# 2 Introduction

## Overview of Security Reference

If you are an IT Security Manager, this guide is for you. Use the reference information for implementing security for an offering in Oracle Applications Cloud. Depending on the needs of your enterprise, determine what works best for your offering, and make the required configuration changes.

Broadly, the reference information includes these details:

- Abstract and job roles for an offering
- Duty roles and the role hierarchy for each job role and abstract role
- Privileges that are required to perform duties defined by a duty role
- Data security policies for each job role or abstract role
- Policies that protect personally identifiable information

To know more about the roles, privileges, and policies and to learn how to implement and administer security for your offering, refer to your product security guide.

## How to Use This Guide

You can review the information in this guide to decide how to assign roles and privileges to specific users. For each role, you will find these details:

- The role hierarchy that lists the other inherited roles
- A list of duties assigned to that role
- Privileges granted to that role
- Data security policies and their implementation scope

**Note:** The changes you make to the security reference implementation are preserved during upgrades or maintenance patches.

## Supply Chain Planning Offering

This guide describes the security reference implementation for the roles applicable to the Supply Chain Planning offering.

For the common roles applicable to the all offerings, see the *Oracle Applications Cloud Security Reference for Common Features*.

## Advisory Note on Subscription Impact

Assigning predefined roles and privileges as is to users may impact subscription usage, even if you haven't purchased the subscription. Privileges that are assigned but remain unused can still account for subscription consumption.

Before you assign predefined roles with privileges, evaluate the business needs of your users. Do your users need the entire role and all its privileges in full scope? Or, do they need the role but only a few of its privileges? Evaluating what your users need will help you avoid potential security risks and also keep a check on the subscription consumption.

If you want users to have the predefined role in full scope and have purchased all the impacted cloud services, you can assign the role with privileges as is. For example, only while setting up an application, you may need to assign the predefined Application Implementation Consultant role as is. Once the setup is complete, you can unassign it. Otherwise, Oracle recommends that you make a copy of that predefined role, remove the privileges you don't need, and assign only the required privileges. For a list of all predefined roles with privileges that impact subscription usage, see the spreadsheet [Predefined Roles with Subscription Impact](#). To give you an example, here's an indicative list of the top three roles that impact subscription usage:

- Employee (ORA\_PER\_EMPLOYEE\_ABSTRACT)
- Application Implementation Consultant (ORA\_ASM\_APPLICATION\_IMPLEMENTATION\_CONSULTANT\_JOB)
- Contingent Worker (ORA\_PER\_CONTINGENT\_WORKER\_ABSTRACT)

## Order Promising Manager (Job Role)

Manages commitment of fulfillment dates, allocating scarce supply among competing demands and trading-off service levels with fulfillment costs.

### Role Hierarchy

The Order Promising Manager job role directly and indirectly inherits these roles.

- Order Promising Manager
  - Item Inquiry
  - Order Promising Management
  - Plan Inputs Reference Data Management
  - Planning Administration
  - Planning Collected Data Management
    - Item Inquiry
  - Planning Item Management
  - Planning Resource Management

## Duties

This table lists the duties assigned directly and indirectly to the Order Promising Manager job role.

Duty Role	Description
Item Inquiry	Queries and views items in the enterprise.
Order Promising Management	Manages order promising activities, including the scheduling and rescheduling of order fulfillment lines, and reviews data related to promising fulfillment lines.
Plan Inputs Reference Data Management	Reviews all reference data entities like items, resources used as input to supply and demand plans
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.
Planning Collected Data Management	Manages data collection processes and verifies collected data.
Planning Item Management	Manages items used in demand and supply plans
Planning Resource Management	Manages manufacturing resources used in supply plans

## Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Order Promising Manager job role.

Business Object	Policy Description	Policy Store Implementation
Application Objects	An Order Promising Manager can manage application objects for all value chain planning application objects	Role: Planning Administration Privilege: Manage Application Objects (Data) Resource: Application Objects

## Production Scheduler (Job Role)

Individual responsible for creating and maintaining the enterprise production schedule. The Production Scheduler requires a deep understanding of the products, the manufacturing processes, and the resource capabilities and constraints. Developing efficient production schedules means balancing conflicting objectives such as carrying

inventory, changeover minimization, and long production runs. Production scheduling also considers on time metrics and avoids schedule unease caused by frequent schedule changes.

## Role Hierarchy

The Production Scheduler job role directly and indirectly inherits these roles.

- Production Scheduler
  - Production Schedule Management
  - Production Scheduling Administration
  - Production Scheduling Data Management

## Duties

This table lists the duties assigned directly and indirectly to the Production Scheduler job role.

Duty Role	Description
Production Schedule Management	Manages, analyzes, runs and releases production schedules
Production Scheduling Administration	Administers and configures production scheduling process
Production Scheduling Data Management	Administers the data required to run production schedules

## Privileges
