of supported platforms. This update supports all locales supported in Release 11.2.8.0.000.

Supported Paths

Oracle recommends that you apply the set of Oracle Enterprise Performance Management System Release 11.2.12 product Opatches together, using the `ApplyUpdate` script. EPM System Release 11.2.12 can only be applied on top of Release 11.2.8.x or any release starting from 11.2.8.x (for example, Release 11.2.9.x, Release 11.2.10.x or Release 11.2.11.x). If you are updating from an earlier release, you must first update to Release 11.2.8.

- EPM System updates are released on a quarterly basis, generally in January, April, July, and October.
- Updates include changes for all embedded components, such as WebLogic and Java, as needed.
- Updates are applied in place.
- Any customer patches that were released are rolled into the next update.
- Updates are expected to be easy to apply and have minimum impact for you to absorb.

Installing EPM for the first time

1. **Install Release 11.2.8:** See [Installing EPM System Products](#) in *Oracle Enterprise Performance Management System Installation and Configuration Guide* for instructions.
2. **Download Release 11.2.12:** Download the Oracle Enterprise Performance Management System Release 11.2.12 files from Oracle Software Delivery Cloud (<http://edelivery.oracle.com/>). Oracle recommends that you download files to a shared drive.

For the list of files available for download in Release 11.2.12, see [Overview](#).

From the [Oracle Software Delivery Cloud](#) (<http://edelivery.oracle.com/>), select the products that you licensed and add them to the cart. All required zip files are included. Select your platform, and download the files into `/download_location`.

3. **Apply Release 11.2.12:** See [Applying Release 11.2.12](#) for more details.
4. **Configure Release 11.2.12:** See [Configuring EPM System Products in a New Deployment](#) for more details.

Note:

You can now install Oracle Enterprise Performance Management System Release 11.2.8 on Windows Server 2022. Note that the configuration and product functionality is not certified in Release 11.2.8. It is only certified in Release 11.2.12.

Applying and Rolling Back Release 11.2.12

Prerequisites

1. Disable the anti-virus software before you apply Release 11.2.12 to your environment. Ensure that you have the anti-virus software disabled for the entire duration of the update process. Anti-virus software can be re-enabled when the update is complete.
2. To identify any EPM patch conflicts before applying the quarterly update, enter the following command:
 - a. **On Windows:**

Note:

The following script must only be run with Administrator privileges.

```
. \ApplyUpdate.ps1 <MIDDLEWARE_HOME> -verify
```

b. On Linux: ./ApplyUpdate.sh <ORACLE_HOME> -verify

3. Stop services:

- Oracle Enterprise Performance Management System services

- Node Manager Windows Service and Oracle HTTP Server, if you are using Oracle HTTP Server as your web server
- WebLogic Administration Server

For information about stopping services, see Starting and Stopping EPM System Products in *Enterprise Performance Management System Installation and Configuration Guide* .

4. Back up these folders:

- EPM Oracle Home. The default EPM Oracle home location is *MIDDLEWARE_HOME/EPMSystem11R1*.
- EPM Oracle Instance. The default location for the EPM Oracle Instance is *MIDDLEWARE_HOME/user_projects/epmsystem1*.

You can delete these folders after you apply the update and validate the installation.

5. Back up the keystores from:

- *MIDDLEWARE_HOME\jdk\jre\lib\security\cacerts*
- *MIDDLEWARE_HOME\EPMSystem11R1\common\JRE\Sun\1.8.0\lib\security\cacerts*

 **Note:**

Ensure that you restore the backed up keystores (cacerts) after applying the update to Release 11.2.12.

 **Note:**

If Kerberos authentication is set up and if Certificate-Based Authentication is enabled, note that Applying Release 11.2.12 update will reset this change. Ensure that you re-enable the Client Certificate-Based Authentication. See *Enable Client Certificate-Based Authentication in Web Applications* in *Kerberos Single Sign-on*.

Applying Release 11.2.12

Release 11.2.12 applies a set of OPatches for all EPM system components on your environment. Oracle recommends that you apply the entire set using the `ApplyUpdate` utility.

Ensure that you meet all the prerequisites before you apply Oracle Enterprise Performance Management System Release 11.2.12 to your environment. See [Prerequisites](#) for more details.

From the [Oracle Software Delivery Cloud](http://edelivery.oracle.com/) (<http://edelivery.oracle.com/>), select the products that you licensed and add them to the cart. All required zip files are included. Select your platform, and download the files into `/download_location`.

For the list of deliverables in Release 11.2.12 (Release 11.2, Update 12), see [Overview](#):

Unzip the files into `/download_location`.

- Use a zip file extraction program that can handle long path names, such as 7-Zip.
- If you are prompted that any files or common components already exist, click **Yes** to overwrite the files.
- Unzip to a directory with no spaces in the name.

1. To Apply Release 11.2.12 (Release 11.2, Update 12):
 - a. On **Windows**: Launch **Windows PowerShell** as an Administrator from the **Start** menu. Navigate to the directory where you extracted the ZIP files and run the following script. For example, navigate to `11.2.12.0-Update-Win` directory and run the following script.

 **Note:**

The following script must only be run with Administrator privileges.

```

```
./ApplyUpdate.sh <MIDDLEWARE_HOME>
```

2. Redeploy Oracle Hyperion foundation services after applying Release 11.2.12. For remote server, Weblogic Admin server must be up and running to redeploy and start Foundation services.
3. You must now start all the services. For information about starting services, see Starting and Stopping EPM System Products in *Enterprise Performance Management System Installation and Configuration Guide*.

Optional: Applying Individual OPatches

Oracle recommends that you apply the set of Oracle Enterprise Performance Management System Release 11.2.12 product Opatches together, using the `ApplyUpdate` script. See [Applying Release 11.2.12](#) for more details.

However, you can also apply selected OPatches based on your operating system environment:

Note:

It is recommended to take a back up of the original `configure<OS>.properties` file before you edit the properties file for the desired OPatches.

1. From the directory where you downloaded and extracted the 11.2.12.0-Update-<OS> folder, open `configureWindows.properties` or `configureLinux.properties` file based on your operating system.
2. In the `configure<OS>.properties` file, include only those products that you want to apply. For example, if you want to apply Oracle Hyperion Calculation Manager OPatch, ensure that the entry `CALC=34522671` is present in the `configure<OS>.properties` file. The list of individual products and their OPatch IDs in the `configure<OS>.properties` file are listed below:

- CALC=34790744
- FCM=34733932
- FDMEE=34765144
- FR=34753894
- HFM=34686766
- HP=34777784
- HPCM=34801828
- HSS=34747257
- Infra=34747247
- TAXPROV=34768682
- Workspace=34715701

 **Note:**

- Oracle Hyperion Tax Governance is included in Oracle Hyperion Financial Close Management (FCM) OPatch.
- Oracle Hyperion Profitability and Cost Management OPatch cannot be applied if you have applied any of the following patches, which enable support for clustered environments:
 - 33832401 – Release Update Exception 11.2.8.0.500
 - 34049504 – Release Update Exception 11.2.9.0.500
 - 34315263 – Release Update Exception 11.2.10.0.500

For more details on individual EPM system products, OPatch ZIP file names and OPatch IDs, see [OPatch Dependencies and Details](#).

3. Run the `ApplyUpdate` Script to apply the individual OPatch:

- **On Windows:**

 **Note:**

The following script must only be run with Administrator privileges.

```
ApplyUpdate.ps1 <MIDDLEWARE_HOME>
```

- **On Linux:**

```
ApplyUpdate.sh <MIDDLEWARE_HOME>
```

 **Note:**

Refer to your individual OPatch Product Readme for more information.
