Use REST Service - Allocated Checklists Read Only	Allows the user to call the GET method associated with the Allocated Checklists REST Service.
Use REST Service - Areas of Responsibility	Allows the user to call all methods associated with the Areas of Responsibility REST Service.
Use REST Service - Areas of Responsibility Read Only	Allows the user to call the GET method associated with the Areas of Responsibility REST Service.
Use REST Service - Availability Patterns	Allows users to call all methods associated with the availability patterns REST service.
Use REST Service - Availability Patterns Read Only	Allows users to call the GET method associated with the availability patterns REST service.
Use REST Service - Benefit Enrollment Opportunities Read Only	Allows users to call the GET method associated with the Benefit Enrollment Opportunities REST Service.
Use REST Service - Benefit Enrollments Read Only	Allows users to call the GET method associated with the Benefit Enrollments REST Service.

Aggregate Privilege	Description
Use REST Service - Benefit Person Information	Allows users to call all methods associated with the benefit person information REST service.
Use REST Service - Benefit Person Information Read Only	Allows users to call the GET method associated with the benefit person information REST service.
Use REST Service - Benefit Relations List of Values	Allows users to call the GET method associated with the benefit relations list of values REST service.
Use REST Service - Candidates	Allows the user to call all methods associated with the Recruiting candidates REST Service.
Use REST Service - Candidates Read Only	Allows the user to call the GET method associated with the Recruiting candidates REST Service.
Use REST Service - Data Load Data Sets	Allows the user to load their own data sets and data sets for templates that have been granted to their roles with view all data sets access using the Data Load Data Sets REST Service.
Use REST Service - Department Hierarchies Read Only	Allows the user to call the GET method associated with the Department Hierarchies REST Service.
Use REST Service - Department Searches V2	Allows the user to search for departments using the departmentSearchesV2 REST API.
Use REST Service - Development Goals Read Only	Allows users to call GET and describe methods with the Development Goals REST service.
Use REST Service - Document Delivery Preferences	Allows the user to call all methods associated with the Document Delivery Preferences REST Service.
Use REST Service - Document Delivery Preferences Read Only	Allows the user to call the GET method associated with the Document Delivery Preferences REST Service.
Use REST Service - Document Records	Allows the user to call all methods associated with the Document Records REST Service.
Use REST Service - Document Records Read Only	Allows the user to call the GET method associated with the Document Records REST Service.
Use REST Service - Element Entries	Allows the user to call all methods associated with the Element Entries REST Service.
Use REST Service - Element Entries Read Only	Allows users to call the GET method associated with the Element Entries REST Service.
Use REST Service - Eligibility Object Results for Benefits	Allows users to call all methods associated with the eligibility object results REST service for eligibility results with an eligibility object type of BENEFITS.
Use REST Service - Eligibility Object Results for Benefits Read Only	Allows users to call the GET method associated with the eligibility object results REST service for eligibility results with an eligibility object type of BENEFITS.

Aggregate Privilege	Description
Use REST Service - Eligibility Object Results for Goals	Allows users to call all methods associated with the eligibility object results REST service for eligibility results with an eligibility object type of GOAL.
Use REST Service - Eligibility Object Results for Goals Read Only	Allows users to call the GET method associated with the eligibility object results REST service for eligibility results with an eligibility object type of GOAL.
Use REST Service - Eligibility Object Results for Performance	Allows users to call all methods associated with the eligibility object results REST service for eligibility results with an eligibility object type of HRA.
Use REST Service - Eligibility Object Results for Performance Read Only	Allows users to call the GET method associated with the eligibility object results REST service for eligibility results with an eligibility object type of HRA.
Use REST Service - Eligibility Object Results for Personal Brand	Allows users to call all methods associated with the eligibility object results REST service for eligibility results with an eligibility object type of HWR.
Use REST Service - Eligibility Object Results for Personal Brand Read Only	Allows users to call the GET method associated with the eligibility object results REST service for eligibility results with an eligibility object type of HWR.
Use REST Service - Eligibility Object Results for Schedules	Allows users to call all methods associated with the eligibility object results REST service for eligibility results with an eligibility object type of SCHED.
Use REST Service - Eligibility Object Results for Schedules Read Only	Allows users to call the GET method associated with the eligibility object results REST service for eligibility results with an eligibility object type of SCHED.
Use REST Service - Eligibility Object Results for Wellness	Allows users to call all methods associated with the eligibility object results REST service for eligibility results with an eligibility object type of EHW.
Use REST Service - Eligibility Object Results for Wellness Read Only	Allows users to call the GET method associated with the eligibility object results REST service for eligibility results with an eligibility object type of EHW.
Use REST Service - Feedback Requests Read Only	Allows the user to call the GET method associated with the Feedback Requests REST service.
Use REST Service - Feedback Requests by Worker or Manager	Allows the user to call the POST method associated with the Feedback Requests REST service.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journey Responses Read Only	Allows the user to call the GET method associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.

Aggregate Privilege	Description
Use REST Service - HCM Channel Messages	Allows the user to call all methods associated with the HCM Channel Messages REST Service.
Use REST Service - HCM Channel Messages Read Only	Allows the user to call the GET method associated with the HCM Channel Messages REST Service.
Use REST Service - HCM Contracts List of Values	Allows the user to call the GET method associated with the HCM Contracts list of values REST Service.
Use REST Service - HCM Countries List of Values	Allows the user to call the GET method associated with the HCM Countries list of values REST Service.
Use REST Service - Job Searches	Allows the user to search for HR jobs using the jobSearches REST API.
Use REST Service - Journey Allocations	Allows the user to call all methods associated with the Journey Allocations REST Service.
Use REST Service - Journey Allocations Read Only	Allows the user to call the GET method associated with the Journey Allocations REST Service.
Use REST Service - Journey Categories List of Values	Allows the user to call the GET method associated with the Journey Categories List of Values REST Service.
Use REST Service - Journey Task Library	Allows the user to call all methods associated with the Journey Task Library REST Service.
Use REST Service - Journey Task Library Read Only	Allows the user to call the GET method associated with the Journey Task Library REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.
Use REST Service - Journeys Read Only	Allows the user to call the GET method associated with the Journeys REST Service.
Use REST Service - Learner Learning Catalog Read Only	Allows the user to call the GET method associated with the Learner Learning Catalog REST Service.
Use REST Service - Learner Learning Record Read Only	Allows the user to call the GET method associated with the Learner Learning Record REST Service.
Use REST Service - Learning Course	Allows the user to call all methods associated with the Learning Course REST service
Use REST Service - Learning Course Read Only	Allows the user to call the GET method associated with the Learning Course REST service
Use REST Service - Learning Record Searches by Administrator	Allows the user to search learning records as a learning administrator.

Aggregate Privilege	Description
Use REST Service - Learning Specialization	Allows the user to call all methods associated with the Learning Specialization REST service
Use REST Service - Learning Specialization Read Only	Allows the user to call the GET method associated with the Learning Specialization REST service
Use REST Service - Location Searches	Allows the user to search for locations using the locationSearches REST API.
Use REST Service - Locations	Allows the user to call all methods associated with the Locations REST Service.
Use REST Service - Locations Read Only	Allows the user to call the GET method associated with the Locations REST Service.
Use REST Service - My Payslips Read Only	Allows users to view their own payslips using the Payslips REST Service.
Use REST Service - Payroll Absence Entries	Allows users to call all methods associated with the Payroll Absence Entries REST Service.
Use REST Service - Payroll Absence Entries Read Only	Allows users to call the GET method associated with the Payroll Absence Entries REST Service.
Use REST Service - Payroll Flow Instances	Allows users to call all methods associated with the Payroll Flow Instances REST Service.
Use REST Service - Payroll Flow Instances Read Only	Allows users to call the GET method associated with the Payroll Flow Instances REST Service.
Use REST Service - Payroll Flow Patterns	Allows users to call all methods associated with the Payroll Flow Patterns REST Service.
Use REST Service - Payroll Flow Patterns Read Only	Allows users to call the GET method associated with the Payroll Flow Patterns REST Service.
Use REST Service - Payroll List of Values	Allows users to call the GET method associated with the Payroll list of values REST Service.
Use REST Service - Payroll Reference Data Lists of Values	Allows users to call the GET method associated with the Payroll Reference Data list of values REST Services.
Use REST Service - Payroll Time Entries	Allows users to call all methods associated with the Payroll Time Entries REST Service.
Use REST Service - Payroll Time Entries Read Only	Allows users to call the GET method associated with the Payroll Time Entries REST Service.
Use REST Service - Performance Evaluations Read Only	Allows the user to call the GET method associated with the Performance Evaluations REST service.
Use REST Service - Performance Goals List of Values	Allows the user to call the GET method associated with the Performance Goals List of Values REST Service.

Aggregate Privilege	Description
Use REST Service - Performance Goals Read Only	Allows the user to call the GET method associated with the Performance Goals REST service.
Use REST Service - Person Benefit Balances	Allows users to call all methods associated with the person benefit balances REST service.
Use REST Service - Person Benefit Balances Read Only	Allows users to call the GET method associated with the person benefit balances REST service.
Use REST Service - Person Benefit Groups	Allows users to call all methods associated with the person benefit groups REST service.
Use REST Service - Person Benefit Groups Read Only	Allows users to call the GET method associated with the person benefit groups REST service.
Use REST Service - Person Notes	Allows the user to call the GET, DESCRIBE, POST, PATCH and DELETE methods associated with the Person Notes REST service.
Use REST Service - Person Notes Read Only	Allows the user to call the GET and DESCRIBE methods associated with the Person Notes REST service.
Use REST Service - Person Reference Data Lists of Values	Allows the user to call the GET method associated with the person reference data lists of values REST services.
