

# Oracle Machine Learning for Python Known Issues

Learn about the issues you may encounter when using Oracle Machine Learning for Python and how to work around them.

## Topics:

- [The online help for `oml.Datetime.replace` incorrectly states that `oml.integer` is supported for the year, month, day, hour minute, second, and microsecond arguments](#)
- [oml.Integer math methods fail with numeric values](#)

## The online help for `oml.Datetime.replace` incorrectly states that `oml.integer` is supported for the year, month, day, hour minute, second, and microsecond arguments

Running the help file for `oml.Datetime.replace` states that the `oml.integer` is supported for the year, month, day, hour minute, second, and microsecond arguments but it is not yet supported:

```
help(oml.Datetime.replace)
```

## `oml.Integer` math methods fail with numeric values

Running the `oml.integer` math method fails with the numeric values.

```
import oml
DF = oml.push(pd.DataFrame(range(5), columns=['X']))
```

```
X_min = DF['X'].min()
DF['X'] - X_min
```

The output returns `TypeError: 'other' must be a oml.Integer, int, oml.Float, or float object`.

### Workaround

The workaround is to cast `DF['X']` to an `oml.Float` data type:

```
oml.Float(DF['X']) - X_min
```

The output returns `[0, 1, 2, 3, 4]`.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

## Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.
