What is the risk and control matrix?	27

What are the severity and status of issues?	28
What is the status for remediating issues?	29
What issues are defined, and what are their relationships to process, risk, and control records?	29
When were assessments initiated?	30
When were key controls tested?	31
When was the last time the control was run?	31
What advanced controls have been defined?	32
How many incidents have been closed?	33
How many incidents were found in the last control run?	33
What Financial Reporting Compliance objects have the incidents been related to?	34
For a specific transaction control, what is the total transaction amount?	35
How many incidents are assigned or in remediation with 0-30 days age?	35
What incidents have been identified for a specified transaction control?	36
What advanced controls have been defined?	37
What SOD conflicts have been identified for users and roles?	37
What comments have been posted against the incidents?	38
What access points are included in the entitlements?	39
Since the same incident path is often found across users, what is the unique incident path count?	39
What is the status of one or multiple access certifications?	40
What job roles need to be removed per user name?	41
What user name and job role combinations require investigation?	41
What user name and job role combinations are pending?	42
How many access certifications did the certifier complete?	43
How many access certifications did the owner complete?	43
How many user name and job role combinations are being certified?	44
What certifications were performed in the last two quarters?	45
What new user-role combinations have been certified this year versus last?	45
What is the employment information for the user being certified, such as business unit, manager, or job name?	46
What is the employment information for a user whose direct manager recommends that access be revoked?	47
Did the approver accept the assessment result, reject it, or return it for information?	47
Who are the owners, editors, and viewers assigned to records (such as process and control), and are they eligible?	48
Who is authorized to review and approve a record (such as process or risk), and are they eligible?	49
Which groups of owners, editors, and viewers are assigned to a record (such as control or issue), and are they eligible?	49
Which groups are authorized to review and approve a record (such as process or risk), and are they eligible?	50
Who are the owners, editors, and viewers assigned to records (such as control or result), and are they eligible?	51

Which analyses reached OTBI max row limit?	65
What are the common execution errors in the past month?	66
How many analyses and dashboards failed in the past month?	66
What are the most commonly used OTBI subject areas?	67
What are the least-used OTBI subject areas?	68
Which subject areas have slow performance?	68
Which subject areas have large data volume?	69
Which analyses have low usage because of poor performance?	69
What is the database SQL execution time and row count?	70
Why am I not able to view certain subject areas with my login credentials?	71
Which data security policy would provide access to the data I need to see?	71
Can I view and edit a particular page? If yes, which functional security policy do I need to provide to a user who needs similar access?	72

I have not added a specific role to a user, but the user seems to have this job role. Can I trace how has this been inherited by the user?	73
What data security privileges has a specific user added?	73
Which roles were added with a specific functional security policy, and who added them?	74
What events and consequences are associated to a risk?	74
What consequences are associated to the event?	75
What risk analyses have been completed for a risk record?	76
What risk evaluations have been completed for a risk record?	76
What treatment plans are associated to the risk record?	77
What unique codes correspond to the role and privilege display names?	78
Who are the owners, editors, and viewers assigned to an assessment batch?	78
Which groups of owners, editors, and viewers are assigned to an assessment batch?	79
Who is authorized to access, view, review, and approve assessment results?	80
Who is the issue validator/owner for the assessment result record?	80

What is the first and last name of the certifier who last updated the certification?	89
What is the name of the survey template used for a specific survey?	89
What is the name of the role code for user role combinations being certified?	90
What is the actual timestamp when the certification event took place?	91
What advanced financial models have been defined?	91
Will the model results help to analyze exceptions, or does model logic need to be adjusted?	92
Is the model ready to be deployed as a control? (Does the model return only the expected exception-based results?)	93
Who approved and reviewed the remediation plan?	93
What date was the remediation plan approved or reviewed?	94
What is the approval history of the remediation plan?	95

What are the specific comments for the remediation plan during the approval workflow?	95
What is the control stratification for each control as it relates to the associated risk record?	96
How many attachments have been applied to assessment records?	97
Who associated the attachments?	97
What is the attachment type?	98
What is the file name or URL of the attachment?	99
What is the document ID of the attachment?	99
What is the timestamp when the attachment was associated?	100
Which controls have not been tested for the current fiscal year?	101
How many controls have and have not been tested for the current fiscal year?	102
What is the overall compliance status for the current fiscal year and/or quarter?	102
What are the assessment results for those controls that have been tested?	103
Which perspectives will be defaulted on results when a control is run?	104

1 Introduction

About This Guide

This guide contains information about Transactional Business Intelligence subject areas, their associated job and duty roles, and the business questions that they provide answers to. For your reference:

- Subject areas are the building blocks of your analytics and reports based upon them. Analytics are built by choosing an appropriate subject area that has information that answers the business question you're analyzing. Technically, subject areas are a grouping of information pieces called data objects that relate to each other in a particular context.
- - Job roles inherit duty roles. To control access to the subject areas, copy the predefined job roles associated with the subject area to create custom roles, and assign them to users.

For more information about custom roles and their use with predefined roles, see [Guidance for Assigning Predefined Roles](#) in the Oracle Fusion Cloud Applications Securing Applications guide.

2 Subject Areas

Overview

This chapter provides information on the subject areas with data you maintain in Oracle Risk Management Cloud. These subject areas, with their corresponding data, are available for you to use when creating and editing analyses and reports. The information for each subject area includes:

- Description of the subject area.
- Business questions that can be answered by data in the subject area, with a link to more detailed information about each business question.
- Job roles and duty roles that can be used to secure access to the subject area, with a link to more detailed information about each job role and duty role.
- Primary navigation to the work area that is represented by the subject area.
- Time reporting considerations in using the subject area, such as whether the subject area reports historical data or only the current data. Historical reporting refers to reporting on historical transactional data in a subject area. With a few exceptions, all dimensional data are current as of the primary transaction dates or system date.
- The lowest grain of transactional data in a subject area. The lowest transactional data grain determines how data are joined in a report.
- Special considerations, tips, and things to look out for in using the subject area to create analyses and reports.

OTBI Performance Real Time

Description

Analyze OTBI analysis and dashboard usage and performance, including logical and physical database SQL, execution time, and errors. View the last six months of OTBI usage and performance trends, commonly used subject areas, and report errors. This subject area provides data to monitor and diagnose OTBI reporting performance. Historical data older than six months is purged each week.

Business Questions

This subject area can answer the following business questions:

- *What are the common execution errors in the past month?*
- *Which analyses reached OTBI max row limit?*
- *What are the least-used OTBI subject areas?*
- *What is the database SQL execution time and row count?*

- *Which analyses have the longest response time?*
- *Which subject areas have large data volume?*
- *Which subject areas have slow performance?*
- *Which analyses have low usage because of poor performance?*
- *What are the long-running analyses in the past month?*
- *What is the OTBI execution time histogram in the past month?*
- *How many analyses and dashboards failed in the past month?*
- *What are the most commonly used OTBI subject areas?*
- *Which analyses have high data row count?*

Job Roles

The following job roles secure access to this subject area:

- *Application Implementation Consultant*
- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *OTBI Report Performance Transactional Analysis Duty*

Primary Navigation

Not available

Time Reporting

This subject area supports six-month usage history data.

Time dimension is linked to "Time"."Report Start Date".

Transactional Grain

This subject area returns data at the grain of a query execution and database physical SQL.

Special Considerations

This subject area contains six months of query execution data. Each OTBI query execution can generate multiple database SQL statements. Usage data volume grows over time, so use proper filters to narrow reporting data load. Because this subject area has no data security, you're advised to secure user access to it.

OTBI Usage Real Time

Description

Analyze six months of subject area and analysis usage trends and patterns with a simpler and lighter-weight selection of OTBI usage metrics, including for example user, report and subject area usage patterns. Historical data older than six months is purged each week.

Business Questions

This subject area can answer the following business questions:

- *How many users run OTBI analyses?*
- *Which analyses have low usage in the past month?*
- *What are the top most frequently run OTBI analyses?*
- *How many predefined OTBI analyses have been run in the past month?*
- *How many ad-hoc OTBI analyses have been run in the past month?*
- *How many custom OTBI analyses have been run in the past month?*
- *How many OTBI SOAP web services have been run in the past month?*
- *What is the execution history of dashboard X in the past month?*
- *What is the weekly OTBI analysis usage trend?*
- *Who are the top OTBI users?*

Job Roles

The following job roles secure access to this subject area:

- *Application Implementation Consultant*
- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *OTBI Report Usage Transactional Analysis Duty*

Primary Navigation

Not available

Time Reporting

This subject area supports six-month usage history data.

Time dimension is linked to "Time"."Report Start Date".

Transactional Grain

This subject area returns data at the grain of a query execution.

Special Considerations

This subject area contains six months of usage history. It doesn't contain database SQL execution details so it has less data volume.

Risk Management Cloud - Access Certification Real Time

Description

This subject area provides information related to Oracle Access Certifications, which enables customers to certify whether job roles are assigned appropriately to users.

Business Questions

This subject area can answer the following business questions:

- *What user name and job role combinations require investigation?*
- *How many user name and job role combinations are being certified?*
- *What is the employment information for a user whose direct manager recommends that access be revoked?*
- *What is the business unit for the user being certified?*
- *When did the certifier last update the certification?*
- *What is the name of the role code for user role combinations being certified?*
- *How many access certifications did the owner complete?*
- *What new user-role combinations have been certified this year versus last?*
- *How many access certifications did the certifier complete?*
- *What is the first and last name of the certifier who last updated the certification?*
- *What is the status of one or multiple access certifications?*
- *What user name and job role combinations are pending?*
- *What is the asset book for the person being certified?*
- *What is the actual timestamp when the certification event took place?*

-
- *What job roles need to be removed per user name?*
 - *What is the employment information for the user being certified, such as business unit, manager, or job name?*
 - *What certifications were performed in the last two quarters?*
 - *What is the ledger for the user being certified?*

Job Roles

The following job roles secure access to this subject area:

- *Access Certification Administrator*
- *External Auditor*
- *Risk Administrator*

Duty Roles

The following duty roles secure access to this subject area:

- *Access Certification Transaction Analysis Duty*

Primary Navigation

1) Risk Management > Access Certifications

Time Reporting

This subject area supports access certification history.

Time dimension is linked to Creation Date.

Transactional Grain

Not available

Special Considerations

The Access Certification synchronization program needs to be run to gather information before data is available in this area.

Risk Management Cloud - Advanced Access Controls Real Time

Description

This subject area provides information related to Oracle Advanced Access Controls, which implements controls that identify users with conflicting access to duties assigned in a company's applications.

Business Questions

This subject area can answer the following business questions:

- *What advanced controls have been defined?*
- *What Financial Reporting Compliance objects have the incidents been related to?*
- *Which groups are authorized to view and edit a record (such as control or result), and are they eligible?*
- *What comments have been posted against the incidents?*
- *How many incidents are assigned or in remediation with 0-30 days age?*
- *What SOD conflicts have been identified for users and roles?*
- *What unique codes correspond to the role and privilege display names?*
- *When was the last time the control was run?*
- *Who are the owners, editors, and viewers assigned to records (such as control or result), and are they eligible?*
- *Which perspectives will be defaulted on results when a control is run?*
- *What access points are included in the entitlements?*
- *How many incidents have been closed?*
- *How many incidents were found in the last control run?*
- *Who is authorized to view and edit a record (such as control or result), and are they eligible?*
- *Which controls are in the North America perspective?*
- *Since the same incident path is often found across users, what is the unique incident path count?*
- *Which groups of owners, editors, and viewers are assigned to a record (such as control or result), and are they eligible?*

Job Roles

The following job roles secure access to this subject area:

- *Advanced Access Controls Analyst*
- *External Auditor*

- *Risk Administrator*

Duty Roles

The following duty roles secure access to this subject area:

- *Advanced Access Control Transaction Analysis Duty*

Primary Navigation

1) Risk Management > Advanced Controls > Controls; 2) Risk Management > Advanced Controls > Results

Time Reporting

This subject area supports control and results change history.

Time dimension is linked to Creation Date.

Transactional Grain

Special Considerations

A synchronization program needs to be run to gather information before data is available in this area.

Risk Management Cloud - Advanced Access Models Real Time

Description

This subject area provides information related to models created in Advanced Access Controls. Models define conflicts among duties assigned in a company's applications and identify users with conflicting access to those duties. Every control created in the application is based on a model.

Business Questions

This subject area can answer the following business questions:

- *What is the model name?*
- *Which users have conflicting access?*
- *How many results were returned for the model?*

-
- *What are the summary result counts for models in the North America perspective?*
 - *Which roles have conflicting access?*

Job Roles

The following job roles secure access to this subject area:

- *Advanced Access Controls Analyst*
- *External Auditor*

Risk Management Cloud - Advanced Financial Controls Real Time

Description

This subject area provides information related to Oracle Advanced Financial Controls, which implements controls that evaluate transactions for fraud, error, or other risk.

Business Questions

This subject area can answer the following business questions:

- *What advanced controls have been defined?*
- *What Financial Reporting Compliance objects have the incidents been related to?*
- *For a specific transaction control, what is the total transaction amount?*
- *Which groups are authorized to view and edit a record (such as control or result), and are they eligible?*
- *What is the document ID of the attachment?*
- *How many incidents are assigned or in remediation with 0-30 days age?*
- *What is the file name or URL of the attachment?*
- *Who associated the attachments?*
- *How many attachments have been applied to assessment records?*
- *What is the attachment type?*

- *External Auditor*
- *Risk Administrator*

Duty Roles

The following duty roles secure access to this subject area:

- *Advanced Financial Control Transaction Analysis Duty*

Primary Navigation

1) Risk Management > Advanced Controls > Controls; 2) Risk Management > Advanced Controls > Results

Time Reporting

This subject area supports control and result change history. This subject area supports historical and trend reporting of transactions when applicable attributes are selected in the result display of a control definition.

Time dimension is linked to Creation Date.

Risk Management Cloud - Assessment Results Real Time

Description

This subject area provides information about assessment and survey results. In Financial Reporting Compliance, users assess processes, risks, and controls, and may complete surveys as they do so.

Business Questions

This subject area can answer the following business questions:

- *What survey questions and responses are related to assessments?*
- *What is the order of the questions presented to the survey participant?*
- *Who are the owners, editors, and viewers assigned to an assessment batch?*
- *Who is authorized to access, view, review, and approve assessment results?*
- *What date was the remediation plan approved or reviewed?*

Security - Audit Real Time

Description

Provides real-time information on audit details related to security. For example, when a custom role was created, when roles were assigned to specific users, or when roles were given specific function or data privileges.

Business Questions

This subject area can answer the following business questions:

- *Which roles were added with a specific functional security policy, and who added them?*
- *What data security privileges has a specific user added?*

Job Roles

The following job roles secure access to this subject area:

- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *Security Transaction Analysis Duty*

Primary Navigation

Tools > Security Console

Time Reporting

This subject area does not support history data.

Transactional Grain

Not applicable.

Special Considerations

This subject area can't be used to create a cross-subject area analysis. Don't mix data from different folders within this subject area either. For example, keep data from the Data Security Policy Audit folder separate from the Instance Set Audit folder. If you need to combine data from different folders, use a union operation or create a report instead of an analysis.

Security - Roles and Privileges Real Time

Description

Provides real-time information about the security setup in the application. This subject area is independent of the pillar and can be used to report on roles and details across pillars like HCM, ERP, SCM and so on.

Use this subject area to report on role categories, roles, functional security policies, data security policies, and the users assigned to the roles.

You can report on the correlation between the objects like the roles that are directly assigned to another role, the roles that are inherited by the virtue of the directly assigned roles, or the functional and data security policies that are directly assigned to the roles.

For a given user, all the roles that have been assigned can also be reported.

Business Questions

This subject area can answer the following business questions:

- *Why am I not able to view certain subject areas with my login credentials?*
- *I have not added a specific role to a user, but the user seems to have this job role. Can I trace how has this been inherited by the user?*
- *Can I view and edit a particular page? If yes, which functional security policy do I need to provide to a user who needs similar access?*
- *Which data security policy would provide access to the data I need to see?*

Job Roles

The following job roles secure access to this subject area:

- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *Security Transaction Analysis Duty*

Primary Navigation

Tools > Security Console

Time Reporting

This subject area does not support history data.

Transactional Grain

Not applicable.

Special Considerations

This subject area is used to report on users, functional security policies, and data security policies all in the correlation of roles. For a role, you can report on functional security policies, or data security policies, or users. If you try to combine all the security objects in a single report, it displays an error message. This subject area can't be used to create a cross subject area report.

5 Duty Roles

Overview

For each duty role in this chapter, links are provided for more detailed information about the job roles, subject areas, and business questions associated with the duty role.

Access Certification Transaction Analysis Duty

Code Name

FBI_ACCESS_CERTIFICATION_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *Access Certification Administrator*
- *External Auditor*
- *Risk Administrator*

Subject Areas

This duty role secures access to the following subject areas:

- *Risk Management Cloud - Access Certification Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *What user name and job role combinations require investigation?*
- *How many user name and job role combinations are being certified?*
- *What is the employment information for a user whose direct manager recommends that access be revoked?*
- *What is the business unit for the user being certified?*
- *When did the certifier last update the certification?*
- *What is the name of the role code for user role combinations being certified?*

- *How many access certifications did the owner complete?*
- *What new user-role combinations have been certified this year versus last?*
- *How many access certifications did the certifier complete?*
- *What is the first and last name of the certifier who last updated the certification?*
- *What is the status of one or multiple access certifications?*
- *What user name and job role combinations are pending?*
- *What is the asset book for the person being certified?*
- *What is the actual timestamp when the certification event took place?*
- *What job roles need to be removed per user name?*
- *What is the employment information for the user being certified, such as business unit, manager, or job name?*
- *What certifications were performed in the last two quarters?*
- *What is the ledger for the user being certified?*

Advanced Access Control Model Transaction Analysis Duty

Code Name

FBI_ADVANCED_ACCESS_CONTROL_MODEL_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *Advanced Access Controls Analyst*
- *External Auditor*

Subject Areas

This duty role secures access to the following subject areas:

- *Risk Management Cloud - Advanced Access Models Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *What is the model name?*
- *Which users have conflicting access?*

- *How many results were returned for the model?*
- *What are the summary result counts for models in the North America perspective?*
- *Which roles have conflicting access?*

Advanced Access Control Transaction Analysis Duty

Code Name

FBI_ADVANCED_ACCESS_CONTROL_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *Advanced Access Controls Analyst*
- *External Auditor*
- *Risk Administrator*

Subject Areas

This duty role secures access to the following subject areas:

- *Risk Management Cloud - Advanced Access Controls Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *What advanced controls have been defined?*
- *What Financial Reporting Compliance objects have the incidents been related to?*
- *Which groups are authorized to view and edit a record (such as control or result), and are they eligible?*
- *What comments have been posted against the incidents?*
- *How many incidents are assigned or in remediation with 0-30 days age?*
- *What SOD conflicts have been identified for users and roles?*
- *What unique codes correspond to the role and privilege display names?*
- *When was the last time the control was run?*

- *Since the same incident path is often found across users, what is the unique incident path count?*
- *Which groups of owners, editors, and viewers are assigned to a record (such as control or result), and are they eligible?*

Advanced Financial Control Models Transaction Analysis Duty

Code Name

FBI_ADVANCED_FINANCIAL_CONTROL_MODELS_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *Advanced Access Controls Analyst*

Subject Areas

This duty role secures access to the following subject areas:

- *Risk Management Cloud - Advanced Financial Models Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *Is the model ready to be deployed as a control? (Does the model return only the expected exception-based results?)*
- *What advanced financial models have been defined?*
- *Will the model results help to analyze exceptions, or does model logic need to be adjusted?*

Advanced Financial Control Transaction Analysis Duty

Code Name

FBI_ADVANCED_FINANCIAL_CONTROL_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *Advanced Transaction Controls Analyst*
- *External Auditor*
- *Risk Administrator*

Subject Areas

This duty role secures access to the following subject areas:

- *Risk Management Cloud - Advanced Financial Controls Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *What advanced controls have been defined?*

 - *What three perspective hierarchies are related to documented processes?*

OTBI Report Performance Transactional Analysis Duty

Code Name

FBI_REPORT_PERFORMANCE_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *Application Implementation Consultant*

- *IT Security Manager*

Subject Areas

This duty role secures access to the following subject areas:

- *OTBI Performance Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *What are the common execution errors in the past month?*
- *Which analyses reached OTBI max row limit?*
- *What are the least-used OTBI subject areas?*
- *What is the database SQL execution time and row count?*
- *Which analyses have the longest response time?*
- *Which subject areas have large data volume?*
- *Which subject areas have slow performance?*
- *Which analyses have low usage because of poor performance?*
- *What are the long-running analyses in the past month?*
- *What is the OTBI execution time histogram in the past month?*
- *How many analyses and dashboards failed in the past month?*
- *What are the most commonly used OTBI subject areas?*
- *Which analyses have high data row count?*

OTBI Report Usage Transactional Analysis Duty

Code Name

FBI_REPORT_USAGE_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *Application Implementation Consultant*
- *IT Security Manager*

Subject Areas

This duty role secures access to the following subject areas:

- *OTBI Usage Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *How many users run OTBI analyses?*
- *Which analyses have low usage in the past month?*
- *What are the top most frequently run OTBI analyses?*
- *How many predefined OTBI analyses have been run in the past month?*
- *How many ad-hoc OTBI analyses have been run in the past month?*
- *How many custom OTBI analyses have been run in the past month?*
- *How many OTBI SOAP web services have been run in the past month?*
- *What is the execution history of dashboard X in the past month?*
- *What is the weekly OTBI analysis usage trend?*
- *Who are the top OTBI users?*

Security Transaction Analysis Duty

Code Name

FBI_SECURITY_TRANSACTION_ANALYSIS_DUTY

Job Roles

This duty role is related to the following job roles:

- *IT Security Manager*

Subject Areas

This duty role secures access to the following subject areas:

- *Security - Audit Real Time*

-
- *Security - Roles and Privileges Real Time*

Business Questions

This duty role secures access to data that can answer the following business questions:

- *Why am I not able to view certain subject areas with my login credentials?*
- *I have not added a specific role to a user, but the user seems to have this job role. Can I trace how has this been inherited by the user?*
- *Which roles were added with a specific functional security policy, and who added them?*
- *Can I view and edit a particular page? If yes, which functional security policy do I need to provide to a user who needs similar access?*
- *What data security privileges has a specific user added?*
- *Which data security policy would provide access to the data I need to see?*
