Get Help

In addition to the resources available in Oracle Help Center, you can explore training, connect with the Oracle community, and share your feedback.

Get Training

Increase your knowledge of Oracle Cloud by taking courses at *Oracle University*.

Join Our Community

Use *Cloud Customer Connect* to get information from industry experts at Oracle and in the partner community. You can join forums to connect with other customers, post questions, suggest *ideas* for product enhancements, and watch events.

Share Your Feedback

We welcome your feedback about Oracle Applications user assistance. If you need clarification, find an error, or just want to tell us what you found helpful, we'd like to hear from you.

You can email your feedback to *oracle_fusion_applications_help_ww_grp@oracle.com*.

Thanks for helping us improve our user assistance!

2 Introduction

Overview of Security Reference

If you are an IT Security Manager, this guide is for you. Use the reference information for implementing security for an offering in Oracle Applications Cloud. Depending on the needs of your enterprise, determine what works best for your offering, and make the required configuration changes.

Broadly, the reference information includes these details:

- Abstract and job roles for an offering
- Duty roles and the role hierarchy for each job role and abstract role
- Privileges that are required to perform duties defined by a duty role
- Data security policies for each job role or abstract role
- Policies that protect personally identifiable information

To know more about the roles, privileges, and polices and to learn how to implement and administer security for your offering, refer to your product security guide.

How to Use This Guide

You can review the information in this guide to decide how to assign roles and privileges to specific users. For each role, you will find these details:

- The role hierarchy that lists the other inherited roles
- A list of duties assigned to that role
- Privileges granted to that role
- Data security policies and their implementation scope

Note: The changes you make to the security reference implementation are preserved during upgrades or maintenance patches.

Product Management Offering

This guide describes the security reference implementation for the roles applicable to the Product Management offering.

For the common roles applicable to the all offerings, see the *Oracle Applications Cloud Security Reference for Common Features*.

Advisory Note on Subscription Impact

Assigning predefined roles and privileges as is to users may impact subscription usage, even if you haven't purchased the subscription. Privileges that are assigned but remain unused can still account for subscription consumption.

Before you assign predefined roles with privileges, evaluate the business needs of your users. Do your users need the entire role and all its privileges in full scope? Or, do they need the role but only a few of its privileges? Evaluating what your users need will help you avoid potential security risks and also keep a check on the subscription consumption.

If you want users to have the predefined role in full scope and have purchased all the impacted cloud services, you can assign the role with privileges as is. For example, only while setting up an application, you may need to assign the predefined Application Implementation Consultant role as is. Once the setup is complete, you can unassign it. Otherwise, Oracle recommends that you make a copy of that predefined role, remove the privileges you don't need, and assign only the required privileges. For a list of all predefined roles with privileges that impact subscription usage, see the spreadsheet *Predefined Roles with Subscription Impact*. To give you an example, here's an indicative list of the top three roles that impact subscription usage:

- Employee (ORA_PER_EMPLOYEE_ABSTRACT)
- Application Implementation Consultant (ORA_ASM_APPLICATION_IMPLEMENTATION_CONSULTANT_JOB)
- Contingent Worker (ORA_PER_CONTINGENT_WORKER_ABSTRACT)

For insights into how Oracle measures and counts Oracle Fusion licenses, see *Metrics Description for Fusion Offerings*

Infolet Access Privileges

You need particular privileges to access infolets on the PDH overview screen.

Privileges for Infolet Access

Infolet	Privilege	Privilege Technical Name
Supplier Products	Review Supplier Upload Manage Item Batch	EGI_REVIEW_SUPPLIER_UPLOAD_PRIV EGI_MANAGE_ITEM_BATCH_PRIV
Publication Status	View Item	EGP_VIEW_ITEM_PRIV
Item Completeness	View Item	EGP_VIEW_ITEM_PRIV
Import Batches	Manage Item Batch	EGI_MANAGE_ITEM_BATCH_PRIV
Item Category Assignments	Manage Item Catalogs	EGP_MANAGE_ITEM_CATALOGS_PRIV

Infolet	Privilege	Privilege Technical Name
Rule Impact Analysis	Manage Item Rule Set	EGO_MANAGE_ITEM_RULE_SET_PRIV
Items for Defination	View New Item Request	EGO_VIEW_NEW_ITEM_REQUEST_PRIV
Items Pending Approval	View New Item Request	EGO_VIEW_NEW_ITEM_REQUEST_PRIV
Commercialization Change Orders	View Item Change Order	EGO_VIEW_ITEM_CHANGE_ORDER_PRIV
New Item Requests	View New Item Request	EGO_VIEW_NEW_ITEM_REQUEST_PRIV

3 What's New

Overview

This release of the offering includes new job roles, abstract roles, duties, aggregate privileges, or privileges.

New Duties

This table lists the new duties for the Product Management offering.

Duty Role	Description
ACL Administrator Common	All users to create and manage common functions for ACL.
Catalog ACL Administrator	Allow users to manage catalog ACL.
Generate Estimate Email Workflow	Allows invoking of the generate estimate email workflow.
Item ACL Administrator	Allow users to manage Item ACL.
Manager Coaching Workspace Access	Grants access to the Manager Coaching Workspace
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.
Sales Catalog Administrator ACL	Allow Sales users to manage catalog ACL.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.
Sales Item Inquiry	Allows Sales users to access items and catalogs.
Sales Item Management	Allows Sales user to create and manage items and catalogs.
Sales Item Setup	Allow Sales users to manage setups for items and catalogs.
Talent Summary Generator Access	Generates the talent summary of a person

New Aggregate Privileges

This table lists the new aggregate privileges for the Product Management offering.

Aggregate Privilege	Description
Manage Time Entries by Line Manager	Allows line managers to create, edit, and delete time entries for the workers who report to them.
Manage Work Patterns by Line Manager	Allows line managers to create, edit and delete work patterns for a worker.
View Work Patterns by Line Manager	Allows line managers to view work patterns for a worker.

New Privileges

This table lists the new privileges for the Product Management offering.

Granted Role	Privilege	Description
Channel Operations	Create Accruals for Program Adjustments	Allows submission of the process to evaluate transactions and create accruals based on revised program rules in active channel programs.
Field Service Administrator	Access Quality Inspection Plans	Allows the user to access Quality inspection plans in the Work Order Charges page.
Grow Coach Access	Access Grow Coach Workspace	Allows the user to access grow coach workspace agentic app.
Inventory Administration	Configure Inventory Striping Attributes	Allows configuration or inventory striping attributes such as lot grade and lot expiration date and assignment of applicability levels and values.
Inventory Administration	Configure Lot Selector Views	Privilege to configure the Lot Selector views for Inventory Management and other products that utilize the Lot Selector for inventory transactions involving lot-controlled items.
Inventory Administration	Item Expiration Date Change	Privilege that allows the update of item expiration date.

Granted Role	Privilege	Description
Inventory Administration	Item Grade Change	Privilege that allows the update of item grade.
Line Manager	Calibrate Performance Documents using Talent Review	Allow calibration of performance documents ratings using talent review.
Manager Coaching Workspace Access	Access Manager Coaching Workspace	Allows users to access the Manager Coaching Workspace
Order Orchestration Administration	Manage Order Management Rule Attribute Setup	Allows users to indicate which attributes can be used in Order Management Rules.
Order Orchestration Administration	View AI agent audit information	Allows access to a tab where user can see the audit information for the actions performed by AI agent.
Planning Administration	Edit Forecasting Profile in Simulate Demand	Allows edit of forecasting profile in demand simulation
Pricing Setup Management	Get Pricing List of Values Data	Allows retrieval of pricing related data held in lists of values.
Redwood Trading Partner Item	Manage Trading Partner Item Extensible Flexfields	Allows access to view and manage the Redwood Trading Partner Item extensible flexfields.
Redwood Trading Partner Item	View Trading Partner Item Extensible Flexfields	Allows access to view the Redwood Trading Partner Item extensible flexfields.
Sales ACL Administrator Common	Configure Access Control Lists for Sellable Items and Bundles	Allows creation of access control lists for sellable items and bundles to enable criteria-based access control.
Supply Chain Application Administrator	Synchronize Subscription Products and Installed Base Assets	Synchronizes subscription product changes to their corresponding installed asset records.
Talent Summary Generator Access	Generate Talent Summary	Allows generation of talent summary
Web Services Application Identity for SCM	Configure Inventory Striping Attributes	Allows configuration or inventory striping attributes such as lot grade and lot expiration date and assignment of applicability levels and values.

4 Roles

Contingent Worker (Abstract Role)

Identifies the person as a contingent worker.

Role Hierarchy

The Contingent Worker abstract role directly and indirectly inherits these roles.

- Contingent Worker
  - Access Family and Emergency Contacts by Worker
  - Access Journey by Worker
    - Use REST Service - HR Document Types List of Values
    - Use REST Service - Journey Task Library Read Only
    - Use REST Service - Public Workers Read Only
    - Use REST Service - Worker Journeys
    - Use REST Service - Workers List of Values
  - Access Learning Common Components
  - Access Person Contact Information by Worker
  - Access Person Extra Information by Worker
  - Access Person Gallery
  - Access Person Identification Information by Worker
  - Access Personal Details by Worker
  - Access Portrait Payslip
  - Access Portrait Personal Payment Method
  - Access Skills Center
    - Assign Public Skill as Worker
    - Use REST Service - Talent Person Profiles
    - Use REST Service - Talent Person Public Skill Activities Read Only
    - Use REST Service - Talent Person Public Skills Read Only
  - Access Touchpoints by Worker
    - Manage HCM Person Note
    - Request Feedback
    - Use REST Service - Development Goals Read Only
    - Use REST Service - Feedback Requests by Worker or Manager
    - Use REST Service - Performance Goals Read Only

        - Use REST Service - Talent Worker Check-Ins
        - Use REST Service - Talent Worker Engagements by Worker Read Only
        - Use REST Service - Worker Journeys
    - Attachments User
        - CRM Stage Write
    - Business Intelligence Consumer
    - Career Growth Access by Worker
        - Use REST Service - Journeys Read Only
        - Use REST Service - Learning Record Searches by Learner
        - Use REST Service - Worker Journeys
        - View Role Guide
        - View Role Guide Assignment
    - Change Person Address
    - Change Person Marital Status
    - Compare HCM Information
    - Content Intelligence Users
    - Delete Time Cards by Worker
    - Edit Person Career Planning
    - Edit Person Skills and Qualifications
    - Employee Enrollment
        - Manage Benefit Participant Enrollment Result by Worker
        - Manage Benefits Questionnaire Responses by Worker
        - Self Report a Life Event
        - Use REST Service - Person Benefit Balances
        - Use REST Service - Person Benefit Groups
        - View Benefit Participant Enrollment Result by Worker
        - View Benefits Questionnaire Responses by Worker
    - Employee Goals Assistant Access
    - Expense Entry
        - Business Intelligence Consumer
        - Employee Bank Account Management
        - Financials Intelligent Agent Runtime
        - Transaction Entry with Budgetary Control
            - Business Intelligence Consumer
    - Generate Time Entries by Worker
    - Grow Coach Access
    - HCM Connections REST Services
        - Use REST Service - Person Notes
        - Use REST Service - Public Workers Read Only
        - Use REST Service - Talent Person Profiles
        - Use REST Service - Talent Person Profiles Read Only
        - Use REST Service - Worker Connections Read Only

- Maintain Absence Records
- Manage Availability Patterns
- Manage Cash Disbursements
- Manage Contextual Journey by Worker
  - Use REST Service - HR Document Types List of Values
  - Use REST Service - Journeys Read Only
  - Use REST Service - Public Workers Read Only
  - Use REST Service - Worker Journeys
  - Use REST Service - Workers List of Values
- Manage Development Goal by Worker
- Manage Donations
- Manage Employee Communities
- Manage My Account
  - Manage Approval Delegations
  - Manage Role Delegations
- Manage My Voluntary Learning
- Manage Onboarding by Worker
- Manage Performance Goal by Worker
- Manage Person Biographical Information
- Manage Person Citizenship
- Manage Person Contact Details
- Manage Person Disability by Worker
- Manage Person Documentation by Worker
- Manage Person Driver License
- Manage Person Ethnicity
- Manage Person Extra Information by Worker
- Manage Person Image
- Manage Person Legislative
- Manage Person Name
- Manage Person National Identifier
- Manage Person Passport
- Manage Person Religion
- Manage Person Visa or Permit
- Manage Personal Compensation
- Manage Scheduling Availability Preferences by Worker
- Manage Worker Information Sharing
- Performance Management Worker
  - Create Anytime Performance Document
  - Manage Check-In Document

- Request Feedback
- View Performance Summary
- View Requested Feedback

- Person Communication Methods Management
- Person Communication Methods View
- Portrait Benefits
- Portrait Current and Completed Tasks
- Print Worker Portrait
- Procurement Requester
  - Intake Request Management as Requester
    - Intake Request Review Management
      - Use REST Service - Assigned Journeys
      - Use REST Service - Journeys
      - Use REST Service - Workers List of Values
    - Intake Request Review Task Management By Worker
      - Use REST Service - Workers List of Values
  - Payables Invoice Inquiry
    - Financials Intelligent Agent Runtime
  - Procurement Folder Reporting
  - Purchasing List of Values Requester Change Order
  - Receiving Management Requester
    - Item Inquiry
      - Product Lifecycle Management Folder Access
      - Product Search
        - Supply Chain Common View Web Service
      - View Item Redwood
        - Product Lifecycle Management Folder Access
        - Supply Chain Common View Web Service
  - Receiving Self Service Responsive Application User
    - Use REST Service - Guided Journey Responses
    - Use REST Service - Guided Journeys Read Only
  - Requisition Self Service User
    - Use REST Service - Locations List of Values
    - Use REST Service - Locations Read Only
  - Requisition Viewing
    - Payables Invoice Inquiry
      - Financials Intelligent Agent Runtime
  - Transaction Entry with Budgetary Control
    - Business Intelligence Consumer
  - Use REST Service - Guided Journey Responses
  - Use REST Service - Guided Journeys Read Only
- Project Time Entry Mobile
  - Use REST Service - Time Record Events

        - Use REST Service - Time Record Groups Read Only
        - Use REST Service - Time Records Read Only
    - Request Assignment Change By Worker
    - Request Time Change
    - Share Personal Data Access
    - Share Personal Information
    - Social Connection Worker
    - Submit Absence Bid
    - Submit Resignation
    - Submit Time Cards by Worker
    - Time and Labor Worker
        - Use REST Service - Time Card Entry Details Read Only
        - Use REST Service - Time Cards by Worker
        - Worker Time Card Entry
    - Use REST Service - Absence Business Titles List of Values
    - Use REST Service - Absence Types List of Values
    - Use REST Service - Areas of Responsibility Mapping Read Only
    - Use REST Service - Departments List of Values
    - Use REST Service - Eligible Contacts List of Values
    - Use REST Service - Grades List of Values
    - Use REST Service - Guided Journey Responses
    - Use REST Service - Guided Journeys Read Only
    - Use REST Service - HCM Countries List of Values
    - Use REST Service - HR Document Types List of Values
    - Use REST Service - Jobs List of Values
    - Use REST Service - Locations List of Values
    - Use REST Service - Nudge Cards
    - Use REST Service - Performance Goals List of Values

Duties

This table lists the duties assigned directly and indirectly to the Contingent Worker abstract role.

Duty Role	Description
Access Journey by Worker	Allows workers to access their own journeys.
Access Learning Common Components	Allows the user to access common learning components.
Access Skills Center	Allows the user to access skills center.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.
Attachments User	UCM application role for access to attachments using the integrated user interface or the standalone product.
Business Intelligence Authoring	An author of Business Intelligence reports as presented in the web catalog. The role allows authoring within Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office.
Business Intelligence Consumer	A role required to allow reporting from Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office. This role allow you to run reports from the web catalog but it will not allow a report to be authored from a subject area.
CRM Stage Write	Allows uploading CRM content to stage area on content server
Career Growth Access by Worker	Allows workers to access the Grow page.
Content Intelligence Users	Provides ability to view content that is generally available to anybody that is logged in.
Employee Bank Account Management	Manages employee bank accounts and other payment details.
Employee Enrollment	Manages employee enrollments.
Employee Goals Assistant Access	Grants access to employee goals assistant.
Expense Entry	Creates and updates expense items and expense reports.
Financials Intelligent Agent Runtime	Allows end users to access intelligent agents within the Financials product family.
Grow Coach Access	Grants access to the Grow Coach.

Duty Role	Description
HCM Connections REST Services	Grants access to REST services used by HCM connections UI
Intake Request Management as Requester	Allows requester to access intake requests.
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).
Intake Request Review Task Management By Worker	Allows user to access intake request review tasks (intake request review assigned journey tasks).
Item Inquiry	Queries and views items in the enterprise.
Manage Contextual Journey by Worker	Allows workers to access and manage their own contextual journeys.
Manage My Account	Manages worker roles.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.
Performance Management Worker	Adds content to rate to performance document and evaluates self.
Person Communication Methods Management	Grants access to the employee, contingent worker and Human Resource Specialist to manage the phones, emails and other communication methods in the portrait.
Person Communication Methods View	Grants access to the employee, contingent worker and Human Resource Specialist to view the phones, emails and other communication methods in the portrait.
Portrait Current and Completed Tasks	Grants access to the current and completed tasks card in the portrait, which includes HCM worklist tasks and user provisioning requests.
Procurement Folder Reporting	Grants access to the Procurement web catalog folder.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Search	Manages product searches.
Project Time Entry Mobile	Allows the user to report time and manage time cards on mobile device.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.

Duty Role	Description
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.
Requisition Viewing	View requisition and associated documents.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Time and Labor Worker	Reports time as a worker.
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.
Use REST Service - Eligible Contacts List of Values	Allows the user to call the GET method associated with the Eligible Contacts list of values REST Service.
Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service. Use this duty role when granting manage access to person documentation data.
Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
View Item Redwood	Allows users to view item details.
View Secured Help Content	Views help content that was added or edited, containing the security lookup value Secured.
Worker Concierge Agent	Grants access to the Worker Concierge agents
Worker Time Card Entry	Reports time by time card, as a worker.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Contingent Worker abstract role.

Aggregate Privilege	Description
Access Family and Emergency Contacts by Worker	Grants access to persons to view their own contacts.
Access Person Contact Information by Worker	Allows access to Person contact information such as phones, emails, other communication accounts, and addresses.
Access Person Extra Information by Worker	Allows access to a person's extensible flexfields.
Access Person Gallery	Searches worker deferred data and views the portrait page.
Access Person Identification Information by Worker	Allows access to Person documents such as citizenship, passport, visa and permits, and driver licenses.
Access Personal Details by Worker	Allows access to Person Information such as such as name, national identifier, biographical, demographic, and disability information.
Access Portrait Payslip	Grants access to a person's own payslip in the portrait.
Access Portrait Personal Payment Method	Grants access to a person's payment methods in the portrait.
Assign Public Skill as Worker	Allows a worker to assign public skills to themselves.
Change Person Address	Grants access to persons to manage their own address data.
Change Person Marital Status	Grants access to a person to manage their own marital status and related data.
Compare HCM Information	Compares workers, jobs, positions, and any combinations of these objects.
Create Anytime Performance Document	Allows creation of anytime performance documents
Delete Time Cards by Worker	Allows the worker to delete time cards. Applies only to the Redwood experience.
Edit Person Career Planning	Allows editing the Person Career Planning.
Edit Person Skills and Qualifications	Allows editing the Person Skills and Qualifications.
Enter Indian Investment Declaration	Allows India employees to enter the investment declaration details.
Enter Indian Previous Employment	Allows India employees to enter their previous employment details when joining in the middle of the financial year.
Enter Indian Social Insurance	Allows India employees to enter the social insurance details.

Aggregate Privilege	Description
Generate Time Entries by Worker	Lets the worker generate time entries from their scheduled hours. Applies only to the Redwood experience.
Maintain Absence Records	Allows workers to enter, update and delete their absence records.
Manage Approval Delegations	Allows management of user approval delegations.
Manage Availability Patterns	Allows users to create, delete, and update availability patterns.
Manage Benefit Participant Enrollment Result by Worker	Allows workers to access benefits pages where they can manage their own enrollment results.
Manage Benefits Questionnaire Responses by Worker	Allows workers to manage their benefit questionnaire responses.
Manage Cash Disbursements	Allows administrator to dispense part of an accrual plan balance for payment.
Manage Check-In Document	Allows to create, view, edit and delete check-in document for a worker.
Manage Development Goal by Worker	Manages worker's own development goals.
Manage Donations	Allows creation and viewing of absence donations.
Manage Employee Communities	Allows to manage employee communities for which the user is an owner or collaborator.
Manage HCM Person Note	Views and manages all types of HCM person notes
Manage Indian Employee Flexible Benefit Plan	Allows India employees to restructure their salary components to optimize their personal tax liability.
Manage My Voluntary Learning	Allows users join and manage their voluntary learning assignments.
Manage Onboarding by Worker	Allows worker to complete the onboarding tasks.
Manage Performance Goal by Worker	Manages worker's own performance goals.
Manage Person Biographical Information	Allows management of a person's biographical information.
Manage Person Citizenship	Grants access to persons to manage their own citizenship.
Manage Person Contact Details	Allows management of a person's contacts.
Manage Person Disability by Worker	Allows worker to manage their own disability information.

Aggregate Privilege	Description
Manage Person Documentation by Worker	Grants access to persons to manage their own document data.
Manage Person Driver License	Grants access to persons to manage their own driver licenses.
Manage Person Ethnicity	Grants access to persons to manage their own ethnicity.
Manage Person Extra Information by Worker	Allows access to a person's extensible flexfields.
Manage Person Image	Grants access to manage a person's own image.
Manage Person Legislative	Grants access to persons to manage their own legislative information.
Manage Person Name	Maintains persons' name related attributes.
Manage Person National Identifier	Grants access to persons to manage their own national identifier.
Manage Person Passport	Grants access to persons to manage their own passports.
Manage Person Religion	Grants access to persons to manage their own religion.
Manage Person Visa or Permit	Grants access to persons to manage their own visas and permits.
Manage Personal Compensation	Manages contributions made toward savings and contribution type plans.
Manage Role Delegations	Allows management of user roles delegations.
Manage Scheduling Availability Preferences by Worker	Allows workers to manage their scheduling availability preferences in their calendar.
Manage Worker Information Sharing	Allows sharing of person information with internal and external recipients. Used in the non-responsive UI.
Portrait Benefits	Views benefits data for a worker in the portrait.
Print Worker Portrait	Grants access to the portrait maintenance duties for the portrait cards.
Request Assignment Change By Worker	Allows workers to request change to their assignment.
Request Feedback	Allows to request feedback
Request Time Change	Allows the worker to create a time change request.

Aggregate Privilege	Description
Self Report a Life Event	Allows employees to report life events for themselves.
Share Personal Data Access	Allows sharing of access to personal data.
Share Personal Information	Allows sharing of personal information.
Submit Absence Bid	Allows workers to submit absence bids.
Submit Indian Tax Exemption for Allowances	Allows India employees to submit expense bills to claim tax exemptions for their allowances.
Submit Resignation	Allows worker to submit their own resignation.
Submit Time Cards by Worker	Allows the worker to submit time cards they're not allowed to edit. Applies only to the Redwood experience.
Use REST Service - Absence Business Titles List of Values	Allows users to call the GET method associated with the Absence Business Titles REST service.
Use REST Service - Absence Types List of Values	Allows users to call the GET method associated with the Absence Types REST service.
Use REST Service - Areas of Responsibility Mapping Read Only	Allows the user to call the GET method associated with the Areas of Responsibility Mapping Relationships REST Service.
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Departments List of Values	Allows the user to call the GET method associated with the Departments LOV REST Service.
Use REST Service - Development Goals Read Only	Allows users to call GET and describe methods with the Development Goals REST service.
Use REST Service - Feedback Requests by Worker or Manager	Allows the user to call the POST method associated with the Feedback Requests REST service.
Use REST Service - Grades List of Values	Allows the user to call the GET method associated with the grades list of values REST Service.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.

Aggregate Privilege	Description
Use REST Service - HCM Countries List of Values	Allows the user to call the GET method associated with the HCM Countries list of values REST Service.
Use REST Service - Jobs List of Values	Allows the user to call the GET method associated with the Jobs list of values REST Service.
Use REST Service - Journey Task Library Read Only	Allows the user to call the GET method associated with the Journey Task Library REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.
Use REST Service - Journeys Read Only	Allows the user to call the GET method associated with the Journeys REST Service.
Use REST Service - Learning Record Searches by Learner	Allows learner to search learning records as a learner.
Use REST Service - Locations List of Values	Allows the user to call the GET method associated with the Locations LOV REST Service.
Use REST Service - Locations Read Only	Allows the user to call the GET method associated with the Locations REST Service.
Use REST Service - Nudge Cards	Allows the user to call all methods associated with the Nudge Cards REST service.
Use REST Service - Performance Goals List of Values	Allows the user to call the GET method associated with the Performance Goals List of Values REST Service.
Use REST Service - Performance Goals Read Only	Allows the user to call the GET method associated with the Performance Goals REST service.
Use REST Service - Person Benefit Balances	Allows users to call all methods associated with the person benefit balances REST service.
Use REST Service - Person Benefit Groups	Allows users to call all methods associated with the person benefit groups REST service.
Use REST Service - Person Notes	Allows the user to call the GET, DESCRIBE, POST, PATCH and DELETE methods associated with the Person Notes REST service.
Use REST Service - Person Reference Data Lists of Values	Allows the user to call the GET method associated with the person reference data lists of values REST services.
Use REST Service - Public Workers Read Only	Allows the user to call the GET method associated with the Public Workers REST Service.
Use REST Service - Recruiting Hierarchy Lists of Values	Allows the user to call the GET method associated with the Recruiting hierarchy lists of values REST Services.

Aggregate Privilege	Description
Use REST Service - Representatives Read Only	Allows the user to call the GET method associated with the Representatives REST Service and grants access to the Representative Assistant workflow agent.
Use REST Service - Talent Person Profiles	Allows the user to call all methods associated with the Talent Person Profile REST Service. Areas of interest, areas of expertise, favorite links and tags can be managed using this aggregate privilege.
Use REST Service - Talent Person Profiles Read Only	Allows the user to call the GET method associated with the Talent Person Profile REST Service.
Use REST Service - Talent Person Public Skill Activities Read Only	Allows the user to call the GET method associated with the Public Skill Activities REST Service.
Use REST Service - Talent Person Public Skills Read Only	Allows the user to call the GET method associated with the Public Skills REST Service.
Use REST Service - Talent Worker Check-Ins	Allows users to call all methods with the Talent Worker Check-Ins REST service.
Use REST Service - Talent Worker Engagements by Worker Read Only	Allows the user to call the GET method associated with the Talent Worker Engagements REST Service as a worker.
Use REST Service - Time Card Entry Details Read Only	Lets the person call the Time Card Entry Details REST Service.
Use REST Service - Time Cards by Worker	Lets the worker call the Time Cards REST Service.
Use REST Service - Time Record Events	Allows users to call all methods on time record events associated with the time records REST service.
Use REST Service - Time Record Groups Read Only	Allows users to call the GET method on time record groups associated with the time records REST service.
Use REST Service - Time Records Read Only	Allows users to call the GET method on time records associated with the time records REST service.
Use REST Service - Transaction Management as Worker	Allows the user to call all methods associated with the Transaction Management as Worker REST Service.
Use REST Service - Worker Assignments List of Values	Allows the user to call the GET method associated with the Assignments list of values REST Service.
Use REST Service - Worker Connections Read Only	Allows the user to call the GET method associated with the Worker Connections REST Service.
Use REST Service - Worker Journeys	Allows the user to call all methods associated with the Worker Journeys REST Service.
Use User Details Service	Creates or updates users during person synchronizations.

Aggregate Privilege	Description
View Accrual Type Absence Plan Balance	Allows workers to view balances of the accrual type absence plans.
View Additional Assignment Info	Allows viewing of additional assignment info.
View Benefit Participant Enrollment Result by Worker	Allows workers to access benefits pages where they can view their own enrollment results.
View Benefits Questionnaire Responses by Worker	Allows workers to view their benefit questionnaire responses.
View Compensation Details for Worker	Views compensation data for a worker.
View Development Goal by Worker	View worker's own development goals.
View Eligible Jobs	Allows viewing of eligible jobs for relief in higher class.
View Employee Communities	Allows to view public employee communities and communities to which they have been invited.
View Employment Information Summary	Grants access to view a worker's employment information summary.
View Learning Communities	Allows users to view learning communities they are members of.
View My Recommended Learning	Allows users to view learning items recommended to them.
View My Required Learning	Allows users to view their required learning assignments.
View Performance Goal by Worker	View worker's own performance goals.
View Performance Summary	Allows viewing of workers performance summary information.
View Person Address	Grants access to persons to view their own address data.
View Person Biographical Information	Allows access to a person's biographical information.
View Person Citizenship	Grants access to persons to view their own citizenship.
View Person Disability by Worker	Allows access to a person's disability information.
View Person Driver License	Grants access to persons to view their own driver licenses.
View Person Ethnicity	Grants access to persons to view their own ethnicity.

Aggregate Privilege	Description
View Person Legislative	Grants access to persons to view their own legislative information.
View Person Name	Views persons' name related attributes.
View Person National Identifier	Grants access to persons to view national identifier.
View Person Passport	Grants access to persons to view their own passports.
View Person Religion	Grants access to persons to view their own religion.
View Person Visa or Permit	Grants access to persons to view their own visas and permits.
View Portrait Availability Card	Grants access to the availability card in the portrait, which includes schedule, absence, and accrual information.
View Portrait Contact Card	Grants access to view the contact card in the portrait, which includes phone number, e-mail, other communication methods, work location information, manager, directs and peers.
View Portrait Personal Information Card	Grants access to a person's own personal and employment information in the portrait.
View Portrait User Account Details Card	Views the User Account Details card in the Person Gallery.
View Requested Feedback	Allows workers and line managers to view requested feedback
View Role Guide	Allows the user to view role guides.
View Role Guide Assignment	Allows the user to view role guide assignments.
View Scheduling Availability Preferences by Worker	Allows workers to view their scheduling availability preferences in their calendar.
View Total Compensation Statements	Views generated total compensation statements for individuals within their security profile.
View US Tax Jurisdictions by Worker	Allows a US employee to view their tax jurisdictions.
View Worker Assignment History Details	Allows viewing of worker's assignment history details.
View Worker Calendar by Worker	Allows workers to view their calendar.
View Worker Contract	Allows viewing of worker's employment contract details and contract extensions.
View Workforce Schedule by Worker	Allows workers to view their own workforce schedules.

Aggregate Privilege	Description
Withdraw Resignation	Allows a worker to withdraw their own resignation

Privileges

This table lists privileges granted to duties of the Contingent Worker abstract role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Journey by Worker	Allows workers to access their own journeys.	Access Journey by Worker	Allows workers to access their own journeys.
Access Journey by Worker	Allows workers to access their own journeys.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Access Journey by Worker	Allows workers to access their own journeys.	Use REST Service - Worker Journey Tasks	Allows the user to call all methods associated with the Worker Journey Tasks REST Service.
Access Journey by Worker	Allows workers to access their own journeys.	Use REST Service - Worker Journey Tasks Read Only	Allows the user to call the GET method associated with the Workers Journey Tasks REST Service, to retrieve journey tasks assigned to them.
Access Learning Common Components	Allows the user to access common learning components.	Access Learning Common Components	Allows access to common components in learning self-service and administration work area.
Access Skills Center	Allows the user to access skills center.	Access Skills Center	Allows the user to access skills center.
Access Skills Center	Allows the user to access skills center.	Use REST Service - Talent Profile Types Read Only	Allows the user to call the GET method associated with the talentProfileTypes REST Service.
Access Skills Center	Allows the user to access skills center.	Use REST Service - Talent Skill Suggestions Read Only	Allows the user to call the GET method associated with the Talent Skill Suggestions REST Service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Access Touchpoints by Worker	Allows workers to access their own touchpoints.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Feedback Templates List of Values	Allows the user to call the GET method associated with the Feedback Templates List of Values REST service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Feedback Templates Read Only	Allows the user to call the GET method associated with the Feedback Templates REST service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - HCM Surveys List of Values	Allows the user to call the GET method associated with the HCM Surveys List of Values REST Service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Nudges	Allows the user to call all methods associated with the Nudges REST service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Talent Check-In Templates Read Only	Allows users to call GET and describe methods with the Talent Check-In Templates REST service.
Career Growth Access by Worker	Allows workers to access the Grow page.	Access Career Growth by Worker	Allows workers to access the Grow page.
Career Growth Access by Worker	Allows workers to access the Grow page.	Use REST Service - Worker Journey Tasks	Allows the user to call all methods associated with the Worker Journey Tasks REST Service.
Contingent Worker	Identifies the person as a contingent worker.	Absence Entry Using Calendar	Allows the button Schedule Absence in the TIME work area to be secured.
Contingent Worker	Identifies the person as a contingent worker.	Access FUSE Directory Page	Allows access to the FUSE directory page.
Contingent Worker	Identifies the person as a contingent worker.	Access FUSE Performance and Career Planning Page	Allows access to the FUSE performance and career planning page.
Contingent Worker	Identifies the person as a contingent worker.	Access FUSE Personal Information Page	Allows access to the FUSE personal information page.
Contingent Worker	Identifies the person as a contingent worker.	Access HCM Common Components	Allows access to HCM common components.
Contingent Worker	Identifies the person as a contingent worker.	Access Internal Candidate Experience	Allows to access internal career site.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contingent Worker	Identifies the person as a contingent worker.	Access Knowledge from HCM	Allows accessing knowledge articles from HCM pages.
Contingent Worker	Identifies the person as a contingent worker.	Access Learner Self-Service Work Area	Allows access to the My Learning tab in the learning self-service work area.
Contingent Worker	Identifies the person as a contingent worker.	Access My Career and Performance	Allows access to My Career and Performance page.
Contingent Worker	Identifies the person as a contingent worker.	Access My Pay	Allows access to My Pay page
Contingent Worker	Identifies the person as a contingent worker.	Access My Time and Absences	Allows users to access the Time and Absences landing page under Me.
Contingent Worker	Identifies the person as a contingent worker.	Access Quick Actions	Provides function access to the Quick Actions page where users can easily see and initiate all actions available to them.
Contingent Worker	Identifies the person as a contingent worker.	Access What to Learn	Allows access to the What to Learn tab in learning self-service work area.
Contingent Worker	Identifies the person as a contingent worker.	Align Performance Goals	Allows aligning of performance goals.
Contingent Worker	Identifies the person as a contingent worker.	Approve Transactions	Allows ability to approve transactions
Contingent Worker	Identifies the person as a contingent worker.	Cancel Performance Goals	Allows performance goals to be cancelled.
Contingent Worker	Identifies the person as a contingent worker.	Claim Shifts	Allows workers to view and claim open shifts
Contingent Worker	Identifies the person as a contingent worker.	Copy Development Goals	Allows copying of development goals.
Contingent Worker	Identifies the person as a contingent worker.	Copy Performance Goals	Allows copying of performance goals.
Contingent Worker	Identifies the person as a contingent worker.	Create Service Request from HCM	Allows the creation of service requests from HCM pages.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contingent Worker	Identifies the person as a contingent worker.	Delete Development Goals	Allow development goals to be deleted.
Contingent Worker	Identifies the person as a contingent worker.	Delete Performance Goals	Allow performance goals to be deleted.
Contingent Worker	Identifies the person as a contingent worker.	Download Desktop Integrator	Allows to download and install Desktop Integrator.
Contingent Worker	Identifies the person as a contingent worker.	Extend Performance Goals	Allows performance goals to be extended to another goal plan.
Contingent Worker	Identifies the person as a contingent worker.	Give Anytime Feedback	Allows a user to give anytime feedback.
Contingent Worker	Identifies the person as a contingent worker.	Manage Development Goal	Allows management of development goals of direct reports.
Contingent Worker	Identifies the person as a contingent worker.	Manage Favorite Colleagues	Allows management of favorite colleagues identified by users for career guidance.
Contingent Worker	Identifies the person as a contingent worker.	Manage Goal Management Notifications	Manage Goal Management Notifications
Contingent Worker	Identifies the person as a contingent worker.	Manage Mentorship	Manage mentorship
Contingent Worker	Identifies the person as a contingent worker.	Manage My Portrait Work Area	Allows access to the My Portrait work area.
Contingent Worker	Identifies the person as a contingent worker.	Manage My Welcome Tab	Allows management of Welcome page.
Contingent Worker	Identifies the person as a contingent worker.	Manage Own HCM Channel Messages	Allows a user to manage their own messages in HCM Channel Messages
Contingent Worker	Identifies the person as a contingent worker.	Manage Performance Goal	Manage Worker Performance or Development Goals
Contingent Worker	Identifies the person as a contingent worker.	Manage Person Allocated Checklist by Worker	Allows a worker to manage their own allocated checklists.
Contingent Worker	Identifies the person as a contingent worker.	Manage Reports and Analytics	Allows access to the Reports and Analytics from Navigator Menu.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contingent Worker	Identifies the person as a contingent worker.	Manage Reputation Overview	Manage reputation overview
Contingent Worker	Identifies the person as a contingent worker.	Manage Reputation Scores	Manage reputation scores
Contingent Worker	Identifies the person as a contingent worker.	Manage Scheduled Processes	Allows management of Scheduled Processes
Contingent Worker	Identifies the person as a contingent worker.	Manage Social Roles	Manage social roles
Contingent Worker	Identifies the person as a contingent worker.	Move Performance Goals	Allows performance goals to be moved to another goal plan.
Contingent Worker	Identifies the person as a contingent worker.	Report Time by Web Clock	Allows the worker to report time within a web clock.
Contingent Worker	Identifies the person as a contingent worker.	Request Deletion of Time Entries	Allows workers to request deletion of time entries.
Contingent Worker	Identifies the person as a contingent worker.	Run Talent Profile Summary Report	Allows running of talent profile summary report.
Contingent Worker	Identifies the person as a contingent worker.	Share Development Goals	Allows development goals to be shared with other workers.
Contingent Worker	Identifies the person as a contingent worker.	Share Performance Goals	Allows performance goals to be shared with other workers.
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Content Items List of Values	Allows the user to call the GET method associated with the Content Items list of values REST Service.
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Individual Compensation Lists of Values	Allows the user to call the GET method associated with the Individual Compensation list of values REST Services.
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Job Families List of Values	Allows the user to call the GET method associated with the job families list of values REST Service.
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Model Profiles List of Values	Allows the user to call the GET method associated with the Model Profiles list of values REST Service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Questionnaire Lists of Values	Allows the user to call the GET method associated with the questionnaire lists of values REST services
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Scheduling Lists of Values	Allows the user to call the GET method associated with the Scheduling lists of values REST services.
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Time Card Lists of Values	Allows the user to call the GET method associated with the Time Card lists of values REST Services.
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Users and Roles Lists of Values	Allows the user to call the GET method associated with the Users and Roles lists of values REST Services.
Contingent Worker	Identifies the person as a contingent worker.	Use REST Service - Workforce Reputation Lists of Values	Allows access to WorkforceReputation REST LOV services.
Contingent Worker	Identifies the person as a contingent worker.	Use Time Card Templates	Lets the worker use templates when entering their time cards.
Contingent Worker	Identifies the person as a contingent worker.	Validate Project Time and Labor Time Card	Allows access to the web service that validates project attributes on time cards.
Contingent Worker	Identifies the person as a contingent worker.	View Calendar by Worker	Allows worker to view calendar.
Contingent Worker	Identifies the person as a contingent worker.	View Notification Details	Allows product specific notification details.
Contingent Worker	Identifies the person as a contingent worker.	View Performance Goal	Review goals and goal details.
Contingent Worker	Identifies the person as a contingent worker.	View Skill Recommendations	Allows the user to view and select application-generated skill recommendations.
Contingent Worker	Identifies the person as a contingent worker.	View Team Schedule by Worker	Allows worker to view team schedule.
Contingent Worker	Identifies the person as a contingent worker.	View Time by Calendar	Allows view of personal schedule in time calendar.

Granted Role	Granted Role Description	Privilege	Privilege Description
Contingent Worker	Identifies the person as a contingent worker.	View Trading Community Common Setup	Allows viewing of common setup data through web services.
Contingent Worker	Identifies the person as a contingent worker.	Workforce Reputation Subscription User	Allows access to the Workforce Reputation Subscription Application features.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	Manage External Payee Payment Details	Allows management of external payee payment details.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	Manage Payment Instrument Assignment	Allows creation of payment instrument assignment
Employee Bank Account Management	Manages employee bank accounts and other payment details.	Manage Third Party Bank Account	Allows update of external bank accounts.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	View Third Party Bank Account	Allows viewing of external bank accounts.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	View Third Party Bank Account Assignment	Allows viewing of payment instrument assignments.
Employee Enrollment	Manages employee enrollments.	Access Benefits Calculators	Allows access to benefit calculators.
Employee Enrollment	Manages employee enrollments.	Change Beneficiaries	Allows employees to change beneficiaries outside open enrollment.
Employee Enrollment	Manages employee enrollments.	Compare Benefit Plans	Allows comparison of medical, dental and vision plans.
Employee Enrollment	Manages employee enrollments.	Elect Benefits	Allows employees to elect benefits.
Employee Enrollment	Manages employee enrollments.	Maintain Plan Beneficiary Designation	Allows maintenance of plan beneficiary designation.
Employee Enrollment	Manages employee enrollments.	Maintain Primary Care Provider	Allows maintenance of primary care physician.
Employee Enrollment	Manages employee enrollments.	Review Benefit Participant Enrollment Result	Allows benefit professionals to view enrollment result benefit statement.
Employee Enrollment	Manages employee enrollments.	Use REST Service - Benefit Plans Comparison List of Values	Allows users to call the GET method associated with the benefit plans comparison list of values REST service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Employee Enrollment	Manages employee enrollments.	Use REST Service - Benefit Plans Comparison Read Only	Allows users to call the GET method associated with the benefit plans comparison REST service.
Employee Enrollment	Manages employee enrollments.	View Benefits Self Service Configuration	Allows viewing of self service configurations.
Expense Entry	Creates and updates expense items and expense reports.	Manage Bank Account for Expense Reimbursement	Allows creation and modification of expense reimbursement bank accounts for themselves.
Expense Entry	Creates and updates expense items and expense reports.	Manage Expense Report	Allows creation of expense items and expense reports. Allows updating expense items and managing submitted expense reports. Allows tracking of expense reports, expense items, and payments.
Expense Entry	Creates and updates expense items and expense reports.	Review Expense Reimbursement	Not Available
Financials Intelligent Agent Runtime	Allows end users to access intelligent agents within the Financials product family.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Grow Coach Access	Grants access to the Grow Coach.	Access Grow Coach Workspace	Allows the user to access grow coach workspace agentic app.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Department Connections Read Only	Allows users to call the GET method associated with the department connections REST Service.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Department Searches	Allows the user to search for departments in HCM Connections.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Location Connections Read Only	Allows users to call the GET method associated with the location connections REST Service.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Person Notes Visibility Options List of Values	Allows the user to call the GET method associated with the Person Notes Visibility Options list of values REST service.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Profile Tag Searches	Allows the user to search for profile tags using REST services.

Granted Role	Granted Role Description	Privilege	Privilege Description
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Worker Searches	Allows the user to search for workers in HCM Connections.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Workers	Allows the user to call all methods associated with the Workers REST Service.
Intake Request Management as Requester	Allows requester to access intake requests.	Cancel Intake Request	Allows a procurement agent to cancel an intake request.
Intake Request Management as Requester	Allows requester to access intake requests.	Change Intake Request	Allows a user to change a submitted intake request.
Intake Request Management as Requester	Allows requester to access intake requests.	Create Intake Request	Allows a requester to create and submit intake requests.
Intake Request Management as Requester	Allows requester to access intake requests.	Search Intake Requests as Requester	Allows a requester to search for intake requests.
Intake Request Management as Requester	Allows requester to access intake requests.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Intake Request Management as Requester	Allows requester to access intake requests.	View Intake Request	Allows a user to review an intake request.
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	Manage Intake Request Reviews	Allow the user to manage intake request reviews (intake request review assigned journeys).
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	Manage System Searches	Allows users to manage HCM system searches.
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	View Global Journeys	Allows users to view global journeys. Viewing of personal journeys is not restricted by this privilege.
Intake Request Review Task Management By Worker	Allows user to access intake request review tasks (intake request review assigned journey tasks).	Manage Intake Request Review Tasks By Worker	Allow the user to access intake request review tasks (intake request review assigned journey tasks).

Granted Role	Granted Role Description	Privilege	Privilege Description
Intake Request Review Task Management By Worker	Allows user to access intake request review tasks (intake request review assigned journey tasks).	Use REST Service - Assigned Journey Tasks	Allows the user to call all methods associated with the Assigned Journey Tasks REST Service.
Intake Request Review Task Management By Worker	Allows user to access intake request review tasks (intake request review assigned journey tasks).	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Manage Contextual Journey by Worker	Allows workers to access and manage their own contextual journeys.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Manage My Account	Manages worker roles.	Delete Roles Delegated To Me	Allows deleting role delegations delegated to user.
Manage My Account	Manages worker roles.	Manage User Account and My Account	Allows access to the page components that are common to My Account and Manage User Account.
Manage My Account	Manages worker roles.	Reset Password	Allows reset password links to be emailed to users.
Manage My Account	Manages worker roles.	View Own Account Details	Allows viewing of one's own account details.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	Manage Payables Invoice List Activities	Allows access to the Payables invoice list to review invoices and clear invoice exceptions.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	Manage Payables Invoices	Allows searching and viewing of Oracle Fusion Payables documents.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	View Payables Invoice	Allows viewing of Oracle Fusion Payables invoices without performing a search.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	View Payables Invoice Holds	Allows viewing of Oracle Fusion Payables invoice holds.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Create Performance Document by Worker	Allows creation of performance documents by workers.

Granted Role	Granted Role Description	Privilege	Privilege Description
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Print Performance Document	Allows printing of performance documents
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Provide Performance Evaluation Feedback	Allows performance evaluation feedback to be provided.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Select Feedback Participants	Allows selection of feedback participants.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Track Participant Feedback Status	Allows tracking of participant feedback status.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	View Performance Information on Worker Dashboard	Allows a worker to view the worker's own performance information.
Person Communication Methods Management	Grants access to the employee, contingent worker and Human Resource Specialist to manage the phones, emails and other communication methods in the portrait.	Manage Person Communication Method	Allows access to a person's other communication methods. For example, instant message, LinkedIn and so on.
Person Communication Methods Management	Grants access to the employee, contingent worker and Human Resource Specialist to manage the phones, emails and other communication methods in the portrait.	Manage Person Email	Allows access to a person's emails.
Person Communication Methods Management	Grants access to the employee, contingent worker and Human Resource Specialist to manage the phones, emails and other communication methods in the portrait.	Manage Person Phone	Allows access to a person's phones.
Person Communication Methods View	Grants access to the employee, contingent worker and Human Resource Specialist to view the phones, emails and other communication methods in the portrait.	Manage Person Communication Method	Allows access to a person's other communication methods. For example, instant message, LinkedIn and so on.
Person Communication Methods View	Grants access to the employee, contingent worker and Human Resource Specialist to view the phones, emails and other	Manage Person Email	Allows access to a person's emails.

Granted Role	Granted Role Description	Privilege	Privilege Description
	communication methods in the portrait.		
Person Communication Methods View	Grants access to the employee, contingent worker and Human Resource Specialist to view the phones, emails and other communication methods in the portrait.	Manage Person Phone	Allows access to a person's phones.
Procurement Requester	Prepares requisitions for themselves.	Cancel Purchase Order as Procurement Requester	Allows a procurement requester to initiate cancellation of a purchase order.
Procurement Requester	Prepares requisitions for themselves.	Change Purchase Order as Procurement Requester	Allows a procurement requester to initiate changes to an approved purchase order.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Project Time Entry Mobile	Allows the user to report time and manage time cards on mobile device.	Report Time for Project Tasks	Allows reporting of time and management of time cards on mobile devices.
Project Time Entry Mobile	Allows the user to report time and manage time cards on mobile device.	View Project Expenditure Types Service	Allows access to the service to get the list of expenditure types.
Project Time Entry Mobile	Allows the user to report time and manage time cards on mobile device.	View Project Financial Tasks Service	Allows access to the service to view financial tasks.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	GET Product Management Index REST	Allows access to view indexed attributes.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Get Item Rest	Allows query access to items through the REST API.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Get Search View REST	Allows query of search views.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	View Product Management Search	Allows access to view Product Management Search.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Correct Self-Service Receiving Receipt	Allows correction of self-service receipts.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Create Self-Service Receiving Receipt	Allows creation of self-service receipts.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Manage Inventory Transfer Order	Allows management of inventory transfer orders.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Manage Self-Service Receiving Receipt Return	Allows return of self-service receipts.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Monitor Self-Service Receiving Receipt Work Area	Allows access to the self-service receipts work area.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Process Inventory Nudges	Privilege to process nudges in inventory management.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Review Inbound Shipment Details	Allows viewing of inbound shipment details.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Review Receiving Receipt Summary	Allows review of receipt summary information.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Review Self-Service Receiving Receipt	Allows review of self-service receipts.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive	View Purchase Order	Allows a user to review a purchase order.

Granted Role	Granted Role Description	Privilege	Privilege Description
	items, correct receipts, and return receipts.		
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	View Receiving Receipt Notification	Allows viewing of receipt notifications.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	View Requisition	Allows users to view requisition details.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	View Work Confirmation	Allows a user to review a work confirmation.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Create Receipt with the Responsive Self Service Receiving Application	Privilege to access the new my receipts work area and create self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Get Trading Partner Item Relationship Rest	Allows query access to trading partner Item relationship through the REST API.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Process Inventory Nudges	Privilege to process nudges in inventory management.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Return Receipt with the Responsive Self Service Receiving Application	Privilege to return self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Update Receipt with the Responsive Self Service Receiving Application	Privilege to update self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Inbound Shipment Using Responsive Receiving Application	Allows viewing an inbound shipment using the responsive receiving application.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Inbound Shipment for Business Unit by Web Service	Allows viewing an inbound shipment for a business unit by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Inventory Transfer Order	Allows access to view inventory transfer orders.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Purchase Order	Allows a user to review a purchase order.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Receipt Summary and Transaction History using Responsive Receiving	Privilege to view receipt summary and transaction history using responsive receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Receipt with the Responsive Self Service Receiving Application	Privilege to view self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Shipment Using Responsive Shipping	Allows viewing shipment details by using a shipment number. This privilege can't be used as a standalone privilege to view shipments.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Create Requisition for Internal Material Transfers	Allows users to create requisitions for internal material transfers.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Create Requisition with Changes to Deliver-to Location	Allows users to change deliver-to locations on requisition lines.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Create Requisition with Noncatalog Requests	Allows users to create requests for items not available through the procurement catalog.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Create Requisition with One Time Location	Allows users to enter one-time address on requisition lines.

Granted Role	Granted Role Description	Privilege	Privilege Description
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Distribute Award Project Costs and Quantities	Allows user to initiate the award distribution process that will match the costs and quantities provided to available award funding patterns to distribute.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Best Or All Available Supply Sources	Get the best supply source or all the available supply sources to fulfill an internal material transfer request.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Internal Transfer Requesting Organization Price	Get the transfer price to the requesting organization for an internal transfer order.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Item Category Rest	Allows query access to item categories through the REST API.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Project Setups	Allows access to list of values for various Projects setup related business objects that will be consumed cross pillars using REST services or BIP reports.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Manage Inventory Transfer Order	Allows management of inventory transfer orders.

Granted Role	Granted Role Description	Privilege	Privilege Description
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Manage Requisition	Allows users to create, search, and view requisitions.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Submit Requisition with One Click	Allows user submit the shopping cart (requisition) without first going to the edit requisition page.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Daily Conversion Rate	Allows view access to daily conversion information.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Geography Information	Not Available
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Inbound Shipment Using Responsive Receiving Application	Allows viewing an inbound shipment using the responsive receiving application.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Inbound Shipment for Business Unit by Web Service	Allows viewing an inbound shipment for a business unit by web service.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Purchasing Hazard Classes List of Values using REST Service	Allows access to REST services list of values for hazard classes that will be consumed cross pillars.

Granted Role	Granted Role Description	Privilege	Privilege Description
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Purchasing UN Numbers List of Values using REST Service	Allows access to REST services list of values for UN numbers that will be consumed cross pillars.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Requisition	Allows users to view requisition details.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Trading Community Location	Allows the invocation of location web services.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Requisition Viewing	View requisition and associated documents.	Review Inbound Shipment Details	Allows viewing of inbound shipment details.
Requisition Viewing	View requisition and associated documents.	Review Receiving Transaction History	Allows viewing of the receiving transaction history for a receipt.
Requisition Viewing	View requisition and associated documents.	View Purchase Order as Procurement Requester	Allows a procurement requester to review a purchase order.
Requisition Viewing	View requisition and associated documents.	View Requisition	Allows users to view requisition details.
Requisition Viewing	View requisition and associated documents.	View Supplier Negotiation	Allows users to review a supplier negotiation.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Add Someone to Social Group	Allows adding of someone as a member to a social group.

Granted Role	Granted Role Description	Privilege	Privilege Description
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Create Social Group	Allows creation of a social group.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Invite Social Connection	Allows sending of an invitation to connect.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Invite Someone to Social Group	Allows sending of an invitation to be a member of a social group.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Link Social Group	Allows linking of a social group to an object, such as a performance goal.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Manage Kudos	Allows sending of kudos to someone.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Manage Message Board	Allows management of postings on the message board.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Manage Social Bookmarks	Allows creation of social bookmarks and sharing them with connections.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Manage Social Connections	Allows management of social connections and connection lists.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Manage Social Group	Allows creation of social groups. Allows management of groups, such as adding social group content, adding and removing members to groups, and leaving groups.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Manage Social Self-descriptive Information	Allows management of self-descriptive information, such as the about me description, and areas of interest.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	Unlink Social Group	Allows unlink of a social group from an object, such as a performance goal.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	View Activity Stream	Allows viewing of the activity stream.
Social Connection Worker	Performs all Oracle Fusion Social Connection employee duties.	View Related Social Groups	Allows viewing of social groups that are linked to an object, such as a performance goal.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Default Expenditure Types by Web Service	Allow viewing Default Expenditure Types by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organization Parameters List of Values by Web Service	Allow viewing inventory organization parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Schedules by Web Service	Allow viewing schedules by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Time and Labor Worker	Reports time as a worker.	Access Time Work Area	Allows access to the Time work area.
Time and Labor Worker	Reports time as a worker.	Report Time by Calendar	Allows the worker to report time within a calendar.
Time and Labor Worker	Reports time as a worker.	Use REST Service - Time Card Field Values Read Only	Lets the person call the Time Card Field Values REST Service.
Time and Labor Worker	Reports time as a worker.	View Calendar by Worker	Allows worker to view calendar.
Time and Labor Worker	Reports time as a worker.	View Team Schedule by Worker	Allows worker to view team schedule.
Time and Labor Worker	Reports time as a worker.	View Time by Calendar	Allows view of personal schedule in time calendar.
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Check Funds	Check whether sufficient funds are available for a transactions

Granted Role	Granted Role Description	Privilege	Privilege Description
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Reserve Funds	Check whether sufficient funds are available for a transactions, and if so, reserve the funds
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budget Impact	Review the budgetary control results of a transaction and its budget impact
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budget Period Statuses	Allows inquiry on the budget period status.
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budgetary Control Balances	Review budget consumption balances
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budgetary Control Transactions	Review budget consumption balances by transaction
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Transfer Budget Balances to Budget Cubes Continuously	Allows the submission of a process to continuously transfer budget balances to the budgetary control balances reporting multidimensional database.
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	View Funds Available Balances	Allows access to view the budgetary control validation results.
Use REST Service - Eligible Contacts List of Values	Allows the user to call the GET method associated with the Eligible Contacts list of values REST Service.	Use REST Service - Eligible Contacts List of Values	Allows the user to call the GET method associated with the Eligible Contacts list of values REST Service.
Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service. Use this duty role when granting manage access to person documentation data.	Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.	Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Worker Time Card Entry	Reports time by time card, as a worker.	Create Time Card	Allows the worker to create a new time card.
Worker Time Card Entry	Reports time by time card, as a worker.	Manage Time Cards by Worker	Allows the worker to view, create, edit, or delete time cards from the Manage Time Cards page.
Worker Time Card Entry	Reports time by time card, as a worker.	Search Time Cards	Allows the worker to search for existing time cards.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Define Talent Profile	Allows definition of talent profile.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Define Talent Profile Item	Allows definition of talent profile item.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Manage Careers of Interest	Allows management of the careers of interest for a worker.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Manage Person Talent Profile	Allows management of talent profile for a person.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Match Talent Profile	Allows access to perform best fit analysis.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Update Talent Profile Item	Allows update to talent profile items.

Granted Role	Granted Role Description	Privilege	Privilege Description
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	View Talent Profile	Allows management of profile task flows that are common to model and person profiles.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Contingent Worker abstract role.

Business Object	Policy Description	Policy Store Implementation
AI Agent	A Contingent Worker can view ai agent for financials ai agents	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent (Data) Resource: AI Agent
AI Agent Tool	A Contingent Worker can view ai agent tool for financials ai agent tools	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent Tool (Data) Resource: AI Agent Tool
AI Agent Workflow	A Contingent Worker can view ai agent workflow for financials ai agent workflows	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent Workflow (Data) Resource: AI Agent Workflow
Absence Type	A Contingent Worker can choose absence types for themselves	Role: Maintain Absence Records Privilege: Choose Absence Types (Data) Resource: Absence Type
Absence Type	A Contingent Worker can choose absence types for themselves	Role: Submit Absence Bid Privilege: Choose Absence Types (Data) Resource: Absence Type
Absence Type	A Contingent Worker can choose absence types for themselves	Role: Use REST Service - Absence Types List of Values Privilege: Choose Absence Types (Data) Resource: Absence Type

Business Object	Policy Description	Policy Store Implementation
Application Attachment	A Contingent Worker can delete application attachment for the purchase order categories including miscellaneous, to supplier, to buyer, to receiver, to approver, and to payables	Role: Procurement Requester Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	A Contingent Worker can read application attachment for the negotiation categories including miscellaneous, to approver, to buyer, to payables, to receiver, and to supplier	Role: Procurement Requester Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Contingent Worker can read application attachment for the purchase order categories including document, miscellaneous, to supplier, to buyer, to receiver, to approver, and to payables	Role: Procurement Requester Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Contingent Worker can update application attachment for the purchase order categories including miscellaneous, to supplier, to buyer, to receiver, to approver, and to payables	Role: Procurement Requester Privilege: Update Application Attachment Resource: Application Attachment
Application Reference Territory	A Contingent Worker can choose application reference territory for countries in their country security profile	Role: Change Person Marital Status Privilege: Choose Application Reference Territory (Data) Resource: Application Reference Territory
Application Reference Territory	A Contingent Worker can choose application reference territory for countries in their country security profile	Role: Use REST Service - HCM Countries List of Values Privilege: Choose Application Reference Territory (Data) Resource: Application Reference Territory
Areas of Responsibility Mapping	A Contingent Worker can view areas of responsibility mapping for areas of responsibility for which the subject is in their person and assignment security profile	Role: Use REST Service - Areas of Responsibility Mapping Read Only Privilege: View Areas of Responsibility Mapping (Data) Resource: Areas of Responsibility Mapping
Assignment Grade	A Contingent Worker can choose assignment grade for all grades in the enterprise	Role: Use REST Service - Grades List of Values Privilege: Choose Assignment Grade (Data) Resource: Assignment Grade
Beneficiary Organization	A Contingent Worker can view worker benefits portrait card for themselves	Role: Portrait Benefits

Business Object	Policy Description	Policy Store Implementation
		Privilege: View Worker Benefits Portrait Card (Data) Resource: Beneficiary Organization
Benefit Covered Dependent	A Contingent Worker can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Covered Dependent
Benefit Participant Enrollment Action	A Contingent Worker can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Participant Enrollment Action
Benefit Participant Enrollment Result	A Contingent Worker can manage benefit participant enrollment result for themselves	Role: Manage Benefit Participant Enrollment Result by Worker Privilege: Manage Benefit Participant Enrollment Result (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	A Contingent Worker can report person for themselves	Role: Employee Enrollment Privilege: Report Person (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	A Contingent Worker can review benefit participant enrollment result for themselves	Role: Employee Enrollment Privilege: Review Benefit Participant Enrollment Result (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	A Contingent Worker can view benefit participant enrollment result for themselves	Role: Manage Benefit Participant Enrollment Result by Worker Privilege: View Benefit Participant Enrollment Result (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	A Contingent Worker can view benefit participant enrollment result for themselves	Role: View Benefit Participant Enrollment Result by Worker Privilege: View Benefit Participant Enrollment Result (Data) Resource: Benefit Participant Enrollment Result

Business Object	Policy Description	Policy Store Implementation
Benefit Participant Enrollment Result	A Contingent Worker can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Potential Life Event	A Contingent Worker can self report a life event for themselves	Role: Self Report a Life Event Privilege: Self Report a Life Event (Data) Resource: Benefit Participant Potential Life Event
Benefit Participant Rate	A Contingent Worker can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Participant Rate
Benefit Person Benefit Group	A Contingent Worker can manage benefit person benefit group for people and assignments in their person and assignment security profile	Role: Use REST Service - Person Benefit Groups Privilege: Manage Benefit Person Benefit Group (Data) Resource: Benefit Person Benefit Group
Benefit Person Benefit Group	A Contingent Worker can view person benefit group for people and assignments in their person and assignment security profile	Role: Use REST Service - Person Benefit Groups Privilege: View Person Benefit Group (Data) Resource: Benefit Person Benefit Group
Benefit Questionnaire Responses	A Contingent Worker can manage benefits questionnaire responses for themselves	Role: Manage Benefits Questionnaire Responses by Worker Privilege: Manage Benefits Questionnaire Responses (Data) Resource: Benefit Questionnaire Responses
Benefit Questionnaire Responses	A Contingent Worker can view benefits questionnaire responses for themselves	Role: Manage Benefits Questionnaire Responses by Worker Privilege: View Benefits Questionnaire Responses (Data) Resource: Benefit Questionnaire Responses
Benefit Questionnaire Responses	A Contingent Worker can view benefits questionnaire responses for themselves	Role: View Benefits Questionnaire Responses by Worker Privilege: View Benefits Questionnaire Responses (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Benefit Questionnaire Responses
Benefit Relation	A Contingent Worker can manage benefit relation for themselves	Role: Employee Enrollment Privilege: Manage Benefit Relation (Data) Resource: Benefit Relation
Cash Advance Approval Note	A Contingent Worker can manage expense report approval note for themselves	Role: Expense Entry Privilege: Manage Expense Report Approval Note (Data) Resource: Cash Advance Approval Note
Check In Document	A Contingent Worker can create check-in document for people in their person and assignment security profile	Role: Use REST Service - Talent Worker Check-Ins Privilege: Create Check-In Document (Data) Resource: Check In Document
Check In Document	A Contingent Worker can create check-in document for themselves	Role: View Performance Summary Privilege: Create Check-In Document (Data) Resource: Check In Document
Check In Document	A Contingent Worker can view check-in document for people in their person and assignment security profile	Role: Use REST Service - Talent Worker Check-Ins Privilege: View Check-In Document (Data) Resource: Check In Document
Check In Document	A Contingent Worker can view check-in document for themselves	Role: View Performance Summary Privilege: View Check-In Document (Data) Resource: Check In Document
Checklist Role Maps	A Contingent Worker can view journey template for others for journey templates which allow them to view assigned journeys for persons and assignments in their person and assignment security profile	Role: Use REST Service - Worker Journeys Privilege: View Journey Template for Others (Data) Resource: Checklist Role Maps
Checklist Role Maps	A Contingent Worker can view journey template for self for journey templates which allow them to view their own assigned journeys	Role: Use REST Service - Worker Journeys Privilege: View Journey Template for Self (Data) Resource: Checklist Role Maps

Business Object	Policy Description	Policy Store Implementation
Corporate Card Transaction Dispute Note	A Contingent Worker can manage expense for themselves	Role: Expense Entry Privilege: Manage Expense (Data) Resource: Corporate Card Transaction Dispute Note
Delegated Role	A Contingent Worker can manage role delegations for persons and assignments in their person and assignment security profile	Role: Manage Role Delegations Privilege: Manage Role Delegations (Data) Resource: Delegated Role
Delegated Role	A Contingent Worker can view role delegations for persons and assignments in their person and assignment security profile	Role: Manage Role Delegations Privilege: View Role Delegations (Data) Resource: Delegated Role
Department	A Contingent Worker can choose department for departments in their organization security profile	Role: Use REST Service - Departments List of Values Privilege: Choose Department (Data) Resource: Department
Employee Community	A Contingent Worker can manage employee communities for employee communities for which they are owner or co-owner	Role: Manage Employee Communities Privilege: Manage Employee Communities (Data) Resource: Employee Community
Employee Community	A Contingent Worker can view employee communities for public employee communities and communities to which they have been invited	Role: View Employee Communities Privilege: View Employee Communities (Data) Resource: Employee Community
Expense	A Contingent Worker can manage expense for themselves	Role: Expense Entry Privilege: Manage Expense (Data) Resource: Expense
Expense Report	A Contingent Worker can manage expense report for themselves	Role: Expense Entry Privilege: Manage Expense Report (Data) Resource: Expense Report
Expense Report Approval Note	A Contingent Worker can manage expense report approval note for themselves	Role: Expense Entry Privilege: Manage Expense Report Approval Note (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Expense Report Approval Note
Guided Journey Response	A Contingent Worker can manage guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: Manage Guided Journey Response (Data) Resource: Guided Journey Response
Guided Journey Response	A Contingent Worker can view guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: View Guided Journey Response (Data) Resource: Guided Journey Response
HCM Approval Process Definition	A Contingent Worker can review approval transactions as business user for transactions in their transactions security profile	Role: Use REST Service - Transaction Management as Worker Privilege: Review Approval Transactions as Business User (Data) Resource: HCM Approval Process Definition
HCM Note	A Contingent Worker can view hcm person note for all types of person notes that they created	Role: Use REST Service - Person Notes Privilege: View HCM Person Note (Data) Resource: HCM Note
HCM Note	A Contingent Worker can view hcm person public note for public person notes that are about people in their public person security profile	Role: Use REST Service - Person Notes Privilege: View HCM Person Public Note (Data) Resource: HCM Note
HCM Note	A Contingent Worker can view hcm person shared note for shared person notes that are about people in their person security profile	Role: Use REST Service - Person Notes Privilege: View HCM Person Shared Note (Data) Resource: HCM Note
HCM Pending Transaction Header	A Contingent Worker can review approval transactions as business user for transactions initiated by persons in their person security profile	Role: Use REST Service - Transaction Management as Worker Privilege: Review Approval Transactions as Business User (Data) Resource: HCM Pending Transaction Header
HR Document Type	A Contingent Worker can view document type for document types in their document type security profile	Role: Manage Person Documentation by Worker Privilege: View Document Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: HR Document Type
HR Job	A Contingent Worker can choose hr job for all jobs in the enterprise	Role: Contingent Worker Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	A Contingent Worker can choose hr job for all jobs in the enterprise	Role: Use REST Service - Jobs List of Values Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	A Contingent Worker can view hr job for all jobs in the enterprise	Role: View Employment Information Summary Privilege: View HR Job (Data) Resource: HR Job
Help Topic	A Contingent Worker can view secured help content for all secured help content they are authorized	Role: View Secured Help Content Privilege: View Secured Help Content Resource: Help Topic
Journey	A Contingent Worker can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey (Data) Resource: Journey
Journey	A Contingent Worker can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Read Only Privilege: Assign Journey (Data) Resource: Journey
Journey	A Contingent Worker can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Contingent Worker can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Read Only Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Contingent Worker can manage journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Manage Journey (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Journey
Journey	A Contingent Worker can view journey for journeys to which they have been granted access	Role: Use REST Service - Guided Journeys Read Only Privilege: View Journey (Data) Resource: Journey
Journey	A Contingent Worker can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: View Journey (Data) Resource: Journey
Journey	A Contingent Worker can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Read Only Privilege: View Journey (Data) Resource: Journey
Journey Task	A Contingent Worker can view journey task library for tasks in the journey task library to which they have been granted access	Role: Use REST Service - Journey Task Library Read Only Privilege: View Journey Task Library (Data) Resource: Journey Task
Knowledge User groups	A Contingent Worker can access content with user group access to fusion user user group	Role: Content Intelligence Users Privilege: Access Content with User Group Resource: Knowledge User groups
Location	A Contingent Worker can choose location for all locations in the enterprise	Role: Use REST Service - Locations List of Values Privilege: Choose Location (Data) Resource: Location
Location	A Contingent Worker can view location for all locations in the enterprise	Role: Use REST Service - Locations Read Only Privilege: View Location (Data) Resource: Location
Organization	A Contingent Worker can choose recruiting organization for organizations in their organization security profile	Role: Use REST Service - Recruiting Hierarchy Lists of Values Privilege: Choose Recruiting Organization (Data) Resource: Organization

Business Object	Policy Description	Policy Store Implementation
Payroll Personal Deduction	A Contingent Worker can enter indian investment declaration for themselves if they are employed by an indian legal employer	Role: Enter Indian Investment Declaration Privilege: Enter Indian Investment Declaration (Data) Resource: Payroll Personal Deduction
Payroll Personal Deduction	A Contingent Worker can enter indian previous employment for themselves if they are employed by an indian legal employer	Role: Enter Indian Previous Employment Privilege: Enter Indian Previous Employment (Data) Resource: Payroll Personal Deduction
Payroll Personal Deduction	A Contingent Worker can enter indian social insurance for themselves if they are employed by an indian legal employer	Role: Enter Indian Social Insurance Privilege: Enter Indian Social Insurance (Data) Resource: Payroll Personal Deduction
Payroll Personal Deduction	A Contingent Worker can manage indian employee flexible benefit plan for themselves if they are employed by an indian legal employer	Role: Manage Indian Employee Flexible Benefit Plan Privilege: Manage Indian Employee Flexible Benefit Plan (Data) Resource: Payroll Personal Deduction

Requisition	A Contingent Worker can manage requisition for themselves for the financial business unit associated with their primary assignment	Role: Requisition Self Service User Privilege: Manage Requisition (Data) Resource: Business Unit
Requisition	A Contingent Worker can manage requisition in other bus by rest service for themselves for the business units for which they are authorized	Role: Procurement Requester Privilege: Manage Requisition in Other BUs by REST Service (Data) Resource: Business Unit

Business Object	Policy Description	Policy Store Implementation
Requisition	A Contingent Worker can manage requisition in primary bu by rest service for themselves for the financial business unit associated with their primary assignment	Role: Requisition Self Service User Privilege: Manage Requisition in Primary BU by REST Service (Data) Resource: Business Unit
Role Guide	A Contingent Worker can view role guide for role guides they have created, are named collaborators of, or are visible to everyone.	Role: View Role Guide Privilege: View Role Guide (Data) Resource: Role Guide
Salary	A Contingent Worker can view worker compensation portrait card for themselves	Role: View Compensation Details for Worker Privilege: View Worker Compensation Portrait Card (Data) Resource: Salary
Shared Performance Goal	A Contingent Worker can choose shared performance goal for people and assignments in their person and assignment security profile	Role: Use REST Service - Performance Goals List of Values Privilege: Choose Shared Performance Goal (Data) Resource: Shared Performance Goal
Talent Profile	A Contingent Worker can assign public skill as worker for themselves	Role: Assign Public Skill as Worker Privilege: Assign Public Skill as Worker (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can compare talent profiles for people and assignments in their person and assignment security profile	Role: Edit Person Skills and Qualifications Privilege: Compare Talent Profiles (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can edit person career planning for themselves	Role: Edit Person Career Planning Privilege: Edit Person Career Planning (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can edit person skills and qualifications for themselves	Role: Edit Person Skills and Qualifications Privilege: Edit Person Skills and Qualifications (Data) Resource: Talent Profile

Business Object	Policy Description	Policy Store Implementation
Talent Profile	A Contingent Worker can manage talent profile person for persons and assignments in their person security profile	Role: Use REST Service - Talent Person Profiles Privilege: Manage Talent Profile Person (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can match talent profile person for themselves	Role: Workforce Profile Worker Privilege: Match Talent Profile Person (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can view endorsement for persons and assignments in their public person security profile	Role: Use REST Service - Talent Person Profiles Privilege: View Endorsement (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can view endorsement for persons and assignments in their public person security profile	Role: Use REST Service - Talent Person Profiles Read Only Privilege: View Endorsement (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can view public skill activity for persons and assignments in their person security profile	Role: Use REST Service - Talent Person Public Skill Activities Read Only Privilege: View Public Skill Activity (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can view public skill for persons and assignments in their public person security profile	Role: Use REST Service - Talent Person Profiles Privilege: View Public Skill (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can view public skill for persons and assignments in their public person security profile	Role: Use REST Service - Talent Person Profiles Read Only Privilege: View Public Skill (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can view public skill for persons and assignments in their public person security profile	Role: Use REST Service - Talent Person Public Skills Read Only Privilege: View Public Skill (Data) Resource: Talent Profile
Talent Profile	A Contingent Worker can view talent profile model for jobs in their job security profile	Role: Workforce Profile Worker Privilege: View Talent Profile Model (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Talent Profile
Talent Profile	A Contingent Worker can view talent profile person for themselves	Role: Workforce Profile Worker Privilege: View Talent Profile Person (Data) Resource: Talent Profile
Talent Profile Interest	A Contingent Worker can view careers of interest for persons and assignments in their public person security profile	Role: Career Growth Access by Worker Privilege: View Careers of Interest (Data) Resource: Talent Profile Interest
Talent Profile Item	A Contingent Worker can view talent profile item worker for themselves	Role: Workforce Profile Worker Privilege: View Talent Profile Item Worker (Data) Resource: Talent Profile Item
Time Change Request	A Contingent Worker can manage time change requests by worker for themselves	Role: Request Time Change Privilege: Manage Time Change Requests by Worker (Data) Resource: Time Change Request
Time Record	A Contingent Worker can manage time records for persons and assignments in their person and assignment security profile	Role: Use REST Service - Time Records Read Only Privilege: Manage Time Records (Data) Resource: Time Record
Time Record Event	A Contingent Worker can manage time record events for persons and assignments in their person and assignment security profile	Role: Use REST Service - Time Record Events Privilege: Manage Time Record Events (Data) Resource: Time Record Event
Time Record Group	A Contingent Worker can manage time record groups for persons and assignments in their person and assignment security profile	Role: Use REST Service - Time Record Groups Read Only Privilege: Manage Time Record Groups (Data) Resource: Time Record Group
Time Record Group Summary	A Contingent Worker can delete time cards by worker for themselves	Role: Delete Time Cards by Worker Privilege: Delete Time Cards by Worker (Data) Resource: Time Record Group Summary

Business Object	Policy Description	Policy Store Implementation
Time Record Group Summary	A Contingent Worker can generate time entries for themselves	Role: Generate Time Entries by Worker Privilege: Generate Time Entries (Data) Resource: Time Record Group Summary
Time Record Group Summary	A Contingent Worker can manage time cards by worker for themselves	Role: Use REST Service - Time Cards by Worker Privilege: Manage Time Cards by Worker (Data) Resource: Time Record Group Summary
Time Record Group Summary	A Contingent Worker can search time cards for persons and assignments in their person and assignment security profile	Role: Use REST Service - Time Card Entry Details Read Only Privilege: Search Time Cards (Data) Resource: Time Record Group Summary
Time Record Group Summary	A Contingent Worker can submit time cards by worker for themselves	Role: Submit Time Cards by Worker Privilege: Submit Time Cards by Worker (Data) Resource: Time Record Group Summary
Total Compensation Statement	A Contingent Worker can view total compensation statement already generated for themselves	Role: View Total Compensation Statements Privilege: View Total Compensation Statement Already Generated (Data) Resource: Total Compensation Statement
Touchpoint Summary	A Contingent Worker can view touchpoints for themselves	Role: Use REST Service - Talent Worker Engagements by Worker Read Only Privilege: View Touchpoints (Data) Resource: Touchpoint Summary
Trading Community Org Address Email Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Expense Entry Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference
Trading Community Org Address Email Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Requisition Self Service User Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference

Business Object	Policy Description	Policy Store Implementation
Trading Community Org Address Phone Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Expense Entry Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference
Trading Community Org Address Phone Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Requisition Self Service User Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference
Trading Community Organization Address Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Expense Entry Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Address Contact Preference
Trading Community Organization Address Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Requisition Self Service User Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Address Contact Preference
Trading Community Organization Email Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Expense Entry Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Email Contact Preference
Trading Community Organization Email Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Requisition Self Service User Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Email Contact Preference
Trading Community Organization Party	A Contingent Worker can view trading community organization for all organizations in the enterprise	Role: Employee Bank Account Management Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party

Business Object	Policy Description	Policy Store Implementation
Trading Community Organization Party	A Contingent Worker can view trading community organization for all organizations in the enterprise	Role: Expense Entry Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party
Trading Community Organization Party	A Contingent Worker can view trading community organization for all organizations in the enterprise	Role: Payables Invoice Inquiry Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party
Trading Community Organization Party	A Contingent Worker can view trading community organization for all organizations in the enterprise	Role: Procurement Requester Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party
Trading Community Organization Phone Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Expense Entry Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Phone Contact Preference
Trading Community Organization Phone Contact Preference	A Contingent Worker can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Requisition Self Service User Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Phone Contact Preference
Trading Community Party	A Contingent Worker can view trading community contact for all trading community persons in the enterprise except contacts created by partners.	Role: Procurement Requester Privilege: View Trading Community Contact (Data) Resource: Trading Community Party

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Cost Accountant job role.

Aggregate Privilege	Description
Use REST Service - Locations List of Values	Allows the user to call the GET method associated with the Locations LOV REST Service.

Privileges

This table lists privileges granted to duties of the Cost Accountant job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Adjust Receipt Accrual Balances	Allows adjustment of receipt accrual balances.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Adjust Receipt Accrual Balances by Web Service	Allows the user to use a web service to perform adjustments of receipt accrual balances.
Cost Accountant	Performs cost and management accounting functions.	Allocate Estimated Charges	Allows automatic allocation of landed cost charges to purchase orders.
Cost Accountant	Performs cost and management accounting functions.	Analyze Cost of Goods Sold and Gross Margins Using REST Service	Allows analysis of cost of goods sold and product gross margins using REST service.
Cost Accountant	Performs cost and management accounting functions.	Analyze Landed Cost Charges	Allows analysis of landed cost charges basing on various business dimensions.
Cost Accountant	Performs cost and management accounting functions.	Analyze Landed Cost Variances	Allows analysis of landed cost charge variances basing on various business dimensions.
Cost Accountant	Performs cost and management accounting functions.	Analyze product gross margins	Allows analysis of product gross margins.
Cost Accountant	Performs cost and management accounting functions.	Analyze product gross margins using REST	Allows analysis of product gross margins by extracting data from REST API.
Cost Accountant	Performs cost and management accounting functions.	Approve Cost Estimates	Allows approval of new or changes to existing cost estimates.
Cost Accountant	Performs cost and management accounting functions.	Approve Item Cost Profiles	Allows approval of item cost profiles.
Cost Accountant	Performs cost and management accounting functions.	Approve Standard Costs	Allows approval of new or changes to existing standard costs.
Cost Accountant	Performs cost and management accounting functions.	Capture Charge References	Allows capture of unique charge reference numbers which are typically business document numbers.
Cost Accountant	Performs cost and management accounting functions.	Clear Landed Cost Accruals	Allows automatic clearing of landed cost accrual, if any.
Cost Accountant	Performs cost and management accounting functions.	Clear Receipt Accrual Balances	Allows clearing of receipt accrual balances.
Cost Accountant	Performs cost and management accounting functions.	Configure Costing Using Quick Setup Template	Allows configuration of Costing using Quick Setup template.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Create Cost Adjustment	Allows creation of cost adjustments.
Cost Accountant	Performs cost and management accounting functions.	Create Cost Distributions	Allows creation of cost distributions.
Cost Accountant	Performs cost and management accounting functions.	Create Cost Distributions by Web Service	Allows creation of cost distributions using a web service.
Cost Accountant	Performs cost and management accounting functions.	Create Cost Estimate Requests	Allows creation and processing of cost estimate requests.
Cost Accountant	Performs cost and management accounting functions.	Create Cost Planning Scenario Definition	Allows creation of cost planning scenario definition.
Cost Accountant	Performs cost and management accounting functions.	Create Period Close Summary	Allows generating period close summary.
Cost Accountant	Performs cost and management accounting functions.	Create Receipt Accounting Distributions	Allows creation of receipt accounting distributions.
Cost Accountant	Performs cost and management accounting functions.	Create Subledger Journal Entry Batch	Allows creation of journal entries for a batch of transactions.
Cost Accountant	Performs cost and management accounting functions.	Create Subledger Journal Entry Online	Allows creation of journal entries online for a transaction.
Cost Accountant	Performs cost and management accounting functions.	Create Subledger Journal Entry for Third Party Merge	Allows submission of the Create Accounting for Third Party Merge program to process third party merge events.
Cost Accountant	Performs cost and management accounting functions.	Create Subledger Multiperiod and Accrual Reversal Entry	Allows submission of the Create Subledger Accrual Reversal Entry program.
Cost Accountant	Performs cost and management accounting functions.	Create Uninvoiced Receipt Accruals	Allows accrual of uninvoiced receipts.
Cost Accountant	Performs cost and management accounting functions.	Define Accounting Calendar	Allows definition of periods used to record and report accounting transactions.
Cost Accountant	Performs cost and management accounting functions.	Define Accrual Clearing	Allows definition of accrual clearing information.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Define Conversion Rate Type	Allows creation of rate types.
Cost Accountant	Performs cost and management accounting functions.	Define Standard Costs	Allows definition of standard costs.
Cost Accountant	Performs cost and management accounting functions.	Enter Purchase Order Charge Estimates	Allows capture of landed cost charge estimates for purchase orders.
Cost Accountant	Performs cost and management accounting functions.	Enter Transaction Cost	Allows creation of transaction costs.
Cost Accountant	Performs cost and management accounting functions.	Estimate Costs	Allows creation and editing of cost estimates for items.
Cost Accountant	Performs cost and management accounting functions.	Export Customer Account	Not Available
Cost Accountant	Performs cost and management accounting functions.	Extract Ledger Setup Definitions	Extract ledger setup data from Oracle Fusion General Ledger to support export of ledger actual balance type balances data from Enterprise Business Suite General Ledger.
Cost Accountant	Performs cost and management accounting functions.	Get Cost Organization and Inventory Organization Association Service	Allows viewing of relationships between cost organizations and inventory organizations.
Cost Accountant	Performs cost and management accounting functions.	Import Cost Adjustments	Allows import of cost adjustments.
Cost Accountant	Performs cost and management accounting functions.	Maintain Daily Conversion Rate	Allows maintenance of daily rates using a spreadsheet.
Cost Accountant	Performs cost and management accounting functions.	Maintain Historical Conversion Rate	Allows maintenance of historical rates using a spreadsheet.
Cost Accountant	Performs cost and management accounting functions.	Maintain Reports and Analytics Region	Allows selection of reports to appear in the Reports and Analytics region of Oracle Fusion Applications work areas.
Cost Accountant	Performs cost and management accounting functions.	Manage Accrual Cutoff Rules by Web Service	Allows the user to use a web service to manage accrual cutoff rules for purchase order receipts that are accrued at receipt.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Manage Charge Invoice Associations	Allows association of charge invoice lines with landed cost trade operation charges
Cost Accountant	Performs cost and management accounting functions.	Manage Charge Invoice Associations by Web Service	Allows associating charge invoice lines with landed cost trade operation charges using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Charge Templates	Allows definition of landed cost charge templates which can be used to default charges.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Accounting Activities	Allows management of cost accounting activities.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Accounting Landing Page Layout	Allows editing the layout of the Cost Accounting landing page.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Adjustments by Web Service	Allows the user to use a web service to manage cost adjustments.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Analysis Groups by Web Service	Allows management and definition of cost analysis groups using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Books by Web Service	Allows management and definition of cost books using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Component Mapping by Web Service	Allows management and definition of cost component mappings using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Element by Web Service	Allows management and definition of cost elements using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Estimate Requests	Allows management and processing of cost estimate requests.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Organization	Allows management and definition of cost organizations.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Organization Relationship by Web Service	Allows management and definition of cost organization relationships using a web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Organization by Web Service	Allows management and definition of cost organizations using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Overhead Element Groups by Web Service	Allows management and definition of cost overhead element groups using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Period	Allows management of cost periods.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Periods by Web Service	Allows management and definition of cost periods using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Planning Activities	Allows management of cost planning activities.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Planning Scenario Definition	Allows management of cost planning scenario definition.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Planning Scenario Exceptions	Allows management and audit of cost planning scenario exceptions.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Processor Error	Allows viewing and management of cost processor errors.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Processor errors by Web Service	Allows to view and manage cost processor errors using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Profile by Web Service	Allows management and definition of cost profiles using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Rollup Groups	Allows management and definition of cost rollup groups for the supply chain rollup process
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Scenarios in Redwood Using REST Service	Allows management of cost scenarios for the Redwood user experience using REST service.
Cost Accountant	Performs cost and management accounting functions.	Manage Cost Valuation Structure Web Service	Allows management and definition of cost valuation structures using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Costing Activities	Allows use of costing home dashboard to manage costing activities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Manage Costing Work Definitions	Allows management of work definitions selected for cost rollup.
Cost Accountant	Performs cost and management accounting functions.	Manage Default Cost Profile by Web Service	Allows management and definition of default cost profiles using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Expense Pools by Web Service	Allows management and definition of expense pools using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage File Import and Export	Privilege to manage import and export of files.
Cost Accountant	Performs cost and management accounting functions.	Manage Financial Application Lookups	Allows the creation or update of financial application lookups
Cost Accountant	Performs cost and management accounting functions.	Manage Item Cost Profile by Web Service	Allows management and definition of item cost profiles using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Landed Cost Accrual Clearing Rules	Allows definition of business rules based on which landed cost accrual can be cleared automatically.
Cost Accountant	Performs cost and management accounting functions.	Manage Landed Cost Charge Invoices by Web Service	Allows the user to use a web service to manage invoices for landed cost charge.
Cost Accountant	Performs cost and management accounting functions.	Manage Landed Cost Charge Names by Web Service	Allows definition and management of various landed cost charge names using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Landed Cost Reference Types by Web Service	Allows definition and management of various landed cost reference types for matching landed cost charges to payables invoices using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Landed Cost Routes by Web Service	Allows definition and management of routes that will be used in modeling and tracking landed cost using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Orchestration Exceptions	View, update, and resubmit the exceptions raised during the supply chain financial orchestration process.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Manage Overhead Rates for Standard Costed Items by Web Service	Allows the user to use a web service to manage overhead rules for standard costed items.
Cost Accountant	Performs cost and management accounting functions.	Manage Overhead Rule	Allows management and definition of overhead rules.
Cost Accountant	Performs cost and management accounting functions.	Manage Overhead Rule by Web Service	Allows management and definition of overhead rules using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Overhead Rules by Web Service	Allows the user to use a web service to manage and define overhead rules.
Cost Accountant	Performs cost and management accounting functions.	Manage Periodic Average Cost Adjustment	Allows creation of periodic average cost adjustments.
Cost Accountant	Performs cost and management accounting functions.	Manage Receipt Accounting Activities	Allows management of receipt accounting activities.
Cost Accountant	Performs cost and management accounting functions.	Manage Receipt Accounting Activities by Web Service	Allows the user to use a web service to manage receipt accounting activities.
Cost Accountant	Performs cost and management accounting functions.	Manage Receipt Accounting Parameters	Allows management of receipt accounting parameters.
Cost Accountant	Performs cost and management accounting functions.	Manage Receipt Accounting Periods	Allows management of receipt accounting periods.
Cost Accountant	Performs cost and management accounting functions.	Manage Resource Instance Rates	Allows management of resource instance rates
Cost Accountant	Performs cost and management accounting functions.	Manage Resource Rates	Allows additions and updates of resource rates in a rate plan.
Cost Accountant	Performs cost and management accounting functions.	Manage Resource Rates by Web Service	Allows management of resource rates using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Resource and Overhead Rate Plans	Allows management of resource and overhead rate plans.
Cost Accountant	Performs cost and management accounting functions.	Manage Resource and Overhead Rates	Allows addition and update of resource and overhead rates in a rate plan.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Manage Standard Cost Import Exceptions Using REST Service	CST_REVIEW_STANDARD_COST_VARIANCES_WEB_SERVICE
Cost Accountant	Performs cost and management accounting functions.	Manage Subledger Journal Entry Manually	Allows recording of manual journal entries.
Cost Accountant	Performs cost and management accounting functions.	Manage Trade Operation Templates	Allows definition of landed cost trade operation templates which can be used to default trade operations including charges.
Cost Accountant	Performs cost and management accounting functions.	Manage Trade Operation Templates by Web Service	Allows defining trade operation templates that can be used to default trade operations including charges using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage Trade Operations	Allows definition and management of landed cost trade operation.
Cost Accountant	Performs cost and management accounting functions.	Manage Trade Operations by Web Service	Allows the user to use a web service to manage trade operations.
Cost Accountant	Performs cost and management accounting functions.	Manage Transfer Charge Rules	Allows management and definition of transfer charge rules for the supply chain cost rollup process.
Cost Accountant	Performs cost and management accounting functions.	Manage Valuation Unit Web Service	Allows management and definition of valuation units using a web service.
Cost Accountant	Performs cost and management accounting functions.	Manage standard costs using REST service	Allows managing standard costs using REST service
Cost Accountant	Performs cost and management accounting functions.	Match Receipt Accruals	Allows matching of receipt accruals.
Cost Accountant	Performs cost and management accounting functions.	Override Subledger Journal Entry	Allows override of subledger journal entries.
Cost Accountant	Performs cost and management accounting functions.	Perform Cost Rollup	Allows rollup of costs.
Cost Accountant	Performs cost and management accounting functions.	Perform Snapshot and Build	Allows selection of work definitions.
Cost Accountant	Performs cost and management accounting functions.	Perform quick setup using REST service	Allows usage of the quick setup configuration in cost management.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Post Journal	Allows journals to be posted.
Cost Accountant	Performs cost and management accounting functions.	Post Subledger Journal Entry to General Ledger	Allows submission of the program to transfer to and post journal entries in General Ledger.
Cost Accountant	Performs cost and management accounting functions.	Print Receipt Accrual Clearing Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Print Uninvoiced Receipts Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Provide Inventory Transaction Interface Service	Allows sending of inventory transactions to cost management.
Cost Accountant	Performs cost and management accounting functions.	Provide Item Cost	Allows retrieval of item costs.
Cost Accountant	Performs cost and management accounting functions.	Provide Payables Interface Service	Allows sending of payables data to receipt accounting interfaces.
Cost Accountant	Performs cost and management accounting functions.	Provide Projects Cost Collection Service	Allows subscription to a service to retrieve project cost collection information.
Cost Accountant	Performs cost and management accounting functions.	Provide Purchasing Interface Service	Allows sending of purchase order information to receipt accounting interfaces.
Cost Accountant	Performs cost and management accounting functions.	Provide Receiving Transaction Interface Service	Allows sending of receiving transaction information to receipt accounting interfaces.
Cost Accountant	Performs cost and management accounting functions.	Publish Standard Costs	Allows publishing of standard costs from cost planning to cost accounting.
Cost Accountant	Performs cost and management accounting functions.	Purge Accounting Event Diagnostic Data	Allows submission of programs to generate and purge transaction objects diagnostics data.
Cost Accountant	Performs cost and management accounting functions.	Receive Item Structure Change Notification for Work Definitions	Allows receiving of Worklist Notifications for Item Structure Changes. The Item for which these changes are completed must have at least one Work Definition defined in Manufacturing.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Reconcile Landed Cost Charges	Allows reconciliation of the landed cost charges from trade operation with purchasing documents.
Cost Accountant	Performs cost and management accounting functions.	Reconcile Landed Cost Charges by Web Service	Allows using a web service to reconcile the landed cost charges from trade operations.
Cost Accountant	Performs cost and management accounting functions.	Reconcile On-Hand Quantity	Allows reconciliation of on-hand quantities.
Cost Accountant	Performs cost and management accounting functions.	Record in-transit inventory for external purchases	Allows creation of in-transit inventory value for external purchases
Cost Accountant	Performs cost and management accounting functions.	Review Cost Accounting	Allows review of cost distributions.
Cost Accountant	Performs cost and management accounting functions.	Review Cost Accounting Period Status	Allows review of cost accounting period statuses.
Cost Accountant	Performs cost and management accounting functions.	Review Cost Distribution	Allows review of cost distributions.
Cost Accountant	Performs cost and management accounting functions.	Review Cost Distribution by Web Service	Allows review of cost distributions using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review Cost Distribution using REST	Allows review of cost distributions using REST API.
Cost Accountant	Performs cost and management accounting functions.	Review Historical Conversion Rate	Allows review of historical rates using a spreadsheet.
Cost Accountant	Performs cost and management accounting functions.	Review Landed Cost Purchase Order Shipments	Allows viewing of purchase order shipments for landed cost.
Cost Accountant	Performs cost and management accounting functions.	Review Landed Cost Purchase Order Shipments by Web Service	Allows reviewing of purchase order shipments for landed cost using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review Landed Cost Purchase Orders	Allows viewing of purchase orders that are related to landed cost.
Cost Accountant	Performs cost and management accounting functions.	Review Landed Cost Summary by Web Service	Allows viewing of item landed cost charge summary data using a web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Review Landed Cost Transfer Order Shipments	Allows viewing of transfer order shipments for landed cost.
Cost Accountant	Performs cost and management accounting functions.	Review Landed Cost Transfer Order Shipments by Web Service	Allows reviewing of transfer order shipments for landed cost using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review Last Open Period Details by Web Service	Allows review of last open period details.
Cost Accountant	Performs cost and management accounting functions.	Review Maintenance Work Order Costs	Allows review of costs and balances by each individual maintenance work order.
Cost Accountant	Performs cost and management accounting functions.	Review Maintenance Work Order Costs by Web Service	Allows review of costs and balances by each individual maintenance work order using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review Maintenance Work Order Costs using REST	Allows review of costs and balances by each individual maintenance work order using REST API.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting	Allows review of receipt accounting activities.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Distributions	Allows review of receipt accounting distributions.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Distributions by Web Service	Allows the user to use a web service to review receipt accounting distributions.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Distributions using REST	Allows review of receipt accounting distributions through REST.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Parameters and Periods by Web Service	Allows review of receipt accounting parameters and periods data using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Parameters using REST	Allows review of receipt accounting parameters through REST.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Period End Validations by Web Service	Allows review of receipt accounting period end validation exceptions.
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Periods using REST	Allows review of receipt accounting periods through REST.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Review Receipt Accounting Scorecards by Web Service	Allows review of receipt accounting scorecards on landing page.
Cost Accountant	Performs cost and management accounting functions.	Review Recent Run of Receipt Accounting Processes	Allows review of recently ran receipt accounting scheduled process.
Cost Accountant	Performs cost and management accounting functions.	Review Rolled Up Costs	Allows review of the rolled up cost of items.
Cost Accountant	Performs cost and management accounting functions.	Review Standard Cost Variances	Allows review and analysis of standard cost variances.
Cost Accountant	Performs cost and management accounting functions.	Review Standard Cost Variances by Web Service	Allows review and analysis of standard cost variances using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review User Entered Notes for Cost Accounting Periods by Web Service	Allows review of all user entered notes for cost accounting periods using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review Work Order Costs	Allows review of costs and balances by each individual work order.
Cost Accountant	Performs cost and management accounting functions.	Review Work Order Costs by Web Service	Allows review of costs and balances by each individual work order using a web service.
Cost Accountant	Performs cost and management accounting functions.	Review Work Order Costs using REST	Allows review of costs and balances by each individual work order using REST API.
Cost Accountant	Performs cost and management accounting functions.	Run Accrual Reconciliation Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Run Calendar Validation Report	Allows submission of the calendar validation report.
Cost Accountant	Performs cost and management accounting functions.	Run Costed BOM Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Run Costing Account Balances Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Run Daily Rates Import and Calculation Program	Allows submission of the daily rates import and calculation program.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Run Import Journals By Program Call	Allows submission of the journal import program by a program call.
Cost Accountant	Performs cost and management accounting functions.	Run Inventory Valuation Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Run Inventory Valuation Report by Web Service	Allows review of inventory valuation report using a web service.
Cost Accountant	Performs cost and management accounting functions.	Run Layer Inventory Valuation Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Run Revenue and COGS Matching Report	Not Available
Cost Accountant	Performs cost and management accounting functions.	Run Service Cost Recognition Report	Allows viewing of service cost recognition information for field service work orders.
Cost Accountant	Performs cost and management accounting functions.	Run WIP Inventory Valuation Report	Allows viewing of open WIP balances by dimensions such as plant, item category, item and date.
Cost Accountant	Performs cost and management accounting functions.	Search Intercompany Rule Web Service	Allows access to the search intercompany rule Web service.
Cost Accountant	Performs cost and management accounting functions.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.
Cost Accountant	Performs cost and management accounting functions.	Set Up Charge Names	Allows definition and management of various landed cost charge names.
Cost Accountant	Performs cost and management accounting functions.	Set Up Reference Types	Allows definition and management of various landed cost reference types for matching landed cost charges to payables invoices.
Cost Accountant	Performs cost and management accounting functions.	Set Up Routes	Allows definition and management of routes that will be used in modeling and tracking landed cost.
Cost Accountant	Performs cost and management accounting functions.	Submit Accounting Event Diagnostic Report	Allows submission of programs to generate and purge transaction objects diagnostics data.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	Submit COGS to Revenue Matching Process	Allows matching of COGS to revenue.
Cost Accountant	Performs cost and management accounting functions.	Submit Cost Accounting	Allows creation of cost accounting entries in the cost accounting subledger.
Cost Accountant	Performs cost and management accounting functions.	Submit Receipt Accounting	Allows creation of receipt accounting entries in the receipt accounting subledger.
Cost Accountant	Performs cost and management accounting functions.	Transfer Costs to Cost Management	Allows transferring of costs to Oracle Fusion Cost Management.
Cost Accountant	Performs cost and management accounting functions.	Transfer Inventory Transaction from Inventory to Costing	Allows transfer of inventory transactions from inventory to costing.
Cost Accountant	Performs cost and management accounting functions.	Transfer Online Journal Entry to General Ledger	Allows submission of the program to transfer journal entries to General Ledger for online accounting.
Cost Accountant	Performs cost and management accounting functions.	Transfer Receiving Transactions from Receiving to Costing	Allows transfer of receiving transactions from receiving to costing.
Cost Accountant	Performs cost and management accounting functions.	Transfer Transactions from Production to Costing	Allows transfer of production transactions to costing.
Cost Accountant	Performs cost and management accounting functions.	Update Subledger Accounting Balance	Allows submission of the program to update subledger third party account and supporting reference balances.
Cost Accountant	Performs cost and management accounting functions.	View Accounting Calendar	Allows view access to existing groupings of accounting periods.
Cost Accountant	Performs cost and management accounting functions.	View Charge References	Allows viewing of unique charge reference numbers which are typically business document numbers.
Cost Accountant	Performs cost and management accounting functions.	View Cost Accounting Ledgers by Web Service	Allows to view cost accounting ledgers using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Cost Comparison Results Using REST Service	Allows viewing of cost comparison results using REST service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	View Cost Component Mapping by Web Service	Allows to view cost component mapping using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Cost Organization Relationship by Web Service	Allows to view cost accounting relationship using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Cost Profile by Web Service	Allows to view cost profiles using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Costing Transaction Types by Web Service	Allows to view cost accounting transaction types using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Customer Account	Allows the viewing of customer account information.
Cost Accountant	Performs cost and management accounting functions.	View Customer Account Information	Not Available
Cost Accountant	Performs cost and management accounting functions.	View Daily Conversion Rate	Allows view access to daily conversion information.
Cost Accountant	Performs cost and management accounting functions.	View Item Cost	Allows viewing of item costs.
Cost Accountant	Performs cost and management accounting functions.	View Item Costs by Web Service	Allows the usage of a web service to review item costs.
Cost Accountant	Performs cost and management accounting functions.	View Item Landed Costs for Purchase Order and Transfer Order In-transit Receipts by Web Service	Allows reviewing of item landed costs for purchase order and transfer order in-transit receipts using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Landed Costs Scorecards by Web Service	Allows using a web service to view scorecards for landed costs.
Cost Accountant	Performs cost and management accounting functions.	View Manual Cost Adjustments Summary by Web Service	Allows review of total manual adjustment amount, count of adjustments and reason for adjustments in a given period using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Missing Standard Costs	This privilege grants access to the Missing Standard Costs Status UI.
Cost Accountant	Performs cost and management accounting functions.	View Order to Cash Infolet Page	Allows users to view the infolet page for the order to cash process area in the Fusion Applications home experience.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	View Plan to Produce Infolet Page	Allows access to the home experience page that contains infolets for the Plan to Produce process area.
Cost Accountant	Performs cost and management accounting functions.	View Production Resources	Allows query and view of production resource details.
Cost Accountant	Performs cost and management accounting functions.	View Purchase Order Receipts	Allows viewing of landed cost charges and item cost by purchase order receipts.
Cost Accountant	Performs cost and management accounting functions.	View Purchase Orders for Landed Costs by Web Service	Allows the user to use a web service to view purchase order schedules for landed costs.
Cost Accountant	Performs cost and management accounting functions.	View Rolled-Up Costs Using REST Service	Allows review of the rolled up costs of manufactured items using REST service
Cost Accountant	Performs cost and management accounting functions.	View Scanned Payables Invoices	Allows viewing of scanned invoices.
Cost Accountant	Performs cost and management accounting functions.	View Valuation Structures by Web Service	Allows to view cost accounting valuation structures using a web service.
Cost Accountant	Performs cost and management accounting functions.	View Work Definitions	Allows query and view of work definition details.
Cost Accountant	Performs cost and management accounting functions.	View list of Cost Periods by Web Service	Allows the user to use a web service to view list of cost periods.
Cost Accountant	Performs cost and management accounting functions.	View list of cost elements using REST service	Allows viewing list of cost elements using REST service
Cost Accountant	Performs cost and management accounting functions.	View list of cost organizations using REST service	Allows viewing list of cost organization using REST service
Cost Accountant	Performs cost and management accounting functions.	View list of item categories using REST service	Allows viewing list of item categories using REST service.
Cost Accountant	Performs cost and management accounting functions.	View list of items using REST service	Allows viewing list of items using REST service.
Cost Accountant	Performs cost and management accounting functions.	View list of scenarios using REST service	Allows viewing list of cost scenarios using REST service

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accountant	Performs cost and management accounting functions.	View list of valuation units using REST service	Allows viewing list of valuation units using REST service
Cost Accountant	Performs cost and management accounting functions.	View scenario exceptions using REST service	Allows viewing scenario exceptions
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Analyze Cost of Goods Sold and Gross Margins Using REST Service	Allows analysis of cost of goods sold and product gross margins using REST service.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Create Cost Distributions	Allows creation of cost distributions.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Create Cost Distributions by Web Service	Allows creation of cost distributions using a web service.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Create Receipt Accounting Distributions	Allows creation of receipt accounting distributions.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Manage Cost Organization Relationship by Web Service	Allows management and definition of cost organization relationships using a web service.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Manage Cost Period	Allows management of cost periods.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Manage Cost Periods by Web Service	Allows management and definition of cost periods using a web service.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Manage Cost Processor errors by Web Service	Allows to view and manage cost processor errors using a web service.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Run Inventory Valuation Report by Web Service	Allows review of inventory valuation report using a web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Submit COGS to Revenue Matching Process	Allows matching of COGS to revenue.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Transfer Costs to Cost Management	Allows transferring of costs to Oracle Fusion Cost Management.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Transfer Inventory Transaction from Inventory to Costing	Allows transfer of inventory transactions from inventory to costing.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Transfer Receiving Transactions from Receiving to Costing	Allows transfer of receiving transactions from receiving to costing.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	Transfer Transactions from Production to Costing	Allows transfer of production transactions to costing.
Cost Accounting Close Workspace	Allows users to access the Cost Accounting Close agentic application and the underlying workflow agents.	View Cost Organization Relationship by Web Service	Allows to view cost accounting relationship using a web service.
Cost Management Administration	Performs cost management application setups and administration.	Approve Item Cost Profiles	Allows approval of item cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Configure Costing Using Quick Setup Template	Allows configuration of Costing using Quick Setup template.
Cost Management Administration	Performs cost management application setups and administration.	Define Estimate Mappings	Allows definition of estimate mappings.
Cost Management Administration	Performs cost management application setups and administration.	Define Planning Cost Components	Allows definition of planning cost components.
Cost Management Administration	Performs cost management application setups and administration.	Define Planning Cost Organizations	Allows definition of planning cost organization parameters.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Management Administration	Performs cost management application setups and administration.	Maintain Cost Organization	Allows maintenance of cost organizations.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Analysis Group	Allows management and definition of cost analysis groups.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Analysis Mappings	Allows management of cost analysis mappings.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Book	Allows management and definition of cost books.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Component	Allows management and definition of cost components.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Element	Allows management and definition of cost elements.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Element Groups	Allows management and definition of cost element groups.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Organization	Allows management and definition of cost organizations.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Profile	Allows management and definition of cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Valuation Structure	Allows management and definition of cost valuation structures.
Cost Management Administration	Performs cost management application setups and administration.	Manage Default Cost Profile	Allows management and definition of default cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Manage Expense Pools	Allows management and definition of expense pools.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Management Administration	Performs cost management application setups and administration.	Manage Item Cost Profile	Allows management and definition of item cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Manage Valuation Unit	Allows management and definition of valuation units.
Cost Management Administration	Performs cost management application setups and administration.	View list of Cost Periods by Web Service	Allows the user to use a web service to view list of cost periods.
Cost Management Command Center	Allows users to analyze and reconcile costing and accounting data	Manage Cost Accounting Activities	Allows management of cost accounting activities.
Cost Management Command Center	Allows users to analyze and reconcile costing and accounting data	Manage Cost Periods by Web Service	Allows management and definition of cost periods using a web service.
Cost Management Command Center	Allows users to analyze and reconcile costing and accounting data	Manage Cost Processor errors by Web Service	Allows to view and manage cost processor errors using a web service.
Cost Management Command Center	Allows users to analyze and reconcile costing and accounting data	Override Subledger Journal Entry	Allows override of subledger journal entries.
Cost Management Command Center	Allows users to analyze and reconcile costing and accounting data	View Cost Accounting Ledgers by Web Service	Allows to view cost accounting ledgers using a web service.
Customer Account Inquiry	View customer account details.	Export Customer Account	Not Available
Customer Account Inquiry	View customer account details.	Export Customer Account Relationship	Allows the export of customer account contact relationship information.
Customer Account Inquiry	View customer account details.	Search Customer Account Relationships	Allows the search of customer account relationships. If assigning, also assign the ability to view the customer account relationship.
Customer Account Inquiry	View customer account details.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.
Customer Account Inquiry	View customer account details.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability

Granted Role	Granted Role Description	Privilege	Privilege Description
			to view the trading community organization.
Customer Account Inquiry	View customer account details.	Search Trading Community Organization Additional Identifier	Not Available

FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables

Granted Role	Granted Role Description	Privilege	Privilege Description
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Subledger Accounting Reporting	Runs all subledger accounting reports, and reviews journal entries.	Create Journal Entries Reporting Sequence Number	Allows generation of the General Ledger journal entries reporting sequence number at period close.
Subledger Accounting Reporting	Runs all subledger accounting reports, and reviews journal entries.	Review Subledger Journal Entry	Allows inquiries on subledger journal entries and entry lines.
Subledger Accounting Reporting	Runs all subledger accounting reports, and reviews journal entries.	Submit Account Analysis Report	Allows submission of the Account Analysis report.
Subledger Accounting Reporting	Runs all subledger accounting reports, and reviews journal entries.	Submit Journal Entries Report	Allows submission of the Journal Entries report.
Subledger Accounting Reporting	Runs all subledger accounting reports, and reviews journal entries.	Submit Subledger Period Close Exceptions Report	Allows submission of the Period Close Exceptions report.
Subledger Accounting Reporting	Runs all subledger accounting reports, and reviews journal entries.	Submit Third Party Balances Report	Allows submission of the Third Party Balances report.
Subledger Accounting Reporting	Runs all subledger accounting reports, and reviews journal entries.	Submit Trading Partner Summary Report	Run Trading Partner Summary Report
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Default Expenditure Types by Web Service	Allow viewing Default Expenditure Types by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organization Parameters List of Values by Web Service	Allow viewing inventory organization parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant	View Schedules by Web Service	Allow viewing schedules by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	parameters, carriers and units of measure list of values.		
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Check Funds	Check whether sufficient funds are available for a transactions
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Reserve Funds	Check whether sufficient funds are available for a transactions, and if so, reserve the funds
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budget Impact	Review the budgetary control results of a transaction and its budget impact
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budget Period Statuses	Allows inquiry on the budget period status.
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budgetary Control Balances	Review budget consumption balances

Granted Role	Granted Role Description	Privilege	Privilege Description
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Review Budgetary Control Transactions	Review budget consumption balances by transaction
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	Transfer Budget Balances to Budget Cubes Continuously	Allows the submission of a process to continuously transfer budget balances to the budgetary control balances reporting multidimensional database.
Transaction Entry with Budgetary Control	Manages the budgetary control tasks by job roles who perform transactions that are subject to budgetary control, such as accounts payable manager.	View Funds Available Balances	Allows access to view the budgetary control validation results.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Cost Accountant job role.

Business Object	Policy Description	Policy Store Implementation
Accrual Clearing	A Cost Accountant can manage accrual clearing for the business units for which they are authorized	Role: Cost Accountant Privilege: Manage Accrual Clearing (Data) Resource: Business Unit
Accrual Reconciliation	A Cost Accountant can manage accrual reconciliation for the business units for which they are authorized	Role: Cost Accountant Privilege: Manage Accrual Reconciliation Load (Data) Resource: Business Unit

Business Object	Policy Description	Policy Store Implementation
COGS Event	A Cost Accountant can manage cogs event for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage COGS Event (Data) Resource: COGS Event
COGS Event	A Cost Accountant can view cogs event for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View COGS Event (Data) Resource: COGS Event
Charge Reference Type	A Cost Accountant can manage charge reference type for the reference data sets they administer	Role: Cost Accountant Privilege: Manage Charge Reference Type (Data) Resource: Reference Data Set
Charge Reference Type	A Cost Accountant can view charge reference type for the reference data sets they administer	Role: Cost Accountant Privilege: View Charge Reference Type (Data) Resource: Reference Data Set
Cost Analysis Mapping	A Cost Accountant can manage cost analysis mapping for the reference data sets they administer	Role: Cost Accountant Privilege: Manage Cost Analysis Mappings (Data) Resource: Reference Data Set
Cost Analysis Mapping	A Cost Accountant can manage cost analysis mappings for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Analysis Mappings (Data) Resource: Reference Data Set
Cost Analysis Mapping	A Cost Accountant can view cost analysis mapping for the reference data sets they administer	Role: Cost Accountant Privilege: View Cost Analysis Mappings (Data) Resource: Reference Data Set
Cost Component	A Cost Accountant can manage cost component for the reference data sets they administer	Role: Cost Accountant Privilege: Manage Cost Components (Data) Resource: Reference Data Set
Cost Component	A Cost Accountant can manage cost components for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Components (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Reference Data Set
Cost Component	A Cost Accountant can view cost component for the reference data sets they administer	Role: Cost Accountant Privilege: View Cost Components (Data) Resource: Reference Data Set
Cost Distribution	A Cost Accountant can view cost distribution for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Cost Transaction (Data) Resource: Cost Distribution
Cost Element	A Cost Accountant can manage cost element for the reference data sets they administer	Role: Cost Accountant Privilege: Manage Cost Element (Data) Resource: Reference Data Set
Cost Element	A Cost Accountant can manage cost element for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Element (Data) Resource: Reference Data Set
Cost Element	A Cost Accountant can view cost element for the reference data sets they administer	Role: Cost Accountant Privilege: View Cost Element (Data) Resource: Reference Data Set
Cost Estimate	A Cost Accountant can manage cost estimate for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Estimate Costs (Data) Resource: Cost Estimate
Cost Estimate	A Cost Accountant can view cost estimate for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Estimate Costs (Data) Resource: Cost Estimate
Cost Estimate Mapping	A Cost Accountant can manage cost estimate mapping for the reference data sets they administer	Role: Cost Accountant Privilege: Manage Estimate Mappings (Data) Resource: Reference Data Set
Cost Estimate Mapping	A Cost Accountant can manage estimate mappings for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Estimate Mappings (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Reference Data Set
Cost Estimate Mapping	A Cost Accountant can view cost estimate mapping for the reference data sets they administer	Role: Cost Accountant Privilege: View Estimate Mappings (Data) Resource: Reference Data Set
Cost Estimate Plant and Work Center Rate	A Cost Accountant can manage cost estimate plant and work center rate for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Estimate Resource and Overheads (Data) Resource: Cost Estimate Plant and Work Center Rate
Cost Estimate Plant and Work Center Rate	A Cost Accountant can view cost estimate plant and work center rate for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Estimate Resource and Overheads (Data) Resource: Cost Estimate Plant and Work Center Rate
Cost Estimate Resource Rate	A Cost Accountant can manage cost estimate resource rate for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Estimate Resource and Overheads (Data) Resource: Cost Estimate Resource Rate
Cost Estimate Resource Rate	A Cost Accountant can view cost estimate resource rate for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Estimate Resource and Overheads (Data) Resource: Cost Estimate Resource Rate
Cost Estimate Scenario	A Cost Accountant can manage cost estimate scenario for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Cost Estimate Scenario (Data) Resource: Cost Estimate Scenario
Cost Estimate Scenario	A Cost Accountant can view cost estimate scenario for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Cost Estimate Scenario (Data) Resource: Cost Estimate Scenario
Cost Management Payables Invoice	A Cost Accountant can view cost management payables invoice for procurement business unit they are authorized for.	Role: Cost Accountant Privilege: View Cost Management Invoice (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Business Unit
Cost Management Purchase Order	A Cost Accountant can view cost management purchase order for procurement business unit they are authorized for.	Role: Cost Accountant Privilege: View Cost Management Purchase Order (Data) Resource: Business Unit
Cost Management Receiving Transaction	A Cost Accountant can view cost management receiving transaction for procurement business unit they are authorized for.	Role: Cost Accountant Privilege: View Cost Management Receiving Transaction (Data) Resource: Business Unit
Cost Organization	A Cost Accountant can manage cost organization for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Cost Organization (Data) Resource: Cost Organization
Cost Organization	A Cost Accountant can manage cost organization for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: Manage Cost Organization (Data) Resource: Cost Organization
Cost Organization	A Cost Accountant can view cost organization for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Cost Organization (Data) Resource: Cost Organization
Cost Period	A Cost Accountant can manage cost period for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Cost Period (Data) Resource: Cost Period
Cost Period	A Cost Accountant can view cost period for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Cost Period (Data) Resource: Cost Period
Cost Processor Error	A Cost Accountant can manage cost processor error for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Cost Processor Error (Data) Resource: Cost Processor Error
Cost Profile	A Cost Accountant can manage cost profile for the reference data sets they administer	Role: Cost Accountant

Business Object	Policy Description	Policy Store Implementation
		Privilege: Manage Cost Profile (Data) Resource: Reference Data Set
Cost Profile	A Cost Accountant can manage cost profile for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Profile (Data) Resource: Reference Data Set
Cost Profile	A Cost Accountant can view cost profile for the reference data sets they administer	Role: Cost Accountant Privilege: View Cost Profile (Data) Resource: Reference Data Set
Cost Profile	A Cost Accountant can view cost profile for the reference data sets they administer	Role: Cost Management Administration Privilege: View Cost Profile (Data) Resource: Reference Data Set
Cost Transaction	A Cost Accountant can manage cost transaction for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Cost Transaction (Data) Resource: Cost Transaction
Cost Transaction	A Cost Accountant can view cost transaction for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Cost Transaction (Data) Resource: Cost Transaction
Cost Valuation Structure	A Cost Accountant can manage cost valuation structure for the reference data sets they administer	Role: Cost Accountant Privilege: Manage Cost Valuation Structure (Data) Resource: Reference Data Set
Cost Valuation Structure	A Cost Accountant can manage cost valuation structure for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Valuation Structure (Data) Resource: Reference Data Set
Cost Valuation Structure	A Cost Accountant can view cost valuation structure for the reference data sets they administer	Role: Cost Accountant Privilege: View Cost Valuation Structure (Data) Resource: Reference Data Set

Business Object	Policy Description	Policy Store Implementation
Costed Onhand	A Cost Accountant can manage costed onhand for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Costed On-Hand (Data) Resource: Costed Onhand
Costed Onhand	A Cost Accountant can view costed onhand for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Costed On-Hand (Data) Resource: Costed Onhand
Costing Processor Parameter	A Cost Accountant can manage costing processor parameter for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Create Cost Distribution (Data) Resource: Costing Processor Parameter
Item Cost	A Cost Accountant can manage item cost for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Item Cost (Data) Resource: Item Cost
Item Cost	A Cost Accountant can view item cost for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Item Cost (Data) Resource: Item Cost
Item Cost Profile	A Cost Accountant can manage item cost profile for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Item Cost Profile (Data) Resource: Item Cost Profile
Item Cost Profile	A Cost Accountant can manage item cost profile for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: Manage Item Cost Profile (Data) Resource: Item Cost Profile
Item Cost Profile	A Cost Accountant can view item cost profile for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Item Cost Profile (Data) Resource: Item Cost Profile
Item Gross Margin	A Cost Accountant can view item gross margin for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Analyze Gross Margin (Data) Resource: Item Gross Margin

Business Object	Policy Description	Policy Store Implementation
Landed Cost Charge	A Cost Accountant can manage landed cost charge for the reference data sets they administer	Role: Cost Accountant Privilege: Manage Landed Cost Charge (Data) Resource: Reference Data Set
Landed Cost Charge	A Cost Accountant can view landed cost charge for the reference data sets they administer	Role: Cost Accountant Privilege: View Landed Cost Charge (Data) Resource: Reference Data Set
Ledger	A Cost Accountant can manage ledger for all ledgers in the enterprise	Role: Cost Accountant Privilege: Manage Ledger for Subledger (Data) Resource: Ledger
Ledger	A Cost Accountant can manage ledger for subledger for the posting ledgers for transactions that they are authorized.	Role: Subledger Accounting Reporting Privilege: Manage Ledger for Subledger (Data) Resource: Ledger
Location	A Cost Accountant can choose location for all locations in the enterprise	Role: Use REST Service - Locations List of Values Privilege: Choose Location (Data) Resource: Location
Manufacturing Plant	A Cost Accountant can manage manufacturing plant for the manufacturing plants identified as costing organizations in which they can operate	Role: Cost Accountant Privilege: Manage Plant Parameters (Data) Resource: Manufacturing Plant
Overhead Rule	A Cost Accountant can manage overhead rule for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: Manage Overhead Rule (Data) Resource: Overhead Rule
Overhead Rule	A Cost Accountant can view overhead rule for the cost organizations for which they are authorized	Role: Cost Accountant Privilege: View Overhead Rule (Data) Resource: Overhead Rule
Overhead Rule	A Cost Accountant can view overhead rule for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: View Overhead Rule (Data) Resource: Overhead Rule

Business Object	Policy Description	Policy Store Implementation

Manage UK Pension Contributions	Allows UK employees to manage their pension contributions.
Manage Worker Information Sharing	Allows sharing of person information with internal and external recipients. Used in the non-responsive UI.
Portrait Benefits	Views benefits data for a worker in the portrait.
Print Worker Portrait	Grants access to the portrait maintenance duties for the portrait cards.
Request Assignment Change By Worker	Allows workers to request change to their assignment.

Aggregate Privilege	Description
Request Feedback	Allows to request feedback
Request Time Change	Allows the worker to create a time change request.
Self Report a Life Event	Allows employees to report life events for themselves.
Share Personal Data Access	Allows sharing of access to personal data.
Share Personal Information	Allows sharing of personal information.
Submit Absence Bid	Allows workers to submit absence bids.
Submit Indian Tax Exemption for Allowances	Allows India employees to submit expense bills to claim tax exemptions for their allowances.
Submit Resignation	Allows worker to submit their own resignation.
Submit Time Cards by Worker	Allows the worker to submit time cards they're not allowed to edit. Applies only to the Redwood experience.
UK New Starter Declaration	Allows UK employees to enter their new starter declaration
Use REST Service - Absence Business Titles List of Values	Allows users to call the GET method associated with the Absence Business Titles REST service.
Use REST Service - Absence Types List of Values	Allows users to call the GET method associated with the Absence Types REST service.
Use REST Service - Areas of Responsibility Mapping Read Only	Allows the user to call the GET method associated with the Areas of Responsibility Mapping Relationships REST Service.
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Departments List of Values	Allows the user to call the GET method associated with the Departments LOV REST Service.
Use REST Service - Development Goals Read Only	Allows users to call GET and describe methods with the Development Goals REST service.
Use REST Service - Feedback Requests by Worker or Manager	Allows the user to call the POST method associated with the Feedback Requests REST service.
Use REST Service - Grades List of Values	Allows the user to call the GET method associated with the grades list of values REST Service.

Aggregate Privilege	Description
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - HCM Countries List of Values	Allows the user to call the GET method associated with the HCM Countries list of values REST Service.
Use REST Service - Jobs List of Values	Allows the user to call the GET method associated with the Jobs list of values REST Service.
Use REST Service - Journey Task Library Read Only	Allows the user to call the GET method associated with the Journey Task Library REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.
Use REST Service - Journeys Read Only	Allows the user to call the GET method associated with the Journeys REST Service.
Use REST Service - Learning Record Searches by Learner	Allows learner to search learning records as a learner.
Use REST Service - Locations List of Values	Allows the user to call the GET method associated with the Locations LOV REST Service.
Use REST Service - Locations Read Only	Allows the user to call the GET method associated with the Locations REST Service.
Use REST Service - Nudge Cards	Allows the user to call all methods associated with the Nudge Cards REST service.
Use REST Service - Performance Goals List of Values	Allows the user to call the GET method associated with the Performance Goals List of Values REST Service.
Use REST Service - Performance Goals Read Only	Allows the user to call the GET method associated with the Performance Goals REST service.
Use REST Service - Person Benefit Balances	Allows users to call all methods associated with the person benefit balances REST service.
Use REST Service - Person Benefit Groups	Allows users to call all methods associated with the person benefit groups REST service.
Use REST Service - Person Notes	Allows the user to call the GET, DESCRIBE, POST, PATCH and DELETE methods associated with the Person Notes REST service.
Use REST Service - Person Reference Data Lists of Values	Allows the user to call the GET method associated with the person reference data lists of values REST services.

Aggregate Privilege	Description
Use REST Service - Public Workers Read Only	Allows the user to call the GET method associated with the Public Workers REST Service.
Use REST Service - Recruiting Hierarchy Lists of Values	Allows the user to call the GET method associated with the Recruiting hierarchy lists of values REST Services.
Use REST Service - Representatives Read Only	Allows the user to call the GET method associated with the Representatives REST Service and grants access to the Representative Assistant workflow agent.
Use REST Service - Talent Person Profiles	Allows the user to call all methods associated with the Talent Person Profile REST Service. Areas of interest, areas of expertise, favorite links and tags can be managed using this aggregate privilege.
Use REST Service - Talent Person Profiles Read Only	Allows the user to call the GET method associated with the Talent Person Profile REST Service.
Use REST Service - Talent Person Public Skill Activities Read Only	Allows the user to call the GET method associated with the Public Skill Activities REST Service.
Use REST Service - Talent Person Public Skills Read Only	Allows the user to call the GET method associated with the Public Skills REST Service.
Use REST Service - Talent Profile Comparisons Read Only	Allows the user to call the GET method associated with the Talent Profile Comparisons REST service.
Use REST Service - Talent Worker Check-Ins	Allows users to call all methods with the Talent Worker Check-Ins REST service.
Use REST Service - Talent Worker Engagements by Worker Read Only	Allows the user to call the GET method associated with the Talent Worker Engagements REST Service as a worker.
Use REST Service - Time Card Entry Details Read Only	Lets the person call the Time Card Entry Details REST Service.
Use REST Service - Time Cards by Worker	Lets the worker call the Time Cards REST Service.
Use REST Service - Time Record Events	Allows users to call all methods on time record events associated with the time records REST service.
Use REST Service - Time Record Groups Read Only	Allows users to call the GET method on time record groups associated with the time records REST service.
Use REST Service - Time Records Read Only	Allows users to call the GET method on time records associated with the time records REST service.
Use REST Service - Transaction Management as Worker	Allows the user to call all methods associated with the Transaction Management as Worker REST Service.

Aggregate Privilege	Description
Use REST Service - Worker Assignments List of Values	Allows the user to call the GET method associated with the Assignments list of values REST Service.
Use REST Service - Worker Connections Read Only	Allows the user to call the GET method associated with the Worker Connections REST Service.
Use REST Service - Worker Journeys	Allows the user to call all methods associated with the Worker Journeys REST Service.
Use User Details Service	Creates or updates users during person synchronizations.
View Accrual Type Absence Plan Balance	Allows workers to view balances of the accrual type absence plans.
View Additional Assignment Info	Allows viewing of additional assignment info.
View Benefit Participant Enrollment Result by Worker	Allows workers to access benefits pages where they can view their own enrollment results.
View Benefits Additional Person Info	Allows viewing of benefits person information.
View Benefits Questionnaire Responses by Worker	Allows workers to view their benefit questionnaire responses.
View Compensation Change Statement	Allows workers to view compensation change statements after the workforce compensation cycle.
View Compensation Details for Worker	Views compensation data for a worker.
View Development Goal by Worker	View worker's own development goals.
View Eligible Jobs	Allows viewing of eligible jobs for relief in higher class.
View Employee Communities	Allows to view public employee communities and communities to which they have been invited.
View Employment Information Summary	Grants access to view a worker's employment information summary.
View HCM Person Note	Views HCM person notes
View Learner Contributions	Allows users to view a person's learning contributions.
View Learning Communities	Allows users to view learning communities they are members of.
View My Recommended Learning	Allows users to view learning items recommended to them.
View My Required Learning	Allows users to view their required learning assignments.

Aggregate Privilege	Description
View Payslip	Views payslips.
View Performance Goal by Worker	View worker's own performance goals.
View Performance Summary	Allows viewing of workers performance summary information.
View Person Address	Grants access to persons to view their own address data.
View Person Beneficiary Organizations	Allows viewing of person benefit organizations.
View Person Biographical Information	Allows access to a person's biographical information.
View Person Citizenship	Grants access to persons to view their own citizenship.
View Person Disability by Worker	Allows access to a person's disability information.
View Person Driver License	Grants access to persons to view their own driver licenses.
View Person Ethnicity	Grants access to persons to view their own ethnicity.
View Person Legislative	Grants access to persons to view their own legislative information.
View Person Name	Views persons' name related attributes.
View Person National Identifier	Grants access to persons to view national identifier.
View Person Passport	Grants access to persons to view their own passports.
View Person Religion	Grants access to persons to view their own religion.
View Person Visa or Permit	Grants access to persons to view their own visas and permits.
View Portrait Availability Card	Grants access to the availability card in the portrait, which includes schedule, absence, and accrual information.
View Portrait Contact Card	Grants access to view the contact card in the portrait, which includes phone number, e-mail, other communication methods, work location information, manager, directs and peers.
View Portrait Personal Information Card	Grants access to a person's own personal and employment information in the portrait.
View Portrait User Account Details Card	Views the User Account Details card in the Person Gallery.

Aggregate Privilege	Description
View Public Learning Communities	Allows users to view the learning communities a person is a member of.
View Requested Feedback	Allows workers and line managers to view requested feedback
View Role Guide	Allows the user to view role guides.
View Role Guide Assignment	Allows the user to view role guide assignments.
View Scheduling Availability Preferences by Worker	Allows workers to view their scheduling availability preferences in their calendar.
View Seniority Dates	Allows viewing of seniority dates.
View Total Compensation Statements	Views generated total compensation statements for individuals within their security profile.
View US Tax Jurisdictions by Worker	Allows a US employee to view their tax jurisdictions.
View Worker Assignment History Details	Allows viewing of worker's assignment history details.
View Worker Calendar by Worker	Allows workers to view their calendar.
View Worker Contract	Allows viewing of worker's employment contract details and contract extensions.
View Workforce Schedule by Worker	Allows workers to view their own workforce schedules.
View Year-End Documents	Allows users to view year-end documents for current or prior tax years.
Withdraw Resignation	Allows a worker to withdraw their own resignation

Privileges

This table lists privileges granted to duties of the Employee abstract role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Journey by Worker	Allows workers to access their own journeys.	Access Journey by Worker	Allows workers to access their own journeys.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Journey by Worker	Allows workers to access their own journeys.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Access Journey by Worker	Allows workers to access their own journeys.	Use REST Service - Worker Journey Tasks	Allows the user to call all methods associated with the Worker Journey Tasks REST Service.
Access Journey by Worker	Allows workers to access their own journeys.	Use REST Service - Worker Journey Tasks Read Only	Allows the user to call the GET method associated with the Workers Journey Tasks REST Service, to retrieve journey tasks assigned to them.
Access Learning Common Components	Allows the user to access common learning components.	Access Learning Common Components	Allows access to common components in learning self-service and administration work area.
Access Skills Center	Allows the user to access skills center.	Access Skills Center	Allows the user to access skills center.
Access Skills Center	Allows the user to access skills center.	Use REST Service - Talent Profile Types Read Only	Allows the user to call the GET method associated with the talentProfileTypes REST Service.
Access Skills Center	Allows the user to access skills center.	Use REST Service - Talent Skill Suggestions Read Only	Allows the user to call the GET method associated with the Talent Skill Suggestions REST Service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Access Touchpoints by Worker	Allows workers to access their own touchpoints.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Feedback Templates List of Values	Allows the user to call the GET method associated with the Feedback Templates List of Values REST service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Feedback Templates Read Only	Allows the user to call the GET method associated with the Feedback Templates REST service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - HCM Surveys List of Values	Allows the user to call the GET method associated with the HCM Surveys List of Values REST Service.
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Nudges	Allows the user to call all methods associated with the Nudges REST service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Touchpoints by Worker	Allows workers to access their own touchpoints.	Use REST Service - Talent Check-In Templates Read Only	Allows users to call GET and describe methods with the Talent Check-In Templates REST service.
Canadian Employee	Allows an employee within a CA legal employer to access CA specific tasks.	Manage Canadian Personal Tax Credits	Manage Canadian Personal Tax Credits
Canadian Employee	Allows an employee within a CA legal employer to access CA specific tasks.	View Canadian End of Year Tax Form	View Canadian End of Year Tax Form
Career Growth Access by Worker	Allows workers to access the Grow page.	Access Career Growth by Worker	Allows workers to access the Grow page.
Career Growth Access by Worker	Allows workers to access the Grow page.	Use REST Service - Worker Journey Tasks	Allows the user to call all methods associated with the Worker Journey Tasks REST Service.
Employee	Identifies the person as an employee.	Absence Entry Using Calendar	Allows the button Schedule Absence in the TIME work area to be secured.
Employee	Identifies the person as an employee.	Access FUSE Directory Page	Allows access to the FUSE directory page.
Employee	Identifies the person as an employee.	Access FUSE Performance and Career Planning Page	Allows access to the FUSE performance and career planning page.
Employee	Identifies the person as an employee.	Access FUSE Personal Information Page	Allows access to the FUSE personal information page.
Employee	Identifies the person as an employee.	Access HCM Common Components	Allows access to HCM common components.
Employee	Identifies the person as an employee.	Access Internal Candidate Experience	Allows to access internal career site.
Employee	Identifies the person as an employee.	Access Knowledge from HCM	Allows accessing knowledge articles from HCM pages.
Employee	Identifies the person as an employee.	Access Learner Self-Service Work Area	Allows access to the My Learning tab in the learning self-service work area.
Employee	Identifies the person as an employee.	Access My Career and Performance	Allows access to My Career and Performance page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Employee	Identifies the person as an employee.	Access My Pay	Allows access to My Pay page
Employee	Identifies the person as an employee.	Access My Time and Absences	Allows users to access the Time and Absences landing page under Me.
Employee	Identifies the person as an employee.	Access My Wellness, Corporate Social Responsibility, and Personal Brand	Allows employees to manage Wellness, Corporate Social Responsibility, and Personal Brand activities.
Employee	Identifies the person as an employee.	Access Oracle Taleo Recruiting Cloud Service	Allows access to Oracle Taleo Recruiting Cloud Service from Oracle Fusion.
Employee	Identifies the person as an employee.	Access Quick Actions	Provides function access to the Quick Actions page where users can easily see and initiate all actions available to them.
Employee	Identifies the person as an employee.	Access Tap Application	Allows access to Tap application.
Employee	Identifies the person as an employee.	Access What to Learn	Allows access to the What to Learn tab in learning self-service work area.
Employee	Identifies the person as an employee.	Align Performance Goals	Allows aligning of performance goals.
Employee	Identifies the person as an employee.	Approve Transactions	Allows ability to approve transactions
Employee	Identifies the person as an employee.	Cancel Performance Goals	Allows performance goals to be cancelled.
Employee	Identifies the person as an employee.	Claim Shifts	Allows workers to view and claim open shifts
Employee	Identifies the person as an employee.	Copy Development Goals	Allows copying of development goals.
Employee	Identifies the person as an employee.	Copy Performance Goals	Allows copying of performance goals.
Employee	Identifies the person as an employee.	Create Non-Catalog Learning Requests by Learner	Allows a non-catalog learning request to be initiated by learner

Granted Role	Granted Role Description	Privilege	Privilege Description
Employee	Identifies the person as an employee.	Create Service Request from HCM	Allows the creation of service requests from HCM pages.
Employee	Identifies the person as an employee.	Delete Development Goals	Allow development goals to be deleted.
Employee	Identifies the person as an employee.	Delete Performance Goals	Allow performance goals to be deleted.
Employee	Identifies the person as an employee.	Download Desktop Integrator	Allows to download and install Desktop Integrator.
Employee	Identifies the person as an employee.	Extend Performance Goals	Allows performance goals to be extended to another goal plan.
Employee	Identifies the person as an employee.	Give Anytime Feedback	Allows a user to give anytime feedback.
Employee	Identifies the person as an employee.	Manage Data Visualization Preference	Allows creation, modification and deletion of the user preferences for the data visualization configuration. For example, a user might prefer to view a data visualization configured initially as a horizontal Bar chart, to be displayed as a vertical Bar chart instead.
Employee	Identifies the person as an employee.	Manage Development Goal	Allows management of development goals of direct reports.
Employee	Identifies the person as an employee.	Manage Favorite Colleagues	Allows management of favorite colleagues identified by users for career guidance.
Employee	Identifies the person as an employee.	Manage Goal Management Notifications	Manage Goal Management Notifications
Employee	Identifies the person as an employee.	Manage Mentorship	Manage mentorship
Employee	Identifies the person as an employee.	Manage My Contact Information Mobile	Allows management of personal information such as phone numbers and addresses in HCM Cloud Mobile
Employee	Identifies the person as an employee.	Manage My Documents Mobile	Allows management of personal documents such as passports,

Granted Role	Granted Role Description	Privilege	Privilege Description
			and driver's license in HCM Cloud Mobile
Employee	Identifies the person as an employee.	Manage My Personal Information Mobile	Allows management of personal information such as name, and biographical information in HCM Cloud Mobile
Employee	Identifies the person as an employee.	Manage My Portrait Work Area	Allows access to the My Portrait work area.
Employee	Identifies the person as an employee.	Manage My Welcome Tab	Allows management of Welcome page.
Employee	Identifies the person as an employee.	Manage My Wellness	Allows management of employee's own wellness.
Employee	Identifies the person as an employee.	Manage My Wellness Team	Allows workers to create their own Wellness teams and manage Wellness team features.
Employee	Identifies the person as an employee.	Manage Own HCM Channel Messages	Allows a user to manage their own messages in HCM Channel Messages
Employee	Identifies the person as an employee.	Manage Performance Goal	Manage Worker Performance or Development Goals
Employee	Identifies the person as an employee.	Manage Person Allocated Checklist by Worker	Allows a worker to manage their own allocated checklists.
Employee	Identifies the person as an employee.	Manage Reports and Analytics	Allows access to the Reports and Analytics from Navigator Menu.
Employee	Identifies the person as an employee.	Manage Reputation Overview	Manage reputation overview
Employee	Identifies the person as an employee.	Manage Reputation Scores	Manage reputation scores
Employee	Identifies the person as an employee.	Manage Scheduled Processes	Allows management of Scheduled Processes
Employee	Identifies the person as an employee.	Manage Social Roles	Manage social roles
Employee	Identifies the person as an employee.	Manage Volunteering	Allows employees to manage own volunteering activities

Granted Role	Granted Role Description	Privilege	Privilege Description
Employee	Identifies the person as an employee.	Move Performance Goals	Allows performance goals to be moved to another goal plan.
Employee	Identifies the person as an employee.	Print Learning Completion Certificate	Allows access to learning completion certificate templates
Employee	Identifies the person as an employee.	Record External Learning by Learner	Allows to record external learning completion by learner
Employee	Identifies the person as an employee.	Record and View Issue	Allows recording of issues and viewing of information about the recordings.
Employee	Identifies the person as an employee.	Report Time by Web Clock	Allows the worker to report time within a web clock.
Employee	Identifies the person as an employee.	Request Deletion of Time Entries	Allows workers to request deletion of time entries.
Employee	Identifies the person as an employee.	Run Talent Profile Summary Report	Allows running of talent profile summary report.
Employee	Identifies the person as an employee.	Share Development Goals	Allows development goals to be shared with other workers.
Employee	Identifies the person as an employee.	Share Performance Goals	Allows performance goals to be shared with other workers.
Employee	Identifies the person as an employee.	Use REST Service - Activity Summaries	Allows users to manage wellness activities through Activity REST service
Employee	Identifies the person as an employee.	Use REST Service - Content Items List of Values	Allows the user to call the GET method associated with the Content Items list of values REST Service.
Employee	Identifies the person as an employee.	Use REST Service - Individual Compensation Lists of Values	Allows the user to call the GET method associated with the Individual Compensation list of values REST Services.
Employee	Identifies the person as an employee.	Use REST Service - Job Families List of Values	Allows the user to call the GET method associated with the job families list of values REST Service.
Employee	Identifies the person as an employee.	Use REST Service - Model Profiles List of Values	Allows the user to call the GET method associated with the Model Profiles list of values REST Service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Employee	Identifies the person as an employee.	Use REST Service - Questionnaire Lists of Values	Allows the user to call the GET method associated with the questionnaire lists of values REST services
Employee	Identifies the person as an employee.	Use REST Service - Scheduling Lists of Values	Allows the user to call the GET method associated with the Scheduling lists of values REST services.
Employee	Identifies the person as an employee.	Use REST Service - Time Card Lists of Values	Allows the user to call the GET method associated with the Time Card lists of values REST Services.
Employee	Identifies the person as an employee.	Use REST Service - Users and Roles Lists of Values	Allows the user to call the GET method associated with the Users and Roles lists of values REST Services.
Employee	Identifies the person as an employee.	Use REST Service - Volunteering Lists of Values	Allows access to Volunteering REST LOV services.
Employee	Identifies the person as an employee.	Use REST Service - Wellness Lists of Values	Allows access to Wellness REST LOV services.
Employee	Identifies the person as an employee.	Use REST Service - Workforce Reputation Lists of Values	Allows access to WorkforceReputation REST LOV services.
Employee	Identifies the person as an employee.	Use Time Card Templates	Lets the worker use templates when entering their time cards.
Employee	Identifies the person as an employee.	Validate Project Time and Labor Time Card	Allows access to the web service that validates project attributes on time cards.
Employee	Identifies the person as an employee.	View Calendar by Worker	Allows worker to view calendar.
Employee	Identifies the person as an employee.	View Employee Common Setup Data	Allows viewing of common setup data by an employee.
Employee	Identifies the person as an employee.	View Notification Details	Allows product specific notification details.
Employee	Identifies the person as an employee.	View Performance Goal	Review goals and goal details.

Granted Role	Granted Role Description	Privilege	Privilege Description
Employee	Identifies the person as an employee.	View Skill Recommendations	Allows the user to view and select application-generated skill recommendations.
Employee	Identifies the person as an employee.	View Team Schedule by Worker	Allows worker to view team schedule.
Employee	Identifies the person as an employee.	View Time by Calendar	Allows view of personal schedule in time calendar.
Employee	Identifies the person as an employee.	View Trading Community Common Setup	Allows viewing of common setup data through web services.
Employee	Identifies the person as an employee.	Workforce Reputation Subscription User	Allows access to the Workforce Reputation Subscription Application features.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	Manage External Payee Payment Details	Allows management of external payee payment details.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	Manage Payment Instrument Assignment	Allows creation of payment instrument assignment
Employee Bank Account Management	Manages employee bank accounts and other payment details.	Manage Third Party Bank Account	Allows update of external bank accounts.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	View Third Party Bank Account	Allows viewing of external bank accounts.
Employee Bank Account Management	Manages employee bank accounts and other payment details.	View Third Party Bank Account Assignment	Allows viewing of payment instrument assignments.
Employee Enrollment	Manages employee enrollments.	Access Benefits Calculators	Allows access to benefit calculators.
Employee Enrollment	Manages employee enrollments.	Change Beneficiaries	Allows employees to change beneficiaries outside open enrollment.
Employee Enrollment	Manages employee enrollments.	Compare Benefit Plans	Allows comparison of medical, dental and vision plans.
Employee Enrollment	Manages employee enrollments.	Elect Benefits	Allows employees to elect benefits.
Employee Enrollment	Manages employee enrollments.	Maintain Plan Beneficiary Designation	Allows maintenance of plan beneficiary designation.

Granted Role	Granted Role Description	Privilege	Privilege Description
Employee Enrollment	Manages employee enrollments.	Maintain Primary Care Provider	Allows maintenance of primary care physician.
Employee Enrollment	Manages employee enrollments.	Review Benefit Participant Enrollment Result	Allows benefit professionals to view enrollment result benefit statement.
Employee Enrollment	Manages employee enrollments.	Use REST Service - Benefit Plans Comparison List of Values	Allows users to call the GET method associated with the benefit plans comparison list of values REST service.
Employee Enrollment	Manages employee enrollments.	Use REST Service - Benefit Plans Comparison Read Only	Allows users to call the GET method associated with the benefit plans comparison REST service.
Employee Enrollment	Manages employee enrollments.	View Benefits Self Service Configuration	Allows viewing of self service configurations.
Expense Entry	Creates and updates expense items and expense reports.	Manage Bank Account for Expense Reimbursement	Allows creation and modification of expense reimbursement bank accounts for themselves.
Expense Entry	Creates and updates expense items and expense reports.	Manage Expense Report	Allows creation of expense items and expense reports. Allows updating expense items and managing submitted expense reports. Allows tracking of expense reports, expense items, and payments.
Expense Entry	Creates and updates expense items and expense reports.	Review Expense Reimbursement	Not Available
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server

Granted Role	Granted Role Description	Privilege	Privilege Description
Financials Intelligent Agent Runtime	Allows end users to access intelligent agents within the Financials product family.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Grow Coach Access	Grants access to the Grow Coach.	Access Grow Coach Workspace	Allows the user to access grow coach workspace agentic app.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Department Connections Read Only	Allows users to call the GET method associated with the department connections REST Service.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Department Searches	Allows the user to search for departments in HCM Connections.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Location Connections Read Only	Allows users to call the GET method associated with the location connections REST Service.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Person Notes Visibility Options List of Values	Allows the user to call the GET method associated with the Person Notes Visibility Options list of values REST service.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Profile Tag Searches	Allows the user to search for profile tags using REST services.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Worker Searches	Allows the user to search for workers in HCM Connections.
HCM Connections REST Services	Grants access to REST services used by HCM connections UI	Use REST Service - Workers	Allows the user to call all methods associated with the Workers REST Service.
Intake Request Management as Requester	Allows requester to access intake requests.	Cancel Intake Request	Allows a procurement agent to cancel an intake request.
Intake Request Management as Requester	Allows requester to access intake requests.	Change Intake Request	Allows a user to change a submitted intake request.
Intake Request Management as Requester	Allows requester to access intake requests.	Create Intake Request	Allows a requester to create and submit intake requests.
Intake Request Management as Requester	Allows requester to access intake requests.	Search Intake Requests as Requester	Allows a requester to search for intake requests.

Granted Role	Granted Role Description	Privilege	Privilege Description
Intake Request Management as Requester	Allows requester to access intake requests.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Intake Request Management as Requester	Allows requester to access intake requests.	View Intake Request	Allows a user to review an intake request.
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	Manage Intake Request Reviews	Allow the user to manage intake request reviews (intake request review assigned journeys).
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	Manage System Searches	Allows users to manage HCM system searches.
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Intake Request Review Management	Allows user to create and manage intake request reviews (intake request review assigned journeys).	View Global Journeys	Allows users to view global journeys. Viewing of personal journeys is not restricted by this privilege.
Intake Request Review Task Management By Worker	Allows user to access intake request review tasks (intake request review assigned journey tasks).	Manage Intake Request Review Tasks By Worker	Allow the user to access intake request review tasks (intake request review assigned journey tasks).
Intake Request Review Task Management By Worker	Allows user to access intake request review tasks (intake request review assigned journey tasks).	Use REST Service - Assigned Journey Tasks	Allows the user to call all methods associated with the Assigned Journey Tasks REST Service.
Intake Request Review Task Management By Worker	Allows user to access intake request review tasks (intake request review assigned journey tasks).	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Manage Career by Worker	Allows a worker to manage their career.	Access Internal Candidate Experience	Allows to access internal career site.
Manage Career by Worker	Allows a worker to manage their career.	Manage Career	Allows management of a worker's career.
Manage Career by Worker	Allows a worker to manage their career.	Manage Careers of Interest	Allows management of the careers of interest for a worker.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Career by Worker	Allows a worker to manage their career.	Use REST Service - Career Searches	Allows the user to call the careerSearches REST service.
Manage Career by Worker	Allows a worker to manage their career.	Use REST Service - Content Items List of Values	Allows the user to call the GET method associated with the Content Items list of values REST Service.
Manage Career by Worker	Allows a worker to manage their career.	Use REST Service - Talent Model Profiles Read Only	Allows the user to call the GET method associated with the Talent Model Profiles REST Service.
Manage Career by Worker	Allows a worker to manage their career.	Use REST Service - Talent Profile Types Read Only	Allows the user to call the GET method associated with the talentProfileTypes REST Service.
Manage Contextual Journey by Worker	Allows workers to access and manage their own contextual journeys.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Manage My Account	Manages worker roles.	Delete Roles Delegated To Me	Allows deleting role delegations delegated to user.
Manage My Account	Manages worker roles.	Manage User Account and My Account	Allows access to the page components that are common to My Account and Manage User Account.
Manage My Account	Manages worker roles.	Reset Password	Allows reset password links to be emailed to users.
Manage My Account	Manages worker roles.	View Own Account Details	Allows viewing of one's own account details.
Manage Offline Learning	Allows download and management of learning item content on mobile device in learning self-service	Manage Offline Learning	Allows download and management of learning item content on mobile device in learning self-service
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	Manage Payables Invoice List Activities	Allows access to the Payables invoice list to review invoices and clear invoice exceptions.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	Manage Payables Invoices	Allows searching and viewing of Oracle Fusion Payables documents.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	View Payables Invoice	Allows viewing of Oracle Fusion Payables invoices without performing a search.

Granted Role	Granted Role Description	Privilege	Privilege Description
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.	View Payables Invoice Holds	Allows viewing of Oracle Fusion Payables invoice holds.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Create Performance Document by Worker	Allows creation of performance documents by workers.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Print Performance Document	Allows printing of performance documents
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Provide Performance Evaluation Feedback	Allows performance evaluation feedback to be provided.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Select Feedback Participants	Allows selection of feedback participants.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	Track Participant Feedback Status	Allows tracking of participant feedback status.
Performance Management Worker	Adds content to rate to performance document and evaluates self.	View Performance Information on Worker Dashboard	Allows a worker to view the worker's own performance information.
Person Communication Methods Management	Grants access to the employee, contingent worker and Human Resource Specialist to manage the phones, emails and other communication methods in the portrait.	Manage Person Communication Method	Allows access to a person's other communication methods. For example, instant message, LinkedIn and so on.
Person Communication Methods Management	Grants access to the employee, contingent worker and Human Resource Specialist to manage the phones, emails and other communication methods in the portrait.	Manage Person Email	Allows access to a person's emails.
Person Communication Methods Management	Grants access to the employee, contingent worker and Human Resource Specialist to manage the phones, emails and other communication methods in the portrait.	Manage Person Phone	Allows access to a person's phones.
Person Communication Methods View	Grants access to the employee, contingent worker and Human Resource Specialist to view the phones, emails and other	Manage Person Communication Method	Allows access to a person's other communication methods. For example, instant message, LinkedIn and so on.

Granted Role	Granted Role Description	Privilege	Privilege Description
	communication methods in the portrait.		
Person Communication Methods View	Grants access to the employee, contingent worker and Human Resource Specialist to view the phones, emails and other communication methods in the portrait.	Manage Person Email	Allows access to a person's emails.
Person Communication Methods View	Grants access to the employee, contingent worker and Human Resource Specialist to view the phones, emails and other communication methods in the portrait.	Manage Person Phone	Allows access to a person's phones.
Procurement Requester	Prepares requisitions for themselves.	Cancel Purchase Order as Procurement Requester	Allows a procurement requester to initiate cancellation of a purchase order.
Procurement Requester	Prepares requisitions for themselves.	Change Purchase Order as Procurement Requester	Allows a procurement requester to initiate changes to an approved purchase order.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Project Time Entry Mobile	Allows the user to report time and manage time cards on mobile device.	Report Time for Project Tasks	Allows reporting of time and management of time cards on mobile devices.
Project Time Entry Mobile	Allows the user to report time and manage time cards on mobile device.	View Project Expenditure Types Service	Allows access to the service to get the list of expenditure types.
Project Time Entry Mobile	Allows the user to report time and manage time cards on mobile device.	View Project Financial Tasks Service	Allows access to the service to view financial tasks.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	GET Product Management Index REST	Allows access to view indexed attributes.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Get Item Rest	Allows query access to items through the REST API.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Get Search View REST	Allows query of search views.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.

Granted Role	Granted Role Description	Privilege	Privilege Description
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
Purchasing List of Values Requester Change Order	Allows Requester to access purchasing list of values to initiate a change order.	View Product Management Search	Allows access to view Product Management Search.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Correct Self-Service Receiving Receipt	Allows correction of self-service receipts.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Create Self-Service Receiving Receipt	Allows creation of self-service receipts.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Manage Inventory Transfer Order	Allows management of inventory transfer orders.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Manage Self-Service Receiving Receipt Return	Allows return of self-service receipts.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Monitor Self-Service Receiving Receipt Work Area	Allows access to the self-service receipts work area.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Process Inventory Nudges	Privilege to process nudges in inventory management.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Review Inbound Shipment Details	Allows viewing of inbound shipment details.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Review Receiving Receipt Summary	Allows review of receipt summary information.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	Review Self-Service Receiving Receipt	Allows review of self-service receipts.

Granted Role	Granted Role Description	Privilege	Privilege Description
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	View Purchase Order	Allows a user to review a purchase order.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	View Receiving Receipt Notification	Allows viewing of receipt notifications.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	View Requisition	Allows users to view requisition details.
Receiving Management Requester	Allows a requester in Oracle Fusion iProcurement to receive items, correct receipts, and return receipts.	View Work Confirmation	Allows a user to review a work confirmation.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Create Receipt with the Responsive Self Service Receiving Application	Privilege to access the new my receipts work area and create self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Get Trading Partner Item Relationship Rest	Allows query access to trading partner Item relationship through the REST API.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Process Inventory Nudges	Privilege to process nudges in inventory management.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Return Receipt with the Responsive Self Service Receiving Application	Privilege to return self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	Update Receipt with the Responsive Self Service Receiving Application	Privilege to update self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Inbound Shipment Using Responsive Receiving Application	Allows viewing an inbound shipment using the responsive receiving application.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Inbound Shipment for Business Unit by Web Service	Allows viewing an inbound shipment for a business unit by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Inventory Transfer Order	Allows access to view inventory transfer orders.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Purchase Order	Allows a user to review a purchase order.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Receipt Summary and Transaction History using Responsive Receiving	Privilege to view receipt summary and transaction history using responsive receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Receipt with the Responsive Self Service Receiving Application	Privilege to view self service receipts using the responsive version of Oracle Self Service Receiving.
Receiving Self Service Responsive Application User	Creates, updates, and returns receipts using the Responsive Self Service Receiving Application.	View Shipment Using Responsive Shipping	Allows viewing shipment details by using a shipment number. This privilege can't be used as a standalone privilege to view shipments.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Create Requisition for Internal Material Transfers	Allows users to create requisitions for internal material transfers.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Create Requisition with Changes to Deliver-to Location	Allows users to change deliver-to locations on requisition lines.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Create Requisition with Noncatalog Requests	Allows users to create requests for items not available through the procurement catalog.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing	Create Requisition with One Time Location	Allows users to enter one-time address on requisition lines.

Granted Role	Granted Role Description	Privilege	Privilege Description
	deliver-to locations on requisition lines.		
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Distribute Award Project Costs and Quantities	Allows user to initiate the award distribution process that will match the costs and quantities provided to available award funding patterns to distribute.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Best Or All Available Supply Sources	Get the best supply source or all the available supply sources to fulfill an internal material transfer request.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Internal Transfer Requesting Organization Price	Get the transfer price to the requesting organization for an internal transfer order.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Item Category Rest	Allows query access to item categories through the REST API.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing deliver-to locations on requisition lines.	Get Project Setups	Allows access to list of values for various Projects setup related business objects that will be consumed cross pillars using REST services or BIP reports.
Requisition Self Service User	Manages requisitions including creating, searching, and viewing requisitions, creating noncatalog requests, creating requisitions with one-time locations, and changing	Manage Inventory Transfer Order	Allows management of inventory transfer orders.

Use REST Service - Eligible Contacts List of Values	Allows the user to call the GET method associated with the Eligible Contacts list of values REST Service.	Use REST Service - Eligible Contacts List of Values	Allows the user to call the GET method associated with the Eligible Contacts list of values REST Service.
Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service. Use this duty role when granting manage access to person documentation data.	Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service.
Use REST Service - Worker Bank Accounts	Allows the user to manage worker bank accounts using REST.	Manage External Payee Payment Details	Allows management of external payee payment details.
Use REST Service - Worker Bank Accounts	Allows the user to manage worker bank accounts using REST.	Manage Payment Instrument Assignment	Allows creation of payment instrument assignment
Use REST Service - Worker Bank Accounts	Allows the user to manage worker bank accounts using REST.	Manage Third Party Bank Account	Allows update of external bank accounts.
Use REST Service - Worker Bank Accounts	Allows the user to manage worker bank accounts using REST.	View Bank and Bank Branches Through REST API	Allows access to bank and bank branches list of values REST APIs.
Use REST Service - Worker Bank Accounts Read Only	Allows the user to view worker bank accounts using REST.	View Bank and Bank Branches Through REST API	Allows access to bank and bank branches list of values REST APIs.
Use REST Service - Worker Bank Accounts Read Only	Allows the user to view worker bank accounts using REST.	View Third Party Bank Account	Allows viewing of external bank accounts.
Use REST Service - Worker Bank Accounts Read Only	Allows the user to view worker bank accounts using REST.	View Third Party Bank Account Assignment	Allows viewing of payment instrument assignments.
Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.	Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Granted Role	Granted Role Description	Privilege	Privilege Description
Worker Time Card Entry	Reports time by time card, as a worker.	Create Time Card	Allows the worker to create a new time card.
Worker Time Card Entry	Reports time by time card, as a worker.	Manage Time Cards by Worker	Allows the worker to view, create, edit, or delete time cards from the Manage Time Cards page.
Worker Time Card Entry	Reports time by time card, as a worker.	Search Time Cards	Allows the worker to search for existing time cards.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Define Talent Profile	Allows definition of talent profile.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Define Talent Profile Item	Allows definition of talent profile item.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Manage Careers of Interest	Allows management of the careers of interest for a worker.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Manage Person Talent Profile	Allows management of talent profile for a person.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Match Talent Profile	Allows access to perform best fit analysis.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	Update Talent Profile Item	Allows update to talent profile items.
Workforce Profile Worker	Performs workforce profile duties as an employee or contingent worker.	View Talent Profile	Allows management of profile task flows that are common to model and person profiles.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Employee abstract role.

Business Object	Policy Description	Policy Store Implementation
AI Agent	An Employee can view ai agent for financials ai agents	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent (Data) Resource: AI Agent
AI Agent Tool	An Employee can view ai agent tool for financials ai agent tools	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent Tool (Data) Resource: AI Agent Tool
AI Agent Workflow	An Employee can view ai agent workflow for financials ai agent workflows	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent Workflow (Data) Resource: AI Agent Workflow
Absence Type	An Employee can choose absence types for themselves	Role: Maintain Absence Records Privilege: Choose Absence Types (Data) Resource: Absence Type
Absence Type	An Employee can choose absence types for themselves	Role: Submit Absence Bid Privilege: Choose Absence Types (Data) Resource: Absence Type
Absence Type	An Employee can choose absence types for themselves	Role: Use REST Service - Absence Types List of Values Privilege: Choose Absence Types (Data) Resource: Absence Type
Application Attachment	A Employee can delete application attachment for items, item revisions, catalogs, categories, and trading partner items that use attachments.	Role: Employee Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	A Employee can maintain application attachment for items, item revisions, catalogs, categories, and trading partner items that use attachments.	Role: Employee Privilege: Update Application Attachment Resource: Application Attachment
Application Attachment	A Employee can view application attachment for items, item revisions, catalogs, categories, and trading partner items that use attachments.	Role: Employee Privilege: Read Application Attachment Resource: Application Attachment

Business Object	Policy Description	Policy Store Implementation
Application Attachment	An Employee can delete application attachment for the purchase order categories including miscellaneous, to supplier, to buyer, to receiver, to approver, and to payables	Role: Procurement Requester Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	An Employee can read application attachment for the negotiation categories including miscellaneous, to approver, to buyer, to payables, to receiver, and to supplier	Role: Procurement Requester Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	An Employee can read application attachment for the purchase order categories including document, miscellaneous, to supplier, to buyer, to receiver, to approver, and to payables	Role: Procurement Requester Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	An Employee can update application attachment for the purchase order categories including miscellaneous, to supplier, to buyer, to receiver, to approver, and to payables	Role: Procurement Requester Privilege: Update Application Attachment Resource: Application Attachment
Application Reference Territory	An Employee can choose application reference territory for countries in their country security profile	Role: Change Person Marital Status Privilege: Choose Application Reference Territory (Data) Resource: Application Reference Territory
Application Reference Territory	An Employee can choose application reference territory for countries in their country security profile	Role: Use REST Service - HCM Countries List of Values Privilege: Choose Application Reference Territory (Data) Resource: Application Reference Territory
Areas of Responsibility Mapping	An Employee can view areas of responsibility mapping for areas of responsibility for which the subject is in their person and assignment security profile	Role: Use REST Service - Areas of Responsibility Mapping Read Only Privilege: View Areas of Responsibility Mapping (Data) Resource: Areas of Responsibility Mapping
Assignment Grade	An Employee can choose assignment grade for all grades in the enterprise	Role: Use REST Service - Grades List of Values Privilege: Choose Assignment Grade (Data) Resource: Assignment Grade

Business Object	Policy Description	Policy Store Implementation
Beneficiary Organization	An Employee can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Beneficiary Organization
Benefit Covered Dependent	An Employee can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Covered Dependent
Benefit Participant Enrollment Action	An Employee can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Participant Enrollment Action
Benefit Participant Enrollment Result	An Employee can manage benefit participant enrollment result for themselves	Role: Manage Benefit Participant Enrollment Result by Worker Privilege: Manage Benefit Participant Enrollment Result (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	An Employee can report person for themselves	Role: Employee Enrollment Privilege: Report Person (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	An Employee can review benefit participant enrollment result for themselves	Role: Employee Enrollment Privilege: Review Benefit Participant Enrollment Result (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	An Employee can view benefit participant enrollment result for themselves	Role: Manage Benefit Participant Enrollment Result by Worker Privilege: View Benefit Participant Enrollment Result (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	An Employee can view benefit participant enrollment result for themselves	Role: View Benefit Participant Enrollment Result by Worker Privilege: View Benefit Participant Enrollment Result (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Benefit Participant Enrollment Result
Benefit Participant Enrollment Result	An Employee can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Participant Enrollment Result
Benefit Participant Potential Life Event	An Employee can self report a life event for themselves	Role: Self Report a Life Event Privilege: Self Report a Life Event (Data) Resource: Benefit Participant Potential Life Event
Benefit Participant Rate	An Employee can view worker benefits portrait card for themselves	Role: Portrait Benefits Privilege: View Worker Benefits Portrait Card (Data) Resource: Benefit Participant Rate
Benefit Person Benefit Group	An Employee can manage benefit person benefit group for people and assignments in their person and assignment security profile	Role: Use REST Service - Person Benefit Groups Privilege: Manage Benefit Person Benefit Group (Data) Resource: Benefit Person Benefit Group
Benefit Person Benefit Group	An Employee can view person benefit group for people and assignments in their person and assignment security profile	Role: Use REST Service - Person Benefit Groups Privilege: View Person Benefit Group (Data) Resource: Benefit Person Benefit Group
Benefit Person Habit	An Employee can manage benefit person info for themselves	Role: Manage Benefits Additional Person Info Privilege: Manage Benefit Person Info (Data) Resource: Benefit Person Habit
Benefit Person Habit	An Employee can view benefit person info for themselves	Role: Manage Benefits Additional Person Info Privilege: View Benefit Person Info (Data) Resource: Benefit Person Habit
Benefit Person Habit	An Employee can view benefit person info for themselves	Role: View Benefits Additional Person Info Privilege: View Benefit Person Info (Data) Resource: Benefit Person Habit

Business Object	Policy Description	Policy Store Implementation
Benefit Questionnaire Responses	An Employee can manage benefits questionnaire responses for themselves	Role: Manage Benefits Questionnaire Responses by Worker Privilege: Manage Benefits Questionnaire Responses (Data) Resource: Benefit Questionnaire Responses
Benefit Questionnaire Responses	An Employee can view benefits questionnaire responses for themselves	Role: Manage Benefits Questionnaire Responses by Worker Privilege: View Benefits Questionnaire Responses (Data) Resource: Benefit Questionnaire Responses
Benefit Questionnaire Responses	An Employee can view benefits questionnaire responses for themselves	Role: View Benefits Questionnaire Responses by Worker Privilege: View Benefits Questionnaire Responses (Data) Resource: Benefit Questionnaire Responses
Benefit Relation	An Employee can manage benefit relation for themselves	Role: Employee Enrollment Privilege: Manage Benefit Relation (Data) Resource: Benefit Relation
Cash Advance Approval Note	An Employee can manage expense report approval note for themselves	Role: Expense Entry Privilege: Manage Expense Report Approval Note (Data) Resource: Cash Advance Approval Note
Check In Document	An Employee can create check-in document for people in their person and assignment security profile	Role: Use REST Service - Talent Worker Check-Ins Privilege: Create Check-In Document (Data) Resource: Check In Document
Check In Document	An Employee can create check-in document for themselves	Role: View Performance Summary Privilege: Create Check-In Document (Data) Resource: Check In Document
Check In Document	An Employee can manage check-in document for themselves	Role: Manage Check-In Document Privilege: Manage Check-In Document (Data) Resource: Check In Document

Business Object	Policy Description	Policy Store Implementation
Check In Document	An Employee can view check-in document for people in their person and assignment security profile	Role: Use REST Service - Talent Worker Check-Ins Privilege: View Check-In Document (Data) Resource: Check In Document
Check In Document	An Employee can view check-in document for themselves	Role: View Performance Summary Privilege: View Check-In Document (Data) Resource: Check In Document
Checklist Role Maps	An Employee can view journey template for others for journey templates which allow them to view assigned journeys for persons and assignments in their person and assignment security profile	Role: Use REST Service - Worker Journeys Privilege: View Journey Template for Others (Data) Resource: Checklist Role Maps
Checklist Role Maps	An Employee can view journey template for self for journey templates which allow them to view their own assigned journeys	Role: Use REST Service - Worker Journeys Privilege: View Journey Template for Self (Data) Resource: Checklist Role Maps
Compensation Allocation	An Employee can view compensation change statement for themselves	Role: View Compensation Change Statement Privilege: View Compensation Change Statement (Data) Resource: Compensation Allocation
Corporate Card Transaction Dispute Note	An Employee can manage expense for themselves	Role: Expense Entry Privilege: Manage Expense (Data) Resource: Corporate Card Transaction Dispute Note
Delegated Role	An Employee can manage role delegations for persons and assignments in their person and assignment security profile	Role: Manage Role Delegations Privilege: Manage Role Delegations (Data) Resource: Delegated Role
Delegated Role	An Employee can view role delegations for persons and assignments in their person and assignment security profile	Role: Manage Role Delegations Privilege: View Role Delegations (Data) Resource: Delegated Role

Business Object	Policy Description	Policy Store Implementation
Department	An Employee can choose department for departments in their organization security profile	Role: Use REST Service - Departments List of Values Privilege: Choose Department (Data) Resource: Department
Employee Community	An Employee can manage employee communities for employee communities for which they are owner or co-owner	Role: Manage Employee Communities Privilege: Manage Employee Communities (Data) Resource: Employee Community
Employee Community	An Employee can view employee communities for public employee communities and communities to which they have been invited	Role: View Employee Communities Privilege: View Employee Communities (Data) Resource: Employee Community
Expense	An Employee can manage expense for themselves	Role: Expense Entry Privilege: Manage Expense (Data) Resource: Expense
Expense Report	An Employee can manage expense report for themselves	Role: Expense Entry Privilege: Manage Expense Report (Data) Resource: Expense Report
Expense Report Approval Note	An Employee can manage expense report approval note for themselves	Role: Expense Entry Privilege: Manage Expense Report Approval Note (Data) Resource: Expense Report Approval Note
Guided Journey Response	An Employee can manage guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: Manage Guided Journey Response (Data) Resource: Guided Journey Response
Guided Journey Response	An Employee can view guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: View Guided Journey Response (Data) Resource: Guided Journey Response

Business Object	Policy Description	Policy Store Implementation
HCM Approval Process Definition	An Employee can review approval transactions as business user for transactions in their transactions security profile	Role: Use REST Service - Transaction Management as Worker Privilege: Review Approval Transactions as Business User (Data) Resource: HCM Approval Process Definition
HCM Note	An Employee can hide hcm person public note for public notes that are about themselves	Role: Hide HCM Person Public Note Privilege: Hide HCM Person Public Note (Data) Resource: HCM Note
HCM Note	An Employee can manage hcm nonperson note for nonperson notes that they created	Role: Manage HCM Nonperson Note Privilege: Manage HCM Nonperson Note (Data) Resource: HCM Note
HCM Note	An Employee can manage hcm person note for all types of person notes that they created	Role: Manage HCM Person Note Privilege: Manage HCM Person Note (Data) Resource: HCM Note
HCM Note	An Employee can view hcm person note for all types of person notes that they created	Role: Use REST Service - Person Notes Privilege: View HCM Person Note (Data) Resource: HCM Note
HCM Note	An Employee can view hcm person note for all types of person notes that they created	Role: View HCM Person Note Privilege: View HCM Person Note (Data) Resource: HCM Note
HCM Note	An Employee can view hcm person public note for public person notes that are about people in their public person security profile	Role: Use REST Service - Person Notes Privilege: View HCM Person Public Note (Data) Resource: HCM Note
HCM Note	An Employee can view hcm person public note for public person notes that are about people in their public person security profile	Role: View HCM Person Note Privilege: View HCM Person Public Note (Data) Resource: HCM Note
HCM Note	An Employee can view hcm person shared note for shared person notes that are about people in their person security profile	Role: Use REST Service - Person Notes Privilege: View HCM Person Shared Note (Data) Resource: HCM Note

Business Object	Policy Description	Policy Store Implementation
HCM Note	An Employee can view hcm person shared note for shared person notes that are about themselves and that have been shared with them	Role: View HCM Person Note Privilege: View HCM Person Shared Note (Data) Resource: HCM Note
HCM Pending Transaction Header	An Employee can review approval transactions as business user for transactions initiated by persons in their person security profile	Role: Use REST Service - Transaction Management as Worker Privilege: Review Approval Transactions as Business User (Data) Resource: HCM Pending Transaction Header
HCM Person Note Shared with Peers	An Employee can view hcm person note shared with peers for person notes shared with peers of the note recipient	Role: View HCM Person Note Privilege: View HCM Person Note Shared with Peers (Data) Resource: HCM Person Note Shared with Peers
HR Document Type	An Employee can view document type for document types in their document type security profile	Role: Manage Person Documentation by Worker Privilege: View Document Type (Data) Resource: HR Document Type
HR Job	A Employee can choose hr job for all jobs in the enterprise	Role: Employee Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	An Employee can choose hr job for all jobs in the enterprise	Role: Use REST Service - Jobs List of Values Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	An Employee can view hr job for all jobs in the enterprise	Role: View Employment Information Summary Privilege: View HR Job (Data) Resource: HR Job
Help Topic	An Employee can view secured help content for all secured help content they are authorized	Role: View Secured Help Content Privilege: View Secured Help Content Resource: Help Topic

Business Object	Policy Description	Policy Store Implementation
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item Asset Maintenance Group (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item Attribute (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item Basic (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item Costing Group (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item General Planning Group (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item Inventory Group (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item Invoicing Group (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item Lead Times Group (Data) Resource: Item
Item	A Employee can maintain item for the items they have access to in item and inventory organizations	Role: Employee Privilege: Maintain Item MRP and MPS Group (Data)

Business Object	Policy Description	Policy Store Implementation

Mass Evaluate Performance Documents by Manager	Allows mass manager evaluation of performance documents.

Duty Role	Description
Nonworker Addition	Adds nonworkers.
Pending Worker Addition and Hire	Adds and hires pending workers.
Performance Management Line Manager	Views performance documents from line manager dashboard.
Performance Management Transaction Analysis	Analyzes Workforce Performance Management transactional information
Share Data Access Transaction Analysis	Analyzes share data access requests.
Succession Planning Guide Access	Grants access to the Succession Planning Guide Agent
Talent Calibration and Review Workspace Access	Grants access to the Talent Calibration and Review Workspace
Talent Management Assistant Access	Grants access to the Talent Management Assistant Agent
Talent Summary Generator Access	Generates the talent summary of a person
Team Goals Assistant Access	Grants access to team goals assistant.
Time and Labor Transaction Analysis	HCM Time and Labor Transaction Analysis Duty Role
Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service. Use this duty role when granting manage access to person documentation data.
Use REST Service - Succession Management Lists of Values	Allows the user to call the GET method associated with the Succession Management list of values REST Services.
Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
Vacancy Transaction Analysis	HCM Vacancy Transaction Analysis Duty Role
View Succession Org Chart by Manager	Allows a manager to view the succession org chart.
View Team Skills as Manager	Allows a manager to view team skills.
Workforce Assignment Salary Transaction Analysis	Analyses assignment and salary transactional information
Workforce Model Plan Line Manager	Manages workforce model plans, including creating and editing the plans.

Duty Role	Description
Workforce Modeling Transaction Analysis	Analyzes Workforce Modeling transactional information
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.
Workforce Profile Transaction Analysis	Analyzes Workforce Profile transactional information.
Workforce Scheduling Transaction Analysis	Analyses workforce scheduling transactional information
Workforce Transaction Analysis	Analyzes Workforce transactional information.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Line Manager abstract role.

Aggregate Privilege	Description
Access Person Gallery	Searches worker deferred data and views the portrait page.
Add Worker Assignment	Allows adding of a worker assignment.
Assign Public Skill as Manager	Allows a manager to assign public skills to the workers in their manager hierarchy.
Change Employment Start Dates	Allows changing of employment start dates for workers.
Change Worker Location	Changes persons' locations.
Change Worker Manager	Changes persons' managers.
Change Worker Working Hour	Changes the working hours of persons.
Compare HCM Information	Compares workers, jobs, positions, and any combinations of these objects.
Create Anytime Performance Document	Allows creation of anytime performance documents
Create Mass Check-Ins By Manager	Allows managers to mass create check-in documents
Create Non-Catalog Learning Request by Learner Manager	null

Aggregate Privilege	Description
Create Succession Plan for Worker	Create succession plans.
Create Work Relationship	Adds work relationships to persons.
Delete Time Cards by Line Manager	Allows the line manager to delete time cards. Applies only to the Redwood experience.
Edit Person Career Planning	Allows editing the Person Career Planning.
Edit Person Skills and Qualifications	Allows editing the Person Skills and Qualifications.
Edit Succession Plan and Manage Candidates	Manages succession plan candidates.
Edit Time Zone Overrides	Allows users to edit time zone overrides for a worker.
Edit User Name	Updates the user name associated with a person.
Maintain Absence Records	Allows workers to enter, update and delete their absence records.
Manage Attendance Violations by Line Manager	Lets line managers manage worker attendance violations.
Manage Availability Patterns	Allows users to create, delete, and update availability patterns.
Manage Cash Disbursements	Allows administrator to dispense part of an accrual plan balance for payment.
Manage Check-In Document	Allows to create, view, edit and delete check-in document for a worker.
Manage Costing of Position in Employment Processes	Allows user to manage costing at position level within employment processes.
Manage Development Goal by Manager	Manages development goals of subordinates.
Manage Direct Report	Manages direct reports.
Manage Donations	Allows creation and viewing of absence donations.
Manage Eligible Jobs	Allows managing of eligible jobs for relief in higher class.
Manage Employee Payroll in Employment Processes	Allows user to manage employee's payroll within employment processes.
Manage HCM Person Note	Views and manages all types of HCM person notes

Aggregate Privilege	Description
Manage Individual Compensation	Privilege to manage individual compensation awards for workers within the user's security profile.
Manage Learning Communities	Allows users to create learning communities.
Manage Learning Community Required Members	Allows adding required members to a community.
Manage Learning Self-Service Tutorials	Allows users to author tutorials.
Manage Learning Self-Service Videos	Allows users to publish and edit videos.
Manage My Team Posts	Allows managers to send posts to their team members.
Manage My Vacancies	Allows management of vacancies that report to the logged in user.
Manage Onboarding by Manager	Allows manager to manage the onboarding tasks.
Manage Performance Goal by Manager	Manages performance goals of subordinates.
Manage Person Documentation	Manages documents.
Manage Person Identifiers for External Applications	Manages person identifiers for external applications.
Manage Recommended Learning	Allows users to recommend learning and view recommendations received.
Manage Required Learning by Learner Manager	Allows managers to create and manage required assignments.
Manage Salaries	Privilege to manage off-cycle salary adjustments as a stand alone transaction or as part of a larger business process such as a promotion or transfer.
Manage Schedules and Exceptions Assignment	Manages the association of schedules to an assignment. This role is associated with the line manager or HR specialist.
Manage Time Change Requests by Line Manager	Allows the line manager to see and approve time change requests data for workers.
Manage Time Entries by Line Manager	Allows line managers to create, edit, and delete time entries for the workers who report to them.
Manage User Roles	Allows management of user roles assignments.
Manage Vacancy	Allows management of vacancies.

Aggregate Privilege	Description
Manage Voluntary Learning by Learner Manager	Allows managers to create and manage voluntary assignments.
Manage Work Patterns by Line Manager	Allows line managers to create, edit and delete work patterns for a worker.
Manage Worker Checklist	Manages checklist definitions.
Manage Worker Contract	Allows update of worker's employment contract details and add, update and delete of contract extensions.
Manage Worker Information Sharing	Allows sharing of person information with internal and external recipients. Used in the non-responsive UI.
Manage Workforce Compensation Budgets by Line Manager	Manages compensation budgets by distributing and publishing budgets to lower manager.
Manage Workforce Schedule by Line Manager	Allows line managers to manage the workforce schedules for departments to which their subordinates are assigned
Moderate User Generated Learning	Allows access to moderate and approve self-service learning items.
Plan Absences by Manager	Allows managers to plan absences for their reports.
Print Worker Portrait	Grants access to the portrait maintenance duties for the portrait cards.
Promote Worker	Promotes persons.
Promote Worker and Change Position by Manager	Allows managers to promote workers and change positions.
Record External Learning by Learner Manager	Allows to record external learning completion by learner manager
Report Manager Transaction Dashboard	Reports Manager Transaction Dashboard
Report My Vacancies	Allows reporting of vacancies that report to the logged in user.
Request Feedback	Allows to request feedback
Request a Position Change	Allows requesting a position change.
Share Personal Data Access	Allows sharing of access to personal data.

Aggregate Privilege	Description
Share Personal Information	Allows sharing of personal information.
Submit Absence Bid by Manager	Allows managers to submit absence bids.
Submit Time Cards by Line Manager	Allows the line manager to submit time cards they're not allowed to edit. Applies only to the Redwood experience.
Submit a Payroll Flow	Allows users to run scheduled processes that are included in payroll flows. When granting this aggregate privilege to a custom role you should also grant the Submit a Payroll Process or Report aggregate privilege. ORA_PAY_PROCESS_AND_REPORT_SUBMISSION_DUTY.
Terminate Employment	Terminates work relationships or assignments.
Transfer Worker	Transfers persons.
Use REST Service - Absence Business Titles List of Values	Allows users to call the GET method associated with the Absence Business Titles REST service.
Use REST Service - Absence Types List of Values	Allows users to call the GET method associated with the Absence Types REST service.
Use REST Service - Development Goals Read Only	Allows users to call GET and describe methods with the Development Goals REST service.
Use REST Service - Feedback Requests by Worker or Manager	Allows the user to call the POST method associated with the Feedback Requests REST service.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - Journey Allocations	Allows the user to call all methods associated with the Journey Allocations REST Service.
Use REST Service - Journey Categories List of Values	Allows the user to call the GET method associated with the Journey Categories List of Values REST Service.
Use REST Service - Journey Scheduled Allocations	Allows the user to call all methods associated with the Journey Scheduled Allocations REST Service.
Use REST Service - Journey Task Library	Allows the user to call all methods associated with the Journey Task Library REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.

Aggregate Privilege	Description
Use REST Service - Journeys Read Only	Allows the user to call the GET method associated with the Journeys REST Service.
Use REST Service - Legislative Data Groups List of Values	Allows the user to call the GET method associated with the Legislative Data Groups LOV REST Service.
Use REST Service - Manager Connections Read Only	Allows the user to call the GET method associated with the Manager Connections REST Service.
Use REST Service - Nudge Cards	Allows the user to call all methods associated with the Nudge Cards REST service.
Use REST Service - Performance Goals List of Values	Allows the user to call the GET method associated with the Performance Goals List of Values REST Service.
Use REST Service - Performance Goals Read Only	Allows the user to call the GET method associated with the Performance Goals REST service.
Use REST Service - Person Reference Data Lists of Values	Allows the user to call the GET method associated with the person reference data lists of values REST services.
Use REST Service - Person Skills Searches	Allows the user to call the Person Skills Searches REST Services.
Use REST Service - Public Absences Read Only	Allows users to call the GET method with the Public Absences REST service.
Use REST Service - Public Workers Read Only	Allows the user to call the GET method associated with the Public Workers REST Service.
Use REST Service - Representatives Read Only	Allows the user to call the GET method associated with the Representatives REST Service and grants access to the Representative Assistant workflow agent.
Use REST Service - Salaries With Analytics Read Only	Allows the user to call the GET method associated with the worker salaries REST Service, that returns salary along with analytical attributes.
Use REST Service - Succession Org Chart Read Only	Allows the user to call the GET method associated with the Succession Org Chart REST Service.
Use REST Service - Talent Performance Mass Evaluations	Allows users to call all methods to get and update performance evaluations with the Talent Performance Mass Evaluations REST service.
Use REST Service - Talent Performance Mass Evaluations Read Only	Allows users to call GET methods to access performance evaluations with the Talent Performance Mass Evaluations REST service.
Use REST Service - Talent Review Managers List of Values	Allows the user to call the GET method associated with the Talent Review Managers list of values REST Service.

Aggregate Privilege	Description
Use REST Service - Talent Skill Assignments	Allows the user to call all methods associated with the Talent Skill Assignments REST Service.
Use REST Service - Talent Skill Assignments Read Only	Allows the user to call the GET method associated with the Talent Skill Assignments REST Service.
Use REST Service - Talent Worker Check-Ins	Allows users to call all methods with the Talent Worker Check-Ins REST service.
Use REST Service - Talent Worker Engagements by Manager Read Only	Allows the user to call the GET method associated with the Talent Worker Engagements REST Service as a manager.
Use REST Service - Team Skills Searches	Allows the user to call the Team Skills Searches REST Services.
Use REST Service - Time Card Entry Details by Line Manager Read Only	Lets the line manager call the Time Card Entry Details REST Service.
Use REST Service - Time Card Searches by Line Manager	Lets the line manager call the Time Card Searches REST Service.
Use REST Service - Time Cards by Line Manager	Lets the line manager call the Time Cards REST Service.
Use REST Service - Worker Assignments List of Values	Allows the user to call the GET method associated with the Assignments list of values REST Service.
Use REST Service - Worker Journeys	Allows the user to call all methods associated with the Worker Journeys REST Service.
Use REST Service - Workforce Structure List of Values	Allows the user to call the GET method associated with the Workforce Structure list of values REST Services.
Use REST Service - eLearning Content Read Only	Allows the user to call the GET method associated with the eLearning Content REST Service.
View Accrual Type Absence Plan Balance	Allows workers to view balances of the accrual type absence plans.
View Additional Assignment Info	Allows viewing of additional assignment info.
View Check-In Document	Allows to view check-in document for a worker.
View Compensation Change Statement	Allows workers to view compensation change statements after the workforce compensation cycle.
View Compensation Details for Worker	Views compensation data for a worker.
View Compensation History	Provides access to view compensation history for workers within the users security profile.

Aggregate Privilege	Description
View Costing of Position in Employment Processes	Allows user to view costing at position level within employment processes.
View Development Goal by Manager	View development goals of subordinates.
View Employee Payroll in Employment Processes	Allows user to view employee's payroll within employment processes.
View Employment Information Summary	Grants access to view a worker's employment information summary.
View HCM Person Note	Views HCM person notes
View Learner Contributions	Allows users to view a person's learning contributions.
View Learning Communities	Allows users to view learning communities they are members of.
View Market Composites Summary	Allows viewing of market composite summary.
View Performance Goal by Manager	View performance goals of subordinates.
View Performance Summary	Allows viewing of workers performance summary information.
View Portrait Availability Card	Grants access to the availability card in the portrait, which includes schedule, absence, and accrual information.
View Portrait Contact Card	Grants access to view the contact card in the portrait, which includes phone number, e-mail, other communication methods, work location information, manager, directs and peers.
View Portrait Employment Information Card	Grants access to view the employment card in the Portrait, which includes assignment and contract information. This role is associated with the line manager and HR specialist.
View Portrait User Account Details Card	Views the User Account Details card in the Person Gallery.
View Positions	Views positions in the user's position security profile.
View Public Learning Communities	Allows users to view the learning communities a person is a member of.
View Recommended Learning by Learner Manager	Allows managers to view recommendations received by people in their person security profile, and learning items recommended for people in their public person security profile.
View Requested Feedback	Allows workers and line managers to view requested feedback

Aggregate Privilege	Description
View Required Learning by Learner Manager	Allows managers to view required learning assignments assigned to people in their person security profile.
View Salary Data Only	Views salary data embedded or used in non-compensation product pages or processes.
View Seniority Dates	Allows viewing of seniority dates.
View Succession Plan	Views succession plans.
View Talent Ratings	Grants access to view the talent ratings.
View Team Schedule by Line Manager	Allows line manager to view team schedule.
View Time Zone Overrides	Allows users to view time zone overrides for a worker.
View Total Compensation Statement Feedback by Line Manager	Allows viewing total compensation statement feedback survey by line manager.
View Voluntary Learning by Learner Manager	Allows managers to view voluntary learning assignments assigned to people in their person security profile.
View Work Patterns by Line Manager	Allows line managers to view work patterns for a worker.
View Worker Assignment History Details	Allows viewing of worker's assignment history details.
View Worker Calendar by Manager	Allows managers to view a worker calendar.
View Worker Contract	Allows viewing of worker's employment contract details and contract extensions.
View Workforce Predictions as Line Manager	Allows Line Manager to view worker predictions.

Privileges

This table lists privileges granted to duties of the Line Manager abstract role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Learning Common Components	Allows the user to access common learning components.	Access Learning Common Components	Allows access to common components in learning self-service and administration work area.

Granted Role	Granted Role Description	Privilege	Privilege Description
Access Succession Planning Dashboard by Manager	Allows users to access the Team Succession Planning Dashboard	Access Team Succession Planning Dashboard	Allows users to access the Team Succession Planning Dashboard
Access Touchpoints by Manager	Allows managers to access touchpoints for the workers who report to them.	Access Touchpoints by Manager	Allows managers to access touchpoints for the workers who report to them.
Access Touchpoints by Manager	Allows managers to access touchpoints for the workers who report to them.	Use REST Service - Feedback Templates List of Values	Allows the user to call the GET method associated with the Feedback Templates List of Values REST service.
Access Touchpoints by Manager	Allows managers to access touchpoints for the workers who report to them.	Use REST Service - Feedback Templates Read Only	Allows the user to call the GET method associated with the Feedback Templates REST service.
Access Touchpoints by Manager	Allows managers to access touchpoints for the workers who report to them.	Use REST Service - HCM Surveys List of Values	Allows the user to call the GET method associated with the HCM Surveys List of Values REST Service.
Access Touchpoints by Manager	Allows managers to access touchpoints for the workers who report to them.	Use REST Service - Nudges	Allows the user to call all methods associated with the Nudges REST service.
Access Touchpoints by Manager	Allows managers to access touchpoints for the workers who report to them.	Use REST Service - Talent Check-In Templates Read Only	Allows users to call GET and describe methods with the Talent Check-In Templates REST service.
Contingent Worker Addition	Adds contingent workers.	Add Contingent Worker	Allows addition of new contingent worker records.
Contingent Worker Addition	Adds contingent workers.	Create User	Allows creation of users.
Contingent Worker Addition	Adds contingent workers.	Renew Placement	Allows renewal of contingent-worker placements.
Employee Hire	Hires employees.	Create User	Allows creation of users.
Employee Hire	Hires employees.	Hire Employee	Allows addition of new employee records.
Employee Hire	Hires employees.	Rehire Employee	Allows rehire of employees.
Expense Approval	Approves expense reports of Oracle Fusion Expenses users.	Approve Expense Report	Allows approval or rejection of expense reports, as well as requests for additional information about questionable expenses.

Granted Role	Granted Role Description	Privilege	Privilege Description
Expense Approval	Approves expense reports of Oracle Fusion Expenses users.	Approve Travel Authorization or Cash Advance	Allows approval or rejection of travel authorizations.
Goal Management Line Manager	Goal Management Line Manager - inherited by Line Manager	Assign Development Goal to Groups of Workers	Allows assignment of development goals to groups of workers en masse.
Goal Management Line Manager	Goal Management Line Manager - inherited by Line Manager	Manage Development Goal	Allows management of development goals of direct reports.
Goal Management Line Manager	Goal Management Line Manager - inherited by Line Manager	Manage Development Goal in Goal Library	Allows management of development goals in the goal library.
Goal Management Line Manager	Goal Management Line Manager - inherited by Line Manager	Manage Development Goal of Other Workers	Allows management of development goals of other workers.
Goal Management Line Manager	Goal Management Line Manager - inherited by Line Manager	Manage Performance Goal	Manage Worker Performance or Development Goals
Goal Management Line Manager	Goal Management Line Manager - inherited by Line Manager	Manage Performance Goals of Others	Not Available
Goal Management Line Manager	Goal Management Line Manager - inherited by Line Manager	View Development Goal	Allows review of development goals and goal details.
Line Manager	Identifies the person as a line manager.	Absence Entry Using Calendar	Allows the button Schedule Absence in the TIME work area to be secured.
Line Manager	Identifies the person as a line manager.	Access FUSE My Team Page	Allows access to the FUSE My Team page.
Line Manager	Identifies the person as a line manager.	Access FUSE Team Talent Page	Allows access to the FUSE Team Talent page
Line Manager	Identifies the person as a line manager.	Access HCM Celebrate Manager Dashboard	Allows accessing the manager dashboard for recognitions and awards.
Line Manager	Identifies the person as a line manager.	Access HCM Common Components	Allows access to HCM common components.
Line Manager	Identifies the person as a line manager.	Access Learner Manager Self-Service Work Area	Allows access to the My Team tab in the learning self-service work area.

Granted Role	Granted Role Description	Privilege	Privilege Description
Line Manager	Identifies the person as a line manager.	Access Oracle Taleo Recruiting Cloud Service	Allows access to Oracle Taleo Recruiting Cloud Service from Oracle Fusion.
Line Manager	Identifies the person as a line manager.	Access Tap Application	Allows access to Tap application.
Line Manager	Identifies the person as a line manager.	Access Team Wellness, Corporate Social Responsibility, and Personal Brand	Allows line managers to manage team's Wellness, Corporate Social Responsibility, and Personal Brand activites.
Line Manager	Identifies the person as a line manager.	Access Time Work Area	Allows access to the Time work area.
Line Manager	Identifies the person as a line manager.	Add New Task for Worker	Allows the addition of new tasks to a worker.
Line Manager	Identifies the person as a line manager.	Add Task for Worker from Task Library	Allows the addition of tasks to a worker from the task library.
Line Manager	Identifies the person as a line manager.	Align Performance Goals	Allows aligning of performance goals.
Line Manager	Identifies the person as a line manager.	Allocate Checklist to Worker	Allows the allocation of checklists.
Line Manager	Identifies the person as a line manager.	Analytical view of team's compliance violations	Analytical view of team's compliance violations
Line Manager	Identifies the person as a line manager.	Analyze Team Compensation	Allows managers to analyze compa-ratio versus performance ratings for their team.
Line Manager	Identifies the person as a line manager.	Approve Individual Compensation Award	Review and approve proposed individual compensation awards.
Line Manager	Identifies the person as a line manager.	Approve Salary Updates	Review and approve proposed salary changes.
Line Manager	Identifies the person as a line manager.	Assign Development Goals	Allows assigning of development goals to workers.
Line Manager	Identifies the person as a line manager.	Assign Performance Goal to Groups of Workers	Assign goals to groups of workers en masse

Granted Role	Granted Role Description	Privilege	Privilege Description
Line Manager	Identifies the person as a line manager.	Assign Performance Goals	Allows performance goals to be assigned to other workers.
Line Manager	Identifies the person as a line manager.	Assign Workers Goals Mass Process	Assign Workers Goals Mass Process
Line Manager	Identifies the person as a line manager.	Award People	Allows sending awards
Line Manager	Identifies the person as a line manager.	Calibrate Performance Documents using Talent Review	Allow calibration of performance documents ratings using talent review.
Line Manager	Identifies the person as a line manager.	Cancel Performance Goals	Allows performance goals to be cancelled.
Line Manager	Identifies the person as a line manager.	Change Manager Mobile	Enables the change manager transaction in HCM Cloud Mobile
Line Manager	Identifies the person as a line manager.	Copy Development Goals	Allows copying of development goals.
Line Manager	Identifies the person as a line manager.	Copy Performance Goals	Allows copying of performance goals.
Line Manager	Identifies the person as a line manager.	Create Position Profile	Allows user to create position profiles.
Line Manager	Identifies the person as a line manager.	Delete Development Goals	Allow development goals to be deleted.
Line Manager	Identifies the person as a line manager.	Delete Performance Goals	Allow performance goals to be deleted.
Line Manager	Identifies the person as a line manager.	Edit Access Certification Manager Worksheet	Allows user to edit the manager worksheet for a certification.
Line Manager	Identifies the person as a line manager.	Enable worker searches using effective dates	Allows the user to perform searches on workers and assignments using effective dates.
Line Manager	Identifies the person as a line manager.	Extend Performance Goals	Allows performance goals to be extended to another goal plan.
Line Manager	Identifies the person as a line manager.	Give Anytime Feedback	Allows a user to give anytime feedback.

Granted Role	Granted Role Description	Privilege	Privilege Description
Line Manager	Identifies the person as a line manager.	Manage Goal Management Notifications	Manage Goal Management Notifications
Line Manager	Identifies the person as a line manager.	Manage Learning Community Members using OTBI	Allows adding members to communities using OTBI analysis objects.
Line Manager	Identifies the person as a line manager.	Manage Learning Community Required Learning	Allows creation and management of required community assignments.
Line Manager	Identifies the person as a line manager.	Manage Outstanding Corporate Card Transaction	Allows management of corporate card transactions for which payment has not been made to the corporate card issuer.
Line Manager	Identifies the person as a line manager.	Manage Performance Goal	Manage Worker Performance or Development Goals
Line Manager	Identifies the person as a line manager.	Manage Salary Mobile	Enables the manage salary transaction in HCM Cloud Mobile
Line Manager	Identifies the person as a line manager.	Manage Social Network Connections	Manage social connections
Line Manager	Identifies the person as a line manager.	Manage Talent Review Content	Allows management of content used at the talent review meeting.
Line Manager	Identifies the person as a line manager.	Manage Team Compensation	Allows managers to view salary and compensation for their employees.
Line Manager	Identifies the person as a line manager.	Manage Team Compliance Violations List View	Manage and view team's compliance violations list view
Line Manager	Identifies the person as a line manager.	Manage Team Reputation Scores List View	Manage and view team's reputation scores list view
Line Manager	Identifies the person as a line manager.	Manage Team Reputation Tasks	Manage team reputation tasks
Line Manager	Identifies the person as a line manager.	Manage Time Card Templates by Line Manager	Lets the line manager manage time card templates.
Line Manager	Identifies the person as a line manager.	Manager Suggest Mentorship Relationships	Suggest mentorship relationships

Granted Role	Granted Role Description	Privilege	Privilege Description
Line Manager	Identifies the person as a line manager.	Manager's View of Employee's Reputation Scores	Manager's view of employee's reputation scores
Line Manager	Identifies the person as a line manager.	Manager's View of Employee's Social Roles	Manager's view of employee's social roles
Line Manager	Identifies the person as a line manager.	Move Performance Goals	Allows performance goals to be moved to another goal plan.
Line Manager	Identifies the person as a line manager.	New Person Work Area As Line Manager	Allows line managers to access the New Person work area.
Line Manager	Identifies the person as a line manager.	Override Attendance Violation Statuses by Line Manager	Lets line managers override the status of worker attendance violations from the attendance violations page.
Line Manager	Identifies the person as a line manager.	Perform Performance Evaluations Mobile	Allows access to performance evaluations in HCM Cloud Mobile
Line Manager	Identifies the person as a line manager.	Promote Worker Mobile	Enables the promote transaction in HCM Cloud Mobile
Line Manager	Identifies the person as a line manager.	Request a New Position	Allows requesting a new position.
Line Manager	Identifies the person as a line manager.	Run Talent Profile Summary Report	Allows running of talent profile summary report.
Line Manager	Identifies the person as a line manager.	Search and Review Skills	Search and review skills
Line Manager	Identifies the person as a line manager.	Share Development Goals	Allows development goals to be shared with other workers.
Line Manager	Identifies the person as a line manager.	Share Performance Goals	Allows performance goals to be shared with other workers.
Line Manager	Identifies the person as a line manager.	Use Assignment Status Type Service	Allows the Assignment Status Type Service to be called
Line Manager	Identifies the person as a line manager.	Use Position lookup Service	Allows use of the position lookup service.
Line Manager	Identifies the person as a line manager.	Use REST Service - Collective Agreements List of Values	Allows the user to call the GET method associated with the Collective Agreements list of values REST Service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Line Manager	Identifies the person as a line manager.	Use REST Service - Content Items List of Values	Allows the user to call the GET method associated with the Content Items list of values REST Service.
Line Manager	Identifies the person as a line manager.	Use REST Service - Individual Compensation Lists of Values	Allows the user to call the GET method associated with the Individual Compensation list of values REST Services.
Line Manager	Identifies the person as a line manager.	Use REST Service - Job Requisition Templates List of Values	Allows the user to call the GET method associated with the job requisition template lists of values REST service.
Line Manager	Identifies the person as a line manager.	Use REST Service - Model Profiles List of Values	Allows the user to call the GET method associated with the Model Profiles list of values REST Service.
Line Manager	Identifies the person as a line manager.	Use REST Service - Peer Salary Percentiles Read Only	Allows the user to call the GET methods associated with the peer salary percentiles REST Service.
Line Manager	Identifies the person as a line manager.	Use REST Service - Salary Bases List of Values	Allows the user to call the GET method associated with the Salary Bases list of values REST Service.
Line Manager	Identifies the person as a line manager.	Use REST Service - Scheduling Lists of Values	Allows the user to call the GET method associated with the Scheduling lists of values REST services.
Line Manager	Identifies the person as a line manager.	Use REST Service - Users and Roles Lists of Values	Allows the user to call the GET method associated with the Users and Roles lists of values REST Services.
Line Manager	Identifies the person as a line manager.	View Calendar by Line Manager	Allows line manager to view worker calendar.
Line Manager	Identifies the person as a line manager.	View Career Overview by Manager	Allows managers to access to Career Overview page.
Line Manager	Identifies the person as a line manager.	View Data Visualization Configuration	Allows viewing of data visualization configurations.
Line Manager	Identifies the person as a line manager.	View Employee Social Connections	View employee social connections

Granted Role	Granted Role Description	Privilege	Privilege Description
Line Manager	Identifies the person as a line manager.	View Notification Details	Allows product specific notification details.
Line Manager	Identifies the person as a line manager.	View Performance Overview by Manager	Allows managers to access the Performance Overview page.
Line Manager	Identifies the person as a line manager.	View Team Compliance Outlier Reports	View team's compliance outlier reports
Line Manager	Identifies the person as a line manager.	View Team Reputation Outlier Reports	View team's reputation outlier reports
Line Manager	Identifies the person as a line manager.	View Team Reputation Scores Analytic View	Analytical view of team's reputation scores
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Allocate Compensation Person Rate by Line Manager	Allows allocating compensation during a periodic compensation cycle.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Approve and Submit Compensation Allocation by Line Manager	Allows approving and submitting compensation proposals made during a periodic compensation cycle.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Assign Compensation Performance Rating by Line Manager	Allows rating worker performance during a periodic compensation cycle.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Award Compensation Promotion by Line Manager	Allows promotion of workers during a periodic compensation cycle by changing their job, grade, or position.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Create Compensation Distribution Model for Allocation by Line Manager	Allows creation of models to automatically allocate worker allocations, budget amounts, or defined targets.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Export Compensation Allocation Details to Spreadsheet by Line Manager	Allows exporting worksheet data and importing allocations, promotions, and performance ratings.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Generate Compensation Allocation Statements by Line Manager	Allows generation of compensation change statements to communicate compensation awards, promotions, and performance ratings given

Granted Role	Granted Role Description	Privilege	Privilege Description
			to workers during a periodic compensation cycle.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Print Performance Document	Allows printing of performance documents
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	Run Group Compensation Line Manager Reports by Line Manager	Allows viewing online reports to analyze the current status or results of a periodic compensation cycle.
Line Manager Workforce Compensation Management	Manages workforce compensation by allocating compensation, rating performance, and promoting workers on a periodic basis.	View Worker Performance Management Document	Allows viewing of performance documents.
Manage Contextual Journey by Manager	Allows managers to access and manage worker contextual journeys.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Manage Journey By Manager	Allows managers to access and manage worker journeys.	Explore Journeys	Allows exploration of journeys.
Manage Journey By Manager	Allows managers to access and manage worker journeys.	Manage Personal Journey	Allows users to create and manage journeys.
Manage Journey By Manager	Allows managers to access and manage worker journeys.	Manage Worker Journey By Manager	Allows managers to access and manage worker journeys.
Manage Journey By Manager	Allows managers to access and manage worker journeys.	Use REST Service - Questionnaire Instructions Read Only	Allows access to the GET method associated with the Questionnaire Instructions REST Service.
Manage Journey By Manager	Allows managers to access and manage worker journeys.	Use REST Service - Worker Journey Tasks	Allows the user to call all methods associated with the Worker Journey Tasks REST Service.
Manage Journey By Manager	Allows managers to access and manage worker journeys.	Use REST Service - Worker Journey Tasks Read Only	Allows the user to call the GET method associated with the Workers Journey Tasks REST Service, to retrieve journey tasks assigned to them.
Manage Journey By Manager	Allows managers to access and manage worker journeys.	View Global Journeys	Allows users to view global journeys. Viewing of personal journeys is not restricted by this privilege.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Journey By Manager	Allows managers to access and manage worker journeys.	View Journey Activity	Allows viewing of journey activities.
Manage Offline Learning	Allows download and management of learning item content on mobile device in learning self-service	Manage Offline Learning	Allows download and management of learning item content on mobile device in learning self-service
Manage Survey by Manager	Allows managers to access and manage their own surveys.	Manage Survey by Manager	Allows managers to access and manage their own surveys.
Manage Survey by Manager	Allows managers to access and manage their own surveys.	Use REST Service - Content Items List of Values	Allows the user to call the GET method associated with the Content Items list of values REST Service.
Manage Talent Pool	Allows to view, edit talent pools and add workers to the Talent Pools.	Manage Talent Pool	Allows to view, edit talent pools and add workers to the Talent Pools.
Manage Time Cards by Line Manager	Manages time cards that need to be adjusted or submitted for processing, when a worker cannot access their time card.	Manage Time Cards by Line Manager	Allows the line manager to create, edit, delete, and approve time cards for workers.
Manage Time Cards by Line Manager	Manages time cards that need to be adjusted or submitted for processing, when a worker cannot access their time card.	Use REST Service - Time Card Field Values Read Only	Lets the person call the Time Card Field Values REST Service.
Manage User Account	Manages user roles.	Copy Personal Data to LDAP	Allows copy of worker personal data to LDAP
Manage User Account	Manages user roles.	Manage User Account	Allows access to Manage User Account.
Manage User Account	Manages user roles.	Manage User Account and My Account	Allows access to the page components that are common to My Account and Manage User Account.
Manage User Account	Manages user roles.	Reset Password	Allows reset password links to be emailed to users.
Manager Coaching Workspace Access	Grants access to the Manager Coaching Workspace	Access Manager Coaching Workspace	Allows users to access the Manager Coaching Workspace
Manager Concierge Workspace Access	Grants access to the Manager Concierge Workspace	Access Manager Concierge Workspace	Allows users to access the Manager Concierge Workspace

Granted Role	Granted Role Description	Privilege	Privilege Description
Mass Evaluate Performance Documents by Manager	Allows mass manager evaluation of performance documents.	Mass Evaluate Performance Documents by Manager	Allows mass evaluations of performance documents by managers
Mass Evaluate Performance Documents by Manager	Allows mass manager evaluation of performance documents.	Use REST Service - Performance Template Document Names List of Values	Allows the user to call the GET method associated with the Performance Template Document Names List of Values REST service.
Mass Evaluate Performance Documents by Manager	Allows mass manager evaluation of performance documents.	Use REST Service - Review Periods List of Values	Allows the user to call the GET method associated with the Review Periods List of Values REST Service.
Nonworker Addition	Adds nonworkers.	Create Person Nonworker	Allows addition of new nonworker records.
Nonworker Addition	Adds nonworkers.	Create User	Allows creation of users.
Pending Worker Addition and Hire	Adds and hires pending workers.	Add Worker Pending Hire	Allows addition of new pending-worker records.
Pending Worker Addition and Hire	Adds and hires pending workers.	Correct Oracle Taleo Recruiting Candidate Import Errors	Allows correction of errors found during pending workers import.
Pending Worker Addition and Hire	Adds and hires pending workers.	Edit Pending Worker	Allows users to correct pending-worker records.
Pending Worker Addition and Hire	Adds and hires pending workers.	Hire Pending Worker	Allows hire or placement of pending workers.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Approve Worker Performance Document	Allows approving of performance documents.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Cancel Worker Performance Document by Manager	Allows canceling performance documents by managers.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Change Participant Due Date by Manager	Allows a manager to change the due date for a participant to provide feedback in a 360 performance evaluation.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Complete Worker Performance Document by Manager	Allows completion of worker performance documents by managers.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Create Performance Document by Manager	Allows creation of performance documents by managers.

Granted Role	Granted Role Description	Privilege	Privilege Description
Performance Management Line Manager	Views performance documents from line manager dashboard.	Delete Worker Performance Document by Manager	Allows deletion of worker performance documents by managers.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Print Performance Document	Allows printing of performance documents
Performance Management Line Manager	Views performance documents from line manager dashboard.	Reopen Performance Document by Manager	Allows reopening performance documents by managers.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Reset Worker Performance Evaluation Status by Manager	Allows resetting of the performance evaluation status by managers so that the evaluation can continue.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Restore Performance Document by Manager	Allows restoring canceled performance documents by managers so evaluations can continue.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Select Feedback Participants	Allows selection of feedback participants.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Track Participant Feedback Status	Allows tracking of participant feedback status.
Performance Management Line Manager	Views performance documents from line manager dashboard.	Transfer Performance Document by Manager	Allows transferring performance documents by managers from one manager to another.
Performance Management Line Manager	Views performance documents from line manager dashboard.	View Performance Information on Manager Dashboard	Allows viewing of performance information on the manager dashboard.
Performance Management Line Manager	Views performance documents from line manager dashboard.	View Performance Information on Worker Dashboard for Manager	Allows viewing of performance information on worker dashboard for manager.
Performance Management Line Manager	Views performance documents from line manager dashboard.	View Performance and Potential	Allows viewing of performance and potential data.
Talent Summary Generator Access	Generates the talent summary of a person	Generate Talent Summary	Allows generation of talent summary
Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service. Use this duty role when granting manage access to person documentation data.	Use REST Service - HR Document Types List of Values	Allows the user to call the GET method associated with the HR document types list of values REST service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Use REST Service - Succession Management Lists of Values	Allows the user to call the GET method associated with the Succession Management list of values REST Services.	Use REST Service - Succession Management Lists of Values	Allows the user to call the GET method associated with the Succession Management list of values REST Services.
Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.	Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
View Succession Org Chart by Manager	Allows a manager to view the succession org chart.	Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
View Succession Org Chart by Manager	Allows a manager to view the succession org chart.	View Succession Org Chart	Allows viewing of the succession org chart.
View Team Skills as Manager	Allows a manager to view team skills.	View Team Skills as Manager	Allows a manager to view team skills.
Workforce Model Plan Line Manager	Manages workforce model plans, including creating and editing the plans.	Manage Workforce Model Plan as Line Manager	Allows the management of workforce model plans.
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.	Define Talent Profile	Allows definition of talent profile.
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.	Define Talent Profile Item	Allows definition of talent profile item.
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.	Manage Careers of Interest	Allows management of the careers of interest for a worker.
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.	Manage Person Talent Profile	Allows management of talent profile for a person.
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.	Match Talent Profile	Allows access to perform best fit analysis.
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.	Update Talent Profile Item	Allows update to talent profile items.
Workforce Profile Line Manager	Performs workforce profile duties as a line manager.	View Talent Profile	Allows management of profile task flows that are common to model and person profiles.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Line Manager abstract role.

Business Object	Policy Description	Policy Store Implementation
Absence Type	A Line Manager can choose absence types for subordinates in their person and assignment security profile	Role: Maintain Absence Records Privilege: Choose Absence Types (Data) Resource: Absence Type
Absence Type	A Line Manager can choose absence types for subordinates in their person and assignment security profile	Role: Submit Absence Bid by Manager Privilege: Choose Absence Types (Data) Resource: Absence Type
Absence Type	A Line Manager can choose absence types for subordinates in their person and assignment security profile	Role: Use REST Service - Absence Types List of Values Privilege: Choose Absence Types (Data) Resource: Absence Type
Application Reference Territory	A Line Manager can choose application reference territory for countries in their country security profile	Role: Line Manager Privilege: Choose Application Reference Territory (Data) Resource: Application Reference Territory
Applied Cash Advance	A Line Manager can view applied cash advance for the employees for whom they are responsible	Role: Line Manager Privilege: View Employee Expense (Data) Resource: Applied Cash Advance
Assignment Grade	A Line Manager can choose assignment grade for all grades in the enterprise	Role: Line Manager Privilege: Choose Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can choose assignment grade for all grades in the enterprise	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose Assignment Grade (Data) Resource: Assignment Grade

Business Object	Policy Description	Policy Store Implementation
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Absence Management Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Availability Patterns Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Career Development Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Compensation Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Goal Management Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Individual Compensation Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Performance Management Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Time and Labor Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Vacancy Transaction Analysis Privilege: Report Assignment Grade (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Workforce Assignment Salary Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade	A Line Manager can report assignment grade for all grades in the enterprise	Role: Workforce Transaction Analysis Privilege: Report Assignment Grade (Data) Resource: Assignment Grade
Assignment Grade Ladder	A Line Manager can report assignment grade ladder for all grades in the enterprise	Role: Absence Management Transaction Analysis Privilege: Report Assignment Grade Ladder (Data) Resource: Assignment Grade Ladder
Assignment Grade Ladder	A Line Manager can report assignment grade ladder for all grades in the enterprise	Role: Availability Patterns Transaction Analysis Privilege: Report Assignment Grade Ladder (Data) Resource: Assignment Grade Ladder
Assignment Grade Ladder	A Line Manager can report assignment grade ladder for all grades in the enterprise	Role: Compensation Transaction Analysis Privilege: Report Assignment Grade Ladder (Data) Resource: Assignment Grade Ladder
Assignment Grade Ladder	A Line Manager can report assignment grade ladder for all grades in the enterprise	Role: Individual Compensation Transaction Analysis Privilege: Report Assignment Grade Ladder (Data) Resource: Assignment Grade Ladder
Assignment Grade Ladder	A Line Manager can report assignment grade ladder for all grades in the enterprise	Role: Vacancy Transaction Analysis Privilege: Report Assignment Grade Ladder (Data) Resource: Assignment Grade Ladder
Assignment Grade Ladder	A Line Manager can report assignment grade ladder for all grades in the enterprise	Role: Workforce Assignment Salary Transaction Analysis

Business Object	Policy Description	Policy Store Implementation
		Privilege: Report Assignment Grade Ladder (Data) Resource: Assignment Grade Ladder
Assignment Grade Ladder	A Line Manager can report assignment grade ladder for all grades in the enterprise	Role: Workforce Transaction Analysis Privilege: Report Assignment Grade Ladder (Data) Resource: Assignment Grade Ladder
Assignment Grade Rate	A Line Manager can report assignment grade rate for all grades in the enterprise	Role: Absence Management Transaction Analysis Privilege: Report Assignment Grade Rate (Data) Resource: Assignment Grade Rate
Assignment Grade Rate	A Line Manager can report assignment grade rate for all grades in the enterprise	Role: Availability Patterns Transaction Analysis Privilege: Report Assignment Grade Rate (Data) Resource: Assignment Grade Rate
Assignment Grade Rate	A Line Manager can report assignment grade rate for all grades in the enterprise	Role: Compensation Transaction Analysis Privilege: Report Assignment Grade Rate (Data) Resource: Assignment Grade Rate
Assignment Grade Rate	A Line Manager can report assignment grade rate for all grades in the enterprise	Role: Individual Compensation Transaction Analysis Privilege: Report Assignment Grade Rate (Data) Resource: Assignment Grade Rate
Assignment Grade Rate	A Line Manager can report assignment grade rate for all grades in the enterprise	Role: Vacancy Transaction Analysis Privilege: Report Assignment Grade Rate (Data) Resource: Assignment Grade Rate
Assignment Grade Rate	A Line Manager can report assignment grade rate for all grades in the enterprise	Role: Workforce Assignment Salary Transaction Analysis Privilege: Report Assignment Grade Rate (Data) Resource: Assignment Grade Rate
Assignment Grade Rate	A Line Manager can report assignment grade rate for all grades in the enterprise	Role: Workforce Transaction Analysis Privilege: Report Assignment Grade Rate (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Assignment Grade Rate
Attendance Violation	A Line Manager can manage attendance violations by line manager for subordinates in their person and assignment security profile	Role: Manage Attendance Violations by Line Manager Privilege: Manage Attendance Violations by Line Manager (Data) Resource: Attendance Violation
Attendance Violation	A Line Manager can report attendance violations for subordinates in their person and assignment security profile	Role: Time and Labor Transaction Analysis Privilege: Report Attendance Violations (Data) Resource: Attendance Violation
Business Unit	A Line Manager can choose business unit for business units in their organization security profile	Role: Line Manager Privilege: Choose Business Unit Organization (Data) Resource: Business Unit
Business Unit	A Line Manager can choose business unit organization for business units in their organization security profile	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose Business Unit Organization (Data) Resource: Business Unit
Cash Advance	A Line Manager can view cash advance for the employees for whom they are responsible	Role: Line Manager Privilege: View Employee Expense (Data) Resource: Cash Advance
Check In Document	A Line Manager can create check-in document for people in their person and assignment security profile	Role: Use REST Service - Talent Worker Check-Ins Privilege: Create Check-In Document (Data) Resource: Check In Document
Check In Document	A Line Manager can create check-in document for subordinates in their person and assignment security profile	Role: View Performance Summary Privilege: Create Check-In Document (Data) Resource: Check In Document
Check In Document	A Line Manager can manage check-in document for subordinates in their person and assignment security profile	Role: Create Mass Check-Ins By Manager Privilege: Manage Check-In Document (Data) Resource: Check In Document

Business Object	Policy Description	Policy Store Implementation
Check In Document	A Line Manager can manage check-in document for subordinates in their person and assignment security profile	Role: Manage Check-In Document Privilege: Manage Check-In Document (Data) Resource: Check In Document
Check In Document	A Line Manager can report check-in document for people and assignments in their person and assignment security profile	Role: Performance Management Transaction Analysis Privilege: Report Check-In Document (Data) Resource: Check In Document
Check In Document	A Line Manager can view check-in document for people in their person and assignment security profile	Role: Use REST Service - Talent Worker Check-Ins Privilege: View Check-In Document (Data) Resource: Check In Document
Check In Document	A Line Manager can view check-in document for people in their person and assignment security profile	Role: View Check-In Document Privilege: View Check-In Document (Data) Resource: Check In Document
Check In Document	A Line Manager can view check-in document for subordinates in their person and assignment security profile	Role: View Performance Summary Privilege: View Check-In Document (Data) Resource: Check In Document
Checklist Role Maps	A Line Manager can view journey template for others for journey templates which allow them to view assigned journeys for persons and assignments in their person and assignment security profile	Role: Manage Worker Checklist Privilege: View Journey Template for Others (Data) Resource: Checklist Role Maps
Checklist Role Maps	A Line Manager can view journey template for others for journey templates which allow them to view assigned journeys for persons and assignments in their person and assignment security profile	Role: Use REST Service - Worker Journeys Privilege: View Journey Template for Others (Data) Resource: Checklist Role Maps
Checklist Role Maps	A Line Manager can view journey template for self for journey templates which allow them to view their own assigned journeys	Role: Manage Worker Checklist Privilege: View Journey Template for Self (Data) Resource: Checklist Role Maps

Business Object	Policy Description	Policy Store Implementation
Checklist Role Maps	A Line Manager can view journey template for self for journey templates which allow them to view their own assigned journeys	Role: Use REST Service - Worker Journeys Privilege: View Journey Template for Self (Data) Resource: Checklist Role Maps
Compensation Allocation	A Line Manager can allocate compensation person rate by line manager for subordinates in their person and assignment security profile	Role: Line Manager Workforce Compensation Management Privilege: Allocate Compensation Person Rate by Line Manager (Data) Resource: Compensation Allocation
Compensation Allocation	A Line Manager can approve and submit compensation allocation by line manager for subordinates in their person and assignment security profile	Role: Line Manager Workforce Compensation Management Privilege: Approve and Submit Compensation Allocation by Line Manager (Data) Resource: Compensation Allocation
Compensation Allocation	A Line Manager can report compensation allocation for subordinates in their person and assignment security profile	Role: Compensation Transaction Analysis Privilege: Report Compensation Allocation (Data) Resource: Compensation Allocation
Compensation Allocation	A Line Manager can view compensation change statement for subordinates in their person and assignment security profile	Role: View Compensation Change Statement Privilege: View Compensation Change Statement (Data) Resource: Compensation Allocation
Compensation History	A Line Manager can view compensation history for subordinates in their person and assignment security profile	Role: View Compensation History Privilege: View Compensation History (Data) Resource: Compensation History
Compensation Market Composites	A Line Manager can view market composites for subordinates in their person and assignment security profile	Role: View Market Composites Summary Privilege: View Market Composites (Data) Resource: Compensation Market Composites
Compensation Note	A Line Manager can manage compensation note for public compensation notes for subordinates in their person and assignment security profile and for private compensation notes that they own	Role: Line Manager Workforce Compensation Management Privilege: Manage Compensation Note (Data) Resource: Compensation Note

Business Object	Policy Description	Policy Store Implementation
Compensation Promotion	A Line Manager can award compensation promotion by line manager for subordinates in their person and assignment security profile	Role: Line Manager Workforce Compensation Management Privilege: Award Compensation Promotion by Line Manager (Data) Resource: Compensation Promotion
Compensation Stock Grant	A Line Manager can report compensation stock grant for subordinates in their person and assignment security profile	Role: Compensation Transaction Analysis Privilege: Report Compensation Stock Grant (Data) Resource: Compensation Stock Grant
Compensation Stock Grant	A Line Manager can view compensation stock grant by line manager for subordinates in their person and assignment security profile	Role: Line Manager Workforce Compensation Management Privilege: View Compensation Stock Grant by Line Manager (Data) Resource: Compensation Stock Grant
Corporate Card Transaction	A Line Manager can view corporate card transaction for the employees for whom they are responsible	Role: Line Manager Privilege: Manage Outstanding Corporate Card Transaction (Data) Resource: Corporate Card Transaction
Department	A Line Manager can choose department for departments in their organization security profile	Role: Line Manager Privilege: Choose Department (Data) Resource: Department
Department	A Line Manager can choose department for departments in their organization security profile	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Absence Management Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Availability Patterns Transaction Analysis Privilege: Report Department (Data) Resource: Department

Business Object	Policy Description	Policy Store Implementation
Department	A Line Manager can report department for departments in their organization security profile	Role: Career Development Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Compensation Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Goal Management Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Performance Management Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Time and Labor Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Vacancy Transaction Analysis Privilege: Report Department (Data) Resource: Department
Department	A Line Manager can report department for departments in their organization security profile	Role: Workforce Assignment Salary Transaction Analysis Privilege: Report Department (Data) Resource: Department

Business Object	Policy Description	Policy Store Implementation
Department	A Line Manager can report department for departments in their organization security profile	Role: Workforce Transaction Analysis Privilege: Report Department (Data) Resource: Department
Expense	A Line Manager can view expense for the employees for whom they are responsible	Role: Line Manager Privilege: View Employee Expense (Data) Resource: Expense
Expense Report	A Line Manager can view expense report for the employees for whom they are responsible	Role: Line Manager Privilege: View Employee Expense (Data) Resource: Expense Report
Expense Report Approval Note	A Line Manager can manage expense report approval note for the employees for whom they are responsible	Role: Expense Approval Privilege: Manage Expense Report Approval Note (Data) Resource: Expense Report Approval Note
General Survey Questionnaire Participants	A Line Manager can report questionnaire responses for subordinates in their person and assignment security profile	Role: HCM Questionnaires General Survey Responses Transaction Analysis Privilege: Report Questionnaire Responses (Data) Resource: General Survey Questionnaire Participants
Guided Journey Response	A Line Manager can manage guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: Manage Guided Journey Response (Data) Resource: Guided Journey Response
Guided Journey Response	A Line Manager can view guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: View Guided Journey Response (Data) Resource: Guided Journey Response
HCM Note	A Line Manager can view hcm person public note for public person notes that are about people in their public person security profile	Role: View HCM Person Note Privilege: View HCM Person Public Note (Data) Resource: HCM Note

Business Object	Policy Description	Policy Store Implementation
HCM Note	A Line Manager can view hcm person shared note for shared person notes that are about subordinates in their person security profile	Role: View HCM Person Note Privilege: View HCM Person Shared Note (Data) Resource: HCM Note
HCM Person Note Shared with Peers	A Line Manager can view hcm person note shared with peers for person notes shared with peers of the note recipient	Role: View HCM Person Note Privilege: View HCM Person Note Shared with Peers (Data) Resource: HCM Person Note Shared with Peers
HR Document Type	A Line Manager can report document type for document types in their document type security profile	Role: Documents of Record Transaction Analysis Privilege: Report Document Type (Data) Resource: HR Document Type
HR Document Type	A Line Manager can view document type for document types in their document type security profile	Role: Manage Person Documentation Privilege: View Document Type (Data) Resource: HR Document Type
HR Job	A Line Manager can choose hr job for all jobs in the enterprise	Role: Line Manager Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	A Line Manager can choose hr job for all jobs in the enterprise	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Absence Management Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Availability Patterns Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Career Development Transaction Analysis Privilege: Report HR Job (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Compensation Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Goal Management Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Individual Compensation Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Performance Management Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Time and Labor Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Vacancy Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Workforce Assignment Salary Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job
HR Job	A Line Manager can report hr job for all jobs in the enterprise	Role: Workforce Transaction Analysis Privilege: Report HR Job (Data) Resource: HR Job

Business Object	Policy Description	Policy Store Implementation
HR Job	A Line Manager can view hr job for all jobs in the enterprise	Role: View Employment Information Summary Privilege: View HR Job (Data) Resource: HR Job
Journey	A Line Manager can assign journey for checklists to which they have been granted access	Role: Manage Worker Checklist Privilege: Assign Journey (Data) Resource: Journey
Journey	A Line Manager can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey (Data) Resource: Journey
Journey	A Line Manager can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Read Only Privilege: Assign Journey (Data) Resource: Journey
Journey	A Line Manager can assign journey to self for checklists to which they have been granted access	Role: Manage Worker Checklist Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Line Manager can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Line Manager can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Read Only Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Line Manager can manage journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Manage Journey (Data) Resource: Journey
Journey	A Line Manager can view journey for checklists to which they have been granted access	Role: Manage Worker Checklist Privilege: View Journey (Data) Resource: Journey

Business Object	Policy Description	Policy Store Implementation
Journey	A Line Manager can view journey for journeys to which they have been granted access	Role: Use REST Service - Guided Journeys Read Only Privilege: View Journey (Data) Resource: Journey
Journey	A Line Manager can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: View Journey (Data) Resource: Journey
Journey	A Line Manager can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Read Only Privilege: View Journey (Data) Resource: Journey
Journey Allocation	A Line Manager can view journey allocation for allocations of journey templates to which they have been granted access that have been initiated by persons and assignments in their person and assignment security profile	Role: Use REST Service - Journey Allocations Privilege: View Journey Allocation (Data) Resource: Journey Allocation
Journey Category	A Line Manager can choose journey category for journey categories to which they have been granted access	Role: Use REST Service - Journey Categories List of Values Privilege: Choose Journey Category (Data) Resource: Journey Category
Journey Scheduled Allocation	A Line Manager can manage journey allocation for allocations of journey templates to which they have been granted access that have been initiated by persons and assignments in their person and assignment security profile	Role: Use REST Service - Journey Scheduled Allocations Privilege: Manage Journey Allocation (Data) Resource: Journey Scheduled Allocation
Journey Scheduled Allocation	A Line Manager can view journey allocation for allocations of journey templates to which they have been granted access that have been initiated by persons and assignments in their person and assignment security profile	Role: Use REST Service - Journey Scheduled Allocations Privilege: View Journey Allocation (Data) Resource: Journey Scheduled Allocation
Journey Task	A Line Manager can manage journey task library for tasks in the journey task library to which they have been granted access	Role: Use REST Service - Journey Task Library Privilege: Manage Journey Task Library (Data) Resource: Journey Task
Journey Task	A Line Manager can view journey task library for tasks in the journey task library to which they have been granted access	Role: Use REST Service - Journey Task Library Privilege: View Journey Task Library (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Journey Task
Knowledge User groups	A Line Manager can access content with user group access to fusion user user group	Role: Content Intelligence Users Privilege: Access Content with User Group Resource: Knowledge User groups
Learning Assignment	A Line Manager can manage voluntary learning for voluntary learning assignments received by subordinates in their person security profile	Role: Manage Voluntary Learning by Learner Manager Privilege: Manage Voluntary Learning (Data) Resource: Learning Assignment
Learning Assignment	A Line Manager can view recommended learning for recommendations received by subordinates in their person security profile	Role: View Recommended Learning by Learner Manager Privilege: View Recommended Learning (Data) Resource: Learning Assignment
Learning Assignment	A Line Manager can view required learning for required learning assignments received by subordinates in their person security profile	Role: View Required Learning by Learner Manager Privilege: View Required Learning (Data) Resource: Learning Assignment
Learning Assignment	A Line Manager can view voluntary learning for voluntary learning assignments received by subordinates in their person security profile	Role: View Voluntary Learning by Learner Manager Privilege: View Voluntary Learning (Data) Resource: Learning Assignment
Learning Assignment Event	A Line Manager can manage recommended learning for recommendations made by subordinates in their person security profile	Role: Manage Recommended Learning Privilege: Manage Recommended Learning (Data) Resource: Learning Assignment Event
Learning Assignment Event	A Line Manager can view recommended learning public person for recommendations made by persons in their public person security profile	Role: View Recommended Learning by Learner Manager Privilege: View Recommended Learning Public Person (Data) Resource: Learning Assignment Event
Learning Item	A Line Manager can manage learning communities for self-service communities	Role: Manage Learning Communities

Business Object	Policy Description	Policy Store Implementation
	owned by subordinates in their person security profile	Privilege: Manage Learning Communities (Data) Resource: Learning Item
Learning Item	A Line Manager can manage learning self-service tutorials for self-service tutorials created by subordinates in their person security profile	Role: Manage Learning Self-Service Tutorials Privilege: Manage Learning Self-Service Tutorials (Data) Resource: Learning Item
Learning Item	A Line Manager can view learning communities for communities which subordinates in their person security profile are members or managers of	Role: View Learning Communities Privilege: View Learning Communities (Data) Resource: Learning Item
Legal Employer	A Line Manager can choose legal employer for legal employers in their organization security profile	Role: Line Manager Privilege: Choose Legal Employer (Data) Resource: Legal Employer
Legal Employer	A Line Manager can choose legal employer for legal employers in their organization security profile	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose Legal Employer (Data) Resource: Legal Employer
Legal Employer	A Line Manager can report legal employer for legal employers in their organization security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Legal Employer (Data) Resource: Legal Employer
Legislative Data Group	A Line Manager can choose legislative data group for legislative data groups in their legislative data group security profile	Role: Line Manager Privilege: Choose Legislative Data Group (Data) Resource: Legislative Data Group
Legislative Data Group	A Line Manager can choose legislative data group for legislative data groups in their legislative data group security profile	Role: Use REST Service - Legislative Data Groups List of Values Privilege: Choose Legislative Data Group (Data) Resource: Legislative Data Group
Legislative Data Group	A Line Manager can choose payroll reference for legislative data groups in their legislative data group security profile	Role: Manage Employee Payroll in Employment Processes Privilege: Choose Payroll Reference (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Legislative Data Group
Legislative Data Group	A Line Manager can choose payroll reference for legislative data groups in their legislative data group security profile	Role: View Employee Payroll in Employment Processes Privilege: Choose Payroll Reference (Data) Resource: Legislative Data Group
Legislative Data Group	A Line Manager can report legislative data group for legislative data groups in their legislative data group security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Legislative Data Group (Data) Resource: Legislative Data Group
Legislative Position Attribute	A Line Manager can view legislative position attribute for countries in their country security profile	Role: View Positions Privilege: View Legislative Position Attribute (Data) Resource: Legislative Position Attribute
Location	A Line Manager can choose location for all locations in the enterprise	Role: Line Manager Privilege: Choose Location (Data) Resource: Location
Location	A Line Manager can choose location for all locations in the enterprise	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Absence Management Transaction Analysis Privilege: Report Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Availability Patterns Transaction Analysis Privilege: Report Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Career Development Transaction Analysis Privilege: Report Location (Data) Resource: Location

Business Object	Policy Description	Policy Store Implementation
Location	A Line Manager can report location for all locations in the enterprise	Role: Compensation Transaction Analysis Privilege: Report Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Goal Management Transaction Analysis Privilege: Report Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Individual Compensation Transaction Analysis Privilege: Report Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Performance Management Transaction Analysis Privilege: Report Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Time and Labor Transaction Analysis Privilege: Report Location (Data) Resource: Location
Location	A Line Manager can report location for all locations in the enterprise	Role: Vacancy Transaction Analysis Privilege: Report Location (Data) Resource: Location

Location	A Line Manager can report location for all locations in the enterprise	Role: Workforce Transaction Analysis Privilege: Report Location (Data) Resource: Location
Manager Posts	A Line Manager can manage team posts for posts that i created.	Role: Manage My Team Posts

Business Object	Policy Description	Policy Store Implementation
		Privilege: Manage Team Posts (Data) Resource: Manager Posts
My Assignment	A Line Manager can view my assignment for themselves	Role: Access Succession Planning Dashboard by Manager Privilege: View My Assignment (Data) Resource: My Assignment
My Assignment	A Line Manager can view my assignment for themselves	Role: View Succession Org Chart by Manager Privilege: View My Assignment (Data) Resource: My Assignment
Payroll Checklist	A Line Manager can view payroll flow for legislative data groups in their legislative data group security profile and payroll flows in their payroll flow security profile	Role: Submit a Payroll Flow Privilege: View Payroll Flow (Data) Resource: Payroll Checklist
Payroll Checklist Annotation	A Line Manager can view payroll flow for legislative data groups in their legislative data group security profile	Role: Submit a Payroll Flow Privilege: View Payroll Flow (Data) Resource: Payroll Checklist Annotation
Payroll Definition	A Line Manager can choose payroll definition for payrolls in their payroll security profile	Role: Line Manager Privilege: Choose Payroll (Data) Resource: Payroll Definition
Payroll Definition	A Line Manager can choose payroll for payrolls in their payroll security profile	Role: Manage Employee Payroll in Employment Processes Privilege: Choose Payroll (Data) Resource: Payroll Definition
Payroll Definition	A Line Manager can choose payroll for payrolls in their payroll security profile	Role: View Employee Payroll in Employment Processes Privilege: Choose Payroll (Data) Resource: Payroll Definition
Payroll Definition	A Line Manager can report payroll definition for legislative data groups in their legislative data group security profile and payrolls in their payroll security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Payroll Definition (Data) Resource: Payroll Definition

Business Object	Policy Description	Policy Store Implementation
Payroll Element Type	A Line Manager can report payroll element for legislative data groups in their legislative data group security profile	Role: Compensation Transaction Analysis Privilege: Report Payroll Element (Data) Resource: Payroll Element Type
Payroll Element Type	A Line Manager can report payroll element for legislative data groups in their legislative data group security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Payroll Element (Data) Resource: Payroll Element Type
Payroll Flow Definition	A Line Manager can view payroll flow for legislative data groups in their legislative data group security profile and payroll flows in their payroll flow security profile	Role: Submit a Payroll Flow Privilege: View Payroll Flow (Data) Resource: Payroll Flow Definition
Payroll Flow Definition Parameter	A Line Manager can view payroll flow for legislative data groups in their legislative data group security profile and payroll flows in their payroll flow security profile	Role: Submit a Payroll Flow Privilege: View Payroll Flow (Data) Resource: Payroll Flow Definition Parameter
Payroll Relationship	A Line Manager can manage employee payroll in employment processes for assignments within their person and assignment security profile	Role: Manage Employee Payroll in Employment Processes Privilege: Manage Employee Payroll in Employment Processes (Data) Resource: Payroll Relationship
Payroll Relationship	A Line Manager can report payroll relationship for legislative data groups in their legislative data group security profile and people and assignments in person and assignment security profile and for payroll statutory units in their organization security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Payroll Relationship (Data) Resource: Payroll Relationship
Payroll Relationship	A Line Manager can report person process result for people and assignments in person and assignment security profile	Role: Compensation Transaction Analysis Privilege: Report Person Process Result (Data) Resource: Payroll Relationship
Payroll Relationship	A Line Manager can report person process result for people and assignments in person and assignment security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Person Process Result (Data) Resource: Payroll Relationship

Business Object	Policy Description	Policy Store Implementation
Payroll Relationship	A Line Manager can view employee payroll in employment processes for assignments within their person and assignment security profile	Role: Manage Employee Payroll in Employment Processes Privilege: View Employee Payroll in Employment Processes (Data) Resource: Payroll Relationship
Payroll Relationship	A Line Manager can view employee payroll in employment processes for assignments within their person and assignment security profile	Role: View Employee Payroll in Employment Processes Privilege: View Employee Payroll in Employment Processes (Data) Resource: Payroll Relationship
Payroll Statutory Unit	A Line Manager can choose payroll statutory unit for payroll statutory units in their organization security profile	Role: Use REST Service - Workforce Structure List of Values Privilege: Choose Payroll Statutory Unit (Data) Resource: Payroll Statutory Unit
Pending Worker Import Error	A Line Manager can correct oracle taleo recruiting cloud service candidate import errors for subordinates in their person and assignment security profile	Role: Pending Worker Addition and Hire Privilege: Correct Oracle Taleo Recruiting Cloud Service Candidate Import Errors (Data) Resource: Pending Worker Import Error
Performance Document	A Line Manager can create anytime performance document for subordinates in their person and assignment security profile	Role: Create Anytime Performance Document Privilege: Create Anytime Performance Document (Data) Resource: Performance Document
Performance Document	A Line Manager can create performance document for subordinates in their person and assignment security profile	Role: Performance Management Line Manager Privilege: Create Performance Document (Data) Resource: Performance Document
Performance Document	A Line Manager can manage performance document for subordinates in their person and assignment security profile	Role: Performance Management Line Manager Privilege: Manage Performance Document (Data) Resource: Performance Document
Performance Document	A Line Manager can report performance document for people and assignments in their person and assignment security profile	Role: Performance Management Transaction Analysis Privilege: Report Performance Document (Data) Resource: Performance Document

Business Object	Policy Description	Policy Store Implementation
Performance Document	A Line Manager can view performance summary for subordinates in their person and assignment security profile	Role: View Performance Summary Privilege: View Performance Summary (Data) Resource: Performance Document
Performance Feedback Request	A Line Manager can report requested feedback for people in their person and assignment security profile	Role: Performance Management Transaction Analysis Privilege: Report Requested Feedback (Data) Resource: Performance Feedback Request
Performance Feedback Request	A Line Manager can request feedback for people in their person and assignment security profile	Role: Use REST Service - Feedback Requests by Worker or Manager Privilege: Request Feedback (Data) Resource: Performance Feedback Request
Performance Feedback Request	A Line Manager can request feedback for subordinates in their person and assignment security profile	Role: Request Feedback Privilege: Request Feedback (Data) Resource: Performance Feedback Request
Performance Feedback Request	A Line Manager can view requested feedback for people for whom feedback was requested by you or was shared with you	Role: View Requested Feedback Privilege: View Requested Feedback (Data) Resource: Performance Feedback Request
Performance Feedback Request	A Line Manager can view requested feedback for people in their person and assignment security profile	Role: Use REST Service - Feedback Requests by Worker or Manager Privilege: View Requested Feedback (Data) Resource: Performance Feedback Request
Performance Goal	A Line Manager can manage development goal by manager for subordinates in their person and assignment security profile	Role: Manage Development Goal by Manager Privilege: Manage Development Goal by Manager (Data) Resource: Performance Goal
Performance Goal	A Line Manager can manage development goal for subordinates in their person security profile	Role: Goal Management Line Manager Privilege: Manage Development Goal (Data) Resource: Performance Goal

Business Object	Policy Description	Policy Store Implementation
Performance Goal	A Line Manager can manage performance goal by manager for subordinates in their person security profile	Role: Manage Performance Goal by Manager Privilege: Manage Performance Goal by Manager (Data) Resource: Performance Goal
Performance Goal	A Line Manager can manage performance goal for subordinates in their person and assignment security profile	Role: Goal Management Line Manager Privilege: Manage Performance Goal (Data) Resource: Performance Goal
Performance Goal	A Line Manager can report career development for subordinates in their person and assignment security profile	Role: Career Development Transaction Analysis Privilege: Report Career Development (Data) Resource: Performance Goal
Performance Goal	A Line Manager can report performance goal for people and assignments in their person and assignment security profile	Role: Goal Management Transaction Analysis Privilege: Report Performance Goal (Data) Resource: Performance Goal
Performance Goal	A Line Manager can view development goal by manager for subordinates in their person and assignment security profile	Role: View Development Goal by Manager Privilege: View Development Goal by Manager (Data) Resource: Performance Goal
Performance Goal	A Line Manager can view development goal for people and assignments in their person and assignment security profile	Role: Use REST Service - Development Goals Read Only Privilege: View Development Goal (Data) Resource: Performance Goal
Performance Goal	A Line Manager can view performance goal by manager for subordinates in their person and assignment security profile	Role: View Performance Goal by Manager Privilege: View Performance Goal by Manager (Data) Resource: Performance Goal
Performance Goal	A Line Manager can view performance goal for people and assignments in their person and assignment security profile	Role: Use REST Service - Performance Goals Read Only Privilege: View Performance Goal (Data) Resource: Performance Goal

Business Object	Policy Description	Policy Store Implementation
Person	A Line Manager can add pending worker for subordinates in their person and assignment security profile	Role: Pending Worker Addition and Hire Privilege: Add Pending Worker (Data) Resource: Person
Person	A Line Manager can add person for subordinates in their person and assignment security profile	Role: Line Manager Privilege: Add Pending Worker (Data) Resource: Person
Person	A Line Manager can compare person for subordinates in their person and assignment security profile	Role: Compare HCM Information Privilege: Compare Person (Data) Resource: Person
Person	A Line Manager can edit pending worker for subordinates in their person and assignment security profile	Role: Pending Worker Addition and Hire Privilege: Edit Pending Worker (Data) Resource: Person
Person	A Line Manager can hire pending worker for subordinates in their person and assignment security profile	Role: Pending Worker Addition and Hire Privilege: Hire Pending Worker (Data) Resource: Person
Person	A Line Manager can print worker portrait for subordinates in their person and assignment security profile	Role: Print Worker Portrait Privilege: Print Worker Portrait (Data) Resource: Person
Person	A Line Manager can rehire employee for subordinates in their person and assignment security profile	Role: Employee Hire Privilege: Rehire Employee (Data) Resource: Person
Person	A Line Manager can renew placement for subordinates in their person and assignment security profile	Role: Contingent Worker Addition Privilege: Renew Placement (Data) Resource: Person
Person	A Line Manager can report person for persons and assignments in their person and assignment security profile	Role: Career Development Transaction Analysis Privilege: Report Person (Data) Resource: Person

Business Object	Policy Description	Policy Store Implementation
Person	A Line Manager can report person for persons and assignments in their person and assignment security profile	Role: Compensation Transaction Analysis Privilege: Report Person (Data) Resource: Person
Person	A Line Manager can report person for persons and assignments in their person and assignment security profile	Role: Documents of Record Transaction Analysis Privilege: Report Person (Data) Resource: Person
Person	A Line Manager can report person for persons and assignments in their person and assignment security profile	Role: Goal Management Transaction Analysis Privilege: Report Person (Data) Resource: Person
Person	A Line Manager can report person for persons and assignments in their person and assignment security profile	Role: Individual Compensation Transaction Analysis Privilege: Report Person (Data) Resource: Person

Workforce Model Plan	A Line Manager can create workforce model plan for top managers in their public person security profile	Role: Workforce Model Plan Line Manager Privilege: Create Workforce Model Plan (Data) Resource: Workforce Model Plan
Workforce Model Plan	A Line Manager can manage workforce model plan for plans that they own or for which they are the top manager and have been granted access	Role: Workforce Model Plan Line Manager Privilege: Manage Workforce Model Plan (Data) Resource: Workforce Model Plan
Workforce Model Plan	A Line Manager can report workforce model plan for plans that they own or those owned by subordinates in their person and assignment security profile	Role: Workforce Modeling Transaction Analysis Privilege: Report Workforce Model Plan (Data) Resource: Workforce Model Plan
Workforce Schedule	A Line Manager can manage workforce schedule by line manager for the workforce scheduling departments to which their subordinates are assigned	Role: Manage Workforce Schedule by Line Manager Privilege: Manage Workforce Schedule by Line Manager (Data) Resource: Workforce Schedule
Workforce Schedule	A Line Manager can view workforce schedule by line manager for the workforce scheduling departments to which their subordinates are assigned	Role: Manage Workforce Schedule by Line Manager Privilege: View Workforce Schedule by Line Manager (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Workforce Schedule
Workforce Scheduling Department	A Line Manager can choose workforce scheduling department by line manager for the workforce scheduling departments to which their subordinates are assigned	Role: Manage Workforce Schedule by Line Manager Privilege: Choose Workforce Scheduling Department by Line Manager (Data) Resource: Workforce Scheduling Department

Product Configurator Manager (Job Role)

Individual responsible for the creation and maintenance of configuration models.

Role Hierarchy

The Product Configurator Manager job role directly and indirectly inherits these roles.

- Product Configurator Manager
  - Configurator Reviewing
  - Download data for Product Catalog Export
  - Functional Setups
  - Item Inquiry
    - Product Lifecycle Management Folder Access
    - Product Search
      - Supply Chain Common View Web Service
    - View Item Redwood
      - Product Lifecycle Management Folder Access
      - Supply Chain Common View Web Service
  - Read for Product Catalog schema
  - Upload and Download data for Product Catalog images
  - Upload data for Configurator Rule Import
  - Upload data for Product Catalog Import

Duties

This table lists the duties assigned directly and indirectly to the Product Configurator Manager job role.

Duty Role	Description
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.
Download data for Product Catalog Export	Allows to download data exported from Product Catalog related data.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Item Inquiry	Queries and views items in the enterprise.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Search	Manages product searches.
Read for Product Catalog schema	Allows to read Product Catalog schema.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Upload and Download data for Product Catalog images	Allows to upload and download Product Catalog images.
Upload data for Configurator Rule Import	Allows to upload data file to import configurator rule data.
Upload data for Product Catalog Import	Allows to upload data file to import Product Catalog related data.
View Item Redwood	Allows users to view item details.

Privileges

This table lists privileges granted to duties of the Product Configurator Manager job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	Access HCM Common Components	Allows access to HCM common components.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Extension Archives	Allows viewing of definitions of Configurator extension archives.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Model Structure	Allows viewing of item-based and supplemental model structure.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Models	Allows viewing of models and their attributes. Allows generation of model reports.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Rules	Allows viewing of model rules.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Supplemental Attributes	Allows viewing of definitions of supplemental attributes.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator UI Template Maps	Allows viewing of UI template maps and their basic attributes, such as name and description.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator User Interfaces	Allows viewing of definitions of model user interfaces.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Workspaces	Allows viewing of workspaces and their basic attributes, such as name and description. Allows viewing of workspace participants.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Snapshots	Allows viewing of basic attributes of snapshots of item data.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Access Configurator Runtime	Allows access to the Configurator Runtime
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Access HCM Common Components	Allows access to HCM common components.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Administer Orchestration Infrastructure Web Service Sourcing Rule	Allows creation and edit of external orchestration infrastructure interface connectors, which are conduits between order orchestration and external fulfillment systems.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Create Item Based Configurator Model	Allows creation of item-based models in Configurator.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Create Supplemental Configurator Model	Allows creation and duplication of supplemental models in Configurator.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Delete Configuration	Allows deletion of configuration which are not active or associated to orders
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Delete Configurator Model	Allows deletion of draft models.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Edit Configurator Model Information	Allows editing of basic attributes of models, such as name and description.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Edit Configurator UI Template Information	Allows editing of basic attributes of UI templates, such as name and description.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Edit Configurator UI Template Map Information	Allows editing of basic attributes of UI template maps, such as name and description.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Force Unlock Configurator Draft	Allows unlocking of a draft locked by any user.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Extension Archives	Allows management and deployment of Configurator extension archives.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Model Resources	Allows management of Configurator Model resources through services
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Model Structure	Allows management of supplemental structure in a model draft.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Rules	Allows management of rules in a model draft.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Supplemental Attributes	Allows management of supplemental attributes.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator UI Template Maps	Allows management of UI template maps.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator UI Templates	Allows management of UI templates.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator User Interfaces	Allows management and testing of model user interfaces.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Workspace	Allows management of workspaces and of the objects in a workspace.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Snapshots	Allows importing and refreshing of snapshots of item data.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Release Configurator Workspace	Allows releasing all draft objects in a workspace, making them available in production.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Revert Draft Model to Version	Allows reverting of a draft model to a previous version.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Set Up Configurator Modeling Environment	Allows setup of the Configurator Modeling Environment.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Set Up Configurator Run Time	Allows setup of Configurator run time objects and other global settings.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Test Configurator Model	Allows testing of models. Allows saving and restoring configurations.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Test Configurator Workspace	Allows testing of the objects in a workspace. Allows saving and restoring of configurations.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Default Expenditure Types by Web Service	Allow viewing Default Expenditure Types by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organization Parameters List of Values by Web Service	Allow viewing inventory organization parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Schedules by Web Service	Allow viewing schedules by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Granted Role	Granted Role Description	Privilege	Privilege Description

Product Data Steward (Job Role)

Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.

Role Hierarchy

The Product Data Steward job role directly and indirectly inherits these roles.

- Product Data Steward
  - ACL Administrator Common
    - Configure Index
    - Landing Page
      - Product Lifecycle Management Folder Access
      - Product Search
        - Supply Chain Common View Web Service
      - Supply Chain Common View Web Service
      - View Item Redwood
        - Product Lifecycle Management Folder Access
        - Supply Chain Common View Web Service
  - Assign Items to Categories
  - Assign Items to Organization Guided Task Flow
  - Catalog ACL Administrator
    - ACL Administrator Common
      - Configure Index
      - Landing Page
        - Product Lifecycle Management Folder Access
        - Product Search
          - Supply Chain Common View Web Service
        - Supply Chain Common View Web Service
        - View Item Redwood
          - Product Lifecycle Management Folder Access
          - Supply Chain Common View Web Service
  - Content Intelligence Users

- Download data for Product Catalog Export
- Guided Tasks
  - Component Replacement Guided Task Flow
    - Upload data for Item Import
  - Product Management Guided Task Builder
    - Use REST Service - Journey Categories
    - Use REST Service - Journey Categories List of Values
    - Use REST Service - Journey Templates
  - Product Management Guided Task Exploration
    - Use REST Service - Journeys
  - Product Management My Guided Task Access
    - Use REST Service - Assigned Journeys
  - Update Item Attributes Guided Task Flow
    - Product Search
      - Supply Chain Common View Web Service
    - Upload data for Item Import
- Item ACL Administrator
  - ACL Administrator Common
    - Configure Index
    - Landing Page

- Use REST Service - Guided Journeys Read Only

Duties

This table lists the duties assigned directly and indirectly to the Product Data Steward job role.

Duty Role	Description
ACL Administrator Common	All users to create and manage common functions for ACL.
Assign Items to Categories	Allows users to configure and run the Guided Tasks Assign.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.

Duty Role	Description
Business Intelligence Authoring	An author of Business Intelligence reports as presented in the web catalog. The role allows authoring within Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office.
Catalog ACL Administrator	Allow users to manage catalog ACL.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.
Configure Index	Manage search index configurations.
Configure Views	Manage view configurations.
Content Intelligence Users	Provides ability to view content that is generally available to anybody that is logged in.
Download data for Product Catalog Export	Allows to download data exported from Product Catalog related data.
FSCM Load Interface Administration	Manages load interface file for import
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Guided Tasks	Manages guided tasks.
Guided Tasks Builder	Manages configuration of guided tasks.
Guided Tasks Run Time	Manages of running guided tasks.
Guided Tasks View	Manages of viewing guided tasks progress and status.
Item ACL Administrator	Allow users to manage Item ACL.
Item Inquiry	Queries and views items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.
Landing Page	Allows access to key analytics and quick action links to pages.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.
Manage Item Compare	Allows users to access and compare item details.
Manage Item Redwood	Allows users to create and edit item details.

Duty Role	Description
Manage Product Management History Configuration	View, create and manage audit configurations
Manage Product Management History Reports	View, create and manage audit reports
Manage Product Management Import Batches	Manages import Batches
Manage Product Management Publication Batches	Manages product searches.
Manage Product for Pedigree and Serialization	Duty role to manage Product.
Manage Publication Map	Manages publication maps for publishing content.
Manage Redwood Setting	Allows management of Product Management Settings.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.
Product Catalog Transaction Analysis	Analyzes Product Catalog transactional information
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Management Guided Task Builder	Allows management of product management guided tasks and task categories (product management journeys and journey categories).
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).
Product Management My Guided Task Access	Allows product management users to access their own guided tasks (product management assigned journeys).
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.

Duty Role	Description
Product Search	Manages product searches.
Reassign items within Categories	Allows users to configure and run the Guided Tasks Reassign.
Redwood Item Catalogs	View, create and edit Redwood Catalogs.
Redwood Item Rule Set Analysis	Creates and manages item rule set analysis for Redwood.
Redwood Settings	Allows users to access the Redwood Settings.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.
Sales Catalog Administrator ACL	Allow Sales users to manage catalog ACL.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.
Sales Item Inquiry	Allows Sales users to access items and catalogs.
Sales Item Management	Allows Sales user to create and manage items and catalogs.
Sales Item Setup	Allow Sales users to manage setups for items and catalogs.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
Transactional Analysis	This duty is used for various generic OTBI security and filtering purposes and is therefore required for all OTBI users.
Unassign Items from Categories	Allows users to configure and run the Guided Tasks Unassign.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.
Upload and Download data for Product Catalog images	Allows to upload and download Product Catalog images.
Upload and Download data for Product Catalog schema	Allows to upload and download Product Catalog schema.

Duty Role	Description
Upload data for Item Import	Allows access to import items and related information.
Upload data for Product Catalog Import	Allows to upload data file to import Product Catalog related data.
Upload data for Product Group Import	Allows to upload data file to import Product Group related data.
View Item Redwood	Allows users to view item details.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Product Data Steward job role.

Aggregate Privilege	Description
Manage Guided Journeys	Allows management of guided journeys.
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - Journey Categories	Allows the user to call all methods associated with the Journey Categories REST Service.
Use REST Service - Journey Categories List of Values	Allows the user to call the GET method associated with the Journey Categories List of Values REST Service.
Use REST Service - Journey Templates	Allows the user to call all methods associated with the Journey Templates REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.

Privileges

This table lists privileges granted to duties of the Product Data Steward job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
ACL Administrator Common	All users to create and manage common functions for ACL.	Access HCM Common Components	Allows access to HCM common components.
ACL Administrator Common	All users to create and manage common functions for ACL.	Access Users	Allow access to view and select users from a lookup in Redwood.
ACL Administrator Common	All users to create and manage common functions for ACL.	Configure Access Control Teams, Permission Sets, and Conditions	Allows configuration of teams, permission sets, and conditions using the UI or the REST interface.
ACL Administrator Common	All users to create and manage common functions for ACL.	Manage HCM Lists	Allows the user to manage HCM lists.
ACL Administrator Common	All users to create and manage common functions for ACL.	Manage HCM Rules	Allows the user to manage HCM rules.
ACL Administrator Common	All users to create and manage common functions for ACL.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
ACL Administrator Common	All users to create and manage common functions for ACL.	Manage Scheduled Processes	Allows management of Scheduled Processes
ACL Administrator Common	All users to create and manage common functions for ACL.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
ACL Administrator Common	All users to create and manage common functions for ACL.	Run Scheduled Processes	Allows running of scheduled processes.
ACL Administrator Common	All users to create and manage common functions for ACL.	Use Atom Feed - Employees Workspace	Allows the user to subscribe to all Feeds associated with the Employees Workspace.
ACL Administrator Common	All users to create and manage common functions for ACL.	Use REST Service - Identity Integration	Allows users to call all methods associated with the Identity Integration REST Service
ACL Administrator Common	All users to create and manage common functions for ACL.	Use REST Service - Users and Roles Lists of Values	Allows the user to call the GET method associated with the Users and Roles lists of values REST Services.
ACL Administrator Common	All users to create and manage common functions for ACL.	View Feature States Value by Web Service	Allow viewing feature states value by web service
ACL Administrator Common	All users to create and manage common functions for ACL.	View Product Management Search	Allows access to view Product Management Search.

Granted Role	Granted Role Description	Privilege	Privilege Description
Assign Items to Categories	Allows users to configure and run the Guided Tasks Assign.	Access Guided Tasks Assign Items to categories	Allows access to view Guided Tasks Assign Items to Category flow for which the user has at the minimum view privilege.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Get Item Rest	Allows query access to items through the REST API.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Import Item	Allows access to import items and related information.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Manage Item Batch	Allows management of item batches to import items and related data.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Manage Item Batch Rest	Allows full access to item batch through the REST API.
Catalog ACL Administrator	Allow users to manage catalog ACL.	Access Redwood Catalogs	Allows access to view catalogs, categories and item assignments.
Catalog ACL Administrator	Allow users to manage catalog ACL.	Manage Redwood Catalogs	Allows access to view, create and manage catalogs, categories and item assignments.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access Change Types Using a REST Service	Allows retrieval of all change types using REST services.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access HCM Common Components	Allows access to HCM common components.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access Item Where Used Data Using a REST Service	Permits access to retrieve where used data for items using REST services.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.

Granted Role	Granted Role Description	Privilege	Privilege Description
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Create Change Order	Allows access to create change orders.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	GET Product Management Index REST	Allows access to view indexed attributes.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Import Map Rest	Allows query access to import maps through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Item Rest	Allows query access to items through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Search View REST	Allows query of search views.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Trading Partner Item Relationship Rest	Allows query access to trading partner Item relationship through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Import Item	Allows access to import items and related information.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Change Orders	Allows access to view and edit change orders. Does not include access to view and edit change requests, problem reports, or corrective actions.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Import Map Rest	Allows full access to import maps through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Item Batch	Allows management of item batches to import items and related data.

Granted Role	Granted Role Description	Privilege	Privilege Description
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Item Batch Rest	Allows full access to item batch through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Search View REST	Allows access to view and manage search views.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	View Change Order	Allows access to view change orders. Does not allow access to view change requests, problem reports, or corrective actions.
Configure Index	Manage search index configurations.	Access Manufacturer Attributes for Indexing Using REST	Allows access to manufacturer attributes that are available for indexing, using a REST service.
Configure Index	Manage search index configurations.	GET Product Management Index REST	Allows access to view indexed attributes.
Configure Index	Manage search index configurations.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Configure Index	Manage search index configurations.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Configure Index	Manage search index configurations.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Configure Index	Manage search index configurations.	Manage Product Management Index	Allows access to view and edit the index for an object.
Configure Index	Manage search index configurations.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Configure Index	Manage search index configurations.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Configure Index	Manage search index configurations.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.

Granted Role	Granted Role Description	Privilege	Privilege Description
Configure Index	Manage search index configurations.	Rebuild Product Management Indexes	Allow access to ESS Job PMESIndexMaintenanceJob to maintain Product Management Indexes.
Configure Views	Manage view configurations.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Configure Views	Manage view configurations.	GET Product Management Index REST	Allows access to view indexed attributes.
Configure Views	Manage view configurations.	Get View Available Attribute REST	Allows access to query and view available attributes for the view.
Configure Views	Manage view configurations.	Manage Product Management View	Allows access to view and edit the view for an object.
Configure Views	Manage view configurations.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Configure Views	Manage view configurations.	Manage Search View REST	Allows access to view and manage search views.
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Guided Tasks	Manages guided tasks.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Guided Tasks	Manages guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks	Manages guided tasks.	View Guided Tasks	Allows view access to guided tasks.
Guided Tasks Builder	Manages configuration of guided tasks.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Guided Tasks Run Time	Manages of running guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks View	Manages of viewing guided tasks progress and status.	View Guided Tasks	Allows view access to guided tasks.
Item ACL Administrator	Allow users to manage Item ACL.	Get Item Attribute Control REST	Allows access to view operational attribute controls for which the user has at the minimum view privilege.
Item ACL Administrator	Allow users to manage Item ACL.	Get Item Class Rest	Allows query access to item Classes through the REST API.
Item ACL Administrator	Allow users to manage Item ACL.	Get Item Lifecycle Phases Read Rest	Allows access to view Item Lifecycle Phases for a single item and attributes for which the user has at the minimum view privilege.
Item ACL Administrator	Allow users to manage Item ACL.	Get Item Status REST	Allows access to view item statuses for which the user has at the minimum view privilege.
Item ACL Administrator	Allow users to manage Item ACL.	Get Template REST	Allows access to view templates for which the user has at the minimum view privilege.
Item ACL Administrator	Allow users to manage Item ACL.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item ACL Administrator	Allow users to manage Item ACL.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Item ACL Administrator	Allow users to manage Item ACL.	View Global Inventory Organizations List of Values by Web Service	Allow viewing the global set of inventory organizations list of values by web service.
Item ACL Administrator	Allow users to manage Item ACL.	View Item	Allows access to product dashboard.
Item ACL Administrator	Allow users to manage Item ACL.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of

Granted Role	Granted Role Description	Privilege	Privilege Description
			standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Configure Item Extended Attributes	Allows configuration of item extended attributes.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Item Structure	Allows access to create item structure action from regional task pane.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Trading Partner	Allows access to creation of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Delete Trading Partners	Allows access to deletion of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item	Allows access to browse items.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Lifecycle Phase Change	Allows access to change lifecycle phase of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Organization Association	Allows access to manage item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Relationship	Allows access to manage item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Status Change	Allows access to change status of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Work List	Allows access to manage item work list entries.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Product Audit Trail Reports	Allows management of audit data for products.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Modify Trading Partners	Allows access to modify of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Summary	Allows access to items overview page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Work Area	Allows access to items and notifications page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Development Structures	Allows access to development structures.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item	Allows access to product dashboard.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item History	Allows viewing of audit data for an item.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Organization Association	Allows access to view item organization assignments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Relationship	Allows access to view item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Trading Partner Item	Allows access to view trading partner items.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Landing Page	Allows access to key analytics and quick action links to pages.	Access HCM Common Components	Allows access to HCM common components.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Object Tag Set Repository	Allows access to view and manage the object tag set repository.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Object Tags Repository	Allows access to view and manage the object tag repository.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Product Management Landing Page	Allows access to view the Product Management Landing page analytics and page navigation.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Data Visualization Configuration	Allows creation, modification and deletion of data visualization configurations either through UI pages or through REST service calls. For example, a data visualization could be configured to be displayed as a Bar chart.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Landing Page Layout	Allows access to create and configure KPIs and Visualizations for the Product Management landing page.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Product Management Scheduled Processes	Allows manage to scheduled processes.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for

Granted Role	Granted Role Description	Privilege	Privilege Description
			application sets that required for picker applications.
Landing Page	Allows access to key analytics and quick action links to pages.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Landing Page	Allows access to key analytics and quick action links to pages.	View Data Visualization Configuration	Allows viewing of data visualization configurations.
Landing Page	Allows access to key analytics and quick action links to pages.	View Scheduled Processes	Allows users to view scheduled processes.
Landing Page	Allows access to key analytics and quick action links to pages.	View Service Manager Dashboard	Allows viewing of the service manager dashboard. The dashboard contains analytical reports on service objects.
Landing Page	Allows access to key analytics and quick action links to pages.	View Service Representative Dashboard	Allows viewing of the service representative dashboard. The dashboard contains analytical reports on service objects.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Access Change Order Using a REST Service	Permits access to change order using REST services
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Access Item Structure Data Using a REST Service	Permits access to retrieve component data for item structures using REST services.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Add Object to Deletion Group	Allow access to add objects to deletion group.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	GET Product Management Index REST	Allows access to view indexed attributes.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Get Search View REST	Allows query of search views.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Manage Delete Group Rest	Allows full access to Manage Delete Group page through Rest API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	Manage Item Delete Group	Allows access to manage delete groups in order to purge items, product structures, packs, change orders, and new item requests.
Manage Delete Group	Manages the Delete Group activities including the REST APIs needed for the page.	View Product Management Search	Allows access to view Product Management Search.
Manage Item Compare	Allows users to access and compare item details.	View Item Compare	Allows access to view compare items in quick actions.
Manage Item Redwood	Allows users to create and edit item details.	Create Item Structure	Allows access to create item structure action from regional task pane.
Manage Item Redwood	Allows users to create and edit item details.	Enter Trading Community Organization Information	Allows the specification of organization information.
Manage Item Redwood	Allows users to create and edit item details.	Get New Item Request Rest	Allows query and return of the NIR setup details.
Manage Item Redwood	Allows users to create and edit item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Associations	Allow access to view the create and edit associations tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Attachments	Allow access to create and edit the attachment tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Item Categories	Allow access to create and edit the item changes tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Relationships	Allow access to create and edit the relationships tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Structures	Allow access to create and edit the item structures tab in the Manage Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Status REST	Allows access to view and manage item statuses.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Association Rest	Allows Redwood custom actions create/update item to create and edit supplier associations for items.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Associations	Allows access to view and manage Redwood item supplier associations for which the user has at the minimum view privilege.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Translation	Allow access to manage translations for items in the translation editor.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Revision Rest	Allows access to view and manage item revisions.
Manage Item Redwood	Allows users to create and edit item details.	Remove Trading Community Organization	Allows the removal of organizations. If assigning, also assign the ability to view the trading community organization.
Manage Item Redwood	Allows users to create and edit item details.	Update Trading Community Organization	Allows the update of the organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Manage Item Redwood	Allows users to create and edit item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Manage Product Management History Configuration	View, create and manage audit configurations	GET Product Management Index REST	Allows access to view indexed attributes.
Manage Product Management History Configuration	View, create and manage audit configurations	Get Redwood Settings REST	Allows query access to settings through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Product Management History Configuration	View, create and manage audit configurations	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Product Management History Configuration	Allows access to manage the Redwood Product Management History Configuration page and Process Product Management History Data process.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Redwood Product Management Settings	Allows access to manage Product Management Settings.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Redwood Setting Rest	Permits access to view and manage the Redwood Settings using REST services
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Redwood Settings REST	Permits access to Redwood Settings using REST services
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Manage Product Management History Configuration	View, create and manage audit configurations	Rebuild Product Management Indexes	Allow access to ESS Job PMESIndexMaintenanceJob to maintain Product Management Indexes.
Manage Product Management History Configuration	View, create and manage audit configurations	View Product Management History Attributes	Allows access to view auditable attributes and their metadata.
Manage Product Management History Reports	View, create and manage audit reports	Access HCM Common Components	Allows access to HCM common components.
Manage Product Management History Reports	View, create and manage audit reports	GET Product Management Index REST	Allows access to view indexed attributes.
Manage Product Management History Reports	View, create and manage audit reports	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Product Management History Reports	View, create and manage audit reports	Manage Search View REST	Allows access to view and manage search views.
Manage Product Management History Reports	View, create and manage audit reports	Manage System Searches	Allows users to manage HCM system searches.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Product Management History Reports	View, create and manage audit reports	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Manage Product Management History Reports	View, create and manage audit reports	View Catalog Context History Report	Allows access to view Catalog Context History Report for which the user has at the minimum view privilege.
Manage Product Management History Reports	View, create and manage audit reports	View Catalog History Report	Allows access to view Catalog History for which the user has at the minimum view privilege.
Manage Product Management History Reports	View, create and manage audit reports	View History Reports	Allows access to view the history for Product Management objects.
Manage Product Management History Reports	View, create and manage audit reports	View Item Context History Report	Allows access to view the item history in the item detail page.
Manage Product Management History Reports	View, create and manage audit reports	View Item History Report	Allows access to view the item history in the History page.
Manage Product Management History Reports	View, create and manage audit reports	View Product Management History Reports	Allows access to view the Redwood Product Management History Reports page.
Manage Product Management History Reports	View, create and manage audit reports	View Trading Partner Item Context History Report	Allows access to view the trading partner item history in trading partner item pages.
Manage Product Management History Reports	View, create and manage audit reports	View Trading Partner Item History Report	Allows access to view the trading partner item history in History page.
Manage Product Management Import Batches	Manages import Batches	Edit Import Batch	Allows access to edit an item batch.
Manage Product Management Import Batches	Manages import Batches	Manage Import Batches	Allows access to Import Batches user interface.
Manage Product Management Publication Batches	Manages product searches.	Manage Publication Batches	Allows management of publication batches in the Publication Batch user interface.
Manage Product for Pedigree and Serialization	Duty role to manage Product.	Create Product for Pedigree and Serialization	Privilege to define the attributes of the shippable product. Products contain: Regulatory Information, Serial Generation Information, and Item Cross Reference Information.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Product for Pedigree and Serialization	Duty role to manage Product.	Delete Product for Pedigree and Serialization	Privilege to delete a product that does not have any associated serials, transactions or lots.
Manage Product for Pedigree and Serialization	Duty role to manage Product.	Edit Product for Pedigree and Serialization	Privilege to edit product information associated with the management of serial numbers.
Manage Publication Map	Manages publication maps for publishing content.	Manage Publication Maps	Allows management of the publication maps through the Publication Map user interface.
Manage Publication Map	Manages publication maps for publishing content.	Manage Publication Maps REST	Allows management of the publication maps through the REST API.
Manage Publication Map	Manages publication maps for publishing content.	Manage Publishable Attributes REST	Allows management of the publishable attributes through the REST API.
Manage Redwood Setting	Allows management of Product Management Settings.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Redwood Setting	Allows management of Product Management Settings.	Manage Redwood Product Management Settings	Allows access to manage Product Management Settings.
Manage Redwood Setting	Allows management of Product Management Settings.	Manage Redwood Settings REST	Permits access to Redwood Settings using REST services
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Access Change Order Using a REST Service	Permits access to change order using REST services
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Access Item Structure Data Using a REST Service	Permits access to retrieve component data for item structures using REST services.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Get Item Rule Set Rest	Allows query access to item rule sets through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage File Import and Export	Privilege to manage import and export of files.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Item Source System	Allows management of batch options for source systems.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Publication Maps REST	Allows management of the publication maps through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Publishable Attributes REST	Allows management of the publishable attributes through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Spoke System Import Options Rest	Allows full access to the import option for the spoke system through the REST API.
Manage Spoke System	Manages the Spoke System activities including the REST APIs needed for the page.	Manage Spoke System Rest	Allows full access to spokes systems through the REST API.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Analyze Change Order	Allows users to route the change order from draft to open status.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Change Order	Allows access to create change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Item Pack	Allows access to create pack action from regional task pane.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	GET Product Management Index REST	Allows access to view indexed attributes.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Generate Item Change Order Report	Allows access to generate item change order reports.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Search View REST	Allows query of search views.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Import Item	Allows access to import items and related information.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Orders	Allows access to view and edit change orders. Does not include access to view and edit change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Requests	Allows access to view and edit change requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Change Order	Allows access to manage item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Delete Group	Allows access to manage delete groups in order to purge items, product structures, packs, change orders, and new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Supplier Association	Allows access to manage item supplier site organizations and the association details.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage New Item Request	Allows access to manage new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Product Management Search	Allows access to view and edit Product Management Search.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Redwood Import Map	All access to create and edit Redwood Import Maps.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Modify Change Status	Allows users to modify the status of a change order through routing.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Catalog Summary	Allows access to catalogs overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Change Order Summary	Allows access to change orders overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Dashboard	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Summary	Allows access to items overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Work Area	Allows access to items and notifications page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor New Item Request Summary	Allows access to new item requests overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Product Management Workflow Objects	Allows access to Product Management workflow objects.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Reschedule Item Change Order	Allows rescheduling of change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Run Guided Tasks	Allows access to run guided task flows.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Order	Allows access to view change orders. Does not allow access to view change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Request	Allows access to view change requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item	Allows access to product dashboard.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Change Order	Allows access to search and view item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Supplier Association	Allows access to view item supplier site organizations and the association details.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View New Item Request	Allows access to search and view new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Product Management Search	Allows access to view Product Management Search.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Check Item Data Quality	Allows access to check item data quality including data standardization.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Generate Access Token	Allows the generation of access token for smart spreadsheets.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Manage Application Data Security Policy	Allows management of security policies that restrict access to functions and data, such as preventing particular values from being accessed in a chart of account segment.
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible for data loads. Develops consistent data in accordance with the business rules of the corporation. Responsibilities also include data scrubbing, monitoring data entry exception, data de-duplication, ensuring overall data quality.	Manage Application Database Resource	Manage application database resources for data security
Product Data Steward	Executes change requests upon approval and maintains the quality of the product master. Responsible	Manage Assignee	Allows you to modify the assignee of an object, such as a change

			application sets that required for picker applications.
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.	Run Scheduled Processes	Allows running of scheduled processes.
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.	Use Atom Feed - Employees Workspace	Allows the user to subscribe to all Feeds associated with the Employees Workspace.
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.	Use REST Service - Identity Integration	Allows users to call all methods associated with the Identity Integration REST Service
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.	Use REST Service - Users and Roles Lists of Values	Allows the user to call the GET method associated with the Users and Roles lists of values REST Services.
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Sales ACL Administrator Common	Allow Sales users to create and manage common functions of ACL.	View Product Management Search	Allows access to view Product Management Search.
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	Administer Sandbox	Allows administration of all sandboxes.
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	Configure Sales Catalog UI	Allows configuration of the sales catalog UI
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and	Manage Product Eligibility Rules	Allows management of eligibility rules for products.

Granted Role	Granted Role Description	Privilege	Privilege Description
	maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.		
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	Manage Product Groups	Allows management of product groups and their attributes, lookups, mapping, profile options, templates and usages.
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export

Granted Role	Granted Role Description	Privilege	Privilege Description
	the bulk export and import of all product group-related objects.		
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files containing business objects, such as customers and contacts, into staging tables.
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	Set Up File Import Object and Mapping	Allows reviewing and registering business objects, such as sales leads and opportunities, intended for import from external files. Also allows creating and maintaining maps of external source file columns to target staging table columns for use in importing those business objects, such as sales leads, customers, contacts, and sales catalogs.
Sales Catalog Administrator	Sets up and maintains sales catalogs for leads, opportunities, quotes and orders. Sets up and maintains rollup catalog for the purpose of forecasting, territory management, and other purposes. Also associates products, promotions, and competitor products to catalogs, and defines eligibility rules. Also manages the bulk export and import of all product group-related objects.	View Administration Link	Privilege to view administration link in UI shell
Sales Catalog Administrator ACL	Allow Sales users to manage catalog ACL.	Access Redwood Catalogs	Allows access to view catalogs, categories and item assignments.
Sales Catalog Administrator ACL	Allow Sales users to manage catalog ACL.	Manage Redwood Catalogs	Allows access to view, create and manage catalogs, categories and item assignments.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	Get Item Attribute Control REST	Allows access to view operational attribute controls for which the user has at the minimum view privilege.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	Get Item Class Rest	Allows query access to item Classes through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	Get Item Lifecycle Phases Read Rest	Allows access to view Item Lifecycle Phases for a single item and attributes for which the user has at the minimum view privilege.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	Get Item Status REST	Allows access to view item statuses for which the user has at the minimum view privilege.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	Get Template REST	Allows access to view templates for which the user has at the minimum view privilege.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	View Global Inventory Organizations List of Values by Web Service	Allow viewing the global set of inventory organizations list of values by web service.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	View Item	Allows access to product dashboard.
Sales Item Administrator ACL	Allow Sales users to manage Item ACL.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access HCM Common Components	Allows access to HCM common components.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Object Tag Set Repository	Allows access to view and manage the object tag set repository.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Object Tags Repository	Allows access to view and manage the object tag repository.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Product Management Landing Page	Allows access to view the Product Management Landing page analytics and page navigation.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Redwood Catalogs	Allows access to view catalogs, categories and item assignments.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	GET Product Management Index REST	Allows access to view indexed attributes.

Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Schedules by Web Service	Allow viewing schedules by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Unassign Items from Categories	Allows users to configure and run the Guided Tasks Unassign.	Access Guided Tasks Unassign Items from categories	Allows access to view Guided Tasks Unassign Items to Category flow for which the user has at the minimum view privilege.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Access HCM Common Components	Allows access to HCM common components.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Generate Access Token	Allows the generation of access token for smart spreadsheets.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Import Map Rest	Allows query access to import maps through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Item Rest	Allows query access to items through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Search View REST	Allows query of search views.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Import Item	Allows access to import items and related information.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Import Map Rest	Allows full access to import maps through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Item Batch	Allows management of item batches to import items and related data.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Item Batch Rest	Allows full access to item batch through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Item Import Map	Not Available
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Search View REST	Allows access to view and manage search views.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Product Data Steward job role.

Business Object	Policy Description	Policy Store Implementation
Application Attachment Category	A Product Data Steward can delete application attachment for all miscelleneous category attachments data	Role: Sales Catalog Administrator Privilege: Delete Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Product Data Steward can read application attachment for all miscelleneous category attachments data	Role: Sales Catalog Administrator Privilege: Read Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Product Data Steward can update application attachment for all miscelleneous category attachments data	Role: Sales Catalog Administrator Privilege: Update Application Attachment Resource: Application Attachment Category
Application Objects	A Product Data Steward can manage application objects for all customer relationship management application objects	Role: Item Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Data Steward can manage application objects for the change orders they have access to	Role: Product Common Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Data Steward can manage application objects for the item classes they have access to	Role: Product Model Administration Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Data Steward can manage application objects for the items they have access to in item and inventory organizations	Role: Product Model Administration Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Data Steward can manage application objects for the journey application object	Role: Manage Guided Journeys Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Data Steward can manage application objects for the journey category application object	Role: Use REST Service - Journey Categories Privilege: Manage Application Objects (Data) Resource: Application Objects

Business Object	Policy Description	Policy Store Implementation
Application Objects	A Product Data Steward can manage application objects for the journey, journey category and worker journey application objects	Role: Use REST Service - Journey Templates Privilege: Manage Application Objects (Data) Resource: Application Objects
Contract File Import Object	A Product Data Steward can view contract import for all contract file import objects	Role: Sales Catalog Administrator Privilege: View Contract Import (Data) Resource: Contract File Import Object
File Export Batch	A Product Data Steward can view file export batch for all export batches	Role: Sales Catalog Administrator Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Object	A Product Data Steward can manage export unit test for all export unit test objects	Role: Sales Catalog Administrator Privilege: Manage Export Unit Test (Data) Resource: File Export Object
File Import Activity	A Product Data Steward can view standard file import activity object type for all standard file import activities that are accessible for sales catalog administrator	Role: Sales Catalog Administrator Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Mapping	A Product Data Steward can view standard file import mapping object type for all standard file import maps that are accessible for sales catalog administrator	Role: Sales Catalog Administrator Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
Guided Journey Response	A Product Data Steward can manage guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: Manage Guided Journey Response (Data) Resource: Guided Journey Response
Guided Journey Response	A Product Data Steward can view guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: View Guided Journey Response (Data) Resource: Guided Journey Response
Item	A Product Data Steward can create item class item for the item classes they have access to	Role: Item Management

Business Object	Policy Description	Policy Store Implementation
		Privilege: Create Item Class Item (Data) Resource: Item
Item Change	A Product Data Steward can maintain created item change for the item change they created	Role: Product Common Management Privilege: Maintain Created Item Change (Data) Resource: Item Change
Item Change	A Product Data Steward can maintain item change order for the item changes they have access to	Role: Product Common Management Privilege: Maintain Item Change Order (Data) Resource: Item Change
Item Change	A Product Data Steward can view created item change for the item change they created	Role: Product Common Management Privilege: View Created Item Change (Data) Resource: Item Change
Item Change	A Product Data Steward can view item change order for the item changes they have access to	Role: Product Common Management Privilege: View Item Change Order (Data) Resource: Item Change
Journey	A Product Data Steward can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey (Data) Resource: Journey
Journey	A Product Data Steward can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Product Data Steward can manage journey for journeys to which they have been granted access	Role: Manage Guided Journeys Privilege: Manage Journey (Data) Resource: Journey
Journey	A Product Data Steward can manage journey for journeys to which they have been granted access	Role: Use REST Service - Journey Templates Privilege: Manage Journey (Data) Resource: Journey

Business Object	Policy Description	Policy Store Implementation
Journey	A Product Data Steward can manage journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Manage Journey (Data) Resource: Journey
Journey	A Product Data Steward can view journey for journeys to which they have been granted access	Role: Manage Guided Journeys Privilege: View Journey (Data) Resource: Journey
Journey	A Product Data Steward can view journey for journeys to which they have been granted access	Role: Use REST Service - Guided Journeys Read Only Privilege: View Journey (Data) Resource: Journey
Journey	A Product Data Steward can view journey for journeys to which they have been granted access	Role: Use REST Service - Journey Templates Privilege: View Journey (Data) Resource: Journey
Journey	A Product Data Steward can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: View Journey (Data) Resource: Journey
Journey Category	A Product Data Steward can choose journey category for journey categories to which they have been granted access	Role: Use REST Service - Journey Categories List of Values Privilege: Choose Journey Category (Data) Resource: Journey Category
Journey Category	A Product Data Steward can manage journey category for journey categories to which they have been granted access	Role: Use REST Service - Journey Categories Privilege: Manage Journey Category (Data) Resource: Journey Category
Journey Category	A Product Data Steward can view journey category for journey categories to which they have been granted access	Role: Use REST Service - Journey Categories Privilege: View Journey Category (Data) Resource: Journey Category
Knowledge User groups	A Product Data Steward can access content with user group access to fusion user user group	Role: Content Intelligence Users Privilege: Access Content with User Group Resource: Knowledge User groups

Business Object	Policy Description	Policy Store Implementation
Product Group Details Export Object	A Product Data Steward can view product group export object for all product group details export objects and product group eligibility export objects in the enterprise	Role: Sales Catalog Administrator Privilege: View Product Group Export Object (Data) Resource: Product Group Details Export Object
Product Group File Import Activity	A Product Data Steward can view product group file import activity object type for all authorized product group file import activities in all resource organizations where they are authorized	Role: Sales Catalog Administrator Privilege: View Product Group File Import Activity Object Type (Data) Resource: Product Group File Import Activity
Product Group File Import Mapping	A Product Data Steward can view product group file import mapping object type for all product group file import mappings in all resource organizations where they are authorized	Role: Sales Catalog Administrator Privilege: View Product Group File Import Mapping Object Type (Data) Resource: Product Group File Import Mapping
Product Group File Import Object	A Product Data Steward can view product group file import object type for all product group file import objects in all resource organizations where they are authorized	Role: Sales Catalog Administrator Privilege: View Product Group File Import Object Type (Data) Resource: Product Group File Import Object
Product Group Products Export Object	A Product Data Steward can view product group export object for all product group products export objects in the enterprise	Role: Sales Catalog Administrator Privilege: View Product Group Export Object (Data) Resource: Product Group Products Export Object
Product Group Subgroups Export Object	A Product Data Steward can view product group export object for all product group subgroups export objects in the enterprise	Role: Sales Catalog Administrator Privilege: View Product Group Export Object (Data) Resource: Product Group Subgroups Export Object
Product Group Translations Export Object	A Product Data Steward can view product group export object for all product group translations export objects in the enterprise	Role: Sales Catalog Administrator Privilege: View Product Group Export Object (Data) Resource: Product Group Translations Export Object
Sales Objects	A Product Data Steward can view standard file import export object type for all standard file	Role: Sales Catalog Administrator

Business Object	Policy Description	Policy Store Implementation
	import export objects that are accessible for sales catalog administrator	Privilege: View Standard File Import Export Object Type Resource: Sales Objects
Trading Community Org Address Email Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Item Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference
Trading Community Org Address Email Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Common Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference
Trading Community Org Address Email Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Hub Administration Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference
Trading Community Org Address Email Contact Preference	A Product Data Steward can manage trading community org address email contact preference for all trading community contact preferences not of type legal.	Role: Product Data Steward Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference
Trading Community Org Address Phone Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Item Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference
Trading Community Org Address Phone Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Common Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference
Trading Community Org Address Phone Contact Preference	A Product Data Steward can manage trading community legal contact preference for all	Role: Product Hub Administration

Business Object	Policy Description	Policy Store Implementation
	trading community contact preferences not of type legal.	Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference
Trading Community Org Address Phone Contact Preference	A Product Data Steward can manage trading community org address phone contact preference for all trading community contact preferences not of type legal.	Role: Product Data Steward Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference
Trading Community Organization Address Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Item Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Address Contact Preference
Trading Community Organization Address Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Common Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Address Contact Preference
Trading Community Organization Address Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Hub Administration Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Address Contact Preference
Trading Community Organization Address Contact Preference	A Product Data Steward can manage trading community organization address contact preference for all trading community contact preferences not of type legal.	Role: Product Data Steward Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Address Contact Preference
Trading Community Organization Email Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Item Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Email Contact Preference
Trading Community Organization Email Contact Preference	A Product Data Steward can manage trading community legal contact preference for all	Role: Product Common Management

Business Object	Policy Description	Policy Store Implementation
	trading community contact preferences not of type legal.	Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Email Contact Preference
Trading Community Organization Email Contact Preference	A Product Data Steward can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Hub Administration Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Email Contact Preference
Trading Community Organization Email Contact Preference	A Product Data Steward can manage trading community organization email contact preference for all trading community contact preferences not of type legal.	Role: Product Data Steward Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Organization Email Contact Preference
Trading Community Organization Party	A Product Data Steward can view trading community organization for all organizations in the enterprise	Role: Item Management Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party
Trading Community Organization Party	A Product Data Steward can view trading community organization for all organizations in the enterprise	Role: Product Common Management Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party
Trading Community Organization Party	A Product Data Steward can view trading community organization for all organizations in the enterprise	Role: Product Hub Administration Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party
Trading Community Organization Party	A Product Data Steward can view trading community organization party for all organizations in the enterprise	Role: Product Data Steward Privilege: View Trading Community Organization (Data) Resource: Trading Community Organization Party
Trading Community Organization Phone Contact Preference	A Product Data Steward can manage trading community legal contact preference for all	Role: Item Management

Business Object	Policy Description	Policy Store Implementation

Product Design Engineer (Job Role)

Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.

Role Hierarchy

The Product Design Engineer job role directly and indirectly inherits these roles.

- Product Design Engineer
  - Concept Development
  - Item Inquiry
    - Product Lifecycle Management Folder Access
    - Product Search
      - Supply Chain Common View Web Service
    - View Item Redwood
      - Product Lifecycle Management Folder Access

        - Supply Chain Common View Web Service
    - Item Management
        - Product Lifecycle Management Folder Access
    - Product Common Management
        - Guided Tasks Run Time
            - Product Management Guided Task Exploration
                - Use REST Service - Journeys
        - Guided Tasks View
            - Product Management My Guided Task Access
                - Use REST Service - Assigned Journeys
        - Manage Item Redwood
            - Product Lifecycle Management Folder Access
        - Product Catalog Transaction Analysis
            - Business Intelligence Authoring
        - Product Lifecycle Management Folder Access
    - Product Management Agent Application
    - Supply Chain Management Folder Reporting
    - Upload data for Change Order Import
    - Upload data for Product Concept Import

Duties

This table lists the duties assigned directly and indirectly to the Product Design Engineer job role.

Duty Role	Description
Business Intelligence Authoring	An author of Business Intelligence reports as presented in the web catalog. The role allows authoring within Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office.
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty
Guided Tasks Run Time	Manages of running guided tasks.
Guided Tasks View	Manages of viewing guided tasks progress and status.
Item Inquiry	Queries and views items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.

Duty Role	Description
Manage Item Redwood	Allows users to create and edit item details.
Product Catalog Transaction Analysis	Analyzes Product Catalog transactional information
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Management Agent Application	Allows users to initiate and launch product management agent application.
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).
Product Management My Guided Task Access	Allows product management users to access their own guided tasks (product management assigned journeys).
Product Search	Manages product searches.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
Upload data for Change Order Import	Allows to upload data file to import change order data
Upload data for Product Concept Import	Allows to upload data file to import product concept related data.
View Item Redwood	Allows users to view item details.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Product Design Engineer job role.

Aggregate Privilege	Description
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.

Aggregate Privilege	Description

Privileges

This table lists privileges granted to duties of the Product Design Engineer job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Manage Product Component	Allows for managing of Components for create, update and delete within a Concept Product Structure and assigning requirements to components
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Review Product Concept	Allows for reviewing a Concept with all its details
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Review Product Requirement	Allows viewing of a product Requirement with all its details
Guided Tasks Run Time	Manages of running guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks View	Manages of viewing guided tasks progress and status.	View Guided Tasks	Allows view access to guided tasks.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Configure Item Extended Attributes	Allows configuration of item extended attributes.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Item Structure	Allows access to create item structure action from regional task pane.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Trading Partner	Allows access to creation of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Delete Trading Partners	Allows access to deletion of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item	Allows access to browse items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Management	Creates and manages items including item attributes, item	Manage Item Lifecycle Phase Change	Allows access to change lifecycle phase of items in the enterprise.

Granted Role	Granted Role Description	Privilege	Privilege Description
	structures, packs, associations, relationships, and catalog assignments.		
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Organization Association	Allows access to manage item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Relationship	Allows access to manage item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Status Change	Allows access to change status of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Work List	Allows access to manage item work list entries.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Product Audit Trail Reports	Allows management of audit data for products.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Modify Trading Partners	Allows access to modify of trading partners.
Item Management	Creates and manages items including item attributes, item	Monitor Item Summary	Allows access to items overview page.

Granted Role	Granted Role Description	Privilege	Privilege Description
	structures, packs, associations, relationships, and catalog assignments.		
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Work Area	Allows access to items and notifications page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Development Structures	Allows access to development structures.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item	Allows access to product dashboard.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item History	Allows viewing of audit data for an item.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Organization Association	Allows access to view item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Relationship	Allows access to view item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Trading Partner Item	Allows access to view trading partner items.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	Create Item Structure	Allows access to create item structure action from regional task pane.
Manage Item Redwood	Allows users to create and edit item details.	Enter Trading Community Organization Information	Allows the specification of organization information.
Manage Item Redwood	Allows users to create and edit item details.	Get New Item Request Rest	Allows query and return of the NIR setup details.
Manage Item Redwood	Allows users to create and edit item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Associations	Allow access to view the create and edit associations tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Attachments	Allow access to create and edit the attachment tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Item Categories	Allow access to create and edit the item changes tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Relationships	Allow access to create and edit the relationships tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Structures	Allow access to create and edit the item structures tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Status REST	Allows access to view and manage item statuses.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Association Rest	Allows Redwood custom actions create/update item to create and edit supplier associations for items.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Associations	Allows access to view and manage Redwood item supplier associations for which the user has at the minimum view privilege.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Translation	Allow access to manage translations for items in the translation editor.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Revision Rest	Allows access to view and manage item revisions.
Manage Item Redwood	Allows users to create and edit item details.	Remove Trading Community Organization	Allows the removal of organizations. If assigning, also assign the ability to view the trading community organization.
Manage Item Redwood	Allows users to create and edit item details.	Update Trading Community Organization	Allows the update of the organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Manage Item Redwood	Allows users to create and edit item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Analyze Change Order	Allows users to route the change order from draft to open status.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and	Create Change Order	Allows access to create change orders.

Granted Role	Granted Role Description	Privilege	Privilege Description
	catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Item Pack	Allows access to create pack action from regional task pane.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Generate Item Change Order Report	Allows access to generate item change order reports.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Search View REST	Allows query of search views.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Import Item	Allows access to import items and related information.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.

Granted Role	Granted Role Description	Privilege	Privilege Description
	catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Orders	Allows access to view and edit change orders. Does not include access to view and edit change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Requests	Allows access to view and edit change requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Change Order	Allows access to manage item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Delete Group	Allows access to manage delete groups in order to purge items, product structures, packs, change orders, and new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and	Manage Item Supplier Association	Allows access to manage item supplier site organizations and the association details.

Granted Role	Granted Role Description	Privilege	Privilege Description
	catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage New Item Request	Allows access to manage new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Redwood Import Map	All access to create and edit Redwood Import Maps.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Modify Change Status	Allows users to modify the status of a change order through routing.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Catalog Summary	Allows access to catalogs overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Change Order Summary	Allows access to change orders overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and	Monitor Item Dashboard	Allows access to product dashboard.

Granted Role	Granted Role Description	Privilege	Privilege Description
	catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Summary	Allows access to items overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Work Area	Allows access to items and notifications page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor New Item Request Summary	Allows access to new item requests overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Product Management Workflow Objects	Allows access to Product Management workflow objects.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Reschedule Item Change Order	Allows rescheduling of change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Run Guided Tasks	Allows access to run guided task flows.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and	View Change Order	Allows access to view change orders. Does not allow access to view change requests, problem reports, or corrective actions.

Granted Role	Granted Role Description	Privilege	Privilege Description
	catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Request	Allows access to view change requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Change Order	Allows access to search and view item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Supplier Association	Allows access to view item supplier site organizations and the association details.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View New Item Request	Allows access to search and view new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Product Management Search	Allows access to view Product Management Search.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics,	Access Clipboard	Allows you to access the clipboard across the product management work areas.

Granted Role	Granted Role Description	Privilege	Privilege Description
	electronic characteristics, and manufacturing parameters such as tolerance.		
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Create Product Idea	Allows for the creation of an Idea
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Generate Item Change Order Report	Allows access to generate item change order reports.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Maintain Development Item Costs	Privilege enables user to maintain costs of development items.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Manage Item Change Order	Allows access to manage item change orders.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Manage Product Document	Allows for managing of a Product Document - creating, updating of Document attributes, deleting and managing its structure.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics,	Manage Product Idea	Allows managing of an Idea - creating and updating

Granted Role	Granted Role Description	Privilege	Privilege Description
	electronic characteristics, and manufacturing parameters such as tolerance.		
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Manage Trading Partner Item	Allows access to manage trading partner items.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Monitor Item Change Order Summary	Allows access to change orders overview page.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Monitor Item Work Area	Allows access to items and notifications page.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Monitor Product Development	Privilege enables users to access Product Development work area and monitor development items.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Publish Change Order	Allows access to the publish change order action
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	Review Product Ideas	Allows reviewing of product ideas
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics,	View Development Item Costs	Privilege enables user to review costs of development items.

Granted Role	Granted Role Description	Privilege	Privilege Description
	electronic characteristics, and manufacturing parameters such as tolerance.		
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	View Item Change Order	Allows access to search and view item change orders.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	View Product Management Reports	Allow configuration of the report path and parameters for OTBI reports launched from the Actions menu on the object page.
Product Design Engineer	Individual responsible for creating the definition of mechanical and electronic products including their shape, physical characteristics, electronic characteristics, and manufacturing parameters such as tolerance.	View Trading Partner Item	Allows access to view trading partner items.
Product Management Agent Application	Allows users to initiate and launch product management agent application.	Access design to source agent application	Allows access to design to source agent application.
Product Management Agent Application	Allows users to initiate and launch product management agent application.	Access product readiness agent application	Allows access to product readiness agent application.
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).	View Global Journeys	Allows users to view global journeys. Viewing of personal journeys is not restricted by this privilege.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Default Expenditure Types by Web Service	Allow viewing Default Expenditure Types by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organization Parameters List of Values by Web Service	Allow viewing inventory organization parameters list of values by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Schedules by Web Service	Allow viewing schedules by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Product Design Engineer job role.

Business Object	Policy Description	Policy Store Implementation
Application Objects	A Product Design Engineer can manage application objects for all customer relationship management application objects	Role: Item Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Design Engineer can manage application objects for the change orders they have access to	Role: Product Common Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Feature Road Map	A Product Design Engineer can review product requirement where they are a member of the feature road map team	Role: Concept Development Privilege: Review Product Requirement (Data) Resource: Feature Road Map
Idea	A Product Design Engineer can manage product idea where they are a member of the idea team	Role: Concept Development Privilege: Manage Product Idea (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Idea
Idea	A Product Design Engineer can review product idea where they are a member of the idea team	Role: Concept Development Privilege: Review Product Idea (Data) Resource: Idea
Item	A Product Design Engineer can create item class item for the item classes they have access to	Role: Item Management Privilege: Create Item Class Item (Data) Resource: Item
Item Change	A Product Design Engineer can maintain created item change for the item change they created	Role: Product Common Management Privilege: Maintain Created Item Change (Data) Resource: Item Change
Item Change	A Product Design Engineer can maintain item change order for the item changes they have access to	Role: Product Common Management Privilege: Maintain Item Change Order (Data) Resource: Item Change
Item Change	A Product Design Engineer can view created item change for the item change they created	Role: Product Common Management Privilege: View Created Item Change (Data) Resource: Item Change
Item Change	A Product Design Engineer can view item change order for the item changes they have access to	Role: Product Common Management Privilege: View Item Change Order (Data) Resource: Item Change
Journey	A Product Design Engineer can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey (Data) Resource: Journey
Journey	A Product Design Engineer can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey to Self (Data) Resource: Journey

Product Design Manager (Job Role)

Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.

Role Hierarchy

The Product Design Manager job role directly and indirectly inherits these roles.

- Product Design Manager
  - Concept Development
  - Item Inquiry
    - Product Lifecycle Management Folder Access
    - Product Search
      - Supply Chain Common View Web Service
    - View Item Redwood
      - Product Lifecycle Management Folder Access
      - Supply Chain Common View Web Service
  - Item Management
    - Product Lifecycle Management Folder Access
  - Product Common Management
    - Guided Tasks Run Time
      - Product Management Guided Task Exploration
        - Use REST Service - Journeys
    - Guided Tasks View
      - Product Management My Guided Task Access
        - Use REST Service - Assigned Journeys
    - Manage Item Redwood
      - Product Lifecycle Management Folder Access
    - Product Catalog Transaction Analysis
      - Business Intelligence Authoring

- Product Lifecycle Management Folder Access
- Supply Chain Management Folder Reporting
- Upload data for Change Order Import
- Upload data for Product Concept Import

Duties

This table lists the duties assigned directly and indirectly to the Product Design Manager job role.

Duty Role	Description
Business Intelligence Authoring	An author of Business Intelligence reports as presented in the web catalog. The role allows authoring within Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office.
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty
Guided Tasks Run Time	Manages of running guided tasks.
Guided Tasks View	Manages of viewing guided tasks progress and status.
Item Inquiry	Queries and views items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.
Manage Item Redwood	Allows users to create and edit item details.
Product Catalog Transaction Analysis	Analyzes Product Catalog transactional information
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).
Product Management My Guided Task Access	Allows product management users to access their own guided tasks (product management assigned journeys).
Product Search	Manages product searches.

Duty Role	Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
Upload data for Change Order Import	Allows to upload data file to import change order data
Upload data for Product Concept Import	Allows to upload data file to import product concept related data.
View Item Redwood	Allows users to view item details.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Product Design Manager job role.

Aggregate Privilege	Description
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.

Privileges

This table lists privileges granted to duties of the Product Design Manager job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Concept Development	A person with this duty can perform concept development related duties such as managing	Manage Product Component	Allows for managing of Components for create, update and delete within a Concept

Granted Role	Granted Role Description	Privilege	Privilege Description
	of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty		Product Structure and assigning requirements to components
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Review Product Concept	Allows for reviewing a Concept with all its details
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Review Product Requirement	Allows viewing of a product Requirement with all its details
Guided Tasks Run Time	Manages of running guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks View	Manages of viewing guided tasks progress and status.	View Guided Tasks	Allows view access to guided tasks.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Configure Item Extended Attributes	Allows configuration of item extended attributes.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Item Structure	Allows access to create item structure action from regional task pane.
Item Management	Creates and manages items including item attributes, item structures, packs, associations,	Create Trading Partner	Allows access to creation of trading partners.

Granted Role	Granted Role Description	Privilege	Privilege Description
	relationships, and catalog assignments.		
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Delete Trading Partners	Allows access to deletion of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item	Allows access to browse items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Lifecycle Phase Change	Allows access to change lifecycle phase of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Organization Association	Allows access to manage item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Relationship	Allows access to manage item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations,	Manage Item Status Change	Allows access to change status of items in the enterprise.

Granted Role	Granted Role Description	Privilege	Privilege Description
	relationships, and catalog assignments.		
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Work List	Allows access to manage item work list entries.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Product Audit Trail Reports	Allows management of audit data for products.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Modify Trading Partners	Allows access to modify of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Summary	Allows access to items overview page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Work Area	Allows access to items and notifications page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Development Structures	Allows access to development structures.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Item Management	Creates and manages items including item attributes, item structures, packs, associations,	View Item	Allows access to product dashboard.

Granted Role	Granted Role Description	Privilege	Privilege Description
	relationships, and catalog assignments.		
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item History	Allows viewing of audit data for an item.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Organization Association	Allows access to view item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Relationship	Allows access to view item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Trading Partner Item	Allows access to view trading partner items.
Manage Item Redwood	Allows users to create and edit item details.	Create Item Structure	Allows access to create item structure action from regional task pane.
Manage Item Redwood	Allows users to create and edit item details.	Enter Trading Community Organization Information	Allows the specification of organization information.
Manage Item Redwood	Allows users to create and edit item details.	Get New Item Request Rest	Allows query and return of the NIR setup details.
Manage Item Redwood	Allows users to create and edit item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Associations	Allow access to view the create and edit associations tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Attachments	Allow access to create and edit the attachment tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Item Categories	Allow access to create and edit the item changes tab in the Manage Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Relationships	Allow access to create and edit the relationships tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Structures	Allow access to create and edit the item structures tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Status REST	Allows access to view and manage item statuses.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Association Rest	Allows Redwood custom actions create/update item to create and edit supplier associations for items.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Associations	Allows access to view and manage Redwood item supplier associations for which the user has at the minimum view privilege.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Translation	Allow access to manage translations for items in the translation editor.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Revision Rest	Allows access to view and manage item revisions.
Manage Item Redwood	Allows users to create and edit item details.	Remove Trading Community Organization	Allows the removal of organizations. If assigning, also assign the ability to view the trading community organization.
Manage Item Redwood	Allows users to create and edit item details.	Update Trading Community Organization	Allows the update of the organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Manage Item Redwood	Allows users to create and edit item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Analyze Change Order	Allows users to route the change order from draft to open status.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Change Order	Allows access to create change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Item Pack	Allows access to create pack action from regional task pane.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Generate Item Change Order Report	Allows access to generate item change order reports.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Get Item Index Available Attributes REST	Allows access to view available attributes for item.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Search View REST	Allows query of search views.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Import Item	Allows access to import items and related information.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Orders	Allows access to view and edit change orders. Does not include access to view and edit change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Manage Change Requests	Allows access to view and edit change requests.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Change Order	Allows access to manage item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Delete Group	Allows access to manage delete groups in order to purge items, product structures, packs, change orders, and new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Supplier Association	Allows access to manage item supplier site organizations and the association details.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage New Item Request	Allows access to manage new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Redwood Import Map	All access to create and edit Redwood Import Maps.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Modify Change Status	Allows users to modify the status of a change order through routing.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Catalog Summary	Allows access to catalogs overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Change Order Summary	Allows access to change orders overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Dashboard	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Summary	Allows access to items overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Work Area	Allows access to items and notifications page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor New Item Request Summary	Allows access to new item requests overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Monitor Product Management Workflow Objects	Allows access to Product Management workflow objects.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Reschedule Item Change Order	Allows rescheduling of change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Run Guided Tasks	Allows access to run guided task flows.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Order	Allows access to view change orders. Does not allow access to view change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Request	Allows access to view change requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Change Order	Allows access to search and view item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	View Item Supplier Association	Allows access to view item supplier site organizations and the association details.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View New Item Request	Allows access to search and view new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Product Management Search	Allows access to view Product Management Search.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Approve Item Change Order	Allows access to approve item change orders.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Create Product Concept	Allows for the creation of a Product Concept
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing	Create Product Idea	Allows for the creation of an Idea

Granted Role	Granted Role Description	Privilege	Privilege Description
	processes, business decisions, and strategies that enable innovation and create effectively designed products.		
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Generate Item Change Order Report	Allows access to generate item change order reports.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Maintain Development Item Costs	Privilege enables user to maintain costs of development items.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Manage Item Change Order	Allows access to manage item change orders.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Manage Product Concept	Allows for managing of a Product Concept - creating, updating of Concept attributes, deleting, managing goals and metrics for the Concept
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Manage Product Document	Allows for managing of a Product Document - creating, updating of Document attributes, deleting and managing its structure.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Manage Product Idea	Allows managing of an Idea - creating and updating

Granted Role	Granted Role Description	Privilege	Privilege Description
	processes, business decisions, and strategies that enable innovation and create effectively designed products.		
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Manage Trading Partner Item	Allows access to manage trading partner items.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Monitor Item Change Order Summary	Allows access to change orders overview page.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Monitor Item Work Area	Allows access to items and notifications page.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Monitor Product Development	Privilege enables users to access Product Development work area and monitor development items.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Publish Change Order	Allows access to the publish change order action
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	Review Product Ideas	Allows reviewing of product ideas
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing	View Development Item Costs	Privilege enables user to review costs of development items.

Granted Role	Granted Role Description	Privilege	Privilege Description
	processes, business decisions, and strategies that enable innovation and create effectively designed products.		
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	View Item Change Order	Allows access to search and view item change orders.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	View Product Management Reports	Allow configuration of the report path and parameters for OTBI reports launched from the Actions menu on the object page.
Product Design Manager	Individual responsible for the business side of design, encompassing the ongoing processes, business decisions, and strategies that enable innovation and create effectively designed products.	View Trading Partner Item	Allows access to view trading partner items.
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).	View Global Journeys	Allows users to view global journeys. Viewing of personal journeys is not restricted by this privilege.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Default Expenditure Types by Web Service	Allow viewing Default Expenditure Types by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organization Parameters List of Values by Web Service	Allow viewing inventory organization parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	inventory organizations, plant parameters, carriers and units of measure list of values.		
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Schedules by Web Service	Allow viewing schedules by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Product Design Manager job role.

Business Object	Policy Description	Policy Store Implementation
Application Objects	A Product Design Manager can manage application objects for all customer relationship management application objects	Role: Item Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Design Manager can manage application objects for the change orders they have access to	Role: Product Common Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Feature Road Map	A Product Design Manager can review product requirement where they are a member of the feature road map team	Role: Concept Development Privilege: Review Product Requirement (Data) Resource: Feature Road Map
Idea	A Product Design Manager can manage product idea where they are a member of the idea team	Role: Concept Development Privilege: Manage Product Idea (Data) Resource: Idea
Idea	A Product Design Manager can review product idea where they are a member of the idea team	Role: Concept Development Privilege: Review Product Idea (Data) Resource: Idea

Business Object	Policy Description	Policy Store Implementation
Item	A Product Design Manager can create item class item for the item classes they have access to	Role: Item Management Privilege: Create Item Class Item (Data) Resource: Item
Item Change	A Product Design Manager can maintain created item change for the item change they created	Role: Product Common Management Privilege: Maintain Created Item Change (Data) Resource: Item Change
Item Change	A Product Design Manager can maintain item change order for the item changes they have access to	Role: Product Common Management Privilege: Maintain Item Change Order (Data) Resource: Item Change
Item Change	A Product Design Manager can view created item change for the item change they created	Role: Product Common Management Privilege: View Created Item Change (Data) Resource: Item Change
Item Change	A Product Design Manager can view item change order for the item changes they have access to	Role: Product Common Management Privilege: View Item Change Order (Data) Resource: Item Change
Journey	A Product Design Manager can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey (Data) Resource: Journey
Journey	A Product Design Manager can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Product Design Manager can manage journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Manage Journey (Data) Resource: Journey
Journey	A Product Design Manager can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: View Journey (Data) Resource: Journey

Business Object	Policy Description	Policy Store Implementation
Product Concept	A Product Design Manager can manage product concept where they are a member of the concept team	Role: Product Design Manager Privilege: Manage Product Concept (Data) Resource: Product Concept
Product Concept	A Product Design Manager can review product concept where they are a member of the concept team	Role: Concept Development Privilege: Review Product Concept (Data) Resource: Product Concept
Product Concept	A Product Design Manager can review product concept where they are a member of the concept team	Role: Product Design Manager Privilege: Review Product Concept (Data) Resource: Product Concept
Requirement	A Product Design Manager can review product requirement where they are a member of the requirement team	Role: Concept Development Privilege: Review Product Requirement (Data) Resource: Requirement
Trading Community Org Address Email Contact Preference	A Product Design Manager can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Item Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference
Trading Community Org Address Email Contact Preference	A Product Design Manager can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Common Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Email Contact Preference
Trading Community Org Address Phone Contact Preference	A Product Design Manager can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Item Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference
Trading Community Org Address Phone Contact Preference	A Product Design Manager can manage trading community legal contact preference for all trading community contact preferences not of type legal.	Role: Product Common Management Privilege: Manage Trading Community Legal Contact Preference (Data) Resource: Trading Community Org Address Phone Contact Preference

Product Management VP (Job Role)

The Product Management VP is the center point of accountability for the performance and alignment of one or more organization product portfolios.

Role Hierarchy

The Product Management VP job role directly and indirectly inherits these roles.

- Product Management VP
  - Portfolio Management
  - Supply Chain Management Folder Reporting

Duties

This table lists the duties assigned directly and indirectly to the Product Management VP job role.

Duty Role	Description
Portfolio Management	This duty allows for managing of a product portfolio.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.

Privileges

This table lists privileges granted to duties of the Product Management VP job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Portfolio Management	This duty allows for managing of a product portfolio.	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Portfolio Management	This duty allows for managing of a product portfolio.	Create Product Portfolio	Allows for creation of a Portfolio, including scenarios, metrics and goals
Portfolio Management	This duty allows for managing of a product portfolio.	Manage Product Portfolio	Allows for managing a Portfolio, including scenarios, metrics and goals
Portfolio Management	This duty allows for managing of a product portfolio.	Manage Product Proposal	Allows for managing of a Product Proposal
Portfolio Management	This duty allows for managing of a product portfolio.	Review Product Portfolio	Allows for reviewing of the Portfolio
Portfolio Management	This duty allows for managing of a product portfolio.	Review Product Proposal	Allows for reviewing of a Product Proposal as part of the Portfolio
Portfolio Management	This duty allows for managing of a product portfolio.	Review Product Requirement	Allows viewing of a product Requirement with all its details

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Product Management VP job role.

Business Object	Policy Description	Policy Store Implementation
Feature Road Map	A Product Management VP can review product requirement where they are a member of the feature road map team	Role: Portfolio Management Privilege: Review Product Requirement (Data) Resource: Feature Road Map

Business Object	Policy Description	Policy Store Implementation
Idea	A Product Management VP can manage product idea where they are a member of the idea team	Role: Portfolio Management Privilege: Manage Product Idea (Data) Resource: Idea
Idea	A Product Management VP can review product idea where they are a member of the idea team	Role: Portfolio Management Privilege: Review Product Idea (Data) Resource: Idea
Product Concept	A Product Management Vp can review product concept where they are a member of the concept team	Role: Product Management VP Privilege: Review Product Concept (Data) Resource: Product Concept
Requirement	A Product Management VP can review product requirement where they are a member of the requirement team	Role: Portfolio Management Privilege: Review Product Requirement (Data) Resource: Requirement

Product Manager (Job Role)

Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.

Role Hierarchy

The Product Manager job role directly and indirectly inherits these roles.

- Product Manager
  - Assign Items to Categories
  - Assign Items to Organization Guided Task Flow
  - Content Intelligence Users
  - Download data for Product Catalog Export
  - FSCM Load Interface Administration
  - Functional Setups
  - Item Inquiry
    - Product Lifecycle Management Folder Access
    - Product Search
      - Supply Chain Common View Web Service
    - View Item Redwood
      - Product Lifecycle Management Folder Access
      - Supply Chain Common View Web Service
  - Item Management
    - Product Lifecycle Management Folder Access
  - Landing Page

    - Supply Chain Common View Web Service
    - View Item Redwood
      - Product Lifecycle Management Folder Access
      - Supply Chain Common View Web Service
  - Manage Item Compare
    - Product Search
      - Supply Chain Common View Web Service
  - Manage Product Management History Configuration
  - Manage Product Management History Reports
  - Manage Product Management Import Batches
    - Product Lifecycle Management Folder Access
  - Manage Product Management Publication Batches
    - Product Lifecycle Management Folder Access
  - Manage Redwood Setting
  - Product Common Management
    - Guided Tasks Run Time

        - Product Management Guided Task Exploration
            - Use REST Service - Journeys
    - Guided Tasks View
        - Product Management My Guided Task Access
            - Use REST Service - Assigned Journeys
    - Manage Item Redwood
        - Product Lifecycle Management Folder Access
    - Product Catalog Transaction Analysis
        - Business Intelligence Authoring
    - Product Lifecycle Management Folder Access
- Product Management Agent Application
- Product Proposal Management
    - Concept Development
- Product Search
    - Supply Chain Common View Web Service
- Read for Product Catalog schema
- Reassign items within Categories
- Redwood Item Catalogs
    - Product Lifecycle Management Folder Access
- Redwood Item Rule Set Analysis
- Redwood Settings
- Redwood Trading Partner Item
    - Product Lifecycle Management Folder Access
- Requirement Management
- Supply Chain Management Folder Reporting
- Unassign Items from Categories
- Upload and Download data for Product Catalog images
- Upload data for Change Order Import
- Upload data for Idea Import
- Upload data for Product Catalog Import
- Upload data for Product Concept Import
- Upload data for Product Proposal Import
- Upload data for Requirement Import
- Use REST Service - Guided Journey Responses
- Use REST Service - Guided Journeys Read Only

Duties

This table lists the duties assigned directly and indirectly to the Product Manager job role.

Duty Role	Description
Assign Items to Categories	Allows users to configure and run the Guided Tasks Assign.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.
Business Intelligence Authoring	An author of Business Intelligence reports as presented in the web catalog. The role allows authoring within Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office.
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty
Content Intelligence Users	Provides ability to view content that is generally available to anybody that is logged in.
Download data for Product Catalog Export	Allows to download data exported from Product Catalog related data.
FSCM Load Interface Administration	Manages load interface file for import
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Guided Tasks Run Time	Manages of running guided tasks.
Guided Tasks View	Manages of viewing guided tasks progress and status.
Item Inquiry	Queries and views items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.
Landing Page	Allows access to key analytics and quick action links to pages.
Manage Item Compare	Allows users to access and compare item details.
Manage Item Redwood	Allows users to create and edit item details.
Manage Product Management History Configuration	View, create and manage audit configurations
Manage Product Management History Reports	View, create and manage audit reports
Manage Product Management Import Batches	Manages import Batches

Duty Role	Description
Manage Product Management Publication Batches	Manages product searches.
Manage Redwood Setting	Allows management of Product Management Settings.
Product Catalog Transaction Analysis	Analyzes Product Catalog transactional information
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Management Agent Application	Allows users to initiate and launch product management agent application.
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).
Product Management My Guided Task Access	Allows product management users to access their own guided tasks (product management assigned journeys).
Product Proposal Management	This duty allows for managing of a product proposal. A person with this duty can perform all activities on a product proposal.
Product Search	Manages product searches.
Read for Product Catalog schema	Allows to read Product Catalog schema.
Reassign items within Categories	Allows users to configure and run the Guided Tasks Reassign.
Redwood Item Catalogs	View, create and edit Redwood Catalogs.
Redwood Item Rule Set Analysis	Creates and manages item rule set analysis for Redwood.
Redwood Settings	Allows users to access the Redwood Settings.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.
Requirement Management	This duty allows for performing all actions on a Requirement.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.

Duty Role	Description
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
Transactional Analysis	This duty is used for various generic OTBI security and filtering purposes and is therefore required for all OTBI users.
Unassign Items from Categories	Allows users to configure and run the Guided Tasks Unassign.
Upload and Download data for Product Catalog images	Allows to upload and download Product Catalog images.
Upload data for Change Order Import	Allows to upload data file to import change order data
Upload data for Idea Import	Allows to upload data file to import idea related data.
Upload data for Product Catalog Import	Allows to upload data file to import Product Catalog related data.
Upload data for Product Concept Import	Allows to upload data file to import product concept related data.
Upload data for Product Proposal Import	Allows to upload data file to import product proposal related data.
Upload data for Requirement Import	Allows to upload data file to import requirement related data.
View Item Redwood	Allows users to view item details.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Product Manager job role.

Aggregate Privilege	Description
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.

Privileges

This table lists privileges granted to duties of the Product Manager job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Assign Items to Categories	Allows users to configure and run the Guided Tasks Assign.	Access Guided Tasks Assign Items to categories	Allows access to view Guided Tasks Assign Items to Category flow for which the user has at the minimum view privilege.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Get Item Rest	Allows query access to items through the REST API.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Import Item	Allows access to import items and related information.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Manage Item Batch	Allows management of item batches to import items and related data.
Assign Items to Organization Guided Task Flow	Create, and perform Assign Items to Organization guided task flow.	Manage Item Batch Rest	Allows full access to item batch through the REST API.
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Manage Product Component	Allows for managing of Components for create, update and delete within a Concept Product Structure and assigning requirements to components
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept	Review Product Concept	Allows for reviewing a Concept with all its details

Granted Role	Granted Role Description	Privilege	Privilege Description
	which is controlled by the Concept Management Duty		
Concept Development	A person with this duty can perform concept development related duties such as managing of components within the concept. This duty does not allow for creating or deleting of a concept which is controlled by the Concept Management Duty	Review Product Requirement	Allows viewing of a product Requirement with all its details
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Guided Tasks Run Time	Manages of running guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks View	Manages of viewing guided tasks progress and status.	View Guided Tasks	Allows view access to guided tasks.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using

Granted Role	Granted Role Description	Privilege	Privilege Description
			REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Configure Item Extended Attributes	Allows configuration of item extended attributes.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Item Structure	Allows access to create item structure action from regional task pane.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Trading Partner	Allows access to creation of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Delete Trading Partners	Allows access to deletion of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item	Allows access to browse items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Lifecycle Phase Change	Allows access to change lifecycle phase of items in the enterprise.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Organization Association	Allows access to manage item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Relationship	Allows access to manage item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Status Change	Allows access to change status of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Work List	Allows access to manage item work list entries.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Product Audit Trail Reports	Allows management of audit data for products.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Modify Trading Partners	Allows access to modify of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Summary	Allows access to items overview page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Work Area	Allows access to items and notifications page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Development Structures	Allows access to development structures.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item	Allows access to product dashboard.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item History	Allows viewing of audit data for an item.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Organization Association	Allows access to view item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Relationship	Allows access to view item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Trading Partner Item	Allows access to view trading partner items.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Clipboard	Allows you to access the clipboard across the product management work areas.

Granted Role	Granted Role Description	Privilege	Privilege Description
Landing Page	Allows access to key analytics and quick action links to pages.	Access HCM Common Components	Allows access to HCM common components.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Object Tag Set Repository	Allows access to view and manage the object tag set repository.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Object Tags Repository	Allows access to view and manage the object tag repository.
Landing Page	Allows access to key analytics and quick action links to pages.	Access Product Management Landing Page	Allows access to view the Product Management Landing page analytics and page navigation.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Data Visualization Configuration	Allows creation, modification and deletion of data visualization configurations either through UI pages or through REST service calls. For example, a data visualization could be configured to be displayed as a Bar chart.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Landing Page Layout	Allows access to create and configure KPIs and Visualizations for the Product Management landing page.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Product Management Scheduled Processes	Allows manage to scheduled processes.
Landing Page	Allows access to key analytics and quick action links to pages.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Landing Page	Allows access to key analytics and quick action links to pages.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Landing Page	Allows access to key analytics and quick action links to pages.	View Data Visualization Configuration	Allows viewing of data visualization configurations.
Landing Page	Allows access to key analytics and quick action links to pages.	View Scheduled Processes	Allows users to view scheduled processes.
Landing Page	Allows access to key analytics and quick action links to pages.	View Service Manager Dashboard	Allows viewing of the service manager dashboard. The

Granted Role	Granted Role Description	Privilege	Privilege Description
			dashboard contains analytical reports on service objects.
Landing Page	Allows access to key analytics and quick action links to pages.	View Service Representative Dashboard	Allows viewing of the service representative dashboard. The dashboard contains analytical reports on service objects.
Manage Item Compare	Allows users to access and compare item details.	View Item Compare	Allows access to view compare items in quick actions.
Manage Item Redwood	Allows users to create and edit item details.	Create Item Structure	Allows access to create item structure action from regional task pane.
Manage Item Redwood	Allows users to create and edit item details.	Enter Trading Community Organization Information	Allows the specification of organization information.
Manage Item Redwood	Allows users to create and edit item details.	Get New Item Request Rest	Allows query and return of the NIR setup details.
Manage Item Redwood	Allows users to create and edit item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Associations	Allow access to view the create and edit associations tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Attachments	Allow access to create and edit the attachment tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Item Categories	Allow access to create and edit the item changes tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Relationships	Allow access to create and edit the relationships tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Structures	Allow access to create and edit the item structures tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Status REST	Allows access to view and manage item statuses.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Association Rest	Allows Redwood custom actions create/update item to create and edit supplier associations for items.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Associations	Allows access to view and manage Redwood item supplier associations for which the user has at the minimum view privilege.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Translation	Allow access to manage translations for items in the translation editor.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Revision Rest	Allows access to view and manage item revisions.
Manage Item Redwood	Allows users to create and edit item details.	Remove Trading Community Organization	Allows the removal of organizations. If assigning, also assign the ability to view the trading community organization.
Manage Item Redwood	Allows users to create and edit item details.	Update Trading Community Organization	Allows the update of the organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Manage Item Redwood	Allows users to create and edit item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Manage Product Management History Configuration	View, create and manage audit configurations	GET Product Management Index REST	Allows access to view indexed attributes.
Manage Product Management History Configuration	View, create and manage audit configurations	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Product Management History Configuration	View, create and manage audit configurations	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework

Granted Role	Granted Role Description	Privilege	Privilege Description
			index metadata, using REST Service.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Product Management History Configuration	Allows access to manage the Redwood Product Management History Configuration page and Process Product Management History Data process.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Redwood Product Management Settings	Allows access to manage Product Management Settings.
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Redwood Setting Rest	Permits access to view and manage the Redwood Settings using REST services
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Redwood Settings REST	Permits access to Redwood Settings using REST services
Manage Product Management History Configuration	View, create and manage audit configurations	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Manage Product Management History Configuration	View, create and manage audit configurations	Rebuild Product Management Indexes	Allow access to ESS Job PMESIndexMaintenanceJob to maintain Product Management Indexes.
Manage Product Management History Configuration	View, create and manage audit configurations	View Product Management History Attributes	Allows access to view auditable attributes and their metadata.
Manage Product Management History Reports	View, create and manage audit reports	Access HCM Common Components	Allows access to HCM common components.
Manage Product Management History Reports	View, create and manage audit reports	GET Product Management Index REST	Allows access to view indexed attributes.
Manage Product Management History Reports	View, create and manage audit reports	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Product Management History Reports	View, create and manage audit reports	Manage Search View REST	Allows access to view and manage search views.
Manage Product Management History Reports	View, create and manage audit reports	Manage System Searches	Allows users to manage HCM system searches.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Product Management History Reports	View, create and manage audit reports	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Manage Product Management History Reports	View, create and manage audit reports	View Catalog Context History Report	Allows access to view Catalog Context History Report for which the user has at the minimum view privilege.
Manage Product Management History Reports	View, create and manage audit reports	View Catalog History Report	Allows access to view Catalog History for which the user has at the minimum view privilege.
Manage Product Management History Reports	View, create and manage audit reports	View History Reports	Allows access to view the history for Product Management objects.
Manage Product Management History Reports	View, create and manage audit reports	View Item Context History Report	Allows access to view the item history in the item detail page.
Manage Product Management History Reports	View, create and manage audit reports	View Item History Report	Allows access to view the item history in the History page.
Manage Product Management History Reports	View, create and manage audit reports	View Product Management History Reports	Allows access to view the Redwood Product Management History Reports page.
Manage Product Management History Reports	View, create and manage audit reports	View Trading Partner Item Context History Report	Allows access to view the trading partner item history in trading partner item pages.
Manage Product Management History Reports	View, create and manage audit reports	View Trading Partner Item History Report	Allows access to view the trading partner item history in History page.
Manage Product Management Import Batches	Manages import Batches	Edit Import Batch	Allows access to edit an item batch.
Manage Product Management Import Batches	Manages import Batches	Manage Import Batches	Allows access to Import Batches user interface.
Manage Product Management Publication Batches	Manages product searches.	Manage Publication Batches	Allows management of publication batches in the Publication Batch user interface.
Manage Redwood Setting	Allows management of Product Management Settings.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Redwood Setting	Allows management of Product Management Settings.	Manage Redwood Product Management Settings	Allows access to manage Product Management Settings.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Redwood Setting	Allows management of Product Management Settings.	Manage Redwood Settings REST	Permits access to Redwood Settings using REST services
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Analyze Change Order	Allows users to route the change order from draft to open status.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Change Order	Allows access to create change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Create Item Pack	Allows access to create pack action from regional task pane.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Generate Item Change Order Report	Allows access to generate item change order reports.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Get Item Index Available Attributes REST	Allows access to view available attributes for item.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Get Search View REST	Allows query of search views.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Import Item	Allows access to import items and related information.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Change Orders	Allows access to view and edit change orders. Does not include access to view and edit change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Manage Change Requests	Allows access to view and edit change requests.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Change Order	Allows access to manage item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Delete Group	Allows access to manage delete groups in order to purge items, product structures, packs, change orders, and new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Item Supplier Association	Allows access to manage item supplier site organizations and the association details.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage New Item Request	Allows access to manage new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Manage Redwood Import Map	All access to create and edit Redwood Import Maps.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Modify Change Status	Allows users to modify the status of a change order through routing.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Catalog Summary	Allows access to catalogs overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Change Order Summary	Allows access to change orders overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Dashboard	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Summary	Allows access to items overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor Item Work Area	Allows access to items and notifications page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Monitor New Item Request Summary	Allows access to new item requests overview page.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	Monitor Product Management Workflow Objects	Allows access to Product Management workflow objects.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Reschedule Item Change Order	Allows rescheduling of change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	Run Guided Tasks	Allows access to run guided task flows.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Order	Allows access to view change orders. Does not allow access to view change requests, problem reports, or corrective actions.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Change Request	Allows access to view change requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item	Allows access to product dashboard.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Item Change Order	Allows access to search and view item change orders.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs,	View Item Supplier Association	Allows access to view item supplier site organizations and the association details.

Granted Role	Granted Role Description	Privilege	Privilege Description
	associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.		
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View New Item Request	Allows access to search and view new item requests.
Product Common Management	Creates and manages items including item attributes, catalogs, item structures, packs, associations, relationships, and catalog assignments common to the Product Manager and Product Data Steward.	View Product Management Search	Allows access to view Product Management Search.
Product Management Agent Application	Allows users to initiate and launch product management agent application.	Access design to source agent application	Allows access to design to source agent application.
Product Management Agent Application	Allows users to initiate and launch product management agent application.	Access product readiness agent application	Allows access to product readiness agent application.
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).	View Global Journeys	Allows users to view global journeys. Viewing of personal journeys is not restricted by this privilege.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Item Structure Data Using a REST Service	Permits access to retrieve component data for item structures using REST services.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Item Where Used Data Using a REST Service	Permits access to retrieve where used data for items using REST services.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Manufacturer Search	Allows access to the Product Management Search page to search for manufacturers.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Product Management Change Search	Allows access to the product management search page to search for change order, change request, problem report, and corrective action workflows.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Relationships for Product Development Objects Using a REST Service	Permits access to retrieve relationship data for Product Development objects using REST services
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Structure Attributes for Indexing Using REST	Allows access to structure component and item attributes that are available for indexing, using a REST service.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Access Users	Allow access to view and select users from a lookup in Redwood.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Approve Item Change Order	Allows access to approve item change orders.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Approve New Item Request	Allows access to approve new item requests.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Create Manufacturer	Allows access to create manufacturers.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Create Product Idea	Allows for the creation of an Idea
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Create Trading Partner	Allows access to creation of trading partners.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Delete Trading Partners	Allows access to deletion of trading partners.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Generate Access Token	Allows the generation of access token for smart spreadsheets.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing organization or the development organization.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Product Manager	Ensures that a product gets created, tested, and shipped on schedule and meets specifications. A member of either the marketing	Get New Item Request Rest	Allows query and return of the NIR setup details.

Product Proposal Management	This duty allows for managing of a product proposal. A person with this duty can perform all activities on a product proposal.	Review Product Proposal	Allows for reviewing of a Product Proposal as part of the Portfolio
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Reassign items within Categories	Allows users to configure and run the Guided Tasks Reassign.	Access Guided Tasks Reassign Items within categories	Allows access to view Guided Tasks Reassign Items to Category flow for which the user has at the minimum view privilege.
Redwood Item Catalogs	View, create and edit Redwood Catalogs.	Access Redwood Catalogs	Allows access to view catalogs, categories and item assignments.
Redwood Item Catalogs	View, create and edit Redwood Catalogs.	Manage Redwood Catalogs	Allows access to view, create and manage catalogs, categories and item assignments.
Redwood Item Rule Set Analysis	Creates and manages item rule set analysis for Redwood.	Manage Item Rule Set Analysis REST	Allows access to view and manage item rule set analysis using a REST service.
Redwood Item Rule Set Analysis	Creates and manages item rule set analysis for Redwood.	Manage Rule Impact Analysis	Allows access to view and manage an item rule set analysis.
Redwood Item Rule Set Analysis	Creates and manages item rule set analysis for Redwood.	View Rule Impact Analysis	Allows access to view an item rule set analysis.
Redwood Settings	Allows users to access the Redwood Settings.	Get Redwood Setting Rest	Permits access query with the Redwood Settings using REST services
Redwood Settings	Allows users to access the Redwood Settings.	Manage Redwood Setting Rest	Permits access to view and manage the Redwood Settings using REST services
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	Manage Redwood Trading Partner Item Attachment	Allows access to view and edot Redwood trading partner item attachments for which the user has at the minimum view privilege.

Granted Role	Granted Role Description	Privilege	Privilege Description
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	Manage Redwood Trading Partner Item Item	Allows access to view and edit Redwood trading partner items for which the user has at the minimum view privilege.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	Manage Redwood Trading Partner Item Relationship	Allows access to view and edit Redwood trading partner item relationships for which the user has at the minimum view privilege.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	Manage Trading Partner Item Extensible Flexfields	Allows access to view and manage the Redwood Trading Partner Item extensible flexfields.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	View Product Management Trading Partner Item Search	Allows access to search Redwood trading partner items for which the user has at the minimum view privilege.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	View Redwood Trading Partner Item	Allows access to view Redwood trading partner items for which the user has at the minimum view privilege.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	View Redwood Trading Partner Item Attachment	Allows access to view Redwood trading partner item attachmentes for which the user has at the minimum view privilege.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	View Redwood Trading Partner Item Relationship	Allows access to view Redwood trading partner item relationships for which the user has at the minimum view privilege.
Redwood Trading Partner Item	Allows users to access the Redwood Trading Partner Items.	View Trading Partner Item Extensible Flexfields	Allows access to view the Redwood Trading Partner Item extensible flexfields.
Requirement Management	This duty allows for performing all actions on a Requirement.	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Requirement Management	This duty allows for performing all actions on a Requirement.	Create Product Requirement	Allows for the creation of a Requirement
Requirement Management	This duty allows for performing all actions on a Requirement.	Manage Product Requirement	Allows managing of Requirement and all its Requirement lines within a requirement structure including managing of dependencies

Granted Role	Granted Role Description	Privilege	Privilege Description
Requirement Management	This duty allows for performing all actions on a Requirement.	Review Product Requirement	Allows viewing of a product Requirement with all its details
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Default Expenditure Types by Web Service	Allow viewing Default Expenditure Types by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organization Parameters List of Values by Web Service	Allow viewing inventory organization parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	inventory organizations, plant parameters, carriers and units of measure list of values.		
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Schedules by Web Service	Allow viewing schedules by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Unassign Items from Categories	Allows users to configure and run the Guided Tasks Unassign.	Access Guided Tasks Unassign Items from categories	Allows access to view Guided Tasks Unassign Items to Category flow for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Product Manager job role.

Business Object	Policy Description	Policy Store Implementation
Application Objects	A Product Manager can manage application objects for all customer relationship management application objects	Role: Item Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Manager can manage application objects for the change orders they have access to	Role: Product Common Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Manager can manage application objects for the items they have access to in catalogs	Role: Product Manager Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Manager can manage application objects for the items they have access to in categories	Role: Product Manager Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Manager can manage application objects for the items they have access to in trading partner items	Role: Product Manager Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Product Manager can view application objects for the items they have access to in item and inventory organizations	Role: Product Manager Privilege: Manage Application Objects (Data) Resource: Application Objects

Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Access Users	Allow access to view and select users from a lookup in Redwood.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Cancel Quality Action	Allows users to cancel quality actions
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project	Cancel Quality Issue	Allows users to cancel quality issues

Granted Role	Granted Role Description	Privilege	Privilege Description
	lifecycle to ensure standard processes and procedures are being followed.		
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Create Quality Action	Allows users to create a quality action
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Create Quality Issue	Allows users to create a quality issue
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Get Report Definitions Using REST	Allows access to report definitions generated by Oracle Analytics Publisher using REST.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Manage Corrective Action	Allows users to manage a corrective action
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Manage Item Change Order	Allows access to manage item change orders.

Granted Role	Granted Role Description	Privilege	Privilege Description
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Manage Problem Report	Allows users to manage a problem report
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Manage Quality Action	Allows users to create and update a quality action.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Manage Quality Issue	Allows users to create and update a quality issue.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Modify Change Status	Allows users to modify the status of a change order through routing.
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	Monitor Product Management Workflow Objects	Allows access to Product Management workflow objects.

Granted Role	Granted Role Description	Privilege	Privilege Description
Quality Analyst	Individual responsible for ensuring the quality of products throughout a project. Supports the Process Manager in defining processes and procedures and is responsible for conducting process reviews and audits throughout the project lifecycle to ensure standard processes and procedures are being followed.	OBSOLETE: Approve Corrective Action	Allows users to approve a corrective action

View Quality Issue	Allows users to view quality issues.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Default Expenditure Types by Web Service	Allow viewing Default Expenditure Types by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organization Parameters List of Values by Web Service	Allow viewing inventory organization parameters list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Organizations List of Values by Web Service	Allow viewing plant organizations list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Plant Parameters List of Values by Web Service	Allow viewing plant parameters list of values by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Attribute Defaults by Web Service	Allow viewing Project Attribute Defaults by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Project Type Cost Exclusions by Web Service	Allow viewing Project Type Cost Exclusions by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Schedules by Web Service	Allow viewing schedules by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.

Quality Issue	A Quality Analyst can view quality issue for the quality issues they have access to	Role: Quality Analyst Privilege: View Quality Issue (Data) Resource: Quality Issue

Quality Engineer (Job Role)

Individual responsible for investigating and correcting product quality issues.

Role Hierarchy

The Quality Engineer job role directly and indirectly inherits these roles.

- Quality Engineer
  - Item Inquiry
    - Product Lifecycle Management Folder Access
    - Product Search
      - Supply Chain Common View Web Service
    - View Item Redwood
      - Product Lifecycle Management Folder Access
      - Supply Chain Common View Web Service
  - Production REST Services
  - Supply Chain Common Web Service
  - Supply Chain Management Folder Reporting
  - Use REST Service - Guided Journey Responses
  - Use REST Service - Guided Journeys Read Only

Duties

This table lists the duties assigned directly and indirectly to the Quality Engineer job role.

Duty Role	Description
Item Inquiry	Queries and views items in the enterprise.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Search	Manages product searches.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Common Web Service	Provides web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
View Item Redwood	Allows users to view item details.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Quality Engineer job role.

Aggregate Privilege	Description
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.

Privileges

This table lists privileges granted to duties of the Quality Engineer job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Get Electronic Signature Preferences by Service	Allows retrieval of the electronic signatures preferences for SCM transactions.

Granted Role	Granted Role Description	Privilege	Privilege Description
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Get Manufacturing Plant Set Up Data by Service	Allows retrieval of manufacturing setup information including work areas, work centers, resources, work definition names and work order statuses using a service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Get Production Exceptions by Service	Allows retrieval of the production exceptions, using a web service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Get Standard Operations by Service	Allows retrieval of standard operation information, using a web service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Get Work Definitions by Service	Allows retrieval of work definition information, using a web service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Get Work Orders by Service	Allows retrieval of work order information including work order header, operations, materials, resources, and serial numbers, as well as the start and stop information for work order operations, using a web service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Manage Inventory Reservation Web Service	Allows access to the reservations Web service to create, edit, and delete reservations.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Manage Manufacturing Plant Set Up Data by Service	Allows creation, update and delete of manufacturing setup information for work areas, work centers and resources using a service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Manage Quality Issue	Allows users to create and update a quality issue.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Manage Standard Operations by Service	Allows creation, update and delete of standard operations, using a web service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Manage Work Definitions by Service	Allows creation, update and delete of work definitions, related priorities, and versions, using a service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Manage Work Orders by Service	Allows creation of work orders and update of work order information including work order header,

Granted Role	Granted Role Description	Privilege	Privilege Description
			operations, materials, resources, and serial numbers, using a web service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Populate Manufacturing IoT Synchronization Errors by Service	Allows correction of work order to IoT production monitoring cloud synchronization errors, using a web service.
Production REST Services	Provides service access using REST Services to manufacturing work set up and work execution.	Report Work Order Transactions by Service	Allows reporting of a work order transaction, such as material transaction, resource transaction and operation transaction, as well as the start and stop information for work order operations, using a web service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Access Users	Allow access to view and select users from a lookup in Redwood.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Cancel Quality Issue	Allows users to cancel quality issues
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Create Change Order	Allows access to create change orders.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Create Quality Issue	Allows users to create a quality issue
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Edit Characteristics	Ability to create, update and delete inspection characteristics.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Edit Inspection Levels	Ability to create, update and delete inspection levels.

Granted Role	Granted Role Description	Privilege	Privilege Description
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Edit Inspection Plans	Ability to create, update and delete inspection plan related data.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Edit Inspection Results	Ability to create, update and delete inspection results.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Get Item Category Rest	Allows query access to item categories through the REST API.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Get Item Class Rest	Allows query access to item Classes through the REST API.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Get Item Rest	Allows query access to items through the REST API.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Get Maintenance Standard Operations by Service	Allows retrieval of Maintenance standard operation information, using a web service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Get Manufacturing Plant Set Up Data by Service	Allows retrieval of manufacturing setup information including work areas, work centers, resources, work definition names and work order statuses using a service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Get Standard Operations by Service	Allows retrieval of standard operation information, using a web service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Get Work Orders by Service	Allows retrieval of work order information including work order header, operations, materials, resources, and serial numbers, as well as the start and stop information for work order operations, using a web service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage All Application Profile Values	Allows management of all application profile option settings and values at various levels to control application behavior.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage Corrective Action	Allows users to manage a corrective action

Granted Role	Granted Role Description	Privilege	Privilege Description
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage Enterprise Assets by Service	Allows the management of enterprise assets using a service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage HCM Rules	Allows the user to manage HCM rules.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage Plant Parameters	Allows access to manage organization parameters for plant organizations.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage Problem Report	Allows users to manage a problem report
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage Quality Issue	Allows users to create and update a quality issue.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Manage Subinventory and Locator	Allows configuration of subinventories and locators to identify material storage locations for items within an inventory organization.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Monitor Product Management Workflow Objects	Allows access to Product Management workflow objects.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	OBSOLETE: Approve Corrective Action	Allows users to approve a corrective action
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	OBSOLETE: Approve Problem Report	Allows users to approve a problem report
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	OBSOLETE: Create Corrective Action	Allows users to create a corrective action
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	OBSOLETE: Create Problem Report	Allows users to create a problem report
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	OBSOLETE: Modify Corrective Action Status	Allows users to change the status of a corrective action

Granted Role	Granted Role Description	Privilege	Privilege Description
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	OBSOLETE: Modify Problem Report Status	Allows users to change status of a problem report
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Print Certification Documents	Ability to print certification documents as part of the shipping documents set.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Review Product Genealogy	Allows review of product genealogy data.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Run Process Item Characteristic Changes	Ability to run the process to react to item characteristic value changes.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	Use REST Service - Users and Roles Lists of Values	Allows the user to call the GET method associated with the Users and Roles lists of values REST Services.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Asset Groups	Allows query and view of asset group.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Audit History	Allows to view the audit history of all the business object attributes enabled for auditing.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Corrective Action	Allows access to view corrective actions.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Customer Assets	Allows query and view of customer assets, related configurations and structures.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Item	Allows access to product dashboard.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Item Lot and Item Serial List of Values by Web Service	Allows viewing lot and serial number list of values using web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Maintainable Assets	Allows query and view of maintainable asset details, including asset parts list.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Maintainable Assets by Service	Allows the retrieval of maintainable asset details using a service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Maintenance Work Orders by Service	Allows the retrieval of work orders using a service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Problem Report	Allows access to view problem reports.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Production Resources	Allows query and view of production resource details.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Quality Issue	Allows users to view quality issues.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Subinventory and Locator List of Values by Web Service	Allows viewing subinventory and locator list of values using web service.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Supplier	Allows access to the supplier profile.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Quality Engineer	Individual responsible for investigating and correcting product quality issues.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.

    - Trading Partner B2B Administrator

Duties

This table lists the duties assigned directly and indirectly to the Supply Chain Application Administrator job role.

Duty Role	Description
AI Agent Connector Management	Provides ability to administer connectors used in AI Agents.
Accounting Hub Administration	Configures the accounting hub for a source system.
Application Deployment Administration	Manages application instance configurations and enterprise applications.
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.

Duty Role	Description
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.
Attachments User	UCM application role for access to attachments using the integrated user interface or the standalone product.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.
Business Intelligence Consumer	A role required to allow reporting from Business Intelligence Applications, Business Intelligence Publisher, Real Time Decisions, Enterprise Performance Management and Business Intelligence Office. This role allow you to run reports from the web catalog but it will not allow a report to be authored from a subject area.
CRM Stage Write	Allows uploading CRM content to stage area on content server
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.
Channel Administration	Manages channel setup and administration tasks.
Channel Operations	Manages execution of scheduled processes.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.
Collaboration Messaging Read Only	Searches and views collaboration messaging setup and administration information.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.
Configure Index	Manage search index configurations.
Configure Inventory Barcode Formats Using Responsive Inventory	Configures inventory barcode formats using the responsive inventory management application.
Configure Item Shortage Parameters Using Responsive Inventory	Configures item shortage parameters using the responsive inventory management application.

Duty Role	Description
Configure Item Transaction Defaults Using Responsive Inventory	Configures item transaction defaults using the responsive inventory management application.
Configure RFID Integrations and Devices Using Responsive Inventory	Configures RFID integrations and devices using the responsive inventory management application.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.
Configure Views	Manage view configurations.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.
Cost Management Administration	Performs cost management application setups and administration.
Customer Account Inquiry	View customer account details.
Download data for Brazil SEFAZ Partner Messages Export	Allows to download data exported from brazil SEFAZ partner messages related data.
Download data for CMK Outbound Message Export	Allows to download data exported from CMK Outbound Message related data.
Download data for OAGIS10 Partner Messages Export	Allows to download data exported from OAGIS10 partner messages related data.
Download data for OAGIS7 Partner Messages Export	Allows to download data exported from OAGIS7 partner messages related data.
Download data for Product Catalog Export	Allows to download data exported from Product Catalog related data.
Download data for Vendor-Managed Inventory Relationships Export	Allows to download data exported from Vendor-Managed Inventory Relationships.
Download data from Order Orchestration and Planning Data Collection Export	Allows to download file exported from order orchestration and planning.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.
FSCM Load Interface Administration	Manages load interface file for import
Facility Schedule Management	Duty role for managing facility schedules.

Duty Role	Description
Financials Intelligent Agent Runtime	Allows end users to access intelligent agents within the Financials product family.
Fiscal Document Data Entry	Capturing the Fiscal Documents into the System
Fixed Asset Inquiry	Views asset information, transaction details, and accounting entries.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Generate Estimate Email Workflow	Allows invoking of the generate estimate email workflow.
Geography Administration	Grants privileges to set up geographies
Global Access for Secured Accounting KFF Segment Values	Placeholder role to provide elevated access to values sets that are secured by customers in Accounting KFF segments.
Guided Tasks	Manages guided tasks.
Guided Tasks Builder	Manages configuration of guided tasks.
Guided Tasks Run Time	Manages of running guided tasks.
Guided Tasks View	Manages of viewing guided tasks progress and status.
Installed Base Web Service	Provide service access to installed base by using the REST services.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.
Inventory Administration	Configures all setup-related activities for inventory management.
Item Inquiry	Queries and views items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.

Duty Role	Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.
Manage Item Redwood	Allows users to create and edit item details.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.
Manage Serial Destination for Pedigree and Serialization	Duty role to manage Serial Destination.
Marketing Campaign Management	Manages secured marketing campaigns from planning to design and execution. Defines and maintains secured marketing treatments, lists, segments, and content.
Marketing Execution Management	Manages the execution of secured marketing campaigns. Manages secured marketing responses including response import and converting responses to sales leads and opportunities. Schedules and monitors processes to record response interactions and create trading community members from suspects.Manages the execution of secured marketing campaigns. Manages secured marketing responses including response import and converting responses to sales leads and opportunities. Schedules and monitors processes to record response interactions and create trading community members from suspects.
Negotiation Viewing	View the negotiation summary and details pages.
Nudge Configuration	Allows the user to configure nudges.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.
Order Orchestration Administration	Allows access to order orchestration or order promising setup tasks.
Order Promising Management	Manages order promising activities, including the scheduling and rescheduling of order fulfillment lines, and reviews data related to promising fulfillment lines.
Payables Invoice Inquiry	Views Oracle Fusion Payables invoices.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.
Planning Collected Data Management	Manages data collection processes and verifies collected data.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.

Duty Role	Description
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Management Guided Task Builder	Allows management of product management guided tasks and task categories (product management journeys and journey categories).
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).
Product Management My Guided Task Access	Allows product management users to access their own guided tasks (product management assigned journeys).
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.
Product Search	Manages product searches.
Project Based Configuration for Supply Chain Management	Duty role for planning, coordinating, and supervising all activities related to Project Based Configuration for Supply Chain management.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.
Read for Product Catalog schema	Allows to read Product Catalog schema.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.
SOA Infra Designer	This role grants view/edit dictionary privileges for a user in SOA Rules Composer. This is a business administrator type role. Any team using the Rules Composer would need to grant this role to their admin enterprise role. This role is granted to SOAAdmin and BPMWorkflowAdmin. By default this application role is granted to "Administrators" enterprise role.
Sales Item Inquiry	Allows Sales users to access items and catalogs.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.

Duty Role	Description
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.
Supplier Profile Inquiry	View supplier profile information.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.
Supply Chain Common View Web Service	Provides view only web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Common Web Service	Provides web service access to supply chain common to perform activities such as viewing inventory organizations, plant parameters, carriers and units of measure list of values.
Supply Chain Management Folder Reporting	Grants access to the Supply Chain Management web catalog folder.
Supply Chain Management Transaction Approval Reviewing	Allows the status of supply chain management transactions going through the approval process to be viewed and take the appropriate action to expedite the approval process.
Synchronize Product Lot for Pedigree and Serialization	Duty role to synchronize lot from the transactional system.
Synchronize Product for Pedigree and Serialization	Duty role to synchronize product from the transactional system.
Trading Community Import Batch Management	Manages trading community data import batches.
Trading Community Import Process Management	Manages trading community data import batch processes.
Trading Partner B2B Administrator	Allows trading partners (suppliers or customers) to access self-service messages.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.
Upload and Download data for Product Catalog images	Allows to upload and download Product Catalog images.

Duty Role	Description
Upload data for B2B Account Numbers Import	Allows to upload data file to import B2B account numbers related data.
Upload data for B2B Configuration Import	Allows to upload data file to import B2B Configuration related data.
Upload data for Brazil SEFAZ Partner Messages Import	Allows to upload data file to import brazil SEFAZ partner messages related data.
Upload data for Brazil SEFAZ Supplier Messages Import	Allows to upload data file to import brazil SEFAZ supplier messages related data.
Upload data for Common Import	Allows to upload data file to import common data.
Upload data for Configurator Rule Import	Allows to upload data file to import configurator rule data.
Upload data for Data Loader Import	Allows to upload data file to import Data Loader related data.
Upload data for Item Import	Allows access to import items and related information.
Upload data for Maintenance Asset Import	Allows to upload data file to import maintenance asset related data.
Upload data for OAGIS10 Partner Messages Import	Allows to upload data file to import OAGIS10 partner messages related data.
Upload data for OAGIS7 Partner Messages Import	Allows to upload data file to import OAGIS7 partner messages related data.
Upload data for Order Orchestration and Planning Data Collection Import	Allows to upload data file to import collected data for order orchestration and planning.
Upload data for Product Catalog Import	Allows to upload data file to import Product Catalog related data.
Upload data for Vendor-Managed Inventory Relationships Import	Allows to upload data file to import Vendor-Managed Inventory Relationships.
View Item Redwood	Allows users to view item details.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Supply Chain Application Administrator job role.

Aggregate Privilege	Description
Compliance Checklist Management Using REST Service	Allows users to call all methods except administrative methods with the Compliance Checklist REST service for all rows.
Compliance Checklist Response Management Using REST Service	Allows users to call all methods except administrative methods with the Questionnaire Responses REST service for all rows.
Compliance Checklist Response Viewing Using REST Service	Allows users to call the get method with the Questionnaire Responses REST service for all rows.
Compliance Checklist Viewing Using REST Service	Allows users to call the get method with the Compliance Checklist REST service for all rows.
Manage Guided Journeys	Allows management of guided journeys.
Manage HCM Nonperson Note	Views and manages HCM notes that are not person notes
Processing Requisitions Using REST Service	Allows users to call all methods to process requisitions into purchase orders.
Procurement Catalog Content Management Using REST Service	Allows management of public shopping list using REST service.
Purchase Agreement Administration Using REST Service	Allows users to call the administrative methods with the Purchase Agreement REST service for all rows.
Purchase Agreement Import Management Using REST Service	Allows user to call all methods with the Purchase Agreement Import Requests REST service for all rows.
Purchase Agreement Management Using REST Service	Do not use: Allows users to call all methods except administrative methods with the Purchase Agreement REST service for all rows.
Purchase Agreement Viewing Using REST Service	Do not use: Allows users to call the GET method with the Purchase Agreement REST service for all rows.
Purchase Order Administration Using REST Service	Allows users to call the administrative methods with the Purchase Order REST service for all rows.
Purchase Order Management Using REST Service	Allows users to call all methods except administrative methods with the Purchase Order REST service for all rows.
Purchase Order Viewing Using REST Service	Allows users to call the get method with the Purchase Order REST service for all rows.
Purchasing Document Import Errors Viewing Using REST Service	Allows user to call GET method with the Purchasing Document Import Errors REST service for all rows.

Aggregate Privilege	Description
Requisition Management Using REST Service	Allows users to call all methods except administrative methods with the Purchase Requisition REST service for all rows.
Requisition Viewing Using REST Service	Allows users to call the get method with the Purchase Requisition REST service for all rows.
SCM Intelligent Agent Management Duty	Allows management and testing of SCM intelligent agents, tools and documents.
Supplier Negotiation Award Using REST Service	Allows user to call all methods with the Supplier Negotiation Award REST service for all rows.
Supplier Negotiation Management Using REST Service	Allows users to call all methods with the Supplier Negotiation REST service for all rows.
Supplier Negotiation Response Management Using REST Service	Allows users to call all methods with the Supplier Negotiation Response REST service for all rows.
Supplier Negotiation Response Viewing Using REST Service	Allows users to call the get method with the Supplier Negotiation Response REST service for all rows.
Supplier Negotiation Viewing Using REST Service	Allows users to call the get method with the Supplier Negotiation REST service for all rows.
Supplier Profile Management Using REST Service	Allows users to call all methods with the Supplier REST service for all rows.
Supplier Profile Viewing Using REST Service	Allows users to call the get method with the Supplier REST service for all rows.
Supplier Qualification Area Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Area REST service for all rows.
Supplier Qualification Initiative Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Initiative REST service for all rows.
Supplier Qualification Initiative Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Initiative REST service for all rows.
Supplier Qualification Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification REST service for all rows.
Supplier Qualification Question Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Question REST service for all rows.
Supplier Qualification Question Response Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Question Response REST service for all rows.

Aggregate Privilege	Description
Supplier Qualification Question Response Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Question Response REST service for all rows.
Supplier Qualification Question Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Question REST service for all rows.
Supplier Qualification Supplier Eligibility Management Using REST Service	Allows users to call all methods except administrative methods with the Supplier Qualification Supplier Eligibility REST service for all rows.
Supplier Qualification Supplier Eligibility Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification Supplier Eligibility REST service for all rows.
Supplier Qualification Viewing Using REST Service	Allows users to call the get method with the Supplier Qualification REST service for all rows.
Use REST Service - Assigned Journeys	Allows the user to call all methods associated with the Assigned Journeys REST Service.
Use REST Service - Departments List of Values	Allows the user to call the GET method associated with the Departments LOV REST Service.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - Jobs List of Values	Allows the user to call the GET method associated with the Jobs list of values REST Service.
Use REST Service - Journey Categories	Allows the user to call all methods associated with the Journey Categories REST Service.
Use REST Service - Journey Categories List of Values	Allows the user to call the GET method associated with the Journey Categories List of Values REST Service.
Use REST Service - Journey Templates	Allows the user to call all methods associated with the Journey Templates REST Service.
Use REST Service - Journeys	Allows the user to call all methods associated with the Journeys REST Service.
Use REST Service - Journeys List of Values	Allows the user to call the GET method associated with the Journeys List of Values REST Service.
Use REST Service - Locations List of Values	Allows the user to call the GET method associated with the Locations LOV REST Service.
Use REST Service - Locations Read Only	Allows the user to call the GET method associated with the Locations REST Service.

Aggregate Privilege	Description
Use REST Service - Public Workers Read Only	Allows the user to call the GET method associated with the Public Workers REST Service.

Privileges

This table lists privileges granted to duties of the Supply Chain Application Administrator job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
AI Agent Connector Management	Provides ability to administer connectors used in AI Agents.	Use AI Agent Connectors	Access and work with connectors in agent studio
Accounting Hub Administration	Configures the accounting hub for a source system.	Activate Subledger Journal Entry Rule Set Assignments	Allows submission of the program to activate subledger journal entry rule set assignments to accounting method.
Accounting Hub Administration	Configures the accounting hub for a source system.	Create Journal Entries for New Reporting Currency or Secondary Ledger	Create Journal Entries for New Reporting Currency or Secondary Ledger
Accounting Hub Administration	Configures the accounting hub for a source system.	Create and Assign Subledger Standard Source	Allows submission of the process to generate sources and source assignments based on the object definitions.
Accounting Hub Administration	Configures the accounting hub for a source system.	Define Subledger Application	Allows creation or update of the subledger application.
Accounting Hub Administration	Configures the accounting hub for a source system.	Define Subledger Transaction Account Type	Allows the creation or update of the subledger transaction account type.
Accounting Hub Administration	Configures the accounting hub for a source system.	Generate Objects for Subledger Transaction Account Type	Generate Objects for Subledger Transaction Account Type.
Accounting Hub Administration	Configures the accounting hub for a source system.	Import Subledger Balance for Supporting Reference	Allows submission of the program to upload initial subledger balance for supporting reference.
Accounting Hub Administration	Configures the accounting hub for a source system.	Import Subledger Control Balance	Run program to upload third party initial balances
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage All Application Profile Values	Allows management of all application profile option settings

Granted Role	Granted Role Description	Privilege	Privilege Description
			and values at various levels to control application behavior.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Application Common Lookup	Not Available
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Application Set-Enabled Lookup	Manage sub-type entities stored in the Application Set-Enabled Lookup entity. Lookup Types are lists of values such as Days of the Week or Yes/No which can be used to validate column values.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Application Standard Lookup	Manage sub-type entities stored in the Application Standard Lookup Values entity. Lookup Types are lists of values such as "Days of the Week" or "Yes/No" which can be used to validate columns values.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Account Rule	Allows creation or update of the subledger account rule.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Attribute	Allows update of the assignment of sources to accounting attributes.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Class Usage	Allows creation or update of the accounting class assignments.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Existing Scope	Allows creation or selection of subledger application context for setup scope.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Method	Allows creation or update of the subledger accounting method.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Accounting Option	Allows update of the subledger accounting options for a ledger.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Application Transaction Object	Allows creation or update of the subledger application transaction object.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Custom Source	Define custom sources to be used in subledger journal entry rule sets
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Description Rule	Allows creation or update of the subledger description rule.

Granted Role	Granted Role Description	Privilege	Privilege Description
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Formula	Allows creation or update of the subledger formula.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Journal Entry Rule Set	Allows creation or update of the subledger journal entry rule set.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Journal Line Rule	Allows creation or update of the subledger journal line rule.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Mapping Set	Allows creation or update of mapping set.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Mapping Set Value	Allows creation or update of mapping set value.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Standard Source	Allows creation or update of subledger sources.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Supporting Reference	Allows creation or update of the subledger supporting reference.
Accounting Hub Administration	Configures the accounting hub for a source system.	Manage Subledger Transaction Account Definition	Allows register and maintain of the subledger application and its corresponding event model such as event classes and event types.
Accounting Hub Administration	Configures the accounting hub for a source system.	Purge Accounting Event Diagnostic Data	Allows submission of programs to generate and purge transaction objects diagnostics data.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Account Rule	Allows review of the subledger account rule.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Accounting Attribute	Allows review of the assignment of sources to accounting attributes.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Accounting Method	Allows review of the subledger accounting method.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Accounting Option	Allows review of the subledger accounting options for a ledger.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Application	Allows review of the subledger application.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Custom Source	Define custom sources to be used in subledger journal entry rule sets

Granted Role	Granted Role Description	Privilege	Privilege Description
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Description Rule	Allows review of the subledger description rule.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Formula	Allows review of the subledger formula.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Journal Entry Rule Set	Allows review of the subledger journal entry rule set.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Journal Line Rule	Allows review of the subledger journal line rule.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Mapping Set	Allows review of mapping set.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Standard Source	Allows review of subledger sources.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Supporting Reference	Allows review of the subledger supporting reference.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Transaction Account Definition	Allows review of the subledger application and its corresponding event model such as event classes and event types.
Accounting Hub Administration	Configures the accounting hub for a source system.	Review Subledger Transaction Account Type	Allows review of the subledger transaction account type.
Accounting Hub Administration	Configures the accounting hub for a source system.	Submit Accounting Event Diagnostic Report	Allows submission of programs to generate and purge transaction objects diagnostics data.
Accounting Hub Administration	Configures the accounting hub for a source system.	Update Subledger Accounting Balance	Allows submission of the program to update subledger third party account and supporting reference balances.
Accounting Hub Administration	Configures the accounting hub for a source system.	Update Subledger Application	Allow submission of the program to update subledger application options when there is a new subledger application registered or updates are made to event model, event class, or event type - after ledgers are defined.
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Activate Optional Enterprise Application	Allows activating optional enterprise applications.

Granted Role	Granted Role Description	Privilege	Privilege Description
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Instance	Allows management of application instances.
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Application Portlet Registration	Allows management of application portlet registration.
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Database	Allows management of databases.
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Deployed Domain	Allows management of deployed domains.
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Manage Enterprise Environment	Allows management of enterprise environments.
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Review Topology Hierarchy	Allows review of topology hierarchies for enterprise applications.
Application Deployment Administration	Manages application instance configurations and enterprise applications.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Administer Sandbox	Allows administration of all sandboxes.
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Configure Setup UI	Allows configuration of setup UI
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Comparison Processes	Allows management of comparison processes
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Configuration Packages	Allows management of configuration packages.
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Manage Setup Data Export and Import Processes	Allows management of the setup data export and import processes.
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Perform Quick Setup	Allows performing quick setup to speed up application implementation
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.

Granted Role	Granted Role Description	Privilege	Privilege Description
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Submit Export Setup Data Process	Secures the setup data export process.
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	Submit Import Setup Data Process	Secures the setup data import process.
Application Implementation Administrator	Performs all Oracle Fusion Functional Setup Manager duties.	View Administration Link	Privilege to view administration link in UI shell
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Configure Oracle Fusion Applications Offering	Allows configuration of offerings and functional areas that will be implemented in the current environment.
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Gather Implementation Requirements	Allows management of the Gather Implementation Requirements page.
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Manage Implementation Project	Allows management of the implementation project, selection of offerings and features, assignment of task owners.
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Review Applications Offering	Provides access to the Getting Started page.
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Review Implementation Project Overview	Allows access to the Overview page for implementation projects.
Application Implementation Management	Manages implementation projects. Also responsible for assigning task owners, but does not perform setup tasks.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Cluster	Allows management of clusters.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise	Manage Composites	Allows management of composites.

Granted Role	Granted Role Description	Privilege	Privilege Description
	applications, domains, and application components such as pillars, environment types, module types, and middleware components.		
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Data Source	Allows management of data sources.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Domain	Allows management of domains.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Enterprise Application	Allows management of enterprise applications.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Environment Type	Allows management of environment types.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Logical Module	Allows management of program logical modules for an enterprise application
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types,	Manage Managed Server	Allows management of managed servers.

Granted Role	Granted Role Description	Privilege	Privilege Description
	module types, and middleware components.		
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Middleware Component	Allows management of middleware components.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Module Type	Allows management of module types.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Pillar	Allows management of pillars.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Provision Configuration	Allows management of provision configurations.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Manage Third Party Applications	Allows management of third party applications.
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.

Granted Role	Granted Role Description	Privilege	Privilege Description
Application Registration	Maintains application metadata such as provisioning configurations, enterprise applications, domains, and application components such as pillars, environment types, module types, and middleware components.	View Topology Objects Overview	Provides overall state of application topology.
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Currency	Manage currencies used by applications.
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference ISO Language	Manage ISO Languages used by applications.
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Industry	Manage Industries used by applications
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Language	Manage Languages used by applications
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Natural Language	Manage Natural Languages used by applications
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Territory	Manage Territories used by applications
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Timezone	Manage Timezones used by applications
B2B Administrator	This user is a member of an organization who has delegated administration responsibilities in addition to the typical B2B user.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Cancel Collaboration Message	Allow access to manage cancel collaboration message

Granted Role	Granted Role Description	Privilege	Privilege Description
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Create Collaboration Messaging Setup Data File	Allow Access to Create Collaboration Messaging Setup Data File
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Create External Partner	Allow access to create external partner.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Get Message Processing Configuration	Allow access to get message processing configuration.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Get Message Transformation Configuration	Allow access to get message transformation configuration.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Application Partner	Allow access to manage Application partner UI.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Application Partners by Web Service	Allow access to manage trading partners by web service
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Associated External Partner	Allow access to manage associated external partner.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage B2B Certificates	Allow access to manage B2B certificates
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage B2B Customer Trading Partners	Allow access to manage B2B Customer Trading Partners
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage B2B Locations by Web Service	Allow access to manage B2B locations by web service
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage B2B Message Transactions using a REST Service	Allow access to manage B2B Message Transactions
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage B2B Supplier Trading Partners	Allow access to manage B2B Supplier Trading Partners
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage B2B Trading Partners	Allow access to manage B2B Trading Partners
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Collaboration Document Data Access for Users	Allow access to manage collaboration document data access for users UI.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Collaboration Message Definitions by Web Service	Allow access to manage collaboration message definitions by web service

Granted Role	Granted Role Description	Privilege	Privilege Description
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Collaboration Message Logging	Allow access to manage collaboration message logging.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Collaboration Messages	Allow access to Manage Collaboration Messages
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Collaboration Messaging Configuration	Allow access to manage collaboration messaging configuration.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Collaboration Messaging Domain Value Map	Allow access to manage collaboration messaging DVM.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Collaboration Messaging History	Allow access to manage collaboration messaging history.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Customer Account Collaboration Configuration	Allow Access to Manage Customer Account Collaboration Configuration
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage External Partner	Allow access to manage external partner
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage External Partner Message	Allow access to manage external partner message.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Failed Collaboration Messages	Allow access to manage failed collaboration messages
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Message Delivery Endpoint	Allow access to manage message delivery endpoint.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Service Provider	Allow access to manage collaboration messaging service provider.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Service Providers by Web Service	Allow access to manage collaboration messaging service provider by web service
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Supplier by Web Service	Allows users to manage suppliers using a web service.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Trading Partners by Web Service	Allow access to manage trading partners by web service

Granted Role	Granted Role Description	Privilege	Privilege Description
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Manage Undelivered Collaboration Messages	Allow access to manage undelivered collaboration messages.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Monitor Collaboration Messaging	Allow access to monitor collaboration messaging work area.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Process Brazil Electronic invoices	Allow access to process Brazil electronic invoices
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Process Collaboration Message	Allow access to process collaboration message.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Process Inbound Collaboration Document	Allow access to process inbound collaboration document.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Reprocess Collaboration Message	Allow access to reprocess collaboration message.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Resolve Purchasing Document Actions by REST Service	Allows an administrator using REST to perform actions such as renumber, resubmit, and communicate again.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Retransmit Purchase Orders from Collaboration Messaging	Allows access to retransmit orders from Collaboration Messaging for which B2B transmission was not initiated or orders with the B2B messaging status of Aborted
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Review Collaboration Messaging Setup Data Import	Allow Access to Review Collaboration Messaging Setup Data Import
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Validate Inbound Collaboration Messaging Setup	Allow access to validate inbound collaboration messaging setup.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	Validate Outbound Collaboration Messaging Setup	Allow access to validate outbound collaboration messaging setup.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Collaboration Message Output Document	Allow access to view output document.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Collaboration Message Source Document	Allow access to view source document.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View B2B Locations by Web Service	Allow access to view B2B locations by web service

Granted Role	Granted Role Description	Privilege	Privilege Description
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Collaboration Message	Allow access to view collaboration message.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Collaboration Message Definitions by Web Service	Allow access to view collaboration message definitions by web service
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Collaboration Message Payload	Allow access to view collaboration messaging XML
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Collaboration Message Setup Details	Allow access to view setup details.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Output Document	Allow access to view output document.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Service Providers by Web Service	Allow access to view collaboration messaging service provider by web service
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Supply Chain Collaboration B2B Infolets	Allows visibility into B2B undelivered and failed messages in the Supply Chain Collaboration landing page.
B2B Messaging Administration	Manages collaboration messaging setup and administration tasks.	View Undelivered Collaboration Messages	Allow access to manage undelivered collaboration messages.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Create Carrier	Not Available
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Carrier Contacts	Allows creation and update of carrier contact information including contact name, phone, and E-mail.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Carrier Inbound Tracking	Allows configuration of carrier tracking set up information.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Carrier Ship Methods	Allows creation and update of shipping methods when creating a carrier.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Carriers Descriptive Flexfields	Allow access to define carrier descriptive flexfields.

Granted Role	Granted Role Description	Privilege	Privilege Description
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Carriers Value Sets	Allow access to define carrier value sets.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Carriers by Web Service	Allow managing Carriers by web service.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Trading Community Zones	Allows managing of geographical boundaries for a specific zone use such as Tax or Shipping based on master reference geography hierarchy data.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Transit Time	Allows configuration of transit times to estimate the time required to ship between an origin and destination.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Transit Times Descriptive Flexfields	Allow access to define transit times descriptive flexfields.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Transit Times Value Sets	Allow access to define transit times descriptive flexfields.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Manage Transit Times by Web Service	Allow managing Transit Times by web service.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Search Carrier	Allows searching for a carrier.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	Update Carrier	Allows update of a carrier.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	View Trading Community Common Setup	Allows viewing of common setup data through web services.
Carrier Management	Manages setup of carriers including defining carriers, carrier contacts, and shipping methods.	View Transit Times by Web Service	Allow viewing Transit Times by web service.
Channel Administration	Manages channel setup and administration tasks.	Maintain Collections Aging Buckets	Allows a user to maintain aging buckets.

Granted Role	Granted Role Description	Privilege	Privilege Description
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Adjustment Types	Enables creation, update, and viewing of channel adjustment types and adjustment reasons.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Administration Using REST Service	Enables creation and update of channel claim sources, channel claim types, channel claim reasons, channel adjustment types, and channel user statuses using REST services.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Claim Reasons	Enables creation, update, and viewing of channel claim reasons.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Claim Sources	Enables creation, update, and viewing of channel claim sources.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Claim Types	Enables creation, update, and viewing of channel claim types.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Program Types	Enables creation, update, deletion, and viewing of channel program types and child entities.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Program Types using REST Service	Enables creation, update, deletion, and viewing of channel program types and child entities.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Settings	Enables creation, update, and viewing of channel settings.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel Settings using REST Service	Enables creation, update, and viewing of channel settings using REST service.
Channel Administration	Manages channel setup and administration tasks.	Manage Channel User Statuses	Enables creation, update, and viewing of channel user statuses.
Channel Administration	Manages channel setup and administration tasks.	Migrate Pending Approvals to BPM Workflow	Allows the submission of the process that migrates the pending approvals to BPM workflow.
Channel Administration	Manages channel setup and administration tasks.	Review Collections Aging Buckets	Allows a user to see the aged transactions for a customer.
Channel Operations	Manages execution of scheduled processes.	Close Settled Claims	Allows submission of the process that closes settled claims.

Granted Role	Granted Role Description	Privilege	Privilege Description
Channel Operations	Manages execution of scheduled processes.	Create Accruals	Allows submission of the process that creates accruals.
Channel Operations	Manages execution of scheduled processes.	Create Accruals for Channel Batch	Allows submission of the process that checks eligibility for channel document transactions and creates channel program accrual entries for the eligible transactions.
Channel Operations	Manages execution of scheduled processes.	Create Accruals for Co-op Programs	Allows submission of the process that checks eligibility for channel document transactions based on product rules and creates aggregated channel program accrual entries for eligible transactions.
Channel Operations	Manages execution of scheduled processes.	Create Accruals for Program Adjustments	Allows submission of the process to evaluate transactions and create accruals based on revised program rules in active channel programs.
Channel Operations	Manages execution of scheduled processes.	Create Accruals for Volume Programs	Allows submission of the process that checks eligibility for channel document transactions based on tiered attainments and creates channel program accrual entries for the eligible transactions.
Channel Operations	Manages execution of scheduled processes.	Generate Supplier Claims	Allows submission of the process that generates supplier claims.
Channel Operations	Manages execution of scheduled processes.	Load Transactions	Allows loading of transactions from external sources into Channel Revenue Management.
Channel Operations	Manages execution of scheduled processes.	Process Indirect Sales Data	Allows submission of the process that creates accruals and processes claims for eligible indirect sales transactions.
Channel Operations	Manages execution of scheduled processes.	Reprocess Stalled Claims	Allows submission of the process that reprocesses claims stuck in update in progress status.
Channel Operations	Manages execution of scheduled processes.	Settle Customer Claims	Allows submission of the process that closes settled customer claims.
Channel Operations	Manages execution of scheduled processes.	Sweep Channel Transaction Accounting Events	Allows submission of the process that sweeps channel transaction accounting events.

Granted Role	Granted Role Description	Privilege	Privilege Description
Channel Operations	Manages execution of scheduled processes.	Update Customer Accruals Summary	Allows the submission of the process that summarizes the customer accruals.
Channel Operations	Manages execution of scheduled processes.	Validate Channel Owner Data	Allows submission of the process that validates whether channel owners are users with an associated HCM person.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Cancel Collaboration Message	Allow access to manage cancel collaboration message
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Get Message Processing Configuration	Allow access to get message processing configuration.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Get Message Transformation Configuration	Allow access to get message transformation configuration.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Invoke Collaboration Message Inbound Service	Allow access to invoke inbound service.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Manage Account Numbers by web service	Allow access to manage b2b account number by web service
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Manage B2B Message Transactions using a REST Service	Allow access to manage B2B Message Transactions
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Manage Collaboration Message Logging	Allow access to manage collaboration message logging.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Manage Collaboration Messaging History	Allow access to manage collaboration messaging history.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Manage Failed Collaboration Messages	Allow access to manage failed collaboration messages
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Manage Message Delivery Endpoint	Allow access to manage message delivery endpoint.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Manage Undelivered Collaboration Messages	Allow access to manage undelivered collaboration messages.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Monitor Collaboration Messaging	Allow access to monitor collaboration messaging work area.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Process Brazil Electronic invoices	Allow access to process Brazil electronic invoices

Granted Role	Granted Role Description	Privilege	Privilege Description
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Process Collaboration Message	Allow access to process collaboration message.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Process Inbound Collaboration Document	Allow access to process inbound collaboration document.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Reprocess Collaboration Message	Allow access to reprocess collaboration message.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Resolve Purchasing Document Actions by REST Service	Allows an administrator using REST to perform actions such as renumber, resubmit, and communicate again.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Retransmit Purchase Orders from Collaboration Messaging	Allows access to retransmit orders from Collaboration Messaging for which B2B transmission was not initiated or orders with the B2B messaging status of Aborted
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	Validate Outbound Collaboration Messaging Setup	Allow access to validate outbound collaboration messaging setup.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	View Collaboration Message	Allow access to view collaboration message.
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	View Collaboration Message Payload	Allow access to view collaboration messaging XML
Collaboration Messaging Manager	Manages collaboration messaging administration tasks.	View Supply Chain Collaboration B2B Infolets	Allows visibility into B2B undelivered and failed messages in the Supply Chain Collaboration landing page.
Collaboration Messaging Read Only	Searches and views collaboration messaging setup and administration information.	View Account Numbers by web service	Allow access to manage b2b account number by web service
Collaboration Messaging Read Only	Searches and views collaboration messaging setup and administration information.	View Application Partners by Web Service	Allow access to manage trading partners by web service
Collaboration Messaging Read Only	Searches and views collaboration messaging setup and administration information.	View B2B Locations by Web Service	Allow access to view B2B locations by web service
Collaboration Messaging Read Only	Searches and views collaboration messaging setup and administration information.	View Collaboration Message Definitions by Web Service	Allow access to view collaboration message definitions by web service

Granted Role	Granted Role Description	Privilege	Privilege Description
Collaboration Messaging Read Only	Searches and views collaboration messaging setup and administration information.	View Service Providers by Web Service	Allow access to view collaboration messaging service provider by web service
Collaboration Messaging Read Only	Searches and views collaboration messaging setup and administration information.	View Trading Partners by Web Service	Allow access to view trading partners by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Create Collaboration Messaging Setup Data File	Allow Access to Create Collaboration Messaging Setup Data File
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Create External Partner	Allow access to create external partner.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Account Numbers by web service	Allow access to manage b2b account number by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Application Partner	Allow access to manage Application partner UI.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Application Partners by Web Service	Allow access to manage trading partners by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Associated External Partner	Allow access to manage associated external partner.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage B2B Certificates	Allow access to manage B2B certificates
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage B2B Customer Trading Partners	Allow access to manage B2B Customer Trading Partners
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage B2B Locations by Web Service	Allow access to manage B2B locations by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage B2B Message Transactions using a REST Service	Allow access to manage B2B Message Transactions
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage B2B Supplier Trading Partners	Allow access to manage B2B Supplier Trading Partners
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage B2B Trading Partners	Allow access to manage B2B Trading Partners

Granted Role	Granted Role Description	Privilege	Privilege Description
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Collaboration Document Data Access for Users	Allow access to manage collaboration document data access for users UI.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Collaboration Message Definitions by Web Service	Allow access to manage collaboration message definitions by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Collaboration Messages	Allow access to Manage Collaboration Messages
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Collaboration Messaging Configuration	Allow access to manage collaboration messaging configuration.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Collaboration Messaging Domain Value Map	Allow access to manage collaboration messaging DVM.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Customer Account Collaboration Configuration	Allow Access to Manage Customer Account Collaboration Configuration
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage External Partner	Allow access to manage external partner
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Service Provider	Allow access to manage collaboration messaging service provider.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Service Providers by Web Service	Allow access to manage collaboration messaging service provider by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Supplier by Web Service	Allows users to manage suppliers using a web service.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Manage Trading Partners by Web Service	Allow access to manage trading partners by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Monitor Collaboration Messaging	Allow access to monitor collaboration messaging work area.
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	Review Collaboration Messaging Setup Data Import	Allow Access to Review Collaboration Messaging Setup Data Import
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	View B2B Locations by Web Service	Allow access to view B2B locations by web service

Granted Role	Granted Role Description	Privilege	Privilege Description
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	View Collaboration Message Definitions by Web Service	Allow access to view collaboration message definitions by web service
Collaboration Messaging Setup	Manages collaboration messaging setup tasks.	View Service Providers by Web Service	Allow access to view collaboration messaging service provider by web service
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access Change Types Using a REST Service	Allows retrieval of all change types using REST services.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access HCM Common Components	Allows access to HCM common components.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access Item Where Used Data Using a REST Service	Permits access to retrieve where used data for items using REST services.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Create Change Order	Allows access to create change orders.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	GET Product Management Index REST	Allows access to view indexed attributes.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Import Map Rest	Allows query access to import maps through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.

Granted Role	Granted Role Description	Privilege	Privilege Description
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Item Rest	Allows query access to items through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Search View REST	Allows query of search views.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Get Trading Partner Item Relationship Rest	Allows query access to trading partner Item relationship through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Import Item	Allows access to import items and related information.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Change Orders	Allows access to view and edit change orders. Does not include access to view and edit change requests, problem reports, or corrective actions.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Import Map Rest	Allows full access to import maps through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Item Batch	Allows management of item batches to import items and related data.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Item Batch Rest	Allows full access to item batch through the REST API.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	Manage Search View REST	Allows access to view and manage search views.
Component Replacement Guided Task Flow	Allows user to create, configure, perform and view the Component Replacement Guided Tasks flow.	View Change Order	Allows access to view change orders. Does not allow access to view change requests, problem reports, or corrective actions.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	Access HCM Common Components	Allows access to HCM common components.

Granted Role	Granted Role Description	Privilege	Privilege Description
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Extension Archives	Allows viewing of definitions of Configurator extension archives.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Model Structure	Allows viewing of item-based and supplemental model structure.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Models	Allows viewing of models and their attributes. Allows generation of model reports.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Rules	Allows viewing of model rules.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Supplemental Attributes	Allows viewing of definitions of supplemental attributes.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator UI Template Maps	Allows viewing of UI template maps and their basic attributes, such as name and description.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator User Interfaces	Allows viewing of definitions of model user interfaces.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Configurator Workspaces	Allows viewing of workspaces and their basic attributes, such as name and description. Allows viewing of workspace participants.
Configurator Reviewing	Contains read-only privileges for the Configurator Modeling Environment.	View Snapshots	Allows viewing of basic attributes of snapshots of item data.
Configure Index	Manage search index configurations.	Access Manufacturer Attributes for Indexing Using REST	Allows access to manufacturer attributes that are available for indexing, using a REST service.
Configure Index	Manage search index configurations.	GET Product Management Index REST	Allows access to view indexed attributes.
Configure Index	Manage search index configurations.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Configure Index	Manage search index configurations.	Get Redwood Settings REST	Allows query access to settings through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Configure Index	Manage search index configurations.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Configure Index	Manage search index configurations.	Manage Product Management Index	Allows access to view and edit the index for an object.
Configure Index	Manage search index configurations.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Configure Index	Manage search index configurations.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Configure Index	Manage search index configurations.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Configure Index	Manage search index configurations.	Rebuild Product Management Indexes	Allow access to ESS Job PMESIndexMaintenanceJob to maintain Product Management Indexes.
Configure Inventory Barcode Formats Using Responsive Inventory	Configures inventory barcode formats using the responsive inventory management application.	Configure Inventory Barcode Formats	Allows configuration of inventory management barcode formats including field names, data length, data type, and date format.
Configure Item Shortage Parameters Using Responsive Inventory	Configures item shortage parameters using the responsive inventory management application.	Configure Item Shortage Parameters Using Responsive Inventory	Allows configuration of item shortage parameters to define default values and rules for providing information on item stockouts and shortages.
Configure Item Shortage Parameters Using Responsive Inventory	Configures item shortage parameters using the responsive inventory management application.	Manage HCM Rules	Allows the user to manage HCM rules.
Configure Item Transaction Defaults Using Responsive Inventory	Configures item transaction defaults using the responsive inventory management application.	Configure Item Transaction Defaults Using Responsive Inventory	Allows configuration of item transaction defaults using responsive inventory to define default subinventories and locators for items for shipping, receiving, and movement request transactions.
Configure Item Transaction Defaults Using Responsive Inventory	Configures item transaction defaults using the responsive inventory management application.	Manage Item Transaction Defaults	Allows configuration of item transaction defaults to define default subinventories and locators for items for shipping,

Granted Role	Granted Role Description	Privilege	Privilege Description
			receiving, and movement request transactions.
Configure RFID Integrations and Devices Using Responsive Inventory	Configures RFID integrations and devices using the responsive inventory management application.	Configure RFID Integrations and Devices Using Responsive Inventory	Allows configuration of radio frequency identification (RFID) integrations and devices to replenish your periodic automatic replenishment (PAR) locations and high-value items located in multiple stocking locations.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	Get Item Rest	Allows query access to items through the REST API.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	Manage Inventory Status	Allows configuration of user-defined material statuses to control the transactions that can be performed on the material. Material status can be assigned either at the subinventory, locator, lot, or serial number level.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	Manage Subinventory and Locator	Allows configuration of subinventories and locators to identify material storage locations for items within an inventory organization.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	Manage Unit of Measure Usage	Allows configuration of units of measure usages for an item at the subinventory level, organization level, or both levels.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	View Inventory On-Hand Balance Web Service	Allows review of inventory on-hand balances along with associated lot and serial details using a web service.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	View Subinventory and Locator List of Values by Web Service	Allows viewing subinventory and locator list of values using web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Configure Subinventory Using Responsive Inventory	Configures subinventories and locators using the responsive inventory management application.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Configure Views	Manage view configurations.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Configure Views	Manage view configurations.	GET Product Management Index REST	Allows access to view indexed attributes.
Configure Views	Manage view configurations.	Get View Available Attribute REST	Allows access to query and view available attributes for the view.
Configure Views	Manage view configurations.	Manage Product Management View	Allows access to view and edit the view for an object.
Configure Views	Manage view configurations.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Configure Views	Manage view configurations.	Manage Search View REST	Allows access to view and manage search views.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Cancel Contract using Web Service	Allows the cancellation of contracts and contract lines from outside the application.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Close Contract by Web Service	Allows the closing of contracts and contract lines from outside the application..
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Delete Contract	Allows the deletion of draft or canceled contracts.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Delete Contract Documents	Not Available
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Delete Supporting Documents	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Edit Contract by Web Service	Not Available
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Enable Buy Intent	Allows all actions permitted by other privileges for contracts with a buy intent. For example, granting this privilege to an individual with a view privilege permits the viewing of supplier contracts. Granting this privilege to an individual with the delete contracts privilege permits the deletion of supplier contracts.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Enable Full Access	Not Available
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Enable Sell Intent	Allows all actions permitted by other privileges for contracts with a sell intent. For example, granting this privilege to an individual with a view privilege permits the viewing of customer contracts. Granting this privilege to an individual with the delete contracts privilege permits the deletion of customer contracts.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Export Customer Account	Not Available
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Export Customer Account Contact	Allows the export of customer account contact information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Export Customer Account Relationship	Allows the export of customer account contact relationship information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Hold Contract	Allows the application of a hold on a contract or contract line.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Manage Contract Documents	Not Available
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Manage Contract Fulfillment	Allows the management of contract fulfillment. Also allows initiating the creation of purchase orders and purchase agreements

Granted Role	Granted Role Description	Privilege	Privilege Description
			from contract fulfillment lines, tracking the execution of purchase orders and agreements created in the procurement application, and sending contract fulfillment notifications.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Manage Sales Credits	Not Available
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Manage Supporting Documents	Not Available
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Search Customer Account Relationships	Allows the search of customer account relationships. If assigning, also assign the ability to view the customer account relationship.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Search Purchase Agreement	Allows a procurement agent to search for purchase agreements including blankets and contracts.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account	Allows the viewing of customer account information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account Contact	Allows the viewing of customer account contact information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account Contact Responsibility	Allows the viewing of customer account contact information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account Information	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account Relationship	Allows the viewing of customer account relationship information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account Relationships	Allows the viewing of customer account relationship information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account Site	Allows the viewing of the customer account site information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Customer Account Site Use	Allows the viewing of the customer account site use information.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Purchase Agreement	Allows a user to review a blanket or contract purchase agreement.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Purchase Order	Allows a user to review a purchase order.
Contract Management Across All Contracts Web Service	Permits an application using the CRM application ID to manage contracts across all business units.	View Service Contract Entitlements	Allows to check service entitlement for a contract.
Cost Management Administration	Performs cost management application setups and administration.	Approve Item Cost Profiles	Allows approval of item cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Configure Costing Using Quick Setup Template	Allows configuration of Costing using Quick Setup template.
Cost Management Administration	Performs cost management application setups and administration.	Define Estimate Mappings	Allows definition of estimate mappings.
Cost Management Administration	Performs cost management application setups and administration.	Define Planning Cost Components	Allows definition of planning cost components.
Cost Management Administration	Performs cost management application setups and administration.	Define Planning Cost Organizations	Allows definition of planning cost organization parameters.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Management Administration	Performs cost management application setups and administration.	Maintain Cost Organization	Allows maintenance of cost organizations.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Analysis Group	Allows management and definition of cost analysis groups.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Analysis Mappings	Allows management of cost analysis mappings.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Book	Allows management and definition of cost books.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Component	Allows management and definition of cost components.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Element	Allows management and definition of cost elements.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Element Groups	Allows management and definition of cost element groups.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Organization	Allows management and definition of cost organizations.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Profile	Allows management and definition of cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Manage Cost Valuation Structure	Allows management and definition of cost valuation structures.
Cost Management Administration	Performs cost management application setups and administration.	Manage Default Cost Profile	Allows management and definition of default cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Manage Expense Pools	Allows management and definition of expense pools.

Granted Role	Granted Role Description	Privilege	Privilege Description
Cost Management Administration	Performs cost management application setups and administration.	Manage Item Cost Profile	Allows management and definition of item cost profiles.
Cost Management Administration	Performs cost management application setups and administration.	Manage Valuation Unit	Allows management and definition of valuation units.
Cost Management Administration	Performs cost management application setups and administration.	View list of Cost Periods by Web Service	Allows the user to use a web service to view list of cost periods.
Customer Account Inquiry	View customer account details.	Export Customer Account	Not Available
Customer Account Inquiry	View customer account details.	Export Customer Account Relationship	Allows the export of customer account contact relationship information.
Customer Account Inquiry	View customer account details.	Search Customer Account Relationships	Allows the search of customer account relationships. If assigning, also assign the ability to view the customer account relationship.
Customer Account Inquiry	View customer account details.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.
Customer Account Inquiry	View customer account details.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.

Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Assign Balancing Segment Values to Ledger	Allows assignment of balancing segment values to ledger.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Assign Balancing Segment Values to Legal Entity	Allows assignment of balancing segment values to legal entities.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Assign Business Unit Business Function	Allows the assignment of the business unit business function.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Assign Legal Entity	Allows assignment of legal entities to accounting configuration.

Granted Role	Granted Role Description	Privilege	Privilege Description
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Assign Oracle Fusion General Ledger Data Access Set Definition	Allows assignment of data access sets.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Common Access Apps Stats Provider Service	Allows the submission of Metrics Statistics Service For Enterprise Manager process.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Create Journal Entries for New Reporting Currency or Secondary Ledger	Create Journal Entries for New Reporting Currency or Secondary Ledger
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Accounting Calendar	Allows definition of periods used to record and report accounting transactions.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Chart of Accounts Mapping	Allows definition of chart of accounts mappings.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Commitment Control Calendar	Allows definition of commitment budget calendars.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Conversion Rate Type	Allows creation of rate types.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Ledger Set	Allows definition of ledger sets.

Granted Role	Granted Role Description	Privilege	Privilege Description
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Oracle Fusion General Ledger Data Access Set	Allows definition of data access sets.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Oracle Fusion General Ledger Statistical Unit Of Measure	Allows definition of statistical units of measure.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Oracle Fusion General Ledger Suspense Account	Allows definition of suspense accounts.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Oracle Fusion General Ledger Transaction Calendar	Allows creation and maintenance of the transaction calendar.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Define Reporting Currency	Allows definition of reporting currencies.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Extract Ledger Setup Definitions	Extract ledger setup data from Oracle Fusion General Ledger to support export of ledger actual balance type balances data from Enterprise Business Suite General Ledger.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Load and Maintain Account Values and Hierarchies	Allows management of value sets through import of value set values and hierarchies from Data Relationship Management, or also known as DRM. Also allows submission and scheduling of programs to audit and flatten account hierarchies.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars,	Maintain Daily Conversion Rate	Allows maintenance of daily rates using a spreadsheet.

Granted Role	Granted Role Description	Privilege	Privilege Description
	currencies, ledgers, legal entities, legal jurisdictions and business units.		
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Maintain Segment Value Attributes	Allows propagation of segment value attribute changes to code combinations.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Account Combination Validation Rules	Allows management of account combination validation rules for a chart of accounts.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Account Cross Validation Rules	Allows management of account combinations segment cross validation rules.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Accounting Configuration	Allows management of the accounting configuration.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Accounting Flexfield Aliases	Allows management of the accounting flexfield aliases.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Accounting Flexfields Segment Value Security Rules by Spreadsheet	Allows management of accounting flexfields segment value security rules, including the assignment of such security rules to data roles, using the Rapid Implementation spreadsheet interface.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Advanced Chart of Accounts Segment Value Security	Allows the set up of segment value security by business function with read and read/write access control.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including	Manage All Application Profile Values	Allows management of all application profile option settings

Granted Role	Granted Role Description	Privilege	Privilege Description
	charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.		and values at various levels to control application behavior.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Data Security Policy	Allows management of security policies that restrict access to functions and data, such as preventing particular values from being accessed in a chart of account segment.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Database Resource	Manage application database resources for data security
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Key Flexfield	Allows management of application key flexfields.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Tree	Manage application trees and tree versions

Granted Role	Granted Role Description	Privilege	Privilege Description
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Application Tree Structure	Manage application tree structures
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Applications Coexistence Configuration Setup	Allows for the management of the applications co-existence configuration setup.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Business Unit	Allows the definition of the business unit.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Business Unit Service Client Relationships	Allows the review of service clients.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Business Unit Service Provider Relationships	Allows create or update of business unit service provider relationships.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Business Unit Set Assignment	Allows creation or update of the business unit set assignment.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Chart of Accounts and Related Components	Allows create and edit of chart of accounts and related components.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Close Monitor Setup	Allows definition of Close Monitor setup including the ledger or ledger sets, manager, image, and account group assignments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage ERP Aggregation Setups	Allows set up and maintenance of the GL balances relational table-based AV Analytic View, as well as other future AV related setups for other product modules.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Enterprise Structures Rapid Implementation	Allows management of the enterprise structures setup objects through the Rapid Implementation path.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Financial Application Lookups	Allows the creation or update of financial application lookups
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Intercompany Balancing Rule	Allows creation or update of the intercompany balancing rules.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Intercompany Customer Supplier Mapping	Allows the creation or update of the customer supplier associations.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Intercompany Organization	Allows the creation or update of the intercompany organizations.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Intercompany Period Status	Allows the definition of period statuses to control the timing of intercompany transaction processing.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities,	Manage Intercompany Receivables Assignment	Allows the assignment of receivables transaction types and memo lines to intercompany transaction types for particular business units.

Granted Role	Granted Role Description	Privilege	Privilege Description
	legal jurisdictions and business units.		
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Intercompany System Option	Allows the definition of intercompany system options.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Intercompany Transaction Type	Allows the creation or update of intercompany transaction types.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Ledger Balancing Rule	Allows the creation or update of intercompany ledger options.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Legal Address	Allows creation and update of the legal address used to register with a legal authority.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Legal Authority	Allows the association of a governing legal body that operates within a jurisdiction to a legal entity for purposes of providing legal reports and financial statements.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Legal Jurisdiction	Allows the definition of the geographic area or areas for which a legal authority is responsible.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Oracle Fusion General Ledger Account Combinations	Allows management of the account combinations.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars,	Manage Secondary Ledger	Allows management of the secondary ledgers.

Granted Role	Granted Role Description	Privilege	Privilege Description
	currencies, ledgers, legal entities, legal jurisdictions and business units.		
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Manage Subledger Accounting Option	Allows update of the subledger accounting options for a ledger.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Review and Submit Accounting Configuration	Allows review and submission of the accounting configuration process.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Run Balancing Segment Value Assignment Report	Allows submission of the balancing segment assignments to accounting configuration report.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Run Calendar Validation Report	Allows submission of the calendar validation report.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Run Chart of Accounts - Mapping Rules Report	Allows submission of the chart of accounts mapping rules report.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Run Daily Rates Import and Calculation Program	Allows submission of the daily rates import and calculation program.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Run Data Access Set Listing Report	Allows submission of the data access set listing report.

Granted Role	Granted Role Description	Privilege	Privilege Description
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Run Import Chart of Accounts Mapping Segment Rollup Rules	Allows submission of the import program for chart of accounts mapping segment rollup rule.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Select Aggregation Options for Account Hierarchies	Allows selection of account balance aggregation options for the account hierarchies in Essbase.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Specify Ledger Option	Allows definition of the various additional attributes for the ledger.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	Sweep Incomplete Intercompany Transaction	Allows sweep of incomplete intercompany transactions.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Accounting Calendar	Allows view access to existing groupings of accounting periods.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Accounting Configuration	Allows view access to the current status and details of the accounting configuration and running the Rapid Implementation enterprise structure listing report.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Accounting Flexfield Aliases	Allows review of the accounting flexfield aliases.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Commitment Control Calendar	Allows view access of commitment budget calendars.

Granted Role	Granted Role Description	Privilege	Privilege Description
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Daily Conversion Rate	Allows view access to daily conversion information.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Ledger Set	Allows view access to existing collections of ledgers intended for batch processing or financial reports.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Oracle Fusion General Ledger Data Access Set Definition	Allows view access of data access set definitions and makes data access set selection.
Enterprise Structures Administration	Administer all enterprise structure related setup objects including charts of accounts, calendars, currencies, ledgers, legal entities, legal jurisdictions and business units.	View Oracle Fusion General Ledger Transaction Calendar	Allows view access to existing groupings of accounting periods for daily balances.
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Facility Schedule Management	Duty role for managing facility schedules.	Manage Inventory Organization	Allows configuration of inventory organizations to represent distinct entities within the company such as manufacturing facilities, warehouses, or distribution centers.

Granted Role	Granted Role Description	Privilege	Privilege Description
Facility Schedule Management	Duty role for managing facility schedules.	Manage Inventory Organization by Web Service	Allow managing Inventory Organizations by web service.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Inventory Organizations Descriptive Flexfields	Allow access to define inventory organizations descriptive flexfields.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Inventory Organizations Value Sets	Allow access to define inventory organizations descriptive flexfields.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Item Grouping	Allows access to view and manage organization grouping.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Item Organization	Allows access to manage organization parameters for item organizations.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Item Organizations Value Sets	Allow access to define item organizations descriptive flexfields.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Manufacturing Plant Profiles	Allow access to define manufacturing plant descriptive flexfields.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Plant Parameters	Allows access to manage organization parameters for plant organizations.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Plant Shift Exception	Allows access to manage plant shift exception.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Production Calendar	Allows access to manage production calendar.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Project Organization	Allows classification of existing organizations to allow them to own projects and tasks or to incur expenditures on projects within the enterprise.
Facility Schedule Management	Duty role for managing facility schedules.	Manage SCM Common Components Quick Setup	Not Available
Facility Schedule Management	Duty role for managing facility schedules.	Manage SCM Common Quick Setup	Allow access to quick setup SCM Common setup data.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Schedule Exception For Facility	Privilege to manage facility schedule exception.

Granted Role	Granted Role Description	Privilege	Privilege Description
Facility Schedule Management	Duty role for managing facility schedules.	Manage Schedule For Facility	Privilege to manage facility schedule.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Schedules by Web Service	Allow managing schedules by web service.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Shift For Facility	Privilege to manage facility shift
Facility Schedule Management	Duty role for managing facility schedules.	Manage Work Center Resource Calendar	Allows access to manage work center resource calendar.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Work Center Resource Exception	Allows access to manage work center resource exception.
Facility Schedule Management	Duty role for managing facility schedules.	Manage Workday Pattern For Facility	Privilege to manage facility workday pattern.
Facility Schedule Management	Duty role for managing facility schedules.	Run Denormalize Organization Hierarchies	Allows submission of program to convert all hierarchical lists of organizations specified in the business unit implement options into flat lists to enhance performance throughout Projects.
Facility Schedule Management	Duty role for managing facility schedules.	Update Plant Resource Availability	Allow access to run update resource availability program.
Facility Schedule Management	Duty role for managing facility schedules.	View Schedules by Web Service	Allow viewing schedules by web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access AI Assist	Allows users to access AI Assist features.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Account Sites Using Web Service	Allows the user to access customer account sites using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Accounts Using Web Service	Allows the user to access customer accounts using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Activities Using Web Service	Allows the user to access activities using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Addresses Using Web Service	Allows the user to access customer addresses using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Asset Hierarchy Using Web Service	Allows the user to access the asset hierarchy using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Billing Types Using Web Service	Allows the user to access billing types using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Create Charges and Estimates	Allows user to create charges and estimates from Manage Work Orders and Charges page
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Customers Using Web Service	Allow viewing customer list of values by web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Debrief Page	Allows user to access standalone debrief page
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Estimates	Allows the user to access estimates.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Estimates PDF	Allows the user to access a PDF copy for estimates.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Estimates Summary KPI	Allows the user to access the Estimates KPI on the Service Logistics landing page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Field Parts Inventory Search for Administrator	Allows the administrator to search for field parts inventory in the search page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Field Parts Inventory Transfer Using Web Service	Allows the user to access fieldPartTransactionActions Type in the field parts inventory Transfer UI using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Field Parts Inventory Using Web Service	Allows the user to access field parts inventory using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Field Parts Reservations Using Web Service	Allows the user to access field parts reservations using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Field Service Administrator Infolets	Allows user to access Field Service Administrator infolets
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Items Using Web Service	Allows the user to access items using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Manual Adjustments Basis Using Web Service	Allows the user to access the manual adjustments basis using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Part Requirements Details for Administrator	Allows the field service administrator to access the Part Requirements details page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Part Requirements Header for Administrator	Allows the field service administrator to access the Part Requirements header pages.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Parts Requirements Search for Administrator	Allows field service administrator to search for parts requirements.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Parts Shipping Methods Using Web Service	Allows user to access Parts Shipping Methods using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Profile Values Using Web Service	Allows user to access Profile option values using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Quality Inspection Plans	Allows the user to access Quality inspection plans in the Work Order Charges page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Receive Parts	Allows the user to access the Receive Parts page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Return Parts Using Web Service	Allows user to access Return Parts using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Service Activities Using Web Service	Allows the user to access service activities using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Service Logistics Landing Page	Allows user to access Service Logistics landing page
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Service Parts Using Web Service	Allows user to access Service Parts using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Standalone Parts Ordering Page	Allows user to access standalone parts ordering page
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Stocking Location Details Using Web Service	Allows user to access Stocking location details using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Subinventories Using Web Service	Allows the user to access subinventories using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Trunk Stock Details Using Web Service	Allows user to access trunk stock details using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Work Order Charges Details for Administrator	Allows admins to view and update work order transactions on the Work Order Charges detail page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Work Order Charges Header for Administrator	Allows admins to create a debrief for a work order on the Work Order Charges header page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Work Order Charges Search	Allows users to search for work orders with an existing debrief header on the Work Order Charges search page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access Work Order Charges by Status KPI	Allows the user to access the Work Order Charges KPI on the Service Logistics landing page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Access the Service Logistics Redwood Landing Page	Allows the user to access the Redwood Service Logistics landing page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Create Debrief Transactions using Web Service	Allows the creation of debrief transactions using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Create Item Structure	Allows access to create item structure action from regional task pane.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Create Maintenance Work Orders by Service	Allows the creation of work orders using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Create Parts Return List	Allow submission of the process that create Field Service Parts Return List
Field Service Administrator	Individual responsible for the administration of field service logistics.	Create Sales Order Requests Using REST Services	Allows the user to send request Create Sales Orders in REST API resource Sales Orders for Order Hub Requests.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Create Sales Orders Using REST Services	Allows the end user to Create Sales Orders Using REST Services.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Delete Sales Orders Using REST Services	Allows the end user to Delete Sales Orders Using REST Services.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Edit Inspection Results	Ability to create, update and delete inspection results.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Edit Price	Allows user to access price manual adjustment page
Field Service Administrator	Individual responsible for the administration of field service logistics.	Edit Service Request	Allows editing of a service request
Field Service Administrator	Individual responsible for the administration of field service logistics.	Edit Service Work Order	Allows editing of a service work order.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Item Rest	Allows query access to items through the REST API.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Manufacturing Plant Set Up Data by Service	Allows retrieval of manufacturing setup information including work areas, work centers, resources, work definition names and work order statuses using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Project List Using Service	Allows access to REST services list of values for projects, that will be consumed cross pillars.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Project Setups	Allows access to list of values for various Projects setup related business objects that will be consumed cross pillars using REST services or BIP reports.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Project Tasks Service	Allows access to the Project Tasks LOV REST service to view the list of project tasks.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Sales Orders Using REST Services	Allows the end user to Get Sales Orders Using REST Services.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Work Definitions by Service	Allows retrieval of work definition information, using a web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Get Work Orders by Service	Allows retrieval of work order information including work order header, operations, materials, resources, and serial numbers, as well as the start and stop information for work order operations, using a web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Import Approved Requisition	Allows users to create approved requisitions through the requisition import program.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Import Order	Allows the end user to import orders into the Order Management application.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Auto Processing Rule	Privilege to Manage Auto Processing Rule

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Auto Processing Rules Using Web Service	Allows the user to manage auto processing rules using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Customer Assets	Allows creation and update of customer assets, related configurations and structures.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Customer Assets by Service	Allows creation and update of customer assets, related configurations and structures.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Enterprise Assets by Service	Allows the management of enterprise assets using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Estimates	Grant this privilege to users to create, edit, delete, and covert estimates to actuals for Engagement Cloud and third party work orders
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Estimates Using Web Service	Allows the user to manage estimates using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Interorganization Parameter	Allows configuration of interorganization parameters to define accounting information and relationships that exist between a shipping organization and a destination organization.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Inventory Reservation and Picks	Allows management of inventory reservations and picks.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Manual Price Adjustments Using Web Service	Allows the user to manage manual price adjustments using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Meter Reading History by Service	Allows the management of meter reading history using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Part Requirement Headers Using Web Service	Allows the user to manage part requirement headers using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Part Requirements Using Web Service	Privilege to Manage Part Requirements Service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Preventive Maintenance of customer owned assets	Allow submission of the process that creates preventive maintenance tasks for customer owned assets
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Pricing Strategies	Allows creation, update, deletion, copy, and viewing of all pricing strategies and child entities.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Resource to Item Mapping	Privilege to Manage Resource to Item Mapping
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Return Routing Rules	Privilege to Manage Return Routing Rules
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Return Routing Rules using Web Service	Privilege to Manage Return Routing Rules Service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Staged Inventory Transaction Web Service	View and update staged inventory transactions using a web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Supplier Warranty Contracts by Service	Allow the creation and update of supplier warranty contracts using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Supply Orchestration Web Services	Privilege to allow user to run Supply Orchestration related web services.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Technician Subinventories Using Web Service	Allows user to manage Technician Subinventories using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Trading Community Organization Usage Assignment	Allows the assignment of usages to an organization. If assigning, also assign the ability to view the trading community organization usage assignment.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Mapping Internal and External locations Using Web Service	Allows user to access Internal and External locations mapping using a service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Post Charges	Allows users to post charges.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Price Sales Transactions	Allows pricing of sales transactions by Price Request Web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Reassign Requisition	Allows users to reassign requisitions entered by others.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Receive Parts	Allows user to receive parts into trunk stock
Field Service Administrator	Individual responsible for the administration of field service logistics.	Record Meter Readings by Service	Allows the recording of meter readings using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Report Maintenance Material Transactions by Service	Allows the reporting of a work order material transaction using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Report Maintenance Resource Transactions by Service	Allows the reporting of a work order resource transaction using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Set Up Shipping Method Schedules	Allows Service Logistics administrators to set up shipping method schedules.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Setup Billing Types	Allows user to setup Billing Types
Field Service Administrator	Individual responsible for the administration of field service logistics.	Setup Service Activities	Allows user to setup Service Activities
Field Service Administrator	Individual responsible for the administration of field service logistics.	Setup Stocking Location	Allows Service Logistics Administrators to setup Spares Stocking Locations

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	Setup Technician	Allows user to setup Technician
Field Service Administrator	Individual responsible for the administration of field service logistics.	Submit Automatic Posting of debrief charges	Allow submission of the process that automatically posts debrief charges
Field Service Administrator	Individual responsible for the administration of field service logistics.	Update Maintenance Work Orders by Service	Allows the update of work orders using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Update OTBI Layout for Service Logistics Landing Page	Allows the user to configure the Oracle Transactional Business Intelligence (OTBI) reports on the Service Logistics landing page.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Update Sales Orders Using REST Services	Allows the end user to Update Sales Orders Using REST Services.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Use Location Service	Allows use of the location service
Field Service Administrator	Individual responsible for the administration of field service logistics.	Use REST Service to Edit Service Request	Allows editing a service request using REST API.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Use REST Service to Edit Service Work Orders	Allows editing of service work orders using REST API.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Use REST Service to View Service Request	Allows viewing of service requests using REST API.
Field Service Administrator	Individual responsible for the administration of field service logistics.	Use REST Service to View Service Work Orders	Allows viewing of service work orders using REST API.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Characteristics	Ability to view inspection characteristics.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Customer Assets	Allows query and view of customer assets, related configurations and structures.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Global Inventory Organizations List of Values by Web Service	Allow viewing the global set of inventory organizations list of values by web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Inspection Levels	Ability to view inspection levels.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Inspection Plans	Ability to view inspection plan related data.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Inspection Results	Ability to view inspection results.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Inventory Transaction List of Values by Web Service	Allows viewing inventory transaction account, inventory transaction reason, inventory account alias, and inventory transaction type list of values web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Item Lot and Item Serial List of Values by Web Service	Allows viewing lot and serial number list of values using web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Maintenance Work Orders by Service	Allows the retrieval of work orders using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Object Link	Allows the user to view an object link.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Orders	Allows the end user to view orders.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Planning Supply Availability	Allows viewing of supply availability.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Pricing Strategies	Allows viewing of all pricing strategies and child entities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Receivables Invoice	View a Receivables invoice.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Receive Parts Using Web Service	Allows the user to view receive parts using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Requirement Lines	Parts Requirement List View
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Requisition	Allows users to view requisition details.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Requisition - All	Allows users to view all requisitions in the authorized business units.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Service Logistics Carriers LOV Using Web Service	Allows the user to view service logistics carriers list of values using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Service Logistics Shipping Methods LOV Using Web Service	Allows the user to view service logistics shipping methods list of values using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Service Request	Allows viewing of service request(s).
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Service Work Order	Allows viewing of service work order(s).
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Shipping Method Schedules Using Web Service	Allows the user to view shipping method schedules using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Subinventory and Locator List of Values by Web Service	Allows viewing subinventory and locator list of values using web service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Subscription Adjustments	Get subscription entitlement information

Granted Role	Granted Role Description	Privilege	Privilege Description
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Subscription Entitlements	Change the subscription user status
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Technician Organizations Using Web Service	Allows the user to view technician organizations list of values using a service.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Technician Portal Work Orders	Allows viewing list of work orders based on search criteria
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Trunk Stock	Allows user to view parts available in Trunk Stock
Field Service Administrator	Individual responsible for the administration of field service logistics.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Financials Intelligent Agent Runtime	Allows end users to access intelligent agents within the Financials product family.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Fiscal Document Data Entry	Capturing the Fiscal Documents into the System	Capture Fiscal Document	Not Available
Fiscal Document Data Entry	Capturing the Fiscal Documents into the System	Load Electronic Fiscal Document	Not Available
Fiscal Document Data Entry	Capturing the Fiscal Documents into the System	Manage Import Validation Errors	Not Available
Fiscal Document Data Entry	Capturing the Fiscal Documents into the System	Process Electronic Fiscal Documents	Not Available
Fixed Asset Inquiry	Views asset information, transaction details, and accounting entries.	Inquire Fixed Asset	Allows viewing of all asset information and depreciation accounting entries.

Granted Role	Granted Role Description	Privilege	Privilege Description
Fixed Asset Inquiry	Views asset information, transaction details, and accounting entries.	Inquire Fixed Asset Transaction	Allows viewing of asset transaction details and accounting entries.
Fixed Asset Inquiry	Views asset information, transaction details, and accounting entries.	Manage Fixed Asset Tracking	Allows access to the tracking transactions work area.
Fixed Asset Inquiry	Views asset information, transaction details, and accounting entries.	Submit Fixed Asset Trace Report	Allows submission of the Asset Trace report, which displays the transaction and setup information stored in different fixed assets tables for the specified asset.
Fixed Asset Inquiry	Views asset information, transaction details, and accounting entries.	View Fixed Asset Books	Allows asset book information to be viewed in Oracle Fusion Assets.
Fixed Asset Inquiry	Views asset information, transaction details, and accounting entries.	View Project Asset Details	Allows viewing of details related to Project Assets from the Fixed Asset .
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Application Store	Allows management of application stores.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Business Process	Allows management of business processes.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Feature	Allows management of features.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Logical Entity	Allows management of certain business objects.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Oracle Fusion Application Offerings and Functional Areas	Allows management of offerings and functional areas.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Quick Setup	Allows management of quick setup.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Solution Bundles	Allows management of solution bundles.

Granted Role	Granted Role Description	Privilege	Privilege Description
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Manage Task List	Allows management of task lists and tasks.
Functional Setup Objects Provider	Maintains setup metadata such as offerings, options, features, setup tasks and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Geography Administration	Grants privileges to set up geographies	Export Import Territory Geography	Not Available
Geography Administration	Grants privileges to set up geographies	Manage Trading Community Geography	Allows managing of geographic entities, such as country, state, province, and city. Allows the managing of geography hierarchy structure and validations.
Geography Administration	Grants privileges to set up geographies	Manage Trading Community Geography Lookups	Allows reviewing and defining of lookup values that provide choices related to geographies, such as address validation methods.
Geography Administration	Grants privileges to set up geographies	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Geography Administration	Grants privileges to set up geographies	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Geography Administration	Grants privileges to set up geographies	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export
Geography Administration	Grants privileges to set up geographies	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files

Granted Role	Granted Role Description	Privilege	Privilege Description
			containing business objects, such as customers and contacts, into staging tables.
Guided Tasks	Manages guided tasks.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Guided Tasks	Manages guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks	Manages guided tasks.	View Guided Tasks	Allows view access to guided tasks.
Guided Tasks Builder	Manages configuration of guided tasks.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Guided Tasks Run Time	Manages of running guided tasks.	Run Guided Tasks	Allows access to run guided task flows.
Guided Tasks View	Manages of viewing guided tasks progress and status.	View Guided Tasks	Allows view access to guided tasks.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Get Customer Assets by Service	Allows query of customer assets using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Get Enterprise Assets by Service	Allows the query of enterprise asset details using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Customer Assets by Service	Allows creation and update of customer assets, related configurations and structures.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Enterprise Assets by Service	Allows the management of enterprise assets using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Meter Reading History by Service	Allows the management of meter reading history using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Meters by Service	Allow the creation and update of meters using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Record Meter Readings by Service	Allows the recording of meter readings using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	View Meter Reading History by Service	Allow the query and view of meter reading history using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	View Meters by Service	Allow the query and view of meters using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	Create ABC Classification Set	Allows creation of ABC classification sets.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	Get Item Rest	Allows query access to items through the REST API.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	Manage ABC Assignment Group	Allows configuration of ABC assignment groups and association of ABC classes to ABC assignment groups.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	Manage ABC Classification	Allows configuration of ABC classes to identify the value groupings to which items belong. Also allows configuration of valuation and scope of the ABC analysis performed against an inventory based on quantity, value, or history of the item.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	Perform ABC Assignment	Allows assignment of items to an ABC assignment group.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	Purge ABC Assignment Group	Not Available
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	Purge ABC Classification Set	Allows purge of ABC classification sets which deletes all item values and rankings for the ABC classification sets specified, as well as the ABC classification set itself.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Inventory ABC Analysis	Manages ABC analysis activities including definition of classes, assignment groups, and classification sets.	View Subinventory and Locator List of Values by Web Service	Allows viewing subinventory and locator list of values using web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Inventory Administration	Configures all setup-related activities for inventory management.	Configure Inventory Attribute Exceptions	Privilege to configure exceptions for inventory attributes such as country of origin.
Inventory Administration	Configures all setup-related activities for inventory management.	Configure Inventory Striping Attributes	Allows configuration or inventory striping attributes such as lot grade and lot expiration date and assignment of applicability levels and values.
Inventory Administration	Configures all setup-related activities for inventory management.	Configure Inventory Zones Using Responsive Inventory	Allows configuration of inventory zones to group subinventories, locators, and internal locations to perform different activities within a warehouse and are used for employee assignments.
Inventory Administration	Configures all setup-related activities for inventory management.	Configure Label Output Preferences	Allows configuration and maintenance of labels for Inventory Management, Receiving, and Shipping.
Inventory Administration	Configures all setup-related activities for inventory management.	Configure Lot Selector Views	Privilege to configure the Lot Selector views for Inventory Management and other products that utilize the Lot Selector for inventory transactions involving lot-controlled items.
Inventory Administration	Configures all setup-related activities for inventory management.	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.
Inventory Administration	Configures all setup-related activities for inventory management.	Get Item Category Rest	Allows query access to item categories through the REST API.
Inventory Administration	Configures all setup-related activities for inventory management.	Get Item Rest	Allows query access to items through the REST API.
Inventory Administration	Configures all setup-related activities for inventory management.	Import Item	Allows access to import items and related information.
Inventory Administration	Configures all setup-related activities for inventory management.	Item Expiration Date Change	Privilege that allows the update of item expiration date.

Granted Role	Granted Role Description	Privilege	Privilege Description
Inventory Administration	Configures all setup-related activities for inventory management.	Item Grade Change	Privilege that allows the update of item grade.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Interorganization Parameter	Allows configuration of interorganization parameters to define accounting information and relationships that exist between a shipping organization and a destination organization.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Intersubinventory Parameter	Allows configuration of parameters related to the transfer of material between two subinventories.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Account Alias	Allows configuration of account aliases to provide an easily recognizable name or label for general ledger account numbers. An account alias can be used instead of the account number to refer to an account when processing inventory transactions.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Business Event Configurations	Allows management of inventory business event configurations.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Consumption Rule	Allows configuration of consigned inventory consumption rules.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Document Output Preferences	Allows management of inventory document output preferences.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Movement Request Approvals	Allows configuration and management of inventory movement request approvals.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Status	Allows configuration of user-defined material statuses to control the transactions that can be performed on the material. Material status can be assigned either at the subinventory, locator, lot, or serial number level.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Transaction Reason	Allows configuration of inventory transaction reasons to classify or explain the reason for an inventory transaction. An inventory transaction reason can be specified

Granted Role	Granted Role Description	Privilege	Privilege Description
			when performing miscellaneous transactions.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Inventory Transaction Sources and Types	Allows configuration of inventory transaction sources and types. Transaction sources are used while performing transactions to classify transactions according to their origin, such as purchase order, sales order, account number, or physical inventory. Transaction types are user-defined and used to identify the various inventory transactions.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Item Lot Expiration Action	Allows configuration of lot expiration actions to indicate the action required on a lot when it expires.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Item Lot Grade	Allows configuration of lot grades to describe the particular makeup and quality characteristics of items in a lot.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Item Lot and Serial Attributes Mapping	Allows assignment of lot and serial number attribute descriptive flexfield context to an item or item category.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Item Transaction Defaults	Allows configuration of item transaction defaults to define default subinventories and locators for items for shipping, receiving, and movement request transactions.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Location	Allows management of locations.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Material Planner	Allows definition and maintenance of material planners.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Min-Max Planning Policies	Privilege to manage min-max planning policies including managing planning classification groups, policy profiles, and policy profile assignments.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Picking Grouping Rule	Allows configuration of rules to group picks into pick slips.

Granted Role	Granted Role Description	Privilege	Privilege Description
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Picking Rule	Allows configuration of picking rules to enable the selection of material based on defined criteria.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Picking Rule Assignments	Allows assignment of picking rules to any combination of criteria and prioritization of the rule assignment within an inventory organization.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Remaining Shelf-Life Rules	Allows management of minimum remaining shelf-life rules
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Subinventory and Locator	Allows configuration of subinventories and locators to identify material storage locations for items within an inventory organization.
Inventory Administration	Configures all setup-related activities for inventory management.	Manage Unit of Measure Usage	Allows configuration of units of measure usages for an item at the subinventory level, organization level, or both levels.
Inventory Administration	Configures all setup-related activities for inventory management.	Mass Create Locations	Allows mass creation of locations.
Inventory Administration	Configures all setup-related activities for inventory management.	Perform Actions on Inventory Tasks	Performs inventory task actions, such as purging closed tasks that require background processing.
Inventory Administration	Configures all setup-related activities for inventory management.	Use REST Service - Users and Roles Lists of Values	Allows the user to call the GET method associated with the Users and Roles lists of values REST Services.
Inventory Administration	Configures all setup-related activities for inventory management.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Inventory Administration	Configures all setup-related activities for inventory management.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Inventory Administration	Configures all setup-related activities for inventory management.	View Inventory Transaction List of Values by Web Service	Allows viewing inventory transaction account, inventory transaction reason, inventory account alias, and inventory

Granted Role	Granted Role Description	Privilege	Privilege Description
			transaction type list of values web service.
Inventory Administration	Configures all setup-related activities for inventory management.	View Owning Party Site List of Values by Web Service	Allows viewing owning party list of values using web service.
Inventory Administration	Configures all setup-related activities for inventory management.	View Remaining Shelf-Life Rules	Allows view of minimum remaining shelf-life rules
Inventory Administration	Configures all setup-related activities for inventory management.	View Subinventory and Locator List of Values by Web Service	Allows viewing subinventory and locator list of values using web service.
Inventory Administration	Configures all setup-related activities for inventory management.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Item Inquiry	Queries and views items in the enterprise.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Item Inquiry	Queries and views items in the enterprise.	GET Product Management Index REST	Allows access to view indexed attributes.
Item Inquiry	Queries and views items in the enterprise.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Item Inquiry	Queries and views items in the enterprise.	Get Search View REST	Allows query of search views.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Inquiry	Queries and views items in the enterprise.	Manage Item Global Search	Allows access to search for items using secure enterprise search.
Item Inquiry	Queries and views items in the enterprise.	Manage Product Management Search	Allows access to view and edit Product Management Search.
Item Inquiry	Queries and views items in the enterprise.	Manage Search View REST	Allows access to view and manage search views.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Inquiry	Queries and views items in the enterprise.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Inquiry	Queries and views items in the enterprise.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Item Inquiry	Queries and views items in the enterprise.	View Item	Allows access to product dashboard.
Item Inquiry	Queries and views items in the enterprise.	View Item Organization Association	Allows access to view item organization assignments.
Item Inquiry	Queries and views items in the enterprise.	View Item Relationship	Allows access to view item relationships.
Item Inquiry	Queries and views items in the enterprise.	View Product Management Search	Allows access to view Product Management Search.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Configure Item Extended Attributes	Allows configuration of item extended attributes.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Item Structure	Allows access to create item structure action from regional task pane.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Create Trading Partner	Allows access to creation of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Delete Trading Partners	Allows access to deletion of trading partners.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item	Allows access to browse items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Attachment	Allows access to view and manage item attachments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Lifecycle Phase Change	Allows access to change lifecycle phase of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Manufacturer	Allows access to view and manage item manufacturers.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Organization Association	Allows access to manage item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Relationship	Allows access to manage item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Status Change	Allows access to change status of items in the enterprise.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Item Work List	Allows access to manage item work list entries.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Product Audit Trail Reports	Allows management of audit data for products.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Manage Trading Partner Item Reference	Allows access to manage trading partner item references for items.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Modify Trading Partners	Allows access to modify of trading partners.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Summary	Allows access to items overview page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	Monitor Item Work Area	Allows access to items and notifications page.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Development Structures	Allows access to development structures.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item	Allows access to product dashboard.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item History	Allows viewing of audit data for an item.

Granted Role	Granted Role Description	Privilege	Privilege Description
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Organization Association	Allows access to view item organization assignments.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Item Relationship	Allows access to view item relationships.
Item Management	Creates and manages items including item attributes, item structures, packs, associations, relationships, and catalog assignments.	View Trading Partner Item	Allows access to view trading partner items.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Address	Allows creation and update of the legal address used to register with a legal authority.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Authority	Allows the association of a governing legal body that operates within a jurisdiction to a legal entity for purposes of providing legal reports and financial statements.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity	Allows creation and update of the legal entity.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity Contact Information	Allows creation and update of the legal entity contact information.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity Deduction Records	Manage Legal Entity Deduction Records
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity Financial Information	Allows creation and update of legal entity financial information.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity HCM Information	Allows creation and update of the legal entity HCM information.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity Intercompany Exception	Allows the creation or update of legal entity intercompany exceptions.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity Primary Ledger	Manage Legal Entity Primary Ledger

Granted Role	Granted Role Description	Privilege	Privilege Description
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity Registration	Allows creation and update of the legal entity registration.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Entity for Associated Business Entity	Allows the definition of associations between business entities and legal entities or legal reporting units for tax calculation purposes.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Jurisdiction	Allows the definition of the geographic area or areas for which a legal authority is responsible.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Reporting Unit	Allows the definition of the legal reporting unit.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Reporting Unit Contact Information	Allows creation and update of the legal reporting unit contact information.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Reporting Unit Deduction Records	Manage Legal Reporting Unit Deduction Records
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Reporting Unit Financial Information	Allows creation and update of the legal reporting unit financial information.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Reporting Unit Registration	Allows creation and update of the legal reporting unit registration.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Reporting Unit Workforce Information	Manage Legal Reporting Unit HCM Information
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Manage Legal Reporting Unit for Associated Balancing Segment	Allows the association of one or multiple balancing segments value to a legal report unit to meet the legal reporting requirement of specific countries.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Mass Create Legal Entity HCM Information	Allows mass creation of legal entity HCM information.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Search Legal Entity	Allows the search for existing legal entities to update or delete them.
Legal Entities Administration	Manages legal entities, legal reporting units and registrations.	Search Legal Reporting Unit	Allows the search for the legal reporting unit.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Import Enterprise Assets	Allows import of enterprise assets.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Import Maintainable Assets	Allows import of maintainable assets.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Asset Group Rules	Allows creation and update of asset group rules.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Asset Groups	Allows creation and update of asset group.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Asset Maintenance Parameters	Allows configuration of parameters for the creation, update, and management of maintenance assets.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Condition Event Codes	Allow the query, creation, and update of condition event codes.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Maintenance Organization Relationships	Allows creation and update of maintenance organization relationships.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Maintenance Resources	Allows creation and update of resources.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Maintenance Work Areas	Allows creation and update of work areas.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Maintenance Work Centers	Allows creation and update of work centers.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Manage Work Order Statuses	Allows creation, update and delete of work order statuses to support the setup of enterprise-specific business processes for manufacturing and maintenance applications.
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Process Asset Transactions	Allows processing asset transactions and update relevant downstream applications.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Setup Administration	Provides access to perform maintenance management setup tasks.	Purge Maintenance Interface Records	Allows purging of maintenance records from the interface tables.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Create Maintainable Assets by Service	Allows the creation of maintainable assets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Create Maintenance Work Orders by Service	Allows the creation of work orders using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Create Recommendations by Service	Allows the creation of recommendations using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Enterprise Assets by Service	Allows the query of enterprise asset details using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Condition Event Codes	Allow the query of asset failure condition event code using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Event Instances	Allow the query of asset failure event instance using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Events	Allow the query of asset failure event using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Sets	Allow the query of asset failure sets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Symptoms	Allow the query of asset failure symptom using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management	Get Logical Hierarchy by Service	Allows retrieval of logical hierarchy details using service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	and work execution by using the REST services.		
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Forecasts by Service	Allows query and view maintenance forecasts by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Programs by Service	Allow the query of maintenance programs using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Standard Operations by Service	Allows retrieval of Maintenance standard operation information, using a web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Work Order Materials by Service	Allow the query of maintenance work order materials using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Work Order Resources by Service	Allow the query of maintenance work order resources using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Manufacturing Plant Set Up Data by Service	Allows retrieval of manufacturing setup information including work areas, work centers, resources, work definition names and work order statuses using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Project List Using Service	Allows access to REST services list of values for projects, that will be consumed cross pillars.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Recommendations by Service	Allow the query of recommendations using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Claim Labor Rates by Service	Allows query labor rates of supplier warranty claim by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Claims by Service	Allow the query of supplier warranty claims using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Contracts by Service	Allow the query of supplier warranty contracts using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Coverages by Service	Allow the query of supplier warranty coverage using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Entitlements by Service	Allow the query of supplier warranty entitlements using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Standard Repair Times by service	Allows the query standard repair time of warranty provider by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Work Definitions by Service	Allows retrieval of work definition information, using a web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Asset Group Rules by Service	Allows query and view of asset group rules using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Asset Groups by Service	Allows creation and update of asset group by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Enterprise Assets by Service	Allows the management of enterprise assets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Condition Event Codes	Allow the creation and update of asset failure condition event code using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Events	Allow the creation and update of asset failure event using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Sets	Allow the creation and update of asset failure sets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Symptoms	Allow the creation and update of asset failure symptom using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Logical Hierarchy by Service	Allows creation and updation of logical hierarchy using service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Maintenance Programs by Service	Allow the creation and update of maintenance programs using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Maintenance Standard Operations by Service	Allows creation, update and delete of Maintenance standard operations, using a web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Manufacturing Plant Set Up Data by Service	Allows creation, update and delete of manufacturing setup information for work areas, work centers and resources using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Meter Reading History by Service	Allows the management of meter reading history using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Meters by Service	Allow the creation and update of meters using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Qualification Profiles by service	Allows the creation, update and query of qualification profiles using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Qualification Requirements by service	Allows the creation, update and query of qualification requirements using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Claim Labor Rates by Service	Allows the creation, update and query labor rates of supplier warranty claim by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Claims by Service	Allow the creation and update of supplier warranty claims using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Contracts by Service	Allow the creation and update of supplier warranty contracts using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Coverages by Service	Allow the creation and update of supplier warranty coverage using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Entitlements by Service	Allow the creation and update of supplier warranty entitlements using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Standard Repair Times by Service	Allows the creation, update and query standard repair time of warranty provider by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Work Definitions by Service	Allows creation, update and delete of work definitions, related priorities, and versions, using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Record Meter Readings by Service	Allows the recording of meter readings using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Report Maintenance Material Transactions by Service	Allows the reporting of a work order material transaction using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Report Maintenance Operation Transactions by Service	Allows the reporting of a work order operation transaction using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Report Maintenance Resource Transactions by Service	Allows the reporting of a work order resource transaction using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Update Maintainable Assets by Service	Allows the update of maintainable assets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Update Maintenance Forecasts by Service	Allows update, query and view maintenance forecasts by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Update Maintenance Work Orders by Service	Allows the update of work orders using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Update Recommendations by Service	Allows the update of recommendations using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Item Lot and Item Serial List of Values by Web Service	Allows viewing lot and serial number list of values using web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Maintainable Assets by Service	Allows the retrieval of maintainable asset details using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Maintenance Work Orders by Service	Allows the retrieval of work orders using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Meter Reading History by Service	Allow the query and view of meter reading history using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management	View Meters by Service	Allow the query and view of meters using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	and work execution by using the REST services.		
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Purchasing Document List of Values using REST Service	Allows access to REST services list of values for purchasing documents that will be consumed cross pillars.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Subinventory and Locator List of Values by Web Service	Allows viewing subinventory and locator list of values using web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Manage Item Redwood	Allows users to create and edit item details.	Create Item Structure	Allows access to create item structure action from regional task pane.
Manage Item Redwood	Allows users to create and edit item details.	Enter Trading Community Organization Information	Allows the specification of organization information.
Manage Item Redwood	Allows users to create and edit item details.	Get New Item Request Rest	Allows query and return of the NIR setup details.
Manage Item Redwood	Allows users to create and edit item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Associations	Allow access to view the create and edit associations tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Attachments	Allow access to create and edit the attachment tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Item Categories	Allow access to create and edit the item changes tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Relationships	Allow access to create and edit the relationships tab in the Manage Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Structures	Allow access to create and edit the item structures tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Status REST	Allows access to view and manage item statuses.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Association Rest	Allows Redwood custom actions create/update item to create and edit supplier associations for items.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Associations	Allows access to view and manage Redwood item supplier associations for which the user has at the minimum view privilege.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Translation	Allow access to manage translations for items in the translation editor.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Revision Rest	Allows access to view and manage item revisions.
Manage Item Redwood	Allows users to create and edit item details.	Remove Trading Community Organization	Allows the removal of organizations. If assigning, also assign the ability to view the trading community organization.
Manage Item Redwood	Allows users to create and edit item details.	Update Trading Community Organization	Allows the update of the organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Manage Item Redwood	Allows users to create and edit item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Create Location for Pedigree and Serialization	Privilege to create a location which defines attributes to control

Granted Role	Granted Role Description	Privilege	Privilege Description
			the processing of serials and pedigrees.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Create Serial Type Group for Pedigree and Serialization	Privilege to create a serial type group for the purpose of controlling serial generation for common serial types.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Delete Location for Pedigree and Serialization	Privilege to delete a location if the location does not have associated transactions, serials or lots.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Delete Serial Type Group for Pedigree and Serialization	Privilege to delete a serial type group that is not associated with any serial types.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Delete Serial Type for Pedigree and Serialization	Privilege to delete serial type from a serial type group.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Edit Location for Pedigree and Serialization	Privilege to edit attributes of a location pertaining to the management of serials and pedigrees.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Edit Lookup for Pedigree and Serialization	Privilege to edit a lookup type and meaning for extensible and user defined lookups. OPSM uses lookups throughout the system for validation.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Edit Pedigree and Serialization System Parameter	Privilege to edit Pedigree and Serialization system parameter. System Parameters define settings that enable the addition of lots at time of shipment and commission, email server information and custom dashboard urls. They also define default settings for owning source system, tracking internal shipments, tracking internal returns, and the creation of serial numbers on shipment.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Edit Serial Type Group for Pedigree and Serialization	Privilege to edit the attributes of a serial type group such as range level control and Product Unit Identifier formula.
Manage Pedigree and Serialization System Setup	Duty role to manage Pedigree and Serialization Setup Information.	Edit Serial Type for Pedigree and Serialization	Privilege to edit a serial type attributes that the system uses to generate serials.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Serial Destination for Pedigree and Serialization	Duty role to manage Serial Destination.	Create Serial Destination for Pedigree and Serialization	Privilege to create a serial destination that is used to transmit serial data to an external system or database.
Manage Serial Destination for Pedigree and Serialization	Duty role to manage Serial Destination.	Delete Serial Destination for Pedigree and Serialization	Privilege to delete a serial destination so that serials are no longer transmitted to the destination.
Manage Serial Destination for Pedigree and Serialization	Duty role to manage Serial Destination.	Edit Serial Destination for Pedigree and Serialization	Privilege to edit a serial destination that is utilized to transmit serial data for various transactions.
Manage Serial Destination for Pedigree and Serialization	Duty role to manage Serial Destination.	View Serial Destination for Pedigree and Serialization	Privilege to view serial destination information that is used to transmit serials to an external system or database.

Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Nonrevenue Credits	Allows assigning of nonrevenue credit to team members. Nonrevenue sales credit is a type of sales credit assigned to non-primary salespeople.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity References	Allows adding or removing of reference customers on the opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Reports	Allows modification of opportunity reports.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Revenue	Allows management of revenue items on the opportunity, including mass updating.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Revenue Credits	Allows assigning revenue credit to team members.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Revenue Recommendations	Enables viewing and applying of revenue recommendations. Revenue recommendations are using SPE to suggest adjustments to revenue based on similar opportunity historical data.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Revenue Recurrences	Allows creating and updating of recurring revenue schedules. Recurring revenue items are those that re-occur over time, such as service contracts.

Granted Role	Granted Role Description	Privilege	Privilege Description
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Sales Account	Allows adding or removing of the sales account from the opportunity. A sales account is a customer with a sell-to address registered in the trading community application.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Sales Method	Allows updating of sales method and sales stage on an opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Sources	Allows adding or removing of sources from the opportunity. A source is the marketing source code for the opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Manage Opportunity Work Area	Allows basic access to the work area. Other privileges secure what can be done with the work area.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Mass Update Opportunity	Allows mass update of opportunities. Mass update allows updating of specific opportunity parameters at one time, such as close date or win probability.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Run Purge Batch Assignment Information Process	Allows scheduling and monitoring of the process to purge the batch assignment data.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	Set Up Opportunity	Allows setup of opportunity application features, such as sales methods, sales coach, credit allocation templates, profiles, lookups, flexfields, and assignment rules, among others.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity	Allows viewing of opportunity pages, including the work area. A work area is the landing page for accessing the frequently used tasks and reports useful for managing relevant opportunities.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Appointments	Allows viewing of their own appointments associated with the opportunity.

Granted Role	Granted Role Description	Privilege	Privilege Description
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Competitors	Allows viewing of competitor information on an opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Contacts	Allows viewing of contact information on an opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Group Space	Allows viewing of group space content. Group spaces are editable Web pages used for collaboration and information sharing.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Interactions	Allows viewing of interactions on an opportunity. An interaction is a record of a customer contact event, such as a phone call or e-mail.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Leads	Allows viewing of lead information on an opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Nonrevenue Credits	Allows viewing of nonrevenue credit assignments. Nonrevenue sales credit is a type of sales credit assigned to non-primary salespeople.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Notes	Allows viewing of opportunity notes.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity References	Allows viewing of opportunity reference customer data.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Revenue	Allows viewing of opportunity revenue information.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Revenue Credits	Allows viewing of revenue credit assignments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Revenue Recurrences	Allows viewing of recurring revenue schedules. Recurring revenue items are those that re-occur over time, such as service contracts.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Sales Coach	Allows access to Sales Coach features. Sales Coach is both a teaching tool and a method to push best practice information to salespeople.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Similar Opportunities	Allows viewing of similar opportunity information. This feature displays opportunities with similar data, such as expected revenue or win probability, and allows salespeople to copy the similar information over to the current opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Sources	Allows viewing of opportunity source. A sources is the marketing source code for the opportunity.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Tasks	Allows viewing of opportunity tasks.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Opportunity Team	Allows viewing of opportunity sales team information.
Opportunity Administration	Administers all aspects of the application, including some setup. This role is for opportunity administrators.	View Reports and Analytics Accordion	Allows viewing of reports and analytics accordion.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Administer Orchestration Infrastructure Jeopardy Threshold Definition	Allows creation and edit of orchestration infrastructure jeopardy threshold definitions that determine the degree of action to take when orchestration highlights potential or actual fulfillment issues due to delays.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Administer Orchestration Infrastructure Web Service Sourcing Rule	Allows creation and edit of external orchestration infrastructure interface connectors, which are conduits between order orchestration and external fulfillment systems.

Granted Role	Granted Role Description	Privilege	Privilege Description
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Deploy Orchestration Infrastructure Process	Allows deployment of orchestration infrastructure processes.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Generate Orchestration Infrastructure Change Constraint Definition Package	Allows submission of the process that generates a dynamic package that activates newly defined validation rule sets for processing constraints within oirchestration infrastructure.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Import Trading Community Person	Allows the import of person information. If assigning, also assign the ability to view the trading community person information.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Maintain Drop Ship Financial Flow	Create, update, and correct past-dated records of the drop ship financial flows.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Drop Ship Financial Flow	Create and update the drop ship financial flows.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage My Application Profile Values	Manage My Application Profile Values. Access to manage profile values at the user level.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Generic Web Service	Allows access to orchestration generic web services.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Change Constraint Definition	Allows creation and edit of the orchestration infrastructure rules that control attempted changes to order orchestration.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure	Manage Orchestration Infrastructure Change Constraint Definition Objects	Allows creation and edit of orchestration infrastructure entities that processing constraints can be applied to.

	elements that can be used by other applications.		
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure External Interface Connector	Allows creation and deployment of orchestration infrastructure connectors that transform messages and communicate with external fulfillment systems.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure External Interface Data Value Map	TBD
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure External Interface Routing Rule	Allows creation and update of orchestration infrastructure rules to route fulfillment requests to appropriate connectors.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure External Interface Transformation Style Sheet	Allows creation and update of transformation style sheets to convert orchestration infrastructure messages into external fulfillment system messages.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Hold Code Definition	Allows creation and edit of hold codes for orchestration infrastructure.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Jeopardy Priorities	Allows creation and edit of score codes that indicate the severity of the delay of orchestration infrastructure tasks.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Order Attributes That Identify Change	Allows creation and edit of the orchestration infrastructure attributes necessary to identify changes in orders used to initiate actions.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Process Definition	Allows creation and edit of definitions that specify how to carry out orchestration processing for orchestration infrastructure.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the	Manage Orchestration Infrastructure Source Systems	Allows creation and edit of orchestration infrastructure source

Granted Role	Granted Role Description	Privilege	Privilege Description
	orchestration infrastructure elements that can be used by other applications.		system definitions and collection parameters for data collection processing.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Status Conditions	Allows creation and edit of orchestration infrastructure process status conditions, which indicate when a status is utilized. These conditions are defined within a specific orchestration process.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Status Definition Values	Allows creation and edit of orchestration infrastructure status codes for tasks.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Orchestration Infrastructure Task Types	Allows creation and edit of orchestration infrastructure task types that group tasks and services for status management, jeopardy, orchestration process definition, and run-time behavior.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Source System Descriptive Flexfields	Allows the specification of additional fields to enter and track information that is not otherwise captured. Descriptive flexfields can be validated and dependent on other values entered in other areas of the page.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Supply Chain Financial Orchestration Qualifiers	Create and update the supply chain financial orchestration qualifiers.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Supply Chain Financial Orchestration System Options	Update the supply chain financial orchestration system options.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure elements that can be used by other applications.	Manage Trading Community Import Lookups	Allows reviewing and defining of lookup values that provide choices related to data import batch processing, such as batch status, batch identifier, batch configuration, and process status.
Orchestration Infrastructure Administration	Allows access to administrative pages and functions for the orchestration infrastructure	Manage Trading Community Original System	Allows the update of original system information.

Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Edit Buyer Planning Participating Suppliers	Allows management of buyer planning suppliers from the participating supplier page.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Edit Forecasting Profile in Simulate Demand	Allows edit of forecasting profile in demand simulation
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Edit Forecasting Profiles	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Edit Planning Exception Sets	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Edit Planning Exceptions Configuration	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Edit Planning Level Profiles	Allows creation, updating, deletion, and viewing of planning level profiles
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Edit Planning Profile Options	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Export Customer Account	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Extract Planning Data	Allows user to extract planning data
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Load Measure Data from Other Plans	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Load Planning Hierarchies Data	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Load Planning Reference Data	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Load Planning Transaction Data	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Material Planner	Allows definition and maintenance of material planners.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage My Application Profile Values	Manage My Application Profile Values. Access to manage profile values at the user level.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Order Promising Data Collection	Allows management of data collection parameters, processes, and requests.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Order Promising Options	Allows management of default order promising parameters related to handling extremely high number of transactions, and other instance level settings that affect promising behavior.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Planning Advisor Alerts	Allows review of planning advisor alerts
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Planning Attributes	Allows edit of planning attributes
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Planning Instance	Allows management of planning source system definitions and related parameters.

Granted Role	Granted Role Description	Privilege	Privilege Description
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Planning Sourcing	Allows management of sourcing rules and bills of distribution.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Planning Sourcing Assignment	Allows management of sourcing assignments.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Projects	Allows edit of project groups and netting rules
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Manage Remaining Shelf-Life Rules	Allows management of minimum remaining shelf-life rules
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Monitor Planning Data Collection Process	Allows monitoring of data collection processes.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Perform Order Orchestration and Planning Data Collection	Allows submission of data collection requests to collect data from Oracle Fusion source systems. Allows upload of third-party source system data to data collection Web services.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Perform Order Orchestration and Planning Data Load	Allows submission of data load requests to move data from the staging tables into the data repository.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Perform Order Promising Server Data Refresh	Allows the refresh of order promising server data loaded into memory. The data is refreshed from the data repository.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Provide Item Cost	Allows retrieval of item costs.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Schedule Publish Planning Data for Collaboration	Allows submission of Publish Planning Data for Collaboration.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.

Granted Role	Granted Role Description	Privilege	Privilege Description
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	Update Plant Resource Availability	Allow access to run update resource availability program.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Planning Analytics Configuration	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Customer Account	Allows the viewing of customer account information.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Customer Account Information	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Customer Account Site	Allows the viewing of the customer account site information.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Customer Account Site Use	Allows the viewing of the customer account site use information.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Forecasting Profiles	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Planning Exception Sets	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Planning Exceptions Configuration	Not Available
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Planning Level Profiles	Allows only viewing of planning level profiles
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Planning Profile Options	Not Available

Granted Role	Granted Role Description	Privilege	Privilege Description
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Planning Sourcing Assignment	Allows review of sourcing assignments.
Planning Administration	Configures and manages planning set up, data collection and order promising server processes.	View Remaining Shelf-Life Rules	Allows view of minimum remaining shelf-life rules
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Manage Order Promising Data Collection	Allows management of data collection parameters, processes, and requests.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Order Orchestration Reference Objects	Not Available
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Approved Supplier List	Allows review of approved supplier list data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Calendar	Allows review of calendar data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Calendar Assignment	Allows review of calendar assignment data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Demand	Allows review of demand data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Demand Class	Allows review of demand class data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Interlocation Shipping Network	Allows review of interlocation shipping network data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Inventory Reservation	Allows review of inventory reservation data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Item	Allows review of item data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Order Orchestration Reference Object	Allows review of order orchestration reference object data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Supply	Allows review of supply data collected from source systems.

Granted Role	Granted Role Description	Privilege	Privilege Description
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Trading Partner	Allows review of trading partner data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Trading Partner Site	Allows review of trading partner site data collected from source systems.
Planning Collected Data Management	Manages data collection processes and verifies collected data.	Review Planning Unit of Measure	Allows review of unit of measure data collected from source systems.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Administer Orchestration Infrastructure Web Service Sourcing Rule	Allows creation and edit of external orchestration infrastructure interface connectors, which are conduits between order orchestration and external fulfillment systems.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Get Pricing List of Values Data	Allows retrieval of pricing related data held in lists of values.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Application Standard Lookup	Manage sub-type entities stored in the Application Standard Lookup Values entity. Lookup Types are lists of values such as "Days of the Week" or "Yes/No" which can be used to validate columns values.

Granted Role	Granted Role Description	Privilege	Privilege Description
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Price Elements	Allows creation, update, deletion, copy, and viewing of price elements.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Bases	Allows creation, update, deletion, copy, and viewing of price bases.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Charge Definitions	Allows creation, update, deletion, and viewing of pricing charge definition.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Matrix Types	Allows creation, update, deletion and viewing of pricing matrix types.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Message Token Attribute List	Allows creation, update, deletion, and viewing of pricing message token attributes.

Granted Role	Granted Role Description	Privilege	Privilege Description
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Messages	Allows creation, update, deletion, and viewing of pricing messages.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Parameter Values	Allows update and deletion of pricing parameter values.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Process Assignments	Allows creation, update, deletion and viewing of pricing process assignment.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Results Presentations	Allows creation, update, deletion, and viewing of pricing results presentations.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Pricing Total Definitions	Allows creation, update, deletion, copy, and viewing of pricing total definitions.
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases,	Manage Rounding Rule Assignments	Allows creation, update, deletion, and viewing of rounding rule assignments.

Granted Role	Granted Role Description	Privilege	Privilege Description
	pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.		
Pricing Setup Management	Manages setup required for price execution. This includes setting up price elements, pricing bases, pricing charges, pricing message and tokens, pricing matrix types, pricing totals, rounding rules, result presentation templates, process assignments, pricing parameters, pricing descriptive flexfields and pricing lookups.	Manage Rounding Rules	Allows creation, update, deletion, copy, and viewing of rounding rules.
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.	Author Standard Contract Terms and Conditions	Allows authoring of contract terms and conditions using contract terms templates defined in the Contract Terms Library. Also includes using the Contract Expert and validating the contract terms.
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.	Manage Approved Supplier List by REST Service	Allows users to call all methods except administrative methods with the Approved Supplier List REST service.
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.	Manage Procurement Agent by REST Service	Allows management of procurement agents using the REST service.
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.	Manage Work Confirmation by REST Service	Allows users to call all methods except administrative methods with the Work Confirmation REST service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.	View Approved Supplier List by REST Service	Allows users to call the get method with the Approved Supplier List REST service.
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.	View Funds Available Balances	Allows access to view the budgetary control validation results.
Procurement REST Service	Allows users to call methods for Procurement REST services. This duty should not be given to duty, job, or abstract roles that are assigned to end users. This duty is for application to application integration similar to APPID and give access to all data.	View Work Confirmation by REST Service	Allows users to call the get method with the Work Confirmation REST service.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Access Configurator Runtime	Allows access to the Configurator Runtime
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Access HCM Common Components	Allows access to HCM common components.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Administer Orchestration Infrastructure Web Service Sourcing Rule	Allows creation and edit of external orchestration infrastructure interface connectors, which are conduits between order orchestration and external fulfillment systems.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Create Item Based Configurator Model	Allows creation of item-based models in Configurator.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Create Supplemental Configurator Model	Allows creation and duplication of supplemental models in Configurator.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Delete Configuration	Allows deletion of configuration which are not active or associated to orders

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Delete Configurator Model	Allows deletion of draft models.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Edit Configurator Model Information	Allows editing of basic attributes of models, such as name and description.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Edit Configurator UI Template Information	Allows editing of basic attributes of UI templates, such as name and description.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Edit Configurator UI Template Map Information	Allows editing of basic attributes of UI template maps, such as name and description.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Force Unlock Configurator Draft	Allows unlocking of a draft locked by any user.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Extension Archives	Allows management and deployment of Configurator extension archives.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Model Resources	Allows management of Configurator Model resources through services
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Model Structure	Allows management of supplemental structure in a model draft.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Rules	Allows management of rules in a model draft.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Supplemental Attributes	Allows management of supplemental attributes.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator UI Template Maps	Allows management of UI template maps.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator UI Templates	Allows management of UI templates.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator User Interfaces	Allows management and testing of model user interfaces.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Configurator Workspace	Allows management of workspaces and of the objects in a workspace.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Manage Snapshots	Allows importing and refreshing of snapshots of item data.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Release Configurator Workspace	Allows releasing all draft objects in a workspace, making them available in production.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Revert Draft Model to Version	Allows reverting of a draft model to a previous version.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Set Up Configurator Modeling Environment	Allows setup of the Configurator Modeling Environment.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Set Up Configurator Run Time	Allows setup of Configurator run time objects and other global settings.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Test Configurator Model	Allows testing of models. Allows saving and restoring configurations.
Product Configurator Manager	Individual responsible for the creation and maintenance of configuration models.	Test Configurator Workspace	Allows testing of the objects in a workspace. Allows saving and restoring of configurations.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Delete Bulk Record REST	Allows access to delete bulk records.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Get Import Map Rest	Allows query access to import maps through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Get Item Rule Set Rest	Allows query access to item rule sets through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Get Item Upload Rest	Allows query access to item uploads through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Get Related Item Relationship Rest	Allows query access to related item relationship through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Get Trading Partner Item Relationship Rest	Allows query access to trading partner Item relationship through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Get Trading Partner Item Rest	Allows query access to trading partner Item through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Import Item	Allows access to import items and related information.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Import Trading Community Person	Allows the import of person information. If assigning, also assign the ability to view the trading community person information.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Audit Policies	Allows to select the business object attributes to audit for Oracle Fusion Applications, and set audit levels for other Oracle products.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage File Import and Export	Privilege to manage import and export of files.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Import Map Rest	Allows full access to import maps through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Batch Rest	Allows full access to item batch through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Catalog Category Mapping	Allows management of catalog category mappings.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Change Order Status	Allows access to create and manage statuses for change orders.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Change Order Type	Allows access to create and manage change order types.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Import Map	Not Available
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Rule Set	Allows access to create and manage business rules for items.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Source System	Allows management of batch options for source systems.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Item Upload Rest	Allows full access to item uploads through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Product Management Data Upgrade	Allows access to Upgrade Product Management ESS Job.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Related Item Relationship Rest	Allows full access to related item relationship through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Source System Descriptive Flexfields	Allows the specification of additional fields to enter and track information that is not otherwise captured. Descriptive flexfields can be validated and dependent on other values entered in other areas of the page.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Community Import Lookups	Allows reviewing and defining of lookup values that provide choices related to data import batch processing, such as batch status, batch identifier, batch configuration, and process status.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Community Original System	Allows the update of original system information.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Community Source System Lookups	Allows the specification of lookup values that provide choices related to the source system model, such as original system types.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Partner Item Relationship Rest	Allows full access to trading partner item relationship through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Manage Trading Partner Item Rest	Allows full access to trading partner Item through the REST API.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Process Oracle Fusion Data Extensions for Transactional Business Intelligence	Allows a process to be run that makes Oracle Fusion data extensions available to Transactional Business Intelligence.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Refresh Material View	Allows access to refresh the material view of Product Management objects.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	Update Enterprise Application Deployment Information	Allows updating deployment information of an enterprise application.
Product Hub Administration	Administers tasks required to setup Oracle Fusion Product Hub. Duty role includes all setup duty roles available for this product and inherits setup duty roles from Oracle Fusion Product and Catalog Management.	View Audit History	Allows to view the audit history of all the business object attributes enabled for auditing.
Product Management Guided Task Exploration	Allows users to explore product management guided tasks (product management journeys).	View Global Journeys	Allows users to view global journeys. Viewing of personal journeys is not restricted by this privilege.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Manufacturer Attributes for Indexing Using REST	Allows access to manufacturer attributes that are available for indexing, using a REST service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Users	Allow access to view and select users from a lookup in Redwood.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Configure Access Control Teams, Permission Sets, and Conditions	Allows configuration of teams, permission sets, and conditions using the UI or the REST interface.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Category Rest	Allows query access to item categories through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Class Rest	Allows query access to item Classes through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Cost Rest	Allows query access to item costs through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Rest	Allows query access to items through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Search View REST	Allows query of search views.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get View Available Attribute REST	Allows access to query and view available attributes for the view.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty	Import Item	Allows access to import items and related information.

Granted Role	Granted Role Description	Privilege	Privilege Description
	role includes all setup duty roles available for this product.		
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage File Import and Export	Privilege to manage import and export of files.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Attribute Control	Allows access to manage attribute controls on item operational attributes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Change Order Status	Allows access to create and manage statuses for change orders.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Change Order Type	Allows access to create and manage change order types.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Child Value Set	Allows access to create and manage child value sets.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Class	Allows access to view and manage item classes including item class hierarchy.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Cost Rest	Allows management of item costs through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Default Functional Area	Allows access to manage default item catalog associations to functional areas.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Keyword Search Attribute	Allow management of attributes that are added to the keyword search.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Lifecycle Phase	Allows access to create and manage item lifecycle phases.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Status	Allows access to manage item statuses.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Structure Type	Allows access to manage item structure type details.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Product Management Index	Allows access to view and edit the index for an object.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Product Management View	Allows access to view and edit the view for an object.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Related Item Type	Allows access to related item types.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Search View REST	Allows access to view and manage search views.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty	Rebuild Product Management Indexes	Allow access to ESS Job PMESIndexMaintenanceJob to

Granted Role	Granted Role Description	Privilege	Privilege Description
	role includes all setup duty roles available for this product.		maintain Product Management Indexes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	View Item Class	Allows read only access to item class data.
Product Search	Manages product searches.	Access HCM Common Components	Allows access to HCM common components.
Product Search	Manages product searches.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Search	Manages product searches.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Search	Manages product searches.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Search	Manages product searches.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Product Search	Manages product searches.	Get Search View REST	Allows query of search views.
Product Search	Manages product searches.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Product Search	Manages product searches.	Manage Search View REST	Allows access to view and manage search views.
Product Search	Manages product searches.	Manage System Searches	Allows users to manage HCM system searches.
Product Search	Manages product searches.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Product Search	Manages product searches.	View Advanced Trading Partner Item Search	Allow access to search Trading Partner Items.
Product Search	Manages product searches.	View Product Management Search	Allows access to view Product Management Search.

Granted Role	Granted Role Description	Privilege	Privilege Description
Project Based Configuration for Supply Chain Management	Duty role for planning, coordinating, and supervising all activities related to Project Based Configuration for Supply Chain management.	Manage Default Expenditure Types	Allows access to Manage Default Expenditure Types
Project Based Configuration for Supply Chain Management	Duty role for planning, coordinating, and supervising all activities related to Project Based Configuration for Supply Chain management.	Manage Default Expenditure Types by Web Service	Allows access to Manage Default Expenditure Types by web service.
Project Based Configuration for Supply Chain Management	Duty role for planning, coordinating, and supervising all activities related to Project Based Configuration for Supply Chain management.	Manage Project Attribute Defaults	Allows access to Manage Project Attribute Defaults
Project Based Configuration for Supply Chain Management	Duty role for planning, coordinating, and supervising all activities related to Project Based Configuration for Supply Chain management.	Manage Project Attribute Defaults by Web Service	Allows access to Manage Project Attribute Defaults by web service.
Project Based Configuration for Supply Chain Management	Duty role for planning, coordinating, and supervising all activities related to Project Based Configuration for Supply Chain management.	Manage Project Type Cost Exclusions	Allows access to Manage Project Type Cost Exclusions
Project Based Configuration for Supply Chain Management	Duty role for planning, coordinating, and supervising all activities related to Project Based Configuration for Supply Chain management.	Manage Project Type Cost Exclusions by Web Service	Allows access to Manage Project Type Cost Exclusions by web service.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Communicate Purchase Order and Purchase Agreement	Allows a procurement agent to communicate purchasing documents to suppliers.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Derive Purchasing Attribute Values by REST Service	Allows access to purchasing REST services for deriving attribute values.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Get Item Rest	Allows query access to items through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Get Project Setups	Allows access to list of values for various Projects setup related business objects that will be consumed cross pillars using REST services or BIP reports.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Purchasing Payment Terms List of Values using REST Service	Allows access to REST services list of values for payment terms.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	Use REST Service - Workers List of Values	Allows the user to call the GET method associated with the Workers list of values REST Service.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Procurement Business Units List of Values using REST Service	Allows access to REST services list of values for procurement business units that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Procurement Buyers List of Values using REST Service	Allows access to REST services list of values for buyers that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchase Agreement	Allows a user to review a blanket or contract purchase agreement.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchase Order	Allows a user to review a purchase order.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Bill-to Business Units List of Values using REST Service	Allows access to REST services list of values for bill-to business units.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Bill-to Locations List of Values using REST Service	Allows access to REST services list of values for bill-to business locations.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Deliver-to Locations List of Values using REST Service	Allows access to REST services list of values for deliver-to locations.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Document Styles List of Values using REST Service	Allows access to REST services list of values for purchasing document

Granted Role	Granted Role Description	Privilege	Privilege Description
			styles that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Hazard Classes List of Values using REST Service	Allows access to REST services list of values for hazard classes that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Line Types List of Values by REST Service	Allows the user to call the GET method associated with the Purchasing Line Types list of values REST Service.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Master Contract List of Values using REST Service	Allows access to REST services list of values for master contract.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Ship-to Locations List of Values using REST Service	Allows access to REST services list of values for ship-to locations.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Ship-to Organizations List of Values using REST Service	Allows access to REST services list of values for ship-to organization.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Shipping Methods List of Values using REST Service	Allows access to REST services list of values for shipping method.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing Sold-to Legal Entities List of Values using REST Service	Allows access to REST services list of values for sold-to legal entities.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Purchasing UN Numbers List of Values using REST Service	Allows access to REST services list of values for UN numbers that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Requisitioning Business Units List of Values using REST Service	Allows access to REST services list of values for requisitioning business units that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Source Agreement List of Values Using REST Service	Allows access to REST services list of values for source agreement.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Subinventory List of Values by Web Service for Self Service Procurement User	Privilege to view subinventories for self service procurement users using a web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Purchasing List of Values and Attribute Defaulting REST	Allows access to purchasing REST services for deriving attribute values.	View Work Confirmation	Allows a user to review a work confirmation.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.	Configure Receiving Document Output Preferences	Allows configuration of receiving document output preferences.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.	Export Customer Account	Not Available
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.	Ingest Receiving Search Indexes	Privilege to access scheduled process to ingest data into the receiving search indexes for the responsive version of Oracle Self Service Receiving.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.	Manage Receiving Parameter	Allows configuration of receiving parameters to specify default receiving options for an inventory organization.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.	View Customer Account	Allows the viewing of customer account information.
Receiving Administration	Configures receiving parameters to specify default receiving options for an inventory organization.	View Customer Account Information	Not Available
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Clipboard	Allows you to access the clipboard across the product management work areas.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access HCM Common Components	Allows access to HCM common components.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Object Tag Set Repository	Allows access to view and manage the object tag set repository.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Object Tags Repository	Allows access to view and manage the object tag repository.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Product Management Landing Page	Allows access to view the Product Management Landing page analytics and page navigation.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Access Redwood Catalogs	Allows access to view catalogs, categories and item assignments.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	GET Product Management Index REST	Allows access to view indexed attributes.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Get Search View REST	Allows query of search views.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Manage Landing Page Layout	Allows access to create and configure KPIs and Visualizations for the Product Management landing page.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Manage Product Management Scheduled Processes	Allows manage to scheduled processes.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Manage Search Consumer Applications Rest	Allows access to view and manage Search Consumer Applications for application sets that required for picker applications.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Manage Search View REST	Allows access to view and manage search views.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Set Up Receivables Payment Terms	Create payment terms to specify the due dates, discount dates, and installment details for customer open items.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Use REST Service - Saved Searches	Allows the user to call all methods associated with the Saved Searches REST Service.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	Verify Tax Configuration	Allows verification of tax configuration for taxes that are enabled for transactions or for simulation by simulating real-time transactions.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Item Context History Report	Allows access to view the item history in the item detail page.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Item Redwood Items	Allow access to view the View Item Redwood page.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Product Management Search	Allows access to view Product Management Search.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Redwood Revision Rest	Allows access to item revisions.
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Scheduled Processes	Allows users to view scheduled processes.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Item Inquiry	Allows Sales users to access items and catalogs.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Create Sales Lead	Allows creating sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Delete Sales Lead	Allows deleting sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Export Sales Lead	Allows exporting sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Import Sales Lead	Allows importing sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Manage Lead Processing Work Area	Allows managing and processing of sales leads including import and lead assignment from the work area. A work area is the landing page for frequent tasks and reports useful for managing relevant sales leads.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Manage Lead Qualification Work Area	Allows managing sales lead qualification information to determine the sales readiness of a lead from the work area. A work area is the landing page for frequent tasks and reports useful for qualifying relevant sales leads.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Manage Sales Lead	Allows web services management of sales leads including modifying lead attributes and accepting or rejecting sales leads.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Manage Sales Lead Processing	For internal use only. Allows web services management of sales lead assignment processing.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Qualify Sales Lead	Allows qualifying sales lead information to determine the sales readiness of a lead.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Run Lead Processing Scheduler	Allows submitting sales lead assignment processing activities.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files containing business objects, such as customers and contacts, into staging tables.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Set Up File Import Object and Mapping	Allows reviewing and registering business objects, such as sales leads and opportunities, intended for import from external files. Also allows creating and maintaining maps of external source file columns to target staging table columns for use in importing those business objects, such as sales leads, customers, contacts, and sales catalogs.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	Update Sales Lead	Allows updating sales lead. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Processing	Processes sales leads including managing, importing, and assigning sales lead activities.	View Sales Lead	Allows viewing sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.	Create Sales Lead	Allows creating sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.	Identify Sales Lead	Allows identifying sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.	Manage Lead Qualification Work Area	Allows managing sales lead qualification information to determine the sales readiness of a lead from the work area. A work area is the landing page for frequent tasks and reports useful for qualifying relevant sales leads.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.	Manage Sales Lead	Allows web services management of sales leads including modifying lead attributes and accepting or rejecting sales leads.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.	Qualify Sales Lead	Allows qualifying sales lead information to determine the sales readiness of a lead.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.	Update Sales Lead	Allows updating sales lead. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Qualification	Qualifies sales leads to determine the sales readiness of the lead.	View Sales Lead	Allows viewing sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.	Create Sales Lead	Allows creating sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.	Identify Sales Lead	Allows identifying sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.	Manage Lead Qualification Work Area	Allows managing sales lead qualification information to determine the sales readiness of a lead from the work area. A work area is the landing page for frequent tasks and reports useful for qualifying relevant sales leads.
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.	Manage Sales Lead	Allows web services management of sales leads including modifying lead attributes and accepting or rejecting sales leads.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.	Qualify Sales Lead	Allows qualifying sales lead information to determine the sales readiness of a lead.
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.	Update Sales Lead	Allows updating sales lead. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Sales Lead Qualification Supervision	Qualifies sales leads to determine the sales readiness of all the leads in your reporting hierarchy.	View Sales Lead	Allows viewing sales leads. A sales lead is a prospect or existing customer who has interest or the potential for interest in a product or service being sold.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Access Shipping Custom Scheduled Processes	Privilege to access shipping custom scheduled processes.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Administer Orchestration Infrastructure Web Service Sourcing Rule	Allows creation and edit of external orchestration infrastructure interface connectors, which are conduits between order orchestration and external fulfillment systems.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Get Item Category Rest	Allows query access to item categories through the REST API.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Get Item Rest	Allows query access to items through the REST API.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage HCM Rules	Allows the user to manage HCM rules.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Packing Unit Item Assignment	Allows creation of default packing configurations to automatically pack items into packing units.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Pick Sequence Rule	Allows configuration of release sequence rules to specify the sequence for releasing order lines. Release sequence rules are used with pick wave release rules.

Granted Role	Granted Role Description	Privilege	Privilege Description
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Pick Wave Release Rule	Allows configuration of pick wave release rules to specify frequently used demand selection criteria and pick release options.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Planning Instance	Allows management of planning source system definitions and related parameters.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Ship Confirm Rule	Allows configuration of ship confirm rules to define frequently used sets of ship confirm options used for confirming shipments.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Shipping Cost Type	Allows configuration of shipping cost types to record and categorize shipping costs.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Shipping Document Job Set Rules	Privilege to manage shipping document job set rules.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Shipping Document Output Preferences	Privilege to manage shipping document output preferences.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Shipping Exception	Allows configuration of shipping exceptions to record with shipments, lines, and packing units.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Shipping Organization Parameter	Allows configuration of shipping parameters to specify default shipping options for the organization.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Trading Community Original System	Allows the update of original system information.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Trading Community Zone for Shipping	Allows configuration of shipping zones representing groupings of geographies.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Trading Community Zones	Allows managing of geographical boundaries for a specific zone use such as Tax or Shipping based on master reference geography hierarchy data.

Granted Role	Granted Role Description	Privilege	Privilege Description
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Transit Time	Allows configuration of transit times to estimate the time required to ship between an origin and destination.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	Manage Transportation Schedule	Allows configuration of transportation schedules to validate that shipments are scheduled to ship and arrive on a valid business day.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Carriers List of Values by Web Service	Allow viewing carriers list of values by web service.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Inventory Organizations List of Values by Web Service	Allow viewing inventory organizations list of values by web service.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Schedules by Web Service	Allow viewing schedules by web service.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Trading Community Common Setup	Allows viewing of common setup data through web services.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Shipping Administration	Manages all setup tasks necessary to implement and maintain Oracle Fusion Shipping.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Supplier Profile Inquiry	View supplier profile information.	Access HCM Common Components	Allows access to HCM common components.
Supplier Profile Inquiry	View supplier profile information.	Manage External Payee Payment Details	Allows management of external payee payment details.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supplier Profile Inquiry	View supplier profile information.	Manage Payment Instrument Assignment	Allows creation of payment instrument assignment
Supplier Profile Inquiry	View supplier profile information.	Manage Third Party Bank Account	Allows update of external bank accounts.
Supplier Profile Inquiry	View supplier profile information.	Run Supplier Background Scheduler	Allows internal users to automatically start scheduled ESS jobs, such as calculating supply base data, sync keyword search and update keyword search based on the frequency setting.
Supplier Profile Inquiry	View supplier profile information.	Search Supplier	Allows searching of suppliers.
Supplier Profile Inquiry	View supplier profile information.	View Location of Final Discharge	Allows view of location of final discharge.
Supplier Profile Inquiry	View supplier profile information.	View Party Fiscal Classification	Allows viewing of tax classifications used by a tax authority to categorize a party and is applicable in the tax determination process.
Supplier Profile Inquiry	View supplier profile information.	View Supplier	Allows access to the supplier profile.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Address	Allows access to supplier addresses.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Attachment	Allows access to supplier attachments.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Business Classification	Allows access to supplier business classifications.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Contact	Allows access to supplier contacts.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Contact Change Request	Allows access to supplier contact change request details.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Contact User Account	Allows access to the user account for supplier contacts.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Income Tax	Allows access to supplier income tax reporting information.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supplier Profile Inquiry	View supplier profile information.	View Supplier Payment	Allows access to supplier site payment terms and controls.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Products and Services Categories	Allows access to supplier products and services categories.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Profile Change Request	Allows access to supplier profile change request details.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Registration Bank Account	Allows access to bank account information on supplier registration requests.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Registration Request	Allows access to supplier registration request details.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Site	Allows access to supplier sites information.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Site Assignment	Allows access to supplier site assignment information.

Supplier Profile Inquiry	View supplier profile information.	View Supplier Transaction Tax	Allows access to supplier transaction tax information.
Supplier Profile Inquiry	View supplier profile information.	View Third Party Bank Account	Allows viewing of external bank accounts.
Supplier Profile Inquiry	View supplier profile information.	View Third-Party Site Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third-party site's transaction tax activities.
Supplier Profile Inquiry	View supplier profile information.	View Third-Party Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third party's transaction tax activities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supplier Profile Inquiry	View supplier profile information.	View Trading Community Common Setup	Allows viewing of common setup data through web services.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Location of Final Discharge	Allows view of location of final discharge.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Party Fiscal Classification	Allows viewing of tax classifications used by a tax authority to categorize a party and is applicable in the tax determination process.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Address as Supplier	Allows access to supplier addresses as supplier.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Business Classification as Supplier	Allows access to supplier business classifications as supplier.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Contact Change Request	Allows access to supplier contact change request details.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Contact User Account as Supplier	Allows access to the user account for supplier contacts as supplier.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Contact as Supplier	Allows access to supplier contacts as supplier.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Products and Services Categories as Supplier	Allows access to supplier products and services categories as supplier.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Profile as Supplier	Allows access to the supplier profile as supplier.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Supplier Tax Information as Supplier	Allows access to supplier tax identifiers information as supplier.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Third-Party Site Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third-party site's transaction tax activities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Third-Party Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third party's transaction tax activities.
Supplier Profile Inquiry as Supplier	Views non-bank account related supplier profile information as a supplier.	View Trading Community Common Setup	Allows viewing of common setup data through web services.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	Search Supplier Assessment	Allows users to search for a supplier assessment.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	Search Supplier Qualification	Allows users to search for a supplier qualification.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Assessment	Allows users to view a supplier assessment.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Qualification	Allows users to view a supplier qualification.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Qualification Initiative	Allows users to view a supplier qualification initiative.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Qualification Question	Allows users to view a supplier qualification question.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Access Item Where Used Data Using a REST Service	Permits access to retrieve where used data for items using REST services.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Administer Sandbox	Allows administration of all sandboxes.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain	Archive Electronic Records	Allows archiving of eligible Electronic Records in accordance with defined retention period.

Granted Role	Granted Role Description	Privilege	Privilege Description
	application users to maintain consistent application setup, rules, and access.		
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Capture Opt In Date	Allows the capture of opt-in enabled date.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Capture SCM SaaS Usage Metrics	Allow access to capture SCM SaaS usage metrics
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Configure Innovation Management UI	Allows configuration of innovation management UI
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Configure Manufacturing Data Security	Allows configuration of data security for supported business objects within Production.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Configure SCM UI	Enables the Edit Pages option on the Settings and Actions menu.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Configure Smart Operations Parameters	Allows creation and update of parameters and performance metrics for workstations
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Configure Supply Chain Collaboration UI	Allows configuration of the Supply Chain Collaboration user interface.
Supply Chain Application Administrator	Individual responsible for supply chain application administration.	Connect Fixed Asset to Operational Asset	Connects fixed asset with the corresponding maintenance asset.

Granted Role	Granted Role Description	Privilege	Privilege Description
	Collaborates with supply chain application users to maintain consistent application setup, rules, and access.		
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Convert Currency by Service	Allows start up of the Oracle Fusion General Ledger currency converter service.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Define Accounting Calendar	Allows definition of periods used to record and report accounting transactions.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Define Endpoint and Security Policy Information	Allows definition of endpoint and security policy information for an enterprise application.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Determine Transactions Requiring Electronic Signature	Allows supply chain administrator to determine the electronic signature requirement for organizations and transactions.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Edit Supply Execution Document Creation Rules	Allows editing of supply execution document creation rules.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Extract Ledger Setup Definitions	Extract ledger setup data from Oracle Fusion General Ledger to support export of ledger actual balance type balances data from Enterprise Business Suite General Ledger.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Blanket Purchase Agreement	Allows a procurement agent to run the Import Blanket Agreement concurrent program.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Purchasing Document Bypassing Approval	Allows a procurement agent to bypass approvals when importing purchase orders or purchase agreements and when creating purchase orders through the purchase order web service.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Trading Community Person	Allows the import of person information. If assigning, also assign the ability to view the trading community person information.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Import Vendor-Managed Inventory Relationships	Allows creation of vendor-managed inventory relationship data records in the Supply Chain Collaboration interface tables using a file-based data import template.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Documentation and Accounting Rules	Create, update, and correct past-dated records of the documentation and accounting rules.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Drop Ship Financial Flow	Create, update, and correct past-dated records of the drop ship financial flows.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Reports and Analytics Region	Allows selection of reports to appear in the Reports and Analytics region of Oracle Fusion Applications work areas.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Supply Chain Financial Orchestration Flow	Create, update, and correct past-dated records of the supply chain financial orchestration flows.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Maintain Transfer Pricing Rules	Create, update, and correct past-dated records of the transfer pricing rule.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Aggregation Schedules	Allows management of the schedule that is used for displaying aggregated data.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage All Application Profile Values	Allows management of all application profile option settings and values at various levels to control application behavior.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Attachment Category	Manage application attachment categories
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Attachment Entity	Manage application attachment entities
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Common Lookup	Not Available
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Data Security Policy	Allows management of security policies that restrict access to functions and data, such as preventing particular values from being accessed in a chart of account segment.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain	Manage Application Database Resource	Manage application database resources for data security

Granted Role	Granted Role Description	Privilege	Privilege Description
	consistent application setup, rules, and access.		
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Document Sequence	Manage implementation of Application Document Sequences. Document Sequences are identifiers guarenteed to be unique, time-ordered, and gapless. This is in contrast to a database sequence which (for performance purposes) may contain gaps and which might not be ordered by time of document creation. Examples would include ID numbers for traffic tickets or other legal documents where gaps in the record may trigger an investigation.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Document Sequence Category	Manage document sequence categories
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Extensible Flexfield	Manage implementation of the Extensible Flexfield feature on a given entity.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Key Flexfield	Allows management of application key flexfields.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Menu Customization	Manage application menu customizations
Supply Chain Application Administrator	Individual responsible for supply chain application administration.	Manage Application Message	Manage an end-user message, shown in the User Interface.

Granted Role	Granted Role Description	Privilege	Privilege Description
	Collaborates with supply chain application users to maintain consistent application setup, rules, and access.		Messages can have different types, such as Error, Warning, Information. Messages are translated and can be re-used across products. Exampe: "File not found", "Table '&TABLE' does not exist".
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Profile Category	Manage application profile option categories
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Profile Option	Manage Application Profile Options: Manage the level the value can be changed
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Reference Data Set	Manage Application Reference Data set. Maintain reference data set attributes.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Reference Data Set Assignment	Manage Application Reference Data Set Assignments. Create and edit reference data set assignments.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Set-Enabled Lookup	Manage sub-type entities stored in the Application Set-Enabled Lookup entity. Lookup Types are lists of values such as Days of the Week or Yes/No which can be used to validate column values.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Taxonomy	Manage hierarchical classification of Applications Taxonomy tree. A node in the Application Taxonomy Tree can be a Product Line, Product Family, Product or Logical Business Area.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Tree	Manage application trees and tree versions

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Tree Label	Manage application tree labels
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Application Tree Structure	Manage application tree structures
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Audit Policies	Allows to select the business object attributes to audit for Oracle Fusion Applications, and set audit levels for other Oracle products.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Collaboration Planners	Allows management of collaboration planners and their settings.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Collaboration Plans	Allows management of collaboration plans and their settings.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Collaboration Settings	Allows management of general collaboration settings.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Condition Event Codes	Allow the query, creation, and update of condition event codes.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain	Manage Configured Item Exceptions	Privilege to allow user to view, resubmit and discard Configured Item exception messages.

Granted Role	Granted Role Description	Privilege	Privilege Description
	consistent application setup, rules, and access.		
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Demand Collaboration	Allows configuration and management of demand collaboration.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Demand Planners	Allows management of demand collaborators and their settings.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Documentation and Accounting Rules	Create and update the documentation and accounting rules.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Drop Ship Financial Flow	Create and update the drop ship financial flows.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage External Purchase Prices Agreement Defaults	Allows to update the agreement defaults for external purchase prices
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage External Purchase Prices Mappings	Allows to update the mapping setup for importing external purchase prices
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage External Purchase Prices Selection Criteria	Allows to update the selection criteria for external purchase prices
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain	Manage Failure Sets Using User Interface	Allow the creation and update of asset failure sets.

Granted Role	Granted Role Description	Privilege	Privilege Description
	application users to maintain consistent application setup, rules, and access.		
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage HCM Extended Lookup Code	Allows management of HCM extended lookup codes.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Help Content	Allows addition, modification, and maintenance of help content.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Import of Application Attachments	Allows importing of Application Attachments.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Maintenance Resources	Allows creation and update of resources.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Maintenance Work Areas	Allows creation and update of work areas.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Maintenance Work Centers	Allows creation and update of work centers.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage My Application Profile Values	Manage My Application Profile Values. Access to manage profile values at the user level.
Supply Chain Application Administrator	Individual responsible for supply chain application administration.	Manage Orchestration Generic Web Service	Allows access to orchestration generic web services.

Granted Role	Granted Role Description	Privilege	Privilege Description
	Collaborates with supply chain application users to maintain consistent application setup, rules, and access.		
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Product Recall Parameters	Manage Product Recall Parameters
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Production Resources	Allows query, creation. and update of production resources.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Profit Center Business Unit to Party Relationship	Create and update the profit center business unit to party relationship setup.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Registration for Recall Alerts	Manage Email Registration for Recall Alerts
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Regulatory Authority for Product Recall	Manage Regulatory Authority for Product Recall
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Signal Definitions	Allows creating and updating signal definitions

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Source System Descriptive Flexfields	Allows the specification of additional fields to enter and track information that is not otherwise captured. Descriptive flexfields can be validated and dependent on other values entered in other areas of the page.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Chain Financial Orchestration Flow	Create and update the supply chain financial orchestration flows.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Chain Financial Orchestration Qualifiers	Create and update the supply chain financial orchestration qualifiers.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Chain Financial Orchestration System Options	Update the supply chain financial orchestration system options.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Data for Externally Managed Organizations as Enterprise User	Allows an enterprise user to manage supply data for externally managed organizations on behalf of the supplier.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Supply Planning Network Relationships	Allows management of relationships between ship-from, ship-to, and item combinations for critical components.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Import Lookups	Allows reviewing and defining of lookup values that provide choices related to data import batch processing, such as batch status, batch identifier, batch configuration, and process status.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Original System	Allows the update of original system information.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Original System Mapping	Allows the specification of entity associations for various source systems. For example, some source systems are configured to import customer data, whereas others are configured to import customers and contacts.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Trading Community Source System Lookups	Allows the specification of lookup values that provide choices related to the source system model, such as original system types.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Transfer Pricing Rules	Create and update the transfer pricing rules.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage VMI Analysts	Allows management of VMI Analysts and their access.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage VMI Network Relationships	Allows management of vendor-managed inventory relationships.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Work Areas	Allows query, creation, and update of work areas.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Work Centers	Allows query, creation, and update of work centers, including resource assignments, and resource capacity updates.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain	Manage Work Order Statuses	Allows creation, update and delete of work order statuses to support the setup of enterprise-specific business processes for

Granted Role	Granted Role Description	Privilege	Privilege Description
	consistent application setup, rules, and access.		manufacturing and maintenance applications.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Manage Workstations	Allows query, creation, and update of workstations.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Mass Association of Meter Templates	Allows mass creation and association of asset meters from meter templates.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Obsolete: Maintain Buy and Sell Terms	Obsolete: Not used from release 11. Create, update, and correct past-dated records of the buy and sell terms.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Obsolete: Manage Buy and Sell Terms	Obsolete: Not used from release 11. Create and update the buy and sell terms.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Obsolete: View Buy and Sell Terms	Obsolete: Not used from release 11. View the buy and sell terms.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Perform Collaboration Data Operations	Allows performing collaboration data operations such as cleaning up or purging data.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Process Supply Order Interface	Ability to schedule or run SCO Process Supply Order Interface ESS job
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain	Purge Historical Collaboration Records	Allows purging of historical collaboration records.

Granted Role	Granted Role Description	Privilege	Privilege Description
	application users to maintain consistent application setup, rules, and access.		
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge Records from Interface	Allows purge of work definition, work order and work execution interface records.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge Supplier On-Hand Quantities	Allows an administrative user to purge supplier on-hand quantities.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge VMI Replenishment Request Records	Allows an enterprise user to purge vendor-managed inventory replenishment request records.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Purge Work Definition Interface Records	Allows purge of work definition interface records.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Run Calendar Validation Report	Allows submission of the calendar validation report.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Schedule Order Forecast Decomposition	Allows execution of the scheduled process that decomposes the order forecast interface.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Up Charge Names	Allows definition and management of various landed cost charge names.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Up Reference Types	Allows definition and management of various landed cost reference types for matching landed cost charges to payables invoices.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Up Routes	Allows definition and management of routes that will be used in modeling and tracking landed cost.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Set Watchlist Options	Allows specification of the Watchlist categories and items available at the site.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Setup Product Innovation	Allows all types of setup and configuration related to product innovation
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Setup Product Quality	Allows users to setup and configure product quality.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Synchronize Subscription Products and Installed Base Assets	Synchronizes subscription product changes to their corresponding installed asset records.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Transfer Receipts to Mass Additions	Allows transfer of receiving information to mass additions in fixed assets.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Units of Measure Picker	Allows access to units of measure picker.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	Update Enterprise Application Deployment Information	Allows updating deployment information of an enterprise application.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	View Accounting Calendar	Allows view access to existing groupings of accounting periods.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	View Administration Link	Privilege to view administration link in UI shell
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	View Audit History	Allows to view the audit history of all the business object attributes enabled for auditing.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	View Condition Event Codes	Allow the query and view of condition events codes.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain consistent application setup, rules, and access.	View Customer Account Site	Allows the viewing of the customer account site information.
Supply Chain Application Administrator	Individual responsible for supply chain application administration. Collaborates with supply chain application users to maintain	View Customer Account Site Use	Allows the viewing of the customer account site use information.

Trading Partner B2B Administrator	Trading partner (Supplier or Customer) responsible for accessing self service tools and who is given delegated user administration responsibilities.	Access Intelligent Agent Chat	Allows access to the intelligent agent chat component.
Trading Partner B2B Administrator	Allows trading partners (suppliers or customers) to access self-service messages.	Invoke Collaboration Message Inbound Service	Allow access to invoke inbound service.
Trading Partner B2B Administrator	Trading partner (Supplier or Customer) responsible for accessing self service tools and who is given delegated user administration responsibilities.	Invoke Collaboration Message Inbound Service	Allow access to invoke inbound service.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	Manage Unit of Measure Lot Conversions and Their History	Allows specifying lot-specific UOM conversions between primary and secondary classes, and viewing the lot conversions over time.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	Manage Units Of Measure by Web Service	Allow managing units of measure by web service.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	Manage Units of Measure Profiles	Allow access to manage units of measure profiles.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard,	Manage Units of Measure and Standard Conversions	Allows configuration of UOMs and definition of standard conversions.

Granted Role	Granted Role Description	Privilege	Privilege Description
	interclass, and intraclass UOM conversions.		
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	Manage Units of Measure for Interclass Conversion	Allow access to manage units of measure for interclass conversion.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	Manage Units of Measure for Intraclass Conversion	Allow access to manage units of measure for intraclass conversion.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	Review Unit of Measure Conversion	Allows review of unit of measure conversions.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	View Unit Of Measure Conversion List of Values by Web Service	Allow viewing unit of measure conversion list of values by web service.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	View Unit of Measure Lot Conversions and History	Allows viewing of lot specific UOM conversions between primary and secondary classes, and of the lot conversions over time.
Unit of Measure Management	Configures UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Access HCM Common Components	Allows access to HCM common components.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Generate Access Token	Allows the generation of access token for smart spreadsheets.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Import Map Rest	Allows query access to import maps through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Item Batch Rest	Allows query access to item batch through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Item Rest	Allows query access to items through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Get Search View REST	Allows query of search views.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Import Item	Allows access to import items and related information.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Import Map Rest	Allows full access to import maps through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Item Batch	Allows management of item batches to import items and related data.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Item Batch Rest	Allows full access to item batch through the REST API.
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Item Import Map	Not Available
Update Item Attributes Guided Task Flow	Allows user to create, configure, perform and view the Update Item Attribute Guided Tasks flow.	Manage Search View REST	Allows access to view and manage search views.
View Item Redwood	Allows users to view item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
View Item Redwood	Allows users to view item details.	View Item Context History Report	Allows access to view the item history in the item detail page.
View Item Redwood	Allows users to view item details.	View Item Redwood Associations	Allow access to view the item associations tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Attachments	Allow access to view the attachment tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Changes	Allow access to view the item changes tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Item Categories	Allow access to view the item category tab in the View Item Redwood page.

Granted Role	Granted Role Description	Privilege	Privilege Description
View Item Redwood	Allows users to view item details.	View Item Redwood Items	Allow access to view the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Quality	Allow access to view the quality tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Relationships	Allow access to view the relationships tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Item Redwood Structures	Allow access to view the item structures tab in the View Item Redwood page.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Associations	Allows access to view Redwood item supplier associations for which the user has at the minimum view privilege.
View Item Redwood	Allows users to view item details.	View Redwood Item Supplier Assoiciation Rest	Allows Redwood Rest services response to get requests for supplier associations for items.
View Item Redwood	Allows users to view item details.	View Redwood Revision Rest	Allows access to item revisions.
View Item Redwood	Allows users to view item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
View Item Redwood	Allows users to view item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
View Item Redwood	Allows users to view item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Access Financial Orchestration Process Services	Access various service calls during the supply chain financial orchestration process.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to	Access Shipping Custom Scheduled Processes	Privilege to access shipping custom scheduled processes.

Granted Role	Granted Role Description	Privilege	Privilege Description
	help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Add Electronic Signatures	Allows inline addition of electronic signatures while creating or editing transactions or setups.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Allocate Estimated Charges	Allows automatic allocation of landed cost charges to purchase orders.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Apply Document Job Set Rules and Output Preferences	Privilege to apply document job set rules and output preferences.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Approve Transactions	Allows ability to approve transactions
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Attach Shipping Documents to Shipment	Privilege to attach shipping documents to a shipment.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage	Cancel Funds Capture Authorization	Gives access to Service to Cancel Funds Capture Authorization

Granted Role	Granted Role Description	Privilege	Privilege Description
	applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Capture Charge References	Allows capture of unique charge reference numbers which are typically business document numbers.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Check Item Reference for Deletion by Web Service	Allows access to the Web service to check item references prior to allowing deletion of the item.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Check Item and Item Structure References in Manufacturing for Delete	Allows check for item or item structure references in Manufacturing before an item can be deleted.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Check Item on Procurement Document for Delete by Web Service	Allows the item deletion web service to check if an item to be deleted is on a procurement document.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Commit to Order Forecasts by Web Service	Allows forecast commit to order forecasts using the Commit Response web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Configure Inventory Striping Attributes	Allows configuration or inventory striping attributes such as lot grade and lot expiration date and assignment of applicability levels and values.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Configure Sales Forecasting Management UI	Grants access to use Page Composer to configure task flows in Sales Forecasting Management, where available.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Convert Currency by Service	Allows start up of the Oracle Fusion General Ledger currency converter service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Copy Funds Capture Transaction Extension	Gives access to Service to Copy Funds Capture Transaction Extension
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Create Cost Distributions	Allows creation of cost distributions.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Create Funds Capture Authorization	Gives access to Service to Create Funds Capture Authorization
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Create Funds Capture Return	Gives access to Service to Create Funds Capture Return

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Create Payables Invoice by Web Service	Allows creation of Oracle Fusion Payables invoices.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Create Task Layer Service	Generate the financial orchestration tasks.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Define Sales Forecast	Allows viewing, editing and submitting of forecasting setup parameters and scheduled forecasts.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Delete Funds Capture Transaction Extension	Gives access to Service to Delete Funds Capture Transaction Extension
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Dispense Materials to Work Orders	Allows review and dispensing of materials to work orders.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Edit Characteristics	Ability to create, update and delete inspection characteristics.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access	Enter Purchase Order Charge Estimates	Allows capture of landed cost charge estimates for purchase orders.

Granted Role	Granted Role Description	Privilege	Privilege Description
	control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Enter Trading Community Organization Information	Allows the specification of organization information.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Enter Trading Community Person	Allows the specification of person information. If assigning, also assign the ability to view the trading community person.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Execute Order Forecast Orchestration Web Services	Allows execution of order forecast orchestration services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Export Customer Account	Not Available
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Export Customer Account Contact	Allows the export of customer account contact information.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service	Export Customer Account Relationship	Allows the export of customer account contact relationship information.

Granted Role	Granted Role Description	Privilege	Privilege Description
	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Export Trading Community Organization Relationship	Allows the export of organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Export Trading Community Person Relationship	Allows the export of person relationship information. If assigning, also assign the ability to view the trading community person relationship.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Generate Electronic Records with Signature Details	Allows generation of electronic records for supply chain transactions with electronic signature details.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Get Drop Ship Requisition BU	Get the requisitioning business unit to create a drop shipment purchase order.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Get Financial Orchestration Flow for Costing	Get the financial orchestration flow information web service used by cost management to retrieve the financial orchestration flow information for inventory transactions like transfer order shipment, sales order shipment and so on.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Get Invoice Status for Inter Organization Transactions	Get the invoice status details for inter organization transactions. This privilege will be used by the globalization team when compiling intrastate reports.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Import Approved Requisition	Allows users to create approved requisitions through the requisition import program.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Import Order	Allows the end user to import orders into the Order Management application.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Import Requisition	Allows users to import requisitions through batch program.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Import Work Orders	Allows import of work orders. Also allows correction of import validation errors, using a spreadsheet.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Load Electronic Fiscal Document	Not Available
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Load File to Interface	Allows file data load to interface tables
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access	Load Interface File for Import	Allows a user to load interface file for import

Granted Role	Granted Role Description	Privilege	Privilege Description
	control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Charge Invoice Associations	Allows association of charge invoice lines with landed cost trade operation charges
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Charge Templates	Allows definition of landed cost charge templates which can be used to default charges.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Collaboration Message Definitions by Web Service	Allow access to manage collaboration message definitions by web service
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Collaboration Order Forecasts using a Web Service	Allows management of collaboration order forecasts using a web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Configure to Order Web Services	Privilege to allow user to run Configure to Order related web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service	Manage Contract Item Deletion	Allows Oracle Fusion Inventory Management to determine through a Web service if an item is currently being used in a contract. If it is not, then the item can be deleted from inventory.

Granted Role	Granted Role Description	Privilege	Privilege Description
	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Cost Period	Allows management of cost periods.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Customer Assets by Service	Allows creation and update of customer assets, related configurations and structures.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Customer Demand Using a Web Service	Allows management of customer demand using a web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Dispense Areas	Allows querying, creating, and updating dispense areas.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Dispense Rules	Allows querying, creating, and updating dispense rules.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage E-mail Notifications	Allows the ability to send event notifications through e-mail

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Estimates Using Web Service	Allows the user to manage estimates using a service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage External Payer Payment Details	Allows management of payer payment details.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage External Purchase Prices	Allows to view, update bad delete external purchase prices and its change orders
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage File Import and Export	Privilege to manage import and export of files.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Funds Capture Payment Method	Allows management of funds capture payment methods.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage HCM Data Role	Allows management of HCM data roles and assignment of security profiles to those roles.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access	Manage Inventory Consumption Rule	Allows configuration of consigned inventory consumption rules.

Granted Role	Granted Role Description	Privilege	Privilege Description
	control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Inventory Reservation Web Service	Allows access to the reservations Web service to create, edit, and delete reservations.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Inventory Transfer Order	Allows management of inventory transfer orders.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Item Class	Allows access to view and manage item classes including item class hierarchy.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Item Organization	Allows access to manage organization parameters for item organizations.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Item Transaction Defaults	Allows configuration of item transaction defaults to define default subinventories and locators for items for shipping, receiving, and movement request transactions.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service	Manage Maintenance Exceptions	Allows creation, update and query of maintenance exceptions.

Granted Role	Granted Role Description	Privilege	Privilege Description
	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Maintenance Work Orders	Allows creation of work orders and update of work order header and general information, except status update for closing a work order.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Meter Reading History by Service	Allows the management of meter reading history using a service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Meters by Service	Allow the creation and update of meters using a service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage New Item Request	Allows access to manage new item requests.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Generic Web Service	Allows access to orchestration generic web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Activity Interface Web Service	Allows access to orchestration order activity interface Web services.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Fulfillment Interface Web Service	Allows access to orchestration order fulfillment interface Web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Modification	Allows management of change orders.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Purchasing Interface Web Service	Allows access to Web services that communicate information between the purchasing application and the order orchestration function.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Receiving Interface Web Service	Allows access to orchestration order receiving interface Web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Shipping Interface Web Service	Allows access to orchestration order shipping interface Web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Template Interface Web Service	Allows access to orchestration order template interface Web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access	Manage Orchestration Order Trade Compliance Interface Web Service	Allows access to web service interface to orchestrate sales orders for trade compliance.

Granted Role	Granted Role Description	Privilege	Privilege Description
	control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Orchestration Order Workbench Web Service	Allows access to orchestration order workbench Web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Order Details Web Service	Allows access to the Web service that provides details about the mapping between shipment fulfillment lines and billing fulfillment lines.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Order Orchestration Composite Generator Service	Allows access to order orchestration composite generator services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Order Orchestration Decomposition Web Service	Allows access to order orchestration decomposition Web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Order Orchestration Setup Web Service	Allows access to order orchestration setup web services.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service	Manage Payables Financials Option	Allows selection and maintenance of common options used by Oracle Fusion Payables and Oracle Fusion Procurement.

Granted Role	Granted Role Description	Privilege	Privilege Description
	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Payment Terms	Allows definition and maintenance of Oracle Fusion Payables payment terms used by an organization.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Product Eligibility Rules	Allows management of eligibility rules for products.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Product Groups	Allows management of product groups and their attributes, lookups, mapping, profile options, templates and usages.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Production Exceptions	Allows query, create, update, and review of production exceptions.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Purchase Request by Web Service	Allows management of purchase requests using web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Quality Issue	Allows users to create and update a quality issue.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Receiving Receipt Advice Web Service	Allows management of receipt advices through Web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Shipment Web Service	Allows access to Web service to manage shipments.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Snapshots	Allows importing and refreshing of snapshots of item data.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Subinventory and Locator	Allows configuration of subinventories and locators to identify material storage locations for items within an inventory organization.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Supply Data for Externally Managed Organizations Using a Web Service	Allows management of supply data for externally managed organizations by using a web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access	Manage Supply Orchestration Web Services	Privilege to allow user to run Supply Orchestration related web services.

Granted Role	Granted Role Description	Privilege	Privilege Description
	control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Trade Operation Templates	Allows definition of landed cost trade operation templates which can be used to default trade operations including charges.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Trade Operations	Allows definition and management of landed cost trade operation.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage User Details	Allows management of user account information.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Web Service Interface to Transportation Data for Sales Order	Allows access to web services that communicate information between the transportation planning application and order orchestration.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Work Definitions	Allows query, creation, update and delete of work definitions, related priorities, and versions, including managing work definitions in spreadsheets.

Granted Role	Granted Role Description	Privilege	Privilege Description
	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Manage Work Order Headers	Allows creation of work orders and update of work order header and general information.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Print Electronic Production Records	Allows generation of electronic production records for work orders.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Print Electronic Records	Allows printing of electronic records.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Print Shipping Reports	Allows printing of shipping reports including bill of lading, commercial invoice, mailing label, and packing slip reports.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Print Shipping Reports for Portugal	Allows printing of shipping reports for Portugal including bill of lading, commercial invoice, and packing slip reports.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Print Work Definition Report	Allows printing of work definitions and their operations, items, and resources requirements to manufacture a product or range of products.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Process Expired Credit Authorizations	Process open credit authorizations that have passed the expiration date.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Process Funds Capture Transaction	Process Funds Capture Authorization
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Process Product Genealogy Transactions	Allows processing of genealogy transactions from source applications, such as manufacturing, receiving.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Process Shipment Request Web Service	Allows access to Web service to process shipment requests.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Provide Inbound Shipment Details Web Service	Allows inbound shipment details to be provided using a web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Provide Inventory Completed Transaction Details Web Service	Allows inventory completed transaction details to be provided using a web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access	Provide Item Cost	Allows retrieval of item costs.

Granted Role	Granted Role Description	Privilege	Privilege Description
	control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Provide Receipt Details Web Service	Allows receipt details to be provided using a web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Provide Receiving Transaction Details Web Service	Allows receiving transaction details to be provided using a web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Provide Trade Events Interface Service	Allows sending of trade events to cost management.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Recall Management Console Inquiry	Inquire Recall Notice Console and view recall notice headers, lines, traceability details, task details and disposition details
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Receive Receiving Receipt Confirmation Web Service	Allows receiving a receipt confirmation through Web Service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Record Meter Readings by Service	Allows the recording of meter readings using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Release Paused Tasks External Web Service	Allows access to a public Web service that can be used to release paused tasks.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Review Landed Cost Purchase Orders	Allows viewing of purchase orders that are related to landed cost.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Run CRM Export Process	This privilege would grant a user the ability to schedule CRM object to export to a file
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Run HCM Transaction Management Notification Duplicate Service	Allows to discover if a notification for this action has already been sent to this user to avoid sending duplicate notifications.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Run Sales Forecast Jobs	Allows running of the various background jobs including Forecast Generation, Participant Forecast Generator, Periodic Refresh, and Due Date Check.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Customer Account Relationships	Allows the search of customer account relationships. If assigning, also assign the ability to view the customer account relationship.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Customer Account Site	Allows the search of customer account sites. If assigning, also assign the ability to view the customer account site.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Purchase Request by Web Service	Allows searching for purchase requests using the web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Shipment Line Web Service	Allows access to Web service to search shipment lines.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Trading Community Organization	Allows the search of organizations. If assigning, also assign the ability to view the trading community organization.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Trading Community Organization Additional Identifier	Not Available
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Trading Community Organization Additional Name	Not Available

Search Trading Community Person Contact Point	Not Available
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Search Trading Community Person Relationship	Allows the search of person relationships. If assigning, also assign the ability to view the trading community person relationship.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Send Receiving Receipt Advice Web Service	Allows sending a receipt advice through Web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Send Shipment Advice	Allows sending shipment advice and intermediate shipment status updates.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Set Funds Capture Transaction Extension Details	Gives access to Service to Set Funds Capture Transaction Extension Details
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Set Up CRM Objects for Export	This privilege would grant a user the ability to register CRM objects for Export
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Set Up Sales Competitor	Allows setup and management of competitors features, such as strength and weakness attributes and threat level.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Set Up Sales Note	Controls the setup of sales notes
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Set Up Sales Resource Organization	Allows setup of sales resource organization.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Set Up Sales Task	Controls the setup of sales tasks
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access	Submit AutoInvoice Web Service	Transfer transactions from other systems into Receivables.

Granted Role	Granted Role Description	Privilege	Privilege Description
	control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Submit Receivables Automatic Receipt Creation Process	Submit the Create Automatic Receipt Batch to create an automatic receipt batch.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Submit Receiving Transaction Manager	Allows submission of receiving transaction manager.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Submit Receiving Transaction Manager Web Service	Allows submission of receiving transaction manager web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Synchronize Work Orders to IoT	Allows synchronization of work orders including operations and resources in bulk to IoT production monitoring cloud, using a scheduled process.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Transfer File	Allows management of file transfer from server
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service	Transfer Financial Orchestration Task Layer Status	Update financial orchestration task statuses and details to supply chain financial orchestration.

Granted Role	Granted Role Description	Privilege	Privilege Description
	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Update Approval Status for Channel Entity using Web Service	Allows the updation of the approval status for channel entities using web service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Update Orchestration Order Fulfillment Line Web Service	Allows access to Web services that update the fulfillment line that is associated with the orchestration order.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Update Trading Community Organization	Allows the update of the organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Update Trading Community Person	Allows the update of person information. If assigning, also assign the ability to view the trading community person.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Use LDAP Request Service	Allows the LDAP Request service to be called
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Use People Core Maintain LDAP Data Service	Allows the People Core Maintain LDAP Data Service to be called

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	Use User Details Service	Allows viewing of person details for person synchronization.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Administration Link	Privilege to view administration link in UI shell
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Characteristics	Ability to view inspection characteristics.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Customer Account	Allows the viewing of customer account information.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Customer Account Contact	Allows the viewing of customer account contact information.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Customer Account Contact Responsibility	Allows the viewing of customer account contact information.

	oriented architecture technology stack.		
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Maintainable Assets by Service	Allows the retrieval of maintainable asset details using a service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Maintenance Work Orders by Service	Allows the retrieval of work orders using a service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Meter Reading History by Service	Allow the query and view of meter reading history using a service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Meters by Service	Allow the query and view of meters using a service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Order Forecasts by Web Service	Allows receipt of order forecasts using the Get Forecasts Web Service.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Party Fiscal Classification	Allows viewing of tax classifications used by a tax authority to categorize a party and is applicable in the tax determination process.

Granted Role	Granted Role Description	Privilege	Privilege Description
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Sales Forecast for Subordinates	Allows managing of all sales forecast items for all territories they own, or where they are delegated forecasting responsibility and for any subordinate territories. Also includes all forecast items assigned to child territories and to territories previously owned that are part of an active forecast.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Scanned Payables Invoices	Allows viewing of scanned invoices.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Supply Chain Financial Orchestration System Options	View the supply chain financial orchestration system options.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Third-Party Site Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third-party site's transaction tax activities.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Third-Party Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third party's transaction tax activities.
Web Services Application Identity for SCM	Identifies roles with elevated access aimed at developers to help achieve code based access control that is beyond the access of the current operator to manage applications using the service oriented architecture technology stack.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Supply Chain Application Administrator job role.

Business Object	Policy Description	Policy Store Implementation
ABC Assignment Group	A Supply Chain Application Administrator can manage abc assignment group for the inventory organizations in which they can operate	Role: Inventory ABC Analysis Privilege: Manage ABC Assignment Group (Data) Resource: Inventory Organization Parameter

Business Object	Policy Description	Policy Store Implementation
ABC Class	A Supply Chain Application Administrator can manage abc class for the inventory organizations in which they can operate	Role: Inventory ABC Analysis Privilege: Manage ABC Class (Data) Resource: Inventory Organization Parameter
ABC Classification Set Header	A Supply Chain Application Administrator can manage abc classification set header for the inventory organizations in which they can operate	Role: Inventory ABC Analysis Privilege: Manage ABC Classification Set Header (Data) Resource: Inventory Organization Parameter
AI Agent	A Supply Chain Application Administrator can manage ai agent for scm ai agents	Role: SCM Intelligent Agent Management Duty Privilege: Manage AI Agent (Data) Resource: AI Agent
AI Agent	A Supply Chain Application Administrator can view ai agent for financials ai agents	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent (Data) Resource: AI Agent
AI Agent	A Supply Chain Application Administrator can view ai agent for scm ai agents	Role: SCM Intelligent Agent Management Duty Privilege: View AI Agent (Data) Resource: AI Agent
AI Agent Business Object	A Supply Chain Application Administrator can view ai agent business object for scm ai agent business objects	Role: SCM Intelligent Agent Management Duty Privilege: View AI Agent Business Object (Data) Resource: AI Agent Business Object
AI Agent Deep Link	A Supply Chain Application Administrator can view ai agent deep link for scm ai agent deep links	Role: SCM Intelligent Agent Management Duty Privilege: View AI Agent Deep Link (Data) Resource: AI Agent Deep Link
AI Agent Tool	A Supply Chain Application Administrator can manage ai agent tool for scm ai agent tools	Role: SCM Intelligent Agent Management Duty Privilege: Manage AI Agent Tool (Data) Resource: AI Agent Tool
AI Agent Tool	A Supply Chain Application Administrator can view ai agent tool for financials ai agent tools	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent Tool (Data) Resource: AI Agent Tool

Business Object	Policy Description	Policy Store Implementation
AI Agent Tool	A Supply Chain Application Administrator can view ai agent tool for scm ai agent tools	Role: SCM Intelligent Agent Management Duty Privilege: View AI Agent Tool (Data) Resource: AI Agent Tool
AI Agent Topic	A Supply Chain Application Administrator can manage ai agent topic for scm ai agent topics	Role: SCM Intelligent Agent Management Duty Privilege: Manage AI Agent Topic (Data) Resource: AI Agent Topic
AI Agent Topic	A Supply Chain Application Administrator can view ai agent topic for scm ai agent topics	Role: SCM Intelligent Agent Management Duty Privilege: View AI Agent Topic (Data) Resource: AI Agent Topic
AI Agent Workflow	A Supply Chain Application Administrator can manage ai agent workflow for scm ai agent workflows	Role: SCM Intelligent Agent Management Duty Privilege: Manage AI Agent Workflow (Data) Resource: AI Agent Workflow
AI Agent Workflow	A Supply Chain Application Administrator can view ai agent workflow for financials ai agent workflows	Role: Financials Intelligent Agent Runtime Privilege: View AI Agent Workflow (Data) Resource: AI Agent Workflow
AI Agent Workflow	A Supply Chain Application Administrator can view ai agent workflow for scm ai agent workflows	Role: SCM Intelligent Agent Management Duty Privilege: View AI Agent Workflow (Data) Resource: AI Agent Workflow
Activity	A Supply Chain Application Administrator can view activity for all activities in the enterprise	Role: Contract Management Across All Contracts Web Service Privilege: View Activity (Data) Resource: Activity
Application Attachment	A Supply Chain Application Administrator can delete application attachment for all procurement attachment categories	Role: Procurement REST Service Privilege: Delete Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can delete application attachment for the purchase document categories including document, from supplier, miscellaneous, to supplier, to buyer, to	Role: Web Services Application Identity for SCM Privilege: Delete Application Attachment

Business Object	Policy Description	Policy Store Implementation
	receiver, to approver, to payables, and internal to purchasing	Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for all procurement attachment categories	Role: Procurement REST Service Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for the purchase document categories including document, from supplier, miscellaneous, to supplier, to buyer, to receiver, to approver, to payables, and internal to purchasing	Role: Contract Management Across All Contracts Web Service Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for the purchase document categories including document, from supplier, miscellaneous, to supplier, to buyer, to receiver, to approver, to payables, and internal to purchasing	Role: Web Services Application Identity for SCM Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for the supplier assessment categories including internal to supplier qualification, miscellaneous	Role: B2B Administrator Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for the supplier assessment categories including internal to supplier qualification, miscellaneous	Role: Supplier Profile Inquiry Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for the supplier assessment categories including internal to supplier qualification, miscellaneous	Role: Web Services Application Identity for SCM Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for the supplier categories from supplier, miscellaneous, and to supplier	Role: B2B Administrator Privilege: Read Application Attachment Resource: Application Attachment
Application Attachment	A Supply Chain Application Administrator can read application attachment for the supplier categories from supplier, miscellaneous, and to supplier	Role: Web Services Application Identity for SCM Privilege: Read Application Attachment Resource: Application Attachment

Business Object	Policy Description	Policy Store Implementation

Business Object	Policy Description	Policy Store Implementation
		Resource: Application Attachment Category
Application Attachment Category	A Supply Chain Application Administrator can update application attachment for all miscelleneous category attachments data	Role: Geography Administration Privilege: Update Application Attachment Resource: Application Attachment Category
Application Attachment Category	A Supply Chain Application Administrator can update application attachment for all miscelleneous category attachments data	Role: Sales Lead Processing Privilege: Update Application Attachment Resource: Application Attachment Category
Application Attachment Entity	A Supply Chain Application Administrator can manage application attachment entity for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Attachment Entity (Data) Resource: Application Attachment Entity
Application Descriptive Flexfield	A Supply Chain Application Administrator can manage application descriptive flexfield for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Descriptive Flexfield (Data) Resource: Application Descriptive Flexfield
Application Document Sequence	A Supply Chain Application Administrator can manage application document sequence for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Document Sequence (Data) Resource: Application Document Sequence
Application Document Sequence Category	A Supply Chain Application Administrator can manage application document sequence category for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Document Sequence Category (Data) Resource: Application Document Sequence Category
Application Flexfield Value Set	A Supply Chain Application Administrator can manage application flexfield value set for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Flexfield Value Set (Data) Resource: Application Flexfield Value Set
Application Key Flexfield	A Supply Chain Application Administrator can manage application key flexfield for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Key Flexfield (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Application Key Flexfield
Application Lookup Type	A Supply Chain Application Administrator can delete application lookup type for all scm applications data	Role: Supply Chain Application Administrator Privilege: Delete Application Lookup Types (Data) Resource: Application Lookup Type
Application Lookup Type	A Supply Chain Application Administrator can update application lookup type for all scm applications data	Role: Supply Chain Application Administrator Privilege: Update Application Lookup Types (Data) Resource: Application Lookup Type
Application Message	A Supply Chain Application Administrator can delete application message for all scm applications data	Role: Supply Chain Application Administrator Privilege: Delete Application Message (Data) Resource: Application Message
Application Message	A Supply Chain Application Administrator can update application message for all scm applications data	Role: Supply Chain Application Administrator Privilege: Update Application Message (Data) Resource: Application Message
Application Objects	A Supply Chain Application Administrator can manage application objects for all applications common objects	Role: Supply Chain Application Administrator Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for all customer relationship management application objects	Role: Item Management Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for all customer relationship management application objects	Role: Supply Chain Application Administrator Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for all financial supply chain manufacturing application objects	Role: Enterprise Structures Administration Privilege: Manage Application Objects (Data) Resource: Application Objects

Business Object	Policy Description	Policy Store Implementation
Application Objects	A Supply Chain Application Administrator can manage application objects for all financial supply chain manufacturing application objects	Role: Supply Chain Application Administrator Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for all human capital management application objects	Role: Supply Chain Application Administrator Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for all value chain planning application objects	Role: Planning Administration Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for the item classes they have access to	Role: Product Model Administration Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for the items they have access to in item and inventory organizations	Role: Product Model Administration Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for the journey application object	Role: Manage Guided Journeys Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for the journey category application object	Role: Use REST Service - Journey Categories Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for the journey, journey category and worker journey application objects	Role: Use REST Service - Journey Templates Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Application Administrator can manage application objects for the quality issues they have access to	Role: Web Services Application Identity for SCM Privilege: Manage Application Objects (Data) Resource: Application Objects

Business Object	Policy Description	Policy Store Implementation
Application Profile Category	A Supply Chain Application Administrator can delete application profile category for all scm applications data	Role: Supply Chain Application Administrator Privilege: Delete Application Profile Category (Data) Resource: Application Profile Category
Application Profile Category	A Supply Chain Application Administrator can update application profile category for all scm applications data	Role: Supply Chain Application Administrator Privilege: Update Application Profile Category (Data) Resource: Application Profile Category
Application Profile Option	A Supply Chain Application Administrator can delete application profile option for all scm applications data	Role: Supply Chain Application Administrator Privilege: Delete Application Profile Option (Data) Resource: Application Profile Option
Application Profile Option	A Supply Chain Application Administrator can update application profile option for all scm applications data	Role: Supply Chain Application Administrator Privilege: Update Application Profile Option (Data) Resource: Application Profile Option
Application Profile Value	A Supply Chain Application Administrator can delete application profile value for all scm applications data	Role: Supply Chain Application Administrator Privilege: Delete Application Profile Value (Data) Resource: Application Profile Value
Application Profile Value	A Supply Chain Application Administrator can update application profile value for all scm applications data	Role: Supply Chain Application Administrator Privilege: Update Application Profile Value (Data) Resource: Application Profile Value
Application Taxonomy	A Supply Chain Application Administrator can delete application taxonomy for all scm applications data	Role: Supply Chain Application Administrator Privilege: Delete Application Taxonomy (Data) Resource: Application Taxonomy
Application Taxonomy	A Supply Chain Application Administrator can update application taxonomy for all scm applications data	Role: Supply Chain Application Administrator Privilege: Update Application Taxonomy (Data) Resource: Application Taxonomy

Business Object	Policy Description	Policy Store Implementation
Application Tree	A Supply Chain Application Administrator can manage application tree for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Tree (Data) Resource: Application Tree
Application Tree Label	A Supply Chain Application Administrator can manage application tree label for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Tree Label (Data) Resource: Application Tree Label
Application Tree Structure	A Supply Chain Application Administrator can manage application tree structure for all scm applications data	Role: Supply Chain Application Administrator Privilege: Manage Application Tree Structure (Data) Resource: Application Tree Structure
Business Unit	A Supply Chain Application Administrator can choose business unit for business units in their organization security profile	Role: Supply Chain Application Administrator Privilege: Choose Business Unit Organization (Data) Resource: Business Unit
Channel Adjustment Type	A Supply Chain Application Administrator can manage channel adjustment type for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Adjustment Type (Data) Resource: Reference Data Set
Channel Claim	A Supply Chain Application Administrator can manage channel claim for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Claims (Data) Resource: Business Unit
Channel Claim	A Supply Chain Application Administrator can manage channel claims for the business units for which they are authorized	Role: Channel Operations Privilege: Manage Channel Claims (Data) Resource: Business Unit
Channel Claim Reason Code	A Supply Chain Application Administrator can manage channel claim reason for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Claim Reason (Data) Resource: Reference Data Set
Channel Claim Source Mapping	A Supply Chain Application Administrator can manage channel claim source mapping for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Claim Source Mapping (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Reference Data Set
Channel Claim Type	A Supply Chain Application Administrator can manage channel claim type for the reference data sets they administer	Role: Channel Administration Privilege: Manage Channel Claim Type (Data) Resource: Reference Data Set
Channel Claim Type Business Unit Mapping	A Supply Chain Application Administrator can manage channel claim type business unit mapping for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Claim Type Business Unit Mapping (Data) Resource: Business Unit
Channel Program	A Supply Chain Application Administrator can manage channel program for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Programs (Data) Resource: Business Unit
Channel Program	A Supply Chain Application Administrator can manage channel programs for the business units for which they are authorized	Role: Channel Operations Privilege: Manage Channel Programs (Data) Resource: Business Unit
Channel Setting	A Supply Chain Application Administrator can manage channel setting for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Channel Setting (Data) Resource: Business Unit
Charge Reference Type	A Supply Chain Application Administrator can manage charge reference type for the reference data sets they administer	Role: Supply Chain Application Administrator Privilege: Manage Charge Reference Type (Data) Resource: Reference Data Set
Charge Reference Type	A Supply Chain Application Administrator can view charge reference type for the reference data sets they administer	Role: Web Services Application Identity for SCM Privilege: View Charge Reference Type (Data) Resource: Reference Data Set
Classification Code File Import Activity	A Supply Chain Application Administrator can view classification code file import activity object type for all classification code file import activities of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Activity Object Type (Data) Resource: Classification Code File Import Activity

Business Object	Policy Description	Policy Store Implementation
Classification Code File Import Mapping	A Supply Chain Application Administrator can view classification code file import mapping object type for all classification code file import mappings of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Mapping Object Type (Data) Resource: Classification Code File Import Mapping
Classification Code File Import Object	A Supply Chain Application Administrator can view classification code file import object type for all classification code file import objects of object type 'classification code'	Role: Trading Community Import Batch Management Privilege: View Classification Code File Import Object Type (Data) Resource: Classification Code File Import Object
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type ack_rejected_invoice_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type acknowledge_forecast_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type cancel_po_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_rcv_adv_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type ack_rcv_adv_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the	Role: B2B Administrator

Business Object	Policy Description	Policy Store Implementation
	collaboration document of document type acknowledge_change_po_in	Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type acknowledge_change_po_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type acknowledge_invoice_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type acknowledge_po_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type acknowledge_po_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type ap_intl_invoice_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type ap_invoice_status_report_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type ar_invoice_status_report_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header

Business Object	Policy Description	Policy Store Implementation
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type br_cteos_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type cancel_br_cte_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type cancel_br_nfe_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type cancel_po_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type change_po_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type change_po_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type generic_document	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process confirm message receipt inbound	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header

Business Object	Policy Description	Policy Store Implementation
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process invoice outbound	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_br_cte_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_br_nf3e_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_br_nfcom_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_br_nfe_confirmation_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_br_nfe_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_br_nfse_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_credit_note_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_forecast_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_forecast_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_invoice_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_po_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_po_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_shipment_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type process_shipment_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type purchase_contracts_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type purchase_negotation_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type purchase_requisition_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type renewal_quote_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type respond_br_cte_validation_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type respond_br_nfe_validation_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type sales_contract_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type supply_forecast_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the	Role: B2B Administrator

Business Object	Policy Description	Policy Store Implementation
	collaboration document of document type supply_planning_data_in	Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type unknown_doc_in	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type validate_br_cte_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collaboration Document Header	A Supply Chain Application Administrator can manage collaboration document for the collaboration document of document type validate_br_nfe_out	Role: B2B Administrator Privilege: Manage Collaboration Document (Data) Resource: Collaboration Document Header
Collections Aging Bucket	A Supply Chain Application Administrator can maintain collections aging buckets for the reference data sets for which they are authorized	Role: Channel Administration Privilege: Maintain Collections Aging Buckets (Data) Resource: Reference Data Set
Consumer File Import Activity	A Supply Chain Application Administrator can view consumer file import activity object type for all consumer file import activities of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Activity Object Type (Data) Resource: Consumer File Import Activity
Consumer File Import Mapping	A Supply Chain Application Administrator can view consumer file import mapping object type for all consumer file import mappings of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Mapping Object Type (Data) Resource: Consumer File Import Mapping
Consumer File Import Object	A Supply Chain Application Administrator can view consumer file import object type for all consumer file import objects of object type 'consumer'	Role: Trading Community Import Batch Management Privilege: View Consumer File Import Object Type (Data) Resource: Consumer File Import Object

Business Object	Policy Description	Policy Store Implementation
Contact File Import Activity	A Supply Chain Application Administrator can view contact file import activity object type for all contact file import activities of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Activity Object Type (Data) Resource: Contact File Import Activity
Contact File Import Mapping	A Supply Chain Application Administrator can view contact file import mapping object type for all contact file import mappings of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Mapping Object Type (Data) Resource: Contact File Import Mapping
Contact File Import Object	A Supply Chain Application Administrator can view contact file import object type for all contact file import objects of object type 'contact'	Role: Trading Community Import Batch Management Privilege: View Contact File Import Object Type (Data) Resource: Contact File Import Object
Contract	A Supply Chain Application Administrator can manage contract for all business units	Role: Contract Management Across All Contracts Web Service Privilege: Manage Contract (Data) Resource: Contract
Contract Expert Rule	A Supply Chain Application Administrator can view contract terms library for all the business units	Role: Procurement REST Service Privilege: View Contract Terms Library (Data) Resource: Contract Expert Rule
Contract Library Clause	A Supply Chain Application Administrator can view contract terms library for all business units	Role: Procurement REST Service Privilege: View Contract Terms Library (Data) Resource: Contract Library Clause
Contract Library Clause Folder	A Supply Chain Application Administrator can view contract terms library for all the business units	Role: Procurement REST Service Privilege: View Contract Terms Library (Data) Resource: Contract Library Clause Folder
Contract Note	A Supply Chain Application Administrator can manage contract note for notes that are not private or private notes where they are the author.	Role: Contract Management Across All Contracts Web Service Privilege: Manage Contract Note (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Contract Note
Cost Analysis Mapping	A Supply Chain Application Administrator can manage cost analysis mappings for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Analysis Mappings (Data) Resource: Reference Data Set
Cost Component	A Supply Chain Application Administrator can manage cost components for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Components (Data) Resource: Reference Data Set
Cost Element	A Supply Chain Application Administrator can manage cost element for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Element (Data) Resource: Reference Data Set
Cost Estimate Mapping	A Supply Chain Application Administrator can manage estimate mappings for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Estimate Mappings (Data) Resource: Reference Data Set
Cost Management Payables Invoice	A Supply Chain Application Administrator can view cost management invoice for procurement business unit they are authorized for.	Role: Web Services Application Identity for SCM Privilege: View Cost Management Invoice (Data) Resource: Business Unit
Cost Management Receiving Transaction	A Supply Chain Application Administrator can view cost management receiving transaction for procurement business unit they are authorized for.	Role: Web Services Application Identity for SCM Privilege: View Cost Management Receiving Transaction (Data) Resource: Business Unit
Cost Organization	A Supply Chain Application Administrator can manage cost organization for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: Manage Cost Organization (Data) Resource: Cost Organization
Cost Organization	A Supply Chain Application Administrator can view cogs event for the cost organizations for which they are authorized	Role: Field Service Administrator Privilege: View COGS Event (Data) Resource: Cost Organization

Business Object	Policy Description	Policy Store Implementation
Cost Organization	A Supply Chain Application Administrator can view cost organization for the cost organizations for which they are authorized	Role: Field Service Administrator Privilege: View Cost Organization (Data) Resource: Cost Organization
Cost Organization	A Supply Chain Application Administrator can view work order costs for the cost organizations for which they are authorized	Role: Field Service Administrator Privilege: View Work Order Costs (Data) Resource: Cost Organization
Cost Profile	A Supply Chain Application Administrator can manage cost profile for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Profile (Data) Resource: Reference Data Set
Cost Profile	A Supply Chain Application Administrator can view cost profile for the reference data sets they administer	Role: Cost Management Administration Privilege: View Cost Profile (Data) Resource: Reference Data Set
Cost Valuation Structure	A Supply Chain Application Administrator can manage cost valuation structure for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Cost Valuation Structure (Data) Resource: Reference Data Set
Country Structure File Import Activity	A Supply Chain Application Administrator can view country structure file import activity object type for all country structure file import activities of object type country structure	Role: Geography Administration Privilege: View Country Structure File Import Activity Object Type (Data) Resource: Country Structure File Import Activity
Country Structure File Import Mapping	A Supply Chain Application Administrator can view country structure file import mapping object type for all country structure file import mappings of object type country structure	Role: Geography Administration Privilege: View Country Structure File Import Mapping Object Type (Data) Resource: Country Structure File Import Mapping
Country Structure File Import Object	A Supply Chain Application Administrator can view country structure file import object type for all country structure file import objects of object type country structure	Role: Geography Administration Privilege: View Country Structure File Import Object Type (Data) Resource: Country Structure File Import Object
Customer File Import Activity	A Supply Chain Application Administrator can view customer file import activity object type	Role: Trading Community Import Batch Management

Business Object	Policy Description	Policy Store Implementation
	for all customer file import activities of object type 'customer'	Privilege: View Customer File Import Activity Object Type (Data) Resource: Customer File Import Activity
Customer File Import Mapping	A Supply Chain Application Administrator can view customer file import mapping object type for all customer file import mappings of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Mapping Object Type (Data) Resource: Customer File Import Mapping
Customer File Import Object	A Supply Chain Application Administrator can view customer file import object type for all customer file import objects of object type 'customer'	Role: Trading Community Import Batch Management Privilege: View Customer File Import Object Type (Data) Resource: Customer File Import Object
Department	A Supply Chain Application Administrator can choose department for all departments in the enterprise.	Role: Inventory Administration Privilege: Choose Department (Data) Resource: Department
Department	A Supply Chain Application Administrator can choose department for departments in their organization security profile	Role: Use REST Service - Departments List of Values Privilege: Choose Department (Data) Resource: Department
External Purchase Price	A Supply Chain Application Administrator can maintain external purchase price for the external purchase prices they have access to	Role: Supply Chain Application Administrator Privilege: Maintain External Purchase Price (Data) Resource: Business Unit
File Export Batch	A Supply Chain Application Administrator can view file export batch for all export batches	Role: Geography Administration Privilege: View File Export Batch (Data) Resource: File Export Batch
File Export Batch	A Supply Chain Application Administrator can view file export batch for all export batches	Role: Web Services Application Identity for SCM Privilege: View File Export Batch (Data) Resource: File Export Batch

Business Object	Policy Description	Policy Store Implementation
File Export Object	A Supply Chain Application Administrator can manage export unit test for all export unit test objects	Role: Geography Administration Privilege: Manage Export Unit Test (Data) Resource: File Export Object
File Export Object	A Supply Chain Application Administrator can manage export unit test for all export unit test objects	Role: Web Services Application Identity for SCM Privilege: Manage Export Unit Test (Data) Resource: File Export Object
File Import Activity	A Supply Chain Application Administrator can view standard file import activity object type for all standard file import activities that are accessible for geography administration duty	Role: Geography Administration Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Activity	A Supply Chain Application Administrator can view standard file import activity object type for all standard file import activities that are accessible for opportunity administration duty	Role: Opportunity Administration Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Activity	A Supply Chain Application Administrator can view standard file import activity object type for all standard file import activities that are accessible for sales lead processing duty	Role: Sales Lead Processing Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Activity	A Supply Chain Application Administrator can view standard file import activity object type for all standard file import activities that are accessible for trading community batch import management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Mapping	A Supply Chain Application Administrator can view standard file import mapping object type for all standard file import maps that are accessible for geography administration duty	Role: Geography Administration Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
File Import Mapping	A Supply Chain Application Administrator can view standard file import mapping object type for all standard file import maps that are accessible for opportunity administration duty	Role: Opportunity Administration Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping

Business Object	Policy Description	Policy Store Implementation
File Import Mapping	A Supply Chain Application Administrator can view standard file import mapping object type for all standard file import maps that are accessible for sales lead processing duty	Role: Sales Lead Processing Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
File Import Mapping	A Supply Chain Application Administrator can view standard file import mapping object type for all standard file import maps that are accessible for trading community batch import management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
Fixed Asset	A Supply Chain Application Administrator can submit fixed assets reports in the asset books that they are authorized to access	Role: Fixed Asset Inquiry Privilege: Submit Fixed Assets Reports Resource: Fixed Asset Book
Geography File Import Activity	A Supply Chain Application Administrator can view geography file import activity object type for all geography file import activities of object type geography	Role: Geography Administration Privilege: View Geography File Import Activity Object Type (Data) Resource: Geography File Import Activity
Geography File Import Mapping	A Supply Chain Application Administrator can view geography file import mapping object type for all geography file import mappings of object type geography	Role: Geography Administration Privilege: View Geography File Import Mapping Object Type (Data) Resource: Geography File Import Mapping
Geography File Import Object	A Supply Chain Application Administrator can view geography file import object type for all geography file import objects of object type geography	Role: Geography Administration Privilege: View Geography File Import Object Type (Data) Resource: Geography File Import Object
Group Customer File Import Activity	A Supply Chain Application Administrator can view group customer file import activity object type for all group customer file import activities of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Activity Object Type (Data) Resource: Group Customer File Import Activity
Group Customer File Import Mapping	A Supply Chain Application Administrator can view group customer file import mapping object type for all group customer file import mappings of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Mapping Object Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Group Customer File Import Mapping
Group Customer File Import Object	A Supply Chain Application Administrator can view group customer file import object type for all group customer file import objects of object type 'group customer'	Role: Trading Community Import Batch Management Privilege: View Group Customer File Import Object Type (Data) Resource: Group Customer File Import Object
Guided Journey Response	A Supply Chain Application Administrator can manage guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: Manage Guided Journey Response (Data) Resource: Guided Journey Response
Guided Journey Response	A Supply Chain Application Administrator can view guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: View Guided Journey Response (Data) Resource: Guided Journey Response
HCM Approval Process Definition	A Supply Chain Application Administrator can review approval transactions for supply chain management transactions	Role: Supply Chain Management Transaction Approval Reviewing Privilege: Review Approval Transactions (Data) Resource: HCM Approval Process Definition
HCM Pending Transaction Header	A Supply Chain Application Administrator can review approval transactions for supply chain management transactions	Role: Supply Chain Management Transaction Approval Reviewing Privilege: Review Approval Transactions (Data) Resource: HCM Pending Transaction Header
HR Job	A Supply Chain Application Administrator can choose hr job for all jobs in the enterprise	Role: Use REST Service - Jobs List of Values Privilege: Choose HR Job (Data) Resource: HR Job
HR Job	A Supply Chain Application Administrator can choose hr job for all jobs in the enterprise.	Role: Inventory Administration Privilege: Choose HR Job (Data) Resource: HR Job
Help Topic	A Supply Chain Application Administrator can view help topic for all secured help content they are authorized	Role: Supply Chain Application Administrator Privilege: View Secured Help Content

Business Object	Policy Description	Policy Store Implementation
		Resource: Help Topic
Hierarchy File Import Activity	A Supply Chain Application Administrator can view hierarchy file import activity object type for all hierarchy file import activities of object type 'hierarchy'	Role: Trading Community Import Batch Management Privilege: View Hierarchy File Import Activity Object Type (Data) Resource: Hierarchy File Import Activity
Hierarchy File Import Activity	A Supply Chain Application Administrator can view standard file import activity object type for all standard file import activities that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type Resource: Hierarchy File Import Activity
Hierarchy File Import Mapping	A Supply Chain Application Administrator can view hierarchy file import mapping object type for all hierarchy file import mappings of object type 'hierarchy'	Role: Trading Community Import Batch Management Privilege: View Hierarchy File Import Mapping Object Type (Data) Resource: Hierarchy File Import Mapping
Hierarchy File Import Mapping	A Supply Chain Application Administrator can view standard file import mapping object type for all standard file import maps that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: Hierarchy File Import Mapping
Hierarchy File Import Object	A Supply Chain Application Administrator can view hierarchy file import object type for all hierarchy file import objects of object type 'hierarchy'	Role: Trading Community Import Batch Management Privilege: View Hierarchy File Import Object Type (Data) Resource: Hierarchy File Import Object
Hierarchy Node File Import Activity	A Supply Chain Application Administrator can view hierarchy node file import activity object type for all hierarchy node file import activities of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Activity Object Type (Data) Resource: Hierarchy Node File Import Activity
Hierarchy Node File Import Activity	A Supply Chain Application Administrator can view standard file import activity object type for all standard file import activities that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Activity Object Type

Business Object	Policy Description	Policy Store Implementation
		Resource: Hierarchy Node File Import Activity
Hierarchy Node File Import Mapping	A Supply Chain Application Administrator can view hierarchy node file import mapping object type for all hierarchy node file import mappings of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Mapping Object Type (Data) Resource: Hierarchy Node File Import Mapping
Hierarchy Node File Import Mapping	A Supply Chain Application Administrator can view standard file import mapping object type for all standard file import maps that are accessible for trading community import batch management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Mapping Object Type Resource: Hierarchy Node File Import Mapping
Hierarchy Node File Import Object	A Supply Chain Application Administrator can view hierarchy node file import object type for all hierarchy node file import objects of object type 'hierarchy node'	Role: Trading Community Import Batch Management Privilege: View Hierarchy Node File Import Object Type (Data) Resource: Hierarchy Node File Import Object
Installed Base Asset	A Supply Chain Application Administrator can manage installed base asset for all installed base assets	Role: Field Service Administrator Privilege: Manage Installed Base Asset (Data) Resource: Installed Base Asset
Interorganization Parameter	A Supply Chain Application Administrator can manage interorganization parameter for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Interorganization Parameter (Data) Resource: Inventory Organization Parameter
Interorganization Parameter	A Supply Chain Application Administrator can manage interorganization parameter for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Interorganization Parameter (Data) Resource: Inventory Organization Parameter
Intersubinventory Parameter	A Supply Chain Application Administrator can manage intersubinventory parameter for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Intersubinventory Parameter (Data) Resource: Inventory Organization Parameter
Inventory Account Alias	A Supply Chain Application Administrator can manage inventory account alias for the	Role: Inventory Administration

Business Object	Policy Description	Policy Store Implementation
	inventory organizations in which they can operate	Privilege: Manage Inventory Account Alias (Data) Resource: Inventory Organization Parameter
Inventory Attribute Exception	A Supply Chain Application Administrator can configure inventory attribute exception for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Configure Inventory Attribute Exception (Data) Resource: Inventory Organization Parameter
Inventory Consumption Rule	A Supply Chain Application Administrator can manage inventory consumption rule for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Consumption Rule (Data) Resource: Inventory Organization Parameter
Inventory Consumption Rule	A Supply Chain Application Administrator can manage inventory consumption rule for the inventory organizations in which they can operate	Role: Web Services Application Identity for SCM Privilege: Manage Inventory Consumption Rule (Data) Resource: Inventory Consumption Rule
Inventory Locator	A Supply Chain Application Administrator can manage inventory locator for the inventory organizations in which they can operate	Role: Configure Subinventory Using Responsive Inventory Privilege: Manage Inventory Locator (Data) Resource: Inventory Organization Parameter
Inventory Locator	A Supply Chain Application Administrator can manage inventory locator for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Inventory Locator (Data) Resource: Inventory Locator
Inventory Locator	A Supply Chain Application Administrator can manage inventory locator for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Locator (Data) Resource: Inventory Organization Parameter
Inventory Locator	A Supply Chain Application Administrator can manage inventory locator for the inventory organizations in which they can operate	Role: Web Services Application Identity for SCM Privilege: Manage Inventory Locator (Data) Resource: Inventory Locator
Inventory Movement Rule Selection Criterion	A Supply Chain Application Administrator can manage inventory movement rule selection criterion for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Movement Rule Selection Criterion (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Inventory Organization Parameter
Inventory Organization	A Supply Chain Application Administrator can manage inventory organization for the quality organizations in which they can operate	Role: Supply Chain Application Administrator Privilege: Manage Quality Organization (Data) Resource: Inventory Organization Parameter
Inventory Organization	A Supply Chain Application Administrator can manage quality organization for the quality organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Quality Organization (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	A Supply Chain Application Administrator can manage inventory organization parameter for the item organizations in which they can operate	Role: Supply Chain Application Administrator Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	A Supply Chain Application Administrator can manage inventory striping attributes for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Inventory Striping Attributes (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	A Supply Chain Application Administrator can manage item and inventory organization parameter for the inventory organizations in which they can operate	Role: Configure Inventory Barcode Formats Using Responsive Inventory Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	A Supply Chain Application Administrator can manage item and inventory organization parameter for the inventory organizations in which they can operate	Role: Configure Item Transaction Defaults Using Responsive Inventory Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	A Supply Chain Application Administrator can manage item and inventory organization parameter for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	A Supply Chain Application Administrator can manage item and inventory organization	Role: Inventory ABC Analysis

Business Object	Policy Description	Policy Store Implementation
	parameter for the inventory organizations in which they can operate	Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Organization Parameter	A Supply Chain Application Administrator can manage item and inventory organization parameter for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item and Inventory Organization Parameter (Data) Resource: Inventory Organization Parameter
Inventory Reservation	A Supply Chain Application Administrator can manage inventory reservation for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Inventory Reservation (Data) Resource: Inventory Reservation
Inventory Rule Configuration Header	A Supply Chain Application Administrator can configure item shortage parameter for the inventory organizations in which they can operate	Role: Configure Item Shortage Parameters Using Responsive Inventory Privilege: Configure Item Shortage Parameter (Data) Resource: Inventory Organization Parameter
Inventory Transfer Order	A Supply Chain Application Administrator can manage inventory transfer order for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Inventory Transfer Order (Data) Resource: Inventory Organization Parameter
Item	A Supply Chain Application Administrator can create item class item for the item classes they have access to	Role: Item Management Privilege: Create Item Class Item (Data) Resource: Item
Item Cost Profile	A Supply Chain Application Administrator can manage item cost profile for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: Manage Item Cost Profile (Data) Resource: Item Cost Profile
Item Locator	A Supply Chain Application Administrator can manage item locator for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item Locator (Data) Resource: Inventory Organization Parameter
Item Lot	A Supply Chain Application Administrator can manage item lot and item serial for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Item Lot and Item Serial (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Item Lot
Item Lot And Serial Attributes Mapping	A Supply Chain Application Administrator can manage item lot and serial attributes mapping for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item Lot and Serial Attributes Mapping (Data) Resource: Inventory Organization Parameter
Item Serial	A Supply Chain Application Administrator can manage item lot and item serial for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Item Lot and Item Serial (Data) Resource: Item Serial
Item Subinventory	A Supply Chain Application Administrator can manage item subinventory for the inventory organizations in which they can operate	Role: Inventory Administration Privilege: Manage Item Subinventory (Data) Resource: Inventory Organization Parameter
Journey	A Supply Chain Application Administrator can assign journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can assign journey to self for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Assign Journey to Self (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can manage journey for journeys to which they have been granted access	Role: Manage Guided Journeys Privilege: Manage Journey (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can manage journey for journeys to which they have been granted access	Role: Use REST Service - Journey Templates Privilege: Manage Journey (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can manage journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: Manage Journey (Data) Resource: Journey

Business Object	Policy Description	Policy Store Implementation
Journey	A Supply Chain Application Administrator can view journey for journeys to which they have been granted access	Role: Manage Guided Journeys Privilege: View Journey (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can view journey for journeys to which they have been granted access	Role: Use REST Service - Guided Journeys Read Only Privilege: View Journey (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can view journey for journeys to which they have been granted access	Role: Use REST Service - Journey Templates Privilege: View Journey (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys Privilege: View Journey (Data) Resource: Journey
Journey	A Supply Chain Application Administrator can view journey for journeys to which they have been granted access	Role: Use REST Service - Journeys List of Values Privilege: View Journey (Data) Resource: Journey
Journey Category	A Supply Chain Application Administrator can choose journey category for journey categories to which they have been granted access	Role: Use REST Service - Journey Categories List of Values Privilege: Choose Journey Category (Data) Resource: Journey Category
Journey Category	A Supply Chain Application Administrator can manage journey category for journey categories to which they have been granted access	Role: Use REST Service - Journey Categories Privilege: Manage Journey Category (Data) Resource: Journey Category
Journey Category	A Supply Chain Application Administrator can view journey category for journey categories to which they have been granted access	Role: Use REST Service - Journey Categories Privilege: View Journey Category (Data) Resource: Journey Category
Knowledge Content Types	A Supply Chain Application Administrator can delete article of a content type connector definition articles	Role: AI Agent Connector Management Privilege: Delete Article of a content type

Business Object	Policy Description	Policy Store Implementation

Location	A Supply Chain Application Administrator can view location for all locations in the enterprise	Role: Use REST Service - Locations Read Only Privilege: View Location (Data) Resource: Location
Maintenance Organization	A Supply Chain Application Administrator can manage maintenance organization for the inventory organizations in which they can operate	Role: Field Service Administrator Privilege: Manage Maintenance Organization (Data) Resource: Inventory Organization Parameter
Maintenance Organization	A Supply Chain Application Administrator can manage maintenance organization for the	Role: Supply Chain Application Administrator

Business Object	Policy Description	Policy Store Implementation
	maintenance organization in which they can operate	Privilege: Manage Maintenance Organization (Data) Resource: Inventory Organization Parameter
Manufacturing Plant	A Supply Chain Application Administrator can manage manufacturing plant for the manufactruing plant in which they can operate	Role: Supply Chain Application Administrator Privilege: Manage Plant Parameters (Data) Resource: Manufacturing Plant
Manufacturing Plant	A Supply Chain Application Administrator can manage plant parameters for the manufactruing plant in which they can operate	Role: Web Services Application Identity for SCM Privilege: Manage Plant Parameters (Data) Resource: Manufacturing Plant
Manufacturing Plant	A Supply Chain Application Administrator can manage plant parameters for the manufacturing plants in which they can operate	Role: Field Service Administrator Privilege: Manage Plant Parameters (Data) Resource: Manufacturing Plant
Marketing Campaign	A Supply Chain Application Administrator can delete marketing campaign for all marketing campaigns in draft or scheduled execution status where they are a manager in the management hierarchy of the owner of the marketing campaign	Role: Marketing Campaign Management Privilege: Delete Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can delete marketing campaign for all marketing campaigns in draft or scheduled execution status where they are the owner of the marketing campaign	Role: Marketing Campaign Management Privilege: Delete Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can delete marketing campaign member where they are the owner of the marketing campaign	Role: Marketing Execution Management Privilege: Delete Marketing Campaign Member (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can delete marketing campaign where they are a manager in the management hierarchy of the owner of the marketing campaign	Role: Marketing Execution Management Privilege: Delete Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can delete marketing campaign where they are the owner of the marketing campaign	Role: Marketing Execution Management Privilege: Delete Marketing Campaign (Data) Resource: Marketing Campaign

Business Object	Policy Description	Policy Store Implementation
Marketing Campaign	A Supply Chain Application Administrator can update marketing campaign activation where they are a manager in the management hierarchy of the owner of the marketing campaign	Role: Marketing Campaign Management Privilege: Update Marketing Campaign Activation (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can update marketing campaign activation where they are the owner of the marketing campaign	Role: Marketing Campaign Management Privilege: Update Marketing Campaign Activation (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can update marketing campaign dialog status where they are the owner of the marketing campaign	Role: Marketing Execution Management Privilege: Update Marketing Campaign Dialog Status (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can update marketing campaign member where they are the owner of the marketing campaign	Role: Marketing Execution Management Privilege: Update Marketing Campaign Member (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can update marketing campaign where they are a manager in the management hierarchy of a resource in the marketing campaign team with full access	Role: Marketing Campaign Management Privilege: Update Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can update marketing campaign where they are a resource in the marketing campaign team	Role: Marketing Campaign Management Privilege: Update Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can update marketing campaign where they are the owner of the marketing campaign	Role: Marketing Campaign Management Privilege: Update Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can view marketing campaign for all resource organizations and child resource organizations for which they are authorized	Role: Marketing Campaign Management Privilege: View Marketing Campaign (Data) Resource: Marketing Campaign
Marketing Campaign	A Supply Chain Application Administrator can view marketing campaign for all resource	Role: Marketing Execution Management Privilege: View Marketing Campaign (Data)

Business Object	Policy Description	Policy Store Implementation
	organizations and child resource organizations for which they are authorized	Resource: Marketing Campaign
Marketing List	A Supply Chain Application Administrator can delete marketing list where they are the owner of the marketing list	Role: Marketing Campaign Management Privilege: Delete Marketing List (Data) Resource: Marketing List
Marketing List	A Supply Chain Application Administrator can update marketing list where i am on the team associated to the marketing list	Role: Marketing Campaign Management Privilege: Update Marketing List (Data) Resource: Marketing List
Marketing List	A Supply Chain Application Administrator can update marketing list where they are a manager in the management hierarchy of the owner of the marketing list	Role: Marketing Campaign Management Privilege: Update Marketing List (Data) Resource: Marketing List
Marketing List	A Supply Chain Application Administrator can update marketing list where they are the owner of the marketing list	Role: Marketing Campaign Management Privilege: Update Marketing List (Data) Resource: Marketing List
Marketing Treatment	A Supply Chain Application Administrator can delete marketing treatment where they are the owner of the marketing treatment	Role: Marketing Campaign Management Privilege: Delete Marketing Treatment (Data) Resource: Marketing Treatment
Marketing Treatment	A Supply Chain Application Administrator can update marketing treatment activation where they are a manager in the management hierarchy of the owner of the marketing treatment	Role: Marketing Campaign Management Privilege: Update Marketing Treatment Activation (Data) Resource: Marketing Treatment
Marketing Treatment	A Supply Chain Application Administrator can update marketing treatment activation where they are a resource in the marketing treatment team	Role: Marketing Campaign Management Privilege: Update Marketing Treatment Activation (Data) Resource: Marketing Treatment
Marketing Treatment	A Supply Chain Application Administrator can update marketing treatment lock where they are a manager in the management hierarchy of the owner of the marketing treatment	Role: Marketing Campaign Management Privilege: Update Marketing Treatment Lock (Data) Resource: Marketing Treatment

Business Object	Policy Description	Policy Store Implementation
Marketing Treatment	A Supply Chain Application Administrator can update marketing treatment lock where they are a resource in the marketing treatment team	Role: Marketing Campaign Management Privilege: Update Marketing Treatment Lock (Data) Resource: Marketing Treatment
Marketing Treatment	A Supply Chain Application Administrator can update marketing treatment where they are a resource in the marketing treatment team	Role: Marketing Campaign Management Privilege: Update Marketing Treatment (Data) Resource: Marketing Treatment
Marketing Treatment	A Supply Chain Application Administrator can update marketing treatment where they are the owner of the marketing treatment	Role: Marketing Campaign Management Privilege: Update Marketing Treatment (Data) Resource: Marketing Treatment
Marketing Treatment E-Mail Footer	A Supply Chain Application Administrator can view marketing treatment unrestricted e-mail footer for all marketing treatment e-mail footers marked as unrestricted visibility in the enterprise	Role: Marketing Campaign Management Privilege: View Marketing Treatment Unrestricted E-Mail Footer (Data) Resource: Marketing Treatment E-Mail Footer
Note	A Supply Chain Application Administrator can view note for all notes in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Note (Data) Resource: Note
Onhand Quantity	A Supply Chain Application Administrator can manage on-hand quantity for the inventory organizations in which they can operate	Role: Configure Subinventory Using Responsive Inventory Privilege: Manage On-Hand Quantity (Data) Resource: Inventory Organization Parameter
Opportunity	A Supply Chain Application Administrator can manage opportunity general profile for all opportunities in the business units that they are authorized within	Role: Opportunity Administration Privilege: Manage Opportunity General Profile (Data) Resource: Opportunity
Opportunity	A Supply Chain Application Administrator can manage opportunity restricted profile for all opportunities in the business units that they are authorized within	Role: Opportunity Administration Privilege: Manage Opportunity Restricted Profile (Data) Resource: Opportunity
Opportunity	A Supply Chain Application Administrator can manage opportunity revenue for all	Role: Opportunity Administration

Business Object	Policy Description	Policy Store Implementation
	opportunities in the business units that they are authorized within	Privilege: Manage Opportunity Revenue (Data) Resource: Opportunity
Opportunity	A Supply Chain Application Administrator can manage opportunity team for all opportunities in the business units that they are authorized within	Role: Opportunity Administration Privilege: Manage Opportunity Team (Data) Resource: Opportunity
Opportunity	A Supply Chain Application Administrator can view opportunity for all opportunities in the business units that they are authorized within	Role: Opportunity Administration Privilege: View Opportunity (Data) Resource: Opportunity
Opportunity File Import Activity	A Supply Chain Application Administrator can view opportunity file import activity object type for all opportunity file import activities in the business units that they are authorized within	Role: Opportunity Administration Privilege: View Opportunity File Import Activity Object Type (Data) Resource: Opportunity File Import Activity
Opportunity File Import Mapping	A Supply Chain Application Administrator can view opportunity file import mapping object type for all opportunity file import mappings in the business units that they are authorized within	Role: Opportunity Administration Privilege: View Opportunity File Import Mapping Object Type (Data) Resource: Opportunity File Import Mapping
Opportunity File Import Object	A Supply Chain Application Administrator can view opportunity file import object type for all opportunity file import objects in the business units that they are authorized within	Role: Opportunity Administration Privilege: View Opportunity File Import Object Type (Data) Resource: Opportunity File Import Object
Orchestration Hold Code	A Supply Chain Application Administrator can manage orchestration hold code definition for the reference data sets they administer	Role: Order Orchestration Administration Privilege: Manage Orchestration Hold Code Definition (Data) Resource: Reference Data Set
Orchestration Order	A Supply Chain Application Administrator can manage orchestration order for the business units for which they are authorized	Role: Field Service Administrator Privilege: Manage Orchestration Order (Data) Resource: Business Unit
Orchestration Process Definition	A Supply Chain Application Administrator can manage orchestration process definition for the reference data sets they administer	Role: Order Orchestration Administration Privilege: Manage Orchestration Process Definition (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Reference Data Set
Overhead Rule	A Supply Chain Application Administrator can view overhead rule for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: View Overhead Rule (Data) Resource: Overhead Rule
Packing Unit Item Assignment	A Supply Chain Application Administrator can manage packing unit item assignment for the inventory organizations in which they can operate	Role: Shipping Administration Privilege: Manage Packing Unit Item Assignment (Data) Resource: Inventory Organization Parameter
Party Tax Profile	A Supply Chain Application Administrator can manage business unit party tax profile for the business units for which they are authorized	Role: Customer Account Inquiry Privilege: Manage Business Unit Party Tax Profile (Data) Resource: Business Unit
Party Tax Profile	A Supply Chain Application Administrator can manage party tax profile for any party tax profile defined in the enterprise	Role: Legal Entities Administration Privilege: Manage Party Tax Profile (Data) Resource: Party Tax Profile
Payables Financials Option	A Supply Chain Application Administrator can manage payables financials option for the business units for which they are authorized	Role: Web Services Application Identity for SCM Privilege: Manage Payables Financials Option (Data) Resource: Business Unit
Payables Payment Term	A Supply Chain Application Administrator can manage payables payment terms for the reference data sets they administer	Role: Web Services Application Identity for SCM Privilege: Manage Payables Payment Terms (Data) Resource: Reference Data Set
Payables Standard Invoice	A Supply Chain Application Administrator can manage payables invoice for all business units in the enterprise	Role: Web Services Application Identity for SCM Privilege: Manage Payables Invoice (Data) Resource: Payables Standard Invoice
Person	A Supply Chain Application Administrator can choose person for persons and assignments in their person and assignment security profile	Role: Enterprise Structures Administration Privilege: Choose Person (Data) Resource: Person

Business Object	Policy Description	Policy Store Implementation
Person Email	A Supply Chain Application Administrator can view person email for persons and assignments in their person and assignment security profile	Role: Procurement REST Service Privilege: View Person Email (Data) Resource: Person Email
Pick Wave	A Supply Chain Application Administrator can manage pick wave for the inventory organizations in which they can operate	Role: Shipping Administration Privilege: Manage Pick Wave (Data) Resource: Inventory Organization Parameter
Pick Wave	A Supply Chain Application Administrator can manage pick wave for the inventory organizations in which they can operate	Role: Web Services Application Identity for SCM Privilege: Manage Pick Wave (Data) Resource: Pick Wave
Planning Cost Component	A Supply Chain Application Administrator can manage planning cost components for the reference data sets they administer	Role: Cost Management Administration Privilege: Manage Planning Cost Components (Data) Resource: Reference Data Set
Planning Cost Organization	A Supply Chain Application Administrator can manage planning cost organizations for the cost organizations for which they are authorized	Role: Cost Management Administration Privilege: Manage Planning Cost Organizations (Data) Resource: Planning Cost Organization
Product Group Details Export Object	A Supply Chain Application Administrator can view product group export object for all product group details export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Product Group Export Object (Data) Resource: Product Group Details Export Object
Product Group File Import Activity	A Supply Chain Application Administrator can view product group file import activity object type for all authorized product group file import activities in all resource organizations where they are authorized	Role: Web Services Application Identity for SCM Privilege: View Product Group File Import Activity Object Type (Data) Resource: Product Group File Import Activity
Product Group File Import Mapping	A Supply Chain Application Administrator can view product group file import mapping object type for all product group file import mappings in all resource organizations where they are authorized	Role: Web Services Application Identity for SCM Privilege: View Product Group File Import Mapping Object Type (Data) Resource: Product Group File Import Mapping
Product Group File Import Object	A Supply Chain Application Administrator can view product group file import object	Role: Web Services Application Identity for SCM

Business Object	Policy Description	Policy Store Implementation
	type for all product group file import objects in all resource organizations where they are authorized	Privilege: View Product Group File Import Object Type (Data) Resource: Product Group File Import Object
Product Group Products Export Object	A Supply Chain Application Administrator can view product group export object for all product group products export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Product Group Export Object (Data) Resource: Product Group Products Export Object
Product Group Subgroups Export Object	A Supply Chain Application Administrator can view product group export object for all product group subgroups export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Product Group Export Object (Data) Resource: Product Group Subgroups Export Object
Product Group Translations Export Object	A Supply Chain Application Administrator can view product group export object for all product group translations export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Product Group Export Object (Data) Resource: Product Group Translations Export Object
Product Recall Notice	A Supply Chain Application Administrator can maintain product recall notice for the recall notices they have access to	Role: Supply Chain Application Administrator Privilege: Maintain Recall Notice (Data) Resource: Business Unit
Project	A Supply Chain Application Administrator can get project list using service for all the projects the user has access to	Role: Field Service Administrator Privilege: Get Project List Using Service (Data) Resource: Project
Public Assignment	A Supply Chain Application Administrator can search person deferred for persons and assignments in their public person security profile	Role: Use REST Service - Public Workers Read Only Privilege: Search Person Deferred (Data) Resource: Public Assignment
Public Assignment	A Supply Chain Application Administrator can view person deferred for persons and assignments in their public person security profile	Role: Use REST Service - Public Workers Read Only Privilege: View Person Deferred (Data) Resource: Public Assignment

Business Object	Policy Description	Policy Store Implementation
Public Person	A Supply Chain Application Administrator can choose public person for all workers in the enterprise	Role: Procurement REST Service Privilege: Choose Public Person (Data) Resource: Public Person
Public Person	A Supply Chain Application Administrator can report public person for persons and assignments in their person and assignment security profile	Role: Fixed Asset Inquiry Privilege: Report Public Person (Data) Resource: Public Person
Public Person	A Supply Chain Application Administrator can report public person for persons and assignments in their person and assignment security profile	Role: Procurement REST Service Privilege: Report Public Person (Data) Resource: Public Person
Public Person	A Supply Chain Application Administrator can search person deferred for persons and assignments in their public person security profile	Role: Use REST Service - Public Workers Read Only Privilege: Search Person Deferred (Data) Resource: Public Person
Public Person	A Supply Chain Application Administrator can view person deferred for persons and assignments in their public person security profile	Role: Use REST Service - Public Workers Read Only Privilege: View Person Deferred (Data) Resource: Public Person
Receivables Bills Receivable	A Supply Chain Application Administrator can manage receivables bills receivable for the business units for which they are authorized	Role: Supply Chain Application Administrator Privilege: Manage Receivables Activities (Data) Resource: Business Unit
Receivables Credit Memo	A Supply Chain Application Administrator can manage receivables activities for the business units for which they are authorized	Role: Web Services Application Identity for SCM Privilege: Manage Receivables Activities (Data) Resource: Receivables Credit Memo
Receivables Debit Memo	A Supply Chain Application Administrator can manage receivables transactions for the business units for which they are authorized	Role: Web Services Application Identity for SCM Privilege: Manage Receivables Transactions (Data) Resource: Receivables Debit Memo
Receivables Invoice	A Supply Chain Application Administrator can manage receivables transactions for the business units for which they are authorized	Role: Web Services Application Identity for SCM Privilege: Manage Receivables Transactions (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Receivables Invoice
Receivables Invoice	A Supply Chain Application Administrator can view receivables activities for the business units for which they are authorized	Role: Field Service Administrator Privilege: View Receivables Activities (Data) Resource: Business Unit
Receiving Option	A Supply Chain Application Administrator can manage receiving option for the inventory organizations in which they can operate	Role: Receiving Administration Privilege: Manage Receiving Option (Data) Resource: Inventory Organization Parameter
Sales Forecast Adjustment Export Object	A Supply Chain Application Administrator can view sales forecast adjustment export object for all sales forecast adjustment export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Sales Forecast Adjustment Export Object (Data) Resource: Sales Forecast Adjustment Export Object
Sales Forecast Header Export Object	A Supply Chain Application Administrator can view sales forecast header export object for all sales forecast header export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Sales Forecast Header Export Object (Data) Resource: Sales Forecast Header Export Object
Sales Forecast Item Adjustment Export Object	A Supply Chain Application Administrator can view sales forecast item adjustment export object for all sales forecast item adjustment export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Sales Forecast Item Adjustment Export Object (Data) Resource: Sales Forecast Item Adjustment Export Object
Sales Forecast Item Export Object	A Supply Chain Application Administrator can view sales forecast item export object for all sales forecast item export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Sales Forecast Item Export Object (Data) Resource: Sales Forecast Item Export Object
Sales Forecast Participant Export Object	A Supply Chain Application Administrator can view sales forecast participant export object for all sales forecast participant export objects in the enterprise	Role: Web Services Application Identity for SCM Privilege: View Sales Forecast Participant Export Object (Data) Resource: Sales Forecast Participant Export Object

Business Object	Policy Description	Policy Store Implementation
Sales Lead	A Supply Chain Application Administrator can delete sales lead for all retired, qualified, unqualified leads in the enterprise	Role: Sales Lead Processing Privilege: Delete Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view descendant territory leads where they are a territory resource in the sales lead territory team or a territory resource with a descendant territory in the sales lead territory team	Role: Sales Lead Qualification Privilege: View Descendant Territory Leads (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view my sales leads where they are the owner of the sales lead	Role: Sales Lead Qualification Privilege: View My Sales Leads (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view sales lead for all sales leads in the business units that they are authorized within	Role: Sales Lead Processing Privilege: View Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view sales lead where they are a manager in the management hierarchy of a resource in the lead sales team	Role: Sales Lead Qualification Supervision Privilege: View Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view sales lead where they are a manager in the management hierarchy of the owner of the sales lead	Role: Sales Lead Qualification Supervision Privilege: View Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view sales lead where they are a resource in the lead sales team	Role: Sales Lead Qualification Privilege: View Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view sales lead where they are a resource in the territory assigned to the sales lead	Role: Sales Lead Qualification Privilege: View Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view sales lead where they are a territory resource in the sales lead territory team or a territory resource with a descendant territory in the sales lead territory team	Role: Sales Lead Qualification Privilege: View Sales Lead (Data) Resource: Sales Lead

Business Object	Policy Description	Policy Store Implementation
Sales Lead	A Supply Chain Application Administrator can view sales lead where they are an administrator of the resource organization in the primary assignment of the owner	Role: Sales Lead Qualification Privilege: View Sales Lead (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view sales team leads where they are a resource in the lead sales team	Role: Sales Lead Qualification Privilege: View Sales Team Leads (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view subordinate team leads where they are a manager in the management hierarchy of a resource in the lead sales team	Role: Sales Lead Qualification Supervision Privilege: View Subordinate Team Leads (Data) Resource: Sales Lead
Sales Lead	A Supply Chain Application Administrator can view territory leads where they are a resource in the territory assigned to the sales lead	Role: Sales Lead Qualification Privilege: View Territory Leads (Data) Resource: Sales Lead
Sales Lead File Import Activity	A Supply Chain Application Administrator can view sales lead file import activity object type for all file import activities of type lead in the enterprise	Role: Sales Lead Processing Privilege: View Sales Lead File Import Activity Object Type (Data) Resource: Sales Lead File Import Activity
Sales Lead File Import Mapping	A Supply Chain Application Administrator can view sales lead file import mapping object type for all file import mappings of type lead in the enterprise	Role: Sales Lead Processing Privilege: View Sales Lead File Import Mapping Object Type (Data) Resource: Sales Lead File Import Mapping
Sales Lead File Import Object	A Supply Chain Application Administrator can view sales lead file import object type for all file import objects of type lead in the enterprise	Role: Sales Lead Processing Privilege: View Sales Lead File Import Object Type (Data) Resource: Sales Lead File Import Object
Sales Objects	A Supply Chain Application Administrator can view standard file import export object type for all standard file import export objects that are accessible for geography administration duty	Role: Geography Administration Privilege: View Standard File Import Export Object Type Resource: Sales Objects

Business Object	Policy Description	Policy Store Implementation
Sales Objects	A Supply Chain Application Administrator can view standard file import export object type for all standard file import export objects that are accessible for opportunity administration duty	Role: Opportunity Administration Privilege: View Standard File Import Export Object Type Resource: Sales Objects
Sales Objects	A Supply Chain Application Administrator can view standard file import export object type for all standard file import export objects that are accessible for sales lead processing duty	Role: Sales Lead Processing Privilege: View Standard File Import Export Object Type Resource: Sales Objects
Sales Objects	A Supply Chain Application Administrator can view standard file import export object type for all standard file import export objects that are accessible for trading community batch import management duty	Role: Trading Community Import Batch Management Privilege: View Standard File Import Export Object Type Resource: Sales Objects
Shipment	A Supply Chain Application Administrator can manage shipment for the inventory organizations in which they can operate	Role: Web Services Application Identity for SCM Privilege: Manage Shipment (Data) Resource: Shipment
Shipment Line Note	A Supply Chain Application Administrator can manage shipment line note for all shipment line notes in the enterprise	Role: Web Services Application Identity for SCM Privilege: Manage Shipment Line Note (Data) Resource: Shipment Line Note
Shipping Organization Parameter	A Supply Chain Application Administrator can manage shipping organization parameter for the inventory organizations in which they can operate	Role: Shipping Administration Privilege: Manage Shipping Organization Parameter (Data) Resource: Inventory Organization Parameter
Simplified Account File Import Activity	A Supply Chain Application Administrator can view simplified account file import activity object type for all simplified account file import activities of object type 'ora_import_account'	Role: Trading Community Import Batch Management Privilege: View Simplified Account File Import Activity Object Type (Data) Resource: Simplified Account File Import Activity
Simplified Account File Import Mapping	A Supply Chain Application Administrator can view simplified account file import mapping object type for all simplified account file import mappings of object type 'ora_import_account'	Role: Trading Community Import Batch Management Privilege: View Simplified Account File Import Mapping Object Type (Data)

Business Object	Policy Description	Policy Store Implementation
		Resource: Simplified Account File Import Mapping
Simplified Account File Import Object	A Supply Chain Application Administrator can view simplified account file import object type for all simplified account file import objects of object type 'ora_import_account'	Role: Trading Community Import Batch Management Privilege: View Simplified Account File Import Object Type (Data) Resource: Simplified Account File Import Object
Simplified Contact File Import Activity	A Supply Chain Application Administrator can view simplified contact file import activity object type for all simplified contact file import activities of object type 'ora_import_contact'	Role: Trading Community Import Batch Management Privilege: View Simplified Contact File Import Activity Object Type (Data) Resource: Simplified Contact File Import Activity
Simplified Contact File Import Mapping	A Supply Chain Application Administrator can view simplified contact file import mapping object type for all simplified contact file import mappings of object type 'ora_import_contact'	Role: Trading Community Import Batch Management Privilege: View Simplified Contact File Import Mapping Object Type (Data) Resource: Simplified Contact File Import Mapping
Simplified Contact File Import Object	A Supply Chain Application Administrator can view simplified contact file import object type for all simplified contact file import objects of object type 'ora_import_contact'	Role: Trading Community Import Batch Management Privilege: View Simplified Contact File Import Object Type (Data) Resource: Simplified Contact File Import Object
Simplified Household File Import Activity	A Supply Chain Application Administrator can view simplified household file import activity object type for all simplified household file import activities of object type 'ora_import_household'	Role: Trading Community Import Batch Management Privilege: View Simplified Household File Import Activity Object Type (Data) Resource: Simplified Household File Import Activity
Simplified Household File Import Mapping	A Supply Chain Application Administrator can view simplified household file import mapping object type for all simplified household file import mappings of object type 'ora_import_household'	Role: Trading Community Import Batch Management Privilege: View Simplified Household File Import Mapping Object Type (Data) Resource: Simplified Household File Import Mapping

Business Object	Policy Description	Policy Store Implementation
Simplified Household File Import Object	A Supply Chain Application Administrator can view simplified household file import object type for all simplified household file import objects of object type 'ora_import_household'	Role: Trading Community Import Batch Management Privilege: View Simplified Household File Import Object Type (Data) Resource: Simplified Household File Import Object
Source System Reference File Import Activity	A Supply Chain Application Administrator can view source system reference file import activity object type for all source system reference file import activities of object type 'source system reference'	Role: Trading Community Import Batch Management Privilege: View Source System Reference File Import Activity Object Type (Data) Resource: Source System Reference File Import Activity
Source System Reference File Import Mapping	A Supply Chain Application Administrator can view source system reference file import mapping object type for all source system reference file import mapping of object type 'source system reference'	Role: Trading Community Import Batch Management Privilege: View Source System Reference File Import Mapping Object Type (Data) Resource: Source System Reference File Import Mapping

Supplier	A Supply Chain Application Administrator can maintain supplier individual identifiers pii for all suppliers of type individual in the enterprise	Role: Procurement REST Service Privilege: Maintain Supplier Individual Identifiers PII (Data) Resource: Supplier
Supplier	A Supply Chain Application Administrator can maintain supplier individual identifiers pii for the supplier for which they are associated	Role: Supplier Profile Inquiry as Supplier Privilege: Maintain Supplier Individual Identifiers PII (Data) Resource: Supplier
Tax Registration	A Supply Chain Application Administrator can manage tax registration for any tax registration defined in the enterprise	Role: Customer Account Inquiry Privilege: Manage Tax Registration (Data) Resource: Tax Registration

Business Object	Policy Description	Policy Store Implementation
Tax Registration	A Supply Chain Application Administrator can manage tax registration for any tax registration defined in the enterprise	Role: Supplier Profile Inquiry Privilege: Manage Tax Registration (Data) Resource: Tax Registration
Tax Registration	A Supply Chain Application Administrator can manage tax registration for any tax registration defined in the enterprise	Role: Supplier Profile Inquiry as Supplier Privilege: Manage Tax Registration (Data) Resource: Tax Registration
Tax Registration	A Supply Chain Application Administrator can manage tax registration for any tax registration defined in the enterprise	Role: Web Services Application Identity for SCM Privilege: Manage Tax Registration (Data) Resource: Tax Registration
Trading Community Person Phone	A Supply Chain Application Administrator can manage trading community person mobile phone number for all trading community person mobile phone numbers	Role: Procurement REST Service Privilege: Manage Trading Community Person Mobile Phone Number Resource: Trading Community Person Phone
Trading Community Person Phone	A Supply Chain Application Administrator can view trading community person mobile phone number for all trading community person mobile phone numbers	Role: Procurement REST Service Privilege: View Trading Community Person Mobile Phone Number Resource: Trading Community Person Phone
Trading Community Person Phone	A Supply Chain Application Administrator can view trading community person mobile phone number for all trading community person mobile phone numbers	Role: Supplier Profile Inquiry Privilege: View Trading Community Person Mobile Phone Number Resource: Trading Community Person Phone
Trading Community Person Phone	A Supply Chain Application Administrator can view trading community person mobile phone number for all trading community person mobile phone numbers	Role: Supplier Profile Inquiry as Supplier Privilege: View Trading Community Person Mobile Phone Number Resource: Trading Community Person Phone
Withholding Party Tax Profile	A Supply Chain Application Administrator can manage party tax profile taxpayer identifier for organizations of type individual party tax profile taxpayer identifier defined in the enterprise.	Role: Customer Account Inquiry Privilege: Manage Party Tax Profile Taxpayer Identifier (Data) Resource: Withholding Party Tax Profile

Supply Chain Integration Specialist (Job Role)

Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.

Role Hierarchy

The Supply Chain Integration Specialist job role directly and indirectly inherits these roles.

- Supply Chain Integration Specialist
  - Channel Integration Specialist
  - Download data for Brazil SEFAZ Partner Messages Export
  - Download data for CMK Outbound Message Export
  - Download data for Collaboration Supplier On-Hand Export
  - Download data for OAGIS10 Partner Messages Export
  - Download data for OAGIS7 Partner Messages Export
  - Download data for Order Fulfillment Request Export
  - Download data from Order Orchestration and Planning Data Collection Export
  - Export Collaboration Order Forecasts
  - FSCM Load Interface Administration
  - Installed Base Web Service
  - Maintenance Management Web Service
  - Product Model Administration
    - FSCM Load Interface Administration
    - Functional Setups
    - Manage Item Redwood
      - Product Lifecycle Management Folder Access
  - Upload data for B2B Account Numbers Import
  - Upload data for B2B Configuration Import
  - Upload data for Batch Transaction Import
  - Upload data for Brazil SEFAZ Partner Messages Import
  - Upload data for Brazil SEFAZ Supplier Messages Import
  - Upload data for Collaboration Order
  - Upload data for Common Import
  - Upload data for Customer Asset Import
  - Upload data for Cycle Count Import
  - Upload data for Data Loader Import
  - Upload data for Installed Base Assets Import
  - Upload data for Interfaced Pick Transactions Import
  - Upload data for Inventory Balance Import
  - Upload data for Inventory Reservation Import
  - Upload data for Inventory Transaction Import

- Upload data for Item Import
- Upload data for Maintenance Asset Import
- Upload data for Maintenance Program Import
- Upload data for Maintenance Work Definition Import
- Upload data for Maintenance Work Order Import
- Upload data for Meter Reading Import
- Upload data for Meter Template Import
- Upload data for OAGIS10 Partner Messages Import
- Upload data for OAGIS7 Partner Messages Import
- Upload data for Order Fulfillment Response Import
- Upload data for Order Orchestration and Planning Data Collection Import
- Upload data for Price List Import
- Upload data for Product Genealogy Import
- Upload data for Receiving Receipt Import
- Upload data for Shipment Request Import
- Upload data for Shipping Transaction Import
- Upload data for Source Sales Order Import
- Upload data for Standard Cost Import
- Upload data for Supplier Warranty Coverage
- Upload data for Supply Order Import
- Upload data for Work Definition Import
- Upload data for Work Order Import
- Upload data for Work Order Material Transaction Import
- Upload data for Work Order Operation Transaction Import
- Upload data for Work Order Resource Transaction Import

Duties

This table lists the duties assigned directly and indirectly to the Supply Chain Integration Specialist job role.

Duty Role	Description
Channel Integration Specialist	Manages import of transactional data from external applications into Channel Revenue Management.
Download data for Brazil SEFAZ Partner Messages Export	Allows to download data exported from brazil SEFAZ partner messages related data.

Duty Role	Description
Download data for CMK Outbound Message Export	Allows to download data exported from CMK Outbound Message related data.
Download data for Collaboration Supplier On-Hand Export	Allows an enterprise user to export supplier on-hand quantities from supply chain collaboration.
Download data for OAGIS10 Partner Messages Export	Allows to download data exported from OAGIS10 partner messages related data.
Download data for OAGIS7 Partner Messages Export	Allows to download data exported from OAGIS7 partner messages related data.
Download data for Order Fulfillment Request Export	Allows to download data exported from Order Fulfillment Request related data.
Download data from Order Orchestration and Planning Data Collection Export	Allows to download file exported from order orchestration and planning.
Export Collaboration Order Forecasts	Allows to export Collaboration Order Forecasts
FSCM Load Interface Administration	Manages load interface file for import
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Installed Base Web Service	Provide service access to installed base by using the REST services.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.
Manage Item Redwood	Allows users to create and edit item details.
Product Lifecycle Management Folder Access	Allows users access to view and manage content uploaded to the content folder.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.
Upload data for B2B Account Numbers Import	Allows to upload data file to import B2B account numbers related data.
Upload data for B2B Configuration Import	Allows to upload data file to import B2B Configuration related data.
Upload data for Batch Transaction Import	Allows to upload data file to import batch transaction related data.

Duty Role	Description
Upload data for Brazil SEFAZ Partner Messages Import	Allows to upload data file to import brazil SEFAZ partner messages related data.
Upload data for Brazil SEFAZ Supplier Messages Import	Allows to upload data file to import brazil SEFAZ supplier messages related data.
Upload data for Collaboration Order	Allows to upload data file to import Collaboration Order
Upload data for Common Import	Allows to upload data file to import common data.
Upload data for Customer Asset Import	Allows to upload data file to import customer asset related data.
Upload data for Cycle Count Import	Allows import of cycle count from an external system.
Upload data for Data Loader Import	Allows to upload data file to import Data Loader related data.
Upload data for Installed Base Assets Import	Allows to upload data file to import Installed Base Assets related data.
Upload data for Interfaced Pick Transactions Import	Allows to upload data file to import pick transactions for the interfaced movement requests.
Upload data for Inventory Balance Import	Allows to upload data file to import inventory balance related data.
Upload data for Inventory Reservation Import	Allows import of inventory reservation.
Upload data for Inventory Transaction Import	Allows import of inventory transaction.
Upload data for Item Import	Allows access to import items and related information.
Upload data for Maintenance Asset Import	Allows to upload data file to import maintenance asset related data.
Upload data for Maintenance Program Import	Allows to upload data file to import maintenance program related data.
Upload data for Maintenance Work Definition Import	Allows import of maintenance work definition.
Upload data for Maintenance Work Order Import	Allows to upload data file to import maintenance work order related data.
Upload data for Meter Reading Import	Allows to upload data file to import meter reading related data.

Duty Role	Description
Upload data for Meter Template Import	Allows to upload data file to import meter template related data.
Upload data for OAGIS10 Partner Messages Import	Allows to upload data file to import OAGIS10 partner messages related data.
Upload data for OAGIS7 Partner Messages Import	Allows to upload data file to import OAGIS7 partner messages related data.
Upload data for Order Fulfillment Response Import	Allows to upload data file to import Order Fulfillment Response related data.
Upload data for Order Orchestration and Planning Data Collection Import	Allows to upload data file to import collected data for order orchestration and planning.
Upload data for Price List Import	Allows to upload data file to import price list related data.
Upload data for Product Genealogy Import	Allows to upload data file to import product genealogy related data.
Upload data for Receiving Receipt Import	Allows import of receiving receipts.
Upload data for Shipment Request Import	Allows import of shipment requests.
Upload data for Shipping Transaction Import	Allows to upload data file to import shipping transaction related data.
Upload data for Source Sales Order Import	Allows to upload data file to import source sales order related data.
Upload data for Standard Cost Import	Allows to upload data file to import Standard Cost related data.
Upload data for Supplier Warranty Coverage	Allows to upload data file to import supplier warranty coverage related data.
Upload data for Supply Order Import	Allows to upload data file to import supply order related data.
Upload data for Work Definition Import	Allows import of work definition.
Upload data for Work Order Import	Allows to upload data file to import work order related data.
Upload data for Work Order Material Transaction Import	Allows to upload data file to import work order material transaction related data.
Upload data for Work Order Operation Transaction Import	Allows to upload data file to import work order operation transaction related data.

Duty Role	Description
Upload data for Work Order Resource Transaction Import	Allows to upload data file to import work order resource transaction related data.

Privileges

This table lists privileges granted to duties of the Supply Chain Integration Specialist job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Channel Integration Specialist	Manages import of transactional data from external applications into Channel Revenue Management.	Run File Import Scheduler	Allows scheduling and monitoring the process that schedules file import activities.
Channel Integration Specialist	Manages import of transactional data from external applications into Channel Revenue Management.	Set Up File Import Activity	Allows creating and maintaining import activities that contain process criteria, file mapping, and schedule to import external files containing business objects, such as customers and contacts, into staging tables.
Channel Integration Specialist	Manages import of transactional data from external applications into Channel Revenue Management.	Set Up File Import Object and Mapping	Allows reviewing and registering business objects, such as sales leads and opportunities, intended for import from external files. Also allows creating and maintaining maps of external source file columns to target staging table columns for use in importing those business objects, such as sales leads, customers, contacts, and sales catalogs.
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.

Granted Role	Granted Role Description	Privilege	Privilege Description
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Get Customer Assets by Service	Allows query of customer assets using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Get Enterprise Assets by Service	Allows the query of enterprise asset details using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Customer Assets by Service	Allows creation and update of customer assets, related configurations and structures.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Enterprise Assets by Service	Allows the management of enterprise assets using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Meter Reading History by Service	Allows the management of meter reading history using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Manage Meters by Service	Allow the creation and update of meters using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	Record Meter Readings by Service	Allows the recording of meter readings using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	View Meter Reading History by Service	Allow the query and view of meter reading history using a service.
Installed Base Web Service	Provide service access to installed base by using the REST services.	View Meters by Service	Allow the query and view of meters using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Create Maintainable Assets by Service	Allows the creation of maintainable assets using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Create Maintenance Work Orders by Service	Allows the creation of work orders using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Create Recommendations by Service	Allows the creation of recommendations using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Enterprise Assets by Service	Allows the query of enterprise asset details using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Condition Event Codes	Allow the query of asset failure condition event code using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Event Instances	Allow the query of asset failure event instance using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Events	Allow the query of asset failure event using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Sets	Allow the query of asset failure sets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Failure Symptoms	Allow the query of asset failure symptom using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Logical Hierarchy by Service	Allows retrieval of logical hierarchy details using service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Forecasts by Service	Allows query and view maintenance forecasts by service.
Maintenance Management Web Service	Provides service access to maintenance asset management	Get Maintenance Programs by Service	Allow the query of maintenance programs using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	and work execution by using the REST services.		
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Standard Operations by Service	Allows retrieval of Maintenance standard operation information, using a web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Work Order Materials by Service	Allow the query of maintenance work order materials using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Maintenance Work Order Resources by Service	Allow the query of maintenance work order resources using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Manufacturing Plant Set Up Data by Service	Allows retrieval of manufacturing setup information including work areas, work centers, resources, work definition names and work order statuses using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Project List Using Service	Allows access to REST services list of values for projects, that will be consumed cross pillars.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Recommendations by Service	Allow the query of recommendations using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Claim Labor Rates by Service	Allows query labor rates of supplier warranty claim by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Claims by Service	Allow the query of supplier warranty claims using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Contracts by Service	Allow the query of supplier warranty contracts using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Coverages by Service	Allow the query of supplier warranty coverage using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Entitlements by Service	Allow the query of supplier warranty entitlements using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Supplier Warranty Standard Repair Times by service	Allows the query standard repair time of warranty provider by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Get Work Definitions by Service	Allows retrieval of work definition information, using a web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Asset Group Rules by Service	Allows query and view of asset group rules using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Asset Groups by Service	Allows creation and update of asset group by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Enterprise Assets by Service	Allows the management of enterprise assets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Condition Event Codes	Allow the creation and update of asset failure condition event code using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Events	Allow the creation and update of asset failure event using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Sets	Allow the creation and update of asset failure sets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Failure Symptoms	Allow the creation and update of asset failure symptom using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Logical Hierarchy by Service	Allows creation and updation of logical hierarchy using service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Maintenance Programs by Service	Allow the creation and update of maintenance programs using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Maintenance Standard Operations by Service	Allows creation, update and delete of Maintenance standard operations, using a web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Manufacturing Plant Set Up Data by Service	Allows creation, update and delete of manufacturing setup information for work areas, work centers and resources using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Meter Reading History by Service	Allows the management of meter reading history using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Meters by Service	Allow the creation and update of meters using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Qualification Profiles by service	Allows the creation, update and query of qualification profiles using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Qualification Requirements by service	Allows the creation, update and query of qualification requirements using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Claim Labor Rates by Service	Allows the creation, update and query labor rates of supplier warranty claim by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Claims by Service	Allow the creation and update of supplier warranty claims using a service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Contracts by Service	Allow the creation and update of supplier warranty contracts using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Coverages by Service	Allow the creation and update of supplier warranty coverage using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Entitlements by Service	Allow the creation and update of supplier warranty entitlements using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Supplier Warranty Standard Repair Times by Service	Allows the creation, update and query standard repair time of warranty provider by service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Manage Work Definitions by Service	Allows creation, update and delete of work definitions, related priorities, and versions, using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Record Meter Readings by Service	Allows the recording of meter readings using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Report Maintenance Material Transactions by Service	Allows the reporting of a work order material transaction using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Report Maintenance Operation Transactions by Service	Allows the reporting of a work order operation transaction using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Report Maintenance Resource Transactions by Service	Allows the reporting of a work order resource transaction using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Update Maintainable Assets by Service	Allows the update of maintainable assets using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management	Update Maintenance Forecasts by Service	Allows update, query and view maintenance forecasts by service.

Granted Role	Granted Role Description	Privilege	Privilege Description
	and work execution by using the REST services.		
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Update Maintenance Work Orders by Service	Allows the update of work orders using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	Update Recommendations by Service	Allows the update of recommendations using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Feature States Value by Web Service	Allow viewing feature states value by web service
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Item Lot and Item Serial List of Values by Web Service	Allows viewing lot and serial number list of values using web service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Maintainable Assets by Service	Allows the retrieval of maintainable asset details using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Maintenance Work Orders by Service	Allows the retrieval of work orders using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Meter Reading History by Service	Allow the query and view of meter reading history using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Meters by Service	Allow the query and view of meters using a service.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Purchasing Document List of Values using REST Service	Allows access to REST services list of values for purchasing documents that will be consumed cross pillars.
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Subinventory and Locator List of Values by Web Service	Allows viewing subinventory and locator list of values using web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Maintenance Management Web Service	Provides service access to maintenance asset management and work execution by using the REST services.	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Manage Item Redwood	Allows users to create and edit item details.	Create Item Structure	Allows access to create item structure action from regional task pane.
Manage Item Redwood	Allows users to create and edit item details.	Enter Trading Community Organization Information	Allows the specification of organization information.
Manage Item Redwood	Allows users to create and edit item details.	Get New Item Request Rest	Allows query and return of the NIR setup details.
Manage Item Redwood	Allows users to create and edit item details.	Get Redwood Settings REST	Allows query access to settings through the REST API.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Associations	Allow access to view the create and edit associations tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Attachments	Allow access to create and edit the attachment tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Item Categories	Allow access to create and edit the item changes tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Items	Allow access to create and edit the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Relationships	Allow access to create and edit the relationships tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Redwood Structures	Allow access to create and edit the item structures tab in the Manage Item Redwood page.
Manage Item Redwood	Allows users to create and edit item details.	Manage Item Status REST	Allows access to view and manage item statuses.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Association Rest	Allows Redwood custom actions create/update item to create and edit supplier associations for items.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Supplier Associations	Allows access to view and manage Redwood item supplier associations for which the user has at the minimum view privilege.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Item Translation	Allow access to manage translations for items in the translation editor.
Manage Item Redwood	Allows users to create and edit item details.	Manage Redwood Revision Rest	Allows access to view and manage item revisions.
Manage Item Redwood	Allows users to create and edit item details.	Remove Trading Community Organization	Allows the removal of organizations. If assigning, also assign the ability to view the trading community organization.
Manage Item Redwood	Allows users to create and edit item details.	Update Trading Community Organization	Allows the update of the organization relationship information. If assigning, also assign the ability to view the trading community organization relationship.
Manage Item Redwood	Allows users to create and edit item details.	View Subscription Coverage Templates	Allows users to retrieve subscription coverage templates for association purposes
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Organization	Allows exporting, searching, and viewing of organization details such as addresses, classifications, identifiers, and names.
Manage Item Redwood	Allows users to create and edit item details.	View Trading Community Person	Allows exporting, searching, and viewing of person details such as addresses, classifications, identifiers, and names.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Manufacturer Attributes for Indexing Using REST	Allows access to manufacturer attributes that are available for indexing, using a REST service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Proposal Attributes for Indexing Using REST	Allows access to proposal attributes that are available for indexing, using a REST service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Access Users	Allow access to view and select users from a lookup in Redwood.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Browse Item	Allows access to browse for items using item class and catalog hierarchies.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Configure Access Control Teams, Permission Sets, and Conditions	Allows configuration of teams, permission sets, and conditions using the UI or the REST interface.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	GET Product Management Index REST	Allows access to view indexed attributes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Category Rest	Allows query access to item categories through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Class Rest	Allows query access to item Classes through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Cost Rest	Allows query access to item costs through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Index Available Attributes REST	Allows access to view available attributes for item.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Item Rest	Allows query access to items through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get Search View REST	Allows query of search views.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Get View Available Attribute REST	Allows access to query and view available attributes for the view.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Import Item	Allows access to import items and related information.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage File Import and Export	Privilege to manage import and export of files.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Guided Task Builder	Allows access to build, run and manage guided task flows.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Attribute Control	Allows access to manage attribute controls on item operational attributes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Catalog	Allows access to view and manage item catalogs including categories and category hierarchies.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Change Order Status	Allows access to create and manage statuses for change orders.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Change Order Type	Allows access to create and manage change order types.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Child Value Set	Allows access to create and manage child value sets.

Granted Role	Granted Role Description	Privilege	Privilege Description
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Class	Allows access to view and manage item classes including item class hierarchy.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Cost Rest	Allows management of item costs through the REST API.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Default Functional Area	Allows access to manage default item catalog associations to functional areas.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Keyword Search Attribute	Allow management of attributes that are added to the keyword search.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Lifecycle Phase	Allows access to create and manage item lifecycle phases.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Status	Allows access to manage item statuses.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Item Structure Type	Allows access to manage item structure type details.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Product Management Index	Allows access to view and edit the index for an object.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Product Management Index REST	Allows access to view and manage Product Management Indicies.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Product Management View	Allows access to view and edit the view for an object.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty	Manage Related Item Type	Allows access to related item types.

Granted Role	Granted Role Description	Privilege	Privilege Description
	role includes all setup duty roles available for this product.		
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Manage Search View REST	Allows access to view and manage search views.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	Rebuild Product Management Indexes	Allow access to ESS Job PMESIndexMaintenanceJob to maintain Product Management Indexes.
Product Model Administration	Administers tasks required to setup Oracle Fusion Product Model. Duty role includes all setup duty roles available for this product.	View Item Class	Allows read only access to item class data.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Access Change Order Using a REST Service	Permits access to change order using REST services
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Access Change Types Using a REST Service	Allows retrieval of all change types using REST services.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Access Product Development Configurations Using a REST Service	Permits access to configure data in Product Development using REST services, including master organization setup.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Access Proposal Using REST Service	Permits access to proposals using REST services
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Access Relationships for Product Development Objects Using a REST Service	Permits access to retrieve relationship data for Product Development objects using REST services

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Create Inventory Transaction Process	Allows creation of inventory transactions.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Define Standard Costs	Allows definition of standard costs.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Delete Collaboration Order Forecasts	Allows deletion of current collaboration order forecasts.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Export Collaboration Order Forecasts	Allows creation of and saving a comma-separated values file with collaboration order forecasts measures from Supply Chain Collaboration.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Export Supplier On-Hand Quantities	Allows an enterprise user to export supplier on-hand quantities from supply chain collaboration.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Import Collaboration Order Forecast Requests using a Web Service	Allows creation and viewing of collaboration order forecast requests in the Supply Chain Collaboration interface tables using a web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Import Collaboration Order Forecasts	Allows creation of collaboration order forecast data records in the Supply Chain Collaboration interface tables using a file-based data import template.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Import Cycle Count Sequences	Allows import of cycle count sequences from an external system.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Import Product Genealogy	Allows import of genealogy structures and transactions from third party systems.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Collaboration Order Forecasts using a Web Service	Allows management of collaboration order forecasts using a web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Cost Adjustments by Web Service	Allows the user to use a web service to manage cost adjustments.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Customer Demand Using a Web Service	Allows management of customer demand using a web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Import of Application Attachments	Allows importing of Application Attachments.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Inventory Reservation Interface Process	Allows management of reservation requests.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Overhead Rules by Web Service	Allows the user to use a web service to manage and define overhead rules.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Replenishment Requests using a Web Service	Allows management of replenishment requests using a web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Supplier On-Hand Quantities Using a Web Service	Allows management of supplier on-hand quantities by using a web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Supply Data for Externally Managed Organizations Using a Web Service	Allows management of supply data for externally managed organizations by using a web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage Units Of Measure by Web Service	Allow managing units of measure by web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Manage VMI Items using a Web Service	Allows management of vendor-managed inventory items using a web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Receive Shipment Request	Allows receipt of shipment requests.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Submit Inventory Transaction Process	Allows submission of the inventory transaction process.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	Submit Receiving Transaction Manager	Allows submission of receiving transaction manager.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	View Collaboration Order Forecasts History using a Web Service	Allows viewing the historical collaboration order forecasts using a web service.
Supply Chain Integration Specialist	Individual responsible for planning, coordinating, and supervising all activities related to the integration of supply chain management information systems.	View Item Costs by Web Service	Allows the usage of a web service to review item costs.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Supply Chain Integration Specialist job role.

Business Object	Policy Description	Policy Store Implementation
Application Objects	A Supply Chain Integration Specialist can manage application objects for the item classes they have access to	Role: Product Model Administration Privilege: Manage Application Objects (Data) Resource: Application Objects
Application Objects	A Supply Chain Integration Specialist can manage application objects for the items they have access to in item and inventory organizations	Role: Product Model Administration Privilege: Manage Application Objects (Data) Resource: Application Objects
File Import Activity	A Supply Chain Integration Specialist can view channel batch transaction file import activity object type for all channel batch transaction file import activities in the enterprise	Role: Channel Integration Specialist Privilege: View Channel Batch Transaction File Import Activity Object Type (Data) Resource: File Import Activity
File Import Activity	A Supply Chain Integration Specialist can view file import activity for all standard file import activities that are accessible for supply chain integration specialist	Role: Supply Chain Integration Specialist Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Activity	A Supply Chain Integration Specialist can view standard file import activity object type for all standard file import activities that are accessible for channel integration specialist	Role: Channel Integration Specialist Privilege: View Standard File Import Activity Object Type Resource: File Import Activity
File Import Mapping	A Supply Chain Integration Specialist can view channel batch transaction file import mapping object type for all channel batch transaction file import mappings in the enterprise	Role: Channel Integration Specialist Privilege: View Channel Batch Transaction File Import Mapping Object Type (Data) Resource: File Import Mapping
File Import Mapping	A Supply Chain Integration Specialist can view file import mapping for all standard file import maps that are accessible for supply chain integration specialist	Role: Supply Chain Integration Specialist Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping

Business Object	Policy Description	Policy Store Implementation
File Import Mapping	A Supply Chain Integration Specialist can view standard file import mapping object type for all standard file import maps that are accessible for channel integration specialist	Role: Channel Integration Specialist Privilege: View Standard File Import Mapping Object Type Resource: File Import Mapping
File Import Object	A Supply Chain Integration Specialist can view channel batch transaction file import object type for all channel batch transaction file import objects in the enterprise	Role: Channel Integration Specialist Privilege: View Channel Batch Transaction File Import Object Type (Data) Resource: File Import Object
Sales Objects	A Supply Chain Integration Specialist can view sales objects for all standard file import export objects that are accessible for supply chain integration specialist	Role: Supply Chain Integration Specialist Privilege: View Standard File Import Export Object Type Resource: Sales Objects
Sales Objects	A Supply Chain Integration Specialist can view standard file import export object type for all standard file import export objects that are accessible for channel integration specialist	Role: Channel Integration Specialist Privilege: View Standard File Import Export Object Type Resource: Sales Objects

Sustainability Analyst (Job Role)

Professional responsible for the creation and posting of activity records for sustainability reporting.

Role Hierarchy

The Sustainability Analyst job role directly and indirectly inherits these roles.

- Sustainability Analyst
  - Functional Setups
  - Sustainability Activity Administration
    - FSCM Load Interface Administration
  - Sustainability Activity Authoring
  - Sustainability Activity Inquiry
  - Sustainability Activity Invoice Classification Rule Management
  - Sustainability Application Administration Viewing
  - Upload data for Sustainability Activity Import
  - Use REST Service - Guided Journey Responses
  - Use REST Service - Guided Journeys Read Only

Duties

This table lists the duties assigned directly and indirectly to the Sustainability Analyst job role.

Duty Role	Description
FSCM Load Interface Administration	Manages load interface file for import
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified invoices, validate activities, and post activities to the sustainability ledger.
Sustainability Activity Authoring	Create and update sustainability activities.
Sustainability Activity Inquiry	Search for and review sustainability activities.
Sustainability Activity Invoice Classification Rule Management	Perform invoice classification rule management tasks for sustainability activities.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.
Upload data for Sustainability Activity Import	Allows to upload data file to import sustainability impact related data.

Duty Role	Description

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Sustainability Analyst job role.

Aggregate Privilege	Description
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.

Privileges

This table lists privileges granted to duties of the Sustainability Analyst job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.

Granted Role	Granted Role Description	Privilege	Privilege Description
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified invoices, validate activities, and post activities to the sustainability ledger.	Generate Sustainability Activity from Payables Invoice	Allows a user to run the Generate Sustainability Activities from Payable Invoices scheduled process.
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified invoices, validate activities, and post activities to the sustainability ledger.	Import Sustainability Activity	Allows a user to run the Import Sustainability Activities scheduled process.
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified invoices, validate activities, and post activities to the sustainability ledger.	Process Sustainability Activity	Allows a user to run the Process Sustainability Activities scheduled process to perform mass validations with an option to post activities to the sustainability ledger.
Sustainability Activity Authoring	Create and update sustainability activities.	Get Item Rest	Allows query access to items through the REST API.
Sustainability Activity Authoring	Create and update sustainability activities.	Manage Sustainability Activity	Allows management of sustainability activities except actions to post and cancel activities.
Sustainability Activity Authoring	Create and update sustainability activities.	Post Sustainability Activity to Ledger	Allows posting of sustainability activities to the ledger and cancellation of sustainability activities.
Sustainability Activity Authoring	Create and update sustainability activities.	Search Sustainability Activity	Allows a user to search sustainability activities.
Sustainability Activity Authoring	Create and update sustainability activities.	View Legal Entity List of Values using REST Service	Allows access to REST services list of values for legal entities assigned to sustainability ledgers.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sustainability Activity Authoring	Create and update sustainability activities.	View Payables Invoice	Allows viewing of Oracle Fusion Payables invoices without performing a search.
Sustainability Activity Authoring	Create and update sustainability activities.	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Sustainability Activity Authoring	Create and update sustainability activities.	View Sustainability Activity	Allows searching and viewing of sustainability activities.
Sustainability Activity Authoring	Create and update sustainability activities.	View Sustainability Activity Work Area	Allows access to the sustainability activity work area.
Sustainability Activity Authoring	Create and update sustainability activities.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Sustainability Activity Inquiry	Search for and review sustainability activities.	Search Sustainability Activity	Allows a user to search sustainability activities.
Sustainability Activity Inquiry	Search for and review sustainability activities.	View Payables Invoice	Allows viewing of Oracle Fusion Payables invoices without performing a search.
Sustainability Activity Inquiry	Search for and review sustainability activities.	View Sustainability Activity	Allows searching and viewing of sustainability activities.
Sustainability Activity Inquiry	Search for and review sustainability activities.	View Sustainability Activity Work Area	Allows access to the sustainability activity work area.
Sustainability Activity Invoice Classification Rule Management	Perform invoice classification rule management tasks for sustainability activities.	Manage Invoice Classification Rule for Sustainability Activities	Allows management of invoice classification rules for sustainability activities.
Sustainability Analyst	Professional responsible for the creation and posting of activity records for sustainability reporting.	Access HCM Common Components	Allows access to HCM common components.
Sustainability Analyst	Professional responsible for the creation and posting of activity records for sustainability reporting.	Manage Emission Factor	Allows management of emission factor mappings.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	Search Emission Factor	Allows a user to search emission factor mappings.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Emission Factor	Allows searching and viewing of emission factor mappings.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Global Warming Potential	Allows searching and viewing of global warming potentials of green house gases.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Activity Type	Allows searching and viewing of sustainability activity types.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Facility	Allows searching and viewing of sustainability facilities.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Ledger	Allows searching and viewing of sustainability ledgers.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Ledger Period	Allows searching and view of sustainability ledger periods.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Sustainability Analyst job role.

Business Object	Policy Description	Policy Store Implementation
Classification Data Set	A Sustainability Analyst can manage classification data set for classification dataset owned by sustainability entity	Role: Sustainability Analyst Privilege: Manage Spend Classification Application (Data) Resource: Classification Data Set
Classification Rule	A Sustainability Analyst can manage classification rule for invoice classification rules owned by sustainability entity	Role: Sustainability Analyst Privilege: Manage Spend Classification Application (Data) Resource: Classification Rule
Guided Journey Response	A Sustainability Analyst can manage guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: Manage Guided Journey Response (Data) Resource: Guided Journey Response
Guided Journey Response	A Sustainability Analyst can view guided journey response for guided journey responses that i have provided	Role: Use REST Service - Guided Journey Responses Privilege: View Guided Journey Response (Data) Resource: Guided Journey Response
Journey	A Sustainability Analyst can view journey for journeys to which they have been granted access	Role: Use REST Service - Guided Journeys Read Only Privilege: View Journey (Data) Resource: Journey

Sustainability Application Administrator (Job Role)

Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.

Role Hierarchy

The Sustainability Application Administrator job role directly and indirectly inherits these roles.

- Sustainability Application Administrator
  - Application World Reference Administration
  - Functional Setups
  - Manage Guided Journeys
  - Manage Users
    - Manage User Account
      - Edit User Name
      - Manage User Roles
      - Use REST Service - Public Workers Read Only
  - Supplier Profile Inquiry
    - Supplier Qualification Viewing
  - Sustainability Application Administration Management
  - Sustainability Application Administration Viewing
  - Use REST Service - Guided Journey Responses
  - Use REST Service - Guided Journeys Read Only
  - Use REST Service - Journey Categories List of Values

Duties

This table lists the duties assigned directly and indirectly to the Sustainability Application Administrator job role.

Duty Role	Description
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Manage User Account	Manages user roles.
Manage Users	Creates and updates users and assigns roles to users.
Supplier Profile Inquiry	View supplier profile information.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.

Duty Role	Description
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Sustainability Application Administrator job role.

Aggregate Privilege	Description
Edit User Name	Updates the user name associated with a person.
Manage Guided Journeys	Allows management of guided journeys.
Manage User Roles	Allows management of user roles assignments.
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.
Use REST Service - Journey Categories List of Values	Allows the user to call the GET method associated with the Journey Categories List of Values REST Service.
Use REST Service - Public Workers Read Only	Allows the user to call the GET method associated with the Public Workers REST Service.

Privileges

This table lists privileges granted to duties of the Sustainability Application Administrator job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
Application World Reference Administration	Manages application reference industry, territory, time zone,	Manage Application Reference Currency	Manage currencies used by applications.

Granted Role	Granted Role Description	Privilege	Privilege Description
	currency, and language, including natural and ISO language.		
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference ISO Language	Manage ISO Languages used by applications.
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Industry	Manage Industries used by applications
Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Language	Manage Languages used by applications

Application World Reference Administration	Manages application reference industry, territory, time zone, currency, and language, including natural and ISO language.	Manage Application Reference Timezone	Manage Timezones used by applications
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Manage User Account	Manages user roles.	Copy Personal Data to LDAP	Allows copy of worker personal data to LDAP
Manage User Account	Manages user roles.	Manage User Account	Allows access to Manage User Account.

Granted Role	Granted Role Description	Privilege	Privilege Description
Manage User Account	Manages user roles.	Manage User Account and My Account	Allows access to the page components that are common to My Account and Manage User Account.
Manage User Account	Manages user roles.	Reset Password	Allows reset password links to be emailed to users.
Manage Users	Creates and updates users and assigns roles to users.	Manage User Details	Allows management of user account information.
Supplier Profile Inquiry	View supplier profile information.	Access HCM Common Components	Allows access to HCM common components.
Supplier Profile Inquiry	View supplier profile information.	Manage External Payee Payment Details	Allows management of external payee payment details.
Supplier Profile Inquiry	View supplier profile information.	Manage Payment Instrument Assignment	Allows creation of payment instrument assignment
Supplier Profile Inquiry	View supplier profile information.	Manage Third Party Bank Account	Allows update of external bank accounts.
Supplier Profile Inquiry	View supplier profile information.	Run Supplier Background Scheduler	Allows internal users to automatically start scheduled ESS jobs, such as calculating supply base data, sync keyword search and update keyword search based on the frequency setting.
Supplier Profile Inquiry	View supplier profile information.	Search Supplier	Allows searching of suppliers.
Supplier Profile Inquiry	View supplier profile information.	View Location of Final Discharge	Allows view of location of final discharge.
Supplier Profile Inquiry	View supplier profile information.	View Party Fiscal Classification	Allows viewing of tax classifications used by a tax authority to categorize a party and is applicable in the tax determination process.
Supplier Profile Inquiry	View supplier profile information.	View Supplier	Allows access to the supplier profile.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Address	Allows access to supplier addresses.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Attachment	Allows access to supplier attachments.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supplier Profile Inquiry	View supplier profile information.	View Supplier Business Classification	Allows access to supplier business classifications.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Contact	Allows access to supplier contacts.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Contact Change Request	Allows access to supplier contact change request details.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Contact User Account	Allows access to the user account for supplier contacts.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Income Tax	Allows access to supplier income tax reporting information.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Payment	Allows access to supplier site payment terms and controls.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Products and Services Categories	Allows access to supplier products and services categories.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Profile Change Request	Allows access to supplier profile change request details.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Registration Bank Account	Allows access to bank account information on supplier registration requests.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Registration Request	Allows access to supplier registration request details.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Site	Allows access to supplier sites information.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Site Assignment	Allows access to supplier site assignment information.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Site Invoicing Information	Allows access to supplier site invoicing terms and controls.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Site Purchasing Information	Allows access to supplier site purchasing terms and controls.
Supplier Profile Inquiry	View supplier profile information.	View Supplier Site Receiving Information	Allows access to supplier site receiving terms and controls.

Granted Role	Granted Role Description	Privilege	Privilege Description
Supplier Profile Inquiry	View supplier profile information.	View Supplier Transaction Tax	Allows access to supplier transaction tax information.
Supplier Profile Inquiry	View supplier profile information.	View Third Party Bank Account	Allows viewing of external bank accounts.
Supplier Profile Inquiry	View supplier profile information.	View Third-Party Site Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third-party site's transaction tax activities.
Supplier Profile Inquiry	View supplier profile information.	View Third-Party Tax Profile	Allows viewing of tax profiles that contain tax information that relate to a third party's transaction tax activities.
Supplier Profile Inquiry	View supplier profile information.	View Trading Community Common Setup	Allows viewing of common setup data through web services.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	Search Supplier Assessment	Allows users to search for a supplier assessment.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	Search Supplier Qualification	Allows users to search for a supplier qualification.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Assessment	Allows users to view a supplier assessment.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Qualification	Allows users to view a supplier qualification.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Qualification Initiative	Allows users to view a supplier qualification initiative.
Supplier Qualification Viewing	An enterprise user can search and view supplier qualifications.	View Supplier Qualification Question	Allows users to view a supplier qualification question.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Get Enterprise Structures Using REST Service	Allows access to REST services list of values for various XLE, GL, FUN Intercompany setup related business objects that will be consumed cross pillars.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Get Item Rest	Allows query access to items through the REST API.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Manage Emission Factor	Allows management of emission factor mappings.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Manage Global Warming Potential	Allows management of global warming potentials of green house gases.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Manage Sustainability Activity Type	Allows management of sustainability activity types.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Manage Sustainability Facility	Allows management of sustainability facilities.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Manage Sustainability Ledger	Allows management of sustainability ledgers.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Migrate Sustainability Profile Options	Allows migration of sustainability profile options.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	Search Sustainability Activity	Allows a user to search sustainability activities.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor	View Legal Entity List of Values using REST Service	Allows access to REST services list of values for legal entities assigned to sustainability ledgers.

Granted Role	Granted Role Description	Privilege	Privilege Description
	mappings, global warming potentials, and facilities		
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	View Sustainability Activity	Allows searching and viewing of sustainability activities.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	View Sustainability Activity Work Area	Allows access to the sustainability activity work area.
Sustainability Application Administration Management	Perform sustainability setup tasks including defining sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	Search Emission Factor	Allows a user to search emission factor mappings.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Emission Factor	Allows searching and viewing of emission factor mappings.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Global Warming Potential	Allows searching and viewing of global warming potentials of green house gases.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger,	View Sustainability Activity Type	Allows searching and viewing of sustainability activity types.

Granted Role	Granted Role Description	Privilege	Privilege Description
	activity types, emission factor mappings, global warming potentials, and facilities.		
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Facility	Allows searching and viewing of sustainability facilities.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Ledger	Allows searching and viewing of sustainability ledgers.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Ledger Period	Allows searching and view of sustainability ledger periods.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Access HCM Common Components	Allows access to HCM common components.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Administer Sandbox	Allows administration of all sandboxes.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Define Accounting Calendar	Allows definition of periods used to record and report accounting transactions.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Edit Page Layout of the Sustainability Activities Dashboard Page	Allows configuration of the KPIs and data visualizations to include on the Sustainability Activities Dashboard page.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Grant Search Framework Manager Permissions	Allows granting permission to a user to manage search framework index metadata, using REST Service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Maintain Reports and Analytics Region	Allows selection of reports to appear in the Reports and Analytics region of Oracle Fusion Applications work areas.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage All Application Profile Values	Allows management of all application profile option settings and values at various levels to control application behavior.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Application Descriptive Flexfield	Allows management of application descriptive flexfields.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Application Flexfield Value Set	Allows management of value sets to validate the content of a flexfield segment. Value sets provide declarative validation for use in applications flexfield attributes and key segments.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Application Message	Manage an end-user message, shown in the User Interface. Messages can have different types, such as Error, Warning, Information. Messages are translated and can be re-used across products. Exampe: "File not found", "Table '&TABLE' does not exist".
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Application Standard Lookup	Manage sub-type entities stored in the Application Standard Lookup Values entity. Lookup Types are lists of values such as "Days of the Week" or "Yes/No" which can be used to validate columns values.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Help Content	Allows addition, modification, and maintenance of help content.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Item Class	Allows access to view and manage item classes including item class hierarchy.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Scheduled Job Definition	Manage the definition of a Scheduled Job
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Scheduled Processes	Allows management of Scheduled Processes
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Search Views	Allows the user to manage the search views.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	Manage Unit of Measure	Allows configuration of UOMs, UOM classes, and definition of standard, interclass, and intraclass UOM conversions.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	View Accounting Calendar	Allows view access to existing groupings of accounting periods.
Sustainability Application Administrator	Responsible for technical aspects of keeping sustainability applications systems available as well as configuring the applications to meet the needs of the business.	View Administration Link	Privilege to view administration link in UI shell

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Sustainability Application Administrator job role.

Business Object	Policy Description	Policy Store Implementation
Application Attachment	A Sustainability Application Administrator can read application attachment for the supplier assessment categories including internal to supplier qualification, miscellaneous	Role: Supplier Profile Inquiry Privilege: Read Application Attachment Resource: Application Attachment

Sustainability Controller (Job Role)

Professional responsible for the review of sustainability analytics to ensure progress is in line with the company's sustainability goals.

Role Hierarchy

The Sustainability Controller job role directly and indirectly inherits these roles.

- Sustainability Controller
  - Functional Setups
  - Sustainability Activity Administration
    - FSCM Load Interface Administration
  - Sustainability Activity Authoring
  - Sustainability Activity Inquiry
  - Sustainability Activity Invoice Classification Rule Management
  - Sustainability Application Administration Viewing
  - Upload data for Sustainability Activity Import
  - Use REST Service - Guided Journey Responses
  - Use REST Service - Guided Journeys Read Only

Duties

This table lists the duties assigned directly and indirectly to the Sustainability Controller job role.

Duty Role	Description
FSCM Load Interface Administration	Manages load interface file for import
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified invoices, validate activities, and post activities to the sustainability ledger.
Sustainability Activity Authoring	Create and update sustainability activities.
Sustainability Activity Inquiry	Search for and review sustainability activities.
Sustainability Activity Invoice Classification Rule Management	Perform invoice classification rule management tasks for sustainability activities.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.
Upload data for Sustainability Activity Import	Allows to upload data file to import sustainability impact related data.

Aggregate Privileges

This table lists aggregate privileges assigned directly and indirectly to the Sustainability Controller job role.

Aggregate Privilege	Description
Use REST Service - Guided Journey Responses	Allows the user to call all methods associated with the Guided Journey Responses REST service.
Use REST Service - Guided Journeys Read Only	Allows the user to call the GET method associated with the Guided Journeys REST service.

Privileges

This table lists privileges granted to duties of the Sustainability Controller job role.

Granted Role	Granted Role Description	Privilege	Privilege Description
FSCM Load Interface Administration	Manages load interface file for import	Access FSCM Integration Rest Service	Allow financials and supply chain users to access the methods associated with the Integration Rest Service.
FSCM Load Interface Administration	Manages load interface file for import	Load File to Interface	Allows file data load to interface tables
FSCM Load Interface Administration	Manages load interface file for import	Load Interface File for Import	Allows a user to load interface file for import
FSCM Load Interface Administration	Manages load interface file for import	Manage File Import and Export	Privilege to manage import and export of files.
FSCM Load Interface Administration	Manages load interface file for import	Transfer File	Allows management of file transfer from server
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Execute Setup Tasks	Allows setup task execution and searching of tasks and tasks lists.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Applications Offering	Provides access to the Getting Started page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Review Setups Functional User Overview	Allows access to the Assigned Implementation Tasks page.
Functional Setups	Uses the functional user overview, and assigned tasks, and task lists.	Setup and Maintain Applications	Allows access to the Setup and Maintenance work area.
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified invoices, validate activities, and post activities to the sustainability ledger.	Generate Sustainability Activity from Payables Invoice	Allows a user to run the Generate Sustainability Activities from Payable Invoices scheduled process.
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified	Import Sustainability Activity	Allows a user to run the Import Sustainability Activities scheduled process.

Granted Role	Granted Role Description	Privilege	Privilege Description
	invoices, validate activities, and post activities to the sustainability ledger.		
Sustainability Activity Administration	Perform sustainability activity administration tasks including importing sustainability activities from external applications, generate activities from classified invoices, validate activities, and post activities to the sustainability ledger.	Process Sustainability Activity	Allows a user to run the Process Sustainability Activities scheduled process to perform mass validations with an option to post activities to the sustainability ledger.
Sustainability Activity Authoring	Create and update sustainability activities.	Get Item Rest	Allows query access to items through the REST API.
Sustainability Activity Authoring	Create and update sustainability activities.	Manage Sustainability Activity	Allows management of sustainability activities except actions to post and cancel activities.
Sustainability Activity Authoring	Create and update sustainability activities.	Post Sustainability Activity to Ledger	Allows posting of sustainability activities to the ledger and cancellation of sustainability activities.
Sustainability Activity Authoring	Create and update sustainability activities.	Search Sustainability Activity	Allows a user to search sustainability activities.
Sustainability Activity Authoring	Create and update sustainability activities.	View Legal Entity List of Values using REST Service	Allows access to REST services list of values for legal entities assigned to sustainability ledgers.
Sustainability Activity Authoring	Create and update sustainability activities.	View Payables Invoice	Allows viewing of Oracle Fusion Payables invoices without performing a search.
Sustainability Activity Authoring	Create and update sustainability activities.	View Supplier List of Values Using REST Service	Allows access to REST services list of values for suppliers that will be consumed cross pillars.
Sustainability Activity Authoring	Create and update sustainability activities.	View Sustainability Activity	Allows searching and viewing of sustainability activities.
Sustainability Activity Authoring	Create and update sustainability activities.	View Sustainability Activity Work Area	Allows access to the sustainability activity work area.
Sustainability Activity Authoring	Create and update sustainability activities.	View Units Of Measure List of Values by Web Service	Allow viewing units of measure list of values by web service.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sustainability Activity Inquiry	Search for and review sustainability activities.	Search Sustainability Activity	Allows a user to search sustainability activities.
Sustainability Activity Inquiry	Search for and review sustainability activities.	View Payables Invoice	Allows viewing of Oracle Fusion Payables invoices without performing a search.
Sustainability Activity Inquiry	Search for and review sustainability activities.	View Sustainability Activity	Allows searching and viewing of sustainability activities.
Sustainability Activity Inquiry	Search for and review sustainability activities.	View Sustainability Activity Work Area	Allows access to the sustainability activity work area.
Sustainability Activity Invoice Classification Rule Management	Perform invoice classification rule management tasks for sustainability activities.	Manage Invoice Classification Rule for Sustainability Activities	Allows management of invoice classification rules for sustainability activities.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	Search Emission Factor	Allows a user to search emission factor mappings.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Emission Factor	Allows searching and viewing of emission factor mappings.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Global Warming Potential	Allows searching and viewing of global warming potentials of green house gases.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Activity Type	Allows searching and viewing of sustainability activity types.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Facility	Allows searching and viewing of sustainability facilities.

Granted Role	Granted Role Description	Privilege	Privilege Description
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Ledger	Allows searching and viewing of sustainability ledgers.
Sustainability Application Administration Viewing	Search for and review sustainability setups including sustainability options, sustainability ledger, activity types, emission factor mappings, global warming potentials, and facilities.	View Sustainability Ledger Period	Allows searching and view of sustainability ledger periods.
Sustainability Controller	Professional responsible for the review of sustainability analytics to ensure progress is in line with the company's sustainability goals.	Access HCM Common Components	Allows access to HCM common components.
Sustainability Controller	Professional responsible for the review of sustainability analytics to ensure progress is in line with the company's sustainability goals.	Manage Emission Factor	Allows management of emission factor mappings.
Sustainability Controller	Professional responsible for the review of sustainability analytics to ensure progress is in line with the company's sustainability goals.	Manage Sustainability Ledger Period	Allows management of sustainability ledger periods.

Data Security Policies

This table lists data security policies and their enforcement across analytics application for the Sustainability Controller job role.

Business Object	Policy Description	Policy Store Implementation
Classification Data Set	A Sustainability Controller can manage classification data set for classification dataset owned by sustainability entity	Role: Sustainability Controller Privilege: Manage Spend Classification Application (Data) Resource: Classification Data Set
Classification Rule	A Sustainability Controller can manage classification rule for invoice classification rules owned by sustainability entity	Role: Sustainability Controller Privilege: Manage Spend Classification Application (Data) Resource: Classification Rule
