Get Help

There are a number of ways to learn more about your product and interact with Oracle and other users.

Get Help in the Applications

Use help icons  to access help in the application. If you don't see any help icons on your page, click your user image or name in the global header and select Show Help Icons.

Get Support

You can get support at [My Oracle Support](#). For accessible support, visit [Oracle Accessibility Learning and Support](#).

Get Training

Increase your knowledge of Oracle Cloud by taking courses at [Oracle University](#).

Join Our Community

Use [Cloud Customer Connect](#) to get information from industry experts at Oracle and in the partner community. You can join forums to connect with other customers, post questions, suggest [ideas](#) for product enhancements, and watch events.

Learn About Accessibility

For information about Oracle's commitment to accessibility, visit the [Oracle Accessibility Program](#). Videos included in this guide are provided as a media alternative for text-based topics also available in this guide.

Share Your Feedback

We welcome your feedback about Oracle Applications user assistance. If you need clarification, find an error, or just want to tell us what you found helpful, we'd like to hear from you.

You can email your feedback to oracle_fusion_applications_help_ww_grp@oracle.com.

Thanks for helping us improve our user assistance!

1 Introduction

Overview of Security Reference

If you are an IT Security Manager, this guide is for you. Use the reference information for implementing security for an offering in Oracle Applications Cloud. Depending on the needs of your enterprise, determine what works best for your offering, and make the required configuration changes.

Broadly, the reference information includes these details:

- Abstract and job roles for an offering
- Duty roles and the role hierarchy for each job role and abstract role
- Privileges that are required to perform duties defined by a duty role
- Data security policies for each job role or abstract role
- Policies that protect personally identifiable information

To know more about the roles, privileges, and policies and to learn how to implement and administer security for your offering, refer to your product security guide.

How to Use This Guide

You can review the information in this guide to decide how to assign roles and privileges to specific users. For each role, you will find these details:

- The role hierarchy that lists the other inherited roles
- A list of duties assigned to that role
- Privileges granted to that role
- Data security policies and their implementation scope

Note: The changes you make to the security reference implementation are preserved during upgrades or maintenance patches.

Common Roles for All Offerings

In this guide, you will find all the common roles that are relevant to all offerings. For information about roles specific to an offering, see the Security Reference Guide for that offering.

Advisory Note on Subscription Impact

Assigning predefined roles and privileges as is to users may impact subscription usage, even if you haven't purchased the subscription. Privileges that are assigned but remain unused can still account for subscription consumption.

Before you assign predefined roles with privileges, evaluate the business needs of your users. Do your users need the entire role and all its privileges in full scope? Or, do they need the role but only a few of its privileges? Evaluating what your users need will help you avoid potential security risks and also keep a check on the subscription consumption.

If you want users to have the predefined role in full scope and have purchased all the impacted cloud services, you can assign the role with privileges as is. For example, only while setting up an application, you may need to assign the predefined Application Implementation Consultant role as is. Once the setup is complete, you can unassign it. Otherwise, Oracle recommends that you make a copy of that predefined role, remove the privileges you don't need, and assign only the required privileges. For a list of all predefined roles with privileges that impact subscription usage, see the spreadsheet [Predefined Roles with Subscription Impact](#). To give you an example, here's an indicative list of the top three roles that impact subscription usage:

- Employee (ORA_PER_EMPLOYEE_ABSTRACT)
- Application Implementation Consultant (ORA_ASM_APPLICATION_IMPLEMENTATION_CONSULTANT_JOB)
- Contingent Worker (ORA_PER_CONTINGENT_WORKER_ABSTRACT)

2 What's New

Overview

This release of the offering includes new job roles, abstract roles, duties, aggregate privileges, or privileges.

New Duties

This table lists the new duties for the Common offering.

Duty Role	Description
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.
PSC Manage Third Party Payments	Allows users to manage third party payments.
PSC Planning Application Meeting Administration	Allows users to access planning application meeting objects
PSC Pre-application Meeting Administration	Allows users to access pre-application meeting objects
Upload data for Supplier Warranty Coverage	Allows to upload data file to import supplier warranty coverage related data.

New Aggregate Privileges

This table lists the new aggregate privileges for the Common offering.

Aggregate Privilege	Description
Manage Payroll Element	Allows users to manage payroll elements.
Purchase Agreement Management Using REST Service	Do not use: Allows users to call all methods except administrative methods with the Purchase Agreement REST service for all rows.

Aggregate Privilege	Description
Purchase Agreement Viewing Using REST Service	Do not use: Allows users to call the GET method with the Purchase Agreement REST service for all rows.
View Payroll Element	Allows users to view payroll elements.

New Privileges

This table lists the new privileges for the Common offering.

Granted Role	Privilege	Description
Application Administrator	Create and Edit Backends for Visual Builder Studio	Allows creation and editing of backends for the Visual Builder Studio extensions.
Channel Operations	Create Accruals for Co-op Programs	Allows submission of the process that checks eligibility for channel document transactions based on product rules and creates aggregated channel program accrual entries for eligible transactions.
Field Service Administrator	Access Parts Requirements Search for Administrator	Allows field service administrator to search for parts requirements.
Higher Education Application Administrator	View Student Management Workflow Instances	Allows viewing of workflow instances in student management. A workflow instance is a process executing in an orchestration engine that is created from a workflow definition.
Joint Venture Application Administrator	Manage Joint Venture Project Sets	Allows for the management of joint venture project sets.
Order Orchestration Administration	Update Sales Order Indexes	Updates indexes for sales orders.
PSC Business License Application Administrator	Manage Public Sector Business License Resources Extensibility	Allows users to manage business license resources enabled for extensibility.
PSC Code Enforcement Application Administrator	Manage Public Sector Code Enforcement Resources Extensibility	Allows users to manage code enforcement resources enabled for extensibility.
PSC Hearings Management All	Run Public Sector Planning Application Hearing Communication Report	Allows users to run the Hearing Communication report.
PSC Hearings Management Self	Run Public Sector Planning Application Hearing Communication Report	Allows users to run the Hearing Communication report.

Granted Role	Privilege	Description
PSC Manage Third Party Payments	Manage Public Sector Third Party Payments	Allows users to manage third party payments.
PSC Permits Application Administrator	Manage Public Sector Permit Resources Extensibility	Allows users to manage permit resources enabled for extensibility.
PSC Planning and Zoning Application Administrator	Manage Public Sector Planning and Zoning Resources Extensibility	Allows users to manage planning and zoning resources enabled for extensibility.
Payments Disbursement Administration	Manage Virtual Card Programs	Allows management of virtual card programs
Payments Disbursement Administration	Manage Virtual Card Templates	Allows management of virtual card programs
Project Application Administrator	Manage Project Program Service	Allows access to services to manage project programs, communication catalog objects, communication association properties, and user preference resets.
Project Integration Specialist	Manage Project Program Service	Allows access to services to manage project programs, communication catalog objects, communication association properties, and user preference resets.
Service Request Administrator	Administer SR Summarization APIs	Allows administration of tasks such as payload to be passed on to APIs.
Service Request Administrator	Create DLM Policies	Allows creation of DLM policies.
Service Request Administrator	Delete DLM Policies	Allows deletion of DLM policies.
Service Request Administrator	Edit DLM Policies	Allows editing of DLM policies.
Service Request Administrator	Edit Workflows	Allows creating, editing and reading of workflow automations.
Service Request Administrator	Manage DLM Policies	Allows create, edit, delete and execution of DLM policies.
Service Request Administrator	View DLM Policies	Allows viewing of DLM policies.
Supply Chain Application Administrator	Mass Association of Meter Templates	Allows mass creation and association of asset meters from meter templates.
Supply Chain Application Administrator	View Feature States Value by Web Service	Allow viewing feature states value by web service

3 Roles

Application Administrator (Job Role)

Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.

Role Hierarchy

The Application Administrator job role directly and indirectly inherits these roles.

- Application Administrator
 - Application Deployment Administration
 - Application Registration
 - Functional Setup Objects Provider
 - Functional Setups
 - Manage data for Configuration Set Migration

Duties

This table lists the duties assigned directly and indirectly to the Application Administrator job role.

Duty Role	Description
Application Deployment Administration	Manages application instance configurations and enterprise applications.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Manage data for Configuration Set Migration	Allows to upload and download configuration set data.

Privileges

This table lists privileges granted to duties of the Application Administrator job role.

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Administer Sandbox
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Configure Help System Settings
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Create About Page Report
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Create and Edit Backends for Visual Builder Studio
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Define Endpoint and Security Policy Information
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Grant Search Framework Manager Permissions
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Import Applications Common Sandbox
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Launch Oracle Social Network

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage All Application Profile Values
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Alternate Words
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Activity Stream Configuration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Attachment
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Attachment Category
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Attachment Entity
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Attachment Trusted Status
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Common Lookup
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Data Security Policy

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Database Resource
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Descriptive Flexfield
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Descriptive Flexfield Registration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Document Sequence
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Document Sequence Category
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Extensible Flexfield
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Extensible Flexfield Registration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Flexfield Value Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Key Flexfield

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Key Flexfield Registration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Menu Customization
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Message
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Profile Category
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Profile Option
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Reference Data Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Reference Data Set Assignment
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Set-Enabled Lookup
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Standard Lookup

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Taxonomy
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Tree
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Tree Label
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Tree Structure
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Applications Core Attachment Undo Checkout
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Audit Policies
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage File Import and Export
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Global Menus
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Global Template Customization

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Horizontal Extensions
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Incoming Configuration Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage My Application Profile Values
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Navigator Menu Structure
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Oracle Social Network Tracking
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Outgoing Configuration Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Read-Only Schema Column Masking
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Scheduled Job Definition
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Scheduled Processes Work Area

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Suggestion Groups
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Themes
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage User Interface Text
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Perform Data Migration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Privilege to control setup of global search
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Publish Applications Common Sandbox
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Record and View Issue
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Set Issue Recording Advanced Options
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Set Supportability Level

Granted Role	Granted Role Description	Privilege
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Set Watchlist Options
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	View About Page Report
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	View Batch Jobs
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	View Version Information
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Activate Optional Enterprise Application
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Instance
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Portlet Registration
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Database
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Deployed Domain
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Enterprise Environment
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Review Topology Hierarchy
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Setup and Maintain Applications

Granted Role	Granted Role Description	Privilege
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Cluster
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Composites
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Data Source
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Domain
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Enterprise Application
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Environment Type
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Logical Module
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Managed Server
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Middleware Component

Granted Role	Granted Role Description	Privilege
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Module Type
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Pillar
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Provision Configuration
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Third Party Applications
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Setup and Maintain Applications
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	View Topology Objects Overview
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Application Store
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Business Process
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Feature
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Logical Entity
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Oracle Fusion Application Offerings and Functional Areas

Granted Role	Granted Role Description	Privilege
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Quick Setup
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Solution Bundles
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Task List
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Setup and Maintain Applications
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Application Administrator job role.

Business Object	Policy Description	Policy Store Implementation
Application Attachment Category	A Application Administrator can delete application attachment category for all miscellaneous category attachments data	Role: Application Administrator Privilege: Delete Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can manage application attachment category for all applications common applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category

Business Object	Policy Description	Policy Store Implementation
Application Attachment Category	A Application Administrator can manage application attachment category for all crm applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can manage application attachment category for all financials applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can manage application attachment category for all hcm applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can manage application attachment category for all ic applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can manage application attachment category for all procurement applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can manage application attachment category for all projects applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can manage application attachment category for all scm applications data	Role: Application Administrator Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Administrator can update application attachment category for all miscellaneous category attachments data	Role: Application Administrator Privilege: Update Application Attachment Resource: Application Attachment Category

Business Object	Policy Description	Policy Store Implementation
Application Attachment Category	A Application Administrator can view application attachment category for all miscellaneous category attachments data	Role: Application Administrator Privilege: Read Application Attachment Resource: Application Attachment Category
Application Attachment Entity	A Application Administrator can manage application attachment entity for all applications common applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Administrator can manage application attachment entity for all crm applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Administrator can manage application attachment entity for all financials applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Administrator can manage application attachment entity for all hcm applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Administrator can manage application attachment entity for all ic applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Administrator can manage application attachment entity for all procurement applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Administrator can manage application attachment entity for all projects applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity

Business Object	Policy Description	Policy Store Implementation
Application Attachment Entity	A Application Administrator can manage application attachment entity for all scm applications data	Role: Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Diagnostic Test	A Application Administrator can execute application diagnostic test for all tests	Role: Application Administrator Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Document Sequence Category	A Application Administrator can manage application document sequence category for all applications common applications data	Role: Application Administrator Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Document Sequence Category	A Application Administrator can manage application document sequence category for all procurement applications data	Role: Application Administrator Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Document Sequence Category	A Application Administrator can manage application document sequence category for all projects applications data	Role: Application Administrator Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Document Sequence Category	A Application Administrator can manage application document sequence category for all scm applications data	Role: Application Administrator Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Objects	A Application Administrator can manage application objects for all applications common objects	Role: Application Administrator Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Application Administrator can manage application objects for all customer relationship management application objects	Role: Application Administrator Privilege: Manage Application Objects (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Application Objects
Application Objects	A Application Administrator can manage application objects for all financial supply chain manufacturing application objects	Role: Application Administrator Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Application Administrator can manage application objects for all human capital management application objects	Role: Application Administrator Privilege: Manage Application Objects (Data) Resource: Application Objects

Application Developer (Job Role)

Provides enterprise-wide application administration needed for configuring and extending applications.

Role Hierarchy

The Application Developer job role directly and indirectly inherits these roles.

- Application Developer
 - Application Deployment Administration
 - Application Registration
 - Application World Reference Administration
 - BI Publisher Data Model Developer
 - Functional Setup Objects Provider
 - Functional Setups

Duties

This table lists the duties assigned directly and indirectly to the Application Developer job role.

Duty Role	Description
Application Deployment Administration	Manages application instance configurations and enterprise applications.

Duty Role	Description
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.
BI Publisher Data Model Developer	Grants permission to create or edit data modes in BI Publisher
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.

Privileges

This table lists privileges granted to duties of the Application Developer job role.

Granted Role	Granted Role Description	Privilege
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Activate Optional Enterprise Application
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Instance
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Portlet Registration
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Database
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Deployed Domain
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Enterprise Environment
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Review Topology Hierarchy
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Setup and Maintain Applications

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Administer Sandbox
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Configure Help System Settings
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Define Endpoint and Security Policy Information
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Grant Search Framework Manager Permissions
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Import Applications Common Sandbox
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Launch Oracle Social Network
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage All Application Profile Values
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Alternate Words
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Activity Stream Configuration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Attachment Category
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Attachment Entity
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Common Lookup

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Data Security Policy
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Database Resource
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Descriptive Flexfield
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Descriptive Flexfield Registration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Document Sequence
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Document Sequence Category
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Extensible Flexfield
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Extensible Flexfield Registration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Flexfield Value Set
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Key Flexfield
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Key Flexfield Registration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Menu Customization

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Message
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Profile Category
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Profile Option
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Reference Data Set
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Reference Data Set Assignment
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Set-Enabled Lookup
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Standard Lookup
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Taxonomy
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Tree
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Tree Label
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Tree Structure
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Audit Policies

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage File Import and Export
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Incoming Configuration Set
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage My Application Profile Values
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Oracle Social Network Tracking
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Outgoing Configuration Set
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Scheduled Job Definition
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Scheduled Processes Work Area
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Suggestion Groups
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Web Service Information
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Webservices catalog
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Perform Data Migration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Privilege to control setup of global search

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Publish Applications Common Sandbox
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Set Supportability Level
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	View Administration Link
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	View Batch Jobs
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Cluster
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Composites
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Data Source
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Domain
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Enterprise Application
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Environment Type

Granted Role	Granted Role Description	Privilege
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Logical Module
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Managed Server
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Middleware Component
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Module Type
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Pillar
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Provision Configuration
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Third Party Applications
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Setup and Maintain Applications
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	View Topology Objects Overview

Granted Role	Granted Role Description	Privilege
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Currency
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference ISO Language
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Industry
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Language
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Natural Language
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Territory
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Timezone
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Application Store
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Business Process
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Feature
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Logical Entity
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Oracle Fusion Application Offerings and Functional Areas
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Quick Setup
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Solution Bundles

Granted Role	Granted Role Description	Privilege
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Task List
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Setup and Maintain Applications
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Application Developer job role.

Business Object	Policy Description	Policy Store Implementation
Application Attachment Category	A Application Developer can delete application attachment category for all miscellaneous category attachments data	Role: Application Developer Privilege: Delete Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Application Developer can manage application attachment category for all applications common applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Developer can manage application attachment category for all crm applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category

Business Object	Policy Description	Policy Store Implementation
Application Attachment Category	A Application Developer can manage application attachment category for all financials applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Developer can manage application attachment category for all hcm applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Developer can manage application attachment category for all ic applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Developer can manage application attachment category for all procurement applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Developer can manage application attachment category for all projects applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Developer can manage application attachment category for all scm applications data	Role: Application Developer Privilege: Manage Application Attachment Category (Data) Resource: Application Attachment Category
Application Attachment Category	A Application Developer can update application attachment category for all miscellaneous category attachments data	Role: Application Developer Privilege: Update Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Application Developer can view application attachment category for all miscellaneous category attachments data	Role: Application Developer Privilege: Read Application Attachment Resource: Application Attachment Category

Business Object	Policy Description	Policy Store Implementation
Application Attachment Entity	A Application Developer can manage application attachment entity for all applications common applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Developer can manage application attachment entity for all crm applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Developer can manage application attachment entity for all financials applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Developer can manage application attachment entity for all hcm applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Developer can manage application attachment entity for all ic applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Developer can manage application attachment entity for all procurement applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Developer can manage application attachment entity for all projects applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Attachment Entity	A Application Developer can manage application attachment entity for all scm applications data	Role: Application Developer Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity

Business Object	Policy Description	Policy Store Implementation
Application Diagnostic Test	A Application Developer can execute application diagnostic test for all tests	Role: Application Developer Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Document Sequence Category	A Application Developer can manage application document sequence category for all applications common applications data	Role: Application Developer Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Document Sequence Category	A Application Developer can manage application document sequence category for all procurement applications data	Role: Application Developer Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Document Sequence Category	A Application Developer can manage application document sequence category for all projects applications data	Role: Application Developer Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Document Sequence Category	A Application Developer can manage application document sequence category for all scm applications data	Role: Application Developer Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Objects	A Application Developer can manage application objects for all applications common objects	Role: Application Developer Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Application Developer can manage application objects for all customer relationship management application objects	Role: Application Developer Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Application Developer can manage application objects for all financial supply chain manufacturing application objects	Role: Application Developer Privilege: Manage Application Objects (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Application Objects
Application Objects	A Application Developer can manage application objects for all human capital management application objects	Role: Application Developer Privilege: Manage Application Objects (Data) Resource: Application Objects

Application Diagnostics Administrator (Job Role)

Manages diagnostic tests and data.

Role Hierarchy

The Application Diagnostics Administrator job role directly and indirectly inherits these roles.

- Application Diagnostics Administrator
 - Application Diagnostics Administration
 - Application Diagnostic Run Data Maintenance
 - Application Diagnostic Tag Maintenance
 - Application Diagnostic Test Maintenance
 - Application Diagnostics Advanced User
 - Application Diagnostic Test Scheduling
 - Application Diagnostics Regular User
 - Application Diagnostic Test Execution
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting
 - Application Diagnostics Advanced User
 - Application Diagnostics Advanced User
 - Application Diagnostic Test Scheduling
 - Application Diagnostics Regular User
 - Application Diagnostic Test Execution
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting
 - Application Diagnostics Data Advanced
 - Application Diagnostics Regular User
 - Application Diagnostics Data Regular
 - Application Diagnostics Regular User
 - Application Diagnostic Test Execution
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting
 - Application Diagnostics Viewer
 - Application Diagnostics Data Viewer
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting
 - Application Diagnostics Data Administration

Duties

This table lists the duties assigned directly and indirectly to the Application Diagnostics Administrator job role.

Duty Role	Description
Application Diagnostic Run Data Maintenance	Manages enterprise-wide application administration of diagnostic tests and tags, Maintains test runs, including the ability to purge test runs and test reports, and cancels runaway test runs submitted by any user.
Application Diagnostic Tag Maintenance	Creates and deletes diagnostic tags and tag values.
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.
Application Diagnostic Test Maintenance	Registers diagnostic tests, assigns and unassigns tag values.
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.
Application Diagnostic Test Scheduling	Selects and schedules diagnostic tests, enters input parameters for diagnostic test runs.
Application Diagnostics Administration	Maintains diagnostic tests, tags, and values. Selects, runs, schedules, and maintains diagnostic test runs, reviews diagnostic test status and reports, adds diagnostic test results to application incidents.
Application Diagnostics Advanced User	Selects, runs, and schedules diagnostic tests, reviews diagnostic test status and reports, and adds diagnostic test results to application incidents.
Application Diagnostics Data Administration	Runs all diagnostics test data, manages tag data, and views test result data for all tests associated with administration user.
Application Diagnostics Data Advanced	Runs application diagnostic test data and views resulting reports, associated with advanced users.
Application Diagnostics Data Regular	Runs application diagnostic test data and views application diagnostic test report data.
Application Diagnostics Data Viewer	Views application diagnostic test report data.
Application Diagnostics Regular User	Selects and runs diagnostic tests. Reviews diagnostic test status and reports. Does not schedule diagnostic tests or add test results to application incidents.
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.

Privileges

This table lists privileges granted to duties of the Application Diagnostics Administrator job role.

Granted Role	Granted Role Description	Privilege
Application Diagnostic Run Data Maintenance	Manages enterprise-wide application administration of diagnostic tests and tags,	Cancel Application Diagnostic Test Run Submitted By Any User

Granted Role	Granted Role Description	Privilege
	Maintains test runs, including the ability to purge test runs and test reports, and cancels runaway test runs submitted by any user.	
Application Diagnostic Run Data Maintenance	Manages enterprise-wide application administration of diagnostic tests and tags, Maintains test runs, including the ability to purge test runs and test reports, and cancels runaway test runs submitted by any user.	Purge Application Diagnostic Test Run
Application Diagnostic Tag Maintenance	Creates and deletes diagnostic tags and tag values.	Maintain Application Diagnostic Tag
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.	Cancel Application Diagnostic Test Run
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.	Run Application Diagnostic Test
Application Diagnostic Test Maintenance	Registers diagnostic tests, assigns and unassigns tag values.	Maintain Application Diagnostic Test
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Run Status
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Test Report
Application Diagnostic Test Scheduling	Selects and schedules diagnostic tests, enters input parameters for diagnostic test runs.	Schedule Application Diagnostic Test
Application Diagnostics Advanced User	Selects, runs, and schedules diagnostic tests, reviews diagnostic test status and reports, and adds diagnostic test results to application incidents.	Add Application Diagnostic Test Results to Incidents
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Access Application Diagnostic Dashboard
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Search Application Diagnostic Test

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Application Diagnostics Administrator job role.

Business Object	Policy Description	Policy Store Implementation
Application Diagnostic Tag	An Application Diagnostics Administrator can delete application diagnostic tag for all tags	Role: Application Diagnostics Data Administration Privilege: Delete Application Diagnostic Tag (Data) Resource: Application Diagnostic Tag
Application Diagnostic Tag	An Application Diagnostics Administrator can update application diagnostic tag for all tags	Role: Application Diagnostics Data Administration Privilege: Update Application Diagnostic Tag (Data) Resource: Application Diagnostic Tag
Application Diagnostic Test	An Application Diagnostics Administrator can delete application diagnostic test for all tests	Role: Application Diagnostics Data Administration Privilege: Delete Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Administrator can execute application diagnostic test for all tests	Role: Application Diagnostics Data Administration Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Administrator can execute application diagnostic test for all tests	Role: Application Diagnostics Data Advanced Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Administrator can execute application diagnostic test for all tests	Role: Application Diagnostics Data Regular Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Administrator can update application diagnostic test for all tests	Role: Application Diagnostics Data Administration Privilege: Update Application Diagnostic Test (Data) Resource: Application Diagnostic Test

Business Object	Policy Description	Policy Store Implementation
Application Diagnostic Test	An Application Diagnostics Administrator can view application diagnostic test report for all tests	Role: Application Diagnostics Data Administration Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Administrator can view application diagnostic test report for all tests	Role: Application Diagnostics Data Advanced Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Administrator can view application diagnostic test report for all tests	Role: Application Diagnostics Data Regular Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Administrator can view application diagnostic test report for all tests	Role: Application Diagnostics Data Viewer Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test

Application Diagnostics Advanced User (Job Role)

Runs diagnostic test, reviews diagnostic test results. Schedules diagnostic tests or adds test results to application incidents.

Role Hierarchy

The Application Diagnostics Advanced User job role directly and indirectly inherits these roles.

- Application Diagnostics Advanced User
 - Application Diagnostics Advanced User
 - Application Diagnostic Test Scheduling
 - Application Diagnostics Regular User
 - Application Diagnostic Test Execution
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting
 - Application Diagnostics Data Advanced
 - Application Diagnostics Regular User
 - Application Diagnostics Data Regular
 - Application Diagnostics Regular User
 - Application Diagnostic Test Execution
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting
 - Application Diagnostics Viewer
 - Application Diagnostics Data Viewer
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting

Duties

This table lists the duties assigned directly and indirectly to the Application Diagnostics Advanced User job role.

Duty Role	Description
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.
Application Diagnostic Test Scheduling	Selects and schedules diagnostic tests, enters input parameters for diagnostic test runs.
Application Diagnostics Advanced User	Selects, runs, and schedules diagnostic tests, reviews diagnostic test status and reports, and adds diagnostic test results to application incidents.
Application Diagnostics Data Advanced	Runs application diagnostic test data and views resulting reports, associated with advanced users.
Application Diagnostics Data Regular	Runs application diagnostic test data and views application diagnostic test report data.

Duty Role	Description
Application Diagnostics Data Viewer	Views application diagnostic test report data.
Application Diagnostics Regular User	Selects and runs diagnostic tests. Reviews diagnostic test status and reports. Does not schedule diagnostic tests or add test results to application incidents.
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.

Privileges

This table lists privileges granted to duties of the Application Diagnostics Advanced User job role.

Granted Role	Granted Role Description	Privilege
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.	Cancel Application Diagnostic Test Run
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.	Run Application Diagnostic Test
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Run Status
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Test Report
Application Diagnostic Test Scheduling	Selects and schedules diagnostic tests, enters input parameters for diagnostic test runs.	Schedule Application Diagnostic Test
Application Diagnostics Advanced User	Selects, runs, and schedules diagnostic tests, reviews diagnostic test status and reports, and adds diagnostic test results to application incidents.	Add Application Diagnostic Test Results to Incidents
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Access Application Diagnostic Dashboard
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Search Application Diagnostic Test

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Application Diagnostics Advanced User job role.

Business Object	Policy Description	Policy Store Implementation
Application Diagnostic Test	An Application Diagnostics Advanced User can execute application diagnostic test for all tests	Role: Application Diagnostics Data Advanced Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Advanced User can execute application diagnostic test for all tests	Role: Application Diagnostics Data Regular Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Advanced User can view application diagnostic test report for all tests	Role: Application Diagnostics Data Advanced Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Advanced User can view application diagnostic test report for all tests	Role: Application Diagnostics Data Regular Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Advanced User can view application diagnostic test report for all tests	Role: Application Diagnostics Data Viewer Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test

Application Diagnostics Regular User (Job Role)

Runs diagnostic tests. Reviews diagnostic test results. Does not schedule diagnostic tests or add test results to application incidents..

Role Hierarchy

The Application Diagnostics Regular User job role directly and indirectly inherits these roles.

- Application Diagnostics Regular User
 - Application Diagnostics Data Regular
 - Application Diagnostics Regular User
 - Application Diagnostic Test Execution
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting
 - Application Diagnostics Viewer
 - Application Diagnostics Data Viewer
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting

Duties

This table lists the duties assigned directly and indirectly to the Application Diagnostics Regular User job role.

Duty Role	Description
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.
Application Diagnostics Data Regular	Runs application diagnostic test data and views application diagnostic test report data.
Application Diagnostics Data Viewer	Views application diagnostic test report data.
Application Diagnostics Regular User	Selects and runs diagnostic tests. Reviews diagnostic test status and reports. Does not schedule diagnostic tests or add test results to application incidents.

Duty Role	Description
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.

Privileges

This table lists privileges granted to duties of the Application Diagnostics Regular User job role.

Granted Role	Granted Role Description	Privilege
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.	Cancel Application Diagnostic Test Run
Application Diagnostic Test Execution	Selects and runs diagnostic tests, enters input parameters for diagnostic test runs.	Run Application Diagnostic Test
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Run Status
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Test Report
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Access Application Diagnostic Dashboard
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Search Application Diagnostic Test

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Application Diagnostics Regular User job role.

Business Object	Policy Description	Policy Store Implementation
Application Diagnostic Test	An Application Diagnostics Regular User can execute application diagnostic test for all tests	Role: Application Diagnostics Data Regular Privilege: Execute Application Diagnostic Test (Data) Resource: Application Diagnostic Test

Business Object	Policy Description	Policy Store Implementation
Application Diagnostic Test	An Application Diagnostics Regular User can view application diagnostic test report for all tests	Role: Application Diagnostics Data Regular Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test
Application Diagnostic Test	An Application Diagnostics Regular User can view application diagnostic test report for all tests	Role: Application Diagnostics Data Viewer Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test

Application Diagnostics Viewer (Job Role)

Reviews diagnostic test run status and test results for analysis.

Role Hierarchy

The Application Diagnostics Viewer job role directly and indirectly inherits these roles.

- Application Diagnostics Viewer
 - Application Diagnostics Data Viewer
 - Application Diagnostics Viewer
 - Application Diagnostic Test Reporting

Duties

This table lists the duties assigned directly and indirectly to the Application Diagnostics Viewer job role.

Duty Role	Description
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.
Application Diagnostics Data Viewer	Views application diagnostic test report data.
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.

Duty Role	Description

Privileges

This table lists privileges granted to duties of the Application Diagnostics Viewer job role.

Granted Role	Granted Role Description	Privilege
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Run Status
Application Diagnostic Test Reporting	Reviews diagnostic test run status and test reports.	View Application Diagnostic Test Report
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Access Application Diagnostic Dashboard
Application Diagnostics Viewer	Reviews diagnostic test run status and test results.	Search Application Diagnostic Test

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Application Diagnostics Viewer job role.

Business Object	Policy Description	Policy Store Implementation
Application Diagnostic Test	An Application Diagnostics Viewer can view application diagnostic test report for all tests	Role: Application Diagnostics Data Viewer Privilege: View Application Diagnostic Test Report (Data) Resource: Application Diagnostic Test

Application Implementation Administrator (Abstract Role)

Performs all Oracle Fusion Functional Setup Manager duties.

Role Hierarchy

The Application Implementation Administrator abstract role directly and indirectly inherits these roles.

- Application Implementation Administrator
 - Application Deployment Administration
 - Application Implementation Management
 - Application Registration
 - Functional Setup Objects Provider

Duties

This table lists the duties assigned directly and indirectly to the Application Implementation Administrator abstract role.

Duty Role	Description
Application Deployment Administration	Manages application instance configurations and enterprise applications.
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.

Privileges

This table lists privileges granted to duties of the Application Implementation Administrator abstract role.

Granted Role	Granted Role Description	Privilege
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Activate Optional Enterprise Application
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Instance
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Portlet Registration
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Database
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Deployed Domain
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Enterprise Environment
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Review Topology Hierarchy
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Setup and Maintain Applications
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Administer Sandbox
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Configure Setup UI
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Comparison Processes
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Configuration Packages
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Setup Data Export and Import Processes

Granted Role	Granted Role Description	Privilege
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Perform Quick Setup
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Setup and Maintain Applications
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Submit Export Setup Data Process
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Submit Import Setup Data Process
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	View Administration Link
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Configure Oracle Fusion Applications Offering
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Gather Implementation Requirements
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Manage Implementation Project
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Review Applications Offering
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Review Implementation Project Overview
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Setup and Maintain Applications
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Cluster
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Composites

Granted Role	Granted Role Description	Privilege
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Data Source
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Domain
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Enterprise Application

PSC Case APO Information Management	Allows users to manage code enforcement case parcel information.
PSC Case Appeals Management	Case Appeals Management
PSC Case Citations Management	Case Citations Management
PSC Case Code References Management	Case Code References Management

Duty Role	Description
PSC Case Fees and Payments Management	Case Fees and Payments Management
PSC Case Notices Management	Case Notices Management
PSC Case Property Information Management	Case Property Information Management Duty
PSC Case Responsible Parties Management	Case Responsible Parties Management
PSC Case Time Recording Management assigned to self	Allows users to manage case time recordings assigned to themselves.
PSC Case Time Recording Management for All	Allows users to manage case time recordings assigned to all.
PSC Case Timeline Inquiry	Allows users to view the case timeline and print the report
PSC Cashier Administration	Cashier Administration Duty
PSC Code Enforcement Case Administration	Code Enforcement Case Administration Duty
PSC Code Enforcement Case Management	Code Enforcement Case Management Duty
PSC Code Enforcement Incident Administration	Code Enforcement Incident Administration Duty
PSC Code Enforcement Incident Management	Code Enforcement Incident Management Duty
PSC Code Enforcement Setup Data Administration	Code Enforcement Setup Data Administration Duty
PSC Code Enforcement Workflow User	Allows users to participate in code enforcement workflow.
PSC Common Setup Data Administration	Common Setup Data Administration Duty
PSC Conditions of Approval Administration	Allows users to administer conditions of approval on planning applications.
PSC Conditions of Approval Inquiry	Allows users to view conditions of approval on planning applications.

Duty Role	Description
PSC Conditions of Approval Management All	Allows users to manage conditions of approval on planning applications assigned to self and others
PSC Conditions of Approval Management Self	Allows users to manage conditions of approval on planning applications assigned to self.
PSC Contractor Master Administration	Allows users to manage contractor master.
PSC Contractor Master Inquiry	Allows agency users to view master contractor data
PSC Contractor Master Management	Allows agency users to manage master contractor data.
PSC Delete Business License Attachments added by self	Enables users to delete business license attachments added by themselves.
PSC Delete Business License Attachments added by self and others	Enables users to delete business license attachments added by themselves and others.
PSC Delete Business License Comments added by self	Enables users to delete business license comments added by themselves.
PSC Delete Business License Comments added by self and others	Enables users to delete business license comments added by themselves and others.
PSC Delete Business License Workflow Attachments of tasks assigned to self and others	Enables users to delete business license attachments for tasks assigned to themselves and others.
PSC Delete Business License Workflow Comments of tasks assigned to self and others	Enables users to delete business license workflow comments for tasks assigned to themselves and others.
PSC Estimate Public Sector Fees	Allows users to estimate public sector application fees.
PSC Execute Solution Package Process	Allows users to submit the Import and Export Solution Package process.
PSC HCM Employee Data Administration	Allows user to add Employee
PSC HCM Employee Data Inquiry	Allows user to view Employee
PSC Hearings Inquiry	Allows users to view hearings.
PSC Hearings Management All	Allows users to manage hearings of applications assigned to others and themselves.
PSC Hearings Management Self	Allows users to manage hearings of applications assigned to themselves.

Duty Role	Description
PSC Incident APO Information Management	Allows users to manage code enforcement incident parcel information.
PSC Inquire Deposit Accounts	Allows users to view public sector deposit accounts.
PSC Inspection Request Management	Inspection Request Management Duty
PSC Inspections Attachments User	Allows users to manage inspection Attachments
PSC Integration Cloud User for Workflow	Allows identification of calls from the process cloud service.
PSC Interactive Voice Recognition Proxy User	Allows user to access system from interactive voice recognition.
PSC Manage Business License Credential Attachments Added by Self	Allows users to add business license credential attachments and update and delete attachments added by themselves.
PSC Manage Business License Credential Attachments Added by Self and Others	Allows users to add business license credential attachments and update and delete attachments added by themselves and others.
PSC Manage Business License Inspections	Allows users to manage business license inspections.
PSC Manage Business License Reporting Period	Responsible for managing the business license reporting period.
PSC Manage Deposit Accounts	Allows users to manage public sector deposit accounts.
PSC Manage Parcel Comments added by self	Allows users to add, update and delete parcel comments added by themselves.
PSC Manage Parcel Comments added by self and others	Allows users to add, update and delete parcel comments added by themselves and others.
PSC Manage Plan Review Cycles in Planning Applications All	Allows users to manage plan review cycles in planning applications assigned to any planner.
PSC Manage Plan Review Cycles in Planning Applications Self	Allows users to manage plan review cycles in planning applications assigned to self.
PSC Manage Related Transactions	Manages Related Transactions.
PSC Manage Third Party Payments	Allows users to manage third party payments.
PSC Map User	Map User Duty

Duty Role	Description
PSC Oracle Policy Automation Proxy User	Allows user to View Hidden from Public sections in the Permit detail form.
PSC Parcel Comments Inquiry	Allows users to view parcel comments.
PSC Permit Conditions Management	Conditions Management Duty
PSC Permit Contractor Management	Allows users to manage contractors in permits
PSC Permit Property Inquiry	Permit Property Inquiry Duty
PSC Permit Property Management	Permit Property Management Duty
PSC Permit Related Management Record	Permit Related Management Record Duty
PSC Permit Time Recording Inquiry	Allows user to view time recording on permits.
PSC Permit Time Recording Management All	Allows user to manage time recording on permits assigned to all.
PSC Permit Time Recording Management Self	Allows user to manage time recording on permits assigned to self.
PSC Permit Workflow Administration	Allows users to administer Permits Workflows.
PSC Permits Administration	Permits Administration Duty
PSC Permits Attachments User	Permits Attachments User Duty
PSC Permits Communication Management	Permits Communication Management Duty
PSC Permits Conditions of Approval Management	Allows users to apply and resolve conditions of approval on permits
PSC Permits Fees Management	Allows users to add, update and delete fees.
PSC Permits Fees and Payments Administration Obsolete	Permits Fees and Payments Administration Duty. This role is obsolete.
PSC Permits Management	Allows users to manage permits.
PSC Permits Management with Elevated Access	Provides users elevated access to manage public sector permits.

Duty Role	Description
PSC Permits Workflow User	Permits Workflow User Duty
PSC Planning Application Management with Elevated Access	Provides users elevated access to manage public sector planning applications.
PSC Planning Application Meeting Administration	Allows users to access planning application meeting objects
PSC Planning Application Meeting Inquiry	Allows users to view a Planning Application Meeting.
PSC Planning Application Meeting Management	Allows users to schedule and reschedule planning application meetings.
PSC Planning Reports Management All	Allows user to manage reports on planning applications assigned to anyone.
PSC Planning Reports Management Self	Allows user to manage reports on planning applications assigned to self.
PSC Planning Time Recording Inquiry	Allows user to view time recording on planning applications.
PSC Planning Time Recording Management All	Allows user to manage time recording on plannings assigned to all.
PSC Planning Time Recording Management Self	Allows user to manage time recording on plannings assigned to self.
PSC Planning and Zoning Activity Administration	Allows users to administer Planning and Zoning activity
PSC Planning and Zoning Activity Management	Allows users to manage Planning and Zoning activity
PSC Planning and Zoning Communication Management	The Planning and Zoning communication management duty.
PSC Planning and Zoning Conditions Management	The Planning and Zoning conditions management duty.
PSC Planning and Zoning Contacts Management	The Planning and Zoning contacts management duty.
PSC Planning and Zoning Contractor Management	Setup Data Administration Duty
PSC Planning and Zoning Fees Management	Planning and Zoning Fees Management Duty

Duty Role	Description
PSC Planning and Zoning Hearings Custom Dates Management	Allows users to insert and remove custom date.
PSC Planning and Zoning Management	The Planning and Zoning management duty.
PSC Planning and Zoning Property Management	The Planning and Zoning property management duty.
PSC Planning and Zoning Workflow Administration	Allows users to Administer Planning and Zoning Workflows.
PSC Planning and Zoning Workflow User	Planning and Zoning workflow user duty
PSC Pre-Application Meeting Inquiry	Allows users to view a Pre-Application Meeting.
PSC Pre-Application Meeting Management	Allows users to schedule and reschedule pre-application meetings.
PSC Pre-application Meeting Administration	Allows users to access pre-application meeting objects
PSC Print Appeal Letter	Allows user to print the appeal letter.
PSC Print Building Permit	Allows user to print building permit.
PSC Print Business License Certificate	Allows printing of the BIP Business License Certificate Report.
PSC Print Citation	Allows user to print citation.
PSC Print Citation Payment Receipt	Allows user to print citation payment receipt.
PSC Print Letter of Compliance	Allows user to print letter of compliance.
PSC Print Notice of Violation	Allows user to print notice of violation.
PSC Print Payment Receipt	Allows user to print payment receipt.
PSC Print Refund Receipt	Allows user to print refund receipt.
PSC Project Management	Permit Project Management Duty
PSC Projects Administration	Allows users to administer Public Sector projects.

Duty Role	Description
PSC Projects Inquiry	Allows users to view Public Sector projects. This access is assigned to all users.
PSC Property Setup Administration	Allows the agency user to administer property setup.
PSC Property Setup Attachments Management	Allows user to manage property setup attachments.
PSC Property Setup Conditions Management	Allows user to manage property setup conditions.
PSC Property Setup Inquiry	Allows the agency user to view property setup.
PSC Public User Account Inquiry	Public User Account Inquiry Duty
PSC Public User Account Management	Public User Account Management Duty
PSC Public User Conditions Inquiry	Allows users to view public sector public user conditions.
PSC Public User Conditions Management	Allows users to manage public sector public user conditions.

Performs setup tasks for contract billing and project performance reporting. Configures project plan types, financial

Duty Role	Description
	plan types, spread curves, and period profiles. Configures setup options for integrating with external scheduling applications.
Project Resource Assignment	Directly assigns a resource to a project without approval from the resource manager. Edits project resource assignment attributes such as from and to dates, effort, allocation percentage, and cost and bill rates.
Project Transaction Approval Reviewing	Allows viewing the status of project transactions due for approval and taking appropriate action to expedite the approval process.
Projects Folder Reporting	Grants access to the Projects web catalog folder.
Public Sector Folder Reporting	Grants access to the Public Sector web catalog folder.
Purchasing Administration	Perform setup tasks including defining procurement configuration, procurement agents, approved supplier list statuses, document styles, change order templates, line types, carriers, UN numbers, and hazard classes.
Quota Export Management	Manages bulk export of all sales territory quota related objects.
Quota Management	Manages sales territory quotas and territory quota formulas. Additional duties include incentive compensation goal management, user and roles management, and party information inquiry.
Quota Management Export Import	Manages sales quota export and import. Provides users with the ability to export sales quota data, modify it offline and import.
Quota Management Setup	Manages sales territory quota setup, quota plans, prediction and spread formula parameters, and seasonality groups. Runs sales territory quota synchronization and sales quota plan activation and completion processes. Additional duties include party information inquiry.
Read for Product Catalog schema	Allows to read Product Catalog schema.
Receivables Administration	Manages Receivables setup activities.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.
Resource Administration	Administers resource information.
Resource Organization Administration	Administers resource organizations.
Resource Team Administration	Defines resource teams.
Revenue Management Configuration Administration	Manages Revenue Management setup activities.

Duty Role	Description
Review CRM Approval Transactions Administrator	Allows viewing of information for CRM approval transactions by an administrator.
Review HCM Approval Transactions as Administrator	Allows viewing of basic information for HCM approval transactions by an administrator.
Review Procurement Transactions as Administrator	Allows viewing of basic information for Procurement approval and electronic communication transactions by an administrator.
SOA Infra Designer	This role grants view/edit dictionary privileges for a user in SOA Rules Composer. This is a business administrator type role. Any team using the Rules Composer would need to grant this role to their admin enterprise role. This role is granted to SOAAdmin and BPMWorkflowAdmin. By default this application role is granted to "Administrators" enterprise role.
SOA Infra Operations	This role provides restricted management capabilities in EM. This is more of a system administrator role than a business administrator role. This role is granted to SOAAdmin. By default this application role is granted to "Administrators" and "Operators" enterprise roles.
Sales Change History Inquiry	Views change history of sales business objects for members within the sales organization.
Sales Lead Follow Up	Processes sales lead for follow up actions including the qualification and conversion of sales lead to revenue opportunities.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.
Sales Party Management	Manages creation and maintenance of the sales organizations and consumers for internal sales users. Additional duties include viewing of opportunities and opportunity revenue, reviewing sales leads as well as appointments, interactions, and customer contacts.
Sales Party Review	Allows resources read-only access to sales parties information such as manage customer work area and all sales party duties. Additional duties include view access to other customer and sales lead features.
Service Availability Management	Manage the service availability data including reading and writing the availability of a service.
Service Request Administrator	Administers all aspects of the Service application, including Setup.
Service Status Computation	Perform actions required to determine the availability of a service.
Setup Customer Center	Manages customer center set up, sales party creation and their related objects, such as appointments, assessments, interactions, notes and tasks.

Duty Role	Description
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.
Social Connection Partner	Performs all Oracle Fusion Social Connection partner duties.
Sourcing Administration	Set up negotiation templates, negotiation styles, attribute lists, cost factor lists, and other administrative operations.
Student Party Maintenance	Reviews and updates the party information of students.
Student Party View	Reviews the party information of students.
Subscription Amendment	Amends approved subscriptions. This includes initiating an amendment, reverting the subscription to the previous signed version, updating all allowable attributes, and submitting the amendment for approval.
Subscription Authoring	Authors subscriptions
Subscription Management Folder Reporting	Grants access to the Subscription Management web catalog folder.
Subscription Search and View Access	Searches and views subscriptions for the assigned business units.
Subscription Setup	Handles the setup required for subscriptions.
Supplier Profile Inquiry	View supplier profile information.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.
Supplier Qualification Administration	An enterprise user can set up supplier qualification questions, areas, and models.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Common Web Service	Provides web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
Supply Chain Management Transaction Approval Reviewing	Allows the status of supply chain management transactions going through the approval process to be viewed and take the appropriate action to expedite the approval process.

Duty Role	Description
Synchronize Product Lot for Pedigree and Serialization	Duty role to synchronize lot from the transactional system.
Synchronize Product for Pedigree and Serialization	Duty role to synchronize product from the transactional system.
Tax Administration	Sets up transaction tax content including regime to rate configuration, rules, tax determinants, configuration options and party tax profiles.
Territory Management	Manages sales territories, territory proposals, and quotas.
Territory Management Export Import	Manages sales territory export and import. Provides users with the ability to export territory data, modify it offline and import.
Territory Management Setup	Manages sales territory setup, including lookups, profile options, flexfields, and dimension data. Runs dimension synchronization, and visibility jobs. Additional duties include quota management setup.
Territory Management T2P Migration	Manages sales territory export and import. Provides users with the ability to export territory data from a test environment and import into production.
Trading Community Customer Account Administration	Grants privileges to setup customer account information.
Trading Community Data Quality Administration	Configures, reviews, and edits predefined data quality server configurations and the predefined matching, synchronization, and cleansing configurations.
Trading Community Import Batch Management	Manages trading community data import batches.
Trading Community Import Process Management	Manages trading community data import batch processes.
Trading Community Person Administration	Grants privileges to setup person information.
Trading Partner B2B Administrator	Allows trading partners (suppliers or customers) to access self-service messages.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Upload and Download data for Product Catalog images	Allows to upload and download Product Catalog images.
Upload content for images	Allows to upload content for images and access it via url.
Upload data for Agreement Import	Allows to upload data file to import Agreement related data.

Duty Role	Description
Upload data for Appointment Import	Allows to upload data file to import Appointment related data.
Upload data for Asset Import	Allows to upload data file to import Asset related data.
Upload data for Assignment Rule Import	Allows to upload data file to import Assignment Rule related data.
Upload data for B2B Account Numbers Import	Allows to upload data file to import B2B account numbers related data.
Upload data for B2B Configuration Import	Allows to upload data file to import B2B Configuration related data.
Upload data for Brazil SEFAZ Partner Messages Import	Allows to upload data file to import brazil SEFAZ partner messages related data.
Upload data for Brazil SEFAZ Supplier Messages Import	Allows to upload data file to import brazil SEFAZ supplier messages related data.
Upload data for CSS Roles Import	Allows to upload data file to import CSS Roles related data.
Upload data for Classification Code Import	Allows to upload data file to import classification code related data.
Upload data for Common Components Import	Allows to upload data file to import Common Components related data.
Upload data for Common Custom Object Import	Allows to upload data file to import Common Custom Object related data.
Upload data for Consumer Import	Allows to upload data file to import Consumer related data.
Upload data for Contact Import	Allows to upload data file to import Contact related data.
Upload data for Contract Import	Allows to upload data file to import Contract related data.
Upload data for Country Structure Import	Allows to upload data file to import Country Structure related data.
Upload data for Customer Hierarchy Import	Allows to upload data file to import Customer Hierarchy related data.
Upload data for Customer Hierarchy Member Import	Allows to upload data file to import Customer Hierarchy Member related data.
Upload data for Customer Import	Allows to upload data file to import Customer related data.
Upload data for Data Loader Import	Allows to upload data file to import Data Loader related data.

Duty Role	Description
Upload data for Data Visualization Configuration Import	Allows to upload data file to import Data Visualization Configuration related data.
Upload data for Deal Registration	Allows to upload data file to import deal registration related data.
Upload data for Employee Resource Import	Allows to upload data file to import Employee Resource related data.
Upload data for Functional Setup Export	Allows to upload data file to export functional setups.
Upload data for Functional Setup Import	Allows to upload data file to import functional setups.
Upload data for General Ledger Import	Allows to upload data file to import chart of account segment values and hierarchies.
Upload data for Geography Import	Allows to upload data file to import Geography related data.
Upload data for Grants Management Import	Allows to upload data file to import Grants Management related data.
Upload data for Group Customer Import	Allows to upload data file to import group customer related data.
Upload data for Higher Education Import	Allows to upload data file to import Higher Education related data.
Upload data for Human Capital Management file based Import	Allows to upload data file to import human capital management data.
Upload data for Incentive Compensation Import New Participant Import	Allows to upload data file to import incentive compensation import new participant related data.
Upload data for Incentive Compensation Rules Import	Allows to upload data file to import Incentive Compensation Rules related data.
Upload data for Incentive Compensation Transaction Import	Allows to upload data file to import incentive compensation transactions.
Upload data for Interaction Import	Allows to upload data file to import Interaction related data.
Upload data for IoT Asset Relation Import	Allows to upload data file to import IoT Asset Relation related data.
Upload data for IoT Registration Request Import	Allows to upload data file to import IoT Registration Request related data.
Upload data for Lead Import	Allows to upload data file to import Lead related data.

Duty Role	Description
Upload data for Legal Entity Import	Allows to upload data file to import Legal Entity related data.
Upload data for MCT Agent Connection Parameters Import	Allows to upload data file to import MCT Agent Connection Parameters related data.
Upload data for MCT CTD Agent Import	Allows to upload data file to import MCT CTD Agent related data.
Upload data for Maintenance Asset Import	Allows to upload data file to import maintenance asset related data.
Upload data for Marketing Activity Advertising Import	Allows to upload data file to import Marketing Activity Advertising related data.
Upload data for Marketing Activity Event Import	Allows to upload data file to import Marketing Activity Event related data.
Upload data for Marketing Activity Interaction Import	Allows to upload data file to import Marketing Activity Interaction related data.
Upload data for Marketing Budget Import	Allows to upload data file to import Marketing Budget related data.
Upload data for Marketing Campaign Import	Allows to upload data file to import Marketing Campaign related data.
Upload data for Marketing Campaign Members Import	Allows to upload data file to import Marketing Campaign Members related data.
Upload data for Marketing Custom Object Import	Allows to upload data file to import Marketing Custom Object related data.
Upload data for Marketing List Import	Allows to upload data file to import Marketing List related data.
Upload data for Message Import	Allows to upload data file to import message related data.
Upload data for Note Import	Allows to upload data file to import Note related data.
Upload data for OAGIS10 Partner Messages Import	Allows to upload data file to import OAGIS10 partner messages related data.
Upload data for OAGIS7 Partner Messages Import	Allows to upload data file to import OAGIS7 partner messages related data.
Upload data for Opportunity Custom Object Import	Allows to upload data file to import Opportunity Custom Object related data.

Duty Role	Description
Upload data for Opportunity Import	Allows to upload data file to import Opportunity related data.
Upload data for Order Orchestration and Planning Data Collection Import	Allows to upload data file to import collected data for order orchestration and planning.
Upload data for Partner Contact Import	Allows to upload data file to import Partner Contact related data.
Upload data for Partner Import	Allows to upload data file to import Partner related data.
Upload data for Product Catalog Import	Allows to upload data file to import Product Catalog related data.
Upload data for Product Group Import	Allows to upload data file to import Product Group related data.
Upload data for Program Enrollments Import	Allows to upload data file to import Program Enrollments related data.
Upload data for Project Billing Import	Allows to upload data file to import project billing related data.
Upload data for Project Control Import	Allows to upload data file to import Project Control related data.
Upload data for Project Costing Import	Allows to upload data file to import project costing data.
Upload data for Project Enterprise Resource Import	Allows to upload data file to import projects enterprise resources.
Upload data for Project Foundation Import	Allows to upload data file to import Project Foundation related data.
Upload data for Project Management Import	Allows to upload data file to import project management data.
Upload data for Project Resource Management Import	Allows to upload data file to import Project Resource Management related data.
Upload data for Project Setup Import	Allows to upload data file to import project setup related data.
Upload data for Promotion Import	Allows to upload data file to import Promotion related data.
Upload data for Quota Import	Allows to upload data file to import quota related data.
Upload data for Receivables Import	Allows to upload data file to import customers.
Upload data for Resource Team Import	Allows to upload data file to import Resource Team related data.

Duty Role	Description
Upload data for Response Import	Allows to upload data file to import Response related data.
Upload data for Sales Account Resource Team Import	Allows to upload data file to import Sales Account Resource Team related data.
Upload data for Sales Business Plan Import	Allows to upload data file to import sales business plan related data.
Upload data for Sales Objectives Import	Allows to upload data file to import sales objectives related data.
Upload data for Simplified Account	Allows to upload data file to import simplified account related data.
Upload data for Simplified Contact	Allows to upload data file to import simplified contact related data.
Upload data for Simplified Household	Allows to upload data file to import simplified household related data.
Upload data for Source System Reference Import	Allows to upload data file to import Source System Reference related data.
Upload data for Subscription Import	Allows to upload data file to import subscription related data.
Upload data for Supplier Import	Allows import of suppliers, supplier site, supplier site assignment and supplier contact
Upload data for Task Import	Allows to upload data file to import Task related data.
Upload data for Tax Import	Allows to upload data file to import tax related data.
Upload data for Territory Import	Allows to upload data file to import territory related data.
Upload data for Vendor-Managed Inventory Relationships Import	Allows to upload data file to import Vendor-Managed Inventory Relationships.
Upload security credential files for Payments Import	Allows upload of wallet and key file to Payments credential store.
Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service. Use this duty role when granting manage access to person documentation data.
Withholding Tax Administration	Sets up withholding tax content including regime to rate configuration, rules, tax determinants, configuration options and party tax profiles.
Workforce Profile Administration	Performs administrative duties for workforce talent profiles.

Duty Role	Description
Workforce Structures Management	Manages positions, locations, jobs, grades, and HR organizations. This role does not have any privileges associated directly but inherits privileges from other duty roles. This role is associated with the HR specialist or manager typically.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Application Implementation Consultant job role.

Aggregate Privilege	Description
Access HCM Spreadsheet Data Loader Templates	Allows access to active HCM Spreadsheet Data Loader templates, allowing the user to generate spreadsheets for bulk data loading.
Compare HCM Information	Compares workers, jobs, positions, and any combinations of these objects.
Compliance Checklist Management Using REST Service	Allows users to call all methods except administrative methods with the Compliance Checklist REST service for all rows.
Compliance Checklist Response Management Using REST Service	Allows users to call all methods except administrative methods with the Questionnaire Responses REST service for all rows.
Compliance Checklist Response Viewing Using REST Service	Allows users to call the get method with the Questionnaire Responses REST service for all rows.
Compliance Checklist Viewing Using REST Service	Allows users to call the get method with the Compliance Checklist REST service for all rows.
Edit User Name	Updates the user name associated with a person.
Load Data using HCM Spreadsheet Data Loader	Allows access to generate spreadsheets for bulk data loading using HCM Spreadsheet Data Loader.
Maintain Positions	Updates and deletes positions in the user's position security profile. This role cannot create new positions.
Manage Costing of Location	Allows user to manage location costing.
Manage Departments	Manages departments in the user's organization security profile.
Manage Divisions	Manages divisions in the user's organization security profile.
Manage Fast Formula	Manages formula definitions used for validation and calculations.

Aggregate Privilege	Description
Manage General Ledger Accounting Period Status	Manages Oracle Fusion General Ledger period status.
Manage HCM Rates	Manages derived rates and values defined by criteria.
Manage HR Document Type	Allows management of document types for documents of record.
Manage Journey	Allows the user to manage the journeys to which they have been granted access.
Manage Payment Method Preferences	Allows management of payment method preferences.
Manage Payroll Element	Allows users to manage payroll elements.
Manage Payroll Element Entry	Manages the allocation and data entry of earnings and deduction elements to a person.
Manage Person Document Delivery Preferences	Allows management of document delivery preferences for person records.
Manage Person Documentation	Manages documents.
Manage Projects Accounting Period Status	Manages Oracle Fusion Projects period status.
Manage Questionnaire Subscriber Access	Allows access to questionnaire subscribers to be controlled.
Manage Schedules and Exceptions Assignment	Manages the association of schedules to an assignment. This role is associated with the line manager or HR specialist.
Manage User Roles	Allows management of user roles assignments.
Manage Value Defined by Criteria	Manages values defined by criteria.
Manage Worker Checklist	Manages checklist definitions.
Manage Worker Time Entry Setup Profile	Creates and updates an association of a layout set and time entry actions to control access to any time entries.
Manage Worker Time Processing Profile	Creates and updates an association of rule sets, a time consumer set, and time card periods to report, validate, approve, and transfer time.
Manage Worker Unions	Manages worker unions in the user's organization security profile.
PSC Access Confidential Business Licenses Data	Allows users to access confidential information in business licenses data.

Aggregate Privilege	Description
PSC Access Filter of Case Citation Notices	Access Filter of Case Citation Notices
PSC Access Filter of Case Violation Notices	Access Filter of Case Violation Notices
PSC Access Filter of Incidents	Access Filter of Incidents
PSC Access Planner Calendar	Allows agency user to access Planner Calendar.
PSC Access Redacted Information	Allows users to access redacted information.
PSC Add Case Attachments	Add Case Attachments
PSC Add Case Comments	Add Case Comments
PSC Add Code Enforcement Inspection Attachments	Add Code Enforcement Inspection Attachments
PSC Add Code Enforcement Inspection Comments	Add Code Enforcement Inspection Comments
PSC Add Comments to Inspections	Add Comments to Inspections
PSC Add Comments to Permit Workflow Task assigned to anyone	Add Comments to Permit Workflow Task assigned to anyone
PSC Add Comments to Permit Workflow Task assigned to self	Add Comments to Permit Workflow Task assigned to self
PSC Add Comments to Permit intake form	Allows users to add comments to permit intake form.
PSC Add Comments to Permits	Add Comments to Permits
PSC Add Comments to Plan Reviews by others and self	Add Comments to Plan Reviews by others and self
PSC Add Comments to Planning and Zoning	Allows user to add comments to Planning and Zoning.
PSC Add Comments to Planning and Zoning Workflow Task assigned to anyone	Allows user to add comments to Planning and Zoning workflow tasks assigned to anyone.
PSC Add Comments to Planning and Zoning Workflow Task assigned to self	Allows user to add comments to Planning and Zoning workflow tasks assigned to themselves.

Aggregate Privilege	Description
PSC Add Cycle to Permit Plan Review	Allows user to Add Cycle to Permit Plan Review
PSC Add Documents to Plan Review Cycles	Allows users to add Documents to plan review cycles for review by plan reviewers.
PSC Add Incident Attachments	Add Incident Attachments
PSC Add Incident Comments	Add Incident Comments
PSC Add Inspection Attachments	Add Inspection Attachments
PSC Add Inspection Checklist	Allows user to Add Inspection Checklist
PSC Add Inspection Checklist Items	Allows user to Add Inspection Checklist Items
PSC Add New Property Information in Permit Intake form	Allows user to add new property information to permit intake.
PSC Add New Property Information in Planning Intake form	Allows user to add new planning intake form property information
PSC Add Permit Attachments	Add Permit Attachments
PSC Add Permit Workflow Attachments	Add Permit Workflow Attachments
PSC Add Planning and Zoning Attachments	Allows user to add Planning and Zoning attachments.
PSC Add Planning and Zoning Workflow Attachments	Add Planning and Zoning Workflow Attachments
PSC Add Property Attachments	Add Property Attachments
PSC Add Property Setup Attachments	Allows users to add property setup attachments.
PSC Add Public Sector Project Attachments	Add Public Sector Project Attachments
PSC Add Reviewer to Permit Plan Review	Allows user to Add Reviewer to Permit Plan Review
PSC Add Reviewers to Documents in Plan Review Cycles	Allows users to add reviewers to Documents in a plan review cycles so they can be reviewed and given a decision status.

Aggregate Privilege	Description
PSC Add Session Cycle for Plan Review Cycles	Allows users to add a session cycle for a plan review cycle so documents can be reviewed.
PSC Administer Planning Expiration Date	Allows users to administer the Expiration Date on the Planning Overview page.
PSC Appeal Code Enforcement Case	Appeal Code Enforcement Case
PSC Appeal Hearings of Applications Assigned to Others and Self	Allows users to appeal hearings of applications assigned to others and themselves.
PSC Appeal Hearings of Applications Assigned to Self	Allows users to appeal hearings of applications assigned to themselves.
PSC Assign Business License Specialist	Allows users to assign a specialist to a business license.
PSC Assign Code Enforcement Inspector	Assign Code Enforcement Inspector
PSC Assign Code Officer	Assign Code Officer
PSC Assign Code Technician	Assign Code Technician
PSC Assign Planner	Allows users to assign a planner to planning application and pre-application.
PSC Cancel Cycle of Permit Plan Review	Allows user to Cancel Cycle of Permit Plan Review
PSC Cancel Hearings of Applications Assigned to Others and Self	Allows users to cancel hearings of applications assigned to others and themselves.
PSC Cancel Hearings of Applications Assigned to Self	Allows users to cancel hearings of applications assigned to themselves.
PSC Cancel Inspection Request	Allows user to Cancel Inspection Request
PSC Cancel Permit Application	Allows agency user to cancel a pending permit application data.
PSC Cancel Planning Application	Allows agency user to cancel a pending planning application data.
PSC Create Code Enforcement Case Duty	Create Code Enforcement Case Duty

PSC Update Public Sector Project Attachments added by Self	Update Public Sector Project Attachments added by Self
PSC Update Session to Finalized for Plan Review Cycles	Allows users to update a session to finalized for a plan review cycle to close the cycle for document review.
PSC View Business License Specialist Assignment	Allows users to view assignments of specialists to business licenses.
PSC View Hidden from Public sections in Incident Applications	Allows user to View Hidden from Public sections in the Incident detail form.
PSC View Hidden from Public sections in the Business License Applications	Allows user to View Hidden from Public sections in the Business License detail form.
PSC View Hidden from Public sections in the Permit Applications	Allows user to View Hidden from Public sections in the Permit and Planning detail form.
PSC View Hidden from Public sections in the Planning Applications	Allows user to View Hidden from Public sections in the Planning detail form.
PSC View Inspection Attachments	View Inspection Attachments
PSC View Permit Attachments	View Permit Attachments

Aggregate Privilege	Description
PSC View Permit Project Attachments OBSOLETE	View Project Attachments
PSC View Permit Workflow Attachments	View Permit Workflow Attachments
PSC View Planner Assignment	Allows users to view a planner assigned to planning application and pre-application.
PSC View Planning and Zoning Attachments	Allows users to view Planning and Zoning attachments.
PSC View Planning and Zoning Workflow Attachments	Allows users to view Planning and Zoning workflow attachments.
PSC View Property Attachments	View Property Attachments
PSC View Property Attachments Detail	View Property Attachments Detail
PSC View Property Detail Attachments	View Property Detail Attachments
PSC View Property Information in Permit Intake form	Allows user to view property information
PSC View Property Information in Planning Intake form	Allows user to view planning intake form property information
PSC View Property Setup Attachments	Allows users to view property setup attachments.
PSC View Public Sector Project Attachments	View Public Sector Project Attachments
PSC Withdraw Permit Application	Allows agency user to withdraw a permit application after submission.
PSC Withdraw Planning Application	Allows agency user to withdraw a planning application after submission.
Processing Requisitions Using REST Service	Allows users to call all methods to process requisitions into purchase orders.
Procurement Catalog Content Management Using REST Service	Allows management of public shopping list using REST service.
Purchase Agreement Management Using REST Service	Do not use: Allows users to call all methods except administrative methods with the Purchase Agreement REST service for all rows.
Purchase Agreement Viewing Using REST Service	Do not use: Allows users to call the GET method with the Purchase Agreement REST service for all rows.

Aggregate Privilege	Description
Purchase Order Administration Using REST Service	Allows users to call the administrative methods with the Purchase Order REST service for all rows.
Purchase Order Management Using REST Service	Allows users to call all methods except administrative methods with the Purchase Order REST service for all rows.
Purchase Order Viewing Using REST Service	Allows users to call the get method with the Purchase Order REST service for all rows.
Request a Position Change	Allows requesting a position change.
Requisition Management Using REST Service	Allows users to call all methods except administrative methods with the Purchase Requisition REST service for all rows.
Requisition Viewing Using REST Service	Allows users to call the get method with the Purchase Requisition REST service for all rows.
Submit a Payroll Flow	Allows users to run scheduled processes that are included in payroll flows. When granting this aggregate privilege to a custom role you should also grant the Submit a Payroll Process or Report aggregate privilege. ORA_PAY_PROCESS_AND_REPORT_SUBMISSION_DUTY.
Submit a Payroll Process or Report	Allows users to access the Submit a Flow action. When granting this aggregate privilege to a custom role you should also grant the Submit a Payroll Flow aggregate privilege, ORA_PAY_PAYROLL_FLOW_SUBMISSION_DUTY.
Supplier Negotiation Management Using REST Service	Allows users to call all methods with the Supplier Negotiation REST service for all rows.
Supplier Negotiation Response Management Using REST Service	Allows users to call all methods with the Supplier Negotiation Response REST service for all rows.
Supplier Negotiation Response Viewing Using REST Service	Allows users to call the get method with the Supplier Negotiation Response REST service for all rows.
Supplier Negotiation Viewing Using REST Service	Allows users to call the get method with the Supplier Negotiation REST service for all rows.
Supplier Profile Management Using REST Service	Allows users to call all methods with the Supplier REST service for all rows.
Supplier Profile Viewing Using REST Service	Allows users to call the get method with the Supplier REST service for all rows.
Supplier Qualification Area Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Area REST service for all rows.

Aggregate Privilege	Description
Supplier Qualification Initiative Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Initiative REST service for all rows.
Supplier Qualification Initiative Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Initiative REST service for all rows.
Supplier Qualification Question Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Question REST service for all rows.
Supplier Qualification Question Response Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Question Response REST service for all rows.
Supplier Qualification Question Response Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Question Response REST service for all rows.
Supplier Qualification Question Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Question REST service for all rows.
Supplier Qualification Supplier Eligibility Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Supplier Eligibility REST service for all rows.
Supplier Qualification Supplier Eligibility Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Supplier Eligibility REST service for all rows.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - Journey Categories List of Values	Allows the user to call the GET method associated with the Journey Categories List of Values REST Service.
Use REST Service - Journey Scheduled Allocations	Allows the user to call all methods associated with the Journey Scheduled Allocations REST Service.
Use REST Service - Locations List of Values	Allows the user to call the GET method associated with the Locations LOV REST Service.
Use REST Service - Locations Read Only	Allows the user to call the GET method associated with the Locations REST Service.
Use REST Service - Person Benefit Balances	Allows users to call all methods associated with the person benefit balances REST service.
Use REST Service - Person Benefit Groups	Allows users to call all methods associated with the person benefit groups REST service.

Aggregate Privilege	Description
Use REST Service - Worker Assignments List of Values	Allows the user to call the GET method associated with the Assignments list of values REST Service.
Use REST Service - Workforce Structure List of Values	Allows the user to call the GET method associated with the Workforce Structure list of values REST Services.
Use User Details Service	Creates or updates users during person synchronizations.
View Costing of Location	Allows user to view location costing.
View Payroll Element	Allows users to view payroll elements.
View Portrait User Account Details Card	Views the User Account Details card in the Person Gallery.
View Positions	Views positions in the user's position security profile.

Privileges

This table lists privileges granted to duties of the Application Implementation Consultant job role.

Granted Role	Granted Role Description	Privilege
Absence Implementation	Manages absence implementation setup using the Oracle Fusion Functional Setup Manager.	Define Absence Plans
Absence Implementation	Manages absence implementation setup using the Oracle Fusion Functional Setup Manager.	Manage Absence Entitlement Band
Absence Implementation	Manages absence implementation setup using the Oracle Fusion Functional Setup Manager.	Manage Benefit Eligibility Profile
Absence Implementation	Manages absence implementation setup using the Oracle Fusion Functional Setup Manager.	Manage Benefit Participant Enrollment Certification
Absence Implementation	Manages absence implementation setup using the Oracle Fusion Functional Setup Manager.	Manage Life Event Reason
Absence Implementation	Manages absence implementation setup using the Oracle Fusion Functional Setup Manager.	Manage Person Eligibility Derived Factor
Absence Implementation	Manages absence implementation setup using the Oracle Fusion Functional Setup Manager.	Run Participation Process Absence

Granted Role	Granted Role Description	Privilege
Academic Period Fee Maintenance	Maintains academic period fees and setup data.	Maintain Academic Period Fee Groups
Academic Period Fee Maintenance	Maintains academic period fees and setup data.	Maintain Academic Period Fees
Academic Period Fee Maintenance	Maintains academic period fees and setup data.	Maintain Tuition Adjustment Calendars
Academic Period Fee Maintenance	Maintains academic period fees and setup data.	Maintain Tuition Adjustment Schedules
Accounting Hub Administration	Configures the accounting hub for a source system.	Activate Subledger Journal Entry Rule Set Assignments
Accounting Hub Administration	Configures the accounting hub for a source system.	Create Journal Entries for New Reporting Currency or Secondary Ledger
Accounting Hub Administration	Configures the accounting hub for a source system.	Create and Assign Subledger Standard Source
Accounting Hub Administration	Configures the accounting hub for a source system.	Define Subledger Application
Accounting Hub Administration	Configures the accounting hub for a source system.	Define Subledger Transaction Account Type
Accounting Hub Administration	Configures the accounting hub for a source system.	Generate Objects for Subledger Transaction Account Type
Accounting Hub Administration	Configures the accounting hub for a source system.	Import Subledger Balance for Supporting Reference
Accounting Hub Administration	Configures the accounting hub for a source system.	Import Subledger Control Balance
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage All Application Profile Values
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Application Common Lookup
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Application Set-Enabled Lookup
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Application Standard Lookup

Granted Role	Granted Role Description	Privilege
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Account Rule
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Attribute
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Class Usage
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Existing Scope
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Method
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Option
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Application Transaction Object
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Custom Source
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Description Rule
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Formula
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Journal Entry Rule Set
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Journal Line Rule
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Mapping Set
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Mapping Set Value
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Standard Source
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Supporting Reference

Granted Role	Granted Role Description	Privilege
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Transaction Account Definition
Accounting Hub Administration	Configures the accounting hub for a source system.	Purge Accounting Event Diagnostic Data
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Account Rule
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Accounting Attribute
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Accounting Method
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Accounting Option
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Application
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Custom Source
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Description Rule
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Formula
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Journal Entry Rule Set
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Journal Line Rule
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Mapping Set
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Standard Source
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Supporting Reference

Granted Role	Granted Role Description	Privilege
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Transaction Account Definition
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Transaction Account Type
Accounting Hub Administration	Configures the accounting hub for a source system.	Submit Accounting Event Diagnostic Report
Accounting Hub Administration	Configures the accounting hub for a source system.	Update Subledger Accounting Balance
Accounting Hub Administration	Configures the accounting hub for a source system.	Update Subledger Application
Adaptive Intelligence Applications Administrator	Individual responsible for configuring adaptive intelligence applications.	Administer Adaptive Intelligence Applications
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Administer Sandbox
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Configure Help System Settings
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Create About Page Report
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Create and Edit Backends for Visual Builder Studio
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Define Endpoint and Security Policy Information
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain	Grant Search Framework Manager Permissions

Granted Role	Granted Role Description	Privilege
	consistent enterprise application setup, architecture, information, rules, and access.	
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Import Applications Common Sandbox
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Launch Oracle Social Network
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage All Application Profile Values
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Alternate Words
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Activity Stream Configuration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Attachment
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Attachment Category
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Attachment Entity
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain	Manage Application Attachment Trusted Status

Granted Role	Granted Role Description	Privilege
	consistent enterprise application setup, architecture, information, rules, and access.	
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Common Lookup
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Data Security Policy
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Database Resource
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Descriptive Flexfield
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Descriptive Flexfield Registration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Document Sequence
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Document Sequence Category
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Extensible Flexfield
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain	Manage Application Extensible Flexfield Registration

Granted Role	Granted Role Description	Privilege
	consistent enterprise application setup, architecture, information, rules, and access.	
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Flexfield Value Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Key Flexfield
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Key Flexfield Registration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Menu Customization
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Message
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Profile Category
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Profile Option
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Reference Data Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain	Manage Application Reference Data Set Assignment

Granted Role	Granted Role Description	Privilege
	consistent enterprise application setup, architecture, information, rules, and access.	
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Set-Enabled Lookup
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Standard Lookup
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Taxonomy
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Tree
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Tree Label
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Application Tree Structure
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Applications Core Attachment Undo Checkout
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Audit Policies
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain	Manage File Import and Export

Granted Role	Granted Role Description	Privilege
	consistent enterprise application setup, architecture, information, rules, and access.	
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Global Menus
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Global Template Customization
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Horizontal Extensions
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Incoming Configuration Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage My Application Profile Values
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Navigator Menu Structure
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Oracle Social Network Tracking
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Outgoing Configuration Set
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain	Manage Read-Only Schema Column Masking

Granted Role	Granted Role Description	Privilege
	consistent enterprise application setup, architecture, information, rules, and access.	
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Scheduled Job Definition
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Scheduled Processes Work Area
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Suggestion Groups
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage Themes
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Manage User Interface Text
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Perform Data Migration
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Privilege to control setup of global search
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Publish Applications Common Sandbox
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain	Record and View Issue

Granted Role	Granted Role Description	Privilege
	consistent enterprise application setup, architecture, information, rules, and access.	
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Set Issue Recording Advanced Options
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Set Supportability Level
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	Set Watchlist Options
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	View About Page Report
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	View Batch Jobs
Application Administrator	Provides enterprise-wide application administration. Collaborates with specific application administrators to maintain consistent enterprise application setup, architecture, information, rules, and access.	View Version Information
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Activate Optional Enterprise Application
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Instance
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Portlet Registration
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Database

Granted Role	Granted Role Description	Privilege
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Deployed Domain
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Enterprise Environment
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Review Topology Hierarchy
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Setup and Maintain Applications
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Administer Sandbox
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Configure Help System Settings
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Define Endpoint and Security Policy Information
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Grant Search Framework Manager Permissions
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Import Applications Common Sandbox
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Launch Oracle Social Network
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage All Application Profile Values
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Alternate Words
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Activity Stream Configuration

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Attachment Category
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Attachment Entity
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Common Lookup
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Data Security Policy
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Database Resource
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Descriptive Flexfield
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Descriptive Flexfield Registration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Document Sequence
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Document Sequence Category
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Extensible Flexfield
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Extensible Flexfield Registration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Flexfield Value Set

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Key Flexfield
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Key Flexfield Registration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Menu Customization
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Message
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Profile Category
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Profile Option
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Reference Data Set
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Reference Data Set Assignment
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Set-Enabled Lookup
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Standard Lookup
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Taxonomy
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Tree

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Tree Label
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Application Tree Structure
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Audit Policies
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage File Import and Export
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Incoming Configuration Set
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage My Application Profile Values
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Oracle Social Network Tracking
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Outgoing Configuration Set
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Scheduled Job Definition
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Scheduled Processes Work Area
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Suggestion Groups
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Web Service Information

Granted Role	Granted Role Description	Privilege
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Manage Webservices catalog
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Perform Data Migration
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Privilege to control setup of global search
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Publish Applications Common Sandbox
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	Set Supportability Level
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	View Administration Link
Application Developer	Provides enterprise-wide application administration needed for configuring and extending applications.	View Batch Jobs
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Administer Sandbox
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Configure Setup UI
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Comparison Processes
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Configuration Packages
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Setup Data Export and Import Processes
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Perform Quick Setup
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Setup and Maintain Applications

Granted Role	Granted Role Description	Privilege
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Submit Export Setup Data Process
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Submit Import Setup Data Process
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	View Administration Link
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Access Feed View
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Access View Feed Configurations
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Administer Sandbox
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Configure Setup UI
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Copy Configurations
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Export Workspace Data
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application	Export and Import Sales Orchestration

Granted Role	Granted Role Description	Privilege
	administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Application Metrics
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Comparison Processes
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Configuration Packages
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Dispatcher Rules
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Feed Element Generations
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Routines
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Sales Notifications

Granted Role	Granted Role Description	Privilege
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Setup Data Export and Import Processes
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Signal Definitions
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Signal Subscriptions
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Smart Actions
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Manage Text Analysis Intelligence
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Perform Quick Setup
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Publish Adaptive Search and Workspace Configuration
Application Implementation Consultant	Manages enterprise-wide implementations. Collaborates with specific application administrators to implement consistent enterprise application setup, architecture, information, rules, and access. Has access to all setup tasks across all products.	Set up Workday Schedules

Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Define Endpoint and Security Policy Information
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Determine Transactions Requiring Electronic Signature
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Edit Supply Execution Document Creation Rules
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Extract Ledger Setup Definitions
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Get Enterprise Structures Using REST Service

Granted Role	Granted Role Description	Privilege
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Blanket Purchase Agreement
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Purchasing Document Bypassing Approval
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Trading Community Person
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Vendor-Managed Inventory Relationships
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Documentation and Accounting Rules
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Drop Ship Financial Flow
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Reports and Analytics Region
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Supply Chain Financial Orchestration Flow
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Transfer Pricing Rules
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Aggregation Schedules
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with	Manage All Application Profile Values

Granted Role	Granted Role Description	Privilege
	supply chain application users to maintain consistent application setup, rules, and access.	
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Attachment Category
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Attachment Entity
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Common Lookup
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Data Security Policy
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Database Resource
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Document Sequence
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Document Sequence Category
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Extensible Flexfield
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Flexfield Value Set
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Key Flexfield

Granted Role	Granted Role Description	Privilege
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Menu Customization
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Message
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Profile Category
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Profile Option
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Reference Data Set
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Reference Data Set Assignment
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Set-Enabled Lookup
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Taxonomy
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Tree
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Tree Label
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with	Manage Application Tree Structure

Granted Role	Granted Role Description	Privilege
	supply chain application users to maintain consistent application setup, rules, and access.	
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Audit Policies
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Collaboration Planners
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Collaboration Plans
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Collaboration Settings
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Condition Event Codes
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Configured Item Exceptions
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Demand Collaboration
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Demand Planners
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Documentation and Accounting Rules
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Drop Ship Financial Flow

Granted Role	Granted Role Description	Privilege
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage External Purchase Prices Mappings
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage External Purchase Prices Selection Criteria
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Failure Sets Using User Interface
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Help Content
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Maintenance Resources
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Maintenance Work Areas
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Maintenance Work Centers
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage My Application Profile Values
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Orchestration Generic Web Service
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Product Recall Parameters
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with	Manage Production Resources

Granted Role	Granted Role Description	Privilege
	supply chain application users to maintain consistent application setup, rules, and access.	
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Profit Center Business Unit to Party Relationship
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Regulatory Authority for Product Recall
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Scheduled Job Definition
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Signal Definitions
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Source System Descriptive Flexfields
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Chain Financial Orchestration Flow
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Chain Financial Orchestration Qualifiers
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Chain Financial Orchestration System Options
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Data for Externally Managed Organizations as Enterprise User
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Planning Network Relationships

Granted Role	Granted Role Description	Privilege
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Import Lookups
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Original System
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Original System Mapping
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Source System Lookups
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Transfer Pricing Rules
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage VMI Analysts
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage VMI Network Relationships
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Work Areas
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Work Centers
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Work Order Statuses
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with	Mass Association of Meter Templates

Granted Role	Granted Role Description	Privilege
	supply chain application users to maintain consistent application setup, rules, and access.	
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Obsolete: Maintain Buy and Sell Terms
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Obsolete: Manage Buy and Sell Terms
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Obsolete: View Buy and Sell Terms
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Perform Collaboration Data Operations
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Process Supply Order Interface
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge Historical Collaboration Records
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge Records from Interface
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge Supplier On-Hand Quantities
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge VMI Replenishment Request Records
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge Work Definition Interface Records

Granted Role	Granted Role Description	Privilege
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Run Calendar Validation Report
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Schedule Order Forecast Decomposition
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Search Customer Account Site
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Up Charge Names
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Up Reference Types
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Up Routes
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Watchlist Options
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Setup Product Innovation
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Setup Product Quality
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Transfer Receipts to Mass Additions

Business Unit	An Application Implementation Consultant can choose business unit organization for business units in their organization security profile	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose Business Unit Organization (Data) Resource: Business Unit
CRM Asset	An Application Implementation Consultant can delete asset a member of an access group associated to the asset with delete access	Role: Access Groups Enablement Privilege: Delete Asset (Data) Resource: CRM Asset
CRM Asset	An Application Implementation Consultant can update asset a member of an access group associated to the asset with update access	Role: Access Groups Enablement Privilege: Update Asset (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: CRM Asset
CRM Asset	An Application Implementation Consultant can view asset a member of an access group associated to the asset	Role: Access Groups Enablement Privilege: View Asset (Data) Resource: CRM Asset
Case Messages	An Application Implementation Consultant can manage case message for all case messages.	Role: Service Request Administrator Privilege: Manage Case Message (Data) Resource: Case Messages
Case Resources	An Application Implementation Consultant can manage case resource for all case resources.	Role: Service Request Administrator Privilege: Manage Case Resource (Data) Resource: Case Resources
Cases	An Application Implementation Consultant can delete case header a member of an access group associated to the case with delete access	Role: Access Groups Enablement Privilege: Delete Case Header (Data) Resource: Cases
Cases	An Application Implementation Consultant can manage case header for all cases	Role: Service Request Administrator Privilege: Manage Case Header (Data) Resource: Cases
Cases	An Application Implementation Consultant can update case header a member of an access group associated to the case with update access	Role: Access Groups Enablement Privilege: Update Case Header (Data) Resource: Cases
Cases	An Application Implementation Consultant can view case header a member of an access group associated to the case	Role: Access Groups Enablement Privilege: View Case Header (Data) Resource: Cases
Cash Advance Setup and Policy	An Application Implementation Consultant can manage cash advance policy for the business units for which they are authorized	Role: Expenses Administration Privilege: Manage Cash Advance Policy (Data) Resource: Business Unit
Channel Adjustment Type	An Application Implementation Consultant can manage channel adjustment type for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Adjustment Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Reference Data Set
Channel Claim	An Application Implementation Consultant can manage channel claims for the business units for which they are authorized	Role: Channel Operations Privilege: Manage Channel Claims (Data) Resource: Business Unit
Channel Claim	An Application Implementation Consultant can manage channel claims for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Claims (Data) Resource: Business Unit
Channel Claim Reason Code	An Application Implementation Consultant can manage channel claim reason for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Claim Reason (Data) Resource: Reference Data Set
Channel Claim Source Mapping	An Application Implementation Consultant can manage channel claim source mapping for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Claim Source Mapping (Data) Resource: Reference Data Set
Channel Claim Type	An Application Implementation Consultant can manage channel claim type for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Claim Type (Data) Resource: Reference Data Set
Channel Claim Type Business Unit Mapping	An Application Implementation Consultant can manage channel claim type business unit mapping for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Claim Type Business Unit Mapping (Data) Resource: Business Unit
Channel Program	An Application Implementation Consultant can manage channel programs for the business units for which they are authorized	Role: Channel Operations Privilege: Manage Channel Programs (Data) Resource: Business Unit
Channel Program	An Application Implementation Consultant can manage channel programs for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Programs (Data) Resource: Business Unit

Business Object	Policy Description	Policy Store Implementation
Channel Setting	An Application Implementation Consultant can manage channel setting for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Setting (Data) Resource: Business Unit
Charge Reference Type	An Application Implementation Consultant can manage charge reference type for the reference data sets they administer	Role: Supply Chain Application Administrator Privilege: Manage Charge Reference Type (Data) Resource: Reference Data Set
Charge Reference Type	An Application Implementation Consultant can view charge reference type for the reference data sets they administer	Role: Web Services Application Identity for SCM Privilege: View Charge Reference Type (Data) Resource: Reference Data Set
Checklist Role Maps	An Application Implementation Consultant can view journey template for others for journey templates which allow them to view assigned journeys for persons and assignments in their person and assignment security profile	Role: Manage Worker Checklist Privilege: View Journey Template for Others (Data) Resource: Checklist Role Maps
Checklist Role Maps	An Application Implementation Consultant can view journey template for self for journey templates which allow them to view their own assigned journeys	Role: Manage Worker Checklist Privilege: View Journey Template for Self (Data) Resource: Checklist Role Maps
Classification Code File Import Activity	An Application Implementation Consultant can view classification code file import activity object type for all classification code file import activities of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Activity Object Type (Data) Resource: Classification Code File Import Activity
Classification Code File Import Mapping	An Application Implementation Consultant can view classification code file import mapping object type for all classification code file import mappings of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Mapping Object Type (Data) Resource: Classification Code File Import Mapping
Classification Code File Import Object	An Application Implementation Consultant can view classification code file import object type for all classification code file import objects of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Object Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Classification Code File Import Object
Code Enforcement Appeal	An Application Implementation Consultant can add code enforcement hearing attachment for hearings on which attachments can be added by administrators	Role: PSC Code Enforcement Application Administrator Privilege: Add Code Enforcement Hearing Attachment (Data) Resource: Code Enforcement Appeal
Code Enforcement Appeal	An Application Implementation Consultant can add code enforcement hearing attachment for hearings on which attachments can be added by agency users	Role: PSC Case Appeals Management Privilege: Add Code Enforcement Hearing Attachment (Data) Resource: Code Enforcement Appeal
Code Enforcement Appeal	An Application Implementation Consultant can manage code enforcement appeals for appeals on all cases	Role: PSC Code Enforcement Application Administrator Privilege: Manage Code Enforcement Appeals (Data) Resource: Code Enforcement Appeal
Code Enforcement Appeal	An Application Implementation Consultant can manage code enforcement appeals for appeals on cases that are not closed	Role: PSC Case Appeals Management Privilege: Manage Code Enforcement Appeals (Data) Resource: Code Enforcement Appeal
Code Enforcement Appeal	An Application Implementation Consultant can view code enforcement appeals for appeals on all cases	Role: PSC Agency Code Enforcement Case Inquiry Privilege: View Code Enforcement Appeals (Data) Resource: Code Enforcement Appeal
Code Enforcement Case	An Application Implementation Consultant can add code enforcement case contacts for public sector cases where adding contacts is allowed	Role: PSC Case Responsible Parties Management Privilege: Add Code Enforcement Case Contacts (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement case contacts for public sector cases where adding contacts is allowed	Role: PSC Code Enforcement Application Administrator Privilege: Add Code Enforcement Case Contacts (Data) Resource: Code Enforcement Case

Business Object	Policy Description	Policy Store Implementation
Code Enforcement Case	An Application Implementation Consultant can add code enforcement case fees for all public sector cases	Role: PSC Case Code References Management Privilege: Add Code Enforcement Case Fees (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement case fees for public sector cases where adding citation is allowed	Role: PSC Code Enforcement Case Administration Privilege: Add Code Enforcement Case Fees (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement case fees for public sector cases where adding fees is allowed by agency users	Role: PSC Case Fees and Payments Management Privilege: Add Code Enforcement Case Fees (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement case notice for public sector cases where adding notices is allowed	Role: PSC Case Notices Management Privilege: Add Code Enforcement Case Notice (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement case notice for public sector cases where adding notices is allowed	Role: PSC Code Enforcement Case Administration Privilege: Add Code Enforcement Case Notice (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement citation for public sector cases where adding citation is allowed	Role: PSC Case Citations Management Privilege: Add Code Enforcement Citation (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement code reference for public sector cases where adding code references is allowed by administrators	Role: PSC Code Enforcement Case Administration Privilege: Add Code Enforcement Code Reference (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement code reference for public	Role: PSC Case Code References Management

Business Object	Policy Description	Policy Store Implementation
	sector cases where adding code references is allowed by agency users	Privilege: Add Code Enforcement Code Reference (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement related transactions for all code enforcement related transactions	Role: PSC Manage Related Transactions Privilege: Add Code Enforcement Related Transactions (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement workflow attachments and comments for public sector cases to which workflow attachments and comments can be added by administrators	Role: PSC Code Enforcement Case Administration Privilege: Add Code Enforcement Workflow Attachments and Comments (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add code enforcement workflow attachments and comments for public sector cases to which workflow attachments and comments can be added by agency users	Role: PSC Code Enforcement Workflow User Privilege: Add Code Enforcement Workflow Attachments and Comments (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add public sector case attachments for public sector cases not in closed statuses	Role: PSC Add Case Attachments Privilege: Add Public Sector Case Attachments (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add public sector case comments for public sector cases not in closed statuses	Role: PSC Add Case Comments Privilege: Add Public Sector Case Comments (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add time recording on permits all for all public sector cases	Role: PSC Case Time Recording Management for All Privilege: Add Time Recording on Permits All (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can add time recording on permits self for all public sector cases	Role: PSC Case Time Recording Management assigned to self Privilege: Add Time Recording on Permits Self (Data) Resource: Code Enforcement Case

Business Object	Policy Description	Policy Store Implementation
Code Enforcement Case	An Application Implementation Consultant can administer code enforcement case status for public sector administrators to update the status	Role: PSC Code Enforcement Case Administration Privilege: Administer Code Enforcement Case Status (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can appeal code enforcement case for public sector cases not in closed statuses	Role: PSC Appeal Code Enforcement Case Privilege: Appeal Code Enforcement Case (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can assess time recording on permits for all public sector cases	Role: PSC Case Time Recording Management for All Privilege: Assess Time Recording on Permits (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can assess time recording on permits self for all public sector cases	Role: PSC Case Time Recording Management assigned to self Privilege: Assess Time Recording on Permits Self (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can assign code enforcement inspector for code enforcement inspections that are not closed or canceled	Role: PSC Assign Code Enforcement Inspector Privilege: Assign Code Enforcement Inspector (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can edit code enforcement appeal by date for public sector cases in statuses where administrator is allowed to update appeal by date.	Role: PSC Code Enforcement Application Administrator Privilege: Edit Code Enforcement Appeal By Date (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can schedule code enforcement inspection for public sector cases in statuses where scheduling code enforcement inspection is allowed	Role: PSC Schedule Code Enforcement Inspection Privilege: Schedule Code Enforcement Inspection (Data) Resource: Code Enforcement Case

Business Object	Policy Description	Policy Store Implementation
Code Enforcement Case	An Application Implementation Consultant can update public sector case for all public sector cases	Role: PSC Code Enforcement Case Administration Privilege: Update Public Sector Case (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can update public sector case for public sector cases not in closed statuses	Role: PSC Code Enforcement Case Management Privilege: Update Public Sector Case (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can update public sector case status for all public sector cases	Role: PSC Code Enforcement Case Administration Privilege: Update Public Sector Case Status (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can update public sector case status for public sector cases not in closed statuses	Role: PSC Update Case Status Privilege: Update Public Sector Case Status (Data) Resource: Code Enforcement Case
Code Enforcement Case	An Application Implementation Consultant can view public sector case for all public sector cases	Role: PSC Agency Code Enforcement Case Inquiry Privilege: View Public Sector Case (Data) Resource: Code Enforcement Case

Inbound Message Detail	An Application Implementation Consultant can manage inbound message for all inbound	Role: Service Request Administrator Privilege: Manage Inbound Message (Data)

Business Object	Policy Description	Policy Store Implementation
	messages sent to a customer relationship management channel	Resource: Inbound Message Detail
Incentive Compensation Currency Exchange Rate	An Application Implementation Consultant can manage incentive compensation currency exchange rate for all incentive compensation currencies	Role: Incentive Compensation Application Administrator Privilege: Manage Incentive Compensation Currency Exchange Rate (Data) Resource: Incentive Compensation Currency Exchange Rate
Incentive Compensation Earnings Type	An Application Implementation Consultant can manage incentive compensation earning types for the business units for which they are authorized	Role: Incentive Compensation Application Administrator Privilege: Manage Incentive Compensation Earning Types (Data) Resource: Business Unit
Incentive Compensation Participant	An Application Implementation Consultant can manage incentive compensation participant for the business units for which they are authorized	Role: Incentive Compensation Application Administrator Privilege: Manage Incentive Compensation Participant (Data) Resource: Business Unit
Incentive Compensation Participant	An Application Implementation Consultant can register incentive compensation participant for the business units for which they are authorized	Role: Incentive Compensation Application Administrator Privilege: Register Incentive Compensation Participant (Data) Resource: Business Unit
Incentive Compensation Payment Transaction Export Object	An Application Implementation Consultant can view incentive compensation payment transaction export object for the incentive compensation payment transaction export object in the enterprise	Role: Incentive Compensation Application Administrator Privilege: View Incentive Compensation Payment Transaction Export Object (Data) Resource: Incentive Compensation Payment Transaction Export Object
Incentive Compensation Staged Transaction File Import Activity	An Application Implementation Consultant can view incentive compensation staged transaction file import activity for all staged transaction file import activities in the enterprise	Role: Incentive Compensation Application Administrator Privilege: View Incentive Compensation Staged Transaction File Import Activity (Data) Resource: Incentive Compensation Staged Transaction File Import Activity
Incentive Compensation Staged Transaction File Import Mapping	An Application Implementation Consultant can view incentive compensation staged	Role: Incentive Compensation Application Administrator

Business Object	Policy Description	Policy Store Implementation
	transaction file import mapping for all staged transaction file import mappings in the enterprise	Privilege: View Incentive Compensation Staged Transaction File Import Mapping (Data) Resource: Incentive Compensation Staged Transaction File Import Mapping
Incentive Compensation Staged Transaction File Import Object	An Application Implementation Consultant can view incentive compensation staged transaction file import object for all staged transaction file import objects in the enterprise	Role: Incentive Compensation Application Administrator Privilege: View Incentive Compensation Staged Transaction File Import Object (Data) Resource: Incentive Compensation Staged Transaction File Import Object
Incentive Compensation System Parameter	An Application Implementation Consultant can set up incentive compensation parameters for the business units for which they are authorized	Role: Incentive Compensation Application Administrator Privilege: Set Up Incentive Compensation Parameters (Data) Resource: Business Unit
Incentive Compensation Tables and Columns Setup	An Application Implementation Consultant can configure incentive compensation tables and columns for the business units for which they are authorized	Role: Incentive Compensation Application Administrator Privilege: Configure Incentive Compensation Tables and Columns (Data) Resource: Business Unit
Installed Base Asset	An Application Implementation Consultant can manage installed base asset for all installed base assets	Role: Customer Relationship Management Application Administrator Privilege: Manage Installed Base Asset (Data) Resource: Installed Base Asset
Installed Base Asset	An Application Implementation Consultant can manage installed base asset for all installed base assets	Role: Field Service Administrator Privilege: Manage Installed Base Asset (Data) Resource: Installed Base Asset
Installed Base Asset	An Application Implementation Consultant can manage installed base asset for all installed base assets	Role: Subscription Specialist Privilege: Manage Installed Base Asset (Data) Resource: Installed Base Asset
Interorganization Parameter	An Application Implementation Consultant can manage interorganization parameter for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Interorganization Parameter (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Inventory Organization Parameter
Intersubinventory Parameter	An Application Implementation Consultant can manage intersubinventory parameter for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Intersubinventory Parameter (Data) Resource: Inventory Organization Parameter
Inventory Account Alias	An Application Implementation Consultant can manage inventory account alias for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Account Alias (Data) Resource: Inventory Organization Parameter
Inventory Attribute Exception	An Application Implementation Consultant can configure inventory attribute exception for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Configure Inventory Attribute Exception (Data) Resource: Inventory Organization Parameter
Inventory Consumption Rule	An Application Implementation Consultant can manage inventory consumption rule for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Consumption Rule (Data) Resource: Inventory Organization Parameter
Inventory Consumption Rule	An Application Implementation Consultant can manage inventory consumption rule for the inventory organizations in which they can operate	Role: Web Services Application Identity for SCM Privilege: Manage Inventory Consumption Rule (Data) Resource: Inventory Consumption Rule
Inventory Locator	An Application Implementation Consultant can manage inventory locator for the inventory organizations in which they can operate	Role: Configure Subinventory Using Responsive Inventory Privilege: Manage Inventory Locator (Data) Resource: Inventory Organization Parameter
Inventory Locator	An Application Implementation Consultant can manage inventory locator for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Locator (Data) Resource: Inventory Organization Parameter
Inventory Locator	An Application Implementation Consultant can manage inventory locator for the inventory organizations in which they can operate	Role: Web Services Application Identity for SCM Privilege: Manage Inventory Locator (Data) Resource: Inventory Locator

Business Object	Policy Description	Policy Store Implementation
Inventory Movement Rule Selection Criterion	An Application Implementation Consultant can manage inventory movement rule selection criterion for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Movement Rule Selection Criterion (Data) Resource: Inventory Organization Parameter
Inventory Organization	An Application Implementation Consultant can manage quality organization for the quality organizations in which they can operate	Role: Supply Chain Application Administrator Privilege: Manage Quality Organization (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	An Application Implementation Consultant can manage item and inventory organization parameter for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	An Application Implementation Consultant can manage item and inventory organization parameter for the item organizations in which they can operate	Role: Supply Chain Application Administrator Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Reservation	An Application Implementation Consultant can manage inventory reservation for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Inventory Reservation (Data) Resource: Inventory Organization Parameter
Inventory Reservation	An Application Implementation Consultant can manage inventory reservation for the inventory organizations in which they can operate	Role: Service Request Administrator Privilege: Manage Inventory Reservation (Data) Resource: Inventory Organization Parameter
Item	An Application Implementation Consultant can create item class item for the item classes they have access to	Role: Item Management Privilege: Create Item Class Item (Data) Resource: Item
Item Cost Profile	An Application Implementation Consultant can manage item cost profile for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: Manage Item Cost Profile (Data) Resource: Item Cost Profile

Business Object	Policy Description	Policy Store Implementation
Item Locator	An Application Implementation Consultant can manage item locator for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item Locator (Data) Resource: Inventory Organization Parameter
Item Lot And Serial Attributes Mapping	An Application Implementation Consultant can manage item lot and serial attributes mapping for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item Lot and Serial Attributes Mapping (Data) Resource: Inventory Organization Parameter
Item Subinventory	An Application Implementation Consultant can manage item subinventory for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item Subinventory (Data) Resource: Inventory Organization Parameter
Joint Venture	An Application Implementation Consultant can manage joint ventures for the joint venture business units they are authorized to manage	Role: Joint Venture Application Administrator Privilege: Manage Joint Ventures Resource: Joint Venture
Joint Venture	An Application Implementation Consultant can view joint ventures for the joint venture business units they are authorized to view	Role: Joint Venture Application Administrator Privilege: View Joint Ventures Resource: Joint Venture
Journey	An Application Implementation Consultant can assign journey for checklists to which they have been granted access	Role: Manage Worker Checklist Privilege: Assign Journey (Data) Resource: Journey
Journey	An Application Implementation Consultant can assign journey for journeys to which they have been granted access	Role: Manage Journey Privilege: Assign Journey (Data) Resource: Journey
Journey	An Application Implementation Consultant can assign journey to self for checklists to which they have been granted access	Role: Manage Worker Checklist Privilege: Assign Journey to Self (Data) Resource: Journey

Payroll Checklist Annotation	An Application Implementation Consultant can view payroll flow for legislative data groups in their legislative data group security profile	Role: Submit a Payroll Process or Report Privilege: View Payroll Flow (Data) Resource: Payroll Checklist Annotation
Payroll Consolidation Group	An Application Implementation Consultant can manage payroll definition for legislative data groups in their legislative data group security profile	Role: Payroll Common HCM Implementation Privilege: Manage Payroll Definition (Data) Resource: Payroll Consolidation Group
Payroll Consolidation Group	An Application Implementation Consultant can manage payroll definition for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Definition (Data) Resource: Payroll Consolidation Group
Payroll Consolidation Group	An Application Implementation Consultant can view payroll definition for legislative data groups in their legislative data group security profile	Role: Payroll Common HCM Implementation Privilege: View Payroll Definition (Data) Resource: Payroll Consolidation Group
Payroll Consolidation Group	An Application Implementation Consultant can view payroll definition for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Definition (Data) Resource: Payroll Consolidation Group
Payroll Context Usage	An Application Implementation Consultant can manage payroll balance definition for legislative data groups in their legislative data group security profile	Role: Payroll Common HCM Implementation Privilege: Manage Payroll Balance Definition (Data) Resource: Payroll Context Usage
Payroll Context Usage	An Application Implementation Consultant can manage payroll balance definition for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Balance Definition (Data) Resource: Payroll Context Usage
Payroll Context Usage	An Application Implementation Consultant can view payroll balance for legislative data groups in their legislative data group security profile	Role: Payroll Common HCM Implementation Privilege: View Payroll Balance (Data) Resource: Payroll Context Usage
Payroll Context Usage	An Application Implementation Consultant can view payroll balance for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Balance (Data) Resource: Payroll Context Usage

Business Object	Policy Description	Policy Store Implementation
Payroll Cost Allocation	An Application Implementation Consultant can manage payroll costing for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Costing (Data) Resource: Payroll Cost Allocation
Payroll Cost Allocation	An Application Implementation Consultant can view payroll costing for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Costing (Data) Resource: Payroll Cost Allocation
Payroll Cost Classification	An Application Implementation Consultant can manage payroll costing for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Costing (Data) Resource: Payroll Cost Classification
Payroll Cost Classification	An Application Implementation Consultant can view payroll costing for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Costing (Data) Resource: Payroll Cost Classification
Payroll Cost Information	An Application Implementation Consultant can manage payroll costing for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Costing (Data) Resource: Payroll Cost Information
Payroll Cost Information	An Application Implementation Consultant can view payroll costing for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Costing (Data) Resource: Payroll Cost Information
Payroll Database Item Group	An Application Implementation Consultant can manage fast formula for legislative data groups in their legislative data group security profile	Role: Manage Fast Formula Privilege: Manage Fast Formula (Data) Resource: Payroll Database Item Group
Payroll Database Item Group	An Application Implementation Consultant can view fast formula for legislative data groups in their legislative data group security profile	Role: Manage Fast Formula Privilege: View Fast Formula (Data) Resource: Payroll Database Item Group
Payroll Database Item Group	An Application Implementation Consultant can view fast formula for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Fast Formula (Data) Resource: Payroll Database Item Group

Business Object	Policy Description	Policy Store Implementation
Payroll Deduction Allow Override	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Manage Value Defined by Criteria Privilege: Manage Payroll Deduction (Data) Resource: Payroll Deduction Allow Override
Payroll Deduction Allow Override	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Deduction (Data) Resource: Payroll Deduction Allow Override
Payroll Deduction Allow Override	An Application Implementation Consultant can view payroll deduction group for legislative data groups in their legislative data group security profile	Role: Manage Value Defined by Criteria Privilege: View Payroll Deduction Group (Data) Resource: Payroll Deduction Allow Override
Payroll Deduction Allow Override	An Application Implementation Consultant can view payroll deduction group for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Deduction Group (Data) Resource: Payroll Deduction Allow Override
Payroll Deduction Autoindirect	An Application Implementation Consultant can manage payroll element for legislative data groups in their legislative data group security profile	Role: Payroll Common HCM Implementation Privilege: Manage Payroll Element (Data) Resource: Payroll Deduction Autoindirect
Payroll Deduction Autoindirect	An Application Implementation Consultant can manage payroll element for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Element (Data) Resource: Payroll Deduction Autoindirect
Payroll Deduction Autoindirect	An Application Implementation Consultant can view payroll element for legislative data groups in their legislative data group security profile	Role: Payroll Common HCM Implementation Privilege: View Payroll Element (Data) Resource: Payroll Deduction Autoindirect
Payroll Deduction Autoindirect	An Application Implementation Consultant can view payroll element for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Element (Data) Resource: Payroll Deduction Autoindirect
Payroll Deduction Calculation	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Manage Value Defined by Criteria Privilege: Manage Payroll Deduction (Data) Resource: Payroll Deduction Calculation

Business Object	Policy Description	Policy Store Implementation
Payroll Deduction Calculation	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Deduction (Data) Resource: Payroll Deduction Calculation
Payroll Deduction Calculation	An Application Implementation Consultant can view payroll deduction group for legislative data groups in their legislative data group security profile	Role: Manage Value Defined by Criteria Privilege: View Payroll Deduction Group (Data) Resource: Payroll Deduction Calculation
Payroll Deduction Calculation	An Application Implementation Consultant can view payroll deduction group for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Deduction Group (Data) Resource: Payroll Deduction Calculation
Payroll Deduction Calculation Group	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Manage Value Defined by Criteria Privilege: Manage Payroll Deduction (Data) Resource: Payroll Deduction Calculation Group
Payroll Deduction Calculation Group	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Deduction (Data) Resource: Payroll Deduction Calculation Group
Payroll Deduction Calculation Group	An Application Implementation Consultant can view payroll deduction group for legislative data groups in their legislative data group security profile	Role: Manage Value Defined by Criteria Privilege: View Payroll Deduction Group (Data) Resource: Payroll Deduction Calculation Group
Payroll Deduction Calculation Group	An Application Implementation Consultant can view payroll deduction group for legislative data groups in their legislative data group security profile	Role: Payroll Implementation View Privilege: View Payroll Deduction Group (Data) Resource: Payroll Deduction Calculation Group
Payroll Deduction Calculation Method	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Manage Value Defined by Criteria Privilege: Manage Payroll Deduction (Data) Resource: Payroll Deduction Calculation Method
Payroll Deduction Calculation Method	An Application Implementation Consultant can manage payroll deduction for legislative data groups in their legislative data group security profile	Role: Payroll Implementation Privilege: Manage Payroll Deduction (Data)
