

Oracle Integration Platform – Connectivity Certification Matrix

Cloud, On-Premises, and Technology Adapters for Oracle Integration, Integration Cloud Service, SOA Cloud Service, and SOA Suite

This document provides certification information for the various Integration Adapters on the **Oracle Integration Platform**, namely, [Oracle Integration](#) (OIC), [Oracle Integration Cloud Service](#) (ICS), [Oracle SOA Cloud Service](#) (SOACS), [Oracle SOA Suite on Marketplace](#) (SOAMP), and [Oracle SOA Suite](#) (on-premises).

Note:

- Oracle Integration has a **vast portfolio of prebuilt application adapters** listed below. Also, if you need connectivity to an application not listed below, then see the [Technology Adapters](#) section for **connectivity through standard technologies** such as FTP, JMS, REST, and SOAP.
- The **OIC** certification information applies to both Oracle Integration Generation 2 and Oracle Integration 3, unless otherwise noted in the Additional Information column.
- The **SOACS** column specifies the **SOA Suite version** (for example, SOA 12.2.1.x) that can be provisioned. **SOAMP** supports SOA Suite version 12.2.1.4 only.
- The adapter features may be at different parity levels across the platform. For example, the Oracle E-Business Suite (EBS) Adapter in OIC may have newer features that aren't available in ICS or SOA Suite.
- For SOA Suite, this matrix only covers Release 12c. For adapters supported on SOA Suite 11g, see the **Adapter Certification** tab of the [Oracle Fusion Middleware 11g Release 1 \(11.1.1.x\) Certification Matrix](#).
