Get Help

There are a number of ways to learn more about your product and interact with Oracle and other users.

Get Help in the Applications

Some application pages have help icons ⊚ to give you access to contextual help. If you don't see any help icons on your page, click your user image or name in the global header and select Show Help Icons. If the page has contextual help, help icons will appear.

Get Support

You can get support at *My Oracle Support*. For accessible support, visit *Oracle Accessibility Learning and Support*.

Get Training

Increase your knowledge of Oracle Cloud by taking courses at *Oracle University*.

Join Our Community

Use *Cloud Customer Connect* to get information from industry experts at Oracle and in the partner community. You can join forums to connect with other customers, post questions, suggest *ideas* for product enhancements, and watch events.

Learn About Accessibility

For information about Oracle's commitment to accessibility, visit the *Oracle Accessibility Program*. Videos included in this guide are provided as a media alternative for text-based topics also available in this guide.

Share Your Feedback

We welcome your feedback about Oracle Applications user assistance. If you need clarification, find an error, or just want to tell us what you found helpful, we'd like to hear from you.

1 Introduction

About This Guide

This guide contains information about Transactional Business Intelligence subject areas, their associated job and duty roles, and the business questions that they provide answers to. For your reference:

- Subject areas are the building blocks of your analytics and reports based upon them. Analytics are built by choosing an appropriate subject area that has information that answers the business question you're analyzing. Technically, subject areas are a grouping of information pieces called data objects that relate to each other in a particular context.

- Job roles inherit duty roles. To control access to the subject areas, copy the predefined job roles associated with the subject area to create custom roles, and assign them to users.

    For more information about custom roles and their use with predefined roles, see *Guidance for Assigning Predefined Roles* in the Oracle Fusion Cloud Applications Securing Applications guide.

ORACLE

2 Subject Areas

Overview

This chapter provides information on the subject areas with data you maintain in Oracle Student Management Cloud. These subject areas, with their corresponding data, are available for you to use when creating and editing analyses and reports. The information for each subject area includes:

- Description of the subject area.
- Business questions that can be answered by data in the subject area, with a link to more detailed information about each business question.
- Job roles and duty roles that can be used to secure access to the subject area, with a link to more detailed information about each job role and duty role.
- Primary navigation to the work area that is represented by the subject area.
- Time reporting considerations in using the subject area, such as whether the subject area reports historical data or only the current data. Historical reporting refers to reporting on historical transactional data in a subject area. With a few exceptions, all dimensional data are current as of the primary transaction dates or system date.
- The lowest grain of transactional data in a subject area. The lowest transactional data grain determines how data are joined in a report.
- Special considerations, tips, and things to look out for in using the subject area to create analyses and reports.

Higher Education - Admissions Applications Real Time

Description

Real time information on admission applicants, including application details, academic history, extracurricular activities and recommendations.

Business Questions

This subject area can answer the following business questions:

- *How many applicants are in each program and academic group?*
- *How many applicants have submitted an application?*
- *How many applications do we have?*
- *What are the extracurricular types?*
- *What are the feeding schools?*
- *What is our applicant diversity?*

ORACLE

- *What is the distribution of applicants per campus?*
- *What is the status for each application?*
- *Which forms are used most frequently?*
- *Which types of extracurricular activities are most common?*
- *Who are the applicants and their contacts?*
- *Who are the recommenders for each applicant?*

Job Roles

The following job roles secure access to this subject area:

- *Admissions Coordinator*
- *Admissions Manager*

Duty Roles

Higher Education - Checklist Assignments Real Time

Description

ORACLE

Analyze checklists, which are collections of tasks assigned to a person. Track the people assigned to checklists, the tasks included in checklists, and the status of tasks within checklists for a person.

Business Questions

This subject area can answer the following business questions:

- *How many checklist assignments do we have for an institution?*
- *What is the address of checklist assignees?*
- *What is the status of the checklist assignments?*
- *When are the assigned checklists due?*
- *When were the assigned checklists completed?*
- *Who has checklist assignments?*

Job Roles

The following job roles secure access to this subject area:

- *Academic Coordinator*
- *Admissions Coordinator*
- *Admissions Manager*
- *Bursar*
- *Registrar*
- *Student Adviser*
- *Student Services Manager*

Higher Education - Enrollment Real Time

Description

Real time information on course enrollments.

Business Questions

This subject area can answer the following business questions:

- *How many enrollments do we have with any combination of academic period, institution, campus, reporting period, and academic organization?*

- *What are the courses being offered?*

- *What is the trend of enrollment by academic period and/or reporting period?*

- *Which campuses have higher enrollment?*

- *Which sections have seat capacity field above or below a certain percentage?*

Job Roles

The following job roles secure access to this subject area:

Higher Education - Task Assignments Real Time

Description

ORACLE

Track action items assigned to a person, along with specified due dates. Analyze task data, such as people assigned to tasks and the status of those tasks, business objects associated with them, tasks that are nearing or past the due date, and how frequently specific tasks are being used.

Business Questions

This subject area can answer the following business questions:

- *How many task assignments do we have for an institution?*
- *What is the address of task assignees?*
- *What is the status of the task assignments?*
- *When are the assigned tasks due?*
- *When were assigned tasks completed?*

OTBI Performance Real Time

Description

Analyze OTBI analysis and dashboard usage and performance, including logical and physical database SQL, execution time, and errors. View the last six months of OTBI usage and performance trends, commonly used subject areas, and report errors. This subject area provides data to monitor and diagnose OTBI reporting performance. Historical data older than six months is purged each week.

Business Questions

This subject area can answer the following business questions:

- *How many analyses and dashboards failed in the past month?*
- *What are the common execution errors in the past month?*
- *What are the least-used OTBI subject areas?*
- *What are the long-running analyses in the past month?*
- *What are the most commonly used OTBI subject areas?*
- *What is the OTBI execution time histogram in the past month?*
- *What is the database SQL execution time and row count?*
- *Which analyses have high data row count?*
- *Which analyses have low usage because of poor performance?*
- *Which analyses have the longest response time?*
- *Which analyses reached OTBI max row limit?*
- *Which subject areas have large data volume?*
- *Which subject areas have slow performance?*

Job Roles

The following job roles secure access to this subject area:

- *Application Implementation Consultant*

> • *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

> • *OTBI Report Performance Transactional Analysis Duty*

Primary Navigation

Not applicable.

Time Reporting

This subject area supports six months of usage historical data.

Time dimension is linked to "OTBI Performance Real Time"."Time"."Report Start Date".

Transactional Grain

This subject area returns data at the grain of a query execution and database physical SQL.

Special Considerations

This subject area contains six months of query execution data. Each OTBI query execution can generate multiple database SQL statements. Usage data volume grows over time, so use proper filters to narrow reporting data load. Because this subject area has no data security, you're advised to secure user access to it.

OTBI Usage Real Time

Description

Analyze six months of subject area and analysis usage trends and patterns with a simpler and lighter-weight selection of OTBI usage metrics, including for example user, report and subject area usage patterns. Historical data older than six months is purged each week.

Business Questions

This subject area can answer the following business questions:

> • *How many OTBI SOAP web services have been run in the past month?*
> • *How many ad-hoc OTBI analyses have been run in the past month?*
> • *How many custom OTBI analyses have been run in the past month?*

ORACLE

- *How many predefined OTBI analyses have been run in the past month?*

- *How many users run OTBI analyses?*

- *What are the top N most frequently-run OTBI analyses?*

- *What is the execution history of dashboard X in the past month?*

- *What is the weekly OTBI analysis usage trend?*

- *Which analyses have low usage in the past month?*

- *Who are the top N OTBI users?*

Job Roles

The following job roles secure access to this subject area:

- *Application Implementation Consultant*
- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *OTBI Report Usage Transactional Analysis Duty*

Primary Navigation

Not applicable.

Time Reporting

This subject area supports six months of usage historical data.

Time dimension is linked to "OTBI Performance Real Time"."Time"."Report Start Date".

Transactional Grain

This subject area returns data at the grain of a query execution.

Special Considerations

This subject area contains six months of usage history. It doesn't contain database SQL execution details so it has less data volume.

Security - Audit Real Time

Description

Provides real-time information on audit details related to security. For example, when a custom role was created, when roles were assigned to specific users, or when roles were given specific function or data privileges.

Business Questions

This subject area can answer the following business questions:

- *List all the Data Security Privileges that were added by a specific user*
- *What are all the data security privileges that a specific user added?*
- *What is the current predicate vs prior predicate values of the data security policy?*
- *What is the total number of updates that have happened on a data security policy?*
- *What is total number of changes done on a functional security policy during the day?*
- *Which roles were added with a specific functional security policy and who added it?*
- *Which roles were added with a specific functional security policy, and who added them?*
- *Which user has added/removed the specific functional security policy?*

Job Roles

The following job roles secure access to this subject area:

- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *Security Transaction Analysis Duty*

Primary Navigation

Tools > Security Console

Time Reporting

This subject area doesn't support historical data.

This subject area has no anchoring date.

ORACLE

Transactional Grain

Not applicable.

Special Considerations

This subject area can't be used to create a cross-subject area analysis. Don't mix data from different folders within this subject area either. For example, keep data from the Data Security Policy Audit folder separate from the Instance Set Audit folder. If you need to combine data from different folders, use a union operation or create a report instead of an analysis.

Security – Roles and Privileges Real Time

Description

Provides real-time information about the security setup in the application. This subject area is independent of the pillar and can be used to report on roles and details across pillars like HCM, ERP, SCM and so on.

Use this subject area to report on role categories, roles, functional security policies, data security policies, and the users assigned to the roles.

You can report on the correlation between the objects like the roles that are directly assigned to another role, the roles that are inherited by the virtue of the directly assigned roles, or the functional and data security policies that are directly assigned to the roles.

For a given user, all the roles that have been assigned can also be reported.

Business Questions

This subject area can answer the following business questions:

- *Can I view and edit a particular page? If yes, which functional security policy do I need to provide to a user who needs similar access?*
- *Can I view and edit the manage employment screen, if yes, which functional security policy do I need to provide to the user?*
- *I have not added the Compensation analyst role to user, however the user seem to have this job role, can I trace how has this been inherited by the user?*
- *I haven't added a specific role to a user, but the user seem to have this job role. Can I trace how has this been inherited by the user?*
- *Which data security policy would provide access to the data I need to see?*
- *Which data security policy would provide access to the talent profile data ?*
- *Why am I not able to view certain subject areas with my login credentials?*
- *Why am I not able to view succession management subject areas with my login?*

Job Roles

The following job roles secure access to this subject area:

- *IT Security Manager*

Duty Roles

The following duty roles secure access to this subject area:

- *Security Transaction Analysis Duty*

Primary Navigation

Tools > Security Console

Time Reporting

This subject area doesn't support historical data.

This subject area has no anchoring date.

Transactional Grain

Not applicable.

Special Considerations

This subject area is used to report on users, functional security policies, and data security policies all in the correlation of roles. For a role, you can report on functional security policies, or data security policies, or users. If you try to combine all the security objects in a single report, it displays an error message.

This subject area can't be used to create a cross-subject area report.
