Send Us Your Comments

Oracle® Workforce Management Cloud Getting Started Guide, Update 20B

Part No. F29971-01

Oracle welcomes your comments and suggestions on the quality and usefulness of this publication. Your input is an important part of the information used for revision.

- Did you find any errors?
- Is the information clearly presented?
- Do you need more information? If so, where?
- Are the examples correct? Do you need more examples?
- What features did you like most about this manual?

If you find any errors or have any other suggestions for improvement, please indicate the title and part number of the documentation and the chapter, section, and page number (if available). You can send comments to us in the following ways:

- Electronic mail: "Email Id"

If you would like a reply, please give your name, address, telephone number, and electronic mail address (optional).

If you have problems with the software, contact Support at <https://support.oracle.com> or find the Support phone number for your region at <http://www.oracle.com/support/contact.html>.

Preface

This document provides you the basic instructions on basic user configuration for Oracle Workforce Management Cloud. Oracle Workforce Management Cloud was formerly known as LogFire Workforce Management.

Change History

Date	Document Revision	Summary of Changes
08/2017	01	Initial publication.
03/04/2019	02	Updated screens and content.
03/24/2020	03	Updated for 20B.

1. System Overview

1.1 Parent-Child Company Hierarchy

In Oracle Workforce Management Cloud (WFM), companies are divided into parent and child companies. This structure exists in order to help 3PLs view and manage their clients' workforce separately. Depending on how many clients and how many warehouses the 3PL has, views can be managed.

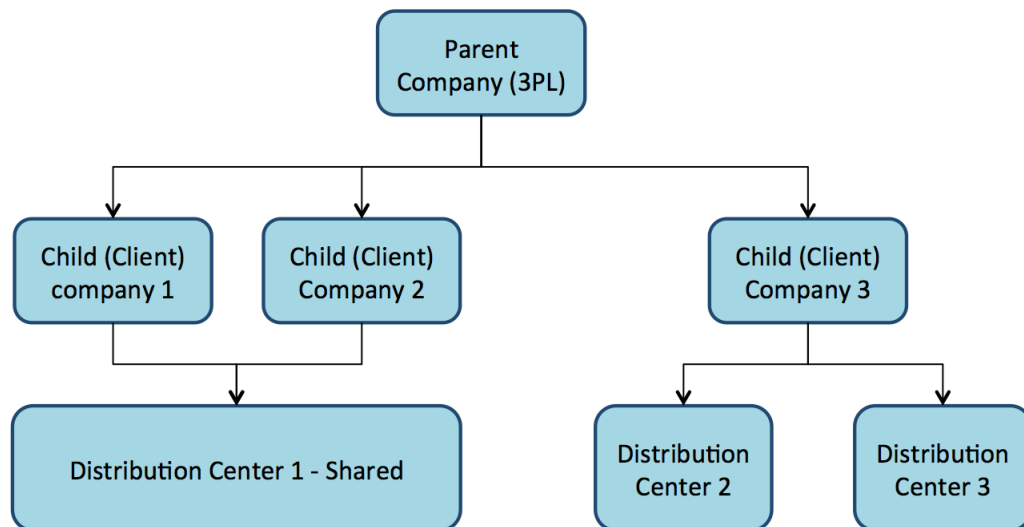

Figure 1-1: Parent-Child Company Example Diagram

To toggle a specific Distribution Center (DC) view for a company, select the choices from the two drop-down menus located at the top right of the UI screen.

In Figure 1-2, the first drop-down indicates a facility (DC), while the second drop-down denotes the companies operated within that facility:

Figure 1-2: Facility and Company Views from the UI

1.2 User Menu Configuration

Oracle Workforce Management Cloud organizes user structure in the following way:

Figure 1-3: User, Group and Menu Organization

1.2.1 Users, Groups and Menus

Users are separated into groups based on their operational purpose in the warehouse. Every user within a group shares the same user interface (UI) and radio frequency (RF) menus. Within each menu, you can configure user permissions and parameters for RF menus.

1.2.2 What is a UI menu?

The UI menu is a series of views that are accessible to you in the WFM via the browser. A menu view allows you to create a UI menu and add the menu to a group. See Figure 1-4.

Users	Work Area	Clock	Groups	Menus	Work Area Activity	Break View	Daily Activity Track	Modules	Equipment Type	Screens	Companies

Figure 1-4: User Interface (UI) Menu

1.2.3 What is an RF menu?

The RF menu is the series of transactions that are accessible to you via the RF gun on the warehouse floor. You can use screens, or modules to perform processes such as Clocking, Break, and Employee Inquiry. Similar to creating the UI Menu, a menu view on the browser allows you to create an RF menu and add the menu to a group.

Oracle WFM

1) RF_Break CI
2) RF_Break CO
3) RF_VAS or CICO
4) RF_Employee Inquiry
5) RF_Manual CICO
6) RF_VAS CICO
7) RF_CICO Enq
8) RF CICO

Ctrl-D: Page Down
Ctrl-X: Exit App
Ctrl-W: Previous screen

Figure 1-6: Validating Your Current Facility in the RF

Note: To change facilities, press Ctrl-F and type in the Facility code.

1.2.4 Creating Users

You can create new users via the user's screen where you can define the following:

- Username and password
- The facilities and companies the user has access for
- The user's role (Administrator, Management, Supervisor, etc.)
- The user's default group (UI and RF Menus)
- The user's language (English or Spanish)
- The user's fixed equipment type

Creating New Users

1. On the Users screen.
2. Click the **Create**  button and populate the necessary fields:

Figure 1-7: Creating New Users

Notes for some of the key fields

- **RUT:** Unique identifier (alphanumeric). Must be same as defined in WMS for this user
 - **Type:** Field used to distinguish between internal and external users.
 - **Facility:** Defines the default Facility that the user is displayed upon login.
 - **Company:** Defines the default company that the user is displayed upon login.
 - **Shift:** Defines the user's shift, if applicable. Shifts are created in the Shifts screen, which defines the start and end time.
 - **Role:** Defines the user's role in the warehouse. Each role has a different set of permissions for viewing reports in Oracle Workforce Management Cloud (UI permissions only).
 - **Language:** Sets the user's language (English or Spanish).
 - **Default Group:** Defines the default group that is displayed when this user logs in. Users can be assigned to multiple groups via the Groups button. If a user is assigned to multiple groups, user can switch Group views by clicking the drop-down next to his name on the top right and then clicking View, and finally selecting the desired Group.
3. Click **Save** when done.
 4. To configure the Facilities and Companies that the user needs to have access to, select the user and click the **Eligible Facilities/Eligible Companies** buttons. This takes you to the respective views that lists all the facilities/companies.

Active	Login	First Name	Last Name	password_life	RUT	alternate_user	email
Yes							

Figure 1-8: Adding User's Eligible Facilities/Companies

5. Click the **Create** **+** button to add new Facilities or Companies.

The screenshot shows the 'Users' module with the 'Eligible Companies' sub-tab selected. The main area contains a table with the following columns: User, Company, Company Name, and Create Timestamp. The first row shows a user (represented by a grey box) associated with the company 'QATSTPC', with the company name 'QA BNG TEST PC' and a create timestamp of '02/03/2019 7:35:30 AM'. To the right of the table is a form with a 'User' dropdown menu and a 'Company' dropdown menu, both with red borders. Below the form are buttons for 'Save', 'Cancel', 'Save/New', and 'Reset'.

User	Company	Company Name	Create Timestamp
[Grey Box]	QATSTPC	QA BNG TEST PC	02/03/2019 7:35:30 AM

Figure 1-9: Adding user's eligible companies

The screenshot shows the 'Users' module with the 'Eligible Facilities' sub-tab selected. The main area contains a table with the following columns: User, Facility, Name, and Create Timestamp. The first row shows a user (represented by a grey box) associated with a facility (represented by a grey box), with the facility name (represented by a grey box) and a create timestamp of '02/03/2019 7:35:30 AM'. To the right of the table is a form with a 'User' dropdown menu and a 'Facility' dropdown menu, both with red borders. Below the form are buttons for 'Save', 'Cancel', 'Save/New', and 'Reset'.

User	Facility	Name	Create Timestamp
[Grey Box]	[Grey Box]	[Grey Box]	02/03/2019 7:35:30 AM

Figure 1-10: Adding user's eligible facilities

6. When finished, return to the main screen.
7. To assign Equipment Types to a user:
 - a. Select user.
 - b. Click on **assign_equipment_type**.
 - c. Select an **Equipment Type** from the drop-down menu.
 - d. Click on **submit**.

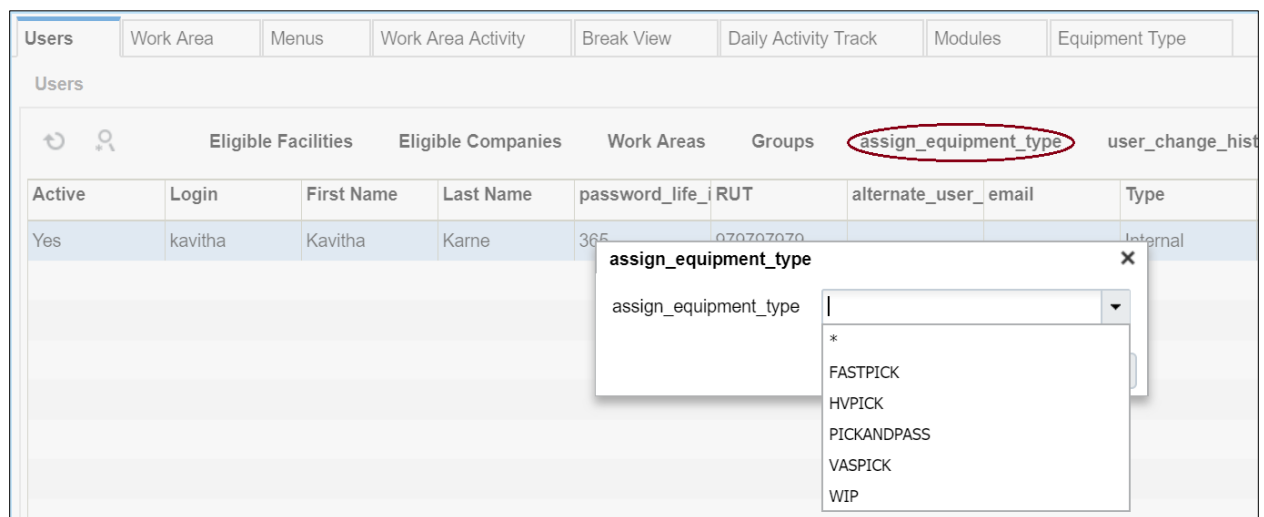

Figure 1-11: Assigning Equipment Types to a user

Note: Equipment Types must be first defined in the Equipment Types screen before assigning them to users.

1.2.5 Configuring Menus for Users

There are five steps to add Group menus.

- Creating UI and RF Screens
- Adding Screens to different Menus
- Assigning Menus to Groups
- Assigning Groups to Users
- Creating and Assigning Facilities & Companies to Users

Creating UI and RF Screens

1. On the Screens UI view, click **Generate Screens**.
2. Select all the necessary screens for the Group (eg. Productivity Report, Break Report etc.).
3. Add both UI and RF screens.
Note: For RF menus, extra configuration might be required (RF module parameters). To modify its parameters, select the RF screen and click the **Details**  button.
4. Click **Save** when done.

Adding Screens to Different Menus

On the Menus view, create a new menu, one for the UI and one for the RF using the **Create +** button:

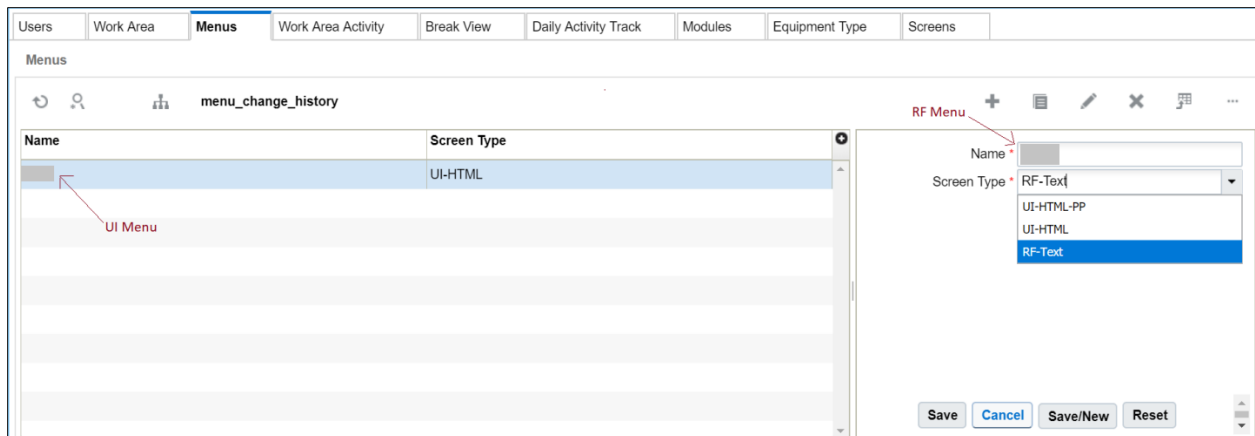

Figure 1-12: Creating UI and RF Menu

Select each menu and click on the **Details** button. To insert screens under each menu, use the **Insert Screen** button. However, if you need additional levels under each main UI and RF menu, you could use **Insert Menu** button.

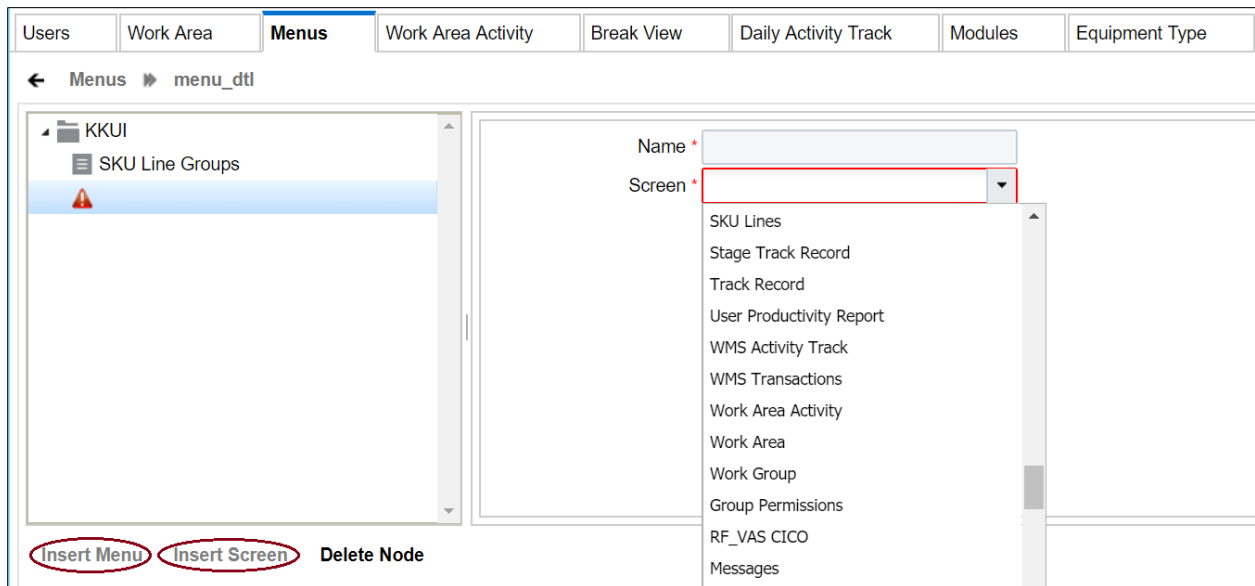

Figure 1-13: Adding Menus/Screens to UI and RF Main Menu

Assigning Menus to Groups

Once the Menus have been set up, it is now time to add them to Groups. On the Groups screen:

1. Click the **Create +** button to create a new group.
2. Type in the group name.
3. Select the UI/RF menus from the drop-down menus.
4. Click **Save**.

The screenshot shows the 'Groups' tab in a software interface. At the top, there's a navigation bar with tabs: Users, Work Area, Groups (selected), Menus, Work Area Activity, Break View, Daily Activity Track, Modules, Equipment Type, and Screens. Below the navigation bar, there's a 'Groups' section with a search icon, a 'Permissions' button, and a 'clear_view_preferences' link. To the right of these are icons for adding, editing, deleting, and other actions. The main area contains a table with columns: Company, Name, UI Menu, and RF Menu. The table lists several groups like BNGRP01, PS Menu, Config_PR, LOG, Auxiliares WFM, Coordinadores WFM, Configuracion, and Reportes Base, each with corresponding UI and RF menu assignments. To the right of the table is a form to create a new group, with fields for Name, UI Menu (dropdown), and RF Menu (dropdown). At the bottom right of the form are buttons: Save, Cancel, Save/New, and Reset.

Company	Name	UI Menu	RF Menu
	BNGRP01	BN UI	BN RF
	PS Menu	PS UI Menu	PS RF Menu
	Config_PR	Config_PR UI	Config_PR RF
	LOG	LOG	
	Auxiliares WFM	Auxiliar UI	Auxiliar RF
	Coordinadores WFM	Coordinadores UI	Coordinadores RF
	Configuracion	Configuracion UI	Configuracion RF
	Reportes Base	Reportes Base	

Figure 1-14: Creating a new group

You can use the Permissions button to assign specific permissions to a group. This takes you to a new view where you can choose permission for each screen for this group.

This screenshot is similar to the previous one, but the 'Permissions' button is circled in red. The table below it shows a single group with the name 'KKUI' and 'KKRF' assigned to the UI and RF menus respectively.

Company	Name	UI Menu	RF Menu
		KKUI	KKRF

Figure 1-15A: Assigning Permissions to a group

The screenshot shows the 'Groups' screen in Oracle Workforce Management Cloud. The 'Permissions' tab is selected, displaying a list of permissions. Each permission is preceded by a checkbox. The permissions listed are:

- ☐ reports / Can download reports
- ☐ shift / Can add shifts
- ☐ shift / Can change shifts
- ☐ shift / Can delete shifts
- ☐ view_preferences / Can add/remove cols to views
- ☐ view_preferences / Can modify menus
- ☐ view_preferences / Can re-order cols in views
- ☐ view_preferences / Can save company default menu
- ☐ view_preferences / Can save company default view
- ☐ view_preferences / Can save group default menu
- ☐ view_preferences / Can save group default view
- ☐ view_preferences / Can save personal view

At the bottom right of the screen, there are two buttons: 'Save' and 'Cancel'.

Figure 1-15B: List of Permissions

Assigning Groups to Users

Now that Groups have been created, you now add users to each group. On the User screen:

1. Select a user to assign to a group.
2. Click on **Groups**.
3. Using the Create **+** button, add the Group(s) to assign the user to the Group.

Creating and Assigning Facilities & Companies to Users

Facilities and Companies in Oracle Workforce Management Cloud need to match the facilities and companies in Oracle WMS.

To create companies, on the Companies screen:

1. Click the **Create** **+** button.
2. Populate the company's information such as the Code, Name, and Address.
Note: The first company is the parent company in the environment by default. The Parent Company has the same code in the Parent Company Column OR has a *.

VMS Transactions

Company Code	Company Name	Type	Address 1	Address 2	address_3	Locality	Parent company
		Regular					
		Regular					

Figure 1-16: Parent and child companies

3. Click **Save** when complete.

Facilities are controlled at the company level. This means that every company has its own set of facilities. This link is defined in the Parent Company column in the Facilities screen.

To Create Facilities, on the Facilities screen:

1. Click the Create **+** button.
2. Populate the facility's information such as the Code, Name, and Address.

Functional Field Descriptions for Facilities

- **Parent Company:** Denotes the company that the facility belongs to.

Once the Companies and Facilities have been created, the next task is to assign them to users. This was described under the [Creating Users](#) section.

1.3 System Integration Framework

Oracle Workforce Management Cloud uses the following methods for processing interface files into Oracle Workforce Management Cloud:

Figure 1-17: SFTP Method in Oracle Workforce Management Cloud

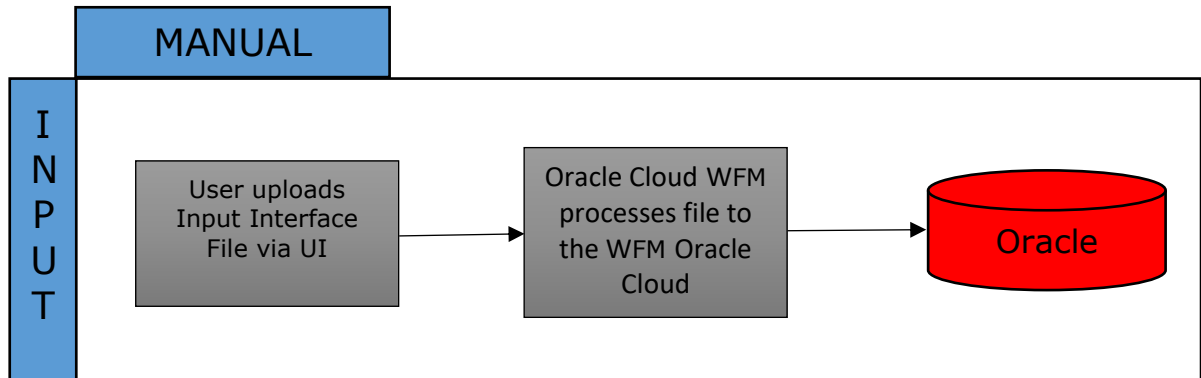

Figure 1-18: Interfacing Methods in Oracle Workforce Management Cloud

1.3.1 Supported Formats

Oracle Workforce Management Cloud supports the following formats with interfaces:

- Flat files
- XML files
- CSV files
- XLS files

1.3.2 Input Interfaces

- User
- Sku Lines
- Prod Goal Line
- Prod Goal VAS
- Clock

1.3.3 Uploading Interface Files with Oracle Workforce Management Cloud

If you are manually preparing the input interface file via Excel, it is important to follow these best practices:

- The filename must start with the phrase as specified in the Input File Formats document (the filename must begin with USR for uploading User files).
- The columns specified as required in the interface specification document must be populated.
- You must populate the correct sequence in the seq_nbr field (i.e. no duplicate values).

2. Clock In/Out

2.1 What is Clock In/Out?

Clocking is a process that is done in order to ensure that the time stamps of every user entering and exiting the Warehouse/facility is captured in WFM. It also captures the user's entry and exit into Work Areas, VAS activities, Manual activities, and Break.

WFM provides multiple options of clocking in and clocking out. If a 3rd party time management system is used by the warehouse, user's exit into and out of the facility can also be interfaced from this system into WFM as the facility clock-in/clock out time.

Note: If users do not clock in/out, then WFM will fail to report user activities appropriately.

2.2 UI Clock Screen

The user can select an option in the [clocking mode](#) to clock in/out, and once all parameters have been selected using the drop-downs, he can click clock in/out.

The screenshot displays the 'Clock' screen within a software application. At the top, there is a navigation bar with tabs: Users, Work Area, Clock (selected), Groups, Menus, Work Area Activity, Break View, Daily Activity Track, Modules, Equipment Type, and Screens. Below the navigation bar, the main content area is titled 'Clock'. It features a large digital clock showing '10:50:20'. To the left of the clock, there is a list of dropdown menus: Mode (set to 'Facility'), Facility, Work Area, Activity, Level (for VAS only), Team, Break, and User (with a red asterisk). To the right of these menus is a cartoon illustration of a woman with brown hair, wearing a green top and black skirt, holding a white folder. At the bottom of the screen, there are two buttons: 'Clock in' and 'Clock out', which are circled in red.

Figure 2-1: UI- Clock Screen

2.3 Clocking Process Flow

Users are required to follow a specific clock-in/clock out process. The following figure depicts a typical clock-in/out flow assuming that the user is performing activity in a single work area on this day.

Every user has to clock into (CI) the facility (FAC) when he/she enters the warehouse/building. As the next logical step, the user needs to clock into the Work Area (WA) where the user will start performing his warehouse activities (WAA – Work Area Activities). If the user needs to step out for lunch or tea breaks, he needs to clock in/out to indicate that to WFM. Finally he needs to clock (CO) of the Work Area and from the Facility.

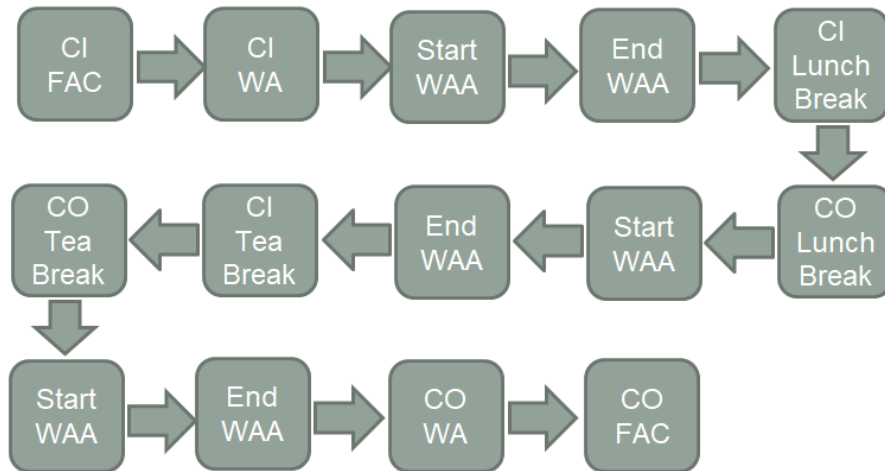

Figure 2-2: Clocking Process Flow

3. Integration of WMS with WFM

3.1 WMS Activity

For transactions to move from WMS to WFM, the Facility parameter "WRITE_WMS_ACTIVITY_RECORD" in WMS must be set to "YES". This parameter allows transaction details to be logged in the WMS_ACTIVITY tables in WMS database. Transaction data will remain in these tables only for a brief period of time, since it must be purged from time to time so as not to impair the performance of the WMS.

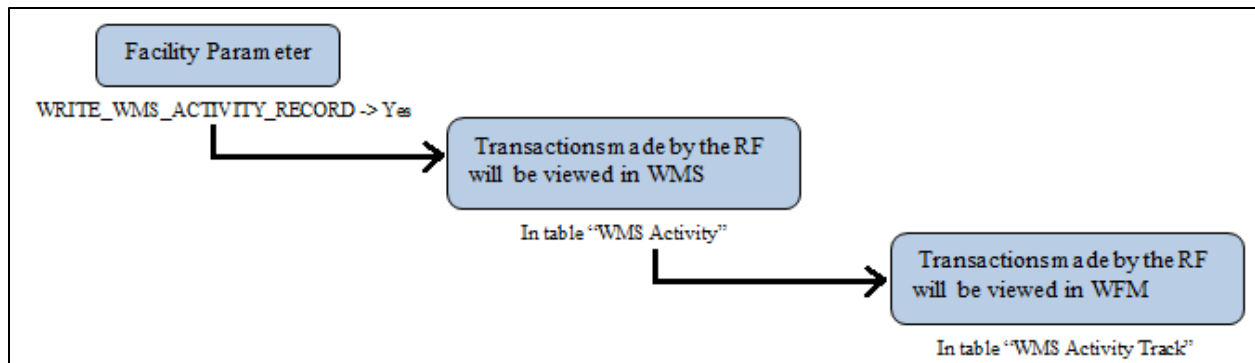

Figure 3-3-1: UI – WMS Activity

One of the integration touch points between the WMS and WFM is the "SKU Line" which is used for grouping of articles with reasonably similar physical characteristics that is created to segment the item master. The SKU LINE can take any field that comes within the item master that is sent by interface. To have the SKU LINE field in the WMS, the company parameter "ITEM_INTF_SKU_LINE_MAP_FIELD", used with the name of the field selected in the item master.

Figure 3-3-2: UI – SKU_LINE

3.2 Data Flow from WMS to WFM using ETL

The ETL SCRIPT can be scheduled run and fetch WMS Activity data based on the customer's requirement from WMS to the WFM.

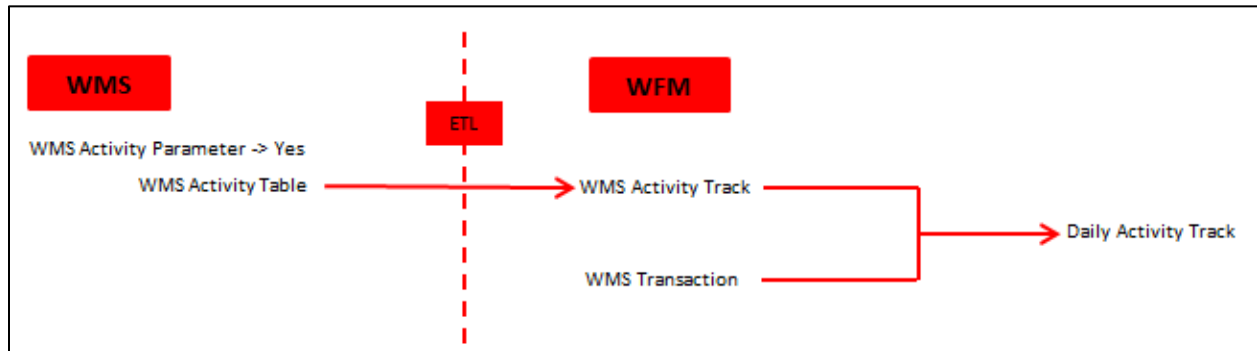

Figure 3-3-3: UI – Data flow from WMS to WFM

4. WFM Reports

There are several reports in WFM that help to provide information regarding users and their productivity.

A few sample reports are as below:

Daily Report

This report provides visibility of:

- Time the users clock into and out of the facility
- Time the users clock into and out of different work areas
- Time spent on lunch and tea/coffee breaks

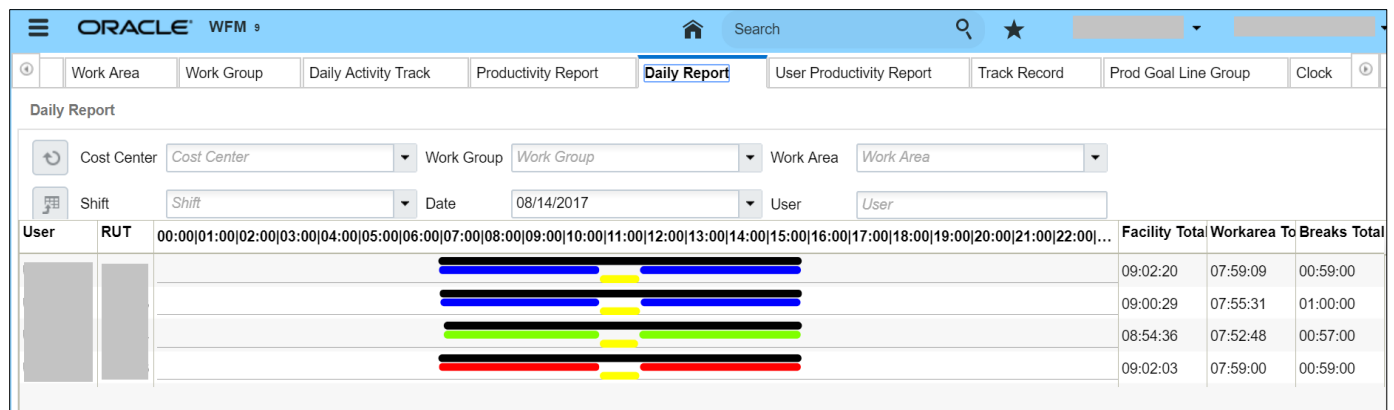

Figure 4 – 1: Daily Report

Break Report

This report compares the time users take for each break against the time allocated for breaks.

ORACLE WFM
