I create an item?

How do I view and manage collection members?

Open the collection. At the top of the collection’s tab is a membership bar with pictures of all the people who are members of the collection.

Note: If you’re viewing a public collection that you haven’t joined, you can view the members by clicking the Options menu ( ), then selecting Show Membership.

To manage members, in the membership bar, click to open the Update Members dialog. For more information, see How do I view and manage an item's members?

How do I work with messages in the collection's wall?

See Working with Messages.

How do I work with documents and folders in the collection?

Open the collection, click the Documents tab. For more information, see Working with Documents.

How do I work with related and referring items in the collection?

Open the collection, click the Related Items or Referring Items tab. For more information, see Working with Related and Referring Items.

How do I share a link to a collection?

Let’s say you want to share a link to a collection in an email or while you’re instant messaging. Open the collection, click the Options menu ( ), then select Copy Link. The link to the collection is copied to your clipboard, and you can paste it anywhere you like.

Note: When people click the link, they are taken to Oracle Social Network in their browser.

How do I rename a collection?

Open the collection, click the Options menu ( ), click Collection Settings, select Rename Collection, then enter a new name.

For more information, see How do I rename an item?

How do I split a Conversation off from a collection's wall?

If your messages start going off-topic or a new question or idea is raised, you might want to split that discussion into a new Conversation.

Open the collection's wall, click (under the text box), then complete the information in the dialog. For more information, see How do I split a Conversation off from an existing Conversation or wall?
When you create the new Conversation, messages are posted both in the new Conversation and on the wall of the original collection showing a link to the other item.

**How do I mute or unmute a collection?**

If you have items in your collection lists that you never look at (for example a collection that doesn't apply to you), or you’re seeing updates on the Overview panel or in your email digests about collections you don't care about, you can mute those collections. Muting a collection hides it and its activity from your view. It’s still there; you just won’t hear about it anymore. (The only exception is if you’re flagged on a message in a muted item, for which you will still be alerted by email.)

To mute a collection, in the Collections panel (click in the sidebar), right-click the collection, then select Mute Collection.

To unmute a collection, view the Muted collections in the Collections panel, right-click the collection you want to unmute, then select Mute Collection to clear the check mark.

For more information, see How do I mute or unmute an item?

**How do I close or reopen a collection?**

You can close any collection you belong to, even if you didn't create it. Closing a collection prevents people from adding new content to it and moves the collection to the list of closed collections in everyone’s Collections panel.

To close a collection, open the collection, click the Options menu ( ), click Collection Settings, then select Close Collection.

To reopen a collection, open the closed collection, click the Options menu ( ), click Collection Settings, then select Reopen Collection.

For more information, see How do I close or reopen an item?

**How do I discard a collection?**

You can discard a collection if you are the only member and it's private. The collection, its messages, and its documents are deleted. Although the relationships between the discarded collection and any related and referring items are deleted, the related and referring items aren’t affected in any other way.

**Note:** All content is retained on the system for legal or forensic purposes, but only an application administrator can recover discarded content.

In the Collections panel (click in the sidebar), right-click the collection, then select Discard Collection.

For more information, see How do I discard an item?

**How do I download an archive of a collection?**

At some point you might want to download an archive of a collection, possibly to view when you’re offline or maybe to keep a record of the collection’s content at a certain point.

The archive is in the form of a .zip file (named after the collection). It contains the collection’s list of members, messages, and replies in an HTML file (named by default index.html) and all the documents added to the collection.
Open the collection, click the Options menu ( ), then click **Download Archive**.

For more information, see **How do I download an archive of an item?**

**Note:** You can’t make changes to an archive of a collection (though you can click a link to open the collection in a browser and make changes there). If you want to be able to make offline changes, instead add the item to your Offline Briefcase (see **Working Offline in Oracle Social Network Desktop**).

**How do I add a collection to my Offline Briefcase?**

**Tip:** For information about offline briefcases, see **Understanding the Offline Briefcase**.

In the **Collections** panel (click in the sidebar), right-click the collection, then select **Add to Offline Briefcase**.

For more information, see **How do I add an item to my Offline Briefcase?**

**How do I view a collection in the web version of Oracle Social Network?**

Open the collection, click the Options menu ( ), then click **View in Web Browser**.

Your browser opens to the selected collection.

For more information, see **How do I view an item in the web version of Oracle Social Network?**

---

**Working with People in Oracle Social Network Desktop**

**What is the People panel?**

You can access people-related features by clicking in the sidebar.

The **People** panel has a menu of viewing options.

<table>
<thead>
<tr>
<th>Viewing Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Contacts</td>
<td>View the people you’ve added as your contacts</td>
</tr>
<tr>

<td>Sort the list alphabetically by first name</td>
</tr>
</tbody>
</table>

---

---
Working with People in Oracle Social Network Desktop

Note: Your online only preferences and sort settings are saved and applied whenever you view the Contacts panel.

Here’s a short list of what you can do on the People panel in Oracle Social Network Desktop:

**Table 16–6  Short List of Things You Can Do with People Features**

<table>
<thead>
<tr>
<th>Action</th>
<th>For more information, see …</th>
</tr>
</thead>
<tbody>
<tr>
<td>Create and maintain a list of contacts</td>
<td>How do I add a contact?</td>
</tr>
<tr>
<td><strong>Note:</strong> You can add an outside user as a contact, but outside users can’t add you. Outside users can’t have contacts in Oracle Social Network.</td>
<td>How do I remove a contact?</td>
</tr>
<tr>
<td>Hold One-on-One Conversations</td>
<td>How do I start a One-on-One Conversation?</td>
</tr>
<tr>
<td>View someone’s profile</td>
<td>How do I view someone’s profile and wall?</td>
</tr>
<tr>

<td>How do I view someone’s profile and wall?</td>
</tr>
<tr>
<td>View a list of recommended people to follow</td>
<td>How do I find people I might want to follow?</td>
</tr>
<tr>
<td>View a list of people you follow</td>
<td>How do I see who I’m following?</td>
</tr>
<tr>
<td>View a list of people who follow you</td>
<td>How do I see who’s following me?</td>
</tr>
</tbody>
</table>

Right-click a person in the list for a menu of useful actions.

**What are "unregistered users"?**

Unregistered users are people who are in your company’s directory but are not yet members of Oracle Social Network. When you add people to a Conversation or wall, the word unregistered appears next to the names of unregistered users in the Manage Members dialog. When you try to add an unregistered user, a warning alerts you to their unregistered status.

When you add an unregistered person to a Conversation, they receive an email with a link to set up their account.

**What are “outside users”?**

Outside users are people who don’t work for your company, but who collaborate with you and your co-workers in Oracle Social Network. They are members of Oracle Social Network with limited privileges. For example, outside users can be contacts but they can’t have contacts in Oracle Social Network. They can participate in Conversations only when they are added by you or some other member of the Conversation.

**Note:** One outside user can’t add another to a Conversation.

Wherever an outside user is a member of a Conversation, a banner appears at the top of the page to alert you. All outside users have the same avatar (🔗) and their name is in purple text so you can easily tell who they are.
Wherever an option to view a person's wall is available, rather than seeing the option View Wall, for outside users you’ll see View Profile. That's because outside user's don't have walls where you can post messages.

Since outside users do not have walls they can post to, you won't see Follow or Following buttons on their profile page. Instead, you'll see Add to Contacts or Remove from Contacts buttons.

**How do I view someone's profile and wall?**

A person’s profile and wall both appear in the Detail window. The profile view can be expanded and collapsed, and appears above the wall’s message area.

When a person is an outside user—someone who works for another company but is using Oracle Social Network in collaboration with your company—you, as an inside user, can follow them, add them as a contact, and initiate a One-on-One with them. But you can’t post to their wall because outside users don’t have a traditional wall.

**Note:** The stream of messages posted to walls differs from those posted to Conversations. In Conversations, the latest message is listed last. On walls, the latest message is listed first.

To view someone’s wall:

1. Click to bring the panel forward.
2. Click the person’s picture to open his or her wall in the Detail window. For more information, see What is the Detail window?
3. To see someone's full profile, click the Profile link.
   - To see fewer details, click Profile again.
4. Post to the wall as you would to any other Conversation.
   - For more information, see How do I post a message?

Profiles show three tabs:

- **Wall**—Shows the messages posted to the person’s wall
- **Followers**—Shows a list of those following the current person
  **Note:** If you follow the person, you can also see the person's followers in the membership bar on their wall. For more information on the membership bar, see How do I view and manage an item's members?
- **Following**—Shows a list of those the current person is following

**How do I add a contact?**

**Note:** You can add an outside user (outside user) as a contact, but outside users can’t add you. Outside users can’t have contacts in Oracle Social Network.

1. Click to bring the panel forward.
2. Click to open a search field.
3. Enter a name or part of a name to open a list of results.
4. Click a name in the results list to add that person to your contacts.
How do I remove a contact?

On the Contacts panel, right-click the person you want to remove and select Remove from Contacts.

How do I work with messages on a person's wall?

See Working with Messages.

How do I work with a person's documents and folders?

Open the person's profile, click the Documents tab. For more information, see Working with Documents.

How do I find people I might want to follow?

You can find people you might want to follow in Conversations you participate in, but you can also see a list of recommended people on the Recommendations panel. Oracle Social Network generates the recommendations list based on actions you have in common with others—documents you've both read, Conversations you're both members of, and other commonly taken actions.

To view your recommendations, click , then, in the menu, click Recommendations. Each recommendation includes the person's name, the reason they were recommended, a Follow button, and an Ignore button.

Note: When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

How do I see who I'm following?

There are several ways to see who you're currently following:

- Click , then, in the menu, click People You Follow.
- Open your profile page, then click Following.

How do I see who's following me?

There are several ways to view the people who follow you:

- Click , then, in the menu, click Your Followers.
- Open your profile page, then click Followers.

How do I share a link to a person's wall?

Let's say you want to share a link to a person's wall in an email or while you're instant messaging. Open the person's wall, click the Options menu ( ), then select Copy Link. The link to the person's wall is copied to your clipboard, and you can paste it anywhere you like.

Note: When people click the link, they are taken to the web version of Oracle Social Network.

How do I split a Conversation off from a person's wall?

If your messages start going off-topic or a new question or idea is raised, you might want to split that discussion into a new Conversation.
Open the person's wall, click (under the text box), then complete the information in the dialog. For more information, see How do I split a Conversation off from an existing Conversation or wall?.

When you create the new Conversation, messages are posted both in the new Conversation and on the wall of the original person showing a link to the other item.

**How do I download an archive of a person's wall?**

At some point you might want to download an archive of a person's wall, possibly to view when you're offline or maybe to keep a record of the person's wall content at a certain point.

The archive is in the form of a .zip file (named after the person). It contains the person's messages, and replies in an HTML file (named by default index.html) and all the documents added to the person's wall.

Open the person's wall, click the Options menu ( ), then click Download Archive.

For more information, see How do I download an archive of an item?

**Note:** You can't make changes to an archive of a person's wall (though you can click a link to open the person's wall in a browser and make changes there). If you want to be able to make offline changes, instead add the item to your Offline Briefcase (see Working Offline in Oracle Social Network Desktop).

**How do I add a person's wall to my Offline Briefcase?**

**Tip:** For information about offline briefcases, see Understanding the Offline Briefcase.

In the People panel (click in the sidebar), right-click the person, then select Add to Offline Briefcase.

For more information, see How do I add an item to my Offline Briefcase?

**How do I view a person in the web version of Oracle Social Network?**

Open the person's wall, click the Options menu ( ), then click View in Web Browser. Your browser opens to the selected person's wall.

For more information, see How do I view an item in the web version of Oracle Social Network?

**Working with Groups in Oracle Social Network Desktop**

**What are groups?**

Groups organize people into a single entity: the group. A group can be added to or removed from a Conversation in a single step. Or you can start a Conversation that instantly includes all members of a group. Like individual profiles, groups have their own identities, which include their own walls and profile pictures. On a group wall, group members can post messages and content of interest to the group.

**What is the Groups panel?**

You can see a list of the groups you belong to and access group features by clicking in the sidebar.
The **Options** menu under the **Groups** banner (▼) has filtering and sorting options for adjusting your view of the groups list.

### Table 16–7  Groups Filtering and Sorting Options

<table>
<thead>

</tr>
</tbody>
</table>

Right-click a group on the list for a menu of useful actions.

**How do I view the groups I’m a member of?**

Click [ ] to open the **Groups** panel. The default view (**Yours**) shows all of the groups you are a member of.

**How do I open a group's wall?**

Click the group’s name. The group opens in the Detail window. For more information, see **How do I open an item?**
How do I mark a group as a favorite?

Marking a group as a favorite is an easy way to keep track of the groups you use most frequently.

To mark a group as a favorite, click ⭐ next to the group. Click the star again to unmark it.

How do I create a group?

In the Groups panel (click ⬅ in the sidebar), click +, and complete the information in the dialog.

For more information, see How do I create an item?

To add a description or picture, see How do I edit a group’s name, description, or picture?

How do I view and manage group members?

Open the group. At the top of the group’s tab is a membership bar with pictures of all the people who are members of the group.

To manage members, in the membership bar, click ⬇️ to open the Update Members dialog. For more information, see How do I view and manage an item’s members?

Note: If you don’t see the manage members button (⬇️), the group is managed externally (for example, through LDAP), so you can’t change the membership through Oracle Social Network.

How do I edit a group’s name, description, or picture?

1. Open the group. For more information, see How do I open an item?

2. Click Edit Profile.

3. Edit the group’s name or description as desired.

4. To change the group’s picture, click Change Picture. Select a .gif, .png, or .jpg file.
   The picture is scaled to 150x150 pixels.
   The Crop Picture dialog shows your image with a circle over the area that will show in Oracle Social Network. You can drag the corners of the crop area to change the size of your picture, or drag your picture to change the position of the crop area. When you’re happy with the size and position, click Crop.
   If you want to remove the group’s picture and just use the default avatar, click Clear Picture.

How do I work with messages on a group's wall?

See Working with Messages.

How do I work with a group's documents and folders?

Open the collection, click the Documents tab. For more information, see Working with Documents.

How do I discover the Conversations and walls a group belongs to?

1. Open the group. For more information, see How do I open an item?
2. In the Detail window, click the **Member Of** tab to see a list of all the Conversations, Social Objects, collections, and other groups this group is a member of.

**How do I work with a group's referring items?**

Open the group, click the **Referring Items** tab. For more information, see Working with Related and Referring Items.

**How do I share a link to a group?**

Let’s say you want to share a link to a group in an email or while you’re instant messaging. Open the group, click the Options menu (.), then select **Copy Link**. The link to the group is copied to your clipboard, and you can paste it anywhere you like.

**Note:** When people click the link, they are taken to the web version of Oracle Social Network.

**How do I split a Conversation off from a group's wall?**

If your messages start going off-topic or a new question or idea is raised, you might want to split that discussion into a new Conversation.

Open the group’s wall, click (under the text box), then complete the information in the dialog. For more information, see How do I split a Conversation off from an existing Conversation or wall?.

When you create the new Conversation, messages are posted both in the new Conversation and on the wall of the original group showing a link to the other item.

**How do I mute or unmute a group?**

If you have items in your group lists that you never look at (for example a group that doesn’t apply to you), or you’re seeing updates on the **Overview** panel or in your email digests about groups you don’t care about, you can mute those groups. Muting a group hides it and its activity from your view. It’s still there; you just won’t hear about it anymore. (The only exception is if you're flagged on a message on a muted group wall, for which you will still be alerted by email.)

To mute a group, in the **Groups** panel (click in the sidebar), right-click the group, then select **Mute Group**.

To unmute a group, view the **Muted** groups in the **Groups** panel, right-click the group you want to unmute, then select **Mute Group** to clear the check mark.

For more information, see How do I mute or unmute an item?

**How do I deactivate or reactivate a group?**

You can deactivate a group you belong to, even if you didn't create it (unless it's managed externally through LDAP or another similar system). Deactivating a group prevents it from being added to more Conversations, disables new posts to its wall, and the group's icon and name are grayed out (the group name is grayed out on membership lists and on the **Groups** tab).

To deactivate a group, open the group, click the Options menu (.), click **Group Settings**, then select **Deactivate Group**.
Note: If you don’t see the Group Settings option, the group is managed externally (for example, through LDAP), so you can’t activate or reactivate the group through Oracle Social Network.

To reactivate a group, open the deactivated group, click the Options menu ( ), click Group Settings, then select Activate Group.

Tip: If you don’t see deactivated groups on the Groups tab, click the Options menu ( ), then select Show Deactivated Groups.

How do I download an archive of a group?

At some point you might want to download an archive of a group, possibly to view when you’re offline or maybe to keep a record of the group’s content at a certain point.

The archive is in the form of a .zip file (named after the group). It contains the group’s list of members, messages, and replies in an HTML file (named by default index.html) and all the documents added to the group.

Open the group, click the Options menu ( ), then click Download Archive.

For more information, see How do I download an archive of an item?

Note: You can’t make changes to an archive of a group (though you can click a link to open the group in a browser and make changes there). If you want to be able to make offline changes, instead add the item to your Offline Briefcase (see Working Offline in Oracle Social Network Desktop).

How do I add a group to my Offline Briefcase?

Tip: For information about offline briefcases, see Understanding the Offline Briefcase.

In the Groups panel (click in the sidebar), right-click the group, then select Add to Offline Briefcase.

For more information, see How do I add an item to my Offline Briefcase?

How do I view a group in the web version of Oracle Social Network?

Open the group, click the Options menu ( ), then click View in Web Browser. Your browser opens to the selected group.

For more information, see How do I view an item in the web version of Oracle Social Network?

Using Social Objects in Oracle Social Network Desktop

Where can I see a list of Social Objects?

Note: For information about Social Objects, see Social Objects.

To see a list of Social Objects, click on the sidebar.

To narrow the list to a selected type or group of related types of Social Object, open the selection list in the Social Objects banner and select a Social Object type or group of types.
Right-click a Social Object on the list for a menu of useful actions.

The **Options** menu under the Social Objects banner (شروط) has filters and sorting options for adjusting your view of Social Objects.

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>Note: The field labels and values that show depend on how the Social Object type was defined. So sometimes you might see a lot of summary information on one type of Social Object, while seeing no summary information on another.</td>
</tr>
<tr>
<td></td>
<td>(See [page 48])</td>
</tr>
</tbody>
</table>

**Note:** Your sort, message preview, and summary information settings are saved and applied whenever you view the **Flags** panel.
How do I show or hide message previews and summary information in my list of Social Objects?

When you’re looking at the list of Social Objects, you might see a preview of the latest message posted to each object’s wall (Message Preview) and all the field labels and values associated with the object (Summary Information). You can control your view of the Social Objects list to show or hide any of this information.

Note: For Summary Information, the field labels and values that show depend on how the Social Object type was defined when it was created. So sometimes you might see a lot of summary information on one type of Social Object, while seeing no summary information on another type.

1. Click on the sidebar.
2. Optionally, select a type of Social Object to show from the selection list in the banner.
3. Click , then:
   - Select or clear Message Preview to show (select) or hide (clear) the latest message posted to each Social Object’s wall.
   - Select or clear Summary Information to show (select) or hide (clear) the field labels and values associated with each Social Object.

For example, a Job Candidate Social Object includes field labels and values, like Open Position: System Administrator, Job Classification: MGR4, and so on. These labels and values appear in the list of Social Objects when Summary Information is set to show.

How do I open a Social Object?

Click the Social Object name. The Social Object opens in the Detail window. For more information, see How do I open an item?

How do I mark a Social Object as a favorite?

Marking a Social Object as a favorite is an easy way to keep track of the Social Objects you use most frequently.

To mark a Social Object as a favorite, click next to the Social Object. Click the star again to unmark it.

How do I create a Social Object?

In the Social Objects panel (click in the sidebar), click , and complete the information in the dialog.

For more information, see How do I create an item?

How do I view and manage Social Object members?

Open the Social Object. At the top of the Social Object’s tab is a membership bar with pictures of all the people who are members of the Social Object.

Note: If you’re viewing a public Social Object that you haven’t joined, you can view the members by clicking the Options menu ( ), then selecting Show Membership.

To manage members, in the membership bar, click to open the Update Members dialog. For more information, see How do I view and manage an item’s members?
Using Social Objects in Oracle Social Network Desktop

How do I work with messages on a Social Object's wall?

See Working with Messages.

How do I work with a Social Object's documents and folders?

Open the Social Object, click the Documents tab. For more information, see Working with Documents.

How do I work with a Social Object's related and referring items?

Open the Social Object, click the Related Items or Referring Items tab. For more information, see Working with Related and Referring Items.

How do I share a link to a Social Object?

Let’s say you want to share a link to a Social Object in an email or while you’re instant messaging. Open the Social Object, click the Options menu (wk), then select Copy Link. The link to the Social Object is copied to your clipboard, and you can paste it anywhere you like.

Note: When people click the link, they are taken to the web version of Oracle Social Network.

How do I rename a Social Object?

Open the Social Object, click the Options menu (wk), click Social Object Settings, select Rename Social Object, then enter a new name.

For more information, see How do I rename an item?

How do I split a Conversation off from a Social Object's wall?

If your messages start going off-topic or a new question or idea is raised, you might want to split that discussion into a new Conversation.

Open the Social Object's wall, click (under the text box), then complete the information in the dialog. For more information, see How do I split a Conversation off from an existing Conversation or wall?

When you create the new Conversation, messages are posted both in the new Conversation and on the wall of the original Social Object showing a link to the other item.

How do I mute or unmute a Social Object?

If you have items in your Social Object lists that you never look at (for example a Social Object that doesn't apply to you), or you’re seeing updates on the Overview panel or in your email digests about Social Objects you don’t care about, you can mute those Social Objects. Muting a Social Object hides it and its activity from your view. It's still there; you just won't hear about it anymore. (The only exception is if you’re flagged on a message in a muted Social Object, for which you will still be alerted by email.)

To mute a Social Object, in the Social Objects panel (click in the sidebar), right-click the Social Object, then select Mute Social Object.

To unmute a Social Object, view the Muted Social Objects in the Social Objects panel, right-click the Social Object you want to unmute, then select Mute Social Object to clear the check mark.
For more information, see How do I mute or unmute an item?

**How do I close or reopen a Social Object?**

You can close any Social Object you belong to, even if you didn't create it. Closing a Social Object prevents people from adding new content to it and moves the Social Object to the list of closed Social Objects in everyone's Social Objects panel.

To close a Social Object, open the Social Object, click the Options menu ( ), click Social Object Settings, then select Close Social Object.

To reopen a Social Object, open the closed Social Object, click the Options menu ( ), click Social Object Settings, then select Reopen Social Object.

For more information, see How do I close or reopen an item?

**How do I discard a Social Object?**

You can discard a Social Object if you are the only member and it's private. The Social Object, its messages, and its documents are deleted. Although the relationships between the discarded Social Object and any related and referring items are deleted, the related and referring items aren't affected in any other way.

**Note:** All content is retained on the system for legal or forensic purposes, but only an application administrator can recover discarded content.

In the Social Objects panel (click in the sidebar), right-click the Social Object, then select Discard Social Object.

For more information, see How do I discard an item?

**How do I download an archive of a Social Object?**

At some point you might want to download an archive of a Social Object, possibly to view when you’re offline or maybe to keep a record of the Social Object's content at a certain point.

The archive is in the form of a .zip file (named after the Social Object). It contains the Social Object's list of members, messages, and replies in an HTML file (named by default index.html) and all the documents added to the Social Object.

Open the Social Object, click the Options menu ( ), then click Download Archive.

For more information, see How do I download an archive of an item?

**Note:** You can’t make changes to an archive of a Social Object (though you can click a link to open the Social Object in a browser and make changes there). If you want to be able to make offline changes, instead add the item to your Offline Briefcase (see Working Offline in Oracle Social Network Desktop).

**How do I add a Social Object to my Offline Briefcase?**

**Tip:** For information about offline briefcases, see Understanding the Offline Briefcase.

In the Social Objects panel (click in the sidebar), right-click the Social Object, then select Add to Offline Briefcase.

For more information, see How do I add an item to my Offline Briefcase?
How do I view a Social Object in the web version of Oracle Social Network?

Open the Social Object, click the Options menu ( ), then click View in Web Browser. Your browser opens to the selected Social Object.

For more information, see How do I view an item in the web version of Oracle Social Network?

Working Offline in Oracle Social Network Desktop

How can I see items when I'm offline?

Suppose you're heading for the airport and want to catch up on your Conversations while on the plane. Before you leave, you can add the Conversations to your Offline Briefcase; or you can save the Conversations to a .zip file (an archive), then unzip the file on your local drive. Both versions contain all content available at the time you created the archive, including messages, replies, and files. However, when you add the Conversations to your Offline Briefcase, you can make changes to the Conversations to be published the next time you're online.

- For information about adding an item to your Offline Briefcase, see How do I add an item to my Offline Briefcase?
- For information on downloading an archive, see How do I download an archive of an item?

Understanding the Offline Briefcase

Oracle Social Network Desktop offers an Offline Briefcase for viewing Conversations and walls when you're offline. The Offline Briefcase panel has convenient controls for adding items to your Offline Briefcase, updating one or all offline Conversations and walls, and publishing any content you have added while offline.

- Refresh All Offline Conversations—(1) Click to update all Conversations and walls in your Offline Briefcase with any messages added after you saved the offline version (see How do I refresh items in my Offline Briefcase?).
- Add Conversation to the Offline Briefcase—(2) Click to open a dialog for selecting a Conversation or wall to add to your Offline Briefcase (see also, How do I add an item to my Offline Briefcase?).
- Refresh Conversation—(3) Select an offline Conversation or wall and click the Refresh Conversation icon to refresh your selection with any messages posted to the Conversation or wall since it was last refreshed (see How do I refresh items in my Offline Briefcase?).
- Publish Changes—(4) Select an offline Conversation or wall and click the Publish Changes icon to add messages you posted to your selection offline to the online version of the Conversation or wall (see Part , "How do I post the changes I made offline?").
Working Offline in Oracle Social Network Desktop

- **Remove from Offline Briefcase**—(5) Select an offline Conversation or wall and click the **Remove from Offline Briefcase** icon to remove your selection from your Offline Briefcase (see How do I remove an item from my Offline Briefcase?).

**What's the difference between online and offline items?**

Items viewed from your Offline Briefcase have a few differences from online items:

- Only the **Messages/Wall**, **Documents**, and **Related Items** tabs appear in the Detail window.
- The members bar isn't shown.
- You can search for unread and flagged messages, but you can't search for text in Conversation. For information on search, see How do I search?
- You can't mark or remove a Conversation as a favorite.
- There's no option for renaming the item on the Options menu (▼).
- The **Insert Reference** button is disabled.
- Documents open locally rather than in the web version of Oracle Social Network.
- Once you make offline additions, a banner appears at the top of the Conversation or wall. The banner shows forward and back buttons, which you can use to navigate directly to your offline additions.

**How do I add an item to my Offline Briefcase?**

There are several ways to add an item to your Offline Briefcase:

- While viewing the item in the Detail window, click the Options menu (▼), then click **Add to Offline Briefcase**.
- While viewing a list of items (for example, on the Conversations panel), right-click the item, then click **Add to Offline Briefcase**.
- Add items in the **Offline Briefcase** panel:
  1. On the sidebar, click to open the **Offline Briefcase** panel.
  2. Click  .
  3. In the Add to Briefcase dialog, either search for an item or select a source:
     - **Recent**—To select from items you have recently visited
     - **Favorites**—To select from items you have marked as favorites
     - **Search Results**—When you search for an item, the results appear here
  4. Select an item, and click **Open** to add it to your Offline Briefcase.

**Note:** If there are related Conversations associated with the item you add to your offline briefcase, you'll be asked if you want to add the related Conversations to your briefcase as well.

**How do I view an item offline from my Offline Briefcase?**

1. On the sidebar, click to open the **Offline Briefcase** panel.
2. Click a listed item to view it in the Detail window.
   
   A banner at the top of the window reminds you that you are viewing the item offline.
Using Notifications in Oracle Social Network Desktop

How do I refresh items in my Offline Briefcase?

Before you shut down your computer, you can refresh all items in your Offline Briefcase so that when you have a chance to look at them offline you're looking at the most current information possible.

1. On the sidebar, click ▼ to open the Offline Briefcase panel.
2. Click ✖.

Rather than refreshing all offline items at once, you can instead select one offline item and refresh just that.

1. On the sidebar, click ▼ to open the Offline Briefcase panel.
2. Right-click the item, then click Refresh <Object>.

How do I post the changes I made offline?

After you've added messages to an offline item, a banner appears at the top of the Offline Briefcase panel. The next time you're online, you can publish those messages for others to see.

1. On the sidebar, click ▼ to open the Offline Briefcase panel.
2. Click Publish All at the top of the panel.

Changes are posted to the live versions of all items in your Offline Briefcase, and the banner disappears.

Rather than publishing all offline changes at once, you can instead select one offline item and publish just the changes to that item.

1. On the sidebar, click ▼ to open the Offline Briefcase panel.
2. Right-click the item, then click Publish Changes.

How do I remove an item from my Offline Briefcase?

1. On the sidebar, click ▼ to open the Offline Briefcase panel.
2. Select an item, and click ✗.

Using Notifications in Oracle Social Network Desktop

What are notifications?

Notifications appear on the Notifications panel in the sidebar. They alert you to something that affects you, like you were added to a Conversation or someone flagged you when you were offline.

Some notifications contain actions you can use to respond to a notification right away. For example, a notification about a message that was added to one of your One-on-One Conversations while you were offline is linked, so you can click it to open the One-on-One and view the missed message.

Note: If you have missed many messages in multiple One-on-Ones, clicking a missed-message notification will open up to 10 tabs in the Detail window.

You can configure your notifications to show pop-up alerts to more immediately bring a notification to your attention. See What are pop-up alerts?
What are pop-up alerts?

Pop-up alerts are dialogs that pop up on your screen when an event that triggers a notification occurs (see How do I select the events that trigger notifications?). Pop-up alerts contain links that enable you to respond immediately to the event. For example:

- When someone assigns a **Please Reply - Urgent** flag to you, you can click a link in the pop-up alert to navigate to the message that was flagged.
- When you’re added to a Conversation or Social Object, this can trigger a pop-up alert that provides a link to the Conversation on your desktop or to a Social Object in your browser.
- You might receive a pop-up alert saying you missed a One-on-One message while you were offline. The alert provides a link to the Conversation, so you can easily navigate to the missed message.

How do I configure my notification settings?

See the following sections for information on **Notifications** settings tab ( ):

- How do I turn notifications on or off?
- How do I turn pop-up alerts on or off?
- How do I select the events that trigger notifications?

How do I turn notifications on or off?

1. Click 🌅.
2. On the **Notifications** tab ( ), select **Enable Notifications** to turn notifications on; clear **Enable Notifications** to turn notifications off.

How do I turn pop-up alerts on or off?

1. Click 🌅.
2. On the **Notifications** tab ( ), select **Show pop-up alerts** to turn pop-ups on; clear **Show pop-up alerts** to turn pop-ups off.

   Optionally, when you select to show pop-up alerts:
   - Select **Play a sound** to play a sound when an alert pops up.
     The sound is a system default sound.
   - Set the number of seconds to show an alert next to **Dismiss after (seconds)**.

How do I select the events that trigger notifications?

Notifications and pop-up alerts are triggered by the same selected events. So, if you select a trigger for a notification, it also applies to your pop-ups (For more information, see What are pop-up alerts?)

1. Click 🌅.
2. On the **Notifications** tab ( ), click **Notification Events**.
3. Under **Notify me when someone**, select the events that should trigger a notification:
Using Notifications in Oracle Social Network Desktop

- **Posts in a Conversation or Social Object**—Send a notification whenever someone posts to a Conversation or Social Object. By default, you get notifications only for Conversations or Social Objects you’ve marked as favorites, but you can change the setting to All, to show notifications for any Conversation or Social Object you are a member of.

  Note: This option is off by default.

- **Posts to a One-on-One Conversation with me**—Send a notification whenever someone posts to a One-on-One Conversation with you.

  Notes:
  - This option is off by default.
  - You are always notified of messages posted to one of your One-on-One Conversations while you were offline.

- **Posts on my wall**—Send a notification whenever someone posts something on your wall.

- **Adds me to a Conversation or Social Object**—Send a notification whenever someone adds you as a member to an Oracle Social Network Conversation or Social Object.

- **Starts a conference in a Conversation or Social Object**—Send a notification whenever someone starts a conference in a Conversation or Social Object that you are a member of.

- **Assigns a flag to you and clears a flag assigned to you**—Send a notification when someone:
  - Assigns a "Please Reply - Urgent" flag to me
  - Assigns a "Please Reply" flag to me
  - Assigns a "For Your Information" flag to me
  - Clears a "Please Reply - Urgent" flag assigned to me
  - Clears a "Please Reply" flag assigned to me
  - Clears a "For Your Information" flag assigned to me

4. Optionally, click **Restore Defaults** to reset these triggers to their original values.

**Where can I see my notifications?**

You can see your notifications by clicking ▶️ on the sidebar.

A maximum of 100 notifications is shown; when this limit is reached, the oldest message is removed as each new message arrives.

The notifications list is cleared when you disconnect from the account that supplied them or when you exit Oracle Social Network Desktop.

**How do I filter my view of notifications in the sidebar?**

On the **Notifications** panel, you can show all types of notifications or just one type. To set this up, click (▼) and select the type of notification to show.

- **All**—To see all of your notifications
- **Conferences**—To see only notifications about new conferences
- **Flags**—To see only notifications about the flags assigned to you
- **Missed One-on-One Messages**—To see only notifications about messages sent to you when you were offline
- **New Memberships**—To see only notifications letting you know you have been added to a Conversation, Social Object, group, or any other type of new membership
- **Message Preview**—When selected, shows a preview of any message associated with the notification.
  
  **Note:** Your message preview setting is saved and applied whenever you view the Notifications panel.

### How do I delete notifications?

Select the notification you want to delete, and click at the top of the Notifications panel.

### Managing Your Account in Oracle Social Network Desktop

#### What are Oracle Social Network accounts?

An Oracle Social Network account is your connection to a server that is hosting an instance of Oracle Social Network. Your organization might have multiple servers, each offering its own instance of Oracle Social Network. If you have connection privileges to two or more of these, then you can say you have multiple accounts.

**Note:** With the desktop client, you can interact with only one Oracle Social Network account at a time.

Your system administrator likely set up your system to automatically connect to the necessary accounts. However, you might be required to supply your name and password at the start of every session.

The first time you start Oracle Social Network Desktop, the Manage Accounts dialog opens with options for configuring this and future sessions. There are options for:

- Showing or hiding the Manage Accounts dialog at future start-ups (for more information, see How do I enable account switching when I start Oracle Social Network Desktop?)
- Selecting the account you want to use in this session (for more information, see How do I enable account switching when I start Oracle Social Network Desktop?)
- Saving your password for future sessions (for more information, see How do I save my password in Oracle Social Network Desktop?)
- Working offline (for more information, see How do I work offline in Oracle Social Network Desktop?)

If you have just one account, you might want to save your password and disable account switching. If you have multiple accounts, you might want the Manage Accounts dialog to show at the start of each session so you can select the account to use (see How do I enable account switching when I start Oracle Social Network Desktop?).
How do I enable account switching when I start Oracle Social Network Desktop?

You can select to always show the Manage Accounts dialog at start-up so that you can select the account you want to use in the current session.

1. At the top of the sidebar, open the Accounts menu and select Manage Accounts.
2. Select Ask for an account at startup.

   Every time you start up Oracle Social Network Desktop, the Manage Accounts dialog opens, and you can select an account from the Account list.

   Clear this option to disable account switching.

Where can I see my account details?

1. At the top of the sidebar, open the Accounts menu, then select Manage Accounts.
2. Select an account from the Account list.

   You can see the account name, server URL, your user name, and the options you’ve selected for the account.

How do I add an account in Oracle Social Network Desktop?

1. At the top of the sidebar, open the Accounts menu, then select Manage Accounts.
2. In the Manage Accounts dialog, click to clear all current values.
3. In the Server URL field, enter the URL to your Oracle Social Network account, then click Next.
   
   For example, enter: https://acme.social.us1.oraclecloud.com/client.
4. If your company uses federated authentication, your newly created account is selected in the Manage Accounts dialog. Click OK, then enter your login information as requested.

   If your company doesn’t use federated authentication, skip to the next step.
5. If necessary, enter the Identity Domain.
6. In the User Name field, enter your Oracle Social Network user name.
7. In the Password field, enter your Oracle Social Network password.
8. To log in automatically in future sessions, select Remember password.
9. Click Finish.

   If you have multiple accounts, you might want the Manage Accounts dialog to show at the start of each session so you can select the account to use (see How do I enable account switching when I start Oracle Social Network Desktop?).

How can I see my account status in Oracle Social Network Desktop?

   The status of the current account appears at the top of the sidebar, to the right of your profile picture and under your name.

How do I switch between accounts in Oracle Social Network Desktop?

1. At the top of the sidebar, open the Accounts menu and select the account you want to switch to.
2. If you haven’t saved the selected account’s name and password, a dialog will open and you can enter them there.

**How do I save my password in Oracle Social Network Desktop?**

1. At the top of the sidebar, open the Accounts menu and select Manage Accounts.
2. Select Remember password.
3. Click OK.

**How do I disconnect from an account in Oracle Social Network Desktop?**

Your connection to an account is maintained until you try to connect to another account or until you select to work offline (see How do I work offline in Oracle Social Network Desktop?).

For information about closing or exiting Oracle Social Network Desktop, see How do I close and exit Oracle Social Network Desktop?

**How do I delete an account in Oracle Social Network Desktop?**

1. At the top of the sidebar, open the Accounts menu and select Manage Accounts.
2. From the Account list, select the account you want to delete.
3. Click.

**How do I work offline in Oracle Social Network Desktop?**

When you work offline, the only feature available in Oracle Social Network Desktop is the Offline Briefcase and any Conversation or wall you have added to it. For more information, see Understanding the Offline Briefcase

1. Open the Accounts menu at the top of the sidebar.
2. Select Work Offline.
   A check mark appears to the left to the Work Offline option.

---

**Configuring Your Settings for Oracle Social Network Desktop**

**How do I get to my desktop settings?**

- On the sidebar, click at the bottom on the left.
- In **Microsoft Windows**: Click in the system tray, and select Settings.
- On a **Mac**: Open the Oracle Social Network menu, and choose Preferences.

The Settings dialog has the following tabs:

- **General**

  See the following sections for information on General settings:

  - How do I get Oracle Social Network Desktop to start when I log in to my computer?
  - How do I prevent my previously opened tabs from showing up when I reconnect?
How do I set the time interval for changing my status to away?
How do I set my time and date format?
Where can I choose a docking position for the sidebar?

Conversations
See the following sections for information on Conversations settings:
How do I set up when to mark messages as read?
How do I set the time to delay before a snapshot is taken?
How do I set up how to post messages?
How do I get One-on-Ones to open automatically when new messages are posted?

Walls
See How do I control whether other people can post or reply to messages and documents on my wall?

Conferences
See How do I automatically log in to conferences?

Cloud Documents
See How do I allow Oracle Social Network to access my cloud documents?

Notifications
See the following sections for information on Notification settings:
How do I turn notifications on or off?
How do I turn pop-up alerts on or off?
How do I select the events that trigger notifications?

How do I configure my general settings?
See the following sections for information on General settings tab ( ):
How do I get Oracle Social Network Desktop to start when I log in to my computer?
How do I prevent my previously opened tabs from showing up when I reconnect?
How do I set the time interval for changing my status to away?
How do I set my time and date format?
Where can I choose a docking position for the sidebar?

How do I get Oracle Social Network Desktop to start when I log in to my computer?
In Settings, you can set an option to start Oracle Social Network Desktop once you log in to your computer.
1. Click to open the Settings window.
2. On the General tab ( ), select Start Social Network Desktop on login.
3. Click OK.
How do I prevent my previously opened tabs from showing up when I reconnect?

By default, your open tabs are saved when you exit Oracle Social Network Desktop. The next time you log on, the Detail window opens, showing those saved tabs. If you don’t want your open tabs saved, you can change the option in your Settings.

1. Click ✉️ to open the Settings window.
2. On the General tab ( ), clear the Save open tabs on exit check box.
3. Click OK.

How do I set the time interval for changing my status to away?

Your online status (or presence) in Oracle Social Network Desktop is indicated by a colored circle around your profile picture. For example, a green circle indicates that you’re online.

Your status changes to Away—a partial yellow circle—when you haven’t used your keyboard or mouse within the time you specify here. Your status changes to Offline—a gray half-circle—when you log out of Oracle Social Network.

1. Click ✉️ to open the Settings window to the General tab ( ).
2. For Change status to Away after, select a number of minutes from 1 to 100 (the default is 10).
3. Click OK.

How do I set my time and date format?

You can specify how times and dates should display in the Desktop client.

1. Click ✉️ to open the Settings window to the General tab ( ).
2. In the Date format drop-down list, select a format.
3. Click OK.

Where can I choose a docking position for the sidebar?

■ In Microsoft Windows, you can choose an initial docking position through Settings. Docking the sidebar keeps a constant space for the sidebar on one side of your screen; other applications will open next to the sidebar.

1. Click ✉️ to open the Settings window to the General tab ( ).
2. Select whether you want the sidebar to be able to be docked automatically. If you clear this option, the sidebar won’t be docked even if you drag it to the side of your screen.
3. If you chose to make the sidebar dockable, select a docking position—either Left, Right, or Undocked.
4. Click OK.

■ You can also grab the title area of the sidebar and move it to a new location.
How do I configure Conversations settings?
See the following sections for information on Conversations settings tab ( ): 
- How do I set up when to mark messages as read?
- How do I set the time to delay before a snapshot is taken?
- How do I set up how to post messages?
- How do I get One-on-Ones to open automatically when new messages are posted?

How do I set up when to mark messages as read?
1. Click to open the Settings window, then click the Conversations tab ( ).
2. Select one or both Conversation options:
   - Mark message as read when selected—Messages will be marked as read when you move your mouse and click to change focus away from the message.
   - Mark visible messages as read after (seconds)—Messages that currently appear on your screen will be marked as read when the time you specify passes. Select the number of seconds for the interval. The default is five seconds.
3. Click OK.
See also How do I mark messages as read or unread?

How do I set the time to delay before a snapshot is taken?
Before you add an image to a Conversation using the snapshot feature, you can set an interval between the time you click and the time the snapshot is taken. You can use this time to arrange your desktop for the snapshot.
1. Click to open the Settings window, then click the Conversations tab ( ).
2. Next to Delay before snapshot capture (seconds), select the number of seconds to wait after you've clicked the Grab snapshot icon.
3. Click OK.
Note: You can skip the waiting period by clicking the Grab Now button when you initiate a snapshot.
See also How do I post a snapshot of my screen?

How do I set up how to post messages?
Using Settings, you can specify whether to post messages using your Enter key or by clicking a Post button. When you post messages using your Enter key, you can use Shift+Enter to add line breaks to a message. When you post messages using the Post button, you can use the Enter key to add line breaks.
1. Click to open the Settings window, then click the Conversations tab ( ).
2. Under Message posting behavior, select an option:
   - Use Post button (Enter creates a new line)—Select this option to post messages using the Post button.
   - Use Enter key (Shift+Enter creates a new line)—Select this option to post messages using your Enter key.
3. If you want to be able to press ESC to cancel a message before you post it, select **Clear post text when hitting ESC key**. When this option is selected, pressing ESC clears your text, and, for replies, closes the editor.

4. Click OK.

For information about posting messages, see How do I post a message?

**How do I get One-on-Ones to open automatically when new messages are posted?**

You can set Oracle Social Network Desktop to open the One-on-One Conversation in the Detail window and bring it forward, or to play a sound when a new message arrives in one of your One-on-One Conversations. You can select one option, both options, or neither option.

1. Click  to open the Settings window, then click the **Conversations** tab ( ).

2. Under **One-on-One Conversations**, select **Play a sound** to play a sound when a new message is added to any of your One-on-One Conversations.

3. Select **Bring window to top** to open the One-on-One Conversation in the Detail window and bring it forward when a new message is added to any of your One-on-One Conversations.

4. Click OK.

**How do I control whether other people can post or reply to messages and documents on my wall?**

Use Walls settings to control whether other people can post or reply to messages and documents on your wall:

1. Click  to open the Settings window, then click the **Walls** tab ( ).

   Alternatively, while viewing your wall, click the **Wall Settings** button or click the Options menu ( ), then click **Wall Settings**.

2. Under **Post on your wall**, specify whether other people can post messages on your wall.

3. Under **Reply on your wall**, specify whether other people can reply to messages or annotate documents on your wall.

4. Click OK.

**How do I automatically log in to conferences?**

Use **Conferences** settings ( ) to set up and preserve log-in information for one or more conference services:

1. Click  to open the Settings window, then click the **Conferences** tab ( ).

2. From the **Service Name** list, select a conference service.

3. In the **Site Name** field, enter the name of your conference instance.

   For example, enter acmeweb.

4. In the **Username** field, enter your conference account user name.

5. In the **Password** field, enter your conference account password.

6. Click OK.

For information about starting a conference, see How do I start a web conference?
How do I allow Oracle Social Network to access my cloud documents?

Assuming your administrator has enabled the use of a cloud document service, like Google Drive, all you have to do is associate your account information with Oracle Social Network to be able to add those documents to your Conversations and walls.

Notes:

■ Documents formatted in Google's proprietary format are automatically converted to PDF when added to Oracle Social Network. You can't copy Google proprietary format documents back to Google Drive, but you can copy the PDF version of these documents. Unlike other file types, Google proprietary documents converted to PDF are not automatically returned to their original location in Google Drive.

■ Annotation marks and comments are not included when you copy from Oracle Social Network back to a cloud document service.

To allow Oracle Social Network to access your cloud documents:

1. Click to open the Settings window, then click the Cloud Documents tab ( ).
2. In the Service Name list, select the type of cloud document service you want to connect to.
3. In the Settings section, supply your account information:
   ■ For Dropbox or Google Drive, click Configure. The web version of Oracle Social Network opens. Click Authorize, log in to your account, then click Accept.
   ■ For other cloud document services, enter your username and password, then click OK.

The next time you add a document in Oracle Social Network, you'll be able to access your documents in the cloud in the file picker.

How do I configure my notification settings?

See the following sections for information on Notifications settings tab ( ):

■ How do I turn notifications on or off?
■ How do I turn pop-up alerts on or off?
■ How do I select the events that trigger notifications?

How do I restore default settings in Oracle Social Network Desktop?

1. Click to open the Settings window.
2. Click the tab with settings you want to restore.
3. Click Restore Defaults.
4. Click OK.

Getting Help, Support, and Updates for Oracle Social Network Desktop

How can I get help with Oracle Social Network Desktop?

The Help menu ( ) has a few options for getting help with your social network:
Getting Help, Support, and Updates for Oracle Social Network Desktop

- Select **Online Help** to navigate to the Help Center, where many topics are available that describe features and step you through their use.

- Select **Community** to navigate to Oracle Social Network community forums, where you can talk about your experience with fellow users and experts.

- Select **Support** for information about how to get support and for access to troubleshooting logs to help in diagnosing problems.

- Select **About Oracle Social Network** to get version information and to download the latest available version.

How do I save my Oracle Social Network activity logs?

Saving your activity logs creates an archive file (.zip) that contains .log, .txt, .xsl, and .xml files. When addressing an issue with Oracle Social Network, someone from support might ask you to save your activity logs.

1. Click 📘, then select **Support**.
2. In the Support dialog, click **Save Logs**.
3. Use the Save As dialog to select a destination and save.

   The default name of the archive file is `client-logs.zip`. If you don't want to overwrite a previous archive file, rename it before saving.

How do I check for updates to Oracle Social Network Desktop?

1. Click 📘, then select **About Oracle Social Network**.
2. In the About dialog, click **Check for Update** and follow prompts.
Using Oracle Social Network on Your iPhone

These topics provide information about the features of Oracle Social Network on your iPhone and describe how to use them.

- "Using Oracle Social Network on Your iPhone"

**Using Oracle Social Network on Your iPhone**

**How do I start a Conversation?**

1. On the sidebar menu, tap Conversations.
2. In the Conversations list, tap .
3. Enter a title for the new Conversation, then tap Create.

**How do I edit Conversation settings?**

1. Open the Conversation.
2. Tap , then tap Settings.
   - Tap the Conversation Name to change the name of the Conversation.
   - Tap the Visibility setting to change whether the Conversation is available only to members (Shared) or is public (can be discovered and joined by anyone).
   - Tap the Status setting to close or open the Conversation.
     **Note:** When you close a Conversation, it is closed for all members, not just you. You are prompted to confirm your action.
   - Tap the Membership Messages setting to show or hide membership messages.
   - Tap the Notifications setting to change whether you receive push notifications for this Conversation. For more information see, How do I set up notifications?

**How do I add or remove members from a Conversation?**

**To add members:**

1. Open the Conversation.
2. Tap More, then tap Members.
3. In the bottom bar, tap +.

4. In the Add Members dialog, select the people or groups you want to add.

By default, you see Recommendations, which shows a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add to a Conversation—the person is one of your contacts, similar Conversations the person is a member of, and other common actions.

To view a list of your contacts or groups, tap More, then select the list you want to see.

Alternatively, search for a person or group to add.

To view the list of people and groups you’ve selected, tap > next to <Number> selected.

Note: People outside your company have a special avatar ( ) and their names are in purple text. If you add an outside user to a Conversation, a banner stating "Visible to outside users." appears at the top of the Conversation and any associated message dialogs.

5. Tap Add.

In-Line Recommendations

You can also add members to a Conversation by accepting the recommendations that are sometimes shown in the list of messages (under Add to this Conversation). Oracle Social Network recommends people to add to a Conversation based on people you frequently add to Conversations and actions you have in common with others (such as being members of the same Conversations).

Each recommendation includes the person’s name and the reason they were recommended. You can perform the following actions:

- Tap the person’s name to view their profile.
- Tap Add to accept the recommendation and add the person to the Conversation.
- Tap Ignore to decline the recommendation.

Note: When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

- Swipe the current recommendation to see the previous or next recommendation.

When you accept or ignore a recommendation, the next recommendation appears.

Note: The recommendations appear near where you entered the Conversation. If you scroll up or down, the Add to this Conversation section might move out of view. Just scroll up or down to find it.

To remove members:

1. Open the Conversation.
2. Tap More, then tap Members.
3. In the bottom bar, tap Edit.
4. Tap next to the member you want to remove, then tap Delete.
How do I open a One-on-One Conversation?

To open a One-on-One Conversation with a member of a Conversation:
1. While viewing a Conversation, tap the picture of the person you want to start a One-on-One Conversation with to open their profile.
2. Tap Open One-on-One.

To open a One-on-One Conversation with one of your contacts:
1. On the sidebar menu, tap People.
2. Tap the person you want to start a One-on-One Conversation with to open their profile.
3. Tap Open One-on-One.

How do I mute or unmute a Conversation?

To mute a Conversation:
1. On the sidebar menu, tap Conversations.
2. Swipe left on the Conversation you want to mute, then tap Mute.

The muted Conversation appears under the Muted filter.

To unmute a Conversation:
1. On the sidebar menu, tap Conversations.
2. Tap Muted.
3. Swipe left on the Conversation you want to unmute, then tap Unmute.

How do I create, reply to, edit, or delete a message?

Note: If a Conversation is visible to people outside your company, you see a banner stating "Visible to outside users." at the top of the Conversation and any associated message dialogs.

To create a new message:
1. Open a Conversation or wall.
2. In the bottom bar, tap  
   ■ To post a message, enter your message text.
   ■ To post a link to another Oracle Social Network item, such as a Conversation or wall, tap , then tap the item.

   Tip: When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?

   Note: If you don’t see in the bottom bar of someone’s wall, you aren’t following the person or the person doesn’t allow other people to post to his or her wall.
3. Tap Post.
To reply to a message:
1. Tap 📨 under the message you want to reply to.
2. Enter your reply, then tap Post.

Note: If you don’t see 📨 under a personal wall post shown on the Overview panel or on a person’s wall, the person doesn’t allow other people to reply to his or her wall posts.

To edit a message:
1. Tap ☞ under the message you want to edit.
2. Tap Edit Message.
3. Make your changes, then tap Post.

Notes:
- You can edit only your own messages.
- Any special formatting on a message is lost when you edit the message.

To delete a message:
You can delete messages you posted or messages on your profile wall.

Note: If you are a service administrator, you can delete any message.
1. Tap ☞ under the message you want to delete.
2. Tap Delete.

How do I post a link to an Oracle Social Network item?
1. Open the Conversation.
2. In the bottom bar, tap 📖.
3. Tap 📖.
4. Tap the Conversation, document, or Social Object you want to reference.
5. Tap Post.

How do I add a referring item to a Conversation?

To add an existing item:
1. Open the Conversation.
2. Tap More, then tap Referring.
3. In the bottom bar, tap ⬅.
4. Tap the collection or Social Object you want to add.

To add a new collection:
1. Follow steps 1 through 3 above.
2. Tap ⬅, then tap New Collection.
3. Enter a name for the new collection, then tap Create.
How do I mark messages as read?

1. Open the Conversation.
2. Mark messages as read using one of the following methods:
   - To mark all messages as read, at the bottom of the Conversation, tap `<Number> Unread`.
   - To mark a single message as read, tap the message.
     Alternatively, tap `xxx` under the message, then tap Mark as Read.

If you want a message status to be unread, but you've already marked it as read, you can return the message to unread by tapping `xxx` under the message, then tapping Mark as Unread. This works only with messages others have posted and not your own posts.

Are there any features that are not supported on an iPhone?

The following Oracle Social Network features are not available for iPhone devices.

- Apps

How do I join or leave a web conference?

1. On the sidebar menu, tap [Conferences].
2. Tap the conference you want to join.
   The conference details open.
3. Tap Join Conference.
   To leave the conference, exit your conference application.

How do I view collections?

1. On the sidebar menu, tap [Collections].
2. Tap one of the following views:
   - Yours to show the collections you created.
   - Available to show all the collections available to you.
   - Favorites to show the collections that you have marked as favorite.
   - Muted to show the collections that you have muted.

How do I add a Conversation to a collection?

1. On the sidebar menu, tap [Collections].
2. Tap the collection you want to add a Conversation to.
3. In the bottom bar, tap `+`.
4. Tap a Conversation or wall to add it to the collection.
   Alternatively, you can create a new Conversation or collection.
   1. Follow steps 1 through 3 above.
   2. Tap `+`.
3. Tap **New Collection** to create a collection or **New Conversation** to create a Conversation.

4. Enter a name, then tap **Create**.

**How do I add a related item to a Social Object?**

1. Open the Social Object.

2. Tap **More**, then tap **Related**.

3. In the bottom bar, tap [+].

4. Tap the Conversation, wall, or Social Object you want to add.

Alternatively, you can create a new Conversation or collection.

1. Follow steps 1 through 3 above.

2. Tap [+].

3. Tap **New Collection** to create a collection or **New Conversation** to create a Conversation.

4. Enter a name, then tap **Create**.

**How do I add documents?**

1. Open the Conversation or wall you want to add to.

2. Tap to create a new message, or tap **More**, then tap **Documents** to add items from the **Documents** panel.

3. Tap [ ] (at the top of the message or at the bottom of the **Documents** panel), then select one of the following options:
   - To add a new photo or video, tap **Take Photo or Video**, take the photo or video, then tap **Use Photo**.
   - To add an existing photo or video, tap **Choose Photo or Video**, select one or more photos or videos, then tap **Done**.
   - To add a voice message, tap **Record Voice Message**. Tap **Start Recording**. If necessary, allow Oracle Social Network to access your microphone. Record your message. Tap **Stop Recording**, then tap **Use**.

   If you want to crop or rotate your photo, tap the photo thumbnail, then tap **Edit**. Edit mode opens.
   - Use the pinch gesture to make your photo bigger or smaller.
   - Tap [ ] to crop your photo vertically. Tap again to crop your photo horizontally.
   - Tap [ ] to rotate your photo 90 degrees. Tap again to continue the rotation.

   When you are done editing, tap **Save**.

4. Optionally, add a message to be posted with the document.

5. Tap **Post**.

**To upload a document from another application:**

1. Open the document in the application you want to upload from.
2. Tap the action button, then tap Open In.

3. Tap Open in Social to open the document in Oracle Social Network.

   Note: iOS lists up to 10 applications in the Open In menu. If you have more than 10 applications that support a file type, Oracle Social Network might not appear in the menu. Unfortunately, there is no way to manage which applications appear in the menu. If you uninstall other applications, Oracle Social Network eventually appears.

4. In the Open In dialog, you can change the file name and add a description.

5. Choose a destination for your document:
   ■ To post the document to your wall, tap Upload to your Wall.
   ■ To post the document to another location, tap Choose Destination. Select a destination, (optionally) select a folder, then tap Upload.

   Notes:
   – If you select a location that is visible to people outside your company, you see a banner stating "Visible to outside users." at the top of the Open In dialog. When you tap Upload, you are warned that the document will be visible to outside users. Tap Yes if you want to post the document.
   – If you can't upload a document to someone's wall, you either aren’t following the person or the person doesn’t allow other people to post to his or her wall.

**How do I view a document?**

To view a document, tap the document image.

After opening the document, you can switch to viewing it in its native viewer (the application most suitable to the document type). Tap the action icon, then tap View in Native Viewer.

If the document is from a cloud document store, the option is Open Document in Cloud Document Store, where Cloud Document Store is the name of the cloud document store.

Tip: To view documents added to a particular Conversation, wall, or collection open the Conversation, wall, or collection, tap More, then tap Documents.

**How do I view an earlier version of a document?**

1. Locate the document (see How do I view a document?).
   If necessary, open the folder that contains the document.

2. Tap <Number> Versions (<number> is the number of versions of the document).

**How do I annotate a document?**

Note: If the document is visible to people outside your company, you see a banner stating "Visible to outside users." at the top of the document preview and any associated annotation dialogs.

1. Open the document you want to annotate.

2. Tap , then tap the type of annotation you want to use:
   ■ Tap , and tap the place you want the annotation to appear.
Tap , and draw a rectangle over an area of any size.

- Tap , and draw a circle around an area of any size.
- Tap , and write or draw over an area of any size.
- Tap , and highlight one line.

3. Tap to open the comment box. Add comment text, then tap Save.

**Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?

4. Tap Publish <number> (<number> is the number of annotations that need to be published) to add them to the document and the Conversation.

**To view annotations:**
Open the annotated document or tap under the annotation message.

To view a list of all annotations, tap the open annotation.

**To show and hide annotations:**
1. Open the annotated document.

2. Tap .

3. Tap All annotations to show all the annotations on the document, No annotations to hide all the annotations, a person’s name to view annotations published by that user, or Unpublished annotations to see the annotations that have not been published yet.

**Note:** Tap , to show the existing annotations in a list.

**How do I copy a document?**

1. From the Conversation or wall, tap under the document, then tap Copy Document.

2. Select where you want to copy the document to.
   - To create a new Conversation for the copied document, tap New Conversation, then enter a name for the Conversation.
   - To select an existing Conversation, Social Object, or wall, tap Existing, then select a location.

Alternatively, while viewing the document, tap the action icon, then tap Copy Document, and select where you want to copy the document to.

**How do I delete a document?**

You can delete documents you created or documents on your profile wall.

**Note:** If you are a service administrator, you can delete any document.

1. Locate the document (see How do I view a document?).
   - If necessary, open the folder that contains the document.

2. Swipe left on the file you want to delete, then tap Delete.

You can also delete a document while viewing it, by tapping the action button, then tapping Delete.
Note: If you don’t see the Delete option when working with a document on someone’s wall, the person doesn’t allow other people to post to (or change) his or her wall.

**How do I see who has viewed a document?**

1. Locate the document (see How do I view a document?).
   If necessary, open the folder that contains the document.
2. Swipe left on the file you want to delete, then tap Access History.

**How do I join or leave a file co-browsing session?**

1. Open the document.
2. Above the file, tap 🔍.
   A list of the people looking at the file appears.
3. Tap the person whose movement you want to follow.
   To stop following the other person’s movement through a file, open the co-browsing menu, and tap the name of the person you’re browsing with.

**How do I create or remove a folder?**

1. On the sidebar menu, tap Conversations.
2. Open the Conversation, tap More, then tap Documents.
3. In the bottom bar, tap 🔍.
   Note: If you don’t see the 🔍 button when working on someone’s wall, the person doesn’t allow other people to post to (or change) his or her wall.
4. Enter a name for the new folder, then tap Create.
   Note: When you open a folder, a breadcrumb appears at the top of the Documents tab to show you where you are in the folder structure. To return to a parent folder, tap the folder name in the breadcrumb or tap the document icon to return to the top-level folder.
   You can delete folders you created (so long as it doesn’t include anyone else’s documents or folders) or folders on your profile wall.
   Notes:
   ■ If you are a service administrator, you can delete any folder.
   ■ If you don’t see the Delete option when working with a folder on someone’s wall, the person doesn’t allow other people to post to (or change) his or her wall.
   To remove a folder, tap ‌next to the folder, then tap Delete.

**How do I move files?**

You can’t move existing Oracle Social Network documents from one location to another. Instead, you can add the document to the new location (see How do I add documents?), and delete the document from the original location (see How do I delete a document?).
How do I view and edit my profile and picture?

1. On the sidebar menu, tap your picture.
2. Tap More, then tap Profile.
3. On the bottom bar, tap Edit.
4. Tap any field to edit it.
5. Tap Save.

Note: To add a new photo, tap your picture, then tap Take Photo or Choose Photo. Move or scale your image, then tap Choose.

How do I view or post to another person's wall?

To view another person's profile:
1. On the sidebar menu, tap People.
2. Tap next to the person to view their profile.

Note: Alternatively, tap a person's name or picture wherever you see it, to open that person's profile.

To post to another person's wall:
1. Open the person's profile.
2. Tap More, then tap Wall.
3. In the bottom bar, tap .
4. Enter your message.
5. Tap Post.

Note: Outside users (people outside your company) have profiles, but they don’t have walls. Outside users’ names appear in purple text, and they have icons ( ) after their names. If you want to post something to an outside user, you can do so through a one-on-one conversation. For more information, see How do I open a One-on-One Conversation?

How do I post a status update to my wall?

1. On the sidebar menu, tap next to your name.
2. Enter your status update.
3. Tap Post.

How can I tell if a person is online?

You can view a person’s presence status in the Conversation membership bar or on the People page. The person’s presence status is represented by the colored circle around the person's picture:

- 📚 - A full green circle around the person’s picture shows that the person is available (logged in to and currently interacting with Oracle Social Network).
- 🚀 - A three-quarter yellow circle around the person’s picture shows that the person is idle (logged in to but not currently interacting with Oracle Social Network).
- A half gray circle around the person’s picture shows that the person is offline (not logged in to Oracle Social Network).

**How do I view my contacts?**

On the sidebar menu, tap People.

**How do I follow or stop following someone?**

**To follow someone:**
1. Open the person’s profile by tapping their name or picture wherever you see it.
2. On the person’s profile, tap Follow.

To view a list of recommendations, tap More, then tap Recommendations. Oracle Social Network generates the Recommendations list based on actions you have in common with others—documents you’ve both read, Conversations you’re both members of, and other commonly taken actions. Each recommendation includes the person’s name, the reason they were recommended, a Follow button, and an Ignore button.

**Note:** When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

**Note:** You can’t follow outside users (people outside your company), but you can add them to your contacts. Outside users’ names appear in purple text, and they have icons ( ) after their names. For more information, see How do I add Oracle Social Network contacts?

**To stop following someone:**

To stop following someone, open the person’s profile and tap Unfollow.

Alternatively, in the People list, you can long press the person you want to stop following, then tap Stop Following.

**To view the people you are following:**
1. On the sidebar menu, tap People.
2. Tap More, then tap Following.

**How do I add Oracle Social Network contacts?**

1. On the sidebar menu, tap People.
2. In the People list, tap .
3. Enter a name, part of a name, or an email address.
4. In the results list, select the people you want to add, then tap Add.

**How do I save an Oracle Social Network contact to my iPhone contacts list?**

1. Open the person’s profile by tapping their name or picture wherever you see it.
2. At the bottom of the person’s profile, tap Add to iPhone Contacts.

**How do I create a group?**

1. On the sidebar menu, tap Groups.
2. In the Groups list, tap +.
3. Enter a Group name.
4. Optionally, enter a Group description.
5. Tap Add Photo, to add a photo to your group profile.
6. Tap Done.

The new group opens and you are added to the group.

How do I add or remove members from a group?

To add members:
1. On the sidebar menu, tap ✉ Groups.
2. Open the group.
3. Tap More, then tap Members.
4. In the bottom bar, tap +.
5. In the list of Contacts, select the people and groups you want to add.

Alternatively, search for users or groups to add.

Note: You can’t add outside users (people outside your company) to a group. Outside users' names appear in purple text, and they have icons (🔗) after their names.
6. Tap Add.

To remove members:
1. Open the group.
2. Tap More, then tap Members.
3. In the bottom bar, tap Edit.
4. Tap ☑️ next to the member you want to remove, then tap Delete.
5. Tap Done.

How do I assign or clear flags?

To assign a flag:
1. Next to the message you want to flag, tap 📄.
2. Tap 📄 next to the person you want to flag, then select the type of flag to assign:
   - 📄 - For your information
   - ☑️ - Please reply
   - ☑️ - Please reply - urgent

To clear a flag:
1. Navigate to the flag you want to clear:
   - On the sidebar menu, tap 📄 Flags.
By default, you see the flags assigned to you. To clear a flag you assigned to someone else, tap Filter, then tap Flags You Assigned.

- Find the flagged message in the Overview or Conversation.

2. Tap the flag you want to clear.
3. Tap ✗ next to the flag you want to clear.

How do I "like" a message?

1. Open the Conversation.
2. Next to the message you want to like, tap 🎉.

How do I mark an object as a favorite?

1. Navigate to the object you want to mark as a favorite.
2. For Messages, next to the message you want to mark as a favorite, tap ⭐.

How do I view my favorites?

On the sidebar menu, tap ⭐ Favorites.

You can also view your favorites from the Collections or Conversations pages by tapping Favorites on the segment bar.

How do I search Oracle Social Network?

To search all of Oracle Social Network:

1. On the sidebar menu, tap Search.
2. Enter your search term, then tap Search.
3. You can filter by object type by tapping All Results, then tapping an object type.
4. If you filtered by object type, you can sort the results by tapping Sort, then tapping a sort order (relevancy or date).
5. If you filtered by an object type, you can further filter the results by tapping ⬇ and selecting a filter option:
   - Posted By: Limit your search to messages or documents posted by a particular person.
   - Posted When: Limit your search to messages or documents posted within a particular period.
   - Document Type: If you filter your results to show documents, you can select which types of documents to show.
   - Updated By: Limit your search to Conversations, collections, hashtags, or Social Definitions updated by a particular user.
   - Updated When: Limit your search to Conversations, collections, hashtags, or Social Definitions updated within a particular period.
   - Created By: Limit your search to Conversations, collections, groups, or Social Definitions created by a particular user.
   - Created When: Limit your search to Conversations, collections, groups, or Social Definitions created within a particular period.
■ **Favorites Only:** Limit your search to only your favorite Conversations, collections, or groups.

■ **Include Public:** Control whether to show public Conversations, collections, or Social Definitions in your results.

■ **Include Closed:** Control whether to show closed Conversations, collections, or Social Definitions in your results.

■ **Include Deactivated:** Control whether to show deactivated groups in your results.

■ **With Member:** Limit your search to Conversations, collections, groups, or Social Definitions with a particular member.

6. Tap a result to open the item.
   - Tap a Conversation to open the Conversation.
   - Tap a person’s name to open the person’s wall.
     
     **Note:** Outside users (people outside your company) don’t have walls. If you tap an outside user, the outside user’s profile opens. Outside users’ names appear in purple text, and they have icons (ผลกระทบ) after their names.
   - Tap a group’s name to open the group’s wall.
   - Tap a hashtag to open a page with all messages that include that hashtag.

You can mark an object in the list of search results as a favorite by tapping ⭐ next to the result. For more information, see How do I view my favorites?

**To search in a Conversation:**
Use the controls at the bottom of the screen to search and navigate through the results in a Conversation. By default, you see the unread messages controls, but you can switch to the other options to find flags assigned to you or text in messages and documents.

■ Tap 🔄 to navigate through the unread messages in the Conversation.

■ Tap 🔄 to navigate through any flags assigned to you in the Conversation.

■ Tap 🔍 to search for text in the messages or documents. After tapping 🔍, enter your search term, then tap **Search**.

Your search term is highlighted in the Conversation.

To clear your search, tap 🔄.

The number of unread messages, flags, or messages that include your text is shown next to the navigation arrows. To step through the items, use the up and down arrows.

**What are hashtags (#) and how do I use them?**
You can use a hashtag (#) in a message to call out a meaningful term or topic, making it easy to search for all content associated with that term or topic. For example, imagine *discounts* is a popular topic in your group, but the discounts can come in the form of dealer incentives, cash-back deals, seasonal discounts, or any other number of forms. How do you find what everyone is saying about all those things? You use a hashtag. Every time you or your colleagues say something about some form of discount, you include the hashtag #discounts. You can then search for #discounts and get a list of all messages in otherwise unrelated Conversations and walls that contain the hashtagged term.
**Adding Hashtags**

You can add one or more hashtags to any message (comments, replies, annotations, and document messages) simply by typing "#" before a term. When you start typing a hashtag by typing "#" plus at least one letter, existing hashtags (ones that have been used before) appear for you to select from.

**Tips:**

- You can include the following characters in a hashtag: A through Z, a through z, 0 through 9 and _.
- A hashtag can be a maximum of 25 characters (not including the ")

**Searching for and Viewing Hashtags**

When you perform a search, available hashtags are included in the results. If your search term starts with a hashtag (#), one of two things will happen. If the hashtag exists, the hashtag page opens. If the hashtag doesn’t exist, you see search results that contain any tags similar to the hashtag you searched for.

Wherever you see them, hashtagged terms are tappable and will open a hashtag page where all messages that include that hashtag are shown. So tapping #discounts in any Conversation opens a #discounts page which shows any message (in a Conversation, document annotation, wall, or such) that you have access to that includes the discounts hashtag.

On the hashtag page, you can filter the messages to show all messages that include the hashtag (Recent) or just those messages posted by people you are following (By People You Follow).

To mark a message as a favorite, next to the message, tap . For more information, see How do I view my favorites?

**Following Hashtags**

You can also follow hashtags. When you follow a hashtag, messages in public Conversations and walls that contain that hashtag appear on the Overview page, even if you are not a member of those Conversations or walls.

To follow a hashtag, tap the hashtag to open the hashtag page, then tap Follow at the top of the page. To stop following the hashtag, tap Unfollow.

**How do I set up notifications?**

Push notifications enable you to receive notifications from your Conversations and walls when you are not currently active in Oracle Social Network.

**Note:** You can set up notifications only when you’re logged in to the account.

1. On the sidebar menu, tap Accounts.
2. Tap next to the account you’re logged in to.
4. By default, all notifications are set to On. Change the settings as desired:
   - **Push Notifications:** Turn on or off all notifications on this device.
   - **All Posts:** Set to On to receive notifications for all new posts to all of your Conversations and walls.

   This can be overridden on a Conversation-by-Conversation basis in the Conversation’s settings. To learn more, see How do I change notification settings
for a selected Conversation or wall?

General Notifications

- **Posts to Your Wall**: Notifies you when someone posts a message to your wall.
- **One-on-One Posts**: Notifies you when someone starts a One-on-One with you.
- **Conferences**: Notifies you when a conference you are invited to starts.
- **Added To**: Notifies you when you are added as a member to a Conversation or wall.

Flags Assigned To Me

- **FYI**: Notifies you when someone assigns a For Your Information flag to you.
- **Please Reply**: Notifies you when someone assigns a Please Reply flag to you.

Note: You are always notified when someone assigns a Please Reply - Urgent flag to you.

Flags Cleared

- **FYI**: Notifies you when a For Your Information flag you assigned is cleared.
- **Please Reply**: Notifies you when a Please Reply flag you assigned is cleared.
- **Please Reply-Urgent**: Notifies you when a Please Reply - Urgent flag you assigned is cleared.

Note: If you use more than one account, you must set up notifications for each account individually.

How do I change notification settings for a selected Conversation or wall?

To select your notification settings for a selected Conversation or wall:

1. Open the Conversation.
2. Tap 📡, then tap **Settings**.
3. Tap the **Notifications** setting and change it as desired:
   - Tap **On** to enable Oracle Social Network to send notifications for this Conversation.
   - Tap **Off** to disable notifications for this Conversation.
   - Tap **Use Global Setting** to use your push notification settings. For more information, see How do I set up notifications?

How do I add, edit, or remove an account?

**To add a new account:**

1. On the sidebar menu, tap ✉️ **Accounts**.
2. Tap **Add Account**.
3. In the **Username** field, enter your Oracle Social Network user name.
4. In the **Password** field, enter your Oracle Social Network password.
5. Turn on **Save Password** to make future connections automatically.
6. In the **Account Name** field, enter a name for the new account.
7. In the **Server** field, enter the path to the server that is hosting your Oracle Social Network instance.
   
   For example, enter:
   
   acme.social.us1.oraclecloud.com/client

8. Tap **Connect**.

**To edit an account:**

*Note:* To edit settings for an account, you must not be connected to it.

1. On the sidebar menu, tap **Accounts**.
2. Tap **i** next to the account you want to edit.
3. Change the information as desired.
4. Tap **Connect**.

**To remove an account:**

*Note:* To remove an account, you must not be connected to it.

1. On the sidebar menu, tap **Accounts**.
2. Tap **i** next to the account you want to remove.
3. Tap **Delete**.

**How do I switch from one account to another?**

1. On the sidebar menu, tap **Accounts**.
2. Tap the account you want to switch to.

**How do I change an Oracle Social Network password?**

If your company’s password policy lets you change your password, you can do this in the web version of Oracle Social Network. You can’t change your password on mobile devices.

**How do I bring up help?**

On the sidebar menu, tap **Help**.

*Note:* **Help** appears only when you are logged in.

**How do I access support for Oracle Social Network?**

On the sidebar menu, tap **Support**.

The Support dialog shows the following information:

- **Oracle Social Network Version** - The version number of the Oracle Social Network application running on the server to which you are connected.
- **iOS App Version** - The version number of the Oracle Social Network application you have installed on your iPhone.

*Note:* **Support** appears only when you are logged in and connected to an Oracle Social Network server that supports the Support menu.
How do I show the user tips if I previously dismissed them?

1. On the sidebar menu, tap 🔍 About.
2. At the bottom of the About dialog, tap Show User Tips Again to show user tips when you first visit a new area.

The About dialog also displays the Oracle Social Network copyright. Tap Legal Terms or Oracle Privacy Policy to view the associated information.
These topics provide information about the features of Oracle Social Network on your iPad and describe how to use them:

- "Using Oracle Social Network on Your iPad"

Using Oracle Social Network on Your iPad

How do I start a Conversation?

1. On the sidebar menu, tap 📮.
2. In the upper right corner of the Conversations page, tap ⬅️.
3. Enter a name for the new Conversation, then tap Create.

How do I edit Conversation settings?

1. Open the Conversation.
2. Tap ⬅️, then tap Settings.
   - Tap the Conversation Name to change the name of the Conversation.
   - Tap the Visibility setting to change whether the Conversation is available only to members (Shared) or is public (can be discovered and joined by anyone).
   - Tap the Status setting to close or open the Conversation.
     Note: When you close a Conversation, it is closed for all members, not just you. You are prompted to confirm your action.
   - Tap the Membership Messages setting to show or hide membership messages.
   - Tap the Notifications setting to change whether notifications are sent for the Conversation. For more information see, How do I set up notifications?

How do I add or remove members from a Conversation?

To add members:
1. Open the Conversation.
2. Tap 🌐.
3. Tap 

4. In the Add Members dialog, select the people or groups you want to add.

By default, you see Recommendations, which shows a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add to a Conversation—the person is one of your contacts, similar Conversations the person is a member of, and other common actions.

To view a list of your contacts or groups, tap More, then select the list you want to see.

Alternatively, search for a person or group to add.

To view the list of people and groups you’ve selected, tap > next to <Number> selected.

Note: People outside your company have a special avatar ( ) and their names are in purple text. If you add an outside user to a Conversation, a banner stating “This Conversation is visible to outside users.” appears at the top of the Conversation and any associated message dialogs.

5. Tap Add.

6. Tap outside the Members dialog box to close it.

**In-Line Recommendations**

You can also add members to a Conversation by accepting the recommendations that are sometimes shown in the list of messages (under Add to this Conversation). Oracle Social Network recommends people to add to a Conversation based on people you frequently add to Conversations and actions you have in common with others (such as being members of the same Conversations).

Each recommendation includes the person’s name and the reason they were recommended. You can perform the following actions:

- Tap the person’s name to view their profile.
- Tap Add to accept the recommendation and add the person to the Conversation.
- Tap Ignore to decline the recommendation.

Note: When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

- Tap the arrows on either side of the current recommendation or swipe the current recommendation to see the previous or next recommendation.

When you accept or ignore a recommendation, the next recommendation appears.

Note: The recommendations appear near where you entered the Conversation. If you scroll up or down, the Add to this Conversation section might move out of view. Just scroll up or down to find it.

**To remove members:**

1. Open the Conversation.
2. Tap 👤.
3. Tap Edit.
4. Tap ⌠ next to the member you want to remove, then tap Delete.
5. Tap Done.
6. Tap outside the Members dialog box to close it.

**How do I open a One-on-One Conversation?**

**To open a One-on-One Conversation with a member of a Conversation:**
1. While viewing a Conversation, tap the picture of the person you want to start a One-on-One Conversation with to open their profile.
2. Tap One-on-One.

**To open a One-on-One Conversation with one of your contacts:**
1. On the sidebar menu, tap .
2. Tap the person you want to start a One-on-One Conversation with to open their profile.
3. Tap One-on-One.

**How do I mute or unmute a Conversation?**

**To mute a Conversation:**
1. On the sidebar menu, tap .
2. Swipe left on the Conversation you want to mute, then tap Mute.

*The muted Conversation appears under the Muted filter.*

**Note:** You can’t mute one-on-one Conversations.

**To unmute a Conversation:**
1. On the sidebar menu, tap .
2. On the segment bar, tap Muted.
3. Swipe left on the Conversation you want to unmute, then tap Unmute.

**How do I create, reply to, edit, or delete a message?**

**Note:** If a Conversation is visible to people outside your company, you see a banner stating "This Conversation is visible to outside users." at the top of the Conversation and any associated message dialogs.

**To create a new message:**
1. Open a Conversation or wall.
2. In the bottom bar, tap .
   - To post a message, enter your message text.
   - To post a link to another Oracle Social Network item, such as a Conversation or wall, tap , then tap the item.

**Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see [What are hashtags (#) and how do I use them?](#).

**Note:** If you don’t see in the bottom bar of someone's wall, you aren’t following the person or the person doesn’t allow other people to post to his or her wall.
3. Tap Post.

**To reply to a message:**
1. Tap under the message you want to reply to.
2. Enter your reply, then tap Post.

*Note:* If you don’t see under a personal wall post shown on the Overview panel or on a person’s wall, the person doesn’t allow other people to reply to his or her wall posts.

**To edit a message:**
1. Tap under the message you want to edit.
2. Tap Edit Message.
3. Make your changes, then tap Save.

*Notes:*
- You can edit only your own messages.
- Any special formatting on a message is lost when you edit the message.

**To delete a message:**
You can delete messages you posted or messages on your profile wall.

*Note:* If you are a service administrator, you can delete any message.
1. Tap under the message you want to delete.
2. Tap Delete.

**How do I post a link to an Oracle Social Network item?**
1. Open the Conversation.
2. In the bottom bar, tap .
3. Tap .
4. Tap the Conversation, document, or Social Object you want to reference.
5. Tap Post.

**How do I add a referring item to a Conversation?**

**To add an existing item:**
1. Open the Conversation.
2. On the segment bar, tap Referring.
3. In the bottom bar, tap .
4. Tap the collection or Social Object you want to add.

**To add a new item:**
1. Follow steps 1 through 3 above.
2. Tap , then tap New Collection.
3. Enter a name for the new collection, then tap Create.
How do I mark messages as read?

1. Open the Conversation.
2. Mark messages as read using one of the following methods:
   - To mark all messages as read, at the bottom of the Conversation, tap `<Number> Unread`.
   - To mark a single message as read, tap the message.
   Alternatively, tap `ooo` under the message, then tap `Mark as Read`.

If you want a message status to be unread, but you’ve already marked it as read, you can return the message to unread by tapping `ooo` under the message, then tapping `Mark as Unread`. This works only with messages others have posted and not your own posts.

Are there any features that are not supported on an iPad?

The following Oracle Social Network features are not available for iPad devices.

- Apps

How do I join or leave a web conference?

1. On the sidebar menu, tap 📈.
2. Tap `Join` next to the conference you want to join.
   
   **Note:** To see the details of a conference, tap the conference.

   To leave the conference, exit your conference application.

How do I view collections?

1. On the sidebar menu, tap 📁.
2. On the segment bar, tap:
   - `Yours` to show the collections you created.
   - `Available` to show all the collections available to you.
   - `Favorites` to show the collections you have marked as favorite.
   - `Muted` to show the collections that you have muted.

How do I add a Conversation to a collection?

1. On the sidebar menu, tap 📁.
2. Tap the collection you want to add a Conversation to.
3. In the bottom bar, tap `➕`.
4. Tap a Conversation or wall to add it to the collection.

Alternatively, you can create a new Conversation or collection.

1. Tap `➕`.
2. Tap `New Collection` to create a collection or `New Conversation` to create a Conversation.
3. Enter a name.
4. Tap Create.

**How do I add a related item to a Social Object?**

1. Open the Social Object.
2. On the segment bar, tap Related.
3. In the bottom bar, tap +.
4. Tap the Conversation, user wall, group wall, or Social Object you want to add. Alternatively, you can create a new Conversation or collection.
   1. Tap +.
   2. Tap New Collection to create a collection or New Conversation to create a Conversation.
   3. Enter a name.
   4. Tap Create.

**How do I add documents?**

1. Open the Conversation or wall you want to add to.
2. Tap ✍️ to create a new message, or tap More, then tap Documents to add items from the Documents panel.
3. Tap 📄 (at the top of the message or at the bottom of the Documents panel), then select one of the following options:
   - To add a new photo or video, tap Take Photo or Video, take the photo or video, then tap Use Photo.
   - To add an existing photo or video, tap Choose Photo or Video, select one or more photos or videos, then tap Done.
   - To add a voice message, tap Record Voice Message. Tap Start Recording. If necessary, allow Oracle Social Network to access your microphone. Record your message. Tap Stop Recording. Tap Use.
   
   If you want to crop or rotate your photo, tap the photo thumbnail, then tap Edit. Edit mode opens.
   - Use the pinch gesture to make your photo bigger or smaller.
   - Tap 📸 to crop your photo vertically. Tap again to crop your photo horizontally.
   - Tap 😱, to rotate your photo 90 degrees. Tap again to continue the rotation.
   
   When you are done editing, tap Save.
4. Optionally, add a message to be posted with the document.
5. Tap Post.

**To upload a document from another application:**

1. Open the document in the application you want to upload from.
2. Tap the action button, then tap Open In.
3. Tap Open in Social to open the document in Oracle Social Network.
Note: iOS lists up to 10 applications in the Open In menu. If you have more than 10 applications that support a file type, Oracle Social Network might not appear in the menu. Unfortunately, there is no way to manage which applications appear in the menu. If you uninstall other applications, Oracle Social Network eventually appears.

4. In the Open In dialog, you can change the file name and add a description.

5. Choose a destination for your document:
   - To post the document to your wall, tap Upload to your Wall.
   - To post the document to another location, tap Choose Destination. Select a destination, (optionally) select a folder, then tap Upload.

Notes:
- If you select a location that is visible to people outside your company, you see a banner stating “This Conversation is visible to outside users.” at the top of the Open In dialog. When you tap Upload, you are warned that the document will be visible to outside users. Tap Yes if you want to post the document.
- If you can’t upload a document to someone’s wall, you either aren’t following the person or the person doesn’t allow other people to post to his or her wall.

6. Tap Upload.

How do I view a document?

To view a document, tap the document image.

After opening the document, you can switch to viewing it in its native viewer (the application most suitable to the document type). Tap the action icon, then tap View in Native Viewer.

If the document is from a cloud document store, the option is Open Document in Cloud Document Store, where Cloud Document Store is the name of the cloud document store.

Tip: To view documents added to a particular Conversation, wall, or collection open the Conversation, wall, or collection, then tap the Documents segment.

How do I view an earlier version of a document?

1. Locate the document (see How do I view a document?).

If necessary, open the folder that contains the document.

2. Tap <Number> Versions (<number> is the number of versions of the document).

How do I annotate a document?

Note: If the document is visible to people outside your company, you see a banner stating “This Conversation is visible to outside users.” at the top of any associated annotation dialogs.

1. Open the document.

2. Tap , then tap the type of annotation you want to use:
   - Tap , and tap the place you want the annotation to appear.
Using Oracle Social Network on Your iPad

- Tap ⬇️, and write or draw over an area of any size.
- Tap ✎, and highlight one line.
- Tap ☐️, and draw a rectangle over an area of any size.
- Tap ⭕️, and draw a circle around an area of any size.

3. If necessary, tap Edit to open the comment dialog.

**Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?

4. Add comment text, then tap Save.

5. Tap Publish <number> (<number> is the number of annotations that need to be published) to add them to the document and the Conversation.

**To view annotations:**
Open the annotated document or tap ☒️ under the annotation message.
To view a list of all annotations, tap the open annotation.

**To show and hide annotations:**
1. Open the annotated document.
2. Tap ☑️.
3. Tap All annotations to show all the annotations on the document, No annotations to hide all the annotations, a person’s name to view annotations published by that user, or Unpublished annotations to see the annotations that have not been published yet.

**How do I copy a document?**
1. From the Conversation or wall, tap ☐️ under the document, then tap Copy Document.
2. Select where you want to copy the document to.
   - To create a new Conversation for the copied document, tap New Conversation, then enter a name for the Conversation.
   - To select an existing Conversation, Social Object, or wall, tap Existing, then select a location.

Alternatively, while viewing the document, tap the action icon, then tap Copy Document, and select where you want to copy the document to.

**How do I delete a document?**
You can delete documents you created or documents on your profile wall.

**Note:** If you are a service administrator, you can delete any document.

1. Locate the document (see How do I view a document?).
   If necessary, open the folder that contains the document.
2. Swipe left on the file you want to delete, then tap Delete.

You can also delete a document while viewing it, by tapping the action button, then tapping Delete.
Using Oracle Social Network on Your iPad

Note: If you don’t see the Delete option when working with a document on someone’s wall, the person doesn’t allow other people to post to (or change) his or her wall.

How do I see who has viewed a document?
1. Locate the document (see How do I view a document?).
   If necessary, open the folder that contains the document.
2. Swipe left on the file you want to delete, then tap Access History.

How do I join or leave a file co-browsing session?
1. Open the document.
2. Above the file, tap 📝.
   A list of the people looking at the file appears.
3. Tap the person whose movement you want to follow.
To stop following the other person’s movement through a file, open the co-browsing menu, and tap the name of the person you’re browsing with.

How do I create or remove a folder?
1. On the sidebar menu, tap 📦.
2. Open the Conversation, and tap the Documents segment.
3. In the bottom bar, tap 📦.
   Note: If you don’t see the 📦 button when working on someone’s wall, the person doesn’t allow other people to post to (or change) his or her wall.
4. Enter a name for the new folder, then tap Create.
Note: When you open a folder, a breadcrumb appears at the top of the Documents tab to show you where you are in the folder structure. To return to a parent folder, tap the folder name in the breadcrumb or tap the document icon to return to the top-level folder.
You can delete folders you created (so long as it doesn’t include anyone else’s documents or folders) or folders on your profile wall.
Notes:
- If you are a service administrator, you can delete any folder.
- If you don’t see the Delete option when working with a folder on someone’s wall, the person doesn’t allow other people to post to (or change) his or her wall.
To remove a folder, tap 🗑 next to the folder, then tap Delete.

How do I move files?
You can’t move existing Oracle Social Network documents from one location to another. Instead, you can add the document to the new location (see How do I add documents?), and delete the document from the original location (see How do I delete a document?).
How do I view and edit my profile and picture?
1. On the sidebar menu, tap your picture.
2. On the segment bar, tap Profile.
3. On the bottom bar, tap Edit.
4. Tap any field to edit it.
5. Tap Save.

*Note:* To add a new photo, tap your picture, then tap Take Photo or Choose Photo. Move or scale your image and tap Use.

How do I view or post to another person's wall?

**To view another person's profile:**
1. On the sidebar menu, tap ♀.
2. Tap 🔍 next to the person to view their profile.

*Note:* Alternatively, tap a person's name or picture wherever you see it, to open that person's profile.

**To post to another person's wall:**
1. Open the person's profile.
2. On the segment bar, tap Wall.
3. In the bottom bar, tap 📝.
4. Enter your message.
5. Tap Post.

How do I post a status update to my wall?
1. On the sidebar menu, tap your picture.
2. In the bottom bar of your wall, tap 📝.
3. Enter your status update.
4. Tap Post.

How can I tell if a person is online?
You can view a person's presence status in the Conversation membership bar or on the People page. The person's presence status is represented by the colored circle around the person's picture:

- A full green circle around the person’s picture shows that the person is available (logged in to and currently interacting with Oracle Social Network).
- A three-quarter yellow circle around the person’s picture shows that the person is idle (logged in to but not currently interacting with Oracle Social Network).
- A half gray circle around the person’s picture shows that the person is offline (not logged in to Oracle Social Network).
How do I view my contacts?
1. On the sidebar menu, tap 📞.
2. On the segment bar, tap Contacts.

How do I follow or stop following someone?

To follow someone:
1. Open the person’s profile by tapping their name or picture wherever you see it.
2. On the person’s profile, tap Follow.

Alternatively, tap 📞, then, in the desired segment, tap Follow next to the person you want to follow.

The Recommendations segment is shown by default. Oracle Social Network generates the Recommendations list based on actions you have in common with others—documents you’ve both read, Conversations you’re both members of, and other commonly taken actions. Each recommendation includes the person’s name, the person’s title, the reason they were recommended, a Follow button, and an Ignore button.

Note: When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

To stop following someone:
To stop following someone, open the person’s profile and tap Unfollow.

Alternatively, on the People page, you can long press the person you want to stop following, then tap Stop Following.

To view the people you are following:
1. On the sidebar menu, tap 📞.
2. On the segment bar, tap People You Follow.

How do I add Oracle Social Network contacts?
1. On the sidebar menu, tap 📞.
2. On the segment bar, tap Contacts.
3. Tap +.
4. Enter a name, part of a name, or an email address.
5. In the results list, select the people you want to add, then tap Add.

How do I save an Oracle Social Network contact to my iPad contacts list?
1. Open the person’s profile by tapping their name or picture wherever you see it.
2. At the bottom of the person’s profile, tap Add to iPad Contacts.

How do I create a group?
1. On the sidebar menu, tap 📞.
2. Tap +.
3. Enter a **Group name**.
4. Optionally, enter a **Group description**.
5. Tap **Add Photo**, to add a photo to your group profile.
6. Tap **Done**.
   
The new group opens and you are added to the group.

**How do I add or remove members from a group?**

**To add members:**
1. On the sidebar menu, tap 🔄.
2. Open the group.
3. In the membership bar, click 🔄.
4. In the Update Members pop-up, tap 🔄.
5. In the Add Members pop-up, select the people or groups you want to add.
   
   Alternatively, search for a person or group to add.
   
   **Note:** You can’t add outside users (people outside your company) to a group. Outside users’ names appear in purple text, and they have icons (tré) after their names.

**To remove members:**
1. Open the group.
2. In the membership bar, click 🔄.
3. In the Update Members pop-up, tap **Edit**.
4. Tap 🔄 next to the member you want to remove, then tap **Delete**.

**How do I assign or clear flags?**

**To assign a flag:**
1. Next to the message you want to flag, click 🔄.
2. Tap 🔄 next to the person you want to flag, then select the type of flag to assign:
   - 🔄 - For your information
   - 🔄 - Please reply
   - 🔄 - Please reply - urgent

**To clear a flag:**
1. Navigate to the flag you want to clear:
   
   On the sidebar menu, tap 🔄 **Flags**.
   
   By default, you see the flags assigned to you. To clear a flag you assigned to someone else, tap **Filter**, then tap **Flags You Assigned**.
   
   Find the flagged message in the Overview, Conversation, or wall.
2. Tap the flag you want to clear.
3. Tap ✗ next to the flag you want to clear.

**How do I "like" a message?**

1. Open the Conversation.
2. Next to the message you want to like, tap 🍂.

**How do I mark an object as a favorite?**

1. Navigate to the object you want to mark as a favorite.
2. Long press the object, then tap **Add to Favorites**.
   For Messages, next to the message you want to mark as a favorite, tap ⭐.

**How do I view my favorites?**

On the sidebar menu, tap ⭐. You can filter your favorites by item type by tapping one of the segments at the top.

You can also view your favorites from the Collections or Conversations pages by tapping **Favorites** on the segment bar.

**How do I search Oracle Social Network?**

**To search all of Oracle Social Network:**

1. On the sidebar menu, tap 🔍.
2. Enter your search term, then tap **Search**.
3. You can filter by object type by tapping **All Results**, then tapping an object type.
4. If you filtered by object type, you can sort the results by tapping **Sort**, then tapping a sort order (relevancy or date).
5. If you filtered by an object type, you can further filter the results by tapping 🔴 and selecting a filter option:
   - **Posted By**: Limit your search to messages or documents posted by a particular person.
   - **Posted When**: Limit your search to messages or documents posted within a particular period.
   - **Document Type**: If you filter your results to show documents, you can select which types of documents to show.
   - **Updated By**: Limit your search to Conversations, collections, hashtags, or Social Definitions updated by a particular user.
   - **Updated When**: Limit your search to Conversations, collections, hashtags, or Social Definitions updated within a particular period.
   - **Created By**: Limit your search to Conversations, collections, groups, or Social Definitions created by a particular user.
   - **Created When**: Limit your search to Conversations, collections, groups, or Social Definitions created within a particular period.
   - **Favorites Only**: Limit your search to only your favorite Conversations, collections, or groups.
- **Include Public**: Control whether to show public Conversations, collections, or Social Definitions in your results.

- **Include Closed**: Control whether to show closed Conversations, collections, or Social Definitions in your results.

- **Include Deactivated**: Control whether to show deactivated groups in your results.

- **With Member**: Limit your search to Conversations, collections, groups, or Social Definitions with a particular member.

6. Tap a result to open the item.
   - Tap a Conversation to open the Conversation.
   - Tap a person’s name to open the person’s wall.
     
     **Note:** Outside users (people outside your company) don’t have walls. If you tap an outside user, the outside user’s profile opens. Outside users’ names appear in purple text, and they have icons (istes) after their names.
   - Tap a group’s name to open the group’s wall.
   - Tap a hashtag to open a page with all messages that include that hashtag.

You can mark an object in the list of search results as a favorite by tapping ⭐ next to the result. For more information, see How do I view my favorites?

**To search in a Conversation:**

Use the controls at the bottom of the screen to search and navigate through the results in a Conversation. By default, you see the unread messages controls, but you can switch to the other options to find flags assigned to you or text in messages and documents.

- Tap 🔼 to navigate through the unread messages in the Conversation.
- Tap 🔱 to navigate through any flags assigned to you in the Conversation.
- Tap 🔍 to search for text in the messages or documents. After tapping 🔍, enter your search term, then tap Search.

Your search term is highlighted in the Conversation.

To clear your search, tap 🔃.

The number of unread messages, flags, or messages that include your text is shown next to the navigation arrows. To step through the items, use the up and down arrows.

**What are hashtags (#) and how do I use them?**

You can use a hashtag (#) in a message to call out a meaningful term or topic, making it easy to search for all content associated with that term or topic. For example, imagine *discounts* is a popular topic in your group, but the discounts can come in the form of dealer incentives, cash-back deals, seasonal discounts, or any other number of forms. How do you find what everyone is saying about all those things? You use a hashtag. Every time you or your colleagues say something about some form of discount, you include the hashtag `#discounts`. You can then search for `#discounts` and get a list of all messages in otherwise unrelated Conversations and walls that contain the hashtagged term.
Adding Hashtags
You can add one or more hashtags to any message (comments, replies, annotations, and document messages) simply by typing "#" before a term. When you start typing a hashtag by typing "#" plus at least one letter, existing hashtags (ones that have been used before) appear for you to select from.

Tips:
- You can include the following characters in a hashtag: A through Z, a through z, 0 through 9 and _.
- A hashtag can be a maximum of 25 characters (not including the ",#"").

Searching for and Viewing Hashtags
When you perform a search, available hashtags are included in the results. If your search term starts with a hashtag (#), one of two things will happen. If the hashtag exists, the hashtag page opens. If the hashtag doesn't exist, you see search results that contain any tags similar to the hashtag you searched for.

Wherever you see them, hashtagged terms are tappable and will open a hashtag page where all messages that include that hashtag are shown. So tapping #discounts in any Conversation opens a #discounts page which shows any message (in a Conversation, document annotation, wall, or such) that you have access to that includes the discounts hashtag.

On the hashtag page, you can filter the messages to show all messages that include the hashtag (Recent) or just those messages posted by people you are following (By People You Follow).

To mark a message as a favorite, next to the message, tap ✫. For more information, see How do I view my favorites?

Following Hashtags
You can also follow hashtags. When you follow a hashtag, messages in public Conversations and walls that contain that hashtag appear on the Overview page, even if you are not a member of those Conversations or walls.

To follow a hashtag, tap the hashtag to open the hashtag page, then tap Follow at the top of the page. To stop following the hashtag, tap Unfollow.

How do I set up notifications?
Push notifications enable you to receive notifications from your Conversations and walls when you are not currently active in Oracle Social Network.

Note: You can set up notifications only when you're logged in to the account.

1. On the sidebar menu, tap 📣
2. Tap 📣 next to the account you're logged in to.
4. By default, all notifications are set to On. Change the settings as desired:
   - Push Notifications: Turn on or off all notifications on this device.
   - All Posts: Set to On to receive notifications for all new posts to all of your Conversations and walls.

This can be overridden on a Conversation-by-Conversation basis in the Conversation’s settings. To learn more see How do I change notification settings.
for a selected Conversation or wall?

**General Notifications**
- **Posts to Your Wall**: Notifies you when someone posts a message to your wall.
- **One-on-One Posts**: Notifies you when someone starts a One-on-One with you.
- **Conferences**: Notifies you when a conference you are invited to starts.
- **Added To**: Notifies you when you are added as a member to a Conversation or wall.

**Flags Assigned To Me**
- **FYI**: Notifies you when someone assigns a For Your Information flag to you.
- **Please Reply**: Notifies you when someone assigns a Please Reply flag to you.

**Note**: You are always notified when someone assigns a Please Reply - Urgent flag to you.

**Flags Cleared**
- **FYI**: Notifies you when a For Your Information flag you assigned is cleared.
- **Please Reply**: Notifies you when a Please Reply flag you assigned is cleared.
- **Please Reply-Urgent**: Notifies you when a Please Reply - Urgent flag you assigned is cleared.

**Note**: If you use more than one account, you must set up notifications for each account individually.

**How do I change notification settings for a selected Conversation or wall?**

To select your notification settings for a selected Conversation or wall:

1. Open the Conversation.
2. Tap ⌚, then tap **Settings**.
3. Tap the **Notifications** setting and change it as desired:
   - Tap **On** to enable Oracle Social Network to send notifications for this Conversation.
   - Tap **Off** to disable notifications for this Conversation.
   - Tap **Use Global Setting** to use your push notification settings. For more information, see How do I set up notifications?

**How do I add, edit, or remove an account?**

**To add a new account:**

1. On the sidebar menu, tap 🔍.
2. Tap **Add Account**.
3. In the **Username** field, enter your Oracle Social Network user name.
4. In the **Password** field, enter your Oracle Social Network password.
5. Turn on **Save Password** to make future connections automatically.
6. In the **Account Name** field, enter a name for the new account.
7. In the **Server** field, enter the path to the server that is hosting your Oracle Social Network instance.
   
   For example, enter:
   
   `acme.social.us1.oraclecloud.com/client`

8. Tap **Connect**.

**To edit an account:**

**Note:** To edit settings for an account, you must not be connected to it.

1. On the sidebar menu, tap ᐁ.
2. Tap ɪ next to the account you want to edit.
3. Change the information as desired.
4. Tap **Connect**.

**To remove an account:**

**Note:** To remove an account, you must not be connected to it.

1. On the sidebar menu, tap ᐁ.
2. Tap ɪ next to the account you want to remove.
3. Tap **Delete**.

**How do I switch from one account to another?**

1. On the sidebar menu, tap ᐁ.
2. Tap the account you want to switch to.

**How do I change an Oracle Social Network password?**

If your company’s password policy lets you change your password, you can do this in the web version of Oracle Social Network. You can’t change your password on mobile devices.

**How do I bring up help?**

On the sidebar menu, tap 📚.

**Note:** 📚 appears only when you are logged in.

**How do I access support for Oracle Social Network?**

On the sidebar menu, tap 📚.

The Support dialog shows the following information:

- **Oracle Social Network Version** - The version number of the Oracle Social Network application running on the server to which you are connected.

- **iOS App Version** - The version number of the Oracle Social Network application you have installed on your iPhone.

**Note:** 📚 appears only when you are logged in and connected to an Oracle Social Network server that supports the Support menu.
How do I show the user tips if I previously dismissed them?

1. On the sidebar menu, tap 📚.

2. At the bottom of the About dialog, tap **Show User Tips Again** to show user tips when you first visit a new area.

The About dialog also displays the Oracle Social Network copyright. Tap **Legal Terms** or **Oracle Privacy Policy** to view the associated information.
These topics describe how to interact with Oracle Social Network on Android devices:

- "Using Oracle Social Network on Your Android Device"

Using Oracle Social Network on Your Android Device

How do I start a Conversation?

1. Tap  in the action bar to open the slide-out navigation, then tap Conversations.
2. Tap  in the action bar to display the actions menu, then tap New Conversation.
3. Enter a name for the new Conversation, then tap OK.

The new Conversation appears in the list of Conversations. You can start posting messages and adding documents.

How do I edit Conversation settings?

1. Open the Conversation you want to configure.
2. Tap  in the action bar to display the actions menu, then tap Conversation Settings.
   - To change the name of the Conversation, tap Name, edit the name, then tap OK.
   - To make the Conversation public, select Publicly Available.
   - To hide membership messages for the Conversation, deselect Hide Membership.

How do I add or remove members from a Conversation?

To add members:
1. Open the Conversation.
2. Open the Add Members dialog using one of the following methods:
   - In the Conversation membership bar, tap .
In the action bar, tap 💾 to display the view menu, then tap Members. In the action bar, tap 📚.

3. Select a view from the Add Members menu:
   - **Recommendations**—View a list of recommended members. Oracle Social Network generates the recommendations list based on actions that might affect who you add to a Conversation—the person is one of your contacts, similar Conversations the person is a member of, and other common actions.
   - **Contacts**—View a list of your contacts.
   - **Groups**—View a list of your groups.
   - **Selected**—View the people and groups you’ve selected to add as members.

4. From the list, select the people or groups you want to add to the Conversation. Alternatively, search for a person or group to add.
   
   **Note:** People outside your company have a special avatar ( создания ) and their names are in purple text. If you add an outside user to a Conversation, a banner stating “Visible to outside users.” appears at the top of the Conversation and any associated message dialogs. Be careful not to post any sensitive information to Conversations that include outside users.

**In-Line Recommendations**
You can also add members to a Conversation by accepting the recommendations that are sometimes shown in the list of messages (under Add to this Conversation). Oracle Social Network recommends people to add to a Conversation based on people you frequently add to Conversations and actions you have in common with others (such as being members of the same Conversations).

Each recommendation includes the person’s name and the reason they were recommended. You can perform the following actions:
   - Tap the person’s name to view their profile.
   - Tap Add to accept the recommendation and add the person to the Conversation.
   - Tap Ignore to decline the recommendation.
     
     **Note:** When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.
   - Tap the arrows on either side of the current recommendation or swipe the current recommendation to see the previous or next recommendation.

When you accept or ignore a recommendation, the next recommendation appears.

**Note:** The recommendations appear near where you entered the Conversation. If you scroll up or down, the Add to this Conversation section might move out of view. Just scroll up or down to find it.

**To remove members:**
1. Open the Conversation.
2. In the Conversation membership bar, tap the picture of the person you want to remove, then tap Remove from Conversation.

Alternatively, you can remove one or more people from the Members view.
1. Open the Conversation.
2. Tap 📚 in the action bar to display the view menu, then tap Members.
3. Remove members using one of the following methods:
   - To remove a particular member, tap next to the member, then tap Remove Member.
   - To remove more than one member, long press a member to bring up the selection dialog, select the people or groups you want to remove, then tap .

**How do I open a One-on-One Conversation?**

**Note:** The colored circle around the person’s picture shows whether the person is available. For more information, see How can I tell if a person is online?

To open a one-on-one Conversation, use one of the following methods:

- When viewing a Conversation, tap the person’s picture in the Conversation membership bar, then tap Open One-on-One.
- When viewing lists of people on the People page, tap next to the person, then tap Open One-on-One.
- Anywhere else you see a person’s name or picture, tap it to open their profile. At the top of their profile, tap Open One-on-One.

**How do I mute or unmute a Conversation?**

**To mute a Conversation:**

1. Tap in the action bar to open the slide-out navigation, then tap Conversations.
2. Long press the Conversation you want to mute, then tap Mute.

Alternatively, from within the Conversation, Tap in the action bar to display the actions menu, then tap Mute.

The muted Conversation now appears under the Muted filter.

**To unmute a Conversation:**

1. Tap in the action bar to open the slide-out navigation, then tap Conversations.
2. Tap in the action bar to display the view menu, then tap Muted.
3. Long press the Conversation you want to unmute, then tap Unmute.

**How do I create, reply to, edit, or delete a message?**

**Note:** If the Conversation is visible to people outside your company, you see a banner stating “Visible to outside users.” at the top of the Conversation and any associated message dialogs. Be careful not to post any sensitive information to Conversations that include outside users.

**To create a message:**

1. Open the Conversation.
2. Tap in the action bar to open the New Message dialog.
   - To post a message, enter your message text.
   - To post a photo from your gallery, tap in the action bar, then select the photos you want to add.
To post a video from your gallery, tap 🎥 in the action bar, then select the videos you want to add.

To post a file, tap 📄 in the action bar, tap a document source, then follow the steps to select a file.

To post a link to another Oracle Social Network item, tap ⏯️ in the action bar to open the Insert Reference dialog, then select an item.

**Tips:**
- Alternatively, to quickly post a photo from your gallery, in the Conversation or wall, tap 📷, and select the photos you want to add. After selecting your photos, you can optionally add a message before you post them.
- When you add photos, rotate and crop tools become available for adjusting the file’s size and orientation. Tap an image, then tap Edit.
- When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?

**To reply to a message:**
Tap 📩 under the message.

**Note:** If you don’t see 📩 under a personal wall post shown on the Overview page or on a person’s wall, the person doesn’t allow other people to reply to his or her wall posts.

**To edit a message:**
Tap 📬 under the message, then tap 🆘 Edit Message.

**Notes:**
- You can edit only your own messages.
- Any special markup on a message is lost when you edit the message.

**To delete a message:**
You can delete messages you posted or messages on your profile wall.

**Note:** If you are a service administrator, you can delete any message.
Tap 🗑️ under the message, then tap 🗑️ Delete.

**How do I post a link to an Oracle Social Network item?**
1. Open the Conversation.
2. Tap ⏯️ in the action bar to open the New Message dialog.
3. Tap ⏯️ in the action bar to open the Insert Reference dialog.
4. Tap the collection or object you want to reference, then tap OK.

**How do I add a referring item to a Conversation?**
This action creates a relationship between the Conversation and the item you select, making it easy to navigate between the two. You can add an existing item or add a new one.
1. Open the Conversation.
2. Tap in the action bar to display the view menu, then tap Referring.

3. Tap to open the Add Related dialog.
   Tip: Tap to choose between Recent, Favorites, or Search to find the collection or Social Object.

4. Tap the collection or Social Object to add.
   Alternatively, you can create a new collection. Tap in the action bar, enter a new name for the collection, then tap OK.

How do I mark messages as read?

1. Open the Conversation, wall, or Social Object.
2. Use one of the following methods to mark messages as read:
   - To mark a single message as read, tap the message, or tap under the message, then tap Mark Read. The blue unread indicator disappears.
   - To mark all messages as read, tap the unread message count in the tile bar; tap in the action bar to display the actions menu, then tap Mark All Read; or, if you have the navigation for unread messages turned on, you can tap the unread message count to mark all read.

Notes:
   - Document annotation messages are marked as read when you view the annotation in the document.
   - To mark a message as unread, tap under the message, then tap Mark Unread. The blue unread indicator reappears.

Are there any features that are not supported on my Android device?

Oracle Social Network Apps are not available on Android devices.

How do I join or leave a web conference?

1. Tap in the action bar to open the slide-out navigation, then tap Conferences.
   Tip: The number next to Conferences shows the number of ongoing conferences you can join.

2. Tap Join next to the conference you want to join.
   Tip: To view conference details, tap the conference.
   To leave the conference, close your conferencing application.

How do I view collections?

1. Tap in the action bar to open the slide-out navigation, then tap Collections.
2. Tap in the action bar to display the view menu, then tap:
   - Yours to show the collections you created.
   - Favorites to show the collections you have marked as favorite.
   - Available to show all the collections available to you.
Using Oracle Social Network on Your Android Device

- **Muted** to show the collections that you have muted.
- **Closed** to show the collections that have been closed.

**How do I add a Conversation to a collection?**

1. Tap 📊 in the action bar to open the slide-out navigation, then tap Collections.
2. Open the collection to which you want to add a Conversation.
3. Tap 👈 in the action bar to display the view menu, then tap Related.
4. Tap 📊 to open the Add Related dialog.
   
   **Tip:** Tap 📊 to choose between Recent, Favorites, or Search to find the collection or Social Object.
5. Tap the Conversation or wall to add it to the collection.

**How do I add a related item to a Social Object?**

You can add an existing item or create a new one.

1. Open the Social Object.
2. Tap 👈 in the action bar to display the view menu, then tap Related.
3. Tap 📊 to open the Add Related dialog.
   
   **Tip:** Tap 📊 to choose between Recent, Favorites, or Search to find the collection or Social Object.
4. Select an existing item or create a new one:
   - To select an existing item, tap the item you want to relate to the open Social Object.
   - To add a new Conversation, tap 📩 in the action bar, enter a new name for the Conversation, then tap OK.
   - To add a new collection, tap 📊 in the action bar, enter a new name for the collection, then tap OK.

**How do I upload or download documents?**

**To add a picture, video, or document from Oracle Social Network:**
You can upload a picture, video, or document from Oracle Social Network by creating a new message in the Conversation or wall you want to add the item to. See How do I create, reply to, edit, or delete a message?

**To upload a document from another application:**

1. Open the document in the application you want to upload from.
2. On the application's sharing menu, tap Oracle Social Network.
3. Optionally, rename the file and add a description.
4. Tap Conversation Select Destination to choose the Conversation, Social Object, or wall to post the document to. The default location is your wall.

**Notes:**
- If the Conversation you select is visible to people outside your company, you see a banner stating “Visible to outside users.” at the top of the dialog. Be careful not to post any sensitive information to Conversations that include outside users.

- If you can’t upload a document to someone’s wall, you either aren’t following the person or the person doesn’t allow other people to post to his or her wall.

5. Tap Upload.

To download a document use one of the following methods:
- While viewing a list of documents, tap under the document you want to download.
- While viewing a message with a document, tap under the message, then tap Download.
- While viewing the document, tap in the action bar to display the actions menu, then tap Download.

Tip: You can see the documents you’ve downloaded by tapping in the action bar to open the slide-out navigation, then tapping Downloads.

How do I share a document with an application?

1. Open the Share dialog in one of the following ways:
   - While viewing a list of documents, tap under the document.
   - While viewing a message with a document, tap under the message, then tap Share.
   - While viewing the document, tap in the action bar to display the actions menu, then tap Share.

   A list of applications appears.

2. Tap the application you want to copy the document to.

3. Tap Always if the application is the one you will always use; tap Just Once, to choose an application each time you share a document.

Alternately, you can share the document while viewing it:

1. Open the document.

2. Tap in the action bar to display the actions menu, then tap Share.

How do I view a document?

To view a document use one of the following methods:

- While viewing a list of documents or a message about a document, tap the document image or name.

- If the document is from a cloud document store, you can open the document in the cloud document store’s viewer. While viewing a list of documents, tap under the document, then tap Open.

How do I view an earlier version of a document?

While viewing a list of documents, tap under the document, then tap Versions.
Alternately, you can view the versions while viewing the document:

1. Open the document for which you want to the versions.
2. Tap in the action bar to display the actions menu, then tap Versions.

How do I annotate a document?

**Note:** If the document is visible to people outside your company, you see a banner stating “Visible to outside users.” at the top of the document preview and any associated annotation dialogs. Be careful not to post any sensitive information to Conversations that include outside users.

1. Open the document you want to annotate.
2. Tap , then tap the type of annotation you want to use:
   - Tap None to exit an annotation tool without selecting another.
   - Tap Pushpin, and tap the place you want the annotation to appear.
   - Tap Pen, and write or draw over an area of any size.
   - Tap Highlighter, and highlight one line.
   - Tap Rectangle, and draw a rectangle over an area of any size.
   - Tap Ellipse, and draw a circle around an area of any size.
3. Add a comment to the annotation, then tap OK.

**Tip:** When you type a hashtag (#) and at least one letter, you see suggestions of hashtags that other people have used. For more information on hashtags, see What are hashtags (#) and how do I use them?

4. Tap Publish <number> Annotation (the <number> is the number of annotations that need to be published) so everyone can see them.

**Note:** If you don’t see at the top of a document on a person’s wall, the person does not allow other people to post annotations to his or her personal documents.

To show or hide annotations:

1. Open the annotated document.
2. Tap to display the annotation filters.
3. Select the annotations you want to see:
   - All Annotations—Show all annotations
   - No Annotations—Show no annotations (hide annotations)
   - Unpublished Annotations—Show annotations that have not been published
   - <Name>—Show annotations from the specified person

**Note:** To view an annotation from a list view, click under the annotation message.

How do I delete a document?

You can delete documents you posted or documents on your profile wall.

**Notes:**

- If you are a service administrator, you can delete any document.
- If a document has multiple versions, delete removes only the selected version.
Deleting a document or document version deletes it for all members of the Conversation or wall.

There's no undelete, so be sure about deleting the file before you act.

If you don't see the Delete option when working with a document on someone's wall, the person doesn't allow other people to post to (or change) his or her wall.

While viewing a list of documents, tap under the document, then tap Delete. Alternately, you can delete the document while viewing it:

1. Open the document.
2. Tap in the action bar to display the actions menu, then tap Delete.

How do I see who has viewed a document?

While viewing a list of documents, tap under the document, then tap Access History. Alternately, you can view the access history while viewing the document:

1. Open the document.
2. Tap in the action bar to display the actions menu, then tap Access History.

How do I join or leave a file co-browsing session?

1. Open the file you want to co-browse.
2. Above the file, tap to display the people looking at the file.
3. Tap the person whose movement you want to follow.

To stop following the other person's movement through a file, tap , then tap the person you are browsing with.

How do I create or remove a folder?

To create a folder:
1. Tap in the action bar to open the slide-out navigation, then tap Conversations.
2. Open the Conversation where you want to create a new folder.
3. Tap in the action bar to display the view menu, then tap Documents.
4. Tap in the action bar to display the actions menu, then tap New Folder.
   Note: If you don’t see the New Folder option when working on someone's wall, the person doesn't allow other people to post to (or change) his or her wall.
5. Enter a name for the new folder, and tap OK.

To remove a folder:
You can delete folders you created (so long as it doesn’t include anyone else's documents or folders) or folders on your profile wall.

Notes:

- If you are a service administrator, you can delete any folder.
■ If you don’t see the **Remove Folder** option when working with a folder on someone’s wall, the person doesn’t allow other people to post to (or change) his or her wall.

To remove a folder, long press it and tap **Remove Folder**.

**How do I move files?**

You can’t move existing Oracle Social Network documents from one location to another. Instead, you can add the document to the new location (see How do I upload or download documents?), and delete the document from the original location (see How do I delete a document?).

**How do I view and edit my profile and picture?**

1. Tap  in the action bar to open the slide-out navigation, then tap your name.
2. Tap  in the action bar to display the view menu, then tap **Profile**.
3. Tap  in the action bar to display the actions menu, then tap **Edit Profile**.
4. Modify any field or enter new data.
5. To update your profile picture, tap **Change**, tap **Take a Photo** or **Choose a Photo**, then follow the steps for updating your profile picture.
6. Tap **Update**.

**How do I view or post to another person’s wall?**

1. Open the person’s wall using one of the following methods:
   - While viewing a Conversation, in the Conversation membership bar, tap the picture of the person whose wall you want to view, then tap **View wall**.
   - Tap  in the action bar to open the slide-out navigation, then tap **People**. Tap the person to open his or her profile. Tap  in the action bar to display the view menu, then tap **Wall**.
      
      To add someone new to your contacts list, see How do I add or remove Oracle Social Network contacts?

   2. Tap  in the action bar to open the New Message dialog. For more information, see How do I create, reply to, edit, or delete a message?
      
      **Note:** If you don’t see  in the action bar, you aren’t following the person or the person doesn’t allow other people to post to his or her wall.

      **Note:** Outside users (people outside your company) have profiles, but they don’t have walls. Outside users’ names appear in purple text, and they have icons ( ) after their names. If you want to post something to an outside user, you can do so through a one-on-one conversation. For more information, see How do I open a One-on-One Conversation?

**How do I post a status update to my wall?**

1. Tap  in the action bar to open the slide-out navigation, then tap  next to your name.
2. Enter your status as you would any other message. For more information, see How do I create, reply to, edit, or delete a message?
How can I tell if a person is online?

The colored circle around a person’s picture signifies the person’s presence status:

-  - A full green circle around the person’s picture shows that the person is available (logged in to and currently interacting with Oracle Social Network).
-  - A three-quarter yellow circle around the person’s picture shows that the person is idle (logged in to but not currently interacting with Oracle Social Network).
-  - A half gray circle around the person’s picture shows that the person is offline (not logged in to Oracle Social Network).

How do I view my contacts?

Tap † in the action bar to open the slide-out navigation, then tap People.

To add someone new to your contacts list, see How do I add or remove Oracle Social Network contacts?

How do I follow or stop following someone?

To follow someone:

Anywhere in Oracle Social Network you see a person's picture or name, tap it to get to their profile. On their profile page tap +Follow.

You can also follow someone directly from the list of recommendations or followers on the People page:

1. Tap † in the action bar to open the slide-out navigation, then tap People.
2. Select people to follow using one of the following methods:

   - To view a list of recommendations, tap † in the action bar to display the view menu, then tap Recommendations.

   Oracle Social Network generates the Recommendations list based on actions you have in common with others—documents you’ve both read, Conversations you’re both members of, and other commonly taken actions.

   Each recommendation includes the person’s name, the reason they were recommended, a Follow button, and an Ignore button.

   Note: When you ignore a recommendation, the person might be recommended again in the future based on additional activity by you or the other person.

   - To view a list of people who follow you, tap † in the action bar to display the view menu, then tap Followers.

     Tap † next to the person, then tap ᐈ + Follow.

     Note: You can’t follow outside users (people outside your company), but you can add them to your contacts. Outside users’ names appear in purple text, and they have icons ( ) after their names. For more information, see How do I add or remove Oracle Social Network contacts?

To view the people you are following and stop following someone:

1. Tap † in the action bar to open the slide-out navigation, tap People.
2. Tap † in the action bar to display the view menu, then tap Following.
3. Tap 😳 next to the person, then tap 🗑️ Stop Following.

How do I add or remove Oracle Social Network contacts?

1. Tap ⬅️ in the action bar to open the slide-out navigation, then tap ⚡️ People.
2. Tap ⬅️ in the action bar to open the Add Contacts dialog.
3. In the Search box, enter the name, part of the name, or the email address of the person you want to add.
4. In the results list, select the person you want to add.
5. Tap Add.

You can also add contacts directly from the list of followers on the People page:
1. Tap ⬅️ in the action bar to open the slide-out navigation, then tap ⚡️ People.
2. Tap ⬅️ in the action bar to display the view menu, then tap Followers.
3. Tap 😳 next to the person, then tap Add to Contacts.

To remove a contact:
1. Tap ⬅️ in the action bar to open the slide-out navigation, then tap ⚡️ People.
2. Tap ⬅️ in the action bar to display the view menu, then tap Following.
3. Tap 😳 next to the person, then tap Remove Contact.

How do I save an Oracle Social Network contact to my Android device contacts list?

1. Tap ⬅️ in the action bar to open the slide-out navigation, then tap ⚡️ People.
2. Tap a name to open that person's profile.
3. Tap Add to Phone Contacts at the bottom of the screen.
   The person’s contact information and picture are added to the contacts on your phone.

How do I create a group?

1. Tap ⬅️ in the action bar to open the slide-out navigation, then tap ⚡️ Groups.
2. Tap 📺.
3. In the Name field, enter the name of the new group.
4. In the Description field, enter a description of the group.
5. Tap Change to add a photo.
6. Tap Create.
   The new group opens. To add members to the group, see How do I add or remove members from a group?

How do I add or remove members from a group?

To add members:
1. Tap ⬅️ in the action bar to open the slide-out navigation, then tap ⚡️ Groups.
2. Optionally, tap ⬅️ and change the sorting from Name to Total Members.
3. Tap the group to which you want to add members.

4. Open the Add Members dialog using one of the following methods:
   - In the Group membership bar, tap ⬤.
   - In the action bar, tap ⬤ to display the view menu, then tap Members. In the action bar, tap ⬤.

5. Select a view from the Add Members menu:
   - Contacts—View a list of your contacts.
   - Groups—View a list of your groups.
   - Selected—View the people and groups you've selected to add as members.

6. From the list of contacts, select the people or groups you want to add to the group.
   Alternatively, search for a person or group to add.
   Note: You can’t add outside users (people outside your company) to a group.
   Outside users’ names appear in purple text, and they have icons (owntown) after their names.

7. In the action bar, tap Add.

   To remove members:
   1. Open the group.
   2. Tap ⬤ in the action bar to display the view menu, then tap Members.
   3. Remove members using one of the following methods:
      - To remove a particular member, tap ⬤ next to the member, then tap Remove Member.
      - To remove more than one member, long press a member to bring up the selection dialog, select the people or groups you want to remove, then tap ⬤.

How do I edit a group profile?

1. Tap ⬤ in the action bar to open the slide-out navigation, then tap ⬤ Groups.
2. Tap the group you want to edit.
3. Tap ⬤ in the action bar to display the actions menu, then tap Group Settings.
4. Modify the current data, then tap Update.

How do I assign or clear flags?

To assign a flag:

1. Open the Conversation.
2. Next to the message you want to flag, tap ⬤.
3. In the Manage Flags dialog, perform one of the following actions:
   - To assign a flag to a particular person, tap ⬤ next to the person you want to flag, then select the type of flag to assign.
   - To assign flags to everyone (other than yourself), tap ⬤ in the action bar to display the actions menu, tap Flag Everyone Else, then select the type of flag to assign.
You can select from the following types of flags:

■  Not Flagged
■  For Your Information
■  Please Reply
■  Please Reply - Urgent

To clear a flag assigned to you:
1. Tap the flag you want to clear.
2. In the Manage Flags dialog, tap Clear next to your flag.
Tip: To view all flags assigned to you, tap in the action bar to open the slide-out navigation, then tap Flags.

To clear a flag assigned by you:
1. Tap in the action bar to open the slide-out navigation, then tap Flags.
2. In the action bar, tap , then select Flags You Assigned.
3. Tap the flag you want to clear.
4. In the Manage Flags dialog, perform one of the following actions:
   ■ To clear a particular flag, tap to the far right of the flag.
   ■ To clear all flags, tap in the action bar to display the actions menu, then tap Clear Flags.
Alternatively, you can open the Manage Flags dialog by tapping a flag while viewing messages in the Conversation.

How do I "like" a message?
Next to the message, tap .

How do I mark an object as a favorite?
1. Navigate to the object you want to mark as a favorite.
2. Next to the object, tap .

How do I view my favorites?
Tap in the action bar to open the slide-out navigation, then tap Favorites.
You can also view your favorites from the Collections, Conversations, or Social Objects pages by tapping in the action bar to display the view menu, then tapping Favorites.

How do I search Oracle Social Network?
To search all of Oracle Social Network:
1. Tap in the action bar to open the slide-out navigation, then tap Search.
2. Enter your search term, then tap .
3. Optionally, select an item type from the Search menu to show a particular result type (for example, Conversations or documents).
4. Optionally, tap ▼ to select how to sort your results. There are different sort options depending on what type of results you’ve selected.

5. After filtering by a result type, there are additional filter options. To view filter options, tap ▼.
   - **Posted By:** Limit your search to messages or documents posted by a particular person.
   - **Posted When:** Limit your search to messages or documents posted within a particular period.
   - **Document Type:** If you filter your results to show documents, you can select which types of documents to show.
   - **Created By:** Limit your search to Conversations, collections, groups, or Social Objects created by a particular user.
   - **Creation Time:** Limit your search to Conversations, collections, groups, or Social Objects created within a particular period.
   - **Favorites Only:** Limit your search to only your favorite Conversations, collections, or Social Objects.
   - **Include Deactivated:** Control whether to show deactivated groups in your results.
   - **With Member:** Limit your search to groups with a particular member.

6. Tap a result to open the item.
   - Tap a Conversation to open the Conversation.
   - Tap a person's name to open the person's wall.
     
     **Note:** Outside users (people outside your company) don't have walls. If you tap an outside user, the outside user's profile opens. Outside users' names appear in purple text, and they have icons ( ) after their names.
   - Tap a group's name to open the group's wall.
   - Tap a hashtag to open a page with all messages that include that hashtag.

You can mark an object in the list of search results as a favorite by tapping ★ next to the result. For more information, see How do I view my favorites?

**To search in a Conversation:**

Use the controls at the bottom of the screen to search and navigate through the results in a Conversation. By default, you see the unread messages controls, but you can switch to the other options to find flags assigned to you or text in messages and documents.

- Tap ▼ to navigate through the unread messages in the Conversation.
- Tap ▼ to navigate through any flags assigned to you in the Conversation.
- Tap ▼ to search for text in the messages or documents. After tapping ▼, enter your search term, then tap ▼.
  
  Your search term is highlighted in the Conversation.

To clear your search, tap ▼.

The number of unread messages, flags, or messages that include your text is shown next to the navigation arrows. To step through the items, use the up and down arrows.
What are hashtags (#) and how do I use them?

You can use a hashtag (#) in a message to call out a meaningful term or topic, making it easy to search for all content associated with that term or topic. For example, imagine *discounts* is a popular topic in your group, but the discounts can come in the form of dealer incentives, cash-back deals, seasonal discounts, or any other number of forms. How do you find what everyone is saying about all those things? You use a hashtag. Every time you or your colleagues say something about some form of discount, you include the hashtag #discounts. You can then search for #discounts and get a list of all messages in otherwise unrelated Conversations and walls that contain the hashtagged term.

Adding Hashtags

You can add one or more hashtags to any message (comments, replies, annotations, and document messages) simply by typing "#" before a term. When you start typing a hashtag by typing "#" plus at least one letter, existing hashtags (ones that have been used before) appear for you to select from.

Tips:

- You can include the following characters in a hashtag: A through Z, a through z, 0 through 9 and _.
- A hashtag can be a maximum of 25 characters (not including the ":#").

Searching for and Viewing Hashtags

When you perform a search, available hashtags are included in the results. If your search term starts with a hashtag (#), one of two things will happen. If the hashtag exists, the hashtag page opens. If the hashtag doesn't exist, you see search results that contain any tags similar to the hashtag you searched for.

Wherever you see them, hashtagged terms are tappable and will open a hashtag page where all messages that include that hashtag are shown. So tapping #discounts in any Conversation opens a #discounts page which shows any message (in a Conversation, document annotation, wall, or such) that you have access to that includes the discounts hashtag.

On the hashtag page, you can filter the messages to show all messages that include the hashtag (All Results) or just those messages posted by people you are following (By People You Follow).

To mark a message as a favorite, next to the message, tap ✰. For more information, see How do I view my favorites?

Following Hashtags

You can also follow hashtags. When you follow a hashtag, messages in public Conversations and walls that contain that hashtag appear on the Overview page, even if you are not a member of those Conversations or walls.

To follow a hashtag, tap the hashtag to open the hashtag page, then tap at the top of the page. To stop following the hashtag, tap 🗑.

How do I set up notifications?

1. Tap ☰ in the action bar to open the slide-out navigation, then tap ☰ Settings.
2. Tap Notifications.
   - To turn notifications on or off, tap the On/Off toggle in the action bar.
Under **Alerts** select **Vibrate** to make your device vibrate when there is a new notification.

Select **Device LED** to make your device LED flash when there is a new notification.

Under **Quiet Hours** select **Enable**, and set a **Start Time** and **End Time** to prevent notifications from alerting you during that period.

3. Under **Accounts** tap an account to set up notifications for that account.

   **Note:** Fewer options are available when you configure an account you’re not logged in to.

**General Notifications**

- Select **Posts** to be notified when someone posts a message to the Conversations and walls you’re a member of.
- Select **Your Wall** to be notified when someone posts a message to your wall.
- Select **One-on-One** to be notified when someone starts a One-on-One with you.
- Select **Conferences** to be notified when a conference you are invited to starts.
- Select **Conversation Membership** to be notified when you are added as a member to a Conversation or wall.

**Flags Assigned To You**

- Select **FYI** to be notified when someone assigns a For Your Information flag to you.
- Select **Please Reply** to be notified when someone assigns a Please Reply flag to you.
- **You are always notified when someone assigns an Urgent flag to you.**

**Flags Cleared**

- Select **FYI** to be notified when a For Your Information flag you assigned is cleared.
- Select **Please Reply** to be notified when a Please Reply flag you assigned is cleared.
- Select **Urgent** to be notified when a Please Reply - Urgent flag you assigned is cleared.

**How do I change notification settings for a selected Conversation or wall?**

1. Open the Conversation you want to configure.
2. Tap ☰ in the action bar to display the actions menu, then tap **Conversation Settings**.

**General**

- Tap **Name** to change the Conversation’s name.
- Select **Publicly Available** to make the Conversation available for anyone to join.

  **Deselect Publicly Available** to make the Conversation available only to members. Anyone who already joined the Conversation is automatically made a member.
- Select **Hide Membership** to hide all membership messages from the Conversation.
  Deselect **Hide Membership** to show all past and present membership messages in the Conversation.

**Notifications**
Tap the value under Notifications to open a selection list:
- Tap **Default** to use the current account’s notification settings.
- Tap **Enabled** to always send notifications for this Conversation, regardless of what is selected for the current account.
- Tap **Disabled** to disable notifications for this Conversation, regardless of what is selected for the current account.

**How do I configure the appearance of Oracle Social Network?**
1. Tap 📊 in the action bar to open the slide-out navigation, and tap ⚙️ **Settings**.
2. Under **Appearance**:
   - Tap **Text Size** to adjust the size of the text.
   - Select **Unread Messages** to show next message and previous message navigation for unread messages.
   - Select **Conversation Members** to show the Conversation membership bar when viewing Conversations.
3. Under **About**:
   - Tap **User Tips** to show user tips when you first visit a new area.
   - Tap **Oracle Social Network** to read about Oracle Social Network, and view its legal notices and privacy policy.

**How do I control who can post to my wall?**
Use Security preferences to control whether other people can post or reply to messages and documents on your wall:
1. Tap 📊 in the action bar to open the slide-out navigation, then tap ⚙️ **Settings**.
2. Under **Wall Posts**:
   - Tap **Who can post top-level messages...** to specify whether other people (your followers) can post messages on your wall.
   - Tap **Who can reply to messages...** to specify whether other people (your followers) can reply to messages or annotate documents on your wall.

**How do I set Oracle Social Network to automatically log me out?**
1. Tap 📊 in the action bar to open the slide-out navigation, and tap ⚙️ **Settings**.
2. Under **Background Data**:
   a. Tap **Automatic Logout** to set a time after which you are automatically logged out.
   b. Select the amount of time your session should be inactive before you are automatically logged out.
How do I add, edit, or remove an account?

**To add an account:**
Once you have installed Oracle Social Network on your mobile device:

1. Tap in the action bar to open the slide-out navigation, then tap 
   
2. To add a new account, tap .
3. In the Add Account pop-up, enter the path to the server that is hosting your Oracle Social Network instance, then tap Save.
   For example, enter:
   acme.social.us1.oraclecloud.com/client
4. In the Account Name field, enter a name for the new account.
   The default account name is the server URL.
5. If necessary, enter the Identity Domain.
6. In the User Name field, enter your Oracle Social Network user name.
7. In the Password field, enter your Oracle Social Network password.
8. To save your password for future connections, select Save Password.
9. Tap Connect in the action bar.

**To edit an account:**

1. Tap in the action bar to open the slide-out navigation, then tap .
2. Select the account you want to edit, then tap in the action bar.
3. Change the account information.
4. To save your changes, tap Connect.

**To remove an account:**

1. Tap in the action bar to open the slide-out navigation, then tap .
2. Select the account you want to delete, then tap .
3. Confirm that you want to delete the account.

How do I switch from one account to another?

1. Tap in the action bar to open the slide-out navigation, then tap .
2. Tap the account you want to switch to.

How do I change an Oracle Social Network password?

If your company's password policy lets you change your password, you can do this in the web version of Oracle Social Network. You can't change your password on a mobile device.

How do I bring up help?

Tap in the action bar to open the slide-out navigation, then tap Help.

Note: Help appears only when you are logged in.
How do I access support for Oracle Social Network?

Tap 📚 in the action bar to open the slide-out navigation, then tap ⬇️ Support.

The Support dialog shows the following information:

- **OSN Version** - The version number of the Oracle Social Network application running on the server to which you are connected.

- **Android Client Version** - The version number of the Oracle Social Network application you have installed on your Android device.

Note: ⬇️ Support appears only when you are logged in and connected to an Oracle Social Network server that supports the Support menu.

How do I get my log files?

If you need to send your log files and device information to someone for support purposes or other reasons, you can send the information from your device.

1. Tap 📚 in the action bar to open the slide-out navigation, and tap ⬇️ Settings.

2. Under About, tap Oracle Social Network.

3. Tap Email Device Information.

4. Optionally, add a description or information about why you’re sending the logs.

5. Tap Email.

6. Select the method you want to use to send the logs:

   - **Email**—If necessary, set up your email account. Enter the email address to send the logs to.

   - **Messaging**—Enter the number you want to send the logs to. Enter a message, then send the text.

   - **Oracle Social Network**—Tap Select Destination. Select a Conversation to post the logs to. Optionally, add a description. Tap Upload.
The Oracle Social Network Administration page is the primary tool for administrators of Oracle Social Network to manage the application.

**Topics:**
- "Getting Started with Administration"
- "Managing General Properties"
- "Managing Users"
- "Managing User Collaboration"
- "Managing Apps"
- "Managing Features"
- "Managing Webhooks"
- "Managing Social Definitions"

**Getting Started with Administration**

**Accessing the Administration Features in Oracle Social Network**

In the web client, administrators can manage the Oracle Social Network instance by selecting **Administration** in the user menu drop-down list.
Getting Started with Administration

Notes:

■ The Administration selection is displayed only if you are logged in as a user with administrator privileges.

■ You access the Administration section in the same way on both the production instance and the stage/test (staging) instance of Oracle Social Network. In nearly all cases, the administration tasks that you perform are done on the production instance. The primary task you do on the staging instance is to manage the Oracle Social Network developer website. For more information about the staging instance, see Terms and Concepts. For more information about managing the developer website, see Editing General Properties and Editing User Properties.

Terms and Concepts

Important terms and concepts that you might need to understand when working with the Administration page include:

■ App. Apps are web-based applications that can be deployed in Oracle Social Network. Apps are currently not applicable on other clients such as iOS or the Outlook plug-in. There are two kinds of apps: Conversation apps and Social Object apps. Conversation apps are standalone applications that you can add to a Conversation. Examples include a poll, map, or a photo viewer. Social Object apps are designed for creating a new Social Object type such as Customer, Opportunity, and so on. Social Object apps incorporate information from a third-party system to make the information viewable in a Conversation. For more information, see Managing Apps.

■ Blacklist. In the Extended Collaboration page, you can create a blacklist of external email domains from which outside users are excluded from joining Oracle Social Network. If the Invite Outside Users with Any Email Domain check box is selected, you do not need to specify any domains in the whitelist to invite external users. If a user is invited from a domain in the blacklist, the invitation fails. For more information, see Inviting/Creating a User from the Administration Page.

■ Cloud document service. You can let users copy files to and from a cloud-based document store in Oracle Social Network. Oracle Social Network integrates with several cloud storage services by default. For more information, see Managing Cloud Document Services.

■ Conferencing service. A conferencing service lets users run on-demand meetings across many locations. Oracle Social Network includes Cisco Web Meetings.
(WebEx) integration by default. Users can start conferences from within the client user interface; for example, while viewing a Conversation you can click Start Conference, and all users in that Conversation can see and join the meeting. For more information, see Managing Conferencing Services.

- **Developer privilege.** Users with the Developer privilege can use the Oracle Social Network developer website to do specialized development tasks. Administrators can set this privilege from the staging instance user properties page. Use this setting only on the staging instance of Oracle Social Network. For more information, see Editing User Properties.

- **Feature.** Features are JavaScript libraries that provide apps with specific functionality, such as communicating with the Oracle Social Network server, adding interactive behavior, or manipulating data. Oracle Social Network includes several features. Under normal circumstances you do not need to change features that are included with Oracle Social Network, but you might want to add features when adding apps into the environment. For more information, see Managing Features.

- **Recommendations.** Oracle Social Network automatically provides social recommendations to connect people to the resources they need, to help drive projects and organizations to success. For Social Definitions, you configure settings for the system to use in creating recommendations. For more information, see Managing Social Definitions.

- **Service administrator.** Oracle Social Network administrators are typically service administrators; they do the normal day-to-day administrative tasks for the Oracle Social Network application. Typically the word service is dropped when referring to service administrators. For more information, see User Types.

- **Site administrator.** Site administrators are Oracle personnel. Site administrators can do comprehensive administrative tasks for the Oracle Social Network server. For more information, see User Types.

- **Social Object.** From a conceptual or user perspective, Social Objects are records within a business application or business process—generically referred to as Systems of Record—that are mapped into Oracle Social Network. For example, accounts in a CRM system can be mapped into Oracle Social Network as opportunities and customers.

  From an implementation perspective, a Social Object is a special type of Conversation that includes a Social Object app. A Social Object app incorporates information from a third-party system to make the information viewable in a Conversation. A Social Object Definition (also called a Social Definition) is a "model" of a Social Object; after you create a Social Definition and publish it on your system, users can create Social Object instances based on the definition.

  For more information, see Managing Social Definitions.

- **Staging instance.** A staging instance (sometimes called the Stage/Test instance) is a non-production environment that lets developers test apps, Social Definitions, Social Plugins, and other implementations in an isolated system; after testing is complete, the changes can be deployed in the production instance. When Oracle Social Network is initially configured, you receive a URL for a staging instance as well as the production instance.

- **System of Record (SoR).** A system of record is a business application or object that is the source of a Social Object, such as a customer or an opportunity. For example, a system of record might be your CRM system. For more information, see Managing Social Definitions.
Managing General Properties

Editing General Properties

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click General. The General page is displayed by default when you enter the Administration section of the user interface.

3. Edit the general properties of Oracle Social Network. For more information about the properties, see General Properties Page.

4. Click Save.

General Properties Page

The following table describes the general properties.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Branding</td>
<td>To give your Oracle Social Network web client interface a customized look, you can customize your branding text and logo; they appear in the user interface and in new user invitation emails. Oracle recommends that you always provide a branding logo, and optionally branding text; if your logo already incorporates text, you don’t need to add branding text separately. Experiment with the sizes and content of your branding information to find the best appearance for your needs. Test your new user invitation email to make sure the logo and text appear as you expect them to.</td>
</tr>
<tr>
<td>Corporate Branding Text</td>
<td>Specify text that you want to appear to the right of the logo in the banner, and in new user invitation emails. By default, the text SOCIAL NETWORK displays. Type your branding text into the field to replace the default. If you put one or more space characters in the field, no corporate branding text displays.</td>
</tr>
<tr>
<td>Corporate Logo</td>
<td>This logo appears in the top banner on the left side of the page. The current image is displayed. To change it, click Change and follow the instructions to upload a different image. The maximum dimensions of the image are 22 pixels in height and 160 pixels in width. The image is scaled to fit, keeping the aspect ratio the same.</td>
</tr>
<tr>
<td>Primary Color</td>
<td>The primary color selection affects the color of the some areas in the user interface. To change it, click the Custom option and type the hex code value for the color; for example, #E12345. Click Example Text to the right of the field to see how the color will appear in the user interface.</td>
</tr>
<tr>
<td>Notifications</td>
<td>These global settings let you control email and mobile notifications.</td>
</tr>
</tbody>
</table>
Apple Push Notification Service (APNS)

When a user installs the Oracle Social Network app on their iOS device and connects it to the server, the device is registered to the server and can receive notifications if you enable them here. Globally enable or disable push notifications to registered iOS devices. When enabled, notifications are sent to iOS devices if selected by the user.

Android Push Notifications (GCM)

When a user installs the Oracle Social Network app on their Android device and connects it to the server, the device is registered to the server and can receive notifications if you enable them here. Globally enable or disable push notifications to Android devices. When enabled, notifications are sent to Android devices if selected by the user.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Time Zone and Language</td>
<td>End users configure these settings either explicitly in their Oracle Social Network settings or implicitly based on their browser settings. You can specify fallback values for the time zone, language, and date format to be used if no setting is available.</td>
</tr>
<tr>
<td>Time Zone</td>
<td>Oracle Social Network uses the time zone in the user's settings if it is specified. If the user did not select a time zone, the value in this field is used. If you do not select a time zone, the time zone of the server where Oracle Social Network resides is used.</td>
</tr>
<tr>
<td></td>
<td>This time zone setting is used to determine when to send daily digest emails (midnight in the user's time zone) and to specify the timestamps on email notifications.</td>
</tr>
<tr>
<td></td>
<td>This setting does not affect timestamps for actions such as posting messages or adding users; the client machine's time zone setting is used.</td>
</tr>
<tr>
<td>Language</td>
<td>Oracle Social Network clients (such as the browser client, Outlook, and Android) use the language specified in the user's settings or browser. If a client setting does not match an available language, or if no setting is found in the browser, the language selected here is used instead.</td>
</tr>
<tr>
<td>Date Format Locale</td>
<td>Oracle Social Network clients (such as the browser client, Outlook, and Android) try to format the date as specified in the user's settings or using the locale of the browser. If a client setting does not match an available format, or if no setting is found in the browser, the date format selected here is used instead.</td>
</tr>
<tr>
<td>Support Message</td>
<td>For clients that support it, users see the text shown in this field when they select the Support option. By default, the text describes how to create a service request with Oracle Support. In the web client a new browser page opens. (A target=&quot;_blank&quot; is included in the link.) You can customize the text if you want users to follow a different process, such as contacting your company's internal support team.</td>
</tr>
<tr>
<td></td>
<td>Type any changes into the text entry field and click Save to save your changes, or click Restore Default to return to the default message that was defined when Oracle Social Network was initially configured.</td>
</tr>
<tr>
<td></td>
<td>Note: The support message is displayed in the language in which it is typed, and it is not translated based on the locale.</td>
</tr>
<tr>
<td>Manage Hashtags</td>
<td>Allows you to censor words or strings that you do not want to be used as hashtags.</td>
</tr>
<tr>
<td>Censored Hashtags</td>
<td>Type one or more strings that you do not want to be used as hashtags, without the hash (#) prefix. Wildcards such as the asterisk (*) are not supported. Use a comma to separate each string in the field; for example, censorthistag,censorthattag.</td>
</tr>
<tr>
<td></td>
<td>When a user types a censored hashtag or views a message containing a censored hashtag, the hashtag appears as regular text. Censored hashtags don't display in the list of hashtag suggestions. If you censor a hashtag that previously existed on the system, the link is removed. If a user previously selected to follow that hashtag, related entries are removed from the Overview page when they refresh the browser, and the hashtag page is removed. If you remove the tag from the censored list later, the hashtag is restored as a followed tag and the hashtag page is restored.</td>
</tr>
<tr>
<td>Developer Website</td>
<td>The developer website provides tools for building Social Definitions, apps, and Social Plugins, and also helps developers learn and implement the REST API by providing an API Explorer.</td>
</tr>
</tbody>
</table>
Managing Users

User Types

The following basic user types exist in Oracle Social Network:

- **Participant**: Participants are users who are employees of your company; this category includes most other user types. Participants can create conversations, post messages, assign flags to other users, and so on. They are normally created when your organization configures users in the Oracle Cloud, but they also can be invited by other participants. A participant is typically a user whose email address (user name) exists within your organization's email domain.

Within your environment, you might have two types of participant users; these two participants are not distinguished from each other in Oracle Social Network. For example, in an Oracle Cloud Application CRM integration you might have 50 licenses; these 50 users have access to both CRM and Oracle Social Network. These users are added to Oracle Social Network and they are participant users. You can invite additional users within the company to use Oracle Social Network, but they do not have access to CRM; these non-CRM users are also participant users.

- **Employee** users are also participants. An employee is typically a user whose email address (user name) exists outside your organization's email domain but they are
still employees who are entitled to full Oracle Social Network access, possibly including service administrator and developer permissions. You must explicitly add or invite them to join Oracle Social Network. When these added/invited users log in, they become Participant users. To allow employee users in your environment, you use the Extended Collaboration page in the Administration UI. For more information, see Managing User Collaboration.

**Administrator:** An administrator is a user who has been given additional administrative privileges. Administrators can log in to the Oracle Social Network web client to do administration tasks. There are two types of administrators: site and service. Service administrators have access to features that allow them to do all the typical management tasks for users, social definitions, conferencing and cloud document services, and more. Site administrators are Oracle personnel who have access to extended functionality for Oracle Social Network administration. The site administrator privilege is not managed in the administration UI.

- **Developer:** A developer is a participant user who has the developer privilege enabled in their user profile. Developers can access the Oracle Social Network developer website on the staging instance to use specialized tools for development work; developer tools include the API Explorer, Social Definition Builder, and more.

- **Integration account:** This account type is for a program, not a user; it authenticates to Oracle Social Network to integrate custom applications. An integration account is not visible in the user interface. Optionally, you can allow the integration account to act on behalf of actual users. This privilege lets the integrating program do tasks as a user who is not logged in to Oracle Social Network, such as posting a message from an on-premise application as if it were posted by a user.

**Caution:** You can also optionally allow the integration account to access any data in Oracle Social Network for any user. This privilege can be used for applications that require access to this secured data, such as custom search indexing, eDiscovery, and compliance. Make sure the credentials to this account are held securely.

- **Outside user:** An outside user is a user whose email address (user name) exists outside your organization’s email domain and who is not an employee of your company. Outside users cannot be given administrator or developer permissions. For users outside your email domain, you must explicitly add or invite them to join Oracle Social Network. To allow outside users in your environment, the Outside Users option must be enabled, at least one value must exist in the Outside Users Whitelist field on the Extended Collaboration page, unless the Invite Outside Users with Any Email Domain check box is selected. To exclude outside users from a specific email domain, you can add the domain name to the Outside Users Blacklist field. If a user is invited from a domain in the blacklist, the invitation fails. For more information, see Managing User Collaboration.

**About User Management in Oracle Identity Manager**

When configured with an external user management system such as Oracle Identity Manager (OIM), general user properties are typically managed in that system. By default, when a user’s general properties are changed in OIM, they are automatically propagated to Oracle Social Network when the user logs in. Your specific system configuration determines whether this change occurs.

By default, these properties are managed from OIM and are not editable in Oracle Social Network:

- **Display Name**
Managing Users

- E-mail address
- Manager
- Name (user ID/login)
- Organization
- Phone Number
- Title

Your environment might have more or fewer properties managed in OIM, depending on your specific configuration.

Role (privilege) properties can be changed from either OIM or from Oracle Social Network, and the changes are propagated to the other system. When role properties are changed using Oracle Identity Manager, it could take up to 10 minutes for that change to be visible in Oracle Social Network. The change is visible after that user logs in again. Changes made in Oracle Social Network become effective immediately in Oracle Identity Manager as well as Oracle Social Network.

Role properties include:

- Developer
- Service Administrator
- Employee
- Outside User

If your OIM settings become out of sync with Oracle Social Network, or if you want to replace property values for one or all users without waiting for the automatic sync that occurs during login, you can do this task either for an individual user or for all users at once. For more information, see Synchronizing User Profile Information with OIM.

Finding a User

On the Users page, you must find the user that you are interested in before you can edit their properties.

You can view a list of administrators, developers, or outside users by selecting the associated tab on the Users page, or you can search for an individual user.

To find an individual user, enter part of the user name, display name, or email address in the Search field and click Search. All matching user accounts are listed in the Users list.

The user list shows some basic information about the users, including the name, email address, user type, and verification status.

Verified user accounts have been verified using one of these methods:

- The user was located in an external account database such as an LDAP (Lightweight Directory Access Protocol) directory service directory.
- An email was sent to the user, and the user clicked the link in that email to verify their identity and logged in.

Inviting/Creating a User from the Administration Page

In an Oracle Cloud environment, you typically do not need to specifically invite users; you can publicize the URL for the Oracle Social Network end-user-client login page, and users inside your email domain can create their own accounts.
If you want to allow employee users (for example, non-Oracle Cloud users who are within your company) or outside users to join Oracle Social Network, you must enable the Employees option or the Outside Users option on the Extended Collaboration page, and add the users’ domain in the Employee Whitelist or Outside Users Whitelist field. If the Invite Outside Users with Any Email Domain check box is selected, you do not need to specify domains in the whitelist to allow external users.

To invite a user to join Oracle Social Network:

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Users. The Users page opens and displays the user list.
3. Click New User.
4. Type an email address and click Create. An email invitation is sent to the address you specify; the email contains a URL that the user can click to access Oracle Social Network.

When the user clicks the invitation link, the browser client's password setup page displays. After the user logs in to Oracle Social Network for the first time, the Verified status appears in green text for that user in the user list.

**Note:** You can add many employee or outside users to Oracle Social Network at once using the Bulk User Upload Wizard. For more information, see Adding Several Employee or Outside Users at Once.

**About New User Invitation Emails**

By default, when you create/invite one or more users to Oracle Social Network, a new user invitation email is sent at these times:

- A new user invitation email is sent immediately.
- If the new user has not accessed Oracle Social Network, a second invitation email is sent two days after the user is created.
- If the new user still has not accessed Oracle Social Network, a third invitation email is sent three days after the user is created.

In some cases (such as when creating users in bulk, or if your system is not being used in production yet) you might not want to send invitation emails to new users. If you disable all email notifications for more than three days, no invitation emails are sent. For more information about the global email notification setting, see Editing General Properties.

**Enabling or Disabling a User**

When an administrator disables (deactivates) a user, the disabled user can’t log in. In addition, access for a disabled user is removed from all Conversations that they were a member of, and other users can’t follow that user or post to their wall.

**Note:** The Deleted check box is not editable; if you see that it's selected, it indicates that the user account is managed in an external user directory, and the user account no longer exists in that directory. You use the Enabled option rather than the Deleted option to specify a user’s status in Oracle Social Network.

To enable or disable a user:

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Users. The Users page opens. The page is empty until you find the user you want to enable or disable.

3. Search for the user, using the instructions in Finding a User.

4. Click Edit for the user you want to enable or disable. The properties page opens.

5. Select or deselect the This User is Enabled check box.

6. Click Save.

Editing User Properties

You can manage Oracle Social Network privileges and other properties for participant, employee, and outside user accounts from the Users page.

To view and edit a user's properties:

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click Users. The Users page opens.

3. Search for the user, using the instructions in Finding a User.

4. Select the user whose properties you want to change. The properties page opens.

5. Edit the properties of the user. For more information about user properties, see User Properties Page.

6. Click Save.

User Properties Page

The following table describes the user properties.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Properties</td>
<td>In this section you can view general information about the user; you cannot edit the values.</td>
</tr>
<tr>
<td>Display Name</td>
<td>The version of the user's name to be displayed in the client. If blank, the User Name is used.</td>
</tr>
<tr>
<td>ID</td>
<td>An identifier assigned by the system for this user's account.</td>
</tr>
<tr>
<td>Type</td>
<td>The user type: Participant or Outside User.</td>
</tr>
<tr>
<td>User Name</td>
<td>The user's name.</td>
</tr>
<tr>
<td>Email</td>
<td>The user's email address.</td>
</tr>
<tr>
<td>Verified</td>
<td>Users are verified by either finding them in the user directory, or after the user clicked a link in an invitation email to verify their identity and joined Oracle Social Network.</td>
</tr>
<tr>
<td>Created</td>
<td>The date and time this user account was created in Social Network.</td>
</tr>
<tr>
<td>Last Modified</td>
<td>The date and time this user account was last modified.</td>
</tr>
<tr>
<td>Last Connected</td>
<td>The date and time this user last logged in to Oracle Social Network.</td>
</tr>
<tr>
<td>Last Disconnected</td>
<td>The date and time this user's last session with Oracle Social Network ended.</td>
</tr>
<tr>
<td>Account Settings</td>
<td>In this section you can enable or disable an account, and view the settings for deleted or locked users.</td>
</tr>
<tr>
<td>This User Account is Enabled</td>
<td>Specifies whether this user is enabled on the system. A disabled user can't log in. In addition, access for a disabled user is removed from all Conversations that they were a member of, and other users can't select to follow that user or post to their wall.</td>
</tr>
</tbody>
</table>
This User Account is Deleted
Not editable. Indicates that a user account is managed in an external user directory, and the user account no longer exists in that directory. A user can't be Enabled and Deleted at the same time.

This User Account is Locked
Indicates that the user account is locked. You can't modify this property from the properties page. For more information about locked accounts, see Unlocking User Accounts.

Privileges and Special Behavior
In this section you can specify user types and configure integration accounts. These properties do not display for Outside Users.

Service Administrator
Specifies whether the user is a service administrator. Service administrators have access to the Administration section of the Oracle Social Network browser interface, and can do all the typical management tasks for users, apps, social definitions, and more.

Developer
Specifies whether the user is a developer. Developers can access the Oracle Social Network developer website to use specialized tools for development work; developer tools include the API Explorer, Social Definition Builder, and more.

Note: Set this property only on the staging instance; the developer user type is intended for use only on that instance. Changes you make on the production instance are not copied to the staging instance.

Integration Account
Specifies whether this is an integration account. This account type is for a program, not a user; it authenticates to Oracle Social Network to integrate custom applications. By default, an integration account has service administrator privileges. An integration account is not visible in the user interface.

Optionally, you can also set two special privileges:

- Allow the integration account to act on behalf of actual users. This privilege lets the integrating program do tasks as a user who is not logged in to Oracle Social Network, such as posting a message from an on-premise application as if it were posted by a user. This privilege is enabled by default.

- Allow the integration account to access any data in Oracle Social Network for any user. This privilege can be used for applications that require access to this secured data, such as custom search indexing, eDiscovery, and compliance. Use this setting with caution. Make sure the credentials to this account are held securely. This privilege is enabled by default.

Tips:

- You use integration accounts on both the staging instance (for testing) and on the production instance.

- We recommend that you not give integration account privileges to developers.

Conversation Settings
In this section you can configure Conversation settings for the user.

Show Conversation Membership Messages by Default
When enabled, the user sees a message in Conversations whenever new members are added to the Conversation; for example, The Conversation is now accessible to <name>. When disabled, messages about new members do not appear in Conversations. If you change the property, it takes effect when the user logs out and then logs in again.

Delegates
To define users or groups who can post to this user’s wall on their behalf, click Choose Delegates and then search for the users and groups that you want to assign as delegates.

In the Update Delegates dialog, move people or groups to the right column to add them, or to the left column to remove them.
Synchronizing User Profile Information with OIM

If your OIM settings become out of sync with Oracle Social Network, or if you want to replace property values for one or all users without waiting for the automatic sync that occurs during login, you can do this task either for an individual user or for all users at once.

To synchronize profile information for an individual user, open the user's properties page and click Sync Profile Now.

To synchronize profile information for all users at once, open the Users page and click Sync Profile Data.

Adding Several Employee or Outside Users at Once

You can use the Bulk User Upload Wizard to add many employee or outside users to Oracle Social Network in one action.

The process has two steps:

- Step 1. Download and Edit the New User Template File
- Step 2. Run the Bulk User Upload Wizard

Notes:

- The primary purpose of the wizard is to add users; however, if a user already exists in the system, the wizard updates the user information based on the content of the user properties CSV file.
- By default, invitation emails are sent to all new users. For more information about these emails and how to disable them if needed, see About New User Invitation Emails.

Step 1. Download and Edit the New User Template File

The wizard adds or updates users based on the information in a CSV file that you upload. Before you can run the wizard you need to put user data into the file.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Users.
3. Click Bulk Create Users.
4. Click Download Template. The template file is downloaded.
5. Add information to the file. The wizard requires, at a minimum, each user's name and email address. Optionally, you can add more information about each user to the file. Use the instructions and examples in the template file as a guide.
6. Save the file using a unique name.

Step 2. Run the Bulk User Upload Wizard

Use the wizard to upload the CSV file containing user information.

Before you begin: Make sure your Extended Collaboration settings allow these employee or outside users to be added. For more information, see Enabling Extended User Collaboration.

Note: If you left the wizard open after downloading the template file, you can skip to step 4 below.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Users.

3. Click Bulk Create Users.

4. Click Select File and follow the screen prompts to upload the CSV file that you previously set up.

5. Click Next. The wizard displays the list of users to be added. If any errors exist in the CSV file, the errors are shown next to each user's information. If the file is error-free, the Finish button is enabled.

6. If you need to fix any problems in the CSV file, click Back, fix the file, and then click Select File again to upload the corrected file.

7. When the user information displays and no errors exist, click Finish to add or update the users.

Unlocking User Accounts

If a user attempts to log in to Oracle Social Network but provides incorrect login information five or more times, the user account is temporarily locked. Locked users are identified in the Users page user list.

To manually unlock an account, click Unlock to the right of the user information in the user list.

If you do not manually unlock a user account, it is unlocked automatically after 20 minutes.

Note: If you manage user locking in your environment using an external process such as Oracle Access Management, user locking and unlocking is controlled from there and not using the Oracle Social Network Administration interface.

Managing User Collaboration

Enabling Extended User Collaboration

If enabled, any user other than an outside user can invite others who don't have Oracle Cloud accounts to collaborate in Oracle Social Network. You can allow two types of extended collaboration:

- Employee collaboration: these users have full user abilities.
- Outside user collaboration: these users have limited access to Oracle Social Network content and a restricted set of abilities. Outside users cannot be given administrator or developer permissions. Outside users can be partners, suppliers, and so on.

For more information about the types of users, see User Types.

Note: Not all environments allow extended collaboration. If your system does not have this capability, the option does not display in the user interface.

To enable extended user collaboration:

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click Extended Collaboration.

3. Enable the Invitations option.
4. Edit the **Employee Whitelist**, **Outside Users Whitelist**, and **Outside Users Blacklist** fields as needed to specify email domains from which users can be invited or excluded. If the **Invite Outside Users with Any Email Domain** check box is selected, you do not need to specify domains in the whitelist to invite external users. For more information about collaboration properties, see User Collaboration Settings.

5. Add your company’s “base” domains into the **Employee Whitelist** field. For example, if you log in to Oracle Social Network as lia.kuang@example.com, put example.com in the **Employee Whitelist** field. If you skip this step, you will be unable to log in to Oracle Social Network after saving your change and logging out.

6. Click **Save**.

**User Collaboration Settings**

The following table describes the user settings for extended collaboration.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employees</td>
<td>In this section you can define which external email addresses can be invited as employee users to Oracle Social Network.</td>
</tr>
<tr>
<td><strong>Employee Whitelist</strong></td>
<td>This field is editable only if <strong>Invitations</strong> are enabled. If you want to allow employee users outside your enterprise domain to join Oracle Social Network as Participant users, you must add at least one domain in the whitelist. Invitations can be sent only to email addresses that match a domain name in the employee whitelis. For example, if you specify example.com, then a person with the email address <a href="mailto:first.last@example.com">first.last@example.com</a> can be invited to join Oracle Social Network as a Participant (full privileges) user. The domain name value is not case-sensitive. To enter more than one domain, separate them with commas. If an invitee’s email address matches any of the entries, it is allowed. Creating a new employee account in Oracle Social Network triggers a corresponding account creation process in an external database such as an LDAP (Lightweight Directory Access Protocol) directory service. <strong>Important Note</strong>: If you enable extended collaboration, you must add your company’s domains into the <strong>Employee Whitelist</strong> field. For example, if you log in to Oracle Social Network as <a href="mailto:lia.kuang@example.com">lia.kuang@example.com</a>, put example.com in the <strong>Employee Whitelist</strong> field. If you skip this step, you will be unable to log in to Oracle Social Network after saving your changes and logging out.</td>
</tr>
<tr>
<td>Outside Users</td>
<td>In this section you can define which external email addresses can be invited as outside users to Oracle Social Network.</td>
</tr>
<tr>
<td><strong>Outside Users Whitelist</strong></td>
<td>This field is editable only if <strong>Invitations</strong> are enabled. If you want to allow users outside your enterprise domain to join Oracle Social Network, you must add at least one domain to the whitelist, unless the <strong>Invite Outside Users with Any Email Domain</strong> check box is selected. If the check box is not selected, invitations can be sent only to email addresses that match a domain name in the list. For example, if you specify example.com, then a person with the email address <a href="mailto:first.last@example.com">first.last@example.com</a> can be invited to join Oracle Social Network as an outside (limited privileges) user. The domain name value is not case-sensitive. To enter more than one domain, separate them with commas. If an invitee’s e-mail address matches any of the entries, it is allowed. Creating a new outside user account in Oracle Social Network triggers a corresponding account creation process in an external database such as an LDAP (Lightweight Directory Access Protocol) directory service.</td>

20-14 Oracle Cloud Using Oracle Social Network
Managing Apps

App Types

Apps (sometimes called applications or gadgets) are web-based applications that can be deployed in Oracle Social Network. Apps are applicable only on the web client.

There are two types of apps:

- **Conversation apps** are external standalone applications that you can add to a Conversation. Examples include a poll, map, or a photo viewer. An app definition file, also called an app specification, is an XML file that defines its content, behavior, properties, and the data it will display.

- **Social Object apps** represent business objects coming from a System of Record or defined directly in Oracle Social Network, to make the information viewable in the context of a Conversation. Social Object apps are managed using the Social Definition Builder in the developer website.

From the Apps page, you can add Conversation apps that were defined in an app definition file or Social Object apps that were exported from the Social Definition Builder; and you can enable, configure, disable, or remove existing apps.

Apps Included with Oracle Social Network

Oracle Social Network comes with two apps, which are enabled by default:

- The **Oracle Social Network Site App** allows you to embed a live web page into a Conversation. Note that many external sites, such as http://www.google.com, don’t allow embedding; these sites do not appear when a user puts the URLs in the Oracle Social Network Site app.

- The **Oracle Social Network Photo App** automatically displays all the images in the Conversation as a slide show.

The **Oracle Social Network Collection App** is included to provide Collection functionality. Although it is included in the product, it is not intended for use as a sample app.

**Note:** If a developer on your team changes an app definition file or Social Object definition file outside the Administration user interface, using the Oracle Social Network REST API or another tool, you must re-upload the updated definition file to Oracle Social Network from the app’s properties page.

Adding an App

When you add an app, Oracle Social Network uploads the definition file containing the code for the app and installs (deploys) it.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Apps. The Apps page opens and lists the apps.

4. Enter a name and external ID for the app. For more information about these fields, see App Properties Page.

5. Click Select File and follow the screen prompts to upload the file containing the app definition. The definition file must be valid XML that conforms to the schema of the app type.

6. Click Save.

7. Edit the properties of the app as needed, by following the steps in Editing App Properties.

Deleting an App

To delete an app, click Delete to the right of the app in the list. If instances of the app exist in the web client, you can’t delete the app.

Deleting an app removes it only from the Oracle Social Network application. The actual file used to create the app is not deleted.

Editing App Properties

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click Apps. The Apps page opens and lists the apps.

3. Select the app to open its properties page.

4. Edit the properties of the app. For more information about fields in the user interface, see App Properties Page.

5. Click Save.

App Properties Page

The following table describes app properties.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>App Name</td>
<td>The name of the app, which is displayed in the client user interface.</td>
</tr>
</tbody>
</table>
| App External ID | Specifies an identifier that allows other apps or code to refer to the app.  
|                | The ID can be up to 256 characters in length and must contain at least one period (.) character.                                               |
|                | Make sure the identifier you specify is unique across your system. Do not change the External ID of an app that is provided with Oracle Social Network. |
| ID             | Not editable. An identifier assigned by the system.                                                                                         |
| Type           | Not editable. An identifier assigned by the system for the app type.                                                                         |
| Created        | Not editable. Shows the date and time when the app was created. For apps that are included as part of Oracle Social Network, the installation date and time are displayed. |
| Last Modified  | Not editable. Shows the most recent date and time that configuration changes were made to the app.                                          |
### Managing Apps

**App Definition File**
- Click **Select File** and follow the screen prompts to upload the file containing the app definition. The definition file must be valid XML.

### General Properties
- **App Enabled** Enables or disables the app. If an app is available but not enabled, it's visible but not functional, and users can't add new instances of the app to Oracle Social Network.
  - For certain system apps, such as the Collection App, this field is not editable.
- **App Available** Makes the app available or unavailable to users. This control determines whether the app is visible to users in the list of available apps.
  - For certain system apps, such as the Collection App, this field is not editable.
- **App Local** Specifies whether the app communicates with the originating Oracle Social Network server locally or over a proxy. The generated URL sent to the app on the client varies depending on the selection. The default is deselected (not local).
  - Do not change this setting except at the direction of Oracle Support.
- **One App Instance Per Conversation** Specifies whether more than one instance of the app can exist in a Conversation. If you select this option, the client user can add only one instance of the app in the Conversation. For example, it doesn't make sense to have two instances of the Photo Viewer app in a Conversation, but you might want to allow more than one instance of a polling app to be added.

### App Type
- **Social Object**
  - The app is a Social Object app, and it displays in the Social Objects drop-down list where applicable (if the app is Discoverable or if it was shared with the user). If the Customizable option is enabled for the app, the app can be customized using the Social Definitions page in the Administration UI. For details, see Managing Social Definitions.
- **Conversation**
  - The app is a standalone app for use in Conversations.

### Social Object App
- For Social Object apps (the App Type is **Social Object**), the following additional properties display.
  - The properties are not editable from the Administration user interface. You can change them using the REST API or (if you have the Developer privilege), using the Social Definition Builder in the Oracle Social Network developer website.
  - **Createable**
    - Instances (Social Objects) based on the Social Definition can be created. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can create an instance of the Social Definition.
  - **Customizable**
    - You can customize the Social Definition. If this option is not selected, the Social Object app does not display in the Social Definitions page.
  - **Updateable**
    - The Social Object fields can be updated in Oracle Social Network; an **Edit** button displays for the object, allowing the user to change the Social Object description, for example. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can update fields of the Social Object.
  - **Deletable**
    - Instances of the Social Object can be permanently deleted. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can delete instances of the Social Object.
  - **Renameable**
    - The Social Object can be renamed. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can rename the Social Object.
  - **Closeable**
    - The Social Object can be closed (made inactive). If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can close the Social Object.

### Required Features
- If applicable, a table displays features that the app requires in order to work properly. You can click a feature name to go to its properties page.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>App Definition File</td>
<td>Click <strong>Select File</strong> and follow the screen prompts to upload the file containing the app definition. The definition file must be valid XML.</td>
</tr>
<tr>
<td><strong>General Properties</strong></td>
<td>This section displays properties that apply to both app types.</td>
</tr>
<tr>
<td>App Enabled</td>
<td>Enables or disables the app. If an app is available but not enabled, it's visible but not functional, and users can't add new instances of the app to Oracle Social Network. For certain system apps, such as the Collection App, this field is not editable.</td>
</tr>
<tr>
<td>App Available</td>
<td>Makes the app available or unavailable to users. This control determines whether the app is visible to users in the list of available apps. For certain system apps, such as the Collection App, this field is not editable.</td>
</tr>
<tr>
<td>App Local</td>
<td>Specifies whether the app communicates with the originating Oracle Social Network server locally or over a proxy. The generated URL sent to the app on the client varies depending on the selection. The default is deselected (not local). Do not change this setting except at the direction of Oracle Support.</td>
</tr>
<tr>
<td>One App Instance Per Conversation</td>
<td>Specifies whether more than one instance of the app can exist in a Conversation. If you select this option, the client user can add only one instance of the app in the Conversation. For example, it doesn't make sense to have two instances of the Photo Viewer app in a Conversation, but you might want to allow more than one instance of a polling app to be added.</td>
</tr>
<tr>
<td>App Type</td>
<td>Specifies the functional type of the app. The options are:</td>
</tr>
<tr>
<td>Social Object</td>
<td>The app is a Social Object app, and it displays in the Social Objects drop-down list where applicable (if the app is Discoverable or if it was shared with the user). If the Customizable option is enabled for the app, the app can be customized using the Social Definitions page in the Administration UI. For details, see Managing Social Definitions.</td>
</tr>
<tr>
<td>Conversation</td>
<td>The app is a standalone app for use in Conversations.</td>
</tr>
<tr>
<td>Social Object App</td>
<td>For Social Object apps (the App Type is <strong>Social Object</strong>), the following additional properties display. The properties are not editable from the Administration user interface. You can change them using the REST API or (if you have the Developer privilege), using the Social Definition Builder in the Oracle Social Network developer website.</td>
</tr>
<tr>
<td>Createable</td>
<td>Instances (Social Objects) based on the Social Definition can be created. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can create an instance of the Social Definition.</td>
</tr>
<tr>
<td>Customizable</td>
<td>You can customize the Social Definition. If this option is not selected, the Social Object app does not display in the Social Definitions page.</td>
</tr>
<tr>
<td>Updateable</td>
<td>The Social Object fields can be updated in Oracle Social Network; an <strong>Edit</strong> button displays for the object, allowing the user to change the Social Object description, for example. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can update fields of the Social Object.</td>
</tr>
<tr>
<td>Deletable</td>
<td>Instances of the Social Object can be permanently deleted. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can delete instances of the Social Object.</td>
</tr>
<tr>
<td>Renameable</td>
<td>The Social Object can be renamed. If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can rename the Social Object.</td>
</tr>
<tr>
<td>Closeable</td>
<td>The Social Object can be closed (made inactive). If the option is not selected, neither the REST API nor users on any client (such as web, mobile, or Outlook) can close the Social Object.</td>
</tr>
</tbody>
</table>
Managing Features

Restoring Apps to their Default Settings

When Oracle Social Network is installed, certain apps and features are included *(seeded)*. If changes occurred after installation that you want to revert, you can re-seed the default apps and features.

Reseeding your apps and features will not affect any apps and features that you added; only the ones included as part of Oracle Social Network are changed.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click **Apps**.
3. Click **Seed Apps and Features**.

*Note:* Both features and apps are re-seeded. You can’t re-seed one without the other.

Managing Features

About Features

Features are JavaScript libraries that provide apps with specific functionality, such as communicating with the Oracle Social Network Server, adding interactive behavior, or manipulating data. Oracle Social Network adds several features as part of the installation process. Under normal circumstances you do not need to change features that are included with Oracle Social Network, but you might want to add features that are needed by new apps that you add into the environment.

Do not modify or disable any of the default features unless advised to do so by Oracle Support. Doing so might disable critical functions of Oracle Social Network.

From the Features pages, you can add features, and enable, configure, disable, or remove existing features. Features currently installed in Oracle Social Network are listed, along with fields indicating a version number and a date/time stamp indicating the most recent update to the feature files.

Adding a Feature

When you add a feature, Oracle Social Network uploads the file for the feature and adds (deploys) it.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click **Features**. The Features page opens and lists the features.
3. Click **New Feature**.
4. Enter a name for the feature in the **Feature Name** field.
5. Enter a version number for the feature in the **Feature Version** field. You can have more than one version of a feature on the system; each version is shown separately in the feature list.
6. Click **Create**.
7. Open the properties file for the new feature and add its feature file. For more information, see **Editing Feature Properties**.
Deleting a Feature

To delete a feature, click Delete to the right of the feature in the list.

Note: Deleting a feature removes it only from the Oracle Social Network application. The actual file used to create the feature is not deleted.

Editing Feature Properties

Do not make changes to the default features that come with Oracle Social Network unless advised to do so by Oracle Support. Doing so might disable critical functions of Oracle Social Network.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Features. The Features page opens and lists the features.
3. Select the feature that you want to change. Its properties page opens.
4. Edit the properties of the feature. For more information about fields in the user interface, see Features Properties Page.
5. (Optional) To edit the properties of the feature files for the feature, select the file in the Feature Files list, edit its properties, then click Save.
6. (Optional) The order of feature files is significant. To change the order of the JavaScript files for a feature, click Move Up or Move Down next to the file that you want to move.
7. Click Save.

Features Properties Page

Select a feature in the list to edit its properties.

</tr>
</tbody>
</table>
About Webhooks

Webhooks let you automatically send information to Oracle Social Network based on events that occur in an external (source) application. Oracle Social Network webhooks, also called incoming webhooks, use HTTP requests and rely on application payloads in JSON format. For example, using an incoming webhook, an external bug-tracking application can create a message in a specific Conversation whenever a bug is created that relates to the Conversation. When the bug-creation event occurs, the application sends an API request to the URL that you configured in the webhook; then Oracle Social Network converts the incoming information into a properly formatted Conversation message.

Oracle Social Network provides built-in support for some applications, while also providing the flexibility for you to configure a custom webhook integration.

Before You Begin

You need to be familiar with the requirements of the source application that you are creating the webhook for. For example, if you are creating a custom incoming webhook, you must know the application’s supported keywords/JSON properties so you can compose a correctly formatted message template. You also must know the source application’s security requirements; for example, you need to know whether or not to use Signature Verification.

On the Library tab of the Webhooks page, you can find a webhook template for each supported source application. For custom webhooks, you use the Generic Incoming Webhook template.

Adding an Incoming Jira Webhook

Jira webhooks are pre-configured with a working message template, based on the JSON elements from the Jira application.

For either Jira webhooks or custom webhooks, first you define the basic information about the webhook. After you save it, the full properties page opens, and you can specify the rest of its properties.

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click Webhooks, then to the right of Jira Incoming Webhook click New Instance.
3. Fill in the fields as needed. For more information about each field on the page, see Incoming Webhook Properties Page.

4. Click Save. The webhook is saved with the settings you created so far, and then the properties page displays.

5. Edit the remaining properties of the webhook. For more information about each field on the page, see Incoming Webhook Properties Page.

6. For the Webhook URL, click the Copy to Clipboard button and then provide that information to the Jira application.

7. Click Save.

**Adding an Incoming Custom Webhook**

For custom webhooks, make sure you are aware of all the requirements for the external application.

For either Jira webhooks or custom webhooks, first you define the basic information about the webhook. After you create it, the full properties page opens, and you can specify the rest of its properties.

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click Webhooks, then to the right of Generic Incoming Webhook click New Instance.

3. Fill in the fields as needed. For more information about each field on the page, see Incoming Webhook Properties Page.

4. Click Save. The webhook is saved with the settings you created so far, and then the properties page displays.

5. Edit the remaining properties of the webhook. For more information about each field on the page, see Incoming Webhook Properties Page.

6. Click the Copy to Clipboard button for the Webhook URL and provide that information to the source application.

7. If you want to use Signature Verification and the webhook supports it, click Use Signature Verification, then click Regenerate, then use the Copy to Clipboard button to get the token so you can provide it to the source application.

8. Click Save.

**Editing Webhook Properties**

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click Webhooks, then click Configured.

3. Click the name of the webhook that you want to change. Its properties page opens.

4. Edit the properties of the webhook. The fields displayed on the page vary depending on the type of webhook you are editing. For more information about fields in the user interface, see Incoming Webhook Properties Page.

5. Click Save.

**Incoming Webhook Properties Page**

The fields displayed in the properties page vary depending on the webhook type.
### Managing Webhooks

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Webhook Name</strong></td>
<td>Specify a unique name for the webhook. This name appears as a heading for the posted Conversation message.</td>
</tr>
<tr>
<td><strong>Webhook Icon</strong></td>
<td>Specify an icon to use for the webhook in the UI, or keep the default icon that displays. When a message is posted based on the webhook, this icon displays instead of a user avatar. If you specify a custom icon, keep in mind that the system resizes it to have a maximum width of 44 pixels.</td>
</tr>
<tr>
<td><strong>Webhook Enabled</strong></td>
<td>Specify whether to enable the webhook. When disabled, information from the integrated application is still sent to Oracle Social Network but Conversation messages are not generated.</td>
</tr>
<tr>
<td><strong>Target Conversation or Wall</strong></td>
<td>Specify the Conversation that you want webhook-based messages to be added to. If you are creating a webhook, click Select to choose a Conversation. If you are editing an existing webhook, the currently selected Conversation displays; click Change to choose a different Conversation.</td>
</tr>
<tr>
<td><strong>Message Template</strong></td>
<td>Specify the wording/layout of the text to be included in the webhook-based message, including the keyword syntax from the webhook's source application. You can use HTML anchor elements, and you can insert variables based on the JSON body of the webhook post from the source application. If you are creating or editing a Jira webhook, a default template displays; edit it as needed.</td>
</tr>
<tr>
<td><strong>Webhook URL</strong></td>
<td>Not editable. A URL for the Oracle Social Network Conversation is auto-generated based on the information you provided about the webhook. Provide this URL to the external application.</td>
</tr>
<tr>
<td><strong>Copy URL to Clipboard</strong></td>
<td>Use the Copy URL to Clipboard button to get the URL information, then provide that information to the source application.</td>
</tr>
<tr>
<td><strong>Regenerate</strong></td>
<td>If for any reason you want to change the webhook URL (for example, you might find that the security of the webhook URL has been compromised), click Regenerate to create a new URL. If you change the URL, the old URL will stop working. You must provide the new URL to the source application.</td>
</tr>
<tr>
<td><strong>Use Signature Verification</strong></td>
<td>Specify whether to use Signature Verification for the webhook; select this option only if the source application uses it. Enabling signature verification causes Oracle Social Network to look in the specified header for the encrypted version of the message, which it decrypts using the token and compares to the actual message. If they don't match, the message is ignored and is not posted to the Conversation. The header is decrypted using the HMAC-SHA256 algorithm. When this option is enabled, the Copy Token to Clipboard button, the Regenerate button, and the Signature Header Name field display.</td>
</tr>
<tr>
<td><strong>Copy Token to Clipboard</strong></td>
<td>Use the Copy Token to Clipboard button to get the token information, then provide the token to the source application.</td>
</tr>
<tr>
<td><strong>Regenerate</strong></td>
<td>If for any reason you want to change the token (for example, you might find that the security of the token has been compromised), click Regenerate to create a new token. If you change the token, the old token will stop working. You must provide the new token to the source application.</td>
</tr>
<tr>
<td><strong>Signature Header Name</strong></td>
<td>Enter the header name required by the source application.</td>
</tr>
</tbody>
</table>
Managing Social Definitions

Social Definition Properties in the Administration UI

A Social Definition is a "model" of a Social Object; after you add a Social Definition on your system, users can create Social Object instances based on the definition. A Social Definition specifies the properties of its corresponding Social Object and how to display it in different client interfaces.

You can create a Social Definition in different ways, including using the Social Definition Builder tool in the Oracle Social Network developer website, or using the Oracle Social Network REST API. For more information, see the Oracle Social Network Developer’s Guide (accessible from the developer website).

If the customizable property of a Social Definition is enabled, you can change some of its properties using the Administration UI. After you save a change, it is visible to end users when they start a new browser session or do a full page refresh. You can set the customizable property from the Social Definition Builder in the developer website, or using the Oracle Social Network REST API. For more information, see the Oracle Social Network Developer’s Guide (accessible from the developer website).

The following table shows the (non-editable) properties that display for Social Definitions when you navigate to Social Definitions. Additional properties display when you choose to edit an individual definition.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Social Definition Name</td>
<td>The name of the Social Definition as it appears in the Administration user interface. This property is editable from the Social Definitions page when you add the definition, and editable from the Apps page after creation.</td>
</tr>
<tr>
<td>External ID</td>
<td>The unique identifier for the Social Definition. This identifier uses namespaces to specify the originating application; for example, a Social Definition named Opportunities might have the External ID companyname.crm.opportunities. This property is editable from the Social Definitions page when you add the definition, and editable from the Apps page after creation.</td>
</tr>
<tr>
<td>Enabled</td>
<td>Shows whether the Social Definition is enabled. Enabled Social Definitions display in the client user interface’s Social Objects drop-down list (if the app is Discoverable or if it was shared with the user). This property is editable from the Social Definitions page when you add the definition, and editable from the Apps page after creation.</td>
</tr>
</tbody>
</table>

Where to Customize Social Definitions

The following table lists the properties of a Social Definition and shows where the property can be changed after it has been created. Note that only Social Definitions that are defined as Customizable can be edited from the Social Definitions page. For more information about Social Object properties and the Social Definition Builder, refer to the Oracle Social Network Developer’s Guide (accessible from the developer website).

The editable properties on your system might differ from those shown in this table. Your specific configuration determines which properties are available in Oracle Social Network.

Note: If a developer on your team changes a Social Object definition file outside the Administration user interface using the Oracle Social Network REST API or another tool, you must re-upload the updated definition file to Oracle Social Network from the Apps properties page.
### Adding a Social Definition

When you add a Social Definition, Oracle Social Network uploads the definition file containing the code for the Social Definition and installs (deploys) it.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click **Social Definitions**. The Social Definitions page opens and lists the existing definitions.
3. Click **New Social Definition**.
4. Enter a name and external ID for the Social Definition. For more information about these fields, see Social Definition Properties Page.

5. Click Select File and follow the screen prompts to upload the Social Definition. The definition file must be valid XML that conforms to the Social Definition schema.

6. Click Save.

7. Edit the properties of the Social Definition as needed, by following the steps in Editing Social Definition Properties.

Editing Social Definition Properties

To customize a Social Definition:

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click Social Definitions.

3. Select the Social Definition that you want to change. Its properties page opens.

4. Edit the values that are displayed. For more information about a field, see Social Definition Properties Page.

5. To reorder a field, select it and click Up or Down.

6. To preview your selections as they would be displayed in the web client, click Preview. A popup window opens and displays the Social Object as it would look with your changes.

7. Click Save. The change is visible to end users when they start a new browser session or do a full page refresh.

8. Optionally, create success rules in the Recommendations section that define which combinations of fields and values indicate a successful Social Object. For more information about defining success rules, see the Recommendations section in the Social Definition Properties Page. Click Save when finished.

Social Definition Properties Page

If the Social Definition specifies that it is Customizable, some of its properties can be changed using the Social Definitions properties page.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Properties</td>
<td>General properties appear at the top of the page. They are not editable.</td>
</tr>
<tr>
<td>Display Name</td>
<td>The name of the Social Definition as it appears in the client user interface.</td>
</tr>
<tr>
<td>Display Name Plural</td>
<td>The plural name of the Social Definition as it appears in the More drop-down list in the client user interface.</td>
</tr>
<tr>
<td>Social Definition Name</td>
<td>The name of the Social Definition as it appears in the administrator user interface. Editable from the Apps page.</td>
</tr>
<tr>
<td>Namespace</td>
<td>Oracle Social Network supports namespacing all the objects under their respective originating applications. The use of namespacing ensures that External IDs remain unique across all Social Object definitions and Social Object instances. In addition to External ID namespacing, you should namespace Social Object field names. Social Definition fields are restricted to the Social Definition namespace and must be unique within the definition.</td>
</tr>
<tr>
<td>Element</td>
<td>Description</td>
</tr>
<tr>
<td>----------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>External ID</td>
<td>The unique identifier for the Social Definition. This identifier uses namespacing to specify the originating application; for example, a Social Definition named Opportunities might have the External ID companyname.crm.opportunities. Editable from the Apps page.</td>
</tr>
<tr>
<td>Group Name</td>
<td>The name of the group, such as CRM. Typically the Group Name corresponds to the name of the System of Record providing data for the Social Definition, but this is not required. In the Oracle Social Network browser client, Social Definitions generally are grouped and displayed in the Social Objects drop-down list.</td>
</tr>
<tr>
<td>Enabled</td>
<td>Shows whether the Social Definition is enabled. Enabled Social Definitions display in the client user interface (if the Social Definition is also Discoverable). Editable from the Apps page.</td>
</tr>
<tr>
<td>Closeable</td>
<td>Shows whether a Social Definition instance (Social Object) can be closed by the end user in the web client interface.</td>
</tr>
<tr>
<td>Deletable</td>
<td>Shows whether a Social Definition instance (Social Object) can be deleted by the end user in the web client interface.</td>
</tr>
<tr>
<td>Updateable</td>
<td>Shows whether a Social Definition instance (Social Object) can be updated by the end user in the web client interface.</td>
</tr>
<tr>
<td>Renameable</td>
<td>Shows whether a Social Definition instance (Social Object) can be renamed by the end user in the web client interface.</td>
</tr>
<tr>
<td>Visibility</td>
<td>These options affect whether users can make Social Definition instances (Social Objects) public, and the default setting for new Social Objects.</td>
</tr>
<tr>
<td>Allow Public (Discoverable) Social Objects</td>
<td>If enabled, the Social Definition displays in the Social Objects drop-down list in the user interface, and users can make Social Objects public in the same way they would make a Conversation public. Public Social Objects appear in search results and in the Available area on the Social Objects page. If disabled, the user does not see the Social Definition or any of its Social Objects unless it is shared with them.</td>
</tr>
<tr>
<td>Default Visibility Setting</td>
<td>Specifies whether newly-created Social Objects are publicly available or members-only by default. After the Social Object is created, users can change this setting.</td>
</tr>
<tr>
<td>Layout Options</td>
<td>These options affect the position of the fields in the Social Object.</td>
</tr>
<tr>
<td>Columns to Display</td>
<td>Specifies the number of columns to use when displaying the Social Object in the user interface.</td>
</tr>
<tr>
<td>Label Position</td>
<td>Specifies whether to display the field name above the field or to the left of the field in the Social Object.</td>

</tr>
</tbody>
</table>
Managing Conferencing Services

Adding a Conferencing Service

A conferencing service lets users run on-demand meetings across many locations. Oracle Social Network lets users start conferences from within the client user interface; for example, while viewing a Conversation you can click **Start Conference**, and all users in that Conversation can see and join the meeting.

Oracle Social Network automatically integrates with the Cisco Web Meetings (WebEx) product. Your environment can integrate with additional conferencing applications. Before you can integrate a new conference service into Oracle Social Network, you need to know the Service URL and the values for any custom properties that apply to the service. For more information about creating a conferencing service, see the *Oracle Social Network Developer’s Guide* (accessible from the developer website).
To add a conferencing service:

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click **Conferencing**. The Conferencing page opens and lists the services.

3. Click **New Service**.

4. Enter the service name and URL, and select options for the service. The fields displayed on the page can vary depending on the type of service you are adding. For more information about fields in the user interface, see **Conferencing Services Properties Page** or (for custom-designed services) consult your application development team.

5. Click **Create**. The detailed properties page displays the new service with the values that you previously entered.

6. Edit any additional desired properties and then click **Save**.

**Editing Conferencing Service Properties**

1. Log in to Oracle Social Network as an administrator.

2. From the Administration UI, click **Conferencing**. The Conferencing page opens and lists the services.

3. Select the service that you want to change. Its properties page opens.

4. Edit the properties of the service. The fields displayed on the page can vary depending on the type of service you are editing. For more information about fields in the user interface, see **Conferencing Services Properties Page**.

5. Click **Save**.

**Conferencing Services Properties Page**

The fields displayed in the properties page vary depending on the configured properties of the conferencing service.

<table>
<thead>
<tr>
<th><strong>Element</strong></th>
<th><strong>Description</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>General Properties</strong></td>
<td>General properties for the service are listed here.</td>
</tr>
<tr>
<td>Service Name</td>
<td>The name of the service.</td>
</tr>
<tr>
<td>ID</td>
<td>Not editable. An identifier assigned by the system.</td>
</tr>
<tr>
<td>Type</td>
<td>Not editable. A identifier assigned by the system for the service type.</td>
</tr>
<tr>
<td>Created</td>
<td>Not editable. Shows the date and time when the service was created. If the service was included in Oracle Social Network, the installation date and time are displayed.</td>
</tr>
<tr>
<td>Last Modified</td>
<td>Not editable. Shows the most recent date and time that configuration changes were made to the service.</td>
</tr>
<tr>
<td><strong>Adapter Settings</strong></td>
<td></td>
</tr>
<tr>
<td>Service Enabled</td>
<td>Enable or disable the service. If a service is disabled, the service properties are not displayed in the client user interface.</td>
</tr>
</tbody>
</table>
After a service is added and Oracle Social Network connects to it successfully, additional service-specific properties might be displayed. For example, the WebEx service displays a property to define the default WebEx site name so that users do not need to specify it themselves.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Service Specific Properties</td>
<td>More or fewer fields might be displayed. The properties that display in this section vary depending on the type of service you are viewing.</td>
</tr>
<tr>
<td>Site Name</td>
<td>The (WebEx) site name. Note that the site name does not include http:// and .com information; for example, if the full URL to the site is <a href="http://acme.webex.com">http://acme.webex.com</a>, you enter acme as the Site Name.</td>
</tr>
<tr>
<td>Corporate ID</td>
<td>An official 512-digit corporate partnership ID.</td>
</tr>
<tr>
<td>Dial-in Phone Number</td>
<td>The phone number of the service, as it would be dialed by a user. Do not include dashes or slashes.</td>
</tr>
<tr>
<td>Plugin ID</td>
<td>The identifier for this service.</td>
</tr>
<tr>
<td>Plugin Password</td>
<td>The login password for the service.</td>
</tr>
<tr>
<td>Session Timeout</td>
<td>The timeout value in seconds.</td>
</tr>
</tbody>
</table>
Deleting a Conferencing Service

When you delete a service, that service is no longer available for conferencing. If a conference is currently occurring on that service, it will end without warning for users.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Conferencing. The Conferencing page opens and lists the services.
3. Select the service that you want to delete; its properties page opens.
4. Click Delete Service.

WebEx Conferencing Service Default Properties

The Cisco Web Meetings (WebEx) conferencing service is included in your Oracle Social Network environment; you do not need to add it or configure it. Do not change settings except at the direction of Oracle Support. If you need to change settings in the future, follow the instructions in Editing Conferencing Service Properties.

If you accidentally delete the WebEx service or change any of its default properties, you can use the following table to restore the original values.

<table>
<thead>
<tr>
<th>Property</th>
<th>Default WebEx Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Service Name</td>
<td>WebEx</td>
</tr>
<tr>
<td>Service Enabled</td>
<td>Selected</td>
</tr>
<tr>
<td>Save User Passwords</td>
<td>Deselected</td>
</tr>
<tr>
<td>Service URL</td>
<td>internal:waggle.webex.meeting</td>
</tr>
<tr>
<td>Use the Oracle Social Network Proxy</td>
<td>Selected</td>
</tr>
<tr>
<td>Site Name</td>
<td>The portion of the URL preceding webex. com. Note that the site name must not include http:// and .com information; for example, if the full URL to the site is <a href="http://acme.webex.com">http://acme.webex.com</a>, you enter acme as the Site Name.</td>
</tr>
</tbody>
</table>

The fields Accept Self-Signed Certificate, Adapter Server User Name, Adapter Server Password, and Site Name are blank by default.

Managing Cloud Document Services

About Cloud Document Services

Cloud document stores, such as Google Drive, Dropbox, and OneDrive, are powerful and popular. Oracle Social Network provides a means for integrating with cloud document stores (also called services) so that users can collaborate on cloud files as easily as on files that originate from the desktop. Oracle Social Network integrates with Google Drive, Dropbox, WebDAV, Oracle Documents, and OneDrive by default. Your configuration might work with more or fewer cloud document stores.
Before you can integrate a new cloud document service into Oracle Social Network, you need to know all the properties that apply to the service. Work with your application development team to get this information.

Oracle Social Network provides a framework that lets developers create applications, called adapters, for other cloud document services. Oracle Social Network supports both OAuth- and credential-based adapters. Source code for the Google Drive adapter and an FTP adapter is provided for developers to use as samples, and all the adapters provided by default in Oracle Social Network were developed using this framework. For information about creating new adapters for Oracle Social Network, see the Oracle Social Network Developer’s Guide (accessible from the developer website).

The following example scenario shows how users might interact with Oracle Social Network to manipulate files stored in Google Drive. In this scenario, Tim is part of the sales team responsible for the Acme account. Acme is a long-time customer and frequently requests proposals for new products. In the past, Tim and his team have shared presentations and proposals with Acme using Google Drive.

Acme has shared a new Request For a Proposal (RFP) with Tim in Google Drive. The file is in Microsoft® Word format. Tim and his team are using OSN for collaboration:

1. Tim creates a new Conversation named RFP for Acme and adds the sales team.
2. In RFP for Acme, Tim wants to create a new message containing the RFP. After he clicks the Add Documents (paper clip) icon, he follows the screen prompts to authorize Oracle Social Networks’s access to his Google Drive account (if this is his first access from Oracle Social Network), and to get the document. Oracle Social Network keeps track of the originating location of the file.
3. In the Conversation, the sales team adds annotations to the RFP.
4. Tim downloads the document to his desktop, edits it to incorporate the annotations, and uploads the new version from his desktop into the Conversation. Steps 3 and 4 repeat until the final version of the RFP is approved by the team internally. Note that having the document in the Conversation allows any member to see the change history of the document by viewing each successive version.
5. After the final RFP version is uploaded to the Conversation, Tim uses the Copy menu, selecting the Copy Back to Google Drive operation, to copy the final RFP back to Google Drive. Oracle Social Network tracked the original location of the file, and places the new document in that same location, replacing the original document.
6. Tim notifies the Acme team that the updated RFP is ready for their approval in Google Drive.

**Configuring the Google Drive Cloud Document Service**

The task of configuring the Google Drive document service provided with Oracle Social Network consists of these parts:

2. Editing the properties of the Google Drive cloud service in the Oracle Social Network Administration UI to add the Client ID and Client Secret from the Google API console.

The following sections describe this task.
Creating the Client ID and Client Secret in the Google API console

1. Navigate to the Google API console at https://console.developers.google.com/project.
2. If you do not already have a Google API project, create a new one, following the prompts in the console.
3. From the Overview page of the Project Dashboard, find the Boost your app with a Google API section and click Enable an API.

On the page that opens, search for Drive API, then click Off to toggle it to the On setting.

4. Navigate to APIs & auth, then Consent screen. Enter a product name, and optionally enter a path to a hosted logo image. The logo image displays on the authorization page when a user chooses to authorize Google Drive in Oracle Social Network.

Note: Although providing a logo is optional, we recommend that you do so; otherwise, a “missing image” indicator appears in the authorization page.

5. Navigate to APIs & auth, then Credentials, then OAuth, then Create New Client ID and follow the instructions in the user interface to create a Client ID.
   - For the Application Type, select Web application.
   - For the Authorized JavaScript Origins field, clear the value (leave it empty).
   - For the Authorized Redirect URIs field, use the value that displays in the Oracle Social Network properties page for the Google Drive service. This property provides the URL that the Google Drive service should redirect to after granting authorization.

6. Take note of the Client ID and Client Secret that display. You will use these values in the Oracle Social Network properties page for Google Drive in the next part of the process.

Adding Client Information to the Google Drive Service in the Administration UI

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Cloud Documents. The Cloud Documents page opens and lists the services.
3. Select the Google Drive service to open its properties page.
4. Enter the values for the Client ID and the Client Secret from the Google API console into those service-specific fields.
5. Click Save.

Adding an OAuth Cloud Document Service

The steps to add an OAuth-based cloud document service are similar to those for Google Drive. First you generate values for the key and secret (called an App Key and App Secret in Dropbox) using the developer tools for that service; then you follow the instructions for a credential-based service and enter all the required information, including the key and secret.
Adding a Credential-Based Cloud Document Service

The information you need in order to add a credential-based cloud document service varies according to the service, but you always need the address (URL) of the server. Follow these steps and provide the information that applies to the service.

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Cloud Documents. The Cloud Documents page opens and lists the services.
3. Click New Service.
4. Enter information about the cloud document store name and URL, and select options for the service. The fields displayed on the page can vary depending on the type of service you are adding. For more information about fields in the user interface, see Cloud Document Services Properties Page or (for custom-designed services) consult your application development team.
5. Click Create.

Editing Cloud Document Service Properties

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Cloud Documents. The Cloud Documents page opens and lists the services.
3. Select the service that you want to change. Its properties page opens.
4. Edit the properties of the service. The fields displayed on the page can vary depending on the type of service. For more information about fields in the user interface, see Cloud Document Services Properties Page.
5. Click Save.

Cloud Document Services Properties Page

Note that the content displayed in the Service Specific Properties section of the page varies depending on the cloud service you are modifying.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Properties</td>
<td>These properties are at the top of the page.</td>
</tr>
<tr>
<td>Cloud Document Store</td>
<td>The name of the document store. This can be any name you prefer; it does not have to match the Google project name.</td>
</tr>
<tr>
<td>Name</td>
<td></td>
</tr>
<tr>
<td>ID</td>
<td>Not editable. An identifier assigned by the system.</td>
</tr>
<tr>
<td>Type</td>
<td>Not editable. An identifier assigned by the system for the service type.</td>
</tr>
<tr>
<td>Version</td>
<td>Not editable. Shows the version or release number of the service, if the adapter developer provided one.</td>
</tr>
<tr>
<td>Created</td>
<td>Not editable. Shows the date and time when the service was created.</td>
</tr>
<tr>
<td>Last Modified</td>
<td>Not editable. Shows the most recent date and time that configuration changes were made to the service.</td>
</tr>
<tr>
<td>About</td>
<td>Not editable. Shows general information about the service, if the adapter developer provided it.</td>
</tr>
<tr>
<td>Authorization Redirect URL</td>
<td>Not editable. The URL for returning to Oracle Social Network after granting authorization, such as a specific page served by the Oracle Social Network server. Use this URL when creating a Client ID using the Google API console.</td>
</tr>
</tbody>
</table>
### Adapter Settings
These are general properties for the cloud document adapter.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enabled for End Users</td>
<td>Enable or disable the service for end users. If a service is disabled, the service is not displayed in the client user interface and users can't use the service to copy files to or from it; however, communication between Oracle Social Network and a disabled service can still occur, to get information such as its localized name and configuration data. <strong>Note:</strong> To enable an adapter, the <strong>Adapter Online</strong> option must also be selected.</td>
</tr>
<tr>
<td>Adapter Online</td>
<td>Enable or disable communication with the service. If the service is offline, Oracle Social Network can’t send any requests to it. Deselect this option if the service is no longer accessible to Oracle Social Network.</td>
</tr>
<tr>
<td>Save User Passwords</td>
<td>If selected, and if a password is relevant for the specific service, the client user interface allows users to set and save their passwords in their settings. For example, in the web client the user can set passwords in the <strong>Cloud Documents</strong> section of <strong>Settings</strong>. If this option is disabled, the <strong>Password</strong> field does not display in the web client; in this case, when the user selects to use the service, a popup window displays for the user to enter a password.</td>
</tr>
<tr>
<td>Prominent</td>
<td>Specifies whether the service instance is prominent in the client user interface. Prominent services are easier for users to find; their actions are included in the Add and Copy menus. For example, when the user clicks the <strong>Add Documents</strong> button, prominent services are shown in the pop-up menu. Non-prominent services are listed in the standard cloud document store list (after the user clicks <strong>Add Document</strong> and then clicks <strong>Add from Cloud Document Store</strong>). If an Oracle Documents service is enabled in your environment, it is prominent by default. If more than one service is prominent, they are sequenced alphabetically by adapter name.</td>
</tr>
<tr>
<td>Copy or Link</td>
<td>Specifies whether the service is a Copy service or a Link service. When users add files from a Copy cloud document store, a copy of the file is created in Oracle Social Network. Users can download that copy. When users add files from a Link cloud document store, a read-only rendition of that file is created in Oracle Social Network with a link to the original. The file can't be downloaded from Oracle Social Network.</td>
</tr>
<tr>
<td>Adapter Server URL</td>
<td>The address of the server. The format is similar to <code>https://companyname.com:&lt;port&gt;/cds-server-gdrive/rest/api</code>.</td>
</tr>
<tr>
<td>Use the Oracle Social Network Proxy</td>
<td>Specifies whether or not to use the Oracle Social Network proxy when communicating with the adapter.</td>
</tr>
<tr>
<td>Accept Self-Signed Certificate</td>
<td>Specifies whether or not to accept an identity certificate that is signed by the same entity whose identity is being certified.</td>
</tr>
<tr>
<td>Adapter Server User Name</td>
<td>The user name for the adapter. This property is applicable if the adapter server is a “user” from the perspective of the cloud document service and needs to log in.</td>
</tr>
<tr>
<td>Adapter Server Password</td>
<td>The password for the Oracle Social Network instance. This property is applicable if the adapter server is a “user” from the perspective of the cloud document service and needs to log in.</td>
</tr>
</tbody>
</table>

### Service Specific Properties
The properties vary depending on the type of service you are viewing. More or fewer fields might be displayed in this section.

**Note:** That the proxy settings in this section control whether or not the cloud document adapter uses a proxy when communicating with the service provider (for example, google.com).
Deleting a Cloud Document Service

You can’t delete a service; services must be preserved in order to maintain historical information about documents that have been copied to and from the document store. However, you can disable the service so that end users can’t access it, or assign a status of Offline to stop all communication with the service. For more information about these properties, see Cloud Document Services Properties Page.

Managing Federated Authentication

When to Configure Federated Authentication

Federated authentication support is required when you are using Oracle Social Network in an Oracle Cloud environment (such as Oracle Sales Cloud or HCM) and you require user authentication using your own identity management provider. For example, you might be using an on-premise authentication solution in your environment, or a Cloud-based provider. In this situation, you must define URLs to be used at specific points during the automatic client authentication process.

In addition, you use the federated authentication settings to help mobile client users define their account settings after installation, based on their existing browser client account settings. With the standard authentication process, no special configuration is required. However, if you use a custom login page (you might need to do this if your users provide a PIN number, captcha, or other information to log in), you must define properties for your Login URL, Login Success URL, and so on, so that Oracle Social Network can send the client user to the correct destinations during the login process.

Editing Federated Authentication Properties

To edit the federated authentication properties:

1. Log in to Oracle Social Network as an administrator.
2. From the Administration UI, click Federated Authentication. The Federated Authentication properties page opens.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HTTP Proxy Hostname</td>
<td>The proxy hostname for use when connecting from the adapter to the service. If you leave the field blank, the proxy is disabled. If a proxy is required, but has been disabled, an error occurs when a connection is attempted.</td>
</tr>
<tr>
<td>HTTP Proxy Port</td>
<td>The HTTP proxy port number for use when connecting from the adapter to the service. If you leave the field blank, the default value of 80 is used.</td>
</tr>
<tr>
<td>HTTP Proxy Scheme</td>
<td>The HTTP proxy scheme for use when connecting from the adapter to the service. If you leave the field blank, the default value of http is used.</td>
</tr>
<tr>
<td>ID/Key</td>
<td>Applicable only to OAuth services. For a description of how this value is obtained for Google Drive, see Creating the Client ID and Client Secret in the Google API console.</td>
</tr>
<tr>
<td>Secret</td>
<td>Applicable only to OAuth services. For a description of how this value is obtained for Google Drive, see Creating the Client ID and Client Secret in the Google API console.</td>
</tr>
</tbody>
</table>
3. Edit the properties. For more information about fields in the user interface, see Federated Authentication Properties Page.

   Note: The URL properties display after you select the Enabled option.

4. Click Save.

Federated Authentication Properties Page

These properties are applicable only if you require user authentication using your own identity management provider.

<table>
<thead>
<tr>
<th>Element</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable Federated Authentication URLs</td>
<td>When enabled, the URL property fields are displayed. Select this option only if you require user authentication using your own identity management provider. Note: The Federated Authentication page does not control whether or not another authentication is enabled; you work with Oracle Support to configure that process outside the Administration UI.</td>
</tr>
<tr>
<td>Login URL</td>
<td>Required. Specify the URL to which the user will be taken to log in, in the format http[s]://&lt;host&gt;:&lt;port&gt;/&lt;path&gt;. For example: <a href="https://companyname.com:12345/osn/federatedLogin.html/">https://companyname.com:12345/osn/federatedLogin.html/</a></td>
</tr>
<tr>
<td>Logout URL</td>
<td>Required. Specify the URL to which the user will be taken to log out, in the format http[s]://&lt;host&gt;:&lt;port&gt;/&lt;path&gt;. For example: <a href="https://companyname.com:12345/oam/server/federatedLogout/">https://companyname.com:12345/oam/server/federatedLogout/</a></td>
</tr>
<tr>
<td>Login Success URL</td>
<td>Required. Specify the URL to which the user will be taken at the completion of a successful login, in the format http[s]://&lt;host&gt;:&lt;port&gt;/&lt;path&gt;. For example: <a href="https://companyname.com:12345/fedauthcompleted/?authentication=success">https://companyname.com:12345/fedauthcompleted/?authentication=success</a></td>
</tr>
<tr>
<td>Login Failure URL</td>
<td>Required. Specify the URL to which the user will be taken after an unsuccessful authentication, in the format http[s]://&lt;host&gt;:&lt;port&gt;/&lt;path&gt;. The user is authenticated by your server, which you configure with a maximum number of login attempts; after the user fails to authenticate in that number of tries, the failure URL is used. For example: <a href="https://companyname.com:12345/fedauthcompleted/?authentication=failed">https://companyname.com:12345/fedauthcompleted/?authentication=failed</a></td>
</tr>
</tbody>
</table>
Collaborating Through Social Networking for Outside Users

This section talks about features available to you when you collaborate with a company as an outside user using social networking.

- "Using Social Networking to Collaborate as an Outside User"

**Using Social Networking to Collaborate as an Outside User**

**What does social networking have to do with my job?**

As an outside user (partner, supplier, or such), you can use the social network to collaborate with internal users in the company.

Whether you’ve been invited to collaborate on a particular project or you collaborate regularly as a partner, the social network provides the following features to make that collaboration easier:

- Have an ongoing Conversation about an issue. Anyone new that joins the Conversation can quickly get up to speed on what’s already been done or said.
- Share presentations and other documents and get input from other team members. Web conference and juggling email responses not required.
- Know when you need to review or respond to something by viewing your flagged items.
- Get real-time notifications about updates to key Conversations.

**How do I view the social activity?**

Depending on the company you’re working with, you might access social activity through a Social application or through a Social panel in the company’s application:

- If you were invited to join a Conversation via an email, click the link in the email.
- If you have access to the company’s application, while viewing the landing page, click the Social icon, or in the Navigator, click Social.

The Social application or panel opens, showing the Overview page with the most recent messages in all Conversations that are available to you.

You can also see the most recent messages in the Recent Activity section on the right side of the Social application or panel. It includes the following sections:
■ **Recent Activity**—Displays the most recent messages in all Conversations that are available to you.

■ **Trending**—Displays the Conversations that are available to you with the most people in them at the moment. It also shows any conferences running in Conversations you’re a member of. Click to join the conference.

**Note:** If you don’t see the sections on the right, your browser window is not wide enough. Expand your browser window to see it.

### How do I collaborate with the people I'm working with?

First someone in the company you’re working with invites you to participate in a Conversation in their social network. The Conversation includes messages centered around the business situation you’re collaborating on.

In the Conversation, you also see the members participating in the Conversation. Each member has an picture to show you what they look like or how they want to represent themselves. A colored border appears around the picture to indicate people's presence—that is, whether they are online (a dark green whole circle), online but inactive (a yellow three-quarter circle), or offline (a gray half-circle).

**Note:** You and other people outside the company you’re working with (outside users) have a special avatar ( ) and have names in purple text.

You can click a user name or picture to navigate to that person’s profile, where you can see information such as the person's title, organization, email, and possibly other contact information.

### How do I edit my profile?

To edit your personal information or picture on your social network profile:

1. From the navigation on the left, click **My Profile**.
2. On your profile, click **Edit Profile**.
3. Edit your personal information. Don’t forget to add a bit about what you do in the **Description** box under **Basic Information** and your contact information in the boxes under **Contact Information**.

   **Note:** Some information is read only. If you need to change the read-only information, contact your administrator.

4. To change your profile picture, click it, then select **Upload Photo**. Select a .gif, .png, or .jpg file. After you select a picture, you can use the crop tools to re-size it. Your picture is scaled to 150x150 pixels square.

   **Note:** If you use Mozilla Firefox and JAWS, you must disable pop-ups before you upload a profile picture. If you don’t disable pop-ups, the upload dialog won’t appear.

### How do I work with messages?

**To add a message:**

1. Open the Conversation.

2. In the text box at the bottom of the display, type your message.

   Formatting options are available beneath the text box after you click it. Hover over the icons to see what they do.
3. Click Post.

To add a link to another item:
While writing a message, you might find it handy to link to a Conversation or
document, or folder. Here’s how:
1. While writing your message, click under the text box to open the Insert
   Reference dialog.
2. Select a source:
   - Recent Items—To select from items you’ve visited recently
   - Viewed Documents—To select from files you’ve opened recently
   - Favorites—To select from items you’ve marked as a favorite
   - Search Results—Type text into the search box, then press Enter to search for
     an item
3. Select the item you want to refer to.
4. Click Insert to add a link to your selection to the message field.
5. Optionally, enter text before or after the reference link.
6. Click Post.

To reply to a message:
Click Reply under the message.

To like a message:
Click Like under the message.

Tip: To see who has liked a message, click the link that shows the number of people
who have liked it.

To mark a message as read or unread:
Click the blue dot next to a message to mark it as read.

To mark a message as unread, click More under the message, then click Mark as
Unread.

To edit a message:
Click More under the message, then click Edit.

Notes:
- You can edit only your own messages.
- Any special markup on a message is lost when you edit the message.

To delete a message:
You can delete only messages you posted.

Click More under the message, then click Delete.

To restore a deleted message, locate the deleted message icon ( ) where the message
used to be, click , then confirm that you want to restore the message.

Note: Only a service administrator, the person who posted the message, or the person
who deleted the message can restore the deleted message.
How do I show or hide membership messages in a Conversation?

To show or hide membership messages in your view of a Conversation:

1. Open the Conversation.
2. Click ☰, then select:
   - **Hide Membership Messages** to hide messages like, *The Conversation is now accessible to: John Doe.*
   - **Show Membership Messages** to show these messages in the stream of the Conversation

*Note:* To set your default preference for showing or hiding membership messages, click your user name at the top of Oracle Social Network, click **Settings**, then, under **Preferences**, select the option you want.

How do I mark a Conversation as a favorite?

Next to the Conversation name or message, click ✭.

To view your favorite Conversations, navigate to the list of Conversations (from the navigation menu on the left, select Conversations), click **Show**, then click **Favorites**.

To view all your favorites, including messages, from the navigation menu on the left, select **Favorites**.

You can filter or sort your favorites to change your view.

- To filter your favorites by object type (for example, messages, documents, or groups), select an option from the **Show** menu.
- To sort your favorites, select options in the **Sort by** menu: sort by options (Date Added or Name), and the order you want them sorted in (Ascending or Descending).

How do I share a document with others?

1. Open the Conversation where you want to share the document.
2. Click the text box to show additional options, then click ☑️ and select a document.
3. Optionally, in the text box add a message to post with the document.
4. Click **Upload**.

   Your document, with any message you added, is posted to the Conversation.

How do I view a file?

There are several ways to view a file:

- To open a preview of the file in Oracle Social Network, click the file's thumbnail.

*Notes:*
- Document previews are limited to the first 100 pages of a document.
- The list of file types you can preview is long, but there are some file types you can’t preview, like an archive or executable file. Oracle Social Network supports adding these types of files but not previewing them. For these file types, you can download the file and open it on your computer.
If the file was added from a cloud document store, you can open the file in the cloud document store’s viewer. Under the document, click **Open Document in Cloud Document Store**, where *Cloud Document Store* is the name of the cloud document store.

**Note:** To open the file, you must have permission to the file in the cloud document store. If you don’t have permission, you get an error when you try to open it.

To download a file and open it on your computer, click **Download** under the document.

**Note:** If the document is from a cloud document store, a browser window opens, where you can download the file or view the online preview of the file. To download the file, you must have permission to the file in the cloud document store. If you don’t have permission, you get an error when you try to download it.

To view a list of all documents and folders in a Conversation, click the **Documents** tab.

**How do I delete a document?**

You can delete documents you posted. Under the document you want to delete, click **More**, then select **Delete**.

**Notes:**

- Service administrators can delete any document.
- If a document has multiple versions, and you delete the document from the messages list (rather than from the **Documents** tab), you delete only the selected version.
- Deleting a document or document version deletes it for all members of the Conversation.

**How do I view document annotations?**

Annotations provide a way to comment on a document. You can view annotations when previewing the document.

1. Open a preview of the file. For more information, see **How do I view a file?**
2. Optionally, filter your view of annotations by user. Click the annotations drop-down list to select **All Annotations**, **No Annotations**, or a particular person.

**Note:** As an outside user, you can’t add annotations.

**How can I alert people to an important message?**

You can assign a flag on the message.

Every message posted to a Conversation or wall shows a flag icon that tells you instantly whether a flag is assigned on the message. For example:

- If the flag icon is hollow ( ), then no flag is assigned on the message.
- If the flag icon is not hollow ( )—that is, it’s a solid color, possibly with secondary marker on it—then one or more flags are assigned on the message.

There are several types of flags:

- **For Your Information** (flag with "i")—Look at this when you have time.
- **Please Reply** (flag with black arrow)—Look at this, and let me know what you think.
Please Reply - Urgent (flag with red arrow)—Look at this now, and let me know what you think immediately. (An email notification is always sent for Please Reply - Urgent flags.)

To get more information about a flag, you can either mouse over the flag to see a tooltip (for example, 'For Your Information flag for another from Name.') or click the flag icon to see all the flag assignments.

To manage flags on an individual message:
1. Click the flag icon next to the message.
2. Assign or clear flags:
   - To remove a flag assigned to you, click \(\times\).
   - To quickly assign a For Your Information flag to someone, click the flag next to the person.
   - To assign a particular flag to someone, select the type of flag in the drop-down list next to the person.
   - To quickly flag everyone, click Flag All (in the Not Flagged section), and select the type of flag you want to assign.
   - To quickly remove all flags (whether assigned by you or not), click Clear All (in the Others Flagged section).
   - To remove a particular flag, click \(\times\) next to the person.
   - To search for someone, enter part of the person's name in the search box.

How can I see all flags assigned to me or by me?
To view your flags, from the navigation menu on the left, select Flags.
You can filter or sort the flags to change your view.
- To view flags you assigned to yourself or others, click Flags You Assigned. To return to the flags assigned to you, click Flags for You.
- To filter the flags by type, click Show, then select an option: All, For Your Information, Please Reply, or Please Reply - Urgent.
- To sort the flags, click the current sort option (Flag Date or Message Date), then select what you want to sort by and the order you want them sorted in (Ascending or Descending).

For more information on flags, see How can I alert people to an important message?

What are hashtags (#) and how do I use them?
You can use a hashtag (#) in a message to call out a meaningful term or topic, making it easy to find all content associated with that term or topic. For example, imagine discounts is a popular topic in your group, but the discounts can come in the form of dealer incentives, cash-back deals, seasonal discounts, or any other number of forms. How do you find what everyone is saying about all those things? You use a hashtag. Every time you or your colleagues say something about some form of discount, you include the hashtag #discounts.

You can then click a #discounts hashtag link to view a list of all messages in otherwise unrelated Conversations that contain the hashtagged term.
Adding Hashtags
You can add one or more hashtags to any message (comments, replies, and document messages) simply by typing "#" before a term. When you start typing a hashtag by typing "#" plus at least one letter, existing hashtags (ones that have been used before) appear for you to select from.

Tips:
- You can include the following characters in a hashtag: A through Z, a through z, 0 through 9 and _.
- A hashtag can be a maximum of 25 characters (not including the "#”).

Viewing Hashtags
Wherever you see them, hashtagged terms are clickable and will open a hashtag page where all messages that include that hashtag are shown. So clicking #discounts in any Conversation opens a #discounts page which shows any message that you have access to that includes the discounts hashtag.

How do I search?
You can do a global search from the search box at the top of the Social panel, or you can search within a Conversation.

Performing a global search:
1. Enter at least two characters in the search box at the top of the Social panel, then press Enter or click Q.
2. Optionally, select a filter from the Show menu to show a particular result type (for example, Conversations or documents).
3. After filtering by a result type, you see some additional sort and filter options:
   - **Sort By**: Select how to sort your results.
   - **Posted By**: Limit your search to messages or documents posted by a particular person.
   - **Posted When**: Limit your search to messages or documents posted within a particular period.
   - **Updated By**: Limit your search to Conversations, collections, hashtags, or Social Objects updated by a particular user.
   - **Updated When**: Limit your search to Conversations, collections, hashtags, or Social Objects updated within a particular period.
   - **Created By**: Limit your search to Conversations, collections, groups, or Social Objects created by a particular user.
   - **Created When**: Limit your search to Conversations, groups, or Social Objects created within a particular period.
   - **Includes Member**: Limit your search to Conversations, collections, groups, or Social Objects with a particular member.
   - **Favorites Only**: Limit your search to only your favorite Conversations, collections, or Social Objects.
   - **Include Public**: Control whether to show public Conversations, collections, or Social Objects in your results.
- **Include Closed**: Control whether to show closed Conversations, collections, or Social Objects in your results.

- **Document Type**: If you filter your results to show documents, you can select which types of documents to show.

- **Include Deactivated**: Control whether to show deactivated groups in your results.

If you don’t see an option that applies to your selected item type, click to show more options.

Click a result to open it.

**Searching within a Conversation:**

- To find unread messages, click the unread messages count (2) in the toolbar, and use the up and down arrows (↑ ↓) to navigate through the unread messages.

- To find flags assigned to you, click the flag count (2) in the toolbar, and use the up and down arrows (↑ ↓) to navigate through your flags.

- To find text in the messages or documents, click the search icon in the toolbar, enter the text you want to search for, then press Enter. The matching text is highlighted in the messages. Use the up and down arrows (↑ ↓) to navigate through the results.

How do I start a chat with someone?

Other users can start a one-on-one chat with you. You can respond to these messages the same way you would any other Conversation. If the other person is not available now, they’ll see your message the next time they’re active in the social network.

**Note**: As an outside user, you can’t initiate a chat with another user.

How do I mute or unmute a Conversation?

If you have items in your object lists that you never look at (for example a Conversation that doesn't apply to you), or you’re seeing updates in your recent activities or in your email digests about items you don’t care about, you can mute those items. Muting an item hides it and its activity from your view. It’s still there; you just won’t hear about it anymore. (The only exception is if you’re flagged on a message in a muted item, for which you will still be alerted by email based on your notification settings.)

**To mute an item:**
1. Open the Conversation.
2. Click , then select **Mute Conversation**.

A banner appears at the top, showing that the Conversation is muted.

**To unmute an item:**
1. From the navigation menu on the left, select **Conversations**.
2. Click **Show**, then select **Muted**.

3. Click a Conversation to open it.

4. In the banner showing that the item is muted, click **Unmute**.
   - If you dismissed the banner, click ⏰, then select **Unmute Conversation**.

**How can I view a list of closed Conversations?**

A closed Conversation is a Conversation that doesn't allow people to post new messages or documents to it. By default, your list of Conversations shows only open Conversations.

To view closed Conversations, navigate to the list of Conversations (from the navigation menu on the left, select **Conversations**), click **Show**, then click **Closed**.

**How do I start a web conference?**

Before you can start a web conference:

- The server you are connected to must support online conferences.
- You must have an account with a supported online conference service.

1. Open the Conversation where you’re going to start a web conference.

2. Click 📚, then select **Start Conference**.

3. In the Start Conference dialog, select your conference service, set the values as necessary, then click **Start**.
   - **Note:** If you want to save your conference settings, select **Remember Conference Settings**.
   - Your web conference application opens.

To end the conference, click ⏪, then select **End Conference**.

**How do I join a web conference?**

On the Conversations list, click ⌘ next to the Conversation name. The Conversation opens and takes you right into the conference.

Alternatively, while viewing a Conversation, click **Join** in the banner at the top of the Conversation; or click 📚, then select **Join Conference**.

To leave the conference, close the conference window.

To rejoin the conference, return to the Conversation and click **Rejoin** in the banner; or click 📚, then select **Rejoin Conference**.

- **Note:** Your administrator might disable web conferencing in your application instance.

**How is the social network accessible?**

You can use your keyboard to navigate your social network. To see a list of keyboard shortcuts, make sure focus is in the social network area of your application, and press the question mark key (?). For more information, see What keyboard shortcuts are available to the social network?

**Tips**

- To navigate between list items and messages, use up and down arrow keys.
To navigate into the elements of a listed item, like a Conversation, press Shift+Enter.

To manage flags in the Manage Flags pop-up, press Enter to assign or change a flag, or press Delete to clear a flag.

When you press Esc to close a dialog, focus moves to the button used to open the dialog, even if you used a keyboard shortcut to open the dialog.

Notes:

- The supported screen reader browser is Mozilla Firefox 26 or later with the latest version of your screen reader software.
- If you use a Mac, by default Tab moves to the next object that isn’t a link. Therefore, to move to the next tappable element, you must use Option+Tab or change your browser preferences to switch the behavior.

What keyboard shortcuts are available to the social network?

Your social network offers keyboard shortcuts and support for keyboard navigation. To see a list of keyboard shortcuts, make sure focus is in the social network area of your application, and press the question mark key (?).

Note: If you’re using a screen reader, the social network keyboard shortcuts work only if your focus is in application mode (for example, in a list of messages in a Conversation), so they won’t otherwise interfere with your screen reader’s keyboard shortcuts. However, you can use your screen reader’s pass-through or bypass functionality if you want to use the social network keyboard shortcuts outside of application mode.

Keyboard shortcuts are available for the following types of actions:

- **Application**—Use these shortcuts anywhere they are relevant in the application. For example, pressing ESC works when you’re in a menu or dialog, and doesn’t work when you’re not; pressing “j” or “k” works in a list, but doesn’t work outside a list.

- **Jumping**—Use these shortcuts anywhere in the application. They jump you to a different view or to the current view’s navigation actions.

  Note: Jumping shortcuts are available only when the navigation menu is in view. When the navigation menu is not in view, the social network does not respond when you use jumping shortcuts.

- **List Actions**—Use these shortcuts with the list item that currently has focus.

- **Conversation Actions**—Use these shortcuts within Conversations.

  Note: Some of these shortcuts work regardless of the current focus, for example, “t,” “b,” “o,” “u.” Some of them operate differently depending on the current focus, for example, in a Conversation “m” and “v” mark all messages as read and mark/unmark the Conversation as a favorite; on a message, “m” and “v” mark the message as read and mark/unmark it as a favorite.

- **Message Actions**—Use these shortcuts with the message that currently has focus.

- **Post and Reply Entry Actions**—Use these shortcuts within the post and reply entry areas.

You can add one or more hashtags to any message (comments, replies, and document messages) simply by typing “#” before a term. When you start typing a hashtag by typing “#” plus at least one letter, existing hashtags (ones that have
been used before) appear for you to select from. Use the up and down arrows to select an existing hashtag, then press Enter or Tab to use the selected hashtag. For more information, see What are hashtags (#) and how do I use them?

How do I change my notifications settings, preferences, and conference settings?

You can configure settings in Oracle Social Network to personalize your experience:

- Notifications let you know when certain events occur in Oracle Social Network, like when someone flags you, or when someone clears a flag that you have set. You can set up your notifications to send emails just for the events you’re interested in.
- Use preferences to customize your Oracle Social Network experience, like your interface language and date format.
- You can enter your conference account information so that when you join a conference you don’t have to enter the information each time.

To configure your settings:

1. Click your user name at the top of Oracle Social Network, then click Settings.
2. Use the settings under Notifications to:
   - Confirm your email address where notifications will be sent. If it’s incorrect, change it yourself if you can or, if the email address is not editable, inform your administrator.
   - Select which events you want to be notified about.
     Note: You are always notified when a Please Reply - Urgent flag is assigned to you.
   - Select whether you want a daily email summary of all the activity in your Conversations.
   - Set your desired time and date stamp format.
3. Use the settings under Preferences to:
   - Change your interface language or date format.
     If you change the primary language, all the buttons, labels, and so on are changed to the language you choose. The things you supply, like messages and documents, are in the language used when you posted the message or when the file was created.
   - Specify whether to use the Enter key or the Post key to post messages.
   - Control whether you see a message every time someone joins or leaves a Conversation.
   - Mark all messages in every Conversations as read, so you don’t have to do it on a Conversation-by-Conversation basis.
4. Use the settings under Conferences to enter your account information (such as user name and password) for the web conferencing application you use.
