# Known Issues and Deprecated Features

This section describes issues associated with Oracle Transactional Business Intelligence Enterprise.

**Topics:**

- [Known Issues](#)
- [Deprecated Features/Commands](#)

## Known Issues

**Topics:**

- [HR Executive dashboard - Treemap Header Does Not Display Aggregate of Children](#)
- [HR Executive dashboard - Line of Business Tree Map Shows Color As High Irrespective of the Data](#)
- [HR Executive Dashboard - Back to Global Summary Link Resets Filters](#)
- [HR Executive Dashboard - Axis sorting On 'New Hire Performance By Recruitment Source' Report](#)
- [Reports in Analytics Library Folder Do Not Render](#)
- [Graph Disappears At Selection of Certain Filters](#)
- [Load Plan Execution Status Does Not Show Error in Oracle BI Applications Configuration Manager](#)
- [Ignore Non-Fusion Applications FSM Tasks](#)
- [Reports Show Zero or Missing Data If Pre-requisite Product Not Implemented](#)

### HR Executive dashboard - Treemap Header Does Not Display Aggregate of Children

The treemap on the Workforce Health Summary page of the HR Executive dashboard displays the parent department box with child departments within. However, the metric displayed for the parent department will only apply to the parent, not an aggregate of the child departments.

## HR Executive dashboard - Line of Business Tree Map Shows Color As High Irrespective of the Data

The treemap on the Workforce Health Summary page of the HR Executive dashboard will display the High range color when all values are 0.

## HR Executive Dashboard - Back to Global Summary Link Resets Filters

The 'Back to Global Summary' link in the HR Executive Dashboard resets filters to the default values for the Dashboard.

## HR Executive Dashboard - Axis sorting On 'New Hire Performance By Recruitment Source' Report

The horizontal axis of the New Hire Performance By Recruitment Source report on the Talent page of the HR Executive Dashboard displays 12, 24, 6 months.

**Workaround:** Edit the report definition to add a space before the 6 in the column formula for '6 Months' to force the sorting to be 6, 12, 24 months.

## Reports in Analytics Library Folder Do Not Render

Reports in the Human Capital Management/Analytic Library/ folder might not render properly without applying filters. The reports are designed with filters that are supplied when the report is placed on a dashboard.

**Workaround:** Make sure that reports are placed on dashboards with dashboard prompts to filter the report data, or customize the reports to include filter prompts to limit the volume of data returned.

## Graph Disappears At Selection of Certain Filters

If there is no data for a selected column, including the column selector drop down, then a graph that is controlled by the column selector drop down will disappear. Because the drop down is no longer visible, the selection cannot be changed to another column. For example, in the HR Executive Dashboard's Talent page, the graph Performance Detail includes a drop down column selector. If the selection does not return any data, then the column selector and graph will disappear from the page.

**Workaround:** Refresh the page to restore the default view for the graph.

## Load Plan Execution Status Does Not Show Error in Oracle BI Applications Configuration Manager

While monitoring execution of long running load plans in Oracle BI Applications Configuration Manager, to troubleshoot the status displayed at load plan level, you must review the status of individual steps of a load plan.

## Ignore Non-Fusion Applications FSM Tasks

In FSM, the task 'Configure Enterprise List' might be erroneously displayed in non-Fusion Applications Implementation Projects, and should be ignored in that context.

## **Reports Show Zero or Missing Data If Pre-requisite Product Not Implemented**

Reports on a dashboard will display a 0 or (Missing Data) in cases where the associated pre-requisite product is not implemented. For example, a report that displays recruiting data will show 0 or (Missing Data) where Taleo or external recruiting data is not loaded. Another example would be reports that display payroll cost data where a Fusion Payroll or external recruiting data is not loaded.

## **Deprecated Features/Commands**

There are no deprecated features or commands at present.
