ORACLE ADAPTERS

Oracle Integration Platform – Connectivity Certification Matrix

Cloud, On-Premises, and Technology Adapters for Oracle Integration, Integration Cloud Service, SOA Cloud Service, and SOA Suite

This document provides certification information for the various Integration Adapters on the **Oracle Integration Platform**, namely, **Oracle Integration** (OIC), **Oracle SOA Cloud Service** (SOACS), **Oracle SOA Suite on Marketplace** (SOAMP), and **Oracle SOA Suite** (on-premises).

Note:

- Oracle Integration has a **vast portfolio of prebuilt application adapters** listed below. Also, if you need connectivity to an application not listed below, then see the Technology Adapters section for **connectivity through standard technologies** such as FTP, JMS, REST, and SOAP.
- The **OIC** certification information applies to both Oracle Integration Generation 2 and Oracle Integration 3, unless otherwise noted in the Additional Information column.
- The **SOACS** column specifies the **SOA Suite version** (for example, SOA 12.2.1.*x*) that can be provisioned. **SOAMP** supports SOA Suite version 12.2.1.4 only.
- The adapter features may be at different parity levels across the platform. For example, the Oracle E-Business Suite (EBS) Adapter in OIC may have newer features that aren't available in SOA Suite.
- For SOA Suite, this matrix only covers Release 12*c*. For adapters supported on SOA Suite 11*g*, see the **Adapter Certification** tab of the Oracle Fusion Middleware 11g Release 1 (11.1.1.x) Certification Matrix.
