

Oracle® Communications
Policy Management

Release Notes

Release 15.0.0.2.0

May 2024

Copyright © 2014, 2024 Oracle and/or its affiliates. All rights reserved.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

This documentation is in preproduction status and is intended for demonstration and preliminary use only. It may not be specific to the hardware on which you are using the software. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to this documentation and will not be responsible for any loss, costs, or damages incurred due to the use of this documentation.

The information contained in this document is for informational sharing purposes only and should be considered in your capacity as a customer advisory board member or pursuant to your beta trial agreement only. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described in this document remains at the sole discretion of Oracle.

This document in any form, software or printed matter, contains proprietary information that is the exclusive property of Oracle. Your access to and use of this confidential material is subject to the terms and conditions of your Oracle Master Agreement, Oracle License and Services Agreement, Oracle Partner Network Agreement, Oracle distribution agreement, or other license agreement which has been executed by you and Oracle and with which you agree to comply. This document and information contained herein may not be disclosed, copied, reproduced, or distributed to anyone outside Oracle without prior written consent of Oracle. This document is not part of your license agreement nor can it be incorporated into any contractual agreement with Oracle or its subsidiaries or affiliates.

Introduction

Patch Release for the 15.0.0.2.0 code stream

This Release Notice identifies the functions and features of Oracle Communications Policy Management (OCPM) Release 15.0.0.2.0.

This Release Notice includes bug fixes descriptions, supported Hardware Baseline, Media and Documentation pack contents and identifies the Supported Upgrade Paths. This document also includes listings of both the Resolved and Known Bugs for this Release. Directions for accessing key Oracle sites and Services are identified in the Oracle References and Services chapter.

Release Notices are included in the Documentation Pack made available with every Software Release.

Feature Descriptions

This patch release of Oracle Communications Policy Management adds the enhancement described in this chapter.

MRA Default Route Change

This enhancement is implemented to set the Default Route Action as LOCAL under MRA "Diameter Routing" tab in the "Default Route" section by default, if no other action is explicitly selected.

Policy 15.0.0.2.0 Version Media and Documentation

Oracle Communications patch software is available for electronic download on My Oracle Support. Both the software Media Pack and the Documentation Pack are listed in this chapter.

Media Pack

Available for download from My Oracle Support (list URL)

Media Pack Contents:

- ISO for all customers:
 - cmp-15.0.0.2.0_6.1.0-x86_64-DIU.iso
 - mpe-15.0.0.2.0_6.1.0-x86_64-DIU.iso
 - mpe-li-15.0.0.2.0_6.1.0-x86_64-DIU.iso
 - mra-15.0.0.2.0_6.1.0-x86_64-DIU.iso
- qcow and ova files:
 - mra-15.0.0.2.0_6.1.0-x86_64.qcow2.tar.bzip2
 - mpe-15.0.0.2.0_6.1.0-x86_64.qcow2.tar.bzip2
 - mpe-li-15.0.0.2.0_6.1.0-x86_64.qcow2.tar.bzip2
 - cmp-15.0.0.2.0_6.1.0-x86_64.qcow2.tar.bzip2
 - mpe-15.0.0.2.0_6.1.0-x86_64.ova
 - mpe-li-15.0.0.2.0_6.1.0-x86_64.ova
 - mra-15.0.0.2.0_6.1.0-x86_64.ova
 - cmp-15.0.0.2.0_6.1.0-x86_64.ova

Note:

- It is recommended to apply this release through ISO upgrade process based on the supported upgrade paths.
 - The qcow and ova images are provided to be used for installation of a customer node in case the node is down due to hardware issues and requires recreation.
 - The scope of performance tests done for release 15.0.0.2.0 is limited to KVM due to engineering resource limitations. However, release 15.0.0.2.0 supported baseline remains same as OCPM 15.0.0.0.0 GA.
-

MAC Algorithms

Only the following MAC algorithms are supported from 12.6.0 onwards:

- hmac-sha2-256
- hmac-sha2-512

Documentation Pack

All documents available for download from the Oracle Help Center site (<http://docs.oracle.com/en/industries/communications>) are listed here.

Note: This list is accurate at the time of release but is subject to change. Please view the Oracle Help Center site for the latest information.

Documentation Pack Contents:

- Upgrade Guide (15.0 to 15.0.x)
- Release Notes
- Related Publications Reference
- Hardware Documentation Roadmap Reference
- Configuration Management Platform Wireless User's Guide
- SNMP User's Guide
- OSSI XML Interface Definitions Reference
- Analytics Data Stream Reference

Security Certificate Declaration

This section lists the security tests and the corresponding dates of compliance for Oracle Communications Policy Management Release 15.0.0.2.0:

Table 1 Security Certification Declaration

Compliance Test Description	Test Completion Date	Summary
Static Source Code Analysis Assesses adherence to common secure coding standards	Mar 18, 2024	All Critical findings addressed.
Dynamic Analysis (including fuzz testing) Tests for risk of common attack vectors such as OWASP Top 10 and SANS 25	Mar 28, 2024	All Critical and High findings addressed.
Vulnerability Scans Scans for CVEs in embedded 3rd party	Apr 02, 2024	All Critical and High findings addressed.

components		
Malware Scans Scans all deliverable software packages for the presence of known malware	Mar 20, 2024	No Findings

Supported Upgrade Paths

This release has been tested for upgrades from specific prior releases; this chapter contains the exact paths for upgrade. Verify that your current installed release is listed on a valid upgrade path.

Table 2 Policy 15.0.0.2.0 Upgrade Paths

From	To	Mechanism
15.0.0.0.0	15.0.0.2.0	ISO Upgrade
15.0.0.1.0	15.0.0.2.0	ISO Upgrade

For the upgrade procedure, see *Oracle Communications Policy Management 15.0 to 15.x Upgrade Procedures Guide* available on OHC.

Resolved and Known Bugs

This chapter lists the resolved and known bugs for this release of Oracle Communications Policy Management 15.0.0.1.0.

These bug lists are distributed to customers with a new software release at the time of General Availability (GA), and are updated for each Maintenance release.

Severity Definitions

The problem report sections in this document refer to Bug severity levels. Definitions of these levels can be found in the publication, *TL 9000 Quality Management System Measurement Handbook*:

- **Problem Report:** A report from a customer or on behalf of the customer concerning a product or process defect requesting an investigation of the issue and a resolution to remove the cause. The report may be issued via any medium. Problem reports are systemic deficiencies with hardware, software, documentation, delivery, billing, invoicing, servicing or any other process involved with the acquisition, operation, or performance of a product. An incident reported simply to request help to bring back the service or functionality to normal without the intent to investigate and provide a resolution to the cause of the incident is not a problem report.
- **Problem Report - Critical:** Conditions that severely affect the primary functionality of the product and because of the business impact to the customer requires non-stop immediate corrective action, regardless of time of day or day of the week as viewed by a customer on discussion with the organization such as
 - a) product inoperability (total or partial outage),
 - b) a reduction in the capacity capability, that is, traffic/ data handling capability, such that expected loads cannot be handled,
 - c) any loss of emergency capability (for example, emergency 911 calls), or
 - d) safety hazard or risk of security breach.
- **Problem Report-Major:** Product is usable, but a condition exists that seriously degrades the product operation, maintenance or administration, etc., and requires attention during pre-defined standard hours to resolve the situation. The urgency is less than in critical situations because of a lesser immediate or impending effect on product performance, customers and the customer's operation and revenue such as
 - a) reduction in product's capacity (but still able to handle the expected load),
 - b) any loss of administrative or maintenance visibility of the product and/or diagnostic capability,
 - c) repeated degradation of an essential component or function, or
 - d) degradation of the product's ability to provide any required notification of malfunction.

- **Problem Report-Minor:** Other problems of a lesser severity than 'critical' or 'major' such as conditions that have little or no impairment on the function of the system

The numbered severity levels in the tables below correspond to these definitions:

- 1 - Complete Loss of Service
- 2 - Severe Loss of Service
- 3 - Minimal Loss of Service
- 4- Minor Error, No Loss of Service

Table 3 Resolved Bugs

SI No.	Num	Customer SR	Sev	Subject	Component
1	36414878	-	3	Subscriber total aggregate quota volume consumed with wrong value	MPE
2	36415082	-	3	Claro-ARG-vPCRF2-Claro-AUP-Server Disk Shortage Warning alarm on PCRF02AUPOLL3-CMP-B	CMP
3	36415092	-	3	Corrupted Session cleanup not working on MRA	MRA
4	36415137	-	3	Post upgrade of Stand by CMP system time zone is changed from EST to CST	CMP
5	36585329		3	Post Secure Connection Enable on GR 15.0 GA Setup, the CMP cluster role is not stable, Alarms and MPE/MRA connections not visible	CMP

Table 4 Known Bugs

SI No.	Num	Customer SR	Sev	Subject	Customer Impact
1	36347987	3-35898699741	3	Slowness of MPE recreate operations and increase in ATS execution time	This bug is present on the PCRF application and causes the operations performed on the MPE to take more time which results in overall higher execution time for ATS. The issue arises because of

					<p>how the changes are stored which results in larger config files when a lot of modifications are done on the PCRf system.</p> <p>Workaround: The workaround for the issue is to remove the config files on the PCRf so that they can be created again. These files must be removed repeatedly as soon as they grow large in size.</p> <p>Perform the following on the PCRf MPE:</p> <ol style="list-style-type: none"> 1. Delete file on MPE <code>/var/TKLC/rcs/etc/camiant/logconfig/logback-rc.xml,v</code> 2. Replace file <code>/etc/camiant/logconfig/logback-rc.xml</code> with the replacement file shared.

Oracle References and Services

This chapter describes how to obtain help, where to find related documentation, and provides other general information.

My Oracle Support

My Oracle Support (<https://support.oracle.com>) is your initial point of contact for all product support and training needs. A representative at Customer Access Support (CAS) can assist you with My Oracle Support registration.

Call the CAS main number at **1-800-223-1711** (toll-free in the US), or call the Oracle Support hotline for your local country from the list at <http://www.oracle.com/us/support/contact/index.html>. When calling, make the selections in the sequence shown below on the Support telephone menu:

1. Select 1 for Technical issues such as creating a new Service Request (SR).
2. Select 2 for Non-technical issues such as registration or assistance with My Oracle Support.
3. Select 3 for Hardware, Networking and Solaris Operating System Support.

You are connected to a live agent who can assist you with My Oracle Support registration and opening a support ticket.

My Oracle Support is available 24 hours a day, 7 days a week, 365 days a year.

Emergency Response

In the event of a critical service situation, emergency response is offered by the Customer Access Support (CAS) main number at 1-800-223-1711 (toll-free in the US), or by calling the Oracle Support hotline for your local country from the list at <http://www.oracle.com/us/support/contact/index.html>. The emergency response provides immediate coverage, automatic escalation, and other features to ensure that the critical situation is resolved as rapidly as possible.

A critical situation is defined as a problem with the installed equipment that severely affects service, traffic, or maintenance capabilities, and requires immediate corrective action. Critical situations affect service and/or system operation resulting in one or several of these situations:

- A total system failure that results in loss of all transaction processing capability
- Significant reduction in system capacity or traffic handling capability
- Loss of the system's ability to perform automatic system reconfiguration

- Inability to restart a processor or the system
- Corruption of system databases that requires service affecting corrective actions
- Loss of access for maintenance or recovery operations
- Loss of the system ability to provide any required critical or major trouble notification

Any other problem severely affecting service, capacity/traffic, billing, and maintenance capabilities may be defined as critical by prior discussion and agreement with Oracle.

Customer Training

Oracle University offers expert training on Oracle Communications solutions for service providers and enterprises. Make sure your staff has the skills to configure, customize, administer, and operate your communications solutions, so that your business can realize all of the benefits that these rich solutions offer. Visit the Oracle University web site to view and register for Oracle Communications training: education.oracle.com/communication. To reach Oracle University:

- In the US, please dial 800-529-0165.
- In Canada, please dial 866-825-9790.
- In Germany, please dial 0180 2000 526 (toll free) or +49 8914301200 (International).
- In Spain, please dial +34 91 6267 792.
- In the United Kingdom, please dial 0845 777 7 711 (toll free) or +44 11 89 726 500 (International).

For the appropriate country or region contact phone number for the rest of the world, please visit Oracle University's web site at <http://www.oracle.com/education/contacts>

Locate Product Documentation on the Customer Support Site

Oracle customer documentation is available on the web at the Oracle Technology Network site, <http://docs.oracle.com>. You do not have to register to access these documents. Viewing these files requires Adobe Acrobat Reader, which can be downloaded at www.adobe.com.

1. Access the Oracle Technology Network site at <http://docs.oracle.com>.
2. Click **Industries**.
3. Under the Oracle Communications subheading, click the **Policy Management** link under the **Signaling & Policy**.
4. Navigate to the Release Number, and click the View link (the Download link will retrieve the entire documentation set).
A list of the entire documentation set for the selected product and release appears.
5. To download a file to your location, right-click the **PDF** link, select **Save target**

as, and save to a local folder.

Locate Product Release Software on the Oracle Software Delivery Cloud Site

Oracle Communications software is available for electronic download at the Oracle Software Delivery Cloud (OSDC) site, <https://edelivery.oracle.com>. Only authorized customers with a valid password may download software from the site.

1. Log into the Oracle Software Delivery Cloud site at <https://edelivery.oracle.com>. The **Terms & Restrictions** page appears.
2. Read and accept both the Oracle Trial License Agreement and the Export Restrictions Agreement. The **Media Pack Search** page appears.
3. Select **Oracle Communications for Product Pack and Tekelec for Platform**.
4. Click the **Go** button. All media packs that meet the search criteria are displayed on the page.
5. Select the media pack for your Product and Release Number and click the **Continue** button. The **Download** page appears.
6. Provide a valid password in the **Password** field and click the **Go** button.
7. To download a file to your location, click the **Download** button.

Upgrade Instructions

Refer to 15.0.x Upgrade Procedures Guide for Upgrade instructions.
