How many assessment transactions are not completed?	18
How many custom OTBI analyses have been run in the past month?	19
How many incidents are assigned or in remediation with 0-30 days age?	19
How many incidents have been closed?	20
How many incidents were found in the last control run?	20
How many predefined OTBI analyses have been run in the past month?	21
How many results were returned for the model?	21
How many user name and job role combinations are being certified?	22
How many users run OTBI analyses?	23
I have not added the Compensation analyst role to user, however the user seem to have this job role, can I trace how has this been inherited by the user?	23
I haven't added a specific role to a user, but the user seem to have this job role. Can I trace how has this been inherited by the user?	23
List all the Data Security Privileges that were added by a specific user	23
Since the same incident path is often found across users, what is the unique incident path count?	23
What Financial Reporting Compliance objects have the incidents been related to?	24
What Financial Reporting Compliance records have been defined?	25
What SOD conflicts have been identified for users and roles?	25
What access points are included in the entitlements?	26
What advanced controls have been defined?	27
What are all the data security privileges that a specific user added?	28
What are the common execution errors in the past month?	28
What are the defined active key controls?	28
What are the least-used OTBI subject areas?	29
What are the long-running analyses in the past month?	29
What are the most commonly used OTBI subject areas?	29
What are the results for batch and impromptu assessments?	29
What are the results of the control test plans?	30
What are the severity and status of issues?	30
What are the summary result counts for models in the North America perspective?	31
What are the top N most frequently-run OTBI analyses?	32
What assessment batches have been defined?	32
What assessments have been defined?	32
What certifications were performed in the last two quarters?	33
What comments have been posted against the incidents?	34
What consequences are associated to the event?	34
What controls are in scope for testing?	35

What is the OTBI execution time histogram in the past month?	37
What is the actual timestamp when the certification event took place?	37
What is the asset book for the person being certified?	38
What is the business unit for the user being certified?	38
What is the control stratification for control records associated to a risk record?	39
What is the current predicate vs prior predicate values of the data security policy?	40
What is the database SQL execution time and row count?	40
What is the employment information for a user whose direct manager recommends that access be revoked?	40
What is the employment information for the user being certified, such as business unit, manager, or job name?	41
What is the execution history of dashboard X in the past month?	41
What is the first and last name of the certifier who last updated the certification?	41
What is the ledger for the user being certified?	42
What is the model name?	43
What is the name of the role code for user role combinations being certified?	43
What is the name of the survey template used for a specific survey?	44
What is the risk and control matrix?	44
What is the status for remediating issues?	45
What is the status of one or multiple access certifications?	46
What is the survey participant's email address?	46
What is the timestamp the survey participant submitted responses?	47
What is the total number of updates that have happened on a data security policy?	48
What is the weekly OTBI analysis usage trend?	48
What is total number of changes done on a functional security policy during the day?	48
What issues are defined, and what are their relationships to process, risk, and control records?	48
What job roles need to be removed per user name?	49
What new user-role combinations have been certified this year versus last?	49
What questions and responses are related to a particular survey?	50
What risk analyses have been completed for a risk record?	51
What risk evaluations have been completed for a risk record?	51
What survey questions and responses are related to assessments?	52
What survey questions and responses are related to objects?	53
What treatment plans are associated to the risk record?	53
What unique codes correspond to the role and privilege display names?	54
What user name and job role combinations are pending?	55
What user name and job role combinations require investigation?	55

When did the certifier last update the certification?	56
When was the last time the control was run?	57
When were assessments completed and closed?	57
When were assessments initiated?	58
When were key controls tested?	59
Which analyses have high data row count?	60
Which analyses have low usage because of poor performance?	60
Which analyses have low usage in the past month?	60
Which analyses have the longest response time?	60
Which analyses reached OTBI max row limit?	60
Which assessments are overdue?	60
Which data security policy would provide access to the data I need to see?	61
Which data security policy would provide access to the talent profile data ?	61
Which groups are authorized as an issue validator/owner for the assessment result record?	61
Which groups are authorized to access, view, review, and approve assessment results?	62
Which groups are authorized to review and approve a record (such as process or risk), and are they eligible?	62
Which groups are authorized to view and edit a record (such as control or result), and are they eligible?	63
Which groups of owners, editors, and viewers are assigned to a record (such as control or issue), and are they eligible?	64
Which groups of owners, editors, and viewers are assigned to a record (such as control or result), and are they eligible?	65
Which groups of owners, editors, and viewers are assigned to an assessment batch?	65
Which roles have conflicting access?	66
Which roles were added with a specific functional security policy and who added it?	67
Which roles were added with a specific functional security policy, and who added them?	67
Which subject areas have large data volume?	67
Which subject areas have slow performance?	67
Which user has added/removed the specific functional security policy?	67
Which users have conflicting access?	67
Who are the owners, editors, and viewers assigned to an assessment batch?	68
Who are the owners, editors, and viewers assigned to records (such as control or result), and are they eligible?	69
Who are the owners, editors, and viewers assigned to records (such as process and control), and are they eligible?	69
Who are the top N OTBI users?	70
Who is authorized to access, view, review, and approve assessment results?	70
Who is authorized to review and approve a record (such as process or risk), and are they eligible?	71
Who is authorized to view and edit a record (such as control or result), and are they eligible?	72

Who is the issue validator/owner for the assessment result record?	72

# Get Help

There are a number of ways to learn more about your product and interact with Oracle and other users.

## Get Help in the Applications

Some application pages have help icons  to give you access to contextual help. If you don't see any help icons on your page, click your user image or name in the global header and select Show Help Icons. If the page has contextual help, help icons will appear.

## Get Support

You can get support at [My Oracle Support](#). For accessible support, visit [Oracle Accessibility Learning and Support](#).

## Get Training

Increase your knowledge of Oracle Cloud by taking courses at [Oracle University](#).

## Join Our Community

Use [Cloud Customer Connect](#) to get information from industry experts at Oracle and in the partner community. You can join forums to connect with other customers, post questions, suggest [ideas](#) for product enhancements, and watch events.

# 1 Introduction

## About This Guide

This guide contains information about Transactional Business Intelligence subject areas, their associated job and duty roles, and the business questions that they provide answers to. For your reference:

- Subject areas are the building blocks of your analytics and reports based upon them. Analytics are built by choosing an appropriate subject area that has information that answers the business question you're analyzing. Technically, subject areas are a grouping of information pieces called data objects that relate to each other in a particular context.
- Job roles inherit duty roles. To control access to the subject areas, copy the predefined job roles associated with the subject area to create custom roles, and assign them to users.

For more information about custom roles and their use with predefined roles, see *Guidance for Assigning Predefined Roles* in the Oracle Fusion Cloud Applications Securing Applications guide.

## 2 Subject Areas

### Overview

This chapter provides information on the subject areas with data you maintain in Oracle Risk Management Cloud. These subject areas, with their corresponding data, are available for you to use when creating and editing analyses and reports. The information for each subject area includes:

- Description of the subject area.
- Business questions that can be answered by data in the subject area, with a link to more detailed information about each business question.
- Job roles and duty roles that can be used to secure access to the subject area, with a link to more detailed information about each job role and duty role.
- Primary navigation to the work area that is represented by the subject area.
- Time reporting considerations in using the subject area, such as whether the subject area reports historical data or only the current data. Historical reporting refers to reporting on historical transactional data in a subject area. With a few exceptions, all dimensional data are current as of the primary transaction dates or system date.
- The lowest grain of transactional data in a subject area. The lowest transactional data grain determines how data are joined in a report.
- Special considerations, tips, and things to look out for in using the subject area to create analyses and reports.

### OTBI Performance Real Time

### OTBI Usage Real Time

### Risk Management Cloud - Access Certification Real Time

#### Description

This subject area provides information related to Oracle Access Certifications, which enables customers to certify whether job roles are assigned appropriately to users.

## Business Questions

This subject area can answer the following business questions:

- *How many access certifications did the certifier complete?*
- *How many access certifications did the owner complete?*
- *How many user name and job role combinations are being certified?*
- *What certifications were performed in the last two quarters?*
- *What is the actual timestamp when the certification event took place?*
- *What is the asset book for the person being certified?*
- *What is the business unit for the user being certified?*
- *What is the employment information for a user whose direct manager recommends that access be revoked?*
- *What is the employment information for the user being certified, such as business unit, manager, or job name?*
- *What is the first and last name of the certifier who last updated the certification?*
- *What is the ledger for the user being certified?*
- *What is the name of the role code for user role combinations being certified?*
- *What is the status of one or multiple access certifications?*
- *What job roles need to be removed per user name?*
- *What new user-role combinations have been certified this year versus last?*
- *What user name and job role combinations are pending?*
- *What user name and job role combinations require investigation?*
- *When did the certifier last update the certification?*

## Job Roles

The following job roles secure access to this subject area:

- *Access Certification Administrator*
- *External Auditor*
- *Risk Administrator*

## Duty Roles

The following duty roles secure access to this subject area:

- *Access Certification Transaction Analysis Duty*

## Primary Navigation

## 1) Risk Management > Access Certifications

### Time Reporting

This subject area supports access certification history.

Time dimension is linked to Creation Date.

### Transactional Grain

Not available

### Special Considerations

The Access Certification synchronization program needs to be run to gather information before data is available in this area.

## Risk Management Cloud - Advanced Access Controls Real Time

### Description

This subject area provides information related to Oracle Advanced Access Controls, which implements controls that identify users with conflicting access to duties assigned in a company's applications.

### Business Questions

This subject area can answer the following business questions:

- *How many incidents are assigned or in remediation with 0-30 days age?*
- *How many incidents have been closed?*
- *How many incidents were found in the last control run?*
- *Since the same incident path is often found across users, what is the unique incident path count?*
- *What Financial Reporting Compliance objects have the incidents been related to?*
- *What SOD conflicts have been identified for users and roles?*
- *What access points are included in the entitlements?*
- *What advanced controls have been defined?*
- *What comments have been posted against the incidents?*
- *What unique codes correspond to the role and privilege display names?*
- *When was the last time the control was run?*
- *Which groups are authorized to view and edit a record (such as control or result), and are they eligible?*

- *Which groups of owners, editors, and viewers are assigned to a record (such as control or result), and are they eligible?*
- *Who are the owners, editors, and viewers assigned to records (such as control or result), and are they eligible?*
- *Who is authorized to view and edit a record (such as control or result), and are they eligible?*

## Job Roles

The following job roles secure access to this subject area:

- *Advanced Access Controls Analyst*
- *External Auditor*
- *Risk Administrator*

## Duty Roles

The following duty roles secure access to this subject area:

- *Advanced Access Control Transaction Analysis Duty*

## Primary Navigation

1) Risk Management > Advanced Controls > Controls; 2) Risk Management > Advanced Controls > Results

## Time Reporting

This subject area supports control and results change history.

Time dimension is linked to Creation Date.

## Transactional Grain

Not available

## Special Considerations

A synchronization program needs to be run to gather information before data is available in this area.

# Risk Management Cloud - Advanced Access Models Real Time

## Description

This subject area provides information related to models created in Advanced Access Controls. Models define conflicts among duties assigned in a company's applications and identify users with conflicting access to those duties. Every control created in the application is based on a model.

## Business Questions

This subject area can answer the following business questions:

- *How many results were returned for the model?*
- *What are the summary result counts for models in the North America perspective?*
- *What is the model name?*
- *Which roles have conflicting access?*
- *Which users have conflicting access?*

## Job Roles

The following job roles secure access to this subject area:

- *Advanced Access Controls Analyst*
- *External Auditor*

## Duty Roles

The following duty roles secure access to this subject area:

- *Advanced Access Control Model Transaction Analysis Duty*

## Primary Navigation

Risk Management > Advanced Controls > Models

## Time Reporting

NA

Time dimension is linked to NA.

## Transactional Grain

Not available

## Special Considerations

A synchronization program needs to be run to gather information before data is available in this area.

# Risk Management Cloud - Advanced Financial Controls Real Time

## Description

This subject area provides information related to Oracle Advanced Financial Controls, which implements controls that evaluate transactions for fraud, error, or other risk.

## Business Questions

This subject area can answer the following business questions:

- *For a specific transaction control, what is the total transaction amount?*
- *How many incidents are assigned or in remediation with 0-30 days age?*
- *How many incidents have been closed?*
- *How many incidents were found in the last control run?*
- *What Financial Reporting Compliance objects have the incidents been related to?*
- *What advanced controls have been defined?*

- *Which groups of owners, editors, and viewers are assigned to a record (such as control or result), and are they eligible?*
- *Who are the owners, editors, and viewers assigned to records (such as control or result), and are they eligible?*
- *Who is authorized to view and edit a record (such as control or result), and are they eligible?*

## Job Roles

The following job roles secure access to this subject area:

- *Advanced Transaction Controls Analyst*
- *External Auditor*
- *Risk Administrator*

## Duty Roles

The following duty roles secure access to this subject area:

- *Advanced Financial Control Transaction Analysis Duty*

## Primary Navigation

1) Risk Management > Advanced Controls > Controls; 2) Risk Management > Advanced Controls > Results

## Time Reporting

This subject area supports control and result change history. This subject area supports historical and trend reporting of transactions when applicable attributes are selected in the result display of a control definition.

Time dimension is linked to Creation Date.

## Transactional Grain

Not available

## Special Considerations

A synchronization program needs to be run to gather information before data is available in this area.

# Risk Management Cloud - Advanced Financial Models Real Time

## Description

This subject area provides information related to models created in Advanced Financial Controls. Models evaluate transactions for fraud, error, or other risk. Every control created in the application is based on a model.

## Job Roles

The following job roles secure access to this subject area:

- *Advanced Access Controls Analyst*

## Duty Roles

The following duty roles secure access to this subject area:

- *Advanced Financial Control Models Transaction Analysis Duty*

## Primary Navigation

Risk Management > Advanced Controls > Models

## Time Reporting

NA

Time dimension is linked to NA.

## Transactional Grain

Not available

## Special Considerations

A synchronization program needs to be run to gather information before data is available in this area.

# Risk Management Cloud - Assessment Results Real Time

## Description

This subject area provides information about assessment and survey results. In Financial Reporting Compliance, users assess processes, risks, and controls, and may complete surveys as they do so.

## Business Questions

This subject area can answer the following business questions:

- *Did the approver accept the assessment result, reject it, or return it for information?*
- *How many assessment transactions are not completed?*
- *What are the defined active key controls?*
- *What are the results for batch and impromptu assessments?*
- *What are the results of the control test plans?*
- *What assessment batches have been defined?*
- *What consequences are associated to the event?*
- *What events and consequences are associated to a risk?*
- *What is the control stratification for control records associated to a risk record?*
- *What is the name of the survey template used for a specific survey?*
- *What is the survey participant's email address?*

- *What is the timestamp the survey participant submitted responses?*
- *What questions and responses are related to a particular survey?*
- *What risk analyses have been completed for a risk record?*
- *What risk evaluations have been completed for a risk record?*
- *What survey questions and responses are related to assessments?*
- *What survey questions and responses are related to objects?*
- *What treatment plans are associated to the risk record?*
- *When were assessments completed and closed?*
- *Which assessments are overdue?*
- *Which groups are authorized as an issue validator/owner for the assessment result record?*
- *Which groups are authorized to access, view, review, and approve assessment results?*
- *Which groups are authorized to review and approve a record (such as process or risk), and are they eligible?*
- *Which groups of owners, editors, and viewers are assigned to a record (such as control or issue), and are they eligible?*
- *Which groups of owners, editors, and viewers are assigned to an assessment batch?*
- *Who are the owners, editors, and viewers assigned to an assessment batch?*
- *Who are the owners, editors, and viewers assigned to records (such as process and control), and are they eligible?*
- *Who is authorized to access, view, review, and approve assessment results?*
- *Who is authorized to review and approve a record (such as process or risk), and are they eligible?*
- *Who is the issue validator/owner for the assessment result record?*

## Job Roles

The following job roles secure access to this subject area:

- *External Auditor*
- *Risk Activities Manager*
- *Risk Administrator*

## Duty Roles

The following duty roles secure access to this subject area:

- *Financial Reporting Compliance Transaction Analysis Duty*

## Primary Navigation

1) Financial Reporting Compliance > Assessments; 2) Risk Management Tools > Surveys

## Time Reporting

This subject area supports risk management assessment results history.

Time dimension is linked to Creation Date of Control, Risk, or Survey, depending on the chosen dimension.

## Transactional Grain

Not available

## Special Considerations

A synchronization program needs to be run to gather perspective and security assignment.

# Risk Management Cloud - Compliance Real Time

## Description

This subject area provides information about processes, risks, controls, issues, remediation plans, and assessments defined in Financial Reporting Compliance.

## Business Questions

This subject area can answer the following business questions:

- *What Financial Reporting Compliance records have been defined?*
- *What are the defined active key controls?*
- *What are the severity and status of issues?*
- *What assessments have been defined?*
- *What consequences are associated to the event?*

- *Who are the owners, editors, and viewers assigned to records (such as process and control), and are they eligible?*
- *Who is authorized to review and approve a record (such as process or risk), and are they eligible?*

## Job Roles

The following job roles secure access to this subject area:

- *External Auditor*
- *Risk Activities Manager*
- *Risk Administrator*

## Duty Roles

The following duty roles secure access to this subject area:

- *Financial Reporting Compliance Transaction Analysis Duty*

## Primary Navigation

1) Financial Reporting Compliance > Processes; 2) Financial Reporting Compliance > Risks; 3) Financial Reporting Compliance > Controls; 4) Financial Reporting Compliance > Issues; 5) Financial Reporting Compliance > Assessments

## Time Reporting

This subject area supports financial reporting compliance history.

Time dimension is linked to Creation Date of Control, Risk, Remediation Task, or Remediation Plan, depending on the chosen dimension.

## Transactional Grain

Not available

## Special Considerations

A synchronization program needs to be run to gather perspective and security assignment.

# 3 Business Questions

## Overview

For each business question in this chapter, links are provided for more detailed information about the subject areas, job roles, and duty roles associated with the business question.

Can I view and edit a particular page? If yes, which functional security policy do I need to provide to a user who needs similar access?

Can I view and edit the manage employment screen, if yes, which functional security policy do I need to provide to the user?

Did the approver accept the assessment result, reject it, or return it for information?

## Subject Areas

The following subject areas contain the folders and attributes needed to answer this business question:

- *Risk Management Cloud - Assessment Results Real Time*

## Job Roles

The following job roles secure access to the data related to this business question:

- *External Auditor*
- *Risk Activities Manager*
- *Risk Administrator*

## Duty Roles

The following duty roles secure access to the data related to this business question:

- *Financial Reporting Compliance Transaction Analysis Duty*

For a specific transaction control, what is the total transaction amount?

## Subject Areas
