Action: Specify additional arguments or precede the command with help.

DIA-48900: Illegal Input Argument [<varname>string</varname>]

Cause: The input argument is invalid

Action: Check the input parameter

DIA-48906: Parser context is not valid

Cause: The parser context is not initialized

Action: Call the initialization routine first before using the context

DIA-48907: The end of file is reached

Cause: The end of file is reached

Action: Handle the end of file

DIA-48908: No trace files are found

Cause: This is no file in the navigator context, either it is done with parsing, or no file is pushed

Action: Check if the file is added to the context

DIA-48909: Scan context is not initialized

Cause: The scan context is not initialized

Action: call the initialization routine of the scan context

DIA-48912: The specified trace filename is too long

Cause: The resulting trace filename length exceeds the maximum length

Action: Use a smaller trace filename suffix or move ADR higher in the directory hierarchy

DIA-48913: Writing into trace file failed, file size limit [<varname>string</varname>] reached

Cause: An attempt was made to write into a trace file that exceeds the trace's file size limit

Action: increase the trace's file size limit.

DIA-48914: File position is not in right format

Cause: The file position format is not right

Action: Check if the file format string is the right one

DIA-48928: The predicate exceeds the max limit <varname>string</varname>

Cause: The predicate is too long, exceeds the max limit

Action: Use a shorter predicate

DIA-48929: The trace record size exceeded the max size that can be read [<varname>string</varname>]

Cause: A trace record is too large to be read by the ADR viewer

Action: Report to Oracle

DIA-48930: Cannot allocate memory for processing traces

Cause: A memory allocation request failed

Action: Report to Oracle

DIA-48934: invalid input for the file name identifier

Cause: An invalid input was given for the file name identifier. The file name is not allowed to have slashes ('/', '\') and is not allowed to refer to the parent directory using the '..' characters.

Action: Check the file name and provide a valid input.

DIA-48936: The number of relations exceeds maximum number [<varname>string</varname>]

Cause: Too many relations listed

Action: Reduce the number

DIA-48937: Feature (<varname>string</varname>) currently not allowed for SELECT

Cause: Feature is not allowed

Action: Remove feature

DIA-48938: View select column count differs from select alias list

Cause: The view alias list has a different number of fields than the select list"

Action: Change the alias list or view select statement

DIA-48939: Select * not allowed in a CREATE VIEW

Cause: * is currently not allowed for a create view select list

Action: List the fields explicitly

DIA-49315: Invalid incident type specified [<varname>string</varname>]

Cause: The specified incident type is not defined in this ADR.

Action: Specify an available incident type.

DIA-49404: No such package [<varname>string</varname>]

Cause: The specified package does not exist.

Action: Specify an existing package.

**DIA-49405: Cannot change package name [<varname>string</varname>]
[<varname>string</varname>]**

Cause: Attempted to change package name after package generation.

Action: Use current name, or create a new package with the desired name.

DIA-49406: Undefined configuration parameter specified [<varname>string</varname>]

Cause: The specified configuration parameter was not found in ADR.

Action: Specify an existing parameter. Re-populate parameters if necessary.

DIA-49407: No unpacking history in this home

Cause: No packages were unpacked into this home.

Action: Verify the current home. Unpack a package if necessary.

DIA-49408: Invalid home specified [<varname>string</varname>]

Cause: An invalid ADR_HOME was specified.

Action: Verify that the directory exists, and has the correct structure.

DIA-49409: Incremental package provided when complete expected

Cause: No packages were unpacked into this home.

Action: Provide a complete package, or use FORCE option.

DIA-49410: Not an IPS package

Cause: The specified file was not an IPS package.

Action: Verify that the file is a valid zip file with expected contents.

DIA-49412: Package ID does not match existing ID [<varname>string</varname>] [<varname>string</varname>]

Cause: The package ID in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49413: Package name does not match existing name [<varname>string</varname>] [<varname>string</varname>]

Cause: The package name in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49414: Package sequence later than expected [<varname>string</varname>] [<varname>string</varname>]

Cause: The package sequence in package file was later than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49415: Package sequence earlier than expected [<varname>string</varname>] [<varname>string</varname>]

Cause: The package sequence in package file was earlier than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49416: Earlier package sequence applied with FORCE option [<varname>string</varname>] [<varname>string</varname>]

Cause: An earlier package sequence was applied using the FORCE option.

Action: Apply a complete sequence which is later than any already applied, or use FORCE option to apply an incremental package.

DIA-49417: Cannot modify already generated package

Cause: Attempted to change package attributes after package generation.

Action: Create a new package with the desired name.

DIA-49418: Invalid package name specified

Cause: An invalid Incident Packaging Service (IPS) package name was specified.

Action: Specify a package name using only alphanumeric and underscore characters.

DIA-49420: Package too large [<varname>string</varname>] [<varname>string</varname>]

Cause: The package is too large.

Action: Remove some files or incidents from the package, or try using incremental mode.

DIA-49421: Maximum number of package files generated [<varname>string</varname>] [<varname>string</varname>]

Cause: The command generated the maximum number of package files.

Action: Remove some files or incidents from the package, or use incremental mode to generate additional files.

DIA-49423: File outside ADR not allowed

Cause: The specified file is not within the ADR directory structure.

Action: Specify a file inside ADR.

DIA-49424: Directory outside ADR not allowed

Cause: The specified directory is not within the ADR directory structure.

Action: Specify a directory inside ADR.

DIA-49425: File inside ADR not allowed

Cause: The specified file is within the ADR directory structure.

Action: Specify a file outside ADR.

DIA-49426: Directory inside ADR not allowed

Cause: The specified directory is within the ADR directory structure.

Action: Specify a directory outside ADR.

DIA-49427: No such file or file not accessible [<varname>string</varname>]

Cause: The specified file does not exist or cannot be accessed.

Action: Create the file or verify file permissions.

DIA-49428: No such directory or directory not accessible [<varname>string</varname>]

Cause: The specified directory does not exist or cannot be accessed.

Action: Create the directory or verify directory permissions.

DIA-49429: File already exists and OVERWRITE option not specified [<varname>string</varname>]

Cause: The client attempted to create a file that already exists.

Action: Either remove the file or use the OVERWRITE option.

DIA-49430: No such problem [<varname>string</varname>]

Cause: The specified problem does not exist.

Action: Specify a problem that exists in this repository.

DIA-49431: No such incident [<varname>string</varname>]

Cause: The specified incident does not exist.

Action: Specify an incident that exists in this repository.

DIA-49432: Problem not part of package [<varname>string</varname>]

Cause: The specified problem is not included in the package.

Action: Specify a problem that is included in the package.

DIA-49433: Incident not part of package [<varname>string</varname>]

Cause: The specified incident is not included in the package.

Action: Specify an incident that is included in the package.

DIA-49434: Invalid date format

Cause: An invalid format was used to specify a date

Action: Specify the date in a supported format.

DIA-49435: Flood-controlled incident not allowed here [<varname>string</varname>]

Cause: A flood-controlled incident cannot be included in a package

Action: Specify an incident that is not flood-controlled

DIA-49436: Date conversion error [<varname>string</varname>]

Cause: An invalid format was used to specify a date

Action: Specify the date in a supported format.

DIA-49440: Warnings while unpacking package, details in file <varname>string</varname>

Cause: There were some non-fatal errors when unpacking a package

Action: Review the specified unpacking log file

DIA-49441: Warnings while finalizing package, details in file <varname>string</varname>

Cause: There were some non-fatal errors when finalizing a package

Action: Review the specified finalize log file

DIA-49450: Non-zero return code from archiving utility [<varname>string</varname>] [<varname>string</varname>]

Cause: The archiving utility (zip/unzip) returned a warning or error.

Action: Verify that the file and directory exist and are readable, and that the file is a valid zip file.

DIA-49451: Archive file structure error [<varname>string</varname>] [<varname>string</varname>]

Cause: The archiving utility (zip/unzip) returned an error indicating that the archive file structure is incorrect.

Action: Verify that the file was transferred correctly and that the file is a valid zip file.

DIA-49452: Archiving utility out of memory [<varname>string</varname>] [<varname>string</varname>]

Cause: The archiving utility (zip/unzip) returned an error indicating that it was unable to allocate enough memory.

Action: Check for operating system limitations on process memory usage.

DIA-49453: Invalid command invoking archiving utility [<varname>string</varname>] [<varname>string</varname>]

Cause: The archiving utility (zip/unzip) was invoked with an invalid command line, or with invalid options.

Action: Verify that there are no operating system settings affecting the behavior of the archiving utility..

DIA-49454: Archive is missing or empty [<varname>string</varname>] [<varname>string</varname>]

Cause: The specified archive does not exist, or is empty.

Action: Check if the specified archive exists.

DIA-49455: Archive I/O failed [<varname>string</varname>] [<varname>string</varname>]

Cause: An attempt to create, write to or read from an archive failed.

Action: Verify that operating system I/O operations are working correctly.

DIA-49456: Operation failed due to insufficient disk space [<varname>string</varname>] [<varname>string</varname>]

Cause: An operation on an archive failed due to insufficient disk space.

Action: Verify that there is sufficient disk space. Check for operating system quotas or other restrictions.

DIA-49601: syntax error: found "<varname>string</varname>": expecting one of: "<varname>string</varname>" etc..

Cause: Syntax error discovered when processing event specification

Action: Enter correct event specification

DIA-49701: Parameter '<varname>string</varname>' is NULL.

Cause: NULL was passed to a function that requires a non-NULL parameter.

Action: Pass a valid non-NULL parameter.

DIA-49702: unable to allocate '<varname>string</varname>' bytes of external procedure call memory

Cause: An attempt to allocate memory in a C external procedure failed due to insufficient memory.

Action: Try the operation again.

DIA-49703: invalid ADR service name

Cause: A NULL or undefined Automatic Diagnostic Repository (ADR) service name was specified.

Action: Specify a valid ADR service name.

DIA-49704: invalid incident ID

Cause: A NULL or nonpositive incident ID was specified.

Action: Specify a valid ADR incident ID.

DIA-51001: check [<varname>string</varname>] not found in HM catalog

Cause: checker name might have been misspelled

Action: retry running check with proper checker name

DIA-51003: run parameters not formatted correctly

Cause: Run parameters were given in a wrong format

Action: Correct the run params text and try again

DIA-51004: Check doesn't take any input params

Cause: run params were passed to the check, which doesn't take any inputs

Action: don't pass any run params and try again

DIA-51006: unexpected delimiter ';' in the run params text

Cause: run params were not properly formatted.

Action: correct the run params format and try again

DIA-51007: parameter [<varname>string</varname>] not registered with this check

Cause: Wrong inputs were given to this check.

Action: correct the run params and try the check again

DIA-51008: parameter [<varname>string</varname>] value is not a proper number

Cause: the given parameter value is a not a proper number

Action: correct the run params and try again

DIA-51025: check name should be non NULL value

Cause: NULL value was passed for check name

Action: give a proper check name and retry again

DIA-51035: invalid timeout value

Cause: User specified an invalid timeout value

Action: n/a

DIA-51036: check [<varname>string</varname>] can only be executed in database instance

Cause: An attempt was made to run database-specific check in ASM environment

Action: Don't run the check in ASM environment

DIA-51037: check [<varname>string</varname>] can only be executed in ASM instance

Cause: An attempt was made to run ASM-specific check in a database environment

Action: Don't run the check in database environment

DIA-51102: cannot change priority of a critical failure <varname>string</varname>

Cause: An attempt was made to change priority of a failure with CRITICAL priority.

Action: No action is required.

DIA-51103: cannot change priority of a closed failure <varname>string</varname>

Cause: An attempt was made to change priority of a closed failure.

Action: No action is required.

DIA-51105: cannot change priority of a failure to CRITICAL

Cause: An attempt was made to change priority of a failure to CRITICAL.

Action: No action is required.

DIA-51106: check failed to complete due to an error. See error below

Cause: While executing the check, an unexpected error occurred.

Action: Check the errors below and try rerunning the check.

DIA-51107: failures are changing too rapidly - retry command

Cause: Failures were added or closed during a Data Recovery Advisor command.

Action: Retry the command.

DIA-51108: unable to access diagnostic repository - retry command

Cause: A lock or timeout error occurred when trying to read failure or repair data from the Automatic Diagnostic Repository.

Action: Retry the command.

DIA-51109: repair script file is too large

Cause: Data Recovery Advisor generated a repair script file that was too large.

Action: Retry the command with fewer failures selected.

DIA-51110: buffer size [<varname>string</varname>] is too small - [<varname>string</varname>] is needed

Cause: An internal buffer was too small.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51111: failure revalidation timed out

Cause: Data Recovery Manager was unable to revalidate all failures before timing out.

Action: Increase timeout and retry the command.

DIA-51190: Internal error [<varname>string</varname>], [<varname>string</varname>] from DBMS_IR

Cause: An unexpected error occurred while executing a routine in the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51191: Too many files opened

Cause: Data Recovery Advisor attempted to open too many files using the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51192: File not open

Cause: Data Recovery Advisor attempted to read or write from a file that was not open.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51193: invalid parameter value

Cause: An invalid parameter value was supplied in a call to the DBMS_IR package.

Action: Fix the parameter value and retry the call.

DIA-51303: illegal check mask value specified

Cause: An illegal check mask value was specified.

Action: Specify one of the following legal values: COLUMN_CHECKS, ROW_CHECKS, REFERENTIAL_CHECKS, or ALL.

DIA-51316: No check meta-data found on specified table <varname>string</varname>

Cause: No check meta-data was found for the object

Action: Table may not exist or no checks currently defined for the table

DIA-51700: Invalid file URL

Cause: A URL with invalid syntax was provided, either directly to the function or through an XML IMPORT or INCLUDE.

Action: Check the URL.

DIA-51701: Invalid file URL or path prefix

Cause: Either a URL or path prefix with invalid syntax was provided.

Action: Check the URL.

DIA-51702: Could not find file at URL provided

Cause: The file requested could not be found in the given location.

Action: Check the URL provided.

DIA-51703: Missing <varname>body</varname> tag from HTML

Cause: An HTML document was passed to the function missing its <varname>body</varname> tag.

Action: Check the HTML source.

DIA-51704: Error <varname>string</varname> received from XPath engine

Cause: An error was received from the XPath library during an XPath operation.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

DIA-51705: XML <varname>string</varname> error: <varname>string</varname> "<varname>string</varname>"

Cause: An error was received from an underlying XDK API and is being resigalled.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

DRG-10000 to DRG-52403

DRG-10000: failed to read column <varname>string</varname>.<varname>string</varname>

Cause: Error during read of specified text column

Action: check existence and privs of column

DRG-10001: can not access result table <varname>string</varname>

Cause: specified table does not exist or server does not have write privileges

Action: check result table

DRG-10002: can not insert into result table

Cause: text server is not privileged to insert, tablespace exhausted

Action: check privileges and tablespace

DRG-10011: invalid object name <varname>string</varname>

Cause: a table, column or procedure name specified had an invalid format. It is either too long or contains illegal characters. Probably you are passing in incorrect parameters.

Action: check parameter values

DRG-10015: id exceeds limit(2147483642) of a number

Cause: the limit of an id is 2147483642

Action: use an id with value 214748364 or under

DRG-10016: you must be the owner to modify this object

Cause: you tried to modify an object which you do not own

Action: have the owner modify the object

DRG-10017: you must be <varname>string</varname> to do this: <varname>string</varname>

Cause: you tried to modify an object which you have no privilege

Action: have the owner modify the object

DRG-10100: invalid argument found: <varname>string</varname>

Cause: invalid command argument was specified

Action: check the documentation for the legal arguments and re-execute the command

DRG-10101: no value for argument: <varname>string</varname>

Cause: this argument requires value(s)

Action: re-execute the command with the correct argument value(s)

DRG-10102: mandatory argument missing: <varname>string</varname>

Cause: this argument is mandatory

Action: re-execute the command and specify the argument

DRG-10103: illegal value for argument: <varname>string</varname>

Cause: an illegal value was passed to this argument

Action: check the documentation for the legal values for this argument

DRG-10200: invalid server personality mask: <varname>string</varname>

Cause: the specification for the server personality mask is invalid

Action: check the documentation and specify the correct mask

DRG-10202: server failed to register

Cause: the server failed to register itself with the data dictionary

Action: look at the next error on the stack

DRG-10203: server named <varname>string</varname> does not exist

Cause: update was called with the name of a server that does not exist

Action: correct the name of the server

DRG-10204: server update failed

Cause: the attempt to update the server failed

Action: look at the next error on the stack

DRG-10205: server deregister failed

Cause: the attempt to deregister the server from the data dictionary failed

Action: look at the next error on the stack

DRG-10206: failed to perform recovery for a server or client

Cause: Contact oracle support

Action: Contact oracle support

DRG-10301: timed out waiting for responses from servers

Cause: Not enough servers are running to handle the current system load, and a large backlog of commands has accumulated; perhaps no servers are running. This message could also indicate an internal error where one of the servers has crashed trying to process a given request

Action: Check that enough servers are running, and that they are processing commands of the correct type. For instance, a DDL command might timeout if all the servers are setup to exclusively process query commands. Also, check the server log files.

DRG-10302: interrupted waiting for responses from servers

Cause: User interrupted the request before it was completed

Action: Restart the request

DRG-10303: could not queue given commands to be processed

Cause: The given command or commands could not (all) be queued. This could indicate an extremely high system load, but it is more likely an internal error.

Action: Check if any servers are running to process the command.

DRG-10304: unexpected error sending command(s) to Oracle Text server

Cause: There was an unexpected error sending command(s) to server

Action: Call customer support.

DRG-10305: pipe <varname>string</varname> is full

Cause: Could not send command to pipe, because the pipe was full

Action: Check if any servers are running to process the commands on that pipe

DRG-10306: server terminated unexpectedly while processing command

Cause: The server shutdown during execution of your command. This could be caused by a shutdown abort, or by an internal error in the server.

Action: If the server terminated had an internal error, contact customer support.

DRG-10307: no servers running

Cause: Could not process command because no servers are running with the correct personality mask.

Action: Start some servers with correct personality mask.

DRG-10308: no server with the required <varname>string</varname> personality mask is running

Cause: Could not process command because no servers are running with the correct personality mask.

Action: Start some servers with correct personality mask.

DRG-10309: not enough job queue processes

Cause: Could not process command because no servers with the correct personality mask are running.

Action: increase the JOB_QUEUE_PROCESSES initialization parameter or reduce the parallel degree for this statement.

DRG-10310: servers were shutdown before processing request

Cause: The command could not be completed because the servers were shut down or terminated before processing the request.

Action: Start another server with the correct personality mask.

DRG-10311: remote send not supported

Cause: You tried to specify a database link in an index specification

Action: Specify only local index names

DRG-10312: logfile name must be specified

Cause: You tried to start logging without specifying a logfile name

Action: Specify a logfile name

DRG-10313: logging has already been started

Cause: You tried to start logging even though logging has already been started

Action: Stop logging first, or ignore

DRG-10314: logging has not been started

Cause: You tried to stop logging even though logging has not been started

Action: Start logging first, or ignore

DRG-10315: logging is not supported on MTS

Cause: You tried to start logging on MTS

Action: n/a

DRG-10500: CREATE_INDEX failed: column spec <varname>string</varname>

Cause: failed to create text index on the specified column

Action: See the next errors on stack and take appropriate action

DRG-10501: invalid stopword: <varname>string</varname>

Cause: The stopword specified could be lexed into multiple tokens with current lexer preference

Action: Check lexer preference and Respecifies the stopword

DRG-10502: index <varname>string</varname> does not exist

Cause: the specified index does not exist or you do not have access to it.

Action: Specify an existing index

DRG-10503: table <varname>string</varname> cannot be indexed because it has no primary key

Cause: a textkey needs to be a single column unique key whose length does not exceed 64 bytes. no such key was defined as an unique index or declared as a primary or unique key constraint

Action: create a suitable textkey for the table or specify it explicitly in this procedure call

DRG-10504: primary key is required when using the DETAIL_DATASTORE

Cause: you tried to use the detail datastore to index a table with no primary key constraint

Action: add a primary key constraint on the table

DRG-10506: table does not exist: <varname>string</varname>

Cause: The table, view, or synonym specified does not exist. There may also be a permissions problem reading the table.

Action: Reinvoke the operation with the correct table name

DRG-10507: duplicate index name: <varname>string</varname>

Cause: the specified index already exists in the dictionary

Action: this index can be updated or deleted, however this is only allowed if there is no text index available on the text column

DRG-10509: invalid text column: <varname>string</varname>

Cause: the column specified is not valid

Action: check that the followings are valid: a) text column is of supported datatype b) valid table name, column name in the specification.

DRG-10510: stopword is missing

Cause: The stopword to be added was not specified.

Action: Specify the stopword

DRG-10511: index <varname>string</varname> does not exist or is incomplete

Cause: index creation is not complete

Action: create index before performing this operation

DRG-10513: index <varname>string</varname> metadata is corrupt

Cause: dictionary contains bad preferences for this index

Action: contact you DBA

DRG-10516: failed to perform DDL operation due to an Oracle error

Cause: the ddl operation requested has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10517: index <varname>string</varname> is already valid

Cause: The index was in a valid state and did not need the requested operation.

Action: Check the requested operation

DRG-10518: an operation is in progress which conflicts with <varname>string</varname> request

Cause: another session is operating on this index. it could be: a) DML is requested and DDL is in progress or b) DDL is requested and DML is in progress operation on the index

Action: try again later

DRG-10520: failed to drop index: <varname>string</varname>

Cause: Failed to drop index on the specified index

Action: see the Oracle error on the stack and take the appropriate action

DRG-10525: missing REBUILD keyword

Cause: all Oracle Text alter index options require the REBUILD keyword

Action: specify alter index with the REBUILD keyword

DRG-10528: primary keys of type <varname>string</varname> are not allowed

Cause: you tried to create an index on a table with an illegal primary key datatype

Action: change the textkey to one of the followings: VARCHAR2, NUMBER, VARCHAR, DATE, CHAR, MLSLABEL

DRG-10531: parallel parameter must be > 0

Cause: you called create index with parallel = 0

Action: specify with value > 0

DRG-10532: table is not partitioned

Cause: you called parallel create index on non-partitioned table

Action: recreate the table with partitions or remove the PARALLEL clause

DRG-10533: invalid user name: <varname>string</varname>

Cause: you specified a user name that is invalid

Action: specify the correct user name

DRG-10535: failed to optimize text index <varname>string</varname>

Cause: the optimize operation requested has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10549: length of the object name <varname>string</varname> exceeded the limit

Cause: object name has exceeded the maximum length of 30 bytes

Action: Reduce the length of the object name if you want to re-create it

DRG-10550: illegal syntax for index, preference, source or section name

Cause: name may have additional periods(.)

Action: check the syntax of the name

DRG-10553: illegal syntax for column specification <varname>string</varname>

Cause: column specification may have additional periods(.)

Action: check the syntax of column specification if you want to re-create it

DRG-10561: index <varname>string</varname> is not valid for requested operation

Cause: The index was not in a valid state due to some prior error.

Action: Drop index and create index again.

DRG-10562: missing alter index parameter

Cause: The parameter string was missing

Action: Provide correct parameter string with regard to the requested alter index operation.

DRG-10569: table or column does not exist: <varname>string</varname>

Cause: The table, view, synonym or column specified does not exist. There may also be a permissions problem reading the table.

Action: Reinvoke the operation with the correct table name or column name

DRG-10573: index <varname>string</varname> is obsolete

Cause: you specified an obsolete index

Action: perform upgrade_index on the index

DRG-10574: failed to upgrade text index <varname>string</varname>

Cause: the upgrade operation has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10579: must provide text query criteria

Cause: text query criteria is mandatory

Action: provide text query criteria

DRG-10580: parallel indexing is not supported: <varname>string</varname>

Cause: attempted to create index with parallel servers

Action: Drop index and set parallel to 1 in create index

DRG-10581: indirect datastores cannot be used with long or lob text columns

Cause: You tried to create an index on a long or lob column using an indirect datastore such as the file or url datastores

Action: Use direct datastore or a varchar column

DRG-10582: column <varname>string</varname> does not exist in table <varname>string</varname>

Cause: you specified an invalid column

Action: specify valid column

DRG-10583: TRUNCATE INDEX failed: <varname>string</varname>

Cause: Failed to truncate index

Action: See the next errors on stack and take appropriate action

DRG-10584: failed to <varname>string</varname> <varname>string</varname> <varname>string</varname> due to an Oracle error

Cause: a DDL operation on an index object failed due to SQL error

Action: see following error

DRG-10595: ALTER INDEX <varname>string</varname> failed

Cause: failed to alter index

Action: See the next errors on stack and take appropriate action

DRG-10597: invalid rebuild online operation

Cause: REBUILD ONLINE is not supported for requested operation.

Action: Alter index without the online option.

DRG-10598: invalid parallel operation

Cause: PARALLEL is not supported for requested operation.

Action: Alter index without the parallel option

DRG-10599: column is not indexed

Cause: The column specified is not indexed.

Action: Create index on the column before performing this operation

DRG-10601: failed to remove pending DML for this index

Cause: The system could not remove triggers setup to monitor updates to the requested table

Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10602: failed to queue DML change to column <varname>string</varname> for primary key <varname>string</varname>

Cause: The system could not record that a change had been made to the given column

Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10606: server failed to access the DML Queue

Cause: The server was had an error accessing the DML Queue

Action: See next error on stack.

DRG-10607: index meta data is not ready yet for queuing DML

Cause: the meta data for the index has not been created yet

Action: retry the DML operation

DRG-10608: rowid to primary key mapping not available in base table

Cause: Procedural replication is on and no rowid to primary key mapping available in base table

Action: Modify base table to include a primary key

DRG-10609: cannot encode composite key with more than 16 columns

Cause: Cannot encode composite key with more than 16 columns

Action: Modify base table to have composite key with less than 16 columns

DRG-10610: Procedure not supported with Procedural replication on: <varname>string</varname>

Cause: This procedure is not supported when Procedural replication is on

Action: Turn off procedural replication to execute this procedure

DRG-10700: preference does not exist: <varname>string</varname>

Cause: the preference name specified does not exist

Action: retry with the correct preference name

DRG-10701: preference <varname>string</varname>.<varname>string</varname> already exists

Cause: the specified preference already exists

Action: must drop the preference if you want to re-create it.

DRG-10702: cannot create or modify preference in another user's schema

Cause: you tried to create a preference for another user

Action: owner or CTXSYS or a user who has CTXADMIN role should create preference

DRG-10703: invalid framework object <varname>string</varname>

Cause: you specified an invalid object type

Action: use a valid framework object

DRG-10704: preference <varname>string</varname> does not have an attribute named <varname>string</varname>

Cause: you tried to set value for a invalid attribute (not supported by the object).

Action: specify the correct attribute name

DRG-10705: invalid value <varname>string</varname> for attribute <varname>string</varname>

Cause: you tried to set an illegal value for an attribute

Action: specify the correct attribute value for the datatype of the attribute

DRG-10706: length of <varname>string</varname> exceeds maximum size of <varname>string</varname>

Cause: Parameter is too many bytes

Action: Correct preference setting and resubmit

DRG-10707: a value is required for attribute <varname>string</varname> of preference <varname>string</varname>

Cause: A required attribute was not provided

Action: Correct preference setting and resubmit

DRG-10708: invalid class id <varname>string</varname> for preference <varname>string</varname>

Cause: the specified class id is not correct for the specified preference

Action: specify the correct class id

DRG-10709: this preference is referenced by <varname>string</varname> and cannot be dropped

Cause: the specified preference is used as part of another preference and cannot be dropped until the referring preference is modified

Action: modify the referring preference

DRG-10710: Invalid value <varname>string</varname> for <varname>string</varname> attribute

Cause: Invalid value provided for save_copy attribute It should be one of these: (PLAINTEXT, FILTERED, NONE)

Action: Provide correct SAVE_COPY attribute value

DRG-10711: Invalid value for SAVE_COPY attribute: <varname>string</varname>

Cause: Invalid value provided for SAVE_COPY attribute. It should be a boolean value

Action: Provide boolean value for SAVE_COPY attribute

DRG-10712: preference <varname>string</varname> already has value for an attribute named <varname>string</varname>

Cause: Cannot call set_sec_grp_attr for an attribute whose value is already set in a preference

Action: Call add_sec_grp_attr_val to add an additional value for attribute

DRG-10713: preference <varname>string</varname> does not have any value for attribute named <varname>string</varname>

Cause: Cannot call add_sec_grp_attr_val for an attribute without calling set_sec_grp_attr for the same attribute

Action: Call set_sec_grp_attr to set value for attribute and then call add_sec_grp_attr_val to add an additional value for attribute

DRG-10714: cannot add or remove value for attribute named <varname>string</varname>

Cause: Cannot call add_sec_grp_attr_val or rem_sec_grp_attr_val for a boolean attribute

Action: Do not call add_set_grp_attr_val or rem_sec_grp_attr_val for a boolean attribute. Use set_sec_grp_attr and unset_sec_grp_attr instead.

DRG-10715: preference <varname>string</varname> has incompatible values for <varname>string</varname> and <varname>string</varname>

Cause: Cannot set related attributes to incompatible values

Action: Set or add a compatible value for related attributes

DRG-10716: invalid prefix_ns_mapping attribute value <varname>string</varname>

Cause: Value of prefix_ns_mapping is neither of the form xmlns:pfx="ns" nor of the form xmlns="ns"

Action: Call rem_sec_grp_attr_val to remove this prefix_ns_mapping attribute value.

DRG-10750: unknown parameter <varname>string</varname>

Cause: Unrecognized parameter

Action: Specify correct parameter

DRG-10751: invalid value for parameter

Cause: Wrong data type or out of range

Action: Specify correct parameter value

DRG-10752: DEFAULT_INDEX_MEMORY cannot be greater than MAX_INDEX_MEMORY

Cause: You tried to set DEFAULT_INDEX_MEMORY to a value higher than the maximum set in MAX_INDEX_MEMORY

Action: Specify a lower value

DRG-10753: invalid size (in bytes) string <varname>string</varname>

Cause: You specified an incorrectly formatted size string

Action: Specify a correctly formatted size string

DRG-10754: Size (in bytes) must be between <varname>string</varname> and <varname>string</varname>

Cause: You specified size (in bytes) which is outside the allowed range

Action: Specify size (in bytes) within the allowed range

DRG-10755: <varname>string</varname> and <varname>string</varname> have characters in common

Cause: the join character sets cannot have characters in common

Action: Correct the attribute values and resubmit

DRG-10756: neither text indexing nor theme indexing has been selected

Cause: INDEX_TEXT and INDEX_THEMES preferences both cannot be FALSE.

Action: Set either of INDEX_TEXT or INDEX_THEMES or both to TRUE.

DRG-10757: stoplist cannot have more than 4096 stopwords

Cause: a stoplist cannot have more than 4096 stopwords. This includes stopthemes.

Action: none required

DRG-10758: index owner does not have the privilege to use file or URL datastore

Cause: index owner does not have the role defined in FILE_ACCESS_ROLE

Action: grant index owner the appropriate role

DRG-10759: invalid role

Cause: the role does not exist in the database

Action: check the role name or create the role

DRG-10760: illegal format for procedure name

Cause: the procedure name specified is invalid. For instance, it may have a semicolon

Action: check the procedure name

DRG-10761: procedure <varname>string</varname> does not exist

Cause: the specified procedure could not be found

Action: check input. Try a fully-specified format such as OWNER.OBJECT

DRG-10762: index owner does not have access to procedure <varname>string</varname>

Cause: the index owner does not have execute privilege on the specified procedure

Action: grant index owner execute permission on the procedure

DRG-10763: value <varname>string</varname> is not a valid character set

Cause: the value specified for the filename_charset attribute of the file datastore is not a valid character set name

Action: specify a valid Oracle character set name

DRG-10764: only SYS can modify FILE_ACCESS_ROLE

Cause: For security reasons, only SYS can modify the FILE_ACCESS_ROLE system parameter

Action: Connect as SYS before modifying the parameter

DRG-10765: stoplist cannot have more than 250 stopclasses with stoppatterns

Cause: a stoplist cannot have more than 250 stopclasses with stoppatterns. This does not include NUMBERS stopclass.

Action: none required

DRG-10800: query failed: <varname>string</varname> <varname>string</varname> <varname>string</varname>

Cause: Failed to process the query

Action: Check the errors on stack and take appropriate action

DRG-10801: cannot create an SQE for another user

Cause: You tried to create an SQE for another user

Action: Remove owner from SQE name specification

DRG-10816: display/highlight call failed

Cause: See the next error on the stack.

Action: See the next error on the stack.

DRG-10817: CONTAINS term consists of stopword or phrase of stopwords: <varname>string</varname>

Cause: One or more terms within a CONTAINS query consist of just a stopword or a phrase of just stopwords

Action: Replace the stopword or use stopwords within phrases containing non-stopwords.

DRG-10819: could not open contains cursor

Cause: An error occurred while trying to open a contains cursor

Action: See accompanying error messages in the stack

DRG-10820: invalid contains cursor id

Cause: You tried to fetch or close a contains cursor with an id which does not exist.

Action: Review fetch or close invocation

DRG-10821: contains cursor is not open

Cause: You tried to fetch from a contains cursor which was not open.

Action: Open cursor first

DRG-10822: duplicate query name

Cause: You tried to create a stored query with a name already used.

Action: Use different name

DRG-10823: invalid query name

Cause: The query name specified is not valid

Action: Check the query name

DRG-10825: stored query does not exist: <varname>string</varname>

Cause: The specified stored query does not exist.

Action: Check the query name

DRG-10826: no document with the specified textkey is found

Cause: There is no document with the specified textkey.

Action: Check the textkey

DRG-10827: open_con must be performed before count_last

Cause: last_count returns hit from in-memory query,so an in-memory query must be run before you can use count_last

Action: execute open_con before run count_last

DRG-10828: token <varname>string</varname> is longer than maximum length for column <varname>string</varname>

Cause: A token to be inserted in the feedback table is longer than the maximum allowed column size.

Action: Modify the query, or the column size for feedback table, or feedback procedure arguments accordingly.

DRG-10829: feedback id <varname>string</varname> is longer than the maximum length of <varname>string</varname> bytes

Cause: Feedback id is longer than the maximum allowed length for the feedback_id column.

Action: Use a smaller feedback_id.

DRG-10830: SHARELEVEL is not 0 or 1

Cause: You specified a sharelevel which is not 0 or 1

Action: Use sharelevel equal to 0 or 1 only.

DRG-10831: can not insert into feedback table <varname>string</varname>

Cause: Not privileged to insert.

Action: Check privileges.

DRG-10832: can not delete from feedback table <varname>string</varname>

Cause: Not privileged to delete.

Action: Check privileges.

DRG-10833: feedback failed

Cause: Failed to process feedback request

Action: Check the errors on stack and take appropriate action

DRG-10834: upper-case form of section name <varname>string</varname> too long

Cause: upper-case form of the section name is longer than supported length

Action: reduce length of section name when adding section

DRG-10835: WITHIN operator not supported for theme index

Cause: WITHIN operator used in theme index query

Action: Rewrite query without WITHIN operator

DRG-10836: field section and attribute section can not be nested

Cause: A field section or a attribute section is specified in a nested section search

Action: Rewrite query without nested field sections

DRG-10837: section <varname>string</varname> does not exist

Cause: The given section name does not exist in USER_SECTIONS

Action: Rewrite query with valid section name

DRG-10838: invalid SPAN argument supplied to NEAR

Cause: An invalid value was supplied for SPAN argument to NEAR

Action: Provide a valid SPAN. Valid values are integers from 0 to 100.

DRG-10839: invalid ORDER argument supplied to NEAR

Cause: An invalid value was supplied for ORDER argument to NEAR

Action: Provide a valid ORDER. Valid values are T, TRUE, F, FALSE (case insensitive).

DRG-10840: CONTAINS predicate including 0 is not supported by FIRST_ROWS hint

Cause: User attempts to issue a query with CONTAINS predicate including 0 while giving FIRST_ROWS hint.

Action: remove FIRST_ROWS hint.

DRG-10841: invalid SCORE argument supplied to FUZZY

Cause: An invalid value was supplied for SCORE argument to FUZZY

Action: Provide a valid SCORE. Valid values are integers from 1 to 80.

DRG-10842: invalid NUMRESULTS argument supplied to FUZZY

Cause: An invalid value was supplied for NUMRESULTS argument to FUZZY

Action: Provide a valid NUMRESULTS. Valid values are integers from 0 to 5000.

DRG-10843: invalid WEIGHT argument supplied to FUZZY

Cause: An invalid value was supplied for WEIGHT argument to FUZZY

Action: Set WEIGHT to WEIGHT or NOWEIGHT.

DRG-10844: index cannot execute this structured predicate efficiently

Cause: You specified a combination of condition and order by columns in a catsearch query which cannot be executed by the index's index set efficiently

Action: n/a

DRG-10845: column <varname>string</varname> is not indexed

Cause: You specified a column in a condition or order by which is not part of the ctxcat index

Action: n/a

DRG-10846: order by columns must be all ascending or all descending

Cause: You specified an order by clause which has some columns ascending and some descending. This is not currently supported by catsearch

Action: n/a

DRG-10847: catsearch requires prefix index for this type of query

Cause: For efficient execution of this Vgram query, we require presence of a prefix index.

Action: create a prefix index

DRG-10848: invalid structured clause

Cause: you have specified an invalid structured clause

Action: n/a

DRG-10849: catsearch does not support functional invocation

Cause: the query plan for your query is invoking a catsearch operator functionally rather than as an index rowsource. The catsearch operator does not support functional invocation

Action: add optimizer hints so that all catsearch operators are performed through index scans

DRG-10850: CTXRULE indextype does not support the operator

Cause: Used an operator not supported by CTXRULE. Currently it only supports AND, NEAR, phrase, NOT, WITHIN, OR, ABOUT, EQUIVALENCE, STEM and THESAURUS operators

Action: Rewrite query without this operator

DRG-10851: Invalid grammar <varname>string</varname> specified for query template

Cause: incorrect grammar specification

Action: Rewrite query specifying valid grammar name

DRG-10852: Invalid scoring type <varname>string</varname> specified for query template

Cause: incorrect scoring type specification

Action: Rewrite query specifying valid scoring type (integer/float)

DRG-10853: Catsearch does not support this operator

Cause: unsupported operator specified

Action: Rewrite query using valid operators

DRG-10854: Invalid scoring algorithm <varname>string</varname> specified for query template

Cause: incorrect scoring algorithm specification

Action: Rewrite query specifying valid scoring algorithm (default/count)

DRG-10855: CTXRULE indextype does not support the token type

Cause: Unsupported VGRAM token type 1.

Action: n/a

DRG-10856: SDATA section <varname>string</varname> does not exist

Cause: The given SDATA section name does not exist in USER_SECTIONS

Action: Rewrite query with valid SDATA section name

DRG-10857: literal is not compatible with the data type of the SDATA section

Cause: The given literal is not compatible with the data type of the specified SDATA section.

Action: Rewrite query with a compatible literal

DRG-10858: SDATA operator is not allowed in WITHIN

Cause: A field section or a attribute section is specified in a nested section search

Action: Rewrite query without nested field sections

DRG-10859: Only one predefined scoring component can be used in DEFINESCORE

Cause: More than one predefined scoring component (i.e. RELEVANCE, OCCURRENCE, etc.) is used in the scoring expression of the DEFINESCORE operator

Action: Rewrite query using only one predefined component

DRG-10860: All expressions under the same WITHIN must use the same predefined scoring component

Cause: The query side of the same within mixes different types of scoring components(i.e. RELEVANCE, OCCURRENCE, etc.)

Action: Rewrite query using only one type of predefined component

DRG-10861: COMPLETION score must be used with WITHIN operator

Cause: The completion score is used without using the WITHIN operator

Action: Rewrite query to include a within operator

DRG-10862: <varname>string</varname> attribute cannot be used with CTXRULE indexes

Cause: Used an attribute not supported by CTXRULE. This restriction is due to lack of wildcard support for CTXRULE indexes.

Action: Rewrite query without this attribute

DRG-10863: invalid ORDER argument supplied to NDATA

Cause: An invalid value was supplied for ORDER argument to NDATA

Action: Set ORDER to ORDER or NOORDER.

DRG-10864: invalid PROXIMITY argument supplied to NDATA

Cause: An invalid value was supplied for PROXIMITY argument to NDATA

Action: Set PROXIMITY to PROXIMITY or NOPROXIMITY.

DRG-10865: invalid datatype in user scoring expression

Cause: The scoring expression specified in DEFINESCORE or NORMALIZATION_EXPR in the query template either contains components with unsupported datatypes or does not return numerical values.

Action: Rewrite the scoring expression.

DRG-10866: The right hand operand of MINUS cannot use IGNORE score

Cause: The IGNORE score is used as the right hand operand of MINUS

Action: Rewrite the scoring expression.

DRG-10867: OCCURRENCE and COMPLETION score cannot be used with ABOUT in DEFINESCORE

Cause: The OCCURRENCE and COMPLETION score cannot be used with ABOUT queries

Action: Rewrite the scoring expression.

DRG-10868: matches does not support functional invocation

Cause: the query plan for your query is invoking a matches operator functionally rather than as an index rowsource. The matches operator does not support functional invocation

Action: add optimizer hints so that all matches operators are performed through index scans

DRG-10869: Invalid span supplied to NEAR2 operator

Cause: Near2 span must be between 0 and 100

Action: Use acceptable span

DRG-10870: Invalid weight supplied to NEAR2 operator

Cause: Near2 weights must be between 0 and 10

Action: Use acceptable weight

DRG-10871: NDATA operator not supported with <varname>string</varname>

Cause: NDATA operator is not supported in the specified operation

Action: Rewrite the query without NDATA operator

DRG-10872: Characters cannot be outside <varname>string</varname> in an XML query

Cause: Characters outside <varname>query</varname> element are not valid

Action: Write the characters inside <varname>query</varname><varname>textquery</varname>

DRG-10873: Invalid characters location in the XML query

Cause: Characters between certain elements are not allowed

Action: Write the characters in designed places

DRG-10874: Syntax error in XML Query Template

Cause: XML template is wrong. Possible causes include missing closing tag or receiving invalid attributes or characters.

Action: Check that the query is valid XML

DRG-10875: Missing closing tag in XML Query

Cause: Some tag has been opened and not closed properly.

Action: Close all tags properly

DRG-10876: Invalid ordering of elements in XML Query

Cause: Occurrence of some element that should be only between another element that was not found

Action: Check the proper ordering of elements

DRG-10877: <varname>query</varname> should always start an XML Query

Cause: Either <varname>query</varname> is missing or is wrongly positioned

Action: Insert <varname>query</varname> properly

DRG-10878: Invalid ordering in XML Query: <varname>string</varname> should be <varname>string</varname> of <varname>string</varname>

Cause: Invalid ordering of tags as of specs

Action: Rewrite query properly

DRG-10879: Invalid <varname>string</varname> element repetition in XML Query

Cause: Invalid repetition of XML element

Action: Rewrite query, merging both repeated elements

DRG-10880: Invalid nesting of <varname>string</varname> in XML Query

Cause: Invalid nesting of same element has been encountered

Action: Either close element properly or avoid nesting

DRG-10881: Invalid setting of savescore in ctxfiltercache

Cause: savescore argument must be true or false

Action: set savescore to true or false

DRG-10882: Invalid setting of topn in ctxfiltercache

Cause: topn argument must be true or false

Action: set topn to true or false

DRG-10883: savescore must be true to use topn in ctxfiltercache

Cause: savescore must be true to use topn in ctxfiltercache

Action: set savescore to true to use topn processing

DRG-10884: invalid use of ctxfiltercache with topn

Cause: ctxfiltercache with topn must be child of AND, THRESHOLD, or WEIGHT operators

Action: invalid query

DRG-10885: ctxfiltercache operator requires non-zero query_filter_cache_size

Cause: used ctxfiltercache operator with zero query_filter_cache_size

Action: Set a non-zero query_filter_cache_size

DRG-10886: topn must be used with order by score desc in ctxfiltercache

Cause: must order query results by score desc when topn argument is true

Action: Add order by score desc and use oracle hint DOMAIN_INDEX_SORT

DRG-10887: Query cannot be processed, index partition is set to non-readable mode

Cause: Index partition has been set to non-readable mode

Action: Use 'alter index modify prartition' to set read mode to TRUE

DRG-10891: invalid MINREQD argument supplied to NEAR

Cause: An invalid value was supplied for MINREQD argument to NEAR

Action: Provide a valid MINREQD. Valid values are integers from 0 to 63.

DRG-10900: out of memory

Cause: can not allocate more memory

Action: Contact your system administrator

DRG-11000: invalid keyword <varname>string</varname>

Cause: A keyword was invalid.

Action: Respecify the parameter string with correct keyword

DRG-11001: missing keyword when expecting one of <varname>string</varname>

Cause: A keyword was missing.

Action: Respecify the parameter string with keyword

DRG-11002: missing value for <varname>string</varname>

Cause: A value for the argument was missing.

Action: Respecify the parameter string with value

DRG-11003: invalid value <varname>string</varname> for <varname>string</varname>

Cause: An invalid value was given for the argument

Action: Specify a valid value

DRG-11004: duplicate or conflicting value for <varname>string</varname>

Cause: More than one value has been specified for the argument

Action: Check parameter string and correct the problem parameter

DRG-11005: invalid create index parameter string

Cause: the supplied parameter string is not correct

Action: drop index and recreate index with correct parameters

DRG-11006: invalid alter index parameter string

Cause: The parameter string was invalid.

Action: Reissue the statement with the correct parameter string.

DRG-11007: multiple stopwords specified

Cause: Tried to add more than one stopword

Action: Specify one stopword at a time

DRG-11008: invalid create index partition parameter string

Cause: The parameter string was invalid

Action: drop index and recreate index with correct parameters

DRG-11100: unable to connect to the database

Cause: failed to connect to Oracle database

Action: check the Oracle error and connect string

DRG-11101: failed to open file <varname>string</varname>

Cause: failed to open a file

Action: check whether the file exist or access permission available

DRG-11102: assigned lexer can not operate on <varname>string</varname> language setting

Cause: Single byte lexer selected in multibyte language setting

Action: check RDBMS language setting or text columns lexer setting

DRG-11104: Oracle Text error:

Cause: See the next error on stack

Action: See the next error on stack

DRG-11106: user database session has terminated during this operation

Cause: this database session does not exist or has terminated

Action: determine why the user database session terminated while the operation was still being carried out.

DRG-11107: invalid path specification: <varname>string</varname>

Cause: the path specified is not valid

Action: check the path specification

DRG-11108: invalid filename specified: <varname>string</varname>

Cause: the filename specified is not valid

Action: check the filename for beginning or trailing spaces, invalid characters, or other such problems.

DRG-11109: assigned lexer does not support <varname>string</varname> query operator

Cause: This lexer does not support this query operator

Action: do not use the operator in your query

DRG-11111: value of <varname>string</varname> must be between <varname>string</varname> and <varname>string</varname>

Cause: You specified a value for the parameter which is out of range

Action: Specify a value which is in the allowed range

DRG-11112: length of <varname>string</varname> exceeds maximum of <varname>string</varname>

Cause: You specified a value for the parameter which is too long

Action: Specify a value which is less than or equal to the maximum length

DRG-11113: value of <varname>string</varname> must be one of <varname>string</varname>

Cause: You specified a value for the parameter which is invalid

Action: Specify a valid value for the parameter

DRG-11114: result table format is not correct for this operation

Cause: You specified a result table which has the wrong number, type, or names of columns for this operation.

Action: Check result table. Refer to the documentation for the correct format for each operation

DRG-11115: a value for <varname>string</varname> must be specified

Cause: You did not specify a value for the parameter

Action: Specify a value for the parameter

DRG-11116: value of <varname>string</varname> must be less than or equal to value of <varname>string</varname>

Cause: You specified values for the two parameters which are invalid

Action: Specify valid values for the parameters

DRG-11117: name is already used by an existing object

Cause: You tried to create an object whose name conflicts with an object of that type which already exists

Action: Specify a new name

DRG-11118: object <varname>string</varname> does not exist

Cause: You tried to modify or drop an object which does not exist

Action: Specify correct object name

DRG-11119: operation is not supported by this index type

Cause: You tried to invoke an operation on an index which is not supported by the index type

Action: n/a

DRG-11120: failed to write to file <varname>string</varname>

Cause: failed to write to a file

Action: check whether the file exist or access permission available

DRG-11121: failed to read from file <varname>string</varname>

Cause: failed to read from a file

Action: check whether the file exist or access permission available

DRG-11122: unsupported section group

Cause: unsupported section group is specified for functional contains

Action: change the section group to NULL_SECTION_GROUP

DRG-11123: theme indexing is not supported

Cause: theme indexing is on in the lexer preference for functional contains

Action: turn off theme indexing

DRG-11124: invalid value <varname>string</varname>

Cause: you specified an invalid value

Action: specify a valid value

DRG-11125: invalid format of existing log file <varname>string</varname>

Cause: the file specified by START_LOG already exists, and is not a previously written log file

Action: specify a new file, or remove the existing file

DRG-11126: context index is empty

Cause: the training table is empty or the context index of training table is not populated

Action: populate the training table or context index

DRG-11127: inconsistent index policy with trained rule

Cause: the ctxrule index policy is inconsistent with the policy in which the rule was trained

Action: change the ctxrule index policy

DRG-11128: invalid format of rule

Cause: the rule format is not valid for this operation

Action: check the rule type and operation type

DRG-11129: the rule table is empty

Cause: the rule table is empty

Action: populate the rule table by training

DRG-11130: no data found in the collection

Cause: feature preparation program can not find any feature in the specified collection

Action: check the setting for extracting features.

DRG-11131: Error from Oracle XML parser: <varname>string</varname>

Cause: The Oracle XML parser reported an error

Action: Check the document for the error, and fix if necessary

DRG-11132: Invalid character in logfile name

Cause: The logfile parameter to CTX_OUTPUT.START_LOG or CTX_OUTPUT.START_QUERY_LOG contains an invalid character (such as a forward slash)

Action: Remove the invalid character

DRG-11133: failed to convert a datetime value [ora-<varname>number</varname>]

Cause: Failed to convert the datetime value.

Action: Check the error code

DRG-11134: The file <varname>string</varname> is currently being used for logging by another process

Cause: The file is currently being used by another process.

Action: Give a different file name.

DRG-11135: feature not generally available

Cause: You tried to use a feature not generally available.

Action: Contact customer support

DRG-11136: assigned lexer does not support entity extraction

Cause: This lexer does not support entity extraction

Action: Do not use this lexer for entity extraction

DRG-11137: tracing is not supported on MTS

Cause: you tried to use ctx_output tracing in an MTS session

Action: connect using a dedicated session and retry the operation

DRG-11138: trace <varname>string</varname> is already enabled

Cause: you tried to enable a trace that is already enabled

Action: disable the trace first

DRG-11139: trace <varname>string</varname> is not enabled

Cause: you tried to disable a trace that is not enabled

Action: enable the trace first

DRG-11140: Section `<varname>string</varname>` is not MDATA

Cause: you tried to perform MDATA operation on non-mdata section

Action: provide correct mdata section name

DRG-11141: `CTX_DDL.REMOVE_MDATA()` and `CTX_DDL.ADD_MDATA()` not allowed for MDATA Section `<varname>string</varname>`

Cause: you tried to call `CTX_DDL.REMOVE_MDATA()` or `CTX_DDL.ADD_MDATA()` on a MDATA section which is created with `ALLOW_ADD_REM` parameter set to FALSE.

Action: do not call `CTX_DDL.REMOVE_MDATA()` or `CTX_DDL.ADD_MDATA()` on a MDATA section that is created with `ALLOW_ADD_REM` parameter set to FALSE.

DRG-11142: `<varname>string</varname>` cannot be `<varname>string</varname>`

Cause: The value for the specified parameter cannot be as specified

Action: Specify the correct value

DRG-11143: Only 64 errors can be traced

Cause: You tried to trace more than 64 errors with `ctx_output`

Action: Trace fewer errors, or use `DRG_DUMP_ALL_ERRORS`

DRG-11144: Invalid value for radius parameter: `<varname>string</varname>`

Cause: You specified invalid value for radius parameter

Action: Provide non-negative/non-decimal value for radius parameter

DRG-11145: Invalid value for max_length parameter: `<varname>string</varname>`

Cause: You specified invalid value for max_length parameter

Action: Provide non-negative/non-decimal value for max_length parameter

DRG-11146: Invalid value for use_saved_copy: `<varname>string</varname>`

Cause: You specified invalid value for use_saved_copy parameter

Action: Use one of these: `SAVE_COPY_FALLBACK` / `SAVE_COPY_ERROR` / `SAVE_COPY_IGNORE`

DRG-11147: Invalid lexer for `ctx_doc.policy_stems`

Cause: You specified/used a lexer which does not support `ctx_doc.policy_stems`

Action: Use auto lexer for `ctx_doc.policy_stems`

DRG-11148: Invalid lexer for `ctx_doc.policy_noun_phrases`

Cause: You specified/used a lexer which does not support `ctx_doc.policy_noun_phrases`

Action: Use auto lexer for `ctx_doc.policy_noun_phrases`

DRG-11149: Invalid lexer for ctx_doc.policy_part_of_speech

Cause: You specified/used a lexer which does not support ctx_doc.policy_part_of_speech

Action: Use auto lexer for ctx_doc.policy_part_of_speech

DRG-11150: Reverse Index feature not enabled

Cause: Feature not enabled

Action: Enable Reverse Index feature

DRG-11203: INSO filter not supported on this platform

Cause: You tried to use the INSO filter on a platform which does not support it

Action: Do not use the INSO filter

DRG-11204: user filter command is too long

Cause: The user filter command must be 32 characters or less

Action: Specify a shorted user filter command

DRG-11205: user filter command contains illegal characters

Cause: The user filter command cannot contain special characters such as slashes, parentheses, semicolons, etc.

Action: Correct command specification

DRG-11206: user filter command <varname>string</varname> could not be executed

Cause: The user filter command could not be executed.

Action: Check that the command exists in \$ORACLE_HOME/ctx/bin, and that it is executable.

DRG-11207: user filter command exited with status <varname>string</varname>

Cause: The user filter command exited with the given error status.

Action: See any DRG-11220, DRG-11221, DRG-11222, DRG-11223, DRG-11224, DRG-11225, or DRG-11227 error message on the error stack otherwise see error status.

DRG-11208: ORACLE_HOME is not set

Cause: ORACLE_HOME is not set

Action: make sure ORACLE_HOME is set when running ctxsrv

DRG-11209: filename for <varname>string</varname> exceeds maximum length of <varname>string</varname>

Cause: Value of the file name is too long

Action: Specify a shorter filename

DRG-11210: format column must be a char, varchar, or varchar2 type

Cause: you specified a format column which is not a char, varchar, or varchar2 type.

Action: specify a format column of correct type

DRG-11211: charset column must be a char, varchar, or varchar2 type

Cause: you specified a charset column which is not a char, varchar, or varchar2 type.

Action: specify a charset column of correct type

DRG-11212: procedure filter procedure name contains a semicolon

Cause: the procedure name specified had a semicolon

Action: remove semicolon or rename procedure name. The correct format is
PACKAGE_NAME.PROCEDURE_NAME

**DRG-11213: CTXSYS does not own procedure filter stored procedure:
<varname>string</varname>**

Cause: CTXSYS does not have execute privilege to the procedure filter stored procedure

Action: make sure the package is owned by CTXSYS and the procedure exist

DRG-11214: execution of procedure filter stored procedure has failed

Cause: an error occur while executing the proedure filter stored procedure

Action: check or debug the stored procedure

**DRG-11215: index owner does not have access to filter stored procedure:
<varname>string</varname>**

Cause: the index owner does not have execute privilege of the procedure

Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-11216: length of datastore data exceeds limit

Cause: the length of the datastore data passed to the filter stored procedure is longer than the maximum length (32767 bytes)

Action: check primary key parameter

DRG-11217: INSO safe callout failed

Cause: The INSO safe callout cannot be executed

Action: check the Oracle errpr

DRG-11218: malformed mail line, line <varname>string</varname>

Cause: The mail message has an error at the indicated line

Action: manually edit mail message, if possible

DRG-11219: malformed mail configuration file, line <varname>string</varname>

Cause: mail filter configuration file has an error at the indicated line

Action: manually edit mail filter configuration file, if possible

DRG-11220: Third-party filter is out of memory.

Cause: Third-party filter could not filter this document because it was unable to allocate sufficient virtual memory.

Action: Increase virtual memory provided by the Operating System and reindex this document.

DRG-11221: Third-party filter indicates this document is corrupted.

Cause: Third-party filter could not filter this document because this document is corrupted.

Action: Fix the corruption and reindex this document.

DRG-11222: Third-party filter does not support this known document format.

Cause: Third-party filter was able to recognize the format of this document but could not filter it because this format is not supported.

Action: Remove this document or specify it to be ignored.

DRG-11223: Third-party filter indicates this document is password protected or encrypted.

Cause: Third-party filter encountered a password protected or encrypted document and could not filter it because this level of password protection or encryption is not supported.

Action: Remove this document or specify it to be ignored.

DRG-11224: Third-party filter is unable to create or write to temporary file.

Cause: Third-party filter could not filter this document because it was unable to create a temporary file or unable to write to a temporary file.

Action: Make sure that the Operating System specified temporary directory has enough space and that the Operating System Oracle user has the privileges to create files in this temporary directory.

DRG-11225: Third-party filter timed out.

Cause: Third-party filter could not filter this document because the filter timed out.

Action: Increase the value of the TIMEOUT attribute of INSO_FILTER filter type and reindex this document. When TIMEOUT attribute is set to 0 and the session hangs then contact Oracle Support.

DRG-11226: Error initializing third-party filter: <varname>string</varname>

Cause: There was an error initializing the third-party filter.

Action: Check the following messages for details

DRG-11227: Third-party filter does not support this document format.

Cause: Third-party filter does not support the format of this document.

Action: Remove this document or specify it to be ignored.

DRG-11228: Charset filter does not support binary documents.

Cause: The format column specifies a binary document

Action: Do not attempt to filter binary documents using the charset filter

DRG-11229: configuration column must be a char, varchar, or varchar2 type

Cause: you specified a configuration column which is not a char, varchar, or varchar2 type.

Action: specify a configuration column of correct type

DRG-11301: error while indexing document

Cause: An error was encountered while indexing the document. The error may have occurred during lexing, parsing for sections, or other action during document tokenization

Action: review document and update with valid data. Note that the document contents may have been partially indexed, so it may be returned by some queries.

DRG-11303: secondary indexes are not supported by this indextype

Cause: You attempted to create an index on an index-organized table, but the indextype does not support this action.

Action: n/a

DRG-11304: function-based indexes are not supported by this indextype

Cause: You attempted to create a function-based index but the indextype does not support this action.

Action: n/a

DRG-11305: create/alter index <varname>string</varname> is in progress in another session

Cause: you attempted to mark the index from INPROGRESS to FAILURE but create/alter on the same index is in progress in another session

Action: n/a

DRG-11306: operation cannot be performed on a policy

Cause: you attempted to perform an operation on a policy, but the operation is only valid for an index.

Action: n/a

DRG-11307: operation cannot be performed on an index

Cause: you attempted to perform an operation on an index, but the operation is only valid for a policy.

Action: n/a

DRG-11308: unsupported column expression <varname>string</varname>

Cause: You attempted to create an index with an unsupported column expression.

Action: n/a

DRG-11309: invalid filter by column: <varname>string</varname>

Cause: the column specified is not valid

Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification.

DRG-11310: invalid order by column: <varname>string</varname>

Cause: the column specified is not valid

Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification.

DRG-11311: <varname>string</varname> cannot be specified for this optimization mode

Cause: the specified option is not valid for this optimization mode

Action: remove the specified option

DRG-11312: source and new policy must have same owner

Cause: the new policy has a different owner than the source policy

Action: Ensure that both policies are owned by the same user

DRG-11313: populate index error on index partition <varname>string</varname>

Cause: failed to populate the text index on the specified partition

Action: See the next errors on stack and take appropriate action

DRG-11314: changing TRANSACTIONAL property on index with rows on pending queue not allowed

Cause: the index has pending unsynced rows

Action: sync the index before changing the TRANSACTIONAL property

DRG-11316: \$\$ table cannot be created with <varname>string</varname>

Cause: the \$\$ table cannot be created with the specified storage option

Action: remove the specified option from the index preference and retry the index creation

DRG-11317: rowid <varname>string</varname> is not in the index

Cause: you specified an invalid rowid in ctx_ddl.add_mdata

Action: correct the rowid and retry

DRG-11318: error processing dr\$\$data_update

Cause: there was an error

Action: check the error stack for more details

DRG-11319: more than 1 index found on \$. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11320: no index found on \$. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11321: triggers detected on \$. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11322: fast optimize not supported for big_io option

Cause: OPTIMIZE FAST is not supported with big_io option

Action: run optimize full or rebuild instead

DRG-11323: merge optimize requires near_realtime option

Cause: OPTIMIZE MERGE requires near_realtime option

Action: run another optimize mode

DRG-11324: fast optimize not supported for separate_offsets option

Cause: OPTIMIZE FAST is not supported with separate_offsets option

Action: run optimize full or rebuild instead

DRG-11325: stageitab only supported for context index

Cause: STAGEITAB requires context index

Action: don't use stageitab on non context indexes

DRG-11326: separate offsets only supported for context index

Cause: SEPARATE_OFFSETS requires context index

Action: don't use separate_offsets on non context indexes

DRG-11327: big_io only supported for context index

Cause: BIG_IO requires context index

Action: don't use big_io on non context indexes

DRG-11328: optimize validation failed

Cause: optimize validation failed

Action: file a bug

DRG-11332: Index already has STAGE_ITAB set

Cause: Index already has stage_itab set

Action: Do not add stage_itab to this index

DRG-11333: Index does not have STAGE_ITAB set

Cause: Index does not have stage_itab set

Action: Do not remove stage_itab from this index

DRG-11334: Index already has BIG_IO set

Cause: Index already has big_io set

Action: Do not add big_io to this index

DRG-11335: Index does not have BIG_IO set

Cause: Index does not have big_io set

Action: Do not remove big_io from this index

DRG-11336: Index already has SEPARATE_OFFSETS set

Cause: Index already has separate_offsets set

Action: Do not add separate_offsets to this index

DRG-11337: Index does not have SEPARATE_OFFSETS set

Cause: Index does not have separate_offsets set

Action: Do not remove separate_offsets from this index

DRG-11338: policy <varname>string</varname> does not exist

Cause: the specified policy does not exist or you do not have access to it.

Action: Specify an existing index

DRG-11339: \$A table cannot be created with <varname>string</varname>

Cause: the \$A table cannot be created with the specified storage option

Action: remove the specified option from the index preference and retry the index creation

DRG-11340: \$F table cannot be created with <varname>string</varname>

Cause: the \$F table cannot be created with the specified storage option

Action: remove the specified option from the index preference and retry the index creation

DRG-11341: Index optimization failed for one or more tokens

Cause: Index optimization generated an error for one or more tokens, possibly due to corruption of the token_info blob.

Action: Check the index optimization log for the detailed error, or retry the optimize call with logging enabled

DRG-11342: OPTIMIZE REBUILD not supported for partitioned \$I and global \$X

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11343: OPTIMIZE REBUILD not supported for current \$I partitioning scheme

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11344: SPLIT DOLLARI does not allow an empty mapping table input

Cause: SPLIT DOLLARI doesn't generate any output for empty mapping table

Action: populate the mapping table, and retry the operation

DRG-11345: Index optimization was interrupted

Cause: Index optimization was interrupted by ctx_adm.stop_optimize

Action: None

DRG-11346: FORWARD INDEX only supported for context index

Cause: FORWARD INDEX needs context index

Action: Don't use FORWARD INDEX on non context indexes

DRG-11347: FORWARD INDEX does not exist for this index

Cause: FORWARD INDEX does not exist

Action: Enable forward index for the index

DRG-11348: OPTIMIZE REBUILD not supported for \$I with character length semantics columns

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11349: FILTER CACHE only supported for context index

Cause: FILTER CACHE only for context index

Action: Don't use FILTER_CACHE on non context indexes

DRG-11350: SAVE COPY only supported for context index

Cause: SAVE COPY needs context index

Action: Don't use SAVE COPY on non context indexes

DRG-11351: Unable to fetch partition Id for given rowid: <varname>string</varname>

Cause: Not able to fetch partition id for given rowid

Action: Make sure index tables are partitioned correctly.

DRG-11352: Not able to fetch partition name for given partition position: <varname>number</varname>

Cause: Not able to fetch partition name for given partition position

Action: Make sure valid partition position has been provided

DRG-11353: xml_enable is not allowed for a local index

Cause: Section group attribute xml_enable set to TRUE for a local index

Action: Set xml_enable to FALSE for a local index.

DRG-11354: stage_itab_target_size need to be set, if stage_itab storage preference is set

Cause: Storage option stage_itab needs to be accompanied with stage_target_max_size

Action: Add stage_target_max_size to storage preference

DRG-11355: Not able to fetch partition position from rowid: <varname>string</varname>

Cause: Not able to fetch partition position for given rowid

Action: Make sure valid rowid has been provided

DRG-11356: Optimize operations are not permitted on partition <varname>string</varname>

Cause: READ mode for this partition is set to FALSE. No optimize operations are permitted in this mode.

Action: Set READ mode for this partition to be TRUE.

DRG-11357: FORWARD INDEX must be specified at index, not partition level <varname>string</varname>

Cause: forward index was specified at partition level and not at index level

Action: Specify forward index option at index level. All partitions inherit.

DRG-11358: Save Copy must be specified at index, not partition level
<varname>string</varname>

Cause: save copy was specified at partition level and not at index level

Action: Specify save copy option at index level. All partitions inherit.

DRG-11400: failed to parse document with key <varname>string</varname>

Cause: the document specified for linguistic extraction could not be parsed. This could indicate that the document is not well-formed English

Action: check the document contents

DRG-11403: primary key value too long

Cause: the primary key value parameter passed to the service request is longer than the maximum primary key length (64 bytes)

Action: check primary key parameter

DRG-11404: no primary key value specified

Cause: the primary key value parameter passed to the service request is null

Action: check primary key parameter

DRG-11410: could not insert into <varname>string</varname> result table

Cause: an ORACLE error occurred while linguistic output was being inserted into the result table

Action: take action appropriate to the ORACLE error code.

DRG-11418: insufficient document content for linguistic parser

Cause: the document specified for linguistic extraction was parsed but the document content was insufficient for linguistic extraction by the specified parser.

Action: check the document contents or try modifying linguistic settings

DRG-11422: linguistic initialization failed

Cause: linguistic services initialization failed

Action: Check to see if knowledge base files present for the language

DRG-11425: gist level <varname>string</varname> is invalid

Cause: invalid gist level

Action: Specify a valid gist level

DRG-11427: valid gist level values are <varname>string</varname>

Cause: Invalid gist level

Action: Specify a valid gist level

DRG-11428: document contains invalid characters

Cause: The document contains invalid characters

Action: Remove invalid characters

DRG-11432: file error while accessing knowledge base

Cause: An oracle error was encountered during knowledge base access

Action: Check to see if knowledge base files present for the language

DRG-11435: primary key value is invalid

Cause: the primary key value parameter passed to the service request is not valid

Action: check primary key parameter

DRG-11439: index name length exceeds maximum of <varname>string</varname> bytes

Cause: the length of the index name is longer than the maximum index name size

Action: drop the index and recreate the index with a shorter index name

DRG-11440: operation not supported for the <varname>string</varname> language

Cause: the requested operation is not supported for the current language

Action: Do not request this operation

DRG-11441: gist numParagraphs <varname>string</varname> is invalid

Cause: invalid gist numparagraphs

Action: Specify valid gist numparagraphs

DRG-11442: valid gist numParagraphs values are <varname>string</varname>

Cause: invalid gist numparagraphs

Action: Specify valid gist numparagraphs

DRG-11443: gist maxPercent <varname>string</varname> is invalid

Cause: invalid gist max percent

Action: Specify valid gist max percent

DRG-11444: valid gist maxPercent values are <varname>string</varname>

Cause: invalid gist max percent

Action: Specify valid gist max percent

DRG-11445: rowid value is invalid: <varname>string</varname>

Cause: the rowid value parameter passed to the service request is not valid

Action: check rowid parameter

DRG-11446: supplied knowledge base file <varname>string</varname> not installed

Cause: Either using Oracle Express edition or supplied Knowledge Base was required but was not installed.

Action: If using Oracle Express edition then upgrade to Oracle Enterprise or Oracle Standard edition. Otherwise see post-installation tasks section of the Database Installation Guide for instructions to install supplied Knowledge Base.

DRG-11480: ctxkbt memory allocation error: %(1)

Cause: Unable to allocate memory

Action: Contact your system administrator

DRG-11481: linguistic feature not enabled

Cause: linguistic feature not enabled

Action: enable linguistic feature

DRG-11500: column name expected, found <varname>string</varname> on line <varname>string</varname>

Cause: possibly miss-spelt column name or keyword

Action: check spellings and punctuation around specified line

DRG-11501: identifier <varname>string</varname> found in place of column name on line <varname>string</varname>

Cause: possibly miss-spelt column name

Action: check spellings around specified line

DRG-11502: read of file failed at line <varname>string</varname> for file <varname>string</varname>

Cause: bad file name, wrong file_type or file system error

Action: check file name, type and/or file integrity

DRG-11503: insert statement overflows maximum statement size

Cause: total length of statement exceeds database maximum

Action: reduce length of column names or number of columns

DRG-11504: invalid longsize parameter of <varname>string</varname> specified

Cause: invalid option argument

Action: specify long buffer size in kbytes above 0

DRG-11505: long data on line <varname>string</varname> not found or invalid

Cause: either bad data or bad data file

Action: check file exists and is accessible, if separate

DRG-11506: record ignored on line <varname>string</varname> because of error(s)

Cause: an error occurred parsing this row's data

Action: move and amend line in error to alternate load file

DRG-11507: file error trying to read file <varname>string</varname>

Cause: file not found or could not be read

Action: check name and location of file

DRG-11508: bad or missing <varname>string</varname> token on line <varname>string</varname>

Cause: token expected was not found

Action: move and amend record affected to error load file

DRG-11509: value expected on line <varname>string</varname>

Cause: could not make sense of text where value expected

Action: move and amend record affected to error load file

DRG-11510: encountered unrecoverable error on line <varname>string</varname>

Cause: see previous messages

Action: see previous errors

DRG-11511: specified table does not contain a LONG RAW column

Cause: text must be inserted into a LONG RAW type column

Action: check table and type of data

DRG-11512: bad syntax for thesaurus load file at line <varname>string</varname>

Cause: load file must have specific format for loading thesaurus

Action: check documentation for description of correct format

DRG-11513: unable to open or write to file <varname>string</varname>

Cause: an attempt to open or to write to the given file failed

Action: check with system administrator

DRG-11514: user <varname>string</varname> does not have UPDATE or SELECT privilege on <varname>string</varname>

Cause: user has not been granted UPDATE or SELECT privilege

Action: check privilege on the user

DRG-11515: not enough text key values

Cause: number of values provided does not match the number of text keys

Action: provide same number of values as the number of text keys

DRG-11516: user must be at least in role CTXUSER to perform this operation

Cause: user does not have CTXUSER, CXAPP or CTXADMIN role

Action: grant user the proper role

DRG-11517: error when validating text objects

Cause: see accompanying Oracle error

Action: see accompanying Oracle error

DRG-11518: text table <varname>string</varname> does not have a LONG or LONG RAW column

Cause: table specified does not have a LONG or LONG RAW column

Action: check the table

DRG-11519: encounter error when exporting a LONG or LONG RAW column

Cause: see accompanying error message

Action: see accompanying error message

DRG-11520: error writing to file

Cause: file does not exist

Action: make sure file exists

DRG-11521: encounter error when updating a LONG or LONG RAW column

Cause: see accompanying error message

Action: see accompanying error message

DRG-11522: no row exists for the text key(s) specified

Cause: no row in the table has the text key(s) specified

Action: use a valid text key(s)

DRG-11523: unable to lock the specified row for update

Cause: some other process has a lock on the row

Action: release the lock or wait until the lock is released

DRG-11524: primary key value is missing

Cause: primary key value is not provided

Action: provide the primary key value(s)

DRG-11525: invalid commitafter parameter of <varname>string</varname> specified

Cause: invalid option argument

Action: specify commitafter above 0

DRG-11526: filename exceeds maximum length

Cause: value of the file name is too long

Action: Specify a shorter file name

DRG-11527: end token not found on line <varname>string</varname>

Cause: <varname>TEXTEND</varname> not found at end of record

Action: processing discontinued - amend record

DRG-11528: LONG or LONG RAW column definition found in structure data

Cause: could be misplaced

Action: remove reference to LONG or LONG RAW column from structure data

DRG-11529: token exceeds maximum length

Cause: value of the column name or value is too long

Action: processing discontinued - amend record

DRG-11530: token exceeds maximum length

Cause: value of the phrase or relation word is too long

Action: processing discontinued - amend record

DRG-11531: start token not found on line <varname>string</varname>

Cause: <TEXTSTART: not found at start of record

Action: processing discontinued - amend record

DRG-11532: error reading through end of line <varname>string</varname> for file <varname>string</varname>

Cause: characters encountered while reading through end of line

Action: remove extraneous characters

DRG-11533: improper value of column <varname>string</varname>

Cause: value of the column is too long or mismatched quote

Action: processing discontinued - amend record

DRG-11534: invalid column <varname>string</varname>

Cause: column does not exist or it's misspelled

Action: processing discontinued - amend record

DRG-11535: error writing phrase or qualifier: <varname>string</varname> on line <varname>string</varname> to memory

Cause: not enough memory

Action: allocate more memory, contact WorldWide Support if problem persists

DRG-11600: URL store: <varname>string</varname> has permanently moved

Cause: the document referred to by the URL has permanently moved

Action: find the new address, if any, of the document

DRG-11601: URL store: bad syntax on request for <varname>string</varname>

Cause: client did not make correct request

Action: contact support

DRG-11602: URL store: access to <varname>string</varname> requires authentication

Cause: user has to provide password or other authentication

Action: get required access, or check URL

DRG-11603: URL store: payment required to access <varname>string</varname>

Cause: payment is required before the URL can be accessed

Action: check URL, or pay if required if access necessary

DRG-11604: URL store: access to <varname>string</varname> is denied

Cause: access to the URL is denied

Action: check URL; if correct, do not try to access URL again

DRG-11605: URL store: document specified by <varname>string</varname> not found

Cause: the document can not be found on the host specified

Action: check URL

DRG-11606: URL store: access to <varname>string</varname> timed out waiting for client request

Cause: client did not make response within timeout period

Action: check URL

DRG-11607: URL store: access to <varname>string</varname> was denied due to garbled response

Cause: Web server identified in URL doesn't obey HTTP protocol

Action: contact the Web administrator of the remote host

DRG-11608: URL store: host portion of <varname>string</varname> specified incorrectly

Cause: host portion of the URL could not be parsed

Action: check URL

DRG-11609: URL store: unable to open local file specified by <varname>string</varname>

Cause: attempt to open local file failed

Action: check URL

DRG-11610: URL store: unable to read local file specified by <varname>string</varname>

Cause: attempt to read local file failed

Action: contact system administrator

DRG-11611: URL store: unknown protocol specified in <varname>string</varname>

Cause: the protocol parsed is neither http or file

Action: check URL

DRG-11612: URL store: unknown host specified in <varname>string</varname>

Cause: the address of the host specified could not be resolved

Action: check URL

DRG-11613: URL store: connection refused to host specified by <varname>string</varname>

Cause: attempt to connect to host was forcibly refused

Action: check URL

DRG-11614: URL store: communication with host specified in <varname>string</varname> timed out

Cause: a network operation timed out

Action: try again later; network connection may be down to Web server

DRG-11615: URL store: write failed sending to <varname>string</varname> over network

Cause: unknown error writing request to Web server

Action: check network connection

DRG-11616: URL store: too many redirections trying to access <varname>string</varname>

Cause: too long a chain of HTTP redirections given the URL

Action: contact the Web administrator of the remote host

DRG-11617: URL store: URL <varname>string</varname> is too long

Cause: The length of the URL string is longer than URLSIZE

Action: set URLSIZE attribute to a larger value

DRG-11618: URL store: document identified by <varname>string</varname> is too large

Cause: document larger than user-set maximum size

Action: do not access URL, or increase document size limit

DRG-11619: URL store: row in table is empty

Cause: row deleted or otherwise missing

Action: check table if necessary

DRG-11620: URL store: thread operation error

Cause: thread operation failed

Action: contact system administrator

DRG-11621: URL store: socket open error for <varname>string</varname>

Cause: socket open failed; probably too many open file descriptors

Action: reduce the maximum number of threads started

DRG-11622: URL store: unknown HTTP error <varname>string</varname> getting <varname>string</varname>

Cause: an unexpected HTTP error has occurred

Action: consult HTTP error codes; if valid, contact support

DRG-11623: URL store: unknown error getting <varname>string</varname>

Cause: unexpected error

Action: contact support

DRG-11624: invalid attribute <varname>string</varname> for <varname>string</varname>: proper range <varname>string</varname> to <varname>string</varname>

Cause: unexpected error

Action: change attribute value

DRG-11625: MAXURLS * URLSIZE must be less than <varname>string</varname>

Cause: MAXURLS * URLSIZE cannot be larger than the limit

Action: Lower either MAXURLS or URLSIZE

DRG-11626: URL store: unknown protocol specified during redirect from <varname>string</varname>

Cause: the URL redirected to a site with neither http nor file protocol

Action: check URL

DRG-11627: URL store: not implemented error getting <varname>string</varname>

Cause: The remote host returned a 501 not implemented error

Action: Check URL

DRG-11628: URL store: bad gateway error getting <varname>string</varname>

Cause: The remote host returned a 502 bad gateway error

Action: Check URL

DRG-11629: URL store: service unavailable error getting <varname>string</varname>

Cause: The remote host returned a 503 service temporarily unavailable error

Action: Check URL

DRG-11630: URL store: gateway timeout error getting <varname>string</varname>

Cause: The remote host returned a 504 gateway timeout error

Action: Check URL

DRG-11700: thesaurus <varname>string</varname> already exists

Cause: thesaurus with same name exists

Action: use another name

DRG-11701: thesaurus <varname>string</varname> does not exist

Cause: thesaurus does not exist

Action: use another thesaurus or create it

DRG-11702: <varname>string</varname>

Cause: error while parsing thesaurus operator in query term. see error message for details.

Action: see error message

DRG-11703: user <varname>string</varname> must have at least CTXAPP role to execute this function

Cause: privilege is not sufficient

Action: grant user CTXAPP role

DRG-11704: phrase '<varname>string</varname>' does not exist

Cause: phrase does not exist

Action: use another phrase or create it

DRG-11705: multilevel jump from <varname>string</varname> to <varname>string</varname>

Cause: the thesaurus load file has a multilevel jump which could not be parsed.

Action: correct thesaurus file

DRG-11706: invalid relation <varname>string</varname>

Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes

Action: Specify a valid relation

DRG-11707: valid relations: <varname>string</varname>

Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes

Action: Specify a valid relation

DRG-11708: too many thesauri

Cause: ctxkbtz cannot compile more than 16 thesauri

Action: Specify fewer thesauri

DRG-11709: too many terms in thesaurus

Cause: number of thesaurus terms exceeds maximum

Action: Use a thesaurus with fewer terms

DRG-11710: thesaurus term <varname>string</varname> too long

Cause: knowledge base does not permit terms longer than 80 characters

Action: Correct thesaurus

DRG-11711: too much data for term <varname>string</varname>

Cause: internal limit on size of data per term

Action: redesign thesaurus

DRG-11712: multiple Broader Terms for term <varname>string</varname>

Cause: There is a term in the thesaurus with multiple broader terms

Action: make sure each term has only one broader term

DRG-11713: multiple Preferred Terms per synonym ring

Cause: There is a synonym ring in the thesaurus with multiple preferred terms

Action: make sure each synonym ring has only one preferred term

DRG-11714: synonyms have different Broader Terms

Cause: Some synonyms in a synonym ring have different broader terms

Action: make sure all synonyms have the same broader term

DRG-11715: attempt to add a BT relation between 2 KB categories
<varname>string</varname> and <varname>string</varname>

Cause: BT relation cannot be between two existing knowledge base categories

Action: redesign the BT hierarchy

DRG-11716: attempt to add Narrower Term <varname>string</varname> for non-Preferred Term <varname>string</varname>

Cause: only a PT can have NTs

Action: attach the NT to the preferred term

DRG-11717: attempt to add Related Term <varname>string</varname> to non-Preferred Term <varname>string</varname>

Cause: only a PT can have RTs

Action: attach the RT

DRG-11718: multiple Preferred Terms for term <varname>string</varname>

Cause: There are multiple preferred terms for this term

Action: Correct thesaurus

DRG-11719: Broader Term hierarchy too deep

Cause: The broader term hierarchy in this thesaurus is too deep

Action: flatten the hierarchy for best results

DRG-11720: too many synonyms per synonym ring

Cause: too many synonyms for a single preferred term

Action: introduce further distinctions to deepen the hierarchy

DRG-11721: thesaurus <varname>string</varname> is empty

Cause: no entries in thesaurus

Action: add some entries or drop the thesaurus

DRG-11722: invalid language specification

Cause: language specification cannot be more than 10 characters

Action: reduce language specification to less or equal to 10 char

DRG-11723: phrase cannot be NULL

Cause: you tried to add a NULL phrase to the thesaurus

Action: specify a valid phrase

DRG-11724: phrase <varname>string</varname> already exists

Cause: phrase with same name exists

Action: use another name

DRG-11725: phrase does not have any synonyms

Cause: you tried to nominate a phrase with no synonyms to be the preferred term, or you tried to drop SYN from a phrase with no synonyms

Action: None

DRG-11726: phrase is not a preferred term

Cause: you tried to remove the preferred term relation from a phrase which is not a preferred term.

Action: None

DRG-11727: phrase does not have any related terms

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11728: phrase does not have any broader terms of this type

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11729: phrase does not have any narrower terms of this type

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11730: relation does not exist

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11731: translation does not exist

Cause: you tried to drop a translation which does not exist

Action: None

DRG-11732: phrase does not have any translations

Cause: you tried to drop translations which does not exists

Action: None

DRG-11733: more than one translation for the term in the specified language

Cause: the term has more than one translation in the specified language

Action: specified a translation

DRG-11734: missing homograph

Cause: A term of the form 'homograph(disambiguation)' is missing the the homograph.

Action: None

DRG-11735: missing disambiguation

Cause: A term of the form 'homograph(disambiguation)' is missing the the disambiguation (i.e., homograph()).

Action: None

DRG-11736: illegal text after disambiguated homograph

Cause: A term of the form 'homograph(disambiguation)' has text after the disambiguation (e.g, homograph(disambiguation) extra text".

Action: None

DRG-11801: Continue

Cause: Enquire user to decide if continue is necessary HTTP_ERROR = 100

Action: Upon positive response, continue the original operation

DRG-11802: Switching Protocols

Cause: Telling client a protocol switching just happened HTTP_ERROR = 101

Action: The user agent takes proper actions

DRG-11803: OK

Cause: Telling client things are ok HTTP_ERROR = 200

Action: The user agent takes proper actions

DRG-11804: Created

Cause: Telling client things are created HTTP_ERROR = 201

Action: The user agent takes proper actions

DRG-11805: Accepted

Cause: Telling client things are accepted but not committed HTTP_ERROR = 202

Action: The user agent takes proper actions

DRG-11806: Non-authoritative Information

Cause: The returned metainformation is not the definitive set HTTP_ERROR = 203

Action: The user agent knows the information is Non-authoritative

DRG-11807: No Content

Cause: request has been fulfilled but no new information found HTTP_ERROR = 204

Action: The user agent takes proper actions

DRG-11808: Reset Content

Cause: Telling client to reset the document view HTTP_ERROR = 205

Action: The user agent takes proper actions

DRG-11809: Partial Content

Cause: Telling client document content is a partial content HTTP_ERROR = 206

Action: The user agent takes proper actions

DRG-11810: Partial Update OK

Cause: Telling client document is partially updated HTTP_ERROR = 207

Action: The user agent takes proper actions

DRG-11811: Multiple Choices

Cause: Telling client multiple choices of resources is possible HTTP_ERROR = 300

Action: The user agent takes proper actions

DRG-11812: Moved Permanently

Cause: The URI has been assigned a new permanent URI HTTP_ERROR = 301

Action: The user agent takes proper actions

DRG-11813: Moved Temporarily

Cause: The URI resides temporarily under a different URI. HTTP_ERROR = 302

Action: The user agent takes proper actions

DRG-11814: See Other

Cause: The URI can be found using GET METHOD under a different URI
HTTP_ERROR = 303

Action: The user agent takes proper actions

DRG-11815: Not Modified

Cause: Response to conditional GET, indicating document not modified.
HTTP_ERROR = 304

Action: The user agent takes proper actions

DRG-11816: Use Proxy

Cause: The client should use specified proxy to repeat the request HTTP_ERROR = 305

Action: The user agent takes proper actions

DRG-11817: Proxy Redirect

Cause: Proxy redirection. Not used HTTP_ERROR = 306

Action: Outdated due to HTTP evolution

DRG-11818: Temporary Redirect

Cause: The resource is temporarily under a different URI. HTTP_ERROR = 307

Action: The takes proper actions

DRG-11819: Bad Request

Cause: The URL syntax is incorrect. Request rejected by server. HTTP_ERROR = 400

Action: The user agent takes proper actions

DRG-11820: Unauthorized

Cause: The request requires further authentication. HTTP_ERROR = 401

Action: The user agent takes proper actions

DRG-11821: Payment Required

Cause: Reserved for future use. HTTP_ERROR = 402

Action: The user agent takes proper actions

DRG-11822: Forbidden

Cause: The server refuses to fulfil the request from client HTTP_ERROR = 403

Action: The user agent takes proper actions

DRG-11823: Not Found

Cause: The server can not find the requested URI HTTP_ERROR = 404

Action: The user agent takes proper actions

DRG-11824: Method Not Allowed

Cause: The user agent specified method not allowed HTTP_ERROR = 405

Action: The user agent reads allow header to decide alternatives.

DRG-11825: Not Acceptable

Cause: Requested resource is not acceptable according to request header
HTTP_ERROR = 406

Action: The user agent should query the user for the next action.

DRG-11826: Proxy Authentication Required

Cause: The client must authenticate itself with the proxy. HTTP_ERROR = 407

Action: The user agent takes proper actions

DRG-11827: Request Timeout

Cause: The server is tired of waiting for the request HTTP_ERROR = 408

Action: The user agent repeat the request

DRG-11828: Conflict

Cause: The request conflicts with the current state of the URI HTTP_ERROR = 409

Action: The user agent takes proper actions

DRG-11829: Gone

Cause: The resource is no longer available and no forwarding address.
HTTP_ERROR = 410

Action: The user agent takes proper actions

DRG-11830: Length Required

Cause: The server must receive a content-length header. HTTP_ERROR = 411

Action: The user agent takes proper actions

DRG-11831: Precondition Failed

Cause: Telling the user agent that the resource failed preconditions HTTP_ERROR = 412

Action: The user agent takes proper actions

DRG-11832: Request Entity Too Large

Cause: Request rejected because request entity is too large. HTTP_ERROR = 413

Action: If Retry-After header found, the user agent should retry.

DRG-11833: Request-URI Too Big

Cause: The server is refusing to accept the URI which is too big. HTTP_ERROR = 414

Action: The user agent takes proper actions

DRG-11834: Unsupported Media Type

Cause: The server is refusing the request because of media type HTTP_ERROR = 415

Action: The user agent takes proper actions

DRG-11835: Requested Range Not Satisfiable

Cause: The byte range request can not be satisfied by the resource extent. HTTP_ERROR = 416

Action: The user agent reads content-range header in the response.

DRG-11836: Expectation Failed

Cause: Server can not meet the user agent's expectation. HTTP_ERROR = 417

Action: The user agent takes pro

DRG-11837: Reauthorization Required

Cause: Reserved HTTP_ERROR = 418

Action: Reserverd

DRG-11838: Proxy Reauthentication Required

Cause: Reserved HTTP_ERROR = 419

Action: Reserved

DRG-11839: Internal Server Error

Cause: The server encountered internal error in fulfilling the request. HTTP_ERROR = 500

Action: The user agent takes proper actions

DRG-11840: Not Implemented

Cause: The server can't support a request feature which has yet to be implemented. HTTP_ERROR = 501

Action: The user agent takes proper actions

DRG-11841: Bad Gateway

Cause: In serving the request, the server received invalid response from gateway. HTTP_ERROR = 502

Action: The user agent takes proper actions

DRG-11842: Service Unavailable

Cause: Server overloaded or in maintenance mode. HTTP_ERROR = 503

Action: If retry-after header is in the response, retry the request.

DRG-11843: Gateway Timeout

Cause: Upstream server did not timely respond to the gateway server. HTTP_ERROR = 504

Action: The user agent takes proper actions

DRG-11844: HTTP Version Not Supported

Cause: The HTTP version in the request header is rejected by the server. HTTP_ERROR = 505

Action: The user agent takes proper actions

DRG-11845: No Partial Update

Cause: Reserved HTTP_ERROR = 506

Action: Reserved

DRG-11846: Response Is Stale

Cause: The the user agent knows the returned reponse is stale. HTTP_CACHE_ERROR = 10

Action: The user agent client takes proper actions.

DRG-11847: Revalidation Failed

Cause: User agent's attempt to revalidate a stale response failed. HTTP_CACHE_ERROR = 11

Action: The user agent client takes proper actions

DRG-11848: Disconnected Operation

Cause: The cache is intentionally disconnected for a time period. HTTP_CACHE_ERROR = 12

Action: The user agent client takes proper actions

DRG-11849: Heuristic Expiration

Cause: Cache freshness lifetime and response age both greater than 24 hours. HTTP_CACHE_ERROR = 13

Action: The user agent client takes proper actions

DRG-11850: Transformation Applied

Cause: Telling cache manager, content encoding/media type has been changed in cache. HTTP_CACHE_ERROR = 14

Action: The user agent takes proper actions

DRG-11851: Cache Related Warning

Cause: Arbitrary information about cache to be presented to logger. HTTP_CACHE_ERROR = 99

Action: The user agent client must not take any automated action.

DRG-11852: Can't Locate Remote Host

Cause: connection to remote host failed USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11853: No Host Name Found

Cause: The host name is not specified in URI. USER_AGENT_ERROR

Action: The user agent client takes proper action.

DRG-11854: No File Name Found Or File Not Accessible

Cause: Unable to open the file specified USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11855: FTP Server Replies

Cause: FTP server responds to the agent request USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11856: FTP Server Doesn't Reply

Cause: No response from FTP server during operation. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11857: Server Timed Out

Cause: Server operation timed out USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11858: Gopher Server Replies

Cause: Gopher server responds to the agent request. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11859: Data Transfer Interrupted

Cause: Processing of URL request was interrupted USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11860: Connection Establishment Interrupted

Cause: Connection operation was interrupted USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11861: CSO-server Replies

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11862: This Is Probably A HTTP Server 0.9 Or Less

Cause: A very old web server USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11863: Bad, Incomplete, Or Unknown Response

Cause: The server is returning something not understandable
USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11864: Unknown Access Authentication Scheme

Cause: The server is using an unknown access authentication scheme
USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11865: News Server Replies

Cause: News Server is responding USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11866: Please Try `ftp:/' Instead Of `file:/'

Cause: wrong access scheme is used. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11867: Method Not Suited For Automatic Redirection

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11868: Too Many Redirections

Cause: The web server setup configured too many redirections
USER_AGENT_ERROR

Action: The user agent client should take proper actions

DRG-11869: Premature End Of File Detected

Cause: Detected end of file is unexpected USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11870: Response From WAIS Server Too Large -- Extra Lines Ignored

Cause: Response from WAIS caused buffer overflow USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11871: WAIS Server Doesn't Return Any Data

Cause: Bad WAIS Server USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11872: Can't Connect To WAIS Server

Cause: Connect to WAIS server failed USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11873: System Call Replies

Cause: register what system call replies USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11874: Wrong Or Unknown Access Scheme

Cause: Protocol class is wrongfully connected to their server USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11875: Access Scheme Is Not Allowed

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11876: When Your Are Connected, You Can Log In

Cause: Pass information to telnet agent USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11877: This Cache Version Has Expired And Will Be Automatically Reloaded

Cause: Need to tell user that cache entry has been reloaded USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11878: Loading New Rules Must Be Explicitly Acknowledged

Cause: Let user agent client be aware of new rule loading USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11879: Automatic Proxy Redirection Msut Be Explicitly Acknowledged

Cause: Let user agent client be aware of proxy redirection USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-12001: Please enter username:

Cause: Prompt user for name W3CLIB_MSG = 0

Action: The user agent client takes proper actions

DRG-12002: Please enter username for proxy authentication:

Cause: Prompt user for name W3CLIB_MSG = 1

Action: The user agent client takes proper actions

DRG-12003: Please enter username for this FTP server:

Cause: Prompt user for name W3CLIB_MSG = 2

Action: The user agent client takes proper actions

DRG-12004: Password:

Cause: Prompt user for password W3CLIB_MSG = 3

Action: The user agent client takes proper actions

DRG-12005: Please give name of file to save in:

Cause: Prompt user for file name W3CLIB_MSG = 4

Action: The user agent client takes proper actions

DRG-12006: Plase enter account:

Cause: Prompt user for account W3CLIB_MSG = 5

Action: The user agent client takes proper actions

DRG-12007: You might not be allowed to use this method here, continue?

Cause: Warn user of deny of service. W3CLIB_MSG = 6

Action: The user agent client takes proper actions

DRG-12008: Location has moved, continue?

Cause: Warn user of location changes. W3CLIB_MSG = 7

Action: The user agent client takes proper actions

DRG-12009: A new set of rules is requested to be added to your setup - continue?

Cause: Warn user of rule changes. W3CLIB_MSG = 8

Action: The user agent client takes proper actions

DRG-12010: This file already exists - replace existing file?

Cause: Warn user of pending replacement W3CLIB_MSG = 9

Action: The user agent client takes proper actions

DRG-12011: Authentication failed - retry?

Cause: Warn user of authentication failure W3CLIB_MSG = 10

Action: The user agent client takes proper actions

DRG-12012: Proxy authentication failed - retry?

Cause: Warn user of proxy authentication failure W3CLIB_MSG = 11

Action: The user agent client takes proper actions

DRG-12013: This method has already been performed - repeat operation?

Cause: Warn user the repetition of previous method used W3CLIB_MSG = 12

Action: The user agent client takes proper actions

DRG-12014: This document is very big - continue operation?

Cause: Warn user of big document processing W3CLIB_MSG = 13

Action: The user agent client takes proper actions

DRG-12015: The source document for this operation has moved - continue?

Cause: Warn user of location changes W3CLIB_MSG = 14

Action: The user agent client takes proper actions

Cause: Warn user of destination document changes W3CLIB_MSG = 15

Action: The user agent client takes proper actions

DRG-12017: A redirection may change the behavior of this method - proceed anyway?

Cause: Warn user of redirection effects on method W3CLIB_MSG = 16

Action: The user agent client takes proper actions

DRG-12018: Encountered an automatic request for changing proxy - continue?

Cause: Warn user of automatic proxy change W3CLIB_MSG = 17

Action: The user agent client takes proper actions

DRG-12201: section group <varname>string</varname> already exists

Cause: Section group with the same name already exists

Action: Use another name or delete the existing one first

DRG-12202: error while creating section group

Cause: detect an Oracle error while creating section group

Action: see the accompanying Oracle error and take appropriate action

DRG-12203: section group <varname>string</varname> does not exist

Cause: section group provided does not exist

Action: provide an existing section group

DRG-12204: error while dropping section group <varname>string</varname>

Cause: detect an Oracle error while dropping a section group

Action: see the accompanying Oracle error and take appropriate action

DRG-12206: tag <varname>string</varname> already exists in section group <varname>string</varname>

Cause: the start tag provided already exists in the same Section

Action: provide another start tag

DRG-12210: error while adding section <varname>string</varname>

Cause: detect an Oracle error while adding a section

Action: see the accompanying Oracle error and take appropriate action

DRG-12211: section or section id <varname>string</varname> does not exist

Cause: Section name or Section id to be dropped does not exist

Action: provide an existing Section name or Section id

DRG-12212: error while dropping section <varname>string</varname>

Cause: detect an Oracle error while dropping a Section

Action: see the accompanying Oracle error and take appropriate action

DRG-12213: cannot create/drop section group or sections for other user

Cause: You can only create/drop section group objects of your own

Action: have the other user create/drop his/her own objects

DRG-12217: tags cannot be more than 64 bytes

Cause: max limit of start and end tag is 64 bytes

Action: provide a shorter start and end tag

DRG-12218: section group name missing

Cause: must provide section group name

Action: provide a section group name when creating Section or section group

DRG-12219: section name missing

Cause: must provide Section name when creating a Section

Action: provide a Section name

DRG-12220: a valid tag must be provided

Cause: must provide tag when adding a section to a section group

Action: provide a tag

DRG-12223: section name <varname>string</varname> is a reserved name

Cause: you tried to name a section a reserved name

Action: Specify a different name for the section

DRG-12224: use ctx_ddl.create_section_group to create section groups

Cause: you tried to use ctx_ddl.create_preference to create a section group

Action: use ctx_ddl.create_section_group

DRG-12225: this type of section cannot be added to this section group

Cause: You tried to add sections to the null section group, add a stop section to a non-auto section group, or add a zone or field section to the auto section group

Action: Do not add this type of section to this section group

DRG-12226: a field section named <varname>string</varname> already exists in this section group

Cause: you tried to name an attribute or zone section the same name as an existing field section

Action: use another name

DRG-12227: a zone section named <varname>string</varname> already exists in this section group

Cause: you tried to name an attribute or field section the same name as an existing zone section

Action: use another name

DRG-12228: maximum number of field sections (<varname>string</varname>) exceeded

Cause: a section group has more than the maximum number of unique field sections

Action: no action required

DRG-12229: special section <varname>string</varname> already exists in this section group

Cause: you tried to add a special section which already exists

Action: no action required

DRG-12230: special section name must be one of <varname>string</varname>

Cause: you tried to add an invalid special section

Action: specify a valid special section

DRG-12231: an attr section named <varname>string</varname> already exists in this section group

Cause: you tried to name a field or zone section the same name as an existing attribute section

Action: use another name

DRG-12232: invalid attribute tag format

Cause: you specified a tag for use as an attribute tag which did not have the correct format. An attribute tag must have the form TAG@ATTR

Action: use correct format

DRG-12233: xml sections cannot co-exist with other section types

Cause: you tried to add an xml section to a section group or index which already has zone, field, attr, or special sections, or you tried to add a zone, field, attr, or special section to a section group or index which already has xml sections

Action: n/a

DRG-12234: column <varname>string</varname> already mapped in section group <varname>string</varname>

Cause: you tried to add a column section which already exists

Action: use correct format

DRG-12235: an sdata section named <varname>string</varname> already exists in this section group

Cause: you tried to name a non-sdata section the same name as an existing sdata section

Action: use another name

DRG-12236: an mdata section named <varname>string</varname> already exists in this section group

Cause: you tried to name a non-mdata section the same name as an existing mdata section

Action: use another name

DRG-12237: a section named <varname>string</varname> already exists in this section group

Cause: you tried to map a column but the section name is already being used by another section

Action: use another name

DRG-12238: maximum number of mdata sections (<varname>string</varname>) exceeded

Cause: a section group has more than the maximum number of unique mdata sections

Action: no action required

DRG-12239: maximum number of sdata sections (<varname>string</varname>) exceeded

Cause: a section group has more than the maximum number of unique sdata sections

Action: no action required

DRG-12240: ORDER BY column <varname>string</varname> must be indexed as an SDATA section

Cause: an order by column has been mapped to an MDATA section

Action: adjust section group

DRG-12241: column name <varname>string</varname> is not a valid section name

Cause: an order by or filter by column cannot be implicitly mapped to an SDATA section because the name is not valid as a section name

Action: adjust section group to map column name to a valid section name

DRG-12242: value of <varname>string</varname> is too large for section <varname>string</varname>

Cause: the value of a filter by or order by column is too large to be indexed

Action: update the row

DRG-12243: invalid datatype

Cause: the datatype specified for a sdata or mdata section is invalid

Action: specify a supported datatype

DRG-12244: data conversion error for sdata section <varname>string</varname>

Cause: failed to convert data

Action: check the format of the data

DRG-12245: SDATA operator not compatible with the sdata section <varname>string</varname>

Cause: failed to convert data

Action: check the format of the data

DRG-12246: SDATA operand not compatible with the sdata section <varname>string</varname>

Cause: failed to convert data

Action: check the format of the data

DRG-12247: maximum number of NDATA sections (<varname>string</varname>) exceeded

Cause: a section group has more than the maximum number of unique NDATA sections

Action: no action required

DRG-12248: a NDATA section named <varname>string</varname> already exists in this section group

Cause: you tried to name a non-NDATA section the same name as an existing NDATA section

Action: use another name

DRG-12249: a MVDATA section named <varname>string</varname> already exists in this section group

Cause: you tried to name a non-MVDATA section the same name as an existing MVDATA section

Action: use another name

DRG-12250: maximum number of mvdata sections (<varname>string</varname>) exceeded

Cause: a section group has more than the maximum number of unique mvdata sections

Action: no action required

DRG-12251: MVDATA section in XML_SECTION_GROUP is not supported

Cause: you tried to add MVDATA section in XML_SECTION_GROUP

Action: n/a

DRG-12252: No valid rowid provided with MVDATA update procedure

Cause: No valid rowid(s) provided with MVDATA update procedure

Action: Provide at least one valid rowid with this procedure

DRG-12300: an index with this column list already exists in the index set

Cause: You tried to add an index to an index set, but an index with the specified column list already exists

Action: n/a

DRG-12301: index does not exist in index set

Cause: You tried to remove an index from an index set, but the specified index was not found

Action: n/a

DRG-12302: invalid column list

Cause: You specified an invalid column list -- it may have a syntax error, duplicate columns, or invalid column names

Action: n/a

DRG-12303: cannot add more than 99 indexes to an index set

Cause: You tried to add too many indexes to the index set

Action: n/a

DRG-12304: index set <varname>string</varname> does not exist

Cause: You specified an invalid index set name

Action: n/a

DRG-12305: column <varname>string</varname> data type is not supported for index set columns

Cause: You specified a column in the column list of an index of an index set which does not have a valid datatype

Action: use only DATE, NUMBER, CHAR, or VARCHAR2 columns in index column lists

DRG-12306: column <varname>string</varname> is too long for index set columns

Cause: You specified a column in the column list of an index of an index set which is too long

Action: CHAR and VARCHAR2 columns must be 30 bytes or less max length

DRG-12307: column <varname>string</varname> is NULL and cannot be indexed

Cause: You tried to index a row where at least one of the meta columns was NULL.

Action: provide a value for the meta column and reindex the row

DRG-12308: use ctx_ddl.create_index_set to create index sets

Cause: you tried to use ctx_ddl.create_preference to create an index set

Action: use ctx_ddl.create_index_set

DRG-12309: not to use compression on attributes lob column

Cause: you tried to use compression on attributes lob column for xml full text index

Action: not to use compression on attributes lob column for xml full text index

DRG-12400: template <varname>string</varname> is empty

Cause: The template is empty.

Action: Check the template was installed successfully.

DRG-12401: invalid template: query within a loop

Cause: A CTX EXEC tag cannot occur within a CTX REPEAT tag.

Action: Remove the CTX EXEC tag.

DRG-12402: error processing template <varname>string</varname>, line <varname>string</varname>

Cause: An error occurred when processing a template.

Action: See other errors on the stack and take the appropriate action.

DRG-12403: template <varname>string</varname> was not found

Cause: The template does not exist.

Action: Check the name of the template and check that it is installed.

DRG-12404: more than one template <varname>string</varname> found

Cause: More than one template with the same name was found.

Action: Remove templates as appropriate.

DRG-12405: error occurred processing CTX REDIRECT or CTX LABEL tag

Cause: Error in syntax of a tag.

Action: Correct the syntax of the tag.

DRG-12406: invalid CTX EXEC tag attribute (<varname>string</varname>)

Cause: The specified attribute is incorrectly specified.

Action: Check the syntax of the specified attribute.

DRG-12407: invalid CTX REPEAT tag attribute (<varname>string</varname>)

Cause: The specified attribute is incorrectly specified.

Action: Check the syntax of the specified attribute.

DRG-12408: invalid variable reference: <varname>string</varname>.<varname>string</varname>

Cause: The variable referenced does not exist.

Action: Check the label and column name.

DRG-12409: syntax error for label in <varname>string</varname>

Cause: The SQL in a CTX EXEC tag has incorrect syntax for a label or label type.

Action: Check the SQL attribute of the CTX EXEC tag.

DRG-12410: could not process CTX EXEC tag

Cause: An error occurred when processing the SQL attribute of a CTX EXEC tag.

Action: See other errors on the stack and take the appropriate action.

DRG-12411: SQL processing error: <varname>string</varname>

Cause: Error executing SQL from SQL attribute of CTX EXEC tag.

Action: Check the SQL in the SQL attribute.

DRG-12412: missing or invalid Template Processor attribute (<varname>string</varname>)

Cause: The specified attribute was missing or invalid in a HTML input field.

Action: Check the Template Processor-specific attributes in the INPUT, SELECT, RADIO and CHECKBOX tags of the template.

DRG-12422: write to client failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12430: mandatory argument missing: <varname>string</varname>

Cause: This argument is mandatory.

Action: Re-submit the URL with this argument supplied.

DRG-12431: configuration section <varname>string</varname> not found

Cause: Specified conf argument is invalid.

Action: Re-submit the URL with this argument corrected.

DRG-12432: configuration file <varname>string</varname> not found or unreadable

Cause: An error occurred when processing the configuration file.

Action: Contact the administrator.

DRG-12433: load of <varname>string</varname> JDBC driver class failed

Cause: Driver class is invalid.

Action: Contact the administrator to modify configuration.

DRG-12434: connection failed using configuration <varname>string</varname> information

Cause: Configuration information is not correct.

Action: Contact the administrator to modify configuration.

DRG-12435: highlight table allocation failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12436: document table allocation failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12437: highlight table release failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12438: document table release failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12439: highlight table read failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12440: document table read failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12441: counting the number of highlights failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12500: stoplist <varname>string</varname> already exists

Cause: the specified stop list already exists

Action: must remove the duplicate stop list if you want to re-create it.

DRG-12501: null stoplist is not allowed

Cause: the specified stop list is null

Action: must specify a valid stop list

DRG-12502: cannot modify stoplists owned by other users

Cause: You can only create/drop Stop List or Stop Word objects of your own

Action: have the other user create/drop his/her own objects

DRG-12503: error while creating or dropping stoplist

Cause: detect an Oracle error while creating Stop List

Action: see the accompanying Oracle error and take appropriate action

DRG-12504: stoplist <varname>string</varname> does not exist

Cause: the specified stop list does not exist

Action: check that the Stop List is valid

DRG-12505: error while adding or removing a stop word

Cause: detect an Oracle error while adding or removing Stop Word

Action: see the accompanying Oracle error and take appropriate action

DRG-12506: stop word <varname>string</varname> does not exist in stoplist <varname>string</varname>

Cause: the specified Stop Word does not exist

Action: check that the Stop Word is valid

DRG-12507: stop word <varname>string</varname> already exists in this stoplist

Cause: the specified stop word already exists

Action: must remove the duplicate word if you want to re-create it.

DRG-12508: null stop words are not allowed

Cause: the specified stop word is null

Action: must remove the null stop word if you want to re-create it.

DRG-12509: length of the stop word <varname>string</varname> exceeded the limit of <varname>string</varname> bytes

Cause: A stop list entry has exceeded the maximum length

Action: Reduce the length of the stop list entry

DRG-12511: use ctx_ddl.create_stoplist to create stoplists

Cause: you tried to use ctx_ddl.create_preference to create a stoplist

Action: use ctx_ddl.create_stoplist

DRG-12512: invalid stop class <varname>string</varname>

Cause: you specified an invalid stop class

Action: specify a valid stop class

DRG-12513: valid stop classes are: <varname>string</varname>

Cause: You specified an invalid stop class

Action: Specify a valid stop class

DRG-12514: languages must be specified for stopwords in a MULTI_STOPLIST

Cause: You tried to add a stopword to a multi_stoplist without specifying the language of the stopword

Action: Specify the language of the stopword

DRG-12515: cannot specify language for stopwords in a BASIC_STOPLIST

Cause: You tried to add a language-specific stopword to a basic stoplist.

Action: Do not specify language for the stopword

DRG-12516: language column must be specified when using the multi stoplist

Cause: you tried to create an index using a multi stoplist but you did not specify a language column

Action: specify a language column

DRG-12517: cannot add stopthemes to a MULTI_STOPLIST

Cause: you tried to add a stoptheme to a MULTI_STOPLIST. This is not supported in this version.

Action: n/a

DRG-12518: cannot use this option with MULTI_STOPLIST

Cause: index already has multi_stoplist

Action: can only be used to migrate from basic to multi stoplist

DRG-12519: LANGUAGE COLUMN missing

Cause: index does not have a language column

Action: specify language column value

DRG-12520: LANGUAGE COLUMN mismatch

Cause: LANGUAGE COLUMN does not match language column of the Index

Action: index language column should match specified one

DRG-12521: cannot add STOP PATTERN to NUMBERS stopclass

Cause: NUMBERS is a predefined stopclass to specify numeric values

Action: use any other alphanumeric word

DRG-12600: user datastore procedure name contains a semicolon

Cause: the procedure name specified had a semicolon

Action: remove semicolon or rename procedure name. The correct format is
PACKAGE_NAME.PROCEDURE_NAME

DRG-12601: invalid user datastore procedure name: <varname>string</varname>

Cause: the format of the procedure name is invalid. It should be in the form
 PACKAGENAME.PROCEDURENAME or PROCEDURENAME

Action: make sure PROCEDURE attr has the format
 PACKAGENAME.PROCEDURENAME or PROCEDURENAME

DRG-12602: index owner does not have access to user datastore procedure: <varname>string</varname>

Cause: the index owner does not have execute privilege of the procedure

Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-12603: CTXSYS does not own user datastore procedure: <varname>string</varname>

Cause: CTXSYS does not have execute privilege to the user datastore procedure

Action: make sure the package is owned by CTXSYS and the procedure exist

DRG-12604: execution of user datastore procedure has failed

Cause: an error occur while executing the user datastore procedure

Action: check or debug the datastore procedure

DRG-12605: datatype of column <varname>number</varname> in COLUMNS list is not supported

Cause: one or more of the columns in the column list of the multi datastore are of a type which the multi datastore is unable to process

Action: change the column list of the multi datastore to contain only supported types. PL/SQL functions can be used in the comlumn list to convert unsupported types to supported types.

DRG-12606: error encountered while parsing COLUMNS list

Cause: An oracle error was encountered while parsing the columns list of the multi datastore.

Action: See next error on stack and take appropriate action

DRG-12607: only ctxsys can create MULTI_COLUMN preferences

Cause: In order to create a multi column datastore preference, the effective user must be ctxsys.

Action: contact your DBA to create the preference as ctxsys

DRG-12700: seed word must be a single word

Cause: seed word is not a single word

Action: use a single-word seed word

DRG-12800: Attribute NESTED_TYPE must have owner name as prefix

Cause: the attribute NESTED_TYPE does not have an owner name prefix

Action: reset the attribute NESTED_TYPE to include owner name prefix

DRG-12801: invalid type: <varname>string</varname>

Cause: invalid nested_type or

Action: check the owner and the type attribute names

DRG-12802: invalid type column: <varname>string</varname>

Cause: column specified does not exist in the type table

Action: check the type table

DRG-12803: invalid text datatype

Cause: LONG and LONG RAW are not supported in nested table

Action: change text column to a supported data type

**DRG-12900: Operation:<varname>string</varname> for index:
<varname>string</varname> has already been started**

Cause: the specified operation has been started

Action: n/a

DRG-13000: error while adding or removing a sub lexer

Cause: see next error

Action: n/a

DRG-13001: sub lexer and multi lexer must have the same owner

Cause: you specified a sub lexer which is not owned by the owner of the enclosing multi-lingual lexer preference

Action: specify a sub lexer owned by the owner of the multi-lexer preference

DRG-13002: preference <varname>string</varname> is not a MULTI_LEXER

Cause: you tried to add a sub lexer to a lexer preference which cannot accept sub lexers. Only multi-lingual lexers can accept sub lexers.

Action: specify a multi lingual lexer

DRG-13003: preference <varname>string</varname> cannot be used as a sub lexer

Cause: you specified a preference for sub lexer which is not a lexer, or is a multi-lingual lexer or is an auto lexer

Action: specify a sub lexer which is not a multi-lingual lexer or an auto lexer

DRG-13004: language is invalid

Cause: you specified an invalid language for the sub lexer or stopword

Action: specify a valid language -- see NLS Support Guide for a list of valid languages

DRG-13005: alt_value cannot be an NLS language name

Cause: you specified an NLS language name as the alt value

Action: specify a non-NLS value

DRG-13006: sub lexer for this language is not defined

Cause: you tried to remove a sub lexer for a language, but no sub lexer was defined for that language

Action: None

DRG-13007: cannot define an alternate value for the DEFAULT sub lexer

Cause: you tried to define an alternate value for the DEFAULT sub lexer

Action: None

DRG-13008: cannot remove the DEFAULT sub lexer

Cause: you tried to remove the DEFAULT sub lexer

Action: None

DRG-13009: multi lexer preference does not have a DEFAULT sub lexer

Cause: you tried to use a multi lexer preference which does not have a DEFAULT sub lexer defined

Action: add a DEFAULT sub lexer to the multi lexer preference and retry

DRG-13010: alt_value is already used by another sub lexer

Cause: you tried to specify an alt value which is already in use by another sub lexer in the lexer preference

Action: specify a different alt value

DRG-13011: language column must be specified when using the multi lexer

Cause: you tried to create an index using a multi lexer preference, but you did not specify a language column

Action: specify a language column

DRG-13012: language column must be a char, varchar, or varchar2 type

Cause: you specified a language column which is not a char, varchar, or varchar2 type.

Action: specify a language column of correct type

DRG-13013: cannot have language independent DEFAULT sub lexer

Cause: you tried to define a language independent DEFAULT sub lexer

Action: DEFAULT sub lexer can only be language dependent

DRG-13014: base table has rows with language column value <varname>string</varname>

Cause: there are documents in the base table with language column value set to symbol for sublexer or stopword being removed

Action: base table should not have such rows

DRG-13015: sublexer <varname>string</varname> already exists in the index

Cause: cannot add a sub_lexer more than once

Action: if you want to update sub_lexer preferences, use update sub_lexer parameter or remove currently used sub_lexer

DRG-13100: index is not partitioned

Cause: you attempted to invoke a partition-level operation on an index which is not partitioned

Action: invoke appropriate index-level operation

DRG-13101: partition <varname>string</varname> does not exist in this index

Cause: you specified a partition name which does not exist

Action: specify correct partition name

DRG-13102: index partition name must be specified

Cause: you attempted to invoke a partition-level operation on a partitioned index but did not specify the partition name

Action: n/a

DRG-13103: index table <varname>string</varname> is partitioned

Cause: you attempted to perform an exchange partition including indexes, but one or more of the internal index tables are partitioned.

Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13104: indexes do not have equivalent settings for <varname>string</varname>

Cause: you attempted to perform an exchange partition including indexes, but the specified metadata setting is not equivalent across the two indexes, so the data cannot be exchanged

Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13200: failed to load dictionary file <varname>string</varname>

Cause: failed to load a dictionary file

Action: check whether the dictionary file exists in \$ORACLE_HOME/ctx/data/kolx or access permission is available

DRG-13201: KOREAN_LEXER is desupported

Cause: Using lexer type KOREAN_LEXER which is desupported.

Action: Use lexer type KOREAN_MORPH_LEXER instead.

DRG-13300: document size bigger than <varname>string</varname> bytes

Cause: size of the document being indexed is larger than the maximum supported size for the VARCHAR2 interface of stored procedure

Action: use the CLOB interface for the stored procedure

DRG-13301: syntax error in token data when expecting <varname>string</varname>, at line <varname>string</varname>

Cause: token data returned by the user-defined lexer procedure is incorrect

Action: modify user-defined lexer procedure to return expected data

DRG-13302: number of wildcard offsets must be in the range <varname>string</varname>..<varname>string</varname>**, at line <varname>string</varname>**

Cause: number of wildcard offsets specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid number of wildcard offsets

DRG-13303: value of wildcard offset must be in the range <varname>string</varname>..<varname>string</varname>**, at line <varname>string</varname>**

Cause: value of pre-normalized wildcard offset or post-normalized wildcard offset specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid value for wildcard offset

DRG-13304: character referenced by wildcard attribute is not a wildcard character, at line <varname>string</varname>

Cause: The wildcard attribute value specified the offset of a wildcard character. The character at the specified offset is neither the '%' character nor the '_' character.

Action: Modify user-defined lexer query procedure.

DRG-13305: 'off' attribute value must be in the range <varname>string</varname>..<varname>string</varname>**, at line <varname>string</varname>**

Cause: value of 'off' attribute does not meet the supported range

Action: modify user-defined lexer index procedure to return valid value for 'off' attribute

DRG-13306: 'len' attribute value must be in the range <varname>string</varname>..<varname>string</varname>**, at line <varname>string</varname>**

Cause: value of 'len' attribute does not meet the supported range

Action: modify user-defined lexer index procedure to return valid value for 'len' attribute

DRG-13307: 'off'=<varname>string</varname> and 'len'=<varname>string</varname> references character past end-of-file of <varname>string</varname> character document, at line <varname>string</varname>

Cause: value of 'off' attribute plus value of 'len' attribute is greater than the number of characters in the document

Action: modify user-defined lexer index procedure to return valid values for 'off' and 'len' attributes

DRG-13308: query operator ABOUT not supported by USER_LEXER

Cause: the query contains an ABOUT operator while using USER_LEXER lexer type

Action: remove ABOUT operator from query or use lexer type other than USER_LEXER

DRG-13309: operation not supported by USER_LEXER

Cause: USER_LEXER does not support this operation

Action: stop the operation or use alternate lexer type

DRG-13310: index owner does not have EXECUTE privilege on USER_LEXER stored procedure <varname>string</varname>

Cause: user CTXSYS did not grant EXECUTE privilege on USER_LEXER stored procedure to the index owner

Action: user CTXSYS grant EXECUTE privilege on USER_LEXER stored procedure to index owner

DRG-13311: USER_LEXER stored procedure name contains a semicolon

Cause: the procedure name contains a semicolon character

Action: remove semicolon from procedure name or rename stored procedure

DRG-13312: user CTXSYS does not own USER_LEXER stored procedure <varname>string</varname>

Cause: CTXSYS does not have EXECUTE privilege on the USER_LEXER stored procedure

Action: make sure the stored procedure exists and is owned by CTXSYS

DRG-13400: Oracle Data Mining was not installed

Cause: The function you used depends on Oracle Data Mining, which has not been installed yet.

Action: make sure the Oracle Data Mining is installed

DRG-13401: the preference <varname>string</varname> type is not supported in this API

Cause: the type you have specified is not supported

Action: use a different type

DRG-13500: Parameter_string must start with <varname>string</varname>

Cause: Wrong syntax for parameter_string.

Action: Make sure the parameter_string has the correct syntax

DRG-13501: Shadow Index Already Exists

Cause: A shadow index was previously created already

Action: Drop the shadow index and try again

DRG-13502: NOPOPULATE is not allowed in recreate_index_online

Cause: Specify NOPOPULATE in parameter_string in recreate_index_online

Action: Don't specify NOPOPULATE.

DRG-13503: POPULATE is not allowed for a local index in create_shadow_index

Cause: Specify POPULATE for a local index during create_shadow_index

Action: Don't specify POPULATE.

DRG-13504: <varname>string</varname> has no shadow index

Cause: Tried to perform exchange shadow without creating shadow index first

Action: create a shadow index before doing exchanges_shadow_index

DRG-13505: Keyword <varname>string</varname> is not allowed here in parameter_string

Cause: Wrong syntax for parameter_string

Action: Make sure the parameter_string has the correct syntax

DRG-13506: <varname>string</varname> has no shadow part

Cause: Tried to perform exchange shadow part without creating shadow part first

Action: create a shadow part before doing exchanges_shadow_index on the partition.

DRG-13507: SWAP and NOPOPULATE is incompatible

Cause: Specified SWAP and NOPOUPLATE in parameter string

Action: Correct the parameter string setting

DRG-13508: Not all partitions for index <varname>string</varname> are swapped

Cause: try to swap an local partitioned index when not all partitions are swapped

Action: Swap all partitions first, then swap the (local) index.

DRG-13509: error while swapping shadow index

Cause: an error occurred during the shadow index swap

Action: check error message stack for the actual error

DRG-13510: shadow index does not exist

Cause: Tried to perform exchange shadow without creating shadow index first

Action: create a shadow index before doing exchanges_shadow_index

DRG-13600: Syntax error in the result set descriptor at <varname>string</varname>

Cause: The result set descriptor has a syntax error

Action: check the syntax of the result set descriptor

DRG-13601: Syntax error in the order attribute

Cause: The order attribute has a syntax error

Action: check the syntax of the order attribute

DRG-13602: Number parsing error in <varname>string</varname>

Cause: The number string is malformed

Action: check the syntax of the number string

DRG-13603: Too many sort keys

Cause: Too many sort keys are specified

Action: reduce the number of sort keys

DRG-13604: Too many items to select

Cause: Too many select items are specified

Action: reduce the number of select items

DRG-13605: Too many group tags

Cause: Too many group tags are specified

Action: reduce the number of group tags

**DRG-13606: start_hit_num is not specified or out of valid range
<varname>number</varname>..**<varname>number</varname>****

Cause: start_hit_num is not specified or out of valid range

Action: set a correct start_hit_num value

**DRG-13607: end_hit_num is not specified or out of valid range
<varname>number</varname>..**<varname>number</varname>****

Cause: end_hit_num is not specified or out of valid range

Action: set a correct end_hit_num value

DRG-13608: Temporary lob not created for ctx_query.result_set_document

Cause: Temporary lob is not allocated for ctx_query.result_set_document

Action: Create a temporary lob for ctx_query.result_set_document

**DRG-13609: Result set Interface should only have group mvdata element in
absence of a query**

Cause: No query is specified and result set descriptor has invalid elements

Action: either specify query or change result set descriptor

DRG-13610: Missing group_values in the result set interface

Cause: MVDATA group values not specified in RSI

Action: add group_values element for group counting

**DRG-13611: Missing value id for MVDATA group counting in the result set
interface**

Cause: MVDATA group values not specified in RSI

Action: add value id element for group counting

DRG-13612: Missing path element in the result set interface

Cause: Path element not specified for the ctx_tree element

Action: add path element for the ctx_tree element

DRG-13613: Missing index name

Cause: index name not specified in the API

Action: specify an index name

DRG-13614: result_set_interface not supported with security policy

Cause: result set interface not supported with security policies

Action: cannot use result set interface on table with security policy

DRG-13615: Only one snippet element allowed in result set interface

Cause: More than one snippet element specified with result set interface

Action: Specify only one snippet element with result set interface

DRG-13616: Invalid MVDATA group counting topn in result set interface

Cause: Cannot use group values and topn for the same group counting

Action: Use group_values or topn

DRG-13617: Invalid MVDATA value for topn in result set interface

Cause: Cannot use topn less than or equal to zero

Action: Use topn greater than zero

DRG-13618: Error in group counting in result set interface

Cause: Cannot do group count for facets with no data

Action: Check facet name or index needed facet values

DRG-13619: Invalid value for MVDATA sortby in result set interface

Cause: Invalid value provided for sortby criteria in result set interface

Action: Select either count or alpha

DRG-13620: Invalid value for MVDATA order in result set interface

Cause: Invalid value provided for order criteria in result set interface

Action: Select either asc or desc

DRG-13621: Duplicate group count element in result set interface

Cause: Group Count element specified more than once for group

Action: Specify one count element for a group

DRG-13700: Syntax error in the Extraction Rule Descriptor

Cause: The Extraction Rule descriptor has a syntax error

Action: check the syntax of the Extraction rule descriptor

DRG-13701: Invalid rule_id

Cause: rule_id is NULL or rule_id <= 0

Action: rule_id must be number > 0

DRG-13702: Rule not found

Cause: No rule for given rule_id

Action: Specify a valid rule_id

DRG-13703: Invalid Type Specified: <varname>string</varname>

Cause: An invalid entity type was specified

Action: Specify a valid entity type

DRG-13704: Invalid Entity Type List

Cause: An invalid entity type list was specified

Action: Check format and types on entity type list

DRG-13705: Must use an Extract Policy

Cause: Using a non-extraction policy

Action: Use a policy created with `ctx_entity.create_extract_policy`

DRG-13706: Cannot use Entity Extraction Policy here

Cause: Using an entity extraction policy

Action: Use a policy created with `ctx_ddl.create_policy`

DRG-13707: Rule Engine Loading Failed

Cause: A user rule has an error

Action: Fix the user rule with the error

DRG-13708: Dictionary Loading Failed

Cause: The user dictionary has an error

Action: Fix the user dictionary

DRG-13709: Unsupported Language Specified: <varname>string</varname>

Cause: Unsupported Language Specified

Action: Specify a supported language

DRG-13710: Syntax Error in Dictionary

Cause: Syntax error in dictionary

Action: Correct syntax error in dictionary

DRG-13711: Stop Entity Not Found

Cause: Tried to remove a non-existent stop entity

Action: Cannot remove non-existent stop entity

DRG-13712: User Dictionary already loaded

Cause: Tried to load a 2nd user dictionary to a policy

Action: Drop the dictionary, and then load

DRG-13713: No User Dictionary loaded

Cause: No user dictionary loaded for this policy

Action: Cannot drop non-existent dictionary

DRG-13714: Duplicate Stop Entity

Cause: Trying to load a duplicate uncompiled stop entity

Action: Stop entity is already present

DRG-13715: Null name and type for Stop entity

Cause: Trying to load a stop entity with null name and type

Action: Stop entity must have at least one parameter non-null

DRG-13716: Entity Extraction not enabled

Cause: Haven't loaded correct event

Action: Must load correct event and level

DRG-13717: Null entry or alternate form in user dict

Cause: A entry or alternate form has null value

Action: Entries or alternate forms must be non-null

DRG-13718: No entity type given in user dict

Cause: An entry was not given an entity type

Action: All entries must have an entity type

DRG-13719: File and Drop are mutually exclusive

Cause: Tried to run ctxload with file and drop

Action: file and drop are mutually exclusive

DRG-13720: Stop entity already marked for deletion

Cause: Tried to re-drop a stop entity

Action: Only drop this stop entity once

DRG-13721: Duplicate Type on Typelist

Cause: Duplicate type on typelist

Action: Typelist must be unique

DRG-13722: Invalid Backreference

Cause: Backreference not between 1 and 10

Action: Backreferences must be between 1 and 10

DRG-13723: Invalid Attribute: <varname>string</varname>

Cause: Unsupported Attribute

Action: Follow correct syntax for rule or dictionary

DRG-13724: Invalid Attribute Value: <varname>string</varname>

Cause: Unsupported attribute value

Action: Follow correct syntax for rule or dictionary

DRG-13725: Type Name Too Long

Cause: Type name more than 30 bytes

Action: Type must be less than 30 bytes

DRG-13726: Invalid Tag: <varname>string</varname>

Cause: Unsupported Tag

Action: Follow correct syntax for rule or dictionary

DRG-13727: Missing Tag: <varname>string</varname>

Cause: Missing Necessary Tag

Action: Add tag for rule or dictionary

DRG-13728: Missing Attribute: <varname>string</varname>

Cause: Missing Necessary Attribute

Action: Add attribute for rule or dictionary

DRG-13800: MVDATA section <varname>string</varname> does not exist

Cause: The given MVDATA section name does not exist in USER_SECTIONS

Action: Rewrite query with valid MVDATA section name

DRG-13801: literal is not compatible with the data type of the MVDATA section

Cause: The given literal is not compatible with the data type of the specified MVDATA section.

Action: Rewrite query with a compatible literal

DRG-13802: MVDATA operand not compatible with the mvdata section <varname>string</varname>

Cause: failed to convert data

Action: check the format of the data

DRG-13803: Illegal MVDATA value

Cause: failed to convert data

Action: check the format of the data

DRG-13804: ctx_tree.register_index() not run for index <varname>string</varname> and mvdata section <varname>string</varname>

Cause: failed to create data

Action: create the data (trees) first

DRG-13805: Invalid character in node name <varname>string</varname>

Cause: failed to create data

Action: check the format of the data

DRG-13806: Duplicate path '<varname>string</varname>' in CTX_TREE.ADD_NODE()

Cause: The path specified in ctx_tree.add_node() adds the node with the same name in the same tree at the same level

Action: change path

DRG-13807: Node <varname>string</varname> does not exist or is deleted

Cause: failed to lookup input node

Action: check if the path exists

DRG-13808: Empty path passed into <varname>string</varname>

Cause: path is empty

Action: pass in a non-empty and valid path

DRG-13809: Index with MVDATA sections must have big_io turned on

Cause: Big_io option not specified for MVDATA index

Action: turn on big_io for the index

DRG-13810: Index with support_ctx_tree must have atleast one MVDATA section

Cause: MVDATA section not specified for ctx_tree usage

Action: add one MVDATA section for the index

DRG-13811: Invalid path '<varname>string</varname>' in CTX_TREE.ADD_NODE()

Cause: The path specified in ctx_tree.add_node() is invalid.

Action: change path

DRG-13812: Partitioned Index with MVDATA must have index-level big_io

Cause: Index-level big_io was not specified

Action: turn on big_io at index level

DRG-13900: Auto_Optimize Process is already started

Cause: Auto_Optimize Process is already started

Action: Can't start auto_optimize when it's already running

DRG-13901: Index must have stage_itab

Cause: Auto_Optimize works on indexes with stage_itab

Action: Use an index with stage_itab for auto_optimize

DRG-13902: Index/Partition already added to auto_optimize list

Cause: Index/Partition already added to auto_optimize list

Action: Can't add index/partition to list twice

DRG-13903: Index/Partition not on the auto_optimize list

Cause: Index/Partition not on the auto_optimize list

Action: Can't remove index/partition from list

DRG-50000: requested size larger than pagesize

Cause: The requested memory size is larger than page size,

Action: Contact support

DRG-50100: CORE LSF error: <varname>string</varname>

Cause: detect a CORE LSF error

Action: look up the core error and take appropriate action

DRG-50101: CORE LEM error: <varname>string</varname>

Cause: detect a CORE LEM error while reading the error stack

Action: Contact support

DRG-50200: Third-party filter internal error

Cause: Third-party filter could not filter this document because of an internal error.

Action: Contact Oracle Support.

DRG-50300: error sending message from server to client

Cause: internal database error or internal Text error

Action: Call customer support

DRG-50301: server error reading request queue

Cause: database error or internal Text error

Action: Call customer support

DRG-50302: server error reading OOB break queue; cannot detect interrupts

Cause: database error or internal Text error

Action: Call customer support

DRG-50303: error in bufout

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50304: error in execute()

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50305: getcmd() called when one of the queue names is NULL

Cause: This is an internal error

Action: Contact Oracle Support

**DRG-50400: maximum number of fuzzy match candidates exceeded:
<varname>string</varname>**

Cause: Internal error, probably result of large number of indexed words

Action: Contact Oracle support

**DRG-50401: failed to retrieve fuzzy match candidates from db:
<varname>string</varname>**

Cause: Internal error

Action: Contact Oracle support

DRG-50402: Index validation failed for one or more tokens

Cause: Index validation generated an error for one or more tokens

Action: Check the ctx log for the detailed errors

DRG-50403: Invalid MVDATA entries exist in the index

Cause: Index validation generated an error for one or more tokens

Action: Check the ctx log for the detailed errors

DRG-50500: only RULE_CLASSIFIER is accepted in this API

Cause: you specified an illegal classifier

Action: use RULE_CLASSIFIER

DRG-50501: classifier preference not specified

Cause: the classifier preference is not specified

Action: specify a classifier preference

DRG-50502: cannot use RULE_CLASSIFIER in this API

Cause: you specified RULE_CLASSIFIER

Action: use a different classifier

DRG-50503: unsupported classification method

Cause: you specified an unsupported classification method

Action: use a different classifier

DRG-50504: invalid column datatype for <varname>string</varname> table

Cause: the column datatype is invalid

Action: specify a different datatype

DRG-50600: assertion failed

Cause: An internal check-condition has been violated

Action: Contact Oracle support for assistance

DRG-50601: fatal error

Cause: A fatal error has occurred

Action: Contact Oracle support for assistance

DRG-50603: unrecognized operation code <varname>string</varname>

Cause: Bad operation code was encountered (reached switch default:)

Action: check .h files versions

DRG-50607: failed to obtain column info for cid <varname>string</varname>

Cause: internal error, probably a bug

Action: call customer support

DRG-50608: unexpected end of data

Cause: internal error, probably a bug

Action: call customer support

DRG-50609: pipe internal error

Cause: internal error, probably a bug

Action: call customer support

DRG-50610: internal error: <varname>string</varname>

Cause: internal error, probably a bug

Action: call customer support

DRG-50611: Third party lexer internal error: <varname>string</varname>

Cause: internal error from inxight lexer

Action: call customer support

DRG-50612: internal error: you need to call bind first for this insertion mode

Cause: internal error

Action: call customer support

DRG-50613: internal error: model type is not supported in drctrwpf

Cause: internal error

Action: call customer support

DRG-50614: library loading error in <varname>string</varname>

Cause: internal error

Action: call customer support

DRG-50615: Third party lexer timed out

Cause: Third-party auto lexer could not complete tokenization because the lexer timed out.

Action: Increase the value of the TIMEOUT attribute of the auto_lexer and reindex the document. If TIMEOUT is set to 0 and the lexer still hangs context Oracle Support.

DRG-50616: Stop-Optimize List not found

Cause: internal error

Action: call customer support

DRG-50617: Query string too long: <varname>string</varname>

Cause: internal error

Action: Invalid query string provided

DRG-50700: unknown command (args=queue, command)

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50701: error in listener.get_cmd()

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50702: error in drtlsleep()

Cause: this is an internal error in a testing function

Action: Contact Oracle Support

DRG-50703: listener startup error

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50704: Net8 listener is not running or cannot start external procedures

Cause: Oracle Text needs to call external code to complete your request, and could not start the extproc agent process.

Action: Start listener if it is configured for external procedures and is not running. If your listener is running, configure it for starting external procedures and restart it. Consult Oracle documentation for details.

DRG-50800: failed to open cursor

Cause: Too many cursors open for internal queries

Action: implement cursor cleanup routine

DRG-50801: failed to parse cursor

Cause: parse error on an internal query

Action: check versions of code

DRG-50802: failed to bind input

Cause: bind error on an internal query

Action: check versions of code

DRG-50803: failed to define output

Cause: define error on an internal query

Action: check versions of code

DRG-50804: failed to exec cursor

Cause: exec error on an internal query

Action: debug code

DRG-50805: failed to close cursor

Cause: cursor close error on an internal query

Action: check versions of code

DRG-50806: failed to rollback

Cause: transaction rollback error

Action: contact support

DRG-50807: failed to commit

Cause: internal error

Action: contact support

DRG-50850: <varname>string</varname>

Cause: This is an oracle error

Action: See RDBMS documentation

DRG-50851: SQL execute failed

Cause: failed to execute a sql statement

Action: please report this as a bug

DRG-50852: failed to turn SQL trace on

Cause: internal error,

Action: Please contact Oracle support

DRG-50853: fetch error

Cause: fetch error on an internal query

Action: check versions of code

DRG-50855: logoff fail

Cause: Fail to logoff from the database

Action: check versions of code

DRG-50857: oracle error in <varname>string</varname>

Cause: this is an informational message

Action: See error

DRG-50858: OCI error: <varname>string</varname>

Cause: a generic OCI error occurred

Action: Please contact Oracle support

DRG-50859: failed to allocate statement handle

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50860: failed to prepare statement

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50861: failed to obtain type descriptor

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50862: failed to create new Oracle object

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50863: string assignment failed

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50864: number assignment failed

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50865: failed to append to collection

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50866: failed to resize string

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50867: failed to free Oracle object

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50868: failed to free statement handle

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50900: text query parser error on line <varname>string</varname>, column <varname>string</varname>

Cause: bad query

Action: fix query

DRG-50901: text query parser syntax error on line <varname>string</varname>, column <varname>string</varname>

Cause: bad query

Action: fix query

DRG-50902: unexpected character <varname>string</varname>

Cause: bad query

Action: fix query

DRG-50903: invalid weight <varname>string</varname>

Cause: invalid weight

Action: fix query

DRG-50904: weight <varname>string</varname> outside valid range 0.1 to 10.0

Cause: invalid weight

Action: fix query

DRG-50905: invalid score threshold <varname>string</varname>

Cause: invalid score threshold

Action: fix query

DRG-50906: score threshold <varname>string</varname> is not an integer

Cause: invalid score threshold

Action: fix query

DRG-50907: score threshold <varname>string</varname> outside valid range 1 to 100

Cause: invalid score threshold

Action: fix query

DRG-50908: invalid maximum number of documents <varname>string</varname>

Cause: invalid maximum number of documents

Action: fix query

DRG-50909: maximum number of documents <varname>string</varname> is not an integer

Cause: invalid maximum number of documents

Action: fix query

DRG-50910: max documents requested <varname>string</varname> outside valid range 1 to 65535

Cause: invalid maximum number of documents

Action: fix query

DRG-50911: invalid first document number <varname>string</varname>

Cause: invalid first document number

Action: fix query

DRG-50912: first document number <varname>string</varname> is not an integer

Cause: invalid first document number

Action: fix query

DRG-50913: first document requested <varname>string</varname> is not a positive number

Cause: invalid first document number

Action: fix query

DRG-50914: invalid last document number <varname>string</varname>

Cause: invalid last document number

Action: fix query

DRG-50915: last document number <varname>string</varname> is not an integer

Cause: invalid last document number

Action: fix query

DRG-50916: last document <varname>string</varname> is less than first document

Cause: invalid last document number

Action: fix query

DRG-50917: escape on at end of text query string

Cause: unbalanced escape characters

Action: turn escape off

DRG-50918: mismatched close escape character

Cause: no matching open escape character for close escape

Action: match open and close escapes

DRG-50919: NEAR operand not a phrase, equivalence or another NEAR expression

Cause: invalid operand type for NEAR operator

Action: correct operand type

DRG-50920: part of phrase not itself a phrase or equivalence

Cause: invalid type of expression which is part of phrase

Action: fix query

DRG-50921: EQUIV operand not a word or another EQUIV expression

Cause: invalid operand type for EQUIV operator

Action: correct operand type

DRG-50922: PL/SQL execution failed for <varname>string</varname>

Cause: PL/SQL function may not exist or is returning bad value

Action: PL/SQL may not exist or is returning bad value

DRG-50923: could not rewrite PL/SQL for execution

Cause: parser internal

Action: call support

DRG-50924: PL/SQL inside PL/SQL not supported

Cause: PL/SQL function call returned another PL/SQL call

Action: remove recursive PL/SQL

DRG-50925: could not parse return value of PL/SQL

Cause: string returned by PL/SQL function could not be parsed

Action: fix PL/SQL function being called

DRG-50926: invalid text query string

Cause: query string empty or made up of invalid characters

Action: fix query

DRG-50927: parser failed on line <varname>string</varname> on column <varname>string</varname>

Cause: bug

Action: call support

DRG-50928: reserved failure on line <varname>string</varname> on column <varname>string</varname>

Cause: bug

Action: call support

DRG-50929: parser internal on line <varname>string</varname> on column <varname>string</varname>

Cause: bug

Action: call support

DRG-50930: parser memory failure on line <varname>string</varname> on column <varname>string</varname>

Cause: memory allocation or freeing error

Action: call support

DRG-50931: parser not opened

Cause: bug

Action: call support

DRG-50932: parser preference initialization failed

Cause: bug

Action: call support

DRG-50933: parser hash insert failure

Cause: bug

Action: call support

DRG-50934: parser hash create failure

Cause: bug

Action: call support

DRG-50935: parser component failure

Cause: bug

Action: look for other errors

DRG-50936: query word <varname>string</varname> is too complex for index

Cause: bug

Action: look for other errors

DRG-50937: query too complex

Cause: query is too complex for our query evaluator

Action: make query smaller

DRG-50938: parser already bound

Cause: internal coding mistake

Action: call support

DRG-50939: parser not set

Cause: bug

Action: call support

DRG-50940: parser not parsed

Cause: bug

Action: call support

DRG-50941: PL/SQL function <varname>string</varname> cannot be executed

Cause: PL/SQL function may not exist or cannot be executed by user

Action: rewrite PL/SQL function specified in query

DRG-50942: errors: <varname>string</varname><varname>string</varname>

Cause: PL/SQL function encountered error -- this is the error message

Action: See error message

DRG-50943: query token too long on line <varname>string</varname> on column <varname>string</varname>

Cause: A query token is longer than 256 bytes

Action: Rewrite query

DRG-50944: NEAR operator not supported for theme index

Cause: NEAR operator used in theme index query

Action: Rewrite query without NEAR operator

DRG-50945: Illegal phrase in query for theme index

Cause: Phrase incorrectly defined in theme index query

Action: Rewrite query

DRG-50946: Invalid unary operator for theme index

Cause: Stemming, fuzzy match and soundex not allowed for theme index

Action: Rewrite query

DRG-50947: ABOUT clause not allowed without a theme index

Cause: The query contains an ABOUT clause, but there is no theme index to support it

Action: Rewrite query

DRG-50948: ABOUT clause required in the absence of a text index

Cause: There is no text index, but the query does not contain any about clause. With only a theme index present, each query term must belong to an ABOUT clause

Action: Rewrite query

DRG-50949: too many SQEs

Cause: Too many SQEs to expand

Action: Rewrite query or SQE

DRG-50950: circular SQE found

Cause: Circular SQE reference is found.

Action: Rewrite query or SQE

DRG-50951: Unable to resolve element name for attribute <varname>string</varname>

Cause: XPATH expression such as A/*/@B or A//@B is not supported.

Action: Rewrite query

DRG-50952: Section is not PATH section group

Cause: XPATH expression has section which is not created using PATH section group.

Action: Rewrite query not to use XPATH expression or create the index with PATH section group

DRG-50953: Unable to determine section name

Cause: XPATH expression should not end with . or *

Action: Rewrite the path expression not to use . or * at the end

DRG-50954: Theme index is required for CTXCAT about queries

Cause: There is no theme index, but the catsearch query contains about clause. You must create a theme index before using ABOUT query against CTXCAT index

Action: create theme index

DRG-50955: Missing comma in transform clause <varname>string</varname>

Cause: A transform clause in a query template is missing a comma

Action: Add the comma in the appropriate position

DRG-50956: Theme index is required for THEMES transform queries

Cause: There is no theme index, but the operator TRANSFORM is used with THEMES as its parameter. You must create a theme index before using THEMES in TRANSFORM operator.

Action: create theme index

DRG-50957: Missing <varname>textquery</varname> element in query template <varname>string</varname>

Cause: The <varname>textquery</varname> tag is missing or misspelled in a query template

Action: Correct the missing tag

DRG-50958: Missing quote in transform clause <varname>string</varname>

Cause: A transform clause in a query template is missing a quote

Action: Add the quote in the appropriate position

DRG-50959: Query length exceeds <varname>string</varname> bytes

Cause: the query length exceeds the maximum allowed length

Action: reduce the length of the query

DRG-50960: Mild not operand not a term or phrase

Cause: invalid operand type for MNOT operator

Action: correct operand type

DRG-50961: Missing <varname>string</varname> for <varname>string</varname> clause

Cause: the specified tag is missing from the specified complex query clause

Action: Add missing clause

DRG-50962: Query operators are not allowed in transform input string

Cause: You specified an operator (such as wildcard) in the input string for the transform operator

Action: Remove or escape the query operator

DRG-51002: unexpected component failure

Cause: Internal error

Action: Contact Oracle support

DRG-51017: unable to open storage buffer for fuzzy match candidates

Cause: Internal error, probably insufficient memory

Action: Contact Oracle support

DRG-51019: unable to open or illegal format for fuzzy match data file: <varname>string</varname>

Cause: Unable to open OS file containing fuzzy matching information or the file was not of the correct format

Action: Consult the documentation for correct location of the fuzzy match information files and check for file damage

DRG-51020: out of memory in fuzzy matcher

Cause: Cannot allocate more memory

Action: Contact your system administrator

DRG-51021: undefined error in fuzzy matcher

Cause: Internal error

Action: Contact Oracle support

DRG-51022: undefined error in stemmer

Cause: Internal error

Action: Contact Oracle support

DRG-51023: stemmer file cannot be opened

Cause: Unable to open OS file containing stemmer lexicon, or the file contents were not correct

Action: Consult documentation for correct location of the stemmer lexicons and check for file damage

DRG-51024: out of memory in stemmer

Cause: Cannot allocate more memory

Action: Contact your system administrator

DRG-51025: an invalid character was passed to the stemmer

Cause: Invalid character in word input to the stemmer

Action: Remove invalid character from word to be stemmed

DRG-51028: unexpected error in fuzzy match expansion: %(1)

Cause: Internal error

Action: Contact Oracle support

DRG-51029: unexpected error in stemmer expansion: %(1)

Cause: Internal error

Action: Contact Oracle support

DRG-51030: wildcard query expansion resulted in too many terms

Cause: User error

Action: Make wildcard query narrower

DRG-51100: invalid program argument index

Cause: This is an internal error

Action: Contact Oracle Support to report a bug

DRG-51101: argument processing callback failed

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-51200: open keymap failed for index id = <varname>string</varname>

Cause: Failed to initialize the keymap for the column id specified.

Action: Check index ID. Contact support if caused by internal errors

**DRG-51201: failed to perform DDL operation: database object
<varname>string</varname>**

Cause: Textkey mapping service failed on DDL operation

Action: Check Oracle error and take corrective action

DRG-51202: invalid key mapping operation mode : <varname>string</varname>

Cause: invalid keymap mode value found. This is an internal error

Action: Contact Oracle support

DRG-51203: found doc ids without mappings during get maps

Cause: found doc ids without mappings during get mapping by doc ids, the index data and keymap service are out of synch.

Action: Contact Oracle support

DRG-51300: error getting dml Queue lock

Cause: a server must have hung while processing the dml Queue, leaving it locked

Action: Contact Oracle support

DRG-51301: error releasing dml Queue lock

Cause: internal database error, or perhaps someone dropped the lock while we were using it

Action: Contact Oracle support

DRG-51311: DML lock handle previously allocated

Cause: internal error

Action: Contact Oracle support

DRG-51312: DML lock internal error <varname>string</varname>

Cause: internal error

Action: Contact Oracle support

DRG-51313: timeout while waiting for lock

Cause: most likely an internal error

Action: Contact Oracle support

DRG-51314: index is not empty

Cause: you attempted to invoke populate_pending against an index which already has or has had indexed documents.

Action: populate pending manually, or recreate the index NOPOPULATE

DRG-51403: New index name not provided by kernel

Cause: this is an internal error

Action: Contact Oracle support

DRG-51801: failed to seek in file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-51802: failed to read from file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-51803: failed to open file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-51804: failed to write to file: %(1)

Cause: this is an internal error

Action: Contact Oracle support

DRG-52100: <varname>string</varname> returned internal error code <varname>string</varname>

Cause: this is an internal error

Action: Contact Oracle support

DRG-52101: an invalid session handle was passed to Oracle Text

Cause: this is an internal error

Action: Contact Oracle support

DRG-52102: an invalid transaction handle was passed to Oracle Text

Cause: this is an internal error

Action: Contact Oracle support

DRG-52103: the Oracle Text environment could not reset

Cause: this is an internal error

Action: Contact Oracle support

DRG-52104: the Oracle Text environment could not initialize

Cause: this is an internal error

Action: Contact Oracle support

DRG-52105: no delete function found

Cause: this is an internal error

Action: Contact Oracle support

DRG-52106: Oracle Text service results could not be committed

Cause: this is an internal error

Action: Contact Oracle support

DRG-52107: ctxkbt internal error

Cause: this is an internal error

Action: Contact Oracle support

DRG-52108: failed to delete knowledge base user extension

Cause: this is an internal error

Action: check file permissions or contact Oracle support

DRG-52109: error in reading thesaurus

Cause: this is an internal error

Action: Contact Oracle support

DRG-52110: error in writing extended knowledge base

Cause: this is an internal error

Action: Contact Oracle support

DRG-52111: error in knowledge base cache

Cause: this is an internal error

Action: Contact Oracle support

DRG-52112: improper Chinese string <varname>string</varname> of length <varname>number</varname>

Cause: this is an internal error

Action: n/a

DRG-52113: improper Japanese string <varname>string</varname> of length <varname>number</varname>

Cause: this is an internal error

Action: n/a

DRG-52200: invalid state during export

Cause: this is an internal error

Action: Contact Oracle support

DRG-52201: incompatible Oracle Text versions

Cause: attempting to import an incompatible version of Oracle Text data

Action: make sure source and target Oracle Text versions are compatible

DRG-52202: invalid class name: <varname>string</varname>

Cause: the specified class name is not valid

Action: Contact Oracle Support

DRG-52203: invalid object name: <varname>string</varname>

Cause: the specified object name is not valid

Action: Contact Oracle Support

DRG-52204: error while registering index

Cause: this is an internal error

Action: Contact Oracle support

DRG-52205: class <varname>string</varname> and object <varname>string</varname> already exists for this index

Cause: duplicate entry of class and object

Action: Contact Oracle support

DRG-52206: error while registering index object

Cause: this is an internal error

Action: Contact Oracle support

DRG-52207: the specified attribute does not exist: <varname>string</varname>

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52208: the specified attribute already exist: <varname>string</varname>

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52210: error while registering value for attribute: <varname>string</varname>

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52211: error while registering partition

Cause: this is an internal error

Action: Contact Oracle support

DRG-52212: error while registering cdi columns

Cause: this is an internal error

Action: Contact Oracle support

DRG-52300: Index <varname>string</varname>.<varname>string</varname> does not exist

Cause: The given index does not exist for the current user

Action: Give a valid index name

DRG-52301: Query Stats is already enabled for this index

Cause: attempting to enable the query stats for an index for which it is already enabled

Action: None. No need to enable again

DRG-52302: Query Stats is not enabled for this index

Cause: attempting to disable the query stats for an index for which it is not enabled

Action: None. No need to disable if it is not already enabled

DRG-52303: Option String is full

Cause: Index option string is full

Action: None

DRG-52304: This operation requires Query Stats to be enabled for the index

Cause: attempting to do an operation which required query stats option for the index to be enabled

Action: Enable query stats option for the index using `ctx_output.enable_query_stats()`

DRG-52305: Unknown value, <varname>string</varname>, passed in to stat_type

Cause: An invalid value is passed in to the parameter `stat_type`

Action: Give a valid value

DRG-52400: Dictionary <varname>string</varname> already exists

Cause: The specified dictionary already exists

Action: Must drop the dictionary if you want to re-create it.

DRG-52401: Invalid language <varname>string</varname> specified

Cause: Language specified is invalid

Action: Must specify a valid language

DRG-52402: Dictionary name is invalid

Cause: The specified dictionary name is invalid

Action: Must provide valid dictionary name

DRG-52403: Dictionary <varname>string</varname> does not exist

Cause: The specified dictionary does not exist

Action: Retry with the correct dictionary name

EVM-00001 to EVM-00901

EVM-00001: Cannot write raw events to a terminal

Cause: Attempted to redirect binary events to a terminal.

Action: Use evmshow to format events for display.

EVM-00002: Use evmshow to format events for display

Cause: Attempted to redirect binary events to a terminal.

Action: Use evmshow instead.

**EVM-00003: Failed to open file "<varname>string</varname>":
<varname>string</varname>**

Cause: Filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00004: Failed to open channel config file "<varname>string</varname>"

Cause: Configuration file name, the path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00006: Failed to create temporary file

Cause: The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00007: Failed to write to temporary file

Cause: The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00008: Failed to read from temporary file

Cause: The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00009: Failed to create EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00010: Failed to read from EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00011: Failed to write to EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00012: Failed to create EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00013: Failed to read from EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00014: Failed to write to EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00015: Failed to create EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00016: Failed to read from EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00017: Failed to start EVM service "<varname>string</varname>"

Cause: EVM daemon failed to start.

Action: Check log for the EVM daemon.

EVM-00018: Failed to write to output stream

Cause: Failed to write to standard output.

Action: Contact Oracle Customer Support.

EVM-00019: Failed to read event from input stream

Cause: Bad input file for evmshow/evmsort EOF missing.

Action: Check the input file.

EVM-00020: Failed to create event subscription

Cause: Bad network connection between subscriber and EVM daemon.

Action: Check the network connection and filter string.

EVM-00021: Failed to create filter

Cause: Used a null filter string or memory allocation failed.

Action: Use a non null filter string.

EVM-00022: Invalid filter string

Cause: Used a null or invalid filter string.

Action: Contact Oracle Customer Support.

EVM-00023: Filter test operation failed

Cause: Used a null or invalid filter string.

Action: Use a non null filter string. Otherwise contact Oracle Customer Support.

EVM-00024: Lost connection to EVM daemon

Cause: Evmlogger lost connection to evmdaemon.

Action: Check status of evmlogger, evmd daemons and logs.

EVM-00025: Authorization database error

Cause: Not authorized to post/listen for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post/listen for specific events.

EVM-00026: Failed to post event "<varname>string</varname>"

Cause: Evmpost failed to post an event.

Action: Check the status and log for EVM daemon.

EVM-00027: Memory allocation failure

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00029: Event contains invalid values

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00030: Event name is missing

Cause: Name of the event was missing.

Action: Use a valid syntax for an event.

EVM-00031: Event name has too few components

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00032: Failed to write event

Cause: Failed to write event to output file.

Action: Check the permissions of the file. Otherwise contact Oracle Customer Support.

EVM-00033: Error in input file "<varname>string</varname>", line <varname>number</varname>

Cause: Failed to parse input file.

Action: Check input file and the line for possible errors. Otherwise contact Oracle Customer Support.

EVM-00034: Error: <varname>string</varname>

Cause: Error Occured.

Action: Look at the error message for details.

EVM-00035: EVM service "<varname>string</varname>" terminated with exit code <varname>number</varname>

Cause: EVM daemon died.

Action: Check the EVM daemon log.

EVM-00036: Host "<varname>string</varname>" is unknown

Cause: Invalid hostname discovered while trying to create a connection to the EVM daemon.

Action: Check the hostname, on which EVM daemon is running. Otherwise contact Oracle Customer Support.

EVM-00037: Failed to connect to EVM daemon on "<varname>string</varname>"

Cause: EVM daemon is dead or is not responding.

Action: Check the status of EVM daemon and logs.

EVM-00038: Failed to create an EVM event

Cause: Failed to create an EVM event.

Action: Check the EVM daemon log.

EVM-00039: Invalid port number in host name "<varname>string</varname>"

Cause: Used an invalid port number.

Action: Use a valid or a different port number.

EVM-00040: Error occurred while reading from "<varname>string</varname>"

Cause: Error occured when evmshow was reading from an input file.

Action: Check the input file.

EVM-00042: Use "<varname>string</varname> -A" to format events, or pipe output to evmshow

Cause: Invalid use of evmshow command.

Action: Use evmshow command as instructed.

EVM-00043: Attempting to reconnect to the EVM daemon...

Cause: Evmwatch trying to reconnect to the evm daemon.

Action: Not an error message.

EVM-00044: Attempting to reconnect to the EVM daemon on "<varname>string</varname>"...

Cause: Evmwatch trying to reconnect to the evm daemon on this host.

Action: Not an error message.

EVM-00045: EVM connection re-established

Cause: Evmwatch was able to reconnect to the evm daemon.

Action: Not an error message.

EVM-00104: End of file reached unexpectedly

Cause: End of event template file reached unexpectedly.

Action: Check the event template file in evm/admin.

EVM-00105: Missing end-of-group character

Cause: end-of-group character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00106: Missing end-of-string character

Cause: end-of-string character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00107: Value "<varname>string</varname>" is not valid

Cause: Invalid value found in the event template file.

Action: Check the event template file in evm/admin.

EVM-00108: Keyword "<varname>string</varname>" is not valid

Cause: Invalid keyword found in the event template file.

Action: Check the event template file in evm/admin.

EVM-00201: Failed to allocate space for application object

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00202: Failed to allocate space for local lock pathname

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00301: Failed to open logger config file "<varname>string</varname>"

Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00302: Configuration error - using default configuration

Cause: Configuration file had invalid configuration details

Action: Check the configuration file.

EVM-00303: Keyword "<varname>string</varname>" is invalid in this position

Cause: Valid Keyword was used in an invalid position in configuration file.

Action: Use the correct syntax.

EVM-00304: Configuration error in file <varname>string</varname>, line <varname>number</varname>

Cause: Configuration error in configuration file.

Action: Check the configuration file.

EVM-00305: Memory allocation failure for "<varname>string</varname>"

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00306: Failed to create filter for "<varname>string</varname>"

Cause: Failed to create a filter for events for evmlogger.

Action: Check the availability of memory.

EVM-00307: Filter string invalid for "<varname>string</varname>"

Cause: Used a null filter string or memory allocation failed.

Action: Use a non null filter string.

EVM-00308: Failed to open eventlog "<varname>string</varname>": <varname>string</varname>

Cause: Eventlog file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00309: Failed to write to eventlog "<varname>string</varname>"

Cause: Eventlog had one of the following problems; size or permissions were not valid.

Action: Check the permissions and the size of the eventlog file. Otherwise contact Oracle Customer Support.

EVM-00310: Invalid suppression filter for eventlog "<varname>string</varname>"

Cause: Invalid filter was used.

Action: Use a non null filter. Otherwise contact Oracle Customer Support.

EVM-00311: Invalid entry in eventlog "<varname>string</varname>" (<varname>number</varname> events OK)

Cause: Evmlogger found an invalid entry in eventlog.

Action: Check the eventlog file.

EVM-00312: Eventlog "<varname>string</varname>" disabled

Cause: Events could not be written to the eventlog file.

Action: Check the permissions,max size of the logfile.

EVM-00313: Eventlog "<varname>string</varname>" re-enabled

Cause: Events logging is reenabled.

Action: Not an error message.

EVM-00314: Forwarder "<varname>string</varname>" disabled

Cause: Forwarding is disabled by the evmlogger.

Action: Not an error message.

EVM-00315: Forwarder "<varname>string</varname>" re-enabled

Cause: Forwarding is disabled by the evmlogger.

Action: Not an error message.

EVM-00316: Suppression disabled for "<varname>string</varname>"

Cause: Error message filtering suppression disabled for this string.

Action: Not an error message.

EVM-00317: Suppression re-enabled for "<varname>string</varname>"

Cause: Error message filtering suppression reenabled for this string.

Action: Not an error message.

EVM-00318: Failed to open config info file "<varname>string</varname>"

Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00319: Keyword "<varname>string</varname>" is not allowed in a secondary config file

Cause: Invalid Keyword was used.

Action: Use a valid Keyword.

EVM-00323: Config file "<varname>string</varname>" has insecure write permission

Cause: The configuration file had write permissions for the group 'other'.

Action: Change the write permissions for the configuration file

EVM-00324: Config file "<varname>string</varname>" has incorrect ownership

Cause: Configuration file should be owned by root or bin.

Action: Change the owner of configuration file to root or bin.

EVM-00325: Config file "<varname>string</varname>" is not a regular file

Cause: Configuration file is not a regular file.

Action: Check the configuration file.

EVM-00401: Failed to open binary event library file

Cause: Binary event file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00601: Data read from the input stream is not a valid EVM event

Cause: evmshow tried to read an invalid EVM event.

Action: Check the logs for the evm daemon.

EVM-00701: Check that the event is registered and you are authorized to post it

Cause: Not authorized to post for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post the specific event.

EVM-00702: Priority must be an integer in the range 0-<varname>number</varname>

Cause: Used an integer out of the range for priority.

Action: Use a valid integer.

EVM-00801: Missed <varname>number</varname> subscribed-to event(s)

Cause: Missed some events during the connection setup phase.

Action: Not an error message.

EVM-00802: Failed to reconnect within <varname>number</varname> seconds - terminating

Cause: Failed to establish a connection with EVM daemon.

Action: Check the logs for EVM daemon.

EVM-00901: Invalid sort specification "<varname>string</varname>"

Cause: Invalid sort specification used for evmsort.

Action: Use a valid sort specification. Look at documentation for evmsort using evmsort -h.

EXP-00000 to EXP-00114

EXP-00000: Export terminated unsuccessfully

Cause: Export encountered an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual, and take appropriate action.

EXP-00001: data field truncation - column length=<varname>number</varname>, buffer size=<varname>number</varname> actual size=<varname>number</varname>

Cause: Export could not fit a column in the data buffer.

Action: Record the given size parameters and the accompanying messages and report this as an Export internal error to customer support. (Part of the table has been exported. Export will continue with the next table.)

EXP-00002: error in writing to export file

Cause: Export could not write to the export file, probably because of a device error. This message is usually followed by a device message from the operating system.

Action: Take appropriate action to restore the device.

EXP-00003: no storage definition found for segment(<varname>number</varname>, <varname>number</varname>)

Cause: Export could not find the storage definitions for a cluster, index, or table.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00004: invalid username or password

Cause: An invalid username or password was specified.

Action: Retry with a valid username and password.

EXP-00005: all allowable logon attempts failed

Cause: Attempts were repeatedly made to log on with an invalid username or password.

Action: Shut down the utility, then restart and retry with a valid username and password.

EXP-00006: internal inconsistency error

Cause: Export's data structure was corrupted.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00007: dictionary shows no columns for <varname>string</varname>.<varname>string</varname>

Cause: Export failed to gather column information from the data dictionary. The table may have been dropped.

Action: Retry the export and, if this error recurs, report it as an Export internal error to customer support.

EXP-00008: ORACLE error <varname>number</varname> encountered

Cause: Export encountered the referenced Oracle error.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00009: no privilege to export <varname>string</varname>'s table <varname>string</varname>

Cause: An attempt was made to export another user's table. Only a database administrator can export another user's tables.

Action: Ask your database administrator to do the export.

EXP-00010: <varname>string</varname> is not a valid username

Cause: An invalid username was specified.

Action: Shut down the utility, then restart and retry with a valid username.

EXP-00011: <varname>string</varname>.<varname>string</varname> does not exist

Cause: Export could not find the specified table.

Action: Retry with the correct table name.

EXP-00012: <varname>string</varname> is not a valid export mode

Cause: An invalid export mode was specified.

Action: Retry with a valid export mode.

EXP-00013: respond with either 'Y', 'N', RETURN or '.' to quit

Cause: An invalid response was entered.

Action: Enter any of the responses shown in the message.

EXP-00014: error on row <varname>number</varname> of table <varname>string</varname>\n

Cause: Export encountered an Oracle error while fetching rows.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00015: error on row <varname>number</varname> of table <varname>string</varname>, column <varname>string</varname>, datatype <varname>number</varname>

Cause: Export encountered an error while fetching or writing the column. An accompanying message gives more information.

Action: Correct the error and try again.

EXP-00016: ORACLE error encountered while reading default auditing options

Cause: Export encountered an Oracle error while reading the default auditing options (those for updates, deletes, and so on).

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00017: feature "<varname>string</varname>" is needed, but not present in database

Cause: The command entered requires the specified feature. Either that feature is not installed, or the row describing the feature is missing from table V\$OPTION

Action: Reinstall Oracle with the feature specified in the message.

EXP-00018: datatype (<varname>number</varname>) for column <varname>string</varname>, table <varname>string</varname>. <varname>string</varname> is not supported

Cause: Export does not support the referenced datatype.

Action: Retry with an acceptable datatype (CHAR, NUMBER, DATE, LONG, or RAW).

EXP-00019: failed to process parameters, type 'EXP HELP=Y' for help

Cause: Invalid command-line parameters were specified.

Action: Check the online help screen for the set of valid parameters, then retry.

EXP-00020: failed to allocate memory of size <varname>number</varname>

Cause: Export failed to allocate the necessary memory.

Action: Decrease the export buffer size so that less memory is required, or increase the runtime memory size for Export.

EXP-00021: can only perform incremental export in Full Database mode

Cause: USER or TABLE mode was specified when doing an incremental export.

Action: Specify FULL database mode (FULL=Y) and retry.

EXP-00022: must be SYS or SYSTEM to do incremental export

Cause: The privileges needed to do an incremental export do not exist. Only a database administrator can do incremental exports.

Action: Ask the database administrator to do the incremental export.

EXP-00023: must be a DBA to do Full Database or Tablespace export

Cause: The privileges needed to do a FULL database export do not exist. Only a database administrator can do a FULL database export.

Action: Ask the database administrator to do the FULL database export.

EXP-00024: Export views not installed, please notify your DBA

Cause: The necessary Export views were not installed.

Action: Ask the database administrator to install the required Export views.

EXP-00025: dictionary shows no column for constraint <varname>string</varname>.<varname>number</varname>

Cause: Export failed to gather column information about the referenced constraint from the data dictionary. The constraint may have been altered.

Action: Retry the export and, if this error recurs, report it as an Export internal error to customer support.

EXP-00026: conflicting modes specified

Cause: Conflicting export modes were specified.

Action: Specify only one parameter and retry.

EXP-00027: failed to calculate ORACLE block size

Cause: Export failed to calculate the Oracle block size.

Action: Report this as an Export internal error to customer support.

EXP-00028: failed to open <varname>string</varname> for write

Cause: Export failed to open the export file for writing. This message is usually followed by device messages from the operating system.

Action: Take appropriate action to restore the device.

EXP-00029: Incremental export mode and consistent mode are not compatible

Cause: Both consistent and incremental exports were specified.

Action: None. Consistent mode is turned off.

EXP-00030: Unexpected End-Of-File encountered while reading input

Cause: Encountered an End-Of-File while reading the user input.

Action: If input to export is being redirected, check the file for errors.

EXP-00031: Arraysize not in valid range. Using arraysize=<varname>number</varname>

Cause: The arraysize value specified is not in the valid range.

Action: None

EXP-00032: Non-DBAs may not export other users

Cause: Only database administrators can export to other users. A non- database administrator attempted to specify owner=user where exporter is not the user.

Action: Request that this operation be performed by the database administrator.

EXP-00033: Could not find environment character set

Cause: The environment character set is missing or incorrectly specified.

Action: Ensure that the environment character set is correctly specified and is present.

EXP-00034: error on rowid: file# <varname>number</varname> block# <varname>number</varname> slot# <varname>number</varname>

Cause: Identifies the rowid on which an error occurred.

Action: This is an information message. No action is required.

EXP-00035: QUERY parameter valid only for table mode exports

Cause: You specified the QUERY parameter in an export command, but you are not performing a table mode export. The QUERY parameter cannot be used for a user mode export, a full export, nor a point in time recovery export.

Action: If you want to select a subset of rows for a table, you must export the table independently with a table mode export. Issue a table mode export command that specifies the table name and the query you want to execute during export.

EXP-00036: Object <varname>number</varname> non-existent in dictionary

Cause: The specified object could not be found in the dictionary. The object might have been dropped during the export

Action: The object no longer exists; no action is needed.

EXP-00037: Export views not compatible with database version

Cause: The Export utility is at a higher version than the database version and is thereby incompatible.

Action: Use the same version of Export utility as the database.

EXP-00038: Bad Hash cluster id in clu\$

Cause: The function id in clu\$ is not a legal number. Clu\$ has become corrupted.

Action: Contact Worldwide Support

EXP-00039: export file <varname>string</varname> must be on a disk

Cause: On some platforms, export can read files from tape. This message is displayed if the first file in an export file set was on disk and you specified a tape device for a second or subsequent file.

Action: Verify that you have specified the correct file name for the export file. Remember that all export files can be either on disk or all files can be on tape, but not mixed both tape and disk.

EXP-00040: Dump file and log file must be different

Cause: The dump file and log file cannot be the same file.

Action: Specify different file names for the dump file and the log file, then retry the operation.

EXP-00041: INCTYPE parameter is obsolete

Cause: Export encountered the INCTYPE parameter when parsing Export options. Incremental Exports are no longer supported.

Action: Consult the Oracle Backup and Recovery guide. Export will attempt to continue.

EXP-00042: Missing NLS_CHARACTERSET/NLS_NCHAR_CHARACTERSET in props\$

Cause: A value for NLS_CHARACTERSET/NLS_NCHAR_CHARACTERSET was not entered in the props\$ table"

Action: internal error.

EXP-00043: Invalid data dictionary information in the row where column "<varname>string</varname>" is "<varname>string</varname>" in table <varname>string</varname>

Cause: The export utility retrieved invalid data from the data dictionary.

Action: Contact Oracle Worldwide Support.

EXP-00044: must be connected 'AS SYSDBA' to do Point-in-time Recovery or Transportable Tablespace import

Cause: The user must log in 'as SYSDBA' to perform transportable tablespace imports or Point-In-Time Recovery imports.

Action: Ask your database administrator to perform the Transportable Tablespace import or the Tablespace Point-in-time Recovery import.

EXP-00045: Cannot export SYSTEM Tablespace for Point-in-time Recovery or Transportable Tablespace

Cause: SYSTEM tablespace cannot be part of recovery set or transportable tablespace set.

Action: Contact Oracle Worldwide Support.

EXP-00046: Tablespace named <varname>string</varname> does not exist

Cause: The specified tablespace does not exist in dictionary.

Action: Contact Oracle Worldwide Support.

EXP-00047: Missing tablespace name(s)

Cause: Tablespace name(s) were not supplied

Action: Provide tablespace name(s)

EXP-00048: Cannot export SYSAUX Tablespace for Point-in-time Recovery or Transportable Tablespace

Cause: SYSAUX tablespace cannot be part of recovery set or transportable tablespace set.

Action: Contact Oracle Worldwide Support.

EXP-00049: <varname>string</varname> option is not compatible with Point-in-time Recovery or Transportable Tablespace Export

Cause: An option was specified incompatible with Point-in-time Recovery or Transportable Tablespace Export.

Action: Retry the Export without the displayed option.

EXP-00050: Cannot perform Partition Export "<varname>string</varname>" on non-partitioned table "<varname>string</varname>"

Cause: The table specified in this Partition Export is not a partitioned table.

Action: Use Table mode, or specify a non-partitioned table.

EXP-00051: "<varname>string</varname>" - given partition or subpartition name is not part of "<varname>string</varname>" table

Cause: The specified partition or subpartition name is not in the specified table.

Action: Check if the correct table, partition or subpartition name was specified.

EXP-00052: error on row <varname>number</varname> of partition <varname>string</varname>\n

Cause: Export encountered the referenced Oracle error while fetching rows.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00053: unable to execute QUERY on table <varname>string</varname> because the table has inner nested tables

Cause: You specified the QUERY parameter on a table that has one or more inner nested tables. The QUERY parameter cannot be specified on tables that have inner nested tables.

Action: Export the entire table by omitting the QUERY parameter.

EXP-00054: error on row <varname>number</varname> of subpartition <varname>string</varname>\n

Cause: Export encountered the referenced Oracle error while fetching rows.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00055: <varname>string</varname>.<varname>string</varname> is marked not exportable

Cause: An object was marked as non-exportable in the NOEXP\$ table.

Action: Consult your database administrator.

EXP-00057: Failure to initialize parameter manager

Cause: The parameter manager failed in initialization.

Action: Record the messages that follow and report this to Oracle Worldwide Support as an Export internal bug.

EXP-00058: Password Verify Function for <varname>string</varname> profile does not exist

Cause: Cannot find the function for the profile.

Action: Check if the profile was created properly.

EXP-00059: error converting an object type's identifier to characters

Cause: An invalid length of an object type identifier prevented its conversion.

Action: Contact Oracle Worldwide Support

EXP-00060: an object type had multiple TYPE BODYs

Cause: More than one TYPE BODY was found for an object type.

Action: Try dropping the TYPE BODY, if that is not successful, contact Oracle Worldwide Support

EXP-00061: unable to find the outer table name of a nested table

Cause: While exporting a bitmap index or posttable action on an inner nested table, the name of the outer table could not be located, using the NTAB\$ table.

Action: Verify the table is properly defined.

EXP-00062: invalid source statements for an object type

Cause: TYPE was not found in the statements in SOURCE\$ for an Object Type

Action: Contact Oracle Worldwide Support.

EXP-00063: error in changing language handle

Cause: Unable to change language handle.

Action: Contact Oracle Worldwide Support.

EXP-00064: <varname>string</varname> is an inner nested table and cannot be exported.

Cause: An attempt was made to export an inner nested table without its parent table.

Action: Export the parent of the inner nested table.

EXP-00065: Error writing lob to the dump file.

Cause: The current LOB could not be written to the dump file.

Action: Identify the cause of the write failure and fix it.

EXP-00066: Object table <varname>string</varname> is missing its object identifier index

Cause: All object tables must have an object identifier index, but the specified table was missing an index on its object identifier column.

Action: Recreate the type table and retry the operation.

EXP-00068: tablespace <varname>string</varname> is offline

Cause: Export failed to export tablespace (tablespace being offline).

Action: Make tablespace online and re export.

EXP-00070: attempt to free unallocated memory

Cause: An attempt was made to free memory that was not allocated.

Action: Contact Oracle Worldwide Support

EXP-00071: QUERY parameter not compatible with Direct Path export

Cause: You specified a value for the QUERY parameter for a direct path export. The QUERY parameter cannot be used with a direct path export.

Action: Re-issue the export command with DIRECT=N or omit the DIRECT parameter from the command line.

EXP-00072: error closing export file <varname>string</varname>

Cause: An error occurred while trying to close the export file.

Action: Contact Oracle Worldwide Support.

EXP-00073: dump file size too small

Cause: You specified either the FILESIZE parameter or the VOLSIZE parameter (if your platform supports it), and the value of the parameter is too small to hold the header information for the export file, plus any data.

Action: Increase the value of the FILESIZE or VOLSIZE parameter.

EXP-00074: rounding VOLSIZE down, new value is <varname>string</varname>

Cause: The VOLSIZE parameter must be a multiple of the RECORDLENGTH, but the value you specified for VOLSIZE does not meet this requirement. The value of VOLSIZE has been rounded down to be a multiple of the RECORDLENGTH used for the dump file.

Action: No action is required. You can adjust the VOLSIZE or RECORDLENGTH parameter to avoid this message. When importing this file, you must specify the VOLSIZE value reported by this message.

EXP-00075: rounding FILESIZE down, new value is <varname>string</varname>

Cause: The FILESIZE parameter must be a multiple of the RECORDLENGTH, but the value you specified for FILESIZE does not meet this requirement. The value of FILESIZE has been rounded down to be a multiple of the RECORDLENGTH used for the dump file.

Action: No action is required. You can adjust the FILESIZE or RECORDLENGTH parameter to avoid this message. When importing this file, you must specify the FILESIZE value reported by this message.

EXP-00076: multiple devices specified for tape output

Cause: You specified multiple file names when doing an export to a tape device. EXPORT uses the same device for writing all files, of the number of tape volumes required. For this reason, export will accept only one value for the FILE parameter when writing to tape.

Action: Reenter the EXPORT command, but specify only one tape device in the FILE parameter.

EXP-00077: multiple output files specified for unbounded export file

Cause: You specified multiple file names when doing an export and you also specified a value of 0 for the FILESIZE parameter. Note that 0 is the value used if FILESIZE is not specified on the command line. Since a value of 0 for FILESIZE means that only one file will be written and there is no size limit for that file, the other files you specified in the FILE parameter can never be used.

Action: If you intended to write multiple files, respecify the command but use the FILESIZE to specify the maximum number of bytes that EXPORT should write to each file. If you intended to write only one file with no limits on its size, reissue the EXPORT command but specify only one file name for the FILE parameter.

EXP-00078: Error exporting metadata for index <varname>string</varname>. Index creation will be skipped

Cause: Domain indexes export private metadata via anonymous PL/SQL blocks prior to the CREATE INDEX statement. Export does this by calling the ODCIIndexGetMetadata method on the implementation type associated with the index. A problem occurred inside this routine. Because the metadata is considered an integral part of the index, the CREATE INDEX statement was not written to the dump file.

Action: Contact the developer of the index's implementation type. If this is an Oracle-supplied index (perhaps via a data cartridge), contact Oracle Worldwide Support.

EXP-00079: Data in table "<varname>string</varname>" is protected. Conventional path may only be exporting partial table.

Cause: User without the execute privilege on DBMS_RLS, the access control package, tries to export a table that has access control. Since table owner is also subjected to access control, the owner may not be able to export all rows in the table, but only the ones he can see. Also, to preserve integrity of the table, user exporting the table should have enough privilege to recreate the table with the security policies at import time. Therefore, it is strongly recommended the database administrator should be handling exporting of this table. Granting the table owner execute privilege would also satisfy this security check, though it might have other security implications. If the table does not have objects, can use direct mode.

Action: Ask the database administrator to export/import this table/view.

EXP-00080: Data in table "<varname>string</varname>" is protected. Using conventional mode.

Cause: User without the execute privilege on DBMS_RLS, the access control package, tries to direct export a table that has access control enabled. Using conventional export mode instead. Note that because of access control, only a partial table may be exported.

Action: Ask the database administrator to export/import this table/view.

EXP-00081: Exporting access control for table/view "<varname>string</varname>" as non-DBA.

Cause: A non-DBA user tries to export table/view and the associated fine grain access control policies. The user may not have enough privilege to recreate the access control policies when importing the table/view. And such an event may cause inconsistency in the security model of the table/view.

Action: Ask the database administrator to export/import this table/view.

EXP-00082: Invalid function name passed to procedural object support: <varname>string</varname>

Cause: Internal inconsistency error: The listed function is not a method on export's procedural object interface specification.

Action: Contact Oracle Worldwide Support

EXP-00083: The previous problem occurred when calling <varname>string</varname>.<varname>string</varname>.<varname>string</varname>

Cause: The listed package provides export/import support for procedural actions. The previously listed error occurred while calling the specified function.

Action: Contact Oracle Worldwide Support. Most packages are supplied by Oracle internal cartridge or server development groups. The package name will help Support determine the correct owner of the problem.

EXP-00084: Unexpected DbmsJava error <varname>number</varname> at step <varname>number</varname>

Cause: The error was returned from a call to a DbmsJava procedure.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00085: The previous problem occurred when calling <varname>string</varname>.<varname>string</varname> for object <varname>number</varname>

Cause: The listed package provides export/import support for procedural objects, i.e., those whose DDL is supplied by stored procedures. The previously listed error occurred while calling the specified function.

Action: Contact Oracle Worldwide Support. Most packages are supplied by Oracle internal cartridge or server development groups. The package name will help Support determine the correct owner of the problem.

EXP-00086: Primary key REFs in table "<varname>string</varname>" may not be valid on import

Cause: The specified table contains primary key REFs which may not be valid in the import database.

Action: Do not use Export/Import to move Primary key REFs between databases having differing character sets.

EXP-00087: Problem with internal hash table of schema/table names

Cause: Most likely a problem with allocating memory for the hash table entries.

Action: Contact Oracle Worldwide Support

EXP-00089: invalid FILE_FORMAT specification

Cause: The FILE_FORMAT specification did not contain an instance of "%s". This wildcard string must be present.

Action: Correct the error and reenter the EXPORT command.

EXP-00090: cannot pin type "<varname>string</varname>".<varname>string</varname>

Cause: Export was unable to pin the specified type in the object cache. This is typically caused because a type could not be made valid (for example because of authorization violations in accessing subtypes).

Action: Fix the problem with the offending type until the type can be successfully compiled.

EXP-00091: Exporting questionable statistics.

Cause: Export was able export statistics, but the statistics may not be usable. The statistics are questionable because one or more of the following happened during export: a row error occurred, client character set or NCHARSET does not match with the server, a query clause was specified on export, only certain partitions or subpartitions were exported, or a fatal error occurred while processing a table.

Action: To export non-questionable statistics, change the client character set or NCHARSET to match the server, export with no query clause, export complete tables. If desired, import parameters can be supplied so that only non-questionable statistics will be imported, and all questionable statistics will be recalculated.

EXP-00092: Unable to set NLS_NUMERIC_CHARACTERS to required defaults.

Cause: Export was unable to set NLS_NUMERIC_CHARACTERS to '.,'

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00093: Could not convert to server character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

EXP-00094: Could not convert to server national character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

EXP-00095: Flashback_time and Flashback_scn are not compatible

Cause: Both flashback_time and flashback_scn parameters were specified.

Action: Reissue command with only one flashback parameter.

EXP-00097: Object type "<varname>string</varname>". "<varname>string</varname>" is not in a valid state, type will not be exported

Cause: The object type's status is invalid which may be caused by a dependant type's modification (or removal) without cascading the change.

Action: The type must be recompiled using ALTER TYPE COMPILE.

EXP-00098: Data in table has not been upgraded, table will not be exported

Cause: Export is attempting to process a table containing references to a type which has evolved. In order for Export to process the table successfully, all data within each table must be upgraded to the latest revision of each referenced type.

Action: The table must be updated using ALTER TABLE UPGRADE DATA.

EXP-00099: Table "<varname>string</varname>". "<varname>string</varname>" is not in a valid state, table will not be exported

Cause: A table or one of its dependant types has modified without cascading the change. This left the table in an INVALID state.

Action: The table must be updated using ALTER TABLE UPDATE.

EXP-00100: error converting an object type's hashcode to characters

Cause: An invalid length of an object type identifier prevented its conversion.

Action: Contact Oracle Worldwide Support

EXP-00101: Version 1 extensible index "<varname>string</varname>". "<varname>string</varname>" can not be included in Transportable Tablespace Export

Cause: Transportable Tablespace extensible indexes must be at least version 2.

Action: Upgrade extensible index implementation to version 2 specifications.

EXP-00102: Resumable parameters ignored -- current session not resumable

Cause: Current session is not resumable.

Action: Must specify RESUMABLE=Y to enable resumable session in order for the RESUMABLE_NAME and RESUMABLE_TIMEOUT parameters to take effect.

EXP-00103: The FLASHBACK_TIME parameter was invalid

Cause: FLASHBACK_TIME did not contain a valid timestamp or an expression that yields a valid timestamp.

Action: Specify a timestamp value in the format of YYYY-MM-DD HH24:MI:SS or an expression that evaluates to a valid timestamp.

EXP-00104: datatype (<varname>string</varname>) of column <varname>string</varname> in table <varname>string</varname>. <varname>string</varname> is not supported, table will not be exported

Cause: The column is of a datatype which does not contain the required support. The table will not be exported.

Action: Use the Data Pump version of Export to export this table.

EXP-00105: parameter <varname>string</varname> is not supported for this user

Cause: The user attempted to specify either CONSISTENT or OBJECT_CONSISTENT when connected as sysdba.

Action: If a consistent export is needed, then connect as another user.

EXP-00106: Invalid Database Link Passwords

Cause: Invalid Encoded Password for Database Link

Action: Please drop the Database Link and recreate it after import.

EXP-00107: Feature (<varname>string</varname>) of column <varname>string</varname> in table <varname>string</varname>. <varname>string</varname> is not supported. The table will not be exported.

Cause: Export does not contain the required support for this feature. The table will not be exported.

Action: Use the Data Pump version of Export to export this table.

EXP-00108: NULL lob fetched

Cause: Internal error

Action: Contact Oracle Worldwide Support.

EXP-00109: XSL delimiter not found

Cause: Internal error

Action: Contact Oracle Worldwide Support.

EXP-00110: Tablespace <varname>string</varname> is encrypted and will not be exported

Cause: Encrypted Tablespace feature is not supported by classic export

Action: Use DATAPUMP Utility to export this tablespace.

EXP-00111: Table <varname>string</varname> resides in an Encrypted Tablespace <varname>string</varname> and will not be exported

Cause: Encrypted Tablespace feature is not supported by classic export

Action: Use DATAPUMP Utility to export this table.

EXP-00112: Index <varname>string</varname> is of XMLType and could not be exported

Cause: Export does not contain the required support for this feature. The index could not be exported.

Action: Use Oracle Data Pump Utility to export this index.

**EXP-00113: Feature <varname>string</varname> is unsupported.
<varname>string</varname> <varname>string</varname>.<varname>string</varname> could not be exported**

Cause: Export does not contain the required support for this feature.

Action: Use Oracle Data Pump Utility

EXP-00114: Length of <varname>string</varname> <varname>string</varname> is exceeding the maximum limit

Cause: Provided length was more than the maximum limit allowed.

Action: Check the input value and provide the correct value.

GIMR-01001 to GIMR-01007

GIMR-01001: The GIMR schema is incompatible with the application. Call Oracle Support Services.

Cause: A Grid Infrastructure Management Repository (GIMR) operation failed because a schema was incompatible with the operation.

Action: Contact Oracle Support Services.

GIMR-01002: GIMR data is corrupt. Contact Oracle Support Services.

Cause: An attempt to access Grid Infrastructure Management Repository (GIMR) data failed because the data store was corrupt.

Action: Contact Oracle Support Services.

GIMR-01003: The application has experienced an error during a GIMR operation. The accompanying error messages provide detailed failure information.

Cause: A Grid Infrastructure Management Repository (GIMR) operation failed. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages, address the issues raised, and retry.

GIMR-01004: The application cannot log in to the GIMR. Use the 'mgmtca' command to reset the user credentials.

Cause: An attempt to log in to the Grid Infrastructure Management Repository (GIMR) failed because user credentials were invalid.

Action: Use the 'mgmtca' command to reset the user credentials.

GIMR-01005: An attempt to connect to the GIMR failed because a connection timed out. Retry the operation.

Cause: An attempt to connect to the Grid Infrastructure Management Repository (GIMR) failed because a connection timed out.

Action: Retry the operation.

GIMR-01006: The application has exhausted the allotted space in the GIMR. Make space available to the application and retry the operation.

Cause: An attempt to write to the Grid Infrastructure Management Repository (GIMR) failed because the data store had no available space.

Action: Make space available to the application and retry the operation.

GIMR-01007: The application is unable to connect to the GIMR because the GIMR network listener is down. Restart the GIMR network listener using the 'srvctl' command.

Cause: The Grid Infrastructure Management Repository (GIMR) network listener was not running when the application attempted to connect to it.

Action: Restart the GIMR network listener using the 'srvctl' command.

GIPC-00000 to GIPC-00020

GIPC-00000: general success.

Cause: The operation succeeded.

Action: No action is required.

GIPC-00001: general failure.

Cause: A GIPC operation failed.

Action: Examine the trace and log files for the specific cause.

GIPC-00002: GIPC needs to be initialized.

Cause: The application failed to initialize GIPC prior to performing an operation.

Action: Initialize GIPC.

GIPC-00014: buffer not large enough to hold data.

Cause: The buffer provided by the application was not big enough to hold the data received.

Action: Use a larger buffer.

GIPC-00016: timeout waiting on request.

Cause: A wait call returned because the time expired.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00017: waiting call has been posted.

Cause: A wait was interrupted by another thread posting it.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00020: bind address already in use.

Cause: The application attempt to bind an endpoint to an address which has already been bound.

Action: Specify another address.

IMG-00001 to IMG-02014

IMG-00001: unable to initialize Oracle Multimedia environment

Cause: The image processing external procedure initialization process failed.

Action: Contact Oracle Support Services.

IMG-00002: unrecoverable error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00003: exhausted memory while processing image

Cause: Oracle Multimedia exhausted available Java memory during processing.

Action: Increase the JAVA_POOL_SIZE initialization parameter setting.

IMG-00201: unsupported metadata type

Cause: The requested metadata type could not be read from or written to this image format.

Action: Refer to the Oracle Multimedia documentation to select the proper metadata type for this image.

IMG-00202: unsupported character encoding

Cause: The character encoding was not supported for this image format.

Action: Refer to the Oracle Multimedia documentation to select the proper encoding for this image.

IMG-00203: xmlData is invalid

Cause: The XML document was NULL or not schema valid.

Action: Create a schema valid document for input.

IMG-00204: input metadata too long

Cause: The metadata was too long to embed in this image format.

Action: Trim the metadata, or use a different image format.

IMG-00205: cannot add a TIFF directory entry

Cause: No new entries could be added to this directory.

Action: Use a different image format.

IMG-00206: unsupported image format for putMetadata

Cause: Metadata could not be written to this image format.

Action: Use a different image format.

IMG-00207: input parameter is not valid

Cause: The input parameter value contained an invalid value.

Action: Correct the input parameter value.

IMG-00208: metadata format parse error

Cause: The parser detected an error in the embedded metadata.

Action: Verify that the metadata conforms to proper standards.

IMG-00209: error parsing metadata

Cause: There was an internal error while parsing the metadata.

Action: Contact Oracle Support Services.

IMG-00210: unable to get metadata from an empty image

Cause: There was no data in the input image.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00211: metadataType value "<varname>string</varname>" is invalid

Cause: The metadataType parameter value was NULL or invalid.

Action: Correct the metadataType parameter value.

IMG-00212: encoding value "<varname>string</varname>" is invalid

Cause: The encoding parameter value was NULL or invalid.

Action: Correct the encoding parameter value.

IMG-00213: xmlData does not contain an <varname>RDF</varname> element

Cause: The XML document did not contain an <varname>RDF</varname> element as a child of <varname>xmpMetadata</varname>.

Action: Create a schema valid document with an <varname>RDF</varname> element.

IMG-00502: invalid scale value

Cause: An invalid scale value was found while parsing the parameters for the image process function.

Action: Correct the statement by using a valid scale value. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00505: missing value in CUT rectangle

Cause: An incorrect number of values was used to specify a rectangle.

Action: Use exactly four integer values for the lower-left and upper-right vertices.

IMG-00506: extra value in CUT rectangle

Cause: An incorrect number of values was used to specify a rectangle.

Action: Use exactly four integer values for the lower left and upper right vertices.

IMG-00510: <varname>string</varname>

Cause: A syntax error was found while parsing the parameters for the image process function.

Action: Correct the statement by using valid parameter values. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00511: <varname>string</varname>

Cause: An error was found while accessing image data.

Action: Contact Oracle Support Services.

IMG-00512: multiple incompatible scaling parameters found

Cause: Multiple incompatible scaling parameters were found in the image process command string. With the exception of XSCALE and YSCALE, which can be used together in a process command string, scaling functions are mutually exclusive and cannot be combined.

Action: Remove scaling functions until only one remains (or two, if they are XSCALE and YSCALE).

IMG-00513: missing value in scaling operation

Cause: An incorrect number of values was used to specify image dimensions. fixedScale and maxScale require exactly two integer values for the X and Y dimensions of the desired image.

Action: Use two values for fixedScale and maxScale.

IMG-00514: extra value in scaling operation

Cause: An incorrect number of values was used to specify image dimensions. fixedScale and maxScale require exactly two integer values for the X and Y dimensions of the desired image.

Action: Use two values for fixedScale and maxScale.

IMG-00515: incorrect number of input channels

Cause: An incorrect number of values was used to specify input channels. InputChannels requires either one or three channels numbers for the gray or red, green, and blue channel assignments.

Action: Use either one or three values to specify the input channels.

IMG-00516: default channel out of range

Cause: An incorrect value was used to specify the default channel selection.

Action: Use a channel number which is less than or equal to the number of bands and greater than zero.

IMG-00517: height or width not present in parameter string

Cause: Height and/or width were not specified in the setProperties parameter string.

Action: Specify both the height and width.

IMG-00518: invalid value for height or width

Cause: Height and/or width were not positive integers"

Action: Specify both the height and width as positive integers"

IMG-00519: illegal combination of parameters

Cause: Other than height, width, dataOffset, and userString no other parameters may be specified in the setProperties parameter string when CCITTG3 or CCITTG4 is used as the compressionFormat.

Action: Supply only the height and width when compressionFormat is either CCITTG3 or CCITTG4. The dataOffset and userString may optionally be supplied as well.

IMG-00520: invalid value for numberOfBands

Cause: NumberOfBands was not a positive integer"

Action: Specify numberOfBands as a positive integer"

IMG-00521: invalid value for dataOffset

Cause: DataOffset was not a positive integer"

Action: Specify dataOffset as a positive integer"

IMG-00522: invalid format for parameter value

Cause: A floating point value was specified where an integer is required, or a character value was specified where a numeric value is required.

Action: Specify the correct type of values for process parameters.

IMG-00523: invalid process verb

Cause: A process verb was specified that is not understood by Oracle Multimedia.

Action: Refer to the Oracle Multimedia documentation for a description of valid process verbs.

IMG-00524: mismatched quotes

Cause: Quotation marks used within a process command string were not matched.

Action: Ensure that quotation marks occur in pairs.

IMG-00525: locale error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00526: error parsing foreign image description

Cause: An internal error occurred while processing a foreign image.

Action: Contact Oracle Support Services.

IMG-00527: invalid deletePages specified

Cause: The specified value for the deletePages parameter was not valid.

Action: See the Oracle Multimedia documentation for reference information about valid values for deletePages parameter.

IMG-00528: invalid movePages specified

Cause: The specified value for the movePages parameter was not valid.

Action: See the Oracle Multimedia documentation for reference information about valid values for movePages parameter.

IMG-00529: invalid combination of TIFF page operations

Cause: The specified TIFF page operations were not valid.

Action: See the Oracle Multimedia documentation for reference information about valid values for TIFF page operations.

IMG-00530: internal error while parsing command

Cause: An internal error occurred while parsing the command passed to the image processing function or the foreign image setProperties function.

Action: Check the command passed to the function. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string or the foreign image setproperties function. If you are certain that your command is correct, then contact Oracle Support Services.

IMG-00531: empty or null image processing command

Cause: An empty or null image processing command was passed to the image process function.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00540: contentFormat and interleave conflict

Cause: Interleave values were specified using both the contentformat and interleave verbs.

Action: Specify interleave using either contentformat or interleave, but not both.

IMG-00541: invalid contentFormat specified

Cause: The specified contentFormat was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid contentFormat specifications.

IMG-00542: contentFormat includes invalid extra information

Cause: The specified contentFormat included invalid characters at the end of the parameter string.

Action: Refer to the Oracle Multimedia documentation for a description of valid contentFormat specifications.

IMG-00543: invalid compressionFormat specified

Cause: The specified compressionFormat was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid compressionFormat specifications.

IMG-00544: invalid compressionQuality specified

Cause: The specified compressionQuality was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid compressionQuality specifications.

IMG-00545: invalid cut values specified

Cause: An invalid value was found while parsing the parameters for the cut operation.

Action: Correct the statement by specifying values for the cut operation that are not negative. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00546: invalid page number specified

Cause: An invalid page number was specified.

Action: Specify page numbers that are not negative.

IMG-00547: invalid channelOrder specified

Cause: The specified channelOrder was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid channelOrder specifications.

IMG-00548: invalid interleave specified

Cause: The specified interleave was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid interleave specifications.

IMG-00549: invalid pixelOrder specified

Cause: The specified pixelOrder was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid pixelOrder specifications.

IMG-00550: invalid scanlineOrder specified

Cause: The specified scanline order was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid scanlineOrder specifications.

IMG-00551: invalid quantize method specified

Cause: The specified quantization method was not valid.

Action: Refer to the Oracle Multimedia documentation for a description of valid quantization method specifications.

IMG-00552: invalid inputChannels specified

Cause: An invalid value was specified for the inputChannels verb.

Action: Specify non-negative values for inputChannels. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the image processing command string.

IMG-00553: invalid rotate value

Cause: An invalid value was specified for image rotation. Rotation values must be a floating point number.

Action: Correct the statement by providing a valid rotation value.

IMG-00554: extra value in rotate operation

Cause: Multiple arguments were used to specify image rotation. The rotate operation accepts only a single value.

Action: Provide a single value for the rotate operation.

IMG-00555: invalid value for gamma correction

Cause: An invalid value was specified for gamma correction. Gamma values must be positive.

Action: Correct the statement by providing a positive gamma value.

IMG-00556: incorrect number of gamma values

Cause: An incorrect number of values were used to specify gamma correction. Gamma correction requires either one or three gamma values.

Action: Provide either one or three values to specify the gamma correction.

IMG-00557: invalid value for contrast enhancement

Cause: An invalid value was used to specify contrast enhancement.

Action: To specify contrast enhancement using percentages, provide values between 0 and 100. To specify contrast enhancement using bounds, provide values greater than 0.

IMG-00558: incorrect number of contrast values

Cause: An incorrect number of values were used to specify contrast enhancement. Contrast enhancement requires one, two, three, or six contrast values.

Action: Provide one or three values to specify contrast enhancement using percentages; provide two or six values to specify contrast enhancement using contrast bounds.

IMG-00559: invalid frame number

Cause: An incorrect number was used to specify frame in Dicom image. The number should be greater than 0 and less than total frames in Dicom image.

Action: Provide one number greater than 0 and less than total frames in Dicom image.

IMG-00560: input format does not support page selection

Cause: The page verb was specified for an input format that does not support selecting pages.

Action: Remove the page selection verb. Refer to the Oracle Multimedia documentation for a description of which image formats support page selection.

IMG-00561: input format does not support channel selection

Cause: The inputChannels verb was specified for an input format that does not support selecting channels.

Action: Remove the inputChannels verb. Refer to the Oracle Multimedia documentation for a description of which image formats support input channel selection.

IMG-00577: invalid quantize argument

Cause: A quantize value was specified that accepts an argument, but the argument provided was not valid.

Action: Provide a valid, non-negative argument for the quantize value.

IMG-00578: missing quantize argument

Cause: A quantize value was specified that requires an argument, but no argument was provided.

Action: Provide an argument for the quantize value.

IMG-00579: extra quantize argument

Cause: An extra argument was provided for a quantize value. Some quantize values accept no arguments, while others accept a single argument.

Action: Provide an argument only for quantize values that accept an argument.

IMG-00580: specified format does not support output

Cause: The output format specified by fileFormat does support output.

Action: Change the specified fileFormat to one that supports output. Refer to the Oracle Multimedia documentation for a description of which formats support output.

IMG-00581: output format does not support the specified contentFormat

Cause: The specified contentFormat is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which contentFormat values are supported for each output format.

IMG-00582: output format does not support the specified interleave

Cause: The specified interleave is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which interleave values are supported for each output format.

IMG-00583: output format does not support the specified compressionFormat

Cause: The specified compressionFormat is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which compressionFormat values are supported for each output format.

IMG-00584: output format does not support the specified compressionQuality

Cause: The specified compressionQuality is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which compressionQuality values are supported for each output format.

IMG-00585: output format does not support the specified channelOrder

Cause: The specified channelOrder is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which channelOrder values are supported for each output format.

IMG-00586: output format does not support the specified pixelOrder

Cause: The specified pixelOrder is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which pixelOrder values are supported for each output format.

IMG-00587: output format does not support the specified scanlineOrder

Cause: The specified scanlineOrder is not supported by the explicitly or implicitly specified output format.

Action: Refer to the Oracle Multimedia documentation for a description of which scanlineOrder values are supported for each output format.

IMG-00599: internal error

Cause: An internal error has occurred.

Action: Contact Oracle Support Services.

IMG-00601: out of memory while copying image

Cause: Operating system process memory has been exhausted while copying the image.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00602: unable to access image data

Cause: An error occurred while reading or writing image data.

Action: Ensure that the source image can be read from and the destination can be written to.

IMG-00603: unable to access source image data

Cause: The source image SOURCE attribute is invalid.

Action: Ensure that the SOURCE attribute of the source image is populated with image data.

IMG-00604: unable to access destination image data

Cause: The destination image SOURCE attribute is invalid.

Action: Ensure that the SOURCE attribute of the destination image is populated with image data.

IMG-00606: unable to access image data

Cause: An attempt was made to access an invalid image.

Action: Ensure that the SOURCE attribute of the image is populated with image data.

IMG-00607: unable to write to destination image

Cause: The destination image SOURCE attribute is invalid.

Action: Ensure that the SOURCE attribute of the destination image is initialized correctly and that you have sufficient tablespace.

IMG-00609: unable to read image stored in a BFILE

Cause: The image stored in a BFILE cannot be opened for reading.

Action: Ensure that the access privileges of the image file and the image file's directory allow read access.

IMG-00611: unable to access the BLOB for reading

Cause: The BLOB could not be opened for reading.

Action: Contact Oracle Support Services.

IMG-00612: unable to open export destination file

Cause: The file could not be created or opened.

Action: Check that the file does not refer to an existing directory. Check that the file is not locked by another application.

IMG-00613: export destination access denied

Cause: Permission to write to destination file was denied.

Action: Refer to the Oracle Multimedia documentation for information on granting privileges for the export() method.

IMG-00614: I/O error during export

Cause: The export operation failed because of an I/O error.

Action: Check OS logs and contact Oracle Support Services.

IMG-00701: unable to set the properties of an empty image

Cause: There is no data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00702: unable to initialize image processing environment

Cause: The image processing external procedure initialization process failed.

Action: Contact Oracle Support Services.

IMG-00703: unable to read image data

Cause: There is no image data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00704: unable to read image data

Cause: There is no image data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate image data into the image object.

IMG-00705: unsupported or corrupted input format

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00706: unsupported or corrupted output format

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00707: unable to access image data

Cause: An error occurred while reading or writing image data.

Action: Contact your system administrator.

IMG-00710: unable to write to destination image

Cause: The destination image is invalid.

Action: Ensure that the SOURCE attribute of the destination image is initialized and that you have sufficient tablespace.

IMG-00711: unable to set properties of destination image

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00712: unable to write to destination image

Cause: The destination image is invalid.

Action: Ensure that the SOURCE attribute of the destination image is initialized and that you have sufficient tablespace. Ensure the row containing the destination image has been locked (this does not apply to temporary BLOBs).

IMG-00713: unsupported destination image format

Cause: A request was made to convert an image to a format that is not supported.

Action: Refer to the Oracle Multimedia Documentation for supported formats.

IMG-00714: internal error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00715: unable to open image stored in a BFILE

Cause: The image stored in a BFILE could not be opened for reading.

Action: Ensure that the access privileges of the image file and the image file's directory allow read access.

IMG-00716: source image format does not support process options

Cause: A request was made to apply a processing option not supported by the source image format.

Action: Refer to the Oracle Multimedia Documentation for a discussion of supported processing options.

IMG-00717: destination image format does not support process options

Cause: A request was made to apply a processing option not supported by the destination image format.

Action: Refer to the Oracle Multimedia Documentation for a discussion of supported processing options.

IMG-00718: the same Temporary LOB cannot be used as both source and destination

Cause: A call was made to processCopy with the same Temporary LOB being specified as both the source and destination.

Action: Specify a different LOB for parameter "dest".

IMG-00719: image processing internal error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

IMG-00720: image processing internal error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

**IMG-00721: unable to find source plug-in package
ORDPLUGINS.ORDX_<varname>string</varname>_SOURCE**

Cause: Custom source plug-in for user-specified source type was not found.

Action: Ensure correct source type is specified or proper custom source plug-in package is installed.

IMG-00722: incorrect value of bitsAllocated, bitsStored or highBit for output Dicom image

Cause: incorrect value of bitsAllocated, bitsStored or highBit for output Dicom image.

Action: Ensure correct value of bitsAllocated, bitsStored or highBit for output Dicom image.

IMG-00723: missing value in SHARPEN operation

Cause: An incorrect number of values was used to specify the sharpen parameters.

Action: Use one integer value to specify the kernel type and one float value to specify the gain factor.

IMG-00724: extra value in SHARPEN operation

Cause: An incorrect number of values was used to specify the sharpen parameters.

Action: Use one integer value to specify the kernel type and one float value to specify the gain factor.

IMG-00725: output image will be empty

Cause: The processing commands resulted in an empty output image.

Action: Ensure the resulting output image will not be empty.

IMG-00726: invalid value for the AVI framerate

Cause: An invalid value was used to specify the AVI framerate parameter.

Action: Use a floating-point value to specify the AVI framerate parameter.

IMG-00727: invalid value for the AVI framerate

Cause: An invalid value was used to specify the AVI framerate parameter.

Action: Use a floating-point value to specify the AVI framerate parameter.

IMG-00728: multiple incompatible AVI frame parameters found

Cause: Multiple incompatible AVI frame parameters were found.

Action: Use only one AVI frame parameter.

IMG-00729: output format does not support the specified frame parameters

Cause: The specified frame parameter is not supported by the explicitly or implicitly specified output format.

Action: Specify AVI as the output format in the process command string.

IMG-00730: unable to process empty image

Cause: There is no data in the input image object.

Action: Refer to the Oracle Multimedia documentation for information on how to put image data into the image object.

IMG-00731: specified page could be found in input image

Cause: The specified page does not exist in the input image.

Action: Restrict the value of the page parameter to values specifying pages that exist within the input image object.

IMG-00732: specified inputChannels could not be found in input image

Cause: The specified inputChannel parameter does not exist in the input image.

Action: Restrict the value of the inputChannels parameter to values specifying channels that exist within the input image object.

IMG-00733: invalid watermark property setting

Cause: The specified watermark property setting is not supported by Oracle Multimedia.

Action: See the Oracle Multimedia documentation for a description of valid watermark property settings.

IMG-00734: invalid deflateLevel value

Cause: The specified value for the deflateLevel parameter was not supported by Oracle Multimedia.

Action: See the Oracle Multimedia documentation for a description of the valid values for the deflateLevel parameter.

IMG-00735: incorrect transparencyFillColor values

Cause: The specified value for the transparencyFillColor parameter was not supported by Oracle Multimedia.

Action: See the Oracle Multimedia documentation for a description of the valid values for the transparencyFillColor parameter.

IMG-00800: internal error while parsing attribute string

Cause: An internal error occurred while parsing the attribute string containing the weights of the attributes.

Action: Check the command passed to the function. Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the attributes string for image matching. If you are certain that your command is correct, then contact Oracle Support Services.

IMG-00801: cannot extract height and width

Cause: Height and width are not set in the image object.

Action: Set the properties of the image object by calling `setProperties` and then generate signature.

IMG-00802: empty or null attribute string

Cause: An empty or null attributes string was passed to the image matching operators.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax of the attributes string.

IMG-00803: invalid attribute value

Cause: An invalid value was found while parsing the attribute string for the image matching operators.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax for the attributes string. The weight values should be between 0.0 and 1.0.

IMG-00804: Syntax error in attribute string

Cause: A syntax error was found while parsing the attribute string for the image matching operators.

Action: Refer to the Oracle Multimedia documentation for a description of the correct usage and syntax of the attributes string.

IMG-00805: SIGNATURE data has been corrupted or is invalid

Cause: The data in the signature is not a valid signature.

Action: Re-create the signature using the `generateSignature` method.

IMG-00806: invalid input image

Cause: The image data is either corrupt or is in an unsupported format.

Action: Repopulate the image object, set properties of the image, and generate the signature.

IMG-00807: no weights specified in weight string

Cause: All weights passed were zero. At least one attribute must be weighted.

Action: Specify a non-zero weight for at least one attribute

IMG-00808: unable to read an empty image

Cause: There is no data in the image object.

Action: Refer to the Oracle Multimedia documentation for information on how to populate the image object with image data.

IMG-00809: usage of IMGSimilar is incorrect

Cause: Syntax error while using IMGSimilar

Action: Refer to the Oracle Multimedia documentation for information on how to use the IMGSimilar operator. Check whether the value returned by IMGSimilar is compared to the value 1.

IMG-00810: boundary queue initialization failed

Cause: Operating system process memory has been exhausted while initializing the boundary queue.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00811: fail queue initialization failed

Cause: Operating system process memory has been exhausted while initializing the fail queue.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00812: merged area queue initialization failed

Cause: Operating system process memory has been exhausted while initializing the merged area queue.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00813: boundary queue free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00814: fail queue free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00815: merged area queue free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00820: area 0 queue clear failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00821: area N queue clear failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00822: area queue reset failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00823: boundary queue pop failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00824: fail queue pop failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00825: merged area queue pop failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00830: boundary queue is full

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00831: boundary queue size exceeds expected size

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00832: fail queue is full

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00833: boundary queue size exceeds expected size

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00834: merged area queue is full

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00835: merged area queue size exceeds expected size

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00836: area queue merge failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00840: image structure allocation failed

Cause: Operating system process memory has been exhausted while initializing the image structure.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00841: image data allocation failed

Cause: Operating system process memory has been exhausted while initializing the image data.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00842: image index allocation failed

Cause: Operating system process memory has been exhausted while initializing the image index.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00843: internal image structure allocation failed

Cause: Operating system process memory has been exhausted while initializing the internal image structure.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00844: internal image data allocation failed

Cause: Operating system process memory has been exhausted while initializing the internal image data.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00845: internal image index allocation failed

Cause: Operating system process memory has been exhausted while initializing the internal image index.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00846: adjacency matrix allocation failed

Cause: Operating system process memory has been exhausted while initializing the adjacency matrix.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00847: area list allocation failed

Cause: Operating system process memory has been exhausted while initializing the area list.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00850: image structure free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00851: image data free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00852: image index free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00853: internal image structure free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00854: internal image data free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00855: internal image index free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00856: adjacency matrix free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00857: area list free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number.

IMG-00860: assert failure, number of region exceeds allocated

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00861: assert failure, inconsistency in area merge operation

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00862: assert failure, inconsistency in merged area labels

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00870: unsupported aspect ratio or image size

Cause: Signature generation was attempted on an image smaller than the supported size.

Action: Try scaling the image up to have a larger height and width, the suggested size is greater than 21 pixels each. If signature generation still fails, contact Oracle Support Services with the error number and the image causing this problem.

IMG-00871: unexpected number of seeds

Cause: An internal error has occurred.

Action: Contact Oracle Support Services with the error number and the image causing this problem.

IMG-00872: unsupported image model

Cause: Signature generation was attempted on an image with an image model that Oracle Multimedia is unable to support.

Action: Try scaling the image down. If signature generation still fails, contact Oracle Support Services with the error number and the image causing this problem.

IMG-00899: signature cannot be generated

Cause: generateSignature could not generate the signature.

Action: Verify that the input image is a format supported by Oracle Multimedia.

IMG-00901: VIR signature version mismatch

Cause: Two signatures to be compared have different versions.

Action: Recompute signatures on the same platform and repeat signature comparison.

IMG-00902: VIR signature free failed

Cause: An internal error has occurred.

Action: Contact Oracle Support Services.

IMG-00910: allocation of basic data structure failed

Cause: Operating system process memory has been exhausted while copying the image.

Action: See the database administrator or operating system administrator to increase process memory quota.

IMG-00911: free basic data structure failed

Cause: Operating system process memory has been exhausted while copying the image.

Action: Contact Oracle Support Services.

IMG-00921: threshold out of range

Cause: Threshold is not between 0 and 100

Action: Use a threshold between 0 and 100 and retry query.

IMG-00922: location specified without feature

Cause: only location was specified.

Action: Specify at least one other parameter (color, texture or shape) along with location. Refer to the Oracle Multimedia documentation for more details.

IMG-00923: signature is empty

Cause: Signature has not been generated.

Action: Generate the signature for the image by calling the generateSignature method.

IMG-00924: Incorrect parameter specification during CREATE INDEX

Cause: There is a spelling error, or duplicate parameter specification, or incorrect specification of parameters while creating an index of type ORDIMAGEINDEX.

Action: Refer to the Oracle Multimedia documentation for correct specification of CREATE INDEX parameters.

IMG-00925: unable to write to the ORDImageSignature object

Cause: The signature object was not valid and therefore the write operation failed. This problem is commonly caused by an attempt to invoke the generateSignature method on an uninitialized ORDImageSignature object.

Action: Ensure that the ORDImageSignature object has been initialized and inserted into a table. Also ensure that the row containing the signature object is locked. (The two previous actions do not apply to signature objects created using temporary BLOBs). Ensure that there is sufficient tablespace to contain the signature.

IMG-00926: tablespace specified during CREATE INDEX is not valid

Cause: A tablespace specified in the parameter string of a CREATE INDEX operation did not exist or the current user did not have sufficient privileges on the tablespace.

Action: Create the tablespace, grant appropriate privileges on the tablespace to the current user, or choose a different tablespace.

IMG-01000: unsupported option string

Cause: The function was invoked with an invalid option string.

Action: Ensure that correct option string is passed to the PL/SQL function. Refer to the Oracle Multimedia documentation for more information.

IMG-01001: not a DICOM object

Cause: The input was not a valid DICOM standalone object.

Action: Use an object that conforms to the DICOM standard. Refer to the Oracle Multimedia documentation for more information.

IMG-01002: unsupported DICOM version

Cause: The object header could not be parsed, possibly because the object header did not conform to the DICOM standard release 2003.

Action: Use an object that conforms to the DICOM standard release 2003. Refer to the Oracle Multimedia documentation for more information.

IMG-01003: unsupported DICOM object type

Cause: The category of DICOM objects is not supported by Oracle Multimedia.

Action: Use a DICOM image is supported by Oracle Multimedia. Oracle Multimedia supports image types defined in the DICOM standard release 2003. Refer to the Oracle Multimedia documentation for more details.

IMG-01004: input DICOM object is not an image

Cause: The DICOM object was not a DICOM image. DICOM object types such as structured reporting are not allowed by this function.

Action: Invoke this function with a DICOM image. Refer to the Oracle Multimedia documentation for more details.

IMG-01005: unsupported DICOM transfer syntax

Cause: The operation failed because the transfer syntax in the DICOM object, which describes the binary encoding of the DICOM object, was not supported by Oracle Multimedia.

Action: Use a DICOM object with a transfer syntax supported by Oracle Multimedia. Refer to the Oracle Multimedia documentation for more details.

IMG-01006: DICOM object cannot be parsed

Cause: The DICOM object could not be parsed by Oracle Multimedia, possibly due to an incorrect format or corrupted object.

Action: Verify that the DICOM object is not corrupted. If the DICOM object is valid, contact Oracle Support Services.

IMG-02001: 2FF01 - incorrect image format

Cause: There was a SQL/MM Still Image exception. Either the supplied image BLOB format did not match the image format or the image format is unsupported.

Action: For supported image formats, specify an input BLOB that has the same format as the image. For unsupported image formats, this method is not supported. Refer to the Oracle Multimedia documentation for more information.

IMG-02002: 2FF02 - incorrect average color feature specification

Cause: There was a SQL/MM Still Image exception. The specified average color value was not a valid SI_Color value.

Action: Specify an average color value that is not null and contains valid SI_Color values. SI_Color attribute values must be integers from 0 to 255. Refer to the Oracle Multimedia documentation for more information on constructing valid SI_Color objects.

IMG-02003: 2FF03 - incorrect color histogram feature specification

Cause: There was a SQL/MM Still Image exception. This exception was caused by one of the following. - The specified color value was null or invalid. - The specified

frequency value was null or invalid. - The input color and frequency arrays were not equal in size. - The SI_ColorList array attribute had reached the maximum size.

Action: Ensure that the following are true(as applicable to your case): - The color and frequency values are not null. - The SI_Color attribute values are integers from 0 to 255. - The frequency value is a double precision number from 0 to 100. - The color and frequency arrays are equal in size and the size of the arrays is less than the SI_MaxHistogramLength value listed in the SI_VALUES view in the SI_INFORMTN_SCHEMA. Refer to the Oracle Multimedia documentation for more information on constructing SI_ColorHistogram objects.

IMG-02004: 2FF04 - incorrect feature list specification

Cause: There was a SQL/MM Still Image exception. Either the specified feature values were invalid or the specified feature weights were invalid.

Action: Check the values of feature and featureweight pairs. For a non null feature value, the corresponding feature weight value must be a double precision number greater than 0.0. Refer to the Oracle Multimedia documentation for more information on the SI_FeatureList object type and its methods.

IMG-02005: 2FF05 - incorrect color specification

Cause: There was a SQL/MM Still Image exception. The specified red/green/blue value was null or invalid.

Action: Specify red, green and blue values as integers from 0 to 255.

IMG-02006: 2FF06 - average color feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the average color feature was not supported by the specified image format

Action: Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image formats and image features.

IMG-02007: 2FF07 - positional color feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the positional color feature was not supported by the specified image format.

Action: Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

IMG-02008: 2FF08 - color histogram feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the color histogram feature was not supported by the specified image format.

Action: Specify an image with non null image data and a supported format Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

IMG-02009: 2FF09 - texture feature cannot be determined

Cause: There was a SQL/MM Still Image exception. Either the specified image was null, the image data in the specified image was null, or the texture feature was not supported by the specified image format.

Action: Specify an image with non null image data and a supported format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image features and formats.

IMG-02010: 2FF10 - illegal image format specification

Cause: There was a SQL/MM Still Image exception. The specified format name was null or invalid.

Action: Specify a format name that is not null. For supported image formats, specify a format name that matches the image BLOB format. For unsupported image formats, specify a format name that is not listed as supported image format. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image formats.

IMG-02011: 2FF11 - unsupported image format conversion specified

Cause: There was a SQL/MM Still Image exception. Either the specified target format value was null, the specified image had a null format value, or the conversion from the specified image format to the specified target format was not supported.

Action: Specify an image with a supported image format and specify a target format value that is supported for conversion. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported image format conversions.

IMG-02012: 2FF12 - illegal specification for thumbnail generation

Cause: There was a SQL/MM Still Image exception. Either the specified image format did not support thumbnail generation, the specified thumbnail height or width was greater than the image height or width respectively, or the default thumbnail size 80 X 80 was greater than the image height or width respectively.

Action: Specify an image for which thumbnail generation is supported and specify thumbnail height and width values that are less than the image height and width values. Refer to the SI_INFORMTN_SCHEMA views and the Oracle Multimedia documentation for a list of supported thumbnail formats.

IMG-02014: 2202D Data exception - Null image value

Cause: There was a SQL/MM Still Image exception. The function was invoked using a null image value.

Action: Specify an image whose image data is not null. Refer to the Oracle Multimedia documentation for more information on constructing SI_StillImage objects.

IMP-00000 to IMP-00402

IMP-00000: Import terminated unsuccessfully

Cause: Import encountered an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual, and take appropriate action.

IMP-00001: respond with either <varname>string</varname>, <varname>string</varname>, RETURN or '.' to quit

Cause: An invalid response was entered.

Action: Enter any of the responses shown in the message.

IMP-00002: failed to open <varname>string</varname> for read

Cause: Import failed to open the export file for reading. This message is usually followed by a device message from the operating system.

Action: Take appropriate action to restore the device.

IMP-00003: ORACLE error <varname>number</varname> encountered

Cause: Import encountered the referenced Oracle error.

Action: Look up the Oracle message in the ORA message chapters of this manual, and take appropriate action.

IMP-00004: invalid username or password

Cause: An invalid username or password was specified.

Action: Retry with a valid username and password.

IMP-00005: all allowable logon attempts failed

Cause: An attempt was repeatedly made to log on with an invalid username or password.

Action: Retry with valid username and password.

IMP-00006: failed to allocate memory of size <varname>number</varname>

Cause: Import failed to allocate the necessary memory.

Action: Decrease the import buffer size so that less memory is required, or increase the runtime memory size for Import.

IMP-00007: must be a DBA to import objects to another user's account

Cause: The privileges needed to import into another user's account do not exist. Only a database administrator can import into another user's account.

Action: Ask the database administrator to do the import.

IMP-00008: unrecognized statement in the export file: ln <varname>string</varname>

Cause: Import did not recognize a statement in the export file. Either the export file was corrupted, or an Import internal error has occurred.

Action: If the export file was corrupted, retry with a new export file. Otherwise, report this as an Import internal error and submit the export file to customer support.

IMP-00009: abnormal end of export file

Cause: The export file is probably from an aborted Export session.

Action: If so, retry the export and import. Otherwise, report this as an Import bug and submit the export file that caused this error to customer support.

IMP-00010: not a valid export file, header failed verification

Cause: Either the file was not generated by Export or it was corrupted.

Action: If the file was indeed generated by Export, report this as an Import bug and submit the export file to customer support.

IMP-00011: formatted table data not currently supported

Cause: You tried to import an export file that contains formatted table data. Import only supports export files containing binary table data. wher

Action: Retry using an export file that contains only binary table data.

IMP-00012: invalid export mode (<varname>character</varname>) in header

Cause: The Export mode specified in the export file header is invalid.

Action: Check the export file to see if it was corrupted. If it was not, report this as an Import bug and submit the export file to customer support.

IMP-00013: only a DBA can import a file exported by another DBA

Cause: The privileges needed to Import an export file generated by a database administrator do not exist. Only a database administrator can import such files.

Action: Ask the database administrator to do the import.

IMP-00014: option "<varname>string</varname>" is needed, but not present in database

Cause: The command entered requires the specified option. Either that option is not installed, or the row describing the option is missing from table V\$OPTION

Action: Reinstall Oracle with the option specified by the message.

IMP-00015: following statement failed because the object already exists:

Cause: Import failed to create an object because it already exists.

Action: Specify IGNORE=Y to ignore such errors and import rows even when tables are not created because they already exist.

IMP-00016: required character set conversion (type <varname>number</varname> to <varname>number</varname>) not supported

Cause: Import could not convert the character format of the export file into the native character format.

Action: Change the user character set by setting the NLS_LANG environment variable to match the character set of the export file.

IMP-00017: following statement failed with ORACLE error <varname>number</varname>:

Cause: Import failed to execute the statement from the export file because of an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00018: partial import of previous table completed: <varname>number</varname> rows imported

Cause: A table was only partially imported because of an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00019: row rejected due to ORACLE error <varname>number</varname>

Cause: Import encountered the referenced Oracle error while trying to import a row.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00020: long column too large for column buffer size (<varname>number</varname>)

Cause: The column buffer is too small. This usually occurs when importing LONG data.

Action: Increase the insert buffer size 10,000 bytes at a time (for example). Use this step-by-step approach because a buffer size that is too large may cause a similar problem.

IMP-00021: INCTYPE parameter is obsolete

Cause: Import encountered the INCTYPE parameter when parsing Import options. Incremental Imports are no longer supported.

Action: Consult the Oracle Backup and Recovery guide. Import will attempt to continue.

IMP-00022: failed to process parameters, type 'IMP HELP=Y' for help

Cause: Invalid command-line parameters were specified.

Action: Check the online help screen for the set of valid parameters, then retry.

IMP-00023: Import views not installed, please notify your DBA

Cause: The necessary Import views were not installed.

Action: Ask your database administrator to install the required Import views.

IMP-00024: Only one mode (TABLES, FROMUSER, or FULL) can be specified

Cause: Parameters were specified that conflict with the import specification FULL=Y.

Action: Retry, making sure not to specify FULL=Y.

IMP-00025: for DBA export files, FROMUSER must be specified with TOUSER option

Cause: When importing a database administrator export file, you specified the TOUSER parameter but not the FROMUSER parameter.

Action: Specify the FROMUSER parameter so that Import knows which user's objects to import.

IMP-00027: failed to rollback partial import of previous table

Cause: Import encountered an Oracle error while trying to roll back a partial import.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action. Then, log on to Oracle and check that the partial import was not committed.

IMP-00028: partial import of previous table rolled back: <varname>number</varname> rows rolled back

Cause: Import encountered an Oracle error while trying to import a table.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action. Then, if necessary, re-import the table.

IMP-00029: cannot qualify table name by owner (<varname>string</varname>), use FROMUSER parameter

Cause: A table name was qualified with the name of its owner, as shown in the following example. This is not allowed. IMP SYSTEM/MANAGER TABLES=(SCOTT.EMP)

Action: Use the FROMUSER parameter to specify the table's owner, as shown in the following example: IMP SYSTEM/MANAGER FROMUSER=SCOTT TABLES=(EMP, DEPT)

IMP-00030: failed to create file <varname>string</varname> for write

Cause: Import was unable to create the specified file with write enabled.

Action: Check the file name and file system for the source of the error.

IMP-00031: Must specify FULL=Y or provide FROMUSER/TOUSER or TABLES arguments

Cause: The database administrator did not specify full or partial import.

Action: The database administrator must specify FROMUSER/TOUSER or table arguments if not a full import.

IMP-00032: SQL statement exceeded buffer length

Cause: The buffer was too small for the SQL statement being read.

Action: Rerun with a larger buffer. This can also be an indication of a corruption in the import datafile.

IMP-00033: Warning: Table "<varname>string</varname>" not found in export file

Cause: A table name was specified that does not exist in export file.

Action: Correct the table specification.

IMP-00034: Warning: FromUser "<varname>string</varname>" not found in export file

Cause: The user specified a FROMUSER name that does not exist in export file.

Action: Correct the FROMUSER specification.

IMP-00035: input file <varname>string</varname> must be on a disk

Cause: On some platforms, import can read files from tape. This message is displayed if the first file in an export file set was on disk and you specified a tape device for a second or subsequent file.

Action: Verify that you have specified the correct file name for the import file. Remember that all input files can be either on disk or all files can be on tape, but not mixed both tape and disk.

IMP-00036: Could not find environment character set

Cause: An environment character set was specified that was not recognized by the Import utility.

Action: Ensure that the spelling of the character set specified in the command line parameter CHARSET (for Release 6 only) or the environment variable NLS_LANG is correct.

IMP-00037: Character set marker unknown

Cause: The export file is corrupted.

Action: Try to obtain an uncorrupted version of the export file. If the export file is not corrupted, report this as an Import internal error and submit the export file to customer support.

IMP-00038: Could not convert to environment character set's handle

Cause: Internal error.

Action: Contact Worldwide Support.

**IMP-00039: VOLSIZE does not match the value used for export:
<varname>string</varname>**

Cause: The value specified for VOLSIZE does not match the value specified during the creation of the export file.

Action: If you believe that the specified VOLSIZE value is correct, verify that you specified the correct file for import. If you specified the correct file but are unsure about the correct value, re-execute the import command but specify VOLSIZE=0.

**IMP-00040: FILESIZE does not match the value used for export:
<varname>string</varname>**

Cause: The value specified for FILESIZE does not match the value specified during the creation of the export file.

Action: If you believe the specified FILESIZE value is correct, verify that you specified the correct file for import. If you specified the correct file but are unsure about the correct value, re-execute the import command but specify FILESIZE=0.

IMP-00041: Warning: object created with compilation warnings

Cause: The object in the SQL statement following this error was created with compilation errors. If this error occurred for a view, it is possible that the base table of the view was missing.

Action: This is a warning. The object may have to be recompiled before being used.

IMP-00042: CHARSET used, but the export file has specific character set

Cause: The user requested that a specific character set be used to process an export file that has a specific embedded character set ID. The ID in the export file is accurate and should be used.

Action: Remove the CHARSET keyword from the command line.

IMP-00043: export file character set inconsistent

Cause: The character set of the export file and the environment character set (or the character set specified with the CHARSET keyword) are inconsistent. One character set is ASCII-based while the other is EBCDIC based.

Action: Specify the correct character set with the CHARSET keyword.

IMP-00044: unable to allocate enough memory for statement

Cause: Import was unable to allocate sufficient memory to read in the specified statement and execute it.

Action: Increase the allocation for database buffers, restart the instance, and reexecute the Import command.

IMP-00045: using VOLSIZ value from export file of <varname>string</varname>

Cause: Either you did not specify the VOLSIZ parameter in your IMPORT command, or you specified VOLSIZ=0 and the export was created with a non-zero value for VOLSIZ. Import will use the value specified in the export file.

Action: None required.

IMP-00046: using FILESIZE value from export file of <varname>string</varname>

Cause: Either you did not specify the FILESIZE parameter in your IMPORT command, or you specified FILESIZE=0 and the export file was created with a non-zero value for FILESIZE. Import will use the value specified in the export file.

Action: None required.

IMP-00047: unexpected file sequence number; expected <varname>number</varname> but found <varname>number</varname>

Cause: The header in the export file contains a sequence number that is used to track the order in which multiple export files are written. The first export file is assigned sequence number one, the second file is assigned sequence number two and so on. This message is displayed when a number other than the expected sequence number is found in the file header

Action: Execute the import command again, but specify the files in the order in which Export wrote them.

IMP-00048: mismatched file header

Cause: During verification of the 2nd or subsequent file in a multi-file export, Import found header fields in the file that did not match values in the first file.

Action: Check the names of the files created by Export and verify that you specified them correctly for the import operation.

IMP-00049: Unknown language specified in CHARSET

Cause: An unknown language was listed in the CHARSET option.

Action: Use a known character set.

IMP-00050: Dump file and log file cannot be identical

Cause: Identical names were given to the dump file and log file.

Action: Specify different names for the dump file and log file and retry the operation.

IMP-00051: Direct path exported dump file contains illegal column length

Cause: An invalid column length was encountered while processing column pieces."

Action: Check to make sure the export file is not corrupted, or else report this to Oracle Worldwide Support as an Import/Export internal bug and submit the export file.

IMP-00052: Warning: Unable to set event for freelist communication with server

Cause: An event could not be set for current the session.

Action: If Import fails, give the Import user ALTER SESSION PRIV and retry the operation.

IMP-00053: Import mode incompatible with Export dump file

Cause: The specified import option is incompatible with point-in-time- recovery dump file.

Action: Generate a proper dump file or use point-in-time-recovery import mode.

IMP-00054: must be connected 'AS SYSDBA' to do Point-in-time Recovery or Transportable Tablespace import

Cause: The user must log in 'as SYSDBA' to perform transportable tablespace imports or Point-In-Time Recovery imports.

Action: Ask your database administrator to perform the Transportable Tablespace import or the Tablespace Point-in-time Recovery import.

IMP-00055: Warning: partition or subpartition "<varname>string</varname>":"<varname>string</varname>" not found in export file

Cause: A partition or subpartition name was specified that does not exist in export file.

Action: Check to make sure the partition or subpartition name belongs to the table.

IMP-00056: multiple devices specified for tape input

Cause: You specified multiple file names when doing an import from a tape device. Import uses the same device for reading all tapes, regardless of the number of tape volumes required. For this reason, export will accept only one value for the FILE parameter when writing to tape.

Action: Reenter the IMPORT command, but specify only one tape device in the FILE parameter.

IMP-00057: Warning: Dump file may not contain data of all partitions of this table

Cause: The dump file used for this Table Import might not contain all of the data belonging to the exported table.

Action: Check to see if the export was done as intended, or try performing a Partition Import.

IMP-00059: Failure to initialize parameter manager

Cause: Parameter manager failed in initialization.

Action: Report this to Oracle Worldwide Support as an Import internal bug.

IMP-00060: Warning: Skipping table "<varname>string</varname>". "<varname>string</varname>" because object type "<varname>string</varname>". "<varname>string</varname>" does not exist or has different identifier

Cause: An object type needed by the table, either does not exist on the * target system or, if it does exist, it has a different object identifier.

Action: Create the object type on the target system with a valid * identifier.

IMP-00061: Warning: Object type "<varname>string</varname>". "<varname>string</varname>" already exists with a different identifier

Cause: An object type cannot be created because it already exists on the * target system, but with a different identifier

Action: Drop the object type from the target system and retry the operation.

IMP-00062: Warning: The identifier on the dump file for object type "<varname>string</varname>". "<varname>string</varname>" is invalid

Cause: The character string representing the object type's identifier * could not be converted to an object identifier.

Action: Internal error.

IMP-00063: Warning: Skipping table "<varname>string</varname>". "<varname>string</varname>" because object type "<varname>string</varname>". "<varname>string</varname>" cannot be created or has different identifier

Cause: An error occurred creating an object type that is used by the * table.

Action: Examine the import log to determine why the object type could not * be created. If the object type already existed, with a * different object identifier, then drop the object type and * retry the import.

IMP-00064: Definition of LOB was truncated by export

Cause: While producing the dump file, Export was unable to write the * entire contents of a LOB. Import is therefore unable to * reconstruct the contents of the LOB. The remainder of the * import of the current table will be skipped.

Action: Delete the offending row in the exported database and retry the * export.

IMP-00065: Import is unable to recreate lob within objects.

Cause: An error occurred recreating a LOB within an imported object.

Action: Report this to Oracle Worldwide Support as an Import internal error.

IMP-00066: Missing NLS_CHARACTERSET in props\$

Cause: No value for NLS_CHARACTERSET in props\$.

Action: Contact Worldwide support.

IMP-00067: Could not convert to server character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

IMP-00068: Could not find environment national character set

Cause: An environment national character set was specified that was not recognized by the Import utility.

Action: Ensure that the spelling of the national character set specified in the environment variable NLS_NCHAR is correct.

IMP-00069: Could not convert to environment national character set's handle

Cause: Internal error..

Action: Contact Worldwide support.

IMP-00070: Lob definitions in dump file are inconsistent with database.

Cause: The number of LOBS per row in the dump file is different than the * number of LOBS per row in the table being populated.

Action: Modify the table being imported so that it matches the column * attribute layout of the table that was exported.

IMP-00071: Object identifier of imported table mismatches object identifier of existing table

Cause: An attempt was made to import data into a table that was recreated under a different object identifier than the object identifier used for the exported object table. Under this situation, REF's to this table that are contained within the dump file will also be invalid.

Action: Drop the offending object table prior to import.

IMP-00072: Warning: The object table's object identifier is invalid.

Cause: The character string representing the table's object identifier could not be converted to an internal object identifier.

Action: Internal error.

IMP-00073: FILE locator "<varname>string</varname>" "<varname>string</varname>" is truncated to "<varname>string</varname>" "<varname>string</varname>" in server character set

Cause: The conversion of the specified directory and name strings for a file attribute or column from the export server's character set into the import server's character set exceeded the maximum string lengths allowed within FILE descriptors. The strings will be truncated to the maximum supported lengths.

Action: Rename the directory aliases and external filenames to match the truncated names in the specified FILE column or attribute.

IMP-00074: The constraints flagged by ALL_CONSTRAINTS.BAD will break in 2000 A.D.

Cause: Constraints exist in the data base that specify date values without fully specifying the year. These constraints could break in the year 2000 A.D.

Action: Query ALL_CONSTRAINTS and correct those constraints marked as bad.

IMP-00075: Warning: The nested table may contain partial rows or duplicate rows

Cause: An error occurred inserting data into an outer or inner nested table. If the error occurred in the outer table, rows are still inserted into the inner tables. If the error occurred in an inner table, data is still inserted into the outer table and other inner tables. This can result in duplicate inner table rows or partial logical rows.

Action: Examine the data in the tables. Delete the incorrect rows or drop the entire table and perform the import again.

IMP-00076: Missing NLS_NCHAR_CHARACTERSET in props\$

Cause: No value for NLS_NCHAR_CHARACTERSET in props\$.

Action: Contact Worldwide support.

IMP-00077: Could not convert to server national character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

IMP-00078: Cannot translate FILE locator to "<varname>string</varname>" "<varname>string</varname>" in server character set

Cause: (1) The current export dump file was generated using Beta-2 of Oracle8.0 AND (2) there was a File that appeared as an attribute of an ADT within a table's column AND (3) the character set of the export server's database was different than the character set of the import server's database AND (4) when the filename or the aliasname of the File increased in size when it was translated to the character set of the import server. When all of these conditions are true, translation of the strings could yield corruption of the data in the column. Rather than proceeding with the translation, import will leave the character strings in the File in the old character set.

Action: After import completes, rename the directory aliases and external filenames to match the real names used for the target database.

IMP-00079: Warning: National character set data in this table may be incorrect

Cause: Due to a problem in 8.0.2 Export, national character data in NCHAR and NVARCHAR2 columns was incorrectly assumed to be in the export server's data base character set and was converted to the export client's data base character set. This conversion would only be correct if the export server's data base character set was the same as the export server's national character set and the export client's data base character set was the same as the export client's national character set. All other combinations would likely be incorrect. This export dump file was generated by 8.0.2 Export and the export client and server character sets did not fit that criteria.

Action: Examine the national character data. If incorrect, update the data with correct data.

IMP-00080: Error during character conversion of long column or long command

Cause: During piecewise character conversion of the data in a long column or of a long command, a fatal conversion error occurred. Either character truncation occurred or an invalid character set handle was used.

Action: Retry the import with a different character set.

IMP-00081: attempt to free unallocated memory

Cause: An attempt was made to free memory that was not allocated.

Action: Contact Oracle Worldwide Support

IMP-00082: Error during conversion ROWID from string format to internal

Cause: An error occurred while attempting to convert a ROWID from an export dump file into an internal format.

Action: Report this to Oracle Worldwide Support as an Import internal error.

IMP-00083: dump file does not contain an incremental export

Cause: An incremental import was requested and the dump file specified for the import command is either a user or table export.

Action: Reissue the command import command but specify the name of a dump file containing an incremental export.

IMP-00084: attempt to mix incremental import with user or table import

Cause: An incremental import was requested along with the FROMUSER, TOUSER, or TABLE qualifier. An incremental import cannot be done if any of these other qualifiers are also specified.

Action: Determine whether you want to do an incremental import, full import, user import or table import and reissue the import command with the appropriate qualifiers.

IMP-00085: multiple input files specified for unbounded export file

Cause: You specified multiple file names for the FILE parameter when doing an import, but the header in the export file indicates that the export operation could create only one file. Specifying multiple file names is valid for an import operation only if the export files were created by an export operation in which the user specified a non-zero value for the FILESIZE parameter.

Action: If you believe the export contains multiple files, verify that you have specified the correct files. If you believe the export should be in only one file then try the import operation again, but specify only one value for the FILE parameter.

IMP-00086: TOID "<varname>string</varname>" not found in export file

Cause: Import did not find the type identification specified in the TOID_NOVALIDATE parameter. The specified type identification does not exist in export file.

Action: Correct or omit the TOID_NOVALIDATE parameter.

IMP-00087: Problem with internal hash table of schema/table names

Cause: Most likely a problem with allocating memory for the hash table entries.

Action: Contact Oracle Worldwide Support

IMP-00088: Problem importing metadata for index <varname>string</varname>. Index creation will be skipped

Cause: Domain indexes import private metadata via anonymous PL/SQL blocks prior to the CREATE INDEX statement. The execution of one of these PL/SQL blocks failed. Because the metadata is considered an integral part of the index, the subsequent CREATE INDEX statement was skipped.

Action: Contact the developer of the index's implementation type. If this is an Oracle-supplied index (perhaps via a data cartridge), contact Oracle Worldwide Support.

IMP-00089: Fine grain policy "<varname>string</varname>" not recreated on table/view "<varname>string</varname>"

Cause: Import user fails to recreate fine grained policies of the table/view being imported. To recreate the policy, the user doing the import needs execute privilege on the package DBMS_RLS for access policies or DBMS_FGA for audit policies.

Action: Ask the database administrator to perform the export/import of this table/view.

IMP-00090: Unexpected DbmsJava error <varname>number</varname> at step <varname>number</varname> while creating <varname>string</varname>

Cause: The error was returned from a call to a DbmsJava procedure.

Action: Record the accompanying messages and report this as an Import internal error to customer support.

IMP-00091: Above error occurred on the following function and object: <varname>string</varname>. Remaining PL/SQL blocks for this object will be skipped.

Cause: An error occurred while executing a PL/SQL block that implements the DDL for the named function and procedural object. A procedural object is one whose DDL is implemented as stored procedures rather than as standard SQL statements.

Action: Contact Oracle Worldwide Support so they may determine the development group responsible for the package that failed.

IMP-00092: Java object "<varname>string</varname>". "<varname>string</varname>" already exists, cannot be created

Cause: Import failed to create the Java source, class or resource object because it already exists.

Action: Drop the object type from the target system and retry the operation.

IMP-00093: Inconsistency between dumpfile constraint definition for table <varname>string</varname> with columns (<varname>string</varname>)

Cause: Import failed to locate a base table for a constraint that was defined in the dump file and statistics were not imported.

Action: Check to see if the table and constraint exist. If the table and constraint exist, then report this to Oracle Support Services as an Import internal error.

IMP-00094: Warning: The identifier on the dump file for object type "<varname>string</varname>". "<varname>string</varname>" is invalid

Cause: The character string representing the object type's identifier * could not be converted.

Action: Contact Oracle Worldwide Support.

IMP-00095: Resumable parameters ignored -- current session not resumable

Cause: Current session is not resumable.

Action: Must specify RESUMABLE=Y to enable resumable session in order for the RESUMABLE_NAME and RESUMABLE_TIMEOUT parameters to take effect.

IMP-00096: Warning: Skipping table "<varname>string</varname>". "<varname>string</varname>" because type synonym "<varname>string</varname>". "<varname>string</varname>" cannot be created

Cause: An error occurred creating a synonym for a type that is used by the * table.

Action: Examine the import log to determine why the type synonym could * not be created. If the synonym already existed, but is not * needed, then drop the synonym and retry the import. If the * synonym is PUBLIC but the importer does not have the * CREATE PUBLIC SYNONYM system privilege, then the import must * be done by someone possessing that privilege, or the importer * must be granted the privilege.

IMP-00097: \nSTREAMS_CONFIGURATION=Y ignored, only valid with FULL=Y

Cause: STREAMS_CONFIGURATION=Y can only be used * when FULL=Y is present on the command line

Action: Remove conflicting command arguments

IMP-00098: INTERNAL ERROR: <varname>string</varname>

Cause: An INTERNAL error occurred.

Action: Contact Oracle Worldwide Support.

IMP-00099: Warning: The typeid in the dump file for object type "<varname>string</varname>". "<varname>string</varname>" is invalid

Cause: The character string representing the object type's identifier * could not be converted.

Action: Contact Oracle Worldwide Support.

IMP-00400: Warning: Object type "<varname>string</varname>". "<varname>string</varname>" already exists with a different typeid

Cause: An object type could not be created because it already existed on the * target system, but with a different typeid

Action: Drop the object type from the target system and retry the operation.

IMP-00401: dump file "<varname>string</varname>" may be an Data Pump export dump file

Cause: A dump file was specified for an import operation which appears to have been created using the Data Pump export utility. These dump files cannot be processed by the original import utility.

Action: Try using the Data Pump import utility to process this dump file.

IMP-00402: Invalid parameter "<varname>string</varname>" with data_only mode

Cause: Parameter provided along data_only is invalid.

Action: Remove the invalid parameter from command line.

INS-00001 to INS-30000

INS-00001: Unknown irrecoverable error

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-00002: Unhandled exception

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-00003: Application startup failed

Cause: An unexpected error occurred while loading the application configuration or other startup resources.

Action: Refer to the logs or contact Oracle Support Services

INS-00004: Unable to load help

Cause: One or more help configuration files were not readable or not in the correct format.

Action: Contact Oracle Support Services or refer to the software manual.

INS-00005: Invalid application configuration

Cause: The given application configuration is not compliant to the expected schema.

Action: Contact Oracle Support Services

INS-00006: No resource bundle is associated to the Resource instance

Cause: Specified resource bundle *string* is not found in the classpath.

Action: Ensure that the required libraries are in the classpath.

INS-00007: Help not available for this application

Cause: No additional information available.

Action: Contact Oracle Support Services support or refer software manual.

INS-00008: Help topic not found

Cause: The current user interface do not have help content associated with it.

Action: Contact Oracle Support Services or refer to the software manual.

INS-01001: Failed to create parent directories while copying *string* to *string*

Cause: Unexpected error occurred while creating the nonexistent parent directories of the destination file *string*

Action: Manually verify whether the destination directory is possible to be created.

INS-01002: Copy failed as the source file *string* do not exist

Cause: No additional information available.

Action: Ensure that the source file exist.

INS-01003: Copy failed as the source path *string* do not correspond to a file.

Cause: Copy routine expects a source path, which represents a file.

Action: Ensure that the source is a file and destination is a file or a directory. Note: if the destination is a directory, then the source file will be copied in the same name, under the destination directory.

INS-01004: *string* is not directory.

Cause: The archive extraction routine expects the destination to be a directory.

Action: Ensure that destination is a directory

INS-01005: Failed to copy file from *string* to *string*

Cause: Unexpected error occurred while copying the file.

Action: Refer to the logs for more details.

INS-01006: The file *string* cannot be copied onto itself.

Cause: The source file and destination file are same.

Action: Ensure that the destination file is different from the source file.

INS-01007: The directory *string* cannot be copied onto itself

Cause: The source directory and destination directory are same.

Action: Ensure that the destination directory is different from the source directory.

INS-01008: Copy failed as the destination file *string* already exists.

Cause: No additional information available.

Action: Ensure that the destination file do not exist or use overwrite option to overwrite the destination file.

INS-01009: *string* is not valid archive.

Cause: The given archive path, either do not correspond to a file or do not exist.

Action: Ensure that the given source path correspond to a valid archive location.

INS-01010: Unable to save file to the specified location.

Cause: The specified location may not be writable.

Action: Specify a location that is writable.

INS-04001: Invalid command line arguments xml file (*string*). Either application could not detect command line arguments xml file or contains syntactically incorrect information.

Cause: n/a

Action: n/a

INS-04002: Application could not parse command line arguments xml file (*string*). Either XPathExpressionException or IOException occurred while parsing command line arguments xml file.

Cause: n/a

Action: n/a

INS-04003: Invalid argument passed from command line. Specified argument (*string*) is not a supported argument for this application.

Cause: n/a

Action: n/a

INS-04004: Value is not specified for comamnd line argument: *string*. Specify valid value for the mentioned argument. Refer application help for more details.

Cause: n/a

Action: n/a

INS-04005: Invalid argument passed from command line: *string*. Specified argument is not a supported for the current operating system.

Cause: n/a

Action: n/a

INS-04006: Invalid combination of arguments passed from command line. Arguments [*string,string*] cannot be passed together in the same application session.

Cause: n/a

Action: n/a

INS-04007: Invalid argument passed from command line: *string*

Cause: n/a

Action: n/a

INS-04008: Invalid combination of arguments passed from command line. One or more mandatory dependent arguments are not passed for the arugment: *string*

Cause: n/a

Action: n/a

INS-04009: The argument [*string*] passed is not supported for the current context *string*

Cause: n/a

Action: n/a

INS-06001: Failed to perform operation due to internal driver error.

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-06002: Authentication failed.

Cause: Failed to login into the selected nodes.

Action: Check shared unix password. Locked accounts or accounts with no password are not supported. Contact Administrator or refer logs for more details.

INS-06003: Failed to setup passwordless SSH connectivity with the following node(s): *string*

Cause: It is possible that the failed nodes are running different Operating System or not reachable. If they are reachable and running the same Operating System as the local machine, it is possible that the SSH daemon is not configured on the selected nodes.

Action: Ensure that the failed nodes are reachable, running the same Operating System and have support for SSH connectivity.

INS-06004: File operation on user's .ssh directory is not permitted.

Cause: Write permission not set for either user's home directory or .ssh directory under user's home directory.

Action: Ensure that .ssh directory is either allowed to be created under user's home directory or .ssh directory allows files to be written into it.

INS-06005: Unable to get SSH connectivity details.

Cause: An unexpected error occurred while getting SSH connectivity details across the selected nodes.

Action: Refer to the logs for more details or contact Oracle Support Services.

INS-06006: Passwordless SSH connectivity not set up between the following node(s): *string*.

Cause: Either passwordless SSH connectivity is not setup between specified node(s) or they are not reachable. Refer to the logs for more details.

Action: Refer to the logs for more details or contact Oracle Support Services.

INS-06007: SSH connectivity check operation disabled

Cause: Either the property named 'oracle.install.ssh.setupCheckEnabled' is set to true in Java system properties or the internal driver had disabled this operation.

Action: Try setting 'oracle.install.ssh.setupCheckEnabled=true' as Java system property or contact Oracle Support Services.

INS-06008: SSH connectivity setup operation disabled

Cause: Either the property named 'oracle.install.ssh.setupEnabled' is set to true in Java system properties or the internal driver had disabled this operation.

Action: Try setting 'oracle.install.ssh.setupEnabled=true' as Java system property or contact Oracle Support Services.

INS-06101: IP address of localhost could not be determined

Cause: The localhost is not mapped to a valid IP address in Hosts file (Eg. /etc/hosts in Unix).

Action: Assign a valid IP address for the localhost or set it to loopback IP address (127.0.0.1 in IPv4 or ::1 in IPv6).

INS-07001: Value for property '*string*' not found in the bean store.

Cause: No additional information available.

Action: It is not mandatory that all properties are to be in a given bean store. This error can be ignored if the given property is not expected to be in the bean store.

INS-07002: Unable to get the type definition for property named 'string' of bean type 'string'

Cause: No additional information available.

Action: Ensure that the properties in the bean type are correctly defined.

INS-07003: Unexpected error occurred while accessing the bean store

Cause: No additional information available.

Action: Refers logs or contact Oracle Support Services

INS-07004: Invalid bean store

Cause: Either the bean store is corrupt or it does not have access to the underlying data source.

Action: Refers logs or contact Oracle Support Services

INS-07005: The given beans cannot be written because there is no bean store assigned to the bean store writer.

Cause: No additional information available

Action: Refers logs or contact Oracle Support Services

INS-07006: Unable to save the bean store to the given target.

Cause: Either the target is not accessible or an unexpected error occurred while saving the bean store.

Action: Refers logs or contact Oracle Support Services

INS-07007: Failed to open or create a bean store reader.

Cause: Either the bean store is corrupt or it does not have access to the underlying data source.

Action: Refers logs or contact Oracle Support Services

INS-07008: The format of the bean store is not specified

Cause: No additional information available.

Action: Refers logs or contact Oracle Support Services

INS-07009: Unable to load bean store

Cause: Unexpected error while loading the bean store.

Action: Refers logs or contact Oracle Support Services

INS-07010: Invalid argument *string*

Cause: The argument for a given property did not comply with either the specification, schema, or rules.

Action: Ensure that given arguments are of the expected data type or schema

INS-08001: Flow configuration is syntactically incorrect

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08005: View class may not exist or a fully qualified View class name is not given.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08007: Fully qualified Action class name is not given.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08011: Route identifier '*string*' mentioned in the transition may not exist.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08012: Unknown View Identifier '*string*' associated to a state.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08013: Unknown Validator class '*string*' associated to a state.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08014: Fully qualified Condition class name is not given.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08015: No transition specified for condition defined at state '*string*'.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08101: Unexpected error while executing the action at state: '*string*'

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08102: Unexpected error occurred while transitioning from state '*string*'

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08103: Null route returned by state '*string*'.

Cause: The route was not chosen from the current state in order to proceed further.

Action: No additional information available.

INS-08104: Route '*string*' returned by state '*string*' is not found in the flow configuration.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08106: Unexpected error occurred while loading the view '*string*' associated to state '*string*'.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08107: Failed while processing user inputs at state '*string*'.

Cause: Unexpected error occurred while processing the inputs from view '*string*' associated to state '*string*'.

Action: No additional information available.

INS-08108: Failed while localizing the view

Cause: Unexpected error occurred while localizing the view '*string*' associated to state '*string*'.

Action: No additional information available.

INS-08109: Unexpected error occurred while validating inputs at state '*string*'.

Cause: No additional information available.

Action: Contact Oracle Support Services or refer to the software manual.

INS-08110: Invalid checkpoint file '*string*'.

Cause: Session restoration failed since the given checkpoint file may have been syntactically incorrect or did not exist.

Action: No additional information available.

INS-08801: View class referred by view ID '*string*' not found.

Cause: The given View class was not found in the classpath.

Action: No additional information available.

INS-08802: Unable to instantiate the View class referred by View ID '*string*'.

Cause: The given class do not represent a valid View class or an unexpected error occurred while instantiating it.

Action: No additional information available.

INS-10002: Inventory initialization failed

Cause: Inventory exist, but an unexpected error occurred while initializing it.

Action: Ensure that the inventory is not corrupt. Otherwise contact Oracle Support Services or refer logs.

INS-10006: Scratch path '*string*' is not valid.

Cause: The specified scratch path is either not accessible or do not exist.

Action: Contact Oracle Support Services or refer logs

INS-10008: Session initialization failed

Cause: An unexpected error occurred while initializing the session.

Action: Contact Oracle Support Services or refer logs

INS-10010: Scratch path not defined or set

Cause: Not additional information available

Action: Contact Oracle Support Services

INS-10012: Setup driver initialization failed.

Cause: An unexpected error occurred while initializing the underlying setup driver.

Action: Contact Oracle Support Services or refer logs

INS-10013: The installer has detected that current home is not registered in the central inventory on this system.

Cause: This can happen for the following reasons - either *string* has not been run or script failed to update the inventory.

Action: Run the script as a root user.

INS-10014: The installer has detected that current home is not registered in the central inventory on the node(s): *string*.

Cause: This can happen for the following reasons - either *string* has not been run or script failed to update the inventory.

Action: Run the script as a root user.

INS-10015: Argument (*string*) passed from the command line is invalid.

Cause: n/a

Action: n/a

INS-10016: Installer failed to update the cluster related details, for this Oracle home, in the inventory on all/some of the nodes

Cause: n/a

Action: n/a

INS-10101: The given response file *string* is not found.

Cause: The given response file is either not accessible or does not exist.

Action: Give a correct response file location. (Note: relative path is not supported)

INS-10102: Installer initialization failed.

Cause: An unexpected error occurred while initializing the Installer.

Action: Contact Oracle Support Services or refer logs

INS-10103: Response file is not specified for this session.

Cause: Response file was not specified for this session. A silent session requires input from a response file or from the command line.

Action: Specify the response file and rerun the installer.

INS-10104: The given response file is not accessible.

Cause: Current user may not have read permission.

Action: Ensure that the current user has permission to read the given response file.

INS-10105: The given response file *string* is not valid.

Cause: Syntactically incorrect response file. Either unexpected variables are specified or expected variables are not specified in the response file.

Action: Refer the latest product specific response file template

INS-10106: The format of the given response file is not supported.

Cause: The response file format was incorrect or not supported.

Action: Use response files of type *string*.

INS-10107: Argument "*string*" is not supported for this session.

Cause: Argument "*string*" is specified for this session. This option is supported only in case of silent installation.

Action: Ensure that you have specified correct arguments to the installer.

INS-10108: The given response file name is not valid.

Cause: It contains special characters.

Action: Specify the response file name which does not have special characters.

INS-13001: Environment does not meet minimum requirements.

Cause: Minimum requirements were not met for this environment

Action: Either check the logs for more information or check the supported configurations for this product.

INS-13010: Automatic prerequisite fix up is not supported

Cause: No additional information available

Action: Refer logs and fix up all prerequisites manually.

INS-13011: No automatic prerequisite fix up routine available.

Cause: Automatic fix up is not supported, hence no fix up routine generated.

Action: Refer logs and fix up all prerequisites manually.

INS-13012: Automatic prerequisite fix up is not performed or is incomplete.

Cause: User has either cancelled the operation or did not execute the automatic prerequisite fix up routines.

Action: Run the automatic fix up routines or refer logs and fix up all prerequisites manually.

INS-13013: Target environment does not meet some mandatory requirements.

Cause: Some of the mandatory prerequisites are not met. See logs for details. *string*

Action: Identify the list of failed prerequisite checks from the log: *string*. Then either from the log file or from installation manual find the appropriate configuration to meet the prerequisites and fix it manually.

INS-13014: Target environment does not meet some optional requirements.

Cause: Some of the optional prerequisites are not met. See logs for details. *string*

Action: Identify the list of failed prerequisite checks from the log: *string*. Then either from the log file or from installation manual find the appropriate configuration to meet the prerequisites and fix it manually.

INS-13015: The path *string* provided for cvu_prereq.xml is invalid.

Cause: The path *string* provided for cvu_prereq.xml is invalid.

Action: Provide a valid path of cvu_prereq.xml. It must be specified as an absolute pathname.

INS-13016: You have chosen to ignore some of the prerequisites for this installation. This may impact product configuration.

Cause: You have chosen to ignore failed prerequisites and proceed with the installation.

Action: Ensure that the failed prerequisites are fixed before proceeding.

INS-13017: Installer is unable to run the fixup script.

Cause: This might be because of the incorrect credentials provided for configuration script execution.

Action: Ensure that the correct credentials provided for configuration script execution. Also refer log files for more details.

INS-13018: Installer is unable to run the fixup script.

Cause: An exception occurred while running the fixup script or during fixup script result collection.

Action: Refer log files for more details.

INS-20701: Unexpected internal driver error

Cause: A call to internal Oracle cluster API failed.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-20702: Unexpected internal driver error

Cause: A call to cluster verification utility failed.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-20801: Configuration Assistant '*string*' failed.

Cause: Refer to the logs for additional information.

Action: Refer to the logs or contact Oracle Support Services.

INS-20802: *string* failed.

Cause: The plug-in failed in its perform method

Action: Refer to the logs or contact Oracle Support Services.

INS-20803: The optional tool named '*string*' failed.

Cause: Refer to the logs for additional information.

Action: Refer to the logs or contact Oracle Support Services. As '*string*' is an optional tool, it is safe to ignore this failure and proceed with the installation.

INS-20804: *string* aborted.

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services.

INS-20805: *string* is not activated

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services.

INS-20806: *string* not executed.

Cause: The plug-in was not executed or unavailable

Action: Refer to the logs or contact Oracle Support Services.

INS-20807: *string* is not valid.

Cause: The action of the specified type could not be found in the referred aggregate

Action: Refer to the logs or contact Oracle Support Services.

INS-20808: Action already referenced.

Cause: The action was already referred to by a previous micro step

Action: Refer to the logs or contact Oracle Support Services.

INS-20809: Execution of '*string*' not enabled

Cause: The invocation of plug-in *string* is not active

Action: Refer to the logs or contact Oracle Support Services.

INS-20810: Target or command for '*string*' not valid.

Cause: The specified external command or internal plug-in could not be executed

Action: Refer to the logs or contact Oracle Support Services.

INS-20811: *string* parameters are not initialized

Cause: An argument of plug-in '*string*' referenced an uninitialized Parameter

Action: Refer to the logs or contact Oracle Support Services.

INS-20812: Unexpected error while executing '*string*'

Cause: An unspecified error occurred while attempting to perform the micro step.

Action: Refer to the logs or contact Oracle Support Services.

INS-20813: *string* not found

Cause: The referred aggregate could not be found

Action: Refer to the logs or contact Oracle Support Services.

INS-20814: The aggregate of '*string*' is not activated

Cause: The reference to the referred aggregate is set inactive

Action: Refer to the logs or contact Oracle Support Services.

INS-21001: ORACLE_HOME was not specified for clone.

Cause: n/a

Action: n/a

INS-21002: ORACLE_BASE was not specified for clone.

Cause: n/a

Action: n/a

INS-21003: Installer has detected that an invalid inventory pointer location file was specified.

Cause: Installer has failed to detect the inventory group owner from the inventory pointer location file.

Action: Ensure the Inventory location file oraInst.loc is corrected or specify a valid Inventory Pointer Location file

INS-30001 to INS-35000

INS-30001: The *string* password is empty.

Cause: The *string* password should not be empty.

Action: Provide a non-empty password.

INS-30002: The *string* password and *string* confirm password are not same.

Cause: The *string* password and *string* confirm password should be the same.

Action: Ensure that *string* password and *string* confirm password are the same.

INS-30003: The *string* password length is too long.

Cause: The *string* password length cannot exceed *string* characters.

Action: Provide a password lesser than *string* characters.

INS-30004: The *string* password entered is invalid.

Cause: Passwords may contain only alphanumeric characters from the chosen database character set, underscore (_), dollar sign (\$), or pound sign (#).

Action: Provide a password as per recommendations.

INS-30005: The *string* password entered is missing recommended characters.

Cause: The *string* password entered is missing recommended characters. Oracle recommends that passwords contain at least one *string*.

Action: Provide a password which contains at least one *string*.

INS-30006: The password specified is too short.

Cause: Oracle recommends that the *string* password entered should be at least *string* characters in length.

Action: Provide a password which is at least *string* characters in length.

INS-30007: Unable to get the raw device partition size.

Cause: Unexpected error occurred while trying to get the raw device partition size.

Action: Refer to the logs for more details.

INS-30008: Refer to the logs for more details.

Cause: Unexpected error occurred while trying to get the FS device partition size.

Action: Refer to the logs for more details.

INS-30009: Unable to get the FS partition free space size

Cause: Unable to get the FS partition free space size

Action: Unable to get the FS partition free space size

INS-30010: Unable to get the file system type.

Cause: Unexpected error occurred while trying to get the file system type.

Action: Refer to the logs for more details.

INS-30011: The *string* password entered does not conform to the Oracle recommended standards.

Cause: Oracle recommends that the password entered should be at least *string* characters in length, contain at least 1 uppercase character, 1 lower case character and 1 digit [0-9].

Action: Provide a password that conforms to the Oracle recommended standards.

INS-30013: Unable to check whether the partition is raw.

Cause: Unexpected error occurred while trying to check whether the partition is raw.

Action: Refer to the logs for more details.

INS-30014: Unable to check whether the location specified is on CFS

Cause: The location specified might not have the required permissions.

Action: Provide a location which has the appropriate required permissions.

INS-30015: An error occurred during setting permission.

Cause: Unexpected error occurred during setting permission.

Action: Refer to the logs for more details.

INS-30016: Unable to load the install inventory.

Cause: Unable to lock or read the install inventory.

Action: Check the permissions on the inventory location.

INS-30017: Install inventory does not exist.

Cause: Install inventory does not exist.

Action: Ensure that the install inventory exists.

INS-30018: Unable to get all the previously installed Oracle Home locations.

Cause: Error occurred while retrieving the oracle home locations.

Action: Check if the existing inventory location is accessible.

INS-30020: Unable to get the default oradata location.

Cause: Unexpected error occurred while trying to get the default oradata location.

Action: Refer to the logs for more details.

INS-30021: Unable to get Oracle RAC databases info.

Cause: Unexpected error occurred while trying to get RAC databases info.

Action: Refer to the logs for more details.

INS-30022: Unable to get SIDs and DB Homes on remote nodes.

Cause: Unexpected error occurred while trying to get SIDs and DB Homes on remote nodes.

Action: Refer to the logs for more details.

INS-30023: Unable to get SIDs and DB Homes on node *string*.

Cause: Unexpected error occurred while trying to get SIDs and DB Homes on node *string*.

Action: Refer to the logs for more details.

INS-30042: IO Exception occurred.

Cause: IO Exception occurred.

Action: Refer to the logs for more details.

INS-30043: The Grid Infrastructure home *string* does not exist or is empty.

Cause: Installer has detected Grid Infrastructure home (*string*) registered in the Inventory. But the home location does not exist or is empty.

Action: Check if the location specified is a valid Grid Infrastructure home. If not unregister the home from inventory using deinstall procedures.

INS-30044: Create Install Session Exception.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30045: Unable to find the specified Oracle Home.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30046: Unable to find product in Oracle Inventory.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30047: Multiple versions of the product were found.

Cause: Refer to the logs for more details.

Action: Refer to the logs for more details.

INS-30048: Incorrect format used in the given cluster configuration file.

Cause: The content of cluster configuration file do not conform to the format recommended.

Action: Ensure that the contents of the cluster configuration file conform to the expected format.

INS-30049: The given cluster configuration file could not be read.

Cause: Unexpected error while reading the given cluster configuration file.

Action: Ensure that the given cluster configuration file exists and has the read permissions.

INS-30051: Failed while checking for *string* directory existence on remote node (*string*).

Cause: User equivalence may not be setup between the local node and the remote nodes or sufficient file permissions are not set.

Action: Setup user equivalence or ensure sufficient file permissions are set.

INS-30052: Check for free disk space across nodes failed.

Cause: Unexpected error occurred while trying to check free disk space across nodes.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30053: Check for shared partitions across nodes failed.

Cause: Unexpected error occurred while trying to get shared partitions across nodes.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30054: Check for file system type across nodes failed.

Cause: Unexpected error while detecting file system type across nodes.

Action: Refer to the logs or contact Oracle Support Services.

INS-30055: Incorrect node role provided.

Cause: Node role *string* provided on line number *string* of the Cluster Configuration File is not valid.

Action: Specify a valid node role.

INS-30056: Host name contains invalid characters.

Cause: The host name *string* provided on line number *string* of the Cluster Configuration File contains one or more invalid characters.

Action: Ensure that the host name contains only valid characters. Valid characters for host names can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen (-) and dot (.).

INS-30057: Host name cannot be empty.

Cause: The node provided on line number *string* of the Cluster Configuration File does not contain private host name.

Action: Ensure the Cluster Configuration File provided is valid.

INS-30060: Check for group existence failed.

Cause: Unexpected error occurred while trying to check for group existence.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30070: There are processes running in the currently selected Oracle Home.

Cause: Software is already running from the home selected for the install.

Action: Shutdown the following processes before continuing: *string*

INS-30071: An error occurred while trying to determine the running processes or services.

Cause: A runtime error

Action: Refer to the logs or contact Oracle Support Services.

INS-30072: There are services running from the currently selected Oracle Home.

Cause: Files that need to be reinstalled or upgraded in this home are currently in use by running services.

Action: Please stop the following services before continuing: *string*

INS-30073: There is software running from the currently selected Oracle Home.

Cause: Files that need to be reinstalled or upgraded in this home are currently in use by one or more applications.

Action: Please close any running applications before continuing.

INS-30080: *string* did not resolve to an IP address. Provide alternative name that resolves to an IP address.

Cause: n/a

Action: n/a

INS-30081: *string* could not be resolved using TCP/IP host name lookup. Provide valid name that can be resolvable using TCP/IP host name lookup.

Cause: n/a

Action: n/a

INS-30090: Check for connectivity across all nodes through the interface *string* has failed.

Cause: Unexpected error while checking connectivity of nodes through the interface.

Action: Refer to the logs or contact Oracle Support Services.

INS-30100: Insufficient disk space on the selected location (*string*).

Cause: Specified location is on a volume without enough disk space on nodes: *string*.

Action: Choose a location that has enough space (minimum of *string*MB) or free up space on the existing volume.

INS-30110: Installer has failed to perform status check on Oracle Clusterware configured.

Cause: Unexpected error occurred while trying to perform status check on existing Oracle Clusterware.

Action: Refer to the logs or contact Oracle Support Services. Note for advanced users: Launch the installer by passing the following flag '-ignoreInternalDriverError'.

INS-30120: Specified file (*string*) doesn't exist.

Cause: n/a

Action: n/a

INS-30131: Initial setup required for the execution of installer validations failed.

Cause: Failed to access the temporary location.

Action: Ensure that the current user has required permissions to access the temporary location.

INS-30132: Initial setup required for the execution of installer validations failed on nodes: *string*

Cause: Indicated nodes were not reachable, or the user equivalence is not available for those nodes, or the user failed to access the temporary location on the indicated nodes.

Action: Ensure that all the indicated nodes are reachable, user equivalence exists for those nodes and current user has required permissions to access the temporary location on all the indicated nodes.

INS-30140: Client data file not specified.

Cause: n/a

Action: n/a

INS-30141: Client data file is not a valid file.

Cause: n/a

Action: n/a

INS-30142: Specified client data file is not a valid file.

Cause: n/a

Action: n/a

INS-30150: Installer has detected that the specified GNS client data file is invalid.

Cause: n/a

Action: n/a

INS-30151: An unexpected exception occurred while extracting Sub-domain info from GNS client data file

Cause: n/a

Action: n/a

INS-30155: Host name contains invalid characters.

Cause: n/a

Action: n/a

INS-30156: Host name cannot be in IP Address format.

Cause: n/a

Action: n/a

INS-30157: The following nodes cannot be clustered due to user equivalence issue: *string*.

Cause: The user performing this installation is not configured identically on all nodes. This may be due to differences in the user or group IDs, or to SSH configuration issues.

Action: If necessary, refer to the installation guide for information about how to set up user equivalence manually on cluster nodes.

INS-30158: One or more host names you provided are invalid, as they do not resolve to a valid IP address.

Cause: n/a

Action: n/a

INS-30159: Node information was entered for two or more nodes that belonged to different domains.

Cause: n/a

Action: n/a

INS-30160: An unexpected exception occurred while extracting details from ASM client data file

Cause: n/a

Action: n/a

INS-30160: Installer has detected that the nodes *string* specified for addnode operation have uncleaned inventory.

Cause: n/a

Action: n/a

INS-30161: An unexpected exception occurred while extracting ASM Cluster name from ASM client data file

Cause: n/a

Action: n/a

INS-30162: An unexpected exception occurred while extracting ASM client cluster name from ASM client data file

Cause: n/a

Action: n/a

INS-30501: Automatic Storage Management software is not configured on this system.

Cause: Prior to configuring a database to use Automatic Storage Management (ASM), you must install and configure Grid Infrastructure, which includes ASM software.

Action: Grid Infrastructure can be installed from the separate installation media included in your media pack. Alternatively, it can be downloaded separately from Electronic Product Delivery (EPD) or the Oracle Technology Network (OTN). This is typically installed as a separate operating system user than the Oracle database and may have been installed by your system administrator. See the installation guide for more details.

INS-30502: No ASM disk group found.

Cause: There were no disk groups managed by the ASM instance *string*.

Action: Use Automatic Storage Management Configuration Assistant to add disk groups.

INS-30503: Unknown ASM disk group.

Cause: There was no disk groups named *string* managed by ASM instance *string*

Action: Enter a valid existing ASM disk group or use Automatic Storage Management Configuration Assistant to add the desired ASM disk group.

INS-30504: Missing ASM disk group name.

Cause: ASM disk group name was not specified.

Action: Enter a valid ASM disk group name.

INS-30505: Invalid disk group name.

Cause: The disk group name specified was invalid. It must start with an alphabetic character, and consist of up to 30 characters which are alphabetic, numeric, or the characters \$, # and _.

Action: Enter a valid disk group name containing only alphanumeric characters and possibly a few special characters allowed by your platform.

INS-30506: Invalid redundancy level.

Cause: Redundancy level was invalid.

Action: Choose a valid redundancy level: High, Normal or External.

INS-30507: Empty ASM disk group.

Cause: No disks were selected from a managed ASM disk group.

Action: Select appropriate number of disks from a managed ASM disk group.

INS-30508: Invalid ASM disks.

Cause: The disks *string* were not valid.

Action: Please choose or enter valid ASM disks.

INS-30509: Insufficient space available in the selected disk group.

Cause: Insufficient space available in the selected disk group. At least, *string* MB of space is required.

Action: Use Automatic Storage Management Configuration Assistant to add more disks to the selected disk group or create a new disk group with as least *string* MB of space.

INS-30510: Insufficient number of ASM disks selected.

Cause: The number of disks selected were insufficient for the selected redundancy level.

Action: For a disk group with redundancy level '*string*', at least '*string*' disks are recommended.

INS-30511: An older ASM instance was found.

Cause: Automatic Storage Management (ASM) *string* instance is found.

Action: Upgrade the existing ASM instance to version *string*.

INS-30512: Automatic Storage Management software is not configured on this cluster.

Cause: Prior to configuring a cluster database to use Automatic Storage Management (ASM), you must configure ASM software in the Grid Infrastructure home.

Action: Grid Infrastructure installation on this cluster was only configured to run Oracle Clusterware. You will need to go back to the Grid Infrastructure home and configure ASM for storing database. Grid Infrastructure is typically installed as a separate operating system user than the Oracle database and may have been installed by your system administrator. See the installation guide for more details.

INS-30513: ASM instance is not running on one or more nodes in the cluster.

Cause: The following nodes did not have an ASM instance running on them. Node list: *string*

Action: Before creating a database that uses ASM on all of the nodes chosen for this installation, you should extend the ASM cluster of instances using the Add Instance procedure to the desired set of nodes. Node list: *string*

INS-30514: The ASM diskgroup name has exceeded *string* characters.

Cause: n/a

Action: n/a

INS-30515: Insufficient space available in the selected disks.

Cause: Insufficient space available in the selected Disks. At least, *string* MB of free space is required.

Action: Choose additional disks such that the total size should be at least *string* MB.

INS-30516: Please specify unique disk groups.

Cause: Installer has detected that the diskgroup name provided already exists on the system.

Action: Specify different disk group.

INS-30517: Automatic Storage Management software is not configured on this system.

Cause: n/a

Action: n/a

INS-30518: Invalid Disk Discovery Path specified.

Cause: The Disk Discovery Path specified is invalid. Disk Discovery Path must not contain \$, \ or ? characters.

Action: Ensure Disk Discovery Path provided does not contain \$, \ or ? characters.

INS-30519: Allocation unit size can only be one of the following value set *string*.

Cause: The allocation unit size (AU Size) is set to an invalid number.

Action: Set the allocation unit size be one of the following value set *string*.

INS-30520: Incorrect Disk Group name specified.

Cause: The Disk Group name specified is incorrect. Disk Group name cannot be a SQL reserved word.

Action: Enter a Disk Group name that is not a SQL reserved word.

INS-30521: The size of disks selected is not the same so as to allow for equal number of *string*MB AU size blocks.

Cause: n/a

Action: n/a

INS-30521: Selected Disk group can not be used as storage location.

Cause: Installer has detected that the value of ASM compatibility attribute of the diskgroup *string* is *string*. The value of the attribute should be atleast *string* to use it as storage location for the database.

Action: Update the value of ASM compatibility attribute of the diskgroup to *string*. Refer to the Storage Administration documentation for further information.

INS-30522: Insufficient space available in the server clusters disk group.

Cause: The selected diskgroup does not have sufficient space. A minimum of *string* MB space is required.

Action: Add new disks to the disk group to meet the space requirement. Alternatively, select a new diskgroup with required space of *string* MB.

INS-30601: File access permissions error encountered.

Cause: n/a

Action: n/a

INS-30602: ASM access denied.

Cause: A connection to the Automatic Storage Management (ASM) instance on this system could not be established.

Action: To ensure a proper connection, the operating system user performing this installation must be a member of the OSDBA group of the ASM instance. See the installation guide for more information on the proper system setup required for running ASM and database instances as separate operating system users. Refer to Oracle error description for ORA-01031 for additional details.

INS-30603: Cluster Ready Services (CRS) is not running on local node.

Cause: n/a

Action: n/a

INS-30604: Required drivers are not found to perform the operation.

Cause: n/a

Action: n/a

INS-30605: The ASM instance is detected to be not running.

Cause: n/a

Action: n/a

INS-30606: Partial installation of ASM home is detected.

Cause: n/a

Action: n/a

INS-30607: No ASM found on the box.

Cause: n/a

Action: n/a

INS-30701: The partition is invalid.

Cause: The partition provided was not available on the system.

Action: Provide a partition that is available on the system.

INS-32001: No value has been given for the Password field.

Cause: A value was not specified for the Password field.

Action: Specify a value for the password field.

INS-32002: Invalid password.

Cause: The password entered in the Confirm password field did not match the password entered in the Password field.

Action: Enter the same password in both Password and Confirm password fields for confirmation purposes.

INS-32008: Oracle base location cant be same as the user home directory.

Cause: The specified Oracle base is same as the user home directory.

Action: Provide an Oracle base location other than the user home directory.

INS-32010: *string* contains invalid characters.

Cause: The specified *string* contained one or more invalid characters.

Action: Choose a *string* containing only alphanumeric characters and a few additional characters that are allowed for your platform.

INS-32011: The *string* that you have specified contains the space character.

Cause: The string you entered contains the space character.

Action: Please choose a string containing only alphanumeric, and a few additional characters that are allowed for your platform.

INS-32012: Unable to create directory: *string*.

Cause: Either proper permissions were not granted to create the directory or there was no space left in the volume.

Action: Check your permission on the selected directory or choose another directory.

INS-32013: The *string* is empty.

Cause: n/a

Action: n/a

INS-32015: The location specified for *string* is invalid.

Cause: The specified location cannot be used for *string*. Either the specified location is not found on the system or is detected to be a file.

Action: Specify a valid location for *string*.

INS-32016: The selected Oracle home contains directories or files.

Cause: n/a

Action: n/a

INS-32017: Invalid path specified for *string*

Cause: Path specified for *string* contains one or more folders which exceeds maximum folder name length.

Action: Specify the location which contains folders name length not more than *string* characters.

INS-32018: The selected Oracle home is outside of Oracle base.

Cause: n/a

Action: n/a

INS-32021: Insufficient disk space on this volume for the selected Oracle home.

Cause: The selected Oracle home was on a volume without enough disk space.

Action: Choose a location for Oracle home that has enough space (minimum of *string*MB) or free up space on the existing volume.

INS-32022: Grid infrastructure software for a cluster installation must not be under an Oracle base directory.

Cause: Grid infrastructure for a cluster installation assigns root ownership to all parent directories of the Grid home location. As a result, ownership of all named directories in the software location path is changed to root, creating permissions errors for all subsequent installations into the same Oracle base.

Action: Specify software location outside of an Oracle base directory for grid infrastructure for a cluster installation.

INS-32024: The specified location for Oracle base is invalid.

Cause: The specified Oracle base location is identical to an existing Oracle home location.

Action: Specify a location for Oracle base which is not an existing Oracle home.

INS-32025: The chosen installation conflicts with software already installed in the given Oracle home.

Cause: n/a

Action: n/a

INS-32026: The Software location specified should not be under Oracle base location.

Cause: Grid Infrastructure for a Cluster installation will assign root ownership to all parent directories of Oracle Clusterware software location. As a result, all named directories in the software location path will acquire root ownership. This may create problems for subsequent installations into the same Oracle base.

Action: Specify software location outside of Oracle base.

INS-32027: The ORACLE_HOME environment variable is currently set and this value is not same as the specified path for software location. This may impact the proper configuration of software.

Cause: n/a

Action: n/a

INS-32030: Invalid location for Central Inventory.

Cause: The Central Inventory location provided was empty.

Action: Provide a valid location for the inventory.

INS-32031: Invalid inventory location.

Cause: n/a

Action: n/a

INS-32033: Central Inventory location is not writable.

Cause: n/a

Action: n/a

INS-32034: Invalid characters specified for the inventory directory.

Cause: The inventory directory contained one or more invalid characters.

Action: The inventory directory can contain only alphanumeric, hyphen, and underscore characters.

INS-32035: Unable to create a new central inventory directory : *string*.

Cause: The central inventory location provided is not empty.

Action: Please provide another location for the inventory, or clean up the current location.

INS-32036: User home directory is not recommended as inventory location

Cause: User home directory has been chosen as inventory directory. Oracle recommends that the inventory directory is not users home directory, because members of inventory group will be given write permission to the inventory directory.

Action: Choose a directory other than users home as inventory location.

INS-32037: The operating system group specified for central inventory (oraInventory) ownership is invalid.

Cause: No value specified for central inventory (oraInventory) ownership group.

Action: Specify an operating system group whose members should have write permission to the central inventory directory (oraInventory).

INS-32038: The operating system group specified for central inventory (oraInventory) ownership is invalid.

Cause: User performing installation is not a member of the operating system group specified for central inventory(oraInventory) ownership.

Action: Specify an operating system group that the installing user is a member of. All the members of this operating system group will have write permission to the central inventory directory (oraInventory).

INS-32039: Inappropriate file permissions for inventory location.

Cause: The current user and current group do not match with the user and group of inventory location.

Action: Ensure that the file user and group are same as the installer user and install group respectively.

INS-32040: The central inventory location provided is not empty on remote nodes *string*.

Cause: n/a

Action: n/a

INS-32041: Unable to create a new central inventory directory : *string*

Cause: The central inventory location provided is not empty or corrupted

Action: Please clean up the inventory location : *string*

INS-32052: Oracle base and Oracle home locations are same.

Cause: n/a

Action: n/a

INS-32053: The specified Oracle home name already exists.

Cause: The Oracle home name specified on the command line corresponded to an existing Oracle home name in the Central Inventory.

Action: Choose another Oracle home name. Abort this installation session and try again.

INS-32054: The Central Inventory *string* is located on a shared file system.

Cause: n/a

Action: n/a

INS-32055: The Central Inventory is located in the Oracle base.

Cause: n/a

Action: n/a

INS-32060: Insufficient permissions granted to create directory *string* on node *string*.

Cause: Insufficient write permissions were granted to create this directory on the specified node.

Action: Ensure that you have the required write permissions. Alternatively, you may want to choose another location.

INS-32061: The selected ASM disk group is invalid.

Cause: An invalid or non-existent ASM disk group has been selected.

Action: Ensure that the selected ASM disk group exists.

INS-32062: Unable to create *string* at the specified location.

Cause: The *string* location provided is not absolute path.

Action: Please provide absolute location for the *string*.

INS-32066: Microsoft Transaction Services (MTS) port is blank or containing non-numeric character.

Cause: The MTS port text field is either empty or containing non-numeric characters

Action: Provide a valid value for MTS port.

INS-32067: The value you have entered for Microsoft Transaction Services (MTS) Port, *string*, is already in use.

Cause: Refer to the error message for details.

Action: Specify a valid port number.

INS-32068: The value specified for Microsoft Transaction Services (MTS) Port number, *string*, is out of valid range.

Cause: The value you have entered for the MTS Port is out of the valid range.

Action: Enter a MTS Port number between 1024 and 65535.

INS-32075: At least one product language need to selected

Cause: No product language selected for installation.

Action: Select at least one product language for installation.

INS-32076: English cannot be removed from the selected languages list.

Cause: An attempt was made to remove English from the selected languages list.

Action: Select English as one of the selected product languages.

INS-32077: The following selected languages are not supported; *string*

Cause: Not all selected product languages are supported.

Action: Refer to the sample response file for more information.

INS-32090: Software installation was unsuccessful.

Cause: Refer the log files for details.

Action: Refer to the logs or contact Oracle Support Services.

INS-32091: Software installation was successful. But some configuration assistants failed, were cancelled or skipped.

Cause: n/a

Action: n/a

INS-32092: User Name is empty.

Cause: A value was not specified for the username field.

Action: Specify a value for the username field.

INS-32094: Specified Oracle Home user has invalid characters.

Cause: You have entered invalid characters in username.

Action: Make sure you specify a username with valid characters.

INS-32095: Specified user has administrative privileges.

Cause: You have selected a user which has administrative privileges to be the Oracle Home user.

Action: Make sure you specify a non-administrative user or revoke the administrative privileges for this user.

INS-32096: n/a

Cause: n/a

Action: n/a

INS-32097: Invalid username or password.

Cause: You have selected an existing user to be the Oracle Home user, however username or password entered are not valid.

Action: Specify a valid username and password combination.

INS-32098: The password field is empty.

Cause: The password should not be empty.

Action: Provide a non-empty password.

INS-32099: The username field is empty.

Cause: The username should not be empty.

Action: Provide a non-empty username.

INS-32100: Specified Oracle Home user is not domain User.

Cause: You have selected a local user to be the Oracle Home user.

Action: Make sure you specify a domain user for Oracle Home user.

INS-32101: Specified Oracle Home user does not exist.

Cause: You have selected an Oracle Home user that does not exist.

Action: Make sure you specify an existing user for Oracle Home user.

INS-32101: My Oracle Support username is empty.

Cause: My Oracle Support username cannot be empty.

Action: Provide a valid My Oracle Support username.

INS-32102: Specified Oracle Home user already exist.

Cause: You have selected an Oracle Home user that already exist.

Action: Make sure you specify a non existing user for Oracle Home user.

INS-32102: My Oracle Support password is empty.

Cause: My Oracle Support password cannot be empty.

Action: Provide a valid My Oracle Support password.

INS-32103: Specified Oracle Home user does not match with existing Home user.

Cause: You have selected an Oracle Home user which is not matching with existing Home user you are trying to upgrade.

Action: Make sure you specify Oracle Home user of Oracle Home that you are trying to upgrade.

INS-32103: Connection to My Oracle Support could not be established.

Cause: Credentials provided may be invalid, or there may be a network connection issue.

Action: Check the My Oracle Support credentials. Also check the proxy setting and the network connection.

INS-32104: Specified Oracle Home user is not the owner of the specified Oracle Base.

Cause: n/a

Action: n/a

INS-32104: The installer is unable to locate the software updates in the specified directory.

Cause: n/a

Action: n/a

INS-32105: Invalid password.

Cause: You have selected a new user to be the Oracle Home user, however password entered cannot be used because of your Windows system policies.

Action: Specify a password which complies with your Windows system policies.

INS-32105: n/a

Cause: n/a

Action: n/a

INS-32106: n/a

Cause: n/a

Action: n/a

INS-32107: n/a

Cause: n/a

Action: n/a

INS-32108: n/a

Cause: n/a

Action: n/a

INS-32109: Failed to retrieve the updates from My Oracle Support.

Cause: The My Oracle Support credentials you provided may not have download privileges, or there may be a network or proxy authentication issue.

Action: Provide credentials with download privileges. Also check the network connection and, if you have a proxy realm, your proxy credentials.

INS-32110: Failed to retrieve the updates from My Oracle Support.

Cause: This may be due to a network connection problem or a missing patch on My Oracle Support.

Action: Check the connection to My Oracle Support or contact Oracle Support Services.

INS-32111: The patch download location provided is empty.

Cause: The patch download location cannot be empty.

Action: Provide the location where the updates have been downloaded.

INS-32112: Unable to retrieve the details from the downloaded metadata.

Cause: The downloaded metadata for software updates is not properly formatted.

Action: Refer to the logs or contact Oracle Support Services.

INS-32113: Unable to read the updates location.

Cause: n/a

Action: n/a

INS-32114: Check the My Oracle Support user name.

Cause: The user name provided is invalid. It either contains invalid characters or does not follow the standard e-mail address format.

Action: Specify an e-mail address that is consistent with RFC 2822 and RFC 2821 format.

INS-32115: Insufficient space in the download location provided.

Cause: The location provided does not have space for downloading all the updates.

Action: Choose a location with enough space or free up space on the existing volume.

INS-32116: The location specified may contain already downloaded software updates. Downloading at this location will overwrite the existing software updates.

Cause: n/a

Action: n/a

INS-32117: My Oracle Support credentials provided does not have download privileges.

Cause: n/a

Action: n/a

INS-32118: Proxy information required for the connection to My Oracle Support is not provided.

Cause: n/a

Action: n/a

INS-32121: Execution of '*string*' script failed.

Cause: Execution of the script failed. This might be due to invalid parameters specified for executing the script.

Action: Review the log file for further details.

INS-32122: Execution of '*string*' script failed.

Cause: Installer is unable to connect to a node for executing the script using specified configuration method.

Action: Review the log file '*string*' for further details.

INS-32123: Execution of '*string*' script failed on nodes: *string*

Cause: Installer has failed to execute the specified script on one or more nodes. This might be because of exception occurred while executing the script on nodes.

Action: Review the log files '*string*' and '*string*' for further details.

INS-32124: Execution of '*string*' script failed.

Cause: Installer has failed to execute the specified script on the local node (first node). This might be because of exception occurred while executing the script on the local node.

Action: Review the log file '*string*' for further details.

INS-32125: Execution of '*string*' script failed.

Cause: Installer has failed to execute the specified script on the last node. This might be because of exception occurred while executing the script on the last node.

Action: Review the log file '*string*' for further details.

INS-32126: Execution of '*string*' script failed.

Cause: Configuration object which is used for executing the script is not initialized.

Action: Review the log file for further details.

INS-32127: '*string*' password is not specified. Specify a valid password.

Cause: n/a

Action: n/a

INS-32128: Installer has failed to login as root user with the specified password. Specify a valid root user password.

Cause: n/a

Action: n/a

INS-32129: Sudo program path is not specified for script execution. Specify a valid Sudo program path.

Cause: n/a

Action: n/a

INS-32130: Specified details for Sudo option are not valid.

Cause: Either Sudo program path or specified user credentials are invalid.

Action: Specify the valid details for Sudo option.

INS-32131: Specified user ('*string*') doesn't have permission to execute configuration script using Sudo option.

Cause: n/a

Action: n/a

INS-32132: Power Broker program path is not specified for script execution. Specify the valid Power Broker program path.

Cause: n/a

Action: n/a

INS-32133: Specified details for Power Broker option are invalid.

Cause: Either Power Broker program path or specified user credentials are invalid.

Action: Specify the valid details for Power Broker option.

INS-32134: Specified user ('string') doesn't have permission to execute configuration script using Power Broker option.

Cause: n/a

Action: n/a

INS-32135: Specified Sudo program path is not valid.

Cause: Sudo program path ('string') is not a complete path. (Note: relative path is not supported)

Action: Specify the valid Sudo program path.

INS-32136: Specified Sudo program name in the path is not valid.

Cause: Either Sudo program path ('string') is not a complete path or Sudo program name is invalid. (Note: Sudo program name should be 'string')

Action: Specify the valid Sudo program path.

INS-32137: Specified Power Broker program path is not valid.

Cause: Power Broker program path ('string') is not a complete path. (Note: relative path is not supported)

Action: Specify the valid Power Broker program path.

INS-32138: root user password is not specified. Specify a valid password.

Cause: n/a

Action: n/a

INS-32139: User name is not specified for Sudo option. Specify the existing user who has privilege to run the configuration scripts using Sudo program.

Cause: n/a

Action: n/a

INS-32140: Specified Sudo user name ('string') doesn't exist on one or more nodes. Specify the existing user who has privilege to run the configuration scripts using Sudo program.

Cause: n/a

Action: n/a

INS-32141: User name is not specified for Sudo option. Specify the existing user who has privilege to run the configuration scripts using Power Broker program.

Cause: n/a

Action: n/a

INS-32142: Specified Power Broker user name ('string') doesn't exist on one or more nodes. Specify the existing user who has privilege to run the configuration scripts using Power Broker program.

Cause: User doesn't have Power Broker permission to execute configuration scripts.

Action: Either select different configuration option or provide Power Broker permission for the user.

INS-32143: Execution of '*string*' script failed on nodes: *string*

Cause: Installer has failed to execute the specified script on one or more nodes. This might be because of either some of the nodes (*string*) require a reboot to complete the configuration, or an exception occurred while executing the script on nodes.

Action: Reboot the specified nodes and then rerun the script. Refer to the documentation for information about completing the configuration after node(s) reboot. Or review the log files '*string*' and '*string*' for further details on failure.

INS-32144: Execution of '*string*' script failed on one or more nodes (*string*). These nodes require a reboot to complete the configuration.

Cause: n/a

Action: n/a

INS-32145: '*string*' password is not specified. Passwordless sudo configuration is supported only for current install user (*string*).

Cause: n/a

Action: n/a

INS-32146: Execution of '*string*' script failed on nodes: *string*.

Cause: n/a

Action: n/a

INS-32147: Execution of '*string*' script failed on nodes: *string*. Following nodes require a reboot before proceeding: *string*.

Cause: n/a

Action: n/a

INS-32148: Execution of '*string*' script failed on nodes: *string*

Cause: n/a

Action: n/a

INS-32149: Following nodes require a reboot before proceeding: *string*.

Cause: n/a

Action: n/a

INS-32151: CLUSTER_NEW_NODES parameter was not specified for performing addnode operation.

Cause: n/a

Action: n/a

INS-32152: Clusterware is not running on the local node.

Cause: Local node does not have Clusterware running for performing addnode.

Action: Ensure that the Clusterware is configured and is running on local node before performing the addnode.

INS-32153: Public Hostname of node was not specified for performing addnode operation.

Cause: n/a

Action: n/a

INS-32154: Installing user cannot perform the addnode operation.

Cause: The addnode wizard detects that the existing oracle home was not installed or cloned using the current user id: *string*.

Action: Either restart the addnode wizard as the user account that was used previously to configure the Oracle home, or re-clone the Oracle home using the current user account.

INS-32166: The current Oracle home is not registered in the central inventory on the following nodes: *string*

Cause: The wizard does not find this Oracle home to be registered with the central inventory on some or all of the nodes specified.

Action: Register the Oracle home on the specified nodes with the central inventory, either by using a cloning operation, or by using an attach-home operation. Restart the wizard after fixing this issue.

INS-32167: The Oracle home is inconsistent on the following nodes: *string*

Cause: The wizard detects that the Oracle home is inconsistent on some or all of the nodes specified. Review the log file for further details.

Action: Ensure that the Oracle home is consistent on all nodes.

INS-32181: The local node was not specified in CLUSTER_NODES parameter for clone.

Cause: n/a

Action: n/a

INS-32182: The nodes *string* specified in CLUSTER_NODES parameter for cloning are not valid.

Cause: n/a

Action: n/a

INS-32196: The script *string* was not executed on the following nodes *string*.

Cause: n/a

Action: n/a

INS-35505: You have selected a non-secure installation and configuration of Oracle software on Windows. Starting with 12c version of Oracle Database, it is recommended to create a named user to be the owner of the Oracle Home.

Cause: n/a

Action: n/a

INS-35001 to INS-40000

INS-32120: The current install user is not part of ORA_ASMADMIN group.

Cause: n/a

Action: n/a

INS-32121: The current install user is not part of ORA_ASMDBA group.

Cause: n/a

Action: n/a

INS-35011: E-mail address cannot be empty.

Cause: E-mail address for database management using e-mail notifications was empty.

Action: Specify an e-mail address for notification functions.

INS-35012: Outgoing main (SMTP) server cannot be empty.

Cause: The value for the outgoing main (SMTP) server is empty. You must provide a SMTP server to enable database management with e-mail notifications.

Action: Specify an outgoing main (SMTP) server for e-mail notifications.

INS-35013: Check e-mail address.

Cause: Either the e-mail address provided contains invalid characters, or it does not follow the standard e-mail address format.

Action: Specify an e-mail address that is consistent with RFC 2822 and RFC 2821 format.

INS-35014: Outgoing mail (SMTP) server is invalid.

Cause: The provided outgoing mail (SMTP) server was not valid. You must specify a valid SMTP server to enable database management with e-mail notifications.

Action: Specify an outgoing mail (SMTP) server for e-mail notifications.

INS-35015: Recovery location cannot be empty.

Cause: The database recovery backup location was empty.

Action: Specify a path for the database recovery backup location.

INS-35016: User name cannot be empty.

Cause: The database recovery user name text field was empty.

Action: Provide the user name permitted to perform database recovery.

INS-35017: Password cannot be empty.

Cause: The database recovery password was empty.

Action: Enter a password for database recovery.

INS-35019: Invalid value specified for Management Service field.

Cause: The installer was unable to detect an agent home corresponding to the URL in the Management Service field.

Action: Specify a valid URL for Management Service field that has a corresponding agent configured on the host.

INS-35020: Invalid value specified for Management Service field.

Cause: No value specified for Management Service field.

Action: Specify a valid Management service URL.

INS-35021: The recovery location is on a file system that is not shared across the cluster.

Cause: The database recovery area is not located on a shared file system.

Action: Enter a recovery area that is located on a shared file system.

INS-35022: Shared file system is not supported on windows for recovery area.

Cause: n/a

Action: n/a

INS-35022: Empty value provided for OMS Host.

Cause: n/a

Action: n/a

INS-35023: Empty value provided for Enterprise Manager Admin user.

Cause: n/a

Action: n/a

INS-35024: Empty value provided for Enterprise Manager Admin password.

Cause: n/a

Action: n/a

INS-35025: Empty value provided for OMS Port.

Cause: n/a

Action: n/a

INS-35026: Unable to connect to Enterprise Manager Cloud Control.

Cause: Invalid connection information specified.

Action: Specify valid connection information.

INS-35027: Selected storage type is not valid.

Cause: You cannot use file system storage for backup and recovery files, with Standard Edition Oracle Real Application Clusters databases.

Action: Choose Oracle Automatic Storage Management for database backup and recovery files.

INS-35071: Global database name cannot be left blank.

Cause: The Global database name was left blank.

Action: Specify a value for the Global database name.

INS-35072: The SID cannot be left blank.

Cause: The Oracle system identifier (SID) was left blank.

Action: Specify a value for Oracle system identifier (SID).

INS-35073: Invalid global database name.

Cause: The value given for the name portion of Global database name exceeds 30 characters. The maximum length is 30 characters.

Action: Enter a legal Global database name not exceeding 30 characters.

INS-35074: The specified SID is already in use.

Cause: The specified SID was already registered in the oratab file (*string*) on the server. The oratab file is used by Oracle products to detect existing database instances.

Action: Specify a unique Oracle system identifier (SID).

INS-35075: A database instance with the specified identifier already exists.

Cause: n/a

Action: n/a

INS-35076: The specified SID exceeds the number of characters allowed.

Cause: The length of the Oracle system identifier (SID) on Linux and UNIX platforms either exceeded 12 characters for single-instance installations or 8 characters for Oracle RAC installations.

Action: Specify an Oracle system identifier (SID) shorter than 12 characters for single-instance installation or 8 characters for Oracle RAC installation.

INS-35077: The specified SID exceeds the number of characters allowed.

Cause: The length of the Oracle system identifier (SID) on Windows platforms either exceeded *string* characters for single-instance installations or *string* characters for Oracle RAC installations.

Action: Specify a Windows Oracle system identifier (SID) shorter than *string* characters for a single-instance installation or *string* characters for an Oracle RAC installation.

INS-35081: The ORACLE_HOME environment variable is currently set.

Cause: The ORACLE_HOME environment variable was already set. This prevents proper use of multiple Oracle homes and, as it is not required for any Oracle products to function, it will be unset in your environment.

Action: The ORACLE_HOME environment variable will be unset automatically.

INS-35082: Global database name did not begin with an alphabetic character.

Cause: The global database name began with a character that was not an alphabetic character.

Action: Specify a global database name that begins with an alphabetic character.

INS-35083: The specified domain of the Global database name exceeds 128 characters.

Cause: The domain portion entered for Global database name exceeded 128 characters.

Action: Specify a domain for the Global database name that is less than 128 characters in length.

INS-35084: The specified global database name contains invalid characters.

Cause: The specified domain portion of the global database name contained invalid characters.

Action: Specify a global database name that contains only alphanumeric, underscore (_), pound (#) and period (.) characters.

INS-35085: Invalid value specified for *string*.

Cause: The *string* derived from *string* contains one or more invalid characters.

Action: Remove the invalid characters (*string*) from the *string* or select Advanced install flow to be able to specify different *string*

INS-35086: Invalid value specified for Global database name.

Cause: Database name cannot be empty.

Action: Enter a legal Global database name not exceeding 30 characters.

INS-35087: Invalid value specified for SID

Cause: The system identifier (SID) that you entered begins with a non-alphabetic character.

Action: Enter a SID that begins with an alphabetic character.

INS-35088: The specified Global database name exceeds *string* characters.

Cause: The name and domain portion entered for Global database name exceeded *string* characters.

Action: Specify the Global database name that is less than *string* characters in length.

INS-35089: The specified domain of the Global database name exceeds *string* characters.

Cause: The domain portion entered for Global database name exceeded *string* characters.

Action: Specify a domain for the Global database name that is less than *string* characters in length.

INS-35090: The service name provided for RAC One is empty.

Cause: n/a

Action: n/a

INS-35091: The service name provided for RAC One did not begin with an alphabetic character.

Cause: The service name provided for RAC One began with a character that was not an alphabetic character.

Action: Provide a service name which begins with an alphabetic character.

INS-35092: The service name provided for RAC One cannot be the same as the global database name.

Cause: n/a

Action: n/a

INS-35093: Invalid value provided for the RAC One service name.

Cause: The service name provided for RAC One may contain invalid characters.

Action: Provide a service name that consists of alphanumeric or underscore (`_`) characters.

INS-35094: Invalid value provided for Oracle RAC One service name.

Cause: The domain portion in the Oracle RAC One service name may contain invalid characters.

Action: Provide a service name whose network domain consists of alphanumeric characters or `_` or `$` or `#`.

INS-35095: The specified domain of the Oracle RAC One service name exceeds 128 characters.

Cause: The domain portion entered for Oracle RAC One service name exceeded 128 characters.

Action: Specify a domain for the Oracle RAC One service name that is less than 128 characters in length.

INS-35096: The pluggable database name did not begin with an alphabetic character.

Cause: n/a

Action: n/a

INS-35097: The pluggable database name cannot be left blank.

Cause: n/a

Action: n/a

INS-35098: Invalid pluggable database name.

Cause: The value provided for pluggable database name exceeds *string* characters.

Action: Provide a value for pluggable database name not exceeding *string* characters.

INS-35099: The pluggable database name provided is same as the container database name.

Cause: n/a

Action: n/a

INS-35100: The Oracle home location contains directories or files on following remote nodes:*string*.

Cause: n/a

Action: n/a

INS-35101: Installer has detected that an Oracle Real Application Cluster (RAC) database with the given Global Database name (*string*) is already configured on this server.

Cause: n/a

Action: n/a

INS-35102: Invalid value specified for Pluggable Database name.

Cause: The Specified Pluggable Database name is same as RAC One database service name.

Action: Specify an unique Pluggable Database name.

INS-35171: Target database memory (*string*MB) exceeds at least one of the selected nodes available shared memory (*string*MB).

Cause: The total available shared memory on at least one of the selected nodes (*string*MB) was less than the chosen target database memory (*string*MB).

Action: Enter a value for the target database memory less than *string*MB.

INS-35172: Target database memory (*string*MB) exceeds available shared memory (*string*MB) on the system.

Cause: The total available shared memory (*string*MB) on the system was less than the chosen target database memory (*string*MB).

Action: Enter a value for target database memory that is less than *string*MB.

INS-35173: Invalid value for allocated memory.

Cause: The allocated memory specified was greater than or equal to the total memory available on the system.

Action: Enter a value less than the total available memory on the system for target database memory.

INS-35174: A minimum of *string*MB (*string*% of total physical memory) is required.

Cause: Allocated memory was less than the required memory.

Action: Enter a memory value larger than *string*MB.

INS-35175: No value given for the allocated memory of the database.

Cause: A value was not specified for the allocated memory of the database.

Action: Specify a value for the allocated memory of the database. This corresponds to the `oracle.install.db.config.starterdb.memoryLimit` variable in the response file.

INS-35176: Invalid value for allocated memory.

Cause: The allocated memory specified was greater than 3GB.

Action: Enter a value less than 3GB for target database memory.

INS-35205: Specified data file storage location is invalid.

Cause: The data file storage location for Oracle Real Application Clusters was not on a shared file system.

Action: Specify a location on a shared file system to place the data files.

INS-35206: Directory is already in use.

Cause: The specified directory for the database files was already in use by the Global database name that was provided.

Action: Specify a different location or go to the previous screen and change the Global database name.

INS-35207: The location *string* you selected is on an Oracle ASM Cluster File System (ACFS).

Cause: Oracle does not recommend placing Oracle Database files on ACFS. Oracle recommends that you place database files directly on the underlying Oracle ASM disk groups, as this provides optimal database performance.

Action: Specify a location that is not on ACFS.

INS-35208: The location *string* you selected is on an Oracle ASM Cluster File System (ACFS).

Cause: You cannot use ACFS as shared storage for Oracle RAC.

Action: Specify an ASM diskgroup or any other supported shared storage location.

INS-35209: Selected storage type is not valid.

Cause: You cannot use file system storage with Standard Edition Oracle Real Application Clusters databases.

Action: Choose Oracle Automatic Storage Management for database storage.

INS-35210: Installing a database with storage on Oracle Automatic Storage Management (Oracle ASM) is not supported on this system.

Cause: Oracle Database 11g Release 2 and later supports Oracle ASM only on 64-bit Windows operating systems.

Action: Place database-related files on a supported file system.

INS-35211: Selected storage type is not valid.

Cause: n/a

Action: n/a

INS-35255: Invalid password.

Cause: One of the Database Administrative account password was either CHANGE_ON_INSTALL or MANAGER or DBSNMP or SYSMAN or PDBADMIN.

Action: Enter a password that is not a former default password for these administrative users, such as CHANGE_ON_INSTALL, MANAGER, DBSNMP or SYSMAN or PDBADMIN.

INS-35256: The password for account *string* is not allowed to be *string*.

Cause: The administrative account password you entered was *string* which is not allowed for *string* user.

Action: Enter a password that is not a former default password for the *string* administrative user account.

INS-35341: The installation user is not a member of the following groups: *string*

Cause: The installation user account must be a member of all groups required for installation.

Action: Ensure that the installation user is a member of the system privileges operating system groups you selected.

INS-35342: The specified group for *string* may not be defined in the system.

Cause: The OS group you specified as *string* may not be configured on the server, or in the Network Information Service (NIS).

Action: Check the group name you selected, and specify a different group, or create the group on the server or in the Network Information Service.

INS-35343: Invalid value specified for *string*.

Cause: OS group *string* specified for *string* contains one or more invalid characters.

Action: Remove the invalid characters (*string*) from *string* or select an existing OS Group for *string*.

INS-35344: The value is not specified for *string*.

Cause: n/a

Action: n/a

INS-35351: Inconsistent versions detected.

Cause: The active version of Oracle Clusterware detected on the system (*string*) was lower than the version of Oracle Database that you were attempting to install(*string*). This is not supported.

Action: Upgrade Oracle Clusterware to version *string* or later.

INS-35352: There are no disk groups selected for storage and backup.

Cause: n/a

Action: n/a

INS-35354: The system on which you are attempting to install Oracle *string* is not part of a valid cluster.

Cause: Before you can install Oracle *string*, you must install Oracle Grid Infrastructure (Oracle Clusterware and Oracle ASM) on all servers to create a cluster.

Action: Oracle Grid Infrastructure for Clusterware is not installed. Install it either from the separate installation media included in your media pack, or install it by downloading it from Electronic Product Delivery (EPD) or the Oracle Technology Network (OTN). Oracle Grid Infrastructure normally is installed by a different operating system user than the one used for Oracle Database. It may need to be installed by your system administrator. See the installation guide for more details.

INS-35355: The node *string* specified in response file is not part of the Oracle Clusterware detected.

Cause: The node list for the Oracle RAC database specified in the response file does not match the configuration stored in the OCR.

Action: Please specify a valid node or add this node *string* to the cluster.

INS-35356: Oracle recommends that you install the database on all nodes that are part of the Oracle Grid Infrastructure cluster.

Cause: All Oracle Grid Infrastructure nodes were not selected for installing Oracle RAC.

Action: Oracle recommends that you deploy Oracle Real Application Clusters across all Oracle Grid Infrastructure cluster nodes.

INS-35357: Oracle RAC is not supported on this system.

Cause: Oracle Database 11g Release 2 and later supports Oracle RAC only on 64-bit Windows operating systems.

Action: Choose the option to install a single instance database on this system.

INS-35358: Oracle RAC is not supported on this system.

Cause: Oracle Database 11g Release 2 and later supports Oracle RAC only on 64-bit Windows operating systems.

Action: Migrate your existing Oracle RAC installation to a 64-bit Windows platform before upgrading it.

INS-35359: Only one node is selected for database creation.

Cause: Only one node is selected for database creation. To protect a database against node or instance failure, at least two nodes should be selected.

Action: Provide at least two nodes for database creation.

INS-35360: No nodes are specified for RAC One Node install.

Cause: n/a

Action: n/a

INS-35361: One or more selected nodes are down.

Cause: One or more selected nodes cannot be reached

Action: Ensure that all the nodes selected for operation are reachable.

INS-35362: Admin managed database can not be installed on following set of nodes: *string*

Cause: Admin managed database can be created only on HUB nodes.

Action: Select only HUB nodes to create admin managed database. HUB nodes detected in your setup are as follows: *string*

INS-35371: Oracle RAC databases not detected.

Cause: The installer could not detect any Oracle Real Application Clusters databases that could be upgraded.

Action: None

INS-35372: Oracle RAC databases not detected.

Cause: The installer could not detect any Oracle Real Application Clusters databases that could be upgraded on the selected nodes.

Action: None

INS-35373: Single-instance database not detected

Cause: The installer could not detect a single-instance database that could be upgraded.

Action: None

INS-35375: The installer detects an older version of Oracle ASM on the system. If you intend to upgrade a database using Oracle ASM for storage, then you must first upgrade Oracle ASM. Refer to Oracle Grid Infrastructure Installation Guide for further information.

Cause: An earlier release version of Oracle Automatic Storage Management (Oracle ASM) is detected on the server.

Action: To upgrade Oracle ASM, refer to installation guides for information about Oracle Grid Infrastructure upgrade.

INS-35376: Password cannot be empty for the ASMSNMP user.

Cause: The ASMSNMP user password was not specified.

Action: Provide a password for the ASMSNMP user in the password field.

INS-35377: An earlier release version of Oracle Automatic Storage Management (Oracle ASM) exists on this system. If you intend to upgrade an earlier release database that uses Oracle ASM to Oracle Database 11g Release 2, then the upgrade will fail on 32-bit systems.

Cause: Oracle Database 11g Release 2 and later supports Oracle ASM only on 64-bit Windows operating systems.

Action: Migrate database storage from Oracle ASM to a file system before upgrading, or migrate earlier release databases versions that use Oracle ASM storage to 64-bit Windows systems. See the upgrade guide for additional information.

INS-35378: The installer has detected that the configured Oracle Restart software is a release version earlier than the database release you want to install. Oracle Restart must be the same release or a later release than Oracle Database.

Cause: The active Oracle Restart release detected on the system (*string*) is an earlier release than the Oracle Database release to which you want to upgrade (*string*).

Action: Upgrade Oracle Restart software to version *string* or later.

INS-35379: The installer has detected that configured Oracle Restart software is not upgraded to current install version.

Cause: The active version of Oracle Restart detected on the system (*string*) is earlier than the version of Oracle Database that you are attempting to upgrade to (*string*).

Action: Upgrade Oracle Restart software to version *string* or later.

INS-35380: Installer has detected one or more policy managed databases eligible for upgrade. If you wish to upgrade one of these policy managed databases, it is recommended that you select all the nodes of the Clusterware. This will ensure the database software availability on all the nodes.

Cause: n/a

Action: n/a

INS-35421: This option installs a single-instance database only.

Cause: You have chosen to perform a Desktop class install on a cluster. This option will not install Oracle RAC.

Action: If you want to install Oracle RAC, then choose to perform a Server class install.

INS-35422: The installer has detected that configured Oracle Restart software is not upgraded to current install version. This database installation does not register the database with lower version of High Availability service.

Cause: The active version of Oracle Restart detected on the system(*string*) is lower than the version of Oracle Database that you are attempting to install to (*string*).

Action: Upgrade Oracle Restart software to version *string* or later.

INS-35423: The installer has detected that Oracle Clusterware is not running on local node.

Cause: You have chosen to install Oracle RAC when Oracle Clusterware stack is not running on the local node.

Action: Start the Oracle Clusterware stack by running the following command as the root user from the Oracle Clusterware home (Grid home) : /bin/crsctl start crs. When the Oracle Clusterware stack is running, restart the installer and continue with the Oracle RAC installation.

INS-35431: Invalid Location Specified for Oracle home.

Cause: The installer detects that the location you specified for the Oracle home is under an Oracle ASM Cluster File System (ACFS) mount point that is not registered with Oracle Grid Infrastructure on this server.

Action: Oracle Database homes can only be placed on ACFS locations registered with Oracle Grid Infrastructure software. Specify a different location for the Oracle home, or register this location with Oracle Grid Infrastructure software.

INS-35432: The installer has detected that the software location you have specified contains Oracle Database software version *string*. Oracle recommends that when upgrading to *string*, you perform an installation of the software into a new Oracle home and then upgrade the database using the new software binaries.

Cause: n/a

Action: n/a

INS-35433: The installer has detected that the specified location *string* is on an Oracle ASM Cluster File System that is not registered as a resource in Oracle Grid Infrastructure.

Cause: The specified location *string* is on an Oracle ASM Cluster File System that is not registered as a resource in Oracle Grid Infrastructure.

Action: Register the Oracle ASM Cluster File System location that you want to use with Oracle Grid Infrastructure.

INS-35434: Oracle Home cannot be on Oracle Cluster File System.

Cause: Oracle Home provided was detected to be on Oracle Cluster File System.

Action: Provide a Oracle Home location which is not on Oracle Cluster File System.

INS-35435: Oracle home of the Policy managed database on a Flex Cluster cannot be on ASM Cluster File System.

Cause: Oracle home location specified was detected to be on ASM Cluster File System.

Action: Specify an Oracle home location which is not on ASM Cluster File System.

INS-35436: Oracle home of a Software Only database installation cannot be on ASM Cluster File System when LEAF type nodes are chosen for the installation.

Cause: Oracle home location specified was detected to be on ASM Cluster File System and LEAF type nodes were chosen for the installation.

Action: Specify an Oracle home location which is not on ASM Cluster File System or remove LEAF type nodes from the selected list of nodes.

INS-35437: Invalid location specified for Oracle home.

Cause: Installer has detected that the location specified for Oracle home is a sub directory under an Automatic Cluster File System(ACFS) mount point that does not provide permissions to your user id.

Action: Provide a different location for Oracle home or update the Access Control List (ACL) of the ACFS mount point.

INS-35438: The specified software location is found to be on ASM Cluster File System (ACFS) configured to be available only on one node (*string*). Oracle RAC software can not be installed on a single-node ACFS.

Cause: n/a

Action: n/a

INS-35439: The specified base location is found to be on ASM Cluster File System (ACFS) on node (*string*) and LEAF nodes were selected. Oracle RAC base location can not be installed on ACFS when LEAF nodes are selected.

Cause: n/a

Action: n/a

INS-35461: Standard Edition One (SE One) is not supported for this installation.

Cause: Standard Edition One (SE One) is not supported for Oracle Real Application Clusters database installation.

Action: Select a different Install Edition.

INS-35462: Personal Edition is not supported for this installation.

Cause: You selected an Install Edition that is not supported for UNIX or Linux operating systems, and for Oracle RAC installations.

Action: Select a different Install Edition.

INS-35463: This option is not supported on Exadata configuration.

Cause: n/a

Action: n/a

INS-35464: The installer does not support installing the *string* of Oracle Database.

Cause: n/a

Action: n/a

INS-35481: Server pool name is not specified.

Cause: You have not specified a valid name for the server pool.

Action: Specify a valid name for server pool.

INS-35482: Server pool cardinality is invalid.

Cause: Server pool cardinality should be a number between *string* and *string*

Action: Specify a valid number as Server pool cardinality.

INS-35483: Server pool name is invalid.

Cause: The specified Server pool name contains an invalid character.

Action: Specify a name for server pool that contains only alphabets, numbers, or the `_`, `#`, `.`, `$` characters.

INS-35491: There are no Hub nodes detected in this cluster

Cause: Admin-managed Real Application Cluster database can be deployed only on Hub nodes.

Action: Choose Policy-managed Real Application Cluster database option if there are no Hub nodes in the cluster

INS-35492: Local node is not a Hub node

Cause: Local Node has to be a Hub node in order to deploy a Admin-managed Real Application Cluster database.

Action: n/a

INS-35501: Nodes *string* specified for addnode are not part of the Clusterware yet. Ensure that the configuration scripts from the Grid Infrastructure home are executed after the database addnode is performed.

Cause: n/a

Action: n/a

INS-35502: Cluster nodes *string* are already having a database software in the same location as local node.

Cause: Nodes are already having a database software.

Action: Specify `-noCopy` option to addnode to have the configuration done without the software copy to these nodes.

INS-35503: Nodes *string* are duplicately specified for addnode operation.

Cause: n/a

Action: n/a

INS-35504: Node name cannot be left unfilled.

Cause: n/a

Action: n/a

INS-35505: Oracle RAC software location can not be installed on ASM Cluster File System (ACFS) when LEAF nodes are selected. You have selected following LEAF nodes:*string*

Cause: n/a

Action: n/a

INS-35506: Oracle RAC software location can only be installed on ASM Cluster File System (ACFS) on HUB nodes. You have selected following nodes that are not detected to be configured as HUB nodes:*string*

Cause: n/a

Action: n/a

INS-35810: You have selected to use Built-in Account for installation and configuration of Oracle Home. Oracle recommends that you specify a Windows User Account with limited privilege to install and configure a secure Oracle Home.

Cause: n/a

Action: n/a

INS-35850: The installer has detected that you are trying to install a cluster database from a leaf node of a Flex cluster.

Cause: n/a

Action: n/a

INS-40001 to INS-45000

INS-40102: Specified Grid home is invalid

Cause: The Oracle Grid Infrastructure for a cluster home (Grid home) was placed in the installation owners home directory.

Action: Oracle recommends that you do not place the Grid home in a user home directory, because ownership of the path to that directory is changed to root.

INS-40103: The installer has detected that the software location specified is on an OCFS2 partition.

Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home is not supported on OCFS2 partitions.

Action: Specify a Grid home location that is not an OCFS2 partition.

INS-40104: The installer has detected that the software location specified is on an OCFS2 partition.

Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home is not supported on OCFS2 partitions.

Action: Specify a Grid home location that is not an OCFS2 partition.

INS-40105: The location specified for Oracle Base is invalid.

Cause: The installer detects that you have configured Oracle Grid Infrastructure software on this server, and that the Oracle base you provided for this install is not the same as the existing Oracle Grid Infrastructure software Oracle base.

Action: Provide the same Oracle base location for this Oracle Grid Infrastructure installation that is used for the existing Oracle Grid Infrastructure.

INS-40106: Invalid location specified for Grid home.

Cause: The installer detects that the Oracle home location you provided is on an Oracle ASM Cluster File System (ACFS) mountpoint. You cannot place Oracle Grid Infrastructure binaries on an ACFS mount point.

Action: Specify a Grid home location that is on a location other than an ACFS mount point.

INS-40107: It is recommended that you choose a location with sufficient disk space to accommodate installation of future patches.

Cause: The selected Oracle home was on a volume without enough disk space for future patching.

Action: Choose a location for Oracle home that has enough space (minimum of *string*MB) or free up space on the existing volume.

INS-40108: The installer has detected that the software location specified is on a temporary file system.

Cause: Configuration of an Oracle Grid Infrastructure for a cluster Grid home should not be done on temporary file system .

Action: Specify a Grid home location that is not an temporary file system.

INS-40401: The Installer has detected a configured Oracle Clusterware home on the system.

Cause: The Installer has detected the presence of Oracle Clusterware software configured on the node.

Action: You can have only one instance of Oracle Clusterware software configured on a node that is part of an existing cluster.

INS-40404: The installer has detected a configured instance of Oracle grid infrastructure software on the server.

Cause: You selected to install and configure a new Oracle grid infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

Action: Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40405: The installer has detected a configured instance of Oracle Grid Infrastructure software on the system.

Cause: You selected to install and configure a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

Action: Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40406: The Installer has not detected an existing Oracle Grid Infrastructure software on the system.

Cause: The installer is unable to detect any existing Oracle Clusterware or Oracle ASM installation to upgrade.

Action: You can choose either to install a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM) on this node and add the node to an existing cluster, or you can install a new Oracle Grid Infrastructure installation and make the node part of a new cluster. If you want to add the node to an existing cluster, then review Oracle Clusterware Administration and Deployment Guide and follow the addnode procedure. If you want to create a new cluster, then select the option for a new installation.

INS-40407: The installer has detected an Oracle ASM instance is already configured on the computer.

Cause: You can have only one Oracle ASM instance configured on the node.

Action: Select the Software Only installation of Oracle Grid Infrastructure into a new home, and configure Oracle ASM in the new home after installation.

INS-40409: The installer has detected local Cluster Synchronization Services (CSS) configured on this host. Local CSS is running from: *string*.

Cause: You selected to install and configure an Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, Oracle Clusterware cannot be installed on a server with a configured CSS daemon.

Action: Deconfigure and delete the existing local CSS daemon, and then restart the installer.

INS-40410: The installer has detected a configured instance of Oracle Grid Infrastructure software on the system.

Cause: You selected to install and configure a new Oracle Grid Infrastructure installation (Oracle Clusterware and Oracle ASM). However, only one installation of Oracle Clusterware and Oracle ASM can be configured on a server at the same time.

Action: Deconfigure the existing Oracle Grid Infrastructure software before installing and configuring a new instance of Oracle Grid Infrastructure software.

INS-40412: This server does not meet network requirements to install and configure this product.

Cause: None of the network interfaces detected on this system supports IPv4 protocol.

Action: Configure at least one of the public interfaces available on this system to support IPv4.

INS-40413: Existing Oracle ASM instance detected.

Cause: The installer has detected that an earlier version of Oracle ASM is configured on the server.

Action: If you intend to upgrade Oracle ASM as part of this installation, then you must shut down the Oracle ASM instance before proceeding. Shut down any database instances using Oracle ASM before shutting down the Oracle ASM instance.

INS-40414: The installer has detected an unused Oracle Cluster Registry (OCR) location pointer file (*string*) on the system.

Cause: OCR location pointer file (*string*) is left behind from a previous installation.

Action: Delete the OCR location pointer file (*string*) and restart the installer.

INS-40415: Upgrade database instances using Oracle Automatic Storage Management (Oracle ASM).

Cause: The installer has detected the presence of Oracle Database release *string* instances.

Action: If you intend to upgrade Oracle ASM as part of this upgrade, then you must upgrade Oracle Database instances using Oracle ASM to release *string* or later before proceeding with upgrading Oracle ASM.

INS-40416: The installer has detected that the version of the configured instance of Grid Infrastructure is not compatible for upgrading to this release of Grid Infrastructure.

Cause: Oracle Clusterware or Oracle ASM release *string* or above is needed to upgrade to Oracle Grid Infrastructure.

Action: Install the patchset to upgrade the configured instance of Grid Infrastructure to version *string* or higher.

INS-40417: The installer has detected an unused Oracle Cluster Registry (OCR) location registry key (*string*) on the system.

Cause: OCR location registry key (*string*) is left behind from a previous installation.

Action: Delete the OCR location registry key (*string*) and restart the installer.

INS-40418: The installer has detected that Oracle Clusterware is not running on local node.

Cause: The installer has detected that the Oracle Clusterware stack on the local node is not running.

Action: Either run the Installer on the node where Oracle Clusterware stack is running or open a terminal, log in as root or Administrator, change directory to the Oracle Clusterware home (Grid home), and start Oracle Clusterware by entering this command: `crsctl start crs`

INS-40419: The installer detects that the configured Oracle Automatic Storage Management (Oracle ASM) release is earlier than the Oracle Grid Infrastructure release.

Cause: Installer has detected that configured version of Automatic Storage Management software is lower than the Grid Infrastructure software version.

Action: Open a terminal, log in as the Grid Infrastructure installation owner, change directory to the Grid home, and run ASMCA to upgrade Oracle ASM.

INS-40420: The current installation user is not the same as the installation owner of the existing Oracle Grid Infrastructure software.

Cause: The installer detects that the current installation user (*string*) is not the same as the existing Oracle Grid Infrastructure software user (*string*). To upgrade the existing software, run the installer as the user owning the Oracle Grid Infrastructure home.

Action: Restart the installation as the user that owns the existing Grid home.

INS-40421: The installer cannot detect the owner of the existing Oracle Grid Infrastructure home (Grid home).

Cause: The installer is unable to detect the owner of the existing Grid home. To upgrade the software, you must run the installer as the user owning the Grid home.

Action: Run the installer as the user owning the existing Grid home.

INS-40422: The installer has detected that the configured instance of Grid Infrastructure is not compatible for upgrading to this release of Grid Infrastructure.

Cause: Patchset for the bug *string* is not installed on the configured instance of the Grid Infrastructure home.

Action: Install the patchset for the bug *string* on all the nodes to upgrade the configured instance of Grid Infrastructure to current version.

INS-40423: The Oracle Cluster Registry and the Voting disk are located on a Oracle Cluster File System.

Cause: n/a

Action: n/a

INS-40424: Installer has detected that the Oracle Cluster Registry (OCR) locations of existing clusterware configuration are on a block or character storage device. The OCR locations cannot be on a block or character storage device during upgrade.

Cause: n/a

Action: n/a

INS-40425: Installer has detected that the Oracle Cluster Registry (OCR) is not managed through Automatic Storage management (ASM).

Cause: n/a

Action: n/a

INS-40426: Grid installation option has not been specified.

Cause: n/a

Action: n/a

INS-40427: The installer has detected that you are trying to upgrade from a leaf node of a Flex cluster.

Cause: The upgrade action of a Flex cluster is not allowed from a leaf node.

Action: Please upgrade from a hub node of this Flex cluster.

INS-40601: The Intelligent Platform Management Interface (IPMI) driver is not installed on one or more of the following nodes: *string*.

Cause: The installer detected that Intelligent Platform Management Interface (IPMI) drivers were not installed on all the nodes that you indicated should be part of the cluster. Cluster Synchronization Service (CSS) requires this driver, as it interacts with the IPMI driver to ensure cluster integrity.

Action: Download the IPMI driver from the hardware vendor website, and ensure that the driver is installed and configured on all the nodes, so that installation can continue.

INS-40602: Baseboard Management Controller (BMC) user name text field cannot be left blank.

Cause: The BMC user name text field was blank.

Action: You have selected Intelligent Platform Management Interface (IPMI) to use for failure isolation support. The installer requires the Baseboard Management Controller (BMC) user name to proceed with configuration. Enter the BMC user name that has privileges to interact with the IPMI-compliant hardware.

INS-40603: Invalid characters in User Name.

Cause: Invalid characters were specified in the user name.

Action: Enter a valid BMC user name. The Baseboard Management Controller (BMC) user name can only contain lower or uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), period(.) and underscore(_).

INS-40604: Password field is blank.

Cause: n/a

Action: n/a

INS-40701: Invalid characters in Grid Naming Service (GNS) subdomain.

Cause: The specified value for the GNS subdomain contained one or more invalid characters.

Action: Enter a valid GNS subdomain name. Valid characters for the GNS subdomain can be any combination of lower or uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40702: Specify a value for Grid Naming Service (GNS) subdomain.

Cause: n/a

Action: n/a

INS-40704: GNS subdomain cannot be resolved.

Cause: The GNS subdomain could not be resolved using TCP/IP host name lookup.

Action: Specify a subdomain that can be resolved.

INS-40705: Invalid characters in Grid Naming Service (GNS) Virtual IP Address.

Cause: The specified value for the GNS virtual IP address contained one or more invalid characters.

Action: Enter a valid value for the GNS virtual IP Address. Valid characters for GNS virtual IP addresses can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40706: Grid Naming Service (GNS) Virtual IP Address is blank.

Cause: n/a

Action: n/a

INS-40707: Grid Naming Service (GNS) Virtual IP Address *string* cannot be resolved.

Cause: The GNS virtual IP address could not be resolved using TCP/IP host name lookup.

Action: Specify a valid GNS virtual IP address.

INS-40708: Grid Naming Service (GNS) Virtual IP Address *string* already assigned to another system.

Cause: The specified GNS virtual host name could not be resolved to an IP address. This may occur if the IP address is in use on another cluster, or the IP address has not been registered to this name in the Domain Name System (DNS).

Action: Ensure that you have entered a virtual host name that is not in use. If you continue to receive an error, then contact your network administrator for assistance.

INS-40709: Cluster name: *string* contains invalid characters.

Cause: The specified value for the cluster name contained one or more invalid characters.

Action: Provide a valid value for the cluster name. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

INS-40710: Cluster name:*string* does not start with a letter.

Cause: The cluster name did not start with a letter.

Action: Provide a value for the cluster name that starts with a letter

INS-40711: Cluster Name is blank.

Cause: The Cluster name text field was blank.

Action: Provide a valid value for the cluster name.

INS-40712: Cluster Name:*string* is too long.

Cause: The specified cluster name was too long.

Action: Provide a cluster name that is 15 or fewer characters in length.

INS-40713: Installer will use "*string*" as cluster name.

Cause: The cluster name cannot be longer than *string* characters. With the Typical install type, the host portion of the SCAN is used as the cluster name. If that portion is longer than *string* characters, then the installer truncates the cluster name to *string* characters.

Action: If you want to use a specific name for the cluster, then provide a name no greater than *string* characters, or select the Advanced installation type.

INS-40714: Single Client Access Name (SCAN) Name: *string* contains invalid characters.

Cause: The name you provided as the SCAN contained one or more invalid characters.

Action: Enter a valid name for the SCAN. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40715: Single Client Access Name (SCAN) Name: *string* contains invalid characters.

Cause: The name you provided as the SCAN contained one or more invalid characters. For the Typical installation type, invalid characters include those that are invalid for a cluster name, because the cluster name is derived from SCAN.

Action: Enter a valid name for the SCAN and for the cluster name. Valid characters can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), hyphen(-), and period(.).

INS-40716: Single Client Access Name (SCAN) Name:*string* does not start with a letter.

Cause: The SCAN did not start with an alphabetic character.

Action: Provide a value for the SCAN that starts with an alphabetic character.

INS-40717: Single Client Access Name (SCAN) is unfilled.

Cause: No name was provided as the SCAN.

Action: Provide a valid name to use for the SCAN.

INS-40718: Single Client Access Name (SCAN):*string* could not be resolved.

Cause: The name you provided as the SCAN could not be resolved using TCP/IP host name lookup.

Action: Provide name to use for the SCAN for which the domain can be resolved.

INS-40719: IP address configured for Single Client Access Name (SCAN): *string* is already assigned to another system.

Cause: The installer could not find the IP addresses you selected as SCAN addresses. This may be because they are assigned to another system, or because the IP addresses are not listed in the DNS or hosts files as assigned to this domain name.

Action: Enter resolvable IP addresses to use as SCAN addresses.

INS-40720: Single Client Access Name (SCAN):*string* is not associated with any IP address.

Cause: The name configured as the SCAN was not associated with an IP address.

Action: Ensure the names you provide as SCANS are associated with IP addresses.

INS-40721: Single Client Access Name (SCAN) port is blank.

Cause: The SCAN port text field was empty.

Action: Provide a valid value for the SCAN port.

INS-40722: Single Client Access Name (SCAN) port: *string* contains non-numeric characters.

Cause: The value entered for the SCAN port contained one or more invalid characters. A valid SCAN port is a number.

Action: Enter a valid numeric value for the SCAN port.

INS-40723: Invalid Single Client Access Name (SCAN) port number:*string*.

Cause: The value entered for the SCAN Port was out of the valid range.

Action: Enter a SCAN port number between 1024 and 65535.

INS-40724: No locally defined network interface matches the SCAN subnet.

Cause: None of the locally defined network interfaces has a subnet matching the SCAN subnet.

Action: Define a public interface with a subnet matching the one you want to use for the SCAN.

INS-40725: Unable to determine the existence of an interface with a subnet matching the SCAN subnet.

Cause: No interface was found with a subnet matching the subnet designated as the SCAN subnet.

Action: Define a public interface with a subnet matching the one you want to use for the SCAN.

INS-40726: Single Client Access Name (SCAN):*string* is not in the GNS subdomain *string*.

Cause: The name you provided as the SCAN is not in the GNS subdomain.

Action: Ensure the name you provide as the SCAN is in the same domain as the GNS subdomain.

INS-40727: Single Client Access Name (SCAN):*string* is already associated with an IP address.

Cause: The name for the configured SCAN is already associated with an IP address.

Action: If you intend to use GNS resolution for your cluster, then ensure the names you provide for SCANS are not associated with IP addresses that are already in use.

INS-40728: Invalid Single Client Access Name (SCAN) port number:*string*.

Cause: The installer detects that the SCAN port number you provided is already in use. This can occur if Oracle9i RAC is installed on the server, and it is using the port.

Action: Provide a different SCAN port number in the range 1024 and 65535.

INS-40729: Invalid Single Client Access Name (SCAN) specified:[*string*].

Cause: Single Client Access Name (SCAN) cannot have a domain name suffix when configuring cluster to use shared GNS

Action: Remove the period('.') and any following text from the specified Single Client Access Name (SCAN)

INS-40729: GNS Client data file not specified.

Cause: To configure Shared GNS, a GNS Client data file has to be specified.

Action: Specify a valid GNS Client data file to configure shared GNS.

INS-40730: Hostname portion of the specified Single Client Access Name (SCAN) Name: *string* is longer than 63 characters.

Cause: n/a

Action: n/a

INS-40730: File name specified as GNS Client data file is not a valid file.

Cause: Installer has detected that the specified GNS Client data file is not a valid file, or does not exist, or is not a readable file.

Action: Specify a valid GNS Client data file to configure shared GNS.

INS-40731: You have not chosen to configure Grid Naming Service(GNS).

Cause: Configuring Grid Naming Service(GNS) is mandatory to configure Flex Cluster.

Action: Choose to configure GNS to have configure Flex Cluster.

INS-40732: Configuring Grid Infrastructure with shared GNS option is currently not supported.

Cause: n/a

Action: n/a

INS-40733: Configuring Grid Infrastructure with shared GNS option for big cluster is not supported.

Cause: n/a

Action: n/a

INS-40734: Configure DHCP option is not supported for IPV6 GNS VIP

Cause: The specified value for the GNS virtual IP address is IPV6, for which DHCP is not supported.

Action: Ensure that the option to Configure DHCP assigned Virtual IPs to the nodes is deselected.

INS-40735: Specified Grid Naming Service (GNS) subdomain is not valid. It does not follow the standard domain name format.

Cause: n/a

Action: n/a

INS-40736: The provided GNS Client data file location is not supported.

Cause: The GNS Client data file location should not be a UNC path.

Action: Provide the GNS Client data file location which is not on a UNC path.

INS-40737: Installer was unable to verify the GNS client data file.

Cause: n/a

Action: n/a

INS-40901: The cluster node information table is unfilled.

Cause: Values in the cluster node information table are unfilled.

Action: Provide valid data in the cluster node information table.

INS-40902: Missing entries in the node Information table.

Cause: Some fields were left blank in the cluster node information table.

Action: Ensure that all information in the table is filled in.

INS-40903: Host name contains invalid characters.

Cause: The name you provided as the host name contains one or more invalid characters.

Action: Ensure that the host name contains valid characters. Valid characters for host names can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-40904: ORACLE_HOSTNAME does not resolve to a valid host name.

Cause: The value provided for ORACLE_HOSTNAME does not resolve to a valid host name.

Action: Provide a valid host name for ORACLE_HOSTNAME, and restart the installer.

INS-40905: Unresolved host IP addresses.

Cause: One or more IP addresses do not resolve to valid host names.

Action: You must enter valid IP addresses that resolve to hostnames before installation can continue.

INS-40906: Duplicate host name *string* found in the node information table for Oracle Clusterware install.

Cause: Duplicate entries have been made in the node information table for Oracle Clusterware installation.

Action: Remove duplicate entries in the Oracle Clusterware node information table.

INS-40907: Local node not included in the list of host names for grid installation.

Cause: The local node (the node where you are running the installer) was missing from the list of host names you provided.

Action: Include the local node in the list of host names for grid installation.

INS-40908: Invalid host names.

Cause: One or more host names you provided are invalid, as they do not resolve to a valid IP address.

Action: Enter valid host names.

INS-40909: Host names from multiple domains entered.

Cause: Node information was entered for two or more nodes that belonged to different domains.

Action: Enter host names belonging to the same domain.

INS-40910: Virtual IP: *string* entered is invalid.

Cause: The Virtual IP did not resolve to an IP address.

Action: Enter a valid name for the virtual IP that resolves to an IP address.

INS-40911: Some public node names could not be resolved.

Cause: Some public nodes either were unreachable, or they belonged to a different subnet.

Action: Ensure that nodes in the list are up and reachable, and ensure that the node addresses are all in the same subnet.

INS-40912: Virtual host name: *string* is assigned to another system on the network.

Cause: One or more virtual host names appeared to be assigned to another system on the network.

Action: Ensure that the virtual host names assigned to each of the nodes in the cluster are not currently in use, and the IP addresses are registered to the domain name you want to use as the virtual host name.

INS-40913: The following nodes cannot be clustered due to user equivalence issue: *string*.

Cause: The user performing this installation is not configured identically on all nodes. This may be due to differences in the user or group IDs, or to SSH configuration issues.

Action: If necessary, refer to the installation guide for information about how to set up user equivalence manually on cluster nodes.

INS-40914: The installer has detected the presence of Oracle9i RAC on the remote node, *string*.

Cause: An Oracle9i RAC installation was present on remote node *string*, but not on the local node.

Action: To install on a set of nodes on which the Oracle9i release of Oracle RAC has been configured, start the installer on the node where Oracle9i RAC is installed so that the installer can upgrade the existing installation.

INS-40915: The installer has detected the presence of Oracle Clusterware on the following nodes: *string*.

Cause: Either Oracle Clusterware is running on the listed nodes, or previous installations of Oracle Clusterware are not completely deinstalled.

Action: For each node listed, ensure that existing Oracle Clusterware is completely deinstalled. You can also choose not to include these nodes in this installation.

INS-40916: Single-instance versions of Cluster Synchronization Services (CSS) are detected.

Cause: The installer detected single-instance versions of Cluster Synchronization Services (CSS) on the following nodes in the cluster:*string*

Action: Before proceeding with the installation, you must deconfigure CSS, shut down any Oracle Automatic Storage Management (Oracle ASM) instances, and shut down all databases that use Oracle ASM for storage on all of the listed nodes. Oracle Clusterware installation starts a cluster-wide version of CSS. After Oracle Clusterware installation is complete, you may start up any databases and Oracle ASM instances that previously used CSS. When they are brought back up, Oracle Clusterware provides CSS.

INS-40917: Host name cannot be in IP Address format.

Cause: n/a

Action: n/a

INS-40918: Virtual IP name: *string* cannot be in IP Address format.

Cause: Virtual IP name cannot be in IP address format.

Action: Provide a valid virtual IP name.

INS-40919: Hostname cannot be left unfilled.

Cause: You did not provide a hostname for the node.

Action: Enter a valid hostname.

INS-40920: No name was provided as the virtual IP name.

Cause: You did not enter a name for the virtual IP address.

Action: Enter a valid virtual IP name.

INS-40921: Virtual IP name contains invalid characters.

Cause: The name you provided for the virtual IP name contains one or more invalid characters.

Action: Provide a name to use for the virtual IP name that contains valid characters. Valid characters for virtual IP name can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

INS-40922: Invalid SCAN - unresolvable to an IP address.

Cause: SCAN provided does not resolve to an IP address.

Action: Ensure that the SCAN is valid, and that it is resolvable to an IP address.

INS-40923: Unable to match a local interface or subnet with the SCAN.

Cause: No local network interface was found with an address matching the subnet for the SCAN.

Action: Ensure that the SCAN subnet matches the subnet configured on an existing local network interface.

INS-40924: Failure while initializing search for common interface or subnets across cluster nodes.

Cause: Unable to locate common interfaces or subnets on all cluster member nodes.

Action: Ensure that the local node has valid network interfaces, with valid subnets that are the same on all cluster member nodes.

INS-40925: One or more nodes have interfaces not configured with a subnet that is common across all cluster nodes.

Cause: One or more nodes have network interfaces configured with a subnet that is not common to all nodes in the cluster.

Action: Ensure all cluster nodes have a public interface that is defined with the same subnet, and accessible by all nodes in the cluster.

INS-40926: Cluster node interfaces are configured in subnets different from the SCAN subnet.

Cause: One or more nodes have interfaces configured with subnets that are different than the SCAN subnet.

Action: Ensure all nodes have a public interface configured with a subnet that matches the SCAN subnet.

INS-40927: Interfaces with common subnets have different names on different nodes.

Cause: The following nodes have interfaces in common subnets that have different interface names: *string*

Action: Ensure that the names of interfaces defined on common subnets are the same on all cluster member nodes.

INS-40928: An unknown interface error occurred during validation of cluster member nodes.

Cause: An unknown error occurred during validation of addresses or subnets on cluster member nodes.

Action: Ensure network interfaces are configured correctly, and that subnets are available on all nodes of the cluster. Ensure all nodes have at least one public interface on a subnet available on all nodes, and ensure all nodes have one public interface on the same subnet.

INS-40929: Installer has detected that the Oracle 9i Global Services Daemon (GSD) is running on the following nodes: *string*

Cause: Oracle 9i Global Services Daemon (GSD) processes are detected on some or all of the nodes specified.

Action: To allow Oracle Clusterware to serve Oracle9i RAC databases, on each cluster member node you must shut down the Oracle9i Database GSD, and shut down any Oracle RAC databases. The installer will configure a GSD to run in the new grid Oracle home. After installation, you may restart all Oracle9i databases.

INS-40930: The following nodes were not resolvable during host IP address lookup: *string*.

Cause: One or more node VIPs could not be resolved to a valid IP address.

Action: Be sure all node VIPs are resolvable to a valid IP address.

INS-40931: The following nodes have interfaces that are configured on a subnet that is different from the SCAN subnet: *string*.

Cause: Some node VIPs are on subnets that are different from the SCAN subnet.

Action: For each cluster member node, ensure that the VIP is configured with the SCAN subnet.

INS-40932: An unknown error has occurred while validating Node Virtual IPs: *string*

Cause: Unknown errors were encountered while validating Node VIPs.

Action: Ensure all node VIPs resolve to a valid IP address.

INS-40933: Interface collection failed on node *string*.

Cause: Interface information collection failed.

Action: Be sure all nodes are accessible and have valid network interfaces defined.

INS-40934: A remote directory operation failed on node *string*: Message: *string*

Cause: n/a

Action: n/a

INS-40935: A cluster operation (For example, copy file, file exists, or other operation) failed on node *string*: Message: *string*

Cause: n/a

Action: n/a

INS-40936: A command tool operation failed on node *string*: Message: *string*

Cause: A cluster operation (for example, list interfaces) failed.

Action: Ensure that all cluster member nodes are accessible on the network.

INS-40937: The following hostnames are invalid:*string*

Cause: The hostname or names listed are invalid.

Action: Ensure that you are not providing aliases, and that the hostnames you provide are valid.

INS-40938: The installer has detected that some or all cluster member nodes of the Oracle 9i RAC database are not included in the selected list of nodes.

Cause: Some of the nodes that are cluster members of the Oracle9i RAC database are not among the nodes you selected.

Action: In the list of nodes, specify all the cluster member nodes of the Oracle9i RAC database.

INS-40939: Some of the nodes you selected are not members of the vendor cluster that is on the local server.

Cause: The installer detects that this node is a member of a vendor cluster, and that some of the nodes you selected to make members of the Oracle Clusterware cluster are not members of the vendor cluster.

Action: If you install Oracle Clusterware on a node that is a member of a vendor cluster, then all nodes that you select to be Oracle Clusterware nodes must also be members of the vendor cluster.

INS-40940: Nodes : *string* are not in the domain : *string*

Cause: Nodes are not configured on the same domain.

Action: Ensure that all nodes are configured on the same domain

INS-40941: Unable to retrieve domain information on one or more nodes.

Cause: The installer cannot collect domain information from one or more nodes you selected.

Action: Before proceeding with the installation, ensure that all selected nodes are configured on the same domain.

INS-40942: Invalid value specified for Target Hub node size.

Cause: Target Hub node size for a cluster should be an integer value between *string* and *string*.

Action: Specify a valid value for Target Hub node size.

INS-40943: No Hub nodes/Auto nodes specified.

Cause: A Flex Cluster type Oracle Clusterware can be configured only if there is at least one Hub node or Auto Node.

Action: Add a Hub node or Auto node to the configuration.

INS-40944: The length of upper bound and lower bound of ranges is not same.

Cause: n/a

Action: n/a

INS-40945: The value of upper bound is lesser than or equal to lower bound.

Cause: n/a

Action: n/a

INS-40946: The vip suffix provided has invalid characters.

Cause: The value provided for vip suffix has one or more invalid characters.

Action: Provide a value for the virtual IP suffix that contains valid characters. Valid characters for virtual IP suffix can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen(-).

INS-40947: No value was provided as the virtual IP suffix.

Cause: You did not enter a value for virtual IP suffix.

Action: Enter a valid virtual IP suffix for the node range.

INS-40949: Host Prefix cannot be left unfilled.

Cause: You did not provide a host prefix for the node range.

Action: Enter a valid host prefix.

INS-40950: Host prefix contains invalid characters.

Cause: Host prefix provided contains one or more invalid characters.

Action: Ensure that the host prefix contains valid characters. Valid characters for host prefix can be any combination of lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-40951: The lower or upper bound of the range cannot be empty.

Cause: Either the lower or the upper bound of the node range is blank.

Action: Provide valid lower and upper bound of the node range you wish to configure.

INS-40952: The lower or upper bound of the range contain invalid characters.

Cause: The lower or the upper bound of the node range contain one or more invalid characters.

Action: Ensure that the lower and upper bound of the node range contain valid numbers.

INS-40953: Local node cannot be a Leaf node.

Cause: n/a

Action: n/a

INS-40954: Local node *string* did not resolve to an IP address. Provide alternative name that resolves to an IP address.

Cause: n/a

Action: n/a

INS-40955: Local node *string* could not be resolved using TCP/IP host name lookup. It is recommended that the local node is resolvable using TCP/IP lookup. This may avoid configuration failures at a later stage.

Cause: n/a

Action: n/a

INS-40956: The specified public host *string* did not resolve to an IP address. Provide alternative name that resolves to an IP address.

Cause: n/a

Action: n/a

INS-40957: The specified public host *string* could not be resolved using TCP/IP host name lookup. It is recommended that the public host name is resolvable using TCP/IP lookup. This may avoid configuration failures at a later stage.

Cause: n/a

Action: n/a

INS-40958: Installer has detected that specified *string* (*string*) is configured with the dual stack addresses.

Cause: The specified *string* is configured with both ipv4 and ipv6 addresses.

Action: Be sure to specify a *string* which is configured with single IP address family.

INS-41101: The specified interface information is incorrect.

Cause: Either the format of the information entered was incorrect, or the interface name or subnet information was incorrect.

Action: Enter the correct interface information before proceeding

INS-41102: No public interface designated.

Cause: None of the network interfaces were designated as public.

Action: Designate at least one interface as a public interface.

INS-41103: Interface *string* has multiple subnets associated with it.

Cause: Interface *string* has been marked as both Public and Private.

Action: Designate interface *string* either as Public or Private, but not both Public and Private.

INS-41104: No Private Interface designated.

Cause: There is no interface marked as Private.

Action: Ensure that at least one interface is designated as Private.

INS-41105: *string* on subnet *string* chosen as public does not match subnet of SCAN VIP.

Cause: The chosen public interface is not on the same subnet as the SCAN VIP.

Action: Ensure the chosen public interface is on the same subnet as the SCAN VIP subnet, and that the same subnet is configured for SCAN VIPs on all cluster nodes.

INS-41106: Invalid choice for public/private interface.

Cause: The chosen public or private interface subnet is not identical on all nodes.

Action: Ensure that the subnets configured for public and private interfaces are identical on all cluster nodes.

INS-41107: The interface (*string*) chosen as Public or Private is not on a shared subnet. Nodes not defining are: *string*

Cause: The Public or Private interface on the nodes indicated are on a different subnet than the ones used on other nodes.

Action: Ensure that the specified Public or Private interface share the same subnet across the nodes.

INS-41108: *string* on subnet *string* chosen as public does not match subnet of Grid Naming Service (GNS) VIP.

Cause: The chosen public interface is not on the same subnet as the GNS VIP.

Action: Be sure that the chosen public interface is on a subnet which matches the GNS VIP subnet and is common across all cluster nodes.

INS-41109: Configured network mask *string* for the interface *string* is not same across all cluster nodes.

Cause: Installer has detected that interface *string* does not have the same netmask *string* configured on all cluster nodes.

Action: Ensure that the chosen interface has been configured with same netmask across all cluster nodes.

INS-41110: Installer has transferred the provided interface list to following format: *string*. This might be because either the Installer has detected hybrid interface configuration (both IPv4 and IPv6 configuration present) on the cluster nodes, or different interface names are configured for particular subnet on the cluster nodes. In the latter case, Installer will not consider interface names during Grid Infrastructure configuration.

Cause: n/a

Action: n/a

INS-41111: The installer has detected that multiple interfaces configured on a subnet (*string*).

Cause: You have specified generic name for the interface configured on the subnet (*string*). But installer detected that multiple interfaces configured on this subnet.

Action: Ensure that you have specified interface name appropriately.

INS-41112: Specified network interface doesn't maintain connectivity across cluster nodes.

Cause: Installer has detected that network interface *string* does not maintain connectivity on all cluster nodes.

Action: Ensure that the chosen interface has been configured across all cluster nodes.

INS-41113: Specified public and private interfaces are configured on the same subnet: *string*

Cause: Installer has detected that both public and private interfaces are configured on the same subnet.

Action: Ensure that the public and private interfaces are configured on different subnets.

INS-41114: Interface selected as Private (cluster interconnect) (*string*) is not configured with Internet Protocol version 4 (IPv4).

Cause: Installer has detected that the interface (*string*) is not configured with Internet Protocol version 4 (IPv4). Only those interfaces which are configured with Internet Protocol version 4 (IPv4) can be specified as Private(cluster interconnect) interface.

Action: Ensure that the interface selected for Private(cluster interconnect) is configured with IPv4.

INS-41115: The number of selected Private and ASM & Private interfaces (*string*) exceeds the limit.

Cause: There are more than *string* Private and ASM & Private interfaces selected.

Action: Ensure that the number of selected Private and ASM & Private interfaces does not exceed *string*.

INS-41170: You have chosen not to configure the Grid Infrastructure Management Repository. Not configuring the Grid Infrastructure Management Repository will permanently disable the Cluster Health Monitor, QoS Management, Memory Guard, and Rapid Home Provisioning features. Enabling of these features will require reinstallation of the Grid Infrastructure.

Cause: n/a

Action: n/a

INS-41204: No shared partition are available between nodes.

Cause: The specified nodes did not have at least one shared partition.

Action: Provide nodes that have at least one shared partition before proceeding with the installation.

INS-41205: Client ASM data file not specified.

Cause: To configure storage on a client ASM, a valid client data file has to be specified.

Action: Specify a valid client ASM data file to configure client ASM.

INS-41206: File name specified as client ASM data file is not a valid file.

Cause: Installer has detected that the specified client ASM data file is not a valid file, or does not exist, or is not a readable file.

Action: Specify a valid client ASM data file to configure shared ASM.

INS-41208: None of the available network subnets is marked for use by Oracle Automatic Storage Management (ASM)

Cause: At least one of the available network subnets should be configured for use by Oracle Automatic Storage Management (ASM).

Action: Configure one of the available network subnets for Oracle Automatic Storage Management (ASM) use if you intend to configure Near Oracle ASM or Client Oracle ASM

INS-41210: One of the available network subnets is marked for use by Automatic Storage Management(ASM).

Cause: This storage option does not require configuring a network subnet for use by ASM.

Action: None of the interfaces should be marked for ASM usage if you want to store OCR on shared file system or Local ASM.

INS-41212: Specified ASM client data file is invalid.

Cause: The cluster name in the ASM client data file doesn't match with the cluster name specified for this installation.

Action: The cluster name retrieved from the specified ASM client data file should match the cluster name of the client cluster. Specify the correct ASM client data file.

INS-41213: Oracle Cluster File system is not supported on windows.

Cause: n/a

Action: n/a

INS-41214: Disk group name not specified.

Cause: n/a

Action: n/a

INS-41215: No Disk groups detected on remote cluster.

Cause: Installer has not detected any diskgroups configured on the remote cluster.

Action: To configure the cluster to store OCR and Voting Disk on remote cluster, a disk group available on the remote cluster should be specified.

INS-41216: Specified disk group is not found on the remote cluster

Cause: n/a

Action: n/a

INS-41302: Normal redundancy requires three locations for the Oracle Cluster Registry.

Cause: Fewer than three locations were provided for the Oracle Cluster Registry.

Action: Specify three locations for the Oracle Cluster Registry.

INS-41303: External redundancy requires a location for the Oracle Cluster Registry.

Cause: A location for the Oracle Cluster Registry was not specified.

Action: Specify a location for the Oracle Cluster Registry.

INS-41305: Invalid characters in one or more Oracle Cluster Registry (OCR) locations.

Cause: One or more Oracle Cluster Registry (OCR) locations contained bad characters.

Action: Provide an OCR location that uses valid characters in the path.

INS-41306: Invalid Oracle Cluster Registry (OCR) Locations.

Cause: One or more Oracle Cluster Registry (OCR) locations are not valid.

Action: Provide valid OCR locations.

INS-41307: Insufficient space in shared file system for Oracle Cluster Registry (OCR).

Cause: Insufficient free space was available in the file system. Oracle Cluster Registry requires a minimum of *string* MB of free space in the file system.

Action: Enter a shared file system that has at least *string* MBs of free space.

INS-41309: The Oracle Cluster Registry (OCR) cannot be placed on a block or character device.

Cause: The Oracle Cluster Registry (OCR) location you provided is on a block or character device.

Action: Select one of the following supported locations: OCFS2 partition, or a shared NFS partition. If you intend to use block or character device, choose Oracle Automatic Storage Management (Oracle ASM) as storage option for install.

INS-41310: More than one Oracle Cluster Registry is in the same partition.

Cause: The Oracle Cluster Registry was located more than once on the same partition. For normal redundancy, Oracle recommends that you specify three locations on separate partitions for the Oracle Cluster Registry.

Action: Select separate partitions for each Oracle Cluster Registry.

INS-41311: One or more Oracle Cluster Registry (OCR) locations specified are in an existing OCR directory.

Cause: One or more Oracle Cluster Registry (OCR) locations specified were in directories with existing OCR files.

Action: Specify locations for Oracle Cluster Registry that are not in use.

INS-41312: One or more locations specified for the Oracle Cluster Registry (OCR) cannot be used.

Cause: One or more Oracle Cluster Registry (OCR) locations specified did not have proper permissions or ownership for the installation to proceed.

Action: Specify a location for Oracle Cluster Registry locations where the installation owner and oraInventory group members have read and write permissions

INS-41313: Duplicate entries found in one or more Oracle Cluster Registry (OCR) locations.

Cause: One or more Oracle Cluster Registry locations specified were duplications.

Action: Specify a unique location for each Oracle Cluster Registry location.

INS-41314: File *string* already exists. The installer will make an attempt to replace this file.

Cause: The specified OCR file already exists.

Action: You may choose a different location or let the installer replace this file. Replacing it will overwrite its current contents.

INS-41315: File *string* already exists.

Cause: The specified OCR file already exists.

Action: Ensure that the OCR file you have specify is a nonexistent file.

INS-41316: Unable to delete file *string*

Cause: The attempt to delete the file was not successful.

Action: Ensure that the user account running the installation has the permissions to replace the file.

INS-41317: Invalid Oracle Cluster Registry (OCR) locations.

Cause: One or more Oracle Cluster Registry (OCR) locations were not valid.

Action: Provide valid OCR locations.

INS-41318: One or more files *string* already exist. The installer will attempt to replace existing files.

Cause: One or more specified files already exist.

Action: Either choose a different storage location, or allow the installer to overwrite this location and remove any existing files.

INS-41319: File(s) *string* already exist(s).

Cause: The specified shared location is in use.

Action: Ensure that the location you provided is not already in use, and that any past Oracle Clusterware configuration is completely removed from the partition.

INS-41320: Unable to delete one or more files *string*.

Cause: The attempt to delete files was unsuccessful.

Action: Ensure that the user account running the installation has the permissions to replace files.

INS-41321: Invalid Oracle Cluster Registry (OCR) location.

Cause: The installer detects that the storage type of the location (*string*) is not supported for Oracle Cluster Registry.

Action: Provide a supported storage location for the Oracle Cluster Registry.

INS-41322: The provided OCR Location (*string*) can not be configured.

Cause: *string* name is reserved for the backup locations for OCR.

Action: Provide the OCR location name other than
week.ocr,data.ocr,backup00.ocr,backup01.ocr,backup02.ocr.

INS-41502: Insufficient number of voting disk locations provided for normal redundancy configuration.

Cause: You did not provide enough separate locations for voting disk files. To provide normal redundancy, you must specify three separate locations for voting disk files.

Action: Specify three separate locations for voting disk files for normal redundancy.

INS-41503: Missing voting disk file locations for external redundancy configuration.

Cause: A voting disk file location was not specified. For external redundancy, you must specify a location for the voting disk file.

Action: Specify one voting disk file location for external redundancy.

INS-41505: The voting disk file locations contain one or more invalid characters.

Cause: n/a

Action: n/a

INS-41506: One or more voting disk file locations are not valid.

Cause: One or more voting disk file locations were not placed in an existing directory.

Action: Provide valid voting disk file locations.

INS-41508: More than one voting disk file is located on the same partition.

Cause: Normal redundancy for voting disk files requires that each file is placed on a different partition, to avoid a single point of failure.

Action: Specify three locations on separate physical partitions to configure normal redundancy for voting disk files.

INS-41509: Duplicate locations used for one or more voting disk file locations.

Cause: One or more voting disk file locations you provide are duplicate. Each voting disk location must be on separate devices.

Action: Specify a location on separate devices for each voting disk file.

INS-41510: One or more voting disk file locations are the same as an OCR location.

Cause: One or more voting disk file locations you provided are the same as an OCR location. Voting disk files cannot be on the same location as Oracle Cluster Registry (OCR) locations.

Action: Specify voting disk file locations that are different from Oracle Cluster Registry (OCR) locations.

INS-41511: One or more of the locations you specified for voting disk files are the same as an Oracle 9i quorum location.

Cause: Oracle 9i quorum disks are located on one or more of the locations you specified for voting disk files.

Action: Provide new locations for voting disk files. You cannot reuse an Oracle9i quorum disk location.

INS-41512: Voting disk files cannot be located on block or character devices.

Cause: The voting disk file location you provided is on a block or character device.

Action: Select one of the following supported locations: Oracle Automatic Storage Management, an OCFS2 partition, or a shared NFS partition.

INS-41513: Voting disk file locations cannot be in a directory with existing voting disks.

Cause: One or more voting disk file locations you provided have an existing voting disk file.

Action: Specify a new voting disk file location.

INS-41514: One or more locations you specified for voting disk files cannot be used.

Cause: One or more locations you specified for placing voting disk files did not have proper permissions or ownership for installation to proceed.

Action: Specify voting disk file locations where the user account running the installation and oraInventory group members have read and write privileges.

INS-41515: Insufficient space in shared file system for voting disk file.

Cause: Insufficient space was available in the storage location for a voting disk file. Voting disk files require a minimum of *string* MB of free space.

Action: Enter a shared storage location that has at least *string* MB of free space.

INS-41516: File *string* already exists. The installer will make an attempt to replace this file.

Cause: The specified voting disk file already exists.

Action: You may choose a different location or let the installer replace this file. Replacing it will overwrite its current contents.

INS-41517: File *string* already exists.

Cause: The specified voting disk file already exists.

Action: Ensure that the location you specify for a voting disk file does not already have a voting disk file in that location.

INS-41518: Unable to delete file *string*

Cause: The attempt to delete the file was not successful.

Action: Ensure that the user account running this installation has proper permissions in this storage area to replace the file.

INS-41519: One or more voting disk file locations are not valid.

Cause: One or more voting disk file locations may not be shared on all nodes.

Action: Provide valid voting disk file locations on shared paths and directories.

INS-41520: For high availability, Oracle recommends that you have this storage mirrored at the hardware level. Alternatively, you can select "Normal Redundancy" option and specify three locations that are on different disks.

Cause: n/a

Action: n/a

INS-41521: Invalid Voting Disk location.

Cause: The installer detects that the storage type of the location (*string*) is not supported for voting disk files.

Action: Provide a supported storage location for the voting disk file.

INS-41702: No nodes selected for upgrade.

Cause: Node selection was blank.

Action: Select a list of nodes to upgrade with the local node.

INS-41703: The local node is not selected as one of the nodes for upgrade.

Cause: The nodes selected for upgrade did not include the local node.

Action: Select the local node (the node from which you are running the installer) as one of the nodes to upgrade.

INS-41704: Selected nodes should be members of the same cluster. The following nodes are not in the cluster: *string*.

Cause: One of more nodes selected were not in the same cluster.

Action: Select nodes from the same cluster, or exclude the following nodes:*string*

INS-41705: The installer has detected that one or more nodes (*string*) that are part of the cluster are down.

Cause: n/a

Action: n/a

INS-41706: Only subset of nodes selected for upgrade.

Cause: You have chosen a subset of the cluster nodes for the upgrade.

Action: During installation, the software will be copied to all cluster nodes. However, during installation setup, you are prompted to run the rootupgrade script only on the nodes you selected for upgrade. To complete the upgrade, run the rootupgrade script on the remaining nodes. You do not need to start the installer again to upgrade the remaining nodes.

INS-41707: Not all cluster member nodes are selected for upgrade.

Cause: The installer detects that this server has an earlier release of Oracle Grid Infrastructure software installed on this system. However, you have selected to upgrade a subset of the cluster nodes.

Action: To complete the upgrade, select all the nodes that are part of the Oracle Grid Infrastructure cluster.

INS-41708: Oracle Automatic Storage Management (Oracle ASM) is not selected for upgrade.

Cause: The installer detects that an earlier release of Oracle ASM is installed on this server. Oracle ASM needs to be upgraded as part of this installation.

Action: Select Oracle ASM upgrade option to complete the installation.

INS-41709: Oracle Automatic Storage Management (Oracle ASM) is not installed on this server.

Cause: You selected to upgrade Oracle ASM. However, the installer does not detect Oracle ASM on this server.

Action: To continue with the installation, deselect the option to upgrade Oracle ASM.

INS-41710: Oracle Automatic Storage Management (Oracle ASM) configured in your cluster cannot be upgraded in a rolling manner. During the upgrade process, any databases using the active Oracle ASM will be forcibly shutdown.

Cause: The installer has detected that the version of the configured instance of Oracle ASM is not compatible for rolling upgrade to this release of Oracle Grid Infrastructure.

Action: All the databases using the active Oracle ASM will go down during this installation. Plan for databases to be unavailable during the time when the installer is running configuration tools.

INS-41711: The upgrade process upgrades the stack one node at a time, even though you selected to upgrade all nodes. Database service will be disrupted for any database that uses Oracle Automatic Storage Management (Oracle ASM), and that is not managed by Oracle Clusterware, or that uses Oracle Clusterware manual management policy. All other databases and services should not be affected, and should continue to function. If this is not desirable, then before proceeding with the upgrade, ensure that Oracle Clusterware manages databases using Oracle ASM, and set the automatic management policy on databases managed by Oracle Clusterware.

Cause: n/a

Action: n/a

INS-41712: Installer has detected that the Oracle Clusterware software on this cluster is not functioning properly on the following nodes *string*.

Cause: The Oracle Clusterware software configured on the system is not in a suitable state to upgrade.

Action: Ensure that the Oracle Clusterware software is in a consistent state to perform an upgrade.

INS-41713: The installer has detected that one or more nodes (*string*) that are part of the cluster are down. Installer will perform upgrade of Grid Infrastructure only on the nodes that are up. The remaining nodes can be upgraded later, following the manual steps as detailed in the documentation.

Cause: n/a

Action: n/a

INS-41714: The installer has detected that you are performing a non-rolling upgrade. Oracle recommends that you perform rolling upgrade of Oracle Grid Infrastructure operated in Flex Cluster Mode.

Cause: n/a

Action: n/a

INS-41802: Unable to determine release of Oracle Automatic Storage Management running from home *string*.

Cause: An Oracle Automatic Storage Management (Oracle ASM) home was found, but the Oracle ASM instance was down. The installer was unable to determine the Oracle ASM release.

Action: Ensure that the Oracle ASM instance installed in home *string* is up, and then retry the installation.

INS-41803: An entry for Oracle ASM is found in the system registry or oratab, but it is not associated with a software home location.

Cause: An Oracle ASM entry was listed in the system registry or oratab, but Oracle ASM home *string* was missing.

Action: Ensure that either the oratab or the system registry is correct, or that the inventory is not corrupted.

INS-41804: An instance of a prior release Oracle ASM is running.

Cause: There is an Oracle ASM instance already running on the server.

Action: Upgrade the existing Oracle ASM instance to the current release.

INS-41806: Virtual IP name cannot be the same as the Single Client Access Name (SCAN): *string*

Cause: The name you provided for the virtual IP name is the same name used as the SCAN.

Action: Enter a name for the virtual IP that is different from the name you entered for the SCAN.

INS-41807: The installer has detected that Oracle Clusterware is not running on the following nodes: *string*.

Cause: Either there was an error in starting the Oracle Clusterware stack on the specified nodes, or the root scripts on the specified nodes were not run.

Action: Run the root scripts on the nodes listed. If root scripts have already been run on these nodes, then examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting

INS-41808: Possible invalid choice for OSASM Group.

Cause: The name of the group you selected for the OSASM group is commonly used to grant other system privileges (For example: asmdba, asmoper, dba, oper).

Action: Oracle recommends that you designate asmadmin as the OSASM group.

INS-41809: Possible invalid choice for OSDBA Group.

Cause: The group name you selected as the OSDBA for ASM group is commonly used for Oracle Database administrator privileges.

Action: Oracle recommends that you designate asmdba as the OSDBA for ASM group, and that the group should not be the same group as an Oracle Database OSDBA group.

INS-41810: Possible invalid choice for OSOPER Group.

Cause: The group name you selected as the OSOPER for ASM group is commonly used for Oracle Database administrator privileges.

Action: Oracle recommends that you designate asmoper as the OSOPER for ASM group, and that the group should not be the same group as an Oracle Database OSOPER group.

INS-41811: OSDBA for ASM and OSOPER for ASM groups are the same OS group.

Cause: The groups you selected granting the OSDBA for ASM and OSOPER for ASM system privileges are the same group.

Action: Oracle recommends that you designate different OS groups to grant the OSDBA for ASM and OSOPER for ASM system privileges.

INS-41812: *string* and OSASM are the same OS group.

Cause: The chosen values for *string* group and the chosen value for OSASM group are the same.

Action: Select an OS group that is unique for ASM administrators. The OSASM group should not be the same as the OS groups that grant privileges for Oracle ASM access, or for database administration.

INS-41813: OSDBA for ASM, OSOPER for ASM, and OSASM are the same OS group.

Cause: The group you selected for granting the OSDBA for ASM group for database access, and the OSOPER for ASM group for startup and shutdown of Oracle ASM, is the same group as the OSASM group, whose members have SYSASM privileges on Oracle ASM.

Action: Choose different groups as the OSASM, OSDBA for ASM, and OSOPER for ASM groups.

INS-41814: The installer has detected that some of the services of Oracle Grid Infrastructure are not running on this system.

Cause: There may have been an error in starting the Oracle Grid Infrastructure services, or you may not have run the root scripts starting these services on this server.

Action: Confirm that you have run the root scripts on this server. If the root scripts have been run, then examine the log file *string* to determine the reason for the services failing to start.

INS-41815: The installer has detected that Oracle Clusterware is not upgraded to *string* version.

Cause: Either there was an error in starting the Oracle Clusterware stack on some of the nodes, or the root scripts on some nodes were not run. If the Clusterware is upgraded from earlier versions, root upgrade script might not be run successfully on the specified nodes.

Action: Run the root scripts on the nodes listed. If root scripts have already been run on these nodes, then examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting.

INS-41816: The installer has detected that Oracle Clusterware is not upgraded to *string* version.

Cause: There might be an error in starting the Oracle Clusterware stack on some of the nodes or there might be unreachable node(s) which are part of Oracle Clusterware.

Action: Examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not upgraded to current release version. The unreachable nodes can be upgraded by following the manual steps as detailed in the documentation.

INS-41817: The installer has detected that Oracle Clusterware is not running on the following nodes: *string*.

Cause: There may have been an error in starting the Oracle Clusterware stack on the specified nodes.

Action: Examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting.

INS-41818: The installer has detected that some of the services of Oracle Grid Infrastructure are not running on this system.

Cause: There may have been an error in starting the Oracle Grid Infrastructure services.

Action: Examine the log file *string* to determine the reason for the services failing to start.

INS-41871: The user account you are using to install the software is not a member of the following OS groups: *string*

Cause: The installation user account must be a member of all groups required for installation.

Action: Change the installation users group memberships to include the required OS system privileges groups, or select system privileges OS groups in which the installation owner is a member.

INS-41872: The OS group you selected as the ASM Administration Operator Group (ASMOPER) may not exist on the server.

Cause: The installer cannot find the group you selected to be the ASMOPER group in the groups defined on the server, or in the Network Information Service (NIS).

Action: Confirm that the group you want to use as the ASMOPER group exists on the server, or in NIS. Create or specify another group if it does not exist.

INS-41873: Invalid value specified for OSOPER Group.

Cause: OS group *string* specified for OSOPER Group contains one or more invalid characters.

Action: Remove the invalid characters (*string*) from *string* or select an existing OS Group for OSOPER Group.

INS-41874: Oracle ASM Administrator (OSASM) Group specified is same as the inventory group.

Cause: Operating system group *string* specified for OSASM Group is same as the inventory group.

Action: It is not recommended to have OSASM group same as inventory group. Select any of the group other than the inventory group to avoid incorrect configuration.

INS-41875: Oracle ASM Administrator (OSASM) Group specified is same as the users primary group.

Cause: Operating system group *string* specified for OSASM Group is same as the users primary group.

Action: It is not recommended to have OSASM group same as primary group of user as it becomes the inventory group. Select any of the group other than the primary group to avoid misconfiguration.

INS-41876: The node listener user name provided cannot be root.

Cause: n/a

Action: n/a

INS-41877: The node listener user name provided cannot be same as the installing user.

Cause: n/a

Action: n/a

INS-41878: The node listener user ('*string*') provided does not exist on nodes which are provided for cluster configuration.

Cause: n/a

Action: n/a

INS-41879: User name for node listener was not provided for clusterware configuration.

Cause: n/a

Action: n/a

INS-41880: User for node listener cannot be a member of Oracle ASM Administrator (OSASM) group.

Cause: n/a

Action: n/a

INS-41881: Installer has detected that the group specified for *string* is not same as the group retrieved from the current configuration of grid software. The upgrade operation may not be successful if the same group name is not selected.

Cause: n/a

Action: n/a

INS-41882: The node listener user name provided cannot be nobody.

Cause: n/a

Action: n/a

INS-41901: The Oracle Grid Infrastructure Typical installation cannot be performed on this system.

Cause: The installer has detected the existence of vendor-specific clusterware. The typical Oracle Grid Infrastructure installation is a simplified configuration that is not designed to co-exist with clusterware other than Oracle Clusterware.

Action: Select Advanced Installation for Oracle Grid Infrastructure. This option allows you to specify configuration information required for Oracle Clusterware to operate with other vendor clusterware.

INS-41902: The Oracle Grid Infrastructure Typical installation cannot be performed on this system.

Cause: The installer has detected the existence of Oracle RAC 9i release 9.x on this server. The Oracle Grid Infrastructure Typical installation is a simplified configuration that is not designed to support older versions of Oracle RAC.

Action: Select Advanced Installation for Oracle Grid Infrastructure. This option allows you to specify configuration information required for Oracle Clusterware to operate with Oracle RAC release 9.x.

INS-42001: The same drive letter *string* cannot be assigned to more than one partition

Cause: n/a

Action: n/a

INS-42002: The specified partition cannot be used.

Cause: The specified partition was selected for storing the software binaries.

Action: Instead, choose a location that is formatted for storing data files.

INS-42003: No partitions selected

Cause: No partitions were selected or partition details provided were incomplete.

Action: Specify one or more partitions. For each partition, select the format option and drive letter you want to have assigned to that partition.

INS-42004: No free drive letters available

Cause: The local server did not have any available drive letters to assign to partitions.

Action: Make drive letters available on the server, and then restart the installer.

INS-42005: The drive letter is not assigned to one or more partitions

Cause: Each partition you select must have an assigned drive letter.

Action: Ensure all partitions you want to use are configured with drive letters.

INS-42006: Selected drive letter (*string*) is invalid or not available for usage.

Cause: Either the drive letter is invalid, or it is already assigned to an existing partition.

Action: Select a valid drive letter.

INS-42011: The operating system group specified for oraInventory group is invalid.

Cause: The user account running the installation must have the oraInventory group as its primary group.

Action: Change the oraInventory group to the primary group of the installation owner account, or change the installation owner groups so that the group you want to use for the oraInventory group is the primary group of the installation owner.

INS-42012: The current Grid home is not registered in the central inventory on this host.

Cause: The wizard finds that this Grid home is not registered in the central inventory.

Action: Register the Grid home in the central inventory by using a cloning operation, or by using an attach-home operation.

INS-42013: Installation user cannot configure the Grid home.

Cause: The wizard detects that the existing Grid home was not installed or cloned using the current user id: *string*.

Action: Either restart the wizard as the user account that was used previously to install the Grid home, or re-clone the Grid home using the current user account.

INS-42014: Oracle Grid Infrastructure cannot be configured.

Cause: The wizard detects that Oracle Grid Infrastructure is already configured on this server.

Action: Before you can proceed, you must completely remove the configured instance.

INS-42015: File missing from Grid home: *string*

Cause: The installer cannot find the specified file in the Grid home. The wizard requires this file to be present in the Grid home before it can proceed.

Action: Restore the home by re-cloning the home, or re-install the software from installation media.

INS-42016: The current Grid home is not registered in the central inventory on the following nodes: *string*

Cause: The wizard does not find this Grid home to be registered with the central inventory on some or all of the nodes specified.

Action: Register the Grid home on the specified nodes with the central inventory, either by using a cloning operation, or by using an attach-home operation. Restart the wizard after fixing this issue.

INS-42017: The Grid home is inconsistent on the following nodes: *string*

Cause: The wizard detects that the Grid home is inconsistent on some or all of the nodes specified. Review the log file for further details.

Action: Ensure that the Grid home is consistent on all nodes.

INS-42018: Specified disk group is invalid.

Cause: The installer detects that the specified disk group is not on the discovery path you provided.

Action: For the selected disks, specify a valid disk group name, to which these disk previously were assigned. Also ensure that the discovery path you provide includes the disks.

INS-42019: The wizard is unable to detect a configured prior release instance of Oracle Grid Infrastructure for a cluster or Cluster Ready Services.

Cause: You can only use Oracle Grid Infrastructure Configuration Wizard to upgrade earlier releases of Oracle Grid Infrastructure for a cluster or Cluster Ready Services.

Action: Ensure Oracle Grid Infrastructure for a cluster or Cluster Ready Services is configured properly before using the configuration wizard. To perform any other upgrade, use the Oracle Grid Infrastructure installer, or run root configuration scripts directly.

INS-42020: The Wizard is unable to detect the user of Grid home.

Cause: The wizard is not able to detect the user of the existing Grid home. This might be because configuration file (*string*) is modified/corrupted in the Grid home.

Action: Verify the correctness of the configuration file. If the file is corrupted, either restore the home by re-cloning the home or re-install the software from installation media.

INS-42021: Multibyte characters in SCAN Name

Cause: In Typical install SCAN Name is also used as Cluster Name. The SCAN name contains multibyte characters which are invalid for Cluster Name.

Action: Ensure that SCAN Name contains valid characters for Cluster Name. Valid characters for Cluster Name can be lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-42022: Multibyte characters in Cluster Name.

Cause: Multibyte characters are not allowed in Cluster Name.

Action: Ensure the Cluster Name contains valid characters. Valid characters for Cluster Name can be lower and uppercase alphanumeric characters (a - z, A - Z, 0 - 9), and hyphen (-).

INS-42023: Invalid option specified for Oracle Grid Infrastructure Wizard.

Cause: The Oracle Grid Infrastructure Wizard only supports Configuring Oracle Grid Infrastructure for a cluster or Upgrading an existing Grid Infrastructure.

Action: Ensure that you select one of the supported options.

INS-42024: Installer has detected that the group configured for *string* privilege in the current home does not match with the group name retrieved (*string*) from the home where earlier version of Oracle Clusterware is configured presently.

Cause: n/a

Action: n/a

INS-42025: Grid Infrastructure Home is not suitable to be configured on this cluster

Cause: The Grid Infrastructure Home is registered with the local user. Configuration cannot continue.

Action: Ensure that the Grid Infrastructure Home is registered with a secure domain user for configuration to continue.

INS-42099: Oracle Service username is not specified.

Cause: For Management Database option its mandatory to specify Oracle Service username.

Action: Specify Oracle Service username.

INS-43001: Cluster type not specified

Cause: Either cluster type is not specified or invalid value is specified

Action: Specify a valid cluster type.

INS-43002: Big Cluster cannot be configured on this host.

Cause: Installer has detected 9i Oracle Real Application Cluster Database on this host. Flex Cluster cannot be configured on a host that has 9i Oracle RAC database configured on it.

Action: You must first configure normal Oracle Clusterware and migrate to Flex Cluster later. Alternatively you can configure Flex cluster after removing 9i Oracle RAC Database.

INS-43003: Big Cluster cannot be configured on this host.

Cause: Installer has detected operating system provided clustering software on this host. Flex Cluster cannot be configured on a host that is managed by operating system provided clustering software.

Action: You can only configure normal Oracle Clusterware on hosts managed by operating system provided clustering software. Alternatively, you can configure Flex Cluster after disabling the operating system provided clustering software.

INS-43004: Big Cluster cannot be configured on this host.

Cause: Installer has detected Oracle Clusterware on this host. Flex Cluster cannot be configured on a host that already has Oracle Clusterware installed.

Action: Remove the existing Oracle Clusterware software before choosing to configure Flex Cluster.

INS-43021: All the nodes (*string*) are down in the last batch.

Cause: Installer has detected that all the nodes specified in the last batch are down. There should be at least one node up and running to complete the Grid Infrastructure upgrade.

Action: Ensure that at least one node in the last batch is running to complete the upgrade operation.

INS-43022: You have selected to execute the root script manually. If some of the nodes are not reachable at the time of upgrade root script execution and if you would want to complete the Grid Infrastructure upgrade on the reachable nodes, you may be required to rerun the *string* with -force flag from the last node after you have completed the execution of this script on all the reachable nodes. The remaining unreachable nodes can be upgraded later, following the manual steps as detailed in the documentation.

Cause: n/a

Action: n/a

INS-43023: Specified sudo user name ('*string*') can't be used to execute configuration script(s).

Cause: Only current installation user name is allowed to execute configuration script(s) using sudo option.

Action: Ensure that you specify the sudo user name same as the current installation user name.

INS-43024: n/a

Cause: n/a

Action: n/a

INS-43025: Installer has detected that there are nodes of different role in batch(*string*).

Cause: n/a

Action: n/a

INS-43026: Installer has detected that batch(*string*) contains LEAF nodes and batch(*string*) contains HUB nodes.

Cause: n/a

Action: n/a

INS-43041: CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter was not specified.

Cause: The CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter was not provided for performing addnode operation.

Action: Ensure that CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter is passed. Refer to installation guide for more information on the syntax of passing CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter.

INS-43042: The cluster nodes *string* specified for addnode is already part of a cluster.

Cause: Cluster nodes specified already has clusterware configured.

Action: Ensure that the nodes that do not have clusterware configured are provided for addnode operation.

INS-43043: Parameters specified for addnode operation are missing details for nodes.

Cause: Some of the parameters passed for addnode operation have incomplete details of the node to be added.

Action: Ensure that the nodes details are appropriately specified and each node have the associated details in parameters.

INS-43044: Addnode operation cannot be performed from a Leaf node.

Cause: Leaf node cannot be local node while performing addnode operation.

Action: Ensure that the addnode operation is performed from a Hub node.

INS-43045: *string* parameter was not specified.

Cause: The *string* parameter was not provided for performing addnode operation.

Action: Ensure that *string* parameter is passed. Refer to installation guide for more information on the syntax of passing CLUSTER_NEW_VIRTUAL_HOSTNAMES parameter.

INS-43046: The Oracle home location contains directories or files on following remote nodes:*string*.

Cause: n/a

Action: n/a

INS-43047: Clusterware configured in Auto mode cannot have nodes of type HUB or LEAF.

Cause: n/a

Action: n/a

INS-43048: An Auto node cannot be added to a cluster having only Hub and Leaf nodes.

Cause: n/a

Action: n/a

INS-43049: Hub nodes cannot be added to the cluster as it is already having *string* Hub nodes which is the maximum number of Hub nodes for a big cluster.

Cause: n/a

Action: n/a

INS-43050: Installer has detected that the clusterware configured on the system is not running from the grid home on which addnode is being performed.

Cause: n/a

Action: n/a

INS-43051: Virtual Hostname was not specified for performing addnode operation.

Cause: n/a

Action: n/a

INS-43052: The Oracle home location contains directories or files on following remote nodes:*string*.

Cause: n/a

Action: n/a

INS-43066: The installer has detected that Oracle Clusterware is not running on the following nodes: *string*. Ignore the warning if any policy managed databases software are not extended to new nodes yet.

Cause: Either there was an error in starting the Oracle Clusterware stack on the specified nodes, or the root scripts on the specified nodes were not run.

Action: Run the root scripts on the nodes listed. If root scripts have already been run on these nodes, then examine the log file *string* on each failed node to determine the reason for the Oracle Clusterware stack not starting

INS-43080: Some of the configuration assistants failed, were cancelled or skipped.

Cause: n/a

Action: n/a

INS-43100: Insufficient space available in the ASM diskgroup *string*.

Cause: n/a

Action: n/a

INS-43101: Insufficient space available in shared file system for Oracle Cluster Registry (OCR) Location *string*.

Cause: n/a

Action: n/a

INS-43102: You cannot upgrade Oracle Grid Infrastructure as Built-In Account.

Cause: The installer has detected that the Oracle Home user of the active Oracle Grid Infrastructure home is (*string*). Oracle GI cannot be upgraded using Built-In Account for the current installation.

Action: Specify (*string*) as the Oracle Home User to perform the upgrade.

INS-43103: Oracle Grid Infrastructure Home is not suitable for upgrade.

Cause: The wizard has detected that the Oracle Home user of the active Oracle Grid Infrastructure home is *string*, whereas the Oracle Home user of the current home is Built-In Account.

Action: Re-install the Oracle Grid Infrastructure software using the appropriate Oracle Home User to perform the upgrade.

INS-43104: If you intend to use this Oracle Grid Infrastructure home to upgrade the active instance of Oracle Grid Infrastructure, then the specified user is invalid.

Cause: The installer has detected that the specified Oracle Home user does not match the Oracle Home user of the active Oracle Grid Infrastructure home(*string*).

Action: Specify (*string*) as the Oracle Home User to be able to upgrade the active Oracle GI to this home.

INS-43105: Specified Oracle Home User (*string*) is invalid.

Cause: The installer has detected that the specified Oracle Home user does not match the Oracle Home user of the active Oracle Grid Infrastructure home (*string*).

Action: Specify (*string*) as the Oracle Home User to perform the upgrade.

INS-43106: Oracle Grid Infrastructure Home is not suitable for upgrade

Cause: The wizard has detected that the Oracle Home user of this home (*string*) does not match the Oracle Home user of the active Oracle Grid Infrastructure home (*string*).

Action: Re-install the Oracle Grid Infrastructure software using the appropriate Oracle Home User to perform the upgrade.

INS-43110: Empty value provided for OMS Host.

Cause: n/a

Action: n/a

INS-43111: Empty value provided for Enterprise Manager Admin password.

Cause: n/a

Action: n/a

INS-43112: Empty value provided for Enterprise Manager Admin user.

Cause: n/a

Action: n/a

INS-43113: Empty value provided for OMS Port.

Cause: n/a

Action: n/a

INS-43114: Unable to connect to Enterprise Manager Cloud Control.

Cause: Invalid connection information specified.

Action: Specify valid connection information.

JMS-00101 to JMS-00256

JMS-00101: Invalid delivery mode {0}

Cause: The delivery mode is not supported

Action: The valid delivery mode is `AQjmsConstants.PERSISTENT` or `AQjmsConstants.NON_PERSISTENT`

JMS-00102: Feature not supported {0}

Cause: This feature is not supported in the current release

Action: n/a

JMS-00104: Message Payload must be specified

Cause: The message payload was null

Action: Specify a non-null payload for the message

JMS-00105: Agent must be specified

Cause: `AQjmsAgent` object was null

Action: Specify a valid `AQjmsAgent` representing the remote subscriber

JMS-00106: Cannot have more than one open Session on a JMSConnection

Cause: There is already one open jms session on the connection Cannot have more than one open session on a connection

Action: Close the open session and then open a new one

JMS-00107: Operation not allowed on {0}

Cause: The specified operation is not allowed on this object

Action: n/a

JMS-00108: Messages of type {0} not allowed with Destinations containing payload of type {1}

Cause: There was a mismatch between the message type being used and the payload type specified for the destination

Action: Use the message type that maps to the payload specified for the queue table that contains this destination

JMS-00109: Class not found: {0}

Cause: The specified class was not found

Action: Make sure your `CLASSPATH` contains the class

JMS-00110: Property {0} not writeable

Cause: An attempt was made to update a read-only message header field or property

Action: n/a

JMS-00111: Connection must be specified

Cause: The connection object was null

Action: Specify a non-null jdbc connection

JMS-00112: Connection is invalid

Cause: The jdbc connection is invalid

Action: Specify a non-null oracle jdbc connection

JMS-00113: Connection is in stopped state

Cause: An attempt was made to receive messages on a connection that is in stopped state

Action: Start the connection

JMS-00114: Connection is closed

Cause: An attempt was made to use a Connection that has been closed

Action: Create a new connection

JMS-00115: Consumer is closed

Cause: An attempt was made to use a Consumer that has been closed

Action: Create a new Message Consumer

JMS-00116: Subscriber name must be specified

Cause: Subscriber name was null

Action: Specify a non-null subscription name

JMS-00117: Conversion failed - invalid property type

Cause: An error occurred while converting the property to the requested type

Action: Use the method corresponding to the property data type to retrieve it

JMS-00119: Invalid Property value

Cause: The property value specified is invalid

Action: Use an appropriate type of value for the property being set

JMS-00120: Dequeue failed

Cause: An error occurred while receiving the message

Action: See message inside the JMSEException and linked SQLException for more information

JMS-00121: DestinationProperty must be specified

Cause: A null AQjmsDestinationProperty was specified while creating a queue/topic

Action: Specify a non-null AQjmsDestinationProperty for the destination

JMS-00123: Interval must be at least {0} seconds

Cause: An invalid interval was specified

Action: Specify an interval value that is greater than or equal to 1 second

JMS-00124: Invalid Dequeue mode

Cause: Invalid dequeue mode was specified

Action: Valid Dequeue modes are AQConstants.DEQUEUE_BROWSE, AQConstants.DEQUEUE_REMOVE, AQConstants.DEQUEUE_LOCKED, AQConstants.DEQUEUE_REMOVE_NODATA

JMS-00125: Invalid Queue specified

Cause: An invalid Queue object was specified

Action: Specify a valid Queue handle

JMS-00126: Invalid Topic specified

Cause: An invalid Topic object was specified

Action: Specify a valid Topic handle

JMS-00127: Invalid Destination

Cause: An invalid destination object was specified

Action: Specify a valid destination (Queue/Topic) object

JMS-00128: Invalid Navigation mode

Cause: An invalid navigation mode was specified

Action: The valid navigation modes are
AQjmsConstants.NAVIGATION_FIRST_MESSAGE,
AQjmsConstants.NAVIGATION_NEXT_MESSAGE,
AQjmsConstants.NAVIGATION_NEXT_TRANSACTION

JMS-00129: Invalid Payload type

Cause: There was a mismatch between the message type being used and the payload type specified for the destination

Action: Use the message type that maps to the payload specified for the queue table that contains this destination. For ADT messages, use the appropriate CustomDatum/ ORADData factory to create the message consumer

JMS-00130: JMS queue cannot be multi-consumer enabled

Cause: An attempt was made to get an AQ multi-consumer queue as a JMS queue

Action: JMS queues cannot be multi-consumer enabled

JMS-00131: Session is closed

Cause: An attempt was made to use a session that has been closed

Action: Open a new session

JMS-00132: Maximum number of properties (100) exceeded, message has {0} properties

Cause: Maximum number of properties (100), including provider-specific properties, for the message has been exceeded

Action: Reduce the number of user defined properties

JMS-00133: Message must be specified

Cause: Message specified was null

Action: Specify a non-null message

JMS-00134: Name must be specified

Cause: Queue or Queue table Name specified was null

Action: Specify a non-null name

JMS-00135: Driver {0} not supported

Cause: The specified driver is not supported

Action: Valid drivers are oci8 and thin. To use the kprb driver get the kprb connection using getDefaultConnection() and use the static createTopicConnection and createQueueConnection methods

JMS-00136: Payload factory can only be specified for destinations with ADT payloads

Cause: A CustomDatumFactory/ORADDataFactory was specified for consumers on destinations not containing ADT payloads

Action: This field must be set to null for destinations containing payloads of type SYS.AQ\$_JMS_TEXT_MESSAGE, SYS.AQ\$_JMS_BYTES_MESSAGE, SYS.AQ\$_JMS_MAP_MESSAGE, SYS.AQ\$_JMS_OBJECT_MESSAGE, SYS.AQ\$_JMS_STREAM_MESSAGE

JMS-00137: Payload factory must be specified for destinations with ADT payloads

Cause: CustomDatumFactory/ORADDataFactory was not specified for destinations containing ADT payloads

Action: For destinations containing ADT messages, a CustomDatumFactory/ORADDataFactory for a java class that maps to the SQL ADT type of the destination must be specified

JMS-00138: Producer is closed

Cause: An attempt was made to use a producer that has been closed

Action: Create a new Message Producer

JMS-00139: Property name must be specified

Cause: Property name was null

Action: Specify a non-null property name

JMS-00140: Invalid System property

Cause: Invalid system property name specified.

Action: Specify one of the valid JMS system properties

JMS-00142: JMS topic must be created in multi-consumer enabled queue tables

Cause: An attempt was made to create a JMS topic in a single-consumer queue table

Action: JMS topics can only be created in queue tables that are multi-consumer enabled

JMS-00143: Queue must be specified

Cause: Null queue was specified

Action: Specify a non-null queue

JMS-00144: JMS queue cannot be created in multi-consumer enabled queue tables

Cause: An attempt was made to create a JMS queue in a multi-consumer queue table

Action: JMS queues can only be created in queue tables that are not multi-consumer enabled

JMS-00145: Invalid recipient list

Cause: The recipient list specified was empty

Action: Specify a recipient list with at least one recipient

JMS-00146: Registration failed

Cause: An error occurred while registering the type in the type map

Action: n/a

JMS-00147: Invalid ReplyTo destination type,

Cause: The ReplyTo destination object is invalid

Action: The ReplyTo destination must be of type AQjmsAgent, or AQjmsDestination. If AQjmsAgent is used, its "name" must not be "JMSReplyTo" (which is considered a reserved name to be used for AQjmsDestination objects). If AQjmsDestination is used, it must be serializable into a string (and vice-versa).

JMS-00148: Property name size exceeded

Cause: The property name is greater than the maximum size allowed

Action: Specify a property name that is less than 100 characters

JMS-00149: Subscriber must be specified

Cause: Subscriber specified was null

Action: Specify a non-null subscriber

JMS-00150: Property not supported

Cause: An attempt was made to use a property that is not supported

Action: n/a

JMS-00151: Topics cannot be of type EXCEPTION

Cause: Topics cannot be of type AQjmsConstants.EXCEPTION

Action: Specify topics to be of type AQjmsConstants.NORMAL

JMS-00153: Invalid System property type

Cause: The type of the value specified does not match the type defined for the system property being set

Action: Use the correct type for the setting the system property

JMS-00154: Invalid value for sequence deviation

Cause: The sequence deviation is invalid

Action: Valid values are AQEnqueueOption.DEVIATION_BEFORE, AQEnqueueOption.DEVIATION_TOP

JMS-00155: AQ Exception {0}

Cause: An error occurred in the AQ java layer

Action: See the message inside the JMSEException and the linked exception for more information

JMS-00156: Invalid Class {0}

Cause: Class specified is invalid

Action: make sure your CLASSPATH has the specified class

JMS-00157: IO Exception {0}

Cause: IO exception

Action: See message is JMSEException for details

JMS-00158: SQL Exception {0}

Cause: SQL Exception

Action: See message inside linked SQLException for details

JMS-00159: Invalid selector {0}

Cause: The selector specified is either invalid or too long

Action: Check the syntax of the selector

JMS-00160: EOF Exception {0}

Cause: EOF exception occurred while reading the byte stream

Action: n/a

JMS-00161: MessageFormat Exception: {0}

Cause: An error occurred while converting the stream data to specified type

Action: check the type of data expected on the stream and use the appropriate read method

JMS-00162: Message not Readable

Cause: Message is in write-only mode

Action: Call the reset method to make the message readable

JMS-00163: Message not Writeable

Cause: Message is in read-only mode

Action: Use the clearBody method to make the message writeable

JMS-00164: No such element

Cause: Element with specified name was not found in the map message

Action: n/a

JMS-00165: Maximum size of property value exceeded

Cause: The property value exceeded the maximum length allowed

Action: Value for JMS defined properties can have a maximum length of 100, value for User defined properties can have a maximum length of 2000

JMS-00166: Topic must be specified

Cause: Topic specified was null

Action: Specify a non-null topic

JMS-00167: Payload factory or Sql_data_class must be specified

Cause: Payload factory or Sql_data_class not specified for queues containing object payloads

Action: Specify a CustomDatumFactory/ORADDataFactory or the SQLData class of the java object that maps to the ADT type defined for the queue.

JMS-00168: Cannot specify both payload factory and sql_data_class

Cause: Both CustomDatumFactory/ORADDataFactory and SQLData class were specified during dequeue

Action: Specify either the CustomDatumFactory/ORADDataFactory or the SQLData class of the java object that maps to the ADT type defined for the queue.

JMS-00169: Sql_data_class cannot be null

Cause: SQLData class specified is null

Action: Specify the SQLData class that maps to the ADT type defined for the queue

JMS-00171: Message is not defined to contain {0}

Cause: Invalid payload type in message

Action: Check if the queue is defined to contain RAW or OBJECT payloads and use the appropriate payload type in the message

JMS-00172: More than one queue table matches query {0}

Cause: More than one queue table matches the query

Action: Specify both owner and queue table name

JMS-00173: Queue Table {0} not found

Cause: The specified queue table was not found

Action: Specify a valid queue table

JMS-00174: Class must be specified for queues with object payloads\n Use dequeue(deq_option, payload_fact) or dequeue(deq_option, sql_data_cl)

Cause: This dequeue method cannot be used to dequeue from queues with OBJECT payloads

Action: use the either dequeue(deq_option, payload_fact) or dequeue(deq_option, sql_data_cl)

JMS-00175: DequeueOption must be specified

Cause: DequeueOption specified is null

Action: Specify a non-null dequeue option

JMS-00176: EnqueueOption must be specified

Cause: EnqueueOption specified is null

Action: Specify a non-null enqueue option

JMS-00177: Invalid payload type: Use dequeue(deq_option) for raw payload queues

Cause: This method cannot be used to dequeue from queues with RAW payload

Action: use the dequeue(deq_option) method

JMS-00178: Invalid Queue name - {0}

Cause: The queue name specified is null or invalid

Action: Specify a queue name that is not null. The queue name must not be qualified with the schema name. The schema name must be specified as the value of the owner parameter

JMS-00179: Invalid Queue Table name - {0}

Cause: The queue table name specified is null or invalid

Action: Specify a queue table name that is not null. The queue table name must not be qualified with the schema name. The schema name must be specified as the value of the owner parameter

JMS-00180: Invalid Queue Type

Cause: Queue type is invalid

Action: Valid types are AQConstants.NORMAL or AQConstants.EXCEPTION

JMS-00181: Invalid value for wait_time

Cause: Invalid value for wait type

Action: Wait time can be AQDequeueOption.WAIT_FOREVER, AQDequeueOption.WAIT_NONE or any value greater than 0

JMS-00182: More than one queue matches query

Cause: More than one queue matches query

Action: Specify both the owner and name of the queue

JMS-00183: No AQ driver registered

Cause: No AQDriver registered

Action: Make sure that the AQ java driver is registered. Use `Class.forName("oracle.AQ.AQOracleDriver")`

JMS-00184: Queue object is invalid

Cause: The queue object is invalid

Action: The underlying JDBC connection may have been closed. Get the queue handle again

JMS-00185: QueueProperty must be specified

Cause: AQQueueProperty specified is null

Action: Specify a non-null AQQueueProperty

JMS-00186: QueueTableProperty must be specified

Cause: QueueTableProperty specified is null

Action: Specify a non-null AQQueueTableProperty

JMS-00187: Queue Table must be specified

Cause: Queue Table specified is null

Action: Specify a non-null queue table

JMS-00188: QueueTable object is invalid

Cause: The queue table object is invalid

Action: The underlying JDBC connection may have been closed. Get the queue table handle again

JMS-00189: Byte array too small

Cause: The byte array given is too small to hold the data requested

Action: Specify a byte array that is large enough to hold the data requested or reduce the length requested

JMS-00190: Queue {0} not found

Cause: The specified queue was not found

Action: Specify a valid queue

JMS-00191: sql_data_cl must be a class that implements SQLData interface

Cause: The class specified does not support the java.sql.SQLData interface

Action: n/a

JMS-00192: Invalid Visibility value

Cause: Visibility value specified is invalid

Action: Valid values are AQConstants.VISIBILITY_ONCOMMIT, AQConstants.VISIBILITY_IMMEDIATE

JMS-00193: JMS queues cannot contain payload of type RAW

Cause: An attempt was made to create a JMS queue with RAW payload

Action: JMS queues/topics cannot contain RAW payload

JMS-00194: Session object is invalid

Cause: Session object is invalid

Action: The underlying JDBC connection may have been closed. Create a new session

JMS-00195: Invalid object type: object must implement CustomDatum/ORADATA or SQLData interface

Cause: Invalid object type specified

Action: object must implement CustomDatum/ORADATA or SQLData interface

JMS-00196: Cannot have more than one open QueueBrowser for the same destination on a JMS Session

Cause: There is already one open QueueBrowser for this queue on this session

Action: There cannot be more than one queue browser for the same queue in a particular session. Close the existing QueueBrowser and then open a new one

JMS-00197: Agent address must be specified for remote subscriber

Cause: Address field is null for remote subscriber

Action: The address field must contain the fully qualified name of the remote topic

JMS-00199: Registration for asynchronous receipt of messages failed

Cause: Registration with the database for asynchronous receipt of messages for the consumer failed

Action: See error message in linked Exception for details

JMS-00200: Destination must be specified

Cause: Destination is null

Action: Specify a non-null destination

JMS-00201: All Recipients in recipient_list must be specified

Cause: One or more elements in the recipient list are null

Action: All AQjmsAgents in the recipient list must be specified

JMS-00202: Unregister for asynchronous receipt of messages failed

Cause: An error occurred while removing the registration of the consumer with the database for asynchronous receipt

Action: n/a

JMS-00203: Payload Factory must be specified

Cause: Null Payload Factory was specified

Action: n/a

JMS-00204: An error occurred in the AQ JNI layer

Cause: JNI Error

Action: Check error message in linked exception for details

JMS-00205: Naming Exception

Cause: Naming exception

Action: n/a

JMS-00207: JMS Exception {0}

Cause: An error occurred in the JMS layer

Action: See the message inside the linked JMSEException for more information

JMS-00208: XML SQL Exception

Cause: An error occurred in the XML SQL layer

Action: See the message inside the linked AQxmlException for more information

JMS-00209: XML SAX Exception

Cause: An error occurred in the XML SAX layer

Action: See the message inside the linked AQxmlException for more information

JMS-00210: XML Parse Exception

Cause: An error occurred in the XML Parser layer

Action: See the message inside the linked AQxmlException for more information

JMS-00220: Connection no longer available

Cause: Connection to the database no longer available.

Action: n/a

JMS-00221: Free physical database connection unavailable in connection pool

Cause: A free physical database connection was not available in the OCI connection pool in order to perform the specified operation.

Action: Try performing the operation later

JMS-00222: Invalid Payload factory type

Cause: Payload factory should be of CustomDatumFactory or ORADDataFactory type.

Action: Use one of CustomDatumFactory/ORADDataFactory types.

JMS-00223: Payload factory must be null for destinations with Sys.AnyData payload - use typemap instead

Cause: A CustomDatumFactory/ORADDataFactory was specified for consumers on destinations containing SYS.ANYDATA payloads

Action: This field must be set to null for destinations containing payloads of type Sys.AnyData. The ORADDataFactory(s) must be registered in the session's typemap

JMS-00224: Typemap is invalid - must be populated with SQLType/ OraDataFactory mappings to receive messages from Sys.AnyData destinations

Cause: The typemap of the session is null or empty. For destinations of type Sys.AnyData, the typemap must contain OraDataFactory objects for all possible types that may be stored in the queue/topic

Action: Use the AQjmsSession.getTypeMap() method get the typemap. Then use the put() method to register SQLType names and their corresponding OraDataFactory objects

JMS-00225: Invalid JDBC driver - OCI driver must be used for this operation

Cause: Operations on Sys.AnyData queues/topics are not supported using this JDBC driver

Action: Use the JDBC OCI driver to receive messages from Sys.AnyData queues/topics

JMS-00226: Header-only Message does not have a body

Cause: Header-only message does not have a body; the body cannot be cleared, changed, or queried.

Action: Do not access or modify the body of a read-only message.

JMS-00227: Illegal attempt to commit on a non transacted JMS Session

Cause: Illegal attempt to invoke the commit method on a non transacted JMS Session

Action: Remove invocation of the commit method on the current JMS Session

JMS-00228: Illegal attempt to rollback on a non transacted JMS Session

Cause: Illegal attempt to invoke the rollback method on a non transacted JMS Session

Action: Remove invocation of the rollback method on the current JMS Session

JMS-00229: {0} must be specified

Cause: The specified parameter was null

Action: Specify a non-null value for the parameter

JMS-00230: Illegal operation on durable subscription with active TopicSubscriber

Cause: Try to unsubscribe, change or create durable subscription while it has an active TopicSubscriber.

Action: Close the active TopicSubscriber and try again.

JMS-00231: Consumers on temporary destination must belong to the same

Cause: The specified parameter was null

Action: Specify a non-null value for the parameter

JMS-00232: An invalid user/password was specified for the JMS connection

Cause: Invalid user/password specified for connection

Action: Specify valid user/password for connection

JMS-00233: The required subscriber information is not available

Cause: Try to retrieve subscriber information from a subscriber which was obtained with getDurableSubscriber method and had no corresponding information in the in-memory map.

Action: Do not retrieve subscriber information from such a subscriber

JMS-00234: This operation is not allowed in the current messaging domain

Cause: Perform an operation that is not allowed in the current messaging domain

Action: Do not perform the operation in the current messaging domain

JMS-00235: Can not link the durable subscriber name with a topic in unsubscribe method.

Cause: OJMS is unable to link the supplied durable subscriber name with a topic. This causes unsubscribe method to fail.

Action: Use other unsubscribe methods which the user can provide topic name.

JMS-00236: OJMS encountered invalid OCI handles.

Cause: OJMS encountered invalid OCI handles when using JDBC OCI driver .

Action: Make sure the underlying JDBC connection is not closed while OJMS is still operating.

JMS-00237: Can not start thread for message listener.

Cause: OJMS is unable to start a new thread for message listener.

Action: Check the thread proxy code if the thread was started by a user provided thread proxy.

JMS-00238: Illegal attempt to recover on a transacted JMS Session

Cause: Illegal attempt to invoke the recover method on a transacted JMS Session

Action: Use rollback method instead of recover method on transacted JMS session.

JMS-00239: Illegal attempt to call {0} method on a XASession.

Cause: Illegal attempt to invoke the commit or rollback method on a XASession

Action: Use JTA to commit or rollback a distributed transaction

JMS-00240: Illegal attempt to call setClientID after other actions.

Cause: Illegal attempt to call Connection.setClientID method after other actions has been taken on this Connection

Action: set client ID before any other action on the Connection

JMS-00241: Illegal attempt to delete temporary destination when there are consumers using it.

Cause: Illegal attempt to delete temporary destination while there are existing consumers still using it.

Action: close the consumers before deleting the temporary destination

JMS-00242: Illegal attempt to enqueue message with both immediate visibility and three phase enqueue process.

Cause: Illegal attempt to enqueue message with both immediate visibility and three phase enqueue process.

Action: turn on the system property oracle.jms.useTemplobsForEnqueue

JMS-00243: Topic {0} not found

Cause: The specified topic was not found

Action: Specify a valid topic

JMS-00244: {0} is an invalid operation with the Sharded Queue.

Cause: The operation is not valid with the Sharded Queue

Action: Specify a valid operation for the Sharded Queue

JMS-00245: JMS Streaming support is available only for Sharded Queues.

Cause: JMS Streaming is supported with Sharded Queues only

Action: Use JMS Streaming APIs with Sharded Queue

JMS-00246: JMS Streaming support is not available for {0} driver.

Cause: JMS Streaming is supported with thin driver only

Action: Use JMS Streaming APIs with thin driver

JMS-00247: NON_PERSISTENT message delivery is not supported with JMS Streaming.

Cause: The NON_PERSISTENT delivery mode is not supported with JMS Streaming

Action: Specify PERSISTENT message delivery mode

JMS-00248: Illegal attempt to use JMS Streaming API when streaming is disabled.

Cause: Illegal attempt to use JMS Streaming API when streaming is disabled

Action: Turn on the system property oracle.jms.useJmsStreaming

JMS-00249: InputStream representing the message data must be specified.

Cause: InputStream is null

Action: Specify a valid InputStream representing the message data

JMS-00250: OutputStream must be specified to write the message data.

Cause: OutputStream is null

Action: Specify a valid OutputStream to write the data from the received message

JMS-00251: Illegal attempt to set message data using both write method(s) and Streaming API.

Cause: Illegal attempt to set message data using both write methods and Streaming API

Action: Specify either an InputStream or write method to set the message data

JMS-00252: Illegal attempt to read the data using {0} when the streaming is used with dequeue.

Cause: Illegal attempt to read the message data using read methods when the dequeue used streaming

Action: Call receiveData() to read the message data

JMS-00253: Operation {0} not allowed on a Message with null JMSMessageID.

Cause: The operation is not allowed on a Message with null JMSMessageID

Action: Use this operation on a Message with valid JMSMessageID

JMS-00254: Streaming is not used with dequeue, please use standard JMS API to read the message data.

Cause: Streaming is not used with dequeue operation

Action: Use standard JMS API to read the message data

JMS-00255: JMS Streaming support is available in a Session with acknowledge mode +

Cause: Invalid acknowledgement mode used with JMS Streaming

Action: Valid acknowledgement modes are Session.CLIENT_ACKNOWLEDGE and Session.SESSION_TRANSACTED

JMS-00256: stop() of javax.jms.Connection timed out.

Cause: stop() of javax.jms.Connection timed out

Action: A default timeout of 10 minutes is set to disable the registrations, and allow the `onMessage()` to process the message. Set a higher value in milli seconds for this timeout using the system property `oracle.jms.notificationTimeOut`

JMS-00400 to JMS-00448

JMS-00400: Destination name must be specified

Cause: A null Destination name was specified

Action: Specify a non-null destination name

JMS-00402: Class not found: {0}

Cause: The specified class was not found

Action: Make sure your CLASSPATH contains the class

JMS-00403: IO Exception {0}

Cause: IO exception

Action: See message is AQxmlException for details

JMS-00404: XML Parse Exception

Cause: An error occurred in the XML Parser layer

Action: See the message inside the linked AQxmlException for more information

JMS-00405: XML SAX Exception

Cause: An error occurred in the XML SAX layer

Action: See the message inside the linked AQxmlException for more information

JMS-00406: JMS Exception {0}

Cause: An error occurred in the JMS layer

Action: See the message inside the linked JMSEException for more information

JMS-00407: Operation not allowed on {0}

Cause: The specified operation is not allowed on this object

Action: n/a

JMS-00408: Conversion failed - invalid property type

Cause: An error occurred while converting the property to the requested type

Action: Use the method corresponding to the property data type to retrieve it

JMS-00409: No such element

Cause: Element with specified name was not found in the map message

Action: n/a

JMS-00410: XML SQL Exception

Cause: An error occurred in the JDBC SQL layer

Action: See the message inside the linked SQLException for more information

JMS-00411: Payload body cannot be null

Cause: An invalid body string or document was specified

Action: Specify a non-null body string or document

JMS-00412: Byte conversion failed

Cause: An invalid username/password was specified

Action: Specify a non-null username and password

JMS-00413: Autocommit not allowed for operation

Cause: The autocommit flag cannot be set for this operation

Action: Do not set the autocommit flag

JMS-00414: Destination owner must be specified

Cause: A null Destination owner was specified

Action: Specify a non-null destination name

JMS-00415: Invalid Visibility value

Cause: Visibility value specified is invalid

Action: Valid values are AQxmlConstants.VISIBILITY_ONCOMMIT, AQxmlConstants.VISIBILITY_IMMEDIATE

JMS-00416: Invalid Dequeue mode

Cause: Invalid dequeue mode was specified

Action: Valid Dequeue modes are AQxmlConstants.DEQUEUE_BROWSE, AQxmlConstants.DEQUEUE_REMOVE, AQxmlConstants.DEQUEUE_LOCKED, AQxmlConstants.DEQUEUE_REMOVE_NODATA

JMS-00417: Invalid Navigation mode

Cause: An invalid navigation mode was specified

Action: The valid navigation modes are AQxmlConstants.NAVIGATION_FIRST_MESSAGE, AQxmlConstants.NAVIGATION_NEXT_MESSAGE, AQxmlConstants.NAVIGATION_NEXT_TRANSACTION

JMS-00418: Invalid value for wait_time

Cause: Invalid value for wait type

Action: Wait time can be AQDequeueOption.WAIT_FOREVER, AQDequeueOption.WAIT_NONE or any value greater than 0

JMS-00419: invalid ConnectionPoolDataSource

Cause: A null or invalid ConnectionPoolDataSource was specified

Action: Specify a valid OracleConnectionPoolDataSource object with the correct url and user/password

JMS-00420: Invalid value for cache_size

Cause: An invalid cache_size was specified

Action: Cache size must be greater than 0

JMS-00421: Invalid value for cache_scheme

Cause: An invalid cache scheme was specified

Action: The valid cache schemes are

OracleConnectionCacheImpl.DYNAMIC_SCHEME

OracleConnectionCacheImpl.FIXED_WAIT_SCHEME

JMS-00422: Invalid tag - {0}

Cause: An invalid tag was encountered in the XML document

Action: Verify that the XML document conforms to the AQ schema

JMS-00423: Invalid value

Cause: An invalid value was specified

Action: Verify that the value specified in the XML document conforms to those specified in the AQ schema

JMS-00424: Invalid message header

Cause: The message header specified is null or invalid

Action: Specify a valid message header

JMS-00425: Property name must be specified

Cause: Property name was null

Action: Specify a non-null property name

JMS-00426: Property does not exist

Cause: Invalid property name specified. The property does not exist

Action: The property does not exist

JMS-00427: Subscriber name must be specified

Cause: Subscriber name was null

Action: Specify a non-null subscription name

JMS-00428: Valid message must be specified

Cause: message was null

Action: Specify a non-null message

JMS-00429: Register Option must be specified

Cause: Register option is null

Action: Specify a non-null Register Option

JMS-00430: Database Link must be specified

Cause: DB Link is null

Action: Specify a non-null Register Option

JMS-00431: Sequence Number must be specified

Cause: Register option is null

Action: Specify a non-null Register Option

JMS-00432: Status must be specified

Cause: status option is null

Action: Specify a non-null Register Option

JMS-00433: User not authenticated

Cause: User is not authenticated

Action: Specify an authenticated user

JMS-00434: Invalid data source

Cause: Data source is null or invalid

Action: Specify a valid data source

JMS-00435: Invalid schema location

Cause: Schema location is null or invalid

Action: Specify a valid URL for the schema

JMS-00436: AQ Exception

Cause: An error occurred in the AQ java layer

Action: See the message inside the AQxmlException and the linked exception for more information

JMS-00437: Invalid Destination

Cause: An invalid destination object was specified

Action: Specify a valid destination (Queue/Topic) object

JMS-00438: AQ agent {0} not mapped to a valid database user

Cause: The AQ agent specified does not map to a database user which has privileges to perform the requested operation

Action: Use `dbms_aqadm.enable_db_access` to map the agent to a database user with the required queue privileges

JMS-00439: Invalid schema document

Cause: The schema document specified is not valid

Action: Specify a valid URL for the schema document

JMS-00440: Invalid operations - agent {0} maps to more than one database user

Cause: The aq agent mapped to more than one database user in the the same session

Action: Map the aq agent to only one database user Check the `aq$internet_users` view for database users that map to this agent

JMS-00441: {0} cannot be null

Cause: The specified parameter was null

Action: Specify a non-null value

JMS-00442: Name and Address for Agent cannot be null

Cause: Both the name and address parameters were specified as null

Action: Specify a non-null value for the name or address

JMS-00443: IMMEDIATE visibility mode not supported for this queue/topic

Cause: IMMEDIATE visibility mode not supported for JMS type queue/topic

Action: Use ON_COMMIT or the default visibility mode for JMS type queue/topic

JMS-00444: This feature is not supported yet

Cause: The requested feature is not yet supported

Action: wait for future releases that support the feature.

JMS-00445: Destination alias must be specified

Cause: A null Destination alias was specified

Action: Specify a non-null destination alias

JMS-00446: Agent alias must be specified

Cause: A null Agent alias was specified

Action: Specify a non-null agent alias

JMS-00447: error in accessing LDAP server

Cause: error in accessing the LDAP server

Action: check the LDAP server is up and the environment parameters provided to the servlet are correct

JMS-00448: Invalid Content-Type

Cause: Invalid Content-Type

Action: Content-Type must be "text/xml" or "application/x-www-form-urlencoded" with parameter name "aqxmldoc"

JZN-00000 to JZN-00328

JZN-00000: Normal, successful completion

Cause: The operation completed successfully.

Action: No action required.

JZN-00001: End of input

Cause: Processing has reached the end of available input.

Action: No action required.

JZN-00002: Invalid argument

Cause: The input argument was not a buffer, file, or stream.

Action: This is a programming error by the caller of the JavaScript Object Notation (JSON) facility. Contact Oracle Support Services.

JZN-00003: Input not specified

Cause: A parse or decode operation was requested without specifying input.

Action: Specify a buffer, file, or stream as input before attempting to parse or decode the input.

JZN-00004: Cannot open input file

Cause: The requested input file could not be found, or was not readable.

Action: Ensure that the file exists and that read permission is available.

JZN-00005: Syntax error

Cause: The JavaScript Object Notation (JSON) parser encountered syntactically invalid JSON.

Action: Correct the JSON input document.

JZN-00006: Invalid escape sequence

Cause: The JavaScript Object Notation (JSON) parser encountered an invalid sequence of characters following a backslash character.

Action: Correct the JSON input and remove or correct the invalid escape sequence.

JZN-00007: Object member key is not unique

Cause: The JavaScript Object Notation (JSON) parser detected a duplicate member key.

Action: Correct the JSON input and remove the duplicate key.

JZN-00008: Parse already in progress

Cause: An attempt was made to begin parsing an input while a parsing operation was already in progress.

Action: Close the previous parsing operation before beginning a new one.

JZN-00009: Unsupported encoding

Cause: The requested character encoding was not supported by JavaScript Object Notation (JSON).

Action: Convert the input to Unicode.

JZN-00010: Invalid byte sequence in character data

Cause: The parser encountered a sequence of bytes that were invalid for the specified character set.

Action: Correct the input source or ensure that the character encoding is correctly specified.

JZN-00011: Error reading input

Cause: An I/O error was encountered while reading input for parsing or decoding.

Action: None

JZN-00012: Premature end of input

Cause: The parser or decoder encountered the end of the input source while still expecting more data.

Action: None

JZN-00013: Stack overflow

Cause: The internal depth limit on the JavaScript Object Notation (JSON) hierarchy of containers (which may be objects, arrays, or both) was exceeded during a Document Object Model (DOM) read or write operation.

Action: None

JZN-00014: Stack underflow

Cause: An event sequence to render the JavaScript Object Notation (JSON) included a closing event for an unknown object or array.

Action: The input source is bad, likely due to a programming error.

JZN-00015: Name too long

Cause: The JavaScript Object Notation (JSON) parser encountered a member key name that exceeded the internal maximum.

Action: Parse the input without duplicate key checks.

JZN-00016: Serializer stream error

Cause: An I/O error was encountered while writing to the output stream.

Action: None

JZN-00017: Serializer buffer error

Cause: The data overflowed the fixed-size output buffer.

Action: Specify a larger output buffer consistent with the input supplied.

JZN-00018: Input to serializer is too large

Cause: The data overflowed the fixed-size output buffer.

Action: Specify a larger output buffer consistent with the input supplied.

JZN-00019: Cannot print without array wrapper

Cause: The result of the JavaScript Object Notation (JSON) expression could not be rendered without an array wrapper.

Action: If the expression results in a sequence of multiple results, the array wrapper option is required.

JZN-00020: Empty result

Cause: The path expression resulted in a null result.

Action: None

JZN-00021: Value to be printed was not scalar

Cause: An operation requested a scalar value, but the selected value was an object, array, or sequence and could not be returned.

Action: None

JZN-00022: Extra data after end of input

Cause: Additional data bytes were encountered after the expected end of input.

Action: None

JZN-00023: Length does not match data

Cause: The binary decoder encountered a data length that exceeded or did not match the actual data value.

Action: The input is corrupt.

JZN-00024: Unrecognized data type or code

Cause: The binary decoder encountered an unrecognized operation code.

Action: The input is corrupt.

JZN-00025: Invalid binary data

Cause: The binary decoder encountered invalid or inconsistent data while reading the input.

Action: The input is corrupt.

JZN-00026: Too many levels of nesting

Cause: The internal depth limit on the JavaScript Object Notation (JSON) hierarchy of containers (which may be objects, arrays, or both) was exceeded.

Action: None

JZN-00027: Internal error

Cause: An internal error occurred in the code.

Action: Contact Oracle Support Services.

JZN-00028: Out of memory

Cause: The operating system ran out of memory.

Action: Increase the memory available to the program.

JZN-00029: Data member too large

Cause: A data value in a Document Object Model (DOM) was too large to be encoded in binary form.

Action: None

JZN-00030: NULL pointer for required context

Cause: A NULL pointer was detected as an internal error condition.

Action: This is a programming error by the caller of the JavaScript Object Notation (JSON) facility. Contact Oracle Support Services.

JZN-00031: Invalid path expression

Cause: The JavaScript Object Notation (JSON) path expression could not be successfully parsed.

Action: Correct the invalid syntax.

JZN-00032: Invalid array position in path expression

Cause: The specified array position was invalid.

Action: Array positions must be non-negative integers.

JZN-00033: Invalid order of array indexes

Cause: In a comma-delimited set of array indexes, the array indexes were in descending order.

Action: Correct the array indexes so that they appear in ascending order.

JZN-00034: Field name too long

Cause: The field name exceeded 256 bytes.

Action: Select a shorter name for the field.

JZN-00035: Total field names too long

Cause: The total length of all field names exceeded the 65536 byte limit.

Action: None

JZN-00036: Array or object position out of bounds

Cause: An attempt was made to access either an element outside of the array bounds, or an object member outside of the list of members.

Action: None

JZN-00037: Invalid number

Cause: The string could not be interpreted as a numeric value.

Action: None

JZN-00038: Invalid date/time

Cause: The string could not be interpreted as a date or date/time.

Action: The data/time string must be in accordance with ISO-8601.

JZN-00039: Size overflow for JSON set encoding

Cause: The total size of the JavaScript Object Notation (JSON) objects exceeded the maximum allowed for JSON set-oriented storage.

Action: None

JZN-00040: Invalid specification

Cause: The Query-By-Example (QBE) specification was invalid.

Action: Correct the specification.

JZN-00041: JSON Patch operation could not be completed

Cause: The JavaScript Object Notation (JSON) Patch operation encountered an infeasible operation and could not be completed.

Action: None

JZN-00042: Modification not allowed on read-only object

Cause: Read-only JavaScript Object Notation (JSON) objects could not be modified by Document Object Model (DOM) operations.

Action: This is a programming error. Correct the error by copying the DOM to a read/write DOM and then executing the modification.

JZN-00043: Feature not implemented

Cause: This feature was not implemented yet.

Action: None

JZN-00044: Type conversion failed

Cause: A type conversion requested for JavaScript Object Notation (JSON) Path output could not be performed.

Action: None

JZN-00045: Invalid sequence of events

Cause: The JavaScript Object Notation (JSON) serializer encountered an incorrect event sequence and could not serialize the result.

Action: This is a programming error by the caller of the JSON facility. Contact Oracle Support Services.

JZN-00046: Requested key does not exist

Cause: An attempt was made to read a key from a Document Object Model (DOM) object node, but the key was not present in the DOM object node.

Action: This is a programming error.

JZN-00047: Cyclic reference to DOM node is not allowed

Cause: A Document Object Model (DOM) node could not be inserted below one of its own descendant nodes.

Action: This is a programming error.

JZN-00048: Multiple references to DOM node are not allowed

Cause: A Document Object Model (DOM) node could not be inserted because it is already present in the document node tree.

Action: This is a programming error.

JZN-00049: Input to JSON parser is empty

Cause: The input provided to the JSON parser was empty.

Action: This is an internal error message not visible to user.

JZN-00070: comma not preceded or followed by field or item

Cause: An unexpected or superfluous comma was encountered while parsing an object or array.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00071: missing comma in object or array

Cause: A comma was expected between members of an object, or between items in an array.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00072: object member is missing value

Cause: An object member name and colon was not followed by a member value.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00073: missing colon in member:value pair

Cause: An object member name was not followed by a colon.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00074: member name not enclosed in double quotation marks

Cause: An object member name was not enclosed in double quotation marks, and either contained or started with a character that was not allowed.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00075: string value not enclosed in double quotation marks

Cause: A string value was not enclosed in double quotation marks.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00076: number could not be parsed

Cause: A JavaScript Object Notation (JSON) number was encountered that

Action: This is an error in the JSON input.

JZN-00077: invalid ASCII control character

Cause: An invalid byte value was read from the JavaScript Object Notation (JSON) input. ASCII control characters are not allowed in JSON text.

Action: This is an error in the JSON input.

JZN-00078: Invalid JSON keyword

Cause: A literal value was encountered that could not be interpreted as a JSON literal. Allowed JSON literals are 'true', 'false', and 'null'.

Action: This is an error in the JSON input.

JZN-00079: missing quotation mark in the string

Cause: A member name or string value beginning with a quotation mark did not have a closing quotation mark.

Action: This is an error in the JavaScript Object Notation (JSON) input.

JZN-00201: Unquoted punctuation in step

Cause: A path step contained punctuation characters.

Action: Enclose the step in double quotation marks.

JZN-00202: Escape sequence must be in quotation marks

Cause: A backslash escape sequence was not enclosed in quotation marks.

Action: Enclose the string in double quotation marks.

JZN-00203: Invalid escape sequence

Cause: An escape sequence beginning with a backslash contained invalid characters.

Action: Correct the invalid escape sequence.

JZN-00204: Invalid surrogate pair

Cause: The surrogate pair was invalid. A surrogate pair must consist of a high surrogate followed by a low surrogate.

Action: Correct the invalid surrogate pair.

JZN-00205: Array subscript too long

Cause: A subscript within an array step was too long to be interpreted.

Action: Shorten the array step.

JZN-00206: Array subscript invalid range

Cause: An array range subscript had a start position greater than the end position.

Action: Reverse the start and end positions to create a valid range.

JZN-00207: Variable name is invalid

Cause: The variable name was invalid. A variable name must be alphanumeric and cannot start with a number.

Action: Correct the variable name.

JZN-00208: Path must start with a dollar sign (\$) character

Cause: A path did not start with a dollar sign (\$) character.

Action: Start the path with a dollar sign (\$) character.

JZN-00209: Unexpected characters after end of path

Cause: Trailing characters followed the end of the path.

Action: Remove the trailing or corrupted characters.

JZN-00210: Empty array subscript

Cause: An array step was empty.

Action: Specify a subscript, range, or series of entries.

JZN-00211: Invalid array subscript

Cause: The specified array position was invalid.

Action: Array positions must be non-negative integers.

JZN-00212: Array wildcard must be used alone

Cause: The array wildcard (*) character was not specified by itself in an array subscript.

Action: Remove all other parts of the subscript.

JZN-00213: Object key wildcard must be used alone

Cause: The key wildcard (*) character did not appear by itself in a key step.

Action: Remove extraneous characters from the key step.

JZN-00214: Missing square bracket in array step

Cause: An array step had mismatching square bracket ([]) characters.

Action: Add the missing closing square bracket character.

JZN-00215: Array step contains unexpected characters

Cause: An array step contained invalid characters and could not be interpreted.

Action: Array steps must contain numbers, ranges, or comma-delimited numbers and ranges.

JZN-00216: Unclosed quoted step

Cause: A step beginning with a quotation mark did not have a closing quotation mark.

Action: Add the missing quotation mark.

JZN-00217: Key step contains unexpected characters

Cause: A key step contained invalid characters and could not be interpreted.

Action: Unquoted key steps must be alphanumeric and begin with an alphabetic character. Otherwise, enclose the step in quotation marks.

JZN-00218: Invalid JSON literal

Cause: A JavaScript Object Notation (JSON) literal must be 'true', 'false', or 'null'.

Action: None

JZN-00219: Literal contains unexpected characters

Cause: A JavaScript Object Notation (JSON) literal must be 'true', 'false', or 'null'.

Action: None

JZN-00220: Invalid number

Cause: The value could not be interpreted as a number.

Action: None

JZN-00221: Numeric overflow

Cause: The numeric value could not be converted to binary because of an overflow.

Action: None

JZN-00222: Invalid regular expression

Cause: The expression supplied to 'eq_regex' or 'like_regex' was not a valid regular expression.

Action: Correct the expression.

JZN-00223: Unsupported operator

Cause: The 'not_in' operator was specified in an expression.

Action: Use a logical not surrounding an 'in' expression instead.

JZN-00224: Unexpected characters in comparison operator

Cause: Unexpected characters were present in the expression.

Action: Remove the unexpected characters from the expression.

JZN-00225: Comparison with expression must involve a path

Cause: A comparison operation with an expression did not involve a path.

Action: None

JZN-00226: Not operator must be followed by parenthetical expression

Cause: The expression after a not operator was not enclosed in parentheses.

Action: Enclose the expression in parentheses.

JZN-00227: Comparison must be against 'true' or 'false'

Cause: The comparison was not against a JavaScript Object Notation (JSON) 'true' or 'false' literal.

Action: None

JZN-00228: Question mark must be followed by parenthetical expression

Cause: A question mark introduced a filter that was enclosed in parentheses.

Action: Enclose the filter condition in parentheses.

JZN-00229: Missing parenthesis in parenthetical expression

Cause: A parenthetical expression was missing a closing parenthesis.

Action: Append a closing parenthesis to close the expression.

JZN-00230: Unexpected characters in expression

Cause: Unexpected characters were present in the expression.

Action: Remove the unexpected characters from the expression.

JZN-00231: Unquoted Unicode character

Cause: A Unicode character appeared outside of quotation marks.

Action: Surround the path step or value with quotation marks.

JZN-00232: Expected a '.' following step

Cause: After a path step, a '.' separator was expected.

Action: None

JZN-00233: Invalid character at start of step

Cause: The next path step started with an invalid character.

Action: None

JZN-00234: Invalid '@' outside of predicate

Cause: An '@' character appeared in the path outside of a predicate clause.

Action: None

JZN-00235: Invalid '\$' inside of predicate

Cause: A '\$' appeared in the path inside of a predicate clause.

Action: None

JZN-00236: missing or invalid function or operator

Cause: A predicate expression was missing an operator or specified a function that was not valid.

Action: None

JZN-00237: invalid comparison of two path expressions

Cause: A predicate expression contained a path expression on both the left and right sides of the operator.

Action: None

JZN-00238: path expression has more than one predicate

Cause: A path expression had more than one predicate expression at the top level. At most, one predicate expression is allowed at the top level.

Action: None

JZN-00239: predicate expression before final path step

Cause: A path expression contained a predicate expression prior to the final step in the path. If an expression has a predicate at the top level, it must be the final step in the path.

Action: None

JZN-00240: invalid characters in array range subscript

Cause: The specified array range contained invalid characters. Array ranges are specified using the keyword 'to' between the start and end of the range.

Action: Array positions must be non-negative integers.

JZN-00241: invalid Function at the end of path

Cause: The specified function is not valid.

Action: None

JZN-00250: JSON Patch specification must be an array of operations

Cause: The JavaScript Object Notation (JSON) Patch specification was not an array. A JSON Patch specification must be an array, listing an ordered series of operations to be performed.

Action: Refer to the JSON Patch standard.

JZN-00251: JSON Patch operations must be objects

Cause: The JavaScript Object Notation (JSON) Patch specification array contained some non-object members. Each element of the JavaScript Object Notation (JSON) Patch specification array must be an object describing a patch operation to be performed.

Action: Refer to the JSON Patch standard.

JZN-00252: No 'op' code for patch operation

Cause: An object in a JavaScript Object Notation (JSON) Patch specification was missing an 'op' code.

Action: Refer to the JSON Patch standard.

JZN-00253: Invalid path for patch operation

Cause: The 'path' or 'from' clause in a patch operation could not be parsed.

Action: Refer to the JavaScript Object Notation (JSON) Pointer specification.

JZN-00254: Invalid 'op' code for patch operation

Cause: The 'op' code could not be interpreted.

Action: An 'op' code must be a string and must be one of the standard JavaScript Object Notation (JSON) Patch operators.

JZN-00255: Unknown key name in patch operation

Cause: The operation contained a key that is not specified by JavaScript Object Notation (JSON) Patch.

Action: Remove the invalid key.

JZN-00256: Patch operation requires a path

Cause: The target path for an operation was not specified.

Action: Ensure that all operations have a valid target path.

JZN-00257: 'path' or 'from' key must have a string value

Cause: The path specified for a 'path' or 'from' field was not a string.

Action: Ensure that all operations have a valid target path.

JZN-00258: From path not allowed for operation

Cause: The 'from' path was specified for an operation that does not allow it. 'from' is only allowed in the 'move' and 'copy' operations.

Action: Remove the 'from' path.

JZN-00259: 'value' is not allowed for operation

Cause: A 'value' was specified for an operation that does not allow it. A 'value' is not allowed in 'remove', 'move', and 'copy'.

Action: Remove the 'value' field.

JZN-00260: 'from' path is required for operation

Cause: A 'move' or 'copy' operation was missing a 'from' path.

Action: Specify a 'from' path in those operations.

JZN-00261: 'value' is required for operation

Cause: An 'add', 'replace', or 'test' operation was missing a target value.

Action: Specify a 'value' in those operations.

JZN-00262: Cyclic 'move' requested

Cause: The target 'path' specified is a child of the 'from' path.

Action: Correct the paths.

JZN-00300: Conflicting inclusion or exclusion rules

Cause: The including rule for a parent node conflicted with the explicit rule asserted for a child node. The projection specification is invalid.

Action: Remove the child node, or change the child node to match any sibling nodes.

JZN-00301: Projection specification must be an object

Cause: A projection specification was an array or JavaScript Object

Action: Ensure that the specification root is an object node.

JZN-00302: Include or exclude rule could not be interpreted

Cause: The rule did not use 'true', 'false', 1, 0, "include", or "exclude".

Action: Correct the invalid rule.

JZN-00303: NULL or invalid path

Cause: A path was either invalid or NULL.

Action: None

JZN-00304: Keys must be numbers or strings

Cause: An argument to \$id was not a number or string.

Action: Do not use null, booleans, objects, or arrays in a \$id expression.

JZN-00305: Array of values was empty

Cause: An array of values for \$in, \$all, or \$id did not any values. The array of values must have at least one value.

Action: Do not pass an empty array to the operators.

JZN-00306: Array must contain only scalar values

Cause: An array of values for \$in, \$all, or \$id contained object or array members. The array of values must contain only scalar values.

Action: Do not use objects or arrays within an array of values.

JZN-00307: \$between must have two values in array

Cause: A minimum and maximum value were not specified for the \$between operator. The \$between operator must be given an array with a minimum and a maximum value.

Action: Use a null for the minimum or maximum value to indicate that the range is open on one end. The values must be scalars, and at least one of the two values must not be null.

JZN-00308: Spatial operators must be at the outermost level

Cause: The \$near, \$within, and \$intersect operators were not used at the outermost level of the Query-By-Example (QBE).

Action: None

JZN-00309: Spatial operators must specify \$geometry

Cause: The \$near, \$within, and \$intersect operators were not given a GeoJSON object as the value of the \$geometry key.

Action: None

JZN-00310: \$distance parameter is not allowed

Cause: The \$distance parameter was used with an operator other than \$near. Only the \$near operator may include values for \$distance and \$unit.

Action: None

JZN-00311: \$distance parameter must be numeric

Cause: The \$distance parameter was specified with a value that was not a JavaScript Object Notation (JSON) number.

Action: None

JZN-00312: \$unit parameter must be a string

Cause: The \$unit parameter was not a JavaScript Object Notation (JSON) string. The \$unit parameter should be a string specifying a unit of measure such as 'mile'. It may not be a number or JSON literal, nor an object or array.

Action: None

JZN-00313: Unknown key found in spatial operator

Cause: The spatial operator contained a key that did not match the expected values. All spatial operators must have a \$geometry value, and the \$near operator may have \$distance and \$unit values. Other keys are not allowed.

Action: None

JZN-00314: \$distance parameter is required

Cause: The \$near operator did not specify a value for \$distance.

Action: None

JZN-00315: Empty objects not allowed

Cause: An empty object was found in the filter specification. An empty object is meaningless and not allowed in the filter specification.

Action: None

JZN-00316: Object with at least one field object must follow modifier

Cause: A modifier operator was not followed by an object, or was followed by an object with no fields. Modifiers include \$not, datatype casts such as \$number, simple conversions such as \$upper, and structural operators such as \$type.

Action: None

JZN-00317: Target of spatial operation must be an object

Cause: A \$near, \$within, or \$intersect operator was not followed by an object containing the spatial parameters.

Action: None

JZN-00318: Invalid operator within modifier

Cause: A modifier operator (such as \$not) was used around a \$and, \$or, \$nor, \$id, or another modifier operator. Modifiers may not be used around those operators.

Action: None

JZN-00319: Value of string matching operator must be a string

Cause: The value supplied to the \$regex, \$hasSubstring, \$startsWith, or \$like operators was not JavaScript Object Notation (JSON) string.

Action: None

JZN-00320: Value of comparison operator must be a scalar

Cause: The value supplied to an operator was not a JavaScript Object Notation (JSON) scalar value.

Action: Use only strings, numbers, or JSON literals; do not use an object or array.

JZN-00321: Value of the operator must be a string or number

Cause: The value supplied to \$eq, \$ne, or \$exists was not a JavaScript Object Notation (JSON) string or number.

Action: Use only strings or numbers; do not use an object or array, and do not use the JSON literals 'true', 'false', or 'null'.

JZN-00322: Value of set comparison operator must be an array

Cause: The value supplied to \$in, \$all, \$id, or \$between was not an array.

Action: None

JZN-00323: Elements in a conjunction array must be objects

Cause: An element of an array for \$and, \$or, or \$nor was not an object.

Action: None

JZN-00324: \$id operator must be at the outermost level

Cause: The \$id operator supplying document keys was not used at the outermost level of the Query-By-Example (QBE).

Action: None

JZN-00325: Cannot combine sub-expression with other filters

Cause: A downscoped sub-expression was used in the same scope as a normal filter condition.

Action: None

JZN-00326: Values for \$orderby conditions must be integers

Cause: An order by condition did not give an integer value. Objects, arrays, strings, and other literals are not allowed to specify ordering criteria.

Action: Use only positive and negative integer values for the ordering criteria. Use negative values for descending order and positive values for ascending order.

JZN-00327: Query specification must be an object

Cause: The query specification root was an array or scalar. A query specification must be an object.

Action: Ensure that the specification root is an object node.

JZN-00328: Order by specification must be an object

Cause: A \$orderby specification was not an object. It may not be an array or JavaScript Object Notation (JSON) scalar.

Action: Ensure that the specification root is an object node.

KFED-00400 to KFED-00403

KFED-00400: Operating system dependent operation: <varname>string</varname> failed with status: <varname>string</varname>

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00401: Operating system failure message: <varname>string</varname>

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00402: failure occurred at: <varname>string</varname>

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFED-00403: additional information: <varname>string</varname>

Cause: There was an operating system call error.

Action: Contact Oracle Support Services.

KFNDG-00200 to KFNDG-00701

KFNDG-00200: invalid syntax

Cause: Invalid syntax for renamedg was specified.

Action: Try renamedg -help for more information.

KFNDG-00201: invalid arguments

Cause: Invalid key or value was specified for renamedg.

Action: Try renamedg -help for more information.

KFNDG-00202: invalid value (<varname>string</varname>) for parameter phase

Cause: Incorrect value for parameter PHASE was specified.

Action: Valid values for parameter PHASE are ONE, TWO, BOTH. Retry with correct values.

KFNDG-00203: disk group name (<varname>string</varname>) exceeds maximum allowed length <varname>number</varname>

Cause: Invalid disk group name was specified.

Action: Disk group name can be a maximum of 32 characters.

KFNDG-00204: disk group name <varname>string</varname> has invalid characters

Cause: Invalid disk group name was specified.

Action: Disk group name can only contain alphabetic, numeric and the underscore (_) characters.

KFNDG-00205: failed to interpret configuration file name

Cause: Invalid configuration file name was specified.

Action: Verify configuration file name and folder permissions and retry renamedg.

KFNDG-00301: new disk group (<varname>string</varname>) already exists, ignoring renamedg

Cause: disk group specified in NEWDGNAME already exists.

Action: None

KFNDG-00302: disk (<varname>string</varname>:<varname>string</varname>) does not contain a valid header

Cause: Device header could not be located or corrupt.

Action: Verify if the device mentioned is an ASM disk device.

KFNDG-00303: failed to update disk group name for <varname>string</varname>

Cause: Insufficient privileges or write error in disk.

Action: Verify disk permissions and retry renamedg. Also, see log for additional information.

KFNDG-00304: unable to access heartbeat block of the device <varname>string</varname>:<varname>string</varname>

Cause: Heartbeat block of the disk was corrupt.

Action: Verify disk header with ASM utilities, retry renamedg.

KFNDG-00305: failed to create configuration file

Cause: Insufficient privileges or invalid path.

Action: Verify folder permissions and retry the command.

KFNDG-00306: unable to write to configuration file

Cause: Insufficient privileges.

Action: Check file permissions and retry renamedg.

KFNDG-00307: unable to read configuration file

Cause: Insufficient privileges or disk read error.

Action: Check file permissions and retry renamedg.

KFNDG-00308: failed to process configuration file entry: <varname>string</varname>

Cause: Configuration file was corrupt.

Action: Check file information and retry renamedg.

KFNDG-00401: allocation unit size conflict (<varname>number</varname>, <varname>number</varname>)

Cause: Allocation unit size of disk group and the disk did not match.

Action: Verify that the device is not corrupt and retry renamedg.

KFNDG-00402: ASM metadata block size conflict (<varname>number</varname>, <varname>number</varname>)

Cause: Metadata block size of the disk group and disk did not match.

Action: Verify if the device is not corrupt and retry renamedg.

KFNDG-00403: not all disks of disk group <varname>string</varname> were discovered

Cause: Offline disks were present in the specified disk group.

Action: Refer to Oracle Database Storage Administrator's Guide for more details.

KFNDG-00404: disk group <varname>string</varname> contains offline disks, ignoring renamedg

Cause: Disk group with offline disks could not be renamed.

Action: Refer to Oracle Database Storage Administrator's Guide for more details.

KFNDG-00405: specified disk group <varname>string</varname> appears to be mounted

Cause: Disk group was mounted.

Action: Unmount the disk group and retry renamedg.

KFNDG-00406: disk group (<varname>string</varname>) is in use by CSS

Cause: Cluster Synchronization Service(CSS) was using the disk group to be renamed.

Action: Refer to crsctl command to relocate voting disks from disk group.

KFNDG-00407: Could not find disks for disk group <varname>string</varname>

Cause: No disks were discovered for disk group.

Action: Try renamedg with a different discovery string.

KFNDG-00408: disk (<varname>string</varname>:<varname>string</varname>) could not be discovered

Cause: Disk was either deleted or moved.

Action: None

KFNDG-00409: disk (<varname>string</varname>) doesn't belong to disk group (<varname>string</varname>)

Cause: Disk is not part of the specified disk group.

Action: None

KFNDG-00410: failed to discover devices in folder <varname>string</varname>

Cause: Insufficient privileges or invalid discovery string.

Action: See log for additional details.

KFNDG-00600: internal error <varname>string</varname>

Cause: An internal error occurred while executing renamedg.

Action: Contact Oracle Support Services.

KFNDG-00601: fatal error <varname>string</varname>

Cause: A fatal error occurred while executing renamedg.

Action: Contact Oracle Support Services.

KFNDG-00603: failed to initialize device discovery

Cause: Error occurred while communicating with generic services layer.

Action: Contact Oracle Support Services.

KFNDG-00700: system dependent error (<varname>number</varname>, <varname>string</varname>, <varname>string</varname>, <varname>string</varname>) occurred

Cause: Internal system error occurred.

Action: Contact Oracle Support Services.

KFNDG-00701: Error <varname>number</varname> while performing I/O

Cause: I/O failure.

Action: Contact Oracle Support Services.

KFOD-00316 to KFOD-00403

KFOD-00316: Error acquiring ASM discovery string: <varname>string</varname>

Cause: Call to the Grid Plug and Play service to request disk discovery string failed.

Action: Ensure that the Grid Plug and Play component of Cluster Ready Services is available. If Grid Plug and Play is operational and command still fails, contact Oracle Support Services.

KFOD-00317: error returned from Patch Query API: <varname>string</varname>

Cause: A call to the Patch Query API returned unsuccessfully.

Action: See the returned error message for details.

KFOD-00318: unable to retrieve error message from Patch Query API: <varname>string</varname>

Cause: A call to the Patch Query API returned unsuccessfully.

Action: See the returned error message for details.

KFOD-00320: Invalid operation or option for this cluster type

Cause: This operation is invalid for this cluster type

Action: Retry the operation with cluster=true

KFOD-00321: failed to read the credential file <varname>string</varname>

Cause: The credential file was not valid.

Action: Verify that the credential file is valid and accessible. Ensure that the user has read access permission on the credential file. Rerun the command.

KFOD-00322: credential file not specified

Cause: The previous 'kfod' command was rejected because it did not include a valid credential file name.

Action: Reexecute the 'kfod' command providing a valid credential file name. Refer to the command line help for information.

KFOD-00323: Client Cluster version '<varname>string</varname>' in the credential file does not match software version '<varname>string</varname>'

Cause: There was a version mismatch between the Client Cluster version in the credential file and the software version.

Action: Install a version of the Client Cluster that matches the version in the credential file.

KFOD-00324: The Client Cluster version '<varname>string</varname>' is incompatible with the Storage Server version '<varname>string</varname>'

Cause: The Client Cluster installation or upgrade was not supported by the Storage Server configured at the version listed in the message.

Action: Install or upgrade the Client Cluster to a version that is compatible with the Storage Server. Refer to the product documentation for information.

KFOD-00325: failed to verify Client Cluster '<varname>string</varname>'\n<varname>string</varname>'

Cause: The Client Cluster installation verification failed. The possible causes are: - A Client Cluster with the same name was already configured. - A Client Cluster with the same name was deinstalled, but the Client Cluster's configuration was not removed at the Storage Server.

Action: Verify if there is already a Client Cluster with the name listed in the message by executing the 'asmcmd lsc' command on the Storage Server. If the Client Cluster is configured and in use, execute the 'asmcmd mkcc' command on the Storage Server, and provide an unused Client Cluster name to generate a new credential file. Retry the Grid Infrastructure installation using the new credential file. If the Client Cluster is configured and not in use, deinstall the existing Client Cluster. Execute the 'asmcmd rmcc' command on the Storage Server to delete the Client Cluster configuration. Retry the Grid Infrastructure installation. If the Client Cluster is not configured or if the error persists, contact Oracle Support Services.

KFOD-00326: Client Cluster(s) '<varname>string</varname>' will be incompatible if the Storage Server is upgraded to version '<varname>string</varname>'.

Cause: Storage Server upgrade to the listed version failed because the listed Client Cluster will become incompatible.

Action: Upgrade the Storage Server to a version that is compatible with all of the configured Client Clusters. If the Storage Server could not be upgraded to a compatible version, forcibly upgrade the Storage Server using the procedure documented in the product documentation.

KFOD-00327: failed to delete Client Cluster '<varname>string</varname>'\n<varname>string</varname>'

Cause: There was a failure in deleting the Client Cluster configuration.

Action: See the returned error message for details.

KFOD-00328: Client Cluster installation or upgrade failed because the Storage Server is in 'rolling migration' or 'rolling patch' state

Cause: The Client Cluster installation or upgrade was rejected because the Storage Server was in 'rolling migration' or 'rolling patch' state.

Action: Retry the installation or upgrade procedure after the Storage Server upgrade or patching has completed.

KFOD-00329: no cluster name specified

Cause: The previous 'kfod' command was rejected because it did not include a cluster name.

Action: Reexecute the 'kfod' command providing a valid cluster name. Refer to the command line help for information.

KFOD-00330: invalid cluster name '<varname>string</varname>' specified

Cause: An invalid cluster name was supplied to the 'kfod' utility.

Action: Specify a cluster name which is at least one character but no more than 15 characters in length. The cluster name must be alphanumeric, it cannot begin with a numeric character, and it may contain hyphen (-) characters. However, it cannot end with a hyphen (-) character.

KFOD-00331: forcibly deleted Client Cluster '<varname>string</varname>'

Cause: The configuration for the Client Cluster listed in the message was forcibly deleted.

Action: The Client Cluster listed in the message will no longer be able to access the Storage Server. Follow the steps to enable access from the Client Cluster. - Delete all the Oracle Clusterware files in the '+<diskgroup_name>/<client_cluster_name>/' directory in all disk groups. - Deinstall the Client Cluster. - Install the Client Cluster.

KFOD-00400: OS system dependent operation: <varname>string</varname> failed with status: <varname>string</varname>

Cause: OS system call error

Action: contact Oracle Support

KFOD-00401: OS failure message: <varname>string</varname>

Cause: OS system call error

Action: contact Oracle Support

KFOD-00402: failure occurred at: <varname>string</varname>

Cause: OS system call error

Action: contact Oracle Support

KFOD-00403: additional information: <varname>string</varname>

Cause: OS system call error

Action: contact Oracle Support

KUP-00552 to KUP-11024

KUP-00552: internal XAD package failed to load

Cause: An error was encountered while attempting to initialize the XAD package.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-00554: error encountered while parsing access parameters

Cause: The parser detected a syntax error.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-00561: invalid length for binary integer field <varname>string</varname>\n

Cause: An integer field was specified with an invalid length. The only supported lengths for binary integer fields are 1, 2, 4, and 8.

Action: n/a

KUP-00562: unknown escape sequence\n

Cause: An unknown escape sequence was specified to the parser. An escape sequence is a backslash followed by a character.

Action: Consult documentation for list of allowable control characters.

KUP-00600: internal error, arguments [<varname>string</varname>] [<varname>string</varname>] [<varname>string</varname>] [<varname>string</varname>]

Cause: An internal XAD error occurred.

Action: Contact Oracle Support.

KUP-00601: fatal XAD error

Cause: A fatal error has occurred.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-01006: error signalled during parse of access parameters

Cause: An error was signalled during parsing of the access parameters.

Action: This message should be accompanied by other error message(s) indicating the cause of the error.

KUP-01007: at line <varname>number</varname> column <varname>number</varname>

Cause: This is an informational message indicating the line and column where a syntax error was detected.

Action: n/a

KUP-01008: the bad identifier was: <varname>string</varname>

Cause: This is an informational message indicating the identifier token that caused a syntax error.

Action: n/a

KUP-02000: wrong message file version (msg <varname>number</varname> not found)

Cause: The kupxx.msb file is not the correct version.

Action: Check that the installation was done correctly.

KUP-02001: unrecognized punctuation symbol "<varname>string</varname>"

Cause: An illegal punctuation character was encountered.

Action: Remove the illegal character.

KUP-02002: unexpected end of input file reached

Cause: This is probably caused by failure to supply the closing quote for a quoted string.

Action: Correct the input.

KUP-02003: unrecognized character: <varname>string</varname>

Cause: An input character that is neither an alpha, digit, or punctuation was encountered.

Action: Remove the character.

KUP-02004: quoted string too big

Cause: A quoted string longer than 2000 bytes was encountered.

Action: This may be caused by a missing close quote. If so, add the missing quote, otherwise shorten the string.

KUP-02005: token too big

Cause: A token longer than 1000 bytes was encountered

Action: Tokens must be separated by whitespace or punctuation. Either add the missing whitespace or punctuation, or shorten the token.

KUP-02006: script line too long

Cause: a line longer than 500 bytes was encountered

Action: break the line up into shorter lines

KUP-03001: fatal error during library cache pre-loading

Cause: This message should be accompanied by other error message(s) indicating the cause of the error.

Action: Check the accompanying errors.

KUP-03002: end position (<varname>number</varname>) <= start position (<varname>number</varname>) for field: <varname>string</varname>

Cause: Error in specifying position for the specified field in the access parameters."

Action: Check that the specified end position is greater than the specified start position.

KUP-03003: absolute end(<varname>number</varname>) - start(<varname>number</varname>) != fieldlength (<varname>number</varname>) for field <varname>string</varname>

Cause: The number of bytes occupied by the field as specified by the starting offset and ending offset of the field is not the same as the number of bytes specified for the datatype of the field.

Action: Verify the absolute begin/end position(s) specified match the length of the field.

KUP-03004: absolute end (<varname>number</varname>) specified with relative start (<varname>number</varname>) for field <varname>string</varname>

Cause: The position of field was specified with a relative start and an absolute end.

Action: Use relative end with relative start

KUP-03005: relative end (<varname>number</varname>) specified does not match fieldlen(<varname>number</varname>) for field <varname>string</varname>

Cause: The number of bytes specified by the relative end position for the field does not match the number of bytes in the datatype.

Action: Correct either the datatype length or the relative end position.

KUP-03006: error initializing handle for character set <varname>string</varname>

Cause: Error attempting to retrieve information for the character set.

Action: Verify that the character set name is valid.

KUP-03007: end position (<varname>number</varname>) is less than start position (<varname>number</varname>) for range

Cause: A byte range specified a start position that comes after the end position.

Action: Verify the start and end positions are correctly specified.

KUP-03008: OCI error getting column parameters.

Cause: An error occurred while trying to obtain column parameters.

Action: Contact Oracle Support.

KUP-03009: OCI error getting column name.

Cause: An error occurred while trying to obtain column name.

Action: Contact Oracle Support.

KUP-03010: OCI error getting database column type.

Cause: An error occurred while trying to obtain database column type.

Action: Contact Oracle Support.

KUP-03011: OCI error getting database column size.

Cause: An error occurred while trying to obtain database column size.

Action: Contact Oracle Support.

KUP-03012: OCI error getting database column precision.

Cause: An error occurred while trying to obtain database column precision.

Action: Contact Oracle Support.

KUP-03013: OCI error getting database column scale.

Cause: An error occurred while trying to obtain database column scale.

Action: Contact Oracle Support.

KUP-03014: OCI error getting datetime fsprecision.

Cause: An error occurred while trying to obtain a datetime column precision value."

Action: Contact Oracle Support.

KUP-03015: OCI error getting datetime lfprecision.

Cause: An error occurred while trying to obtain database column precision.

Action: Contact Oracle Support.

KUP-03016: length specified for FIXED records must be greater than 0

Cause: A record format of FIXED was specified with a length of 0.

Action: n/a

KUP-03017: length specified for VARIABLE records must be greater than 0

Cause: A record format of VARIABLE was specified with a length of 0.

Action: n/a

KUP-03018: invalid date mask "<varname>string</varname>" specified for column <varname>string</varname>

Cause: The date mask for the specified column is invalid.

Action: n/a

KUP-03019: directory object not specified in LOBFILE clause for field <varname>string</varname>

Cause: A LOBFILE clause was specified for the field, but no directory object was specified. When no directory object is specified, then the default directory specified for the external table is used, but no default directory was specified.

Action: Specify a directory object in the LOBFILE clause or specify a default directory for the external table.

KUP-03020: empty delimiter specified for record

Cause: An empty delimiter string was specified for a record delimiter.

Action: Specify the string used to delimiter records.

KUP-03021: clause references unknown field <varname>string</varname>

Cause: A WHEN, NULLIF or DEFAULTIF clause referenced a field that doesn't exist in the data file.

Action: n/a

KUP-03022: lob data could not be found for field <varname>string</varname>\n

Cause: The field specified in the data source that contains the name of the lob file for the record could not be identified.

Action: n/a

KUP-03023: string for TERMINATED BY or ENCLOSED BY clause for record is longer than maximum <varname>number</varname>\n

Cause: The string value for a TERMINATED BY or ENCLOSED BY clause is longer than the maximum number of bytes allowed. If the character set of the data file is different than the character set of the database, the string will be converted to the character set of the data file. If the length of the converted string is too large, then this error will also be returned.

Action: Use shorter delimiters in the data file and the access parameters.

KUP-03024: string for TERMINATED BY or ENCLOSED BY clause for column <varname>string</varname> is longer than maximum <varname>number</varname>\n

Cause: The string value for a TERMINATED BY or ENCLOSED BY clause for the columns is longer than the maximum number of bytes allowed. If the character set of the data file is different than the character set of the database, the string will be converted to the character set of the data file. If the length of the converted string is too large, then this error will also be returned.

Action: Use shorter delimiters in the data file and the access parameters.

KUP-03025: For CSV format files, field <varname>string</varname> is not delimited.\n

Cause: The comma-delimited value (CSV) format files did not have all delimited fields. CSV format files must have all delimited fields so that the access driver can process the fields.

Action: Make all of the fields delimited or remove the CSV specification and retry.

KUP-03026: For FIELD NAMES, field <varname>string</varname> is not delimited.\n

Cause: The data files with a FIELD NAMES record did not have all delimited fields. Data files with a FIELD NAMES record must have all delimited fields so that the access driver can process the field names.

Action: Make all of the fields delimited and retry.

KUP-03027: NULLIF at field level not allowed with NO NULLIF for field <varname>string</varname>.\n

Cause: The field had both NULLIF and NO NULLIF specified. You must specify one or the other.

Action: Remove one of the specifications and retry.

KUP-03028: Field name <varname>string</varname> in field list does not match the name of any table column.\n

Cause: The ALL FIELDS OVERRIDE THESE clause was specified and there was a field name in the field list in the access parameters that did not match the name of a column in the table definition. Only names that match the name of columns in the table may be specified in the field list.

Action: Verify that the correct names are used for the columns in the table and for the fields in the field list.

KUP-03029: Invalid value specified for parameter <varname>string</varname>.

Cause: The access parameter contained an invalid value for the parameter specified in the error message.

Action: Update the access parameters to have a valid value.

KUP-03995: LOCAL TIME ZONE not allowed with DATE_FORMAT TIME\n

Cause: LOCAL can only be specified with TIMESTAMP, not with TIME.

Action: Remove LOCAL or change TIME to TIMESTAMP and try the operation again.

KUP-03996: multiple DATE_FORMAT <varname>string</varname> masks specified at table level for table <varname>string</varname>\n

Cause: Multiple date format masks were specified for the listed datetime or interval data type at the table level for the listed table.

Action: Remove one of the datetime mask specifications and try the operation again.

KUP-03997: invalid DATE_FORMAT <varname>string</varname> mask ("<varname>string</varname>**") specified for table <varname>string</varname>\n**

Cause: The date format mask for listed datetime type for the specified table was invalid.

Action: Fix the mask and try the operation again.

KUP-03998: error <varname>number</varname> formatting KUP message <varname>number</varname>\n

Cause: error occurred while attempting to format a KUP message.

Action: contact Oracle support.

KUP-03999: error occurred while processing a date format: ORA- <varname>number</varname>: <varname>string</varname>

Cause: Error converting a date format string into an internal representation.

Action: Verify that the date format strings specified in the access parameters are valid.

KUP-04000: error initializing I/O state for file <varname>string</varname>\n

Cause: An unexpected error occurred while preparing the file.

Action: Contact Oracle Support Services.

KUP-04001: error opening file <varname>string</varname>\n

Cause: An error occurred while attempting to open the specified file. This message should be followed by another message with more information about the error.

Action: See the error that follows to determine the action to be taken.

KUP-04002: error getting file size for file <varname>string</varname>\n

Cause: An error occurred while retrieving the number of bytes in the specified file.

Action: See the error that follows to determine the action to be taken.

KUP-04003: error while closing file <varname>string</varname>\n

Cause: An error occurred while closing the specified file.

Action: See the error that follows to determine the action to be taken.

KUP-04004: error while reading file <varname>string</varname>\n

Cause: An error occurred while reading the specified file.

Action: See the error that follows to determine the action to be taken.

KUP-04017: OS message: <varname>string</varname>\n

Cause: An error occurred. This message contains the message associated with this error that was returned by the operating system. The message displayed before this one should indicate the operation that failed.

Action: n/a

KUP-04018: partial record at end of file <varname>string</varname>\n

Cause: An incomplete record was found at the end of the file.

Action: Verify the file is not corrupt or missing data.

KUP-04019: illegal length found for VAR record in file <varname>string</varname>\n

Cause: A record in a VAR file has an length field with either no numeric characters in it or with non numeric characters in it.

Action: Verify the records in the file have the correct length specified for them.

KUP-04020: found record longer than buffer size supported, <varname>number</varname>, in <varname>string</varname> (offset=<varname>number</varname>)\n

Cause: a record in the data source was longer than the maximum data size supported. The number reported is the maximum supported size of a record.

Action: n/a

KUP-04021: field formatting error for field <varname>string</varname>\n

Cause: There was an error trying to find the contents of the specified field in a record.

Action: This message should be followed by another message containing more specific information about the cause of the error.

KUP-04022: field start is before start of record\n

Cause: The position of the start of a field is before the start of a record. This can occur if a negative number is used to indicate the relative start of a field.

Action: Verify that the definition of the layout of fields in the data file is correct.

KUP-04023: field start is after end of record\n

Cause: This can happen when specifying either absolute or relative positioning for a field.

Action: Verify that the definition of the layout of fields in the data file is correct. If it is valid for fields at the end of the record to be missing, use the MISSING FIELD VALUES ARE NULL clause in the access parameters.

KUP-04024: field end is before field start

Cause: The end of the field comes after the start of the field. This can happen if the field is defined with a relative start position and an absolute end position.

Action: Verify that the definition of the layout of fields in the data file is correct.

KUP-04025: field extends beyond end of record

Cause: This can happen when specifying either absolute or relative positioning for a field.

Action: Verify that the definition of the layout of fields in the data file is correct.

KUP-04026: field too long for datatype

Cause: The character field in the record is larger than the maximum length specified.

Action: Make sure the definition of the layout of the fields in the data file is correct. Also make sure the correct maximum size was specified for a character datatype.

KUP-04027: file name check failed: <varname>string</varname>

Cause: The check of the filename failed. These checks are platform specific, but they can include verifying that there are no hard links in the file path, the file is not a soft link, the file specification includes a parent reference (".." on Unix), or the file was modified between the time the check was made and the file was opened.

Action: Use a file location that does not violate any of the checks.

KUP-04028: conversion of character length to a number failed

Cause: The character length portion of the field could not be converted to a number. This message is followed by another message with information on why the conversion failed.

Action: Make sure the data is correct. Also verify the datatypes specified for the fields are correct.

KUP-04029: numeric field overflowed

Cause: An attempt to convert a character string to number failed because the value of the number in the string was too large.

Action: n/a

KUP-04030: invalid numeric data

Cause: An attempt to convert a character string to a number failed because non-numeric characters were found.

Action: n/a

KUP-04031: empty filename specified for LOB file in column <varname>string</varname>

Cause: The field in the data file that was supposed to contain the name of a LOB file was empty.

Action: Correct the data so that it contains a valid file name.

KUP-04032: internal error <varname>string</varname> while parsing field <varname>string</varname>

Cause: An internal error occurred while parsing a field.

Action: Contact Oracle support.

KUP-04035: beginning enclosing delimiter not found\n

Cause: The beginning enclosure was not found for a field that is enclosed by delimiters.

Action: Verify that the data is correct. Also verify that the correct enclosing delimiters were specified and whether the enclosing delimiter should be optional.

KUP-04037: terminator not found\n

Cause: The terminator for the field is missing.

Action: Verify that the records are formatted correctly.

KUP-04038: internal error: <varname>string</varname>\n

Cause: an unexpected error condition was detected.

Action: contact Oracle customer support

KUP-04039: unexpected error while trying to find file <varname>string</varname> in <varname>string</varname>\n

Cause: An error occurred while trying to find path containing the file.

Action: This message should be followed by another message with more information about the error.

KUP-04040: file <varname>string</varname> in <varname>string</varname> not found\n

Cause: The file was not found in the directory specified

Action: Verify the correct file and directory names were specified.

KUP-04041: error generating full file name for <varname>string</varname> in <varname>string</varname>\n

Cause: Unexpected error occurred while trying to form a file name.

Action: n/a

KUP-04043: table column not found in external source: <varname>string</varname>\n

Cause: A column in the external table was not found in the access parameters that define the contents of the data source.

Action: Verify that the external table is defined correctly and that the abstract parameters are also correct.

KUP-04044: error positioning file <varname>string</varname>\n

Cause: An attempt to position a file to an absolute file offset failed.

Action: See messages that follow for more information.

KUP-04045: unexpected OCI status <varname>string</varname>

Cause: An OCI call returned a status that cannot be handled.

Action: Contact Oracle support.

KUP-04047: error parsing record from external data source\n

Cause: An error occurred while trying to extract a record from the data source.

Action: Look in the log file for more messages about the error.

KUP-04048: internal error parsing record from external data source\n

Cause: An unexpected or unhandled error occurred while getting a record from the data source

Action: Contact Oracle support.

KUP-04049: record <varname>number</varname> discarded from file <varname>string</varname>\n

Cause: Informational message displayed whenever the WHEN clause has been satisfied. If a DISCARD file has been specified for the operation, the record will be written to that file.

Action: None

KUP-04050: error while attempting to allocate <varname>number</varname> bytes of memory\n

Cause: An error occurred while trying to allocate memory. This is likely caused by insufficient memory.

Action: Reconnect to the instance and retry the operation.

KUP-04051: error processing column <varname>string</varname> in row <varname>number</varname> for datafile <varname>string</varname>\n

Cause: an error occurred while trying to convert the data from the data file into the type of a column in the external table.

Action: See messages that follow for more details.

KUP-04052: \nerror processing column <varname>string</varname> in a row for datafile <varname>string</varname>\n

Cause: an error occurred while trying to convert the data from the data file into the type of a column in the external table.

Action: See messages that follow for more details.

KUP-04053: record number <varname>number</varname>\n

Cause: This message identifies a record number in a file for a record that had an error. The message preceding this one contains information about the error and the name of the file.

Action: n/a

KUP-04054: internal error: invalid bad row <varname>number</varname> identified for bad column <varname>number</varname>\n

Cause: This is an internal error.

Action: Contact Oracle support.

KUP-04055: column <varname>string</varname> is both a field in the data file and a column transform\n

Cause: The specified column was in the list of fields in the data file and in the list of column transforms. The column should be in one list or the other, but not both.

Action: Determine whether the value for the field in the data file or the value for the field in the column transform should be loaded in to the table. If the value for the data file is to be loaded, then remove the column transform. If the value for the column transform is to be loaded, then rename the field in the data file so that it does not match the name of a field in the table.

KUP-04056: internal error: OCI error while fetching record: <varname>number</varname>\n

Cause: An OCI error occurred while processing the granule.

Action: Contact Oracle support.

KUP-04057: internal error: OCI error while fetching record.\n

Cause: An OCI error occurred while processing the granule.

Action: Contact Oracle support.

KUP-04058: unrecoverable error occurred, operation aborted.\n

Cause: An unrecoverable error occurred during processing.

Action: See preceding error messages for more information.

KUP-04059: found EOF in length portion of VARIABLE record in file <varname>string</varname>\n

Cause: The record parser was looking for the size portion of a file a record format of VARIABLE. It found EOF before finding all the bytes for the length.

Action: Correct the corruption in the file.

KUP-04060: field <varname>string</varname> referenced by lobfile column <varname>string</varname> not found\n

Cause: The LOBFILE transform for the named column referenced a field for either the directory object portion or the name portion of the LOBFILE. However, that field did not exist anywhere in the definition of the data file.

Action: Verify that the LOBFILE clause is specified correctly. Also verify that the field definitions for the data file are correct.

KUP-04061: directory object <varname>string</varname> specified for LOBFILE column <varname>string</varname> is not valid\n

Cause: The column being loaded from a LOBFILE specified the directory object containing the LOBFILE through another field in the data file. In this case, the LOBFILE clause in the access parameters must specify a list of all directory objects that will be used for this field. This error occurs because a field contains the name of a directory object that is not in this list.

Action: Verify that the data file contains the correct directory object and verify that the list of valid directory objects in the LOBFILE clause for this column is complete.

KUP-04062: no data source specified\n

Cause: No location for the data source of the external table was specified when the external table was created. An empty string is not valid.

Action: Specify the name of the data source in the LOCATION clause when creating an external table.

KUP-04063: unable to open log file <varname>string</varname>\n OS error <varname>string</varname>\n

Cause: An attempt to open the log file failed.

Action: Specify a different log file or use NO LOGFILE to disable logging.

KUP-04064: fatal error during initialization\n

Cause: An unexpected error occurred while initializing access to an external table.

Action: Contact Oracle support.

KUP-04065: error processing LOBFILE for field <varname>string</varname>\n

Cause: An error occurred while opening or reading a LOBFILE for a column in a row.

Action: See message in log file for more information about the error.

KUP-04066: error initializing access to external table source\n

Cause: An error occurred while attempting to retrieve information about a data source.

Action: See messages preceding this one for more information about the error.

KUP-04067: internal error allocating handle type <varname>string</varname>\n

Cause: An attempt to create an internal object failed.

Action: Contact Oracle support.

KUP-04068: internal error fetching attribute <varname>string</varname>\n

Cause: An attempt to fetch information about an internal object failed.

Action: Contact Oracle support.

KUP-04069: error fetching data for external table\n

Cause: An error occurred while attempting to fetch data from an external table.

Action: See messages the precede this one for more information.

KUP-04070: field <varname>string</varname> referenced by column transform <varname>string</varname> not found\n

Cause: The column transform for the named column references a field that did not exist anywhere in the definition of the data file.

Action: Verify that the column transform clause is specified correctly. Also verify that the field definitions for the data file are correct.

KUP-04071: record discarded from file <varname>string</varname>\n

Cause: Informational message displayed whenever the WHEN clause has been satisfied. If a DISCARD file has been specified for the operation, the record will be written to that file. The record number in the source data file is not known because multiple servers are loading from the file.

Action: n/a

KUP-04072: error writing to file <varname>string</varname>\n

Cause: An error occurred while attempting to write to the named file.

Action: See messages that follow this message for more information about the error.

KUP-04073: record ignored because all referenced fields are null for a record

Cause: A record was rejected because all fields in the data file referenced by the query were NULL.

Action: n/a

KUP-04074: no write access to directory object <varname>string</varname>

Cause: The user does not have write access to the directory object used for a log, bad or reject file.

Action: n/a

KUP-04075: no read access to directory object <varname>string</varname>

Cause: The user does not have read access to the directory object used for a data file.

Action: n/a

KUP-04076: file name cannot contain a path specification: <varname>string</varname>

Cause: The name of a data file, log file, bad file or reject file contains a path specification.

Action: Use the name of a directory object to indicate where the file should be stored.

KUP-04077: unknown format specifier in file name <varname>string</varname>

Cause: A format specifier is a percent sign followed by a character. The percent sign and character are replaced by a value depending on the character. This error occurs when the character following the percent sign is not defined to have a value.

Action: See the documentation for information on valid format specifiers. If the file to be opened needs to have a percent sign in its name then use two percent signs. They will get replaced by a single percent sign in the resulting file name.

KUP-04078: invalid file name specified: <varname>string</varname>

Cause: Attempt to parse the file name failed.

Action: Specify a valid file name.

KUP-04079: error fetching list of valid directories

Cause: An attempt to retrieve a list of valid directories that can be used by the user to open files failed. See messages that follow for more information.

Action: Contact Oracle support. As a workaround try specifying no log file, no discard files and no bad files.

KUP-04080: directory object <varname>string</varname> not found

Cause: The directory object specified for an input file or a log, bad or discard file does not exist in the database or the user has no privileges to access this directory.

Action: n/a

KUP-04081: field <varname>string</varname> used in concatenation for column <varname>string</varname> is not a character type

Cause: The specified field was part of a concatenation of strings used to create the value for the names column. However, the field was not of a character datatype. Only character fields may be used as part of concatenating fields.

Action: Verify the correct field was used in the CONCAT clause. Also verify that the correct datatype is specified for the field in the field list.

KUP-04082: error converting field <varname>string</varname> for LOBFILE column <varname>string</varname>

Cause: The LOBFILE column had either its directory object name or filename specified by a field in the data file and that field needed to be converted to the server's character set before it could be used. This message indicates that an attempt to convert the field failed.

Action: Verify that the data file has the correct value for the fields. Also verify that the correct character set was specified for the data file.

KUP-04083: no directory object specified in LOBFILE clause for column <varname>string</varname>

Cause: There was no directory object specified for the LOB files used to populate the named column and no default directory was specified for the external table.

Action: Either specify a directory name, or the name of a data field containing the name of the directory object that contains the files.

KUP-04084: The ORACLE_DATAPUMP access driver does not support the ROWID column.

Cause: A query of an external table of type ORACLE_DATAPUMP tried to reference the ROWID column. The ORACLE_DATAPUMP access driver does not support ROWIDs.

Action: Remove the ROWID from the query. If that is not possible, create a table in the database with the same columns as the external table, copy the data from the external table into the newly created table, and use that new table for the query.

KUP-04085: duplicate directory object <varname>string</varname> and file <varname>string</varname> specified for unload

Cause: A CREATE TABLE AS SELECT statement was executed for an external table of type ORACLE_DATAPUMP and the same directory object and filename combination was specified multiple times.

Action: Issue the CREATE TABLE AS SELECT command again but make sure the combination of directory objects and filenames is unique.

KUP-04086: length of file name exceeds platform maximum of <varname>number</varname>

Cause: The length of a filename is longer than the maximum length supported by Oracle on the server platform.

Action: Verify that the name is correct. If so, use a shorter file name.

KUP-04087: no execute access to directory object <varname>string</varname>

Cause: Execute access to the directory object used for a preprocessor file was not granted.

Action: Grant execute privilege on the directory object or specify a different directory which already has execute privilege enabled.

KUP-04088: data sampling is not supported by this access driver\n

Cause: A query of an external table requested a sample of the data returned. The access driver for the external table does not support sampling.

Action: Do not try to use sampling for this external table.

KUP-04089: column transform <varname>string</varname> is not the name of a table column\n

Cause: The specified column was in the list of column transforms but a column by that name does not exist in the table

Action: Verify that the correct name was specified in the column transform.

KUP-04090: big endian byte order mark found when little endian expected in <varname>string</varname>\n

Cause: A big endian byte order mark was found at the beginning of the specified file and either the access parameters specified the data was in little endian order or the byte order mark for a previous file was little endian.

Action: The file needs to be loaded separately. If a byte order was specified in the access parameters, make sure it is changed to be big endian.

KUP-04091: little endian byte order mark found when big endian expected in <varname>string</varname>\n

Cause: A little endian byte order mark was found at the beginning of the specified file and either the access parameters specified the data was in big endian order or the byte order mark for a previous file was big endian.

Action: The file needs to be loaded separately. If a byte order was specified in the access parameters, make sure it is changed to be little endian.

KUP-04092: attempt to audit directory object <varname>string</varname> returned internal error <varname>number</varname>\n

Cause: An error occurred while attempting to enable auditing for the specified directory object.

Action: Contact Oracle Support Services.

KUP-04093: error processing the FIELD NAMES record in data file <varname>string</varname>\n

Cause: An error occurred while processing the FIELD NAMES record for the data file.

Action: See the messages that precede this one for more details. Fix the error and retry the operation.

KUP-04094: preprocessing cannot be performed if Database Vault is installed\n

Cause: The Database Vault option did not permit the execution a program from an Oracle directory object.

Action: If preprocessing must be performed, then the Database Vault option must not be installed.

KUP-04095: preprocessor command <varname>string</varname> encountered error "<varname>string</varname>"\n

Cause: The specified preprocessor command encountered an error during execution.

Action: Verify that the preprocessor command along with any arguments are correct.

KUP-04096: Warning: lobfile column transform ignored with PREPROCESSOR option.\n

Cause: The specified column was in the list of lobfile column transforms but the PREPROCESSOR option was also specified. The PREPROCESSOR option does not work in conjunction with lobfile column transforms.

Action: Do not use column transforms with the PREPROCESSOR option.

KUP-04097: RECORDS clause specified without a record format\n

Cause: The RECORDS clause was part of the external table access parameters but no record format type was provided.

Action: If the RECORDS clause is used, then it must be followed by one of the VARIABLE, FIXED, or DELIMITED BY clauses.

KUP-04098: empty field name for field <varname>number</varname> in the FIELD NAMES record in data file\n

Cause: The field name for the listed field number in the FIELD NAMES record was empty.

Action: Specify a valid field name in the data file and retry the operation.

KUP-04099: Missing one or more field names in the FIELD NAMES record in the data file. Found <varname>number</varname> fields, there should be <varname>number</varname> fields.\n

Cause: One or more field names was not listed in the FIELD NAMES record. However, it was listed in the access parameter list for the external table.

Action: Include all field names in the data file and retry the operation.

KUP-04100: record rejected in file <varname>string</varname>\n

Cause: A record in the data file was not loaded into the table because of an error while finding fields in the record. See the previous error for more information. The record will be written to the BAD file, if one is being used. The record number in the source data file is not known because multiple servers are loading from the file.

Action: n/a

KUP-04101: record <varname>number</varname> rejected in file <varname>string</varname>\n

Cause: A record in the data file was not loaded into the table because of an error while finding fields in the record. See the previous error for more information. The record will be written to the BAD file, if one is being used.

Action: n/a

KUP-04102: record <varname>number</varname> discarded from file <varname>string</varname>\n

Cause: Informational message displayed whenever the WHEN clause has been satisfied. If a DISCARD file has been specified for the operation, the record will be written to that file.

Action: n/a

KUP-04103: error converting zoned decimal field to number for <varname>string</varname>\n

Cause: An error occurred converting a zoned decimal number to an Oracle number.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04104: zoned decimal field has bad values for <varname>string</varname>\n

Cause: A zoned decimal number has an invalid format.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04105: zoned decimal to number conversion caused overflow for <varname>string</varname>\n

Cause: A zoned decimal number could not be converted to an Oracle number because the number is too big for an oracle number.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04106: precision for zoned decimal number is too large for <varname>string</varname>\n

Cause: The precision of a zoned decimal number is larger than the precision that can be stored in an Oracle number.

Action: Verify that the zoned decimal number is formatted correctly.

KUP-04107: substring of field <varname>string</varname> for column <varname>string</varname> is not a character type\n

Cause: A substring was specified for a field that which is not a character datatype. Only character fields may be used when specifying the substring transform.

Action: Verify the correct field was used in the STARTOF clause. Also verify that the correct datatype is specified for the field in the field list.

KUP-04108: unable to reread file <varname>string</varname>\n

Cause: The query that is executing requires that a data source for an external table be read multiple times. However, the data source is a sequential device that cannot be reread. Examples of this type of data source is a tape or pipe.

Action: There are a few ways around this problem. One is to rewrite the query so that the external table is referenced only once. Another option is to move the data source to a rereadable device such as a disk file. A third option is to load the data for the external table into a temporary table and change the query to reference the temporary table.

KUP-04109: specified path for directory object "<varname>string</varname>" is invalid\n

Cause: The default directory or a directory object specified for an input data file or an output dump, log, bad or discard file contains an invalid path name.

Action: Specify a valid path name for the directory object.

KUP-04116: Field name <varname>string</varname><varname>string</varname><varname>string</varname> in the FIELD NAMES record in the data file is too long.\n

Cause: The field name exceeded the maximum of 30 characters.

Action: Specify at most 30 characters.

KUP-04117: Field name <varname>string</varname><varname>string</varname><varname>string</varname> was not found in the access parameter field list or table.\n

Cause: The listed field name in the FIELD NAMES record of the data file was not found in the access parameter field list or in the table columns. The next error message, if any, lists the name of the data file where the error was found.

Action: Verify that the field name in the FIELD NAMES record is correct. If that is correct, verify that the external table is defined correctly and that the access parameter field list is also correct.

KUP-04118: operation "<varname>string</varname>", location "<varname>string</varname>"\n

Cause: This message provides information about the previous messages.

Action: Refer to the help for the previous message for more information.

KUP-04119: Error <varname>number</varname> opening directory for wild card search: <varname>string</varname>\n

Cause: An error occurred while trying to open a directory to look for files that match a wild card specification.

Action: See messages that follow for more details.

KUP-04120: Error <varname>number</varname> fetching count of files for wild card search in directory <varname>string</varname>\n

Cause: An error occurred while trying to retrieve the count of files matching a wild card specification in the directory

Action: See messages that follow for more details.

KUP-04121: Error <varname>number</varname> fetching file names for wild card search in directory <varname>string</varname>\n

Cause: An error occurred while trying to retrieve the names of files matching a wild card specification in the directory

Action: See messages that follow for more details.

KUP-04122: Error <varname>number</varname> finishing wild card search in directory <varname>string</varname>\n

Cause: An error occurred while trying to finish a search for files that match a wild card specification the directory. matching a wild card specification in the directory

Action: See messages that follow for more details.

KUP-05001: Shift based character sets not supported with CSV format files\n

Cause: CSV is being used with a shift based character set.

Action: Either use a non-shift based character set or do not use CSV format files.

KUP-05002: There are no matching files for any file specification in the LOCATION clause.

Cause: One or more file specifications including wild cards were specified in the LOCATION clause, but none of the files matched any of the specifications.

Action: Check to make sure that the file specifications are correct and that one or more files match the file specifications and then try the operation again.

KUP-05003: Warning: There are no matching files for this specification.\n

Cause: No matching files were found for the LOCATION clause specification listed in the previous error message.

Action: No action is required. However, if you expected the LOCATION clause specification to match one or more files, check the specification and the files in the directory to make sure that they are correct. If needed, try the operation again.

KUP-05004: Warning: Intra source concurrency disabled because parallel select was not requested.\n\n

Cause: Intra source concurrency can only be used when parallel select has been requested.

Action: No action is required this message is informational.

KUP-05005: Warning: Intra source concurrency disabled because a field of type RECNUM exists.\n\n

Cause: Intra source concurrency cannot be used with RECNUM fields.

Action: No action is required this message is informational.

KUP-05006: Warning: Intra source concurrency disabled because a complex terminator string is being used.\n\n

Cause: Intra source concurrency cannot be used with terminators where replicated substrings in the terminator could cause ambiguity during record parsing.\n\n"

Action: No action is required this message is informational.

KUP-05007: Warning: Intra source concurrency disabled because the preprocessor option is being used.\n\n

Cause: Intra source concurrency cannot be used with the PREPROCESSOR option.

Action: No action is required this message is informational.

KUP-05008: Warning: Intra source concurrency disabled because the input data is in DELIMITED record format and the charset is neither fixed width nor UTF8.\n\n

Cause: Intra source concurrency cannot be used with the DELIMITED record format if the charset is neither fixed width or UTF8.

Action: No action is required this message is informational.

KUP-05009: Warning: Intra source concurrency disabled because the input data is in VARIABLE record format.\n\n

Cause: Intra source concurrency cannot be used with the VARIABLE record format.

Action: No action is required this message is informational.

KUP-05010: Warning: Intra source concurrency disabled because the input data is in CSV format with embedded record delimiters/terminators.\n\n

Cause: Intra source concurrency cannot be used with the CSV record format that has embedded record delimiters/terminators.

Action: No action is required this message is informational.

KUP-11000: file truncated error\n

Cause: A truncated file was used for the load operation.

Action: Verify unload operation completed successfully.

KUP-11001: files not from the same unload operation\n

Cause: Files used for the load operation were not from the same unload operation.

Action: Verify the files used are from the same unload operation.

KUP-11002: unable to read data chunk <varname>string</varname>\n

Cause: A read or seek to this data chunk was not possible. This chunk may not have existed.

Action: Verify the files used for the load operation are correct.

KUP-11003: bad data encountered while reading from file <varname>string</varname>\n

Cause: There was a datatype conversion error while attempting to convert the data in the data file to match the datatype of a column in the external table. The message that follows this one displays the name of the column and the start of the data for the column that could not be converted. The row containing the bad data is rejected and not included as a row in the external table.

Action: If the row containing the bad data should not be filtered out, then modify the definition of the external table so that the datatypes of the columns match the datatypes of the fields in the data file.

KUP-11004: requested version <varname>string</varname> not supported by ORACLE_DATAPUMP\n

Cause: This database version (defaulted to COMPATIBLE if not user-specified) was not supported by ORACLE_DATAPUMP external table access driver. Note: Database versions before 9.2 were not supported.

Action: Specify a supported version and rerun the operation.

KUP-11005: error seeking in file: <varname>string</varname>\n

Cause: An attempt to seek to the specified position in file failed.

Action: Review the error message. Resolve the problem and retry the the operation. Contact Oracle Support Services if the problem cannot be resolved.

KUP-11006: file truncated error in <varname>string</varname>\n

Cause: A truncated or incomplete file was used for the load operation.

Action: Verify unload operation completed successfully.

KUP-11007: conversion error loading table <varname>string</varname>.<varname>string</varname>

Cause: A row could not be loaded into the table because there was a conversion error for one or more columns in a row.

Action: See the message that follows for more information about the row that could not be loaded. To avoid this error, make sure the definition of the table being loaded matches the definition of the table being unloaded.

KUP-11008: conversion error loading table <varname>string</varname>.<varname>string</varname> partition <varname>string</varname>

Cause: A row could not be loaded into the table because there was a conversion error for one or more columns in a row.

Action: See the message that follows for more information about the row that could not be loaded. To avoid this error, make sure the definition of the table being loaded matches the definition of the table being unloaded.

KUP-11009: data for row: <varname>string</varname> \n

Cause: A conversion error occurred while loading data into a table. The message shows values for the field in the row that had the conversion error.

Action: None. This is only an informational message.

KUP-11010: unable to open at least one dump file for fetch\n

Cause: None of the files in the LOCATION clause can be opened for a fetch on an external table.

Action: A fetch operation on an external table in SQL mode requires that at least one file could be opened. Check that the directory object and file names to the dump files are correct.

KUP-11011: the following file is not valid for this load operation\n

Cause: This file could not be used for this load operation. See the following message for more information.

Action: Verify all the files in the LOCATION clause are from the same unload operation and that the unload was successful.

KUP-11012: file <varname>string</varname> in <varname>string</varname> already exists\n

Cause: The specified file could not be used for this unload because that would mean overwriting an existing file.

Action: Specify a file that does not currently exist.

KUP-11013: internal number in header in file <varname>string</varname> is not valid\n

Cause: The specified file could not be used for this operation because the internal number in the header was not valid.

Action: If the dump files were transferred over, verify the transfer operation was done correctly.

KUP-11014: internal metadata in file <varname>string</varname> is not valid

Cause: The specified file could not be used for this operation because the internal metadata stored in this file does not match the metadata stored in the first file piece set.

Action: Verify all the files in the LOCATION clause are the correct dump files to use.

KUP-11015: error in unloading or loading data

Cause: An error has occurred in a stream unload or load operation.

Action: Contact Oracle Support Services.

KUP-11016: database version in file <varname>string</varname> is not valid

Cause: The specified file could not be used for this fetch because its database version was not compatible with the database version in the other files in the LOCATION clause.

Action: Verify all the files in the LOCATION clause were populated with compatible database versions.

KUP-11017: file <varname>string</varname> not found

Cause: The file was not found.

Action: Verify the correct file (path and file name) was specified.

KUP-11018: file <varname>string</varname> not a valid dump file

Cause: This file did not have the correct file format. It could not be used for an external table fetch operation.

Action: Verify this file is from a SQL mode external table populate operation and that the operation was successful.

KUP-11019: the following file is not valid for this fetch operation

Cause: A file could not be used for this fetch. See the following message for more information.

Action: Verify all the files in the LOCATION clause are from successful populate operations. If the files were generated from various populate operations, then verify that those were done with common attributes such as with the same tables and compatible database versions.

KUP-11020: header in file <varname>string</varname> may not contain correct information

Cause: The header may be corrupted.

Action: Contact Oracle Support Services.

KUP-11021: header in file <varname>string</varname> has an incompatible version number

Cause: A dump file was specified for a load operation whose version number is incompatible with the dump file version currently produced by the Oracle server on the system. Usually this message indicates that the dump file was produced by a newer version of the Oracle server.

Action: Load this dump file using the same version of the Oracle server that created the file.

KUP-11022: specified file name "<varname>string</varname>" is invalid

Cause: The file name specified for a dump or log file was invalid or null.

Action: Specify a valid file name for the dump or log file.

KUP-11023: specified path for directory object "<varname>string</varname>" is invalid

Cause: The default directory or a directory object specified for a dump or log file contained an invalid path name or was null.

Action: Specify a valid path name for the directory object.

KUP-11024: This external table can only be accessed from within a Data Pump job.

Cause: An attempt was made to access a temporary external table that was created by Data Pump to be used internally during the execution of an export or import job.

Action: None

LCD-00100 to LCD-00219

LCD-00100: internal error, argument [<varname>number</varname>]

Cause: An internal error has occurred

Action: Report it to your System Administrator immediately

LCD-00111: value not in legal range [<varname>string</varname>]

Cause: The value of the parameter is outside bounds

Action: Refer to the manual for the bounds on the parameter

LCD-00112: illegal integer radix specification [<varname>string</varname>]

Cause: Self Explanatory

Action: valid characters are 'd', 'h', 'D' and 'H'

LCD-00113: integer conversion error or negative integer [<varname>string</varname>]

Cause: A bad or negative integer was assigned to an integer parameter

Action: Self explanatory

LCD-00114: illegal boolean response [<varname>string</varname>]

Cause: You a value than TRUE or FALSE to a boolean parameter

Action: Boolean parameters only take TRUE or FALSE

LCD-00122: unrecognized keyword [<varname>string</varname>]

Cause: You have misspelled the parameter name

Action: Spell the parameter name correctly

LCD-00128: invalid positional parameter value [<varname>string</varname>]

Cause: An invalid positional parameter value has been entered

Action: Remove the invalid positional parameter

LCD-00161: ORACLE error (possible syntax error) parameter [<varname>string</varname>]

Cause: Possible syntax error. Additional messages follow.

Action: Correct the parameter in error.

LCD-00201: could not open specified filename [<varname>string</varname>]

Cause: The file specified does not exist

Action: Create an appropriate parameter file

LCD-00203: missing keyword [<varname>string</varname>]

Cause: A keyword is expected but none was found

Action: Add a keyword followed by an '=' sign and a parameter value

LCD-00204: left parenth and no parameter specified [<varname>string</varname>]

Cause: A parameter list was started but no parameter was specified

Action: Add an appropriate list of values and close the parameter list

LCD-00205: unbalanced parentheses [<varname>string</varname>]

Cause: Self explanatory

Action: Balance the parentheses

LCD-00206: positional parameter entered after keyword [<varname>string</varname>]

Cause: An '=' sign is missing

Action: All keywords must be followed by '=' signs

LCD-00207: nested parentheses encountered [<varname>string</varname>]

Cause: Only one set of parentheses is permitted

Action: Remove the nested parentheses

LCD-00208: unexpected keyword in value list [<varname>string</varname>]

Cause: A keyword was found instead of a value

Action: Insert an appropriate value for the given parameter

LCD-00209: missing value for keyword at end of string [<varname>string</varname>]

Cause: A keyword is specified with no value

Action: Specify a valid value for the keyword

LCD-00210: illegal assignment operator [<varname>string</varname>]

Cause: You used a sign other than '=' to assign a keyword a value

Action: Use only the '=' sign

LCD-00211: unexpected delimiter [<varname>string</varname>]

Cause: An invalid delimiter was found between values

Action: A comma or a space is a valid delimiter

LCD-00212: runaway quoted string [<varname>string</varname>]

Cause: The parameter value was quoted on the left side but not on the right

Action: Quote the parameter value on both sides

LCD-00215: parameter files nested too deep [<varname>string</varname>]

Cause: Too many levels of indirection of file parameters. Maximum is 3.

Action: Reduce the level of indirection to less than 3

LCD-00217: failure while processing file parameter [<varname>string</varname>]

Cause: An error occurred while processing the specified file parameter

Action: Specific details will appear in other messages

LCD-00218: error in file [<varname>string</varname>]

Cause: An error occurred in the particular file.

Action: Refer to the other messages for the specific error.

LCD-00219: nested include file [<varname>string</varname>] is too large

Cause: There is a limit on the size of a parameter file, and it was exceeded. This limit is now 8192 bytes.

Action: Remove characters from the file to make it smaller, or use another level of nesting.

LFI-00002 to LFI-01525

LFI-00002: Out of memory. <varname>string</varname>

Cause: The File IO package failed in trying to dynamically allocate memory. function name is used for additional comments to indicate where, when and why the error occurred.

Action: Perform whatever actions necessary to make more memory available to the executing program.

LFI-00003: Internal exception code. icode = [<varname>string</varname>], [<varname>string</varname>].

Cause: Unknown - indicated by parameters. The first '%s' gives the internal exception code; the second is for any other additional comments.

Action: Report to the appropriate development group

LFI-00004: Call to <varname>string</varname> failed.

Cause: A function call has failed. This error is a generic message to show that the exception has occurred in a particular function name. This allows the client to know the trace runtime calling sequence by examining the exception stack.

Action: See the accompanying error messages for more information.

LFI-00005: Free some memory failed in <varname>string</varname>.

Cause: A call to free some memory in function name has failed.

Action: See the accompanying error messages for more information and contact Oracle Worldwide Support immediately.

LFI-00006: Invalid parameter to function <varname>string</varname>.

Cause: The function was called with an invalid parameter.

Action: Check the function call to make sure that the correct parameters are being passed.

LFI-00007: NLSRTL's call failed. <varname>string</varname>.

Cause: LX calls return failure

Action: Check if our parameters are correct. Contact the appropriate group immediately if we parameters are valid.

LFI-00008: SLTS's initializing/terminating mutex failed for <varname>string</varname>.

Cause: SLTS's call return failure in function '%s'.

Action: Contact the appropriate development group.

LFI-00100: Unable to perform operation, file not opened in <varname>string</varname>.

Cause: The file has not been successfully opened at the time the operation is attempted.

Action: Check to make sure that the file exists (for read) or that the program has access to the write a file (for write). It is also possible that the file was just never opened

LFI-00101: Write failed, file cannot be written to.

Cause: The buffer write operation failed. Possibly due to incorrect parameters being passed in.

Action: Check the underlying error for more information.

LFI-00102: Unable to seek in sequentially accessed file.

Cause: The file was opened with the flag LFILFA_SEQ for sequential file operations. Use seek only on files that are opened with the LFILFA_RANDOM flag for random access.

Action: Check to see how the file is being opened and accessed and make the two operations consistent (that is, make them both operations either sequential or random).

LFI-00103: Seek operation failed.

Cause: The buffer seek operation failed. Probably due to incorrect parameters or flags.

Action: Check syntax of the seek command and retry the operation.

LFI-00104: Read operation failed.

Cause: The buffer read operation failed. Probably due to incorrect parameters or flags.

Action: Check syntax of the read command and retry the operation.

LFI-00105: Unable to add path.

Cause: One of the following might have caused the error: the current path might not be in the proper format the directory might not be in the proper format the name object might not have been initialized properly

Action: Check the format of the current path and the new directory; check that the name object was initialized properly.

LFI-00106: Path object holds more than one path.

Cause: The path object passed to lfippth() holds more than one path.

Action: Make sure that the path object used in lfippth() holds only one path.

LFI-00107: Open does not expect the file [<varname>string</varname>] [<varname>string</varname>] to exist.

Cause: The flags specified for the open indicate that the file does not exist. However, the file does exist.

Action: Check to make sure that the options that were specified for the file are correct and that you do not expect that the file should exist. If so then find out why the file does exist.

LFI-00108: Open expect the file [<varname>string</varname>] [<varname>string</varname>] to exist.

Cause: The flags specified for the open indicate that the file the file to exist and it does not.

Action: Check to make sure that the options that were specified for the file are correct and that you expect that the file should exist. If so then find out why the file doesn't.

LFI-00109: Unable to open file [<varname>string</varname>][<varname>string</varname>]. <varname>string</varname>.

Cause: Either: the process does not have the proper access rights to open the file the file is already open

Action: Check to make sure the proper access permissions are assigned. If they are and the file still cannot be opened, then contact Oracle Worldwide Support.

LFI-00110: Unable to initialize the Buffer Manager.

Cause: The Buffer Manager initialization routine failed; probably because memory was exhausted.

Action: See the accompanying error messages for more information.

LFI-00111: No other flags allowed in fixed length format.

Cause: The function lfigfo() was called with an invalid File ID Descriptor. The valid File ID Descriptors are LFISTDIN, LFISTDOUT, and LFISTDERR.

Action: Check the call to lfigfo() to make sure it is correct.

LFI-00113: Unable to initialize the Standard File object <varname>string</varname>.

Cause: The call to open the standard file object failed.

Action: Check the underlying errors for more information.

LFI-00114: Append is not allowed with <varname>string</varname>.

Cause: Attempting to append using certain options.

Action: Check the flag options to verify its usage.

LFI-00115: Buffer free failed.

Cause: Probably do to the buffer flush failing.

Action: See the accompanying error messages for more information.

LFI-00116: Unable to close file in operation <varname>string</varname>.

Cause: The file close operation failed.

Action: See the accompanying error messages for more information.

LFI-00117: Unable to rename file.

Cause: The rename operation failed. Rename is called when we are protecting a file by operating on a temp file.

Action: Check to make sure that the process has the correct access rights to perform a rename.

LFI-00118: Unable to change type to Unknown.

Cause: The function `lfichy()` was called to change the file extension to `LFIEXUNK` (Unknown). This is not a valid operation.

Action: Check why you are doing this. If the extension is already unknown then you do not need to do this. If you just want no extension then use the extension type `LFIEXNONE`.

LFI-00119: Unable to Abort an Unprotected file.

Cause: The Abort function `lfiabt()` was called on a file that was not opened as a protected file. As such the abort operation is not valid.

Action: Check to see if you intended to open the file as a protected file.

LFI-00120: Unable to parse root filename <varname>string</varname>.

Cause: The root filename that was given to `lfimknam()` is not in a format that this platform understands.

Action: Check the format of the filename and retry the operation.

LFI-00121: Only one of REPLACE, or PROT allowed for opty.

Cause: Two or more of the following open type options were specified for the `lfilini()` function: `LFILOPTY_REPLACE`, or `LFILOPTY_PROT`.

Action: Remove one or more the of options such that you are only passing in one of the three.

LFI-00122: Can only delete a file if we create it.

Cause: The delete file flag was specified for a file that was not created by this file operation. The ability to delete a file is not portable. As such the only deletion that is allowed by this package is if we know we want to delete the file when we create it.

Action: You can only delete a file that you create. If you need to delete a file that you do not create then you will have to find another means of doing so.

LFI-00123: Cannot access file Sequentially and Randomly.

Cause: Both the `LFILFA_SEQ` (sequential) and `LFILFA_RANDOM` (random) flags were specified during the file object creation. This is not allowed. Only one of the two may be specified.

Action: Choose how you wish to access the file. If you choose random you can still access sequentially by just not using the repositioning functions.

LFI-00124: No access mode was specified, default is sequential.

Cause: Neither `LFILFA_SEQ` (sequential) or `LFILFA_RANDOM` (random) were specified during file object creation.

Action: The default is sequential but this should be explicitly set.

LFI-00125: Random access only allowed on fixed length record files.

Cause: The `LFILFA_RANDOM` flag was specified on a file that was not organized into fixed-length records. Random access is only allowed on fixed-length record files.

Action: Determine if the organization of your data needs to be in variable-length records and if you need to have random access to the file. If both conditions are true then you might need to buffer the entire file or enough of it to remove your need for random access. Another option is to close and rescan the file although this is not the optimal solution.

LFI-00126: Record format can only be one of Fixed or Variable.

Cause: Both LFILRF_FIXED (fixed) and LFILRF_VAR (variable) were specified during file object creation. Only one of the two is allowed for a given file.

Action: Determine how the file is organized and choose the option that matches.

LFI-00127: No Record Format was specified, default is variable.

Cause: Neither LFILRF_FIXED (fixed) or LFILRF_VAR (variable) were specified for record format. One of the two must be specified for each file.

Action: The default is LFILRF_VAR, but this should be explicitly set during file object creation.

LFI-00128: Carriage Control is only valid for Standard file objects.

Cause: The Carriage Control option is only valid for the standard file objects (LFISTDIN, LFISTDOUT, LFISTDERR). You may not specify this option for any other type of file.

Action: Choose between LFILRF_FIXED and LFILRF_VAR for the record format.

LFI-00129: Invalid option <varname>string</varname> were specified on an input only file.

Cause: The file was opened as input only but the output mode option LFILRF_WR_ASIS or delete option LFLOPTY_DELETE was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00130: Input option specified on output only file.

Cause: The file was opened as output only but one of the input mode options (LFILRF_READ_NL or LFILRF_FORCE_NL) or was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00131: No open type specified.

Cause: The file object was created without an open type (that is, LFILOPTY_INPUT, LFILOPTY_OUTPUT, etc.).

Action: Decide how the file should be accessed and specify one of the open types.

LFI-00132: Record length <varname>string</varname> is greater than max length of <varname>string</varname>.

Cause: The record length specified for the file is greater than the max supported by this platform.

Action: Decrease the record length.

LFI-00133: Trying to create file <varname>string</varname> that already exists.

Cause: The file object was initialized with LFILOPTY_OUTPUT and without LFILOPTY_REPLACE and yet a file by this name already exists.

Action: Check to make sure that you are creating the right file. If you intend to overwrite the file if it exists that specify the replace option LFILOPTY_REPLACE when initializing the file object.

LFI-00134: Unable to protect a file for an append operation.

Cause: The LFILOPTY_APPEND and LFILOPTY_PROT options were both specified for the file. This is currently not allowed because it would require copying the entire file at open time.

Action: Decide if you really need to protect the file for append. If so then think about making a copy of it before appending.

LFI-00135: Unable to remove temporary file.

Cause: A temporary file was created to protect a file and when the the tempfile was nolonger needed it LFI attempted to remove it and was unable to do so.

Action: Check the permissions and where the temp files are being created.

LFI-00136: Unable to change type of open file.

Cause: The function lfichy() was called on an opened file.

Action: This is a bug in the client code. lfichy() cannot be used in this case.

LFI-00137: Unable to perform <varname>string</varname> on a file object that is <varname>string</varname>.

Cause: Unable to perform an LFI operation on a file object for the given reason.

Action: Take the appropriate corrective measure. For example if a file is supposed to be opened before the operation can be performed, client code will need to open the file first.

LFI-00138: Unable to perform <varname>string</varname> on a name object that is <varname>string</varname>.

Cause: Unable to perform an LFI operation on a name object for the given reason.

Action: Take the appropriate corrective measure.

LFI-00139: Option <varname>string</varname> cannot be used with option <varname>string</varname> in calling <varname>string</varname>.

Cause: First option cannot be used with second option in such a function call.

Action: Re-examine code to determine which option is needed.

LFI-00140: Invalid option <varname>string</varname> were specified on input-output file.

Cause: The file was opened as input-output and one of the mode options (LFILOPTY_DELETE or non-LFILOPTY_RANDOM) was specified.

Action: Check to see how you intend to open this file and make the necessary changes.

LFI-00141: Unable to abort file in operation <varname>string</varname>.

Cause: The abort operation failed.

Action: Check the underlying errors for more information.

LFI-00142: Unable to delete an existing file [<varname>string</varname>] [<varname>string</varname>] not owned by Oracle.

Cause: The file was not created by Oracle.

Action: Change owner of file to Oracle or give Oracle access privileges to delete it.

LFI-00143: Unable to delete non-existent file <varname>string</varname>.

Cause: The file to be deleted does not exist.

Action: Check the underlying errors for more information.

LFI-00144: File [<varname>string</varname>][<varname>string</varname>] does not exist

Cause: The file does not exist.

Action: Check to make sure the file exists and retry the operation.

LFI-00145: User buffer too short.

Cause: The buffer that was passed is not large enough.

Action: Allocate a larger buffer and retry the operation.

LFI-00146: copy does not expect the file <varname>string</varname>.<varname>string</varname> to exist

Cause: We are expecting the destination file not to exist and it does.

Action: Find out why the file does exist.

LFI-00147: File <varname>string</varname>.<varname>string</varname> does not exist

Cause: The file does not exist.

Action: Check to make sure the file exists and retry the operation.

LFI-00148: <varname>string</varname> can be called only on files opened in byte mode

Cause: A routine that should be used only for files in byte mode was called for a file that was opened in record mode

Action: In order to use this function, the file should be opened in byte mode.

LFI-00149: Error on destroying hash table in function <varname>string</varname>

Cause: We were expecting the cache path object and it does not.

Action: In order to use this function, the path object should be cache path object.

LFI-00150: Error on creating hash table in function <varname>string</varname>

Cause: routine failed to create path object hash table

Action: make sure that startsize <= LHTQMAXSLOTS

LFI-00151: Error on inserting into hash table in function <varname>string</varname>

Cause: routine failed to insert into hash table

Action: make sure there is enough memory for allocation and that the hash table exists.

LFI-00152: Read operation (byte mode) failed.

Cause: Byte mode read operation failed. Probably due to incorrect parameters or flags, or trying to read beyond end of file.

Action: Check syntax of the read command and size of file.

LFI-01000: Unable to write line to file.

Cause: The file being written to may no longer be open or we may have reached the end of the file.

Action: Examine underlying errors for more information.

LFI-01001: Unable to write <varname>string</varname> bytes to file.

Cause: The file being written to may no longer be open or we may have reached the end of the file.

Action: Examine underlying errors for more information.

LFI-01002: Unable to read line from file.

Cause: The file being read from may no longer be open.

Action: Examine underlying errors for more information.

LFI-01003: Unable to read <varname>string</varname> bytes from file.

Cause: The file being read from may no longer be open.

Action: See the accompanying error messages for more information.

LFI-01004: Unable to empty buffer.

Cause: The buffer manager is probably unable to write to the underlying file.

Action: Examine underlying errors for more information.

LFI-01005: Unable to fill buffer.

Cause: The buffer manager is probably unable to read from the underlying file.

Action: See the accompanying error messages for more information.

LFI-01006: File ends in partial character in <varname>string</varname>.

Cause: A line ends in a partial character.

Action: Examine underlying errors for more information.

LFI-01007: Line is too long; encountered in function <varname>string</varname>.

Cause: The length of the line exceeds the maximum length.

Action: Examine underlying errors for more information.

LFI-01500: Error condition on call to OSD function <varname>string</varname>.

Cause: An error condition arises in calling an OSD function. This message occurs if calls to malloc or free functions failed.

Action: Contact Oracle Worldwide Support.

LFI-01501: tmpnam() fails to generate temporary file name.

Cause: Operating system was unable to create temporary file name.

Action: Contact the development organization.

LFI-01502: Base filename does not exist.

Cause: The filename that was parsed had no base file. It was either all path or extension.

Action: Check the filename being passed in to make sure it is correct.

LFI-01503: Max filename size exceeded generating filename.

Cause: While building a filename we exceeded the buffer allocated to hold the new filename.

Action: Contact the development organization.

LFI-01504: fseek() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: The function fseek() returned an error condition.

Action: Contact Oracle Worldwide Support.

LFI-01505: fclose() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: The function fclose() returned an error condition.

Action: Contact Oracle Worldwide Support.

LFI-01506: fflush() failed(OSD return value = <varname>string</varname>).

Cause: The function fflush() returned an error condition.

Action: Contact the development organization.

LFI-01507: fwrite() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: File pointer may be null or may not be opened for write.

Action: Contact the development organization.

LFI-01508: access() failed.

Cause: Call to access() failed.

Action: Contact the development organization.

LFI-01509: fopen() failed(OSD return value = <varname>string</varname>).

Cause: Call to fopen() failed.

Action: Contact Oracle Worldwide Support.

LFI-01510: fread() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: Call to fread() failed.

Action: Contact Oracle Worldwide Support.

LFI-01511: unlink() failed(OSD errno = <varname>string</varname>) in <varname>string</varname>.

Cause: Call to unlink() failed.

Action: Contact the development organization.

LFI-01512: stat() failed

Cause: Call to stat() failed.

Action: Contact Oracle Worldwide Support.

LFI-01514: ftell() failed in <varname>string</varname>

Cause: The ftell() function returned an error.

Action: Contact Oracle Worldwide Support.

LFI-01515: truncate() failed.

Cause: The function truncate() returned an error condition.

Action: Contact the development organization.

LFI-01516: read() failed (OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: Call to read() failed.

Action: Contact the development organization.

LFI-01517: open() failed(OSD return value = <varname>string</varname>).

Cause: Call to open() failed.

Action: Contact the development organization.

LFI-01518: write() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: Call to write() failed.

Action: Contact the development organization.

LFI-01519: lseek() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: The lseek() function returned an error.

Action: Contact Oracle Worldwide Support.

LFI-01520: close() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: The function close() returned an error condition.

Action: Contact the development organization.

LFI-01521: fsync() failed(OSD return value = <varname>string</varname>) in <varname>string</varname>.

Cause: The function fsync() returned an error condition.

Action: Contact the development organization.

LFI-01522: opendir() failed.

Cause: The function opendir() returned an error condition.

Action: Contact the development organization.

LFI-01523: rename() failed.

Cause: The function rename() returned an error condition.

Action: Contact the development organization.

LFI-01524: fdopen() failed(OSD return value = <varname>string</varname>).

Cause: Call to fdopen() failed.

Action: Contact the development organization.

LFI-01525: setvbuf() failed.

Cause: A call to lficstd() had failed.

Action: Contact development service

LPX-00000 to LPX-01160

LPX-00000: normal, successful completion

Cause: Normal exit

Action: No action required.

LPX-00001: NULL pointer

Cause: A NULL pointer was detected as an internal error condition.

Action: This is a programming error by the caller of the XML parser. Please contact someone who can fix the problem.

LPX-00002: out of memory

Cause: The operating system has run out of memory.

Action: Make more memory available to the program.

LPX-00003: duplicate entry in hash table

Cause: An internal error has occurred (a key was requested to be placed in a hash table but was already there).

Action: Contact Oracle Support Services and report the error.

LPX-00004: internal error "~s"

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LPX-00005: ~1s buffer overflow, maximum size is ~2u bytes

Cause: A name, quoted string, URL, or other document component was too long.

Action: Restrict the component to the maximum size shown.

LPX-00006: invalid child type for parent node

Cause: An attempt was made to add an invalid node-type to a parent node.

Action: Correct the code.

LPX-00007: unexpected end-of-file encountered

Cause: The document ended unexpectedly, perhaps due to truncation.

Action: Verify that the document is complete.

LPX-00008: invalid memory callback

Cause: The memory callback structure passed to xmlinit was missing the allocate or free functions (or both).

Action: Provide both functions in the callback structure.

LPX-00011: In line ~1u of ~2s [general entity ~3S]:

Cause: Error message prefixes, not errors themselves. These are the possible banner messages which appear before an XML error to describe the position (line#) and source (buffer or URI) in which the error occurred, as well as the entity's name (if the source is an entity). Parameter entity banner must be at +1 to non-entity banner, general entity at +2 (see lpxerr.c).

Action: No action required. This is not an error message.

LPX-00012: Unicode data alignment error

Cause: An input Unicode (UCS2) datum was not aligned properly.

Action: UCS2 data consists of an array of shorts (ub2) which must be aligned on an even-byte boundary.

LPX-00013: wrong node type

Cause: The wrong node type was given as argument to a DOM call.

Action: Review the failing function call, consult the documentation, and make sure the node types passed as correct.

LPX-00014: context is not clean

Cause: An operation was performed on a context that has already been used (so is not "clean").

Action: Some functions must be performed on a newly initialized context before being used for parsing. For example, setting a shared DTD. Change the code and do the call before parsing.

LPX-00017: ~1snodeName: <~2S>

Cause: More error message boilerplate.

Action: No action required. This is not an error message.

LPX-00018: internal error "nested open strings"

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LPX-00019: property "~s" unknown

Cause: An unexpected error has occurred in a subsystem used by XML. Subcode is the error code returned by that failing subsystem.

Action: Contact Oracle Support Services and report the error and subcode.

LPX-00050: initialization error: NLS mismatch

Cause: A language ID was specified without the matching global area.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00051: NLS initialization failed

Cause: The NLS (National Language Support) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00052: LEH initialization failed

Cause: The LEH (Library Exception Handling) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00053: LML initialization failed

Cause: The LML (Low-Level Memory manager) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00054: LPU initialization failed, error ~u

Cause: The LPU (URL Parser/Loader) package initialization failed.

Action: Internal error, contact Oracle Support Services and report the error.

LPX-00100: root element "~1S" does not match DTD root "~2S"

Cause: Validity Constraint 2.8 failed: "The Name in the document type declaration must match the element type of the root element." *Example: `<?xml version="1.0"?><!DOCTYPE greeting [<!ELEMENT greeting (#PCDATA)>]> <varname>salutation</varname>Hello!<varname>/salutation</varname>` *Explanation: The document's root element, salutation, does not match the root element declared in the DTD (greeting).

Action: Correct the document.

LPX-00101: parameter-entity markup cannot be split up

Cause: Validity Constraint 2.8 failed: "Parameter-entity replacement text must be properly nested with markup declarations." *Example: `<?xml version="1.0"?> <!DOCTYPE greeting [<!ENTITY % e "<!ELEMENT "> %e; greeting (#PCDATA)>]> <varname>greeting</varname>Hello!<varname>/greeting</varname>` *Explanation: The parameter entity 'e' contains markup which may not be split up; the entire ELEMENT (or ATTLIST or ENTITY) definition must be present in one piece.

Action: Correct the document.

LPX-00102: standalone document declaration should be "no"

Cause: Validity Constraint 2.9 failed: "Standalone document declaration must have the value 'no' if any external markup declarations contain declarations of: * attributes with default values - or - * entities - or - * attributes with values subject to normalization - or - * element types with element content"

Action: Correct the document.

LPX-00103: document structure does not match DTD

Cause: Validity Constraint 3 failed: "An element is valid if there is a declaration matching elementdecl where the Name matches the element type, and one of the following holds: * The declaration matches EMPTY and the element has no content * The declaration matches children and the sequence of child elements belongs to the language generated by the regular expression in the content model, with optional white space (characters matching the nonterminal S) between each pair of child elements. * The declaration matches Mixed and the content consists of character data and child elements whose types match names in the content model. * The declaration matches ANY, and the types of any child elements have been declared."

Action: Correct the document.

LPX-00104: element "~S" is not declared in the DTD

Cause: Validity Constraint 3 failed: The named element has no matching elementdecl in the DTD

Action: Correct the document.

LPX-00105: element "~S" is not empty as required by the DTD

Cause: Validity Constraint 3 failed: The named element is declared as EMPTY in the DTD but contains sub-elements in the document.

Action: Correct the document.

LPX-00106: attribute "~1S" of element "~2S" is undefined

Cause: Validity Constraint 3.1 failed:

Action: Correct the document.

LPX-00107: element "~S" has multiple declarations

Cause: Validity Constraint 3.2 failed: "No element type may be declared more than once."

Action: Correct the DTD.

LPX-00108: parameter-entity parenthetical cannot be split up

Cause: Validity Constraint 3.2.1 failed: "Parameter-entity replacement text must be properly nested with parenthesized groups. For interoperability, if a parameter-entity reference appears in a choice, seq, or Mixed construct, its replacement text should not be empty, and neither the first nor last non-blank character of the replacement text should be a connector (| or ,). *Example: <?xml version="1.0"?> <!DOCTYPE foo [<!ELEMENT greeting (#PCDATA)> <!ENTITY % e "(#PCDATA|)"> <!ELEMENT foo %e; greeting>]> <varname>greeting</varname>Hello!<varname>/greeting</varname> *Explanation: The parenthetical content of the 'e' entity may not be split up into sections: both open and close parentheses must be in the same declaration.

Action: Correct the DTD.

LPX-00109: duplicate name "~S" in mixed-content declaration

Cause: Validity Constraint 3.2.2 failed: "The same name must not appear more than once in a single mixed-content declaration." *Example: <!ELEMENT p (#PCDATA|a|b|c|d|a)> *Explanation: 'a' occurs more than once in the mixed-content declaration.

Action: Correct the DTD.

LPX-00110: invalid ~1s "~2S" (not a Name)

Cause: Validity Constraint 3.3.1 failed: Given thing is not a Name

Action: Correct the document.

LPX-00111: invalid ~1s "~2S" (not a Nmtoken)

Cause: Validity Constraint 3.3.1 failed: Given thing is not a Nmtoken

Action: Correct the document.

LPX-00112: element "~S" has multiple ID attributes

Cause: Validity Constraint 3.3.1 failed: "No element type may have more than one ID attribute specified."

Action: Correct the document.

LPX-00113: element "~1S" ID attribute "~2S" must be #IMPLIED or #REQUIRED

Cause: Validity Constraint 3.3.1 failed: "An ID attribute must have a declared default of #IMPLIED or #REQUIRED."

Action: Correct the document.

LPX-00114: element "~1S" attribute "~2S" has invalid enumeration value "~3S"

Cause: Validity Constraint 3.3.1 failed: "Values of this type must match one of the Nmtoken tokens in the declaration."

Action: Correct the document.

LPX-00115: element "~1S" is missing required attribute "~2S"

Cause: Validity Constraint 3.3.2 failed: "If the default declaration is the keyword #REQUIRED, then the attribute must be specified for all elements of the type in the attribute-list declaration."

Action: Correct the document.

LPX-00116: element "~1S" attribute "~2S" has invalid value "~3S", must be "~4S"

Cause: Validity Constraint 3.3.2 failed: "If an attribute has a default value declared with the #FIXED keyword, instances of that attribute must match the default value."

Action: Correct the document.

LPX-00118: undefined entity "~S"

Cause: Validity Constraint 4.1 failed: "In a document with an external subset or external parameter entities with "standalone='no'", the Name given in the entity reference must match that in an entity declaration."

Action: Correct the document.

LPX-00119: element "~1S" attribute "~2S" must be an unparsed entity

Cause: The attribute value must be an unparsed entity.

Action: Correct the document.

LPX-00120: entity "~1S" NDATA (notation) "~2S" is undefined

Cause: Entity's NDATA (notation) is undefined

Action: Correct the document.

LPX-00121: undefined notation "~S"

Cause: Notation is not known.

Action: Correct the document.

LPX-00122: undefined ID "~S" in IDREF

Cause: Validity Constraint 3.3.1 failed: "A name must not appear more than once in an XML document as a value of this type; i.e., ID values must uniquely identify the elements which bear them."

Action: Correct the document.

LPX-00123: duplicate ID "~S"

Cause: An ID was used twice, they must be unique.

Action: Correct the document.

LPX-00124: attribute value should be one or more tokens

Cause: An attribute with tokenized type (IDREFS, ENTITIES, NMTOKENS) did not contain any tokens.

Action: Value must contain one or more tokens, separated by spaces.

LPX-00125: duplicate entity "~S" (ignored)

Cause: Warning returned by XmlDocumentGetDecl when original document did not contain an XMLDecl

Action: This is a warning, not an error. The value XMLERR_NO_DECL is used by the programmer to detect whether a document had an XMLDecl or not. It does not indicate a problem.

LPX-00200: could not convert from encoding ~1s to ~2s

Cause: The conversion cannot be made between the specified encodings.

Action: Choose a data encoding which can represent all expected input encoding (such as a Unicode-based encoding, UTF-8 or UTF-16).

LPX-00201: unknown encoding "~s"

Cause: The specified encoding was not known. It should be an IANA or Oracle encoding name.

Action: Use an appropriate encoding.

LPX-00202: could not open "~s" (error ~u)

Cause: The named input (file, URL, etc) does not exist.

Action: Make sure the named input is available and can be opened.

LPX-00203: could not read from "~s" (error ~u)

Cause: Data could not be read from the named input.

Action: Take appropriate action to allow data to be read.

LPX-00204: syntax error

Cause: A syntax error was found.

Action: Check the XML document line and correct it.

LPX-00205: expected "<!--" at the start of comment

Cause: Bad syntax detected when processing a comment.

Action: Fix the comment syntax.

LPX-00206: invalid CDATA section

Cause: Bad syntax detected when processing CDATA. Proper format is '<![CDATA[
data ']]>'.
</td></tr></table>

Action: Correct the CDATA syntax.

LPX-00207: expected "[" at the start of conditional section

Cause: Bad syntax detected when processing a conditional section.

Action: Fix the conditional section syntax.

LPX-00208: unknown DTD keyword "~s"

Cause: An unknown keyword was found in the DTD.

Action: Use a proper keyword.

LPX-00209: PI names starting with XML are reserved

Cause: Processing instruction starting with XML was found.

Action: Use another name for the processing instruction.

LPX-00210: expected '~1c' instead of '~2c'

Cause: A syntax error was detected.

Action: Use proper syntax.

LPX-00211: attribute default must be REQUIRED, IMPLIED, or FIXED

Cause: Attribute default was invalid.

Action: Default must be REQUIRED, IMPLIED, or FIXED.

LPX-00212: comment must not contain "--"

Cause: A syntax error was detected in the comment.

Action: Use '--' only when specifying the end of the comment.

LPX-00213: comment did not end in "-->"

Cause: A syntax error was detected in the comment.

Action: Be sure to end the comment with '-->'.

LPX-00214: CDATA section did not end in "]]>"

Cause: A syntax error was detected in the CDATA section.

Action: Be sure to end the CDATA section with ']]>'.

LPX-00215: processing instruction did not end in "?>"

Cause: A syntax error was detected in the PI section.

Action: Be sure to end the PI with '?>'.

LPX-00216: invalid character ~1u (~2X)

Cause: An invalid multibyte character was found.

Action: Use only characters allowed by the XML specification.

LPX-00217: invalid character ~1u (~2x)

Cause: An invalid Unicode character was found.

Action: Use only characters allowed by the XML specification.

LPX-00218: invalid character ~1u (~2c')

Cause: An invalid native (ASCII/EBCDIC) character was found.

Action: Use only characters allowed by the XML specification.

LPX-00219: invalid digit '~c' in character reference

Cause: An invalid digit was found in a character reference.

Action: Character references are either &#DDD; where D's are decimal digits, or &#xHHH; where H's are hexadecimal digits.

LPX-00220: the string "]]>" cannot occur in character data

Cause: Found ']]>' in character data.

Action: Do not use ']]>' in character data.

LPX-00221: the character "<" cannot occur in attribute values

Cause: Found '<' in an attribute value.

Action: Do not use '<' in attribute values.

LPX-00222: error received from SAX callback function

Cause: An error was received from the SAX callback function.

Action: Examine the additional error messages and take corrective action.

LPX-00223: external entity "~s" found in an attribute value

Cause: An external entity reference was found in an attribute value.

Action: Use only references to internal or character entities in attribute values.

LPX-00224: multiple occurrences of attribute "~S" found

Cause: An attribute occurred multiple times in the same start-tag or empty-element tag.

Action: Make sure that the attributes are unique.

LPX-00225: end-element tag "~1S" does not match start-element tag "~2S"

Cause: An element tag was not ended properly.

Action: Make sure that the correct end element tag is used.

LPX-00226: entity "~S" is not declared

Cause: An entity is not declared.

Action: Declare the entity before referencing it.

LPX-00227: entity "~S" is not a parsed entity

Cause: An entity reference contained the name of an unparsed entity.

Action: Only reference parsed entities.

LPX-00228: entity reference "~S" refers to itself

Cause: An entity reference contains a recursive reference to itself.

Action: Modify the contents of the entity reference to remove this recursion.

LPX-00229: input source is empty

Cause: An XML input file has no contents.

Action: The XML file representing a document must contain at least one element.

LPX-00230: invalid character ~1u (~2x) found in a Name or Nmtoken

Cause: An invalid character was found in a NAME or NMTOKEN.

Action: Use only the characters allowed for NAMES and NMTOKENS by the XML specification.

LPX-00231: invalid character ~1u ('~2c') found in a Name or Nmtoken

Cause: An invalid character was found in a NAME or NMTOKEN.

Action: Use only the characters allowed for NAMES and NMTOKENS by the XML specification.

LPX-00232: invalid use of a parameter entity reference

Cause: A parameter entity reference was found in an improper location in the internal DTD subset.

Action: Use a parameter entity reference only where markup declarations can occur in the internal DTD subset, in the external DTD subset, or in an external entity.

LPX-00233: namespace prefixes starting with "xml" are reserved

Cause: Namespace prefix starting with XML was found.

Action: Use another name for the namespace prefix.

LPX-00234: namespace prefix "~S" is not declared

Cause: Namespace prefix is not declared.

Action: Declare the prefix in an attribute list.

LPX-00235: invalid XML version, must be 1.0 or 1.1

Cause: An invalid XML version was specified. Only version 1.0 of the XML specification is supported. Version 1.1 may be specified but will be treated as version 1.0.

Action: Use the 1.0 or 1.1 specification and set the version number accordingly.

LPX-00236: invalid character ~1u ('~2c') found in public identifier

Cause: An invalid character was found in a public identifier.

Action: Use only the characters allowed for public identifiers by the XML specification.

LPX-00237: invalid condition section keyword, must be INCLUDE or IGNORE

Cause: A conditional section <![keyword [markup]]> had invalid keyword, must be either "IGNORE" or "INCLUDE"

Action: Correct condition section usage in document.

LPX-00238: unterminated conditional section

Cause: A conditional section was not properly terminated with]>.

Action: Verify conditional nesting in document and correct.

LPX-00239: invalid attribute type "~s"

Cause: The attribute type is not valid. Options are CDATA, ID, IDREF, IDREFS, ENTITY, ENTITIES, NMTOKEN, or NMTOKENS.

Action: Check and correct attribute declaration.

LPX-00240: element-start tag is not well formed

Cause: A start-element tag was improperly formed.

Action: Check and correct the start-element syntax.

LPX-00241: entity reference is not well formed

Cause: An entity reference (general or parameter) was not formed properly.

Action: Form entity reference correctly as "&name;" or "%name;".

LPX-00242: invalid use of ampersand ('&') character (use &)

Cause: The ampersand character is used only to start entity or character references.

Action: To include an ampersand character as data, use the built-in & general entity.

LPX-00243: element attribute value must be enclosed in quotes

Cause: An attribute defined in an element's start-tag must be enclosed in single (") or double (") quotes.

Action: Enclose the attribute value in quotes.

LPX-00244: invalid use of less-than ('<') character (use <)

Cause: The less-than character ('<') is not permitted as data.

Action: Use the built-in entity < instead. Check for mismatched quotes (") in case the '<' is part of subsequent markup.

LPX-00245: extra data after end of document

Cause: After the close of the top-level element, more data was found.

Action: The end-element tag for the top-level element must be the last thing in the document.

LPX-00246: missing system ID after public ID

Cause: In an external ID declaration, the public ID literal was not followed by the system ID literal as required.

Action: Provide with public *and* system IDs for 'PUBLIC' type.

LPX-00247: invalid Document Type Declaration (DTD)

Cause: Problems were encountered in the DTD declaration.

Action: Review the DTD and correct the problems.

LPX-00248: invalid entity declaration

Cause: Problems were encountered parsing an entity declaration.

Action: Check and correct the declaration syntax.

LPX-00249: invalid external ID declaration

Cause: Problems were encountered parsing an external ID declaration.

Action: Check and correct the declaration syntax.

LPX-00250: invalid attribute declaration

Cause: Problems were encountered parsing an attribute declaration.

Action: Check and correct the declaration syntax.

LPX-00251: conditional sections are valid only in external DTDs

Cause: A condition section is not permitted in internal DTDs.

Action: Remove the condition section.

LPX-00252: invalid entity replacement-text nesting

Cause: Markup included from an entity must nest/group properly. That is, open/close markup must occur within the same entity. For example, `<!DOCTYPE doc [<!ENTITY e "<varname>/foo</varname><varname>foo</varname>">]> <varname>doc</varname><varname>foo</varname>&e;<varname>/foo</varname><varname>/doc</varname>` Is invalid since foo's start-tag occurs in the top-level document, but the close-tag is provided by the "e" entity. Both start and end must be provided by the same source.

Action: Examples, such as the ones above, are not permitted.

LPX-00253: missing required version number in XML declaration

Cause: An XML declaration was missing the required version#.

Action: Always provide a version#, which must come first in the declaration. XML is case sensitive, so only "version" (not "Version", and so on) is valid.

LPX-00254: invalid XML declaration

Cause: Problems were encountered parsing an XML declaration.

Action: Check and correct the declaration syntax.

LPX-00255: XML standalone declaration must be "yes" or "no"

Cause: The "standalone" parameter in the XML declaration had an invalid value.

Action: standalone must be set to either "yes" or "no". Case is sensitive, so "Yes", "YES", and so on, are invalid.

LPX-00256: invalid element declaration

Cause: Problems were encountered parsing an element declaration.

Action: Check and correct the declaration.

LPX-00257: invalid children specification in element declaration

Cause: The 'children' specification in an element declaration was invalid.

Action: Check and correct the declaration.

LPX-00258: invalid "Mixed" specification in element declaration

Cause: The 'Mixed' specification in an element declaration was invalid.

Action: Check and correct the declaration.

LPX-00259: invalid notation declaration

Cause: Problems were encountered parsing a notation declaration.

Action: Check and correct the declaration syntax.

LPX-00260: invalid xml:space attribute declaration

Cause: The xml:space attribute must be declared as an enumeration with choices "default" and "preserve". For example, `<!ATTLIST foo xml:space (default|preserve) 'preserve'`).

Action: Declare the special attribute as above.

LPX-00261: invalid URL ~s

Cause: The specified URL was invalid and could not be parsed.

Action: Correct the URL; consult RFC-2396.

LPX-00262: unsupported protocol ~s

Cause: An URL was encountered which requested a protocol not supported by the XML parser. Only HTTP and file are currently allowed.

Action: Make the data available through the filesystem or HTTP.

LPX-00263: couldn't connect to host ~s port ~d

Cause: A TCP connection couldn't be opened to the named host.

Action: Verify the hostname and connectivity to the host.

LPX-00264: send failed to host ~s

Cause: An error occurred trying to send data over a TCP connection.

Action: Verify network connectivity, and so on.

LPX-00265: read failed from to host ~s

Cause: An error occurred trying to read data from a TCP connection.

Action: Verify network connectivity, and so on.

LPX-00266: invalid language specification ~s

Cause: The given language specification was invalid.

Action: Language specification has the format `<varname>language</varname>_<varname>territory</varname>.<varname>character set</varname>`. For example, "French_France".

LPX-00267: could not resolve relative URL ~s

Cause: The named relative URL couldn't be resolved against its parent.

Action: Make sure the relative makes sense in relation to its parent URL; see RFC-2396 sections 4, 5, and appendix C.

LPX-00268: invalid access method ~1d, must be 0 to ~2d

Cause: The provided access code was not in the valid range.

Action: The code should be one of the XMLACCESS_xxx codes defined in oraxml.h, in the range shown in the error message.

LPX-00269: all three access functions (open/close/read) must be provided

Cause: An attempt was made to set the access method callbacks, but all three functions were not provided.

Action: All three callback functions (open, close, and read) are required. They must all be provided, even if they are stub functions which do nothing.

LPX-00270: FTP error: ~s

Cause: An error was returned from the FTP server while trying to retrieve a file. See the specific message for details.

Action: Corrective action depends on the error.

LPX-00271: FTP login failed: ~s

Cause: The username/password combination was invalid for FTP login.

Action: Specify a valid pair.

LPX-00272: FTP server unavailable: ~s

Cause: The FTP server is unavailable for use.

Action: No action is possible from the client side. See server's error message.

LPX-00273: failed to initialize TCP/IP

Cause: The TCP/IP package could not be initialized.

Action: Check with system administrator to see if this is a configuration problem or a connectivity problem.

LPX-00274: can't import node type

Cause: Some node types (DOCUMENT_NODE & DOCUMENT_TYPE_NODE) cannot be imported with importNode().

Action: No action required.

LPX-00275: can't set output/data encoding AFTER parsing

Cause: Output/data encoding must be set after initialization but BEFORE any parsing has taken place.

Action: Set encoding before parsing any documents.

LPX-00276: bad HTTP/Mime header

Cause: An HTTP reply contained an invalid Mime header.

Action: Verify HTTP reply for accuracy. See RFC 2616.

LPX-00277: no closing quote was seen

Cause: A quoted string was started but not finished.

Action: Put a closing quote in the proper location.

LPX-00278: invalid ~s proxy "~s"

Cause: The proxy specification for the given protocol was invalid.

Action: Check and correct the proxy specification. For HTTP, this is the environment variable "http_proxy".

LPX-00279: invalid no_proxy "~s"

Cause: The no_proxy specification was invalid.

Action: Check and correct it. `no_proxy` is a comma- or space-separated list of machine or domain names, with an optional port part. If no port part is present, then it applies to all ports on that domain.

LPX-00280: HTTP error ~s

Cause: An HTTP protocol error occurred.

Action: Corrective action depends on the error..

LPX-00281: unsupported encoding "~s"

Cause: The specified encoding is known but not supported by the parser.

Action: Try a different encoding.

LPX-00282: document cannot have both internal/external and shared DTDs

Cause: A parser context which had a shared DTD set was used to parse a document which also contained a DTD. You cannot use both a shared DTD and an internal/external one.

Action: If a shared DTD is to be used, then the documents parsed must not contain or reference a DTD.

LPX-00283: document encoding is ~s-based but default input encoding is not

Cause: The input document was detected to be ASCII (or EBCDIC) based, but no encoding was specified in the XMLDecl and the default input coding was not ASCII (or EBCDIC) based, so could not be applied.

Action: Add an explicit encoding specification to the XMLDecl so the default input encoding is not needed, or pick a default encoding which matches the input document.

LPX-00284: namespace prefix to NULL URI is not allowed

Cause: An element's namespace prefix declarations was for a NULL URI, e.g. `<foo xmlns:bar=""/>` This is illegal presently in XML 1.0, but will be legal in XML 1.1

Action: Remove erroneous prefix definition.

LPX-00285: invalid Unicode surrogate ~X ~X

Cause: A Unicode document contained an invalid surrogate. If the first (high) surrogate is in the correct range 0xD800 to 0xDBFF, then the second (low) surrogate must be in the range 0xDC00 to 0xDFFF.

Action: Correct the document.

LPX-00286: Exceeded max depth for recursion

Cause: The depth of embedded elements in the document exceeded the limit of 2000.

Action: Correct the document.

LPX-00287: Max limit of ~1d exceeded for ~s

Cause: Max limit exceeded

Action: Correct the document.

LPX-00288: CDATA-section-close delimiter is prohibited in element content

Cause: Element content contained CDATA-section-close delimiter.

Action: Correct the document.

LPX-00289: invalid redefinition of xmlns URI

Cause: The XML namespace Uniform Resource Identifier 'http://www.w3.org/2000/xmlns/' must not be assigned a prefix.

Action: Correct the document.

LPX-00290: invalid use of xmlns as a prefix

Cause: The prefix 'xmlns' was reserved and could not be used as a prefix.

Action: Correct the document.

LPX-00300: no name in attribute set

Cause: The name attribute was not found in the attribute-set element.

Action: Add a name attribute for this element.

LPX-00301: error in XPATH evaluation

Cause: The XPATH evaluation returns an error.

Action: Check specified XPATH expression to determine the error.

LPX-00302: Incorrect stylesheet. The node is not valid.

Cause: The child node is of invalid type or has invalid name for this particular location in stylesheet, rendering the stylesheet as invalid XSLT.

Action: Fix the stylesheet by using valid nodes only.

LPX-00303: attribute value "~S" not expected for ~S

Cause: Attribute is found but its value is not the expected value.

Action: Set the attribute value to the correct value.

LPX-00304: input parameter to function is null

Cause: An input parameter passed into this function is null when it is not supposed to.

Action: Make sure the caller function is not passing null for this parameter.

LPX-00305: missing token

Cause: An expected token is not found.

Action: Check the input string to make sure the expected token is present.

LPX-00306: inputted string ended with no corresponding closing '}'

Cause: A closing '}' is expected.

Action: Add the closing '}' to the input string or remove the extra opening '{'.

LPX-00307: namespace prefix ~S used but not declared

Cause: Namespace prefix is used but not declared.

Action: Either declare the namespace or don't use this namespace prefix.

LPX-00308: attribute ~S not found in ~S

Cause: The expected attribute for this node is not found.

Action: Need to add this attribute to the node.

LPX-00309: cannot initialize XPATH

Cause: XPATH context could not be initialized.

Action: Check the initialization function LpxsutInitXPathCtx().

LPX-00310: element ~S not found in ~S

Cause: The expected element is not found.

Action: Check the initialization function LpxsutInitXPathCtx().

LPX-00311: unsupported feature: ~s

Cause: This feature is not supported.

Action: Do not use this feature.

LPX-00312: cannot construct XML PI with content: ~S

Cause: The content of XML PI node might be invalid.

Action: Make necessary changes to make the node valid according to spec.

LPX-00313: cannot construct XML comment with content: ~S

Cause: The content of XML comment node might be invalid.

Action: Make necessary changes to make the node valid according to spec.

LPX-00314: an internal failure occurred

Cause: An internal error occurred in the code.

Action: Contact appropriate developer.

LPX-00315: extension function ~S not supported

Cause: This extension function is not supported.

Action: Either contact appropriate developer for more information or don't use this extension function.

LPX-00316: invalid value ~S for ~S attribute ~S

Cause: The value for the specified attribute is invalid.

Action: Consult the XSL spec, use only legal values.

LPX-00317: undefined decimal-format "~S"

Cause: The named decimal-format is undefined (the name "#default" means the default format).

Action: Define the desired decimal-format before trying to use it.

LPX-00318: duplicate xsl:decimal-format "~S"

Cause: The named decimal-format was declared more than once.

Action: Make sure there is only a single declaration.

LPX-00319: The node specified is not valid

Cause: The node specified is not of expected type.

Action: Use only the nodes of legal type.

LPX-00320: No more attributes can be added to a non empty element

Cause: The element to which an attribute was being added is non empty and hence can not add anymore attributes to it.

Action: Modify the XSLT stylesheet so that all the attributes are added to an element before anything else is added to it. If you absolutely can not do that then select your output method to be DOM based rather than a stream or SAX based output which you are using presently.

LPX-00321: None of the output method (DOM, SAX, Stream) is selected

Cause: User is trying to process an XML file with out selecting any mechanism for output.

Action: User must select one of the output mechanisms (SAX/DOM/Stream) before attempting to process the XML file.

LPX-00322: A doc referred by XSLT stylesheet could not be opened : ~s

Cause: Either an import,include or document() function tried to open a document and failed.

Action: Make sure that document is present and can be opened.

LPX-00323: illegal apply-imports because of no current template: ~s

Cause: apply-imports was used even when there was no current template possibly with in for-each.

Action: Make sure that apply-imports are invoked only if there is a current template and it is not in a xsl:for-each.

LPX-00324: "~S" is not a valid value for the lang attribute of xsl:sort

Cause: An invalid language name was specified for sorting.

Action: Provide a valid value for the lang attribute of xsl:sort.

LPX-00400: an internal error has occurred in XPATH

Cause: An internal error has occurred in XPATH.

Action: Contact the appropriate developer.

LPX-00401: invalid QName in the XSL file

Cause: An invalid QName was passed to the XPATH parser.

Action: See whether there are any invalid QNames in the XSL file.

LPX-00402: invalid axisname in the XSL file

Cause: An invalid axis name was passed to the XPATH parser.

Action: See whether all axis names in the XSL file are correct.

LPX-00403: unmatched quote in the XSL file

Cause: An unmatched quote was found in the XSL file.

Action: Check for unmatched quotes in the XSL file.

LPX-00404: unable to resolve namespace URI

Cause: The namespace URI may not be valid.

Action: Make sure that the name space URIs are valid.

LPX-00405: unable to allocate memory

Cause: May be out of memory.

Action: Try increasing virtual memory.

LPX-00406: object of incorrect type passed to the function

Cause: An object of incorrect type was passed to the XPATH/XSL function.

Action: Do the required conversion before passing in an object of type which is different from the expected type.

LPX-00407: right square bracket missing in the XSL file

Cause: Right square bracket missing in the XSL file.

Action: Check for unmatched square bracket in the XSL file.

LPX-00408: right parenthesis missing in the XSL file

Cause: Right parenthesis missing in the XSL file.

Action: Check for unmatched parenthesis in the XSL file.

LPX-00409: incorrect token encountered while parsing

Cause: An unexpected token encountered while parsing the expression/ pattern.

Action: Check the syntax of the expressions/patterns.

LPX-00410: unable to resolve the variable reference

Cause: Variable reference may not be valid.

Action: Check whether the variable references are valid.

LPX-00411: unknown function name encountered

Cause: The function is not supported at this time or the name is invalid.

Action: Check the function names. If valid and this error occurs, then avoid using them at this time.

LPX-00413: loss of precision due to excessively large numerical constant

Cause: The numerical constant in the XPath expression is too big.

Action: n/a

LPX-00601: Invalid token in: '~S'

Cause: Invalid token in XPath expression.

Action: Check the expression.

LPX-00602: Invalid child element '~1S' of element '~2S'.

Cause: Invalid child element in this stylesheet context.

Action: Check the stylesheet.

LPX-00603: Invalid attribute value '~1S': {element '~2S', attribute '~3S'}.

Cause: Invalid attribute value in this stylesheet context.

Action: Check the stylesheet.

LPX-00604: Invalid attribute value '~1S', for attribute '~2s'.

Cause: Invalid attribute value for this attribute.

Action: Check the stylesheet.

LPX-00605: Invalid attribute '~1S' in element '~2S'.

Cause: Invalid attribute for this element.

Action: Check the stylesheet.

LPX-00606: Missing attribute '~1s' in element '~2S'.

Cause: Missing attribute for this element.

Action: Check the stylesheet.

LPX-00607: Invalid reference: '~S'.

Cause: Invalid variable or parameter or template reference.

Action: Check the stylesheet.

LPX-00608: Repeated declaration of '~1S' in element '~2S'.

Cause: Only one declaration is allowed at this level.

Action: Check the stylesheet.

LPX-00609: Function call with invalid number of arguments in '~1S'.

Cause: Invalid number of arguments.

Action: Check the function signature.

LPX-00651: VM Stack overflow.

Cause: The XML data is too large.

Action: Increase the size of VM stacks in XmlXslVMCreate().

LPX-00652: SAX callback returns with error.

Cause: SAX callback returns an error.

Action: Check the callback function.

LPX-00653: Output attribute '~S' doesn't have a parent element.

Cause: Attribute is generated in a wrong context.

Action: Check the XSLT stylesheet.

LPX-00654: Output namespace attribute '~S' doesn't have a parent element.

Cause: Attribute generated in the wrong context.

Action: Check the XSLT stylesheet.

LPX-00655: Invalid output comment '~S'.

Cause: Invalid comment node.

Action: Check the XSLT stylesheet.

LPX-00656: XSLTVM terminate.

Cause: VM terminates.

Action: No action.

LPX-00657: Invalid output PI '~S'.

Cause: Invalid PI node.

Action: Check the XSLT stylesheet.

LPX-00658: Invalid XSLT object type.

Cause: Invalid object type in XPath evaluation.

Action: Check the XSLT stylesheet.

LPX-00659: Output write failed.

Cause: Write operation failed.

Action: Check the write method.

LPX-00660: Not a well-formed document or external entity.

Cause: The generated document is not well-formed.

Action: Check the XSLT stylesheet.

LPX-00661: Failed to load: '~s'.

Cause: Failed to load a document.

Action: Check the XSLT stylesheet.

LPX-00662: Invalid encoding.

Cause: Invalid encoding specified.

Action: Check the encoding string.

LPX-00663: VM String-Stack overflow.

Cause: The string data is too large.

Action: Increase the size of VM StringStack in XmlXslVMCreate().

LPX-00664: VM Node-Stack overflow.

Cause: Too many XML nodes.

Action: Increase the size of VM NodeStack in XmlXslVMCreate().

LPX-00690: Invalid argument.

Cause: Invalid or missing argument.

Action: Check the function signature.

LPX-00700: invalid SOAP context

Cause: The SOAP context passed to an XmlSoap function was invalid.

Action: Make sure the context passed is an xmlsoapctx and is still valid (has not been destroyed).

LPX-00701: invalid SOAP role

Cause: An invalid SOAP role was specified.

Action: Only xmlsoaprole enum values should be used (see xml.h).

LPX-00702: invalid SOAP connection binding

Cause: An invalid SOAP connection binding was specified.

Action: Only xmlsoapbind enum values should be used (see xml.h).

LPX-00703: SOAP POST failed

Cause: A SOAP message sent with an HTTP binding failed.

Action: See the returned HTTP error to determine the problem.

LPX-00704: elem has no mustUnderstand

Cause: Header block does not have a mustUnderstand attribute.

Action: This is legal, no action required.

LPX-00705: elem has no role

Cause: Header block does not have a role attribute.

Action: This is legal, no action required.

LPX-00706: message has no fault

Cause: Message body has no Fault child.

Action: This is legal, no action required.

LPX-00707: no Fault reason w/given language

Cause: Fault element does not have a reason with given language.

Action: This is legal, no action required.

LPX-00708: SOAP failed to make HTTP connection

Cause: SOAP failed to make an HTTP connection to the given URL.

Action: Possible cause is invalid URL or memory exhaustion.

LPX-00709: SOAP reply not valid XML

Cause: The reply to a SOAP call was not a valid XML document.

Action: Check the calling URL for validity; otherwise the problem is likely to be on the reply side.

LPX-00711: invalid SOAP version

Cause: The version string specified at SOAP creation time was invalid.

Action: Specify a valid version string, either '1.1' or '1.2'.

LPX-00712: failed to set HTTP header

Cause: Connection does not exist, or header is badly formed, or maximum number of headers is exceeded.

Action: Check that connection exists, header has ':', decrease number of headers.

LPX-00713: body has more than one fault

Cause: Message body has multiple Fault children.

Action: Most likely bug in the server.

LPX-00714: fault is not a single child

Cause: Message body has additional children besides Fault.

Action: Most likely bug in the server.

LPX-00715: badly formed fault elemen

Cause: Fault element does not have one of mandatory children or has children, which are not allowed.

Action: Most likely bug in the server.

LPX-00716: badly formed Text subelement

Cause: Mandatory text child is missing from the requested message subelement.

Action: Most likely bug in the server.

LPX-00717: badly formed Value subelement

Cause: Mandatory Value child of the Code child of the Fault badly formed or absent.

Action: Most likely bug in the server.

LPX-00718: message has no envelope

Cause: The message has no envelope element child.

Action: Most likely bug in the server.

LPX-00719: prefix too long

Cause: The maximum size of encoded namespace attribute name is 1022.

Action: Use shorter prefix.

LPX-00720: envelope has no header

Cause: The message envelope does not have header.

Action: This is legal, no action required

LPX-00721: envelope has no body

Cause: The message envelope does not have body.

Action: Most likely bug in the server.

LPX-00722: elem has no relay

Cause: Header block does not have a relay attribute.

Action: This is legal, no action required.

LPX-00723: no such element

Cause: The element with requested namespace name and local part does not exist.

Action: This is legal, no action required.

LPX-00750: arguments "~1s" to function "~2s" are null

Cause: Input arguments passed into this function are null when it is not supposed to.

Action: Make sure the caller function is not passing null for this parameter.

LPX-00751: arguments "~s" are exclusive

Cause: Input arguments passed into this function are exclusive. Specify only one of them.

Action: Specify only one of the exclusive arguments.

LPX-00752: invalid ~1s, must be ~2s

Cause: Invalid value was specified for attribute.

Action: Correct the value with one of the suggested values.

LPX-00753: invalid proxy "~s"

Cause: The proxy specification for the given protocol was invalid.

Action: Check and correct the proxy specification. For HTTP, this is the environment variable "http_proxy".

LPX-00754: invalid no_proxy "~s"

Cause: The no_proxy specification was invalid.

Action: Check and correct the specification. no_proxy is a comma- or space-separated list of machine or domain names, with an optional port part. If no port part is present, then it applies to all ports on that domain.

LPX-00755: missing required argument "~s"

Cause: A required argument was missing.

Action: Provide the missing argument to the function.

LPX-00756: Etags and tokens must be either all tagged or all untagged

Cause: The list of condition factors need to be either all tagged with absoluteURI's or all untagged with absoluteURI's.

Action: If all condition factors were applied to the resource receiving the request, make them all untagged. Otherwise, make them all tagged with appropriate resource's URI's.

LPX-00757: maximum XML document size (~s bytes) exceeded

Cause: The input XML document's size exceeded the limit set by "max_xml_size" attribute set in XmlDavCreate().

Action: Raise the value set for max_xml_size attribute in XmlDavCreate() if this does not create problems with security.

LPX-00758: user-provided callback returns null

Cause: Null was returned from user-provided callback function.

Action: Check error(s) encountered within the callback function.

LPX-00759: failed to initialize TCP/IP

Cause: The TCP/IP package could not be initialized.

Action: Check with your system administrator to see if this is a configuration problem or a connectivity problem.

LPX-00760: couldn't connect to host ~s port ~u

Cause: A TCP connection couldn't be opened to the named host.

Action: Verify the hostname and connectivity to the host.

LPX-00761: send failed to host ~s

Cause: An error occurred trying to send data over a TCP connection.

Action: Verify network connectivity.

LPX-00762: read failed from host ~s

Cause: An error occurred trying to read data from a TCP connection.

Action: Verify network connectivity.

LPX-00763: exceeded maximum TCP connections

Cause: The maximum allowable number of TCP connections were exceeded. This happens only if too many pending HTTP responses have not been properly ended or destroyed.

Action: End a pending response session or destroy response objects that have been processed.

LPX-00764: TCP connection was broken

Cause: Either the server terminated the TCP connection or the TCP connection is in a bad state.

Action: Analyze the error. After cleanup, retry the method.

LPX-00765: HTTP error ~s

Cause: An HTTP protocol error occurred.

Action: Corrective action depends on the error.

LPX-00766: unsupported transfer-coding values: ~s

Cause: Only "chunked" and "identity" transfer-coding values are supported.

Action: This is WebDAV implementation's shortfall. There is no workaround for this problem.

LPX-00767: not a text media type

Cause: A text media type was expected. But other media types were found.

Action: Since this data cannot be read as a text type, use another routine to read it.

LPX-00768: no entity body found

Cause: No entity body was found when it was read.

Action: Check the HTTP status code and headers to see why the entity body was not found.

LPX-00769: not xml media type

Cause: An XML media type was expected. But other media types were found.

Action: Since this data cannot be read as an XML type, use another routine to read it.

LPX-00770: missing lock token in lock refresh request

Cause: A LOCK request to refresh a lock had no lock token header specified.

Action: Use XmlDavUpdResDesc to set a lock token in the resource

LPX-00771: missing lock token in UNLOCK request

Cause: An UNLOCK request to remove a lock had no lock token header specified.

Action: Use XmlDavUpdResDesc to set a lock token in the resource

LPX-00772: wrong object type

Cause: The wrong object type was given as argument to a WebDAV call.

Action: Review the failing function call, consult the documentation, and make sure the object types pass as correct.

LPX-00773: protocol violation: ~s

Cause: The entity body sent by the server in Chunked Transfer Encoding violated protocol.

Action: Either this is an internal implementation error or a server implementation error. Users should file a bug against either the server's or the client's implementation.

LPX-00800: XQuery invalid token

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00801: XQuery syntax error at

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00802: Too many arguments

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00803: Too few arguments

Cause: Invalid XQuery query.

Action: Correct the query.

LPX-00804: Invalid token: '~S'

Cause: Invalid program.

Action: Correct the program.

LPX-00805: Syntax error at '~S'

Cause: Invalid program.

Action: Correct the program.

LPX-00806: Invalid token in the pattern

Cause: The program was invalid.

Action: Correct the program.

LPX-00807: Invalid range

Cause: The program was invalid.

Action: Correct the program.

LPX-00808: internal error, invalid OPCODE

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LPX-00809: Invalid subexpression reference

Cause: The replacement string was invalid.

Action: Correct the replacement string.

LPX-00825: Can't compile the element:

Cause: XSLT Stylesheet can't be compiled to XQuery query.

Action: Correct the the stylesheet.

LPX-00826: Can't compile the attribute:

Cause: XSLT Stylesheet can't be compiled to XQuery query.

Action: Correct the the stylesheet.

LPX-00827: Namespace conflict for prefix:

Cause: XSLT Stylesheet can't be compiled to XQuery query.

Action: Correct the the stylesheet.

LPX-00903: Invalid flags specified for XmlDiff or XmlPatch

Cause: Invalid value supplied to flags parameter for XmlDiff or XmlPatch functions.

Action: Specify valid flags (see xmldf.h).

LPX-00904: Invalid inputs were supplied to XmlDiff or XmlPatch

Cause: Data could not be read from inputs to XmlDiff or XmlPatch functions.

Action: Specify valid inputs (see xmldf.h).

LPX-00910: The root nodes in input documents to XmlDiff did not match

Cause: The root nodes in input documents do not match.

Action: Make sure the root nodes have same qualified name in both input documents. XmlDiff can be called only if the root nodes are same in input documents.

LPX-00913: XmlPatch could not process the XML PI oracle-xmldiff

Cause: The diff document either did not specify the XML Processing Instruction "oracle-xmldiff" or did not specify all data required by XmlPatch. The PI should be the first child of the top-level xdiff element. This error is also thrown when the output-model is 'snapshot' and operations-in-docorder is 'false'.

Action: Specify the "oracle-xmldiff" PI correctly. See documentation for XmlPatch C function in xmldf.h.

LPX-00918: XmlPatch encountered an error in translating XPATH using XmlXVM

Cause: XmlPatch encountered an invalid XPATH in the diff document.

Action: If you handcoded the diff document, make sure all the XPATHs in the diff document are valid.

LPX-00950: JSON path processing error

Cause: The JavaScript Object Notation (JSON) path engine encountered a fatal condition.

Action: Contact Oracle Support Services and report the error.

LPX-01001: [XPST0001] Static context component '~S' has no value

Cause: It is a static error if analysis of an expression relies on some component of the static context that has not been assigned a value.

Action: n/a

LPX-01002: [XPDY0002] Dynamic context component '~S' has no value

Cause: It is a dynamic error if evaluation of an expression relies on some// part of the dynamic context that has not been assigned a value.

Action: n/a

LPX-01003: [XPST0003] Syntax error at '~s'

Cause: It is a static error if an expression is not a valid instance of the grammar defined in A.1 EBNF

Action: n/a

LPX-01004: [XPTY0004] Expression type does not match a required type

Cause: It is a type error if, during the static analysis phase, an expression is found to have a static type that is not appropriate for the context in which the expression occurs, or during the dynamic evaluation phase, the dynamic type of a value does not match a required type as specified by the matching rules in 2.5.4 SequenceType Matching.

Action: Check the expression type.

LPX-01005: [XPST0005] Invalid empty-sequence() expression

Cause: During the analysis phase, it is a static error if the static type assigned to an expression other than the expression () or data() is empty-sequence().

Action: n/a

LPX-01006: [XPTY0006]

Cause: Not currently used.

Action: n/a

LPX-01007: [XPTY0007]

Cause: Not currently used.

Action: n/a

LPX-01008: [XPST0008] Invalid reference

Cause: It is a static error if an expression refers to an element name, attribute name, schema type name, namespace prefix, or variable name that is not defined in the static context, except for an ElementName in an ElementTest or an AttributeName in an AttributeTest.

Action: n/a

LPX-01009: [XQST0009] Schema Import Feature not supported

Cause: An implementation that does not support the Schema Import Feature must raise a static error if a Prolog contains a schema import.

Action: n/a

LPX-01010: [XPST0010] Axis '~S' not supported

Cause: An implementation must raise a static error if it encounters a reference to an axis that it does not support.

Action: n/a

LPX-01012: [XQST0012] Invalid XML schema

Cause: It is a static error if the set of definitions contained in all schemas imported by a Prolog do not satisfy the conditions for schema validity specified in Sections 3 and 5 of [XMLSchema] Part 1 i.e., each definition must be valid, complete, and unique

Action: n/a

LPX-01013: [XQST0013] Invalid pragma content

Cause: It is a static error if an implementation recognizes a pragma but determines that its content is invalid.

Action: n/a

LPX-01014: [XQST0014]

Cause: Not currently used.

Action: n/a

LPX-01015: [XQST0015]

Cause: Not currently used.

Action: n/a

LPX-01016: [XQST0016] Module Feature not supported

Cause: An implementation that does not support the Module Feature raises a static error if it encounters a module declaration or a module import.

Action: n/a

LPX-01017: [XPST0017] Invalid function call

Cause: It is a static error if the expanded QName and number of arguments in a function call do not match the name and arity of a function signature in the static context.

Action: n/a

LPX-01018: [XPTY0018] Path last step contains both nodes and atomic values

Cause: It is a type error if the result of the last step in a path expression contains both nodes and atomic values.

Action: n/a

LPX-01019: [XPTY0019] Path step contains atomic values

Cause: It is a type error if the result of a step (other than the last step) in a path expression contains an atomic value.

Action: n/a

LPX-01020: [XPTY0020] The path step context item is not a node

Cause: It is a type error if, in an axis step, the context item is not a node.

Action: n/a

LPX-01021: [XPDY0021]

Cause: Not currently used.

Action: n/a

LPX-01022: [XQST0022] The value of a namespace must be a URILiteral.

Cause: It is a static error if the value of a namespace declaration attribute is not a URILiteral.

Action: n/a

LPX-01023: [XPDY0023]

Cause: Not currently used.

Action: n/a

LPX-01024: [XQTY0024] Attribute node out of context

Cause: It is a type error if the content sequence in an element constructor contains an attribute node following a node that is not an attribute node.

Action: n/a

LPX-01025: [XQDY0025] Repeated attribute name

Cause: It is a dynamic error if any attribute of a constructed element does not have a name that is distinct from the names of all other attributes of the constructed element.

Action: n/a

LPX-01026: [XQDY0026] Processing instruction content contains '?>'

Cause: It is a dynamic error if the result of the content expression of a computed processing instruction constructor contains the string '?>'.

Action: n/a

LPX-01027: [XQDY0027] Invalid PSVI validity property of the root element

Cause: In a validate expression, it is a dynamic error if the root element information item in the PSVI resulting from validation does not have the expected validity property: valid if validation mode is strict, or either valid or notKnown if validation mode is lax.

Action: n/a

LPX-01028: [XQDY0028]

Cause: Not currently used

Action: n/a

LPX-01029: [XQDY0029]

Cause: Not currently used

Action: n/a

LPX-01030: [XQTY0030] Expression should evaluate to exactly one node

Cause: It is a type error if the argument of a validate expression does not evaluate to exactly one document or element node.

Action: n/a

LPX-01031: [XQST0031] Version not supported by the implementation

Cause: It is a static error if the version number specified in a version declaration is not supported by the implementation.

Action: n/a

LPX-01032: [XQST0032] Repeated base URI declaration

Cause: A static error is raised if a Prolog contains more than one base URI declaration.

Action: n/a

LPX-01033: [XQST0033] Multiple bindings for the namespace prefix '~s'

Cause: It is a static error if a module contains multiple bindings for the same namespace prefix.

Action: n/a

LPX-01034: [XQST0034] Repeated function declaration

Cause: It is a static error if multiple functions declared or imported by a module have the number of arguments and their expanded QNames are equal (as defined by the eq operator).

Action: n/a

LPX-01035: [XQST0035] Repeated schema components

Cause: It is a static error to import two schema components that both define the same name in the same symbol space and in the same scope.

Action: n/a

LPX-01036: [XQST0036] Importing module should import schema '~s'

Cause: It is a static error to import a module if the importing module's in-scope schema types do not include definitions for the schema type names that appear in the declarations of variables and functions (whether in an argument type or return type) that are present in the imported module and are referenced in the importing module.

Action: n/a

LPX-01037: [XQST0037]

Cause: Not currently used

Action: n/a

LPX-01038: [XQST0038] Invalid collation

Cause: It is a static error if a Prolog contains more than one default collation declaration, or the value specified by a default collation declaration is not present in statically known collations.

Action: n/a

LPX-01039: [XQST0039] Repeated parameter name

Cause: It is a static error for a function declaration to have more than one parameter with the same name.

Action: n/a

LPX-01040: [XQST0040] Repeated attribute name

Cause: It is a static error if the attributes specified by a direct element constructor do not have distinct expanded QNames.

Action: n/a

LPX-01041: [XQDY0041] Expression can't be cast to the type xs:NCName

Cause: It is a dynamic error if the value of the name expression in a computed processing instruction constructor cannot be cast to the type xs:NCName.

Action: n/a

LPX-01042: [XQST0042]

Cause: Not currently used.

Action: n/a

LPX-01043: [XQST0043]

Cause: Not currently used.

Action: n/a

LPX-01044: [XQDY0044] Invalid attribute namespace

Cause: It is a dynamic error if the node-name property of the node constructed by a computed attribute constructor is in the namespace <http://www.w3.org/2000/xmlns/> (corresponding to namespace prefix xmlns), or is in no namespace and has local name xmlns.

Action: n/a

LPX-01045: [XQST0045] Invalid function namespace

Cause: It is a static error if the function name in a function declaration is in one of the following namespaces: <http://www.w3.org/XML/1998/namespace>, <http://www.w3.org/2001/XMLSchema>, <http://www.w3.org/2001/XMLSchema-instance>, <http://www.w3.org/2005/xpath-functions>.

Action: n/a

LPX-01046: [XQST0046] Invalid URILiteral

Cause: An implementation MAY raise a static error if the value of a URILiteral is of nonzero length and is not in the lexical space of xs:anyURI.

Action: n/a

LPX-01047: [XQST0047] Repeated import module target namespace

Cause: It is a static error if multiple module imports in the same Prolog specify the same target namespace.

Action: n/a

LPX-01048: [XQST0048] Namespace should be as the module target namespace

Cause: It is a static error if a function or variable declared in a library module is not in the target namespace of the library module.

Action: n/a

LPX-01049: [XQST0049] Repeated variable declaration

Cause: It is a static error if two or more variables declared or imported by a module have equal expanded QNames (as defined by the eq operator.)

Action: n/a

LPX-01050: [XPDY0050] Invalid dynamic type

Cause: It is a dynamic error if the dynamic type of the operand of a treat expression does not match the sequence type specified by the treat expression. This error might also be raised by a path expression beginning with "/" or "/" if the context node is not in a tree that is rooted at a document node. This is because a leading "/" or "/" in a path expression is an abbreviation for an initial step that includes the clause treat as document-node().

Action: n/a

LPX-01051: [XPST0051] AtomicType not defined

Cause: It is a static error if a QName that is used as an AtomicType in a SequenceType is not defined in the in-scope schema types as an atomic type.

Action: n/a

LPX-01052: [XQDY0052]

Cause: Not currently used.

Action: n/a

LPX-01053: [XQDY0053]

Cause: Not currently used.

Action: n/a

LPX-01054: [XQST0054] The variable depends on itself

Cause: It is a static error if a variable depends on itself.

Action: n/a

LPX-01055: [XQST0055] Repeated copy-namespaces declaration

Cause: It is a static error if a Prolog contains more than one copy-namespaces declaration.

Action: n/a

LPX-01056: [XQST0056]

Cause: Not currently used.

Action: n/a

LPX-01057: [XQST0057] Missing schema import target namespace

Cause: It is a static error if a schema import binds a namespace prefix but does not specify a target namespace other than a zero-length string.

Action: n/a

LPX-01058: [XQST0058] Repeated schema import target namespace

Cause: It is a static error if multiple schema imports specify the same target namespace.

Action: n/a

LPX-01059: [XQST0059] Can't find schema or module with namespace '-s'

Cause: It is a static error if an implementation is unable to process a schema or module import by finding a schema or module with the specified target namespace.

Action: n/a

LPX-01060: [XQST0060] Function name should have a namespace

Cause: It is a static error if the name of a function in a function declaration is not in a namespace (expanded QName has a null namespace URI).

Action: n/a

LPX-01061: [XQDY0061] Invalid document node

Cause: It is a dynamic error if the operand of a validate expression is a document node whose children do not consist of exactly one element node and zero or more comment and processing instruction nodes, in any order.

Action: n/a

LPX-01062: [XQDY0062]

Cause: Not currently used.

Action: n/a

LPX-01063: [XQST0063]

Cause: Not currently used.

Action: n/a

LPX-01064: [XQDY0064] Processing instruction name contains 'XML'

Cause: It is a dynamic error if the value of the name expression in a computed processing instruction constructor is equal to "XML" (in any combination of upper and lower case).

Action: n/a

LPX-01065: [XQST0065] Repeated ordering mode declaration

Cause: A static error is raised if a Prolog contains more than one ordering mode declaration.

Action: n/a

LPX-01066: [XQST0066] Repeated default declaration

Cause: A static error is raised if a Prolog contains more than one default element/type namespace declaration, or more than one default function namespace declaration.

Action: n/a

LPX-01067: [XQST0067] Repeated construction declaration

Cause: A static error is raised if a Prolog contains more than one construction declaration.

Action: n/a

LPX-01068: [XQST0068] Repeated boundary-space declaration

Cause: A static error is raised if a Prolog contains more than one boundary-space declaration.

Action: n/a

LPX-01069: [XQST0069] Repeated empty order declaration

Cause: A static error is raised if a Prolog contains more than one empty order declaration.

Action: n/a

LPX-01070: [XQST0070] Invalid (prefix, URI) combination

Cause: A static error is raised if a namespace URI is bound to the predefined prefix xmlns, or if a namespace URI other than <http://www.w3.org/XML/1998/namespace> is bound to the prefix xml, or if the prefix xml is bound to a namespace URI other than <http://www.w3.org/XML/1998/namespace>.

Action: n/a

LPX-01071: [XQST0071] Repeated namespace attribute

Cause: A static error is raised if the namespace declaration attributes of a direct element constructor do not have distinct names.

Action: n/a

LPX-01072: [XQDY0072] Element content contains invalid hyphens combination

Cause: It is a dynamic error if the result of the content expression of a computed comment constructor contains two adjacent hyphens or ends with a hyphen.

Action: n/a

LPX-01073: [XQST0073] Cyclic import sequence

Cause: It is a static error if the graph of module imports contains a cycle (that is, if there exists a sequence of modules M1 ... Mn such that each Mi imports Mi+1 and Mn imports M1), unless all the modules in the cycle share a common namespace.

Action: n/a

LPX-01074: [XQDY0074] Invalid element or attribute QName

Cause: It is a dynamic error if the value of the name expression in a computed element or attribute constructor cannot be converted to an expanded QName (for example, because it contains a namespace prefix not found in statically known namespaces.)

Action: n/a

LPX-01075: [XQST0075] Validate expression not supported

Cause: An implementation that does not support the Validation Feature must raise a static error if it encounters a validate expression.

Action: n/a

LPX-01076: [XQST0076] Invalid collation

Cause: It is a static error if a collation subclause in an order by clause of a FLWOR expression does not identify a collation that is present in statically known collations.

Action: n/a

LPX-01077: [XQST0077]

Cause: Not currently used.

Action: n/a

LPX-01078: [XQST0078]

Cause: Not currently used.

Action: n/a

LPX-01079: [XQST0079] Invalid extension expression

Cause: It is a static error if an extension expression contains neither a pragma that is recognized by the implementation nor an expression enclosed in curly braces.

Action: n/a

LPX-01080: [XPST0080] Invalid target type

Cause: It is a static error if the target type of a cast or castable expression is xs:NOTATION or xs:anyAtomicType.

Action: n/a

LPX-01081: [XPST0081] Invalid prefix

Cause: It is a static error if a QName used in a query contains a namespace prefix that cannot be expanded into a namespace URI by using the statically known namespaces.

Action: n/a

LPX-01082: [XQST0082]

Cause: Not currently used.

Action: n/a

LPX-01083: [XQST0083]

Cause: Not currently used.

Action: n/a

LPX-01084: [XQDY0084] Missing top-level element declaration

Cause: It is a dynamic error if the element validated by a validate statement does not have a top-level element declaration in the in-scope element declarations, if validation mode is strict.

Action: n/a

LPX-01085: [XQST0085] The namespace URI shouldn't be a zero-length string

Cause: It is a static error if the namespace URI in a namespace declaration attribute is a zero-length string, and the implementation does not support [XML Names 1.1].

Action: n/a

LPX-01086: [XQTY0086] No-preserve mode conflict

Cause: It is a type error if the typed value of a copied element or attribute node is namespace-sensitive when construction mode is preserve and copy-namespaces mode is no-preserve.

Action: n/a

LPX-01087: [XQST0087] Invalid encoding

Cause: It is a static error if the encoding specified in a Version Declaration does not conform to the definition of EncName specified in [XML 1.0].

Action: n/a

LPX-01088: [XQST0088] Target namespace string shouldn't be of zero length

Cause: It is a static error if the literal that specifies the target namespace in a module import or a module declaration is of zero length.

Action: n/a

LPX-01089: [XQST0089] Repeated variable name

Cause: It is a static error if a variable bound in a for clause of a FLWOR expression, and its associated positional variable, do not have distinct names (expanded QNames).

Action: n/a

LPX-01090: [XQST0090] Invalid character reference

Cause: It is a static error if a character reference does not identify a valid character in the version of XML that is in use.

Action: n/a

LPX-01091: [XQDY0091] Invalid xml:id

Cause: An implementation MAY raise a dynamic error if an xml:id error, as defined in [XML ID], is encountered during construction of an attribute named xml:id.

Action: n/a

LPX-01092: [XQDY0092] Invalid xml:space value

Cause: An implementation MAY raise a dynamic error if a constructed attribute named xml:space has a value other than preserve or default.

Action: n/a

LPX-01093: [XQST0093] Module depends on itself

Cause: It is a static error to import a module M1 if there exists a sequence of modules M1 ... Mi ... M1 such that each module directly depends on the next module in the sequence (informally, if M1 depends on itself through some chain of module dependencies.)

Action: n/a

LPX-01094: [FORG0003] fn:zero-or-one called with a sequence containing more than one item

Cause: It is a dynamic error if fn:zero-or-one is called with a sequence containing more than one item

Action: n/a

LPX-01095: [FORG0004] fn:one-or-more called with a sequence containing no items

Cause: It is a dynamic error if fn:one-or-more is called with a sequence containing no items

Action: n/a

LPX-01096: [FORG0005] fn:exactly-one called with a sequence containing zero or more than one item

Cause: It is a dynamic error if fn:exactly-one is called with a sequence containing zero or more than one item

Action: n/a

LPX-01097: [FORG0006] Invalid argument type

Cause: It is a dynamic error if an XQuery F&O is called with wrong argument type.

Action: n/a

LPX-01098: [FOCA0002] Invalid lexical value

Cause: It is a dynamic error if an XQuery F&O is called with wrong argument value.

Action: n/a

LPX-01099: [FOCA0001] Input value too large for decimal

Cause: It is a dynamic error if the Input value too large for decimal

Action: n/a

LPX-01100: [FOCA0003] Input value too large for integer

Cause: It is a dynamic error if the Input value too large for integer

Action: n/a

LPX-01101: External Error '-s' occurs

Cause: An error occurred during the processing of the XQuery expression.

Action: Check the detailed error message for the possible causes.

LPX-01102: [FORG0008] both arguments to fn:dateTime have a specified timezone

Cause: It is an error to pass arguments to fn:dateTime having a specified timezone

Action: n/a

LPX-01105: [FOAR0001] Division by zero

Cause: It is an error to divide by zero

Action: n/a

LPX-01106: [FOAR0002] Numeric operation overflow/underflow

Cause: Numeric operations causes overflow/underflow

Action: n/a

LPX-01107: [FORG0002] invalid argument to fn:resolve-uri()

Cause: Wrong argument to fn:resolve-uri() function

Action: n/a

LPX-01108: [FORG0009] error in resolving a relative URI against a base URI in fn:resolve-uri()

Cause: Error resolving relative URI in fn:resolve-uri() function

Action: n/a

LPX-01109: [FOCA0005] NaN supplied as float/double value

Cause: NaN supplied as float/double value

Action: n/a

LPX-01110: [FOCA0006] String to be cast to decimal has too many digits of precision

Cause: String to be cast to decimal has too many digits of precision

Action: n/a

LPX-01111: [FOCH0002] Unsupported collation

Cause: Unsupported collation

Action: n/a

LPX-01112: [FOCH0003] Unsupported normalization form

Cause: Unsupported normalization form

Action: n/a

LPX-01113: [FOCH0004] Collation does not support collation units

Cause: Collation does not support collation units

Action: n/a

LPX-01114: [FODC0001] No context document

Cause: No context document

Action: n/a

LPX-01115: [FODC0002] Error retrieving resource

Cause: Error retrieving resource

Action: n/a

LPX-01116: [FODC0003]

Cause: Function stability not defined

Action: Function stability not defined

LPX-01117: [FODC0004] Invalid argument to fn:collection

Cause: Invalid argument to fn:collection

Action: n/a

LPX-01118: [FODC0005] Invalid argument to fn:doc or fn:doc-available

Cause: Invalid argument to fn:doc or fn:doc-available

Action: n/a

LPX-01119: [FODT0001] Overflow/underflow in date/time operation

Cause: Overflow/underflow in date/time operation

Action: n/a

LPX-01120: [FODT0002] Overflow/underflow in duration operation

Cause: Overflow/underflow in duration operation

Action: n/a

LPX-01121: [FODT0003] Invalid timezone value

Cause: Invalid timezone value

Action: n/a

LPX-01122: [FONS0005] Base-uri not defined in the static context

Cause: Base-uri not defined in the static context

Action: n/a

LPX-01123: [FORG0001] Invalid value for cast/constructor

Cause: Invalid value for cast/constructor

Action: n/a

LPX-01124: [FORX0001] Invalid regular expression flags

Cause: Invalid regular expression flags

Action: n/a

LPX-01125: [FORX0002] Invalid regular expression

Cause: Invalid regular expression

Action: n/a

LPX-01126: [FORX0003] Regular expression matches zero-length string

Cause: Regular expression matches zero-length string

Action: n/a

LPX-01127: [FORX0004] Invalid replacement string

Cause: Invalid replacement string

Action: n/a

LPX-01128: [FOTY0012] Argument node does not have a typed value

Cause: Argument node does not have a typed value

Action: n/a

LPX-01129: [XUST0001] Updating expression in a wrong position

Cause: It is a static error if an updating expression is used in any position other than one of the following: 1. The topmost expression in the body of a query. 2. The modify clause of a transform expression. 3. The return clause of a FLWOR expression. 4. The return clauses of a typeswitch expression in which every return clause contains an updating expression, an empty expression (), or a call to the fn:error function. 5. The then and else clauses of a conditional statement in which both the then and else clauses contain either an updating expression, an empty expression (), or a call to the fn:error function. 6. An operand of a comma expression in which each operand is either an updating expression, an empty expression (), or a call to the fn:error function. 7. The content of a parenthesized expression. 8. The body of a function declaration in which the keyword updating is specified.

Action: n/a

LPX-01130: [XUST0002] Non-updating expression in a wrong position

Cause: It is a static error if a non-updating expression other than an empty expression () or a call to the fn:error function is used in one of the following positions: 1. The modify clause of a transform expression. 2. The top-level expression in the body of a function declaration in which the keyword updating is specified.

Action: n/a

LPX-01131: [XUST0003] Repeated revalidation declaration

Cause: It is a static error if a Prolog contains more than one revalidation declaration.

Action: n/a

LPX-01132: [XUTY0004] Invalid attribute node in the insertion sequence

Cause: It is a type error if the insertion sequence of an insert expression contains an attribute node following a node that is not an attribute node.

Action: n/a

LPX-01133: [XUTY0005] Invalid target expression for 'insert'

Cause: In an insert expression where into, as first into, or as last into is specified, it is a type error if the target expression returns a non-empty result that does not consist of a single element or document node.

Action: n/a

LPX-01134: [XUTY0006] Invalid target expression for 'insert'

Cause: In an insert expression where before or after is specified, it is a type error if the target expression returns a non-empty result that does not consist of a single element, text, comment, or processing instruction node.

Action: n/a

LPX-01135: [XUTY0007] Invalid target expression for 'delete'

Cause: It is a type error if the target expression of a delete expression does not return a sequence of zero or more nodes.

Action: n/a

LPX-01136: [XUTY0008] Invalid target expression for 'replace'

Cause: In a replace expression, it is a type error if the target expression returns a non-empty result that does not consist of a single element, attribute, text, comment, or processing instruction node.

Action: n/a

LPX-01137: [XUDY0009] Invalid target expression for 'replace'

Cause: In a replace expression where value of is not specified, it is a dynamic error if the node returned by the target expression does not have a parent.

Action: n/a

LPX-01138: [XUTY0010] Invalid replacement sequence for 'replace'

Cause: In a replace expression where value of is not specified and the target is an element, text, comment, or processing instruction node, it is a type error if the replacement sequence does not consist of zero or more element, text, comment, or processing instruction nodes.

Action: n/a

LPX-01139: [XUTY0011] Invalid replacement sequence for 'replace'

Cause: In a replace expression where value of is not specified and the target is an attribute node, it is a type error if the replacement sequence does not consist of zero or more attribute nodes.

Action: n/a

LPX-01140: [XUTY0012] Invalid target expression for 'rename'

Cause: In a rename expression, it is a type error if the target expression returns a non-empty result that does not consist of a single element, attribute, or processing instruction node.

Action: n/a

LPX-01141: [XUTY0013] Invalid copy expression for transform

Cause: In a transform expression, it is a type error if a source expression in the copy clause does not return a single node.

Action: n/a

LPX-01142: [XUDY0014] Modified node was not created by the copy clause

Cause: In a transform expression, it is a dynamic error if the modify clause modifies any node that was not created by the copy clause.

Action: n/a

LPX-01143: [XUDY0015] Duplicate 'rename' for the same target node

Cause: It is a dynamic error if any node is the target of more than one rename expression within the same query.

Action: n/a

LPX-01144: [XUDY0016] Duplicate 'replace' for the same target node

Cause: It is a dynamic error if any node is the target of more than one replace expression (without value of being specified) within the same query.

Action: n/a

LPX-01145: [XUDY0017] Duplicate 'replace' for the same target node

Cause: It is a dynamic error if any node is the target of more than one replace value of expression within the same query.

Action: n/a

LPX-01146: [XUDY0018] External not updating function returns an updated value

Cause: It is a dynamic error if a function that was declared to be external but not updating returns a non-empty pending update list.

Action: n/a

LPX-01147: [XUDY0019] External updating function returns an invalid value

Cause: It is a dynamic error if a function that was declared to be both external and updating returns a non-empty data model instance.

Action: n/a

LPX-01148: [XUDY0020] Deleted node has no parent

Cause: An implementation may (but is not required to) raise a dynamic error if a node is deleted that had no parent before execution of the query began.

Action: n/a

LPX-01149: [XUDY0021] The result XDM instance violates XDM constraints

Cause: It is a dynamic error if the XDM instance that would result from applying all the updates in a query violates any constraint specified in [XQuery/XPath Data Model (XDM)]. In this case, none of the updates in the query are made effective.

Action: n/a

LPX-01150: [XUTY0022] Invalid attribute insertion into a document node

Cause: It is a type error if an insert expression specifies the insertion of an attribute node into a document node.

Action: n/a

LPX-01151: [XUDY0023] Updating expression introduces a namespace conflict

Cause: It is a dynamic error if an insert, replace, or rename expression affects an element node by introducing a new namespace binding that conflicts with one of its existing namespace bindings.

Action: n/a

LPX-01152: [XUDY0024] Updating expression introduces a namespace conflict

Cause: It is a dynamic error if the effect of a set of updating expressions is to introduce conflicting namespace bindings into an element node.

Action: n/a

LPX-01153: [XUDY0025] Invalid QName for processing instruction rename

Cause: It is a dynamic error if the target of a rename expression is a processing instruction node, and the new name expression returns a QName with a non-empty namespace prefix.

Action: n/a

LPX-01154: [XUST0026] Revalidation mode '~s' is not supported

Cause: It is a static error if a revalidation declaration in a Prolog specifies a revalidation mode that is not supported by the current implementation.

Action: n/a

LPX-01155: [XUDY0027] Invalid target expression

Cause: It is a dynamic error if the target expression of an insert, replace, or rename expression evaluates to an empty sequence.

Action: n/a

LPX-01156: [XUST0028] Updating function should not have a return type

Cause: It is a static error if a function declaration specifies both updating and a return type.

Action: n/a

LPX-01157: [XUDY0029] Insert expression target node doesn't have a parent

Cause: In an insert expression where before or after is specified, it is a dynamic error if node returned by the target expression does not have a parent.

Action: n/a

LPX-01158: [XUDY0030] Invalid insertion of an attribute node

Cause: It is a dynamic error if an insert expression specifies the insertion of an attribute node before or after a child of a document node.

Action: n/a

LPX-01159: [FOUP0001] Invalid 'fn:put' first operand

Cause: It is a dynamic error if the first operand of fn:put is not a node of a supported kind.

Action: n/a

LPX-01160: [FOUP0002] Invalid 'fn:put' second operand

Cause: It is a dynamic error if the second operand of fn:put is not a valid lexical representation of the xs:anyURI type.

Action: n/a

LRM-00100 to LRM-00123

LRM-00100: internal error [<varname>number</varname>]

Cause: An internal error has occurred.

Action: Contact Oracle Support Services and report the error.

LRM-00101: unknown parameter name '<varname>string</varname>'

Cause: The parameter name was misspelled.

Action: Spell the parameter name correctly.

LRM-00102: '<varname>string</varname>' is not in the legal range for '<varname>string</varname>'

Cause: The value of the parameter is not within the legal range.

Action: Refer to the manual for the allowable values for this parameter.

LRM-00103: '<varname>string</varname>' contains an illegal integer radix for '<varname>string</varname>'

Cause: An illegal integer radix specification was found.

Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.

LRM-00104: '<varname>string</varname>' is not a legal integer for '<varname>string</varname>'

Cause: The value is not a valid integer.

Action: Specify only valid integers for this parameter.

LRM-00105: '<varname>string</varname>' is not a legal Boolean for '<varname>string</varname>'

Cause: The value is not a valid Boolean.

Action: Refer to the manual for allowable Boolean values.

LRM-00106: out of memory

Cause: The operating system has run out of memory.

Action: Take action to make more memory available to the program.

LRM-00107: parameter name abbreviation '<varname>string</varname>' is not unique

Cause: The given abbreviation was not unique.

Action: Use a longer abbreviation to make the parameter name unique.

LRM-00108: invalid positional parameter value '<varname>string</varname>'

Cause: An invalid positional parameter value has been entered.

Action: Remove the invalid positional parameter.

LRM-00109: could not open parameter file '<varname>string</varname>'

Cause: The parameter file does not exist.

Action: Create an appropriate parameter file.

LRM-00110: syntax error at '<varname>string</varname>'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00111: no closing quote for value '<varname>string</varname>'

Cause: A quoted string was started but not finished.

Action: Put a closing quote in the proper location.

LRM-00112: multiple values not allowed for parameter '<varname>string</varname>'

Cause: An attempt was made to specify multiple values for a parameter which can take only one value.

Action: Do not specify more than one value for this parameter.

LRM-00113: error when processing file '<varname>string</varname>'

Cause: A problem occurred when processing this file.

Action: Examine the additional error messages and correct the problem.

LRM-00114: error when processing from command line

Cause: A problem occurred when processing the command line.

Action: Examine the additional error messages and correct the problem.

LRM-00115: error when processing an environment variable

Cause: A problem occurred when processing an environment variable.

Action: Examine the additional error messages and correct the problem.

LRM-00116: syntax error at '<varname>string</varname>' following '<varname>string</varname>'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00117: syntax error at '<varname>string</varname>' at the start of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00118: syntax error at '<varname>string</varname>' at the end of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

LRM-00119: unable to obtain a valid value for '<varname>string</varname>'

Cause: No valid value was obtained for this parameter.

Action: Rerun the application and enter a valid value.

LRM-00120: '<varname>string</varname>' is not a legal Oracle number for '<varname>string</varname>'

Cause: The value is not a valid Oracle number.

Action: Refer to the manual for allowable Oracle number values.

LRM-00121: '<varname>string</varname>' is not an allowable value for '<varname>string</varname>'

Cause: The value is not a legal value for this parameter.

Action: Refer to the manual for allowable values.

LRM-00122: value '<varname>string</varname>' for '<varname>string</varname>' must be between '<varname>number</varname>' and '<varname>number</varname>'

Cause: The value of the parameter is not within the legal range.

Action: Specify a value that is within the legal range.

LRM-00123: invalid character <varname>number</varname> found in the input file

Cause: A character that is invalid was found in the input file.

Action: Specify an input file that contains only valid characters.

LSX-00001 to LSX-00345

LSX-00001: NULL pointer

Cause: A NULL pointer was detected as an internal error condition.

Action: This is a programming error by the caller of the Schema processor. Contact someone who can fix the problem.

LSX-00002: root element is not <varname>schema</varname>

Cause: The top-level element of an XML Schema must be <varname>schema</varname>.

Action: Correct the Schema; consult the Schema specification.

LSX-00003: invalid attribute "~1S" for element "~2S"

Cause: The named Schema element had an invalid attribute.

Action: Correct the Schema; consult the Schema specification.

LSX-00004: unexpected XML node type

Cause: Schema contains an XML node other than element, text (or CDATA),

Action: Other node types are not permitted; remove them.

LSX-00008: feature "~s" is not implemented

Cause: An attempt was made to use a feature that is not yet implemented.

Action: Make an enhancement request for the feature.

LSX-00009: data missing for type "~S"

Cause: Data is missing for an element or attribute of a simple type.

Action: Add data in the element or attribute.

LSX-00010: extra element(s) at end of "~S"

Cause: Extra elements exist at the end of schema component declarations.

Action: Remove the extra elements.

LSX-00011: internal error: ~sln

Cause: Implementation error.

Action: File a bug.

LSX-00013: element "~S" not from Schema of Schemas

Cause: Bogus element exists in the schema file. Its name is not from Schema of Schemas.

Action: Remove the bogus element.

LSX-00014: empty instance document

Cause: Instance document to be Schema validated was empty (no top-level element).

Action: Provide a complete XML instance document.

LSX-00015: failed to parse document

Cause: Failed to parse the schema document using the given URI.

Action: Provide the correct URI and make sure that the schema document is valid.

LSX-00016: schema and instance document have incompatible character sets

Cause: Parsed schema components were in a simple-type character set while the parsed instance document data was not. A simple-type character set is single-byte, not shift sensitive, and has no linguistic specials in use.

Action: Reinitialize the schema global context with appropriate parser context settings, i.e. pass a parser context with its output encoding set to be a multibyte or Unicode character set.

LSX-00018: invalid schema context

Cause: An invalid schema context was provided to the processor. Multiple schema documents were loaded and assembled into the schema context. At least one of them is not fully valid with respect to a schema corresponding to the Schema for Schemas.

Action: Check the errors reported when schema documents were loaded, mapped, or validated. Correct errors found in the identified schema documents and reload them into a new schema context. Then provide the new schema context to the processor.

LSX-00020: unknown type "~S"

Cause: A specified type was unknown (not defined in any loaded Schemas).

Action: Make sure the type was defined and that the type usage referenced the correct Schema.

LSX-00021: undefined element "~S"

Cause: Element is undefined in the specified namespace.

Action: If the element name is misspelled, correct the spelling.

LSX-00022: unknown namespace prefix "~S"

Cause: Prefix in a QName is undefined in the current scope.

Action: Correct the prefix name if it's misspelled.

LSX-00023: unknown namespace URI "~S"

Cause: Namespace URI is unknown to the schema processor.

Action: Correct the namespace URI if it's misspelled.

LSX-00024: unknown attribute group "~S"

Cause: The name of attribute group is unknown to the schema processor in the current scope.

Action: Correct the name of attribute group if it's misspelled.

LSX-00025: unknown group "~S"

Cause: The name of group is unknown to the schema processor in the current scope.

Action: Correct the name of group if it's misspelled.

LSX-00026: unknown attribute "~S"

Cause: The name of attribute is unknown to the schema processor in the current scope.

Action: Correct the name of attribute if it's misspelled.

LSX-00027: property "~s" unknown

Cause: The named validation property was unknown.

Action: Refer to the documentation for the complete list of validation properties.

LSX-00102: duplicate element "~S"

Cause: Element declaration is not unique within its scope.

Action: Rename the element.

LSX-00103: duplicate group "~S"

Cause: Group declaration is not unique within its scope.

Action: Rename the group.

LSX-00104: duplicate type "~S"

Cause: Type definition is not unique within its scope.

Action: Rename the type.

LSX-00105: duplicate attribute group "~S"

Cause: Attribute group declaration is not unique within its scope.

Action: Rename the attribute group.

LSX-00106: duplicate attribute "~S"

Cause: Attribute declaration is not unique within its scope.

Action: Rename the attribute.

LSX-00110: facet "~S" should have single value attribute

Cause: A facet declaration did not have a value attribute.

Action: Each facet declaration must contain one and only one value attribute.

LSX-00111: type "~S" contains invalid facets

Cause: A specified facet was invalid for a type. Each datatype has a different set of facets which may apply.

Action: Use only applicable facets for the type.

LSX-00112: facet "~S" duplicated

Cause: A facet (other than "enumeration") was specified more than once.

Action: Only the enumeration facet may be used more than once for a type.

LSX-00113: facet "~1S" has invalid value "~2S"

Cause: Facet value contained illegal characters or its value was out of range.

Action: Remove illegal characters.

LSX-00114: facet "~S" not in schema schema

Cause: Facets are not defined in the XMLSchema namespace.

Action: Remove illegal facet declarations.

LSX-00116: mutually exclusive facets are not allowed

Cause: Mutual exclusiveness violations were found for facets. For example, both "length" and either "minLength" or "maxLength" are not allowed to be facets.

Action: Remove the facets that are at fault.

LSX-00117: "minLength" should not be greater than "maxLength"

Cause: The value of "minLength" must be less than or equal to the value of "maxLength".

Action: Correct either "minLength" or "maxLength".

LSX-00118: fixed facet value cannot be changed

Cause: The value of a fixed facet in the base type definition should remain the same.

Action: Remove the fixed facet specification in the parent's type for the erroneous facet component.

LSX-00119: value is not valid restriction of parent's minLength

Cause: There was an error in that minLength was among the members of {facets} of {base type definition} and {value} was less than the {value} of the parent minLength.

Action: Increase the {value} of minLength.

LSX-00120: value is not valid restriction of parent's maxLength

Cause: There was an error in that maxLength was among the members of {facets} of {base type definition} and {value} was greater than the {value} of the parent maxLength.

Action: Increase the {value} of maxLength.

LSX-00121: value is not valid restriction of parent's length

Cause: There was an error in that length was among the members of {facets} of {base type definition} and {value} was not equal to the {value} of the parent length.

Action: Make {value} the same as parent's.

LSX-00122: value is not valid restriction of parent's whitespace

Cause: There was an error in that whitespace was among the members of {facets} of {base type definition} and at least one of the following conditions was true: 1 {value} is replace or preserve and {value} of the parent whitespace is collapse 2 {value} is preserve and the {value} of the parent whitespace is replace

Action: Change the {value} of whitespace.

LSX-00123: base type is required

Cause: Missing base type declaration in the type definition.

Action: Define a base type.

LSX-00124: "list" element is improperly defined

Cause: A "list" element either must have its "itemType" attribute set or have one of its children be a "simpleType" element, but both conditions cannot exist.

Action: Remove the erroneous condition.

LSX-00125: "restriction" element is improperly defined

Cause: A "restriction" element either must have its "base" attribute set or have one of its children be a "simpleType" element, but both conditions cannot exist.

Action: Remove the erroneous condition.

LSX-00126: facet "~1S" has invalid value "~u"

Cause: Facet value contained illegal characters or its value was out of range.

Action: Remove illegal characters.

LSX-00127: totalDigits must be greater than or equal to fractionDigits

Cause: The value of the facet totalDigits is less than the value of the facet fractionDigits.

Action: Ensure that totalDigits is greater than or equal to fractionDigits.

LSX-00130: attribute "processContents" has invalid value "~S"

Cause: Attribute "processContents" in the "any" element or "anyAttribute" declaration has an invalid value.

Action: Specify one of the following values: lax, skip, or strict.

LSX-00132: attribute "~1S" has invalid occurrences value "~2S"

Cause: A minOccurs or maxOccurs attribute had an invalid value (not a integer or less than zero).

Action: Use a legal "occurs" value.

LSX-00133: attribute "use" has invalid value "~S"

Cause: A "use" attribute had an invalid value. Choices for "use" are "default", "fixed", "optional", "prohibited", or "required".

Action: Change the attribute to one of the above values.

LSX-00134: attribute "~1S" has invalid qualification "~2S"

Cause: An attribute that specifies qualification (form, attributeFormDefault, elementFormDefault) was invalid; it must be one of "qualified" or "unqualified".

Action: Change the attribute to one of the above values.

LSX-00135: invalid min/max Occurs for <varname>all</varname> element, must be 0/1

Cause: "minOccurs" has a value other than 0/1 or "maxOccurs" has a value other than 1.

Action: Specify 0/1 for "minOccurs" or "maxOccurs".

LSX-00136: "maxOccurs" is less than "minOccurs"

Cause: The value of the "maxOccurs" specification is less than the value of the "minOccurs" specification.

Action: Correct "minOccurs" or "maxOccurs".

LSX-00141: ID type may only be used in attributes

Cause: For backward compatibility with DTD, ID type may only be used in attributes.

Action: Remove the ID type.

LSX-00142: invalid sub-element "~1S" for element "~2S"

Cause: There was an invalid sub-element in the content of either the attribute or the element declaration. This was because the sub-element was either at the wrong position or out of context.

Action: Remove the sub-element or move it to the correct position.

LSX-00143: element "~S" must have type or ref

Cause: A Schema element was declared but was neither type or reference.

Action: One of type or reference must be specified.

LSX-00144: attribute "~1S" invalid derivation-restriction value "~2S"

Cause: An attribute which specifies a derivation-restriction setting (block, content, final) had an invalid value. Choices are "#all", "extension", or "restriction".

Action: Change the attribute to one of the above values.

LSX-00145: attribute "~1S" invalid derived value "~2S"

Cause: A derivedBy attribute had an invalid value. Choices are "extension" or "restriction".

Action: Change the attribute to one of the above values.

LSX-00146: element or attribute is improperly defined

Cause: An element or attribute definition must have either its "type" attribute set or must have one of its children be a "simpleType" or "complexType" element but both conditions cannot exist.

Action: Remove the erroneous condition.

LSX-00147: "~1S" cannot contain "~2S"

Cause: An invalid schema component exists in the current declaration.

Action: Remove the schema component.

LSX-00148: annotation must come first in "~S"

Cause: "annotation" element must be the first in the content.

Action: Make "annotation" the first element.

LSX-00149: duplicated ID specified in "~S"

Cause: An attempt was made to specify two distinct members of {attribute uses} with {attribute declaration}s, both of whose {type definition}s are from ID or are derived from ID.

Action: Declare only one member of the {attribute uses} whose {type definition} is from ID or will be derived from ID.

LSX-00150: attributeGroup reference shouldn't have children

Cause: A reference-to-attributeGroup element has children. It is suppose to be empty except for annotations.

Action: Remove the children.

LSX-00151: invalid combination of attributes "ref" and "name"

Cause: If the item's parent is not <varname>schema</varname>, then either the "ref" or the "name" attribute must be present, but not both. Top-level elements or attributes must have a name.

Action: Specify either the "ref" or "name" attribute.

LSX-00152: only "minOccurs", "maxOccurs", or "id" is allowed

Cause: If the item's parent is not <varname>schema</varname> and "ref" is present, then "complexType", "simpleType", "key", "keyref", "unique", "nillable", "default", "fixed", "form", "block", and "type" must be absent.

Action: Remove the prohibited attribute.

LSX-00153: invalid combination of default and fixed attributes

Cause: It is an error for a declaration to contain both fixed and default attributes.

Action: Remove either the default or the fixed attributes.

LSX-00154: attribute "use" must have its value set to "optional"

Cause: If "default" and "use" are both present, use must have its value set to "optional".

Action: Remove the default attribute or change the value of the "use" attribute.

LSX-00155: invalid use of attribute "ref"

Cause: If the item's parent is not <varname>schema</varname> and the attribute "ref" is present, then the element "simpleType" and the attributes "form" and "type" must be absent.

Action: Remove the prohibited items.

LSX-00156: type is final and no derivations are allowed

Cause: Derivation from a type that is declared to be final occurred.

Action: Remove the final declaration from the base type.

LSX-00157: "~S" is abstract and cannot be used in an instance document

Cause: The element declaration or the type definition was abstract.

Action: When an element is declared to be abstract, a member of that element's substitution group must appear in the instance document. When an element's

corresponding type definition is declared as abstract, all instances of that element must use xsi:type to indicate a derived type that is not abstract.

LSX-00158: base type of "~S" must be simple type or primitive datatype

Cause: The derivation constraint was violated.

Action: Use complexType instead of simpleType.

LSX-00159: list content of multiple simple types is not allowed

Cause: Two or more simple types were specified within the list content .

Action: Specify only one simple type.

LSX-00160: invalid substitution group affiliation between "~S" and "~S"

Cause: There was an error in that {substitution group exclusions} prevented substitution group affiliation by type restriction or type extension.

Action: Remove the offending deriving method from the {substitution group exclusions} list.

LSX-00161: disallowed type substitution between "~S" and "~S"

Cause: There was a substituted type whose deriving method falls in the union of the {disallowed substitutions} and the {type definition}'s {prohibited substitutions}.

Action: Remove the offending deriving method from the element's {disallowed substitutions} list or the {type definition}'s {prohibited substitutions} list.

LSX-00162: string "~S" is an invalid default for the complex type

Cause: If the {content type} is a simple type definition, then the string must be valid with regard to the simple type definition as defined by String Valid (3.14.4). If the {content type} is mixed, then the {content type}'s particle must be emptiable as defined by Particle Emptiable (3.9.6). However, one of these conditions was not met, resulting in this error.

Action: Make the default string a valid default with regard to the complex type definition.

LSX-00163: duplicated content specification in "~S"

Cause: There was a duplicate content specification in the children of complexType.

Action: Remove the duplicate content specification.

LSX-00164: no content specified in "~S"

Cause: In a simpleContent specification, either "restriction" or "extension" was not specified as a child.

Action: Add either a "restriction" or an "extension" element information item.

LSX-00165: content type of "~S" must be simple type

Cause: The content type of the type definition was not a simple type definition.

Action: Use complexContent instead of simpleContent .

LSX-00166: both content types must be mixed or both must be element-only

Cause: If the content types of the derived type and base type are not the same simple type definition and the content type of the base type is not empty, then both content

types must be mixed or both must be element-only. This was not the case, resulting in this error.

Action: Add attribute `mixed="true"` or remove it.

LSX-00167: defining form of "~S" must occur at the top level

Cause: The defining form did not occur at the top level of a schema.

Action: Move attributeGroup or group definition to the top level of the schema.

LSX-00168: referring form of "~S" must NOT occur at the top level

Cause: The referring form did not occur within a complex type definition or an attribute group definition.

Action: Move the attributeGroup definition to within a complex type definition or an attribute group definition. Or, move the group definition to within a complex type, restriction, extension, choice, or sequence.

LSX-00169: circular group reference is disallowed outside <varname>redefine</varname>

Cause: There was a circular group reference.

Action: One of the group references needs to be changed to a group definition.

LSX-00170: union must have memberTypes attribute or some simpleType children

Cause: There was no member type definition for the union declaration.

Action: Add memberTypes attribute or simpleType children.

LSX-00171: missing required sub-element "~S"

Cause: The sub-element specified in the error message was required.

Action: Add the required sub-element.

LSX-00172: "~S" is not a valid restriction of "~S"

Cause: The schema component constraint, Derivation Valid (Restriction, Complex) or Particle Valid (Restriction), was violated.

Action: Modify the base type (particle) or the restricted type (particle) definition.

LSX-00173: ~S of ~S type is not a valid restriction of ~S of ~S type

Cause: The schema component constraint, Particle Restriction OK (Elt:Elt -- NameAndTypeOK), was violated.

Action: Modify either or both element declaration particles.

LSX-00174: "~S" is not a valid derivation of "~S"

Cause: The schema component constraint, Derivation Valid (Restriction, simple), (Restriction, complex) or (Extension), was violated.

Action: Modify the base type or the derived type definition.

LSX-00175: a complex base within "simpleContent" must have simple content

Cause: A complex base within "simpleContent" was not restricted to contain only simple content.

Action: Modify the base type or the derived type definition.

LSX-00176: circular reference detected in schema component named "~S"

Cause: An attempt was made to use a circular reference. This is not allowed. For example, it is not possible to return to an element declaration by repeatedly following the {substitution group affiliation} property. Or, within the {particles} of a group there must not be at any depth a particle whose {term} is the group itself.

Action: Modify one of the schema components in the loop.

LSX-00200: element "~S" not empty

Cause: Content of the element must be empty.

Action: Remove any schema components in the content.

LSX-00201: contents of "~S" should be elements only

Cause: Node with type other than "element", "processing instruction", or "comment" exists in the content of the violating element.

Action: Remove the offending nodes.

LSX-00202: contents of "~S" should be text only

Cause: Node with type other than "text", "processing instruction", or "comment" exists in the content of the violating element.

Action: Remove the offending nodes.

LSX-00204: extra data at end of complex element

Cause: Extra nodes exist at the end of an element with a complex type definition.

Action: Remove the offending nodes or check the definition of the complex type.

LSX-00205: element "~1S" value "~2S" is wrong (must be "~3S")

Cause: The element had a value other than its fixed value.

Action: Use the fixed value as its value.

LSX-00206: substitution for element "~S" is disallowed

Cause: An attempt was made to substitute an element that violated a constraint.

Action: Change to a valid new element that can be substituted for the headElement.

LSX-00207: empty list is disallowed

Cause: An empty list was supplied where at least one value is required.

Action: Specify at least one valid list item.

LSX-00208: circular type reference disallowed

Cause: A type referenced itself as a member type, either directly or indirectly using other types.

Action: Remove the circular type dependency.

LSX-00209: fixed or default not allowed on ID-based type

Cause: A type derived from the ID type specified a fixed value or a default value.

Action: Remove the fixed or default value from the type.

LSX-00210: value "~1S" out of range for type "~2S"

Cause: Value is out of range for the data with a specific type.

Action: Fix the value.

LSX-00211: value "~1S" whose fractional digits exceeds ~2d

Cause: Too many fractional digits after the decimal point.

Action: Remove the extra fractional digits.

LSX-00212: value "~1s" whose total digits exceeds ~2d

Cause: Too many digits in the decimal data.

Action: Remove the extra digits.

LSX-00213: only ~1d occurrences of particle "~2S", minimum is ~3d

Cause: Too few occurrences of particles in the node.

Action: Specify more particles.

LSX-00214: too many occurrences of particle "~1S", maximum is ~2d

Cause: Too many occurrences of particles in the node.

Action: Remove extra ones.

LSX-00215: value "~1S" whose total digits exceeds ~2d

Cause: There were too many digits in the decimal data.

Action: Remove the extra digits.

LSX-00220: "~1S" is wrong length, should be ~2d

Cause: Data of simple type has invalid length.

Action: Fix the length of the data.

LSX-00221: "~1S" is too short (minimum length is ~2d)

Cause: The length of the data is too short.

Action: Prepend extra characters (such as zeros or blank characters) to make the data longer.

LSX-00222: "~1S" is too long (maximum length is ~2d)

Cause: The length of the data is too long.

Action: Remove extra characters from the data.

LSX-00229: item type is not a valid type for a list simple type

Cause: The specified item type must not itself be a list type, and must be one of the types identified in [XML Schemas: Datatypes] as a suitable item type for a list simple type.

Action: Change the list schema component's declaration.

LSX-00230: invalid integer "~S"

Cause: Illegal characters exist in the "integer" or its derivative type declarations.

Action: Remove illegal characters.

LSX-00231: invalid unsigned integer "~S"

Cause: Illegal characters exist in the "unsignedLong", "unsignedInt", "unsignedShort", or "unsignedByte" declarations.

Action: Remove illegal characters.

LSX-00232: invalid unsigned long "~S"

Cause: Illegal characters exist in the "unsignedLong" declaration.

Action: Remove illegal characters.

LSX-00233: invalid long "~S"

Cause: Illegal characters exist in the "long" declaration.

Action: Remove illegal characters.

LSX-00234: invalid decimal "~S"

Cause: Illegal characters exist in the "decimal" declaration.

Action: Remove illegal characters.

LSX-00235: invalid URI "~S"

Cause: Invalid URI specification for data of "anyURI" type.

Action: Remove illegal characters.

LSX-00237: invalid Name "~S"

Cause: Invalid XML name.

Action: Remove illegal characters.

LSX-00238: invalid Nmtoken "~S"

Cause: Invalid Nmtoken.

Action: Remove illegal characters.

LSX-00240: bad float "~S"

Cause: Invalid value for "float" type data.

Action: Remove illegal characters.

LSX-00241: bad double "~S"

Cause: Invalid value for "double" type data.

Action: Remove illegal characters.

LSX-00242: bad Boolean "~S"

Cause: Boolean data must have a value from the following set: "1", "0", "true", or "false".

Action: Specify one of "1", "0", "true", or "false".

LSX-00243: invalid date "~S"

Cause: Invalid value for data of "date" type.

Action: Remove illegal characters.

LSX-00244: invalid NCName "~S"

Cause: Invalid value for data of "NCName" type.

Action: Remove illegal characters.

LSX-00245: invalid ID "~S"

Cause: Data specified is not of "NCName" type.

Action: Remove illegal characters.

LSX-00246: invalid QName "~S"

Cause: Invalid value for data of "QName" type.

Action: Remove illegal characters.

LSX-00247: invalid language specification "~S"

Cause: Invalid value for data of "language" type.

Action: Remove illegal characters.

LSX-00248: invalid duration "~S"

Cause: Invalid value for data of "duration" type.

Action: Remove illegal characters.

LSX-00249: invalid date or time "~S"

Cause: Invalid value for data of "dateTime", "time", "gYearMonth", "gYear", "gMonthDay", "gDay", or "gMonth" type.

Action: Remove illegal characters.

LSX-00250: invalid normalizedString "~S"

Cause: Invalid value for data of "normalizedString" type.

Action: Remove illegal characters.

LSX-00251: invalid token "~S"

Cause: Invalid value for data of "token" type.

Action: Remove illegal characters.

LSX-00252: invalid union "~S"

Cause: Data of simple type is not one of the union type.

Action: Use one of the union type as its type.

LSX-00253: branch is empty

Cause: The pattern specification "branch1 | branch2" has either "branch1" or "branch2" missing.

Action: Remove '|' or add either "branch1" or "branch2".

LSX-00255: mismatched parentheses

Cause: ")" found without a matching "(" in a pattern specification.

Action: Add "(" to the pattern specification.

LSX-00256: empty character class expression

Cause: "[]" found when processing a character class expression.

Action: Specify the character group within the brackets.

LSX-00257: atom specification is missing

Cause: A quantifier was found without an atom specification.

Action: Add an atom specification in front of the quantifier.

LSX-00258: invalid escape character

Cause: "x" in "\x" is not a valid escape character.

Action: Change "x" to a valid escape character.

LSX-00259: invalid character found in the pattern

Cause: An unexpected character was found in the pattern.

Action: Fix the pattern.

LSX-00260: unexpected end of pattern

Cause: Something is missing at the end of the pattern.

Action: Fix the pattern.

LSX-00261: invalid character property

Cause: An error occurred when processing the character property. For example, "{" is missing after "\p" or "\P".

Action: Fix the character property.

LSX-00262: attribute "~1S" cannot have complex type "~2S"

Cause: The type of the attribute is "complex".

Action: Specify the type of the attribute to be "simple".

LSX-00263: undefined attribute "~S"

Cause: Violating attribute is not defined in the current scope.

Action: Correct the attribute name if it's misspelled.

LSX-00264: attribute "~S" is prohibited (may not occur)

Cause: Global declarations cannot contain the attributes "ref", "minOccurs", or "maxOccurs", or the use of this attribute is explicitly declared as "prohibited" by the schema.

Action: Remove the attribute.

LSX-00265: attribute "~1S" value "~2S" is wrong (must be "~3S")

Cause: Attribute has a value other than its fixed value.

Action: Use fixed value as its value.

LSX-00266: missing required attribute "~S"

Cause: A required attribute is missing.

Action: Add the required attribute.

LSX-00270: hex-encoded binary has odd length

Cause: Data of "hexBinary" type has odd number of digits.

Action: Add missing digits as appropriate.

LSX-00271: invalid character "~c" in hex-encoded binary

Cause: Data of "hexBinary" type has invalid characters.

Action: Remove illegal characters.

LSX-00272: BASE64-encoded binary grouped improperly (not 4's)

Cause: Number of digits is not a multiple of four.

Action: Add missing digits as appropriate.

LSX-00273: invalid character "~c" in base64-encoded binary

Cause: Data of "base64Binary" type has invalid characters.

Action: Remove illegal characters.

LSX-00274: invalid padding in base64-encoded binary

Cause: Invalid padding characters at the end of data.

Action: Use "=" as the padding characters.

LSX-00280: duplicate ID "~S"

Cause: ID name is not unique within the schema scope.

Action: Rename the ID.

LSX-00281: referenced ID "~S" is not defined

Cause: Referenced ID name is not defined within the schema scope.

Action: Define the ID.

LSX-00282: duplicate notation name "~S"

Cause: The name of the "notation" element is not unique within the schema scope.

Action: Rename the element.

LSX-00283: referenced notation "~S" is not defined

Cause: Referenced notation name is not defined within the schema scope.

Action: Define the element.

LSX-00284: duplicate constraint name "~S"

Cause: Each constraint declaration has a name which exists in a single symbol space for constraints.

Action: Choose a different name.

LSX-00285: referenced key "~S" is not defined

Cause: Referenced key name is not defined within the schema scope.

Action: Define the key.

LSX-00286: duplicate key "~S" for {"~S"}~S"

Cause: The key value was not unique within its scope.

Action: Change the key value.

LSX-00287: duplicate key "~S"

Cause: The key value was not unique within its scope.

Action: Change the key value.

LSX-00290: invalid enumeration choice "~S"

Cause: The value of the data is not one of the enumeration choice.

Action: Select one of the enumeration choice as its value.

LSX-00291: value "~1S" is less than minimum "~2S" (~3S)

Cause: Data has a value less than required minimum.

Action: Increase the value.

LSX-00292: value "~1S" is greater than maximum "~2S" (~3S)

Cause: Data has a value greater than maximum.

Action: Decrease the value.

LSX-00293: missing one or more fields from element "~S"

Cause: The required fields were missing from the content of the element.

Action: Add the fields.

LSX-00294: field "~S" produced multiple hits

Cause: XPath expressions relative to each element selected by a {selector} are specified by {fields}. These XPath expressions must identify a single node (element or attribute) whose content or value was used in the constraint. This content or value must be of a simple type.

Action: Remove duplicate elements or attributes.

LSX-00295: field element "~S" is not a simple type

Cause: The field element evaluated to a node-set with a member that was not a simple type.

Action: Change the field element's type.

LSX-00296: field value "~S" could not be compared to facet

Cause: The value of the data could not be compared to the facet value because one value had a time zone while the other did not.

Action: Correct the data to add the necessary time zone or to remove the unnecessary time zone.

LSX-00300: group must have name or ref but not both

Cause: "ref" or "name" attributes are either both missing or have both been specified.

Action: Specify either "ref", "name", but not both.

LSX-00310: local element or attribute should be namespace qualified

Cause: Element or attribute name is not namespace qualified.

Action: Add prefix or default namespace URI declaration.

LSX-00311: local element or attribute shouldn't be namespace qualified

Cause: Element or attribute name is namespace qualified.

Action: Remove prefix or default namespace URI declaration from itself or ancestors.

LSX-00320: missing required elements in <varname>all</varname>

Cause: Some required elements in "all" particle are missing.

Action: Add the missing elements.

LSX-00330: missing range start character

Cause: Missing range start character in a character range specification.

Action: Add the missing characters.

LSX-00331: missing comma

Cause: A comma is missing in a range specification.

Action: Add the missing characters.

LSX-00332: bad decimal digits in a quantifier specification

Cause: Quantifier has invalid characters.

Action: Remove illegal characters.

LSX-00333: literal "~S" is not valid with respect to the pattern

Cause: Literal is not valid with respect to the pattern.

Action: Choose correct characters in the literal.

LSX-00340: improper namespace value for the imported element

Cause: If the namespace attribute is present, then its actual value must not match the actual value of the enclosing schema's targetNamespace attribute. If the namespace attribute is not present, then the enclosing schema must have a targetNamespace attribute.

Action: Match namespace value.

LSX-00341: ENTITY or ENTITIES type may only be used in attributes

Cause: For compatibility, ENTITY or ENTITIES should be used only on attributes.

Action: Remove the ENTITY or ENTITIES.

LSX-00342: value of attribute "base" must be a complex type definition

Cause: If the "complexContent" alternative is chosen, then the type definition resolved to by the actual value of the attribute "base" must be a complex type definition.

Action: Choose a complex type definition as its base type.

LSX-00343: "~S" is not nillable

Cause: Attribute nillable was set to be "false" in element's declaration.

Action: Remove attribute xsi:nil from the instance document.

LSX-00344: namespace values "~1S" and "~2S" differ

Cause: The targetNamespace specified in the schema document differed from either:
a) the value of the enclosing schema's namespace attribute, or b) the value of the namespace attribute identified in the import element information item.

Action: Match the namespace value to the enclosing schema's targetNamespace attribute or the actual value of the namespace attribute identified in the import element information item.

LSX-00345: Element ("~1S") from "~2S" namespace is unexpected. Expecting element from "~3S" namespace

Cause: The namespace of the Xml Node in the instance document does not match with the expected element definition namespace

Action: n/a

MGTCA-01001 to MGTCA-01117

MGTCA-01001: clusterware stack did not respond

Cause: A wallet operation was requested when the Oracle Clusterware stack was down.

Action: Contact Oracle Support Services.

MGTCA-01002: clusterware stack did not respond to wallet operation

Cause: User attributes could not be read because the Grid Infrastructure Management Repository wallet location was not accessible.

Action: Contact Oracle Support Services.

MGTCA-01003: wallet access denied

Cause: An attempt to access the wallet was denied because the user does not have the required permissions.

Action: Contact Oracle Support Services.

MGTCA-01004: clusterware wallet internal error

Cause: An invalid wallet operation was performed or Oracle Cluster Registry storage for wallet was not present.

Action: Contact Oracle Support Services.

MGTCA-01005: cannot perform database operation while setting Grid Infrastructure Management Repository users

Cause: Failed to connect to Grid Infrastructure Management Repository using JDBC during new user setup.

Action: Contact Oracle Support Services.

MGTCA-01006: could not change user credentials for Grid Infrastructure Management Repository

Cause: SQL execute query failed.

Action: Contact Oracle Support Services.

MGTCA-01007: Grid Infrastructure Management Repository is not running on this node

Cause: During the execution of 'mgmtca', no running instance of the Grid Infrastructure Management Repository was found on the node.

Action: Run 'mgmtca' on the node having Grid Infrastructure Management Repository.

MGTCA-01008: An internal error occurred while querying for the node running Grid Infrastructure Management Repository

Cause: During the execution of 'mgmtca', an internal error occurred while querying for the node running Grid Infrastructure Management Repository.

Action: Contact Oracle Support Services.

MGTCA-01100: This utility is used to configure the Grid Infrastructure Management Repository.
Usage: `mgmtca [-em <varname>passwd</varname>] | [-gridhome] | [[setpasswd -user <varname>user-1</varname> [<varname>passwd-1</varname>] [, <varname>user-n</varname> <varname>passwd-n</varname>]]]`

Cause: None

Action: None

MGTCA-01101: failure in Oracle Grid Infrastructure Management Repository operation

Cause: A SQL request to the Oracle Grid Infrastructure Management Repository encountered an error.

Action: Contact Oracle Support Services

MGTCA-01102: failure in performing database operation to retrieve the name of the Pluggable Database in the Oracle Grid Infrastructure Management Repository

Cause: An attempt to retrieve the name of the Pluggable Database in Oracle Grid Infrastructure Management Repository failed.

Action: Contact Oracle Support Services

MGTCA-01103: failure in performing database operation to unlock the user of Oracle Grid Infrastructure Management Database

Cause: The user account to be unlocked did not exist.

Action: Contact Oracle Support Services

MGTCA-01104: An internal error occurred during the remote execution of 'mgmtca' on the node running the Grid Infrastructure Management Repository.

Cause: During the execution of 'mgmtca', an internal error occurred while remotely executing the operation of the node running the Grid Infrastructure Management Repository.

Action: Contact Oracle Support Services.

MGTCA-01105: Grid Infrastructure Management Repository is not running in the cluster.

Cause: The execution of 'mgmtca' could not complete because the Grid Infrastructure Management Repository was not running in the cluster.

Action: Contact Oracle Support Services.

MGTCA-01106: An internal error occurred while querying the state of the Grid Infrastructure Management Repository.

Cause: During the execution of 'mgmtca', an internal error occurred while querying the state of the Grid Infrastructure Management Repository.

Action: Contact Oracle Support Services.

MGTCA-01107: The resource for the Grid Infrastructure Management Repository does not exist.

Cause: The execution of 'mgmtca' could not complete because the resource for the Grid Infrastructure Management Repository did not exist.

Action: Contact Oracle Support Services.

MGTCA-01108: failed to determine CRS Home location

Cause: Execution of 'mgmtca' to retrieve the CRS Home location failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01109: failed to determine Oracle Base location

Cause: Execution of 'mgmtca' to retrieve the Oracle Base location failed. This is an internal error.

Action: Contact Oracle Support Services.

MGTCA-01110: An internal error occurred while querying the state of the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while querying the state of the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01111: An internal error occurred while stopping the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while stopping the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01112: An internal error occurred while removing the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while removing the existing instance of the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01113: The reconfigure operation for the Grid Infrastructure Management Repository could not complete because there was already an instance running on the cluster.

Cause: The reconfigure operation for the Grid Infrastructure Management Repository could not complete because there was already an instance running on the cluster.

Action: Contact Oracle Support Services.

MGTCA-01114: An internal error occurred while creating the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while creating the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01115: An internal error occurred while starting the resource for the Grid Infrastructure Management Repository during reconfiguration.

Cause: The execution of 'mgmtca' could not complete because an internal error occurred while starting the resource for the Grid Infrastructure Management Repository during reconfiguration.

Action: Contact Oracle Support Services.

MGTCA-01116: The syntax of the 'mgmtca' command is incorrect.

Cause: The 'mgmtca' command was rejected because the syntax as entered was incorrect.

Action: Reenter the 'mgmtca' command with the correct syntax. Enter 'mgmtca -h' to display usage.

MGTCA-01117: The username specified in the 'mgmtca' command is incorrect.

Cause: The 'mgmtca' command was rejected because the syntax as entered was incorrect.

Action: Provide correct username for the 'mgmtca' command.

NCR-00001 to NCR-04028

NCR-00001: NCR: Could not allocate memory

Cause: Insufficient swap space or system memory.

Action: Increase swap space or system memory.

NCR-00002: NCR: Invalid usage

Cause: Bad function parameter.

Action: Check function call.

NCR-00003: NCR: Initialization failure

Cause: Usually insufficient swap space or system memory.

Action: Increase swap space or system memory.

NCR-01003: NCRS: Read error.

Cause: Failed to read data from an input device.

Action: Check the input device driver return code for further information.

NCR-01004: NCRS: Write error.

Cause: Failed to write data to an output device.

Action: Check the output device driver return code for further information.

NCR-01005: NCRS: Failed to flush the output buffer.

Cause: Failed to write data in the output buffer to an output device.

Action: Check the output device driver return code for further information.

NCR-01006: NCRS: Data buffer overflow.

Cause: An attempt to read or write data outside of a given data buffer.

Action: Check data buffer size.

NCR-01007: NCRS: Operation is not supported in a given mode.

Cause: Attempt to perform an operation which is not supported for the current mode.

Action: See documentation for a list of work modes and supported operations.

NCR-01008: NCRS: Failed to obtain transport parameters.

Cause: Could not identify transport layer parameters.

Action: Check the transport layer return code for further information.

NCR-01009: NCRS: Record handling error.

Cause: Encountered an invalid record or an attempt to read beyond last record.

Action: See documentation for description of record handling methods.

NCR-01010: NCRS: Invalid network address length.

Cause: Network address size is set to 0.

Action: See documentation for valid network address sizes.

NCR-01011: NCRS: Send message failure.

Cause: Failed to send a message over network.

Action: Check the network interface return code for further information.

NCR-01012: NCRS: Receive message failure.

Cause: Failed to receive a network message.

Action: Check the network interface return code for further information.

NCR-01013: NCRS: Unvalid connection type.

Cause: Connection type is other than stream or message.

Action: See documentation for description of connection types.

NCR-01018: NCRS: Encryption failure.

Cause: Can not do the encryption for the data.

Action: See the SNS documentation for more information.

NCR-01019: NCRS: Checksumming failure.

Cause: Can not add the checksumming for the data.

Action: See the SNS documentation for more information.

NCR-01020: NCRS: Operation would block.

Cause: An I/O operation returned with no data read/written because the transport connection is "non-blocking" and, to succeed, the operation would have needed to block.

Action: This is a soft error; retry the operation.

NCR-02003: NCRF: Invalid type passed to format interpreter.

Cause: The format interpreter was given a data type it did not recognize.

Action: Check the types returned to the interpreter from either the type callback routine or from the type context structure.

NCR-02004: NCRF: Invalid format interpreter type context

Cause: The format interpreter was given an invalid type context.

Action: This error usually happens due to an improperly described aggregate. For example, declaring NCRF_END_STRUCT_DATA_TYPE within a context, without a complementary NCRF_STRUCT_DATA_TYPE, is invalid.

NCR-02005: NCRF: Invalid session mode

Cause: The data format layer received a session mode other than GET,PUT or FREE.

Action: None

NCR-02006: NCRF: Invalid floating point representation received

Cause: The data format layer received a floating point representation it did not recognize.

Action: Check incoming format descriptor for errors.

NCR-02007: NCRF: Invalid format descriptor received

Cause: The data format layer received an improperly formed format descriptor. Subsequent data could not be formatted.

Action: Check for data integrity on receipt from remote host.

NCR-02008: NCRF: Error within stream processing in format interpreter

Cause: An error occurred while the interpreter was processing an NCRF_STREAM_DATA_TYPE.

Action: Check for data integrity, or for stream existence.

NCR-02009: NCRF: Unable to open trace file

Cause: Failure to open tracing file.

Action: Make sure that this is a legal file name and that the user has write access.

NCR-02010: NCRF: Call context is not available

Cause: Call context not passed to format context.

Action: Make sure that create call context has been called.

NCR-02011: NCRF: Exceeded maximum number of rfids.

Cause: Exceeded maximum number of rfids.

Action: Call Oracle Support.

NCR-03002: NCRO: Maximum number of contexts has been reached

Cause: An attempt to create either a call context or a service context has failed because all context slots are in use.

Action: Free-up context slots by destroying those contexts no longer required, or, reconfigure NCRO with more context slots.

NCR-03003: NCRO: Unexpected message

Cause: Message read from service connection is not of the expected type.

Action: Application error - debug and fix.

NCR-03004: NCRO: Unknown message

Cause: Message read from service connection is of unknown type.

Action: Internal error - contact customer support.

NCR-03005: NCRO: Orphan message

Cause: Message read from service connection is for a call context that no longer exists.

Action: Application error - debug and fix.

NCR-03006: NCRO: Invalid operation

Cause: Attempted operation over call context is invalid. For example, attempting to send IN args for a procedure which is defined to have none.

Action: Application error - debug and fix.

NCR-03007: NCRO: Context is busy

Cause: Attempted operation failed because service/call context is busy performing a previous operation.

Action: Application error - debug and fix.

NCR-03008: NCRO: Call rejected

Cause: An attempt to execute a remote procedure has failed because the server has rejected the procedure id.

Action: If wrong procedure id, send the correct one. If wrong server was contacted, then contact the right one.

NCR-03009: NCRO: Protocol version mismatch

Cause: Client and server NCRO layers are at incompatible versions levels.

Action: Upgrade to latest NCRO version.

NCR-03010: NCRO: Transfer callback error

Cause: Application transfer callback function has returned a "FAILED" status.

Action: Debug the transfer callback function.

NCR-03012: NCRO: Invalid session mode

Cause: Attempted operation has failed because the session context is in an invalid state.

Action: Internal error - contact customer support.

NCR-03013: NCRO: Operation not supported

Cause: Attempted operation is not supported on this service connection because it is incompatible with the NCRO version level of the remote application.

Action: Link remote application with latest NCR library.

NCR-03014: NCRO: Bad transport address

Cause: A service context cannot be created because the transport address descriptor (contained in the binding context) is invalid.

Action: Application error - initialize the transport address descriptor correctly.

NCR-03015: NCRO: No transport address

Cause: A service context cannot be created because no transport address was provided (in the binding context) and the transport protocol uses datagrams.

Action: Application error - provide a transport address.

NCR-03016: NCRO: Message has bad address

Cause: Message read from service connection has bad address information.

Action: Internal error - contact customer support.

NCR-03017: NCRO: Transport type RSLV not supported

Cause: Support for transport type RSLV has not been built.

Action: Re-compile NCR library with NCR_USE_RSLV defined.

NCR-03018: NCRO: Failed to make RSLV connection

Cause: Failure to make RSLV connection usually means that the name resolution failed or the resolved TNS address is bad.

Action: Make sure that the name is in TNSNAMES.ORA and that it is set to the correct TNS address.

NCR-03019: NCRO: Unable to initialize thread support

Cause: Attempt to initialize the Core thread package has failed.

Action: Internal error - contact customer support.

NCR-03020: NCRO: Invalid call context

Cause: The call context is not an valid call context.

Action: Call context was destroyed, probably because the Break was received

NCR-03021: NCRO: Reset the in-band line

Cause: Our parnter is asking to reset the in-band line, after receiving a break

Action: The in-band line is required to be reset

NCR-03022: NCRO: Cannot send the break

Cause: There is an error occur when sending the break using the side-band channel

Action: Read the documentation regarding to side-band break support issues

NCR-03023: NCRO: Cannot receive the break

Cause: There is an error occur when receiving the break using the side-band channel

Action: Read the documentation regarding to side-band break support issues

NCR-03024: NCRO: Transport type LIST not supported

Cause: Support for transport type LIST has not been built.

Action: Re-compile NCR library with NCR_USE_LIST defined.

NCR-03025: NCRO: Failed to make LIST connection(s)

Cause: Failure to make LIST connection(s) usually means one of two things: (1) Address list syntax error, (2) Could not connect with supplied addresses

Action: Check address list syntax and make sure that there is a 'listener' process for each (or some) of the supplied addresses.

NCR-03026: NCRO: The result buffer has overflowed

Cause: The result buffer for holding the pickling result is too small.

Action: Please enlarge the result buffer and try again.

NCR-03027: NCRO: No remote service session set up yet.

Cause: Sender-makes-right needs the remote FID.

Action: Please set up the remote session before using the Send Make's Right option.

NCR-03028: NCRO: Partner refused request for sender-makes-right.

Cause: Sender-makes-right was requested by the current side, yet refused by the server.

Action: Check the server side to see why it refused SMR.

NCR-04002: NCRR: Invalid interface descriptor

Cause: An attempt to register an interface has failed because of an invalid interface descriptor.

Action: Check interface descriptor passed into the ncrri_register_interface call.

NCR-04003: NCRR: Interface exists

Cause: An attempt to register an interface has failed because an interface already exists.

Action: Application error - register a new interface, destroy the old one, or indicate that the old one must be replaced.

NCR-04004: NCRR: Invalid interface instance handle

Cause: A service registration API call has failed because of an invalid instance handle.

Action: Application error - debug and fix.

NCR-04005: NCRR: Invalid procedure handle

Cause: A procedure/object registration has failed because of an invalid procedural handle.

Action: Application error - debug and fix.

NCR-04006: NCRR: Invalid argument descriptor

Cause: A procedure registration has failed because of an invalid argument descriptor.

Action: Application error - debug and fix.

NCR-04007: NCRR: Invalid object handle

Cause: A service registration API call failed because of an invalid object handle, for example, one that does not exist.

Action: Application error - debug and fix.

NCR-04008: NCRR: Procedure exists

Cause: An attempt to register a remote procedure has failed because the procedure already exists in this interface.

Action: Application error - register a new procedure, destroy the old one, or indicate that the old one must be replaced.

NCR-04009: NCRR: Object exists

Cause: An attempt to register an object has failed because the object already exists in this interface.

Action: Application error - register a new object, destroy the old one, or indicate that the old one must be replaced.

NCR-04010: NCRR: Unable to contact Oracle Internet Directory Server

Cause: Service export or import failed to contact Oracle Internet Directory Server.

Action: Ensure Oracle Internet Directory configuration is correct. Otherwise, turn on tracing and/or contact customer support.

NCR-04011: NCRR: Oracle Internet Directory error

Cause: Service export or import failed during interaction with Oracle Internet Directory Server.

Action: Either wrong parameters with respect to the Remote Operations Service Registration Schema were passed in and/or the Oracle Internet Directory server refused to perform the requested operation. Refer the Remote Operations Service Registration Schema and/or turn on Oracle Internet Directory tracing and/or contact customer support.

NCR-04012: NCRR: Invalid address descriptor

Cause: An `ncrrei_export_interface` call failed because of an invalid address descriptor.

Action: Application error - debug and fix.

NCR-04013: NCRR: Insufficient authorization

Cause: Attempted Oracle Internet Directory Server operation has failed because of insufficient authorization.

Action: Contact customer support.

NCR-04014: NCRR: Invalid instance name

Cause: Service export or import failed because of an invalid instance name

Action: Application error - debug and fix.

NCR-04015: NCRR: Invalid interface name

Cause: Service export or import failed because of an invalid interface name

Action: Application error - debug and fix.

NCR-04016: NCRR: Last interface instance handle

Cause: The instance handle passed in is the last instance handle in the list.

Action: Not an error - means reaching the end of the list.

NCR-04017: NCRR: Unable to find the interface instance handle

Cause: The instance handle corresponding to the instance name was not found.

Action: Application error - debug and fix.

NCR-04018: NCRR: Unable to create the TNS address list

Cause: Unable to create the TNS address list from the interface instance list.

Action: Application error - debug and fix.

NCR-04019: NCRR: Interface or instance name already exists

Cause: Service export failed because the name already exists with the Oracle Internet Directory server

Action: Application error - debug and fix.

NCR-04020: NCRR: Interface or instance name does not exist

Cause: Service expunge/query failed because the name does not exist with the Oracle Internet Directory server

Action: Use Oracle Internet Directory tools on the relevant Oracle Internet Directory instance to verify the same. Otherwise turn on tracing and/or contact customer support

NCR-04021: NCRR: Pickler errors

Cause: Service export/query failed because of pickler errors

Action: Contact customer support

NCR-04022: NCRR: Invalid procedure descriptor

Cause: A procedure registration has failed because of an invalid procedural descriptor.

Action: Application error - debug and fix.

NCR-04023: NCRR: Invalid object descriptor

Cause: An object registration has failed because of an invalid object descriptor.

Action: Application error - debug and fix.

NCR-04024: NCRR: Maximum number of procedures reached

Cause: A procedure registration has failed because the procedures array is filled up.

Action: Re-register the interface increasing the maximum # of procedures.

NCR-04025: NCRR: Operation timed out

Cause: An operation for the Oracle Internet Directory server failed because it exceeded the timeout period.

Action: Retry the operation and/or turn on Oracle Internet Directory tracing.

NCR-04026: NCRR: Operation not supported

Cause: An operation for the Oracle Internet Directory server failed because it met with a server referral to another instance.

Action: Unify the Remote Ops registration entries into the Oracle Internet Directory instance and/or turn on Oracle Internet Directory tracing.

NCR-04027: NCRR: Operation failed

Cause: An operation for the Oracle Internet Directory server failed because the Service Registration interfaces met with invalid parameters.

Action: Contact customer support.

NCR-04028: NCRR: Operation failed

Cause: An operation for the Oracle Internet Directory server failed because the data involved exceeds the maximum allowed size.

Action: Check the entries in the Oracle Internet Directory instance with tools available from Oracle Internet Directory and/or turn on Oracle Internet Directory tracing.

NDFN-00020 to NDFN-00025

NDFN-00020: missing IPMI userid

Cause: Required user name argument was not specified.

Action: Reissue command with correct arguments.

NDFN-00021: missing node list

Cause: Required node list was not supplied.

Action: Re-issue command with correct arguments.

NDFN-00022: unrecognized command option: '<varname>string</varname>'

Cause: Operation type missing or mis-spelled.

Action: Re-issue command with correct arguments.

NDFN-00023: no password read. Re-issue request

Cause: Required administrator password was not read in response to the password prompt before finding end-of-line.

Action: Re-issue command and be sure to type the password immediately following the prompt.

NDFN-00024: caught I/O exception: <varname>string</varname>

Cause: Unexpected I/O exception was encountered while attempting to read the password. Exception string should indicate the precise cause.

Action: Re-issue command after repairing root cause.

NDFN-00025: <varname>string</varname> failed for node <varname>string</varname>

Cause: The indicated operation could not be completed for the specified node. The lower-level error messages attached should indicate the root cause.

Action: Re-issue command after repairing the condition indicated.

NID-00001 to NID-00604

NID-00001: Illegal command line syntax - parse error = (<varname>number</varname>)

Cause: Illegal operand on command line.

Action: Remove illegal operand.

NID-00002: Parse error: <varname>string</varname>

Cause: An error was encountered while parsing the command line.

Action: Remove offending operand.

NID-00010: Password:

Cause: Password was not specified in command line.

Action: Type password at this prompt.

NID-00100: Cannot open datafile "<varname>string</varname>"

Cause: The specified datafile could not be opened.

Action: Ensure that the specified datafile exists and is writable.

NID-00101: LOGFILE (<varname>string</varname>) not accessible

Cause: The specified log file could not be opened.

Action: Specify a log file that is writable.

NID-00102: Garbled target string

Cause: The supplied connect string could not be parsed. The connect string does not have the correct format.

Action: Refer to Oracle9i Database Concepts.

NID-00103: Missing password in connect string "<varname>string</varname>"

Cause: Could not find the password in the supplied connect string. The connect string does not have the correct format.

Action: Refer to Oracle9i Database Concepts.

NID-00104: Need to specify TARGET connection parameter in command line

Cause: The mandatory parameter TARGET was not specified.

Action: Specify TARGET=<varname>username</varname>.<varname>password</varname> when invoking this utility.

NID-00105: Need to specify "LOGFILE=<varname>logfile</varname>" when using APPEND=YES option

Cause: The APPEND parameter was specified without a LOGFILE.

Action: Specify APPEND=YES only when LOGFILE is also specified.

**NID-00106: LOGIN to target database failed with Oracle error:
ln<varname>string</varname>**

Cause: An Oracle error was reported while attempting to log in to the target database.

Action: Follow the actions for the specified Oracle error.

**NID-00107: File I/O error on datafile "<varname>string</varname>" during
<varname>string</varname> operation (<varname>number</varname>/
<varname>string</varname>)**

Cause: An operating system error was reported while performing the specified operation in the specified file.

Action: Verify the datafile and check for operating system errors.

**NID-00109: DBNAME string length <varname>number</varname> exceeds
maximum length of <varname>number</varname>**

Cause: The specified new database name exceeded the maximum size.

Action: Specify a shorter, valid name.

NID-00110: Cannot use REVERT and specify a database name at the same time

Cause: Conflicting options were specified in the command line.

Action: Choose only one of the options.

**NID-00111: Oracle error reported from target database while executing
ln<varname>string</varname>ln<varname>string</varname>**

Cause: An Oracle error was reported when executing an OCI operation.

Action: Follow the actions for the specified Oracle error.

NID-00112: unsupported connection mode

Cause: A mode different than SYSDBA or SYSBACKUP was specified for the connection to the target.

Action: Specify only AS SYSDBA or AS SYSBACKUP.

NID-00113: Error reading answer - aborting

Cause: Response caused an error.

Action: Retry the operation.

NID-00114: Must specify new database name when SETNAME is used

Cause: SETNAME=YES was specified but no DBNAME was provided.

Action: Specify DBNAME or remove the SETNAME=YES option.

NID-00115: Database should be mounted

Cause: The database was not mounted.

Action: Mount the database.

NID-00120: Database should be mounted exclusively

Cause: The database was started in parallel mode. To change the DBID, the database must be mounted exclusively.

Action: Shut down the database and start it in exclusive mode.

NID-00121: Database should not be open

Cause: The database was open. To change the DBID, the database must be mounted exclusively.

Action: Shutdown the database and mount it in exclusive mode.

NID-00122: Database should have no offline immediate datafiles

Cause: The database has one or more datafiles that are in OFFLINE IMMEDIATE mode.

Action: Drop the datafiles or recover them and bring them online.

NID-00123: Magic number for datafile "<varname>string</varname>" is incorrect

Cause: Block 0 header has an incorrect magic number for the specified datafile.

Action: Verify that the datafile is correct and retry the operation.

NID-00124: Mismatched dbid for datafile <varname>string</varname>, expected <varname>number</varname>, found <varname>number</varname>

Cause: The dbid of the datafile does not match the 'old' DBID or the 'new' DBID.

Action: Verify that this datafile belongs to the database. You may need to restore a backup of the datafile.

NID-00125: Database should have no disabled datafiles

Cause: The database has one or more datafiles that are disabled.

Action: Drop the datafiles or recover them and bring them online.

NID-00126: Database should have no datafiles in unknown state

Cause: The database has one or more datafiles that are in an unknown state.

Action: Drop the datafiles or recover them and bring them online.

NID-00127: All online files in the database must have the same checkpoint SCN

Cause: The database has one or more datafiles that have a checkpoint SCN that does not match the database checkpoint SCN.

Action: Restart the database and shut it down cleanly, then retry the operation.

NID-00128: Cannot revert change of database, change not in progress

Cause: The REVERT option was used, but the control file does not show that a change of DBID was in progress.

Action: Do not use the REVERT option, or possibly restore the control file that was in place when the utility was started.

NID-00129: Invalid DBID for datafile "<varname>string</varname>", expecting <varname>number</varname>, found <varname>number</varname>

Cause: A datafile header shows a different DBID from the rest of the database files.

Action: Ensure that the file belongs to this database.

NID-00130: Mismatched CHECKPOINT_CHANGE# in datafile "<varname>string</varname>", expecting <varname>string</varname>, found <varname>string</varname>

Cause: The datafile header does not match information in the control file.

Action: Revert the change, open the database, and verify that all datafiles are consistent. Then, shut down the database and retry the operation.

NID-00131: Control file is not current

Cause: A non-current control file is currently mounted.

Action: Perform necessary actions to make the control file current and retry.

NID-00132: CHECKPOINT_CHANGE# in datafile "<varname>string</varname>": <varname>string</varname> in the future of controlfile: <varname>string</varname>

Cause: The checkpoint in the datafile header is ahead of the checkpoint in the control file.

Action: Make the database consistent and retry.

NID-00133: Database should have only consistent datafiles

Cause: The database has one or more datafiles that are marked FUZZY in the control file.

Action: Restart the database and shut down consistently, then retry the operation.

NID-00134: Datafile "<varname>string</varname>" is not consistent

Cause: The datafile is marked as fuzzy in its header.

Action: Restart the database and shut down cleanly, then retry the operation.

NID-00135: There are <varname>number</varname> active threads

Cause: There are active threads in the database. The most likely cause is that the database crashed the last time it was shut down.

Action: Ensure that all threads are closed before retrying the operation. Start and open the database to perform crash recovery, then shut down with the NORMAL or IMMEDIATE options to close it cleanly. Finally, try running the utility again.

NID-00137: All datafiles that are not dropped should be readable

Cause: The database had one or more files that could not be read.

Action: Restore the missing files and retry the operation.

NID-00138: Block verification failed for datafile <varname>string</varname> (<varname>number</varname>)

Cause: Block header checksum yields a nonzero value for the specified datafile.

Action: Verify that the datafile is correct and retry the operation.

NID-00139: Mismatched dbname for datafile <varname>string</varname>, expected <varname>string</varname>, found <varname>string</varname>

Cause: The dbname of the datafile does not match the 'old' dbname or the 'new' dbname.

Action: Verify that this datafile belongs to the database. You may need to restore a backup of the datafile.

NID-00140: Specified database name <varname>string</varname> does not match previous name used <varname>string</varname>

Cause: This is a continuation of a failed attempt. However in the failed attempt, the database name is different than the one used in the last attempt.

Action: Retry the command using the original database name.

NID-00141: No database name specified, previous attempt used <varname>string</varname>

Cause: This is a continuation of a failed attempt. However, in the failed attempt, a database name was provided.

Action: Retry the command using the original database name.

NID-00142: Only changing database name, previous attempt changed dbid to <varname>number</varname>

Cause: This is a continuation of a failed attempt. However, in the failed attempt, the database id was also being changed.

Action: Retry the command removing SETNAME=YES.

NID-00143: Mismatched controlfile <varname>string</varname>

Cause: A controlfile did not have the correct status.

Action: Shutdown the database, remove the mismatched controlfile, mount the database, and retry the operation.

NID-00144: New name for database <varname>string</varname> is the same as current name <varname>string</varname>

Cause: The specified name is the same as the current name of the database.

Action: Specify a different name or do not use the DBNAME option.

NID-00145: nls subsystem initialization failure for product=<varname>string</varname>, facility=<varname>string</varname>

Cause: The NLS product/facility error message file could not be located or properly initialized.

Action: Check that the error message directory and file(s) have been properly installed.

NID-00300: Connected to database <varname>string</varname> (DBID=<varname>number</varname>)

Cause: Informational message.

Action: No action required.

NID-00301: Datafile <varname>string</varname> - dbid changed, wrote new name

Cause: Informational message.

Action: No action required.

NID-00302: Datafile <varname>string</varname> - dbid changed

Cause: Informational message.

Action: No action required.

NID-00303: Datafile <varname>string</varname> - wrote new name

Cause: Informational message.

Action: No action required.

NID-00304: Datafile <varname>string</varname> - reverted

Cause: Informational message.

Action: No action required.

NID-00305: Datafile <varname>string</varname> - already changed

Cause: Informational message.

Action: No action required.

NID-00306: Datafile <varname>string</varname> - no revert needed

Cause: Informational message.

Action: No action required.

NID-00307: Control File <varname>string</varname> - dbid changed, wrote new name

Cause: Informational message.

Action: No action required.

NID-00308: Control File <varname>string</varname> - dbid changed

Cause: Informational message.

Action: No action required.

NID-00309: Control File <varname>string</varname> - wrote new name

Cause: Informational message.

Action: No action required.

NID-00310: Control File <varname>string</varname> - reverted

Cause: Informational message.

Action: No action required.

NID-00311: Control File <varname>string</varname> - modified

Cause: Informational message.

Action: No action required.

NID-00312: Connected to server version <varname>string</varname>

Cause: Informational message.

Action: No action required.

NID-00315: Operation already in progress, continuing

Cause: Informational message.

Action: No action required.

NID-00320: Operation cancelled at user request

Cause: Informational message.

Action: No action required.

NID-00321: Proceeding with operation

Cause: Informational message.

Action: No action required.

NID-00330: The following datafiles are offline immediate:

Cause: Informational message.

Action: No action required.

NID-00331: The following datafiles are disabled:

Cause: Informational message.

Action: No action required.

NID-00332: The following datafiles are in unknown state:

Cause: Informational message.

Action: No action required.

NID-00333: Cannot read the header of the following datafiles:

Cause: Informational message.

Action: No action required.

NID-00334: The following datafiles are not checkpointed to <varname>string</varname>:

Cause: Informational message.

Action: No action required.

NID-00335: The following datafiles are not consistent:

Cause: Informational message.

Action: No action required.

NID-00336: The following datafiles are offline clean:

Cause: Informational message.

Action: No action required.

NID-00337: The following datafiles are read-only:

Cause: Informational message.

Action: No action required.

NID-00338: Control Files in database:

Cause: Informational message.

Action: No action required.

**NID-00350: <varname>string</varname> (<varname>number</varname>)
<varname>string</varname>**

Cause: Informational message.

Action: No action required.

NID-00351: <varname>string</varname> (<varname>number</varname>)

Cause: Informational message.

Action: No action required.

**NID-00352: <varname>string</varname> (<varname>number</varname>), error:

**NID-00600: Internal Error - [<varname>number</varname>]
[<varname>number</varname>] [<varname>number</varname>]
[<varname>number</varname>]**

Cause: This is the generic internal error number for program exceptions. This indicates that the program has encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number

NID-00601: Internal Error - [<varname>number</varname>] [<varname>string</varname>] [<varname>number</varname>] [<varname>number</varname>]

Cause: This is the generic internal error number for program exceptions. This indicates that the program has encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number

**NID-00602: Could not allocate <varname>number</varname> bytes for
"<varname>string</varname>"**

Cause: Memory allocation failed.

Action: Free memory at the operating system level and retry operation.

NID-00603: No datafiles found in database

Cause: Controlfile has not datafiles recorded

Action: Report as a bug - the first argument is the internal error number

NID-00604: No control files found in database

Cause: Instance has no control files recorded

Action: Report as a bug - the first argument is the internal error number

NMP-00001 to NMP-00011

NMP-00001: value too big

Cause: The SNMP program interface received a value too large for it to process. This error is usually displayed underneath an error which describes in more detail the value which caused the problem.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NMP-00002: no such SNMP variable name

Cause: An SNMP request was not processed because the one or more of the variable names in the request does not exist. This error is not normally visible to the user except in a trace file, where it is usually part of a "soft" error condition which is normal.

Action: The error may indicate that a managed server does not support an operation requested by its control program, perhaps because of version incompatibility. For further details, turn on tracing and re-execute the failing operation. If the error persists, and does not occur as part of a "soft" error condition as noted in the trace file, contact Worldwide Customer Support.

NMP-00003: bad SNMP variable value

Cause: The SNMP program interface received a variable value which has an unsupported data type. This error may occur if a standard SNMP network monitor is sending requests to an Oracle service through an SNMP-to-TNS gateway, and that service cannot understand the requests.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

NMP-00004: SNMP variable is read only

Cause: The user attempted to change a variable value at a remote server, and that variable is read-only. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Read-only variables may never be modified.

NMP-00005: general SNMP error

Cause: an SNMP error occurred which did not fall under the heading of any other more specific error condition. This error may occur if a standard SNMP network monitor is sending requests to an Oracle service through an SNMP-to-TNS gateway, and that service cannot understand the requests.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

NMP-00006: uninitialized SNMP context

Cause: An internal function attempted to use an uninitialized SNMP handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NMP-00007: I/O failure

Cause: The SNMP program interface attempted to send or receive an SNMP request and was unable to do so because of a network failure of some sort. This error is usually displayed underneath an error which describes the problem in more detail.

The problem typically occurs when a control program is attempting to communicate with a service and either that service has unexpectedly terminated or the network path between the control program and the service has been interrupted.

Action: n/a

NMP-00008: SNMP message has incorrect version, version 0 is required

Cause: The SNMP program interface received a protocol request with an illegal version number. This error may occur if a standard SNMP network monitor is sending malformed requests to an Oracle service through an SNMP-to-TNS gateway.

Action: Ensure that the management platform in question is sending SNMP requests with the correct version number. If the error persists, and occurs when an Oracle control program sends requests to an Oracle service, contact Worldwide Customer Support.

NMP-00009: SNMP initialization failure

Cause: The SNMP program interface could not be initialized, either because its error message file could not be found, or because there is a malformed snmp.communities parameter value in the parameter table.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations. Turn on tracing and look for parameter table load errors.

NMP-00010: memory exhausted

Cause: The program interface has run out of memory.

Action: Add more memory or run fewer processes.

NMP-00011: internal SNMP program interface error

Cause: An internal error occurred inside the SNMP program interface. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00001 to NNC-00501

NNC-00001: maximum number of connections already open

Cause: All available name service connections are handling requests.

Action: If the problem occurs when running a name server, increase the values of `names.max_open_connections`. If the problem occurs in a client program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00002: error listening on stream <varname>string</varname>

Cause: The name server was asked to listen on the specified address, and failed, probably because the address is malformed, or because it uses a SQL*Net protocol adaptor which has not been installed.

Action: Make sure the address is properly formed, and that it uses a protocol adaptor which has been installed on your system.

NNC-00003: error opening stream <varname>string</varname>

Cause: A name server or client program attempted to open a connection to another server and failed, either because the server is down, or because the network path to that server is not working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Make sure that the server being connected to is listening on the address used, and that there is network connectivity between the two end-points.

NNC-00004: connection is broken

Cause: The connection from a name server or client program to another server has been broken, either because that server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

NNC-00005: cannot initialization stream subsystem

Cause: The name service stream subsystem could not be started, probably because of a missing TNS error message file.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NNC-00050: message format error

Cause: A corrupted name server message was received by a name server or the name server program interface.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00051: message content error

Cause: A corrupted name server message was received by a name server or the name server program interface.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00052: client and server protocol versions are incompatible

Cause: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

Action: upgrade older client and server software so it is compatible with newer software.

NNC-00053: ASN.1 error encountered while sending or receiving message

Cause: The name server or the name server program interface attempted to send or receive a message and failed because of an ASN.1 error.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00400: memory exhausted

Cause: The program interface has run out of memory.

Action: Add more memory or run fewer processes.

NNC-00401: program interface initialization failed

Cause: The name server program interface could not be initialised, probably because of a missing TNS or name server error message file.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NNC-00402: program interface de-initialization failed

Cause: An internal error occurred while the name server program interface was being de-initialised by an internal function.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00403: program interface has not been initialised

Cause: An internal function has attempted to de-initialise the name service program interface when it has not yet been initialised.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00404: supplied buffer of size <varname>string</varname> is smaller than minimum size <varname>string</varname>

Cause: A caller supplied the name server program interface with a memory buffer too small for the interface's requirements. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00405: network failure

Cause: The network connection between the client program and the name server has failed, either because the server has shut down, or because the network path to the server has stopped working. This error is usually displayed underneath an error which describes the problem in more detail.

Action: Contact your name server administrator to make sure that the server being connected to is running and listening on the address used, and that there is network connectivity between the two end-points.

NNC-00406: name "<varname>string</varname>" does not exist

Cause: The user asked for information associated with a global name that does not exist.

Action: Re-try the failing operation with a global name that exists.

NNC-00407: alias loop in name request

Cause: The name service detected an "alias loop" when trying to retrieve information associated with a global name. An alias loop occurs when an alias name X points to another alias name Y, which in turn points back to X, rather than eventually to a global name which contains data.

Action: Contact your name server administrator to have the alias loop investigated and fixed.

NNC-00408: name "<varname>string</varname>" exists but desired data does not

Cause: The user asked for information associated with a global name. The name in question exists, but does not contain the desired type of information.

Action: Re-try the failing operation with a type which the desired name does contain.

NNC-00409: temporary name service failure

Cause: There are no name servers available to handle a client request, or a name server was temporarily unable to handle a client request. This situation is almost always temporary, and occurs when the program interface has issued a name server request and not received a timely response from any of its preferred servers. Such delays can occur due to transient network or name server outages or heavy load.

Action: Re-try the failing operation. If the error persists, make sure there is network connectivity between the client and its preferred name servers, and contact your name server administrator to make sure that those name servers are running.

NNC-00410: invalid preferred server address list

Cause: The names.preferred_servers parameter in sqlnet.ora is malformed.

Action: Make sure the address list is properly formatted.

NNC-00411: invalid default domain name "<varname>string</varname>"

Cause: The names.default_domain parameter in sqlnet.ora is invalid.

Action: Make sure the parameter value is a valid global name. See your documentation for the characters which may be used in a global name.

NNC-00412: invalid name "<varname>string</varname>"

Cause: The name server program interface was given an invalid global name to process.

Action: Supply a valid domain name. If the error is caused by an internal function, contact Worldwide Customer Support.

NNC-00413: general failure

Cause: A name server program interface error occurred which did not fall under the heading of any other more specific error condition. The error will usually be followed by more specific lower-level information.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00414: invalid name-value binding string "<varname>string</varname>"

Cause: A caller provided the name server program interface with an invalid name-value binding string value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid name-value binding string argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00415: section identifier <varname>string</varname> is invalid, must be between <varname>string</varname> and <varname>string</varname>

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00416: user callback function returned error number <varname>string</varname>

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00417: name "<varname>string</varname>" already exists

Cause: A caller has attempted to create a new global name, and that name already exists.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that does not already exist. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00418: name "<varname>string</varname>" cannot be modified because it has children

Cause: A caller has attempted to delete or rename a global name, and that name cannot be modified because it has child names underneath it in the name space.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a name that is a leaf node. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00419: authoritative server is unreachable

Cause: A name server request cannot be processed because the server which received the operation does not own the name specified in the request and cannot locate the server which does own the name. The error is almost always transient, and occurs either because the path between the server receiving the request and the request's final destination has been interrupted, or because the final destination is down.

Action: Not normally visible to the user, except when using the name server control program. Because the error is typically a transient one, retrying the failing operation will usually work. If the failure persists, the name server which is allowed to process the failing operation is probably shut down or unreachable. Contact your name server administrator to make sure that your site's name servers are running, and are properly configured.

NNC-00420: operation not allowed

Cause: A name server request cannot be processed because the server which received the operation is not allowed to process it. The problem typically occurs when an administrator has disabled request processing at a particular server for some reason.

Action: Contact your name server administrator to determine why server request processing has been disabled.

NNC-00421: invalid modification directive <varname>string</varname>, must be between <varname>string</varname> and <varname>string</varname>

Cause: An internal function has called the name server program interface with illegal arguments.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00422: invalid data type name "<varname>string</varname>"

Cause: A caller has provided an invalid data type name to the name server program interface.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00423: invalid data item syntax code <varname>string</varname>

Cause: A caller has provided an invalid data type code to the name server program interface.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid type name. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00424: invalid address "<varname>string</varname>"

Cause: A caller provided the name server program interface with an invalid address value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid address argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00425: meta-data violation

Cause: A caller issued a name server modification request and that request cannot be processed because it would violate data type meta-data constraints.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, examine the meta-data constraints for the data type being operated upon and don't violate them. Examples of typical constraint violations are attempts to add a new data item to a name which already contains alias information, or attempts to add alias information to a name which already contains other data, or attempts to replace a data item with another item that has the wrong syntax. If the error occurs outside the control program, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00426: no such data type

Cause: A caller attempted to create a data item, and could not because the data item's type does not exist.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the operation with an existent data type. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00427: server does not support this version of the protocol

Cause: A name server message with an incompatible protocol version was received by a name server or the name server program interface. This problem will occur when there are clients and servers with widely varying protocol versions that are trying to communicate.

Action: upgrade older client and server software so it is compatible with newer software.

NNC-00428: invalid meta-data data item

Cause: A caller provided the name server program interface with an invalid meta-data data item.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid meta-data argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00429: invalid octet string literal "<varname>string</varname>"

Cause: A caller provided the name server program interface with an invalid octet string value.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, retry the failing operation with a valid octet string argument. Otherwise, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNC-00430: Database not accessible

Cause: When a database is used for consistency between different nameservers, any modify operation should not only modify the cache but also the database. And if the database is not accessible, this error occurs.

Action: Not normally visible to the user, except when using the name server control program. If the error occurs when using the control program, make sure database is available and then re-execute the operation. If error persists, contact Worldwide Customer Support.

NNC-00431: NS address does not match any of the current addresses

Cause: When delegating a domain, the address of the Nameserver is provided by the client. If the nameserver already exists, then it already has address(es) associated with it. So, the address supplied by the client must match one of them. Otherwise, this error occurs.

Action: Not normally visible to the user, except when using name server control program. If the error occurs when using the control program, either provide an one of the existing addresses of the name server or delegate the domain to a new nameserver.

NNC-00500: warning: "<varname>string</varname>" parameter value is illegal, setting to <varname>string</varname>

Cause: The named parameter value is invalid.

Action: Make sure the parameter value is formatted correctly. Valid choices for boolean parameter values are TRUE, FALSE, YES, NO, ON, and OFF.

NNC-00501: warning: "<varname>string</varname>" parameter value must be between <varname>number</varname> and <varname>number</varname>, setting to <varname>number</varname>

Cause: The named parameter value is invalid or outside legal boundary values.

Action: Make sure the parameter value is a number, and falls between valid minimum and maximum values, as specified in the error text.

NNF-00001 to NNF-04009

NNF-00001: Not a TNS address

Cause: While asking to read an address the name service returned a record which was not an address.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00002: Invalid value passed to function call

Cause: An invalid value was passed to an interface function.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00003: Naming adapter <varname>string</varname> does not exist

Cause: The requested name service adapter was not found in the current adapter table.

Action: Check the spelling of the adapter requested. Verify that the adapter runs on this platform, and the adapter is compiled into the adapter table linked into the executable.

NNF-00004: Operation not supported in <varname>string</varname>

Cause: The operation requested is not supported under this adapter.

Action: Verify that the operation being performed is not under restriction, such as writing to read-only name service. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-00005: Functionality not implemented

Cause: The operation requested is not supported in this implementation.

Action: If this is retrieved from a production release, contact Worldwide Customer Support. Otherwise, check the release notes as to the restrictions in this release.

NNF-00110: no values exist

Cause: Test program help text.

Action: None

NNF-00540: Failed to insert name: <varname>string</varname>

Cause: Failed to insert name into the native service.

Action: Verify that the name is not already in the native namespace and the appropriate access permissions are set for the namespace.

NNF-01001: ds_initialize: workspace initialization failed

Cause: The DCE workspace as setup by ds_initialize() failed to initialize.

Action: Verify that conditions necessary for a successful `ds_initialize()` call are present on this platform (e.g. is there enough memory?). Check that there is not another workspace user in this program. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01002: DCE could not open configuration file

Cause: A DCE call returned an error that it could not access its configuration file.

Action: Check that the DCE configuration file for this platform is present, and accessible. On Unix this file is `dce_cf.db`. Check if a simple call to `dce_cf_get_cell_name()` succeeds.

NNF-01003: DCE could not find cell name

Cause: A DCE call returned an error that it could not find the cell name in its configuration file.

Action: Check that this machine has been configured for a DCE cell. Check that the DCE configuration file is not corrupted. On Unix, this file is `dce_cf.db`. Check if a simple call to `dce_cf_get_cell_name()` succeeds.

NNF-01004: DCE returned unspecified error <varname>string</varname>

Cause: A DCE call returned an status that was not in this implementation's list of possible status values for this DCE call.

Action: Verify that this platform's DCE release is not beyond those supported by this Oracle application. If the error persists, contact Worldwide Customer Support.

NNF-01005: Internal XOM class violation

Cause: A DCE XOM call returned statuses inconsistent with the class definitions in the DCE documentation.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01006: Attribute <varname>string</varname> not available

Cause: A insertion call attempted to use an attribute which did not have a translation to a DCE attribute.

Action: Use another attribute, or insert the translation into DCE.

NNF-01007: DCE long strings are not supported

Cause: A query returned a object which has a XOM `OM_S_LONG_STRING`. The current implementation does not support such objects.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-01008: XDS attribute syntax <varname>string</varname> incorrect for Oracle Names syntax <varname>string</varname>

Cause: The syntax as specified in the XDS object is different than that which is expected for the given Oracle names syntax.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNF-02001: NIS client error string: <varname>string</varname>

Cause: A call to an NIS (YP) function failed. This message contains the text of the NIS error code returned.

Action: Should only be visible when returned as part of another error. If the error persists, contact Worldwide Customer Support.

NNF-02002: NIS value does not conform to adapter schema: <varname>string</varname>

Cause: The values in the maps used by the NIS adapter must conform to a specific set of internal formatting rules. This value returned did not conform to those rules.

Action: Should not be visible, unless you are attempting to create your own maps. If the error persists, contact Worldwide Customer Support.

NNF-02003: Unknown NIS error code: <varname>string</varname>

Cause: An error code returned by a NIS (YP) function was not in the list expected by this program.

Action: Verify that the error is generated by the YP functions on this platform. Notify Worldwide Customer Support of the error.

NNF-02004: NIS map <varname>string</varname> does not exist

Cause: The requested attribute does not exist.

Action: For an unused attribute, no action is required, as this is the expected error. Otherwise, add the attribute and reload the NIS (YP) maps.

NNF-02005: NIS key <varname>string</varname> does not exist in map <varname>string</varname>

Cause: The requested name was not found.

Action: For an unused name, no action is required, as this is the expected error. Otherwise, add the name to the map and reload the NIS (YP) maps.

NNF-03002: Unknown BIND error code: <varname>string</varname>

Cause: The return code in the BIND (DNS) query response did not conform to those values listed in RFC 1035.

Action: Verify that the error is generated by the BIND functions on this platform. Notify Worldwide Customer Support of the error.

NNF-03003: Format error parsing server response

Cause: The query response packet returned from the BIND (DNS) API did not conform to the format listed in RFC 1035.

Action: Verify that the error is generated by the BIND functions on this platform. Notify Worldwide Customer Support of the error.

NNF-03004: DNS Class mismatch (<varname>string</varname>)

Cause: The query response packet returned a class different from the ones expected by the interface.

Action: Verify that the error is generated by the BIND functions on this platform. Notify Worldwide Customer Support of the error.

NNF-04000: File succesfully converted

Cause: The requested conversion is performed.

Action: Normal condition, no action necessary.

NNF-04001: Error converting input file

Cause: The input file contains lines that cannot be converted by the conversion program.

Action: Check that the syntax of the input file is correct.

NNF-04002: Outputfile already exists

Cause: An old output file already exists in the current directory

Action: Remove the existing file, and restart the conversion tool

NNF-04003: Entry in inputfile is too long

Cause: The makedbm program, limits entries in mapfiles to 1017 characters. Therefor, the conversion tool will not process TNS addresses which are longer than 1017 characters.

Action: Shorten the offending entry.

NNF-04004: Invalid string in inputfile

Cause: the input file contains invalid lines.

Action: Check that the syntax of the input file is correct.

NNF-04005: Cannot open inputfile

Cause: The specified input file could not be found.

Action: restart the conversion tool with the correct input file.

NNF-04006: Could not create outputfile

Cause: An output file could not be created in the current working directory

Action: Change the permissions of the current directory and restart the conversion tool.

NNF-04007: Error reading input file

Cause: A problem while reading the input file. This could be caused by an unexpected end of file in the input file.

Action: Check that the file is intact and that the syntax of the input file is correct.

NNF-04008: Error writing outputfile

Cause: An error occured while writing to the output file.

Action: Check available disk space. If the error persists, contact Worldwide Customer Support.

NNF-04009: Usage: tns2nis <varname>filename</varname>

Cause: The conversion tool was not invoked properly. The filename should either be tnsnames.ora or native.ora

Action: Restart the conversion tool with the proper parameter.

NNL-00001 to NNL-01078

NNL-00001: request argument "<varname>string</varname>" is invalid

Cause: The user entered an invalid request command argument.

Action: Supply a valid argument.

NNL-00002: request argument "<varname>string</varname>" is not allowed with this operation

Cause: The user entered a request command argument which is not valid with the particular request command.

Action: Supply a valid argument.

NNL-00003: memory exhausted

Cause: The program has run out of memory

Action: Check the amount of available memory on your machine to ensure that there is enough memory to run this executable. If necessary, free up memory by running fewer programs, then try again.

NNL-00004: invalid command argument "<varname>string</varname>"

Cause: The user entered an invalid command argument.

Action: Supply a valid argument.

NNL-00005: no server has been set. Use the "SET SERVER" command first

Cause: The user attempted to issue a command which requires that a default managed Oracle Names server be set first.

Action: Use the SET SERVER command to set your default server, then reissue the command. Alternatively, if the command allows, re-issue it with a specific server name so the control program does not need to use the default.

NNL-00006: timeout, server is not responding

Cause: The control program issued a request to an Oracle Names server and no response arrived in a timely fashion. The network connection between the control program and the server may be faulty, the server may be very heavily loaded, or there may be substantial network delays between the control program and the server. The latter is especially true for WAN links.

Action: Reissue the command; if it continues to fail, check to see that the server being managed is running correctly and that the network connection between the server and the control program is working correctly.

NNL-00007: server responded with an error

Cause: The control program issued a request to an Oracle Names server and the server responded with an error.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNL-00008: request not understood by server

Cause: The control program issued a request to an Oracle Names server and the server did not understand the request.

Action: If the server and the control program have different versions, they may be unable to communicate. Check your documentation for version compatibility constraints. If the server and control program are compatible, turn on tracing for further details, and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNL-00009: encryption of server password failed

Cause: The control program attempted and failed to encrypt a server password, supplied either through the SET PASSWORD command or the namesctl.server_password configuration parameter.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00010: error getting address for server "<varname>string</varname>"

Cause: The control program attempted to translate a server name to its corresponding address, and failed. There are a large number of possible causes for the failure. The control program's SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. If the user has changed managed servers with the SET SERVER command, the new server must be running, and must be able to resolve the address or forward the request to another server which can resolve the address. Alternatively, a TNSNAMES.ORA file with valid name server names and addresses must exist in the correct system-specific location.

Action: For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NNL-00011: no server with name "<varname>string</varname>" exists

Cause: The user issued a SET SERVER request and the current managed Oracle Names server was unable to translate that name into an address. Alternatively, the user issued a control program request to a specific server, and that server's name could not be translated into an address. Both problems are almost always caused by mis-typing the server name.

Action: Re-issue the request with a valid server name.

NNL-00012: invalid "<varname>string</varname>" value "<varname>string</varname>"

Cause: The first argument is a data type, the second is a value. The user supplied an invalid data value of the specified type.

Action: Re-issue the failing operation with correct data.

NNL-00013: not performed, permission denied for supplied password

Cause: The user issued a request to an Oracle Names server, and the password supplied with the request was incorrect.

Action: Check to see that the password sent by the control program to the server is correct for that server. You can set a new password with the SET PASSWORD control program command.

NNL-00014: unknown data type "<varname>string</varname>"

Cause: The user issued a name server request which contained an unknown data type.

Action: It is possible that the server had no information on the type, but automatically fetched it in response to the failing request. Re-issue the failing request; if the server has in the meantime fetched the appropriate data type information, the error will go away. If the error persists, the data type is probably invalid.

NNL-00015: type "<varname>string</varname>" has "<varname>string</varname>" syntax, which has no textual representation

Cause: Not all data type syntaxes can be represented as text. This message indicates that the user issued a name server request for a type with a non-textual representation.

Action: Re-issue the operation with a data type that has a syntax with a textual representation.

NNL-00016: cannot start server, error getting program directory's name

Cause: The user issued a STARTUP request, but the control program was unable to start the server because it was unable to find the name of the directory where the server executable resides.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00017: cannot start server, program "<varname>string</varname>" does not exist

Cause: The user issued a STARTUP request, but the control program was unable to start the server because it was unable to find the server executable.

Action: Make sure that a copy of the server executable exists in your system's oracle executable directory.

NNL-00018: warning: could not contact default name server

Cause: The control program was unable to contact its default name server during startup. There are a number of possible causes for this error. The control program's SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. The first server in the preferred-server list must be running, and there must be network connectivity between the control program and that server.

Action: Check to see that all of the above are true. If the control program is still unable to contact its default server, turn on tracing and restart the control program. If the error persists, contact Worldwide Customer Support.

NNL-00019: warning: server either changed or ignored your request

Cause: The user issued a request to an Oracle Names server and that request was altered in some way. Typically the user specified an invalid argument of some sort, and the server either ignored the request, or replaced the invalid argument with a reasonable default.

Action: Use the control program to check the current state of the value that you attempted to change. The server's log file may also contain information about the exact cause of the problem. Re-issue the operation with correct arguments.

NNL-00020: warning: no TNSNAMES.ORA file and no preferred name servers in SQLNET.ORA

Cause: The control program was unable to find a TNSNAMES.ORA file and was unable to find a default name server in SQLNET.ORA. The control program will operate in this state, but will be unable to resolve any names until a default server has been set, and that server must be set using its raw TNS address.

Action: The control program's SQLNET.ORA file must exist in the correct system-specific location, and must be readable by the control program. The file must contain a names.preferred_servers entry with valid name server addresses. The first server in the preferred-server list must be running, and there must be network connectivity between the control program and that server. Alternatively, a TNSNAMES.ORA file with valid name server information must exist in the correct system-specific location.

NNL-00022: error changing trace level from <varname>string</varname> to <varname>string</varname>, level change ignored

Cause: The user attempted to change the control program's local trace level, and the program encountered an error while changing the level. Usually the problem is that tracing was enabled for the first time (by changing the trace level from OFF to something else) and the trace file is not writeable by the control program.

Action: Check to see that the trace file is writeable. Your documentation will tell you the name of the trace file.

NNL-00023: SET command is missing an argument

Cause: The user attempted to issue a SET command with no argument.

Action: Supply a valid argument to the SET command.

NNL-00024: warning: no preferred name servers in SQLNET.ORA

Cause: The control program was unable to find any preferred name servers in SQLNET.ORA, and will therefore not connect to a default server.

Action: Make sure that the SQLNET.ORA file contains a valid names.preferred_servers entry.

NNL-00035: File <varname>string</varname> or nested IFILEs not found.

Cause: Error in loading from the tnsfile.

Action: None

NNL-00036: No records loaded

Cause: No loadable data.

Action: None

NNL-00037: Error <varname>number</varname> while sequencing through parameter table.

Cause: The NL Parameter system reported an error while retrieving the next name from the table.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00038: Distinguished Name syntax error

Cause: Distinguished Name incorrectly specified.

Action: Supply a valid DN.

NNL-00039: no RRs

Cause: Object has no relevant RRs to be mapped to LDAP objects.

Action: None

NNL-00040: Distinguished Name exceeds buffer length: <varname>string</varname>

Cause: Distinguished Name derived from Domain Name is too long.

Action: Either move the object to a domain whose name is shorter or manually update the LDAP object.

NNL-00041: Object <varname>string</varname> not in domain <varname>string</varname>

Cause: Object has no relevant RRs to be mapped to LDAP objects.

Action: None

NNL-00042: LDAP bind failure: <varname>number</varname>, <varname>string</varname>

Cause: Call to ldap_bind failed with return set to given number.

Action: Correct user/pwd parameters or definitions.

NNL-00043: LDAP open failure

Cause: LDAP server could not be contacted.

Action: Correct connect info or server unavailability.

NNL-00044: Unsupported data type <varname>string</varname> not mapped

Cause: ONames data type could not be mapped to LDAP attributes

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNL-00045: No host given for LDAP server

Cause: LDAP open will dump core without a host.

Action: Provide appropriate host with '-h' option.

NNL-00046: Name <varname>string</varname> exceeds DN template depth

Cause: There are more domains in the name than are specified in the DN template.

Action: Add fields to the template or migrate subdomains with separate dump operations.

NNL-00047: LDAP modify returned error: 0x<varname>number</varname>, <varname>string</varname>

Cause: LDAP failed with the return code shown.

Action: Refer to LDAP documentation for the meaning of the error.

NNL-00048: Error opening file: <varname>string</varname>

Cause: Named file cannot be opened.

Action: Provide for access to file.

NNL-00049: Output in <varname>string</varname> cannot be renamed to <varname>string</varname>

Cause: The given file cannot be created.

Action: Insure that the file specified can be created before running the command. Or use the temporary file itself.

NNL-00201: Shutdown occurs in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00202: No shutdown currently scheduled

Cause: Control program general message.

Action: None

NNL-00203: Scheduled shutdown to occur in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00204: Cancelled shutdown

Cause: Control program general message.

Action: None

NNL-00205: Reload check occurs in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00206: No reload check currently scheduled

Cause: Control program general message.

Action: None

NNL-00207: Scheduled reload check to occur in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00208: Cancelled reload check

Cause: Control program general message.

Action: None

NNL-00209: Cache checkpoint interval is currently <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00210: Cache checkpointing is currently disabled

Cause: Control program general message.

Action: None

NNL-00211: Cache checkpoint interval is now <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00212: Cache checkpointing is now disabled

Cause: Control program general message.

Action: None

NNL-00213: No entry with specified index number, try "SHOW SYSTEM_QUERIES"

Cause: Control program general message.

Action: None

NNL-00214: Next auto-refresh for specified index number occurs in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00215: Scheduled specified index number's next auto-refresh to occur in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00216: Disabled auto-refresh for specified index number

Cause: Control program general message.

Action: None

NNL-00217: Controller is sleeping for <varname>number</varname> seconds

Cause: Control program general message.

Action: None

NNL-00218: Ignoring spurious trailing text "<varname>string</varname>"

Cause: Control program general message.

Action: None

NNL-00219: Statistic counter logging interval is currently <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00220: Statistic counter logging is currently disabled

Cause: Control program general message.

Action: None

NNL-00221: Statistic counter logging interval is now <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00222: Statistic counter logging is now disabled

Cause: Control program general message.

Action: None

NNL-00223: Statistic counters are next logged in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00224: Scheduled statistic counters to be logged in <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00225: Currently managing name server "<varname>string</varname>"

Cause: Control program general message.

Action: None

NNL-00226: Current request-processing delay is <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00227: Request-processing delay is currently disabled

Cause: Control program general message.

Action: None

NNL-00228: Request-processing delay is now <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00229: Request-processing delay is now disabled

Cause: Control program general message.

Action: None

NNL-00230: Controller NOCONFIRM mode is currently <varname>string</varname>

Cause: Control program general message.

Action: None

NNL-00231: Controller NOCONFIRM mode is now <varname>string</varname>
Cause: Control program general message.

Action: None

NNL-00232: Auto-refresh failure-retry interval is currently <varname>string</varname>
Cause: Control program general message.

Action: None

NNL-00233: Auto-refresh failure-retry interval is now <varname>string</varname>
Cause: Control program general message.

Action: None

NNL-00234: Auto-refresh failure-retry expiration period is currently <varname>string</varname>
Cause: Control program general message.

Action: None

NNL-00235: Auto-refresh failure-retry expiration period is now <varname>string</varname>
Cause: Control program general message.

Action: None

NNL-00236: Statistic counter reset interval is currently <varname>string</varname>
Cause: Control program general message.

Action: None

NNL-00237: Resetting of statistic counters is currently disabled
Cause: Control program general message.

Action: None

NNL-00238: Statistic counter reset interval is now <varname>string</varname>
Cause: Control program general message.

Action: None

NNL-00239: Resetting of statistic counters is now disabled
Cause: Control program general message.

Action: None

NNL-00240: Starting "<varname>string</varname>"...
Cause: Control program general message.

NNL-00516: Displays complete server status

Cause: Control program help text.

Action: None

NNL-00517: Insert-replaces a data item under an existing name

Cause: Control program help text.

Action: None

NNL-00518: Shows or sets the maximum number of times a server can reforward a request

Cause: Control program help text.

Action: None

NNL-00519: Shows, enables, or disables modification request processing

Cause: Control program help text.

Action: None

NNL-00520: Changes an existing name's TTL

Cause: Control program help text.

Action: None

NNL-00521: Shows or sets the server's system query forwarding requirements

Cause: Control program help text.

Action: None

NNL-00522: Removes a data item from a name by value or by type

Cause: Control program help text.

Action: None

NNL-00523: Renames an existing name

Cause: Control program help text.

Action: None

NNL-00524: Replaces a data item with another data item

Cause: Control program help text.

Action: None

NNL-00525: Shows or sets the server's default-forwarding status

Cause: Control program help text.

Action: None

NNL-00526: Starts a server using a non-standard executable and optional arguments

Cause: Control program help text.

Action: None

NNL-00527: Shows, sets, or cancels the time when the server next checkpoints its cache

Cause: Control program help text.

Action: None

NNL-00528: [set] password <varname>password</varname> : set the password for subsequent calls

Cause: Control program help text.

Action: None

NNL-00529: set|show default_domain [<domain_name>] : set|show the current default domain

Cause: Control program help text.

Action: None

NNL-00530: quit|exit : exit the names control program

Cause: Control program help text.

Action: None

NNL-00531: flush_name <varname>name</varname> :\nremoves a name from caches along a route to an authoritative server

Cause: Control program help text.

Action: None

NNL-00532: set|show forwarding_available [<on|off>] [<server_list>] :\nenable, disable or show server request forwarding

Cause: Control program help text.

Action: None

NNL-00533: ping [<server_list>] : ping one or more Names servers

Cause: Control program help text.

Action: None

NNL-00534: query <varname>name</varname> [<varname>type</varname>] :
query for a desired name and RR type

Cause: Control program help text.

Action: None

NNL-00535: reload [<server_list>] : reload server cache data if there are changes

Cause: Control program help text.

Action: None

NNL-00536: set|show requests_enabled [<on|off>] [<server_list>] : enable, disable or show server request processing

Cause: Control program help text.

Action: None

NNL-00537: set|show server [<server_name>] : set|show the currently managed server

Cause: Control program help text.

Action: None

NNL-00538: stop|shutdown [<server_list>] : stop one or more Names servers

Cause: Control program help text.

Action: None

NNL-00539: start|startup [<varname>args</varname>] : start the Names server with optional arguments

Cause: Control program help text.

Action: None

NNL-00540: [show] status [<server_list>] : display server status summary

Cause: Control program help text.

Action: None

NNL-00541: set|show trace_level [<varname>level</varname>] [<server_list>] : set|show the server's tracing level

Cause: Control program help text.

Action: None

NNL-00542: restart [<server_list>] : restart one or more Names servers

Cause: Control program help text.

Action: None

NNL-00543: [show] version [<server_list>] : show the name and version of one or more Names servers

Cause: Control program help text.

Action: None

NNL-00544: Displays operations statistics

Cause: Control program help text.

Action: None

NNL-00545: Displays query request statistics

Cause: Control program help text.

NNL-01078: Access/Create File Error : <varname>string</varname>

Cause: Failed to access/create named file or its backup File due to incorrect permissions

Action: Provide correct access to file.

NNO-00050 to NNO-00854

NNO-00050: serious errors in configuration data, server cannot run

Cause: The server's configuration data has a problem of some sort which prevents the server from starting.

Action: Previous error messages in the log file will specify the exact problems leading to the shutdown. The problem most frequently occurs when the network is broken up into multiple administrative regions and the delegation points are incorrect. Read the Oracle Names documentation sections on region delegation and ensure that their directions are being followed correctly.

NNO-00051: domain count <varname>number</varname> exceeds maximum of <varname>number</varname>, first <varname>number</varname> will be loaded

Cause: The server's configuration contains more domains than the server can support.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00052: invalid domain description list

Cause: The server's configuration contains an invalid domain description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00053: duplicate domain description for domain "<varname>string</varname>"

Cause: The server's configuration contains duplicate domain descriptions in the domain description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00054: invalid domain name "<varname>string</varname>"

Cause: The server's configuration contains a domain description with an invalid name.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00055: invalid domain minimum TTL "<varname>string</varname>"

Cause: The server's configuration contains a domain description with an invalid minimum TTL.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00056: warning: domain minimum TTL must be between <varname>number</varname> and <varname>number</varname>, set to <varname>number</varname> seconds

Cause: The server's configuration contains a domain description with an invalid minimum TTL. This error is not fatal; the server will automatically set the TTL to a default value which is suitable for most uses.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00057: loading and verifying topology data

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00058: cannot load topology data from configuration database

Cause: An error was encountered while trying to load the server's topology data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the `names.no_region_database` parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00059: cannot construct topology checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00060: loading server topology from checkpoint file "<varname>string</varname>"

Cause: An informational message written to the log file when the server has been forced to load from its most recent topology checkpoint file, by setting the `names.no_region_database` parameter to TRUE.

Action: None

NNO-00061: loading data for domain "<varname>string</varname>"

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00062: cannot load domain data from configuration database

Cause: An error was encountered while trying to load the server's domain data from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the

names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00063: cannot construct domain checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00064: loading domain data from checkpoint file "<varname>string</varname>"

Cause: An informational message written to the log file when the server has been forced to load from its most recent domain checkpoint file, by setting the names.no_region_database parameter to TRUE.

Action: None

NNO-00065: loading cached data from checkpoint file "<varname>string</varname>"

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00066: server will perform reload check of administrative region in <varname>number</varname> seconds

Cause: An informational message written to the log file whenever the Oracle Network Manager or the Oracle Names control program send a reload request to the server.

Action: None

NNO-00067: server reload check countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a reload request previously sent to the server

Action: None

NNO-00068: warning: administrative region check failed, next check in <varname>number</varname> seconds

Cause: this warning is issued whenever the server fails to connect to the configuration database to see if any configuration data has changed. The server will automatically begin reissuing reload checks more frequently, and will eventually give up if connections fail continuously for three days.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database.

NNO-00069: warning: too many administrative region check failures, checking disabled

Cause: a warning issued whenever the server has continuously failed for three days in its attempts to connect to the configuration database. The server disables reload checking. Reload checking can later be re-enabled from the Oracle Network Manager or the Oracle Names control program.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net

connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the `names.no_region_database` parameter set to `TRUE`. If no checkpoint data is available, the server will shut down.

NNO-00070: administrative region has changed, reloading domain data

Cause: An informational message written to the log file whenever the server's configuration has changed, and the server is reloading the new configuration from the configuration database.

Action: None

NNO-00071: cannot construct cache checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00072: loading from region database

Cause: normal

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00073: loading server config from region database

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00074: downloading region from server <varname>string</varname>

Cause: An informational message written to the log file during normal server startup.

Action: None

NNO-00080: domain "<varname>string</varname>" cannot be delegated because its parent is already delegated

Cause: an internal delegation error has occurred. Delegation is controlled by the Oracle Network Manager, which enforces correct delegation rules.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00081: domain "<varname>string</varname>" has no name servers

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00082: domain "<varname>string</varname>" is missing my name "<varname>string</varname>" as a name server

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00083: domain "<varname>string</varname>" server "<varname>string</varname>" has no addresses

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00084: domain "<varname>string</varname>" is not in the authoritative domain list

Cause: an internal configuration error has occurred. The Oracle Network Manager is responsible for configuring Oracle Names servers correctly.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00104: line <varname>string</varname>: syntax error, data ignored

Cause: the server found a syntax error its domain data. This message will also appear if the server's internal checkpoint files become corrupted. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00105: line <varname>string</varname>: invalid name "<varname>string</varname>", data ignored

Cause: the server found an invalid global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00106: line <varname>string</varname>: invalid TTL "<varname>string</varname>", data ignored

Cause: the server found an invalid TTL in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00107: line <varname>string</varname>: ignoring stale checkpoint data

Cause: an informational message which appears during server startup when the server detects out-of-date cached data in its cache checkpoint file. The message is part of normal server startup.

Action: None

NNO-00108: line <varname>number</varname>: TTL of <varname>number</varname> seconds below domain minimum <varname>number</varname>, using minimum

Cause: the server found an invalid TTL value in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00109: line <varname>string</varname>: invalid data type name
"<varname>string</varname>", data ignored**

Cause: the server found an invalid data type name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00110: line <varname>string</varname>: unknown data type
"<varname>string</varname>", data ignored**

Cause: the server found an unknown data type in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00111: line <varname>string</varname>: data type "<varname>string</varname>" has syntax "<varname>string</varname>", should be
"<varname>string</varname>", data ignored**

Cause: the server found an invalid data type syntax in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00112: line <varname>string</varname>: ignored duplicate data of type
"<varname>string</varname>"**

Cause: the server found a duplicate record in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00113: line <varname>string</varname>: alias data already exists, all other
data ignored**

Cause: the server found a alias and non-alias data with the same global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

**NNO-00114: line <varname>string</varname>: other data exists, alias data
ignored**

Cause: the server found a alias and non-alias data with the same global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00115: line <varname>string</varname>: single-value data type "<varname>string</varname>", other instances ignored

Cause: the server found more than one record with the same name and type, when the type allows only a single record with a particular name. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00116: warning: data type "<varname>string</varname>" in <varname>string</varname> load

Cause: the server found a record with an invalid data type in its domain data.

Action: No action required; adjustments to data will eliminate warning.

NNO-00117: line <varname>string</varname>: missing data type, data ignored

Cause: the server found a record with a missing data type in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00118: line <varname>string</varname>: data length <varname>string</varname> exceeds maximum of <varname>string</varname>, data ignored

Cause: the server found a record whose length exceeds an internal limit. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00119: line <varname>string</varname>: server not authoritative for name "<varname>string</varname>", data ignored

Cause: the server found a global name in its domain data for which it is not authoritative. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00120: line <varname>string</varname>: topology name "<varname>string</varname>" not allowed here

Cause: the server found an invalid record in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00121: LDIF file <varname>string</varname> open failed: error = <varname>number</varname>

Cause: the server found an invalid record in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00122: invalid name, data ignored: entry:\n<varname>string</varname>

Cause: the server found an invalid global name in its domain data. The record in question is not loaded, but the server continues to load data.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00123: node "<varname>string</varname>" has no authoritative parent, data ignored

Cause: an object in the domain data is apparently not in the domain(s) which the server is authoritative for. The record in question is not loaded, but the server continues to load data.

Action: Check for inconsistencies in the data and correct any errors in topology definition or domain data outside of authoritative domains.

NNO-00150: warning: invalid hint list, no hints loaded

Cause: The server's configuration contains an invalid hint description list. The server will continue to run, but will not load any hints.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00151: warning: ignoring hint for domain "<varname>string</varname>", server is authoritative

Cause: the server's configuration contained a hint for a domain in the server's administrative region. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00152: warning: hint count <varname>number</varname> exceeds maximum of <varname>number</varname>, first <varname>number</varname> will be loaded

Cause: There are too many hints in the server's hint list. The server will load a specified maximum number of hints, ignore the rest, and continue running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00153: warning: hint domain <varname>number</varname> has invalid name "<varname>string</varname>", hint domain ignored

Cause: The server's configuration contains a hint domain with an invalid name. The domain is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00154: warning: hint <varname>number</varname> has invalid server name "<varname>string</varname>", hint ignored

Cause: The server's configuration contains a hint with an invalid server name. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00155: warning: hint <varname>number</varname> has missing address, hint ignored

Cause: The server's configuration contains a hint with no server address. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00156: warning: hint <varname>number</varname> address length <varname>number</varname> exceeds maximum of <varname>number</varname>, hint ignored

Cause: The server's configuration contains a hint whose address length exceeds an internal limit. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00157: warning: hint <varname>number</varname> has invalid address, hint ignored

Cause: The server's configuration contains a hint with an invalid address. The hint is ignored and the server continues to run.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00158: warning: hint domain count <varname>number</varname> exceeds maximum of <varname>number</varname>, first <varname>number</varname> will be loaded

Cause: The server's hint domain list is too long. The server will load a specified maximum number of hint domains, ignore the rest, and continue running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00159: warning: ignoring duplicate hint domain <varname>number</varname> name "<varname>string</varname>"

Cause: The server's hint domain list contains a duplicate domain. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00160: warning: ignoring duplicate hint server "<varname>string</varname>"

Cause: The server's hint server list contains a duplicate server. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00250: invalid administrative region description

Cause: The server encountered an invalid administrative region description during startup. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but

administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00251: missing administrative region parameter <varname>string</varname>

Cause: The server's administrative region description is missing a required parameter. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00252: invalid administrative region parameter <varname>string</varname> value "<varname>string</varname>"

Cause: The server encountered an invalid administrative region parameter. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00253: administrative region parameter <varname>string</varname> length <varname>string</varname> exceeds maximum of <varname>string</varname>

Cause: The server encountered an administrative region parameter whose length exceeds an internal limit. This error will prevent the server from starting. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00254: warning: parameter <varname>string</varname> value must be between <varname>number</varname> and <varname>number</varname>, set to <varname>number</varname> seconds

Cause: The server encountered an administrative region parameter with an invalid value. The value is set to a default suitable for most applications, and the server continues running. The administrative region description is stored in the server's names.ora configuration file.

Action: Make sure that the names.admin_region parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00255: cannot initialize ROS

Cause: The server was unable to initialize ROS during startup. The error prevents the server from running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00256: using administrative region "<varname>string</varname>"

Cause: an informational message which appears during server startup, and notes the name of the administrative region for future diagnostic use by administrators. The message is part of normal server startup.

Action: None

NNO-00257: warning: cannot get serial number from region store

Cause: The server encountered an error while trying to get the configuration database's serial number. The error occurs almost always because time the server is unable to access the configuration database. If the error occurs during server startup, the server will shut down. If the error occurs during server operation (the server checks the serial number periodically to see if it should reload itself), then the server assumes a transient failure has occurred and repeats the operation a short while later. If the repetitions continue to fail for three days, the server will log another error and stop issuing the serial number load operation.

Action: First make sure that the Netadmin program has exported a server configuration for this name server. Next, make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. If the error occurs during server startup, you can force startup anyway, with checkpoint data, by starting the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00258: cannot load configuration from configuration database

Cause: An error was encountered while trying to load the server's configuration from the configuration database. If more information is available, it will appear under this error. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00259: configuration tables have not been installed or are inaccessible

Cause: The configuration database has not been properly installed.

Action: Make sure the Oracle Network Manager and its database have been properly installed

NNO-00260: loading configuration data from checkpoint file "<varname>string</varname>"

Cause: An informational message written to the log file when the server has been forced to load from its most recent configuration checkpoint file, by setting the names.no_region_database parameter to TRUE.

Action: None

NNO-00261: cannot construct configuration checkpoint file name

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00262: warning: cannot write checkpoint file "<varname>string</varname>"

Cause: the server was unable to write the named checkpoint file. This problem is typically due to the file system's protection settings. The error is not fatal; it simply means the server will not create any checkpoint data. Note, however, that if the configuration database is ever unavailable during a future server startup, the lack of checkpoint data means you will be unable to force a startup from checkpoint data with the `names.no_region_database` parameter.

Action: Check to see that the server has permission to write the file named in the error message.

NNO-00263: error from configuration database

Cause: the server encountered an error while accessing the configuration database. The error can occur when the database is unavailable, or SQL*Net connectivity to the database is interrupted.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the `names.no_region_database` parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00264: configuration database query returned no data

Cause: the server attempted to fetch data from the configuration database and no data was found.

Action: The error generally appears underneath a more specific error which will tell you the exact nature of the problem.

NNO-00265: warning: cannot load data from checkpoint file

Cause: the server was started using checkpoint data, and was unable to read that data. The remaining errors below this one on the error stack provide more specific information about the problem.

Action: Check to see that the named file exists and that the server has permission to read it.

NNO-00266: cannot find document "<varname>string</varname>" in configuration database

Cause: The server encountered an error while trying to get its configuration ID from the configuration database. The error can occur any time the server is unable to access the configuration database. This error will cause the server to shut down.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the `names.no_region_database` parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00267: warning: configuration database contains no data for server "<varname>string</varname>"

Cause: the server successfully contacted the configuration database, but was unable to find any configuration information associated with the server's name. The name is specified in the server's names.ora configuration file. The error occurs almost always because the server configuration has not been exported from the Netadmin program.

Action: Make sure that the Netadmin program has exported a server configuration for this name server.

NNO-00268: warning: configuration database is not used, using checkpoint data instead

Cause: An informational message indicating that the server has been started with the names.no_region_database parameter set to TRUE, and that it will use checkpoint data rather than attempting to contact the configuration database.

Action: None

NNO-00269: configuration database is version <varname>string</varname>, server requires at least version <varname>string</varname>

Cause: The server cannot use the specified configuration database because it is of an incorrect version.

Action: Run the document conversion utility supplied with the Network Manager and re-export your network. The conversion utility will upgrade old documents to a version which can be understood by the name server.

NNO-00270: ORACLE error <varname>string</varname>

Cause: An ORACLE error was encountered while accessing the configuration database. The error can occur when the database is unavailable, or SQL*Net connectivity to the database is interrupted.

Action: Make sure that the database is running, that its name and password as specified in the Oracle Network Manager are accurate, and that there is SQL*Net connectivity between the Oracle Names server and the database. To force the server to start up anyway, using its checkpoint data, start the server with the names.no_region_database parameter set to TRUE. If no checkpoint data is available, the server will shut down.

NNO-00271: warning: names.ora region is version <varname>string</varname>, network definition is version <varname>string</varname>

Cause: The region description in names.ora is out of synch with the network definition.

Action: No action is required unless the name server cannot run with the network definition. To be safe names.ora should be updated with one which is consistent with the network definition.

NNO-00272: line <varname>string</varname>; invalid DIT/DN

Cause: There is a syntax error in the DIT/DN provided in the region description.

Action: Correct the error and restart the server.

NNO-00300: no listen addresses specified, at least one is required

Cause: the server's configuration is missing addresses on which to listen.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00301: server will shut down in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server receives a shutdown request from the Oracle Names control program.

Action: None

NNO-00302: server stopped

Cause: An informational message written to the log file when the server shuts down.

Action: None

NNO-00303: server "<varname>string</varname>" started with process ID <varname>number</varname>

Cause: An informational message written to the log file when the server successfully starts up.

Action: None

NNO-00304: listen address <varname>string</varname> length <varname>string</varname> exceeds maximum of <varname>string</varname>

Cause: the length of one of the server's listen addresses exceeds an internal limit.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00305: trace level changed from <varname>number</varname> to <varname>number</varname>

Cause: An informational message written to the log file when the server changes its trace level in response to a request from the Oracle Names control program.

Action: None

NNO-00306: server shutdown countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a shutdown request previously sent to the server

Action: None

NNO-00307: invalid server name "<varname>string</varname>"

Cause: the server's name is invalid. The name is specified in the server's names.ora configuration file.

Action: Make sure that the names.server_name parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00308: server will restart in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server receives a restart request from the Oracle Names control program.

Action: None

NNO-00309: server restarting

Cause: An informational message written to the log file when the server restarts.

Action: None

NNO-00310: server restart countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a restart request previously sent to the server

Action: None

NNO-00311: invalid listen address list

Cause: the server's configuration contains an invalid listen address list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00312: listen address <varname>string</varname> is invalid

Cause: the server's configuration contains an invalid listen address.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00313: server password length <varname>string</varname> exceeds maximum of <varname>string</varname>

Cause: the server's password length exceeds an internal limit.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00314: error changing trace level from <varname>number</varname> to <varname>number</varname>, level change ignored

Cause: the server encountered an error while changing its trace level in response to a request from the Oracle Names control program.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00315: server is listening on address <varname>string</varname>

Cause: An informational message written to the log file during server startup.

Action: None

NNO-00316: statistic counter reset disabled

Cause: An informational message written to the log file when the server disables statistic counter resetting in response to a request from the Oracle Names control program.

Action: None

NNO-00317: statistic counter reset interval changed to <varname>number</varname> seconds

Cause: An informational message written to the log file when the server changes its statistic counter reset interval in response to a request from the Oracle Names control program.

Action: None

NNO-00318: overriding next statistic counter reset, resetting in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server resets its statistic counters in response to a request from the Oracle Names control program.

Action: None

NNO-00320: missing server name parameter

Cause: the server could not find a names.server_name parameter. The name is specified in the server's names.ora configuration file.

Action: Make sure that the names.server_name parameter in names.ora is correct. The names.ora file is automatically generated by the Oracle Network Manager, but administrators can edit the file at any time, introducing errors. If the file was never changed, contact Worldwide Customer Support.

NNO-00321: statistic counter dump disabled

Cause: An informational message written to the log file when the server disables statistics dumping in response to a request from the Oracle Names control program.

Action: None

NNO-00322: statistic counter dump interval changed to <varname>number</varname> seconds

Cause: An informational message written to the log file when the server changes its statistic dump interval in response to a request from the Oracle Names control program.

Action: None

NNO-00323: overriding next statistic counter dump, dumping in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server dumps its statistic counters in response to a request from the Oracle Names control program.

Action: None

NNO-00326: server statistic counter dump follows

Cause: An informational message written to the log file at the beginning of a statistic dump. The message is followed by a set of server statistics, and ends with another informational message indicating the dump has finished.

Action: None

NNO-00327: server statistic counter dump ends

Cause: An informational message written to the log file at the end of a statistic dump. The message is preceded by a set of server statistics.

Action: None

NNO-00328: server has reset statistic counters to zero

Cause: An informational message written to the log file when the server resets its statistic counters to zero in response to a request from the Oracle Names control program.

Action: None

NNO-00329: server will save the config file in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server saves the config to config file in response to a request from the Oracle Names control program.

Action: None

NNO-00330: server saved the config file "<varname>string</varname>"

Cause: An informational message written to the log file when the server saves the config to config file in response to a request from the Oracle Names control program.

Action: None

NNO-00331: error saving new value <varname>string</varname> of <varname>string</varname> to the save config table.

Cause: An informational message written to the log file when the a set operation is performed and the change cannot be saved in the save config ptable, but should be.

Action: None

NNO-00332: warning: region store serial number reduced from <varname>number</varname> to <varname>number</varname>

Cause: An informational message written to the log file when the server finds the region database has its serial number set lower than it was when the server previously loaded the region data. This is an unnatural condition- every update to the region should increment the serial number so a reduction of the serial number might reflect tampering or accidental manual alteration this and possibly other region tables.

Action: Administrators should find out how/why the serial number decreased.

NNO-00333: warning: ROS admin_region types obsolete; using SQL

Cause: the value set in names.admin_region is an obsolete ROS type

Action: No action is necessary; administrators should set the value to the correct type- probably SQL, possibly LDAP or LDIF

NNO-00334: region load failure: ROS admin_region type <varname>number</varname> unsupported

Cause: the value set in names.admin_region is an obsolete ROS type

Action: No action is necessary; administrators should set the value to the correct type- probably SQL, possibly LDAP or LDIF

NNO-00600: warning: forwarder count <varname>number</varname> exceeds maximum of <varname>number</varname>, first <varname>number</varname> will be loaded

Cause: the server's configuration contains too many default forwarders. The server loads a specified maximum number of forwarders, ignores the rest, and continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00601: warning: no forwarders, DEFAULT-FORWARDERS-ONLY mode ignored

Cause: the server's configuration enables DEFAULT-FORWARDERS-ONLY mode but the configuration contains no default forwarders. The server ignores the request and continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00602: warning: forwarder <varname>number</varname> has invalid address, forwarder ignored

Cause: One of the forwarders in the default forwarder list has an invalid address. The forwarder definition is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00603: enabling all request processing

Cause: An informational message written to the log file when the server enables request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00604: disabling all request processing

Cause: An informational message written to the log file when the server disables request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00605: enabling modification requests

Cause: An informational message written to the log file when the server enables modification-request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00606: disabling modification requests

Cause: An informational message written to the log file when the server disables modification-request processing in response to a request from the Oracle Names control program.

Action: None

NNO-00607: server will forward to default forwarders only

Cause: An informational message written to the log file when the server's configuration enables DEFAULT-FORWARDERS-ONLY mode.

Action: None

NNO-00608: received corrupted message

Cause: The server received a corrupted request. The request is ignored.

Action: corrupted requests are usually caused by transient network problems. If many corrupted messages are received, turn on tracing for further information. If the errors persist, contact Worldwide Customer Support.

NNO-00609: warning: forwarder <varname>number</varname> address length <varname>number</varname> exceeds maximum of <varname>number</varname>, ignored

Cause: the server's configuration contains a forwarder address whose length exceeds an internal limit.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00610: detected possible alias loop involving name "<varname>string</varname>"

Cause: the server detected an alias loop involving the specified name. An alias loop occurs when an alias "X" points to another alias "Y", which points back to "X" rather than to an address or other name server data. The loop can contain more hops but the basic idea remains the same. Loops occur when administrators mis-enter network data, particularly when an alias in one administrative region points to data in another administrative region.

Action: Use the Oracle Names control program to query for the specified name. The control program will describe the alias path, and you can use that information to find which names are incorrect and what administrative regions the incorrect data belongs to.

NNO-00611: disabling request forwarding

Cause: An informational message written to the log file when the server disables request forwarding in response to a request from the Oracle Names control program.

Action: None

NNO-00612: enabling request forwarding

Cause: An informational message written to the log file when the server enables request forwarding in response to a request from the Oracle Names control program.

Action: None

NNO-00613: disabling FORWARDING-DESIRED on system queries

Cause: An informational message written to the log file when the server disables the FORWARDING-DESIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00614: enabling FORWARDING-DESIRED on system queries

Cause: An informational message written to the log file when the server enables the FORWARDING-DESIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00615: disabling DEFAULT-FORWARDERS-ONLY mode

Cause: An informational message written to the log file when the server disables DEFAULT-FORWARDERS-ONLY mode in response to a request from the Oracle Names control program.

Action: None

NNO-00616: enabling DEFAULT-FORWARDERS-ONLY mode

Cause: An informational message written to the log file when the server enables DEFAULT-FORWARDERS-ONLY mode in response to a request from the Oracle Names control program.

Action: None

NNO-00617: enabling AUTHORITY-REQUIRED on system queries

Cause: An informational message written to the log file when the server enables the AUTHORITY-REQUIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00618: disabling AUTHORITY-REQUIRED on system queries

Cause: An informational message written to the log file when the server disables the AUTHORITY-REQUIRED attribute on queries that it generates. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00622: warning: too many auto-refresh failures for name "<varname>string</varname>", query expired

Cause: If an auto-refresh query is issued and continuously returns an error for three days, the query is removed from the auto-refresh queue and a warning logged. The query can be restarted from the Oracle Names control program.

Action: this message will be preceded by numerous warnings that the query in question is failing. Use the Oracle Names control program to describe the failing query. Make sure the server being queried is running and that there is network connectivity between the querying server and the server being queried.

NNO-00623: setting auto-refresh retry interval to <varname>number</varname> seconds

Cause: An informational message written to the log file when the server changes its auto-refresh retry interval in response to a request from the Oracle Names control program.

Action: None

NNO-00624: setting auto-refresh expiration period to <varname>number</varname> seconds

Cause: An informational message written to the log file when the server changes its auto-refresh expiration period in response to a request from the Oracle Names control program.

Action: None

NNO-00625: overriding auto-refresh of name "<varname>string</varname>", type "<varname>string</varname>", refresh in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server changes the time when an auto-refresh query is next issued. The message comes in response to a request from the Oracle Names control program.

Action: None

NNO-00626: cannot enable DEFAULT-FORWARDERS-ONLY mode, no default forwarders exist

Cause: the Oracle Names control program issued a request to enable DEFAULT-FORWARDERS-ONLY mode, and the request was ignored because the server has no default forwarders.

Action: None

NNO-00627: cancelling auto-refresh of name "<varname>string</varname>", type "<varname>string</varname>"

Cause: An informational message written to the log file when the server removes a query from the auto-refresh queue in response to a request from the Oracle Names control program.

Action: None

NNO-00628: setting maximum reforwarders per query to <varname>number</varname>

Cause: An informational message written to the log file when the server changes its maximum-reforward count in response to a request from the Oracle Names control program.

Action: None

NNO-00629: warning: invalid forwarder list, no default forwarders loaded

Cause: The server's configuration contains an invalid forwarder description list.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00630: setting request-processing delay to <varname>number</varname> seconds

Cause: An informational message written to the log file when the server sets an artificial request-processing delay in response to a request from the Oracle Names control program.

Action: None

NNO-00631: warning: forwarder <varname>number</varname> has invalid name "<varname>string</varname>", forwarder ignored

Cause: The server's configuration contains a forwarder description with an invalid server name.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00632: warning: forwarder <varname>number</varname> has missing address, forwarder ignored

Cause: The server's configuration contains a forwarder description with a missing address.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00633: detected fatal delegation loop involving server "<varname>string</varname>"

Cause: the server detected a fatal delegation loop while forwarding a request. A loop occurs when the server's topology data indicates that it should forward a request to itself. The server immediately shuts down in response to this error.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00634: received authoritative name "<varname>string</varname>" when we are its authority

Cause: a server "X" received authoritative data from another server "Y" when server "X" is also authoritative for the data. Such situations should never arise because if server "X" is authoritative for the requested data, it should never forward the request to another server.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00635: warning: ignoring duplicate forwarder "<varname>string</varname>"

Cause: The server's default forwarder list contains a duplicate server. The duplicate is ignored and the server continues running.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00700: warning: cannot checkpoint the cache, trying again in <varname>number</varname> seconds

Cause: The server was unable to perform its normal periodic cache checkpointing, typically because the cache checkpoint file could not be written. The cache checkpoint file name appears as an informational message during server startup.

Action: Check to see that the server has permission to write the cache checkpoint file, and that there is sufficient disk space for the file to be written.

NNO-00701: warning: cannot construct checkpoint file name, checkpointing disabled

Cause: the server could not construct a system-dependent file name.

Action: An internal error not normally visible to the user. For further details, turn on tracing and restart the server. If the error persists, contact Worldwide Customer Support.

NNO-00702: cache checkpointing disabled

Cause: An informational message written to the log file when the server disables cache checkpointing in response to a request from the Oracle Names control program.

Action: None

NNO-00703: checkpoint interval changed to <varname>number</varname> seconds

Cause: An informational message written to the log file when the server changes its cache checkpoint interval in response to a request from the Oracle Names control program.

Action: None

NNO-00705: warning: cannot open checkpoint file "<varname>string</varname>", checkpointing disabled

Cause: the server was unable to open the named checkpoint file for writing. This problem is typically due to the file system's protection settings. The error is not fatal; it simply means the server will not checkpoint its cache.

Action: Check to see that the server has permission to write the file named in the error message.

NNO-00706: overriding next cache checkpoint, checking in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server checkpoints its cache in response to a request from the Oracle Names control program.

Action: None

NNO-00707: server's cache will be flushed in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server flushes its cache in response to a request from the Oracle Names control program.

Action: None

NNO-00708: cache flush countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a cache flush request previously sent to the server

Action: None

NNO-00709: failed delete of cache checkpoint file "<varname>string</varname>", cache flush may not work

Cause: the server attempted to flush its cache, which also deletes the cache checkpoint file. The file deletion failed, although the rest of the cache flush succeeded. Succeeding errors describe the reason for the deletion failure.

Action: This error typically occurs when two cache-flush operations are issued in succession without an intervening cache checkpoint operation (which would recreate the file). The first deletes the cache file, the second attempts to do so, but fails since the file has already been deleted. In such cases, the message is harmless and can be ignored. If, however, the error occurs because the server lacks permission to delete the file, then you must change the file system permissions so the server is allowed to delete the file.

NNO-00710: server's cache will be dumped to the trace file in <varname>number</varname> seconds

Cause: An informational message written to the log file when the server dumps its cache to the trace file in response to a request from the Oracle Names control program.

Action: None

NNO-00711: cache dump countdown aborted

Cause: An informational message written to the log file whenever the Oracle Names control program halts a cache dump request previously sent to the server

Action: None

NNO-00712: warning: group <varname>string</varname> cache checkpoint failed

Cause: The server was unable to perform its normal periodic cache checkpointing, typically because the cache checkpoint file could not be written. The cache checkpoint file name appears as an informational message during server startup.

Action: Check to see that the server has permission to write the cache checkpoint file, and that there is sufficient disk space for the file to be written.

NNO-00800: Error: cannot read version from config database

Cause: The query for the region database version failed. The database may be shut down, or the tables may not exist in the schema specified in names.ora.

Action: Correct any access problems accordingly.

NNO-00801: Error: OCI_SUCCESS_WITH_INFO: <varname>string</varname>

Cause: Diagnostic information was returned from OCI during region database access.

Action: None

NNO-00802: Error: OCI_NEED_DATA

Cause: The server did not provide sufficient data to the OCI interface while accessing the region database.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00803: Error: OCI_INVALID_HANDLE

Cause: The server called OCI with an invalid handle while accessing the region database.

Action: An internal error not normally visible to the user. Contact Worldwide Customer Support.

NNO-00804: Error: OCI_STILL_EXECUTE

Cause: An OCI operation between the server and the database is still in progress.

Action: None

NNO-00805: Error: OCI_CONTINUE

Cause: Not possible.

Action: None

NNO-00806: Error: OCI_ERROR: <varname>string</varname>

Cause: An OCI occurred accessing the region database. More specific details will be written to the log file.

Action: Find the appropriate entry in the log file and correct the cause of the failure if possible. Otherwise contact Worldwide Customer Support.

NNO-00807: End of Fetch: OCI_NO_DATA

Cause: All rows have been returned from the region table.

Action: None

NNO-00808: Error connecting to region database

Cause: Not possible.

Action: None

NNO-00809: Unknown OCI error: <varname>number</varname>

Cause: Not possible.

Action: None

NNO-00850: Error: LDAP query returns <varname>string</varname>

Cause: The LDAP API returned an error. More specific details will be written to the log file.

Action: Find the appropriate entry in the log file and correct the cause of the failure if possible. Otherwise contact Worldwide Customer Support.

NNO-00851: LDAP open/bind failed: error = <varname>number</varname>

Cause: the server failed to connect to the LDAP directory.

Action: Find the cause of the error and correct it and restart the server.

NNO-00852: failed to get LDAP entry: error = <varname>number</varname>

Cause: the server could not retrieve query entries from the LDAP API.

Action: Find the cause of the error and correct it and restart the server.

NNO-00853: failed to get LDAP attribute/value: error = <varname>number</varname>

Cause: the server failed to connect to the LDAP directory.

Action: Find the cause of the error and correct it and restart the server.

NNO-00854: error unbinding LDAP: error = <varname>number</varname>

Cause: the server failed to connect to the LDAP directory.

Action: Find the cause of the error and correct it and restart the server.

NPL-00100 to NPL-00420

NPL-00100: cannot initialize ASN.1 context

Cause: The ASN.1 program interface could not be initialized, probably because its error message file could not be found.

Action: Check that SQL*Net has been installed properly and that all message files are in their proper locations.

NPL-00101: uninitialized ASN.1 context

Cause: The ASN.1 program interface received an uninitialized ASN.1 handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00102: missing stream functions in ASN.1 context initialization

Cause: An internal function improperly attempted to initialize an ASN.1 handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00103: unusable ASN.1 context

Cause: The ASN.1 program interface received an unusable ASN.1 handle.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00300: maximum ASN.1 element nesting depth <varname>string</varname> exceeded on read

Cause: An ASN.1 construct is too complex for the program interface to read.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00301: maximum ASN.1 element nesting depth <varname>string</varname> exceeded on write

Cause: An ASN.1 construct is too complex for the program interface to write.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00302: ASN.1 type tag is greater than maximum of 16383

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00303: uninitialized ASN.1 class attribute

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00304: uninitialized ASN.1 tag attribute

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00305: unsupported ASN.1 "UNIV" type <varname>string</varname>

Cause: An internal function attempted to create an illegal ASN.1 construct

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00307: ASN.1 sequence has already been ended on write

Cause: An internal function attempted to end an ASN.1 construct prematurely.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00308: requested ASN.1 class <varname>string</varname> does not match received class <varname>string</varname>

Cause: An internal function requested an ASN.1 construct different from that received by the ASN.1 protocol engine.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00309: requested ASN.1 type tag <varname>string</varname> does not match received type tag <varname>string</varname>

Cause: An internal function requested an ASN.1 construct different from that received by the ASN.1 protocol engine.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00310: ASN.1 sequence has already been ended on read

Cause: An internal function attempted to finish reading an ASN.1 construct which has already been completely read.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00311: cannot end constructed ASN.1 encoding, <varname>string</varname> encoding octets unread

Cause: An internal function attempted to finish reading an ASN.1 construct prematurely.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00312: attempt to put ASN.1 "UNIV" type with illegal tag <varname>string</varname>

Cause: An internal function attempted to create an illegal ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00313: requested form <varname>string</varname> does not match actual form <varname>string</varname>

Cause: An internal function received an ASN.1 construct different from that expected.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00410: incoming ASN.1 value too large (<varname>string</varname> octets) to store locally

Cause: The ASN.1 protocol engine was unable to translate an ASN.1 construct to its host representation because the construct was too big.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00411: incoming ASN.1 NULL encoding has nonzero length of <varname>string</varname>

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00412: incoming ASN.1 BOOLEAN encoding has incorrect length of <varname>string</varname>

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00413: incoming ASN.1 encoding has length <varname>string</varname>, maximum allowed is <varname>string</varname>

Cause: The ASN.1 protocol engine received an ASN.1 construct too large for it to process.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00414: incoming ASN.1 type tag is greater than maximum of 16383

Cause: The ASN.1 protocol engine received an illegal ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00415: received unsupported ASN.1 INDEFINITE-LENGTH encoding

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00416: received illegal ASN.1 encoding length of <varname>string</varname>

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00417: received ASN.1 length octet count greater than maximum of <varname>string</varname>

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00418: received malformed ASN.1 object identifier

Cause: The ASN.1 protocol engine received a corrupted ASN.1 construct.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00419: received ASN.1 object identifier with sub-identifier that is too large

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NPL-00420: received ASN.1 object identifier with more than 256 sub-identifiers

Cause: The ASN.1 protocol engine received an ASN.1 encoding which it could not process because its implementation does not support it.

Action: Not normally visible to the user. For further details, turn on tracing and re-execute the failing operation. If the error persists, contact Worldwide Customer Support.

NZE-28750 to NZE-29249

NZE-28750: unknown error

Cause: An Oracle Security Server error of an unspecified type occurred.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28751: memory allocation failure

Cause: The allocation of memory failed due to insufficient system memory.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28752: data source initialization failure

Cause: A data source failed to initialize. Frequently, this error is caused by insufficient system resources.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28753: failure to terminate use of data source

Cause: The system failed to terminate its use of a data source. This error may have been caused by memory or disk corruption, among other things.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28754: object storage failure

Cause: Error not user-visible.

Action: n/a

NZE-28755: object retrieval failure

Cause: The system failed to retrieve information from a file or a database.

Action: Check if the data source exists, or check to ensure that the correct information exists.

NZE-28756: callback failure to allocate memory

Cause: A function supplied by the caller failed to allocate memory. This error could have been caused by system memory exhaustion.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28757: system attempt to allocate 0 bytes of memory

Cause: The system attempted to allocate 0 bytes of memory because there was no available memory left to allocate. This error could have been caused by insufficient system memory.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28758: memory release failure

Cause: The release of a memory fragment failed. This may be due to memory corruption either within the application or in the Oracle Security Server library.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28759: failure to open file

Cause: The system could not open the specified file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28760: list creation failure

Cause: Error not user-visible.

Action: n/a

NZE-28761: element creation failure

Cause: Error not user-visible.

Action: n/a

NZE-28762: failure to add element

Cause: Error not user-visible.

Action: n/a

NZE-28763: Invalid parameter type found in configuration file.

Cause: A parameter in the sqlnet.ora file may have been specified incorrectly.

Action: Check the sqlnet.ora file for this parameter value.

NZE-28764: failure to retrieve a configuration parameter

Cause: The system failed to retrieve a configuration parameter from the sqlnet.ora file. This error may have occurred because a necessary configuration parameter was not specified in the sqlnet.ora file.

Action: Supply the needed configuration parameter in the sqlnet.ora file.

NZE-28765: Data method list does not exist.

Cause: Error not user-visible.

Action: n/a

NZE-28766: failure to terminate use of data source

Cause: The system failed to terminate its use of a data source. This error may have been caused by memory or disk corruption, or a system error.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28767: invalid version number

Cause: Version number of the wallet was incorrect. A corrupt wallet or an incompatible wallet was provided.

Action: Ensure that proper wallet is being used.

NZE-28768: bad magic number

Cause: An invalid magic number was specified in a data file. This could have been caused by a corrupted disk or by some other process overwriting the file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28769: Specified method does not exist.

Cause: The data access method that was specified in the configuration file is not supported.

Action: Specify a supported method. Consult the Oracle Security Server documentation to determine the supported types.

NZE-28770: Data source is already initialized.

Cause: The caller attempted to initialize a data source which was already initialized.

Action: This is a programming error. An application should not attempt to initialize a data source more than once.

NZE-28771: Data source is not yet initialized.

Cause: The caller attempted to use a data source which had not yet been initialized.

Action: This is a programming error. The application must always initialize the data source before it can be used.

NZE-28772: invalid file ID

Cause: Error not user-visible.

Action: n/a

NZE-28773: failure to write magic and version numbers

Cause: Both the magic and version numbers failed to write. This usually occurs because of insufficient disk space.

Action: Delete unnecessary files to free up disk space or add disk space to the system.

NZE-28774: file cannot write to disk

Cause: The output of a file failed. This error usually occurs because of insufficient disk space.

Action: Delete unnecessary files to free up disk space or add disk space to the system.

NZE-28775: file cannot close

Cause: Failed to close a file which is used by a data access method. This error usually indicates memory corruption or a system error.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28776: Output buffer supplied is too small.

Cause: The data returned by a function was too large for the supplied buffer.

Action: Call the routine again with a larger buffer.

NZE-28777: binding creation failure

Cause: Failed to create a binding for use in the parsing of a parameter value. This error can be caused by the parameter value being in an incorrect format, such as a right parenthesis was not supplied where expected, or due to insufficient system memory.

Action: Make sure that the parameter is specified in the correct format. If the format is correct, free up system memory by terminating processes or adding more memory.

NZE-28778: Configuration parameter is not specified in the proper format.

Cause: The configuration parameter was not specified in the proper format.

Action: Consult the Oracle Security Server documentation for a description of the proper format for this parameter.

NZE-28779: no data access method specified in parameter

Cause: No method for data access was specified in the parameter value.

Action: Specify a method for data access in the parameter. Consult the Oracle Security Server documentation for the supported data access methods for this data type.

NZE-28780: invalid data access method specified by the parameter

Cause: The data access method specified by the parameter value is not supported.

Action: Specify a supported data access method. Consult the Oracle Security Server documentation for the supported data access methods for this data type.

NZE-28781: No data for the access method is specified in the parameter.

Cause: No data was specified in the parameter for use with the specified access method.

Action: Consult the Oracle Security Server documentation for the data that must be specified for the access method.

NZE-28782: data source is not allocated

Cause: No memory was allocated for a data source.

Action: Ensure that the application calls in the data source initialization function.

NZE-28783: invalid parameter

Cause: There was no match for the parameter name that was used in the configuration file.

Action: Check your sqlnet.ora file for the correct parameter name.

NZE-28784: file name translation failure

Cause: The translation of a file name from Oracle format to native format has failed.

Action: Specify a correct file name. Consult your Oracle documentation for the correct file name format.

NZE-28785: parameter does not exist

Cause: A necessary configuration parameter was not found in the parameter file.

Action: Supply the required parameter.

NZE-28786: decryption of encrypted private key failure

Cause: An incorrect password was used to decrypt an encrypted private key.

Action: Enter the correct password.

NZE-28787: private key encryption failure

Cause: This may have been caused by an error in the mkwallet parameter of the sqlnet.ora file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28788: user provided invalid information, or an unknown error

Cause: User may have responded to a prompt with unexpected input, or an unknown error occurred.

Action: Enter correct input, or enable tracing to check the trace file for errors.

NZE-28789: name type not found

Cause: Error not user-visible.

Action: n/a

NZE-28790: NLS string open failure

Cause: The opening of a string for use by the NLS subsystem failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28791: certificate verification failure

Cause: Verification of the certificate, which the user supplied, failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28792: PL/SQL operation failure

Cause: A PL/SQL operation attempted by the Oracle Security Server failed.

Action: This is an internal error. Enable tracing and try the operation again. Contact Oracle customer support for assistance.

NZE-28793: variable bind failure

Cause: Error not user-visible.

Action: n/a

NZE-28794: data type attribute did not initialize

Cause: The initialization of the attribute data type failed. This error may be due to insufficient system resources.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28795: data type attribute did not terminate

Cause: The termination of the use of the attribute data type subsystem failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28796: access method is not supported

Cause: The method specified to access data is not supported.

Action: Use a supported access method. Consult your Oracle documentation to determine which access methods are supported.

NZE-28797: invalid key data type

Cause: The type specified for a key is not supported.

Action: Correct the key type. Consult your Oracle documentation to determine which key types are supported.

NZE-28798: Number of sub-keys application passes to bind does not match that in the key.

Cause: The number of keys passed by the application to bind does not match the number used to create the key.

Action: This is an internal programming exception. Contact Oracle customer support.

NZE-28799: failure to allocate shared memory

Cause: The allocation of shared memory for use in operations involving the shared server failed. This error was probably due to insufficient memory heap supplied by the Oracle server.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28800: data source failed to open

Cause: A data source (a file or a database) failed to open.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28801: invalid object type

Cause: Error not user-visible.

Action: n/a

NZE-28802: invalid mode or data source in configuration file

Cause: An invalid mode or data source has been specified in the configuration file (sqlnet.ora).

Action: Check the method parameter in the sqlnet.ora file. If the parameter value is correct, then enable tracing to determine the exact error.

NZE-28803: I/O operation failure

Cause: The system or application failed to access a data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28804: Data source cannot close.

Cause: The data source, which could be either a file or a database), failed to close.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28805: Cannot retrieve information from the data source.

Cause: The system or application failed to retrieve information from the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28806: Cannot write to the data source.

Cause: The system or application failed to write to the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28807: Cannot update the data source.

Cause: The system or application failed to update the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28808: Cannot retrieve method information from the configuration file.

Cause: The system or application failed to retrieve method information from the sqlnet.ora configuration file.

Action: Check the method configuration parameters in the sqlnet.ora file. If the method configuration parameters are correct, then enable tracing to determine the exact error.

NZE-28809: Cannot delete information from the data source.

Cause: The system or application failed to delete information from the data source (file or database).

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28810: Cannot create key descriptor.

Cause: The system failed to create a key descriptor.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28811: invalid access descriptor

Cause: Error not user-visible.

Action: n/a

NZE-28812: record operation failure

Cause: Error not user-visible.

Action: n/a

NZE-28813: invalid record type

Cause: Error not user-visible.

Action: n/a

NZE-28814: Cannot convert a number in Oracle format to native format.

Cause: Failed to convert a number from Oracle format to native format.

Action: This is an internal programming exception. Enable tracing to try and reproduce the problem. Contact Oracle customer support and supply the trace file.

NZE-28815: Cannot convert a number in native format to Oracle format.

Cause: Failed to convert a number from native format to Oracle portable format failed.

Action: This is an internal programming exception. Enable tracing to try and reproduce the problem. Contact Oracle customer support and supply the trace file.

NZE-28816: No password provided for a PL/SQL function.

Cause: A required password was not passed to a PL/SQL function.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28817: PL/SQL function returned an error.

Cause: A PL/SQL function returned an error unexpectedly.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28818: No package context provided.

Cause: The context that holds the state of the security package was not passed to a function or procedure that was expecting it.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28819: No distinguished name provided.

Cause: The user's distinguished name was not provided to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28820: Signature or decryption/encryption state is not provided.

Cause: The state of either a signature or decryption/encryption was not passed to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28821: No input buffer provided.

Cause: A PL/SQL function or procedure was not passed an expected buffer.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28822: Required seed is not specified.

Cause: No seed was specified to the PL/SQL seed initialization function.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28823: Number of random bytes to generate is not specified.

Cause: The number of random bytes to generate was not specified to the PL/SQL random number generator.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28824: invalid encryption/decryption/signature state passed

Cause: An invalid state was passed to a PL/SQL encryption, decryption, or signature procedure or function.

Action: Specify a correct state value.

NZE-28825: No cryptographic engine function specified.

Cause: No function was specified for the cryptographic engine.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28826: invalid cryptographic engine function passed

Cause: An incorrect cryptographic engine function was passed to a PL/SQL function or procedure.

Action: Specify a correct engine function.

NZE-28827: invalid cipher type passed

Cause: An incorrect cipher type was passed to a PL/SQL function or procedure.

Action: Specify a correct cipher type.

NZE-28828: invalid identity type passed

Cause: An incorrect identity type was passed to a PL/SQL function or procedure.

Action: Specify a correct identity type.

NZE-28829: no cipher type specified

Cause: No cipher type was passed to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28830: no identity type specified

Cause: No identity type was passed to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28831: no data unit format

Cause: No data unit format was passed to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28832: invalid data unit format

Cause: An incorrect data unit format was passed to a PL/SQL function or procedure.

Action: Specify a data unit format.

NZE-28833: inadequate information provided

Cause: Inadequate information, which usually is in the form of parameters, has been provided to a PL/SQL function.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28834: Buffer is too small.

Cause: The buffer provided by PL/SQL to an Oracle Security Server toolkit function is too small for the data to be returned.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28835: Identity descriptor is not present or is too small.

Cause: An identity descriptor, which is passed to a PL/SQL function or descriptor, was not provided or was not the correct size.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28836: Wallet is not open.

Cause: The wallet to be used has not yet been opened.

Action: Call the function that opens the wallet.

NZE-28837: no wallet descriptor

Cause: No wallet descriptor was specified to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28838: no identity descriptor

Cause: No identity descriptor was specified to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28839: no persona descriptor

Cause: No persona descriptor was specified to a PL/SQL function or procedure.

Action: This is an internal error. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-28840: Wallet is already open.

Cause: An attempt was made to open a wallet that was already open.

Action: This is a programming error. A wallet should only be opened once.

NZE-28841: Operation is not supported.

Cause: An attempt was made to perform an operation that is not supported.

Action: This is a programming error. Please refer to Oracle documentation to determine which operations are supported.

NZE-28842: Incorrect file permissions

Cause: The subject file did not have the correct permissions for the operation.

Action: Ensure that the file permissions allow the current operation.

NZE-28843: Operating system error while creating/opening file

Cause: An operating system dependent error occurred while trying to create/ open the file or while trying to set the appropriate permissions on the file.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28844: No wallet present

Cause: There was no wallet in the location specified.

Action: Check to ensure that the wallet is in the correct directory location.

NZE-28845: No certificate

Cause: Either there is no certificate or the system cannot find it.

Action: Check to ensure that the certificate is in the specified wallet.

NZE-28846: No private key

Cause: Either there is no private key or the system cannot find it.

Action: Check to ensure that the private key is in the specified wallet.

NZE-28847: No clear private key file

Cause: Failed to retrieve private key from SSO wallet

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28848: No encrypted private key file

Cause: Failed to retrieve private key from the wallet

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28849: No Trustpoints

Cause: The wallet does not have any trusted certificates

Action: Ensure that the wallet/keystore has trusted certificates.

NZE-28852: Bad password

Cause: The password created for an obfuscated wallet exceeds the maximum password length limit.

Action: n/a

NZE-28853: Initialization failure

Cause: Either initialization or module loading has failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28854: Memory allocation failure

Cause: The allocation of memory failed due to insufficient system memory.

Action: Terminate other processes to free up memory or add memory to the system.

NZE-28855: Unsupported SSL operation

Cause: An unsupported operation was attempted, for example, an attempt was made to select a mode of operation that is not allowed.

Action: Refer to the SSL chapter in the product's documentation.

NZE-28856: Buffer overflow error

Cause: A buffer overflow error occurred during SSL handshake.

Action: This error is not normally visible to the user. Enable tracing and attempt the connection again. Then contact Oracle customer support with the trace output.

NZE-28857: Unknown SSL error

Cause: An unknown SSL error occurred.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28858: SSL protocol error

Cause: An error occurred while negotiating the SSL handshake between two processes.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28859: SSL negotiation failure

Cause: An error occurred during negotiation between two processes as part of the SSL protocol. This error will occur if the two sides to the connection do not support a common cipher suite.

Action: Configure each process so they support a common cipher suite. Then attempt the connection again. If error occurs again, enable tracing and retry the connection. Then contact Oracle customer support with the trace output.

NZE-28860: Fatal SSL error

Cause: An error occurred during the SSL connection to the peer. It is likely that this side sent data which the peer rejected.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-28861: SSL connection would block

Cause: This error is informational. It should never be communicated to the user.

Action: Enable tracing and retry the connection to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-28862: SSL connection failed

Cause: This error occurred because the peer closed the connection.

Action: Enable tracing on both sides and examine the trace output. Contact Oracle Customer support with the trace output.

NZE-28863: SSL session not found

Cause: This error is informational. It indicates that a specified session does not exist.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-28864: SSL connection closed gracefully

Cause: This error is informational. It indicates that the connection closed without error.

Action: This error is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28865: SSL connection closed

Cause: The SSL connection closed because of an error in the underlying transport or because the peer process quit unexpectedly.

Action: Enable tracing and retry the connection. The trace output should indicate how the failure occurred.

NZE-28866: Invalid peer certificate encoding

Cause: A field from a certificate in the peer's certificate chain could not be recognized.

Action: Refer to Oracle Wallet Manager documentation to find out how to obtain the peer's certificate. Then contact Oracle customer support with the peer's certificate chain.

NZE-28867: Integer value is too big.

Cause: The certificate presented had an integer field whose value was too large.

Action: Refer to Oracle Wallet Manager documentation to find out how to obtain the peer's certificate. Then contact Oracle customer support with the peer's certificate chain.

NZE-28868: Peer certificate chain check failed.

Cause: The check of the certificate list presented by the peer failed. Possible causes include: 1. the expiration of one of the certificates; 2. a certificate authority in a certificate was not recognized as a trust point; 3. the signature in a certificate could not be verified.

Action: Refer to Oracle Wallet Manager documentation to find out how to open your wallet and ensure that: 1. all of the certificates installed in your wallet are current 2. a certificate authority's certificate from your peer's certificate chain is added as a trusted certificate in your wallet

NZE-28869: Peer's certificate is expired.

Cause: The certificate being used to authenticate a client or server has expired.

Action: Obtain a new certificate, which is unexpired, and attempt the connection again.

NZE-28870: Name comparison failure

Cause: A comparison of the names contained in two certificates failed.

Action: This error is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28871: Peer certificate chain is incomplete.

Cause: The peer certificate chain presented was incomplete because it did not end with a self-signed root certificate.

Action: Refer to Oracle Wallet Manager documentation to find out how to open your wallet and ensure that: 1. the certificate authority's root certificate is self-signed. 2. a certificate authority's certificate from your peer's certificate chain is added as a trusted certificate in your wallet

NZE-28872: Invalid peer certificate format

Cause: The peer certificate does not conform to the X.509v3 standard.

Action: Refer to Oracle Wallet Manager documentation to find out how to get the peer certificate. Then contact Oracle customer support with the peer's certificate.

NZE-28873: Invalid parameter

Cause: A function was presented with a null parameter.

Action: This error is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28874: SSL: I/O closed - override goodbye kiss

Cause: This error is informational. It indicates that the connection closed without error.

Action: This error is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28875: SSL: use server-gated cryptographic suites

Cause: This is used as a internal status indicator and not really an error.

Action: This message is not normally visible to the user. Enable tracing and retry the connection. If the error persists, contact Oracle customer support.

NZE-28884: invalid cipher suite

Cause: An invalid cipher suite string has been specified in the product's configuration file.

Action: Refer to the product documentation for information about supported cipher suites.

NZE-28885: No certificate with the required key usage found.

Cause: Certificate not created with the appropriate X509v3 key usage extension.

Action: Refer to Oracle Wallet Manager documentation to find out the supported key usages.

NZE-28890: Entrust Login Failed

Cause: An application failed to log in to an Entrust Profile. Possible causes include: 1. Entrust Admin/Authority was not online. 2. Invalid password for Entrust profile was specified. 3. Invalid path to Entrust profile was specified 4. Invalid Entrust initialization

file was specified. 5. Entrust Server Login program was not executed (server-side only).

Action: Make sure that: 1. Entrust Authority is online; 2. Password for Entrust profile is specified correctly; 3. Path to Entrust profile is specified correctly; 4. A valid Entrust initialization file is provided; 5. Entrust Server Login program is run before the database startup. For more information, enable tracing and examine the trace output to get exact the Entrust failure codes.

NZE-29000: Certificate not installed

Cause: Trying to delete a certificate which has not been installed.

Action: Refer to the Oracle Wallet Manager documentation for information about delete option.

NZE-29002: SSL transport detected invalid or obsolete server certificate.

Cause: The client detected a mismatch between the server's distinguished name specified on the server's certificate and the server's SID or service name.

Action: Refer to the SSL chapter in Oracle Advanced Security Administrator's Guide for information about enabling server distinguished name matching. Contact your administrator to perform the appropriate action.

NZE-29003: SSL transport detected mismatched server certificate.

Cause: The client detected a mismatch between the server's distinguished name specified on the server's certificate and the server's SID or service name.

Action: Refer to the SSL chapter in Oracle Advanced Security Administrator's Guide for information about enabling server distinguished name matching. Contact your administrator to perform the appropriate action.

NZE-29004: Callback Failure

Cause: The alert callback returns this error; it is not fatal.

Action: n/a

NZE-29005: The certificate is invalid.

Cause: The peer certificate encoding is invalid when using SSL 2.0.

Action: Refer to Oracle Wallet Manager documentation to find out how to obtain the peer's certificate. Then contact Oracle customer support with the peer's certificate chain.

NZE-29006: The certificate request message is invalid when using SSL 2.0.

Cause: There is an error processing the SSL 2.0 REQUEST-CERTIFICATE message.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29007: Bad Clear Key Length when using SSL 2.0

Cause: The clear key length of an SSL 2.0 Client Master key handshake message is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29008: Bad DH Param key length

Cause: The length of the Diffie-Hellman params exceeds export restrictions.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29009: Bad encrypted key length when using SSL 2.0

Cause: The encrypted key length of an SSL 2.0 Client Master key handshake message is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29010: Export key length does not meet export restrictions.

Cause: The server sent a ServerKeyExchange message with an export key which does not meet export restrictions. For RSA, the export key must be exactly 512 bits.

Action: Obtain a certificate with the appropriate key length.

NZE-29011: Finished message is incorrect.

Cause: The FINISHED message data verification failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29012: Bad key argument length when using SSL 2.0

Cause: The key argument length of an SSL 2.0 Client Master Key handshake message is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29013: SSL MAC verification failure

Cause: Verification of SSL Record MAC failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29014: Maximum fragment length extension is incorrect.

Cause: The maximum fragment length extension specified is incorrect.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29015: incorrect message length

Cause: The message length is not correct.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29016: inadequate PKCS1 message padding

Cause: The message was not properly padded before encryption.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29017: The premaster secret length is incorrect.

Cause: The premaster secret sent by the peer has an incorrect length.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29018: The premaster secret contains an incorrect version number.

Cause: The premaster secret must contain the same version number as the ClientHello. The version sent by the client was incorrect.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29019: The protocol version is incorrect.

Cause: There is a protocol version mismatch between the two peers.

Action: Specify the correct protocol version in the product's configuration file.

NZE-29020: The handshake record length is too long.

Cause: The handshake record length exceeds the maximum that is allowed by the SSL specification.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29021: Secret key length is incorrect when using SSL 2.0.

Cause: The length of the decrypted ENCRYPTED-KEY is incorrect.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29022: Operation is being attempted on the wrong side of the client/server connection.

Cause: The SSL network layer has detected that the operation has been attempted on the wrong side of the client/server connection.

Action: Select the protocol side (of this protocol) to be the same as the one selected with a previous protocol.

NZE-29023: The buffers are not empty.

Cause: Trying to free buffers that are not empty.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29024: Certificate validation failure

Cause: The certificate sent by the other side could not be validated. This may occur if the certificate has expired, has been revoked, or is invalid for another reason.

Action: Check the certificate to determine whether it is valid. Obtain a new certificate, alert the sender that the certificate has failed, or resend.

NZE-29025: Error found in certificate check callback.

Cause: The application callback failed during additional certificate validation. Additional checks include CRL validation and extension checking.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29026: Decryption failure

Cause: SSL record decryption failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29027: Error in entropy collection

Cause: The internal entropy collection failed to generate enough seed data.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29028: Server verification failure when using SSL 2.0

Cause: Processing of an SSL 2.0 SERVER-VERIFY message failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29029: SSL handshake already completed

Cause: The system is trying to initiate a handshake when it has already been completed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29030: SSL handshake is requested.

Cause: The peer sends this message if it wishes to renegotiate. The application can either proceed with the renegotiation or reject the request.

Action: This is not an error. To find out more details enable tracing and retry the connection. Contact Oracle customer support with the trace output.

NZE-29031: SSL handshake is required.

Cause: Renegotiation cannot proceed before the SSL handshake is completed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29032: The given identity is not complete.

Cause: The certificate list does not contain both private key and certificate.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29033: Invalid PFX

Cause: The PFX is invalid for this operation containing either no certificates and private key or multiple private keys. However, the API which returns this error is not used in our code.

Action: n/a

NZE-29034: Correct cipher suite or client authentication is needed.

Cause: Before installing a private key, a cipher suite or client authentication suite using the same key exchange algorithm must be installed first. This has not been done.

Action: Install a cipher suite or client authentication suite that uses the same key exchange algorithm as the private key before re-installing the private key.

NZE-29035: Pseudo Random Number Generator is needed

Cause: PRNG not set yet. A PRNG must be installed first.

Action: n/a

NZE-29036: This feature is not supported

Cause: Operation is not supported by the current connection parameters.

Action: Check the Oracle documentation to determine the appropriate connection parameters required for this operation.

NZE-29037: No certificate is present

Cause: The other client or server sent a certificate message that contained no certificates.

Action: Check the other side (client or server) to ensure they have appropriate credentials.

NZE-29038: There are no matching certificates.

Cause: The other client or server sent a certificate message that contained a certificate which was not signed by a trusted certificate authority (CA).

Action: Check to ensure that the other client or server sends a certificate which is signed by a CA that is in your trusted list. Or, include the CA certificate for the other client or server's certificate as a trustpoint in your wallet.

NZE-29039: There are no matching cipher suites.

Cause: Neither end of the handshake can agree on a cipher suite.

Action: Check to ensure that both sides of the handshake select cipher suites that are supported.

NZE-29040: There are no supported cipher suites.

Cause: This end of the handshake cannot support any cipher suites. This connection and the peer have some matching cipher suites, however, these cipher suites cannot be negotiated because they cannot be supported by the connection.

Action: Check to ensure that both sides of the handshake select cipher suites that are supported by the connection. Refer to Oracle documentation for supported cipher suites.

NZE-29041: The callback is NULL.

Cause: A NULL callback was passed.

Action: n/a

NZE-29042: Read buffer is not empty.

Cause: There is an attempt to free a read buffer that is not empty.

Action: n/a

NZE-29043: Read is required.

Cause: Renegotiation with the peer has not yet started. There is application data which must be processed before the handshake can proceed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29044: Renegotiation has already been requested.

Cause: Renegotiation has already been requested.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29045: Renegotiation request has been refused.

Cause: A renegotiated handshake has been refused by the peer.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29046: Session is resumable.

Cause: Server is trying to resume a session with different session parameters.

Action: Server should resume the session with the correct session parameters.

NZE-29047: Mismatch in Transport Layer Security extension

Cause: Neither side can agree on a TLS extension.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29048: Unexpected message received.

Cause: An unexpected message has been received.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29049: Unknown record

Cause: The record type is unknown.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29050: Installed client authentication mode is not supported.

Cause: The enabled client authentication mode(s) cannot be used within the selected cipher suite.

Action: Enable a client authentication mode that can be used within the selected cipher suite.

NZE-29051: The given public key type is not supported.

Cause: The public key in the first certificate is not supported.

Action: Check to ensure that the certificate complies with the X.509v3 standard.

NZE-29052: Write buffer is not empty.

Cause: There is an attempt to free a write buffer that is not empty.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29084: The parameter specified is illegal.

Cause: The parameter is not correct. For example, it could be bad input, or an invalid message.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29095: Index is not correct.

Cause: The instance identified by the index parameter doesn't exist.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29096: The given length is incorrect.

Cause: The specified length is too small or is invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29100: Cannot create local key ID.

Cause: Creation of local key identifier for the certificate or the private key failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29101: Cannot add private key bag.

Cause: The private key could not be added to the PKCS#12 object. Possible reasons are: (i) A required parameter is NULL (ii) The PKCS#12 construct is not supported (iii) An ASN.1 encoding error occurred in the certificate.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29102: Cannot add certificate bag.

Cause: Creation of certificate bag failed. The application could have run out of memory.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29103: Cannot create PKCS #12 wallet.

Cause: Creation of PKCS#12 wallet failed possibly due to memory allocation failure.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29104: Cannot add certificate request.

Cause: Adding certificate request to the PKCS#12 wallet failed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29105: Cannot export PKCS #12 wallet.

Cause: A required parameter is NULL or the PKCS#12 construct is not supported.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29106: Cannot import PKCS #12 wallet.

Cause: A required parameter is NULL or the BER-encoding is malformed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29107: Cannot create PKCS #12 wallet.

Cause: PKCS#12 wallet creation failed. The application may have run out of memory.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29108: Cannot initialize random object.

Cause: The random object could not be initialized or seeded. Either memory allocation has failed or the pseudo random number generator module has not been installed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29109: Cannot create private key object.

Cause: The private key object could not be created. Memory allocation may have failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29110: Invalid PKCS #12 bag type

Cause: The PKCS #12 bag type is invalid. Either one of the required parameters is NULL or the requested OID is not in the list.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29111: Invalid index

Cause: The index passed for getting the bag type is less than 1.

Action: Check to ensure that the index is greater than 1.

NZE-29112: Cannot access attributes from a PKCS #12 certificate bag.

Cause: The certificate cannot be accessed. One of the required parameters is probably NULL, or the index specified by the application does not contain a certbag, or the certificate could be malformed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29113: Cannot access attributes from a PKCS #12 key bag.

Cause: Retrieval of the private key failed. One of the required parameters is probably NULL or the index specified by the application does not contain a key bag.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29114: Cannot import private key.

Cause: The private key could not be imported. One of the required parameters could be NULL or the encoded private key could be malformed.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29115: Cannot export private key.

Cause: The private key could not be exported. Either the application ran out of memory or the key type is not valid.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29116: Cannot get PKCS #12 attributes.

Cause: Retrieval of an attribute failed. One of the required parameters could be NULL.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29117: Cannot add PKCS #12 attributes.

Cause: Could not add an attribute. The attribute parameter could be NULL.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29118: Cannot create PKCS #12 attributes.

Cause: Creation of the attributes failed, possibly due to a memory allocation error.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29119: Cannot import certificate.

Cause: The certificate cannot be imported. One of the required parameters could be NULL or the certificate has an invalid X.509 BER or DER encoding.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29120: Cannot export certificate.

Cause: The certificate cannot be exported. One of the required parameters could be NULL.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29122: could not add pkcs11 info to the pkcs12 wallet

Cause: Failed while adding pkcs11 information into a pkcs12 wallet.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29123: could not get pkcs11 info from the pkcs12 wallet

Cause: An error was encountered while retrieving pkcs11 information from the wallet.

Action: Enable tracing to determine the exact cause of this error. Contact Oracle customer support if needed.

NZE-29124: pkcs11 library name already set

Cause: pkcs11 library information was already set in the wallet.

Action: Use a different wallet that does not have this information. If issue persists, enable tracing to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-29125: pkcs11 token label already set

Cause: pkcs11 token label information was already set in the wallet.

Action: Use a different wallet that does not have this information. If issue persists, enable tracing to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-29126: pkcs11 token passphrase already set

Cause: The pkcs11 token passphrase can be set only once in the wallet.

Action: Use a different wallet that does not have this information. If issue persists, enable tracing to determine the exact cause of the error. Contact Oracle customer support if needed.

NZE-29127: unknown pkcs11 information

Cause: An unknown pkcs11 information type was encountered. The wallet may have been corrupted due to a system error or memory corruption.

Action: Enable tracing and retry the failed operation. Contact Oracle customer support with the trace output.

NZE-29128: pkcs11 library name not set

Cause: The wallet does not have pkcs11 library information.

Action: Ensure that the wallet was created with valid library location or update the wallet with this information.

NZE-29129: pkcs11 token label not set

Cause: The wallet does not have pkcs11 token label information.

Action: Ensure that the wallet was created with valid token label information or update the wallet with this information.

NZE-29130: pkcs11 token passphrase not set

Cause: The wallet does not have pkcs11 token passphrase.

Action: Ensure that the wallet was created with valid token passphrase information or update the wallet with this information.

NZE-29131: pkcs11 certificate label already set in wallet

Cause: The pkcs11 certificate label was already set in the wallet.

Action: Use an empty wallet (created with orapki).

NZE-29135: Seed generation for Random Number Generator failed.

Cause: Generation of seed for random number generator failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29136: The allocated buffer is too small.

Cause: The output buffer is too small.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29137: The global context is incorrect.

Cause: The global context is incorrectly configured or invalid.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29140: Cannot create certificate object.

Cause: Creation of the certificate object failed. The application could have run out of memory.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29141: Cannot import in the der format.

Cause: Cannot import the certificate into the certificate object. The reason could be a malformed certificate.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29150: DES self-test failure

Cause: DES power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29151: 3DES self-test failure

Cause: 3DES power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29152: SHA-1 self-test failure

Cause: The SHA-1 power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29153: RSA self-test failure

Cause: The RSA power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29154: deterministic RNG self-test failure

Cause: The deterministic Random Number Generator power up self-test has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29155: continuous key pair consistency check self-test failure

Cause: The public-private key pair check test failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29156: conditional RNG self-test failure

Cause: Continuous Random Number Generator test, which is needed in FIPS mode, has failed.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29157: Unable to build an absolute path to the library.

Cause: Not able to construct an absolute path to the location of the library.

Action: Enable tracing and attempt the connection again. Contact Oracle customer support with the trace output.

NZE-29158: Unable to open library.

Cause: Opening of the library failed.

Action: Check to ensure that the library is present in the location specified, and that it has the appropriate file permissions.

NZE-29159: Unable to read library.

Cause: Not able to read the library on which the DAC check has to be performed. Read call failed.

Action: Check if the library has the appropriate file permissions.

NZE-29160: NZ library being used is different.

Cause: The NZ library being used at runtime is not the same one on which the digest was computed for the software integrity check.

Action: Check to ensure that the library being used is the same as the one on which the digest was pre-computed.

NZE-29161: software integrity self-test failure

Cause: The software integrity check test on the NZ shared library has failed.

Action: Check to ensure that the library being used is the same as the one on which the digest was pre-computed.

NZE-29162: Non-FIPS cipher suites being used in FIPS mode.

Cause: The cipher suite being used does not contain FIPS-approved algorithms.

Action: Use cipher suites that contain FIPS-approved algorithms.

NZE-29163: Third party PKI vendor is not supported in FIPS mode.

Cause: Third party PKI vendors like Entrust and MCS are not supported in FIPS mode.

Action: Use only Oracle PKI when running in FIPS mode.

NZE-29164: External PKCS #12 wallet is not supported in FIPS mode.

Cause: PKCS #12 wallets created using third party software cannot be used in FIPS mode.

Action: Use only PKCS #12 wallets created by Oracle Wallet Manager when running in FIPS mode.

NZE-29166: Bad key size in FIPS mode.

Cause: User attempted to use a key size that is not allowed in FIPS mode

Action: Ensure that the key size meets FIPS usage requirement. For example, RSA key modulus cannot be less than 1024 bits in FIPS mode.

NZE-29176: CRL signature verification failed

Cause: A CRL is verified before being used. CRL signature cannot be verified.

Action: Get a new CRL from CA

NZE-29177: certificate serial number is not in CRL

Cause: Cert is not revoked

Action: n/a

NZE-29178: certificate serial number is in CRL

Cause: Cert has been revoked

Action: Reject the certificate

NZE-29179: certificate validation check failed

Cause: Could not complete checking certificate status with a CRL.

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29180: Unsupported validation protocol

Cause: The certificate validation protocol is not supported

Action: Make sure a supported certificate validation protocol is specified

NZE-29181: ldap_open failed

Cause: Could not connect to the LDAP server

Action: Ensure that correct LDAP information was provided. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-29182: ldap_bind failed

Cause: Could not log in to the LDAP server

Action: Ensure that correct LDAP credentials were provided. Enable tracing to find more information. Contact Oracle customer support if needed.

NZE-29183: ldap_search failed

Cause: Failed to complete search operation in LDAP server

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29184: ldap_result failed

Cause: Failed to retrieve results from LDAP operation

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29185: ldap_first_attribute failed

Cause: Could not get the first attribute from LDAP entry.

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29186: ldap_get_values_len failed

Cause: Failed to retrieve attribute values from LDAP entry

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29187: unsupported validation mechanism

Cause: The validation mechanism specified in OID is not supported

Action: Make sure a supported validation mechanism is set in OID

NZE-29188: ldap_count_entries failed

Cause: Failed to get count of entries from a search result chain.

Action: Enable tracing to find more information on this error. Contact Oracle customer support if needed.

NZE-29189: No entry found in OID

Cause: CRL not found in OID

Action: Upload the CRL to OID

NZE-29190: Multiple entries in OID

Cause: For a given issuer name there should be only one CRL in OID

Action: Make sure there is only one CRL for a given issuer name in OID

NZE-29191: OID connection information not set

Cause: To connect to OID the connection information must be available

Action: Set the OID connection information.

NZE-29192: Validation mechanism not set in OID

Cause: The validation mechanism to be used is not set in OID

Action: Set validation mechanism to be used in OID at cn=ValidationMechanism, cn=Validation, cn=PKI, cn=Products, cn=OracleContext

NZE-29193: no CRL found using CRLDP mechanism

Cause: A CRL could not be fetched using CRL Distribution point (CRLDP)

Action: Contact the CA

NZE-29194: no CRL found in cache

Cause: CRL not in cache

Action: n/a

NZE-29195: CRL is expired

Cause: CRL nextUpdate time is in the past

Action: Get a new CRL from the CA

NZE-29222: Distinguished name does not match.

Cause: Distinguished name (DN) on certificate doesn't match user.

Action: Create the global user in the database with the DN that matches with the one in the user certificate on the client side.

NZE-29223: Cannot create certificate chain.

Cause: Unable to create a certificate chain with the existing trust points for the certificate that is to be installed.

Action: Install the trust point that signed the certificate.

NZE-29224: Cannot locate matching certificate request.

Cause: No matching certificate request for the certificate was found.

Action: Install the correct certificate.

NZE-29225: Certificate already installed.

Cause: Attempting to install a certificate into a persona which already has it.

Action: Do not install the certificate.

NZE-29226: No matching private key found.

Cause: Could not locate a matching private key in the persona for the given certificate (public key).

Action: n/a

NZE-29227: Certificate is expired.

Cause: Certificate is no longer valid..

Action: Obtain another certificate or renew this certificate.

NZE-29228: Cannot calculate the number of bytes for output.

Cause: The cryptographic engine is confused about the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29229: the magic number found in the header does not match expected

Cause: The input TDU has either been corrupted or is not being used correctly.

Action: Check that the TDU is being used from the beginning. If possible, compare the size of the TDU upon generation to the size being used.

NZE-29230: the header length is not sufficient for message header

Cause: The input TDU has either been corrupted or it is not being used correctly.

Action: Check that the TDU is being used from the beginning. If possible, compare the size of the TDU upon generation to the size being used.

NZE-29231: the cryptographic engine failed to initialize

Cause: During initialization of the cryptographic engine, some failure occurred. Possible causes include running out of memory and trying to seed the random number generator.

Action: Make sure the executable has been linked with compatible library versions, and that you are not running out of swap space.

NZE-29232: the cryptographic engine key initialization failed

Cause: During initialization of a key for cryptography, some failure occurred. This includes running out of memory and passing illegal arguments.

Action: Make sure the executable has been linked with compatible library versions, and that the correct parameters are being used for the cryptographic functions.

NZE-29233: the key object could not be encoded

Cause: The key object may be corrupted or may be an unsupported type.

Action: Check the key object being passed to the encoding routine.

NZE-29234: a key object was not extracted from encoding

Cause: The encoding may be corrupted or may not be a key object at all.

Action: Check the encoding and parameters passed to decoding routine.

NZE-29235: the key information could not be retrieved

Cause: The key may be corrupted or may be an unsupported type.

Action: Check the parameters being used with the cryptographic functions.

NZE-29236: the random number generator will not accept seed

Cause: The cryptographic engine may have run out of memory.

Action: Make sure the executable has been linked with compatible library versions.

NZE-29237: the cryptographic engine could not finish the algorithm

Cause: The cryptographic engine does not have enough information to correctly finish applying the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29238: the cryptographic engine could not apply the algorithm

Cause: The cryptographic engine does not have enough information to correctly apply the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29239: the cryptographic engine could not initialize the algorithm

Cause: The cryptographic engine does not have enough information to correctly initialize the algorithm.

Action: Check the parameters being used with the cryptographic functions.

NZE-29240: the cryptographic engine does not recognize the algorithm

Cause: The application may be passing wrong parameters.

Action: Check the parameters being used with the cryptographic functions.

NZE-29241: a buffer block needs more space but its length is fixed

Cause: The application has preallocated an output buffer that is too short for the operation and has specified that the buffer should not grow as needed.

Action: Either preallocate a larger buffer or allow the toolkit to grow the output buffer as needed.

NZE-29242: the asymmetric key is too short to be used with the data.

Cause: An asymmetric key must be at least 11 bytes longer than the data it is being used to encrypt.

Action: Use an asymmetric key with more bits or break the data into smaller pieces.

NZE-29243: the toolkit does not recognize the type of key being used

Cause: The application may be passing wrong parameters.

Action: Check the parameters being used with the toolkit functions.

NZE-29245: the toolkit does not recognize the function being used

Cause: The application is probably passing the wrong parameters.

Action: Check the parameters being used with the toolkit functions.

NZE-29246: the toolkit could not parse the tdu

Cause: The TDU could be corrupted.

Action: Check the parameters being used with the toolkit functions.

NZE-29247: an unopen toolkit object was used before it was opened

Cause: Some toolkit objects must be opened before they can be used.

Action: Check the parameters being used with the toolkit functions.

NZE-29248: an unrecognized WRL was used to open a wallet

Cause: WRL's have a specific set of types and must be formatted correctly.

Action: Check the parameters being used with the toolkit functions.

NZE-29249: an unrecognized state was passed to a cryptographic function

Cause: The application is probably passing the wrong parameters.

Action: Check the parameters being used with the toolkit functions.

NZE-43000 to NZE-43021

NZE-43000: pkcs11 library not found

Cause: The PKCS11 library could not be found.

Action: Make sure that the pkcs11 library is at the location specified in the wallet.

NZE-43001: pkcs11 token not found

Cause: The PKCS11 token could not be found.

Action: Make sure that a token with correct label is present in slot.

NZE-43002: pkcs11 passphrase is wrong

Cause: The PKCS11 passphrase is wrong.

Action: Make sure that the token passphrase specified is correct.

NZE-43005: pkcs11: No tokens present

Cause: a token is not present in the slot

Action: Place a pkcs11 token in the slot

NZE-43011: pkcs11: Token login failed

Cause: To login to the pkcs11 token a correct passphrase is needed

Action: Check the token passphrase.

NZE-43014: pkcs11: finding private key on token error

Cause: error occurred while finding private key on token

Action: Make sure the private key corresponding to the certificate in wallet is on the token. Check trace message

NZE-43015: pkcs11: key pair gen error

Cause: error occurred while generating key pair using HSM

Action: Check trace message

NZE-43017: pkcs11: No certificate found on the smart card/HSM

Cause: No certificate was found on the smart card/HSM.

Action: Follow smart card/HSM vendor documentation to populate the smart card/HSM with certificate.

NZE-43018: pkcs11: No user certificate found on the smart card/HSM

Cause: No user certificate was found on the smart card/HSM.

Action: Follow smart card/HSM vendor documentation to populate the smart card/HSM with certificate and private key.

NZE-43019: pkcs11: No certificate found on smart card/HSM label with given cert label

Cause: There were no certificate labels on the smart card/HSM that matched the certificate label specified in the wallet.

Action: Follow smart card/HSM vendor documentation to set certificate label in smart card/HSM.

NZE-43020: pkcs11: Multiple certificates found on smart card/HSM with given cert label

Cause: Certificates with identical labels were found in the smart card/HSM.

Action: Follow smart card/HSM vendor documentation to assign unique certificate labels to certificates.

NZE-43021: pkcs11: Certificate with given cert label is not a user cert

Cause: The certificate with the specified certificate label did not have a matching private key in the smart card/HSM.

Action: Follow smart card/HSM vendor instructions to create credentials (certificate/private key) in smart card/HSM.

O2F-00301 to O2F-00341

O2F-00301: Error attempting to read from the INTYPE file

Cause: An operating system error occurred while attempting to read from the INTYPE file.

Action: Try opening the INTYPE file with an editor to make sure you are able to access the file.

O2F-00302: Unable to allocate memory

Cause: OTT was unable to allocate memory.

Action: Contact ORACLE customer support.

O2F-00303: No INTYPE file was specified

Cause: The required option INTYPE was not specified.

Action: Set the INTYPE option to the name of the file containing names of types for OTT to translate. The INTYPE option may be specified on the command line or in a CONFIG file.

O2F-00304: Invalid filename for the INTYPE file

Cause: The filename specified for the INTYPE file is not syntactically correct.

Action: Make sure you spelled the filename of the INTYPE file correctly.

O2F-00305: Error opening the INTYPE file for reading

Cause: An operating system error occurred while attempting to open the INTYPE file.

Action: Make sure you spelled the filename of the INTYPE file correctly. Try opening the INTYPE file with an editor to make sure you have access to the file.

O2F-00306: Unable to close the INTYPE file

Cause: An operating system error occurred while attempting to close the INTYPE file.

Action: Try opening the INTYPE file with an editor to make sure you are able to access the file.

O2F-00307: Unable to read the INTYPE file

Cause: The first token of the INTYPE file was not read. Either an operating system error occurred while attempting to read from the INTYPE file, or all lines of the INTYPE file are blank lines or comment lines.

Action: Try opening the INTYPE file with an editor to make sure you are able to access the file. Make sure the INTYPE file contains one or more type specifications.

O2F-00308: No type specifications were seen in the INTYPE file

Cause: Either there are no type specifications in the INTYPE file, or the first type specification could not be read due to a previously reported error.

Action: Fix any previously reported errors. Make sure there are one or more type specifications in the INTYPE file.

O2F-00309: Name of user-defined type is illegal or missing

Cause: The name of a user-defined type is expected following the keyword TYPE at the beginning of a type specification. No legal type name was seen.

Action: Make sure that the type specification is syntactically correct, and that the type name is spelled correctly.

O2F-00310: Illegal or missing identifier name

Cause: A legal C or C++ identifier was expected following AS, but was not seen.

Action: Use a legal C or C++ identifier, consisting of letters, digits, and underscores not beginning with a digit.

O2F-00311: Illegal or missing file name

Cause: A legal file name was expected, but was not seen.

Action: Make sure your TYPE file syntax is correct. Use a correct file name.

O2F-00312: Illegal or missing type version string

Cause: A type version name was expected, but was not seen.

Action: Make sure your TYPE file syntax is correct. Use a correct version name.

O2F-00313: Illegal or missing attribute name

Cause: An attribute name was expected in the INTYPE file, but was not seen.

Action: Make sure your TYPE file syntax is correct. Use a correct attribute name.

O2F-00314: AS expected but not seen in the INTYPE file

Cause: Incorrect syntax in the INTYPE file.

Action: Make sure your TYPE file syntax is correct.

O2F-00315: An attribute of a type is listed twice in a type specification

Cause: An attribute of a user-defined type is listed twice in a type specification in the INTYPE file. The second occurrence is ignored.

Action: Remove one of the two occurrences of the attribute.

O2F-00316: An unexpected token was seen at the end of a type specification

Cause: There is a syntax error in the INTYPE file.

Action: Check your documentation to make sure the type specifications in the INTYPE file are syntactically correct. Check your documentation to make sure the type specifications

O2F-00317: Error opening the ERRTYPE file for writing

Cause: An operating system error occurred while attempting to open the ERRTYPE file for writing.

Action: Make sure you spelled the ERRTYPE filename correctly. Try creating or modifying the ERRTYPE file to make sure you have write access to the file.

O2F-00318: Error writing to the OUTTYPE file

Cause: An operating system error occurred when attempting to write to the OUTTYPE file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2F-00319: No OUTTYPE file specified

Cause: The required option OUTTYPE was not specified.

Action: Set the OUTTYPE option to the name of the file to which the TYPE file produced by OTT should be written. The OUTTYPE option may be specified on the command line or in a CONFIG file.

O2F-00320: Invalid filename for the OUTTYPE file

Cause: The filename specified for the OUTTYPE file is not syntactically correct.

Action: Make sure you spelled the filename of the OUTTYPE file correctly.

O2F-00321: Error opening the OUTTYPE file for writing

Cause: An operating system error occurred while attempting to open the OUTTYPE file.

Action: Make sure you spelled the filename of the OUTTYPE file correctly. Make sure you have operating system permission to open the the file.

O2F-00322: Unable to close the OUTTYPE file

Cause: An operating system error occurred while attempting to close the OUTTYPE file.

Action: Try opening the OUTTYPE file with an editor to make sure you are able to access the file.

O2F-00323: Internal error in OTT facility O2F

Cause: An internal OTT error occurred in the O2F component of OTT.

Action: Contact ORACLE customer support.

O2F-00324: Unable to convert from the database character set to the compiler character set

Cause: The name of a type, attribute, or method cannot be converted from the client character set in effect when OTT was invoked to the compiler character set (typically ASCII or EBCDIC).

Action: A name is translated first from the database character set to the client character set, and then from the client character set to the compiler character set. The client character set is specified in a platform-dependent manner (On UNIX platforms, the client character set is specified by setting the NLS_LANG environment variable). Use a client character set that can be translated to the compiler character set. The compiler character set itself is one such character set. Specify synonyms in the INTYPE file for any names of database objects that cannot be successfully translated to the client character set.

O2F-00325: None of the characters in a name were legal identifier characters

Cause: None of the characters in the name of a database entity could be translated to a character that may begin a C or C++ identifier, such as a letter or an underscore.

Action: Specify an explicit translation for the name in the INTYPE file.

O2F-00326: Some characters in this name were not legal identifier characters

Cause: One or more characters in the name of a database entity could not be translated to a character that may appear in a C or C++ identifier, such as a letter, an underscore, or a digit. The characters that could not be translated were replaced with underscores.

Action: Make sure that the name is spelled correctly, and that it is terminated by a blank, the end of a line, or an equals sign ("="). You may use the translated name with added underscores, or you may specify an explicit translation for the name in the INTYPE file.

O2F-00327: CASE option has an illegal value

Cause: The value given for the CASE option in the INTYPE file is not legal.

Action: Change the value given for the CASE option to one of the following legal values: SAME, LOWER, UPPER, or OPPOSITE.

O2F-00328: Illegal INITFUNC name

Cause: The function name given for the INITFUNC option in the INTYPE file is not a legal C or C++ identifier.

Action: Specify the name of the INITFUNC function as a legal C or C++ identifier. This name can be given in the INTYPE file, given on the command line, or derived from the INITFILE name.

O2F-00329: Type or option specification expected

Cause: A type or option specification was expected in the INTYPE file, but was not seen.

Action: Check the INTYPE file for syntax errors. Supply a type or option specification. A type specification begins with the word TYPE. An option specification begins with the word CASE, INITFILE, or INITFUNC.

O2F-00330: Name exceeds 265 bytes in length

Cause: A name seen in the INTYPE file exceeds 265 bytes in length.

Action: Choose a shorter name.

O2F-00331: A syntactically illegal name was seen in the INTYPE file

Cause: A syntax error occurred in a name used in the INTYPE file.

Action: If the name is quoted, make sure that the quotes are at the beginning and at the end of the name. If a period (which separates a schema name from a type name) appears, make sure that the schema name and the type name are both present.

O2F-00332: A database link may not appear in the name of a user-defined type

Cause: A database link was seen in the name of a user-defined type. This feature is not yet supported.

Action: Declare the user-defined type in the database to which OTT connects.

O2F-00333: An unexpected token appeared where a keyword was expected in the INTYPE file

Cause: A keyword such as TYPE was expected in the INTYPE file, but an incorrect or misspelled keyword was seen.

Action: Verify that your TYPE specification obeys the syntax described in your documentation. Verify that your keyword is spelled correctly.

O2F-00334: A user-defined type is listed more than once in the INTYPE file

Cause: The same name of a user-defined type appears in more than one type specification. The duplicate specifications of the type name will be ignored.

Action: Put all of the information about the type, including all type name and attribute name translations, in a single TYPE specification, and eliminate the duplicate TYPE specifications.

O2F-00335: Internal error in O2F component of OTT

Cause: A request was made that all types in the database schema are to database.

Action: List the types to be processed in an INTYPE file. Contact ORACLE customer support.

O2F-00336: Error reported by subsystem:\n

Cause: A request was made to generate declarations for all the types in a database schema. An error occurred in a subsystem when accessing the database.

Action: Examine the error message reported by the subsystem to determine its cause. List the types to be processed in an INTYPE file.

O2F-00337: Schema not found, or no types found in schema

Cause: A request was made to generate declarations for all the types in a database schema. Either the schema was not found, no user-declared types were found in the schema, or unable to connect to Oracle.

Action: Ensure that a login/password string was specified for OTT and that the Oracle database can be accessed with it. Ensure that the USER_TYPES table contains at least one row.

O2F-00338: Illegal or missing package name

Cause: A legal Java package name was expected following IN or PACKAGE or IN PACKAGE, but was not seen.

Action: Use a legal Java package name.

O2F-00339: CODE option has an illegal value

Cause: The value given for the CODE option in the INTYPE file is not legal.

Action: Change the value given for the CODE option to one of the following legal values: C, ANSI_C, KR_C, JAVA, NATIVE_JAVA, ORACLE_JAVA.

O2F-00340: Name was null

Cause: A name had a length of 0 characters.

Action: This error should never be reported to the user. Contact ORACLE customer support.

O2F-00341: An error occurred for which no message is available

Cause: The cause of this error was not reported.

Action: Contact ORACLE customer support.

O2I-00101 to O2I-00133

O2I-00101: Invalid value for the USERID parameter

Cause: The value supplied for the USERID parameter is not a legal <varname>username</varname>/<varname>password</varname>[@<varname>databasename</varname>] string.

Action: Set the USERID option to the correct <varname>username</varname>/<varname>password</varname> or <varname>username</varname>/<varname>password</varname>@<varname>database name</varname> combination to use when connecting to the database. If you have an OPS\$ account, you may instead omit the USERID option, in which case OTT will attempt to connect to the database using the userid OPS\$<varname>username</varname>. The USERID option may be specified on the command line or in a CONFIG file.

O2I-00102: Unable to connect to Oracle

Cause: OTT could not connect to Oracle with the username, password, and, if applicable, database link that was supplied. Either the USERID option value was incorrect, or, if the USERID was not supplied, the userid OPS\$<varname>username</varname> was not accepted.

Action: Check that the username and password are current and correct. Run another program that connects to Oracle to verify that you can connect using that username and password.

O2I-00103: Two file names refer to the same HFILE file in the INTYPE file

Cause: Two different file names have been used in the INTYPE file to refer to the same HFILE file, or different file names have been used to refer to the same HFILE file on the command line and in the INTYPE file.

Action: Consistently refer to each HFILE file using the same file name.

O2I-00110: Internal error in OTT component O2I

Cause: An internal OTT error occurred in the O2I component of OTT.

Action: Contact ORACLE customer support.

O2I-00111: Unable to allocate memory

Cause: OTT was unable to allocate memory.

Action: Contact ORACLE customer support.

O2I-00112: Unable to write to the HFILE file

Cause: An operating system error occurred when attempting to write to the HFILE file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2I-00113: No HFILE specified

Cause: The HFILE file to which C declarations generated by OTT are written was not specified.

Action: Specify the global HFILE option on the command line or in a CONFIG file. You may choose a different HFILE for a particular type by specifying a different HFILE in the INTYPE file entry describing the type. If every INTYPE file entry specifies an HFILE, and if none of the types in the HFILE require declarations of types not mentioned there, the global HFILE option may be omitted. An INTYPE file generated by a previous invocation of OTT satisfies these conditions.

O2I-00114: Invalid HFILE file name

Cause: An HFILE file name was specified that is not syntactically correct.

Action: Make sure the HFILE filename is spelled correctly.

O2I-00115: Error opening the HFILE file

Cause: An operating system error occurred while attempting to open the HFILE file for writing.

Action: Make sure the HFILE filename is spelled correctly. Try creating or modifying the HFILE to make sure you have write access to the file.

O2I-00116: Unable to close the HFILE file

Cause: An operating system error occurred while attempting to close the HFILE file.

Action: Try creating or modifying the HFILE file to make sure you are able to access the file.

O2I-00117: Internal error: No message file for component O2U

Cause: The message file for the internal OTT component O2U was not found. OTT may not be correctly installed.

Action: Contact ORACLE customer support.

O2I-00118: This user-defined type was not found in the database

Cause: A user-defined type specified in the INTYPE file was not found in the database.

Action: Make sure the name of the type is spelled correctly. Make sure the type is actually declared in the database.

O2I-00119: Warning reported by subsystem:\n

Cause: A subsystem invoked by OTT reported a warning. This warning immediately follows the "Warning reported by subsystem" message.

Action: Examine the warning reported by the subsystem to determine its cause.

O2I-00120: Error reported by subsystem:\n

Cause: A subsystem invoked by OTT reported an error. This error immediately follows the "Error reported by subsystem" message.

Action: Examine the error message reported by the subsystem to determine its cause.

O2I-00121: No value was specified for the CODE option

Cause: The required CODE option was not specified on the command line or in a configuration file.

Action: Specify the CODE option on the command line or in a configuration file. Currently, the following values of the CODE option are supported: CODE=ANSI_C, CODE=KR_C, CODE=C

O2I-00122: Invalid filename for the INITFILE file

Cause: The filename specified for the INITFILE file is not syntactically correct.

Action: Make sure the filename of the INITFILE file is spelled correctly.

O2I-00123: Unable to close the INITFILE file

Cause: An operating system error occurred while attempting to close the INITFILE file.

Action: Try opening the INITFILE file with an editor to make sure the file can be accessed.

O2I-00124: Error opening the INITFILE file for writing

Cause: An operating system error occurred while attempting to open the INITFILE file for writing.

Action: Make sure the INITFILE filename is spelled correctly. Try creating or modifying the INITFILE file to make sure you have write access to the file.

O2I-00125: Error writing to the INITFILE file

Cause: An operating system error occurred when attempting to write to the INITFILE file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2I-00126: You must specify an INTYPE file with SCHEMA_NAMES=FROM_INTYPE

Cause: The option SCHEMA_NAMES=FROM_INTYPE requests that schema names be written to the OUTTYPE file as given in the INTYPE file. However, an INTYPE file was not specified.

Action: Either supply the name of an INTYPE file, or specify the SCHEMA_NAMES option ALWAYS or IF_NEEDED.

O2I-00127: Illegal INITFUNC name

Cause: The name of the INITFUNC function is not a legal C or C++ identifier.

Action: Specify the name of the INITFUNC function as a legal C or C++ identifier. This name may be given in the INTYPE file, given on the command line, or derived from the INITFILE name.

O2I-00128: Unable to write to the Java file

Cause: An operating system error occurred when attempting to write to a Java source file.

Action: Make sure you have operating system permission to write to the file. Also, make sure disk space is available.

O2I-00129: No Java file specified

Cause: The file to which Java declarations generated by OTT are written was not specified.

Action: This message should never be seen, because Java files are named after the classes declared within them. Contact ORACLE customer support.

O2I-00130: Invalid Java file name

Cause: A Java file name was specified that is not syntactically correct.

Action: Make sure the Java filename is spelled correctly.

O2I-00131: Error opening a Java file

Cause: An operating system error occurred while attempting to open a Java file for writing.

Action: Make sure the filename is spelled correctly. Try creating or modifying the file to make sure you have write access to the file.

O2I-00132: Unable to close a Java file

Cause: An operating system error occurred while attempting to close a Java file.

Action: Try creating or modifying the Java file to make sure you are able to access the file.

O2I-00133: An error occurred for which no message is available

Cause: The cause of this error was not reported.

Action: Contact ORACLE customer support.

O2U-00200 to O2U-00212

O2U-00200: Internal error in OTT facility O2U

Cause: An internal OTT error occurred in the O2U facility of OTT.

Action: Contact ORACLE customer support.

O2U-00201: Illegal arguments to function o2upt()

Cause: Illegal arguments were passed to the function o2upt(). This is an internal error that should not be encountered by an end user.

Action: Contact ORACLE customer support.

O2U-00202: Invalid data passed to function

Cause: Arguments with incorrect values were passed to the function o2upt(). This is an internal error that should not be encountered by the end user.

Action: Contact ORACLE customer support.

O2U-00203: Type to be declared must be an object type or a named collection type

Cause: You have asked OTT to generate code for a type it does not support. When generating Java code, OTT will only generate code for object types. When generating C declarations, OTT will only generate declarations for object types and named collection types.

Action: You are probably asking OTT to declare a built-in type, or, if you are generating Java code, a named collection type. Do not ask OTT to generate a declaration for this type.

O2U-00204: Unable to convert from the database character set to the compiler character set

Cause: The name of a type, attribute, or method cannot be converted from the client character set in effect when OTT was invoked to the compiler character set (typically ASCII or EBCDIC).

Action: A name is translated first from the database character set to the client character set, and then from the client character set to the compiler character set. The client character set is specified in a platform-dependent manner (On UNIX platforms, the client character set is specified by setting the NLS_LANG environment variable.) Use a client character set that includes the character set of the INTYPE file and can be translated to the compiler character set. The database character set is one such character set. Specify synonyms in the INTYPE file for any names of database objects that cannot be successfully translated to the client character set.

O2U-00205: None of the characters in a type name were legal identifier characters

Cause: None of the characters in the name of a user-defined type could be translated to a character that can begin a C or C++ identifier, such as a letter or an underscore.

Action: Specify an explicit translation for the type name in the INTYPE file.

O2U-00206: Some characters in a type name were not legal identifier characters

Cause: One or more characters in the name of a user-defined type could not be translated to a character that can appear in a C or C++ identifier, such as a letter, an underscore, or a digit. The characters that could not be translated were replaced with underscores.

Action: Specify an explicit translation for the type name in the INTYPE file, or just use the translated type name with added underscores.

O2U-00207: None of the characters in an attribute name were legal identifier characters

Cause: None of the characters in the name of an attribute of a type could be translated to a character that can begin a C or C++ identifier, such as a letter or an underscore. To find the affected attribute, look in the declaration generated for this type for data member names that are obviously incorrect.

Action: Specify an explicit translation for the attribute name in the INTYPE file.

O2U-00208: One or more characters in an attribute name were not legal identifier characters

Cause: If an attribute name contains one or more characters that can not be translated to a legal C or C++ identifier character, the characters that can not be translated are replaced with underscores. To find the affected attribute or attributes, look in the declaration generated for this type for data member names that have extra underscores not present in the original attribute names.

Action: Specify explicit translations for the affected attribute names in the INTYPE file, or just use the translated attribute names with added underscores.

O2U-00209: Attribute or function name to be translated was not found

Cause: This name, for which a translation was requested, is not the name of an attribute or a function of the current type.

Action: Make sure that the name is spelled correctly, and is the name of an attribute or function defined in the current type.

O2U-00210: Unable to allocate memory

Cause: OTT was unable to allocate memory.

Action: Contact ORACLE customer support.

O2U-00211: A type without attributes was translated

Cause: OTT translated a type without attributes. The corresponding C-type will be a struct without any components, which is not legal C. The empty type in the database may be the result of an error during type creation. Additionally, incomplete types may be used temporarily in the creation of types that reference one another.

Action: Re-create a full version of the type in the database and then re-run OTT.

O2U-00212: An error occurred for which no message is available

Cause: The cause of this error was not reported.

Action: Contact ORACLE customer support.

OCI-00601 to OCI-31199

OCI-00601: cleanup lock conflict

Cause: PMON process runs into lock conflict trying to recover processes.

Action: This is trapped internally, no action necessary.

OCI-00602: internal programming exception

Cause: Internal programming exception.

Action: Report as a bug. Caution: The following error code is not relocatable.

OCI-00972: identifier is too long

Cause: An identifier with more than 30 characters was specified.

Action: Specify at most 30 characters.

OCI-01841: (full) year must be between -4713 and +9999, and not be 0

Cause: Illegal year entered

Action: Input year in the specified range

OCI-01854: julian date must be between 1 and 5373484

Cause: An invalid Julian date was entered.

Action: Enter a valid Julian date between 1 and 5373484.

OCI-01858: a non-numeric character was found where a numeric was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a number where a number was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

OCI-01859: a non-alphabetic character was found where an alphabetic was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a letter where a letter was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

OCI-01861: literal does not match format string

Cause: Literals in the input must be the same length as literals in the format string (with the exception of leading whitespace). If the "FX" modifier has been toggled on, the literal must match exactly, with no extra whitespace.

Action: Correct the format string to match the literal.

OCI-01862: wrong number of digits for this format item

Cause: The number of digits used for this format item is not equal to the number necessary for this format when specifying Format eXact ("FX") for this item.

Action: Fill out this format item with leading zeros to the number necessary for this format. (This is generally the number of characters in the format code--DD needs 2 digits, for example. The exceptions are HH24 & HH12, which both need 2, and J, which needs 9.)

OCI-01864: the date is out of range for the current calendar

Cause: Your calendar doesn't extend to the specified date.

Action: Specify a date which is legal for this calendar.

OCI-01865: not a valid era

Cause: Era input does not match a known era.

Action: Provide a valid era on input.

OCI-01867: the interval was invalid

Cause: The character string you specified is not a valid interval.

Action: Please specify a valid interval.

OCI-01868: the leading precision of the interval was too small

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

OCI-01870: the intervals or datetimes were not mutually comparable

Cause: The intervals or datetimes are not mutually comparable.

Action: Specify a pair of intervals or datetimes that are mutually comparable.

OCI-01871: the number of seconds must be less than 60

Cause: The number of seconds specified was greater than 59.

Action: Specify a value for seconds that is 59 or smaller.

OCI-01873: the leading precision of the interval was too small

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

OCI-01874: time zone hour must be between -12 and 14

Cause: The time zone hour specified was not in the valid range.

Action: Specify a time zone hour between -12 and 14.

OCI-01875: time zone minute must be between -59 and 59

Cause: The time zone minute specified was not in the valid range.

Action: Specify a time zone minute between -59 and 59.

OCI-01876: year must be at least -4713

Cause: The specified year was not in range.

Action: Specify a year that is greater than or equal to -4713.

OCI-01878: specified field not found in datetime or interval

Cause: The specified field was not found in the datetime or interval.

Action: Make sure that the specified field is in the datetime or interval.

OCI-01879: the hh25 field must be between 0 and 24

Cause: The specified hh25 field was not in the valid range.

Action: Specify an hh25 field between 0 and 24.

OCI-01880: the fractional seconds must be between 0 and 999999999

Cause: The specified fractional seconds were not in the valid range.

Action: Specify a value for fractional seconds between 0 and 999999999.

OCI-01881: time zone region ID is invalid

Cause: The region ID referenced an invalid region.

Action: Contact Oracle Support Services.

OCI-01882: time zone region not found

Cause: The specified region name was not found.

Action: Contact Oracle Support Services.

OCI-01883: overlap was disabled during a region transition

Cause: The region was changing state and the overlap flag was disabled.

Action: Contact Oracle Support Services.

OCI-01884: divisor is equal to zero

Cause: An attempt was made to divide by zero.

Action: Avoid zero divisor.

OCI-01890: NLS error detected

Cause: An NLS error was detected.

Action: Look for additional error messages and take appropriate action. If there are no additional errors, call Oracle Support Services.

OCI-01898: too many precision specifiers

Cause: While trying to truncate or round dates, extra data was found in the date format picture

Action: Check the syntax of the date format picture and retry.

OCI-02083: database name has illegal character '<varname>string</varname>'

Cause: Supplied database name can contain only A-Z, 0-9, '_', '#', '\$', '.' and '@' characters.

Action: n/a

OCI-02084: database name is missing a component

Cause: Supplied database name cannot contain a leading '.', trailing '.' or '@', or two '.' or '@' in a row.

Action: n/a

OCI-04020: deadlock detected while trying to lock object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: While trying to lock a library object, a deadlock is detected.

Action: Retry the operation later.

OCI-04021: timeout occurred while waiting to lock object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: While waiting to lock a library object, a timeout is occurred.

Action: Retry the operation later.

OCI-04022: nowait requested, but had to wait to lock dictionary object

Cause: Had to wait to lock a library object during a nowait request.

Action: Retry the operation later.

OCI-04028: cannot generate diana for object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: Cannot generate diana for an object because of lock conflict.

Action: Please report this error to your support representative.

OCI-04029: error ORA-<varname>string</varname> occurred when querying <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: The table or view being queried might be missing. The error number indicates the error.

Action: Fix the error.

OCI-04030: out of process memory when trying to allocate <varname>string</varname> bytes (<varname>string</varname>,<varname>string</varname>)

Cause: Operating system process private memory has been exhausted

Action: n/a

OCI-04031: unable to allocate <varname>string</varname> bytes of shared memory ("<varname>string</varname>",<varname>string</varname>,"<varname>string</varname>",<varname>string</varname>)

Cause: More shared memory is needed than was allocated in the shared pool.

Action: Either use the dbms_shared_pool package to pin large packages, reduce your use of shared memory, or increase the amount of available shared memory by increasing the value of the init.ora parameter "shared_pool_size".

OCI-04054: database link <varname>string</varname> does not exist

Cause: During compilation of a PL/SQL block, an attempt was made to use a non-existent database link.

Action: Either use a different database link or create the database link.

OCI-04060: insufficient privileges to execute <varname>string</varname>

Cause: Attempt to execute a stored procedure without sufficient privileges.

Action: Get necessary privileges.

OCI-04061: existing state of <varname>string</varname> has been invalidated

Cause: Attempt to resume the execution of a stored procedure using the existing state which has become invalid or inconsistent with the stored procedure because the procedure has been altered or dropped.

Action: Try again; this error should have caused the existing state of all packages to be re-initialized.

OCI-04062: timestamp of <varname>string</varname> has been changed

Cause: Attempt to execute a stored procedure to serve an RPC stub which specifies a timestamp that is different from the current timestamp of the procedure.

Action: Recompile the caller in order to pick up the new timestamp.

OCI-04063: <varname>string</varname> has errors

Cause: Attempt to execute a stored procedure or use a view that has errors. For stored procedures, the problem could be syntax errors or references to other, non-existent procedures. For views, the problem could be a reference in the view's defining query to a non-existent table.

Action: Fix the errors and/or create referenced objects as necessary.

OCI-04064: not executed, invalidated <varname>string</varname>

Cause: Attempt to execute a stored procedure that has been invalidated.

Action: Recompile it.

OCI-04065: not executed, altered or dropped <varname>string</varname>

Cause: Attempt to execute a stored procedure that has been altered or dropped thus making it not callable from the calling procedure.

Action: Recompile its dependents.

OCI-04066: non-executable object, <varname>string</varname>

Cause: Attempt to execute a non-procedure.

Action: Make sure that a correct name is given.

OCI-04067: not executed, <varname>string</varname> does not exist

Cause: Attempt to execute a non-existent stored procedure.

Action: Make sure that a correct name is given.

OCI-04068: existing state of packages<varname>string</varname><varname>string</varname> has been discarded

Cause: One of errors 4060 - 4067 when attempt to execute a stored procedure.

Action: Try again after proper re-initialization of any application's state.

OCI-19200: Invalid column specification

Cause: All input arguments must be valid columns

Action: Specify a valid list of columns

OCI-19201: Datatype not supported

Cause: The particular datatype is not supported in the XMLGEN operator

Action: Specify only supported datatypes as arguments to the XMLGEN operator

OCI-19202: Error occurred in XML processing<varname>string</varname>

Cause: An error occurred when processing the XML function

Action: Check the given error message and fix the appropriate problem

OCI-19203: Error occurred in DBMS_XMLGEN processing<varname>string</varname>

Cause: An error occurred when processing the DBMS_XMLGEN functions

Action: Check the given error message and fix the appropriate problem

OCI-19204: Non-scalar value '<varname>string</varname>' is marked as XML attribute

Cause: Only scalar values (i.e. values which are not of object or collection type) can be marked as XML attribute,i.e. is prefixed by '@'. In this case, a non-scalar value was prefixed with '@'

Action: Remove the '@' sign, or make the value a scalar.

OCI-19205: Attribute '<varname>string</varname>' qualifies a non-scalar value in the select list

Cause: The attribute immediately follows a value of object or collection type in the select list or type definition.

Action: Remove the '@' sign, or make the previous value a scalar.

OCI-19206: Invalid value for query or REF CURSOR parameter

Cause: The queryString argument passed to DBMS_XMLGEN.newContext was not a valid query, or REF CURSOR.

Action: Rewrite the query so that the queryString argument is a valid query or REF CURSOR.

OCI-19207: scalar parameter <varname>string</varname> of XMLELEMENT cannot have an alias.

Cause: The scalar parameter to XMLELEMENT has been qualified with an alias.

Action: Remove the AS clause of the scalar element.

OCI-19208: parameter <varname>string</varname> of function <varname>string</varname> must be aliased

Cause: The indicated parameter of the XML generation function has not been aliased, although it is an expression.

Action: Specify an alias for the expression using the AS clause.

OCI-19209: invalid or unsupported formatting argument

Cause: An invalid or unsupported formatting argument was supplied

Action: Change the formatting argument to legal supported values

OCI-19210: column '<varname>string</varname>', specified to be a key or update column for DBMS_XMLSTORE, does not exist in table '<varname>string</varname>'

Cause: The column specified using setKeyColumn()/setUpdateColumn() did not exist in the table.

Action: Change the column specified to be a column in the table

OCI-19211: column '<varname>string</varname>', specified as key using DBMS_XMLSTORE.setKeyColumn() , must be of scalar type

Cause: The column specified using setKeyColumn() was a non-scalar type column.

Action: Change the column specified to be a scalar column in the table

OCI-19212: no key columns specified before call to DBMS_XMLSTORE.updateXML()

Cause: No columns were specified as key columns before the call to DBMS_XMLSTORE.updateXML.

Action: Use DBMS_XMLSTORE.setKeyColumn() to specify key columns

OCI-21300: objects option not installed

Cause: The objects option is not installed at this site. Object types and other object features are, therefore, unavailable.

Action: Install the objects option. The objects option is not part of the Oracle Server product and must be purchased separately. Contact an Oracle sales representative if the objects option needs to be purchased.

OCI-21301: not initialized in object mode

Cause: This function requires the oci process to be initialized in object mode.

Action: Specify OCI_OBJECT mode when calling OCIInitialize().

OCI-21500: internal error code, arguments: [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>]

Cause: This is the generic error number for the OCI environment (client-side) internal errors. This indicates that the OCI environment has encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number.

OCI-21501: program could not allocate memory

Cause: The operating system has run out of memory.

Action: Take action to make more memory available to the program.

OCI-21503: program terminated by fatal error

Cause: A program is in an unrecoverable error state.

Action: Report as a bug.

OCI-21520: database server driver not installed

Cause: User attempted to access a database server through an object-mode OCI environment but the necessary driver for supporting such access to the database server is not installed or linked in.

Action: Check if the driver corresponding to the database server has been installed/linked in and entered in the server driver table.

OCI-21521: exceeded maximum number of connections in OCI (object mode only)

Cause: User exceeded the maximum number of connections (255) that can be supported by an OCI environment in object mode.

Action: Close some of existing and unused connections before opening more connections.

OCI-21522: attempted to use an invalid connection in OCI (object mode only)

Cause: User attempted to use an invalid connection or a connection that has been terminated in an OCI environment (object mode), or user attempted to dereference a REF obtained from a connection which has been terminated.

Action: Ensure that the connection exists and is still valid.

OCI-21523: functionality not supported by the server (object mode only)

Cause: User attempted to use a functionality that the server does not support.

Action: Upgrade the server

OCI-21524: object type mismatch

Cause: The object type of the object is different from what is specified.

Action: Check the type of the object and correct it.

OCI-21525: attribute number (or collection element at index) <varname>string</varname> violated its constraints

Cause: Attribute value or collection element value violated its constraint.

Action: Change the value of the attribute or collection element such that it meets its constraints. The constraints are specified as part of the attribute or collection element's schema information.

OCI-21526: initialization failed

Cause: The initialization sequence failed. This can happen, for example, if an environment variable such as NLS_DATE_FORMAT is set to an invalid value.

Action: Check that all NLS environment variables are well-formed.

OCI-21527: internal OMS driver error

Cause: A process has encountered an exceptional condition. This is the generic internal error number for Oracle object management services exceptions.

Action: Report this as a bug to Oracle Support Services.

OCI-21560: argument <varname>string</varname> is null, invalid, or out of range

Cause: The argument is expecting a non-null, valid value but the argument value passed in is null, invalid, or out of range. Examples include when the LOB/FILE positional or size argument has a value outside the range 1 through (4GB - 1), or when an invalid open mode is used to open a file, etc.

Action: Check your program and correct the caller of the routine to not pass a null, invalid or out-of-range argument value.

OCI-21562: column <varname>string</varname> has unsupported data type <varname>string</varname>

Cause: A data type was specified which is currently unsupported.

Action: Choose another data type which is supported.

OCI-21563: Error <varname>string</varname> while calling <varname>string</varname> for column <varname>string</varname> with datatype <varname>string</varname>

Cause: OCI Error encountered while performing data type conversion.

Action: Check the OCI Error code

OCI-21570: current <varname>string</varname> LCR has unreceived chunk data

Cause: The client did not receive all the chunk data for the current LCR.

Action: If OCIXStreamOutLCRCallbackReceive is used in your program then modify your callback functions to return OCI_CONTINUE while OCI_XSTREAM_MORE_ROW_DATA flag is set; otherwise, modify your program to call OCIXStreamOutChunkReceive until all the chunks are received (that is, the flag returned by OCIXStreamOutChunkReceive API does not have OCI_XSTREAM_MORE_ROW_DATA bit set).

OCI-21571: must provide a LOB WRITE, LOB TRIM or LOB ERASE LCR in <varname>string</varname> call (input LCR=<varname>string</varname>)

Cause: An attempt was made to invoke the specified function without providing a piece-wise LOB LCR (for example, LOB WRITE, LOB TRIM or LOB ERASE LCR).

Action: Correct the 'row_lcrp' argument in the call.

OCI-21572: Invalid LCR type (<varname>string</varname>) in <varname>string</varname> call

Cause: An attempt was made to invoke the specified function with an incorrect logical change record (LCR) type.

Action: Provide an LCR of the correct type.

OCI-21573: Invalid command type (<varname>string</varname>) when sending a chunk.

Cause: An attempt was made to send a chunk when the command type for the current LCR was not INSERT, UPDATE, or LOB WRITE.

Action: Check your program and provide an LCR with a valid command type to OCIXStreamInChunkSend call or to OCICallbackXStreamInChunkCreate callback.

OCI-21574: Invalid data type (<varname>string</varname>) specified for LOB chunk.

Cause: Invalid data type specified for LOB chunk in OCIXStreamInChunkSend call.

Action: Check your program and provide either SQLT_CHR or SQLT_BIN for 'coldty' argument to OCIXStreamInChunkSend call.

OCI-21577: Input <varname>string</varname> LCR has no LOB column.

Cause: An attempt was made to invoke OCILCRlobInfoGet call with an LCR that had no LOB column.

Action: Replace the input LCR to OCILCRlobInfoGet call.

OCI-21578: Only one LOB column allowed per <varname>string</varname> LCR.

Cause: An attempt was made to set multiple LOB columns on a piece-wise LOB LCR.

Action: Check your program and make sure OCIXStreamInChunkSend is called for only one column per piece-wise LOB LCR.

OCI-21579: Input LCR must have at least one old or new column.

Cause: An attempt was made to call OCIXStreamInChunkSend with an LCR that had empty column lists.

Action: Use OCILCRRowColumnInfoSet to add one or more columns to the input LCR before calling OCIXStreamInChunkSend.

OCI-21580: The LOB operation length (value=<varname>string</varname>) for column (<varname>string</varname>) must be an even number of bytes.

Cause: An attempt was made to call OCIXStreamInChunkSend with an odd number of bytes for a column flagged as AL16UTF16 or NCLOB.

Action: Correct either the LOB column length or 'column_flag' argument to OCIXStreamInChunkSend call.

OCI-21583: invalid XStream server name '<varname>string</varname>'

Cause: An attempt was made to attach to an XStream server with a nonexistent server name.

Action: Correct the server name in the attach call.

OCI-21600: path expression too long

Cause: The path expression that is supplied by the user is too long. The path expression is used to specify the position of an attribute in an object. This error occurs when one of the intermediate elements in the path expression refers to an attribute of a built-in type. Thus, the OCI function cannot proceed on to process the rest of the elements in the path expression.

Action: User should pass in the correct path expression to locate the attribute.

OCI-21601: attribute is not an object

Cause: The user attempts to perform an operation (that is valid only for an object) to an attribute of a built-in type. An example of such an illegal operation is to dynamically set a null structure to an attribute of a built-in type.

Action: User should avoid performing such operation to an attribute of built-in type.

OCI-21602: operation does not support the specified typecode

Cause: The user attempts to perform an operation that does not support the specified typecode.

Action: User should use the range of valid typecodes that are supported by this operation.

OCI-21603: property id [<varname>string</varname>] is invalid

Cause: The specified property id is invalid.

Action: User should specify a valid property id. Valid property ids are enumerated by OCIObjectPropId.

OCI-21604: property [<varname>string</varname>] is not a property of transient or value instances

Cause: Trying to get a property which applies only to persistent objects.

Action: User should check the lifetime and only get this property for persistent objects.

OCI-21605: property [<varname>string</varname>] is not a property of value instances

Cause: Trying to get a property which applies only to persistent and transient objects.

Action: User should check the lifetime and only get this property for persistent and transient objects.

OCI-21606: can not free this object

Cause: Trying to free an object that is persistent and dirty and the OCI_OBJECTFREE_FORCE flag is not specified.

Action: Either flush the persistent object or set the flag to OCI_OBJECTFREE_FORCE

OCI-21607: memory cartridge service handle not initialized

Cause: Attempt to use the handle without initializing it.

Action: Initialize the memory cartridge service handle.

OCI-21608: duration is invalid for this function

Cause: Attempt to use a duration not valid for this function.

Action: Use a valid duration - a previously created user duration or OCI_DURATION_STATEMENT or OCI_DURATION_SESSION. For callout duration or external procedure duration, use OCIExtProcAllocCallMemory.

OCI-21609: memory being resized without being allocated first

Cause: Attempt to resize memory without allocating it first.

Action: Allocate the memory first before resizing it.

OCI-21610: size [<varname>string</varname>] is invalid

Cause: Attempt to resize memory with invalid size.

Action: Pass in a valid size (must be a positive integer).

OCI-21611: key length [<varname>string</varname>] is invalid

Cause: Attempt to use an invalid key length.

Action: Key length is invalid and valid range is 0 to 64

OCI-21612: key is already being used

Cause: Attempt to use a key that is already used.

Action: Use a new key that is not yet being used.

OCI-21613: key does not exist

Cause: Attempt to use a non-existent key

Action: Use a key that already exists.

OCI-21700: object does not exist or is marked for delete

Cause: User attempted to perform an inappropriate operation to an object that is non-existent or marked for delete. Operations such as pinning, deleting and updating cannot be applied to an object that is non-existent or marked for delete.

Action: User needs to re-initialize the reference to reference an existent object or the user needs to unmark the object.

OCI-21701: attempt to flush objects to different servers

Cause: User attempted to flush objects to different servers in one function call. These objects are obtained by calling a callback functions provided by the program.

Action: User should avoid performing such operation.

OCI-21702: object is not instantiated or has been de-instantiated in cache

Cause: User attempted to perform an inappropriate operation to a transient object that is not instantiated in the object cache. Operations that cannot be applied to a not-instantiated transient object include deleting or pinning such an object.

Action: User should check their code to see if they are performing such an operation without instantiating the object first, or performing such an operation after the allocation duration of the object has expired.

OCI-21703: cannot flush an object that is not modified

Cause: See the error message.

Action: The object should not be flushed.

OCI-21704: cannot terminate cache or connection without flushing first

Cause: See the error message.

Action: The transaction should be aborted or committed before terminating the cache or connection.

OCI-21705: service context is invalid

Cause: The service context that is supplied by the user is not valid.

Action: User needs to establish the service context.

OCI-21706: duration does not exist or is invalid

Cause: The duration number that is supplied by the user is not valid.

Action: User needs to establish the duration or use a correct predefined duration.

OCI-21707: pin duration is longer than allocation duration

Cause: The pin duration supplied by the user is longer than the allocation duration. This affects operations such as pinning and setting default parameters.

Action: User should use a shorter pin duration or use the null duration.

OCI-21708: inappropriate operation on a transient object

Cause: User attempted to perform an inappropriate operation on a transient object. Operations that cannot be applied to a transient object include flushing and locking.

Action: User should avoid performing such operation on a transient object.

OCI-21709: cannot refresh an object that has been modified

Cause: User attempted to refresh an object that has been marked for delete, update or insert (new).

Action: User should unmark the object before refreshing it.

OCI-21710: argument is expecting a valid memory address of an object

Cause: The object memory address that is supplied by the user is invalid. The user may have passed in a bad memory address to a function that is expecting a valid memory address of an object.

Action: User should pass in a valid memory address of an object to the function.

OCI-21779: duration not active

Cause: User is trying to use a duration that has been terminated.

Action: User should avoid performing such operation.

OCI-22053: overflow error

Cause: This operation's result is above the range of Oracle number.

Action: Decrease the input value(s) so that the result is in the range of Oracle number.

OCI-22054: underflow error

Cause: This operation's result is below the range of Oracle number.

Action: Increase the input value(s) so that the result is in the range of Oracle number.

OCI-22055: unknown sign flag value [<varname>string</varname>]

Cause: Signed flag used is not OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED.

Action: Use either OCI_NUMBER_SIGNED or OCI_NUMBER_UNSIGNED as sign flag.

OCI-22056: value [<varname>string</varname>] is divided by zero

Cause: Given value is divided by zero.

Action: Modify divisor value to be non-zero.

OCI-22057: bad integer length [<varname>string</varname>]

Cause: The length of the integer (ie number of bytes) to be converted to or from an Oracle number is invalid.

Action: Use integer length 1, 2, 4 or 8 bytes only.

OCI-22059: buffer size [<varname>string</varname>] is too small - [<varname>string</varname>] is needed

Cause: The buffer to hold the resulting text string is too small.

Action: Provide a buffer of the required size.

OCI-22060: argument [<varname>string</varname>] is an invalid or uninitialized number

Cause: An invalid or uninitialized number is passed in.

Action: Use a valid number. To initialize number call OCINumberSetZero().

OCI-22061: invalid format text [<varname>string</varname>]

Cause: The numeric format string for converting characters to or from an Oracle number is invalid.

Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22062: invalid input string [<varname>string</varname>]

Cause: The text string for converting to numbers is invalid.

Action: Use a valid input string as documented in OCI Programmer's Guide.

OCI-22063: reading negative value [<varname>string</varname>] as unsigned

Cause: Attempt to convert a negative number to an unsigned integer.

Action: Use the sign flag ORLTsb to convert a signed number.

OCI-22064: invalid NLS parameter string [<varname>string</varname>]

Cause: The NLS parameter string for converting characters to or from an Oracle number is invalid.

Action: Use valid format string as documented in OCI Programmer's Guide.

OCI-22065: number to text translation for the given format causes overflow

Cause: Rounding done due to the given string format causes overflow.

Action: Change the format such that overflow does not occur.

OCI-22130: buffer size [<varname>string</varname>] is less than the required size [<varname>string</varname>]

Cause: The size of the buffer into which the hexadecimal REF string is to be written is too small.

Action: Provide a buffer of the required size.

OCI-22131: hexadecimal string length is zero

Cause: The given hexadecimal string length must be greater than zero.

Action: Specify a length greater than zero.

OCI-22132: hexadecimal string does not correspond to a valid REF

Cause: The given hexadecimal string is invalid.

Action: Provide a valid hexadecimal string which was previously returned by a call to OCIRefToHex().

OCI-22140: given size [<varname>string</varname>] must be in the range of 0 to [<varname>string</varname>]

Cause: The given resize size is invalid.

Action: Ensure that the given size is in the required range.

OCI-22141: given size [<varname>string</varname>] must be even in UTF-16 environment

Cause: The given resize size is odd. In a UTF-16 environment, all characters are 2 bytes in length.

Action: Ensure that the given size is even.

OCI-22150: variable-length array has not been initialized

Cause: An un-initialized variable-length array is being operated upon.

Action: Initialize the variable-length array prior to calling this function.

OCI-22151: cannot resize non-zero variable-length array to zero elements

Cause: Trying to resize a non-zero variable-length array to 0 elements.

Action: Specify a non-zero size.

OCI-22152: destination variable-length array is not initialized

Cause: The variable-length array on the right-hand-side of an assignment or the destination array of an append is not initialized.

Action: Initialize the destination variable-length array prior to calling this function.

OCI-22153: source variable-length array is not initialized

Cause: The variable-length array on the left-hand-side of an assignment or the source array of an append is not initialized.

Action: Initialize the destination variable-length array prior to calling this function.

OCI-22160: element at index [<varname>string</varname>] does not exist

Cause: Collection element at the given index does not exist.

Action: Specify the index of an element which exists.

OCI-22161: type code [<varname>string</varname>] is not valid

Cause: Given type code is not valid.

Action: Use one of the typecodes enumerated in OCITypeCode.

OCI-22162: element at index [<varname>string</varname>] has been previously deleted

Cause: Trying to delete a non-existent collection element.

Action: Check for the existence of the element prior to calling this function.

OCI-22163: left hand and right hand side collections are not of same type

Cause: Left hand and right side collections are not of same type.

Action: Ensure that the same collection type is passed for both left hand and right hand side of this function.

OCI-22164: delete element operation is not allowed for variable-length array

Cause: Trying to delete an element of a variable-length array.

Action: Ensure that the collection is not a variable-length array prior to calling this function.

OCI-22165: given index [<varname>string</varname>] must be in the range of [<varname>string</varname>] to [<varname>string</varname>]

Cause: Given index is not in the required range.

Action: Ensure that the given index is in the required range.

OCI-22166: collection is empty

Cause: Given collection is empty.

Action: Test if collection is empty prior to invoking this function.

OCI-22167: given trim size [<varname>string</varname>] must be less than or equal to [<varname>string</varname>]

Cause: Given trim size is greater than the current collection size.

Action: Ensure that the given size is less than or equal to the collection size prior to calling this function.

OCI-22275: invalid LOB locator specified

Cause: There are several causes: (1) the LOB locator was never initialized; (2) the locator is for a BFILE and the routine expects a BLOB/CLOB/NCLOB locator; (3) the locator is for a BLOB/CLOB/NCLOB and the routine expects a BFILE locator; (4) trying to update the LOB in a trigger body -- LOBs in trigger bodies are read only.

Action: For (1), initialize the LOB locator by selecting into the locator variable or by setting the LOB locator to empty. For (2) and (3), pass the correct type of locator into the routine. For (4), remove the trigger body code that updates the LOB value.

OCI-22276: invalid locator for LOB buffering

Cause: There are several causes: (1) the locator was never enabled for buffering (2) it is not an updated locator but is being used for a write/flush operation

Action: For (1) enable the locator for buffering; (2) ensure that only an updated locator is used for a LOB update operation

OCI-22277: cannot use two different locators to modify the same LOB

Cause: LOB buffering is enabled and an attempt was made to modify the LOB using two different LOB locators.

Action: When using LOB buffering, modify the LOB through one LOB locator only.

OCI-22278: must update the LOB only through the LOB buffers

Cause: LOB buffering is enabled for this LOB and there are buffers for this LOB in the buffer pool. Thus, updating the LOB through means other than the LOB buffers is not allowed.

Action: Update the LOB through the LOB buffers using the locator that has LOB buffering enabled. If this operation is required, buffers associated with this LOB should either be flushed as necessary or buffering should be disabled. Once this is done, reissue the command.

OCI-22279: cannot perform operation with LOB buffering enabled

Cause: The operation attempted is not allowed when LOB buffering is enabled.

Action: If the operation is required, LOB buffering should not be used. In this case, flush buffers associated with the input LOB locator as necessary, disable buffering on the input LOB locator and reissue the command.

OCI-22280: no more buffers available for operation

Cause: There are two causes: (1) All buffers in the buffer pool have been used up by previous operations (2) Attempt to flush a LOB without any previous buffered update operations.

Action: For (1), flush the LOB(s) through the locator that is being used to update the LOB. For (2), write to the LOB through a locator enabled for buffering before attempting to flush buffers.

OCI-22281: cannot perform operation with an updated locator

Cause: The input locator has buffering enabled and was used to update the LOB value through the LOB buffering subsystem. The modified buffer has not been flushed since the write that was performed by the the input locator; thus, the input locator is considered an updated locator. Updated locators cannot be the source of a copy operation. Only one locator per LOB may be used to modify the LOB value through the LOB buffering subsystem.

Action: Depending on whether the modifications made through the input locator to the LOB buffering subsystem should be written to the server, either flush the buffer to write the modifications, or, disable buffering on the locator to discard the modifications. Then, reissue the command.

OCI-22282: non-contiguous append to a buffering enabled LOB not allowed

Cause: The buffered write operation has an input offset value more than one byte or character past the end of the LOB.

Action: Specify an input offset value which is exactly one character or byte greater than the length of the LOB that you are attempting to update through a buffered write operation.

OCI-22285: non-existent directory or file for <varname>string</varname> operation

Cause: Attempted to access a directory that does not exist, or attempted to access a file in a directory that does not exist.

Action: Ensure that a system object corresponding to the specified directory exists in the database dictionary, or make sure the name is correct.

OCI-22286: insufficient privileges on directory or file to perform <varname>string</varname> operation

Cause: The user does not have the necessary access privileges on the directory alias and/or the file for the operation.

Action: Ask the database/system administrator to grant the required privileges on the directory alias and/or the file.

OCI-22287: invalid or modified directory occurred during <varname>string</varname> operation

Cause: The directory alias used for the current operation is not valid if being accessed for the first time, or has been modified by the DBA since the last access.

Action: If you are accessing this directory for the first time, provide a valid directory name. If you have been already successful in opening a file under this directory before this error occurred, then close the file and retry the operation with a valid directory alias as modified by your DBA. Oracle recommends that directories should be modified only during quiescent periods.

**OCI-22288: file operation <varname>string</varname> failed
In<varname>string</varname>**

Cause: The operation attempted on the file failed.

Action: See the next error message for more detailed information. Also, verify that the file exists and that the necessary privileges are set for the specified operation. If the error still persists, report the error to the DBA.

OCI-22289: cannot perform <varname>string</varname> operation on an unopened file

Cause: The file is not open for the required operation to be performed.

Action: Check that the current operation is preceded by a successful file open operation.

OCI-22290: operation would exceed the maximum number of opened files

Cause: The number of open files has reached the maximum limit.

Action: Close some of the opened files and retry the operation.

OCI-22303: type "<varname>string</varname>". "<varname>string</varname>" not found

Cause: The user is trying to obtain information for a type that cannot be found.

Action: Check that the schema is correct and that the type has been created correctly.

OCI-22305: attribute/method/parameter "<varname>string</varname>" not found

Cause: Type element with the given name is not found in the type.

Action: Check to make sure that the type element exists.

OCI-22306: type "<varname>string</varname>". "<varname>string</varname>" already exists

Cause: The user is trying to create a type that already exists.

Action: Check to make sure that the type has not been created prior to this.

OCI-22307: type to alter is not a user-defined type

Cause: The user is trying to alter a built-in type.

Action: Check to make sure that only user-defined types are being altered.

OCI-22309: attribute with name "<varname>string</varname>" already exists

Cause: The user is attempting to create an object type where more than one attributes have the same name.

Action: Check to make sure that all attribute names are unique.

OCI-22311: type for attribute "<varname>string</varname>" does not exist

Cause: The type of the attribute does not exist.

Action: No types were created/modified for this DDL transaction. Redo the DDL transaction and add the creation of the attribute's type in the DDL transaction.

OCI-22313: cannot use two versions of the same type "<varname>string</varname>"

Cause: The version of this type conflicts with the version of this type used by another library that was linked in with the application. An application may only use one version of a type.

Action: Check that the libraries being linked with this application and use the same versions of the type.

OCI-22314: method information mismatch in ALTER TYPE

Cause: The number of methods or the method signature do not match that of the original type declaration. This is not supported.

Action: Make sure the method signature stay identical for the previously declared method. Do not drop existing methods.

OCI-22315: type "<varname>string</varname>" does not contain a map or order function

Cause: The input type does not contain a map or order function so one cannot be returned.

Action: Add a map or order function to the type or catch this error.

OCI-22316: input type is not a collection type

Cause: The user is trying to obtain information for collection types on a non-named collection type.

Action: Use a named collection type for the function.

OCI-22317: typecode <varname>number</varname> is not legal as a number type

Cause: The user is trying to use a number typecode that is not valid.

Action: Use only OCI_TYPECODE_SMALLINT, OCI_TYPECODE_INTEGER, OCI_TYPECODE_REAL, OCI_TYPECODE_DOUBLE, OCI_TYPECODE_FLOAT, OCI_TYPECODE_NUMBER, or OCI_TYPECODE_DECIMAL.

OCI-22318: input type is not an array type

Cause: The user is trying to obtain the number of elements for a non-array type.

Action: Pass in only a named collection type which is an array.

OCI-22319: type attribute information altered in ALTER TYPE

Cause: The type attribute information does not match that of the original type declaration when altering type. Attributes cannot be altered during ALTER TYPE. Only new methods can be added.

Action: Check that all type alterations are legal.

OCI-22321: method does not return any result

Cause: OCITypeResult() was called on a method that does not return any results.

Action: Check that you are passing in the correct method descriptor, or that your method creation was done correctly.

OCI-22337: the type of accessed object has been evolved

Cause: The type of the accessed object has been altered and the client's object is based on an earlier type definition.

Action: The user needs to exit application and modify application to accommodate the type change. From SQL/PLUS, reconnect and resubmit statement.

OCI-22351: This API is not supported by the ORACLE server.

Cause: An attempt was made to call an API which is not supported by the Oracle server.

Action: Do not call the unsupported API when connected to this Oracle server.

OCI-22352: Type is unsupported or contains an unsupported attribute or element.

Cause: A PL/SQL package type was not supported on the client or contained an attribute or element that was not supported on the client. Unsupported types include index by VARCHAR2 collections, remote types and MLSLABELs.

Action: Do not attempt to use unsupported PL/SQL package types or types that contain unsupported attributes or elements on the client.

OCI-22369: invalid parameter encountered in method <varname>string</varname>

Cause: An invalid parameter is being passed to this method of SYS.RowType or SYS.RowSet.

Action: Check the parameters being passed to this method and make sure that the parameters are allowed.

OCI-22370: incorrect usage of method <varname>string</varname>

Cause: This method of SYS.RowType or SYS.RowSet is being used inappropriately.

Action: Check the documentation for correct usage.

OCI-22600: encountered 8.0.2 (Beta) VARRAY data that cannot be processed

Cause: Production Oracle8 (8.0.3 and beyond) encounters some VARRAY data which was created and stored by Oracle8 8.0.2 (Beta 2). Production Oracle8 cannot understand or process such VARRAY data.

Action: Delete the VARRAY data from the table by dropping the table, deleting the rows, or nulling out the VARRAY columns, and then re-insert the VARRAY data. There is no provided script or tool to help automate this conversion.

OCI-22601: pickler TDS context [<varname>string</varname>] is not initialized

Cause: Attempt to use the pickler TDS context without initializing it.

Action: Use OCIPicklerTdsCtxInit to initialize the context.

OCI-22602: pickler TDS handle [<varname>string</varname>] is not well-formed

Cause: Attempt to use the pickler TDS handle without initializing/ constructing it.

Action: Use OCIPicklerTdsInit to initialize the handle before it is constructed. Use OCIPicklerTdsGenerate to generate the TDS before its attributes can be accessed.

OCI-22603: cannot add an attribute to the already generated TDS handle

Cause: Attempt to add an attribute to the already constructed TDS.

Action: Use a TDS handle that is initialized but not yet constructed.

OCI-22604: TDS handle already generated

Cause: Attempt to generate TDS that is already generated.

Action: Use a TDS handle that is initialized but not yet generated.

OCI-22605: FDO handle [<varname>string</varname>] is not initialized

Cause: Attempt to use an uninitialized FDO handle.

Action: Use OCIPicklerFdoInit to initialize FDO handle".

OCI-22606: pickler image handle [<varname>string</varname>] is not well-formed

Cause: Attempt to use the image handle without initializing/ constructing it.

Action: Use OCIPicklerImageInit to initialize the handle before it is constructed. Use OCIPicklerImageGenerate to generate the image before its attributes can be accessed.

OCI-22607: image handle already generated

Cause: Attempt to generate image that is already generated.

Action: Use a image handle that is initialized but not yet generated.

OCI-22608: cannot add an attribute to the already generated image handle

Cause: Attempt to add an attribute to the already constructed image.

Action: Use an image handle that is initialized but not yet constructed.

OCI-22609: error <varname>string</varname> during initialization of FDO

Cause: Error during FDO initialization.

Action: Take an action based on the specified error.

OCI-22626: Type Mismatch while constructing or accessing OCIAnyData

Cause: Type supplied is not matching the type of the AnyData. If piece wise construction or access is being attempted, the type supplied is not matching the type of the current attribute.

Action: Make sure the type supplied matches the type of object to be constructed or accessed.

OCI-22700: object access trace event number

Cause: N/A

Action: If the trace event number is set to a level greater than 0 then all the dangling REFs are dumped. *Note: THIS IS NOT A USER ERROR NUMBER/MESSAGE. THIS DOES NOT NEED TO BE TRANSLATED OR DOCUMENTED.

OCI-22975: cannot create a PRIMARY KEY-based REF to this object view

Cause: The object view specified in the MAKE_REF function does not have a PRIMARY KEY-based object identifier. A PRIMARY KEY-based REF cannot be created for such a view.

Action: Specify an object view that has a PRIMARY KEY-based object identifier in the MAKE_REF function.

OCI-22976: incorrect number of arguments to MAKE_REF

Cause: Number of arguments for MAKE_REF is different from the number of PRIMARY KEY attributes of the object view.

Action: Specify all the necessary arguments for MAKE_REF.

OCI-29783: GPnP attribute SET failed with error [<varname>string</varname>]

Cause: An attempt to set the Grid Plug and Play (GPnP) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-29785: GPnP attribute GET failed with error [<varname>string</varname>]

Cause: An attempt to get the Grid Plug and Play (GPnP) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-29786: SIHA attribute GET failed with error [<varname>string</varname>]

Cause: An attempt to get the Single-Instance High Availability (SIHA) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-29787: SIHA attribute SET failed with error [<varname>string</varname>]

Cause: An attempt to set the Single-Instance High Availability (SIHA) attribute failed. See the brackets for the reason.

Action: Resolve the problem in the included message and retry the request.

OCI-30100: internal error [<varname>number</varname>]

Cause: An internal error has occurred.

Action: Contact Oracle Worldwide Support and report the error.

OCI-30101: unknown parameter name '<varname>string</varname>'

Cause: You have misspelled the parameter name.

Action: Spell the parameter name correctly.

OCI-30102: '<varname>string</varname>' is not in the legal range for '<varname>string</varname>'

Cause: The value of the parameter is not within the legal range.

Action: Refer to the manual for the allowable values for this parameter.

OCI-30103: '<varname>string</varname>' contains an illegal integer radix for '<varname>string</varname>'

Cause: An illegal integer radix specification was found.

Action: Only 'd', 'h', 'D', and 'H' may be used as radix specifications.

OCI-30104: '<varname>string</varname>' is not a legal integer for '<varname>string</varname>'

Cause: The value is not a valid integer.

Action: Specify only valid integers for this parameter.

OCI-30105: '<varname>string</varname>' is not a legal boolean for '<varname>string</varname>'

Cause: The value is not a valid boolean.

Action: Refer to the manual for allowable boolean values.

OCI-30106: reserved for future use

Cause: None.

Action: None

OCI-30107: parameter name abbreviation '<varname>string</varname>' is not unique

Cause: The abbreviation given was not unique.

Action: Use a longer abbreviation to make the parameter name unique.

OCI-30108: invalid positional parameter value '<varname>string</varname>'

Cause: An invalid positional parameter value has been entered.

Action: Remove the invalid positional parameter.

OCI-30109: could not open parameter file '<varname>string</varname>'

Cause: The parameter file does not exist.

Action: Create an appropriate parameter file.

OCI-30110: syntax error at '<varname>string</varname>'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30111: no closing quote for value '<varname>string</varname>'

Cause: A quoted string was begun but not finished.

Action: Put a closing quote in the proper location.

OCI-30112: multiple values not allowed for parameter '<varname>string</varname>'

Cause: You attempted to specify multiple values for a parameter which can take only one value.

Action: Do not specify more than one value for this parameter.

OCI-30113: error when processing file '<varname>string</varname>'

Cause: A problem occurred when processing this file.

Action: Examine the additional error messages and correct the problem.

OCI-30114: error when processing from command line

Cause: A problem occurred when processing the command line.

Action: Examine the additional error messages and correct the problem.

OCI-30115: error when processing an environment variable

Cause: A problem occurred when processing an environment variable.

Action: Examine the additional error messages and correct the problem.

OCI-30116: syntax error at '<varname>string</varname>' following '<varname>string</varname>'

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30117: syntax error at '<varname>string</varname>' at the start of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30118: syntax error at '<varname>string</varname>' at the end of input

Cause: A syntax error was detected.

Action: Change the input so that the correct syntax is used.

OCI-30119: unable to obtain a valid value for '<varname>string</varname>'

Cause: No valid value was obtained for this parameter.

Action: Rerun the application and enter a valid value.

OCI-30120: '<varname>string</varname>' is not a legal oracle number for '<varname>string</varname>'

Cause: The value is not a valid oracle number.

Action: Refer to the manual for allowable oracle number values.

OCI-30121: '<varname>string</varname>' is not an allowable value for '<varname>string</varname>'

Cause: The value is not a legal value for this parameter.

Action: Refer to the manual for allowable values.

OCI-30122: value '<varname>string</varname>' for '<varname>string</varname>' must be between '<varname>number</varname>' and '<varname>number</varname>'

Cause: The value of the parameter is not within the legal range.

Action: Specify a value that is within the legal range.

OCI-30129: invalid function argument received

Cause: A function received an invalid argument

Action: Check function calls, make sure correct arguments are being passed.

OCI-30130: invalid parameter key type received

Cause: A function received an invalid parameter key type

Action: Check parameter key types in function calls

OCI-30131: number of keys being set exceeds allocation

Cause: Number of parameter keys being set exceeds allocation

Action: Reduce the number of keys being set or increase allocation

OCI-30132: invalid key index supplied

Cause: The key index specified was not within bounds

Action: Change key index to ensure it lies within bounds

OCI-30133: reserved for future use

Cause: None.

Action: None

OCI-30134: reserved for future use

Cause: None.

Action: None

OCI-30135: OCI Thread operation fails

Cause: An OCI Thread function call has failed.

Action: Check the function call to make sure that the correct parameters are being passed and take the appropriate action.

OCI-30150: Invalid argument passed to OCIFile function

Cause: An invalid argument is passed to the OCIFile function. The most common cause is that a NULL pointer is passed where a non-NULL pointer is expected.

Action: Make sure that the values passed as arguments are valid. Esp check for NULL pointers.

OCI-30151: File already exists

Cause: Tried to open a file with OCI_FILE_EXCL flag and the file already exists.

Action: OCIFile is supposed throw this exception in this case.

OCI-30152: File does not exist

Cause: The OCIFile function requires the file to exist, but it does not.

Action: Make sure that the file exists.

OCI-30153: An invalid File Object is passed to the OCIFile function

Cause: An invalid File Object is passed to the OCIFile function.

Action: Make sure that the file object is a valid one. Create a new file object by calling OCIFileOpen if needed.

OCI-30154: The memory address given as buffer for OCIFileRead/Write is invalid

Cause: An invalid memory address is given as the buffer pointer for OCIFileRead/Write.

Action: Make sure that the required memory is allocated and pass a valid memory address as buffer pointer.

OCI-30155: An I/O Error occurred during an OCIFile function call

Cause: An I/O error occurred at the system level.

Action: This is a system error and the action will depend on the error.

OCI-30156: Out of disk space

Cause: The disks associated with the underlying file system are full.

Action: Create more disk space.

OCI-30157: An invalid argument was given to operating system call

Cause: The OS call was called with an invalid argument.

Action: Check the values passed. If unsuccessful to solve the problem contact ORACLE support.

OCI-30158: The OCIFileWrite causes the file to exceed the maximum allowed size

Cause: There is no space to write to the file. Its size is at the maximum limit.

Action: Up to the user.

OCI-30159: OCIFileOpen: Cannot create the file or cannot open in the requested mode

Cause: The create flag was specified in OCIFileOpen such that the file was to be created. But unable to do so. Or the file already exists and the permissions on it doesn't allow the file to be opened in the requested open mode

Action: Check whether the user has permissions to create the specified file or if the file exists whether the permissions on it allow the requested open mode.

OCI-30160: Unable to access the file

Cause: The function was unable to access the existing file.

Action: Check if the user has the required permissions on the file.

OCI-30161: A system error occurred during the OCIFile function call

Cause: A system error occurred while executing the OCIFile function.

Action: Depend on the error.

OCI-30162: The OCIFile context is not initialized

Cause: The function OCIFileInit need to be called before calling any other OCIFile function to initialize the OCIFile context.

Action: Call the function OCIFileInit need to be called before calling any other OCIFile function.

OCI-30163: The thread safety initialization failed

Cause: The call to SlgInit failed in OCIFileInit.

Action: Contact support

OCI-30175: invalid type given for an argument

Cause: There is an argument with an invalid type in the argument list.

Action: Use the correct type wrapper for the argument.

OCI-30176: invalid format code used in the format string

Cause: There is an invalid format code in the format string.

Action: Replace the invalid format code with a valid one.

OCI-30177: invalid flag used in a format specification

Cause: There is an invalid flag in a format specification.

Action: Replace the invalid flag with a valid one.

OCI-30178: duplicate flag used in a format specification

Cause: There is a duplicate flag in a format specification.

Action: Remove the duplicate flag.

OCI-30179: invalid argument index used in a format code

Cause: Zero or negative argument index or index not following (."

Action: Replace the invalid argument index with a valid one.

OCI-30180: argument index is too large

Cause: An argument index exceeds actual number of arguments supplied.

Action: Fix format string or pass additional arguments.

OCI-30181: integer in argument index is not immediately followed by)

Cause: Missing closing parenthesis in argument index.

Action: Fix the format specification.

OCI-30182: invalid precision specifier

Cause: Period in format specification not followed by valid format.

Action: Replace the invalid precision specifier with a valid one.

OCI-30183: invalid field width specifier

Cause: Invalid field width supplied.

Action: Replace the invalid field width with a valid one.

OCI-30184: argument type not compatible with a format code

Cause: Bad argument type given for a format code.

Action: Make format and arguments be compatible.

OCI-30185: output too large to fit in the buffer

Cause: The buffer is not large enough to hold the entire output string.

Action: Fix the buffer size and length passed in.

OCI-30186: reserved for future use

Cause: None.

Action: None

OCI-30187: reserved for future use

Cause: None.

Action: None

OCI-30188: reserved for future use

Cause: None.

Action: None

OCI-30189: reserved for future use

Cause: None.

Action: None

OCI-30190: reserved for future use

Cause: None.

Action: None

OCI-30191: missing argument list

Cause: No argument list supplied.

Action: Modify the argument list to have at least OCIFormatEnd in it.

OCI-30192: reserved for future use

Cause: None.

Action: None

OCI-30193: reserved for future use

Cause: None.

Action: None

OCI-30194: reserved for future use

Cause: None.

Action: None

OCI-30195: reserved for future use

Cause: None.

Action: None

OCI-30196: reserved for future use

Cause: None.

Action: None

OCI-30197: reserved for future use

Cause: None.

Action: None

OCI-30198: reserved for future use

Cause: None.

Action: None

OCI-30199: reserved for future use

Cause: None.

Action: None

OCI-30930: XML node '<varname>string</varname>' (type=<varname>string</varname>) does not support this operation

Cause: The given node's type is not supported for this operation. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

Action: Use a valid node type for the operation.

OCI-30931: Element '<varname>string</varname>' cannot contain mixed text

Cause: XML elements must be declared mixed to contain multiple text nodes

Action: Declare this element type as mixed in its schema

OCI-30932: Reference node '<varname>string</varname>' not contained in specified parent node '<varname>string</varname>'

Cause: When using a reference node, it must have the specified parent node

Action: Use a node in the specified parent as the reference

OCI-30933: Element '<varname>string</varname>' may not appear at this point within parent '<varname>string</varname>'

Cause: The ordering specified by the content model of the parent does not allow for this element to occur at this position.

Action: Reorder the child elements to conform with the content model of the parent element

OCI-30934: '<varname>string</varname>' (<varname>string</varname> node) cannot be inserted in parent '<varname>string</varname>' (<varname>string</varname> node)

Cause: The schema does not allow a child node of this type to be inserted into a parent node of this type. For example, only element nodes may only be inserted into a document

Action: Insert only child nodes that make sense for this node type

OCI-30935: XML maxoccurs value (<varname>string</varname>) exceeded

Cause: An attempt was made to insert more than maxoccurs values into a schema-based XML document.

Action: Do not insert more than maxoccurs values into the document.

OCI-30936: Maximum number (<varname>string</varname>) of '<varname>string</varname>' XML node elements exceeded

Cause: An attempt was made to insert more than the allowed number of elements (specified by the maxoccurs facet) into an XML document.

Action: Do not attempt to add more than the maximum number of elements to XML documents.

OCI-30937: No schema definition for '<varname>string</varname>' (namespace '<varname>string</varname>') in parent '<varname>string</varname>'

Cause: The schema definition for the parent node being processed does not allow for the specified child node in its content model. Note that any typecasting via xsi:type must occur before the schema definitions for the new type can be used.

Action: Only insert elements and attributes declared in the schema. Check to make sure that xsi:type (if used) is specified first.

OCI-30938: No prefix defined for namespace '<varname>string</varname>' (particle <varname>string</varname>)

Cause: An XML namespace mapping (xmlns:<varname>prefix</varname>=<varname>namespace URL</varname>) must be defined for each particle (element or attribute) stored in an schema-constrained XMLType document.

Action: Add an xmlns attribute definition (attribute name="xmlns:prefix" and value="namespace URL") to the current XMLType document. The safest place to add this attribute is in the root node of the document to ensure that the mapping will be in scope.

OCI-30939: Order violation: Element '<varname>string</varname>' may not follow element '<varname>string</varname>'

Cause: The XML schema specifies a content model that is sequential, where the order of nodes in the instance must follow the order specified by the schema, and this instance relies on the schema validity to avoid maintaining instance order information

Action: Insert elements only in the order specified in the schema

OCI-30940: Cannot resolve prefix '<varname>string</varname>' for QName node '<varname>string</varname>'

Cause: An attempt was made to store a QName value without having a valid namespace in scope for that prefix.

Action: Declare the namespace for the prefix used

OCI-30941: Cannot specify empty URI for non-default namespace '<varname>string</varname>'

Cause: An attempt was made to insert a namespace declaration for a non-default namespace using an empty URI string.

Action: Specify a non-empty URI for namespace declarations other than the default namespace.

OCI-30942: XML Schema Evolution error for schema '<varname>string</varname>' table <varname>string</varname> column '<varname>string</varname>'

Cause: The given XMLType table/column which conforms to the given schema had errors during evolution. For more information, see the more specific error below this one

Action: Based on the schema, table and column information in this error and the more specific error below, take corrective action

OCI-30943: XML Schema '<varname>string</varname>' is dependent on XML schema '<varname>string</varname>'

Cause: Not all dependent schemas were specified and/or the schemas were not specified in dependency order, i.e., if schema S1 is dependent on schema S, S must appear before S1.

Action: Include the previously unspecified schema in the list of schemas and/or correct the order in which the schemas are specified. Then retry the operation.

OCI-30944: Error during rollback for XML schema '<varname>string</varname>' table <varname>string</varname> column '<varname>string</varname>'

Cause: The given XMLType table/column which conforms to the given schema had errors during a rollback of XML schema evolution. For more information, see the more specific error below this one

Action: Based on the schema, table and column information in this error and the more specific error below, take corrective action

OCI-30945: Could not create mapping table '<varname>string</varname>'

Cause: A mapping table could not be created during XML schema evolution. For more information, see the more specific error below this one

Action: Ensure that a table with the given name does not exist and retry the operation

OCI-30946: XML Schema Evolution warning: temporary tables not cleaned up

Cause: An error occurred after the schema was evolved while cleaning up temporary tables. The schema evolution was successful

Action: If the user needs to remove the temporary tables, use the mapping table to get the temporary table names and drop them.

OCI-30951: Element or attribute at Xpath <varname>string</varname> exceeds maximum length

Cause: An attempt was made to insert a node of length exceeding the maximum length (specified by the maxLength facet) into an XML document.

Action: Do not attempt to add a node exceeding the maximum length to XML documents.

OCI-30990: insufficient privileges to change owner of resource <varname>string</varname>

Cause: An attempt was made to change the <varname>Owner</varname> field of an XML DB resource without sufficient privileges to do so.

Action: Switch to SYS before performing the ownership change, or have the intended recipient of the resource perform the transfer.

OCI-30991: cannot use DOM to add special attribute to schema-based parent

Cause: An attempt was made to add or remove an xsi:schemaLocation, xsi:noNamespaceSchemaLocation, xsi:type, or xsi:nil attribute to or from a schema-based XML node using DOM.

Action: Use the updateXML operator instead of DOM.

OCI-31000: Resource '<varname>string</varname>' is not an XDB schema document

Cause: The given schema URL does not refer to a registered XDB schema

Action: Make sure the specified schema has been registered in XDB

OCI-31001: Invalid resource handle or path name "<varname>string</varname>"

Cause: An invalid resource handle or path name was passed to the XDB hierarchical resolver.

Action: Pass a valid resource handle or path name to the hierarchical resolver.

OCI-31002: Path name <varname>string</varname> is not a container

Cause: XDB expected the given path name to represent a container.

Action: Pass a path name or resource handle that represents a container.

OCI-31003: Parent <varname>string</varname> already contains child entry <varname>string</varname>

Cause: An attempt was made to insert a duplicate child into the XDB hierarchical resolver.

Action: Insert a unique name into the container.

OCI-31004: Length <varname>string</varname> of the BLOB in XDB\$H_INDEX is below the minimum <varname>string</varname>

Cause: In the XDB\$H_INDEX table, the CHILDREN column, a BLOB, must have a certain minimum length without being chained. The calculated length of the LOB was less than the stated minimum.

Action: Set the value of the init.ora parameter db_block_size to at least 2K. For XDB to run at its fastest, set db_block_size to 8K.

OCI-31005: Path name length <varname>string</varname> exceeds maximum length <varname>string</varname>

Cause: The length of a path name passed to the XDB hierarchical resolver exceeded the maximum length.

Action: Choose a shorter path name.

OCI-31006: Path name segment length <varname>string</varname> exceeds maximum length <varname>string</varname>

Cause: The length of a path name segment passed to the XDB hierarchical resolver exceeded the maximum length of a path name segment.

Action: Choose a shorter path name segment.

OCI-31007: Attempted to delete non-empty container <varname>string</varname>/<varname>string</varname>

Cause: An attempt was made to delete a non-empty container in the XDB hierarchical resolver.

Action: Either perform a recursive deletion, or first delete the contents of the container.

OCI-31009: Access denied for property <varname>string</varname>

Cause: An attempt was made to access a property you don't have access to

Action: Check the ACL to see what privileges you have for this property

OCI-31010: XML element index <varname>string</varname> exceeds maximum insertion index <varname>string</varname>

Cause: An attempt was made to insert an XML element at an invalid index location in the node.

Action: Choose a new index that falls within the allowed range.

OCI-31011: XML parsing failed

Cause: XML parser returned an error while trying to parse the document.

Action: Check if the document to be parsed is valid.

OCI-31012: Given XPATH expression not supported

Cause: XPATH expression passed to the function is currently unsupported.

Action: Check the xpath expression and change it to use a supported expression.

OCI-31013: Invalid XPATH expression

Cause: XPATH expression passed to the function is invalid.

Action: Check the xpath expression for possible syntax errors.

OCI-31014: Attempted to delete the root container

Cause: An attempt was made to delete the root container in the hierarchical index.

Action: Do not delete the root container.

OCI-31015: Attempted to insert entry without name

Cause: An attempt was made to insert an entry into the hierarchical resolver without a child name.

Action: Supply a child name and try inserting again.

OCI-31016: Attempted to delete entry without name

Cause: An attempt was made to delete an entry from the hierarchical resolver without a child name.

Action: Supply a child name and try deleting again.

OCI-31017: Error generating unique OID for XML document

Cause: An error occurred while generating a globally unique OID for storing an XML document.

Action: n/a

OCI-31018: Error deleting XML document

Cause: The XMLType object pointed to by the given REF could not be deleted because either the REF was invalid or it pointed to a non-existent table.

Action: Either use FORCE deletion or supply a valid REF.

OCI-31019: Recursive deletion snapshot too old for <varname>string</varname>/<varname>string</varname>

Cause: Changes were made to the structure of a directory while it was being recursively deleted.

Action: Try deleting the directory again.

OCI-31020: The operation is not allowed, Reason: <varname>string</varname>

Cause: The operation attempted is not allowed

Action: See reason and change to a valid operation.

OCI-31021: Element definition not found

Cause: The element definition was not found.

Action: Supply the definition for the element or use a defined element.

OCI-31022: Element not found

Cause: The element was not found.

Action: Make sure the specified element exists.

OCI-31023: Index size error

Cause: The index is greater than the allowed value.

Action: Make sure the index is less than allowed value.

OCI-31025: Invalid document element

Cause: An attempt was made to replace the data at an invalid index number in the XML document

Action: Supply a correct occurrence number and try again.

OCI-31027: Path name or handle <varname>string</varname> does not point to a resource

Cause: An attempt was made to retrieve a resource based on a path name or resource handle that points to an entity other than a resource.

Action: Do not attempt to retrieve a resource based on that path name or resource handle.

OCI-31028: Resource metadata length <varname>string</varname> exceeded maximum length <varname>string</varname>

Cause: An attempt was made to insert resource metadata that exceeded the maximum length of that type of metadata.

Action: Keep resource metadata within its allowed length.

OCI-31029: Cannot bind to unsaved resource

Cause: An attempt was made to bind to a resource that had not been saved to disk.

Action: Bind only to saved resources.

OCI-31030: Unable to retrieve XML document

Cause: The resource had an invalid (dangling) REF to an XML document.

Action: Rebind the resource using a valid XMLType REF.

OCI-31033: Requested number of XML children <varname>string</varname> exceeds maximum <varname>string</varname>

Cause: An attempt was made to add more than the maximum number of allowable children in an XML element.

Action: Redefine the schema to allow breaking up of the children among siblings.

OCI-31035: Could not bind locked resource to path <varname>string</varname> <varname>string</varname>

Cause: An attempt was made to bind an existing resource to a new location in the hierarchy, but a lock could not be obtained on the resource.

Action: Commit or roll back the transaction that has the lock on the resource.

OCI-31037: Invalid XML attribute name <varname>string</varname>

Cause: The attribute name in the XML document did not match anything in the associated schema.

Action: Supply only schema-defined or XML standard attributes.

OCI-31038: Invalid <varname>string</varname> value: "<varname>string</varname>"

Cause: The text in the XML document did not represent a valid value given the datatype and other constraints in the schema.

Action: Ensure that the specified value in XML documents is valid with respect to the datatype and other constraints in the schema.

OCI-31039: XML namespace length <varname>string</varname> exceeds maximum <varname>string</varname>

Cause: The length of the disk-formatted XML namespace exceeded the maximum.

Action: Keep XML namespace declarations below the maximum length.

OCI-31040: Property <varname>string</varname>: XML type (<varname>string</varname>) not compatible with internal memory type (<varname>string</varname>)

Cause: The XML datatype given is inconsistent with the database datatype, and a conversion cannot be made.

Action: This is an internal error, generally resulting from corruption of the compiled XML schema. Re-register schemas, or contact Oracle support.

OCI-31041: Property <varname>string</varname>: Memory type (<varname>string</varname>) not compatible with database type (<varname>string</varname>)

Cause: The memory type associated with this property is mapped to an incompatible database type, and a conversion cannot be made.

Action: This is an internal error, generally resulting from corruption of the compiled XML schema. Re-register schemas, or contact Oracle support.

OCI-31042: Too many properties in type '<varname>string</varname>'

Cause: The type can only have the same number of properties (elements and attributes) as a table can have columns.

Action: Modify the XML schema to move properties into subelements that are not inlined.

OCI-31043: Element '<varname>string</varname>' not globally defined in schema '<varname>string</varname>'

Cause: The specified element name has not been defined at the top level of the XML schema (i.e. globally). Elements must be defined globally to be the root of an XMLType object.

Action: Check the XML schema definition to make sure the specified element name has been defined at the top level.

OCI-31044: Top-level prefix length <varname>string</varname> exceeds maximum <varname>string</varname>

Cause: An attempt was made to save to disk a top-level XML namespace prefix whose length exceeded the maximum.

Action: Do not define XML namespace prefixes that exceed the maximum length.

OCI-31045: Cannot store more than <varname>string</varname> extras outside the root XML node

Cause: An attempt was made to store more than the maximum number of XML extras (e.g. comments and processing instructions) either before or after the document's root node.

Action: Keep the number of extras outside the root node below the maximum.

OCI-31046: Incorrect argument(s) specified in the operator

Cause: One or more of the arguments specified in the operator in the query are incorrect

Action: Correct the arguments specified in the operator

OCI-31047: Could not retrieve resource data at path <varname>string</varname>

Cause: An error occurred while retrieving the contents and/or metadata of a resource.

Action: Contact Oracle customer support.

OCI-31048: Unsaved resources cannot be updated

Cause: An attempt was made to update a resource that was never saved to disk.

Action: Perform a resource insertion instead.

OCI-31049: Internal event to turn off direct path loading of XML

Cause: N/A

Action: Do not document.

OCI-31050: Access denied

Cause: The requested access privileges have not been granted to the current user. User must be granted privileges prior to resource access.

Action: Check the set of requested access privileges to make sure that they are included in the set of access privileges granted to the user.

OCI-31051: Requested access privileges not supported

Cause: The requested access privileges are not supported for the specified resource.

Action: Ensure that the set of requested access privileges are valid access privileges for the specified resource.

OCI-31052: Cannot delete ACL with other references

Cause: The requested deletion of an ACL resource cannot proceed. The ACL is in use by other resources.

Action: Remove the resources that are making reference to the ACL in question and try again.

OCI-31053: The value of the depth argument in the operator cannot be negative

Cause: The value of the depth argument passed to the primary operator is not a positive integer

Action: Pass a positive value of the depth argument

OCI-31054: The <varname>string</varname> operator cannot have an ancillary operator

Cause: An ancillary operator was used with an operator which does not support ancillary operators

Action: Remove the ancillary operator in the query

OCI-31055: A null XMLType element cannot be inserted into RESOURCE_VIEW

Cause: The element which is being inserted into the RESOURCE_VIEW is NULL

Action: Specify a non-null XMLType element to insert into RESOURCE_VIEW

OCI-31056: The document being inserted does not conform to <varname>string</varname>

Cause: The XMLType element being inserted into the RESOURCE_VIEW does not conform to the specified Schema

Action: Insert an element which conforms to the specified Schema

OCI-31057: Display Name of the element being inserted is null

Cause: The Display Name of the element which is being inserted into the RESOURCE_VIEW is null

Action: Specify the Display Name and insert the element into RESOURCE_VIEW

OCI-31058: cannot modify read-only XOBs

Cause: Read-Only XOBs cannot be modified.

Action: Use only read operations on such a XOB.

OCI-31059: Cannot insert root XML document node if it already exists

Cause: An attempt was made to insert a root node into an XML document that already had a root node.

Action: Call the appropriate replace function to replace the node instead of inserting it anew.

OCI-31060: Resource at path <varname>string</varname> could not be deleted

Cause: An error occurred while deleting the named resource. The specific error can be found one lower on the error stack.

Action: Look at the next error on the stack and take appropriate action.

OCI-31061: XML event error

Cause: The specified error occurred in XDB.

Action: Correct the error or contact Oracle Support Services.

OCI-31062: Cannot delete an unsaved resource

Cause: An attempt was made to delete a resource that had not been saved to disk.

Action: Delete only saved resources.

OCI-31065: Cannot modify read-only property [<varname>string</varname>]

Cause: An attempt was made to modify an immutable XML node.

Action: Use only read operations on such properties.

OCI-31066: Insertion of <varname>string</varname> into <varname>string</varname> creates a cycle

Cause: An attempt was made to insert a link into the XDB hierarchy that would create a cycle in the tree.

Action: Ensure that links to existing resources do not cause cycles.

OCI-31067: XML nodes must be updated with nodes of the same type

Cause: An attempt was made to use updateXML to update an XML node with a node of another type.

Action: Ensure that the node specified by the XPath matches the type of new data provided.

OCI-31068: updateXML expected data format [<varname>string</varname>] instead of [<varname>string</varname>]

Cause: An attempt was made to use updateXML to update data with a node of the incorrect type. Text and attribute nodes must be updated with string data, whereas element nodes must be updated with XMLType data.

Action: Use CREATEXML or getStringVal to coerce the new data to the proper format.

OCI-31069: Cannot apply typed changes to non-schema-based XMLType nodes

Cause: An attempt was made to insert, delete, or update a non-schema-based XMLType node using an XML schema definition.

Action: Make changes to non-typed nodes only by referencing their tag names.

OCI-31070: Invalid database user ID <varname>string</varname>

Cause: An attempt was made set an invalid user ID into an XDB resource metadata property.

Action: Verify the validity of the user ID and try again.

OCI-31071: Invalid database username or GUID <varname>string</varname>

Cause: An attempt was made to set an invalid username or GUID into an XDB resource metadata property.

Action: Verify the validity of the username or GUID and try again.

OCI-31072: Too many child nodes in XMLType fragment for updateXML

Cause: An attempt was made to pass an XMLType fragment with multiple children as new data for the updateXML operator.

Action: Extract the desired child from the XMLType before passing it to updateXML as the desired new XML node.

OCI-31073: Resource not retrieved using path name

Cause: An attempt was made to access the path name of a resource that was either never saved to disk or was loaded using a method other than with its path name.

Action: Perform path name operations only on resources obtained using a path name.

OCI-31075: invalid <varname>string</varname> declaration in XML Schema

Cause: The XML schema contains an invalid declaration identified by the message.

Action: Fix the identified error and try again.

OCI-31076: required attribute "<varname>string</varname>" not specified

Cause: The XML schema does not specify a required attribute.

Action: Specify a value for the required attribute.

OCI-31077: invalid attribute "<varname>string</varname>" specified

Cause: The XML schema specifies an invalid attribute.

Action: Remove specification of the invalid attribute.

OCI-31078: error in SQL mapping information

Cause: There is an error in the SQL type and table specification within the XML Schema.

Action: Ensure that all specified SQL types and tables are valid and compatible with the corresponding XML types.

OCI-31079: unable to resolve reference to <varname>string</varname> "<varname>string</varname>"

Cause: The identified type or attribute or element could not be resolved.

Action: Make sure that the name corresponds to a valid XML (simple/complex) type or attribute or element and try again.

OCI-31080: type not specified for attribute or element "<varname>string</varname>"

Cause: The identified attribute or element does not have a type.

Action: Make sure that every attribute and element has a valid type specification.

OCI-31081: name not specified for global declaration

Cause: The XML schema does not specify the name for the global declaration of attribute or element or simpleType or complexType.

Action: Specify names for all global declarations.

OCI-31082: invalid attribute "<varname>string</varname>" specified in declaration of "<varname>string</varname>"

Cause: The XML schema specifies an invalid attribute.

Action: Remove specification of the invalid attribute.

OCI-31083: error while creating SQL type "<varname>string</varname>". "<varname>string</varname>"

Cause: An error occurred while trying to create the SQL type based on the specification of a complex type.

Action: Fix the identified error and try again.

OCI-31084: error while creating table "<varname>string</varname>". "<varname>string</varname>" for element "<varname>string</varname>"

Cause: An error occurred while trying to create the table based on the declaration for the identified element.

Action: Fix the identified error and try again.

OCI-31085: schema "<varname>string</varname>" already registered

Cause: An attempt was made to register a schema with the same URL as a previously registered schema.

Action: Register the schema with a different URL.

OCI-31086: insufficient privileges to register global schema "<varname>string</varname>"

Cause: An attempt was made to register a global schema without sufficient privileges.

Action: Make sure that the user has sufficient privileges to register a global schema.

OCI-31087: insufficient privileges to delete schema "<varname>string</varname>"

Cause: An attempt was made to delete a schema resource without sufficient privileges.

Action: Make sure that the user has sufficient privileges to delete the schema.

OCI-31088: object "<varname>string</varname>". "<varname>string</varname>" depends on the schema

Cause: An attempt was made to delete a schema which has dependent objects.

Action: Either drop the dependent objects prior to deleting the schema or use the CASCADE or FORCE options.

OCI-31089: schema "<varname>string</varname>" does not target namespace "<varname>string</varname>"

Cause: The schema document contains references (via include and import definitions) to other schemas that do not belong to valid namespaces.

Action: Make sure that all schemas referenced via include definitions target the same namespace as the parent schema. Further make sure that the namespace specified in the import definition matches the actual target namespace of the specified schema.

OCI-31090: invalid database schema name "<varname>string</varname>"

Cause: The XML schema document contains an invalid database schema name. For example, the value of attribute SQLSchema

Action: Make sure that all database user/schema names specified in the XML schema document refer to existing database users/schemas.

OCI-31091: empty string specified as a SQL name

Cause: The XML schema document contains a null SQL name. For example, the values of attributes SQLName, SQLType, defaultTable.

Action: Make sure that all names of SQL schema objects specified in the XML schema document are valid SQL names. Otherwise, remove such attributes from the schema and try again.

OCI-31092: invalid SQL name "<varname>string</varname>"

Cause: The XML schema document contains an invalid SQL name. For example, the values of attributes SQLName, SQLType, defaultTable.

Action: Make sure that all names of SQL schema objects specified in the XML schema document are valid SQL names. This implies that the database length and other restrictions on names be satisfied.

OCI-31093: null or invalid value specified for parameter : <varname>string</varname>

Cause: The argument value passed for the given parameter is null or invalid.

Action: Make sure that all the input argument values are valid.

OCI-31094: incompatible SQL type "<varname>string</varname>" for attribute or element "<varname>string</varname>"

Cause: The SQL type information provided in the XML schema is not compatible with the XML datatype for the specified attribute or element.

Action: Make sure that the specified SQL types are compatible with the declared XML datatypes.

OCI-31095: cannot generate <varname>string</varname> : "<varname>string</varname>.<varname>string</varname>" already exists

Cause: The type/table name specified in the XML schema document cannot be generated because it is already being used.

Action: Use different names for types/tables or use the NOGEN mode so that schema compiler does not generate new types/tables.

OCI-31096: validation failed for schema

Cause: The XML Schema could not be validated.

Action: Make sure that the SQLType and other datatype mapping is valid.

OCI-31097: Hierarchical Index not empty

Cause: An attempt was made to rebuild the hierarchical index which is not empty.

Action: Delete all rows in the hierarchical index and then rebuild it.

OCI-31098: Internal event to turn on XDB tracing

Cause: N/A

Action: Do not document.

OCI-31099: XDB Security Internal Error

Cause: An XDB Security internal error has occurred.

Action: Contact Oracle Support.

OCI-31100: XDB Locking Internal Error

Cause: An XDB Locking Internal error has occurred.

Action: Contact Oracle Support.

OCI-31101: Token "<varname>string</varname>" not given while locking resource "<varname>string</varname>"

Cause: Locking attempted on resource when the principal already owns a lock given by the token above.

Action: Reattempt the lock with the token.

OCI-31102: Already locked in exclusive mode. Cannot add lock.

Cause: The resource is already locked in exclusive mode. Cannot add another lock.

Action: Unlock the existing lock.

OCI-31103: Resource locked in shared mode. Cannot add exclusive lock

Cause: The resource is locked in shared mode. Cannot add a shared lock.

Action: Try locking in shared mode or unlocking the existing lock.

OCI-31104: Cannot find lock with token "<varname>string</varname>" on "<varname>string</varname>" for unlock

Cause: The lock may have been unlock or it may have expired.

Action: No action needed. Unlock already successful.

OCI-31105: User does not own lock "<varname>string</varname>"

Cause: The lock to be unlocked is not owned by the user.

Action: n/a

OCI-31107: Action failed as resource "<varname>string</varname>" is locked by name lock

Cause: Lock requests cause the whole request URI to be locked

Action: Supply lock token or unlock the lock

OCI-31108: Action failed as resource <varname>string</varname> is locked

Cause: Delete/Rename failed because of an existing lock

Action: Do lockdiscovery to find the lock and delete it.

OCI-31109: Action failed as parent resource <varname>string</varname> is locked

Cause: Delete/Rename failed because of an lock on parent resource

Action: Do lockdiscovery to find the lock and delete it.

OCI-31110: Action failed as resource <varname>string</varname> is locked by name

Cause: Delete/Rename failed because one of the children is locked.

Action: Do lockdiscovery to find the lock and delete it.

OCI-31111: table <varname>string</varname> cannot be hierarchically enabled

Cause: Trigger <varname>tablename</varname>_xdb_pittrigger already exists

Action: Either the table is already hierarchically enabled or the user trigger <varname>tablename</varname>_xdb_pittrigger needs to be dropped. Delete all rows in the hierarchical index and then rebuild it.

OCI-31112: fail to <varname>string</varname> for <varname>string</varname> port using xdb configuration

Cause: port number for the defined presentation is not valid

Action: Either the port number is already in use or it is protected. Specify another port number.

OCI-31113: XDB configuration may not be updated with non-schema compliant data

Cause: An attempt was made to update the XDB configuration resource with non-schema or non-schema compliant data.

Action: Check the document to make sure it is schema based and schema compliant.

OCI-31114: XDB configuration has been deleted or is corrupted

Cause: The XDB configuration resource has been deleted or corrupted.

Action: Reinstall XDB, or reinsert a valid configuration document.

OCI-31115: XDB configuration error: <varname>string</varname>

Cause: An error related to XDB configuration has occurred.

Action: Make sure the configuration resource contains valid data.

OCI-31116: Tablespace not specified correctly

Cause: XDB cannot be moved to the specified tablespace.

Action: Specify a valid tablespace.

OCI-31121: The <varname>string</varname> operator can not be FALSE

Cause: The value of the operator that is specified is FALSE

Action: Specify an operator that evaluates to TRUE

OCI-31122: The <varname>string</varname> operator has incorrect RHS value

Cause: The right hand side value that has been specified for the operator does not evaluate to TRUE

Action: Specify value on the right hand side that evaluate to TRUE

OCI-31151: Cyclic definition encountered for <varname>string</varname>: "<varname>string</varname>"

Cause: The schema definition for this type has cycles.

Action: Remove cyclic definition and re-compile schema.

OCI-31152: Internal event to enable lru XOBs

Cause: N/A

Action: Do not document

OCI-31153: Cannot create schema URL with reserved prefix "http://xmlns.oracle.com/xdb/schemas/"

Cause: This prefix is reserved for XDB extended schema URLs and cannot be used in a user specified URL.

Action: Modify the prefix to a different one.

OCI-31154: invalid XML document

Cause: The XML document is invalid with respect to its XML Schema.

Action: Fix the errors identified and try again.

OCI-31155: attribute <varname>string</varname> not in XDB namespace

Cause: The specified attribute should be prefixed with XDB's namespace.

Action: Ensure that all XDB specified attributes are prefixed with XDB's namespace and try again.

OCI-31156: Internal event to turn off validation during schema registration

Cause: N/A

Action: Do not document

OCI-31157: Invalid Content-Type charset

Cause: HTTP Content-Type header had a charset that Oracle does not understand.

Action: Fix the Content-Type header in the HTTP request.

OCI-31158: schema "<varname>string</varname>" currently being referenced

Cause: The specified schema URL is currently being referenced by the same session. This could happen because of PLSQL XMLType variables still in scope.

Action: Ensure all references to this schema in this session are released and try the operation again.

OCI-31159: XML DB is in an invalid state

Cause: XML DB's internal tables are in an invalid state, probably because the database was not upgraded or the upgrade was not successful

Action: Ensure that the database is upgraded successfully. If the problem persists, contact Oracle Support

OCI-31160: max substitution group size `<varname>string</varname>` exceeded by `"<varname>string</varname>"` (`<varname>string</varname>`) for head element `"<varname>string</varname>"` (`<varname>string</varname>`)

Cause: The maximum limit on nested substitution groups has been exceeded by an element.

Action: Delete specified schema and re-register it after removing the offending substitution element.

OCI-31161: element or attribute `"<varname>string</varname>"` cannot be stored out of line

Cause: An element or attribute of a simple type has `SQLInline=false`

Action: Remove the `SQLInline=false` qualification for the offending element or attribute

OCI-31162: element or attribute `"<varname>string</varname>"` has no `SQLType` specified

Cause: Schema registration was invoked with `GENTYPES=false` without specifying a `SQLType` for some element or attribute

Action: Specify a `SQLType` for the offending element or attribute and register the schema again

OCI-31163: element or attribute `"<varname>string</varname>"` has invalid attribute value `"<varname>string</varname>"` (should be `"<varname>string</varname>"`)

Cause: An element or attribute for a complex type derived by restriction has an attribute whose value is different from that in the base type

Action: Remove the mismatched attribute values from the offending element or attribute

OCI-31164: cannot load object-relational XML attribute using direct path \n

Cause: The table being loaded contains a xml column with object-relational storage. The xmltype column contains a type with subtypes. This type of attribute cannot be loaded with direct path.

Action: Perform the load with conventional path mode.

OCI-31165: cannot load object-relational XML attribute using direct path \n

Cause: The table being loaded contains a xml column with object-relational storage. The xmltype column either contains an out-of-line partitioned table or the table itself is partitioned by one of the attributes of xmltype. This type of table cannot be loaded with direct path.

Action: Perform the load with conventional path mode.

OCI-31166: internal error code to handle ignorable attributes

Cause: N/A

Action: Do not document

OCI-31167: XML nodes over 64K in size cannot be inserted

Cause: An attempt was made to insert an XML Text Node with a size greater than 64K. This is not supported.

Action: Create text nodes under 64K.

OCI-31168: Node localname and namespace values should be less than 64K

Cause: An attempt was made to specify an XML Node with localname or namespace value greater than or equal to 64K. This is not supported.

Action: Node localnames and namespace values should be under 64K.

OCI-31180: DOM Type mismatch in invalid PL/SQL DOM handle

Cause: The specified PL/SQL DOM handle is referencing a DOM Node whose DOM Type that does not match the one available in the session. This could happen because the pl/sql handle was reused, or the original document is no longer available.

Action: Ensure that the pl/sql handle for the target node is valid and try the operation again.

OCI-31181: PL/SQL DOM handle accesses node that is no longer available

Cause: The specified pl/sql handle is referencing a node in a DOM Document that is no longer available.

Action: Ensure that the pl/sql handle for the target node is valid and try the operation again.

OCI-31182: Too many PL/SQL DOM handles specified

Cause: An attempt was made to create a PL/SQL DOM handle that exceeded the maximum allowable number of PL/SQL DOM handles.

Action: Free PL/SQL DOM handles and try the operation again.

OCI-31185: DOM Nodes do not belong to the same DOM Document

Cause: The specified PL/SQL DOM Node does not belong to the parent DOM Document of the referring DOM Node.

Action: Ensure that both the DOM Nodes are part of the same DOM Document.

OCI-31190: Resource <varname>string</varname> is not a version-controlled resource

Cause: Either one of the following is the cause: - Checkout is requested for a resource that isn't under version control". Only version-controlled resource can be checked out. - Checkout is requested for a row of a non-versioned table.

Action: put the resource under version-control before checking out.

OCI-31191: Resource <varname>string</varname> is already checked out

Cause: Either one of the following is the cause: - Checkout is requested for a resource that is already checked out to the workspace by the same or different user.

Action: checked in the resource from the workspace before checking out

OCI-31192: Resource <varname>string</varname> has not been checked out

Cause: Either one of the following is the cause: - Checkin or uncheckout is requested for a resource that has not been checked out to the workspace by any user in a workspace

Action: checked in the resource from the workspace before checking out

OCI-31193: This versioning feature isn't supported for resource <varname>string</varname>

Cause: Either one of the following is the cause: - Container cannot be put under version-controlled.

Action: Avoid using these features.

OCI-31194: Resource <varname>string</varname> is already deleted

Cause: Access a version-controlled resource that is already deleted.

Action: Recreate the resource. Remove the cyclic definitions in the type and retry compilation.

OCI-31195: XML node '<varname>string</varname>' (type=<varname>string</varname>) does not support this operation

Cause: The given node's type is not supported for this operation. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

Action: Use a valid node type for the operation.

OCI-31196: XML nodes over <varname>string</varname> in size cannot be printed

Cause: An attempt was made to use an XML Text Node with a size greater than 64K, or an XML Comment Node with a size greater than 4K. These cannot be printed. For example, trying to add children to an attribute node, or passing in a document node as a child, are unsupported operations.

Action: Use getClobVal() or getStringVal() to print the Document.

OCI-31197: Error in processing file <varname>string</varname>

Cause: An error occurred while operating on the specified file. The possible causes are the file header is corrupt or check the next error on stack

Action: Ensure that the specified file is correct. Look at the next error on the stack and take appropriate action.

OCI-31198: Mismatch in number of bytes transferred due to non-binary mode

Cause: An error occurred while reading the specified file. The most probable cause is that the transfer was initiated in ASCII mode.

Action: Ensure that the transfer mode is set to BINARY

OCI-31199: Warning in processing file <varname>string</varname>

Cause: A warning was raised while operating on the specified file. However, the current operation was completed successfully.

Action: This is primarily an informational message. Look at the next error on the stack to obtain further information.

ODIG-00000 to ODIG-00013

ODIG-00000: No error.

Cause: Operation was successful.

Action: No action needed.

ODIG-00001: no value specified for option '*string*'

Cause: No value was specified for an option.

Action: Specify a value.

ODIG-00002: invalid argument: '*string*'

Cause: An invalid argument was specified.

Action: Specify a valid argument.

ODIG-00003: invalid option: '*string*'

Cause: An invalid option was specified.

Action: Specify a valid option.

ODIG-00004: invalid value specified for option '*string*': '*string*'

Cause: The value specified for an option was not the expected type.

Action: Specify a valid value.

ODIG-00005: Invalid query type: '*string*'. Supported types: *string*.

Cause: The type of query is invalid.

Action: Specify a valid query type.

ODIG-00007: thread spawn failed.

Cause: The spawn of a thread used for a query failed.

Action: This error should not be seen in ordinary use. Contact Oracle Customer Support if it appears.

ODIG-00008: invalid server address or name '*string*': *string*

Cause: The address or name specified for the DNS server was not valid.

Action: Specify a valid DNS name. See RFC 1034 for details.

ODIG-00009: No name specified.

Cause: A name was not specified to be queried for.

Action: Specify a name.

ODIG-00010: Internal error: *string*

Cause: An unexpected error occurred.

Action: Contact Oracle Support Services.

ODIG-00011: Invalid value specified for option '*string*': *number*

Cause: The value specified for the option must be greater than zero.

Action: Specify a valid value.

ODIG-00012: failed to get the name of the GNS domain

Cause: An error occurred when trying to get the name of the Grid Naming Service (GNS) domain.

Action: Examine the accompanying error messages for further information about the error.

ODIG-00013: Options '*string*' and '*string*' are incompatible.

Cause: A query specified both the the DNSSEC option and the DNS query option, which is not allowed.

Action: Specify either the DNSSEC option or the DNS query option, but not both.

OKSK-00000 to OKSK-00029

OKSK-00000: %2 %3

Cause: Informational.

Action: None

OKSK-00001: %2 %3

Cause: Informational.

Action: None

OKSK-00002: %2 %3

Cause: Informational.

Action: None

OKSK-00003: %2 %3

Cause: Informational.

Action: None

OKSK-00004: Module load succeeded. Build information: %2 %3 %4

Cause: Informational.

Action: None

OKSK-00005: Module failed to load and start with status %2. Build information: %3 %4 %5

Cause: Informational.

Action: None

OKSK-00006: Module unloaded.

Cause: Informational.

Action: None

OKSK-00007: Information has been saved in the file %2 . Include the contents of this file if reporting a problem to Oracle.

Cause: Informational.

Action: None

OKSK-00008: Cluster Membership Change starting - Incarnation %2.

Cause: Informational.

Action: None

OKSK-00009: Cluster Membership Change complete.

Cause: Informational.

Action: n/a

OKSK-00010: Persistent OKS log opened at %2.

Cause: Informational.

Action: None

OKSK-00011: Failed to allocate kernel memory for %2.

Cause: Unable to allocate memory for a required function.

Action: Contact Oracle Support Services.

OKSK-00012: Failed to open %2.

Cause: Unable to open a persistent OKS log file. Likely an invalid file path was specified or there was an internal error.

Action: Ensure that the file or directory exists else. If it does, contact Oracle Support Services.

OKSK-00013: Terminating Persistent OKS log.

Cause: Persistent OKS logging terminated due to the previous message.

Action: Informational.

OKSK-00014: Unable to generate an persistent OKS log file name.

Cause: Failed to generate an persistent OKS log file name.

Action: Internal error.

OKSK-00015: Persistent log thread creation failed.

Cause: Failed to create a kernel thread.

Action: Internal error.

OKSK-00016: Configuration error: buffer size %2 bytes is out of range.

Cause: The user selected an invalid buffer size.

Action: Select a different buffer size.

OKSK-00017: Configuration error: interval timer of %2 ms is out of range.

Cause: The user selected an invalid timer interval.

Action: Select a different timer value.

OKSK-00018: Configuration error: low water level of %2 bytes is out of range.

Cause: The user selected an invalid low water value.

Action: Select a different low water value.

OKSK-00019: Configuration error: high water level of %2 bytes is out of range.

Cause: The user selected an invalid high water value.

Action: Select a different high water value.

OKSK-00020: Configuration error: maximum number of log files (%2) is out of range.

Cause: The user selected an invalid maximum file number value.

Action: Select a different file number value.

OKSK-00021: Configuration error: The maximum file size of %2 bytes is out of range.

Cause: The user selected an invalid maximum log file size value.

Action: Select a different maximum log file size value.

OKSK-00022: File write error: File name '<varname>string</varname>'.

Cause: A write to the persistent OKS log file failed - possibly due to a full file system. Otherwise, it is an internal error. The in-memory OKS log will contain details regarding the error.

Action: Free up file systems space and restart the OKS persistent log ('acfsutil plogconfig -d <varname>dir</varname>'). If freeing up file system space does not resolve the problem, contact Oracle Support Services.

OKSK-00023: Cluster membership node list:

Cause: Informational.

Action: None

OKSK-00024: Node %2 (Interconnect address: %3.%4.%5.%6)

Cause: Informational.

Action: None

OKSK-00025: Cluster membership node count: %2, Local Node Number: %3.

Cause: Informational.

Action: None

OKSK-00026: Cluster membership rebuild manager failed to initialize.

Cause: Informational.

Action: Contact Oracle Support.

OKSK-00027: Oracle kernel distributed lock manager hash size is %2

Cause: Informational.

Action: None

OKSK-00028: In memory kernel log buffer address: %2, size: %3

Cause: Informational.

Action: None

OKSK-00029: Unable to %2 the log buffer.

Cause: Informational.

Action: None

ORA-00000 to ORA-00877

ORA-00000: normal, successful completion

Cause: Normal exit.

Action: None

ORA-00001: unique constraint (<varname>string</varname>.<varname>string</varname>) violated

Cause: An UPDATE or INSERT statement attempted to insert a duplicate key. For Trusted Oracle configured in DBMS MAC mode, you may see this message if a duplicate entry exists at a different level.

Action: Either remove the unique restriction or do not insert the key.

ORA-00017: session requested to set trace event

Cause: The current session was requested to set a trace event by another session.

Action: This is used internally; no action is required.

ORA-00018: maximum number of sessions exceeded

Cause: All session state objects are in use.

Action: Increase the value of the SESSIONS initialization parameter.

ORA-00019: maximum number of session licenses exceeded

Cause: All licenses are in use.

Action: Increase the value of the LICENSE MAX SESSIONS initialization parameter.

ORA-00020: maximum number of processes (<varname>string</varname>) exceeded

Cause: All process state objects are in use.

Action: Increase the value of the PROCESSES initialization parameter.

ORA-00021: session attached to some other process; cannot switch session

Cause: The user session is currently used by others.

Action: Do not switch to a session attached to some other process.

ORA-00022: invalid session ID; access denied

Cause: Either the session specified does not exist or the caller does not have the privilege to access it.

Action: Specify a valid session ID that you have privilege to access, that is either you own it or you have the CHANGE_USER privilege.

ORA-00023: session references process private memory; cannot detach session

Cause: An attempt was made to detach the current session when it contains references to process private memory.

Action: A session may contain references to process memory (PGA) if it has an open network connection, a very large context area, or operating system privileges. To allow the detach, it may be necessary to close the session's database links and/or cursors. Detaching a session with operating system privileges is always disallowed.

ORA-00024: logins from more than one process not allowed in single-process mode

Cause: Trying to login more than once from different processes for ORACLE started in single-process mode.

Action: Logoff from the other process.

ORA-00025: failed to allocate <varname>string</varname>

Cause: Out of memory.

Action: Restart with larger sga heap.

ORA-00026: missing or invalid session ID

Cause: Missing or invalid session ID string for ALTER SYSTEM KILL SESSION.

Action: Retry with a valid session ID.

ORA-00027: cannot kill current session

Cause: Attempted to use ALTER SYSTEM KILL SESSION to kill the current session.

Action: None

ORA-00028: your session has been killed

Cause: A privileged user has killed your session and you are no longer logged on to the database.

Action: Login again if you wish to continue working.

ORA-00029: session is not a user session

Cause: The session ID specified in an ALTER SYSTEM KILL SESSION command was not a user session (for example, recursive, etc.).

Action: Retry with a user session ID.

ORA-00030: User session ID does not exist.

Cause: The user session ID no longer exists, probably because the session was logged out.

Action: Use a valid session ID.

ORA-00031: session marked for kill

Cause: The session specified in an ALTER SYSTEM KILL SESSION command cannot be killed immediately (because it is rolling back or blocked on a network operation), but it has been marked for kill. This means it will be killed as soon as possible after its current uninterruptable operation is done.

Action: No action is required for the session to be killed, but further executions of the ALTER SYSTEM KILL SESSION command on this session may cause the session to be killed sooner.

ORA-00032: invalid session migration password

Cause: The session migration password specified in a session creation call was invalid (probably too long).

Action: Retry with a valid password (less than 30 chars).

ORA-00033: current session has empty migration password

Cause: An attempt was made to detach or clone the current session and it has an empty migration password. This is not allowed.

Action: Create the session with a non-empty migration password.

ORA-00034: cannot <varname>string</varname> in current PL/SQL session

Cause: An attempt was made to issue a commit or rollback from a PL/SQL object (procedure, function, package) in a session that has this disabled (by 'alter session disable commit in procedure')

Action: Enable commits from PL/SQL in this session, or do not attempt to use commit or rollback in PL/SQL when they are disabled in the current session.

ORA-00035: LICENSE_MAX_USERS cannot be less than current number of users

ORA-00036: maximum number of recursive SQL levels (<varname>string</varname>) exceeded

Cause: An attempt was made to go more than the specified number of recursive SQL levels.

Action: Remove the recursive SQL, possibly a recursive trigger.

ORA-00037: cannot switch to a session belonging to a different server group

Cause: An attempt was made to switch to a session in a different server group. This is not allowed.

Action: Make sure the server switches to a session that belongs to its server group.

ORA-00038: Cannot create session: server group belongs to another user

Cause: An attempt was made to create a non-migratable session in a server group that is owned by a different user.

Action: A server group is owned by the first user who logs into a server in the server group in non-migratable mode. All subsequent non-migratable mode logins must be made by the user who owns the server group. To have a different user login in non-migratable mode, the ownership of the server group will have to be changed. This can be done by logging off all current sessions and detaching from all existing servers in the server group and then having the new user login to become the new owner.

ORA-00039: error during periodic action

Cause: An unexpected error occurred while executing a periodically invoked action.

Action: Check the error stack for detailed error information.

ORA-00040: active time limit exceeded - call aborted

Cause: The Resource Manager SWITCH_TIME limit was exceeded.

Action: Reduce the complexity of the update or query, or contact your database administrator for more information.

ORA-00041: active time limit exceeded - session terminated

Cause: The Resource Manager SWITCH_TIME limit was exceeded.

Action: Reduce the complexity of the update or query, or contact your database administrator for more information.

ORA-00042: Unknown Service name <varname>string</varname>

Cause: An attempt was made to use an invalid application service.

Action: Use a valid service name from SERVICES\$ or add a new service using the DBMS_SERVICE package.

ORA-00043: remote operation failed

Cause: Execution of the inter-instance operation failed.

Action: Check the status of the target instance. The operation may have partially executed. Verify the result of the intended operation.

ORA-00044: timed_statistics must be TRUE when statistics_level is not BASIC

Cause: The user attempted to set timed_statistics to FALSE when statistics_level was not BASIC. timed_statistics is required to be TRUE to collect meaningful statistics when statistics_level is set to TYPICAL or ALL.

Action: Either set timed_statistics to TRUE or set statistics_level to BASIC.

ORA-00045: Your session has been terminated with no replay.

Cause: A privileged user terminated your session and you were no longer logged on to the database. Your session will not be replayed by Application Continuity or Transparent Application Failover (TAF).

Action: Log in again if you wish to continue working.

ORA-00046: cannot modify sessions parameter

Cause: An attempt was made to alter the sessions parameter in the root container or non-consolidated database.

Action: The sessions parameter behaves like a static parameter in root containers and non-consolidated databases and hence cannot be altered. It can only be altered from a pluggable database.

ORA-00047: cannot set sessions parameter to this value

Cause: An attempt was made to alter the sessions parameter to a value greater than the root container's session value.

Action: The sessions parameter can only be set to a value less than or equal to the root container's session value.

ORA-00050: operating system error occurred while obtaining an enqueue

Cause: Could not obtain the operating system resources necessary to cover an oracle enqueue. This is normally the result of an operating system user quota that is too low.

Action: Look up the operating system error in your system documentation and perform the needed action.

ORA-00051: timeout occurred while waiting for a resource

Cause: Usually due to a dead instance.

Action: Check for any dead, unrecovered instances and recover them.

ORA-00052: maximum number of enqueue resources (<varname>string</varname>) exceeded

Cause: Ran out of enqueue resources.

Action: Increase the value of the ENQUEUE_RESOURCES initialization parameter.

ORA-00053: maximum number of enqueues exceeded

Cause: Ran out of enqueue state objects.

Action: Increase the value of the ENQUEUEES initialization parameter.

ORA-00054: resource busy and acquire with NOWAIT specified or timeout expired

Cause: Interested resource is busy.

Action: Retry if necessary or increase timeout.

ORA-00055: maximum number of DML locks exceeded

Cause: Ran out of DML lock state objects.

Action: Increase the value of the DML_LOCKS initialization parameter and warm start.

ORA-00056: DDL lock on object '<varname>string</varname>.<varname>string</varname>' is already held in an incompatible mode

Cause: An attempt was made to acquire a DDL lock that is already locked.

Action: This happens if you attempt to drop a table that has parse locks on it.

ORA-00057: maximum number of temporary table locks exceeded

Cause: The number of temporary tables equals or exceeds the number of temporary table locks. Temporary tables are often created by large sorts.

Action: Increase the value of the TEMPORARY_TABLE_LOCKS initialization parameter and warm start.

ORA-00058: DB_BLOCK_SIZE must be <varname>string</varname> to mount this database (not <varname>string</varname>)

Cause: DB_BLOCK_SIZE initialization parameter is wrong for the database being mounted. It does not match the value used to create the database.

Action: Fix the value of the DB_BLOCK_SIZE parameter or mount a database that matches the value.

ORA-00059: maximum number of DB_FILES exceeded

Cause: The value of the DB_FILES initialization parameter was exceeded.

Action: Increase the value of the DB_FILES parameter and warm start.

ORA-00060: deadlock detected while waiting for resource

Cause: Transactions deadlocked one another while waiting for resources.

Action: Look at the trace file to see the transactions and resources involved. Retry if necessary.

ORA-00061: another instance has a different DML_LOCKS setting

Cause: The shared instance being started is using DML locks, and the running instances are not, or vice-versa.

Action: Ensure that all instances' INIT.ORA files specify the DML_LOCKS parameter as 0 or all as non-zero.

ORA-00062: DML full-table lock cannot be acquired; DML_LOCKS is 0

Cause: The instance was started with DML_LOCKS = 0, and the statement being executed needs a full-table lock (S, X, or SSX).

Action: Restart the instance with DML_LOCKS not equal to zero, and reexecute the statement.

ORA-00063: maximum number of log files exceeded <varname>string</varname>

Cause: The number of log files specified exceeded the maximum number of log files supported in this release.

Action: Re-create the control file with the highest number of log files no greater than the maximum supported in this release.

ORA-00064: object is too large to allocate on this O/S (<varname>string</varname>, <varname>string</varname>, <varname>string</varname>)

Cause: An initialization parameter was set to a value that required allocating more contiguous space than can be allocated on this operating system.

Action: Reduce the value of the initialization parameter.

ORA-00065: initialization of FIXED_DATE failed

Cause: The FIXED_DATE string was not in date format yyyy-mm-dd:hh24:mi:ss.

Action: Make sure the initialization parameter is in the correct date format.

ORA-00066: SID '<varname>string</varname>' contains an illegal character or is too long

Cause: The specified SID contained an illegal character or the SID specified was too long, which cannot occur in an SPFILE setting. Illegal characters include ,#"=() and whitespace.

Action: Use a SID that does not contain a special character or whitespace. Check platform specific documentation for the maximum length of SID.

ORA-00067: invalid value <varname>string</varname> for parameter <varname>string</varname>; must be at least <varname>string</varname>

Cause: The value for the initialization parameter is invalid.

Action: Choose a value as indicated by the message.

ORA-00068: invalid value <varname>string</varname> for parameter <varname>string</varname>, must be between <varname>string</varname> and <varname>string</varname>

Cause: The value for the initialization parameter is invalid.

Action: Choose a value as indicated by the message.

ORA-00069: cannot acquire lock -- table locks disabled for <varname>string</varname>

Cause: A command was issued that tried to lock the table indicated in the message. Examples of commands that can lock tables are: LOCK TABLE, ALTER TABLE ... ADD (...), and so on.

Action: Use the ALTER TABLE ... ENABLE TABLE LOCK command, and retry the command.

ORA-00070: command <varname>string</varname> is not valid

Cause: An invalid debugger command was specified.

Action: Type HELP to see the list of available commands.

ORA-00071: process number must be between 1 and <varname>string</varname>

Cause: An invalid process number was specified.

Action: Specify a valid process number.

ORA-00072: process "<varname>string</varname>" is not active

Cause: An invalid process was specified.

Action: Specify a valid process.

ORA-00073: command <varname>string</varname> takes between <varname>string</varname> and <varname>string</varname> argument(s)

Cause: An incorrect number of arguments was specified.

Action: Specify the correct number of arguments. Type HELP to see the list of commands and their syntax.

ORA-00074: no process has been specified

Cause: No debug process has been specified.

Action: Specify a valid process.

ORA-00075: process "<varname>string</varname>" not found in this instance

Cause: The specified process was not logged on to the current instance.

Action: Specify a valid process.

ORA-00076: dump <varname>string</varname> not found

Cause: An attempt was made to invoke a dump that does not exist.

Action: Type DUMPLIST to see the list of available dumps.

ORA-00077: dump <varname>string</varname> is not valid

Cause: An attempt was made to invoke an invalid dump.

Action: Try another dump.

ORA-00078: cannot dump variables by name

Cause: An attempt was made to dump a variable by name on a system that does not support this feature.

Action: Try the PEEK command.

ORA-00079: variable <varname>string</varname> not found

Cause: An attempt was made to dump a variable that does not exist.

Action: Use a valid variable name.

ORA-00080: invalid global area specified by level <varname>string</varname>

Cause: An attempt was made to dump an invalid global area.

Action: Use level 1 for the PGA, 2 for the SGA, and 3 for the UGA. Use <extra + level> to dump global area <varname>level</varname> as well as <varname>extra</varname> bytes for every pointer; <varname>extra</varname> must be a multiple of 4.

ORA-00081: address range [<varname>string</varname>, <varname>string</varname>) is not readable

Cause: An attempt was made to read/write an invalid memory address range.

Action: Try another address or length.

ORA-00082: memory size of <varname>string</varname> is not in valid set of [1], [2], [4]<varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: An invalid length was specified for the POKE command.

Action: Use a valid length (either 1, 2, 4, or possibly 8).

ORA-00083: warning: possibly corrupt SGA mapped

Cause: Even though there may be SGA corruptions, the SGA was mapped.

Action: Use the DUMPSGA command to dump the SGA.

ORA-00084: global area must be PGA, SGA, or UGA

Cause: An attempt was made to dump an invalid global area.

Action: Specify either PGA, SGA, or UGA.

ORA-00085: current call does not exist

Cause: An invalid attempt was made to dump the current call heap.

Action: Wait until the process starts a call.

ORA-00086: user call does not exist

Cause: An invalid attempt was made to dump the user call heap.

Action: Wait until the process starts a call.

ORA-00087: command cannot be executed on remote instance

Cause: Cluster database command issued for non cluster database ORADEBUG command.

Action: Issue the command without the cluster database syntax.

ORA-00088: command cannot be executed by shared server

Cause: Debug command issued on shared server.

Action: Reissue the command using a dedicated server.

ORA-00089: invalid instance number in ORADEBUG command

Cause: An invalid instance number was specified in a cluster database ORADEBUG command.

Action: Reissue the command with valid instance numbers.

ORA-00090: failed to allocate memory for cluster database ORADEBUG command

Cause: Could not allocate memory needed to execute cluster database oradebug.

Action: Reissue the command on each instance with single-instance oradebug.

ORA-00091: LARGE_POOL_SIZE must be at least <varname>string</varname>

Cause: The value of LARGE_POOL_SIZE is below the minimum size.

Action: Increase the value of LARGE_POOL_SIZE past the minimum size.

ORA-00092: LARGE_POOL_SIZE must be greater than LARGE_POOL_MIN_ALLOC

Cause: The value of LARGE_POOL_SIZE is less than the value of LARGE_POOL_MIN_ALLOC.

Action: Increase the value of LARGE_POOL_SIZE past the value of LARGE_POOL_MIN_ALLOC.

ORA-00093: <varname>string</varname> must be between <varname>string</varname> and <varname>string</varname>

Cause: The parameter value is not in a valid range.

Action: Modify the parameter value to be within the specified range.

ORA-00094: <varname>string</varname> requires an integer value

Cause: The parameter value is not an integer.

Action: Modify the parameter value to be an integer.

ORA-00096: invalid value <varname>string</varname> for parameter <varname>string</varname>, must be from among <varname>string</varname>

Cause: The value for the initialization parameter is invalid.

Action: Choose a value as indicated by the message.

ORA-00097: use of Oracle SQL feature not in SQL92 <varname>string</varname> Level

Cause: Usage of Oracle's SQL extensions.

Action: n/a

ORA-00098: creating or mounting the database requires a parameter file

Cause: An attempt was made to create or mount the database when the instance was started without a parameter file.

Action: Restart the instance with a parameter file.

ORA-00099: warning: no parameter file specified for <varname>string</varname> instance

Cause: Even though no parameter file was specified, the instance was started with all default values.

Action: None

ORA-00100: no data found

Cause: An application made reference to unknown or inaccessible data.

Action: Handle this condition within the application or make appropriate modifications to the application code. NOTE: If the application uses Oracle-mode SQL instead of ANSI-mode SQL, ORA-01403 will be generated instead of ORA-00100.

ORA-00101: invalid specification for system parameter DISPATCHERS

Cause: The syntax for the DISPATCHERS parameter is incorrect.

Action: Refer to the manual for correct syntax.

ORA-00102: network protocol <varname>string</varname> cannot be used by dispatchers

Cause: The network specified in DISPATCHERS does not have the functionality required by the dispatchers.

Action: Refer to the manual on network protocols supported by the dispatchers.

ORA-00103: invalid network protocol; reserved for use by dispatchers

Cause: The network specified in the SQL*Net connect string is reserved for use by the dispatchers.

Action: Specify other network protocols in the connection string.

ORA-00104: deadlock detected; all public servers blocked waiting for resources

Cause: All available public servers are servicing requests that require resources locked by a client which is unable to get a public server to release the resources.

Action: Increase the limit for the system parameter MAX_SHARED_SERVERS as the system will automatically start up new servers to break the deadlock until the number of servers reaches the value specified in MAX_SHARED_SERVERS.

ORA-00105: too many dispatcher configurations

Cause: Too many dispatcher configurations have been specified. No more can be added.

Action: Consolidate the dispatcher configurations if possible.

ORA-00106: cannot startup/shutdown database when connected to a dispatcher

Cause: An attempt was made to startup/shutdown database when connected to a shared server via a dispatcher.

Action: Re-connect as user INTERNAL without going through the dispatcher. For most cases, this can be done by connect to INTERNAL without specifying a network connect string.

ORA-00107: failed to connect to ORACLE listener process

Cause: Most likely due to the fact that ORACLE listener has not been started.

Action: Start ORACLE listener if it has not been started. Or else contact your ORACLE representative.

ORA-00108: failed to set up dispatcher to accept connection asynchronously

Cause: Most likely due to the fact that the network protocol used by the the dispatcher does not support asynchronous operations.

Action: Contact your ORACLE representative.

**ORA-00109: invalid value for attribute <varname>string</varname>:
<varname>string</varname>**

Cause: The value specified for the attribute was incorrect.

Action: Refer to the manual for the proper values.

**ORA-00110: invalid value <varname>string</varname> for attribute
<varname>string</varname>, must be between <varname>string</varname>
and <varname>string</varname>**

Cause: The value specified for the attribute was incorrect.

Action: Specify a value within the range allowed.

ORA-00111: invalid attribute <varname>string</varname>

Cause: The specified attribute was not recognized.

Action: Refer to the manual for the proper keyword to use to specify a dispatcher attribute.

ORA-00112: value of <varname>string</varname> is null

Cause: The attribute was specified with no value.

Action: Specify a non-null value.

ORA-00113: protocol name <varname>string</varname> is too long

Cause: A protocol name specified in the DISPATCHERS system parameter is too long.

Action: Use a valid protocol name for the DISPATCHERS value.

ORA-00114: missing value for system parameter SERVICE_NAMES

Cause: No value was specified for the SERVICE_NAMES system parameter, nor for the DB_NAME parameter.

Action: Add an SERVICE_NAMES or DB_NAME definition to the INIT.ORA file. By default, SERVICE_NAMES is the value of DB_NAME unless SERVICE_NAMES is explicitly specified.

ORA-00115: connection refused; dispatcher connection table is full

Cause: A connection request was refused by a dispatcher because the dispatcher cannot support any more connections.

Action: Connect to a different dispatcher, or use a dedicated server.

ORA-00116: SERVICE_NAMES name is too long

Cause: A service name specified in the SERVICE_NAMES system parameter is too long.

Action: Use a shorter name in the SERVICE_NAMES value (<= 255 chars).

ORA-00117: PROTOCOL, ADDRESS or DESCRIPTION must be specified

Cause: PROTOCOL, ADDRESS or DESCRIPTION was not specified.

Action: Use one of the attributes: PROTOCOL, ADDRESS or DESCRIPTION to specify the listening address for dispatchers.

ORA-00118: Only one of PROTOCOL, ADDRESS or DESCRIPTION may be specified

Cause: More than one of PROTOCOL, ADDRESS or DESCRIPTION was specified.

Action: Use only one of the attributes: PROTOCOL, ADDRESS or DESCRIPTION to specify the listening address for dispatchers.

ORA-00119: invalid specification for system parameter <varname>string</varname>

Cause: The syntax for the specified parameter is incorrect.

Action: Refer to the Oracle Reference Manual for the correct syntax.

ORA-00120: invalid 'shared_servers' value for the PDB

Cause: 'shared_servers' cannot be set to a non-zero value in a non-ROOT pluggable database (PDB).

Action: In a multitenant container database (CDB) setup, shared servers can be configured only in ROOT. A non-ROOT PDB can disable shared servers for the PDB by setting 'shared_servers' to 0. No other values are allowed. To reenale within the PDB, use 'alter system reset shared_servers'.

ORA-00122: cannot initialize network configuration

Cause: ORACLE could not initialize SQL*Net version 2.

Action: Check the error stack for detailed information.

ORA-00123: idle public server terminating

Cause: Too many idle servers were waiting on the common queue.

Action: This error is used internally, no action is required.

ORA-00125: connection refused; invalid presentation

Cause: The PRESENTATION in the CONNECT_DATA of the TNS address DESCRIPTION is not correct or is not supported.

Action: Correct the PRESENTATION specified in the TNS address.

ORA-00126: connection refused; invalid duplicity

Cause: The DUPLICITY in the CONNECT_DATA of the TNS address DESCRIPTION is not correct or is not supported.

Action: Correct the DUPLICITY specified in the TNS address.

ORA-00127: dispatcher <varname>string</varname> does not exist

Cause: There is currently no dispatcher running with the specified name.

Action: Retry with a name of the form "D####" denoting an existing dispatcher process.

ORA-00128: this command requires a dispatcher name

Cause: Wrong syntax for ALTER SYSTEM SHUTDOWN

Action: Use correct syntax: ALTER SYSTEM SHUTDOWN [IMMEDIATE] 'dispatcher name'

ORA-00129: listener address validation failed '<varname>string</varname>'

Cause: An error was encountered while validating the listener address.

Action: Resolve error or contact your ORACLE representative.

ORA-00130: invalid listener address '<varname>string</varname>'

Cause: The listener address specification is not valid.

Action: Make sure that all fields in the listener address (protocol, port, host, key, ...) are correct.

ORA-00131: network protocol does not support registration '<varname>string</varname>'

Cause: The specified protocol does not support async notification.

Action: Refer to the manual for information on supported network protocols.

ORA-00132: syntax error or unresolved network name '<varname>string</varname>'

Cause: Listener address has syntax error or cannot be resolved.

Action: If a network name is specified, check that it corresponds to an entry in TNSNAMES.ORA or other address repository as configured for your system. Make sure that the entry is syntactically correct.

ORA-00133: value of <varname>string</varname> is too long

Cause: The value specified for the attribute was too long.

Action: Use shorter names and keywords or remove unneeded blanks.

ORA-00134: invalid DISPATCHERS specification #<varname>string</varname>

Cause: The syntax for the n-th DISPATCHERS specification was incorrect.

Action: Refer to the Oracle Reference Manual for the correct syntax.

ORA-00135: missing attribute <varname>string</varname>

Cause: The indicated mandatory attribute was not specified.

Action: Specify a non-null value for the attribute.

ORA-00136: invalid LISTENER_NETWORKS specification #<varname>string</varname>

Cause: The syntax for the nth LISTENER_NETWORKS specification was invalid.

Action: Refer to the Oracle Reference Manual for the correct syntax.

ORA-00137: invalid LISTENER_NETWORKS specification with NAME=<varname>string</varname>

Cause: The syntax for the LISTENER_NETWORKS specification with the indicated NAME was invalid.

Action: Refer to the Oracle Reference Manual for the correct syntax.

ORA-00138: all addresses specified for attribute <varname>string</varname> are invalid

Cause: All of the specified addresses or aliases for the attribute were invalid.

Action: Specify at least one valid address or alias.

ORA-00139: duplicate attribute <varname>string</varname>

Cause: The indicated attribute was specified more than once.

Action: Specify the attribute at most once.

ORA-00150: duplicate transaction ID

Cause: Attempted to start a new transaction with an ID already in use by an existing transaction.

Action: Check your application.

ORA-00151: invalid transaction ID

Cause: The specified transaction ID does not correspond to an existing valid transaction.

Action: Check your application.

ORA-00152: current session does not match requested session

Cause: The current session is not the same as the session that was passed into a `upixado()` call.

Action: Check your application.

ORA-00153: internal error in XA library

Cause: The XA library could not access thread-specific pointers.

Action: Contact customer support.

ORA-00154: protocol error in transaction monitor

Cause: The transaction monitor returned TMJOIN on an AX_REG call but the transaction was locally suspended.

Action: Contact the transaction monitor customer support.

ORA-00155: cannot perform work outside of global transaction

Cause: The application tried to perform some work on either an Oracle 7.3 server or an Oracle8 server with local transactions disabled while outside of a global transaction.

Action: Check if the application is connected to an Oracle 7.3 server. The Transaction monitor must not return a NULL XID on an AX_REG call when the resource manager is Oracle 7.3. If the application is connected to an Oracle8 server, either set `nolocal=f` in the `xa_open` string or start a global transaction prior to attempting the work.

ORA-00160: global transaction length <varname>string</varname> is greater than maximum (<varname>string</varname>)

Cause: An external global transaction ID with a too large length field was passed in.

Action: Report the problem to your external transaction coordinator vendor.

ORA-00161: transaction branch length <varname>string</varname> is illegal (maximum allowed <varname>string</varname>)

Cause: An external transaction branch ID with a length either too large or 0 was passed in.

Action: Report the problem to your external transaction coordinator vendor.

ORA-00162: external dbid length <varname>string</varname> is greater than maximum (<varname>string</varname>)

Cause: An external database name with too large a length field was passed in.

Action: Report the problem to your external transaction coordinator vendor.

ORA-00163: internal database name length <varname>string</varname> is greater than maximum (<varname>string</varname>)

Cause: An internal database name with a too large length field was passed in.

Action: Report the problem to your external transaction coordinator vendor.

ORA-00164: distributed autonomous transaction disallowed within migratable distributed transaction

Cause: A request was made by the application to start a distributed autonomous transaction when the application was in a migratable distributed transaction.

Action: Roll back or commit the current distributed transaction first.

ORA-00165: migratable distributed autonomous transaction with remote operation is not allowed

Cause: A request was made by the application to start a migratable distributed autonomous transaction with remote operation.

Action: n/a

ORA-00166: remote/local nesting level is too deep

Cause: Too many remote table operations required a reverse trip back to the local site, for example to execute a local function on a remote table.

Action: Rearrange the query or co-locate the functions with the tables.

ORA-00200: control file could not be created

Cause: It was not possible to create the control file.

Action: Check that there is sufficient disk space and no conflicts in filenames and try to create the control file again.

ORA-00201: control file version <varname>string</varname> incompatible with ORACLE version <varname>string</varname>

Cause: The control file was created by incompatible software.

Action: Either restart with a compatible software release or use CREATE CONTROLFILE to create a new control file that is compatible with this release.

ORA-00202: control file: '<varname>string</varname>'

Cause: This message reports the name file involved in other messages.

Action: See associated error messages for a description of the problem.

ORA-00203: using the wrong control files

Cause: The mount ID in the control file is not the same as the mount ID in the control file used by the first instance to mount this database. The control files are for the same database but they are not the same files. Most likely one instance is using a backup control file.

Action: Check that the correct control files were specified.

ORA-00204: error in reading (block <varname>string</varname>, # blocks <varname>string</varname>) of control file

Cause: A disk I/O failure was detected on reading the control file.

Action: Check if the disk is online, if it is not, bring it online and try a warm start again. If it is online, then you need to recover the disk.

ORA-00205: error in identifying control file, check alert log for more info

Cause: The system could not find a control file of the specified name and size.

Action: Check that ALL control files are online and that they are the same files that the system created at cold start time.

ORA-00206: error in writing (block <varname>string</varname>, # blocks <varname>string</varname>) of control file

Cause: A disk I/O failure was detected on writing the control file.

Action: Check if the disk is online, if it is not, bring it online and try a warm start again. If it is online, then you need to recover the disk.

ORA-00207: control files are not for the same database

Cause: The database ID in the control file is not the same as the database ID in the control file used by the first instance to mount this database. Most likely one of the mounts used the wrong control file or there are two databases with the same name.

Action: Check that the control file is for the correct database and is not an old version.

ORA-00208: number of control file names exceeds limit of <varname>string</varname>

Cause: An attempt was made to use more control files than Oracle supports.

Action: Shut down Oracle. Reduce the number of control files specified in the CONTROL_FILES parameter in the initialization parameter file, and restart Oracle. Delete unused files.

ORA-00209: control file blocksize mismatch, check alert log for more info

Cause: The block size in the control file header does not match the size specified in the DB_BLOCK_SIZE parameter.

Action: Look at the alert log for more information.

ORA-00210: cannot open the specified control file

Cause: Cannot open the control file.

Action: Check to make sure the control file exists and is not locked by some other program.

ORA-00211: control file does not match previous control files

Cause: A control file was specified that belongs to another database.

Action: Find and install the correct control file.

ORA-00212: block size <varname>string</varname> below minimum required size of <varname>string</varname> bytes

Cause: The block size specified was too small. Space for the system overhead is required.

Action: Specify a larger block size and retry the operation.

ORA-00213: cannot reuse control file; old file size <varname>string</varname>, <varname>string</varname> required

Cause: To reuse a control file, it must be the same size as the one previously used.

Action: Either do not specify REUSE, or specify a matching combination of MAXDATAFILES, MAXLOGFILES, MAXLOGMEMBERS, MAXLOGHISTORY, and MAXINSTANCES clauses in the CREATE DATABASE or CREATE CONTROLFILE statement.

ORA-00214: control file '<varname>string</varname>' version <varname>string</varname> inconsistent with file '<varname>string</varname>' version <varname>string</varname>

Cause: An inconsistent set of control files, datafiles/logfiles, and redo files was used.

Action: Use a consistent set of control files, datafiles/logfiles, and redo log files. That is, all the files must be for the same database and from the same time period.

ORA-00215: must be at least one control file

Cause: No control file is specified or the control file specified does not exist.

Action: Specify at least one valid control file and retry the operation.

ORA-00216: control file could not be resized for migration from 8.0.2

Cause: The control file created by release 8.0.2 was missing some record types. These record types are automatically added by resizing the control file during mount. The resize has failed.

Action: Look in the alert log for the reason that the resize has failed. If indicated in the alert log, give the control file more space. Otherwise, use the CREATE CONTROLFILE script dumped to the trace file to create a new control file.

ORA-00217: control file could not be resized for new record types

Cause: The control file was missing some new record types supported by this release. These record types are automatically added by resizing the control file during mount. The resize has failed.

Action: Look in the alert log for the reason that the resize has failed. If indicated in the alert log, give the control file more space. Otherwise, use the CREATE CONTROLFILE script dumped to the trace file to create a new control file.

**ORA-00218: block size <varname>string</varname> of control file
'<varname>string</varname>' does not match DB_BLOCK_SIZE
(<varname>string</varname>)**

Cause: The block size as stored in the control file header is different from the value of the initialization parameter DB_BLOCK_SIZE. This might be due to an incorrect setting of DB_BLOCK_SIZE, or else might indicate that the control file has either been corrupted or belongs to a different database.

Action: Restore a good copy of the control file. If the control file is known to be clean set the DB_BLOCK_SIZE to match control file headers block size value.

ORA-00219: required control file size (<varname>string</varname> logical blocks) exceeds maximum allowable size (<varname>string</varname> logical blocks)

Cause: An invocation of CREATE DATABASE or CREATE CONTROLFILE was executed specifying a combination of parameters that would require the control file size in blocks to exceed the maximum allowable value.

Action: In the case of CREATE DATABASE or CREATE CONTROLFILE, use a different combination of MAXDATAFILES, MAXLOGFILES, MAXLOGMEMBERS, MAXLOGHISTORY, and MAXINSTANCES clauses.

ORA-00220: control file not mounted by first instance, check alert log for more info

Cause: The specified control file has a different mount ID than the other control files that are being mounted. This means that the first instance to mount the database did not use this control file.

Action: Find and install the correct control file.

ORA-00221: error on write to control file

Cause: An error occurred when writing to one or more of the control files.

Action: See accompanying messages.

ORA-00222: operation would reuse name of a currently mounted control file

Cause: The filename supplied as a parameter to the ALTER DATABASE BACKUP CONTROLFILE command or to cfileSetSnapshotName matches the name of the specified currently mounted control file.

Action: Retry the operation with a different filename.

ORA-00223: convert file is invalid or incorrect version

Cause: An Oracle7 to Oracle8 convert file contains invalid data or was created with an different version of the migration utility. This error can also be caused by incorrect ORACLE_HOME environment variable when ALTER DATABASE CONVERT command is issued.

Action: Use a correct version of the convert file or regenerate it with the migration utility. Make sure that the migration utility is the same version as the Oracle8 RDBMS executable and that the ORACLE_HOME environment variable is properly set.

**ORA-00224: control file resize attempted with illegal record type
(<varname>string</varname>)**

Cause: An attempt was made to expand or shrink the control file by calling cfileResizeSection using an invalid value for the RECORD_TYPE parameter.

Action: Use a value for the RECORD_TYPE parameter that specifies a valid record type other than type 0 (valid range is 1-16).

ORA-00225: expected size <varname>string</varname> of control file differs from actual size <varname>string</varname>

Cause: The expected size of the control file as stored in its header was different than the actual operating system file size. This usually indicates that the control file was corrupted.

Action: Restore a good copy of the control file.

ORA-00226: operation disallowed while alternate control file open

Cause: The attempted operation could not be executed at this time because this process had an alternate control file open for fixed table access.

Action: Retry the operation after calling cfileUseCurrent.

ORA-00227: corrupt block detected in control file: (block <varname>string</varname>, # blocks <varname>string</varname>)

Cause: A block header corruption or checksum error was detected on reading the control file.

Action: Use the CREATE CONTROLFILE or RECOVER DATABASE USING BACKUP CONTROLFILE command.

ORA-00228: length of alternate control file name exceeds maximum of <varname>string</varname>

Cause: The specified filename, which was supplied as a parameter to cfileSetSnapshotName or cfileUseCopy, exceeds the maximum filename length for this operating system.

Action: Retry the operation with a shorter filename.

ORA-00229: operation disallowed: already hold snapshot control file enqueue

Cause: The attempted operation cannot be executed at this time because this process currently holds the snapshot control file enqueue.

Action: Retry the operation after calling cfileUseCurrent to release the snapshot control file enqueue.

ORA-00230: operation disallowed: snapshot control file enqueue unavailable

Cause: The attempted operation cannot be executed at this time because another process currently holds the snapshot control file enqueue.

Action: Retry the operation after the concurrent operation that is holding the snapshot control file enqueue terminates.

ORA-00231: snapshot control file has not been named

Cause: During an invocation of cfileMakeAndUseSnapshot or cfileUseSnapshot it was detected that no filename for the snapshot control file had previously been specified.

Action: Specify a name for the snapshot control file by calling cfileSetSnapshotName.

ORA-00232: snapshot control file is nonexistent, corrupt, or unreadable

Cause: The snapshot control file was found to be nonexistent, corrupt, or unreadable during an invocation of cfileUseSnapshot.

Action: Call cfileMakeAndUseSnapshot again (or for the first time).

ORA-00233: copy control file is corrupt or unreadable

Cause: The specified copy control file was found to be corrupt or unreadable during an invocation of cfileUseCopy.

Action: Before retrying cfileUseCopy, use the ALTER DATABASE BACKUP CONTROLFILE command and specify the same filename that was specified for cfileUseCopy.

ORA-00234: error in identifying or opening snapshot or copy control file

Cause: A snapshot or copy control file of the specified name could not be found or opened during an invocation of cfileUseSnapshot, cfileMakeAndUseSnapshot, or cfileUseCopy.

Action: Re-create the snapshot or copy control file using cfileMakeAndUseSnapshot or ALTER DATABASE BACKUP CONTROLFILE, respectively.

ORA-00235: control file read without a lock inconsistent due to concurrent update

Cause: Concurrent update activity on a control file caused a process to read inconsistent information from the control file without a lock.

Action: Retry the operation.

ORA-00236: snapshot operation disallowed: mounted control file is a backup

Cause: Attempting to invoke cfileSetSnapshotName, cfileMakeAndUseSnapshot, or cfileUseSnapshot when the currently mounted control file is a backup control file.

Action: Mount a current control file and retry the operation.

ORA-00237: snapshot operation disallowed: control file newly created

Cause: An attempt to invoke cfileMakeAndUseSnapshot with a currently mounted control file that was newly created with CREATE CONTROLFILE was made.

Action: Mount a current control file and retry the operation.

ORA-00238: operation would reuse a filename that is part of the database

Cause: The filename supplied as a parameter to the ALTER DATABASE BACKUP CONTROLFILE command or to cfileSetSnapshotName matches the name of a file that is currently part of the database.

Action: Retry the operation with a different filename.

ORA-00239: timeout waiting for control file enqueue: held by '<varname>string</varname>' for more than <varname>string</varname> seconds

Cause: The specified process waited the maximum allowed time for the control file enqueue.

Action: Restart the blocking instance indicated in the incident trace file or reboot the blocking node.

ORA-00240: control file enqueue held for more than <varname>string</varname> seconds

Cause: The current process did not release the control file enqueue within the maximum allowed time.

Action: Reissue any commands that failed and contact Oracle Support Services with the incident information.

ORA-00241: operation disallowed: control file inconsistent with data dictionary

Cause: The control file was either recently created via CREATE CONTROLFILE or an incomplete recovery has been done. Thus, the datafiles in the control file and the ones in the data dictionary may not match.

Action: Open the database, then retry the operation.

ORA-00242: maximum allowed filename records used up in control file

Cause: Failed to create a new filename record entry in the control file because the maximum allowed filename records have been allocated and are in use.

Action: Free up controlfile filename section entries by dropping unwanted tablespaces/datafiles/redofiles.

ORA-00243: failed to expand control file filename section by <varname>string</varname> records

Cause: Failed to expand control file filename section. See alert log for more details.

Action: Retry the operation after increasing disk space for controlfile expansion.

ORA-00244: concurrent control file backup operation in progress

Cause: Failed to create a control file backup because concurrent control file backup operation was in progress.

Action: Retry backup creation later.

ORA-00245: control file backup failed; in Oracle RAC, target might not be on shared storage

Cause: Failed to create a control file backup because some process signaled an error during backup creation. This is likely caused by the backup target (i.e., RMAN snapshot controlfile) being on a local file system so it could not be accessed by other instances. It can also be caused by other I/O errors to the backup target. Any process of any instance that starts a read/write control file transaction must have access to the backup control file during backup creation.

Action: Check whether RMAN snapshot controlfile is on shared storage. Also, check alert files of all instances for further information.

ORA-00246: control file backup failed; error accessing backup target

Cause: An attempt to create a control file backup failed because some process signaled an I/O error when accessing the backup target.

Action: Check alert and trace files for further information.

ORA-00250: archiver not started

Cause: An attempt was made to stop automatic archiving, but the archiver process was not running.

Action: No action required.

ORA-00251: LOG_ARCHIVE_DUPLEX_DEST cannot be the same destination as string <varname>string</varname>

Cause: The destination specified by the LOG_ARCHIVE_DUPLEX_DEST parameter is the same as the destination specified by an ALTER SYSTEM ARCHIVE LOG START TO command.

Action: Specify a different destination for parameter LOG_ARCHIVE_DUPLEX_DEST, or specify a different destination with the ALTER SYSTEM command.

ORA-00252: log <varname>string</varname> of thread <varname>string</varname> is empty, cannot archive

Cause: A log must be used for redo generation before it can be archived. The specified redo log was not been used since it was introduced to the database. However it is possible that instance death during a log switch left the log empty.

Action: Empty logs do not need to be archived. Do not attempt to archive the redo log file.

ORA-00253: character limit <varname>string</varname> exceeded by archive destination string <varname>string</varname>

Cause: The destination specified by an ALTER SYSTEM ARCHIVE LOG START TO command was too long.

Action: Retry the ALTER SYSTEM command using a string shorter than the limit specified in the error message.

ORA-00254: error in archive control string '<varname>string</varname>'

Cause: The specified archive log location is invalid in the archive command or the LOG_ARCHIVE_DEST initialization parameter.

Action: Check the archive string used to make sure it refers to a valid online device.

ORA-00255: error archiving log <varname>string</varname> of thread <varname>string</varname>, sequence # <varname>string</varname>

Cause: An error occurred during archiving.

Action: Check the accompanying message stack for more detailed information. If the online log is corrupted, then the log can be cleared using the UNARCHIVED option. This will make any existing backups useless for recovery to any time after the log was created, but will allow the database to generate redo.

ORA-00256: cannot translate archive destination string <varname>string</varname>

Cause: The destination specified by an ALTER SYSTEM ARCHIVE LOG START TO command could not be translated.

Action: Check the accompanying message stack for more detailed information. Then, retry the ALTER SYSTEM command using a different string.

ORA-00257: Archiver error. Connect AS SYSDBA only until resolved.

Cause: The archiver process received an error while trying to archive a redo log. If the problem is not resolved soon, the database will stop executing transactions. The most likely cause of this message is that the destination device is out of space to store the redo log file. Another possible cause is that a destination marked as MANDATORY has failed.

Action: Check the alert log and trace files for detailed error information.

ORA-00258: manual archiving in NOARCHIVELOG mode must identify log

Cause: The database is in NOARCHIVELOG mode and a command to manually archive a log did not specify the log explicitly by sequence number, group number or filename.

Action: Specify log by filename, by group number or by thread and sequence number.

ORA-00259: log <varname>string</varname> of open instance <varname>string</varname> (thread <varname>string</varname>) is the current log, cannot archive

Cause: An attempt was made to archive the current log of an open thread. This is not allowed because the redo log file may still be in use for the generation of redo entries.

Action: Force a log switch in the instance where the thread is open. If no instances are open, open the database so that instance recovery can recover the thread.

ORA-00260: cannot find online log sequence <varname>string</varname> for thread <varname>string</varname>

Cause: The log sequence number supplied to the archival command does not match any of the online logs for the thread. The log might have been reused for another sequence number, it might have been dropped, the sequence number might be greater than the current log sequence number, or the thread might not have any logs.

Action: Check the ARCHIVE statement, then specify a valid log sequence number. Specify a valid log sequence number.

ORA-00261: log <varname>string</varname> of thread <varname>string</varname> is being archived or modified

Cause: The log is either being archived by another process or an administrative command is modifying the log. Operations that modify the log include clearing, adding a member, dropping a member, renaming a member, and dropping the log.

Action: Wait for the current operation to complete and try again.

ORA-00262: current log <varname>string</varname> of closed thread <varname>string</varname> cannot switch

Cause: The log cannot be cleared or manually archived because it is the current log of a closed thread, and it is not possible to switch logs so another log is current. All other logs for the thread need to be archived, or cleared, and cannot be reused.

Action: Archive another log in the same thread first, or complete the clearing. See attached errors for the reason the switch cannot be completed.

ORA-00263: there are no logs that need archiving for thread <varname>string</varname>

Cause: An attempt was made to manually archive the unarchived logs in this thread but no logs needed archiving.

Action: No action required.

ORA-00264: no recovery required

Cause: An attempt was made to perform media recovery on files that do not // need any type of recovery.

Action: Do not attempt to perform media recovery on the selected files. Check to see that the filenames were entered properly. If not, retry the command with the proper filenames.

ORA-00265: instance recovery required, cannot set ARCHIVELOG mode

Cause: The database either crashed or was shutdown with the ABORT option. Media recovery cannot be enabled because the online logs may not be sufficient to recover the current datafiles.

Action: Open the database and then enter the SHUTDOWN command with the NORMAL or IMMEDIATE option.

ORA-00266: name of archived log file needed

Cause: During media recovery, the name of an archived redo log file was requested, but no name was entered.

Action: Mount the correct redo log file and enter its name when it is requested.

ORA-00267: name of archived log file not needed

Cause: During media recovery, the name of an archived redo log file was entered, but no name was requested.

Action: Continue media recovery, but do not enter a new log name.

ORA-00268: specified log file does not exist '<varname>string</varname>'

Cause: The given redo log file does not exist.

Action: Check the spelling and capitalization of the filename and retry the command.

ORA-00269: specified log file is part of thread <varname>string</varname> not <varname>string</varname>

Cause: The given redo log file is not part of the given thread

Action: Check that the thread of the redo log file matches the thread on the command line. If not, use a redo log file from the appropriate thread. Retry the command after correcting the error.

ORA-00270: error creating archive log <varname>string</varname>

Cause: An error was encountered when either creating or opening the destination file for archiving.

Action: Check that the archive destination is valid and that there is sufficient space on the destination device.

ORA-00271: there are no logs that need archiving

Cause: An attempt was made to archive the unarchived redo log files manually, but there are no files that need to be archived.

Action: No action required.

ORA-00272: error writing archive log <varname>string</varname>

Cause: An I/O error occurred while archiving a redo log file.

Action: Check that the output device is still available and correct any device errors that may have occurred. Also, make certain that sufficient space for archiving is available on the output device.

ORA-00273: media recovery of direct load data that was not logged

Cause: A media recovery session encountered a table that was loaded by the direct loader without logging any redo information. Some or all of the blocks in this table are now marked as corrupt.

Action: The table must be dropped or truncated so that the corrupted blocks can be reused. If a more recent backup of the file is available, try to recover this file to eliminate this error.

ORA-00274: illegal recovery option <varname>string</varname>

Cause: An illegal option was specified for a recovery command.

Action: Correct the syntax and retry the command.

ORA-00275: media recovery has already been started

Cause: An attempt was made to start a second media recovery operation in the same session.

Action: Complete or cancel the first media recovery session or start another session to perform media recovery.

ORA-00276: CHANGE keyword specified but no change number given

Cause: The CHANGE keyword was specified on the command line, but no change number was given.

Action: Retry the command using a valid change number after the CHANGE keyword.

ORA-00277: illegal option to the UNTIL recovery flag <varname>string</varname>

Cause: Only CANCEL, CHANGE, CONSISTENT and TIME can be used with the UNTIL keyword.

Action: Correct the syntax.

ORA-00278: log file '<varname>string</varname>' no longer needed for this recovery

Cause: The specified redo log file is no longer needed for the current recovery.

Action: No action required. The archived redo log file may be removed from its current location to conserve disk space, if needed. However, the redo log file may still be required for another recovery session in the future.

ORA-00279: change <varname>string</varname> generated at <varname>string</varname> needed for thread <varname>string</varname>

Cause: The requested log is required to proceed with recovery.

Action: Please supply the requested log with "ALTER DATABASE RECOVER LOGFILE <file_name>" or cancel recovery with "ALTER DATABASE RECOVER CANCEL".

ORA-00280: change <varname>string</varname> for thread <varname>string</varname> is in sequence #<varname>string</varname>

Cause: This message helps to locate the redo log file with the specified change number requested by other messages.

Action: Use the information provided in this message to specify the required archived redo log files for other errors.

ORA-00281: media recovery may not be performed using dispatcher

Cause: An attempt was made to use a dispatcher process for media recovery. Memory requirements disallow this recovery method.

Action: Connect to the instance via a dedicated server process to perform media recovery.

ORA-00282: UPI <varname>string</varname> call not supported, use ALTER DATABASE RECOVER

Cause: The given UPI call is no longer supported.

Action: Use the ALTER DATABASE RECOVER command for all recovery actions.

ORA-00283: recovery session canceled due to errors

Cause: An error during recovery was determined to be fatal enough to end the current recovery session.

Action: More specific messages will accompany this message. Refer to the other messages for the appropriate action.

ORA-00284: recovery session still in progress

Cause: An error during recovery was determined to be minor enough to allow the current recovery session to continue.

Action: More specific messages will accompany this message. Refer to the other messages for the appropriate action.

ORA-00285: TIME not given as a string constant

Cause: TIME was not followed by a string constant for the time.

Action: Enter the time enclosed in single quotation marks.

ORA-00286: no members available, or no member contains valid data

Cause: None of the members of a redo log file group are available, or the available members do not contain complete data.

Action: If a member is temporarily offline, attempt to make it available. Make sure that the correct filenames are being used, especially if the redo log file is being accessed from a remote location.

ORA-00287: specified change number <varname>string</varname> not found in thread <varname>string</varname>

Cause: The given change number does not appear in any of the online redo logs for the given thread.

Action: Check the statement to make certain a valid change number is given. Perhaps try to use the NEXT option for archiving logs.

ORA-00288: to continue recovery type ALTER DATABASE RECOVER CONTINUE

Cause: During media recovery, a new log is not required but the continuation command is necessary to do a checkpoint and report errors.

Action: Type ALTER DATABASE RECOVER CONTINUE and recovery will resume.

ORA-00289: suggestion : <varname>string</varname>

Cause: This message reports the next redo log filename that is needed, according to the initialization parameters LOG_ARCHIVE_DEST and LOG_ARCHIVE_FORMAT. This message assumes that LOG_ARCHIVE_DEST and LOG_ARCHIVE_FORMAT are the same now as when the required redo log file was archived.

Action: Consider using this filename for the next log needed for recovery.

ORA-00290: operating system archival error occurred. See error below

Cause: While attempting to archive to a redo log file, the server encountered an unexpected operating system error.

Action: Correct the operating system error given in the messages and retry the operation. See also your operating system-specific Oracle documentation.

ORA-00291: numeric value required for PARALLEL option

Cause: A recovery command was specified incorrectly. The PARALLEL option must be followed by a numeric argument that specifies the degree of parallelism.

Action: Re-enter the command with a numeric argument specifying the degree of parallelism desired.

ORA-00292: parallel recovery feature not installed

Cause: A parallel recovery was requested when the parallel recovery option is not installed.

Action: Delete the PARALLEL clause from the RECOVER command. Also, delete the RECOVERY_PARALLELISM parameter in the initialization file.

ORA-00293: control file out of sync with redo log

Cause: The redo log file and control file are out of sync because a non-current control file was specified when the instance was started.

Action: Retry the RECOVER command using the current control file, or retry the RECOVER command using the USING BACKUP CONTROLFILE clause.

ORA-00294: invalid archivelog format specifier '<varname>string</varname>'

Cause: An invalid format specifier was found in the LOG_ARCHIVE_FORMAT initialization parameter. The only characters permitted following the % symbol are s, S, t, and T.

Action: Correct the initialization file and re-start the instance.

ORA-00295: datafile/tempfile number <varname>string</varname> is invalid, must be between 1 and <varname>string</varname>

Cause: An invalid file number was specified.

Action: Specify a valid datafile or tempfile number and retry the operation.

ORA-00296: maximum number of files (<varname>string</varname>) exceeded for RECOVER DATAFILE LIST

Cause: The RECOVER DATAFILE LIST command specified more datafiles than are allowed by the DB_FILES initialization parameter. This error occurs when doing recovery with Recovery Manager, and the instance has been started with a DB_FILES parameter specifying fewer datafiles than recovery manager needs to recover to satisfy the user's RECOVER command.

Action: Re-start the instance with a higher value for DB_FILES.

ORA-00297: must specify RECOVER DATAFILE LIST before RECOVER DATAFILE START

Cause: The RECOVER DATAFILE START command was issued, but no RECOVER DATAFILE LIST commands had been issued. This only happens when doing recovery with Recovery Manager, and is an internal error in Recovery Manager, because Recovery Manager should always issue RECOVER DATAFILE LIST before RECOVER DATAFILE START.

Action: Contact customer support

ORA-00298: Missing or invalid attribute value

Cause: A non-zero integer value is required when the following keyword attributes are specified: TIMEOUT, EXPIRE, DELAY, NEXT

Action: Correct the syntax and retry the command.

ORA-00299: must use file-level media recovery on data file <varname>string</varname>

Cause: The control file does not contain an entry for this file, so block media recovery cannot be done.

Action: Restore the data file and perform file-level media recovery.

ORA-00300: illegal redo log block size <varname>string</varname> specified - exceeds limit of <varname>string</varname>

Cause: The specified block size of the redo log is greater than the maximum block size for the operating system.

Action: Create the redo log on a device with a smaller block size

ORA-00301: error in adding log file '<varname>string</varname>' - file cannot be created

Cause: The creation of the redo log file failed

Action: Check: 1) there is enough storage space on the device 2) the name of the file is valid 3) the device is online 4) an IO error occurred Also, it is possible REUSE was specified on the command line and a file of the incorrect size exists. Either do not specify REUSE or use a file of the correct size.

ORA-00302: limit of <varname>string</varname> logs exceeded

Cause: The maximum number of redo log files has been exceeded.

Action: Use the CREATE CONTROLFILE command with a larger value for MAXLOGFILES if the compatibility is lower than 10.2.0. Otherwise, allocate more storage space for the control file.

ORA-00303: cannot process Parallel Redo

Cause: A redo log containing Parallel Redo has been detected. The current Oracle release cannot process this format of redo.

Action: Use a later release that supports Parallel Redo. to process this log.

ORA-00304: requested INSTANCE_NUMBER is busy

Cause: An instance tried to start by using a value of the initialization parameter INSTANCE_NUMBER that is already in use.

Action: Either a) specify another INSTANCE_NUMBER, b) shut down the running instance with this number c) wait for instance recovery to complete on the instance with this number.

ORA-00305: log <varname>string</varname> of thread <varname>string</varname> inconsistent; belongs to another database

Cause: The database ID in the redo log file does not match the database ID in the control file. This redo log file is not from the current database.

Action: Specify the correct redo log file, then retry the operation.

ORA-00306: limit of <varname>string</varname> instances in this database

Cause: Starting this instance would exceed the maximum number of instances allowed for this database. This message occurs only with STARTUP shared and multiple instances.

Action: You cannot start more than the lower of a) port-specific limit as to the number of instances b) the number of instances specified at create-database time

ORA-00307: requested INSTANCE_NUMBER out of range, maximum is <varname>string</varname>

Cause: The initialization parameter INSTANCE_NUMBER specified a number that was out of range.

Action: Change INSTANCE_NUMBER to a valid range and restart the instance. The minimum value is one and the maximum value is the lower of the operating system-specific maximum or the MAXINSTANCES option specified in the CREATE DATABASE statement. See also your operating system-specific Oracle documentation.

ORA-00308: cannot open archived log '<varname>string</varname>'

Cause: The system cannot access a required archived redo log file.

Action: Check that the off line log exists, the storage device is online, and the archived file is in the correct location. Then attempt to continue recovery or restart the recovery session.

ORA-00309: log belongs to wrong database

Cause: The system cannot access the archived redo log because it belongs to another database.

Action: Specify the correct redo log file, then retry the operation.

ORA-00310: archived log contains sequence <varname>string</varname>; sequence <varname>string</varname> required

Cause: The archived log was out of sequence, probably because it was corrupt or the wrong redo log file name was specified during recovery.

Action: Specify the correct redo log file; then retry the operation.

ORA-00311: cannot read header from archived log

Cause: An I/O error occurred when attempting to read the log file header from the specified archived redo log file.

Action: Other messages will accompany this message. See the associated messages for the appropriate action to take.

ORA-00312: online log <varname>string</varname> thread <varname>string</varname>: '<varname>string</varname>'

Cause: This message reports the filename for details of another message.

Action: Other messages will accompany this message. See the associated messages for the appropriate action to take.

ORA-00313: open failed for members of log group <varname>string</varname> of thread <varname>string</varname>

Cause: The online log cannot be opened. May not be able to find file.

Action: See accompanying errors and make log available.

ORA-00314: log <varname>string</varname> of thread <varname>string</varname>, expected sequence# <varname>string</varname> doesn't match <varname>string</varname>

Cause: The online log is corrupted or is an old version.

Action: Find and install correct version of log or reset logs.

ORA-00315: log <varname>string</varname> of thread <varname>string</varname>, wrong thread # <varname>string</varname> in header

Cause: The online log is corrupted or is an old version.

Action: Find and install correct version of log or reset logs.

ORA-00316: log <varname>string</varname> of thread <varname>string</varname>, type <varname>string</varname> in header is not log file

Cause: The online log is corrupted or is an old version.

Action: Find and install correct version of log or reset logs.

ORA-00317: file type <varname>string</varname> in header is not log file

Cause: This is not an archived log file.

Action: Find the correct file and try again.

ORA-00318: log <varname>string</varname> of thread <varname>string</varname>, expected file size <varname>string</varname> doesn't match <varname>string</varname>

Cause: On header read the file size indicated in the control file did not match the file size contained in the log file.

Action: Restore correct file or reset logs.

ORA-00319: log <varname>string</varname> of thread <varname>string</varname> has incorrect log reset status

Cause: Check of log file header at database open found that an online log has log reset data that is different from the control file. The log is probably an incorrectly restored backup.

Action: Restore correct file or reset logs.

ORA-00320: cannot read file header from log <varname>string</varname> of thread <varname>string</varname>

Cause: The file is not available.

Action: Restore the log file.

ORA-00321: log <varname>string</varname> of thread <varname>string</varname>, cannot update log file header

Cause: Cannot write to the log file.

Action: Restore the access to the file.

ORA-00322: log <varname>string</varname> of thread <varname>string</varname> is not current copy

Cause: Check of log file header at database open found that an online log appears to be an incorrectly restored backup.

Action: Restore correct file or reset logs.

ORA-00323: Current log of thread <varname>string</varname> not useable and all others need archiving

Cause: Attempt to open thread failed because it is necessary to switch redo generation to another online log, but all the other logs need to be archived before they can be used.

Action: Archive the logs for the thread then retry open.

ORA-00324: log file '<varname>string</varname>' translated name '<varname>string</varname>' too long, <varname>string</varname> characters exceeds <varname>string</varname> limit

Cause: the translated name for a log file is too long.

Action: Choose a untranslated name that yields a shorter translated name.

ORA-00325: archived log for thread <varname>string</varname>, wrong thread # <varname>string</varname> in header

Cause: The archived log is corrupted or for another thread. Can not use the log for applying redo.

Action: Find correct archived log.

ORA-00326: log begins at change <varname>string</varname>, need earlier change <varname>string</varname>

Cause: The archived log supplied for recovery was generated after the log that is needed. Can not yet use the log for applying redo.

Action: Find correct archived log.

ORA-00327: log <varname>string</varname> of thread <varname>string</varname>, physical size <varname>string</varname> less than needed <varname>string</varname>

Cause: A log file has shrunk in size. This is likely to have been caused by operator or operating system error.

Action: Restore the log file from backup. If backup is not available, drop this log and re-create. If the database was shut down cleanly, no further action should be required; otherwise incomplete recovery may be required.

ORA-00328: archived log ends at change <varname>string</varname>, need later change <varname>string</varname>

Cause: The archived log supplied for recovery was generated before the log that is needed. Can not use the log for applying redo.

Action: Find correct archived log.

ORA-00329: archived log begins at change <varname>string</varname>, need change <varname>string</varname>

Cause: The archived log is not the correct log. An earlier log is needed.

Action: Restore the correct log file.

ORA-00330: archived log ends at change <varname>string</varname>, need change <varname>string</varname>

Cause: The archived log is not the correct log. A later log is needed.

Action: Restore the correct log file.

ORA-00331: log version <varname>string</varname> incompatible with ORACLE version <varname>string</varname>

Cause: The log was written by incompatible version of Oracle.

Action: Recover the database with the compatible software, shut it down cleanly, then restart with current software.

ORA-00332: archived log is too small - may be incompletely archived

Cause: The log is smaller than the space allocated in it. May be the result of a shutdown abort while it was being written by the archiver.

Action: Get a complete version of this log and use it for recovery. There should either be an online version of it or a copy that was successfully archived.

ORA-00333: redo log read error block <varname>string</varname> count <varname>string</varname>

Cause: An IO error occurred while reading the log described in the accompanying error.

Action: Restore accessibility to file, or get another copy of the file.

ORA-00334: archived log: '<varname>string</varname>'

Cause: Reporting filename for details of another error

Action: See associated error messages

ORA-00335: online log <varname>string</varname>: No log with this number, log does not exist

Cause: Reporting filename for details of another error

Action: See associated error messages

ORA-00336: log file size <varname>string</varname> blocks is less than minimum <varname>string</varname> blocks

Cause: The log file size as specified in create database is too small.

Action: Increase the log file size.

ORA-00337: log file '<varname>string</varname>' does not exist and no size specified

Cause: An attempt to add a log found neither an existing file nor a size for creating the file.

Action: Specify a size for the log file.

ORA-00338: log <varname>string</varname> of thread <varname>string</varname> is more recent than control file

Cause: The control file change sequence number in the log file is greater than the number in the control file. This implies that the wrong control file is being used. Note that repeatedly causing this error can make it stop happening without correcting the real problem. Every attempt to open the database will advance the control file change sequence number until it is great enough.

Action: Use the current control file or do backup control file recovery to make the control file current. Be sure to follow all restrictions on doing a backup control file recovery.

ORA-00339: archived log does not contain any redo

Cause: The archived log is not the correct log. It is a copy of a log file that has never been used for redo generation, or was an online log being prepared to be the current log.

Action: Restore the correct log file.

ORA-00340: IO error processing online log <varname>string</varname> of thread <varname>string</varname>

Cause: An IO error occurred on the named online log.

Action: Restore accessibility to file, or restore file from backup.

ORA-00341: log <varname>string</varname> of thread <varname>string</varname>, wrong log # <varname>string</varname> in header

Cause: The internal information in an online log file does not match the control file.

Action: Restore correct file or reset logs.

ORA-00342: archived log does not have expected resetlogs SCN <varname>string</varname>

Cause: Recovery was given a log that does not belong to current incarnation or one of the parent incarnation. There should be another log that contains the correct redo.

Action: Supply the correct log file.

ORA-00344: unable to re-create online log '<varname>string</varname>'

Cause: An I/O failure occurred when attempting to re-create an online as part of either ALTER DATABASE OPEN RESETLOGS or ALTER DATABASE CLEAR LOGFILE command.

Action: Correct the file/device as indicated by accompanying errors.

ORA-00345: redo log write error block <varname>string</varname> count <varname>string</varname>

Cause: An IO error has occurred while writing the log

Action: Correct the cause of the error, and then restart the system. If the log is lost, apply media/incomplete recovery.

ORA-00346: log member marked as STALE and closed

Cause: A log file member was no longer complete.

Action: Correct the underlying problem by referring to the other error messages found with this one.

ORA-00347: log <varname>string</varname> of thread <varname>string</varname>, expected block size <varname>string</varname> doesn't match <varname>string</varname>

Cause: On header read the blocksize indicated in the control file did not match the blocksize contained in the log file.

Action: Restore correct file or reset logs.

ORA-00348: single-process redo failure. Must abort instance

Cause: A failure occurred during a critical portion of the log code during single process operation. This error does not occur during normal multi-process operation.

Action: Shutdown abort and warmstart the database.

ORA-00349: failure obtaining block size for '<varname>string</varname>'

Cause: The operating system was unable to determine the blocksize for the given filename.

Action: Consult the accompanying error message, and correct the device or specify another filename.

ORA-00350: log <varname>string</varname> of instance <varname>string</varname> (thread <varname>string</varname>) needs to be archived

Cause: The command cannot be done because the log has not been archived, and media recovery has been enabled.

Action: Archive the log or disable media recovery. If the command supports an UNARCHIVED option then it can be used. However this may result in making backups unuseable, and forcing the drop of some offline files.

ORA-00351: recover-to time invalid

Cause: The time specified in a recover-until statement must be after January 1st 1988.

Action: Specify a time after January 1st 1988.

ORA-00352: all logs for thread <varname>string</varname> need to be archived - cannot enable

Cause: Attempting to enable a thread with all logs needing to be archived, and media recovery has been enabled. There is no log that can be made the new current log for the thread.

Action: Archive a log for the thread or disable media recovery.

ORA-00353: log corruption near block <varname>string</varname> change <varname>string</varname> time <varname>string</varname>

Cause: Some type of redo log corruption has been discovered. This error describes the location of the corruption. Accompanying errors describe the type of corruption.

Action: Do recovery with a good version of the log or do incomplete recovery up to the indicated change or time.

ORA-00354: corrupt redo log block header

Cause: The block header on the redo block indicated by the accompanying error, is not reasonable.

Action: Do recovery with a good version of the log or do time based recovery up to the indicated time. If this happens when archiving, archiving of the problem log can be skipped by clearing the log with the UNARCHIVED option. This must be followed by a backup of every datafile to insure recoverability of the database.

ORA-00355: change numbers out of order

Cause: A change number found in the redo log is lower than a previously encountered change number. The log is corrupted in some way. The corruption may be at the earlier change or at this one.

Action: Do recovery with a good version of the log or do time based recovery up to the indicated time.

ORA-00356: inconsistent lengths in change description

Cause: A change record in the redo log contains lengths that do not add up to a consistent value. The log is corrupted in some way.

Action: Do recovery with a good version of the log or do time based recovery up to the indicated time.

ORA-00357: too many members specified for log file, the maximum is <varname>string</varname>

Cause: An add logfile or add logfile member command would result in a log with too many members. The number of members is set when the database is created.

Action: Use fewer log file members.

ORA-00358: Too many file members specified, the maximum is <varname>string</varname>

Cause: A create or alter statement specified too many members in a parenthesised file list.

Action: Specify a number of file members that is within the port-defined limit.

ORA-00359: logfile group <varname>string</varname> does not exist

Cause: An add logfile member or drop logfile request specified a logfile group number that does not exist.

Action: Check the configuration of the log files and reissue the command.

ORA-00360: not a logfile member: <varname>string</varname>

Cause: A filename was given to drop logfile member that is not a part of the database, or which is a data file.

Action: Supply a valid logfile member name.

ORA-00361: cannot remove last log member <varname>string</varname> for group <varname>string</varname>

Cause: An attempt has been made to remove the last member of a log file group.

Action: If desired, delete the entire log, by using DROP LOGFILE.

ORA-00362: member is required to form a valid logfile in group <varname>string</varname>

Cause: A request to drop a logfile member was denied because it would remove data required to form a complete logfile.

Action: If desired, delete the entire log (after archiving if required), by using DROP LOGFILE;

ORA-00363: log is not the archived version

Cause: The log given to recovery is a backup of the online version from the time it was the current log. The archived version of the log would not be marked as end of thread. This error can also be caused by failing to list the current log of an enabled thread in a CREATE CONTROLFILE command.

Action: Find the archived version of the log and supply its name. If this is media recovery immediately following a CREATE CONTROLFILE, be sure the current log for this thread was included.

ORA-00364: cannot write header to new log member

Cause: An i/o error occurred when attempting to write the header to a log member that is being added to an existing group.

Action: See accompanying errors. Fix problem or use another file.

ORA-00365: the specified log is not the correct next log

Cause: The specified log failed to pass checks to ensure it corresponds to the log that was just applied. This is probably the result of using a log that was generated against a cold backup image of the database.

Action: Find the log that was generated by this copy of the database and give that filename to recovery.

ORA-00366: log <varname>string</varname> of thread <varname>string</varname>, checksum error in the file header

Cause: The file header for the redo log contains a checksum that does not match the value calculated from the file header as read from disk. This means the file header is corrupted

Action: Find and install correct version of log or reset logs.

ORA-00367: checksum error in log file header

Cause: The file header for the redo log contains a checksum that does not match the value calculated from the file header as read from disk. This means the file header is corrupted

Action: Find the correct file and try again.

ORA-00368: checksum error in redo log block

Cause: The redo block indicated by the accompanying error, is not valid. It has a checksum that does not match the block contents.

Action: Do recovery with a good version of the log or do time based recovery up to the indicated time. If this happens when archiving, archiving of the problem log can be skipped by clearing the log with the UNARCHIVED option. This must be followed by a backup of every datafile to insure recoverability of the database. Restore correct file or reset logs.

ORA-00369: Current log of thread <varname>string</varname> not useable and other log being cleared

Cause: Attempt to open thread failed because it is necessary to switch redo generation to another online log, but all the other logs are being cleared or need to be archived before they can be used.

Action: If the ALTER DATABASE CLEAR LOGFILE command is still active then wait for it to complete. Otherwise reissue the CLEAR command. If there are other online logs for the thread, that are not being cleared, then archive the logs.

ORA-00370: potential deadlock during kcbchange operation

Cause: Error code used internally by software. Should never be reported

Action: Treat as internal error. See error 600.

ORA-00371: not enough shared pool memory, should be at least <varname>string</varname> bytes

Cause: The SHARED_POOL_SIZE initialization parameter was too small.

Action: Increase the parameter value.

ORA-00372: file <varname>string</varname> cannot be modified at this time

Cause: attempting to modify the contents of a file that cannot be modified. The file is most likely part of a read only tablespace but may be in the process of going offline, or the database may be in the process of closing.

Action: check the status of the file and its tablespace

ORA-00373: online log version <varname>string</varname> incompatible with ORACLE version <varname>string</varname>

Cause: The online log was written by incompatible version of Oracle. Can occur when the log file was created by either a new or older version of Oracle.

Action: Recover the database with the compatible software, shut it down cleanly, then restart with current software.

ORA-00374: parameter db_block_size = <varname>string</varname> invalid ; must be a multiple of <varname>string</varname> in the range [<varname>string</varname>..<varname>string</varname>]

Cause: invalid value for db_block_size parameter

Action: adjust parameter and restart

ORA-00375: Cannot allocate buffer cache state object**ORA-00376: file <varname>string</varname> cannot be read at this time**

Cause: attempting to read from a file that is not readable. Most likely the file is offline.

Action: Check the state of the file. Bring it online

ORA-00377: Frequent backups of file <varname>string</varname> causing write operation to stall

Cause: Backups are occurring too frequently on this file. Each time a new backup is started for a file, any writes which have been previously issued (but not completed) have to be re-issued. If hot backups are started very, very frequently, it is possible that some writes will be re-issued repeatedly and never complete.

Action: Increase the interval between begin hot-backup commands for this file.

ORA-00378: buffer pools cannot be created as specified

Cause: Either the number of buffers or the number of lru latches is too small to satisfy the specified buffer pool configuration.

Action: Either increase the number of buffers and/or number of lru latches or configure smaller buffer pools.

ORA-00379: no free buffers available in buffer pool <varname>string</varname> for block size <varname>string</varname>K

Cause: All buffers in the specified buffer pool for the specified block size are in use and no free buffers are available.

Action: Increase the number of buffers in the specified pool for the specified block size

ORA-00380: cannot specify db_<varname>string</varname>k_cache_size since <varname>string</varname>K is the standard block size

Cause: User specified the parameter db_nk_cache_size (where n is one of 2,4,8,16,32), while the standard block size for this database is equal to n Kbytes. This is illegal.

Action: Specify the standard block size cache using db_cache_size (DEFAULT pool) (and db_recycle_cache_size, db_keep_cache_size if additional buffer pools are required). Do NOT use the corresponding db_nk_cache_size parameter for the standard block size.

ORA-00381: cannot use both new and old parameters for buffer cache size specification

Cause: User specified one or more of { db_cache_size , db_recycle_cache_size, db_keep_cache_size, db_nk_cache_size (where n is one of 2,4,8,16,32), db_cache_advice } AND one or more of { db_block_buffers, buffer_pool_keep , buffer_pool_recycle }. This is illegal.

Action: Use EITHER the old (pre-Oracle_8.2) parameters OR the new ones. Don't specify both. If old size parameters are specified in the parameter file, you may want to replace them with new parameters since the new parameters can be modified dynamically and allow you to configure additional caches for additional block sizes. Cache advisory can only be enabled with the new cache parameters.

ORA-00382: <varname>string</varname> not a valid block size, valid range [<varname>string</varname>..<varname>string</varname>]

Cause: User specified a value for db_nk_cache_size where n is one of {2, 4, 8, 16, 32}, but nk is not a valid block size for this platform.

Action: Remove corresponding parameter from the "init.ora" file and restart the instance.

ORA-00383: DEFAULT cache for blocksize <varname>string</varname> cannot be reduced to zero

Cause: User attempted to reduce db_cache_size to zero, or attempted to to reduce db_<varname>n</varname>K_cache_size to zero while there were still online tablespaces with blocksize <varname>n</varname>K. Note that since the SYSTEM tablespace cannot be taken offline, it is always illegal to set db_cache_size to zero.

Action: Offline any tablespaces with the corresponding blocksize and then perform the operation again.

ORA-00384: Insufficient memory to grow cache

Cause: The system could not allocate sufficient memory to grow the cache to the specified size.

Action: Attempt a smaller increase in the value of the parameter.

ORA-00385: cannot enable Very Large Memory with new buffer cache parameters

Cause: User specified one or more of { db_cache_size , db_recycle_cache_size, db_keep_cache_size, db_nk_cache_size (where n is one of 2,4,8,16,32) } AND use_indirect_data_buffers is set to TRUE. This is illegal.

Action: Very Large Memory can only be enabled with the old (pre-Oracle_8.2) parameters.

ORA-00386: use_indirect_data_buffers not supported

Cause: The system could not allocate sufficient memory to grow the cache to the specified size.

Action: Attempt a smaller increase in the value of the parameter.

ORA-00387: version of the block on disk may be stale

ORA-00388: dependent redo for buffers is lost

Cause: The instance contained buffers that had non-durable changes and depended on redo in another thread that was lost because of that thread crash. No data are lost because changes to such buffers cannot be committed while they are non-durable.

Action: Restart the instance.

ORA-00390: log <varname>string</varname> of thread <varname>string</varname> is being cleared, cannot become current log

Cause: An attempt to switch to a new online log for the redo thread failed because no reusable log could be found. This log is being cleared and will be useable when the clearing completes. The command that began the clearing may have terminated without completing the clearing.

Action: If the clear command is still executing then wait for its completion. If it terminated then reissue the clear command, or drop the log.

ORA-00391: All threads must switch to new log format at the same time

Cause: An attempt to switch the current log of a single thread is not allowed because the compatibility requirements force a new log format version number. When changing log formats, all threads must switch to the new format at the same time.

Action: Open the database to cause the coordinated log switch. If that is not possible then return to the same software version and compatibility setting last used to open the database.

ORA-00392: log <varname>string</varname> of thread <varname>string</varname> is being cleared, operation not allowed

Cause: An operation encountered this online log in the middle of being cleared. The command that began the clearing may have terminated without completing the clearing.

Action: If the clear command is still executing then wait for its completion. If it terminated then reissue the clear command, or drop the log.

ORA-00393: log <varname>string</varname> of thread <varname>string</varname> is needed for recovery of offline datafiles

Cause: Log cannot be cleared because the redo in it is needed to recover offline datafiles. It has not been archived so there is no other copy available. If the log is cleared the tablespaces containing the files will have to be dropped.

Action: Archive the log then repeat the clear command. If archiving is not possible, and dropping the tablespaces is acceptable, then add the clause UNRECOVERABLE DATAFILE at the end of the clear command.

ORA-00394: online log reused while attempting to archive it

Cause: It has been detected that an online log that is being archived has been reused

Action: Cannot archive the logfile anymore since it has been overwritten

ORA-00395: online logs for the clone database must be renamed

Cause: A clone database open forces logfile renaming to avoid overwriting the primary logfiles

Action: Rename the logfiles manually or using the log_file_name_convert initialization parameter

ORA-00396: error <varname>string</varname> required fallback to single-pass recovery

Cause: The indicated error caused two-pass instance or crash recovery to fail. Recovery was retried with an alternate (slower) method to avoid the error.

Action: Correct the cause of the indicated error (also recorded) so that future instance or crash recovery can succeed with the two-pass algorithm. This usually requires making more main memory available to the recovery process.

ORA-00397: instance recovery process terminated with error

Cause: The foreground process doing instance recovery died.

Action: Check the foreground trace file for the cause of recovery failure.

ORA-00398: abort thread recovery due to reconfiguration

Cause: Global enqueue service reconfiguration occurred during instance/crash recovery.

Action: This is used internally, no action is required.

ORA-00399: corrupt change description in redo log

Cause: A change vector in the redo log failed validation checks.

Action: Do recovery with a good version of the log or do time based recovery up to the indicated time.

ORA-00400: invalid release value <varname>string</varname> for parameter <varname>string</varname>

Cause: The release level given for the specified init parameter is invalid.

Action: Correct the parameter value in the parameter file and retry.

ORA-00401: the value for parameter <varname>string</varname> is not supported by this release

Cause: The value specified cannot be supported by this release of the software.

Action: Choose an appropriate value, or remove the parameter value to use the default value.

ORA-00402: database changes by release <varname>string</varname> cannot be used by release <varname>string</varname>

Cause: Changes have been made to the database that require a newer software release or that violate the compatibility parameters.

Action: Use a version of the software that can understand the changes or relax the compatibility requirements in the init file.

ORA-00403: <varname>string</varname> (<varname>string</varname>) is not the same as other instances (<varname>string</varname>)

Cause: Another instance has set the compatible or compatible no recovery parameters differently than this instance.

Action: Change the parameters of the current instance to match other instances already running.

ORA-00404: Convert file not found: '<varname>string</varname>'

Cause: The file used for converting the database from V7 to V8 could not be found.

Action: Verify that the migration process has been started on this database and that the convert filename is accessible.

ORA-00405: compatibility type "<varname>string</varname>"

Cause: Reporting a type associated with another error.

Action: See accompanying error

ORA-00406: COMPATIBLE parameter needs to be <varname>string</varname> or greater

Cause: The COMPATIBLE initialization parameter is not high enough to allow the operation. Allowing the command would make the database incompatible with the release specified by the current COMPATIBLE parameter.

Action: Shutdown and startup with a higher compatibility setting.

ORA-00407: rolling upgrade from release <varname>string</varname>.<varname>string</varname> to <varname>string</varname>.<varname>string</varname> is not allowed

Cause: Another instance executing software at a different point release already has the database mounted.

Action: Shutdown all instances then startup with the new software.

ORA-00408: parameter <varname>string</varname> is set to TRUE

Cause: Reporting the parameter that resulted in the compatibility error.

Action: Shutdown and startup with a higher compatibility setting.

ORA-00409: COMPATIBLE needs to be <varname>string</varname> or higher to use AUTO SEGMENT SPACE MANAGEMENT

Cause: This is due to migrating from an older release of Oracle with tablespaces created using AUTO SEGMENT SPACE MANAGEMENT. To open the database, the COMPATIBLE parameter needs to be set to the specified value.

Action: Shutdown and startup with the specified compatibility setting.

ORA-00436: ORACLE is not licensed. Contact Oracle Corp. for assistance**ORA-00437: ORACLE feature is not licensed. Contact Oracle Corp. for assistance**

Cause: ORACLE feature is not licensed.

Action: Contact ORACLE for assistance.

ORA-00438: <varname>string</varname> Option not installed

Cause: The specified option is not installed.

Action: Purchase and install the option.

ORA-00439: feature not enabled: <varname>string</varname>

Cause: The specified feature is not enabled.

Action: Do not attempt to use this feature.

ORA-00443: background process "<varname>string</varname>" did not start

Cause: The specified process did not start.

Action: Ensure that the executable image is in the correct place with the correct protections, and that there is enough memory.

ORA-00444: background process "<varname>string</varname>" failed while starting

Cause: Usually due to a bad (or non-existent) background process image.

Action: Get a good background process image.

ORA-00445: background process "<varname>string</varname>" did not start after <varname>string</varname> seconds

Cause: The specified process did not start after the specified time.

Action: Ensure that the background did not die and leave a trace file.

ORA-00446: background process started when not expected

Cause: The background process specified started up AFTER the RDBMS was already running.

Action: If nobody at your site started the process, then this is an internal error.

ORA-00447: fatal error in background process

Cause: One of the background processes died unexpectedly.

Action: Warm start the system.

ORA-00448: normal completion of background process

Cause: One of the background processes completed normally (i.e. exited). The background process thinks that somebody asked it to exit.

Action: Warm start the system.

ORA-00449: background process '<varname>string</varname>' unexpectedly terminated with error <varname>string</varname>

Cause: A foreground process needing service from a background process has discovered the process died.

Action: Consult the error code, and the trace file for the process.

ORA-00450: background process '<varname>string</varname>' did not start

Cause: The specified process did not start.

Action: Consult the error code, and the trace file for the process.

ORA-00451: foreground process died unexpectedly

Cause: The foreground process for the new connection did not start.

Action: Reconnect to Oracle.

ORA-00452: foreground process unexpectedly terminated with error <varname>string</varname>

Cause: The foreground process for the new connection did not start.

Action: Reconnect to Oracle.

ORA-00453: background process '<varname>string</varname>' is dead

Cause: The background process that was being messaged was dead or its incarnation was invalid.

Action: Restart the background process.

ORA-00454: The background process '<varname>string</varname>' is running

Cause: An attempt to spawn a background process that was already running failed.

Action: None

ORA-00455: timeout waiting for background process '<varname>string</varname>' cleanup

Cause: The state of the background process was not cleaned up.

Action: None

ORA-00469: CKPT process terminated with error

Cause: The checkpoint process died

Action: Warm start instance

ORA-00470: LGWR process terminated with error

Cause: The log writer process died

Action: Warm start instance

ORA-00471: DBWR process terminated with error

Cause: The database writer process died

Action: Warm start instance

ORA-00472: PMON process terminated with error

Cause: The process cleanup process died

Action: Warm start instance

ORA-00473: ARCH process terminated with error

Cause: The archive process died

Action: Warm start instance

ORA-00474: SMON process terminated with error

Cause: The system cleanup process died

Action: Warm start instance

ORA-00475: TRWR process terminated with error

Cause: The system tracing process died

Action: Warm start instance

ORA-00476: RECO process terminated with error

Cause: The distributed transaction (two-phase commit) recovery process died.

Action: Warm start instance

ORA-00477: SNP* process terminated with error

Cause: A materialized view refresh process died

Action: PMON will restart SNP process shortly. If SNP process does not get started, contact Oracle support.

ORA-00478: SMON process terminated due to error <varname>string</varname>

Cause: SMON was unable to service the requests due to error in cleanup of resources

Action: Warm start instance

ORA-00479: RVWR process terminated with error <varname>string</varname>

Cause: The RVWR process died

Action: Warm start instance

ORA-00480: LCK* process terminated with error

Cause: A system lock process died

Action: Warm start instance

ORA-00481: LMON process terminated with error

Cause: The global enqueue service monitor process died

Action: Warm start instance

ORA-00482: LMD* process terminated with error

Cause: A global enqueue service daemon process died

Action: Warm start instance

ORA-00483: During shutdown a process abnormally terminated

Cause: One of the background processes did not exit normally at or near the time of shutdown.

Action: Use shutdown abort.

ORA-00484: LMS* process terminated with error

Cause: A global cache service process died

Action: Warm start instance

ORA-00485: DIAG process terminated with error <varname>string</varname>

Cause: A global diagnostic process died

Action: Wait for process to restart

ORA-00486: ASMB process terminated with error

Cause: An ASM background process died.

Action: Warm start instance. Also check that ASM Instance is running.

ORA-00487: CTWR process terminated with error

Cause: The change tracking process died

Action: Warm start instance

ORA-00488: RBAL process terminated with error

Cause: The ASM rebalance coordinator process died.

Action: Warm start instance.

ORA-00489: ARB* process terminated with error

Cause: An ASM rebalance worker process died.

Action: Wait for process to restart.

ORA-00490: PSP process terminated with error

Cause: The process spawner died

Action: Warm start instance

ORA-00491: RMS0 process terminated with error

Cause: The RAC Management Process died

Action: n/a

ORA-00492: GTX* process terminated with error

Cause: A global transaction background process died.

Action: Warm start instance

ORA-00493: GMON process terminated with error

Cause: The ASM disk group monitor process died

Action: Warm start instance

ORA-00494: enqueue <varname>string</varname> held for too long (more than <varname>string</varname> seconds) by 'inst <varname>string</varname>, osid <varname>string</varname>'

Cause: The specified process did not release the enqueue within the maximum allowed time.

Action: Reissue any commands that failed and contact Oracle Support Services with the incident information.

ORA-00495: GEN0 process terminated with error

Cause: The generic background processing process died.

Action: Warm start the instance.

ORA-00496: LMHB process terminated with error

Cause: The LM heartbeat monitor process died.

Action: Warm start the instance.

ORA-00497: XDMG process terminated with error

Cause: The Cell automation manager process terminated with error.

Action: PMON will restart XDMG process shortly. If XDMG process does not restart, contact Oracle Support Services.

ORA-00498: XDWK process terminated with error

Cause: The Cell automation worker actions process terminated with error.

Action: PMON will restart XDWK process shortly. If XDWK process does not restart, contact Oracle Support Services.

ORA-00499: XDMG repeatedly failed to initialize terminating the instance.

Cause: The Cell automation manager process repeatedly failed to initialize.

Action: Examine the alert log for the reason prior attempts to start XDMG failed. If it is due to user error or bad configuration, fix it and restart the instance. Otherwise, contact Oracle Support Services.

ORA-00500: Listener registration process terminated with an error.

Cause: The listener registration process died.

Action: Warm start the instance.

ORA-00566: cannot request processor group - NUMA not enabled

Cause: Cannot start process in a requested processor group when the NUMA feature is disabled.

Action: Start the process without requesting a NUMA processor group.

ORA-00567: Requested processor group <varname>string</varname> is too large (maximum <varname>string</varname>)

Cause: The process could not be started in the requested processor group.

Action: Start the process in another processor group.

ORA-00568: Maximum number of interrupt handlers exceeded

Cause: User specified too many ^c handlers

Action: Remove some old handlers.

ORA-00569: Failed to acquire global enqueue.

Cause: A prior error occurred on one of the instances in the cluster. Typically errors are caused by shared pool resource contention.

Action: Check for and resolve prior errors on all instances in the cluster. If there is shared pool resource contention, increase the SHARED_POOL_SIZE, DML_LOCKS, PROCESSES, TRANSACTIONS, CLUSTER_DATABASE_INSTANCES and PARALLEL_MAX_SERVERS initialization parameters.

ORA-00574: osndnt: \$CANCEL failure (break)

ORA-00575: osndnt: \$QIO failure (send out-of-band break)

ORA-00576: in-band break protocol error

ORA-00577: out-of-band break protocol error

ORA-00578: reset protocol error

ORA-00579: osndnt: server received malformed connection request

ORA-00580: protocol versions do not match

ORA-00581: osndnt: cannot allocate context area

ORA-00582: osndnt: cannot deallocate context area

ORA-00583: osndnt: \$TRNLOG failure

ORA-00584: cannot close connection

ORA-00585: host name has incorrect form

ORA-00586: osndnt: LIB\$ASN_WTH_MBX failure

ORA-00587: cannot connect to remote host

ORA-00588: message from host was too short

ORA-00589: message from host had incorrect data length

ORA-00590: message from host had incorrect message type

ORA-00591: incorrect number of bytes written

ORA-00592: osndnt: \$QIO failure (mailbox queue)

ORA-00593: osndnt: \$DASSGN failure (network device)

ORA-00594: osndnt: \$DASSGN failure (mailbox)

ORA-00595: osndnt: \$QIO failure (receive)

ORA-00596: osndnt: \$QIO failure (send)

ORA-00597: osndnt: \$QIO failure (mailbox requeue)

ORA-00598: osndnt: \$QIO failure (mailbox read)

ORA-00600: internal error code, arguments: [<varname>string</varname>],
 [<varname>string</varname>], [<varname>string</varname>],
 [<varname>string</varname>], [<varname>string</varname>],
 [<varname>string</varname>], [<varname>string</varname>],
 [<varname>string</varname>], [<varname>string</varname>],
 [<varname>string</varname>]

Cause: This is the generic internal error number for Oracle program exceptions. It indicates that a process has encountered a low-level, unexpected condition. The first argument is the internal message number. This argument and the database version number are critical in identifying the root cause and the potential impact to your system.

Action: Visit My Oracle Support to access the ORA-00600 Lookup tool (reference Note 600.1) for more information regarding the specific ORA-00600 error encountered. An Incident has been created for this error in the Automatic Diagnostic Repository (ADR). When logging a service request, use the Incident Packaging Service (IPS) from the Support Workbench or the ADR Command Interpreter (ADRCI) to automatically package the relevant trace information (reference My Oracle Support Note 411.1). The following information should also be gathered to help determine the root cause: - changes leading up to the error - events or unusual circumstances leading up to the error - operations attempted prior to the error - conditions of the operating system and databases at the time of the error Note: The cause of this message may manifest itself as different errors at different times. Be aware of the history of errors that occurred before this internal error.

ORA-00601: cleanup lock conflict

Cause: PMON process runs into lock conflict trying to recovery processes

Action: This is trapped internally, no action necessary

ORA-00602: internal programming exception

Cause: Internal programming exception

Action: Report as bug

ORA-00603: ORACLE server session terminated by fatal error

Cause: An Oracle server session was in an unrecoverable state.

Action: Log in to Oracle again so a new server session will be created automatically. Examine the session trace file for more information.

ORA-00604: error occurred at recursive SQL level <varname>string</varname>

Cause: An error occurred while processing a recursive SQL statement (a statement applying to internal dictionary tables).

Action: If the situation described in the next error on the stack can be corrected, do so; otherwise contact Oracle Support.

ORA-00606: Internal error code

Cause: A call to deferred upi functions was made in non deferred mode

Action: Report as a bug.

ORA-00607: Internal error occurred while making a change to a data block

Cause: An internal error or memory exception occurred while Oracle was applying redo to a data block.

Action: call Oracle Support

ORA-00608: testing error [<varname>string</varname>] [<varname>string</varname>] [<varname>string</varname>] [<varname>string</varname>] [<varname>string</varname>]

Cause: Internal error reserved for testing.

Action: call Oracle Support

ORA-00609: could not attach to incoming connection

Cause: Oracle process could not answer incoming connection

Action: If the situation described in the next error on the stack can be corrected, do so; otherwise contact Oracle Support.

ORA-00610: Internal error code

Cause: Oracle process started too late

Action: This error should never be seen by the customer. Contact Oracle Support

ORA-00700: soft internal error, arguments: [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>]

Cause: Internal inconsistency that will not crash a process

Action: Report as a bug - the first argument is the internal error.

ORA-00701: object necessary for warmstarting database cannot be altered

Cause: Attempt to alter or drop a database object (table, cluster, or index) which are needed for warmstarting the database.

Action: None

ORA-00702: bootstrap version '<varname>string</varname>' inconsistent with version '<varname>string</varname>'

Cause: The reading version of the bootstrap is incompatible with the current bootstrap version.

Action: Restore a version of the software that is compatible with this bootstrap version.

ORA-00703: maximum number of row cache instance locks exceeded

Cause: There are not enough row cache enqueues.

Action: Increase the row cache enqueue parameter and warm start the system.

ORA-00704: bootstrap process failure

Cause: Failure in processing bootstrap data - see accompanying error.

Action: Contact your customer support representative.

ORA-00705: inconsistent state during start up; shut down the instance, then restart it

Cause: A previous attempt to start an instance was terminated.

Action: Shut down the instance completely, then restart it.

ORA-00706: error changing format of file '<varname>string</varname>'

Cause: An attempt to change the block0 format of the specified file failed because the file is read-only or offline.

Action: Make the file read-write or bring the file online and set the BLK0_FMTCHG event.

ORA-00710: new tablespace name is the same as the old tablespace name

Cause: An attempt to rename a tablespace failed because the new name is the same as the old name.

Action: No action required.

ORA-00711: new tablespace name is invalid

Cause: An attempt to rename a tablespace failed because the new name is invalid.

Action: Choose a valid new name and retry the command.

ORA-00712: cannot rename system tablespace

Cause: An attempt to rename the system tablespace failed.

Action: No action required.

ORA-00720: ALTER DATABASE RESET COMPATIBILITY command has been de-supported

Cause: ALTER DATABASE RESET COMPATIBILITY command has been de-supported since Oracle 10i.

Action: No action required.

ORA-00721: changes by release <varname>string</varname> cannot be used by release <varname>string</varname>

Cause: An attempt to import a tablespace failed because the tablespace contains changes that require a newer software release or that violate the compatibility parameters.

Action: Use a version of the software that can understand the changes or relax the compatibility requirements in the initialization parameter file.

ORA-00722: Feature "<varname>string</varname>"

Cause: Reporting name of the feature for details of another error.

Action: See associated error message.

ORA-00723: Initialization parameter COMPATIBLE must be explicitly set

Cause: Oracle detected that the initialization parameter COMPATIBLE was not explicitly specified, and the compatibility of the database is lower than the default value of the COMPATIBLE parameter. In order to use the new compatible setting, the initialization parameter must be explicitly set by the user.

Action: Explicitly set the value of COMPATIBLE parameter either in PFILE or SPFILE, whichever is used.

ORA-00724: ALTER DATABASE CONVERT command has been de-supported

Cause: ALTER DATABASE CONVERT command has been de-supported since Oracle 10i.

Action: No action required.

ORA-00725: Desupported ALTER DATABASE SET STANDBY clause specified: <varname>string</varname>

Cause: A deprecated ALTER DATABASE SET STANDBY was specified.

Action: No action required.

ORA-00740: datafile size of (<varname>string</varname>) blocks exceeds maximum file size

Cause: The user specified datafile size exceeded maximum file size.

Action: Please check REFERENCE for maximum size. Reduce the size and retry.

ORA-00741: logfile size of (<varname>string</varname>) blocks exceeds maximum logfile size

Cause: The user specified logfile size exceeded maximum logfile size.

Action: Please check REFERENCE for maximum size. Reduce the size and retry.

ORA-00742: Log read detects lost write in thread <varname>string</varname> sequence <varname>string</varname> block <varname>string</varname>

Cause: Either a write issued by Oracle was lost by the underlying operating system or storage system or an Oracle internal error occurred.

Action: The trace file shows the lost write location. Dump the problematic log file to see whether it is a real lost write. Contact Oracle Support Services.

ORA-00750: database has been previously mounted and dismounted

Cause: The instance has already mounted and dismounted the database, which is only allowed once in its lifetime.

Action: Shut down the database.

ORA-00751: could not obtain resilvering status for file

Cause: An error occurred while obtaining the mirror resilvering status of a file.

Action: Refer to other error messages shown for additional details of the problem.

ORA-00752: recovery detected a lost write of a data block

Cause: A data block write to storage was lost during normal database operation on the primary database.

Action: Shutdown the primary database and activate the physical standby database to failover. Call Oracle Support Services. See the Data Guard documentation for details.

ORA-00753: recovery detected a lost write of a data block

Cause: A data block write to storage was lost during normal redo database operation on the standby database or during recovery on a primary database.

Action: Close the database and try the RECOVER MANAGED STANDBY DATABASE (on the standby database) or RECOVER DATABASE ... FORCE START AT (on the primary database) statement starting at the SCN of the bad block that was printed already. See the Administrator's Guide for details.

ORA-00754: recovery detected a data block with invalid SCN

Cause: An error caused a data block mismatch with a log record.

Action: If running on a primary database in recovery mode, you may perform a point-in-time recovery to an earlier time. Otherwise, call Oracle Support Services. See the Administrator's Guide for details.

ORA-00756: recovery detected a lost write of a data block

Cause: A data block write to storage was lost during normal redo database operation on the standby database or during recovery on a primary database.

Action: Close the database and try the RECOVER MANAGED STANDBY DATABASE (on the standby database) or RECOVER DATABASE ... FORCE START AT (on the primary database) statement starting at the SCN of the bad block that was printed already. See the Administrator's Guide for details.

ORA-00758: recovery detected a block with inconsistent flag values set

Cause: An internal error occurred.

Action: If running on a primary database in recovery mode, you may perform a point-in-time recovery to an earlier time. Otherwise, call Oracle Support Services. See the Administrator's Guide for details.

ORA-00816: error message translation failed

ORA-00820: Specified value of sga_max_size is too small, needs to be at least <varname>string</varname>M

Cause: The specified value of sga_max_size is too small for the SGA to accommodate all of the necessary SGA components such as the log buffer, buffer pools, shared pool, etc.

Action: Set sga_max_size to the recommended value or reduce the values of any SGA component size parameters you have specified.

ORA-00821: Specified value of sga_target <varname>string</varname>M is too small, needs to be at least <varname>string</varname>M

Cause: The specified value of sga_target is too small for the SGA to accommodate all of the necessary SGA components such as the log buffer, buffer pools, shared pool, etc.

Action: Set sga_target to the recommended value or reduce the values of any SGA component size parameters you have specified.

ORA-00822: MMAN process terminated with error

Cause: The Memory Management process died.

Action: Warm start instance

ORA-00823: Specified value of sga_target greater than sga_max_size

Cause: The specified value of sga_target is greater than sga_max_size.

Action: Increase sga_max_size to match up with sga_target or decrease sga_target to match up with sga_maxsize.

ORA-00824: cannot set SGA_TARGET or MEMORY_TARGET due to existing internal settings

Cause: Could not set SGA_TARGET or MEMORY_TARGET due to current parameter settings.

Action: Check the other error messages for additional information.

ORA-00825: cannot set DB_BLOCK_BUFFERS if SGA_TARGET or MEMORY_TARGET is set

Cause: SGA_TARGET or MEMORY_TARGET set with DB_BLOCK_BUFFERS set.

Action: Do not set SGA_TARGET, MEMORY_TARGET or use new cache parameters, and do not use DB_BLOCK_BUFFERS which is an old cache parameter.

ORA-00826: cannot set SGA_TARGET or MEMORY_TARGET for an ASM instance

Cause: SGA_TARGET or MEMORY_TARGET set for an ASM instance.

Action: Do not set SGA_TARGET or MEMORY_TARGET.

ORA-00827: could not shrink sga_target to specified value

Cause: Attempted to shrink the SGA to the specified value but did not succeed because the SGA components could not be shrunk as they were already at their minimum sizes.

Action: Do not set sga_target to a value below the current value without first shrinking the individual SGA components.

ORA-00828: specified value of shared_pool_reserved_size inconsistent with internal settings

Cause: Unable to set shared_pool_reserved_size to specified value if SGA_TARGET set, either because the specified value is too small, or because it is too large for the current internal size of shared pool. More details can be found in the alert log.

Action: If possible, do not set shared_pool_reserved_size without setting shared_pool_size if SGA_TARGET set. Examine the alert log for information about current internal size of shared pool, and valid range of values for shared_pool_reserved_size.

ORA-00829: event to stress test self tuning SGA feature by forcing partial granules transfers**ORA-00830: cannot set statistics_level to BASIC with auto-tune SGA enabled**

Cause: The user attempted to set statistics_level to BASIC with auto-tune SGA enabled which cannot be done because auto-tune SGA cannot work with statistics_level set to BASIC.

Action: Disable auto-tune SGA and try setting the statistics_level to BASIC again.

ORA-00831: event to stress test self tuning SGA feature by doing random memory broker resizes

ORA-00832: no streams pool created and cannot automatically create one

Cause: A database feature which needs STREAMS SGA was being used, however, the streams_pool_size parameter was not defined and the value of db_cache_size was too small to permit an automatic transfer of SGA to the streams pool from the buffer cache.

Action: Please set the parameter streams_pool_size or set SGA_TARGET.

ORA-00833: event to test cancellation and cache protection by pinning buffers for deferred mode requests

ORA-00834: Simulate 4031 during an immediate mode request in auto-sga

ORA-00835: Simulate memory broker disabling for code coverage

ORA-00836: Simulate memory transfer from system memory for startup request

ORA-00837: Specified value of MEMORY_TARGET greater than MEMORY_MAX_TARGET

Cause: The specified value of MEMORY_TARGET was greater than MEMORY_MAX_TARGET.

Action: Set MEMORY_TARGET less than or equal to MEMORY_MAX_TARGET.

ORA-00838: Specified value of MEMORY_TARGET is too small, needs to be at least <varname>string</varname>M

Cause: The specified value of MEMORY_TARGET was less than the sum of the specified values for SGA_TARGET and PGA_AGGREGATE_TARGET.

Action: Set MEMORY_TARGET to at least the recommended value.

ORA-00839: SGA_TARGET cannot be modified to the specified value

Cause: The specified value of SGA_TARGET was not compatible with current settings of PGA_AGGREGATE_TARGET and MEMORY_TARGET/MEMORY_MAX_TARGET.

Action: Set SGA_TARGET to be no more than the difference of MEMORY_TARGET/MEMORY_MAX_TARGET and PGA_AGGREGATE_TARGET. Also ensure that the current PGA memory used for non-auto workareas is low.

ORA-00840: PGA_AGGREGATE_TARGET cannot be modified to the specified value

Cause: The specified value of PGA_AGGREGATE_TARGET was not compatible with current settings of SGA_TARGET and MEMORY_TARGET/MEMORY_MAX_TARGET.

Action: Set PGA_AGGREGATE_TARGET to be no more than the difference of MEMORY_TARGET/MEMORY_MAX_TARGET and SGA_TARGET.

ORA-00841: MEMORY_TARGET not supported on this system

Cause: MEMORY_TARGET parameter was not supported on this system as shmfs was disabled.

Action: Refer to documentation for a list of supported systems.

ORA-00842: DB_BLOCK_BUFFERS cannot be set with SGA_TARGET or MEMORY_TARGET

Cause: DB_BLOCK_BUFFERS was incompatible with SGA_TARGET and MEMORY_TARGET.

Action: Remove the incompatible parameter setting.

ORA-00843: Parameter not taking MEMORY_MAX_TARGET into account

Cause: The parameter was larger than MEMORY_MAX_TARGET.

Action: Check the other error messages for additional information about the parameter. Set the parameter to a lower value than MEMORY_MAX_TARGET.

ORA-00844: Parameter not taking MEMORY_TARGET into account

Cause: The parameter was larger than MEMORY_TARGET.

Action: Check the other error messages for additional information about the parameter. Set the parameter to a lower value than MEMORY_TARGET.

ORA-00845: MEMORY_TARGET not supported on this system

Cause: The MEMORY_TARGET parameter was not supported on this operating system or /dev/shm was not sized correctly on Linux.

Action: Refer to documentation for a list of supported operating systems. Or, size /dev/shm to be at least the SGA_MAX_SIZE on each Oracle instance running on the system.

ORA-00846: could not shrink MEMORY_TARGET to specified value

Cause: Attempted to shrink MEMORY_TARGET to the specified value but did not succeed because the PGA and SGA components could not be shrunk.

Action: Do not set MEMORY_TARGET to a value below the current value without first shrinking the individual memory components.

ORA-00847: MEMORY_TARGET/MEMORY_MAX_TARGET and LOCK_SGA cannot be set together

Cause: MEMORY_TARGET/MEMORY_MAX_TARGET was set to a non-zero value and LOCK_SGA was also set

Action: Do not set MEMORY_TARGET or MEMORY_MAX_TARGET if LOCK_SGA is set to TRUE.

ORA-00848: STATISTICS_LEVEL cannot be set to BASIC with SGA_TARGET or MEMORY_TARGET

Cause: STATISTICS_LEVEL of BASIC was incompatible with SGA_TARGET and MEMORY_TARGET.

Action: Fix the incompatible parameter setting. Set STATISTICS_LEVEL to TYPICAL or ALL to use SGA_TARGET or MEMORY_TARGET.

ORA-00849: SGA_TARGET <varname>string</varname> cannot be set to more than MEMORY_MAX_TARGET <varname>string</varname>.

Cause: SGA_TARGET value was more than MEMORY_MAX_TARGET value.

Action: Set SGA_TARGET to be less than MEMORY_MAX_TARGET.

ORA-00850: PGA_AGGREGATE_TARGET <varname>string</varname> cannot be set to more than MEMORY_MAX_TARGET <varname>string</varname>.

Cause: PGA_AGGREGATE_TARGET value was more than MEMORY_MAX_TARGET value.

Action: Set PGA_AGGREGATE_TARGET to be less than MEMORY_MAX_TARGET.

ORA-00851: SGA_MAX_SIZE <varname>string</varname> cannot be set to more than MEMORY_TARGET <varname>string</varname>.

Cause: SGA_MAX_SIZE value was more than MEMORY_TARGET value.

Action: Set SGA_MAX_SIZE to be less than MEMORY_TARGET.

ORA-00852: Rolling migration monitor process terminated.

Cause: The ASM rolling migration monitor process died.

Action: Warm start the instance.

ORA-00853: SGA_MAX_SIZE <varname>string</varname> cannot be set to more than MEMORY_MAX_TARGET <varname>string</varname>.

Cause: SGA_MAX_SIZE value was more than MEMORY_MAX_TARGET value.

Action: Set SGA_MAX_SIZE to be less than MEMORY_MAX_TARGET.

ORA-00854: ASM IO Server Instance Fence monitor process terminated.

Cause: The ASM IO Server Fence monitor process died.

Action: Warm start the instance.

ORA-00875: failed to <varname>string</varname> the dedicated connection broker

Cause: The dedicated connection broker could not be enabled or disabled.

Action: Check the process trace file for the reason for failure.

ORA-00876: invalid CONNECTION_BROKERS specification #<varname>string</varname>

Cause: The syntax for the nth CONNECTION_BROKERS specification was invalid.

Action: See the additional errors that were reported. Refer to the Oracle Database Reference manual for the correct syntax.

ORA-00877: TYPE=<varname>string</varname> appears in multiple CONNECTION_BROKERS specifications

Cause: Multiple CONNECTION_BROKER specifications contained the same TYPE.

Action: Specify only one specification for each TYPE.

ORA-00900 to ORA-01499

ORA-00900: invalid SQL statement

ORA-00901: invalid CREATE command

ORA-00902: invalid datatype

ORA-00903: invalid table name

ORA-00904: <varname>string</varname>: invalid identifier

ORA-00905: missing keyword

ORA-00906: missing left parenthesis

ORA-00907: missing right parenthesis

ORA-00908: missing NULL keyword

ORA-00909: invalid number of arguments

ORA-00910: specified length too long for its datatype

Cause: for datatypes CHAR and RAW, the length specified was > 2000; otherwise, the length specified was > 4000.

Action: use a shorter length or switch to a datatype permitting a longer length such as a VARCHAR2, LONG CHAR, or LONG RAW

ORA-00911: invalid character

Cause: identifiers may not start with any ASCII character other than letters and numbers. \$#_ are also allowed after the first character. Identifiers enclosed by doublequotes may contain any character other than a doublequote. Alternative quotes (q'#...#') cannot use spaces, tabs, or carriage returns as delimiters. For all other contexts, consult the SQL Language Reference Manual.

Action: n/a

ORA-00912: input parameter too long

Cause: one of your input strings was too long

Action: shorten the input parameter length

ORA-00913: too many values

ORA-00914: missing ADD keyword

ORA-00915: network access of dictionary table not currently allowed

ORA-00917: missing comma

ORA-00918: column ambiguously defined

ORA-00919: invalid function

ORA-00920: invalid relational operator

ORA-00921: unexpected end of SQL command

ORA-00922: missing or invalid option

ORA-00923: FROM keyword not found where expected

ORA-00924: missing BY keyword

ORA-00925: missing INTO keyword

ORA-00926: missing VALUES keyword

ORA-00927: missing equal sign

ORA-00928: missing SELECT keyword

ORA-00929: missing period

ORA-00930: missing asterisk

ORA-00931: missing identifier

ORA-00932: inconsistent datatypes: expected <varname>string</varname> got <varname>string</varname>

ORA-00933: SQL command not properly ended

ORA-00934: group function is not allowed here

ORA-00935: group function is nested too deeply

ORA-00936: missing expression

ORA-00937: not a single-group group function

ORA-00938: not enough arguments for function

ORA-00939: too many arguments for function

ORA-00940: invalid ALTER command

ORA-00941: missing cluster name

ORA-00942: table or view does not exist

ORA-00943: cluster does not exist

ORA-00944: insufficient number of clustered columns

ORA-00945: specified clustered column does not exist

ORA-00946: missing TO keyword

ORA-00947: not enough values

ORA-00948: ALTER CLUSTER statement no longer supported**ORA-00949: illegal reference to remote database****ORA-00950: invalid DROP option****ORA-00951: cluster not empty****ORA-00952: missing GROUP keyword****ORA-00953: missing or invalid index name**

Cause: An index name of the form [<varname>identifier</varname> .] <varname>identifier</varname> is expected but not present. If OIDINDEX clause, index name must be <varname>identifier</varname>

Action: Enter an appropriate index name.

ORA-00954: missing IDENTIFIED keyword**ORA-00955: name is already used by an existing object****ORA-00956: missing or invalid auditing option**

Cause: AUDIT or NOAUDIT statement contains an invalid auditing option.

Action: Use a valid option.

ORA-00957: duplicate column name**ORA-00958: missing CHECK keyword****ORA-00959: tablespace '<varname>string</varname>' does not exist****ORA-00960: ambiguous column naming in select list**

Cause: A column name in the order-by list matches more than one select list columns.

Action: Remove duplicate column naming in select list.

ORA-00961: bad datetime/interval value**ORA-00962: too many group-by / order-by expressions**

Cause: The group-by or order-by column list contain more than 1000 expressions.

Action: Use 1000 or less expressions in the group-by or order-by list.

ORA-00963: unsupported interval type**ORA-00964: table name not in FROM list**

Cause: The table name referred in the select list is not specified in the from list.

Action: Make sure the name is correctly specified and matches one of the names in the from list.

ORA-00965: column aliases not allowed for ''**

Cause: The statement is trying to alias the * expression in the select list which is not legal.

Action: Remove the alias.

ORA-00966: missing TABLE keyword

ORA-00967: missing WHERE keyword

ORA-00968: missing INDEX keyword

ORA-00969: missing ON keyword

ORA-00970: missing WITH keyword

ORA-00971: missing SET keyword

ORA-00972: identifier is too long

Cause: An identifier with more than 30 characters was specified.

Action: Specify at most 30 characters.

ORA-00973: invalid row count estimate

ORA-00974: invalid PCTFREE value (percentage)

ORA-00975: date + date not allowed

ORA-00976: Specified pseudocolumn or operator not allowed here.

Cause: LEVEL, PRIOR, ROWNUM, CONNECT_BY_ROOT, CONNECT_BY_ISLEAF or CONNECT_BY_ISCYCLE was specified at an illegal location.

Action: Remove LEVEL, PRIOR, ROWNUM, CONNECT_BY_ROOT, CONNECT_BY_ISLEAF or CONNECT_BY_ISCYCLE.

ORA-00977: duplicate auditing option

Cause: AUDIT or NOAUDIT statement specifies an option more than once

Action: Either use ALL with no other auditing options or make sure no option is listed more than once.

ORA-00978: nested group function without GROUP BY

ORA-00979: not a GROUP BY expression

ORA-00980: synonym translation is no longer valid

Cause: A synonym did not translate to a legal target object. This could happen for one of the following reasons: 1. The target schema does not exist. 2. The target object does not exist. 3. The synonym specifies an incorrect database link. 4. The synonym is not versioned but specifies a versioned target object.

Action: Change the synonym definition so that the synonym points at a legal target object.

ORA-00981: cannot mix table and system auditing options

Cause: Table and system-wide auditing options were specified in the same AUDIT or NOAUDIT statement.

Action: You must issue table and system options in separate statements.

ORA-00982: missing plus sign

ORA-00983: cannot audit or noaudit SYS user actions

Cause: An attempt was made to AUDIT or NOAUDIT SYS user actions.

Action: Execute the statement again with a valid user.

ORA-00984: column not allowed here**ORA-00985: invalid program name****ORA-00986: missing or invalid group name(s)****ORA-00987: missing or invalid username(s)****ORA-00988: missing or invalid password(s)****ORA-00989: too many passwords for usernames given****ORA-00990: missing or invalid privilege****ORA-00991: only MAC privileges may be granted to procedures**

Cause: Object privileges or non-MAC system privileges were granted to the procedure.

Action: Only grant MAC privileges using the PROCEDURE clause.

ORA-00992: invalid format for REVOKE command**ORA-00993: missing GRANT keyword****ORA-00994: missing OPTION keyword****ORA-00995: missing or invalid synonym identifier****ORA-00996: the concatenate operator is ||, not |****ORA-00997: illegal use of LONG datatype****ORA-00998: must name this expression with a column alias****ORA-00999: invalid view name****ORA-01000: maximum open cursors exceeded****ORA-01001: invalid cursor****ORA-01002: fetch out of sequence**

Cause: This error means that a fetch has been attempted from a cursor which is no longer valid. Note that a PL/SQL cursor loop implicitly does fetches, and thus may also cause this error. There are a number of possible causes for this error, including: 1) Fetching from a cursor after the last row has been retrieved and the ORA-1403 error returned. 2) If the cursor has been opened with the FOR UPDATE clause, fetching after a COMMIT has been issued will return the error. 3) Rebinding any placeholders in the SQL statement, then issuing a fetch before reexecuting the statement.

Action: 1) Do not issue a fetch statement after the last row has been retrieved - there are no more rows to fetch. 2) Do not issue a COMMIT inside a fetch loop for a cursor

that has been opened FOR UPDATE. 3) Reexecute the statement after rebinding, then attempt to fetch again.

ORA-01003: no statement parsed

ORA-01004: default username feature not supported; logon denied

ORA-01005: null password given; logon denied

ORA-01006: bind variable does not exist

ORA-01007: variable not in select list

ORA-01008: not all variables bound

ORA-01009: missing mandatory parameter

ORA-01010: invalid OCI operation

Cause: One of the following: 1) You attempted an invalid OCI operation. 2) You are using an Oracle client application linked with version 7.1 (or higher) libraries, the environment variable ORA_ENCRYPT_LOGIN is set to TRUE, and you attempted to connect to a version 7.0 (or lower) Oracle Server. 3) You are connected to a version 7.1 (or higher) Oracle Server, the initialization parameter DBLINK_ENCRYPT_LOGIN is set to TRUE, and you attempted to use a database link pointing to a version 7.0 (or lower) Oracle Server. 4) You are connected to a version 9.0.2(or higher) Oracle Server and you attempted to use a database link pointing to a version 9.0.1(or lower) Oracle Server for distributed autonomous transaction.

Action: For the above causes: 1) Do not use the invalid OCI operation. 2) If you do not wish to use encrypted connect passwords in your distributed database, set ORA_ENCRYPT_LOGIN to FALSE. If you wish to use encrypted connect passwords, you must upgrade all Oracle Servers to version 7.1 (or higher). 3) If you do not wish to use encrypted database links in your distributed database, set DBLINK_ENCRYPT_LOGIN to FALSE. If you wish to use encrypted database links, you must upgrade all Oracle Servers to version 7.1 (or higher). 4) Do not attempt distributed autonomous transaction on version 9.0.1(or lower) Oracle Server.

ORA-01011: Cannot use v7 compatibility mode when talking to v6 server

ORA-01012: not logged on

ORA-01013: user requested cancel of current operation

ORA-01014: ORACLE shutdown in progress

ORA-01015: logon called recursively

ORA-01016: This function can be called only after a fetch

Cause: Cursor in an invalid state.

Action: Make sure that the oci/upi function is called after fetch.

ORA-01017: invalid username/password; logon denied

ORA-01018: column does not have a LONG datatype

ORA-01019: unable to allocate memory in the user side

Cause: The user side memory allocator returned error.

Action: Increase the processes heap size or switch to the old set of calls.

ORA-01020: unknown context state**ORA-01021: invalid context size specified****ORA-01022: database operation not supported in this configuration**

Cause: The attempted database operation does not conform to the user programming interface (UPI) for the two communicating ORACLE servers.

Action: You may need to upgrade one or more of your ORACLE servers or re-link your user side application with new libraries. Report the problem to Worldwide Customer Support.

ORA-01023: Cursor context not found (Invalid cursor number)

Cause: The cursor number is not a valid open cursor.

Action: Make sure that the cursor is open.

ORA-01024: invalid datatype in OCI call**ORA-01025: UPI parameter out of range**

Cause: An integer parameter to a upi function is out of range.

Action: This usually indicates an error in a tool built on top of the oracle dbms. Report the error to your customer support representative.

ORA-01026: multiple buffers of size > 4000 in the bind list

Cause: More than one long buffer in the bind list.

Action: Change the buffer size to be less than 4000 for the bind variable bound to a normal column.

ORA-01027: bind variables not allowed for data definition operations

Cause: An attempt was made to use a bind variable in a SQL data definition operation.

Action: Such bind variables are not allowed.

ORA-01028: internal two task error

Cause: Received send long message but don't have the cursor context.

Action: Report as a bug.

ORA-01029: internal two task error

Cause: Received a request to send the long again when there is no long

Action: Report as a bug

ORA-01030: SELECT ... INTO variable does not exist

Cause: The SELECT... INTO specified in the bind call does not correspond to a variable in the SQL statement.

Action: If it is not possible to correct the statement, call customer support.

ORA-01031: insufficient privileges

Cause: An attempt was made to perform a database operation without the necessary privileges.

Action: Ask your database administrator or designated security administrator to grant you the necessary privileges

ORA-01032: no such userid

Cause: This is an internal error message related to Export/Import.

Action: Contact customer support.

ORA-01033: ORACLE initialization or shutdown in progress

Cause: An attempt was made to log on while Oracle is being started up or shutdown.

Action: Wait a few minutes. Then retry the operation.

ORA-01034: ORACLE not available

Cause: Oracle was not started up. Possible causes include the following: - The SGA requires more space than was allocated for it. - The operating-system variable pointing to the instance is improperly defined.

Action: Refer to accompanying messages for possible causes and correct the problem mentioned in the other messages. If Oracle has been initialized, then on some operating systems, verify that Oracle was linked correctly. See the platform specific Oracle documentation.

ORA-01035: ORACLE only available to users with RESTRICTED SESSION privilege

Cause: Logins are disallowed because an instance started in restricted mode. Only users with RESTRICTED SESSION system privilege can log on.

Action: Request that Oracle be restarted without the restricted option or obtain the RESTRICTED SESSION system privilege.

ORA-01036: illegal variable name/number

Cause: Unable to find bind context on user side

Action: Make sure that the variable being bound is in the sql statement.

ORA-01037: maximum cursor memory exceeded

Cause: Attempting to process a complex sql statement which consumed all available memory of the cursor.

Action: Simplify the complex sql statement.

ORA-01038: cannot write database file version <varname>string</varname> with ORACLE version <varname>string</varname>

Cause: Attempting to write datafile headers in an old format. The new format can not be used until after the database has been verified as being compatible with this software version.

Action: Open the database to advance to the new file formats, then repeat the operation. If the operation is required before the database can be opened, then use the previous software release to do the operation.

ORA-01039: insufficient privileges on underlying objects of the view

Cause: Attempting to explain plan on other people's view without the necessary privileges on the underlying objects of the view.

Action: Get necessary privileges or do not perform the offending operation.

ORA-01040: invalid character in password; logon denied

Cause: There are multibyte characters in the password or some characters in the password are not in US7ASCII range.

Action: Resubmit password with valid characters.

ORA-01041: internal error. hostdef extension doesn't exist

Cause: Pointer to hstdef extension in hstdef is null.

Action: Report as a bug

ORA-01042: detaching a session with open cursors not allowed

Cause: An attempt was made to detach a session which had open cursors.

Action: Close all the cursors before detaching the session.

ORA-01043: user side memory corruption [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>], [<varname>string</varname>]

Cause: The application code corrupted some of the user memory used by Oracle

Action: Make sure that the application code is not overwriting memory.

ORA-01044: size <varname>string</varname> of buffer bound to variable exceeds maximum <varname>string</varname>

Cause: An attempt was made to bind a buffer whose total size would exceed the maximum size allowed. Total array size for arrays is calculated as:
(element_size)*(number of elements)

Action: Reduce buffer size.

ORA-01045: user <varname>string</varname> lacks CREATE SESSION privilege; logon denied

Cause: A connect was attempted to a user which does not have create session privilege.

Action: Grant the user CREATE SESSION privilege.

ORA-01046: cannot acquire space to extend context area**ORA-01047: The above error occurred in schema=<varname>string</varname>, package=<varname>string</varname>, procedure=<varname>string</varname>****ORA-01048: Couldn't find the specified procedure in the given context**

Cause: The procedure user specified in deferred RPC doesn't exist.

Action: Check to make sure that the procedure exists and is visible to the replication process.

ORA-01049: Bind by name is not supported in streamed RPC

Cause: A newer version of server is talking with this version requesting an operation not supported in this version.

Action: n/a

ORA-01050: cannot acquire space to open context area**ORA-01051: deferred rpc buffer format invalid**

Cause: The deferred rpc data in sys.def\$_call is corrupted.

Action: Contact your customer support representative.

ORA-01052: required destination LOG_ARCHIVE_DUPLEX_DEST is not specified

Cause: A valid destination for parameter LOG_ARCHIVE_DUPLEX_DEST was not specified when parameter LOG_ARCHIVE_MIN_SUCCEED_DEST was set to two.

Action: Either specify a value for parameter LOG_ARCHIVE_DUPLEX_DEST, or reduce the value for parameter LOG_ARCHIVE_MIN_SUCCEED_DEST to one.

ORA-01053: user storage address cannot be read**ORA-01054: user storage address cannot be written****ORA-01055: Object datatypes not supported for bind or define in this mode**

Cause: Bind or Define used for objects with an invalid mode

Action: Change the mode.

ORA-01057: invalid or ambiguous block.field reference in user exit**ORA-01058: internal New Upi interface error**

Cause: Attempt to delete non existent hstdef extension.

Action: Report as a bug.

ORA-01059: parse expected before a bind or execute

Cause: The client application attempted to bind a variable or execute a cursor opened in a PL/SQL block before the statement was parsed.

Action: Ensure the statement is parsed before a bind or execute.

ORA-01060: array binds or executes not allowed

Cause: The client application attempted to bind an array of cursors or attempted to repeatedly execute against a PL/SQL block with a bind variable of type cursor.

Action: Bind a single cursor or execute the PL/SQL block once.

ORA-01061: cannot start up a V8 server using a V7 client application

Cause: You are using an Oracle client application linked with version 7 (or lower) libraries and you attempted to start up a V8 (or higher) server.

Action: Use a client application linked with V8 (or higher) libraries.60

ORA-01062: unable to allocate memory for define buffer

Cause: Exceeded the maximum buffer size for current platform

Action: Use piecewise fetch with a smaller buffer size

ORA-01070: Using an old version of Oracle for the server

Cause: Using pre 7.0.10.1 version of oracle for server

Action: Upgrade server to post 7.0.10.1 version

ORA-01071: cannot perform operation without starting up ORACLE

Cause: Obvious

Action: n/a

ORA-01072: cannot stop ORACLE; ORACLE not running

Cause: Obvious

Action: n/a

ORA-01073: fatal connection error: unrecognized call type

Cause: An illegal internal operation was attempted.

Action: Contact your customer support representative.

ORA-01074: cannot shut down ORACLE; inside a login session - log off first

Cause: Obvious

Action: n/a

ORA-01075: you are currently logged on

Cause: Attempt to login while logged in.

Action: n/a

ORA-01076: multiple logons per process not yet supported

Cause: Obvious

Action: n/a

ORA-01077: background process initialization failure

Cause: Failure during initialization of ORACLE background processes.

Action: Further diagnostic information should be in the error stack or in the trace file.

ORA-01078: failure in processing system parameters

Cause: Failure during processing of INIT.ORA parameters during system startup.

Action: Further diagnostic information should be in the error stack.

ORA-01079: ORACLE database was not properly created, operation aborted

Cause: There was an error when the database or control file was created.

Action: Check what error was signaled when the database was first created or when the control file was recreated. Take appropriate actions to recreate the database or a new control file.

ORA-01080: error in shutting down ORACLE

Cause: Failure during system shutdown.

Action: Further diagnostic information should be in the error stack.

ORA-01081: cannot start already-running ORACLE - shut it down first

Cause: Obvious

Action: n/a

ORA-01082: 'row_locking = always' requires the transaction processing option

Cause: "row_locking = always" is specified in INIT.ORA file. This feature is not supported by ORACLE without the transaction processing option.

Action: Remove it from INIT.ORA file or set it to "default" or "intent".

ORA-01083: value of parameter "<varname>string</varname>" is inconsistent with that of other instances

Cause: The value of the given parameter is required to be the same for all instances in the cluster database configuration. ROW_LOCKING and SERIALIZABLE are 2 examples.

Action: Change the value of the parameter in INIT.ORA file to match that of other cluster database instances.

ORA-01084: invalid argument in OCI call

Cause: The failing OCI call contains an argument with an invalid value.

Action: Use valid argument values. For more information, see the Programmer's Guide to the Oracle Call Interfaces and the appropriate programming language supplement.

ORA-01085: preceding errors in deferred rpc to "<varname>string</varname>.<varname>string</varname>.<varname>string</varname>"

Cause: Errors were encountered when the named procedure was executed as a deferred remoted procedure call.

Action: Correct the cause of the preceding errors.

ORA-01086: savepoint '<varname>string</varname>' never established in this session or is invalid

Cause: An attempt was made to roll back to a savepoint that was never established in this session, or was invalid.

Action: Try rolling back to the savepoint from the session where it is established.

ORA-01087: cannot start up ORACLE - currently logged on

ORA-01088: shutdown in progress - operation not permitted until restart

Cause: The SHUTDOWN command was used to shut down a running Oracle instance but the shutdown operation was not complete.

Action: Wait for the instance to be restarted or contact your database administrator.

ORA-01089: immediate shutdown or close in progress - no operations are permitted

Cause: The SHUTDOWN IMMEDIATE command was used to shut down a running Oracle instance, or CLOSE IMMEDIATE was used to shut down a pluggable database, so your operations have been terminated.

Action: Wait for the instance to be restarted, or contact your DBA.

ORA-01090: shutdown in progress - connection is not permitted

Cause: The SHUTDOWN command was used to shut down a running ORACLE instance, so you cannot connect to ORACLE.

Action: Wait for the instance to be restarted, or contact your DBA.

ORA-01091: failure during startup force

Cause: Unable to destroy the old SGA.

Action: Manually remove the old SGA and reissue the STARTUP command

ORA-01092: ORACLE instance terminated. Disconnection forced

Cause: The instance this process was connected to was terminated abnormally, probably via a shutdown abort. This process was forced to disconnect from the instance.

Action: Examine the alert log for more details. When the instance has been restarted, retry action.

ORA-01093: ALTER DATABASE CLOSE only permitted with no sessions connected

Cause: There is at least one more session other than the current one logged into the instance. ALTER DATABASE CLOSE is not permitted.

Action: Find the other sessions and log them out and resubmit the command

ORA-01094: ALTER DATABASE or ALTER PLUGGABLE DATABASE CLOSE in progress. Connections not permitted

ORA-01095: DML statement processed zero rows

Cause: During a call to OTEX, an update, delete, or insert statement being executed processed zero rows. The execution of statements by OTEX was halted at this point.

Action: n/a

ORA-01096: program version (<varname>string</varname>) incompatible with instance (<varname>string</varname>)

Cause: A program is trying to connect to an instance using a different version of code than the database was started with. This is not allowed.

Action: Either relink the program with the same version as the database or restart the database using the old version of code.

ORA-01097: cannot shutdown while in a transaction - commit or rollback first

Cause: Obvious

Action: n/a

ORA-01098: program Interface error during Long Insert

ORA-01099: cannot mount database in SHARED mode if started in single process mode

Cause: Obvious

Action: n/a

ORA-01100: database already mounted

Cause: A database is already mounted in this instance.

Action: n/a

ORA-01101: database being created currently mounted by some other instance

Cause: Some other instance has the database of same name currently mounted and you are trying to create it.

Action: Either change the database name or shutdown the other instance.

ORA-01102: cannot mount database in EXCLUSIVE mode

Cause: Some other instance has the database mounted exclusive or shared.

Action: Shutdown other instance or mount in a compatible mode.

ORA-01103: database name '<varname>string</varname>' in control file is not '<varname>string</varname>'

Cause: The database name in the control file does not match your database name.

Action: Either find the correct control file or change your database name.

ORA-01104: number of control files (<varname>string</varname>) does not equal <varname>string</varname>

Cause: The number of control files used by this instance disagrees with the number of control files in an existing instance.

Action: Check to make sure that all control files are listed.

ORA-01105: mount is incompatible with mounts by other instances

Cause: An attempt to mount the database discovered that another instance mounted a database by the same name, but the mount is not compatible. Additional errors are reported explaining why.

Action: See accompanying errors.

ORA-01106: database must be closed before dismounting

Cause: Obvious

Action: n/a

ORA-01107: database must be mounted for media recovery

Cause: An attempt to perform media recovery was made but the database is not mounted.

Action: Mount the database.

ORA-01108: file <varname>string</varname> is in backup or media recovery

Cause: Either media recovery is actively being applied to the file, or it is being backed up while the database is in NOARCHIVELOG mode. It cannot be used for normal database access or crash recovery.

Action: Complete or cancel the media recovery session or backup.

ORA-01109: database not open

Cause: A command was attempted that requires the database to be open.

Action: Open the database and try the command again

ORA-01110: data file <varname>string</varname>: '<varname>string</varname>'

Cause: Reporting file name for details of another error. The reported name can be of the old file if a data file move operation is in progress.

Action: See associated error message.

ORA-01111: name for data file <varname>string</varname> is unknown - rename to correct file

Cause: The data file was missing from a CREATE CONTROLFILE command or backup control file recovery was done with a control file that was saved before the file was created.

Action: Rename the MISSING file to the name of the real file.

ORA-01112: media recovery not started

Cause: An attempt to continue media recovery is being made but media recovery was not started.

Action: None

ORA-01113: file <varname>string</varname> needs media recovery

Cause: An attempt was made to online or open a database with a file that is in need of media recovery.

Action: First apply media recovery to the file.

ORA-01114: IO error writing block to file <varname>string</varname> (block # <varname>string</varname>)

Cause: The device on which the file resides is probably offline. If the file is a temporary file, then it is also possible that the device has run out of space. This could happen because disk space of temporary files is not necessarily allocated at file creation time.

Action: Restore access to the device or remove unnecessary files to free up space.

ORA-01115: IO error reading block from file <varname>string</varname> (block # <varname>string</varname>)

Cause: Device on which the file resides is probably offline

Action: Restore access to the device

ORA-01116: error in opening database file <varname>string</varname>

Cause: Usually the file is not accessible.

Action: Restore the database file.

ORA-01117: adding file '<varname>string</varname>' with illegal block size: <varname>string</varname>; limit is <varname>string</varname>

Cause: An attempt was made to add a database file with a block size that is greater than the maximum block size allowed.

Action: Retry the DDL command with a smaller block size.

ORA-01118: cannot add any more database files: limit of <varname>string</varname> exceeded

Cause: There is no more room in the control file for adding database files.

Action: Resize the control file or drop other tablespaces.

ORA-01119: error in creating database file '<varname>string</varname>'

Cause: Usually due to not having enough space on the device.

Action: n/a

ORA-01120: cannot remove online database file <varname>string</varname>

Cause: Attempting to drop a datafile when it is online

Action: Take file offline before dropping.

ORA-01121: cannot rename database file <varname>string</varname> - file is in use or recovery

Cause: Attempted to use ALTER DATABASE RENAME to rename a datafile that is online in an open instance or is being recovered.

Action: Close database in all instances and end all recovery sessions.

ORA-01122: database file <varname>string</varname> failed verification check

Cause: The information in this file is inconsistent with information from the control file. See accompanying message for reason.

Action: Make certain that the db files and control files are the correct files for this database.

ORA-01123: cannot start online backup; media recovery not enabled

Cause: An attempt to start backup of an on-line tablespace failed because media recovery is not enabled.

Action: Enable media recovery and retry this operation.

ORA-01124: cannot recover data file <varname>string</varname> - file is in use or recovery

Cause: An attempt to do media recovery found that the file was not available for recovery. Either it is online and the database is open in some instance, or another process is currently doing media recovery on the file.

Action: Do not do media recovery.

ORA-01125: cannot disable media recovery - file <varname>string</varname> has online backup set

Cause: An attempt to disable media recovery found that an online backup is still in progress.

Action: End the backup of the offending tablespace and retry this command.

ORA-01126: database must be mounted in this instance and not open in any instance

Cause: Obvious

Action: n/a

ORA-01127: database name '<varname>string</varname>' exceeds size limit of <varname>string</varname> characters

Cause: Obvious

Action: n/a

ORA-01128: cannot start online backup - file <varname>string</varname> is offline

Cause: An attempt to start an online backup found that one of the files is offline.

Action: Bring the offending files online and retry this command or do a cold backup.

ORA-01129: user's default or temporary tablespace does not exist

Cause: The user's default or temporary tablespace was dropped.

Action: Reassign the default or temporary tablespace.

ORA-01130: database file version <varname>string</varname> incompatible with ORACLE version <varname>string</varname>

ORA-01131: DB_FILES system parameter value <varname>string</varname> exceeds limit of <varname>string</varname>

ORA-01132: length of database file name '<varname>string</varname>' exceeds limit of <varname>string</varname> characters

ORA-01133: length of log file name '<varname>string</varname>' exceeds limit of <varname>string</varname> characters

ORA-01134: database mounted exclusive by another instance

ORA-01135: file <varname>string</varname> accessed for DML/query is offline

Cause: Attempted to access a data file that is offline

Action: Bring the data file back online

ORA-01136: specified size of file <varname>string</varname> (<varname>string</varname> blocks) is less than original size of <varname>string</varname> blocks

Cause: A file size was specified in the AS clause of ALTER DATABASE CREATE DATAFILE, and the size was smaller than the size needed

Action: Create the file with a larger size.

ORA-01137: data file <varname>string</varname> is still in the middle of going offline

Cause: It was not possible to get the lock for a file that is offline when attempting to bring it online. The most likely cause is that the lock is still held by the instance that is took it offline.

Action: Wait a bit and try to online the file again.

ORA-01138: database must either be open in this instance or not at all

Cause: The requested operation can not be done when the database is mounted but not open in this instance, and another instance has the database open.

Action: Execute the operation in an open instance, open the database in this instance, or close the database in the other instances.

ORA-01139: RESETLOGS option only valid after an incomplete database recovery

Cause: The RESETLOGS option was given in ALTER DATABASE OPEN, but there has been no incomplete recovery session.

Action: Retry the ALTER DATABASE OPEN without specifying RESETLOGS

ORA-01140: cannot end online backup - all files are offline or readonly

Cause: All the files were found to be offline or readonly when attempting to end an online backup.

Action: None. Online backup does not need to be ended for this tablespace.

ORA-01141: error renaming data file <varname>string</varname> - new file '<varname>string</varname>' not found

Cause: An attempt to change a data file's name in the control file failed because no file was found with the new name.

Action: Make sure that the data file has been properly renamed by the operating system and retry.

ORA-01142: cannot end online backup - none of the files are in backup

Cause: None of the files were found to be in online backup when attempting to end an online backup.

Action: None. Online backup does not need to be ended for this tablespace.

ORA-01143: cannot disable media recovery - file <varname>string</varname> needs media recovery

Cause: An attempt to disable media recovery found a file that needs media recovery, thus media recovery cannot be disabled.

Action: Recover the offending file or drop the tablespace it belongs to and retry this command.

ORA-01144: File size (<varname>string</varname> blocks) exceeds maximum of <varname>string</varname> blocks

Cause: Specified file size is larger than maximum allowable size value.

Action: Specify a smaller size.

ORA-01145: offline immediate disallowed unless media recovery enabled

Cause: ALTER TABLESPACE ... OFFLINE IMMEDIATE or ALTER DATABASE DATAFILE ... OFFLINE is only allowed if database is in ARCHIVELOG mode.

Action: Take tablespace offline normally or shutdown abort. Reconsider your backup strategy. You could do this if you were archiving your logs.

ORA-01146: cannot start online backup - file <varname>string</varname> is already in backup

Cause: When starting an online backup it was noticed that an online backup was already started for one of the data files.

Action: End the first backup before beginning another.

ORA-01147: SYSTEM tablespace file <varname>string</varname> is offline

Cause: A file belonging to the SYSTEM tablespace has been marked offline by the DBA. The database cannot be started until all SYSTEM tablespace files are online and openable.

Action: Bring the file online.

ORA-01148: cannot refresh file size for datafile <varname>string</varname>

Cause: An operating system or device error occurred when retrieving the file's size. The device on which the file resides may have been offline.

Action: Restore access to the device.

ORA-01149: cannot shutdown - file <varname>string</varname> has online backup set

Cause: An attempt to shutdown normally found that an online backup is still in progress.

Action: End the backup of the offending tablespace and retry this command.

ORA-01150: cannot prevent writes - file <varname>string</varname> has online backup set

Cause: An attempt to make a tablespace read only or offline normal found that an online backup is still in progress. It will be necessary to write the file header to end the backup, but that would not be allowed if this command succeeded.

Action: End the backup of the offending tablespace and retry this command.

ORA-01151: use media recovery to recover block, restore backup if needed

Cause: Error 1172 occurred.

Action: This is additional information for error 1172.

ORA-01152: file <varname>string</varname> was not restored from a sufficiently old backup

Cause: An incomplete recovery session was started, but an insufficient number of logs were applied to make the database consistent. This file is still in the future of the last log applied. The most likely cause of this error is forgetting to restore the file from a backup before doing incomplete recovery.

Action: Either apply more logs until the database is consistent or restore the database file from an older backup and repeat recovery.

ORA-01153: an incompatible media recovery is active

Cause: Attempted to start an incompatible media recovery or open resetlogs during media recovery or RMAN backup. Media recovery sessions are incompatible if they attempt to recover the same data file. Incomplete media recovery or open resetlogs is incompatible with any media recovery. Backup or restore by RMAN is incompatible with open resetlogs

Action: Complete or cancel the other media recovery session or RMAN backup

ORA-01154: database busy. Open, close, mount, and dismount not allowed now

Cause: Some operation is in progress that expects the opened/mounted state of this instance to remain the same.

Action: Wait for the operation to complete then retry. If attempting to do a shutdown, SHUTDOWN ABORT will work. If this is a shutdown of a standby database that is operating in NO DATA LOSS mode, you must shutdown the primary database first.

ORA-01155: the database is being opened, closed, mounted or dismounted

Cause: The requested operation needs the instance to be in a particular state but the state is being changed.

Action: Wait for the open, close, mount, or dismount to complete then retry the operation. If necessary, a SHUTDOWN ABORT will always work.

ORA-01156: recovery or flashback in progress may need access to files

Cause: Either media recovery, instance recovery, or flashback was in progress. The recovery or flashback in progress may need the files to which this operation is being applied.

Action: Wait for recovery or flashback to complete.

ORA-01157: cannot identify/lock data file <varname>string</varname> - see DBWR trace file

Cause: The background process was either unable to find one of the data files or failed to lock it because the file was already in use. The database will prohibit access to this file but other files will be unaffected. However the first instance to open the database will need to access all online data files. Accompanying error from the operating system describes why the file could not be identified.

Action: Have operating system make file available to database. Then either open the database or do ALTER SYSTEM CHECK DATAFILES.

ORA-01158: database <varname>string</varname> already mounted

Cause: Another instance has a database by this name mounted.

Action: Find which instance is still running. Perhaps you have not lost the control files after all.

ORA-01159: file is not from same database as previous files - wrong database id

Cause: Not all of the files specified in CREATE CONTROLFILE are from the same database. The database ID of this file does not match that from the first file specified.

Action: Please double check the list of files provided to the CREATE

ORA-01160: file is not a <varname>string</varname>

Cause: The named file in the DATAFILE or LOGFILE section of the CREATE CONTROLFILE command does not appear to be as stated.

Action: Please double check the mentioned file.

ORA-01161: Database name <varname>string</varname> in the file header does not match <varname>string</varname> in the DATABASE clause.

Cause: The database name provided in the DATABASE clause did not match the database name found in the file header.

Action: Ensure consistency of database names. Use the SET DATABASE clause if you are renaming the database.

ORA-01162: block size <varname>string</varname> in file header does not match configured block sizes

Cause: CREATE CONTROLFILE discovered that the block size for this file is incompatible with any of the configured cache block sizes in the INIT.ORA file.

Action: Configure the appropriate cache for this block size using one of the various (db_2k_cache_size, db_4k_cache_size, db_8k_cache_size, db_16k_cache_size, db_32K_cache_size) parameters.

ORA-01163: SIZE clause indicates <varname>string</varname> (blocks), but should match header <varname>string</varname>

Cause: The size specified in bytes in the SIZE clause of the CREATE CONTROLFILE statement does not equate to the number of blocks recorded in the header.

Action: Specify the correct filename and size (in bytes).

ORA-01164: MAXLOGFILES may not exceed <varname>string</varname>

Cause: MAXLOGFILES specified on the command line too large.

Action: Resubmit the command with a smaller MAXLOGFILES

ORA-01165: MAXDATAFILES may not exceed <varname>string</varname>

Cause: MAXDATAFILES specified on the command line too large.

Action: Resubmit the command with a smaller MAXDATAFILES

ORA-01166: file number <varname>string</varname> is larger than <varname>string</varname> (<varname>string</varname>)

Cause: File mentioned in CREATE CONTROLFILE has a file number which is larger than that specified for MAXDATAFILES or MAXLOGFILES.

Action: Increase the maximum specified on the command line.

ORA-01167: two files are the same file/group number or the same file

Cause: There is an overlap of file numbers in the files specified on the command line or the same file is specified twice. If they are not the exact same file then one is likely to be a backup of the other. If they are two members of the same log they must be specified together in a group file spec. This message will also appear if the same control file appears more than once in the control_files parameter in the init.ora file. If this happens, check for additional error messages.

Action: Confirm that the file mentioned is not a repeat of a file already mentioned in the command. If they are different files then omit the earlier backup. If they are members of the same log, insure they are in the same group file specification. If this message appears because of a duplicate control file, check the control_files parameter in the init.ora file and see if a file is specified more than once. If all files names appear to be unique, check to make sure that the actual control files themselves are unique. For example, in UNIX check for a symbolic or a hard link to another control file in the list.

ORA-01168: physical block size <varname>string</varname> does not match size <varname>string</varname> of other members

Cause: The file is located on a device with a different physical block size than the other members in the group

Action: Use a physical device with matching block size.

ORA-01169: DATAFILE number 1 not found. Must be present

Cause: Datafile number 1 was not specified in a CREATE CONTROLFILE command.

Action: Locate datafile number 1 and resubmit the CREATE CONTROLFILE command.

ORA-01170: file not found '<varname>string</varname>'

Cause: ALL datafiles and, if NORESETLOGS, ALL logfiles MUST be accessible by the process for CREATE CONTROLFILE.

Action: The file specified probably contains a typing error. Double check command and the existence of all files and then resubmit.

ORA-01171: datafile <varname>string</varname> going offline due to error advancing checkpoint

Cause: The checkpoint in the file header could not be advanced. See accompanying errors for the reason. The datafile will be taken offline the same as for a write error of a data block.

Action: See accompanying errors for details. Restore access to the file, do media recovery, and bring it back online.

ORA-01172: recovery of thread <varname>string</varname> stuck at block <varname>string</varname> of file <varname>string</varname>

Cause: Crash recovery or instance recovery could not apply a change to a block because it was not the next change. This can happen if the block was corrupted and then repaired during recovery.

Action: Do a RECOVER DATAFILE for the file containing the block. If this does not resolve the problem then restore the file from a backup and recover it.

ORA-01173: data dictionary indicates missing data file from system tablespace

Cause: Either the database has been recovered to a point in time in the future of the control file or a datafile from the system tablespace was omitted from the create control file command previously issued.

Action: For the former problem you need to recover the database from a more recent control file. For the latter problem, simply recreate the control file checking to be sure that you include all the datafiles in the system tablespace.

ORA-01174: DB_FILES is <varname>string</varname> but needs to be <varname>string</varname> to be compatible

Cause: The maximum number of database files supported by this instance is not the same as for the other instances. All instances must be able to open all the files any instance can open.

Action: Change the value of the DB_FILES parameter to be compatible

ORA-01175: data dictionary has more than the <varname>string</varname> files allowed by the instance

Cause: The data dictionary is found to have more files than that which can be supported by this instance.

Action: Shutdown the instance and restart with a larger number of db_files

ORA-01176: data dictionary has more than the <varname>string</varname> files allowed by the controlfile

Cause: After a CREATE CONTROLFILE, the data dictionary was found to have more data files than that supported by the control file.

Action: Re-create the control file with a larger MAXDATAFILES.

ORA-01177: data file does not match dictionary - probably old incarnation

Cause: When comparing the control file with the data dictionary after a CREATE CONTROLFILE or OPEN RESETLOGS, it was noted that this datafile was inconsistent with the dictionary. Most likely the file is a backup of a file that was dropped from the database, and the same file number was reused for a new file. It may also be that an incomplete recovery stopped at a time when this file number was used for another datafile.

Action: Do a CREATE CONTROLFILE with the correct file or none at all.

ORA-01178: file <varname>string</varname> created before last CREATE CONTROLFILE, cannot recreate

Cause: Attempted to use ALTER DATABASE CREATE DATAFILE to recreate a datafile that existed at the last CREATE CONTROLFILE command. The information needed to recreate the file was lost with the control file that existed when the file was added to the database.

Action: Find a backup of the file, and recover it. Do incomplete recovery to time before file was originally created.

ORA-01179: file <varname>string</varname> does not exist

Cause: During datafile recovery, a file was listed which was not part for the database.

Action: Recheck the datafile name. Remember to use double quotes at the SQLDBA command line and remember that the file name is translated in the environment of the SQLDBA.

ORA-01180: can not create datafile 1

Cause: Attempting to create datafile 1 using ALTER DATABASE CREATE DATAFILE.

Action: Recover file from a backup or recreate database.

ORA-01181: file <varname>string</varname> created before last known RESETLOGS, cannot recreate

Cause: Attempted to use ALTER DATABASE CREATE DATAFILE to recreate a datafile that existed before the last known RESETLOGS.

Action: Find a backup of the file, and recover it. Do incomplete recovery to time before file was originally created.

ORA-01182: cannot create database file <varname>string</varname> - file is in use or recovery

Cause: Attempted to use ALTER DATABASE CREATE DATAFILE to recreate a datafile that is online in an open instance or is being recovered.

Action: Close database in all instances and end all recovery sessions

ORA-01183: cannot mount database in SHARED mode

Cause: Some other instance has the database mounted exclusive.

Action: Shutdown other instance then mount shared.

ORA-01184: logfile group <varname>string</varname> already exists

Cause: An ALTER DATABASE ADD LOGFILE command specified a log number for the new log which is already in use.

Action: Specify a different logfile number, or let the database choose an unused value.

ORA-01185: logfile group number <varname>string</varname> is invalid

Cause: An ALTER DATABASE ADD LOGFILE command specified a log number for the new log which is too large.

Action: Specify a correct logfile number.

ORA-01186: file <varname>string</varname> failed verification tests

Cause: The data file did not pass the checks to insure it is part of the database. See the accompanying error messages for the reason the verification failed.

Action: Make the correct file available to the database. Then, either open the database, or execute ALTER SYSTEM CHECK DATAFILES.

ORA-01187: cannot read from file <varname>string</varname> because it failed verification tests

Cause: The data file did not pass the checks to insure it is part of the database. Reads are not allowed until it is verified.

Action: Make the correct file available to the database. Then, either open the database, or execute ALTER SYSTEM CHECK DATAFILES.

ORA-01188: The block size specified <varname>string</varname> does not match header block size <varname>string</varname>

Cause: The block size specified in the BLOCKSIZE clause of the CREATE CONTROLFILE statement does not equate to the block size recorded in the log file header.

Action: Specify the correct block size.

ORA-01189: file is from a different RESETLOGS than previous files

Cause: In a CREATE CONTROLFILE command either this file or all previous files were backups from before the last RESETLOGS. This may also occur if this is a file that is offline and has been offline since before the last RESETLOGS.

Action: If the file was taken offline normal before the last RESETLOGS, and is still offline, omit it from the CREATE CONTROLFILE command. Rename and online the file after the database is open. Otherwise find the version of the mentioned file consistent with the rest of the datafiles and resubmit the command.

ORA-01190: control file or data file <varname>string</varname> is from before the last RESETLOGS

Cause: Attempting to use a data file when the log reset information in the file does not match the control file. Either the data file or the control file is a backup that was made before the most recent ALTER DATABASE OPEN RESETLOGS.

Action: Restore file from a more recent backup.

ORA-01191: file <varname>string</varname> is already offline - cannot do a normal offline

Cause: When attempting to do a normal tablespace offline it was discovered that one of the files in the tablespace was already offline.

Action: Either bring the datafile online first, or use another tablespace offline option.

ORA-01192: must have at least one enabled thread

Cause: You must specify at least two logfiles from at least one thread at the create controlfile command line.

Action: Find the missing logfiles and resubmit the command with the newly found logfiles included in the command line.

ORA-01193: file <varname>string</varname> is not the same file seen at start of recovery

Cause: A different copy of the file was accessed the last time media recovery looked at the file header. A backup of the file was restored or the meaning of the file name changed during recovery.

Action: Ensure the correct file is available, then retry recovery.

ORA-01194: file <varname>string</varname> needs more recovery to be consistent

Cause: An incomplete recovery session was started, but an insufficient number of logs were applied to make the file consistent. The reported file was not closed cleanly when it was last opened by the database. It must be recovered to a time when it was not being updated. The most likely cause of this error is forgetting to restore the file from a backup before doing incomplete recovery.

Action: Either apply more logs until the file is consistent or restore the file from an older backup and repeat recovery.

ORA-01195: online backup of file <varname>string</varname> needs more recovery to be consistent

Cause: An incomplete recovery session was started, but an insufficient number of logs were applied to make the file consistent. The reported file is an online backup which must be recovered to the time the backup ended.

Action: Either apply more logs until the file is consistent or restore the database files from an older backup and repeat recovery.

ORA-01196: file <varname>string</varname> is inconsistent due to a failed media recovery session

Cause: The file was being recovered but the recovery did not terminate normally. This left the file in an inconsistent state. No more recovery was successfully completed on this file.

Action: Either apply more logs until the file is consistent or restore the backup again and repeat recovery.

ORA-01197: thread <varname>string</varname> only contains one log

Cause: During CREATE CONTROLFILE all threads represented in the logs must be represented by at least two logs. A "last log" and a second log. The named thread does not contain two such logs.

Action: Either find more logs from the named thread. Or use the RESETLOGS option to CREATE CONTROLFILE.

ORA-01198: must specify size for log file if RESETLOGS

Cause: File sizes must be given for all logfiles if doing a CREATE CONTROLFILE with the RESETLOGS option.

Action: Resubmit the command with the appropriate logfile size.

ORA-01199: file <varname>string</varname> is not in online backup mode

Cause: Attempting to end an online backup for a file that is not in online backup.

Action: Do not enter command since it is not needed.

ORA-01200: actual file size of <varname>string</varname> is smaller than correct size of <varname>string</varname> blocks

Cause: The size of the file as returned by the operating system is smaller than the size of the file as indicated in the file header and the control file. Somehow the file has been truncated. Maybe it is the result of a half completed copy.

Action: Restore a good copy of the data file and do recovery as needed.

ORA-01201: file <varname>string</varname> header failed to write correctly

Cause: An I/O error was reported for the file header. The error was trapped and a second attempt will be made.

Action: The file probably will require recovery. Further error messages will indicate what is needed.

ORA-01202: wrong incarnation of this file - wrong creation time

Cause: The creation time in the file header is not the same as the creation time in the control file. This is probably a copy of a file that was dropped.

Action: Restore a current copy of the data file and do recovery as needed.

ORA-01203: wrong incarnation of this file - wrong creation SCN

Cause: The creation SCN in the file header is not the same as the creation SCN in the control file. This is probably a copy of a file that was dropped.

Action: Restore a current copy of the data file and do recovery as needed.

ORA-01204: file number is <varname>string</varname> rather than <varname>string</varname> - wrong file

Cause: The file number in the file header is not correct. This is probably a restored backup of the wrong file, but from the same database.

Action: Restore a copy of the correct data file and do recovery as needed.

ORA-01205: not a data file - type number in header is <varname>string</varname>

Cause: The file type in the header is not correct for a data file. This is probably a log file or control file. If the type is not a small non-zero positive number then the header is corrupted.

Action: Restore a copy of the correct data file and do recovery as needed.

ORA-01206: file is not part of this database - wrong database id

Cause: The database ID in the file header does not match the database id in the control file. The file may be from a different database, or it may not be a database file at all. If the database was rebuilt, this may be a file from before the rebuild. Note that if you see this error when the file is supposed to be plugged in from another database via the Transportable Tablespace feature, it means the database ID in the file header does not match the one expected.

Action: Restore a copy of the correct data file and do recovery as needed.

ORA-01207: file is more recent than control file - old control file

Cause: The control file change sequence number in the data file is greater than the number in the control file. This implies that the wrong control file is being used. Note that repeatedly causing this error can make it stop happening without correcting the real problem. Every attempt to open the database will advance the control file change sequence number until it is great enough.

Action: Use the current control file or do backup control file recovery to make the control file current. Be sure to follow all restrictions on doing a backup control file recovery.

ORA-01208: data file is an old version - not accessing current version

Cause: The checkpoint in the file header is less recent than in the control file. If opening a database that is already open by another instance, or if another instance just brought this file online, the file accessed by this instance is probably a different version. Otherwise, a backup of the file probably was restored while the file was in use.

Action: Make the correct file available to the database. Then, either open the database, or execute ALTER SYSTEM CHECK DATAFILES.

ORA-01209: data file is from before the last RESETLOGS

Cause: The reset log data in the file header does not match the control file. If the database is closed or the file is offline, the backup is old because it was taken before the last ALTER DATABASE OPEN RESETLOGS command. If opening a database that is open already by another instance, or if another instance just brought this file online, the file accessed by this instance is probably a different version. Otherwise, a backup of the file probably was restored while the file was in use.

Action: Make the correct file available to the database. Then, either open the database, or execute ALTER SYSTEM CHECK DATAFILES.

ORA-01210: data file header is media corrupt

Cause: The file header block is internally inconsistent. The beginning of the block has a header with a checksum and other data for insuring the consistency of the block. It is possible that the last disk write did not operate correctly. The most likely problem is that this is not a datafile for any database.

Action: Have operating system make correct file available to database. If the trace file dump indicates that only the checksum is wrong, restore from a backup and do media recovery.

ORA-01211: Oracle7 data file is not from migration to Oracle8

Cause: The file is not a copy of the file LAST used under Oracle7. This datafile is either a backup taken from before the migration, or the database was opened by

Oracle7 after the migration utility was run. When converting a database from Oracle7 to Oracle8, the migration program **MUST** be the LAST utility to access the database under Oracle7. Only the datafiles that were current when the migration was done may be accessed by Oracle8.

Action: Have operating system make correct data file available to database, or repeat the Oracle7 to Oracle8 migration. Make sure that database is NOT opened after migration utility is run.

ORA-01212: MAXLOGMEMBERS may not exceed <varname>string</varname>

Cause: MAXLOGMEMBERS specified on the command line too large.

Action: Resubmit the command with a smaller MAXLOGMEMBERS

ORA-01213: MAXINSTANCES may not exceed <varname>string</varname>

Cause: MAXINSTANCES specified on the command line too large.

Action: Resubmit the command with a smaller MAXINSTANCES

ORA-01214: MAXLOGHISTORY may not exceed <varname>string</varname>

Cause: MAXLOGHISTORY specified on the command line too large.

Action: Resubmit the command with a smaller MAXLOGHISTORY

ORA-01215: enabled thread <varname>string</varname> is missing after CREATE CONTROLFILE

Cause: A CREATE CONTROLFILE statement was given which did not list all the enabled threads for the database.

Action: Reissue the CREATE CONTROLFILE statement, including all enabled threads.

ORA-01216: thread <varname>string</varname> is expected to be disabled after CREATE CONTROLFILE

Cause: A thread that was given during CREATE CONTROLFILE is enabled, but the datafiles indicate that it should be disabled. This is probably because the logs supplied to the CREATE CONTROLFILE are old (from before the disabling of the thread).

Action: This thread is not required to run the database. The CREATE CONTROLFILE statement can be reissued without the problem thread, and, if desired, the thread can be recreated after the database is open.

ORA-01217: logfile member belongs to a different logfile group

Cause: A member of a multiple-member logfile group specified in a CREATE CONTROLFILE is not part of the same group as previous members.

Action: Group together the correct members for the CREATE CONTROLFILE command.

ORA-01218: logfile member is not from the same point-in-time

Cause: A member of a multiple-member logfile group is from a different point in time. One of the members specified may be an older (backup) copy of the log.

Action: Find the correct version of the log, or leave it out of the CREATE CONTROLFILE command.

ORA-01219: database or pluggable database not open: queries allowed on fixed tables or views only

Cause: A query was issued against an object not recognized as a fixed table or fixed view before the database or pluggable database has been opened.

Action: Re-phrase the query to include only fixed objects, or open the database or pluggable database.

ORA-01220: file based sort illegal before database is open

Cause: A query issued against a fixed table or view required a temporary segment for sorting before the database was open. Only in-memory sorts are supported before the database is open.

Action: Re-phrase the query to avoid a large sort, increase the values of the SORT_AREA_SIZE and/or SORT_AREA_RETAINED_SIZE initialization parameters to enable the sort to be done in memory.

ORA-01221: data file <varname>string</varname> is not the same file to a background process

Cause: When the database writer opens the data file, it is accessing a different physical file than the foreground doing the recovery. The timestamp set in the file header by the foreground was not found by the background. It may be that the background process could not read the file at all.

Action: Look in the DBWR trace file for the error it received when attempting to read the file header. Reconfigure the operating system as needed to have the file name successfully access the same file when opened by a background process.

ORA-01222: MAXINSTANCES of <varname>string</varname> requires MAXLOGFILES be at least <varname>string</varname>, not <varname>string</varname>

Cause: Attempting to create a database or control file that does not have room for at least two logs per thread of redo. A thread of redo must have two online logs in order to be enabled. It does not make sense to allow more redo threads than can be supported by the logs.

Action: Either reduce the MAXINSTANCES argument or increase MAXLOGFILES.

ORA-01223: RESETLOGS must be specified to set a new database name

Cause: The SET database name option was specified to CREATE CONTROLFILE, but RESETLOGS was not specified. The database name can only be changed when opening the database with RESETLOGS.

Action: Either add the RESETLOGS option or drop the SET option to CREATE CONTROLFILE.

ORA-01224: group number in header <varname>string</varname> does not match GROUP <varname>string</varname>

Cause: Group number specified at CREATE CONTROLFILE does not match the group number stored in the header. Most likely the specification is wrong.

Action: Omit the GROUP option or give the correct one.

ORA-01225: thread number <varname>string</varname> is greater than MAXINSTANCES <varname>string</varname>

Cause: The log is for a thread greater than the MAXINSTANCES argument.

Action: Increase the value for MAXINSTANCES and resubmit the command.

ORA-01226: file header of log member is inconsistent with other members

Cause: The log file member in the accompanying error is for the same group as the previous members, but other fields in the header are different. Either a file header is corrupted, or some file is a member of a deleted log.

Action: Find the correct log member or omit this member from the command.

ORA-01227: log <varname>string</varname> is inconsistent with other logs

Cause: The log file in the accompanying error is inconsistent with the contents of other logs given in the CREATE CONTROLFILE command. Either a file header is corrupted, or some file is an old copy rather than the current version. The problem may not be with the log listed since all that can be detected is that there is an inconsistency. All log files listed in the command must be the current versions of the online logs.

Action: Find the correct online logs or use the RESETLOGS option.

ORA-01228: SET DATABASE option required to install seed database

Cause: The SET DATABASE option was not included in the CREATE CONTROLFILE command when installing a seed database. The database does not have a database ID because it is intended to be installed at multiple sites, and each site needs to be a different database with its own database id. Both the SET DATABASE and RESETLOGS options must be specified to create the control file for this database.

Action: Resubmit command with the SET DATABASE and RESETLOGS options.

ORA-01229: data file <varname>string</varname> is inconsistent with logs

Cause: The data file in the accompanying error is inconsistent with the contents of the logs given in the CREATE CONTROLFILE command. The most likely cause is that one or more of the online logs was missing from the command. It is also possible that one or more of the logs is an old copy rather than the current version. All online log files must be listed in the command and must be the current versions of the online logs.

Action: Find the correct online logs or use the RESETLOGS option.

ORA-01230: cannot make read only - file <varname>string</varname> is offline

Cause: An attempt to make a tablespace read only found that one of its files is offline.

Action: Bring the file online and retry this command.

ORA-01231: cannot make read write - file <varname>string</varname> is offline

Cause: An attempt to make a tablespace read write found that one of its files is offline.

Action: Bring the file online and retry this command.

ORA-01232: cannot start online backup - file <varname>string</varname> is being made read-only

Cause: An attempt to start an online backup found that one of the files is in transition to read-only mode.

Action: Wait for the transition to complete and then retry the command, if this is an ALTER DATABASE BEGIN BACKUP command, or take the backup without any

begin or end commands, if this is an ALTER TABLESPACE BEGIN BACKUP command.

ORA-01233: file <varname>string</varname> is read only - cannot recover using backup control file

Cause: An attempt to do media recovery using a backup control file found that one of the files is marked read only. Read only files do not normally need to be recovered, but recovery with a backup control file must recover all online files.

Action: If the file really is read only, take it offline before the recovery, and bring the read only tablespace online after the database is open. If the file does need recovery use a control file from the time the file was read-write. If the correct control file is not available, use CREATE CONTROLFILE to make one.

ORA-01234: cannot end backup of file <varname>string</varname> - file is in use or recovery

Cause: Attempted to end an online backup of file when the file is busy. Some operation such as recovery or rename may be active, or there may still be some instance that has the database open with this file online.

Action: If there is an instance with the database open then the backup can be ended there by using the ALTER TABLESPACE command. Otherwise wait for the completion of the other operation.

ORA-01235: END BACKUP failed for <varname>string</varname> file(s) and succeeded for <varname>string</varname>

Cause: One or more of the files in an end backup command failed. Some other files given in the same command may have succeeded.

Action: See the accompanying error messages for the reason the backups could not be ended. Any files not listed in the error messages were successful.

ORA-01236: Error <varname>string</varname> occurred during initialization of file header access

Cause: The indicated error occurred while doing initialization processing of file headers.

Action: The error indicated should be corrected. An attempt is made to recover from this error by using a slower access algorithm.

ORA-01237: cannot extend datafile <varname>string</varname>

Cause: An operating system error occurred during the resize.

Action: Fix the cause of the operating system error and retry the command.

ORA-01238: cannot shrink datafile <varname>string</varname>

Cause: An operating system error occurred during the resize.

Action: The error is ignored, operation continues normally.

ORA-01239: database must be in ARCHIVELOG mode to use external cache

Cause: An online file uses an external cache, but the database is in NOARCHIVELOG mode. Since an external cache may require media recovery this can not be allowed.

Action: Change database to be in ARCHIVELOG mode or do not use an external cache.

ORA-01240: too many data files to add in one command

Cause: The command specifies adding more data files than can be done in one command. It is necessary to fit all the file names into one log entry, but that would make the entry too large.

Action: If this is a CREATE TABLESPACE command, create with fewer files then add the other files later. If this is an ADD DATAFILE command, break it up into multiple commands.

ORA-01241: an external cache has died

Cause: The external cache may have been restarted.

Action: Take the file mentioned in the error stack offline, perform media recovery, bring the file online, and retry the attempted operation. You may also restart all instances to make sure they access all data files through consistent external caches.

ORA-01242: data file suffered media failure: database in NOARCHIVELOG mode

Cause: The database is in NOARCHIVELOG mode and a database file was detected as inaccessible due to media failure.

Action: Restore accessibility to the file mentioned in the error stack and restart the instance.

ORA-01243: system tablespace file suffered media failure

Cause: A system tablespace file was detected as inaccessible due to media failure.

Action: Restore accessibility to the file mentioned in the error stack and restart the instance.

ORA-01244: unnamed datafile(s) added to control file by media recovery

Cause: Media recovery with a backup control file or a control file that was rebuilt, encountered the creation of a datafile that was not in the control file. An entry has been added to the control file for the new datafiles, but with the file name UNNAMEDnnnn, where nnnn is the file number. Attached errors describe the file names that were originally used to create the files.

Action: Rename the files to valid file names and resume recovery. If necessary the command ALTER DATABASE CREATE DATAFILE may be used to create a file suitable for recovery and do the rename. If the file is not going to be recovered then take it offline with the FOR DROP option.

ORA-01245: offline file <varname>string</varname> will be lost if RESETLOGS is done

Cause: Attempting to do an OPEN RESETLOGS with a file that will be lost because it is offline. The file was not taken offline with the FOR DROP option.

Action: Either bring the file online and recover it, or take it offline with the FOR DROP option.

ORA-01246: recovering files through TSPITR of tablespace <varname>string</varname>

Cause: The files named in the accompanying errors are backups that were made before a tablespace point in time recovery of this tablespace. They cannot be recovered to a time after the point in time recovery.

Action: Restore more recent backups and recover them.

**ORA-01247: database recovery through TSPITR of tablespace
<varname>string</varname>**

Cause: Recovery of the whole database encountered redo indicating there was a point in time recovery of the tablespace. The new version of the files in the tablespace should be included in the recovery, but that was not done.

Action: If the tablespace should not be recovered, take its file offline for drop. If it should be recovered, then restore or rename as needed and restart the recovery.

ORA-01248: file <varname>string</varname> was created in the future of incomplete recovery

Cause: Attempting to do a RESETLOGS open with a file entry in the control file that was originally created after the UNTIL time of the incomplete recovery. Allowing such an entry may hide the version of the file that is needed at this time. The file number may be in use for a different file which would be lost if the RESETLOGS was allowed.

Action: If more recovery is desired then apply redo until the creation time of the file is reached. If the file is not wanted and the same file number is not in use at the stop time of the recovery, then the file can be taken offline with the FOR DROP option. Otherwise a different control file is needed to allow the RESETLOGS. Another backup can be restored and recovered, or a control file can be created via CREATE CONTROLFILE.

ORA-01249: archiving not allowed in a clone database

Cause: Attempting to archive an online redo log or enable archiving for a clone database.

Action: Do not attempt to archive from a clone. The archive log destination could easily be the same as the primary database destroying its archived logs. If archiving is needed then recreate database as not a clone.

ORA-01250: Error <varname>string</varname> occurred during termination of file header access

Cause: The indicated error occurred while terminating the processing of file headers. The error was other than a write error.

Action: The indicated error should be corrected.

**ORA-01251: Unknown File Header Version read for file number
<varname>string</varname>**

Cause: Read of the file header returned a record but its version cannot be identified. Either the header has been corrupted, or the file is not a valid database file.

Action: Have the operating system make the correct file available to the database, or recover the file.

ORA-01252: cannot prevent writes - file <varname>string</varname> in recovery manager backup

Cause: An attempt to make a tablespace read only or offline normal found that a recovery manager proxy backup is in progress. If the file is made offline or read-only, then the file header cannot be updated when the backup is complete.

Action: Wait for the Recovery Manager backup to complete and retry this command.

ORA-01253: cannot start online backup - file <varname>string</varname> in recovery manager backup

Cause: The specified file is being backed up by Recovery Manager.

Action: Wait for the Recovery Manager proxy backup to complete before starting another backup.

ORA-01254: cannot end online backup - file <varname>string</varname> in recovery manager backup

Cause: The specified file is being backed up by Recovery Manager.

Action: Wait for the Recovery Manager proxy backup to complete. Recovery Manager backup mode cannot be initiated or terminated manually.

ORA-01255: cannot shutdown - file <varname>string</varname> in recovery manager backup

Cause: An attempt to shutdown normally found that a Recovery Manager backup is still in progress.

Action: Wait for the Recovery Manager proxy backup to complete and retry this command.

ORA-01256: error in locking database file <varname>string</varname>

Cause: The file is in use by another database instance.

Action: Determine which database instance legitimately owns the file.

ORA-01257: cannot reuse database file <varname>string</varname>, unknown file size

Cause: The size of the raw partition cannot be determined

Action: Add the datafile/logfile by specifying the size parameter.

ORA-01258: unable to delete temporary file <varname>string</varname>

Cause: A DROP TABLESPACE INCLUDING CONTENTS AND DATAFILES or ALTER DATABASE TEMPFILE DROP INCLUDING DATAFILES operation was not able to delete a temporary file in the database.

Action: Subsequent errors describe the operating system error that prevented the file deletion. Fix the problem, if possible, and manually purge the file.

ORA-01259: unable to delete datafile <varname>string</varname>

Cause: A DROP TABLESPACE INCLUDING CONTENTS AND DATAFILES operation was not able to delete a datafile in the tablespace.

Action: Subsequent errors describe the operating system error that prevented the file deletion. Fix the problem, if possible, and manually purge the file.

ORA-01260: warning: END BACKUP succeeded but some files found not to be in backup mode

Cause: END BACKUP completed successfully for all files that were in online backup mode. However one or more modifiable files were found not to be in online backup mode. Backup of those files (if it was done) can be invalid and, if restored, can result in an inconsistent database.

Action: Check the alert log for a list of the files that were found not to be in backup mode. If there is a possibility that those files have been modified during online backup, then replace their backups with new ones.

ORA-01261: Parameter <varname>string</varname> destination string cannot be translated

Cause: The value for the specified parameter contained a destination string that could not be translated.

Action: Use a valid destination string in the specified parameter.

ORA-01262: Stat failed on a file destination directory

Cause: Unable to get information about an Oracle managed files destination directory.

Action: Check the permissions on the directory or use a different directory name.

ORA-01263: Name given for file destination directory is invalid

Cause: The name given for an Oracle managed files destination does not correspond to a directory.

Action: Use a different name.

ORA-01264: Unable to create <varname>string</varname> file name

Cause: Unable to create an Oracle managed file name.

Action: Check previous error messages for the reason Oracle was unable to create the file name. Take corrective action, if possible, and retry the command.

ORA-01265: Unable to delete <varname>string</varname> <varname>string</varname>

Cause: An error prevented the file from being deleted.

Action: See the subsequent error messages that describe the operating system error that prevented the file from being deleted. If possible, fix the problem and manually delete the file.

ORA-01266: Unable to create unique file name

Cause: Unable to create a unique file name for an Oracle managed file. Oracle tried several names but each file name was already in use in the default destination directory for the file type.

Action: Retry the operation. If that fails, also, it may be necessary to change the default destination directory for the file type and then retry.

ORA-01267: Failure getting date/time

Cause: Could not get date/time when trying to create unique file name.

Action: Internal error - contact Oracle Customer Support.

ORA-01268: invalid TEMPFILE clause for alter of permanent TABLESPACE

Cause: A TEMPFILE clause was specified for an ALTER TABLESPACE for a permanent tablespace.

Action: Retry with a DATAFILE clause.

ORA-01269: Destination parameter string is too long

Cause: The value for DB_CREATE_FILE_DEST, DB_CREATE_ONLINE_LOG_DEST_n or DB_RECOVERY_FILE_DEST parameter was too long.

Action: Replace the destination value for the specified parameter with a shorter character string.

ORA-01270: <varname>string</varname> operation is not allowed if STANDBY_PRESERVES_NAMES is true

Cause: An operation that renames or adds/drops a file was attempted at a standby database and STANDBY_PRESERVES_NAMES is true.

Action: Set STANDBY_PRESERVES_NAMES false if the operation must be performed.

ORA-01271: Unable to create new file name for file <varname>string</varname>

Cause: During standby database recovery an error occurred when trying to create a new file name for the indicated file.

Action: Use the ALTER DATABASE CREATE DATAFILE command with a new unique name and then resume the standby database recovery.

ORA-01272: REUSE only allowed when a file name is provided.

Cause: The REUSE parameter was specified in a command without a file name.

Action: Either supply a file name or remove the REUSE parameter.

ORA-01273: STANDBY_FILE_MANAGEMENT = AUTO needs COMPATIBLE = <varname>string</varname> or higher

Cause: Automated standby file management was disabled, so an added file

Action: Restart the instance with COMPATIBLE set to the correct release.

ORA-01274: cannot add data file that was originally created as '<varname>string</varname>'

Cause: The recovery failed to add the specified data file either because the recovery tried to create the specified data file but automated standby file management was disabled, or the recovery tried to look for the specified data file but the data file did not exist. In the former case, the recovery added a control file entry as 'UNNAMEDnnnnn'.

Action: Either use the ALTER DATABASE CREATE DATAFILE statement to create the file, or set STANDBY_FILE_MANAGEMENT to AUTO, or restore the data file to the location specified by the corresponding control file entry, and restart standby recovery.

ORA-01275: Operation <varname>string</varname> is not allowed if standby file management is automatic.

Cause: An operation that renames, adds, or drops a file was attempted at a standby database and STANDBY_FILE_MANAGEMENT was set to AUTO.

Action: Set STANDBY_FILE_MANAGEMENT to MANUAL if the operation must be performed.

ORA-01276: Cannot add file <varname>string</varname>. File has an Oracle Managed Files file name.

Cause: An attempt was made to add to the database a datafile, log file, control file, snapshot control file, backup control file, datafile copy, control file copy or backuppiece with an Oracle Managed Files file name.

Action: Retry the operation with a new file name.

ORA-01277: file '<varname>string</varname>' already exists

Cause: An ALTER DATABASE BACKUP CONTROLFILE TO TRACE AS 'filename' command specified a file name which is already in use.

Action: Either specify a different file name, or add the REUSE parameter to the command to overwrite the existing file.

ORA-01278: error creating file '<varname>string</varname>'

Cause: An operating system error occurred while attempting to create a trace file specified in the command ALTER DATABASE BACKUP CONTROLFILE TO TRACE AS 'filename'.

Action: Check the error stack for more detailed information.

ORA-01279: db_files too large

Cause: db_files has been set too high to be supported by the system.

Action: Decrease the number of db_files.

ORA-01280: Fatal LogMiner error.

Cause: An internal error occurred inside LogMiner.

Action: Check the alert log and trace files for further information.

ORA-01281: SCN range specified is invalid

Cause: StartSCN may be greater than EndSCN, or the SCN specified may be invalid.

Action: Specify a valid SCN range.

ORA-01282: date range specified is invalid

Cause: startTime may be greater than endTime. startTime or endTime may be greater than year 2110. startTime may be less than year 1988.

Action: Specify a valid date range.

ORA-01283: Options specified is invalid

Cause: The specified options parameter is invalid for the procedure.

Action: Specify valid Options parameter.

ORA-01284: file <varname>string</varname> cannot be opened

Cause: The file or directory may not exist or may be inaccessible. Pathname exceeds 256 characters.

Action: Ensure that the file and the directory exist and are accessible.

ORA-01285: error reading file <varname>string</varname>

Cause: The file or directory may not exist or is inaccessible.

Action: Specify valid file or directory. Make sure that file and directory are accessible.

ORA-01286: start interval required

Cause: Options were supplied which require a starting time or starting SCN

Action: Specify a starting interval (time or SCN).

ORA-01287: file <varname>string</varname> is from a different database incarnation

Cause: The logfile is produced by a different incarnation of the database.

Action: Add a logfile that is produced by the same incarnation.

ORA-01288: cannot apply this DDL to the Logminer Dictionary

Cause: A command that is not supported by Logminer was present in a logfile. Commands that change the character set of the database are not supported by Logminer. "ALTER DATABASE SET TIME_ZONE" is not supported by Logminer.

Action: Do not execute unsupported commands when using Streams, Logical Standby, or Logminer. Turn off DDL tracking in order for Logminer to skip unsupported commands.

ORA-01289: cannot add duplicate logfile <varname>string</varname>

Cause: The logfile specified has already been added to the list of logfiles.

Action: Specify a different logfile.

ORA-01290: cannot remove unlisted logfile <varname>string</varname>

Cause: The user attempted to remove a logfile that is not present in the list.

Action: Specify a valid logfile.

ORA-01291: missing logfile

Cause: Not all logfiles corresponding to the time or scn range specified have been added to the list.

Action: Check the v\$logmnr_logs view to determine the missing scn range, and add the relevant logfiles.

ORA-01292: no log file has been specified for the current LogMiner session

Cause: No logfile has been specified for the LogMiner session.

Action: Specify atleast one log file.

ORA-01293: mounted database required for specified LogMiner options

Cause: Options were specified which required the database to be mounted

Action: Specify different options or mount the database.

ORA-01294: error occurred while processing information in dictionary file <varname>string</varname>, possible corruption

Cause: The dictionary file is corrupt.

Action: Get a new dictionary file.

ORA-01295: DB_ID mismatch between dictionary <varname>string</varname> and logfiles

Cause: The dictionary file is produced by a database that is different from that produced the logfiles.

Action: Specify a compatible dictionary file.

ORA-01296: character set mismatch between dictionary <varname>string</varname> and logfiles

Cause: The character set of the database that produced the dictionary file is different from the character set of the database that produced the logfiles.

Action: Specify a dictionary file with the same character set.

ORA-01297: redo version mismatch between dictionary <varname>string</varname> and logfiles

Cause: The redo version of the database generating the dictionary is different from the one generating the logfiles.

Action: n/a

ORA-01298: conflicting dictionary option

Cause: More than one dictionary source was specified or DDL_DICT_TRACKING was specified with DICT_FROM_ONLINE_CATALOG.

Action: n/a

ORA-01299: dictionary <varname>string</varname> corresponds to a different database incarnation

Cause: The dictionary file was extracted from a different incarnation of the database.

Action: Specify a dictionary file extracted from the correct database incarnation.

ORA-01300: writable database required for specified LogMiner options

Cause: Options were specified which required the database to be writable.

Action: Specify different options or open the database for write access.

ORA-01301: error writing to file during flat file build

Cause: Error writing to file during flat file build

Action: n/a

ORA-01302: dictionary build options missing or incorrect

Cause: Missing dictionary build options or incorrectly specified options

Action: Specify either a build to redo log or to flat file. If build to flat file, specify filename and directory.

ORA-01303: subordinate process error: <varname>string</varname>. Check alert and trace logs

Cause: A process subordinate to this Logminer process has exited with this error status.

Action: Search for this error in the alert log and trace files for additional information.

ORA-01304: subordinate process error. Check alert and trace logs

Cause: A process subordinate to this Logminer process has exited with an error condition.

Action: Look in the alert log and trace files for additional information.

ORA-01305: incompatible database character set

Cause: The database character set of the mining database was not a superset of the source database character set.

Action: Perform the mining operation on a database having a compatible database character set.

ORA-01306: dbms_logmnr.start_logmnr() must be invoked before selecting from v\$logmnr_contents

Cause: A select was issued from v\$logmnr_contents without first invoking the dbms_logmnr.start_logmnr() procedure.

Action: Invoke the dbms_logmnr.start_logmnr() procedure before issuing a select from the v\$logmnr_contents view.

ORA-01307: no LogMiner session is currently active

Cause: A select was issued from v\$logmnr_contents without first invoking the dbms_logmnr.start_logmnr() procedure. Otherwise, dbms_logmnr.end_logmnr() was called without a prior call to dbms_logmnr.start_logmnr() or dbms_logmnr.add_logfile()

Action: Invoke the dbms_logmnr.start_logmnr() procedure before issuing a select from the v\$logmnr_contents view.

ORA-01308: initialization parameter utl_file_dir is not set

Cause: utl_file_dir is not set in the initialization file.

Action: Set utl_file_dir to the appropriate directory.

ORA-01309: invalid session

Cause: The specified Logminer session ID or session handle is invalid.

Action: Use a valid Logminer session ID or session handle.

ORA-01310: requested return type not supported by the lcr_mine function

Cause: The return type requested by the user is not supported by lcr_mine"

Action: Pick a return type supported by the lcr_mine function"

ORA-01311: Illegal invocation of the mine_value function

Cause: An attempt was made to use mine_value function on a column other than redo_value or undo_value columns of SYS.X\$LOGMNR_CONTENTS or SYS.V\$LOGMNR_CONTENTS fixed table/view.

Action: Rewrite the SQL statement with a legal invocation of mine_value

ORA-01312: Specified table/column does not exist

Cause: The table/column specified in the lcr_mine call does not exist at the the specified SCN. The table/column definition has to exist at the start SCN specified for lcr_mine to be able to identify the table/column correctly.

Action: Create a LogMiner session at a start SCN at which the table definition is available.

ORA-01313: LogMiner dictionary column type different from specified type

Cause: The return type specified for the column in lcr_mine call is different from the actual type of the column.

Action: Rewrite the lcr_mine invocation with the right return type.

ORA-01314: Name of the column to be mined should be a string literal

Cause: The fully qualified name of the column to be mined by the LogMiner functions should be string literal.

Action: If the fully qualified name of the column to be mined is a.b.c.d, enclose the column name in quotes as in 'a.b.c.d'.

ORA-01315: Log file has been added or removed during select

Cause: A redo log file has been added or removed while selecting on the v\$logmnr_logs fixed view.

Action: Re-issue the SQL select statement on the v\$logmnr_logs view.

ORA-01316: Already attached to a Logminer session

Cause: A Logminer attach session was issued while already attached to a Logminer session.

Action: Detach from the current Logminer session and attach to the requested session.

ORA-01317: Not attached to a Logminer session

Cause: A command or procedure was issued which requires an attached Logminer session.

Action: Attach to a Logminer session before issuing the command or procedure.

ORA-01318: incompatible national character set

Cause: The national character set of the mining database was not a superset of the source database national character set.

Action: Perform the mining operation on a database having a compatible national character set.

ORA-01319: Invalid Logminer session attribute

Cause: A session attribute was supplied which is invalid.

Action: Re-issue with valid session attribute.

ORA-01320: Invalid Logminer dictionary attribute

Cause: A Logminer dictionary attribute was supplied which is invalid.

Action: Re-issue with valid dictionary attribute.

ORA-01321: No Logminer Dictionary for requested start SCN

Cause: The requested session start SCN is less than the SCN of any available Logminer Dictionary build. It is not possible to unwind a Logminer Dictionary to the requested start SCN.

Action: Re-issue the start_logminer request with a start SCN for which a Logminer Dictionary is available.

ORA-01322: No such table

Cause: An non-existent table was supplied to Logminer include_src_tbl() or exclude_src_table().

Action: Re-issue with valid table name.

ORA-01323: Invalid state

Cause: A Logminer routine was called from the wrong state.

Action: n/a

ORA-01324: cannot add file <varname>string</varname> due to DB_ID mismatch

Cause: The logfile is produced by a different database than other logfiles already added to the list.

Action: Specify a logfile produced by the same database.

ORA-01325: archive log mode must be enabled to build into the logstream

Cause: Database does not have archivelog mode enabled.

Action: Mount the database, then issue commands to enable archivelog mode. startup pfile=init.ora mount alter database archivelog alter database open

ORA-01326: compatability of 9.0 or greater required to build into the logstream

Cause: Compatibility mode set to some value less than 9.0

Action: Ensure that init.ora parameter establishing a compatability of 9.0 or greater is set. For example: compatible=9.0.0.0.0

ORA-01327: failed to exclusively lock system dictionary as required by build

Cause: Other users are performing DDL operations.

Action: n/a

ORA-01328: only one build operation may occur at one time

Cause: Another processes is simultaneously attempting to run build();

Action: Wait until the other processes completes.

ORA-01329: unable to truncate required build table

Cause: The table may be missing, or locked by another user.

Action: n/a

ORA-01330: problem loading a required build table**ORA-01331: general error while running build****ORA-01332: internal Logminer Dictionary error**

Cause: Unexpected error condition

Action: Check trace and/or alert logs

ORA-01333: failed to establish Logminer Dictionary

Cause: No previously established Logminer Dictionary is available and a complete gather of a source system data dictionary was not found in the logstream. build() may

not have been run to force the gathering of a source system data dictionary. Or `add_log_file()` may not have been called to add all log files which contain the complete gathered system data dictionary.

Action: If `build()` was not employed prior to this mining session the Logminer Ad Hoc user may elect to employ an alternate dictionary such as the current system catalog or a previously built flat file dictionary. Other Logminer clients must run `build()` prior to mining. If `build()` has been run, ensure that all logfiles which comprise the gathered system dictionary have been added. The following query, run on the system which `build()` was run, can be helpful in identifying the required files. `select DICTIONARY_BEGIN, DICTIONARY_END, name from v$archived_log;` Minimally a set of files beginning with one which has `DICTIONARY_BEGIN = 'YES'` and all following log files through one marked `DICTIONARY_END = 'YES'` must be added.

ORA-01334: invalid or missing logminer dictionary processes context

Cause: Unexpected internal error condition

Action: n/a

ORA-01335: feature not yet implemented

ORA-01336: specified dictionary file cannot be opened

Cause: The dictionary file or directory does not exist or is inaccessible.

Action: Make sure that the dictionary file and directory exist and are accessible.

ORA-01337: log file has a different compatibility version

Cause: The logfile has a different compatibility version than the rest of the logfile in the session"

Action: Make sure that the logfile has the same compatibility version as the rest of the logfiles in the session.

ORA-01338: Other process is attached to LogMiner session

Cause: Can not do this when other process is attached to LogMiner session.

Action: n/a

ORA-01339: LogMiner BUILD: Error copying system catalog metadata to LogMiner dictionary

Cause: Unexpected result while accessing system catalog metadata.

Action: Check the alert log.

ORA-01340: NLS error

Cause: Could not load NLS package.

Action: n/a

ORA-01341: LogMiner out-of-memory

Cause: The LogMiner session requires more system resources than is currently available.

Action: Allocate more SGA for LogMiner.

ORA-01342: LogMiner can not resume session due to inability of staging checkpointed data

Cause: Logmnr can not resume session because there is not enough SGA memory available to read in checkpointed data. Logminer periodically checkpoints data to enable faster crash recovery.

Action: Specify a bigger max_sga for the given LogMiner session and try again.

ORA-01343: LogMiner encountered corruption in the logstream

Cause: Log file is missing a range of scn values.

Action: Verify the contiguity of the scn range represented by the log files added to LogMiner.

ORA-01344: LogMiner coordinator already attached

Cause: A coordinator process is already attached to the specified logminer context.

Action: Detach from the active coordinator session and retry the attach.

ORA-01345: Must be a LogMiner coordinator process

Cause: A LogMiner client attempted to perform a privileged operation.

Action: Issue the operation from the coordinator process.

ORA-01346: Oracle LogMiner processed redo beyond primary reset log SCN <varname>string</varname>

Cause: Oracle LogMiner detected a new branch with reset log SCN information prior to redo already mined.

Action: If running inside SQL Apply, retrieve standby reset SCN by executing DBMS_LOGSTDBY.MAP_PRIMARY_SCN (primary reset log SCN). And, execute FLASHBACK STANDBY DATABASE [<database_name>] TO BEFORE SCN <varname>standby reset SCN</varname>. Note: If the primary reset log SCN is 0, then intermediary log files are missing. Check the primary database for missing log files. In other scenarios, contact Oracle Support Services.

ORA-01347: Supplemental log data no longer found

Cause: The source database instance producing log files for this LogMiner session was altered to no longer log supplemental data.

Action: Destroy this Logminer session. Re-enable supplemental log data on the source system and create a new LogMiner session.

ORA-01348: LogMiner testing event**ORA-01349: LogMiner tracing event****ORA-01350: must specify a tablespace name**

Cause: Invocation failed to specify a valid tablespace

Action: Reformat invocation of DBMS_LOGMNR_D.SET_TABLESPACE to include the name of a valid tablespace.

ORA-01351: tablespace given for Logminer dictionary does not exist

Cause: The tablespace name given as a parameter to DBMS_LOGMNR_D.SET_TABLESPACE does not exist.

Action: Check spelling of the tablespace name. If spelling is correct verify that the named tablespace has already been created.

DBMS_LOGMNR_D.SET_TABLESPACE does not create a tablespace.

ORA-01352: tablespace given for Logminer spill does not exist

Cause: The tablespace name given as the parameter to DBMS_LOGMNR_D.SET_TABLESPACE does not exist.

Action: Check spelling of the tablespace name. If spelling is correct verify that the named tablespace has already been created.

DBMS_LOGMNR_D.SET_TABLESPACE does not create a tablespace.

ORA-01353: existing Logminer session

Cause: An attempt was made to execute DBMS_LOGMNR_D.SET_TABLESPACE while a Logminer session(s) was active.

Action: First cause all Logminer sessions to be closed. A Logminer session can exist as a result of executing DBMS_LOGMNR.START_LOGMNR or as the result of using Oracle features such as Data Guard SQL Apply or Streams which use Logminer.

Next, execute DBMS_LOGMNR_D.SET_TABLESPACE.

ORA-01354: Supplemental log data must be added to run this command

Cause: An attempt was made to perform an operation that required that supplemental log data be enabled.

Action: Execute a command such as ALTER DATABASE ADD SUPPLEMENTAL LOG DATA; and then reissue the command that failed with this error.

ORA-01355: logminer tablespace change in progress

Cause: The tables used by logminer are in the process of being moved to another tablespace.

Action: Wait until the move is complete and try again.

ORA-01356: active logminer sessions found

Cause: Logminer sessions are currently active.

Action: End all logminer sessions and retry.

ORA-01358: LogMiner version is less than mined dictionary version

Cause: An attempt was made to mine a LogMiner dictionary from redo logs. The version of the Oracle database that created the logs was higher than the Oracle database version that attempted to mine the logs.

Action: Mine the logs using a newer version of the Oracle database having a version number that is equal to or greater than the dictionary version.

ORA-01360: invalid token

ORA-01361: global name mismatch

Cause: The database global name where the log file was generated did not match the user-specified global name of the Streams Capture process.

Action: Start a new capture process and ensure that the user-specified global name matches that of the database that generated the log file.

ORA-01362: Specified SQL_REDO_UNDO parameter is invalid

Cause: The specified input value for the parameter was not a valid number.

Action: Specify a valid number and try again.

ORA-01363: Specified COLUMN_NAME parameter is NULL

Cause: NULL was specified for input value of parameter.

Action: Specify a non-NULL value and try again.

ORA-01364: waiting for branch at SCN <varname>string</varname>

Cause: LogMiner reader process has completed mining of physical standby terminal logs up to the stop SCN. LogMiner reader is now waiting for logs from the new branch.

Action: No action necessary. This informational statement is provided to record the event for diagnostic purposes. If there is a problem with log transport, the files can be registered manually using the ALTER DATABASE REGISTER LOGICAL LOGFILE statement.

ORA-01365: waiting for new branch registration

Cause: LogMiner reader process has completed mining of physical standby terminal logs up to the stop SCN. The builder process is now waiting for logs from the new branch to be registered before continuing.

Action: No action necessary. This informational statement is provided to record the event for diagnostic purposes. If there is a problem with log transport, the files may be registered manually using the ALTER DATABASE REGISTER LOGICAL LOGFILE statement.

ORA-01366: failed to find redo logs required for terminal apply

Cause: LogMiner failed to find all the expected log files required to complete the terminal apply, requested using the FINISH APPLY clause. During terminal apply, LogMiner does not wait for logs to be registered. It expects all logs between the starting point and the last log on any redo branch that it will or could mine through, to be present at the mining site.

Action: Examine system.logmnr_log\$ to see which logs are known to LogMiner. Then, locate or restore any missing logs and use the ALTER DATABASE REGISTER LOGICAL LOGFILE statement to register them. Alternatively, do not use the FINISH APPLY clause, but if activating a logical standby, only do this when you are sure that the missing log files can not be located and registered as this can lead to data loss.

ORA-01370: Specified restart SCN is too old

Cause: specified restart scn is too old, logmnr could not find a proper checkpoint.

Action: Specify a bigger restart SCN to try again

ORA-01371: Complete LogMiner dictionary not found

Cause: One or more log files containing the LogMiner dictionary was not found.

Action: Add into LogMiner all log files containing the dictionary.

ORA-01372: Insufficient processes for specified LogMiner operation

Cause: The number of processes requested by the caller can not be allocated

Action: Increase number of parallel servers allocated to the instance

ORA-01373: insufficient memory for staging persistent LogMiner session

Cause: The maximum number of concurrent persistent LogMiner sessions allowed is limited by LOGMNR_MAX_PERSISTENT_SESSIONS parameter. Not enough memory has been set aside at instance startup to allocate the new LogMiner session.

Action: Increase LOGMNR_MAX_PERSISTENT_SESSIONS and restart instance.

ORA-01374: _log_parallelism_max greater than 1 not supported in this release

Cause: LogMiner does not mine redo records generated with _log_parallelism_max set to a value greater than 1.

Action: n/a

ORA-01375: Corrupt logfile <varname>string</varname> recovered

Cause: A corrupt logfile has been recovered by RFS

Action: None. Logical Standby should automatically restart. If logfile is still corrupt, may need to manually copy and reregister the logfile on the standby.

ORA-01376: LogMiner testing event

ORA-01377: Invalid log file block size

Cause: An invalid value was specified in the BLOCKSIZE clause.

Action: Use correct syntax.

ORA-01378: The logical block size (<varname>string</varname>) of file <varname>string</varname> is not compatible with the disk sector size (media sector size is <varname>string</varname> and host sector size is <varname>string</varname>)

Cause: One of the following occurred: (1) An attempt was made to create a file. (2) A file was moved to disks with different sector size.

Action: Create file or move file to the proper disk.

ORA-01379: LogMiner testing event

ORA-01380: Instance <varname>string</varname> (thread <varname>string</varname>) has less than two <varname>string</varname> block size log files

Cause: One of the following occurred: (1) An attempt was made to switch to specified block size logs for all threads. (2) An attempt was made to open a thread.

Action: Add log files to the thread that signals error, and try again.

ORA-01381: Dropping log <varname>string</varname> would leave less than two log files with block size <varname>string</varname> for instance <varname>string</varname> (thread <varname>string</varname>)

Cause: The database was migrated to use a specified log block size. Dropping all the logs specified would leave fewer than the required two log files with the specified block size per enabled thread.

Action: Either drop fewer logs or disable the thread before deleting the logs. It may be possible to clear the log rather than drop it.

ORA-01382: Thread <varname>string</varname> failed to open log file <varname>string</varname>. The log file's block size (<varname>string</varname>) is larger than the disk sector size (<varname>string</varname>)

Cause: Log file was created on bigger sector disks, and moved to smaller sector disks.

Action: Move the log file back to bigger sector disks.

ORA-01383: Thread <varname>string</varname> failed to open <varname>string</varname> block size log file '<varname>string</varname>' on <varname>string</varname> sector native-mode disks

Cause: Log file was copied from smaller sector disks to larger sector native-mode disks.

Action: Move the log file back to smaller sector disks.

ORA-01398: LogMiner public event

ORA-01399: LogMiner public event

ORA-01400: cannot insert NULL into (<varname>string</varname>)

Cause: An attempt was made to insert NULL into previously listed objects.

Action: These objects cannot accept NULL values.

ORA-01401: inserted value too large for column

Cause: The value inserted was too large for the given column.

Action: Do not insert a value greater than what the column can hold.

ORA-01402: view WITH CHECK OPTION where-clause violation

ORA-01403: no data found

Cause: No data was found from the objects.

Action: There was no data from the objects which may be due to end of fetch.

ORA-01404: ALTER COLUMN will make an index too large

ORA-01405: fetched column value is NULL

ORA-01406: fetched column value was truncated

Cause: The fetched column values were truncated.

Action: Use the right data types to avoid truncation.

ORA-01407: cannot update (<varname>string</varname>) to NULL

ORA-01408: such column list already indexed

ORA-01409: NOSORT option may not be used; rows are not in ascending order

Cause: Creation of index with NOSORT option when rows were not ascending. For non-unique indexes the rowid is considered part of the index key. Therefore, if you create an index nosort and two of the rows in the table have the same key and are stored in ascending order, but get split accross two extents where the dba of the first block in the second extent is less than the dba of the last block in the first extent, then the create index nosort may fail.

Action: Create the index without the NOSORT option, or ensure table is stored in one extent.

ORA-01410: invalid ROWID

ORA-01411: cannot store the length of column in the indicator

Cause: Tried to fetch a column of size more than 64K and couldn't store the length of the column in the given indicator of size 2 bytes.

Action: Use the new bind type with call backs to fetch the long column.

ORA-01412: zero length not allowed for this datatype

Cause: The length for type 97 is 0

Action: Specify the correct length.

ORA-01413: illegal value in packed decimal number buffer

Cause: The user buffer bound by the user as packed decimal number contained an illegal value.

Action: Use a legal value.

ORA-01414: invalid array length when trying to bind array

Cause: An attempt was made to bind an array without either a current array length pointer or a zero maximum array length.

Action: Sepcify a valid length.

ORA-01415: too many distinct aggregate functions

Cause: The query contains more distinct aggregates than can be processed. The current limit is 255.

Action: Reduce the number of distinct aggregate functions in the query.

ORA-01416: two tables cannot be outer-joined to each other

ORA-01417: a table may be outer joined to at most one other table

Cause: a.b (+) = b.b and a.c (+) = c.c is not allowed

Action: Check that this is really what you want, then join b and c first in a view.

ORA-01418: specified index does not exist

ORA-01419: datdts: illegal format code

ORA-01420: datstd: illegal format code

ORA-01421: datrnd/dattrn: illegal precision specifier

ORA-01422: exact fetch returns more than requested number of rows

Cause: The number specified in exact fetch is less than the rows returned.

Action: Rewrite the query or change number of rows requested

ORA-01423: error encountered while checking for extra rows in exact fetch

ORA-01424: missing or illegal character following the escape character

Cause: The character following the escape character in LIKE pattern is missing or not one of the escape character, '%', or '_'.

Action: Remove the escape character or specify the missing character.

ORA-01425: escape character must be character string of length 1

Cause: Given escape character for LIKE is not a character string of length 1.

Action: Change it to a character string of length 1.

ORA-01426: numeric overflow

Cause: Evaluation of an value expression causes an overflow/underflow.

Action: Reduce the operands.

ORA-01427: single-row subquery returns more than one row**ORA-01428: argument '<varname>string</varname>' is out of range****ORA-01429: Index-Organized Table: no data segment to store overflow row-pieces**

Cause: No overflow segment defined.

Action: Add overflow segment.

ORA-01430: column being added already exists in table**ORA-01431: internal inconsistency in GRANT command****ORA-01432: public synonym to be dropped does not exist****ORA-01433: synonym to be created is already defined****ORA-01434: private synonym to be dropped does not exist****ORA-01435: user does not exist****ORA-01436: CONNECT BY loop in user data****ORA-01437: cannot have join with CONNECT BY****ORA-01438: value larger than specified precision allowed for this column**

Cause: When inserting or updating records, a numeric value was entered that exceeded the precision defined for the column.

Action: Enter a value that complies with the numeric column's precision, or use the MODIFY option with the ALTER TABLE command to expand the precision.

ORA-01439: column to be modified must be empty to change datatype**ORA-01440: column to be modified must be empty to decrease precision or scale****ORA-01441: cannot decrease column length because some value is too big****ORA-01442: column to be modified to NOT NULL is already NOT NULL**

ORA-01443: internal inconsistency; illegal datatype in resultant view column

ORA-01444: internal inconsistency; internal datatype maps to invalid external type

ORA-01445: cannot select ROWID from, or sample, a join view without a key-preserved table

ORA-01446: cannot select ROWID from, or sample, a view with DISTINCT, GROUP BY, etc.

ORA-01447: ALTER TABLE does not operate on clustered columns

ORA-01448: index must be dropped before changing to desired type

ORA-01449: column contains NULL values; cannot alter to NOT NULL

ORA-01450: maximum key length (<varname>string</varname>) exceeded

ORA-01451: column to be modified to NULL cannot be modified to NULL

Cause: the column may already allow NULL values, the NOT NULL constraint is part of a primary key or check constraint.

Action: if a primary key or check constraint is enforcing the NOT NULL constraint, then drop that constraint.

ORA-01452: cannot CREATE UNIQUE INDEX; duplicate keys found

ORA-01453: SET TRANSACTION must be first statement of transaction

Cause: self-evident

Action: commit (or rollback) transaction, and re-execute

ORA-01454: cannot convert column into numeric datatype

ORA-01455: converting column overflows integer datatype

ORA-01456: may not perform insert/delete/update operation inside a READ ONLY transaction

Cause: A non-DDL insert/delete/update or select for update operation was attempted

Action: commit (or rollback) transaction, and re-execute

ORA-01457: converting column overflows decimal datatype

ORA-01458: invalid length inside variable character string

ORA-01459: invalid length for variable character string

ORA-01460: unimplemented or unreasonable conversion requested

ORA-01461: can bind a LONG value only for insert into a LONG column

ORA-01462: cannot insert string literals longer than 4000 characters

ORA-01463: cannot modify column datatype with current constraint(s)

Cause: An attempt was made to modify the datatype of column which has referential constraints; or has check constraints which only allows changing the datatype from CHAR to VARCHAR or vice versa.

Action: Remove the constraint(s) or do not perform the offending operation.

ORA-01464: circular grant (granting to grant ancestor) of table or view**ORA-01465: invalid hex number****ORA-01466: unable to read data - table definition has changed**

Cause: Query parsed after tbl (or index) change, and executed w/old snapshot

Action: commit (or rollback) transaction, and re-execute

ORA-01467: sort key too long**ORA-01468: a predicate may reference only one outer-joined table****ORA-01469: PRIOR can only be followed by a column name**

Cause: Attempting to specify "PRIOR <varname>something</varname>" where <varname>something</varname> is not a column name.

Action: Only a column name can follow PRIOR. Replace with a column name.

ORA-01470: In-list iteration does not support mixed operators

Cause: Constants of different types are specified in an in-list.

Action: Use constants of same type for in-lists.

ORA-01471: cannot create a synonym with same name as object**ORA-01472: cannot use CONNECT BY on view with DISTINCT, GROUP BY, etc.****ORA-01473: cannot have subqueries in CONNECT BY clause****ORA-01474: cannot have START WITH or PRIOR without CONNECT BY****ORA-01475: must reparse cursor to change bind variable datatype****ORA-01476: divisor is equal to zero****ORA-01477: user data area descriptor is too large****ORA-01478: array bind may not include any LONG columns**

Cause: User is performing an array bind with a bind variable whose maximum size is greater than 2000 bytes.

Action: Such bind variables cannot participate in array binds. Use an ordinary bind operation instead.

ORA-01479: last character in the buffer is not Null

Cause: A bind variable of type 97 does not contain null at the last position

Action: Make the last character null

ORA-01480: trailing null missing from STR bind value

Cause: A bind variable of type 5 (null-terminated string) does not contain the terminating null in its buffer.

Action: Terminate the string with a null character

ORA-01481: invalid number format model

Cause: The user is attempting to either convert a number to a string via TO_CHAR or a string to a number via TO_NUMBER and has supplied an invalid number format model parameter.

Action: Consult your manual.

ORA-01482: unsupported character set

Cause: The character set used to perform the operation, such as the CONVERT function, is not a supported character set.

Action: Use one of the supported character sets.

ORA-01483: invalid length for DATE or NUMBER bind variable

Cause: A bind variable of type DATE or NUMBER is too long.

Action: Consult your manual for the maximum allowable length.

ORA-01484: arrays can only be bound to PL/SQL statements

Cause: You tried to bind an array to a non-PL/SQL statement.

Action: n/a

ORA-01485: compile bind length different from execute bind length

Cause: You bound a buffer of type DTYVCS (VARCHAR with the two byte length in front) and at execute time the length in the first two bytes is more than the maximum buffer length (given in the bind call). The number of elements in the array and the current number of elements in the array cannot be more than the maximum size of the array.

Action: n/a

ORA-01486: size of array element is too large

Cause: You tried to bind a data value which was either too large for the datatype (for example, NUMBER) or was greater than 4000 bytes (for example, VARCHAR or LONG).

Action: n/a

ORA-01487: packed decimal number too large for supplied buffer

Cause: An impossible request for decimal to oracle number conversion was made

Action: This conversion cannot be performed

ORA-01488: invalid nibble or byte in the input data

Cause: An impossible request for decimal to oracle number conversion was made

Action: This conversion cannot be performed

ORA-01489: result of string concatenation is too long

Cause: String concatenation result is more than the maximum size.

Action: Make sure that the result is less than the maximum size.

ORA-01490: invalid ANALYZE command

Cause: Incorrect syntax specified

Action: Retry the command

ORA-01491: CASCADE option not valid

Cause: The CASCADE option is only valid for tables or clusters.

Action: Do not specify CASCADE

ORA-01492: LIST option not valid

Cause: The LIST option is only valid for tables or clusters.

Action: Do not specify LIST

ORA-01493: invalid SAMPLE size specified

Cause: The specified SAMPLE size is out of range

Action: Specify a value within the proper range.

ORA-01494: invalid SIZE specified

Cause: The specified histogram SIZE value was out of range.

Action: Specify a value within the proper range.

ORA-01495: specified chain row table not found

Cause: The specified table either does not exist or user does not have the proper privileges.

Action: Specify the correct table to use.

ORA-01496: specified chain row table form incorrect

Cause: The specified table does not have the proper field definitions.

Action: Specify the correct table to use.

ORA-01497: illegal option for ANALYZE CLUSTER

Cause: The FOR COLUMNS <varname>column-list</varname> clause may not be used with ANALYZE CLUSTER.

Action: Retry with a legal syntax.

ORA-01498: block check failure - see trace file**ORA-01499: table/index cross reference failure - see trace file**

ORA-01500 to ORA-02099

ORA-01500: failure in getting date/time

Cause: During create database or alter tablespace, there was a failure in getting the date and time.

Action: Contact your customer support representative.

ORA-01501: CREATE DATABASE failed

Cause: An error occurred during create database

Action: See accompanying errors.

ORA-01502: index '<varname>string</varname>.<varname>string</varname>' or partition of such index is in unusable state

Cause: An attempt has been made to access an index or index partition that has been marked unusable by a direct load or by a DDL operation

Action: DROP the specified index, or REBUILD the specified index, or REBUILD the unusable index partition

ORA-01503: CREATE CONTROLFILE failed

Cause: An error occurred during CREATE CONTROLFILE

Action: See accompanying errors.

ORA-01504: database name '<varname>string</varname>' does not match parameter db_name '<varname>string</varname>'

Cause: The name in a database create or mount does not match the name given in the INIT.ORA parameter db_name.

Action: correct or omit one of the two names.

ORA-01505: error in adding log files

Cause: During create or alter database, error(s) occurred when adding new log files.

Action: Check error stack for detailed error information.

ORA-01506: missing or illegal database name

Cause: No db_name INIT.ORA parameter was specified.

Action: The database name must be given in the db_name INIT.ORA parameter.

ORA-01507: database not mounted

Cause: A command was attempted that requires the database to be mounted.

Action: If you are using the ALTER DATABASE statement via the SQLDBA startup command, specify the MOUNT option to startup; else if you are directly doing an ALTER DATABASE DISMOUNT, do nothing; else specify the MOUNT option to ALTER DATABASE. If you are doing a backup or copy, you must first mount the

desired database. If you are doing a FLASHBACK DATABASE, you must first mount the desired database.

ORA-01508: cannot create database; error in file '<varname>string</varname>' at line <varname>string</varname>

Cause: CREATE DATABASE was unable to process the specified file.

Action: Check the offending line in the specified file.

ORA-01509: specified name '<varname>string</varname>' does not match actual '<varname>string</varname>'

Cause: The database name specified in ALTER DATABASE does not match the name of the currently mounted database.

Action: Correct the database name spelling or DISMOUNT the mounted database.

ORA-01510: error in deleting log files

Cause: During ALTER DATABASE, an error occurred while dropping log files.

Action: Check the error stack for detailed error information.

ORA-01511: error in renaming log/data files

Cause: An error occurred during the ALTER DATABASE RENAME FILE command.

Action: Check the error stack for detailed error information.

ORA-01512: error renaming log file <varname>string</varname> - new file <varname>string</varname> not found

Cause: An attempt to change a log file's name in the control file failed because no file was found with the new name.

Action: Make sure that the log file has been properly renamed by the operating system and retry.

ORA-01513: invalid current time returned by operating system

Cause: The operating system returned a time that was not between 1988 and 2121.

Action: Correct the time kept by the operating system.

ORA-01514: error in log specification: no such log

Cause: A log file name, or list of member names, did not correspond to an existing log.

Action: Specify an existing log file.

ORA-01515: error dropping log group <varname>string</varname>: no such log

Cause: ALTER DATABASE is attempting to drop a log file which is not known to the database control file.

Action: Specify the name of an existing log file.

ORA-01516: nonexistent log file, data file, or temporary file "<varname>string</varname>"

Cause: An attempt was made to use ALTER DATABASE to rename a log file, data file, or temporary file; or to change attributes of a data file or temporary file (for example, resize, autoextend, online or offline); or to re-create or move a data file. The

attempt failed because the specified file is not known to the database's control file or is not of a type supported by the request.

Action: Specify the name or number of an existing file of the correct type, as appropriate. Check the relevant V\$ table for a list of possible files.

ORA-01517: log member: '<varname>string</varname>'

Cause: Used to print member names

Action: See top level error for information

ORA-01518: CREATE DATABASE must specify more than one log file

Cause: Only one log file was specified in the CREATE DATABASE statement.

Action: Specify at least two log files.

ORA-01519: error while processing file '<varname>string</varname>' near line <varname>string</varname>

Cause: CREATE DATABASE encountered a problem while processing specified file. The specified file is bad.

Action: Retry your system installation procedure or contact your customer support representative.

ORA-01520: number of data files to add (<varname>string</varname>) exceeds limit of <varname>string</varname>

Cause: CREATE TABLESPACE statement specifies more files than is permitted for this database.

Action: Use fewer files or re-create the database with a larger value of MAXDATAFILES.

ORA-01521: error in adding data files

Cause: During CREATE or ALTER TABLESPACE, an error was detected while adding data files.

Action: Check the error stack for detailed error information.

ORA-01522: file '<varname>string</varname>' to be renamed does not exist

Cause: During ALTER TABLESPACE RENAME, a file to be renamed was not found in the database control file.

Action: Specify the correct file name.

ORA-01523: cannot rename data file to '<varname>string</varname>' - file already part of database

Cause: During ALTER DATABASE RENAME or ALTER TABLESPACE RENAME, the new name of a file is already present in the control file.

Action: Rename the file to a name not already being used as part of the database.

ORA-01524: cannot create data file as '<varname>string</varname>' - file already part of database

Cause: During ALTER DATABASE CREATE DATAFILE, the new name of a file is already present in the control file.

Action: Create the file as a name not already being used as part of the database.

ORA-01525: error in renaming data files

Cause: An error occurred when renaming files as part of ALTER TABLESPACE.

Action: Check the error stack for detailed information. All files are renamed except for those mentioned in the error stack.

ORA-01526: error in opening file '<varname>string</varname>'

Cause: CREATE DATABASE was not able to open the specified file. This is probably due to a system installation error.

Action: Retry your system installation procedure or contact your customer support representative.

ORA-01527: error while reading file

Cause: CREATE DATABASE was not able to read the specified file. This is probably due to a system installation error.

Action: Retry your system installation procedure or contact your customer support representative.

ORA-01528: EOF while processing SQL statement

Cause: CREATE DATABASE unexpectedly hit EOF while reading the specified file. The sql.bsq file is bad.

Action: Retry your system installation procedure or contact your customer support representative.

ORA-01529: error closing file '<varname>string</varname>'

Cause: CREATE DATABASE was not able to close the specified file.

Action: Retry your system installation procedure or contact your customer support representative.

ORA-01530: a database already mounted by the instance

Cause: During ALTER DATABASE MOUNT, an attempt is being made to mount a database on an instance in which a database is or has previously been mounted.

Action: If you wish to mount the database, shutdown the instance and then startup the instance and retry the operation.

ORA-01531: a database already open by the instance

Cause: During ALTER DATABASE, an attempt was made to open a database on an instance for which there is already an open database.

Action: If you wish to open a new database on the instance, first shutdown the instance and then startup the instance and retry the operation.

ORA-01532: cannot create database; instance being started elsewhere

Cause: During CREATE DATABASE, another user appears to be simultaneously altering the instance.

Action: Make sure no one else is simultaneously altering the instance. If no one is, contact your customer support representative; otherwise, retry the operation.

ORA-01533: cannot rename file '<varname>string</varname>'; file does not belong to tablespace

Cause: During ALTER TABLESPACE RENAME, a file to be renamed was not found in the argument tablespace.

Action: Specify the correct file name or the correct tablespace name.

ORA-01534: rollback segment '<varname>string</varname>' doesn't exist

Cause: During ALTER or DROP ROLLBACK SEGMENT, the specified rollback segment name is unknown.

Action: Use the correct rollback segment name.

ORA-01535: rollback segment '<varname>string</varname>' already exists or given name has prefix _SYSSMU

Cause: Specified rollback segment already exists or given name starts with _SYSSMU.

Action: Use a different name. Note that _SYSSMU is an illegal prefix to an RBU segment.

ORA-01536: space quota exceeded for tablespace '<varname>string</varname>'

Cause: The space quota for the segment owner in the tablespace has been exhausted and the operation attempted the creation of a new segment extent in the tablespace.

Action: Either drop unnecessary objects in the tablespace to reclaim space or have a privileged user increase the quota on this tablespace for the segment owner.

ORA-01537: cannot add file '<varname>string</varname>' - file already part of database

Cause: During CREATE or ALTER TABLESPACE, a file being added is already part of the database.

Action: Use a different file name.

ORA-01538: failed to acquire any rollback segment

Cause: Failed to acquire any rollback segment during startup in shared mode

Action: Startup in exclusive mode to create one more public segment or specify available private segments in the INIT.ORA parameter rollback_segments_required, then startup in shared mode

ORA-01539: tablespace '<varname>string</varname>' is not online

Cause: Failed to either make a tablespace read-only or offline because it is not online. A tablespace must be online before it can become read-only or offline normal.

Action: Check the status of the tablespace. Use IMMEDIATE or TEMPORARY options to force all files offline. Bring the tablespace online before making it read-only.

ORA-01540: tablespace '<varname>string</varname>' is not offline

Cause: Failed to bring a tablespace online because it is not offline

Action: Check the status of the tablespace

ORA-01541: system tablespace cannot be brought offline; shut down if necessary

Cause: Tried to bring system tablespace offline

Action: Shutdown if necessary to do recovery

ORA-01542: tablespace '<varname>string</varname>' is offline, cannot allocate space in it

Cause: Tried to allocate space in an offline tablespace

Action: Bring the tablespace online or create the object in other tablespace

ORA-01543: tablespace '<varname>string</varname>' already exists

Cause: Tried to create a tablespace which already exists

Action: Use a different name for the new tablespace

ORA-01544: cannot drop system rollback segment

Cause: Tried to drop system rollback segment

Action: None

ORA-01545: rollback segment '<varname>string</varname>' specified not available

Cause: Either: 1) An attempt was made to bring a rollback segment online that is unavailable during startup; for example, the rollback segment is in an offline tablespace. 2) An attempt was made to bring a rollback segment online that is already online. This is because the rollback segment is specified twice in the ROLLBACK_SEGMENTS parameter in the initialization parameter file or the rollback segment is already online by another instance. 3) An attempt was made to drop a rollback segment that is currently online. 4) An attempt was made to alter a rollback segment that is currently online to use unlimited extents. 5) An attempt was made to online a rollback segment that is corrupted. This is because the rollback is specified in _corrupted_rollback_segments parameter in initialization parameter file.

Action: Either: 1) Make the rollback segment available; for example, bring an offline tablespace online. 2) Remove the name from the ROLLBACK_SEGMENTS parameter if the name is a duplicate or if another instance has already acquired the rollback segment. 3) Bring the rollback segment offline first. This may involve waiting for the active transactions to finish, or, if the rollback segment needs recovery, discover which errors are holding up the rolling back of the transactions and take appropriate actions. 4) Same as 3). 5) Remove the name from the _corrupted_rollback_segments parameter.

ORA-01546: tablespace contains active rollback segment '<varname>string</varname>'

Cause: Tried to make a tablespace that contains active rollback segment(s) offline or read-only

Action: Shutdown instances that use the active rollback segments in the tablespace and then make the tablespace offline or read-only

ORA-01547: warning: RECOVER succeeded but OPEN RESETLOGS would get error below

Cause: Media recovery with one of the incomplete recovery options ended without error. However, if the ALTER DATABASE OPEN RESETLOGS command were

attempted now, it would fail with the specified error. The most likely cause of this error is forgetting to restore one or more datafiles from a sufficiently old backup before executing the incomplete recovery.

Action: Rerun the incomplete media recovery using different datafile backups, a different control file, or different stop criteria.

ORA-01548: active rollback segment '<varname>string</varname>' found, terminate dropping tablespace

Cause: Tried to drop a tablespace that contains active rollback segment(s)

Action: Shutdown instances that use the active rollback segments in the tablespace and then drop the tablespace

ORA-01549: tablespace not empty, use INCLUDING CONTENTS option

Cause: Tried to drop a non-empty tablespace

Action: To drop all the objects in the tablespace, use the INCLUDING CONTENTS option

ORA-01550: cannot drop system tablespace

Cause: Tried to drop system tablespace

Action: None

ORA-01551: extended rollback segment, pinned blocks released

Cause: Doing recursive extent of rollback segment, trapped internally by the system

Action: None

ORA-01552: cannot use system rollback segment for non-system tablespace '<varname>string</varname>'

Cause: Tried to use the system rollback segment for operations involving non-system tablespace. If this is a clone database then this will happen when attempting any data modification outside of the system tablespace. Only the system rollback segment can be online in a clone database.

Action: Create one or more private/public segment(s), shutdown and then startup again. May need to modify the INIT.ORA parameter rollback_segments to acquire private rollback segment. If this is a clone database being used for tablespace point in time recovery then this operation is not allowed. If the non-system tablespace has AUTO segment space management, then create an undo tablespace.

ORA-01553: MAXEXTENTS must be no smaller than the <varname>string</varname> extents currently allocated

Cause: The number of extents allocated is greater than the MAXEXTENTS specified.

Action: Specify a larger MAXEXTENTS value.

ORA-01554: transaction concurrency limit reached reason:<varname>string</varname> params:<varname>string</varname>, <varname>string</varname>

Cause: Too many concurrent transactions

Action: Shutdown the system, modify the INIT.ORA parameters transactions, rollback_segments or rollback_segments_required, then startup again.

ORA-01555: snapshot too old: rollback segment number <varname>string</varname> with name "<varname>string</varname>" too small

Cause: rollback records needed by a reader for consistent read are overwritten by other writers

Action: If in Automatic Undo Management mode, increase undo_retention setting. Otherwise, use larger rollback segments

ORA-01556: MINEXTENTS for rollback segment must be greater than 1

Cause: Specified MINEXTENTS of less than 2 for rollback segment

Action: Specify larger MINEXTENTS

ORA-01557: rollback segment extents must be at least <varname>string</varname> blocks

Cause: Specified extent of less than minimum size for rollback segment

Action: Specify larger extents

ORA-01558: out of transaction ID's in rollback segment <varname>string</varname>

Cause: All the available transaction id's have been used

Action: Shutdown the instance and restart using other rollback segment(s), then drop the rollback segment that has no more transaction id's.

ORA-01559: MAXEXTENTS for rollback segment must be greater than 1

Cause: Specified MAXEXTENTS of less than 2 for rollback segment

Action: Specify larger MAXEXTENTS

ORA-01560: LIKE pattern contains partial or illegal character

Cause: like pattern is not formed correctly

Action: make sure like pattern is specified correctly

ORA-01561: failed to remove all objects in the tablespace specified

Cause: Failed to remove all objects when dropping a tablespace

Action: Retry the drop tablespace until all objects are dropped

ORA-01562: failed to extend rollback segment number <varname>string</varname>

Cause: Failure occurred when trying to extend rollback segment

Action: This is normally followed by another error message that caused the failure. You may take the rollback segment offline to perform maintenance. Use the alter rollback segment offline command to take the rollback segment offline.

ORA-01563: rollback segment is PUBLIC, need to use the keyword PUBLIC

Cause: Did not use the keyword PUBLIC to identified public rollback segment

Action: Use the keyword PUBLIC when identifying public rollback segment

ORA-01564: rollback segment is not PUBLIC

Cause: The rollback segment segment identified is not public

Action: Do not use the keyword PUBLIC when identifying private rollback segment

ORA-01565: error in identifying file '<varname>string</varname>'

Cause: An error occurred while trying to identify a file.

Action: Check the error stack for detailed information.

ORA-01566: file specified more than once in ALTER DATABASE

Cause: The list of files supplied to the command contained at least one duplicate.

Action: Remove the duplicate file specification and retry.

ORA-01567: dropping log <varname>string</varname> would leave less than 2 log files for instance <varname>string</varname> (thread <varname>string</varname>)

Cause: Dropping all the logs specified would leave fewer than the required two log files per enabled thread.

Action: Either drop fewer logs or disable the thread before deleting the logs. It may be possible to clear the log rather than drop it.

ORA-01568: cannot set space quota on PUBLIC

Cause: Trying to set space quota on a tablespace for PUBLIC.

Action: If trying to grant system-wide or tablespace-wide space privileges to all users, use GRANT RESOURCE [ON <varname>tablespace</varname>] TO PUBLIC.

ORA-01569: data file too small for system dictionary tables

Cause: The datafile specified during creation of the database is too small to hold the system dictionary tables.

Action: Recreate the database by specifying a larger file or more files.

ORA-01570: MINEXTENTS must be no larger than the <varname>string</varname> extents currently allocated

Cause: The number of extents allocated is smaller than the MINEXTENTS specified.

Action: Specify a smaller MINEXTENTS value.

ORA-01571: redo version <varname>string</varname> incompatible with ORACLE version <varname>string</varname>

Cause: This software version can not read the current redo logs, and either crash recovery is required or there are offline database files that need media recovery. If a file name is listed then it needs media recovery.

Action: Shutdown and startup using the compatible software. Do any required media recovery, and open the database. Shutdown and then startup using current software. If the file is going to be dropped then take it offline with the DROP option to skip this check.

ORA-01572: rollback segment '<varname>string</varname>' cannot be brought online, <varname>string</varname> extents exceeded

Cause: The number of extents in the rollback segment exceeds the hard limit. It cannot be brought online for writing.

Action: Drop and recreate the rollback segment.

ORA-01573: shutting down instance, no further change allowed

Cause: Some process tries to make changes while the db is being shutdown

Action: None

ORA-01574: maximum number of concurrent transactions exceeded

Cause: the limit on the number of concurrent transactions has been hit

Action: shutdown the system, increase the INIT.ORA parameter 'transactions' , and then restart the system.

ORA-01575: timeout waiting for space management resource

Cause: failed to acquire necessary resource to do space management.

Action: Retry the operation.

ORA-01576: The instance <varname>string</varname> is not enabled

Cause: The thread associated with instance is not enabled.

Action: Enable the thread associated with the instance using ALTER DATABASE ENABLE INSTANCE command.

ORA-01577: cannot add log file '<varname>string</varname>' - file already part of database

Cause: During CREATE or ALTER DATABASE, a file being added is already part of the database.

Action: Use a different file name.

ORA-01578: ORACLE data block corrupted (file # <varname>string</varname>, block # <varname>string</varname>)

Cause: The data block indicated was corrupt. This was a physical corruption, also called a media corruption. The cause is unknown but is most likely external to the database. If ORA-26040 is also signaled, the corruption is due to NOLOGGING or UNRECOVERABLE operations.

Action: The general method to repair a media corrupt block is to restore a backup and recover the backup. For databases in ARCHIVELOG mode, use block media recovery or media recovery. In some situations, you can also drop the segment and re-create it. For example, you can drop an index and re-create the index.

ORA-01579: write error occurred during recovery

Cause: A write error occurred during recovery

Action: Consult trace files for the nature of the write error, and correct error.

ORA-01580: error creating control backup file <varname>string</varname>

Cause: An operating system error occurred while attempting to create a control file backup.

Action: Check the error stack for more detailed information

ORA-01581: attempt to use rollback segment (<varname>string</varname>) new extent (<varname>string</varname>) which is being allocated

Cause: Undo generated to extend a rollback segment run out of current undo block space and is attempting to write into the new extent which has not been completely allocated.

Action: The rollback segment extending will be rolled back by the system, no more extension will be possible until the next extent is freed up by rolling back or committing other transactions.

ORA-01582: unable to open control file for backup

Cause: An operating system error occurred while attempting to open a control file for backup.

Action: Check the error stack for more detailed information

ORA-01583: unable to get block size of control file to be backed up

Cause: An operating system error occurred while attempting to get the block size of a control file for backup.

Action: Check the error stack for more detailed information

ORA-01584: unable to get file size of control file to be backed up

Cause: An operating system error occurred while attempting to get the file size of a control file for backup.

Action: Check the error stack for more detailed information

ORA-01585: error identifying backup file <varname>string</varname>

Cause: An operating system error occurred when attempting to identify the file to be used for control file backup.

Action: Check the error stack for more detailed information

ORA-01586: database must be mounted EXCLUSIVE and not open for this operation

Cause: Attempting to DROP DATABASE when the database is not mounted EXCLUSIVE.

Action: Mount the database in EXCLUSIVE mode.

ORA-01587: error during control file backup file copy

ORA-01588: must use RESETLOGS option for database open

Cause: An earlier attempt to open the database with the RESETLOGS option did not complete, or recovery was done with a control file backup, or a FLASHBACK DATABASE was done.

Action: Use the RESETLOGS option when opening the database.

ORA-01589: must use RESETLOGS or NORESETLOGS option for database open

Cause: Either incomplete or backup control file recovery has been performed. After these types of recovery you must specify either the RESETLOGS option or the NORESETLOGS option to open your database.

Action: Specify the appropriate option.

ORA-01590: number of segment free list (<varname>string</varname>) exceeds maximum of <varname>string</varname>

Cause: storage parameter FREELIST GROUPS is too large.

Action: Reduce storage parameters FREELIST GROUPS

ORA-01591: lock held by in-doubt distributed transaction <varname>string</varname>

Cause: Trying to access resource that is locked by a dead two-phase commit transaction that is in prepared state.

Action: DBA should query the pending_trans\$ and related tables, and attempt to repair network connection(s) to coordinator and commit point. If timely repair is not possible, DBA should contact DBA at commit point if known or end user for correct outcome, or use heuristic default if given to issue a heuristic commit or abort command to finalize the local portion of the distributed transaction.

ORA-01592: error converting Version 7 rollback segment (<varname>string</varname>) to Oracle 8 format

Cause: Look at the accompanying internal error; Version 7 database may not have shutdown cleanly.

Action: Investigate the internal error; may have to reload the Version 7 database (from backup) and shutdown the database cleanly.

ORA-01593: rollback segment optimal size (<varname>string</varname> blks) is smaller than the computed initial size (<varname>string</varname> blks)

Cause: Specified OPTIMAL size is smaller than the cumulative size of the initial extents during create rollback segment.

Action: Specify a larger OPTIMAL size.

ORA-01594: attempt to wrap into rollback segment (<varname>string</varname>) extent (<varname>string</varname>) which is being freed

Cause: Undo generated to free a rollback segment extent is attempting to write into the same extent due to small extents and/or too many extents to free

Action: The rollback segment shrinking will be rolled back by the system; increase the optimal size of the rollback segment.

ORA-01595: error freeing extent (<varname>string</varname>) of rollback segment (<varname>string</varname>)

Cause: Some error occurred while freeing inactive rollback segment extents.

Action: Investigate the accompanying error.

ORA-01596: cannot specify system in <varname>string</varname> parameter

Cause: The system rollback segment is specified in the INIT.ORA parameter referred to in the error message

Action: change the INIT.ORA parameter

ORA-01597: cannot alter system rollback segment online or offline

Cause: Tried to online or offline the system rollback segment

Action: None

ORA-01598: rollback segment '<varname>string</varname>' is not online

Cause: Could have been taken offline before by DBA or cleaned up by SMON.

Action: Check the status of rollback segment in undo\$ or dba_rollback_segs to make sure the rollback segment is actually online.

ORA-01599: failed to acquire rollback segment (<varname>string</varname>), cache space is full

Cause: the amount statically allocated is not enough based on max_rollback_segments parameter.

Action: For now take another rollback segment offline or increase the parameter max_rollback_segments

ORA-01600: at most one "<varname>string</varname>" in clause "<varname>string</varname>" of <varname>string</varname>

Cause: The INIT.ORA parameter was mis-specified.

Action: Correct the INIT.ORA parameter and restart the instance.

ORA-01601: illegal bucket size in clause "<varname>string</varname>" of <varname>string</varname>

Cause: The bucket size was invalid for this parameter.

Action: Correct the INIT.ORA parameter and restart the instance.

ORA-01603: illegal grouping size in clause "<varname>string</varname>" of <varname>string</varname>

Cause: The grouping size was invalid for this parameter.

Action: Correct the INIT.ORA parameter and restart the instance.

ORA-01604: illegal number range in clause "<varname>string</varname>" of <varname>string</varname>

Cause: The number range was invalid for this parameter.

Action: Correct the INIT.ORA parameter and restart the instance.

ORA-01605: missing numbers in clause "<varname>string</varname>" of <varname>string</varname>

Cause: The numbers were missing for this parameter.

Action: Correct the INIT.ORA parameter and restart the instance.

ORA-01606: parameter not identical to that of another mounted instance

Cause: A parameter was different on two instances.

Action: Modify the initialization parameter and restart.

ORA-01607: cannot add logfile to the specified instance

Cause: The limit on the number of instances supported by the control file has been reached.

Action: Use an instance name supported by the control file, or resize the thread record and/or checkpoint progress record sections of the control file.

ORA-01608: cannot bring rollback segment '<varname>string</varname>' online, its status is (<varname>string</varname>)

Cause: Could have been brought online before by DBA or left as a result of process crash.

Action: Check the status of rollback segment in undo\$ or dba_rollback_segs

ORA-01609: log <varname>string</varname> is the current log for thread <varname>string</varname> - cannot drop members

Cause: A member of the current log for a thread cannot be dropped.

Action: If the thread is opened, request a log switch by the instance that is using it. If it is not open, disable the thread, manually archive the log, or clear it.

ORA-01610: recovery using the BACKUP CONTROLFILE option must be done

Cause: Either an earlier database recovery session specified BACKUP CONTROLFILE, or the control file was recreated with the RESETLOGS option, or the control file being used is a backup control file. After that only BACKUP CONTROLFILE recovery is allowed and it must be followed by a log reset at the next database open.

Action: Perform recovery using the BACKUP CONTROLFILE option.

ORA-01611: thread number <varname>string</varname> is invalid - must be between 1 and <varname>string</varname>

Cause: A thread number in a command is greater than the number of threads supported by the control file.

Action: Use a thread number that is valid, or resize the thread record and/or checkpoint progress record sections of the control file.

ORA-01612: instance <varname>string</varname> (thread <varname>string</varname>) is already enabled

Cause: An attempt was made to enable a thread that is already enabled.

Action: Either use this thread or enable another thread.

ORA-01613: instance <varname>string</varname> (thread <varname>string</varname>) only has <varname>string</varname> logs - at least 2 logs required to enable.

Cause: The thread cannot be enabled because it only has two online log files associated with it.

Action: Add logs to the thread or pick another thread to enable

ORA-01614: instance <varname>string</varname> (thread <varname>string</varname>) is busy - cannot enable

Cause: The mount enqueue for the thread could not be acquired when attempting to enable the thread. This probably means that another process has already started enabling this thread.

Action: Wait and try again, or find another thread to enable.

ORA-01615: instance <varname>string</varname> (thread <varname>string</varname>) is mounted - cannot disable

Cause: Some instance, possibly this one, has allocated the thread for its use. The thread can not be disabled while in use.

Action: Shut the instance down cleanly using the thread.

ORA-01616: instance <varname>string</varname> (thread <varname>string</varname>) is open - cannot disable

Cause: The thread is not closed. The last instance to use the thread died leaving the thread open. A thread cannot be disabled until it is closed. It is still required for crash or instance recovery.

Action: If the database is open, instance recovery should close the thread soon - wait a few minutes. Otherwise open the database - crash recovery will close the thread.

ORA-01617: cannot mount: <varname>string</varname> is not a valid thread number

Cause: The INIT.ORA parameter "thread" is not between 1 and the number of threads allowed by the control file.

Action: Shut down the instance, change the INIT.ORA parameter and startup, or resize the thread record and/or checkpoint progress record sections of the control file.

ORA-01618: redo thread <varname>string</varname> is not enabled - cannot mount

Cause: The INIT.ORA parameter "thread" requests a thread that is not enabled. A thread must be enabled before it can be mounted.

Action: Shutdown the instance, change the INIT.ORA parameter and startup mounting a different thread. If the database is open in another instance then the thread may be enabled.

ORA-01619: thread <varname>string</varname> is mounted by another instance

Cause: The INIT.ORA parameter "thread" requests a thread that has been mounted by another instance. Only one instance may use a thread.

Action: Shutdown the instance, change the INIT.ORA parameter and startup mounting a different thread.

ORA-01620: no public threads are available for mounting

Cause: The INIT.ORA parameter "thread" is zero, its default value. There are no threads which have been publicly enabled, and not mounted.

Action: Shutdown the instance, change the INIT.ORA parameter to a thread which is privately enabled and not mounted. If the database is open in another instance, then a thread may be publicly enabled.

ORA-01621: cannot rename member of current log if database is open

Cause: This is a rename command for a member of the current log for an open thread. If the database is open anywhere, the log may be in use, so the rename cannot be done.

Action: Wait until the log is not current, or mount the database exclusively.

ORA-01622: thread number must be specified - default not specific

Cause: The thread was not specified when adding a log, and the currently mounted thread was chosen by default at mount time. Since the current thread was not specified explicitly the user cannot know which thread the log will be added to.

Action: Explicitly specify the thread number either in the INIT.ORA parameter "thread", or in the add command.

ORA-01623: log <varname>string</varname> is current log for instance <varname>string</varname> (thread <varname>string</varname>) - cannot drop

Cause: A thread's current log cannot be dropped even if the thread is closed. A disabled thread usually does not have a current log, but a half completed disable may need to be disabled again.

Action: If the database is not open then disable the thread. If the database is open and an instance has the thread open, then the instance can be requested to switch logs. If the database is closed the log can be archived or cleared to force a switch.

ORA-01624: log <varname>string</varname> needed for crash recovery of instance <varname>string</varname> (thread <varname>string</varname>)

Cause: A log cannot be dropped or cleared until the thread's checkpoint has advanced out of the log.

Action: If the database is not open, then open it. Crash recovery will advance the checkpoint. If the database is open force a global checkpoint. If the log is corrupted so that the database cannot be opened, it may be necessary to do incomplete recovery until cancel at this log.

ORA-01625: rollback segment '<varname>string</varname>' does not belong to this instance

Cause: Trying to shrink or take a rollback segment offline that does not belong to this instance.

Action: n/a

ORA-01626: rollback segment number '<varname>string</varname>' cannot handle more transactions

Cause: Too many transactions in this segment.

Action: Choose a different rollback segment, or reduce the number of concurrent transactions.

ORA-01627: rollback segment number '<varname>string</varname>' is not online

Cause: Could have been taken offline before by DBA or cleaned up by SMON.

Action: Check the status of rollback segment in undo\$ or dba_rollback_segs to make sure the rollback segment is actually online.

ORA-01628: max # extents (<varname>string</varname>) reached for rollback segment <varname>string</varname>

Cause: An attempt was made to extend a rollback segment that was already at the MAXEXTENTS value.

Action: If the value of the MAXEXTENTS storage parameter is less than the maximum allowed by the system, raise this value.

ORA-01629: max # extents (<varname>string</varname>) reached saving undo for tablespace <varname>string</varname>

Cause: Save undo for the offline tablespace at max extents

Action: Check the storage parameters for the system tablespace. The tablespace needs to be brought back online so the undo can be applied .

ORA-01630: max # extents (<varname>string</varname>) reached in temp segment in tablespace <varname>string</varname>

Cause: A temp segment tried to extend past max extents.

Action: If maxextents for the tablespace is less than the the system maximum, you can raise that. Otherwise, raise pctincrease for the tablespace

ORA-01631: max # extents (<varname>string</varname>) reached in table <varname>string</varname>.<varname>string</varname>

Cause: A table tried to extend past maxextents

Action: If maxextents is less than the system maximum, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params

ORA-01632: max # extents (<varname>string</varname>) reached in index <varname>string</varname>.<varname>string</varname>

Cause: An index tried to extend past maxextents

Action: If maxextents is less than the system max, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params.

ORA-01633: Real Application Clusters Option needed for this operation

Cause: System doesn't have Real Application Clusters configured

Action: Obtain Real Application Clusters option

ORA-01634: rollback segment number '<varname>string</varname>' is about to go offline

Cause: The rollback segment specified was marked to go offline by DBA.

Action: Bring the rollback segment online first.

ORA-01635: rollback segment #<varname>string</varname> specified not available

Cause: (same as 1545)

Action: (same as 1545)

ORA-01636: rollback segment '<varname>string</varname>' is already online

Cause: The instance is trying to online an already online RS

Action: n/a

ORA-01637: rollback segment '<varname>string</varname>' is being used by another instance (#<varname>string</varname>)

Cause: The instance is trying to online a RS already in use by another instance

Action: n/a

ORA-01638: parameter <varname>string</varname> does not allow ORACLE version <varname>string</varname> to mount cluster database

Cause: The recovery compatible parameter is set too low to allow this software version to mount in cluster database mode.

Action: Either use an earlier software release or advance the recovery_compatible parameter. If this happens when no recovery_compatible parameter has been specified then set it to the current software release.

ORA-01639: instance <varname>string</varname> has no thread assigned to it

Cause: There is no mapping from instance to thread for this instance in the control file.

Action: Make sure that this instance has a thread assigned to it by adding logfiles to this instance or by starting the instance with an existing thread which will automatically create a mapping.

ORA-01640: cannot make tablespace read-only with changes by in-doubt transactions

Cause: An attempt was made to alter a tablespace read-only while there were changes in the tablespace made by in-doubt distributed transactions. The in-doubt transactions must commit or rollback to ensure that there is no undo for a tablespace before it can be made read-only.

Action: Any in-doubt transactions that made changes to the tablespace must be resolved.

ORA-01641: tablespace '<varname>string</varname>' is not online - cannot add data file

Cause: Attempting to add a datafile to a tablespace that has been set to read-only or offline.

Action: Make the tablespace online and read write then add the datafile.

ORA-01642: begin backup not needed for read-only tablespace '<varname>string</varname>'

Cause: Attempting to begin or end a backup for a tablespace that has been set to read-only.

Action: Take the backup without any begin or end commands. The files are not being modified so the backup will be consistent.

ORA-01643: system tablespace can not be made read-only

Cause: Attempting to set the system tablespace to read-only. The system tablespace must remain read write for database operation.

Action: Leave system tablespace read write.

ORA-01644: tablespace '<varname>string</varname>' is already read-only

Cause: Attempting to make tablespace read-only that is already read-only.

Action: Leave tablespace read-only, or make read write then make read-only again.

ORA-01645: previous attempt to make read write is half complete

Cause: A failure while making the tablespace read write left it read only, but the checkpoint was advanced. The tablespace will not be useable after a resetlogs if its files are offline.

Action: Repeat the command to make the tablespace read write.

ORA-01646: tablespace '<varname>string</varname>' is not read-only - cannot make read write

Cause: Attempting to make a tablespace read write that is not read-only. It may be either online or offline.

Action: Leave tablespace read write.

ORA-01647: tablespace '<varname>string</varname>' is read-only, cannot allocate space in it

Cause: Tried to allocate space in a read-only tablespace

Action: Create the object in another tablespace

ORA-01648: log <varname>string</varname> is the current log of disabled instance <varname>string</varname> (thread <varname>string</varname>)

Cause: An attempt to enable the thread failed after it was half completed. This log was left as the current log even though the thread is still disabled. Since a log switch cannot be done until the thread is enabled, the log can not be cleared or archived.

Action: Complete the thread enable by issuing the enable command again.

ORA-01649: operation not allowed with a backup control file

Cause: An attempt is being made to perform a command that does not make sense when the control file is a restored backup.

Action: Wait until after the database has been opened and try again.

ORA-01650: unable to extend rollback segment <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for a rollback segment in the tablespace.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01651: unable to extend save undo segment by <varname>string</varname> for tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for saving undo entries for the indicated offline tablespace.

Action: Check the storage parameters for the SYSTEM tablespace. The tablespace needs to be brought back online so the undo can be applied.

ORA-01652: unable to extend temp segment by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for a temporary segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01653: unable to extend table <varname>string</varname>.<varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for a table segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01654: unable to extend index <varname>string</varname>. <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for an index segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01655: unable to extend cluster <varname>string</varname>. <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for a cluster segment in tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01656: max # extents (<varname>string</varname>) reached in cluster <varname>string</varname>. <varname>string</varname>

Cause: A cluster tried to extend past maxextents

Action: If maxextents is less than the system maximum, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params

ORA-01657: invalid SHRINK option value

Cause: The specified value must be an integer.

Action: Choose an appropriate integer value.

ORA-01658: unable to create INITIAL extent for segment in tablespace <varname>string</varname>

Cause: Failed to find sufficient contiguous space to allocate INITIAL extent for segment being created.

Action: Use ALTER TABLESPACE ADD DATAFILE to add additional space to the tablespace or retry with a smaller value for INITIAL

ORA-01659: unable to allocate MINEXTENTS beyond <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to find sufficient contiguous space to allocate MINEXTENTS for the segment being created.

Action: Use ALTER TABLESPACE ADD DATAFILE to add additional space to the tablespace or retry with smaller value for MINEXTENTS, NEXT or PCTINCREASE

ORA-01660: tablespace '<varname>string</varname>' is already permanent

Cause: Attempting to make tablespace permanent that is already permanent.

Action: Leave tablespace permanent.

ORA-01661: tablespace '<varname>string</varname>' is already temporary

Cause: Attempting to make tablespace temporary that is already temporary.

Action: Leave tablespace permanent.

ORA-01662: tablespace '<varname>string</varname>' is non-empty and cannot be made temporary

Cause: Tried to convert a non-empty tablespace to a temporary tablespace

Action: To drop all the objects in the tablespace.

ORA-01663: the contents of tablespace '<varname>string</varname>' is constantly changing

Cause: The contents of the tablespace is always changing between PERMANENT and TEMPORARY.

Action: To decide what the tablespace contents should be and stay with it.

ORA-01664: Transaction which has expanded the Sort Segment has aborted

Cause: Internal Error.

Action: Contact Oracle Support.

ORA-01665: control file is not a standby control file

Cause: Attempting to mount, recover or activate a standby database without a standby control file.

Action: Create a standby control file before attempting to use the database as a standby database.

ORA-01666: control file is for a standby database

Cause: Attempting to mount, recover, or open a standby database without the appropriate command option to designate a standby database.

Action: Use the standby option or appropriate commands, or mount with the primary control file.

ORA-01667: cannot add any more tablespaces: limit of <varname>string</varname> exceeded

Cause: There is no more room in the control file for adding tablespaces.

Action: Resize the control file or drop other tablespaces.

ORA-01668: standby database requires DROP option for offline of data file

Cause: Attempting to take a datafile offline in a standby database without specifying the DROP option. Files that are offline in a standby database are not recovered, and are likely to be unusable if the standby is activated. Note that specifying DROP does not prevent bringing the file online later.

Action: Specify the DROP option or leave the file online.

ORA-01669: standby database control file not consistent

Cause: Attempting to activate a standby database with a control file that has not been recovered to the same point as the data files. Most likely the control file was just copied from the primary database and has not been used for recovery.

Action: Recover the standby database until all the files are consistent.

ORA-01670: new datafile <varname>string</varname> needed for standby database recovery

Cause: Standby database recovery noticed that a file was added to the primary database, but is not available on the standby.

Action: Either copy the file from the primary database or do an ALTER DATABASE CREATE DATAFILE command on the standby to create a file to recover.

ORA-01671: control file is a backup, cannot make a standby control file

Cause: The currently mounted control file is a backup control file, and attempting to create a control file for a standby database.

Action: Complete any needed recovery and open the database with the resetlogs option.

ORA-01672: control file may be missing files or have extra ones

Cause: Attempting to create a standby control file, but the control file was either recently created via CREATE CONTROLFILE or an incomplete recovery has been done. Thus the datafiles in the control file and the ones in the data dictionary may not match.

Action: Open the database, then retry the operation.

ORA-01673: data file <varname>string</varname> has not been identified

Cause: This data file was not in the control file after an incomplete recovery or CREATE CONTROLFILE. Since information from its header is needed for standby database recovery, we can not create a standby control file.

Action: Find the file and bring it online. If desired it may be taken offline again. If you intend to drop this file, then taking it offline with the DROP option will avoid this error.

ORA-01674: data file <varname>string</varname> is an old incarnation rather than current file

Cause: Recovery encountered redo that indicates this file was dropped from the database and another file was added using the same file number. This implies that a CREATE CONTROLFILE command was given the old file which was dropped rather than the latest file.

Action: Rebuild the control file using CREATE CONTROLFILE, and give the correct file.

ORA-01675: max_commit_propagation_delay inconsistent with other instances

Cause: The max_commit_propagation_delay INIT.ORA parameter is inconsistent with those in other instances.

Action: Make sure all instances have the same max_commit_propagation_delay.

ORA-01676: standby file name conversion of '<varname>string</varname>' exceeds maximum length of <varname>string</varname>

Cause: When the given file name was converted to the name used for the standby database, the converted name was bigger than the maximum allowed file name.

Action: Change initialization parameter DB_FILE_NAME_CONVERT or LOG_FILE_NAME_CONVERT to convert to a valid file name.

ORA-01677: standby file name conversion parameters differ from other instance

Cause: The DB_FILE_NAME_CONVERT or LOG_FILE_NAME_CONVERT initialization parameters were not the same as in other instances that already had the database mounted.

Action: Change initialization parameters DB_FILE_NAME_CONVERT or LOG_FILE_NAME_CONVERT to match other instances.

ORA-01678: parameter <varname>string</varname> must be pairs of pattern and replacement strings

Cause: The initialization parameter does not have even number of strings for its value. The odd numbered strings are patterns to be found in file names. The even numbered strings are used to replace the corresponding patterns when found in file names.

Action: Specify even number of strings for the parameter, or omit the parameter.

ORA-01679: database is being opened

Cause: An attempt was made to activate a standby database when the database was in the middle of being opened.

Action: Wait for database open to finish and retry the ACTIVATE command.

ORA-01680: unable to extend LOB segment by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for a LOB segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01681: max # extents (<varname>string</varname>) reached in LOB segment in tablespace <varname>string</varname>

Cause: A LOB segment tried to extend past max extents.

Action: If maxextents for the tablespace is less than the the system maximum, you can raise that. Otherwise, raise pctincrease for the tablespace

ORA-01682: read-only DB cannot allocate temporary space in tablespace <varname>string</varname>

Cause: Temporary space (usually for sorting) could not be allocated in either main storage or a tempfile. An attempt was made to allocate the space from the tablespace named, but the database is opened read-only. The database open requires a sort work space.

Action: Either allow sufficient workspace in main storage (SORT_AREA_SIZE initialization parameter), or create a temporary tablespace before making the database read-only. Use ALTER TABLESPACE ADD TEMPFILE statement to add temporary files to the temporary tablespace.

ORA-01683: unable to extend index <varname>string</varname>.<varname>string</varname> partition <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for index segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01684: max # extents (<varname>string</varname>) reached in table <varname>string</varname>.<varname>string</varname> partition <varname>string</varname>

Cause: A table tried to extend past maxextents

Action: If maxextents is less than the system maximum, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params

ORA-01685: max # extents (<varname>string</varname>) reached in index <varname>string</varname>.<varname>string</varname> partition <varname>string</varname>

Cause: An index tried to extend past maxextents

Action: If maxextents is less than the system max, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params.

ORA-01686: max # files (<varname>string</varname>) reached for the tablespace <varname>string</varname>

Cause: The number of files for a given tablespace has reached its maximum value

Action: Resize existing files in the tablespace, or partition the objects among multiple tablespaces, or move some objects to a different tablespace.

ORA-01687: specified logging attribute for tablespace '<varname>string</varname>' is same as the existing

Cause: Attempting to change the tablespace default logging attribute (LOGGING or NOLOGGING) to be the same as the existing logging attribute

Action: Change the specified logging attribute

ORA-01688: unable to extend table <varname>string</varname>.<varname>string</varname> partition <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for table segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01689: syntax error in clause "<varname>string</varname>" of <varname>string</varname>

Cause: There was a syntax in the INIT.ORA parameter.

Action: Fix the syntax error and restart the instance.

ORA-01690: sort area size too small

Cause: sort area size too small to fit two records in memory

Action: increase sort_area_size

ORA-01691: unable to extend lob segment <varname>string</varname>.<varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for LOB segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01692: unable to extend lob segment <varname>string</varname> partition <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent of the required number of blocks for LOB segment in the tablespace indicated.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-01693: max # extents (<varname>string</varname>) reached in lob segment <varname>string</varname>.<varname>string</varname>

Cause: A LOB segment tried to extend past maxextents

Action: If maxextents is less than the system max, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params.

ORA-01694: max # extents (<varname>string</varname>) reached in lob segment <varname>string</varname>.<varname>string</varname> partition <varname>string</varname>

Cause: A LOB segment tried to extend past maxextents

Action: If maxextents is less than the system max, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params.

ORA-01695: error converting rollback segment <varname>string</varname> to version 8.0.2

Cause: Version 8.0.1 database may not have shutdown cleanly

Action: May have to reload the 8.0.1 database and shutdown cleanly

ORA-01696: control file is not a clone control file

Cause: Attempting to mount, a database as a clone when it is already mounted by another instance not as a clone or attempting to use a current control file for a clone.

Action: Mount without the clone option or use a backup control file and shutdown the other instances before mounting as a clone.

ORA-01697: control file is for a clone database

Cause: Attempting to mount a clone database without the appropriate command option to designate a clone database.

Action: Use the clone option or appropriate commands, or mount with the primary control file.

ORA-01698: a clone database may only have SYSTEM rollback segment online

Cause: Attempting to online a rollback segment in a clone database.

Action: Do not use this command.

ORA-01699: tablespace '<varname>string</varname>' is being imported for point in time recovery

Cause: Attempting to online a tablespace or begin another point in time import while a point in time import is already in progress

Action: Wait until the import completes

ORA-01700: duplicate username in list

ORA-01701: a cluster is not appropriate here**ORA-01702: a view is not appropriate here**

Cause: Among other possible causes, this message will be produced if an attempt was made to define an Editioning View over a view.

Action: An Editioning View may only be created over a base table.

ORA-01703: missing SYNONYM keyword**ORA-01704: string literal too long**

Cause: The string literal is longer than 4000 characters.

Action: Use a string literal of at most 4000 characters. Longer values may only be entered using bind variables.

ORA-01705: an outer join cannot be specified on a correlation column**ORA-01706: user function result value was too large****ORA-01707: missing LIST keyword****ORA-01708: ACCESS or SESSION expected****ORA-01709: program does not exist****ORA-01710: missing OF keyword****ORA-01711: duplicate privilege listed****ORA-01712: you cannot grant a privilege which you do not have****ORA-01713: GRANT OPTION does not exist for that privilege****ORA-01714: error in execution of user function****ORA-01715: UNIQUE may not be used with a cluster index**

Cause: An attempt was made to create a cluster index with the UNIQUE attribute.

Action: Remove UNIQUE from the CREATE INDEX statement.

ORA-01716: NOSORT may not be used with a cluster index

Cause: An attempt was made to create a cluster index using the NOSORT option.

Action: Remove NOSORT from the CREATE INDEX statement.

ORA-01717: seccta: invalid access mode token passed**ORA-01718: BY ACCESS | SESSION clause not allowed for NOAUDIT**

Cause: Attempt to specify BY ACCESS | SESSION in a NOAUDIT statement.

Action: Remove BY ACCESS | SESSION.

ORA-01719: outer join operator (+) not allowed in operand of OR or IN

Cause: An outer join appears in an or clause.

Action: If A and B are predicates, to get the effect of (A(+) or B), try (select where (A(+) and not B)) union all (select where (B)).

ORA-01720: grant option does not exist for '<varname>string</varname>.<varname>string</varname>'

Cause: A grant was being performed on a view or a view was being replaced and the grant option was not present for an underlying object.

Action: Obtain the grant option on all underlying objects of the view or revoke existing grants on the view.

ORA-01721: USERENV(COMMITSCN) invoked more than once in a transaction

Cause: The USERENV('COMMITSCN') function can only be used once in a transaction.

Action: Re-write the transaction to use USERENV('COMMITSCN') only once

ORA-01722: invalid number

Cause: The specified number was invalid.

Action: Specify a valid number.

ORA-01723: zero-length columns are not allowed

Cause: Columns with zero length were not allowed.

Action: Correct the use of the column.

ORA-01724: floating point precision is out of range (1 to 126)

Cause: The specified number had an invalid range.

Action: Use a floating point precision that is in the correct precision.

ORA-01725: USERENV('COMMITSCN') not allowed here

Cause: The function USERENV('COMMITSCN') is only allowed as a top-level expression in the VALUES clause of an INSERT statement, and on the right-hand side of an assignment in an UPDATE statement.

Action: Correct the use of the function.

ORA-01726: a table is not appropriate here**ORA-01727: numeric precision specifier is out of range (1 to 38)****ORA-01728: numeric scale specifier is out of range (-84 to 127)****ORA-01729: database link name expected****ORA-01730: invalid number of column names specified****ORA-01731: circular view definition encountered****ORA-01732: data manipulation operation not legal on this view****ORA-01733: virtual column not allowed here****ORA-01734: illegal parameters - EXTENT MIN higher than EXTENT MAX**

Cause: A wrong value is specified for the parameter.

Action: Correct the parameter and reissue the statement.

ORA-01735: invalid ALTER TABLE option

ORA-01736: [NOT] SUCCESSFUL expected

ORA-01737: valid modes: [ROW] SHARE, [[SHARE] ROW] EXCLUSIVE, SHARE UPDATE

ORA-01738: missing IN keyword

ORA-01739: missing MODE keyword

ORA-01740: missing double quote in identifier

ORA-01741: illegal zero-length identifier

ORA-01742: comment not terminated properly

Cause: The indicated comment or hint begun with the /* token did not have the terminating */.

Action: Properly terminate the comment or hint with a /*.

ORA-01743: only pure functions can be indexed

Cause: The indexed function uses SYSDATE or the user environment.

Action: PL/SQL functions must be pure (RNDS, RNPS, WNDS, WNPS). SQL expressions must not use SYSDATE, USER, USERENV(), or anything else dependent on the session state. NLS-dependent functions are OK.

ORA-01744: inappropriate INTO

ORA-01745: invalid host/bind variable name

ORA-01746: indicator variable not permitted here

ORA-01747: invalid user.table.column, table.column, or column specification

ORA-01748: only simple column names allowed here

ORA-01749: you may not GRANT/REVOKE privileges to/from yourself

ORA-01750: UPDATE/REFERENCES may only be REVOKEd from the whole table, not by column

ORA-01751: Invalid dump undo option

Cause: An invalid option is specified in the ALTER DUMP UNDO command.

Action: Correct and reissue the command.

ORA-01752: cannot delete from view without exactly one key-preserved table

Cause: The deleted table had - no key-preserved tables, - more than one key-preserved table, or - the key-preserved table was an unmerged view.

Action: Redefine the view or delete it from the underlying base tables.

ORA-01753: column definition incompatible with clustered column definition

ORA-01754: a table may contain only one column of type LONG

Cause: An attempt was made to add a LONG column to a table which already had a LONG column. Note that even if the LONG column currently in the table has already been marked unused, another LONG column may not be added until the unused columns are dropped.

Action: Remove the LONG column currently in the table by using the ALTER TABLE command.

ORA-01755: Must specify an extent number or block number

Cause: Expecting an extent or block number but something else was specified.

Action: Correct the error and reissue the command.

ORA-01756: quoted string not properly terminated**ORA-01757: Must specify an object number**

Cause: Expecting an object number but something else was specified.

Action: Correct the error and reissue the command.

ORA-01758: table must be empty to add mandatory (NOT NULL) column**ORA-01759: user function is incorrectly defined****ORA-01760: illegal argument for function****ORA-01761: DML operation does not map to a unique table in the join**

Cause: The primary table is the base table against which the update, insert or delete operation is finally being done. For delete either there is no primary table in the join query or there is more than one. For update or insert the columns specified map to more than one base table.

Action: Change the join specification.

ORA-01762: vopdrv: view query block not in FROM**ORA-01763: update or delete involves outer joined table**

Cause: For deletes, the table being deleted from is outer joined to some other table. For updates, either the table being updated is outer- joined to some other table, or some table reachable from the primary table is being outer joined to a table not reachable from the primary table.

Action: Change the join specification.

ORA-01764: new update value of join is not guaranteed to be unique

Cause: A row of a join query table is being updated using a row of a table that is not guaranteed to have exactly one value for the row being updated.

Action: Change the join specification.

ORA-01765: specifying owner's name of the table is not allowed

Cause: An attempt was made to rename the object with dotted object name.

Action: Do not specify username.tablename in query for table name.

ORA-01766: dictionary table not allowed in this context

ORA-01767: UPDATE ... SET expression must be a subquery**ORA-01768: number string too long****ORA-01769: duplicate CLUSTER option specifications**

Cause: During a CREATE of a clustered table, the user attempted to specify more than one CLUSTER option.

Action: Remove the extra CLUSTER option.

ORA-01770: CLUSTER option not allowed in CREATE CLUSTER command**ORA-01771: illegal option for a clustered table**

Cause: During a CREATE or ALTER of a clustered table, the user attempted to enter one or more of the following options: INITRANS, MAXTRANS, PCTFREE, PCTUSED, STORAGE, TABLESPACE. These options may only be specified for the cluster itself.

Action: Remove the illegal option(s).

ORA-01772: Must specify a value for LEVEL

Cause: Expecting the value of LEVEL but something else was specified.

Action: Correct the error and reissue the command.

ORA-01773: may not specify column datatypes in this CREATE TABLE**ORA-01774: Dump undo option specified more than once**

Cause: The same option for ALTER DUMP UNDO was specified twice.

Action: Remove the redundant options and reissue the command.

ORA-01775: looping chain of synonyms**ORA-01776: cannot modify more than one base table through a join view**

Cause: Columns belonging to more than one underlying table were either inserted into or updated.

Action: Phrase the statement as two or more separate statements.

ORA-01777: WITH GRANT OPTION not allowed in this system**ORA-01778: maximum subquery nesting level exceeded****ORA-01779: cannot modify a column which maps to a non key-preserved table**

Cause: An attempt was made to insert or update columns of a join view which map to a non-key-preserved table.

Action: Modify the underlying base tables directly.

ORA-01780: string literal required**ORA-01781: UNRECOVERABLE cannot be specified without AS SELECT**

Cause: UNRECOVERABLE was specified in a CREATE TABLE statement without also specifying a populating subquery with an AS clause.

Action: Do not specify UNRECOVERABLE.

ORA-01782: UNRECOVERABLE cannot be specified for a cluster or clustered table

Cause: A CREATE CLUSTER, or clustered CREATE TABLE statement specified UNRECOVERABLE.

Action: Do not specify UNRECOVERABLE.

ORA-01783: only one RECOVERABLE or UNRECOVERABLE clause may be specified

Cause: RECOVERABLE was specified more than once, UNRECOVERABLE was specified more than once, or both RECOVERABLE and UNRECOVERABLE were specified in a CREATE TABLE or CREATE INDEX or ALTER INDEX REBUILD statement.

Action: Remove all but one of the RECOVERABLE or UNRECOVERABLE clauses and reissue the statement.

ORA-01784: RECOVERABLE cannot be specified with database media recovery disabled

Cause: A CREATE TABLE or CREATE INDEX statement specified RECOVERABLE when the database was running in NOARCHIVELOG mode. Since logs are not being archived, they will be overwritten and the object being created cannot be recovered from a backup taken before the object was created.

Action: Do not specify RECOVERABLE, or restart the database with media recovery enabled.

ORA-01785: ORDER BY item must be the number of a SELECT-list expression**ORA-01786: FOR UPDATE of this query expression is not allowed****ORA-01787: only one clause allowed per query block****ORA-01788: CONNECT BY clause required in this query block****ORA-01789: query block has incorrect number of result columns****ORA-01790: expression must have same datatype as corresponding expression****ORA-01791: not a SELECTed expression****ORA-01792: maximum number of columns in a table or view is 1000**

Cause: An attempt was made to create a table or view with more than 1000 columns, or to add more columns to a table or view which pushes it over the maximum allowable limit of 1000. Note that unused columns in the table are counted toward the 1000 column limit.

Action: If the error is a result of a CREATE command, then reduce the number of columns in the command and resubmit. If the error is a result of an ALTER TABLE command, then there are two options: 1) If the table contained unused columns, remove them by executing ALTER TABLE DROP UNUSED COLUMNS before adding new columns; 2) Reduce the number of columns in the command and resubmit.

ORA-01793: maximum number of index columns is 32**ORA-01794: maximum number of cluster columns is 32**

ORA-01795: maximum number of expressions in a list is 1000

Cause: Number of expressions in the query exceeded than 1000. Note that unused column/expressions are also counted Maximum number of expressions that are allowed are 1000.

Action: Reduce the number of expressions in the list and resubmit.

ORA-01796: this operator cannot be used with lists**ORA-01797: this operator must be followed by ANY or ALL****ORA-01798: missing EXCEPTION keyword****ORA-01799: a column may not be outer-joined to a subquery**

Cause: <varname>expression</varname>(+) <varname>relop</varname> (<varname>subquery</varname>) is not allowed.

Action: Either remove the (+) or make a view out of the subquery. In V6 and before, the (+) was just ignored in this case.

ORA-01800: a literal in the date format was too large to process**ORA-01801: date format is too long for internal buffer****ORA-01802: Julian date is out of range****ORA-01803: failure in getting date/time****ORA-01804: failure to initialize timezone information**

Cause: The timezone information file was not properly read.

Action: Please contact Oracle Customer Support.

ORA-01805: possible error in date/time operation

Cause: The timezone files on client and server do not match. Operation can potentially result in incorrect results based on local timezone file.

Action: Please ensure client and server timezone versions are same.

ORA-01810: format code appears twice**ORA-01811: Julian date precludes use of day of year****ORA-01812: year may only be specified once****ORA-01813: hour may only be specified once****ORA-01814: AM/PM conflicts with use of A.M./P.M.****ORA-01815: BC/AD conflicts with use of B.C./A.D.****ORA-01816: month may only be specified once****ORA-01817: day of week may only be specified once****ORA-01818: 'HH24' precludes use of meridian indicator****ORA-01819: signed year precludes use of BC/AD**

ORA-01820: format code cannot appear in date input format

ORA-01821: date format not recognized

ORA-01822: era format code is not valid with this calendar

ORA-01830: date format picture ends before converting entire input string

ORA-01831: year conflicts with Julian date

ORA-01832: day of year conflicts with Julian date

ORA-01833: month conflicts with Julian date

ORA-01834: day of month conflicts with Julian date

ORA-01835: day of week conflicts with Julian date

ORA-01836: hour conflicts with seconds in day

ORA-01837: minutes of hour conflicts with seconds in day

ORA-01838: seconds of minute conflicts with seconds in day

ORA-01839: date not valid for month specified

ORA-01840: input value not long enough for date format

ORA-01841: (full) year must be between -4713 and +9999, and not be 0
Cause: Illegal year entered

Action: Input year in the specified range

ORA-01842: quarter must be between 1 and 4

ORA-01843: not a valid month

ORA-01844: week of year must be between 1 and 52

ORA-01845: week of month must be between 1 and 5

ORA-01846: not a valid day of the week

ORA-01847: day of month must be between 1 and last day of month

ORA-01848: day of year must be between 1 and 365 (366 for leap year)

ORA-01849: hour must be between 1 and 12

ORA-01850: hour must be between 0 and 23

ORA-01851: minutes must be between 0 and 59

ORA-01852: seconds must be between 0 and 59

ORA-01853: seconds in day must be between 0 and 86399

ORA-01854: julian date must be between 1 and 5373484
Cause: An invalid Julian date was entered.

Action: Enter a valid Julian date between 1 and 5373484.

ORA-01855: AM/A.M. or PM/P.M. required

ORA-01856: BC/B.C. or AD/A.D. required

ORA-01857: not a valid time zone

ORA-01858: a non-numeric character was found where a numeric was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a number where a number was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

ORA-01859: a non-alphabetic character was found where an alphabetic was expected

Cause: The input data to be converted using a date format model was incorrect. The input data did not contain a letter where a letter was required by the format model.

Action: Fix the input data or the date format model to make sure the elements match in number and type. Then retry the operation.

ORA-01860: week of year must be between 1 and 53

ORA-01861: literal does not match format string

Cause: Literals in the input must be the same length as literals in the format string (with the exception of leading whitespace). If the "FX" modifier has been toggled on, the literal must match exactly, with no extra whitespace.

Action: Correct the format string to match the literal.

ORA-01862: the numeric value does not match the length of the format item

Cause: When the FX and FM format codes are specified for an input date, then the number of digits must be exactly the number specified by the format code. For example, 9 will not match the format specifier DD but 09 will.

Action: Correct the input date or turn off the FX or FM format specifier in the format string.

ORA-01863: the year is not supported for the current calendar

Cause: The year is not supported for the current calendar.

Action: Please check the documentation to find out what years are supported for the current calendar.

ORA-01864: the date is out of range for the current calendar

Cause: Your calendar doesn't extend to the specified date.

Action: Specify a date which is legal for this calendar.

ORA-01865: not a valid era

Cause: Era input does not match a known era.

Action: Provide a valid era on input.

ORA-01866: the datetime class is invalid

Cause: This is an internal error.

Action: Please contact Oracle Worldwide Support.

ORA-01867: the interval is invalid

Cause: The character string you specified is not a valid interval.

Action: Please specify a valid interval.

ORA-01868: the leading precision of the interval is too small

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

ORA-01869: reserved for future use**ORA-01870: the intervals or datetimes are not mutually comparable**

Cause: The intervals or datetimes are not mutually comparable.

Action: Specify a pair of intervals or datetimes that are mutually comparable.

ORA-01871: the number of seconds must be less than 60

Cause: The number of seconds specified was greater than 59.

Action: Specify a value for seconds that is 59 or smaller.

ORA-01872: reserved for future use**ORA-01873: the leading precision of the interval is too small**

Cause: The leading precision of the interval is too small to store the specified interval.

Action: Increase the leading precision of the interval or specify an interval with a smaller leading precision.

ORA-01874: time zone hour must be between -12 and 14

Cause: The time zone hour specified was not in the valid range.

Action: Specify a time zone hour between -12 and 14.

ORA-01875: time zone minute must be between -59 and 59

Cause: The time zone minute specified was not in the valid range.

Action: Specify a time zone minute between -59 and 59.

ORA-01876: year must be at least -4713

Cause: The specified year was not in range.

Action: Specify a year that is greater than or equal to -4713.

ORA-01877: string is too long for internal buffer

Cause: This is an internal error.

Action: Please contact Oracle Worldwide Support.

ORA-01878: specified field not found in datetime or interval

Cause: The specified field was not found in the datetime or interval.

Action: Make sure that the specified field is in the datetime or interval.

ORA-01879: the hh25 field must be between 0 and 24

Cause: The specified hh25 field was not in the valid range.

Action: Specify an hh25 field between 0 and 24.

ORA-01880: the fractional seconds must be between 0 and 999999999

Cause: The specified fractional seconds were not in the valid range.

Action: Specify a value for fractional seconds between 0 and 999999999.

ORA-01881: timezone region ID is invalid

Cause: The region ID referenced an invalid region.

Action: Contact Oracle Support Services.

ORA-01882: timezone region not found

Cause: The specified region name was not found.

Action: Contact Oracle Support Services.

ORA-01883: overlap was disabled during a region transition

Cause: The region was changing state and the overlap flag was disabled.

Action: Please contact Oracle Customer Support.

ORA-01884: divisor is equal to zero

Cause: An attempt was made to divide by zero.

Action: Avoid zero divisor.

ORA-01885: public synonym collides with Oracle-supplied schema name

Cause: The public synonym was the same as the Oracle-supplied schema name.

Action: Use either a different synonym or a different schema name.

ORA-01890: NLS error detected

Cause: An NLS error was detected.

Action: Look for additional error messages and take appropriate action. If there are no additional errors, call Oracle Worldwide Support.

ORA-01891: Datetime/Interval internal error

Cause: Internal error.

Action: Please contact Oracle Worldwide Support.

ORA-01898: too many precision specifiers

Cause: While trying to truncate or round dates, extra data was found in the date format picture

Action: Check the syntax of the date format picture and retry.

ORA-01899: bad precision specifier**ORA-01900: LOGFILE keyword expected**

Cause: keyword missing

Action: supply missing keyword

ORA-01901: ROLLBACK keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01902: SEGMENT keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01903: EVENTS keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01904: DATAFILE keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01905: STORAGE keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01906: BACKUP keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01907: TABLESPACE keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01908: EXISTS keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01909: REUSE keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01910: TABLES keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01911: CONTENTS keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01912: ROW keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01913: EXCLUSIVE keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01914: invalid auditing option for sequence numbers

Cause: AUDIT or NOAUDIT on a sequence number specifies an auditing option that is not legal for sequence numbers.

Action: The following options may not be used for sequence numbers and should be removed: COMMENT, DELETE, INDEX, INSERT, LOCK, RENAME, UPDATE, REFERENCES, EXECUTE

ORA-01915: invalid auditing option for views

Cause: AUDIT or NOAUDIT on a view specifies an auditing option that is not legal for views.

Action: The following options may not be used for views and should be removed: ALTER, INDEX, REFERENCES, EXECUTE

ORA-01916: keyword ONLINE, OFFLINE, RESIZE, AUTOEXTEND or END/DROP expected

Cause: An expected keyword was not used for datafile/tempfile clause

Action: Use correct syntax.

ORA-01917: user or role '<varname>string</varname>' does not exist

Cause: There is not a user or role by that name.

Action: Re-specify the name.

ORA-01918: user '<varname>string</varname>' does not exist

Cause: User does not exist in the system.

Action: Verify the user name is correct.

ORA-01919: role '<varname>string</varname>' does not exist

Cause: Role by that name does not exist.

Action: Verify you are using the correct role name.

ORA-01920: user name '<varname>string</varname>' conflicts with another user or role name

Cause: There is already a user or role with that name.

Action: Specify a different user name.

ORA-01921: role name '<varname>string</varname>' conflicts with another user or role name

Cause: There is already a user or role with that name.

Action: Specify a different role name.

ORA-01922: CASCADE must be specified to drop '<varname>string</varname>'

Cause: Cascade is required to remove this user from the system. The user own's object which will need to be dropped.

Action: Specify cascade.

ORA-01923: CASCADE aborted, objects locked by another user

Cause: Cannot drop the user's objects; someone has them locked.

Action: Use the lock monitor to determine who has the objects locked.

ORA-01924: role '<varname>string</varname>' not granted or does not exist

Cause: Either the role was not granted to the user, or the role did not exist.

Action: Create the role or grant the role to the user and retry the operation.

ORA-01925: maximum of <varname>string</varname> enabled roles exceeded

Cause: The INIT.ORA parameter "max_enabled_roles" has been exceeded.

Action: Increase max_enabled_roles and warm start the database.

ORA-01926: cannot GRANT to a role WITH GRANT OPTION

Cause: Role cannot have a privilege with the grant option.

Action: Perform the grant without the grant option.

ORA-01927: cannot REVOKE privileges you did not grant

Cause: You can only revoke privileges you granted.

Action: Don't revoke these privileges.

ORA-01928: GRANT option not granted for all privileges

Cause: In order to grant a privilege, you must first have the privilege with the grant option.

Action: Obtain the privilege with the grant option and try again.

ORA-01929: no privileges to GRANT

Cause: "ALL" was specified but the user doesn't have any privileges with the grant option.

Action: Don't grant privileges on that object.

ORA-01930: auditing the object is not supported

Cause: AUDIT or NOAUDIT was specified for an object that cannot be audited.

Action: Don't attempt to AUDIT the object.

ORA-01931: cannot grant <varname>string</varname> to a role

Cause: REFERENCES, INDEX, SYSDBA, SYSOPER or SYSASM privilege could not be granted to a role.

Action: Grant privilege directly to the user.

ORA-01932: ADMIN option not granted for role '<varname>string</varname>'

Cause: The operation requires the admin option on the role.

Action: Obtain the grant option and re-try.

ORA-01933: cannot create a stored object using privileges from a role

Cause: An attempt was made to create a stored object using privileges from a role. Stored objects cannot use privileges from roles.

Action: Grant the privileges required to the user directly.

ORA-01934: circular role grant detected

Cause: Roles cannot be granted circularly. Also, a role cannot be granted to itself.

Action: Do not perform the grant.

ORA-01935: missing user or role name

Cause: A user or role name was expected.

Action: Specify a user or role name.

ORA-01936: cannot specify owner when creating users or roles

Cause: Users and roles do not have owners.

Action: Don't specify an owner.

ORA-01937: missing or invalid role name

Cause: A valid role name was expected.

Action: Specify a valid role name.

ORA-01938: IDENTIFIED BY must be specified for CREATE USER

Cause: Cannot create a user without specifying a password or "IDENTIFIED EXTERNALLY".

Action: Specify one of the password clauses.

ORA-01939: only the ADMIN OPTION can be specified

Cause: System privileges and roles can only be granted with the admin option. The grant option cannot be used with system privileges and roles. The delegate option cannot be used with system privileges.

Action: Specify the admin option.

ORA-01940: cannot drop a user that is currently connected

Cause: Attempt was made to drop a user that is currently logged in.

Action: Make sure user is logged off, then repeat command.

ORA-01941: SEQUENCE keyword expected

Cause: keyword missing

Action: supply missing keyword

ORA-01942: IDENTIFIED BY and EXTERNALLY cannot both be specified

Cause: A user cannot be specified to have and not have a password.

Action: Specify only one of the options.

ORA-01943: IDENTIFIED BY already specified

Cause: The identified clause has been given twice.

Action: Use only one identified by clause.

ORA-01944: IDENTIFIED EXTERNALLY already specified

Cause: The identified externaly clause has been given twice.

Action: Use only one identified clause.

ORA-01945: DEFAULT ROLE[S] already specified

Cause: The default roles clause has been given twice.

Action: Use only on default role clause.

ORA-01946: DEFAULT TABLESPACE already specified

Cause: The default tablespace clause has been given twice.

Action: Use only one default tablespace clause.

ORA-01947: TEMPORARY TABLESPACE already specified

Cause: The temporary tablespace clause has been given twice.

Action: Use only one temporary tablespace clause.

ORA-01948: identifier's name length (<varname>string</varname>) exceeds maximum (<varname>string</varname>)

Cause: A name has been specified that is too long. For example, `dbms_session.is_role_enabled()` specifies a role name that is too long.

Action: Change the application or command to use a correct identifier.

ORA-01949: ROLE keyword expected

Cause: The role keyword is required here.

Action: Specify the role keyword.

ORA-01950: no privileges on tablespace '<varname>string</varname>'

Cause: User does not have privileges to allocate an extent in the specified tablespace.

Action: Grant the user the appropriate system privileges or grant the user space resource on the tablespace.

ORA-01951: ROLE '<varname>string</varname>' not granted to '<varname>string</varname>'

Cause: The role you tried to revoke was not granted to the user.

Action: Don't try to revoke a privilege which is not granted.

ORA-01952: system privileges not granted to '<varname>string</varname>'

Cause: A system privilege you tried to revoke was not granted to the user.

Action: Make sure the privileges you are trying to revoke are granted.

ORA-01953: command no longer valid, see ALTER USER

Cause: The syntax for assigning quotas on tablespaces has changed. The ALTER USER command is now used to perform the functionality

Action: Use the alter user command instead.

ORA-01954: DEFAULT ROLE clause not valid for CREATE USER

Cause: Default roles cannot be specified for create user.

Action: Grant and alter the user's default roles after creating the user.

ORA-01955: DEFAULT ROLE '<varname>string</varname>' not granted to user

Cause: The user being altered does not have the specified role granted directly to the user. Note, sub-roles cannot be used in the default role clause.

Action: Grant the role to the user.

ORA-01956: invalid command when OS_ROLES are being used

Cause: This command cannot be used when the INIT.ORA parameter OS_ROLES is TRUE.

Action: Grant the role to the user in the operating system.

ORA-01957: Keyword MIN or MAX expected, not found

ORA-01958: Must supply an integer for the LAYER option

ORA-01959: Must supply an integer for the OPCODE option

ORA-01960: Invalid dump logfile option

ORA-01961: Invalid dump option

ORA-01962: Must specify a file number or log sequence number

ORA-01963: Must specify a block number

ORA-01964: Must specify a time for the TIME option

ORA-01965: Must specify a PERIOD

ORA-01967: invalid option for CREATE CONTROLFILE

Cause: An invalid CREATE CONTROLFILE option is present.

Action: Specify only valid CREATE CONTROLFILE options.

ORA-01968: Only specify RESETLOGS or NORESETLOGS once

Cause: The keyword RESETLOGS or NORESETLOGS has appeared more than once

Action: Be sure to specify RESETLOGS or NORESETLOGS exactly once.

ORA-01969: You must specify RESETLOGS or NORESETLOGS

Cause: Missing a RESETLOGS or a NORESETLOGS

Action: Be sure to specify RESETLOGS or NORESETLOGS exactly once.

ORA-01970: You must specify a database name for CREATE CONTROLFILE

Cause: Missing a database name

Action: Retype CREATE CONTROLFILE command with the DATABASE keyword.

ORA-01971: Illegal ALTER TRACING option

ORA-01972: Must specify a string for ALTER TRACING ENABLE or DISABLE

ORA-01973: Missing change number

Cause: Keyword "CHANGE" found but change number not specified.

Action: Fix command line and resubmit

ORA-01974: Illegal archive option

Cause: Not a valid option to the "ALTER SYSTEM ARCHIVE" command

Action: n/a

ORA-01975: Illegal character in change number <varname>string</varname>

ORA-01976: Missing change number

ORA-01977: Missing thread number

Cause: Keyword "THREAD" found but thread number not specified.

Action: Fix command line and resubmit

ORA-01978: Missing sequence number

Cause: Keyword "SEQUENCE" found but sequence number not specified.

Action: Fix command line and resubmit

ORA-01979: missing or invalid password for role '<varname>string</varname>'

Cause: An attempt was made to enable a role without giving the proper password.

Action: Use the IDENTIFIED BY clause in SET ROLE to specify the correct password.

ORA-01980: error during OS ROLE initialization

Cause: An OS error occurred while loading a users OS ROLES.

Action: Check the OS error.

ORA-01981: CASCADE CONSTRAINTS must be specified to perform this revoke

Cause: During this revoke some foreign key constraints will be removed. In order to perform this automatically, CASCADE CONSTRAINTS must be specified.

Action: Remove the constraints or specify CASCADE CONSTRAINTS.

ORA-01982: invalid auditing option for tables

Cause: AUDIT or NOAUDIT on a table specifies an auditing option that is not legal for tables.

Action: The following options may not be used for tables and should be removed: REFERENCES, EXECUTE

ORA-01983: invalid auditing option for DEFAULT

Cause: AUDIT or NOAUDIT on a DEFAULT specifies an auditing option that is not legal for DEFAULT.

Action: The following options may not be used for DEFAULT and should be removed:
REFERENCES

ORA-01984: invalid auditing option for procedures/packages/functions

Cause: AUDIT or NOAUDIT on a DEFAULT specifies an auditing option that is not legal for procedures, packages, or functions.

Action: The following options may not be used for procedures, packages, and functions and should be removed: all but EXECUTE

ORA-01985: cannot create user as LICENSE_MAX_USERS parameter exceeded

Cause: Maximum users in the database license limit exceeded.

Action: Increase license limit.

ORA-01986: OPTIMIZER_GOAL is obsolete

Cause: An obsolete parameter, OPTIMIZER_GOAL, was referenced.

Action: Use the OPTIMIZER_MODE parameter.

ORA-01987: client os username is too long

Cause: A client's os username is too long for the os logon to succeed.

Action: Use a shorter os username.

ORA-01988: remote os logon is not allowed

Cause: Remote os login attempted when not allowed.

Action: Use a local client, or use the remote_os_authent system parameter to turn on remote os logon.

ORA-01989: role '<varname>string</varname>' not authorized by operating system

Cause: The os role does not exist, is not granted to you, or you did not provide the correct password.

Action: Re-attempt the SET ROLE with a valid os role and password, if necessary.

ORA-01990: error opening password file '<varname>string</varname>'

Cause: The password file either did not exist or was inaccessible.

Action: Ensure that the file exists and is accessible.

ORA-01991: invalid password file '<varname>string</varname>'**ORA-01992: error closing password file '<varname>string</varname>'****ORA-01993: error writing password file '<varname>string</varname>'****ORA-01994: GRANT failed: password file missing or disabled**

Cause: The operation failed either because the INIT.ORA parameter REMOTE_LOGIN_PASSWORDFILE was set to NONE or else because the password file was missing.

Action: Create the password file using the orapwd tool and set the INIT.ORA parameter REMOTE_LOGIN_PASSWORDFILE to EXCLUSIVE.

ORA-01995: error reading password file '<varname>string</varname>'

ORA-01996: GRANT failed: password file '<varname>string</varname>' is full

ORA-01997: GRANT failed: user '<varname>string</varname>' is identified externally

ORA-01998: REVOKE failed: user SYS always has SYSOPER and SYSDBA

ORA-01999: password file cannot be updated in SHARED mode

Cause: The operation failed because the INIT.ORA parameter REMOTE_LOGIN_PASSWORDFILE was set to SHARED.

Action: Set the INIT.ORA parameter to EXCLUSIVE.

ORA-02000: missing <varname>string</varname> keyword

ORA-02001: user SYS is not permitted to create indexes with freelist groups

Cause: user tried to create an index while running with sys authorization.

Action: n/a

ORA-02002: error while writing to audit trail

ORA-02003: invalid USERENV parameter

ORA-02004: security violation

Cause: This error code is never returned to a user. It is used as a value for column, audit_trail.returncode, to signal that a security violation occurred.

Action: None

ORA-02005: implicit (-1) length not valid for this bind or define datatype

ORA-02006: invalid packed decimal format string

ORA-02007: can't use ALLOCATE or DEALLOCATE options with REBUILD

Cause: Allocate or deallocate storage and rebuild index are not compatible.

Action: Choose one or the other.

ORA-02008: non-zero scale specified for nonnumeric column

ORA-02009: the size specified for a file must not be zero

Cause: A value of zero was specified in a SIZE or RESIZE clause of a file specification.

Action: Use correct syntax, or, if allowed, omit the SIZE or RESIZE clause.

ORA-02010: missing host connect string

ORA-02011: duplicate database link name

ORA-02012: missing USING keyword

ORA-02013: missing CONNECT keyword**ORA-02014: cannot select FOR UPDATE from view with DISTINCT, GROUP BY, etc.**

Cause: An attempt was made to select FOR UPDATE from a view which had not been merged because the view used syntax (for example, DISTINCT or GROUP BY) preventing the merge, or because of initialization file parameter settings.

Action: Determine the reason the view will not merge and, if possible, make changes so that it can.

ORA-02015: cannot select FOR UPDATE from remote table

Cause: An attempt was made to select FOR UPDATE on a remote table (directly, or via a view) that had abstract data type columns, and the view or select list contained abstract data type columns or non-column items.

Action: To attempt a select FOR UPDATE, use a view or select list that consists only of base columns from the remote table, none of which may be abstract data type columns.

ORA-02016: cannot use a subquery in a START WITH on a remote database**ORA-02017: integer value required****ORA-02018: database link of same name has an open connection****ORA-02019: connection description for remote database not found****ORA-02020: too many database links in use**

Cause: The current session has exceeded the INIT.ORA open_links maximum.

Action: Increase the open_links limit, or free up some open links by committing or rolling back the transaction and canceling open cursors that reference remote databases.

ORA-02021: DDL operations are not allowed on a remote database

Cause: An attempt was made to use a DDL operation on a remote database. For example, "CREATE TABLE tablename@remotedbname ...".

Action: To alter the remote database structure, you must connect to the remote database with the appropriate privileges.

ORA-02022: remote statement has unoptimized view with remote object

Cause: The local view is unoptimized and contains references to objects at the remote database and the statement must be executed at the remote database.

Action: Create a similar view on the remote database and modify the violating view in the SQL statement with the new view@remote.

ORA-02023: START WITH or CONNECT BY predicate cannot be evaluated by remote data base**ORA-02024: database link not found**

Cause: Database link to be dropped is not found in dictionary

Action: Correct the database link name

ORA-02025: all tables in the SQL statement must be at the remote database

Cause: The user's SQL statement references tables from multiple databases. The remote database is not Oracle V7 or above, and can perform updates only if it can reference all tables in the SQL statement.

Action: n/a

ORA-02026: missing LINK keyword

Cause: keyword missing

Action: supply missing keyword

ORA-02027: multi-row UPDATE of LONG column is not supported

Cause: A bind variable with length greater than 4000 bytes is being used to update a column, and the update statement updates more than one row.

Action: You may only update a single row with such a bind variable.

ORA-02028: fetching an exact number of rows is not supported by the server

Cause: The server does not support UPIALL, so the fetch of an exact number of rows cannot be emulated on the user side.

Action: Connect to a valid server or do not use an exact fetch.

ORA-02029: missing FILE keyword

Cause: keyword missing

Action: supply missing keyword

ORA-02030: can only select from fixed tables/views

Cause: An attempt is being made to perform an operation other than a retrieval from a fixed table/view.

Action: You may only select rows from fixed tables/views.

ORA-02031: no ROWID for fixed tables or for external-organized tables

Cause: An attempt is being made to access rowid from a fixed table or from a external-organized table.

Action: Do not access ROWID from a fixed table or from a external-organized table.

ORA-02032: clustered tables cannot be used before the cluster index is built

Cause: User attempted to perform a DML statement on a clustered table for which no cluster index has yet been created.

Action: Create the cluster index.

ORA-02033: a cluster index for this cluster already exists

Cause: A cluster index already exists for the cluster.

Action: None

ORA-02034: speed bind not permitted

Cause: Speed bind not allowed with supplied bind variables. Trapped internally by the system.

Action: None

ORA-02035: illegal bundled operation combination

Cause: User requested that the UPI bundled execution call perform an illegal combination of operations.

Action: See documentation for legal operation combinations.

ORA-02036: too many variables to describe with automatic cursor open

Cause: User requested that the UPI bundled execution call perform automatic cursor open and close on a describe operation. There were too many select-list items or bind variables to do this.

Action: open and close cursor explicitly

ORA-02037: uninitialized speed bind storage

Cause: User attempted a UPI bundled execution call containing a standalone execute operation without first performing a UPI bundled execution call containing a bind operation.

Action: perform a UPI bundled execution call with bind before performing a bundled execution call with execute

ORA-02038: define is not allowed for array type

Cause: User attempted to define a select list variable of type "array". Arrays may only serve as host bind variables.

Action: n/a

ORA-02039: bind by value is not allowed for array type

Cause: User attempted to bind an array host variable by value. Arrays may only be bound by reference.

Action: n/a

ORA-02040: remote database <varname>string</varname> does not support two-phase commit

Cause: the database was potentially updated but does not support prepare to commit (as determined by its logon transaction traits). The transaction was rolled back.

Action: Do not attempt to update the remote database unless it is the only database updated in one transaction.

ORA-02041: client database did not begin a transaction

Cause: internal error

Action: contact support

ORA-02042: too many distributed transactions

Cause: the distributed transaction table was full because too many distributed transactions were active.

Action: Run fewer transactions. If you are sure you don't have too many concurrent distributed transactions, this indicates an internal error and support should be notified. Instance shutdown/restart would be a work-around.

ORA-02043: must end current transaction before executing <varname>string</varname>

Cause: a transaction is in progress and one of the following commands is issued: COMMIT FORCE, ROLLBACK FORCE, or ALTER SYSTEM ENABLE DISTRIBUTED RECOVERY in single process mode.

Action: COMMIT or ROLLBACK the current transaction and resubmit command.

ORA-02044: transaction manager login denied: transaction in progress

Cause: a remote transaction manager tried to log in while a distributed transaction is in progress.

Action: end the current transaction (this is a protocol error from a remote transaction manager)

ORA-02045: too many local sessions participating in global transaction

Cause: too many sessions at this site for this transaction.

Action: use an existing link so another session need not be created.

ORA-02046: distributed transaction already begun

Cause: internal error or error in external transaction manager. A server session received a begin_tran RPC before finishing with a previous distributed tran.

Action: n/a

ORA-02047: cannot join the distributed transaction in progress

Cause: Either a transaction is in progress against a remote database that does not fully support two phase commit, and an update is attempted on another database, or updates are pending and an attempt is made to update a different database that does not fully support two phase commit.

Action: complete the current transaction and then resubmit the update request.

ORA-02048: attempt to begin distributed transaction without logging on

Cause: client program must issue a distributed transaction login.

Action: contact support.

ORA-02049: timeout: distributed transaction waiting for lock

Cause: exceeded INIT.ORA distributed_lock_timeout seconds waiting for lock.

Action: treat as a deadlock

ORA-02050: transaction <varname>string</varname> rolled back, some remote DBs may be in-doubt

Cause: network or remote failure in 2PC.

Action: Notify operations; remote DBs will automatically re-sync when the failure is repaired.

ORA-02051: another session or branch in same transaction failed or finalized

Cause: A session at the same site with the same global transaction ID failed. The failure could also be caused by an application error if an attempt was made to update the database while another tightly coupled transaction branch with the same global transaction ID was finalized or aborted.

Action: No action necessary as the transaction will be automatically recovered. In the case of an application error, make sure there are no more updates to the database once the transaction manager has started two-phase commit for tightly coupled distributed transaction.

ORA-02052: remote transaction failure at <varname>string</varname>

Cause: error in remote transaction at given DBLINK

Action: retry

ORA-02053: transaction <varname>string</varname> committed, some remote DBs may be in-doubt

Cause: network or remote failure in 2PC.

Action: Notify operations; remote DBs will automatically re-sync when the failure is repaired.

ORA-02054: transaction <varname>string</varname> in-doubt

Cause: network or remote failure in 2PC.

Action: Notify operations; DBs will automatically re-sync when the failure is repaired. Monitor pending_trans\$ for final outcome.

ORA-02055: distributed update operation failed; rollback required

Cause: a failure during distributed update operation may not have rolled back all effects of the operation. Since some sites may be inconsistent, the transaction must roll back to a savepoint or entirely

Action: rollback to a savepoint or rollback transaction and resubmit

ORA-02056: 2PC: <varname>string</varname>: bad two-phase command number <varname>string</varname> from <varname>string</varname>

Cause: two-phase commit protocol error.

Action: recovery of transaction attempted. Monitor pending_trans\$ table to ensure correct resolution. Contact support.

ORA-02057: 2PC: <varname>string</varname>: bad two-phase recovery state number <varname>string</varname> from <varname>string</varname>

Cause: internal error in two-phase recovery protocol

Action: contact support

ORA-02058: no prepared transaction found with ID <varname>string</varname>

Cause: no transaction with local_tran_id or global_tran_id found in the pending_trans\$ table in prepared state.

Action: check the pending_trans\$ table.

ORA-02059: ORA-2PC-CRASH-TEST-<varname>string</varname> in commit comment

Cause: This is a special comment used to test the two phase commit.

Action: Don't use this special comment (%s a number 1-10)

ORA-02060: select for update specified a join of distributed tables

Cause: tables in a join with the for update clause must reside at the same DB.

Action: n/a

ORA-02061: lock table specified list of distributed tables

Cause: tables in a lock table statement must reside at the same DB.

Action: issue multiple lock table commands.

ORA-02062: distributed recovery received DBID <varname>string</varname>, expected <varname>string</varname>

Cause: a database link at a coordinator no longer points to the expected database. Link may have been redefined, or a different DB mounted.

Action: restore link definition or remote database.

ORA-02063: preceding <varname>string</varname><varname>string</varname> from <varname>string</varname><varname>string</varname>

Cause: an Oracle error was received from a remote database link.

Action: refer to the preceding error message(s)

ORA-02064: distributed operation not supported

Cause: One of the following unsupported operations was attempted: 1. array execute of a remote update with a subquery that references a dblink, or 2. an update of a long column with bind variable and an update of a second column with a subquery that both references a dblink and a bind variable, or 3. a commit is issued in a coordinated session from an RPC procedure call with OUT parameters or function call.

Action: simplify remote update statement

ORA-02065: illegal option for ALTER SYSTEM

Cause: The option specified for ALTER SYSTEM is not supported

Action: refer to the user manual for option supported

ORA-02066: missing or invalid DISPATCHERS text

Cause: A character string literal was expected, but not found, following ALTER SYSTEM SET DISPATCHERS

Action: place the string literal containing the dispatcher's specification after ALTER SYSTEM SET DISPATCHERS

ORA-02067: transaction or savepoint rollback required

Cause: A failure (typically a trigger or stored procedure with multiple remote updates) occurred such that the all-or-nothing execution of a previous Oracle call cannot be guaranteed.

Action: rollback to a previous savepoint or rollback the transaction and resubmit.

ORA-02068: following severe error from <varname>string</varname><varname>string</varname>

Cause: A severe error (disconnect, fatal Oracle error) received from the indicated database link. See following error text.

Action: Contact the remote system administrator.

ORA-02069: global_names parameter must be set to TRUE for this operation

Cause: A remote mapping of the statement is required but cannot be achieved because global_names should be set to TRUE for it to be achieved

Action: Issue alter session set global_names = true if possible

ORA-02070: database <varname>string</varname><varname>string</varname> does not support <varname>string</varname> in this context

Cause: The remote database does not support the named capability in the context in which it is used.

Action: Simplify the SQL statement.

ORA-02071: error initializing capabilities for remote database <varname>string</varname>

Cause: Could not load a remote-specified capability table.

Action: Contact support for the remote SQL*Connect product.

ORA-02072: distributed database network protocol mismatch

Cause: This should never happen between different PRODUCTION releases of ORACLE, but may happen between alpha and beta releases, for example.

Action: Upgrade the older release.

ORA-02073: sequence numbers not supported in remote updates

Cause: Sequence numbers may not be used in INSERTS, UPDATES, or DELETES on remote tables.

Action: n/a

ORA-02074: cannot <varname>string</varname> in a distributed transaction

Cause: A commit or rollback was attempted from session other than the parent of a distributed transaction.

Action: Only commit or rollback from the parent session.

ORA-02075: another instance changed state of transaction <varname>string</varname>

Cause: A commit force or rollback force was issued from a session in another instance.

Action: Check if another Oracle instance is performing recovery of pending transactions. Query DBA_2PC_PENDING to determine the new state of the transaction.

ORA-02076: sequence not co-located with updated table or long column

Cause: all referenced sequences must be co-located with the table with the long column.

Action: n/a

ORA-02077: selects of long columns must be from co-located tables

Cause: if a select returns long columns from multiple tables, all the tables must be co-located

Action: n/a

ORA-02078: invalid setting for ALTER SYSTEM FIXED_DATE**ORA-02079: cannot join a committing distributed transaction**

Cause: Once a transaction branch is prepared, no more new transaction branches are allowed to start, nor is the prepared transaction branch allowed to be joined.

Action: Check the application code as this is an XA protocol violation.

ORA-02080: database link is in use

Cause: a transaction is active or a cursor is open on the database link given in the alter session close database link <varname>link</varname> command.

Action: commit or rollback, and close all cursors

ORA-02081: database link is not open

Cause: dblink given is not currently open.

Action: n/a

ORA-02082: a loopback database link must have a connection qualifier

Cause: An attempt was made to create a database link with the same name as the current database.

Action: a loopback database link needs a trailing qualifier, for example MYDB.EXAMPLE.COM@INST1 - the '@INST1' is the qualifier

ORA-02083: database name has illegal character '<varname>string</varname>'

Cause: supplied database name can contain only A-Z, 0-9, '_', '#', '\$', '.' and '@' characters.

Action: n/a

ORA-02084: database name is missing a component

Cause: supplied database name cannot contain a leading '.', trailing '.' or '@', or two '.' or '@' in a row.

Action: n/a

ORA-02085: database link <varname>string</varname> connects to <varname>string</varname>

Cause: a database link connected to a database with a different name. The connection is rejected.

Action: create a database link with the same name as the database it connects to, or set global_names=false.

ORA-02086: database (link) name is too long

Cause: database/database link name can have at most 128 characters.

Action: n/a

ORA-02087: object locked by another process in same transaction

Cause: A database link is being used in the cluster database environment that loops back to the same instance. One session is trying to convert a lock that was obtained by the other session.

Action: Get the more restrictive lock first. For example, if session 1 gets a share lock and session 2 gets an exclusive lock on the same object, get the exclusive lock first. Or, simply use the same session to access the object.

ORA-02088: distributed database option not installed

Cause: Remote and distributed updates and transactions are a separately priced option in ORACLE V7.

Action: n/a

ORA-02089: COMMIT is not allowed in a subordinate session

Cause: COMMIT was issued in a session that is not the two-phase commit global coordinator.

Action: Issue commit at the global coordinator only.

ORA-02090: network error: attempted callback+passthru

Cause: internal error.

Action: n/a

ORA-02091: transaction rolled back

Cause: Also see error 2092. If the transaction is aborted at a remote site then you will only see 2091; if aborted at host then you will see 2092 and 2091.

Action: Add rollback segment and retry the transaction.

ORA-02092: out of transaction table slots for distributed transaction

Cause: The transaction is assigned to the system rollback segment and is trying to get into the PREPARED state, but the required number of non-PREPARED slots are not available, hence the transaction is rolled back.

Action: Add a rollback segment and retry the transaction.

ORA-02093: TRANSACTIONS_PER_ROLLBACK_SEGMENT(<varname>string</varname>) more than maximum possible(<varname>string</varname>)

Cause: Value of parameter specified is greater than allowed on this port.

Action: Use default or reduce it to less than max.

ORA-02094: replication option not installed

Cause: The replication option was not installed at this site. Updatable materialized views, deferred RPCs, and other replication features were, therefore, unavailable.

Action: Install the replication option. The replication option is not part of the Oracle Server product and must be purchased separately. Contact an Oracle Sales representative if the replication option needs to be purchased.

ORA-02095: specified initialization parameter cannot be modified

Cause: The specified initialization parameter is not modifiable

Action: n/a

ORA-02096: specified initialization parameter is not modifiable with this option

Cause: Though the initialization parameter is modifiable, it cannot be modified using the specified command.

Action: Check the DBA guide for information about under what scope the parameter may be modified

ORA-02097: parameter cannot be modified because specified value is invalid

Cause: Though the initialization parameter is modifiable, the modified value is not acceptable to the parameter.

Action: Check the DBA guide for range of acceptable values for this parameter.

ORA-02098: error parsing index-table reference (:I)

Cause: An incorrect index-table (:I) syntax was encountered.

Action: This syntax is for oracle internal use only.

ORA-02099: used for internal purposes, should never be printed

ORA-02100 to ORA-04099

ORA-02100: PCC: out of memory (i.e., could not allocate)

ORA-02101: PCC: inconsistent cursor cache (uce/cuc mismatch)

ORA-02102: PCC: inconsistent cursor cache (no cuc entry for this uce)

ORA-02103: PCC: inconsistent cursor cache (out-of-range cuc ref)

ORA-02104: PCC: inconsistent host cache (no cuc available)

ORA-02105: PCC: inconsistent cursor cache (no cuc entry in cache)

ORA-02106: PCC: inconsistent cursor cache (OraCursor nr is bad)

ORA-02107: PCC: this pgm too old for run-time library: please re-PCC it

ORA-02108: PCC: invalid descriptor passed to run-time library

ORA-02109: PCC: inconsistent host cache (out-of-range sit ref)

ORA-02110: PCC: inconsistent host cache (invalid sqi type)

ORA-02111: PCC: heap consistency error

ORA-02112: PCC: SELECT..INTO returns too many rows

ORA-02140: invalid tablespace name

Cause: An identifier does not follow ALTER TABLESPACE.

Action: Specify a tablespace name following ALTER TABLESPACE.

ORA-02141: invalid OFFLINE option

Cause: An option other than NORMAL or IMMEDIATE follows OFFLINE.

Action: The user must either specify no option following OFFLINE or one of the options NORMAL or IMMEDIATE.

ORA-02142: missing or invalid ALTER TABLESPACE option

Cause: A valid option was not present.

Action: Use one of the valid options: add, rename, default, online, offline, read only, read write, begin, end, no, force, retention guarantee and retention noguarantee.

ORA-02143: invalid STORAGE option

Cause: An option other than INITIAL, NEXT, MINEXTENTS, MAXEXTENTS, or PCTINCREASE was specified in the STORAGE clause.

Action: Specify only valid options.

ORA-02144: no option specified for ALTER CLUSTER

Cause: No ALTER CLUSTER options are specified.

Action: Specify one or more of the following options: pctfree, pctused, size, storage.

ORA-02145: missing STORAGE option

Cause: No STORAGE options were specified following STORAGE (

Action: Specify one or more STORAGE option between the parentheses.

ORA-02146: SHARED specified multiple times

Cause: The SHARED option was specified in a CREATE DATABASE statement multiple times.

Action: Only specify the SHARED option once.

ORA-02147: conflicting SHARED/EXCLUSIVE options

Cause: Both the SHARED and EXCLUSIVE options were specified in a CREATE DATABASE statement.

Action: Specify SHARED or EXCLUSIVE, but not both.

ORA-02148: EXCLUSIVE specified multiple times

Cause: The EXCLUSIVE option was specified in a CREATE DATABASE statement multiple times.

Action: Only specify the EXCLUSIVE option once.

ORA-02149: Specified partition does not exist

Cause: Partition not found for the object.

Action: Retry with correct partition name.

ORA-02150: invalid new tablespace name

Cause: The new tablespace name specified in ALTER TABLESPACE RENAME TO statement was invalid.

Action: Retry with a valid new tablespace name.

ORA-02151: invalid tablespace name: <varname>string</varname>

Cause: Oracle cannot create a tablespace whose name starts with '_\$deleted\$'.

Action: Try a different tablespace name.

ORA-02152: Invalid ALTER TABLESPACE ... RENAME option

Cause: An option other than DATAFILE or TO follows by ALTER TABLESPACE ... RENAME.

Action: The user must specify either DATAFILE or TO following ALTER TABLESPACE ... RENAME.

ORA-02153: invalid VALUES password string

Cause: An encoded password string does not follow the VALUES clause.

Action: Place a proper encoded password string after the VALUES clause.

ORA-02154: a tablespace with the name '<varname>string</varname>' is found

Cause: An attempt to rename a tablespace to a new name failed because the new name is already used by some other tablespace.

Action: Retry with a different new name.

ORA-02155: invalid DEFAULT tablespace identifier

Cause: An identifier does not follow DEFAULT TABLESPACE.

Action: Place a tablespace name after DEFAULT TABLESPACE.

ORA-02156: invalid TEMPORARY tablespace identifier

Cause: An identifier does not follow TEMPORARY TABLESPACE.

Action: Place a tablespace name after TEMPORARY TABLESPACE.

ORA-02157: no options specified for ALTER USER

Cause: No options were specified.

Action: Specify at least one ALTER USER option.

ORA-02158: invalid CREATE INDEX option

Cause: An option other than COMPRESS, NOCOMPRESS, PCTFREE, INITRANS, MAXTRANS, STORAGE, TABLESPACE, PARALLEL, NOPARALLEL, RECOVERABLE, UNRECOVERABLE, LOGGING, NOLOGGING, LOCAL, or GLOBAL was specified.

Action: Choose one of the valid CREATE INDEX options.

ORA-02159: installed DLM does not support releasable locking mode

Cause: The parameter file specified gc_* parameters that allow locks to be release by the LCK process when not in use. This mode requires additional support from the DLM that is not available.

Action: Specify configuration parameters that do not require the additional function.

ORA-02160: index-organized table can not contain columns of type LONG

Cause: A column of type LONG defined for index-organized table.

Action: Do not use columns of type LONG in index-organized tables.

ORA-02161: invalid value for MAXLOGFILES

Cause: A number does not follow MAXLOGFILES.

Action: Specify a number after MAXLOGFILES.

ORA-02162: invalid value for MAXDATAFILES

Cause: A number does not follow MAXDATAFILES.

Action: Specify a number after MAXDATAFILES.

ORA-02163: invalid value for FREELIST GROUPS

Cause: A number does not follow FREELIST GROUPS.

Action: Specify a number after FREELIST GROUPS.

ORA-02164: DATAFILE clause specified more than once

Cause: The CREATE DATABASE command contains more than one DATAFILE clause.

Action: Specify at most one DATAFILE clause.

ORA-02165: invalid option for CREATE DATABASE

Cause: An invalid CREATE DATABASE option is present.

Action: Specify only valid CREATE DATABASE options.

ORA-02166: ARCHIVELOG and NOARCHIVELOG specified

Cause: Both ARCHIVELOG and NOARCHIVELOG are specified in a CREATE DATABASE statement.

Action: Specify at most one of these two options.

ORA-02167: LOGFILE clause specified more than once

Cause: The CREATE DATABASE command contains more than one LOGFILE clause.

Action: Specify at most one LOGFILE clause.

ORA-02168: invalid value for FREELISTS

Cause: A number does not follow FREELISTS

Action: Specify a number after FREELISTS

ORA-02169: FREELISTS storage option not allowed

Cause: The user attempted to specify the FREELISTS storage option. This option may only be specified during create table or create index.

Action: Remove these options and retry the statement.

ORA-02170: FREELIST GROUPS storage option not allowed

Cause: The user attempted to specify the FREELIST GROUPS storage option. This option may only be specified during create table and when allow_freelist_groups INIT.ORA is specified.

Action: Remove this option and retry the statement or set the allow_freelist_groups INIT.ORA parameter.

ORA-02171: invalid value for MAXLOGHISTORY

Cause: A number does not follow MAXLOGHISTORY

Action: Specify a number after MAXLOGHISTORY

ORA-02172: The PUBLIC keyword is not appropriate for a disable thread

Cause: The PUBLIC keyword was specified for a disable.

Action: Remove the keyword and resubmit.

ORA-02173: invalid option for DROP TABLESPACE

Cause: Either a token other than INCLUDING was found following the tablespace name or some text was found following INCLUDING CONTENTS.

Action: Place nothing or only INCLUDING CONTENTS after the tablespace name.

ORA-02174: Missing required thread number

Cause: Must specify thread number after THREAD keyword

Action: n/a

ORA-02175: invalid rollback segment name

Cause: In the CREATE or DROP ROLLBACK SEGMENT statements, an identifier was not found following ROLLBACK SEGMENT.

Action: Place the segment name following ROLLBACK SEGMENT.

ORA-02176: invalid option for CREATE ROLLBACK SEGMENT

Cause: An invalid option was specified in a CREATE ROLLBACK SEGMENT statement.

Action: Specify one of the valid options: TABLESPACE and STORAGE.

ORA-02177: Missing required group number

Cause: Must specify group number after GROUP keyword

Action: n/a

ORA-02178: correct syntax is: SET TRANSACTION READ { ONLY | WRITE }

Cause: There is a syntax error in the user's statement.

Action: Correct the syntax as indicated.

ORA-02179: valid options: ISOLATION LEVEL { SERIALIZABLE | READ COMMITTED }

Cause: There is a syntax error in the user's statement.

Action: Correct the syntax as indicated.

ORA-02180: invalid option for CREATE TABLESPACE

Cause: An invalid option appeared.

Action: Specify one of the valid options: DATAFILE, DEFAULT STORAGE, ONLINE, OFFLINE, FORCE, RETENTION.

ORA-02181: invalid option to ROLLBACK WORK

Cause: A token other than TO follows ROLLBACK [WORK].

Action: Place nothing or TO SAVEPOINT <varname>name</varname> after ROLLBACK [WORK].

ORA-02182: savepoint name expected

Cause: An identifier does not follow ROLLBACK [WORK] TO [SAVEPOINT].

Action: Place a savepoint name following TO [SAVEPOINT].

ORA-02183: valid options: ISOLATION_LEVEL { SERIALIZABLE | READ COMMITTED }

Cause: There is a syntax error in the user's statement.

Action: Correct the syntax as indicated.

ORA-02184: resource quotas are not allowed in REVOKE

Cause: In a revoke statement, a resource quota was specified.

Action: Specify resource privilege without the quota.

ORA-02185: a token other than WORK follows COMMIT

Cause: A token other than WORK follows COMMIT.

Action: Place either nothing or WORK after COMMIT.

ORA-02186: tablespace resource privilege may not appear with other privileges

Cause: An attempt was made to grant or revoke a resource quota in the same statement in which other privileges are granted or revoked.

Action: Use a separate grant or revoke statement for the resource quota privilege.

ORA-02187: invalid quota specification

Cause: In a grant or revoke statement, the user attempted to grant a tablespace quota above the upper limit.

Action: Grant a smaller tablespace quota.

ORA-02188: Cannot enable instance publicly

Cause: An attempt was made to publicly enable a thread associated with an instance.

Action: Leave out the PUBLIC keyword.

ORA-02189: ON <varname>tablespace</varname> required

Cause: In a grant or revoke statement, the user specified a tablespace quota but did not follow it with the ON <varname>tablespace</varname> clause.

Action: Specify the tablespace on which the quota is to be applied with the ON <varname>tablespace</varname> clause.

ORA-02190: keyword TABLES expected

Cause: The keyword TABLES is expected following DROP CLUSTER <varname>name</varname> INCLUDING.

Action: Place TABLES after INCLUDING.

ORA-02191: correct syntax is: SET TRANSACTION USE ROLLBACK SEGMENT <varname>rbs</varname>

Cause: There is a syntax error in the user's statement.

Action: Correct the syntax as indicated.

ORA-02192: PCTINCREASE not allowed for rollback segment storage clauses

Cause: pctincrease was specified in a create or alter rollback segment

Action: reissue statement without the pctincrease clause

ORA-02194: event specification syntax error <varname>string</varname> (minor error <varname>string</varname>) near '<varname>string</varname>'

Cause: There is a syntax error in an event specification.

Action: Fix the error.

ORA-02195: Attempt to create <varname>string</varname> object in a <varname>string</varname> tablespace

Cause: The object type is inconsistent with a tablespace contents.

Action: Create an object in a different tablespace, or change the user defaults.

ORA-02196: PERMANENT/TEMPORARY option already specified

Cause: In CREATE TABLESPACE, the PERMANENT and/or TEMPORARY options were specified more than once.

Action: n/a

ORA-02197: file list already specified

Cause: In CREATE TABLESPACE, more than one DATAFILE/TEMPFILE clause was specified.

Action: Merge the DATAFILE/TEMPFILE clauses into a single clause.

ORA-02198: ONLINE/OFFLINE option already specified

Cause: In CREATE TABLESPACE, the ONLINE and/or OFFLINE options were specified more than once.

Action: Specify at most one of ONLINE or OFFLINE.

ORA-02199: missing DATAFILE/TEMPFILE clause

Cause: A CREATE TABLESPACE statement has no DATAFILE/TEMPFILE clause.

Action: Specify a DATAFILE/TEMPFILE clause.

ORA-02200: WITH GRANT OPTION not allowed for PUBLIC

Cause: An attempt was made to GRANT to PUBLIC WITH GRANT OPTION.

Action: Remove the WITH GRANT OPTION clause.

ORA-02201: sequence not allowed here

Cause: An attempt was made to reference a sequence in a from-list.

Action: A sequence can only be referenced in a select-list.

ORA-02202: no more tables permitted in this cluster

Cause: An attempt was made to create a table in a cluster which already contains 32 tables.

Action: Up to 32 tables may be stored per cluster.

ORA-02203: INITIAL storage options not allowed

Cause: The user attempted to alter the INITIAL storage option of a table, cluster, index, or rollback segment. These options may only be specified when the object is created.

Action: Remove these options and retry the statement.

ORA-02204: ALTER, INDEX and EXECUTE not allowed for views

Cause: An attempt was made to grant or revoke an invalid privilege on a view.

Action: Do not attempt to grant or revoke any of ALTER, INDEX, or EXECUTE privileges on views.

ORA-02205: only SELECT and ALTER privileges are valid for sequences

Cause: An attempt was made to grant or revoke an invalid privilege on a sequence.

Action: Do not attempt to grant or revoke DELETE, INDEX, INSERT, UPDATE, REFERENCES or EXECUTE privilege on sequences.

ORA-02206: duplicate INITRANS option specification

Cause: INITRANS is specified more than once.

Action: Specify INITRANS at most once.

ORA-02207: invalid INITRANS option value

Cause: The INITRANS value is not an integer between 1 and 255 and less than or equal to the MAXTRANS value.

Action: Choose a valid INITRANS value.

ORA-02208: duplicate MAXTRANS option specification

Cause: MAXTRANS is specified more than once.

Action: Specify MAXTRANS at most once.

ORA-02209: invalid MAXTRANS option value

Cause: The MAXTRANS value is not an integer between 1 and 255 and greater than or equal to the INITRANS value.

Action: Choose a valid MAXTRANS value.

ORA-02210: no options specified for ALTER TABLE

Cause: No ALTER TABLE option was specified.

Action: Specify at least one alter table option.

ORA-02211: invalid value for PCTFREE or PCTUSED

Cause: The specified value for PCTFREE or PCTUSED is not an integer between 0 and 100.

Action: Choose an appropriate value for the option.

ORA-02212: duplicate PCTFREE option specification

Cause: PCTFREE option specified more than once.

Action: Specify PCTFREE at most once.

ORA-02213: duplicate PCTUSED option specification

Cause: PCTUSED option specified more than once.

Action: Specify PCTUSED at most once.

ORA-02214: duplicate BACKUP option specification

Cause: The BACKUP option to ALTER TABLE is specified more than once.

Action: Specify the option at most once.

ORA-02215: duplicate tablespace name clause

Cause: There is more than one TABLESPACE clause in the CREATE TABLE, CREATE INDEX, or CREATE ROLLBACK SEGMENT statement.

Action: Specify at most one TABLESPACE clause.

ORA-02216: tablespace name expected

Cause: A tablespace name was not present where required by the syntax for the failing statement.

Action: Specify a tablespace name where required by the syntax.

ORA-02217: duplicate storage option specification

Cause: A storage option (INITIAL, NEXT, MINEXTENTS, MAXEXTENTS, PCTINCREASE) is specified more than once.

Action: Specify all storage options at most once.

ORA-02218: invalid INITIAL storage option value

Cause: The specified value must be an integer.

Action: Choose an appropriate integer value.

ORA-02219: invalid NEXT storage option value

Cause: The specified value must be an integer.

Action: Choose an appropriate integer value.

ORA-02220: invalid MINEXTENTS storage option value

Cause: The specified value must be a positive integer less than or equal to MAXEXTENTS.

Action: Specify an appropriate value.

ORA-02221: invalid MAXEXTENTS storage option value

Cause: The specified value must be a positive integer greater than or equal to MINEXTENTS.

Action: Specify an appropriate value.

ORA-02222: invalid PCTINCREASE storage option value

Cause: The specified value must be a positive integer.

Action: Specify an appropriate value.

ORA-02223: invalid OPTIMAL storage option value

Cause: The specified value must be an integer.

Action: Choose an appropriate integer value.

ORA-02224: EXECUTE privilege not allowed for tables

Cause: An attempt was made to grant or revoke an invalid privilege on a table.

Action: Do not attempt to grant or revoke EXECUTE privilege on tables.

ORA-02225: only EXECUTE and DEBUG privileges are valid for procedures

Cause: An attempt was made to grant or revoke an invalid privilege on a procedure, function or package.

Action: Do not attempt to grant or revoke any privilege besides EXECUTE or DEBUG on procedures, functions or packages.

ORA-02226: invalid MAXEXTENTS value (max allowed: <varname>string</varname>)

Cause: The MAXEXTENTS specified is too large for the database block size. This applies only to SYSTEM rollback segment.

Action: Specify a smaller value.

ORA-02227: invalid cluster name

Cause: A cluster name of the form [<varname>identifier</varname> .] <varname>identifier</varname> is expected but not present.

Action: Enter an appropriate cluster name.

ORA-02228: duplicate SIZE specification

Cause: The SIZE option is specified more than once.

Action: Specify the SIZE option at most once.

ORA-02229: invalid SIZE option value

Cause: The specified value must be an integer number of bytes.

Action: Specify an appropriate value.

ORA-02230: invalid ALTER CLUSTER option

Cause: An option other than PCTFREE, PCTUSED, INITRANS, MAXTRANS, STORAGE, or SIZE is specified in an ALTER CLUSTER statement.

Action: Specify only legal options.

ORA-02231: missing or invalid option to ALTER DATABASE

Cause: An option other than ADD, DROP, RENAME, ARCHIVELOG, NOARCHIVELOG, MOUNT, DISMOUNT, OPEN, or CLOSE is specified in the statement.

Action: Specify only legal options.

ORA-02232: invalid MOUNT mode

Cause: A mode other than SHARED or EXCLUSIVE follows the MOUNT keyword in an ALTER DATABASE statement.

Action: Specify either SHARED, EXCLUSIVE, or nothing following MOUNT.

ORA-02233: invalid CLOSE mode

Cause: A mode other than NORMAL or IMMEDIATE follows the CLOSE keyword in an ALTER DATABASE statement.

Action: Specify either NORMAL, IMMEDIATE, or nothing following CLOSE.

ORA-02234: changes to this table are already logged

Cause: the log table to be added is a duplicate of another

Action: Don't add this change log to the system; check that the replication product's system tables are consistent

ORA-02235: this table logs changes to another table already

Cause: the table to be altered is already a change log for another table

Action: Don't log changes to the specified base table to this table; check that the replication product's system tables are consistent

ORA-02236: invalid file name

Cause: A character string literal was not used in the filename list of a LOGFILE, DATAFILE, or RENAME clause.

Action: Use correct syntax.

ORA-02237: invalid file size

Cause: A non-integer value was specified in the SIZE or RESIZE clause.

Action: Use correct syntax.

ORA-02238: filename lists have different numbers of files

Cause: In a RENAME clause in ALTER DATABASE or TABLESPACE, the the number of existing filenames does not equal the number of new filenames.

Action: Make sure there is a new filename to correspond to each existing filename.

ORA-02239: there are objects which reference this sequence

Cause: the sequence to be dropped is still referenced

Action: Make sure the sequence name is correct, or drop the referencing constraint/object

ORA-02240: invalid value for OBJNO or TABNO

Cause: A number does not follow either OBJNO or TABNO.

Action: Specify a number after OBJNO or TABNO.

ORA-02241: must of form EXTENTS (FILE <varname>n</varname> BLOCK <varname>n</varname> SIZE <varname>n</varname>, ...)

Cause: bad extent storage clause

Action: respecify

ORA-02242: no options specified for ALTER INDEX

Cause: No options specified.

Action: Specify at least one of REBUILD, INITTRANS, MAXTRANS, or STORAGE.

ORA-02243: invalid ALTER INDEX or ALTER MATERIALIZED VIEW option

Cause: An option other than INITTRANS, MAXTRANS, or STORAGE is specified in an ALTER INDEX statement or in the USING INDEX clause of an ALTER MATERIALIZED VIEW statement.

Action: Specify only legal options.

ORA-02244: invalid ALTER ROLLBACK SEGMENT option

Cause: The STORAGE option is expected but not found.

Action: Specify the STORAGE option.

ORA-02245: invalid ROLLBACK SEGMENT name

Cause: An identifier was expected, but not found, following ALTER [PUBLIC] ROLLBACK SEGMENT.

Action: Place a rollback segment name following SEGMENT.

ORA-02246: missing EVENTS text

Cause: A character string literal was expected, but not found, following ALTER SESSION SET EVENTS.

Action: Place the string literal containing the events text after EVENTS.

ORA-02247: no option specified for ALTER SESSION

Cause: The option SET EVENTS was expected, but not found, following ALTER SESSION.

Action: Place the SET EVENTS option after ALTER SESSION.

ORA-02248: invalid option for ALTER SESSION

Cause: Obvious.

Action: see SQL Language Manual for legal options.

ORA-02249: missing or invalid value for MAXLOGMEMBERS

Cause: A valid number does not follow MAXLOGMEMBERS. The value specified must be between 1 and the port-specific maximum number of log file members.

Action: Specify a valid number after MAXLOGMEMBERS.

ORA-02250: missing or invalid constraint name

Cause: The constraint name is missing or invalid.

Action: Specify a valid identifier name for the constraint name.

ORA-02251: subquery not allowed here

Cause: Subquery is not allowed here in the statement.

Action: Remove the subquery from the statement.

ORA-02252: check constraint condition not properly ended

Cause: The specified search condition for the check constraint is not properly ended.

Action: End the condition properly.

ORA-02253: constraint specification not allowed here

Cause: Constraint specification is not allowed here in the statement.

Action: Remove the constraint specification from the statement.

ORA-02254: DEFAULT <varname>expression</varname> not allowed here

Cause: Default value expression is not allowed for the column here in the statement.

Action: Remove the default value expression from the statement.

ORA-02255: obsolete 7.1.5

Cause: Was that defaults must not conflict with not null constraints

Action: n/a

ORA-02256: number of referencing columns must match referenced columns

Cause: The number of columns in the foreign-key referencing list is not equal to the number of columns in the referenced list.

Action: Make sure that the referencing columns match the referenced columns.

ORA-02257: maximum number of columns exceeded

Cause: The number of columns in the key list exceeds the maximum number.

Action: Reduce the number columns in the list.

ORA-02258: duplicate or conflicting NULL and/or NOT NULL specifications

Cause: Self-evident.

Action: Remove the duplicate or conflicting specification.

ORA-02259: duplicate UNIQUE/PRIMARY KEY specifications

Cause: Self-evident.

Action: Remove the duplicate specification.

ORA-02260: table can have only one primary key

Cause: Self-evident.

Action: Remove the extra primary key.

ORA-02261: such unique or primary key already exists in the table

Cause: Self-evident.

Action: Remove the extra key.

ORA-02262: ORA-`<varname>string</varname>` occurs while type-checking column default value expression

Cause: New column datatype causes type-checking error for existing column default value expression.

Action: Remove the default value expression or don't alter the column datatype.

ORA-02263: need to specify the datatype for this column

Cause: The required datatype for the column is missing.

Action: Specify the required datatype.

ORA-02264: name already used by an existing constraint

Cause: The specified constraint name has to be unique.

Action: Specify a unique constraint name for the constraint.

ORA-02265: cannot derive the datatype of the referencing column

Cause: The datatype of the referenced column is not defined as yet.

Action: Make sure that the datatype of the referenced column is defined before referencing it.

ORA-02266: unique/primary keys in table referenced by enabled foreign keys

Cause: An attempt was made to truncate a table with unique or primary keys referenced by foreign keys enabled in another table. Other operations not allowed are

dropping/truncating a partition of a partitioned table or an ALTER TABLE EXCHANGE PARTITION.

Action: Before performing the above operations the table, disable the foreign key constraints in other tables. You can see what constraints are referencing a table by issuing the following command: `SELECT * FROM USER_CONSTRAINTS WHERE TABLE_NAME = "tabnam";`

ORA-02267: column type incompatible with referenced column type

Cause: The datatype of the referencing column is incompatible with the

Action: Select a compatible datatype for the referencing column.

ORA-02268: referenced table does not have a primary key

Cause: The referenced table does not have a primary key.

Action: Specify explicitly the referenced table unique key.

ORA-02269: key column cannot be of LONG datatype

Cause: Self-evident.

Action: Change the datatype of the column, or remove the column from the key.

ORA-02270: no matching unique or primary key for this column-list

Cause: A REFERENCES clause in a CREATE/ALTER TABLE statement gives a column-list for which there is no matching unique or primary key constraint in the referenced table.

Action: Find the correct column names using the ALL_CONS_COLUMNS catalog view

ORA-02271: table does not have such constraint

Cause: Self-evident.

Action: Make sure the specified constraint name is correct.

ORA-02272: constrained column cannot be of LONG datatype

Cause: Self-evident.

Action: Change the datatype of the column, or remove the constraint on the column.

ORA-02273: this unique/primary key is referenced by some foreign keys

Cause: Self-evident.

Action: Remove all references to the key before the key is to be dropped.

ORA-02274: duplicate referential constraint specifications

Cause: Self-evident.

Action: Remove the duplicate specification.

ORA-02275: such a referential constraint already exists in the table

Cause: Self-evident.

Action: Remove the extra constraint.

ORA-02276: default value type incompatible with column type

Cause: The type of the evaluated default expression is incompatible with the datatype of the column.

Action: Change the type of the column, or modify the default expression.

ORA-02277: invalid sequence name

Cause: The specified sequence name is not a valid identifier name.

Action: Specify a valid identifier name for the sequence name.

ORA-02278: duplicate or conflicting MAXVALUE/NOMAXVALUE specifications

Cause: Self-evident.

Action: Remove the duplicate or conflicting specification.

ORA-02279: duplicate or conflicting MINVALUE/NOMINVALUE specifications

Cause: Self-evident.

Action: Remove the duplicate or conflicting specification.

ORA-02280: duplicate or conflicting CYCLE/NOCYCLE specifications

Cause: Self-evident.

Action: Remove the duplicate or conflicting specification.

ORA-02281: duplicate or conflicting CACHE/NOCACHE specifications

Cause: Self-evident.

Action: Remove the duplicate or conflicting specification.

ORA-02282: duplicate or conflicting ORDER/NOORDER specifications

Cause: Self-evident.

Action: Remove the duplicate or conflicting specification.

ORA-02283: cannot alter starting sequence number

Cause: Self-evident.

Action: Don't alter it.

ORA-02284: duplicate INCREMENT BY specifications

Cause: Self-evident.

Action: Remove the duplicate specification.

ORA-02285: duplicate START WITH specifications

Cause: Self-evident.

Action: Remove the duplicate specification.

ORA-02286: no options specified for ALTER SEQUENCE

Cause: Self-evident.

Action: The statement is meaningless without any options.

ORA-02287: sequence number not allowed here

Cause: The specified sequence number (CURRVAL or NEXTVAL) is inappropriate here in the statement.

Action: Remove the sequence number.

ORA-02288: invalid OPEN mode

Cause: A token other than RESETLOGS appears following ALTER DATABASE <varname>name</varname> OPEN.

Action: Either nothing or RESETLOGS should be placed following OPEN.

ORA-02289: sequence does not exist

Cause: The specified sequence does not exist, or the user does not have the required privilege to perform this operation.

Action: Make sure the sequence name is correct, and that you have the right to perform the desired operation on this sequence.

ORA-02290: check constraint (<varname>string</varname>.<varname>string</varname>) violated

Cause: The values being inserted do not satisfy the named check constraint.

Action: do not insert values that violate the constraint.

ORA-02291: integrity constraint (<varname>string</varname>.<varname>string</varname>) violated - parent key not found

Cause: A foreign key value has no matching primary key value.

Action: Delete the foreign key or add a matching primary key.

ORA-02292: integrity constraint (<varname>string</varname>.<varname>string</varname>) violated - child record found

Cause: attempted to delete a parent key value that had a foreign key dependency.

Action: delete dependencies first then parent or disable constraint.

ORA-02293: cannot validate (<varname>string</varname>.<varname>string</varname>) - check constraint violated

Cause: an alter table operation tried to validate a check constraint to a populated table that had noncomplying values.

Action: Obvious

ORA-02294: cannot enable (<varname>string</varname>.<varname>string</varname>) - constraint changed during validation

Cause: While one DDL statement was attempting to enable this constraint, another DDL changed this same constraint.

Action: Try again, with only one DDL changing the constraint this time.

ORA-02295: found more than one enable/disable clause for constraint

Cause: a create or alter table specified more than one enable and/or disable clause for a given constraint.

Action: only one enable or disable may be specified for a given constraint.

ORA-02296: cannot enable (<varname>string</varname>.<varname>string</varname>) - null values found

Cause: an alter table enable constraint failed because the table contains values that do not satisfy the constraint.

Action: Obvious

ORA-02297: cannot disable constraint (<varname>string</varname>.<varname>string</varname>) - dependencies exist

Cause: an alter table disable constraint failed because the table has foreign keys that are dependent on this constraint.

Action: Either disable the foreign key constraints or use disable cascade

ORA-02298: cannot validate (<varname>string</varname>.<varname>string</varname>) - parent keys not found

Cause: an alter table validating constraint failed because the table has orphaned child records.

Action: Obvious

ORA-02299: cannot validate (<varname>string</varname>.<varname>string</varname>) - duplicate keys found

Cause: an alter table validating constraint failed because the table has duplicate key values.

Action: Obvious

ORA-02300: invalid value for OIDGENERATORS

Cause: A number was not specified for the value of OIDGENERATORS.

Action: Specify a number for OIDGENERATORS.

ORA-02301: maximum number of OIDGENERATORS is 255

Cause: A number greater than 255 was specified for the value of OIDGENERATORS.

Action: Make sure the number specified for OIDGENERATORS does not exceed 255.

ORA-02302: invalid or missing type name

Cause: An invalid or missing type name was entered in a statement.

Action: Enter a valid type name in the statement and retry the operation.

ORA-02303: cannot drop or replace a type with type or table dependents

Cause: An attempt was made to drop or replace a type that has type or table dependents.

Action: For DROP TYPE, drop all type(s) and table(s) depending on the type and then retry the operation, or use the FORCE option. For CREATE TYPE, drop all type(s) and table(s) depending on the type and then retry the operation, or drop all table(s) depending on the type and retry with the FORCE option.

ORA-02304: invalid object identifier literal

Cause: An attempt was made to enter an object identifier literal for CREATE TYPE that is either: - not a string of 32 hexadecimal characters - an object identifier that already identifies an existing object - an object identifier different from the original object identifier already assigned to the type

Action: Do not specify the object identifier clause or specify a 32 hexadecimal-character object identifier literal that is unique or identical to the originally assigned object identifier. Then retry the operation.

ORA-02305: only EXECUTE, DEBUG, and UNDER privileges are valid for types

Cause: An attempt was made to GRANT or REVOKE an invalid privilege (not EXECUTE, DEBUG, or UNDER) on a type.

Action: GRANT or REVOKE only the EXECUTE, DEBUG, or UNDER privilege on types.

ORA-02306: cannot create a type that already has valid dependent(s)

Cause: An attempt was made to create a type that already has some valid dependent(s) (these dependents depend on the fact that the type does not exist).

Action: Drop the dependents first before creating the type, or do not create the type.

ORA-02307: cannot alter with REPLACE option a type that is not valid

Cause: An attempt was made to ALTER with REPLACE option a type that is not valid.

Action: Use the CREATE OR REPLACE TYPE command to modify the type.

ORA-02308: invalid option <varname>string</varname> for object type column

Cause: An attempt was made to specify an invalid option, such as PACKED or UNPACKED, for the object type column.

Action: Remove the invalid option from column specification and retry the operation.

ORA-02309: atomic NULL violation

Cause: An attempt was made to access the attributes of a NULL object instance.

Action: Ensure that the object instance is non-NULL before accessing.

ORA-02310: exceeded maximum number of allowable columns in table

Cause: The attributes in the object type column exceeded the maximum number of columns allowed in a table.

Action: Specify fewer attributes for the object type and retry the operation.

ORA-02311: cannot alter with COMPILE option a valid type with type or table dependents

Cause: An attempt was made to ALTER with COMPILE option a type that is valid and has type or table dependents.

Action: No need to perform this operation.

ORA-02313: object type contains non-queryable type <varname>string</varname> attribute

Cause: The specified object type contains a nested attribute whose type is non-queryable.

Action: Use an object type with queryable attribute types.

ORA-02314: illegal use of type constructor

Cause: The statement contains an illegal use of a type constructor.

Action: Refer to the SQL Reference manual for the correct statement syntax.

ORA-02315: incorrect number of arguments for default constructor

Cause: The number of arguments specified for the default constructor doesn't match the number of attributes of the object type.

Action: Specify the correct number of arguments for the default constructor and retry the operation.

**ORA-02320: failure in creating storage table for nested table column
<varname>string</varname>**

Cause: An error occurred while creating the storage table for the specified nested table column.

Action: See the messages that follow for more details. If the situation they describe can be corrected, do so; otherwise contact Oracle Support.

ORA-02321: event for nested table equipartition**ORA-02322: failure in accessing storage table of the nested table column**

Cause: An error occurred while performing DML on the storage table of the nested table column.

Action: If the situation described in the following messages can be corrected, do so; otherwise contact Oracle Support.

ORA-02324: more than one column in the SELECT list of THE subquery

Cause: More than one column was selected in the THE subquery.

Action: Specify only one column in the SELECT list of the THE subquery and retry the operation.

**ORA-02327: cannot create index on expression with datatype
<varname>string</varname>**

Cause: An attempt was made to create an index on a non-indexable expression.

Action: Change the column datatype or do not create the index on an expression whose datatype is one of VARRAY, nested table, object, LOB, or REF.

ORA-02329: column of datatype <varname>string</varname> cannot be unique or a primary key

Cause: An attempt was made to place a UNIQUE or a PRIMARY KEY constraint on a column of datatype VARRAY, nested table, object, LOB, FILE or REF.

Action: Change the column datatype or remove the constraint. Then retry the operation.

ORA-02330: datatype specification not allowed

Cause: An attempt was made to specify the data type in the column constraint specification of an object table.

Action: Remove data type specification and retry the operation.

ORA-02331: cannot create constraint on column of datatype <varname>string</varname>

Cause: An attempt was made to create a constraint on a column possessing a non-constrainable datatype -- VARRAY, nested table, object, LOB, FILE, or REF.

Action: Change the column datatype, or remove the constraint.

ORA-02332: cannot create index on attributes of this column

Cause: An attempt was made to create an index on an attributes of an object type column.

Action: Do not specify the index on the attribute.

ORA-02333: cannot create constraints on attributes of this column

Cause: An attempt was made to create a constraint on an attribute of an object type column.

Action: Remove the constraint or change the object type.

ORA-02334: cannot infer type for column

Cause: A datatype was not declared for this column (in the CREATE TABLE) and an attempt was made to create a constraint on an attribute of this column.

Action: Declare a datatype for the column.

ORA-02335: invalid datatype for cluster column

Cause: An attempt was made to declare a CLUSTER column of datatype object, REF, nested table, VARRAY, LOB, or FILE.

Action: Remove the CLUSTER column or change the datatype of the column.

ORA-02336: column attribute cannot be accessed

Cause: An attempt was made to extract an attribute of an object type column.

Action: Change the object type for the column and retry the operation.

ORA-02337: not an object type column

Cause: An attempt was made to use dotted notation on a non-ADT column; that is, "a.b.c" where "a" is not an object type.

Action: Either change the column type to an object type or do not perform this operation.

ORA-02338: missing or invalid column constraint specification

Cause: A column constraint was not specified.

Action: Remove the column specification or specify a column constraint. Then retry the operation.

ORA-02339: invalid column specification

Cause: An attempt was made to specify the PACKED or UNPACKED keyword for a non-object type column.

Action: Remove the PACKED or UNPACKED keyword in the column specification and retry the operation.

ORA-02340: invalid column specification

Cause: An attempt was made to specify an UNPACKED column within a packed table.

Action: Remove the UNPACKED keyword in the column specification.

ORA-02342: replacement type has compilation errors

Cause: The use of the ALTER...REPLACE statement on a valid type caused a compilation error.

Action: Use the ALTER...REPLACE statement to replace the type with a valid type which does not cause compilation errors.

ORA-02344: cannot revoke execute on a type with table dependents

Cause: An attempt was made to revoke execute on a type that has dependents.

Action: Drop all table(s) depending on the type, then retry the operation, or use the FORCE option.

ORA-02345: cannot create a view with column based on CURSOR operator

Cause: A CURSOR operator was used as one of the SELECT elements in the subquery of a CREATE VIEW or CREATE TABLE ... AS SELECT statement.

Action: Remove the CURSOR operator and replace it with the CAST operator.

ORA-02347: cannot grant privileges on columns of an object table

Cause: An attempt was made to grant privileges on the columns of an object table.

Action: n/a

ORA-02348: cannot create VARRAY column with embedded LOB

Cause: An attempt was made to create a column of a VARRAY type which has an embedded LOB attribute. The LOB could be an attribute of a subtype of the declared type of VARRAY's element.

Action: Remove offending attribute from type. If it is a subtype attribute then declare the VARRAY column NOT SUBSTITUTABLE.

ORA-02349: invalid user-defined type - type is incomplete

Cause: An attempt was made to use an incomplete type definition as a column or table datatype.

Action: Complete the type definition and retry the operation.

ORA-02351: internal error: <varname>string</varname>\n

Cause: An unexpected error condition was detected.

Action: Make a note of the error number and message and contact Oracle Support Services.

ORA-02352: error setting an OCI attribute: <varname>string</varname>\n

Cause: An OCI error has occurred.

Action: The table or column referenced may not be accessible. Contact Oracle Support Services if the problem cannot be resolved.

ORA-02353: error fetching an OCI attribute: <varname>string</varname>\n

Cause: An OCI error has occurred.

Action: The table or column referenced may not be accessible. Contact Oracle Support Services if the problem cannot be resolved.

ORA-02354: error in exporting/importing data\n<varname>string</varname>

Cause: An error has occurred in a stream export or import operation. This message will be followed by another message giving more details about this error.

Action: See export/import documentation for an explanation of the second error message.

ORA-02355: error opening file: <varname>string</varname>\n

Cause: An attempt to open the specified file for data export/import failed.

Action: Review the error message. Resolve the problem and retry the the operation. Contact Oracle Support Services if the problem cannot be resolved.

ORA-02356: The database is out of space. The load cannot continue

Cause: The load was discontinued due to space exhaustion in the database.

Action: Add space for the specified table.

ORA-02357: header in file <varname>string</varname> may not contain correct information\n

Cause: The header may be corrupted.

Action: Contact Oracle Support Services.

ORA-02358: error in exporting or importing data\n

Cause: An error has occurred in a stream export or import operation.

Action: Contact Oracle Support Services.

ORA-02359: database version in file <varname>string</varname> is not valid\n

Cause: The specified file could not be used for this load because its database version was not compatible with the database version in the other files in the DUMPFILE clause.

Action: Verify all the files in the DUMPFILE clause are from the same unload operation.

ORA-02360: fatal error during data export/import initialization\n

Cause: An unexpected error occurred during initialization for data export/import.

Action: Contact Oracle Support Services.

ORA-02361: error while attempting to allocate <varname>number</varname> bytes of memory\n

Cause: An error occurred while trying to allocate memory. This is likely caused by insufficient memory.

Action: Reconnect to the instance and retry the operation.

ORA-02362: error closing file: <varname>string</varname>\n

Cause: An attempt to close the specified file for data export/import failed.

Action: Review the error message. Resolve the problem and retry the the operation. Contact Oracle Support Services if the problem cannot be resolved.

ORA-02363: error reading from file: <varname>string</varname>\n

Cause: An attempt to read from the specified file for data export/import failed.

Action: Review the error message. Resolve the problem and retry the the operation.
Contact Oracle Support Services if the problem cannot be resolved.

ORA-02364: error writing to file: <varname>string</varname>\n

Cause: An attempt to write to the specified file for data export or import failed.

Action: Review the error message. Resolve the problem and retry the the operation.
Contact Oracle Support Services if the problem cannot be resolved.

ORA-02365: error seeking in file: <varname>string</varname>\n

Cause: An attempt to seek to the specified position in file failed.

Action: Review the error message. Resolve the problem and retry the the operation.
Contact Oracle Support Services if the problem cannot be resolved.

ORA-02366: The following index(es) on table <varname>string</varname> were processed:

Cause: The table had some indexes which were loaded if there were no errors.

Action: None

ORA-02367: read ended but had expected more data from file <varname>string</varname>\n

Cause: A truncated or incomplete file was used for the load operation.

Action: Verify unload operation completed successfully and that the files had not been accidentally truncated.

ORA-02368: the following file is not valid for this load operation\n

Cause: A file could not be used for this load. See the following message for more information.

Action: Verify all the files in the DUMPFIL clause are from the same unload operation and that the unload was successful.

ORA-02369: internal number in header in file <varname>string</varname> is not valid\n

Cause: The specified file could not be used for this load because the internal number in the header was not valid.

Action: If the dump files were transferred over, verify the transfer operation was done correctly.

ORA-02370: internal metadata in file <varname>string</varname> is not valid\n

Cause: The specified file could not be used for this load because the internal metadata stored in this file does not match the metadata stored in the first file piece set.

Action: Verify all the files in the DUMPFIL clause are from the same unload operation.

ORA-02371: Loader must be at least version <varname>string</varname>.<varname>string</varname>.<varname>string</varname>.<varname>string</varname> for direct path

Cause: The loader being used is incompatible with this version of the kernel.

Action: Upgrade your loader to at least the specified version or use the conventional path.

ORA-02372: data for row: <varname>string</varname> \n

Cause: A conversion error occurred while loading data into a table. The message shows values for the field in the row that had the conversion error.

Action: None. This is only an informational message.

ORA-02373: Error parsing insert statement for table <varname>string</varname>.

Cause: self-evident.

Action: Check the error given below this one.

ORA-02374: conversion error loading table <varname>string</varname>.<varname>string</varname>

Cause: A row could not be loaded into the table because there was a conversion error for one or more columns in a row.

Action: See the message that follows for more information about the row that could not be loaded. To avoid this error, make sure the definition of the table being imported matches the definition of the table being exported.

ORA-02375: conversion error loading table <varname>string</varname>.<varname>string</varname> partition <varname>string</varname>

Cause: A row could not be loaded into the table because there was a conversion error for one or more columns in a row.

Action: See the message that follows for more information about the row that could not be loaded. To avoid this error, make sure the definition of the table being imported matches the definition of the table being exported.

ORA-02376: invalid or redundant resource

Cause: a create, or alter profile command which names a resource not yet defined, or try to specify same resource twice.

Action: define resource first

ORA-02377: invalid resource limit

Cause: specifying limit of 0

Action: specify limit > 0

ORA-02378: duplicate resource name <varname>string</varname>

ORA-02379: profile <varname>string</varname> already exists

Cause: Try to create a profile which already exist

Action: n/a

ORA-02380: profile <varname>string</varname> does not exist

Cause: Try to assign a user to a non-existent profile

Action: n/a

ORA-02381: cannot drop PUBLIC_DEFAULT profile

Cause: Try to drop PUBLIC_DEFAULT profile

Action: n/a

ORA-02382: profile <varname>string</varname> has users assigned, cannot drop without CASCADE**ORA-02383: illegal cost factor**

Cause: Negative or UNLIMITED cost for this resource

Action: n/a

ORA-02390: exceeded COMPOSITE_LIMIT, you are being logged off**ORA-02391: exceeded simultaneous SESSIONS_PER_USER limit**

Cause: An attempt was made to exceed the maximum number of concurrent sessions allowed by the SESSION_PER_USER clause of the user profile.

Action: End one or more concurrent sessions or ask the database administrator to increase the SESSION_PER_USER limit of the user profile.

ORA-02392: exceeded session limit on CPU usage, you are being logged off**ORA-02393: exceeded call limit on CPU usage****ORA-02394: exceeded session limit on IO usage, you are being logged off****ORA-02395: exceeded call limit on IO usage****ORA-02396: exceeded maximum idle time, please connect again**

Cause: as stated

Action: n/a

ORA-02397: exceeded PRIVATE_SGA limit, you are being logged off

Cause: Only when using TP monitor

Action: expand limit

ORA-02398: exceeded procedure space usage

Cause: Stored procedure used up too much space in SYSTEM Tablespace

Action: Use less stored procedure

ORA-02399: exceeded maximum connect time, you are being logged off

Cause: As stated

Action: n/a

ORA-02400: explain plan output buffer size limit exceeded

Cause: Internally this error is raised and caught to handle cases where the plan output exceeds the buffer size. The output is truncated in cases.

Action: This error should never be seen externally.

ORA-02401: cannot EXPLAIN view owned by another user

Cause: The view specified in the SQL statement belongs to another user and cannot be explained.

Action: Create a view with the same definition that belongs to current user.

ORA-02402: PLAN_TABLE not found

Cause: The table used by EXPLAIN to store row source information does not exist in the current schema.

Action: Create a plan table in the current schema or use the INTO clause of the statement to put the results of the explain command in an existing plan table.

ORA-02403: plan table does not have correct format

Cause: The explicit plan table does not have the appropriate field definitions.

Action: Redefine the plan table to have the appropriate field definitions.

ORA-02404: specified plan table not found

Cause: The specified plan table does not exist.

Action: Create the specified plan table or use an existing plan table.

ORA-02405: invalid sql plan object provided

Cause: The user provided a NULL, empty, or malformed object of type SQL_PLAN_TABLE_TYPE

Action: Provide a new, properly formed object to the function

ORA-02420: missing schema authorization clause

Cause: the AUTHORIZATION clause is missing from a create schema statement.

Action: Precede the schema authorization identifier with the AUTHORIZATION keyword.

ORA-02421: missing or invalid schema authorization identifier

Cause: the schema name is missing or is incorrect in an authorization clause of a create schema statement.

Action: If the name is present, it must be the same as the current schema.

ORA-02422: missing or invalid schema element

Cause: A statement other than a create table, create view, or grant privilege appears in a create schema statement.

Action: Self-evident.

ORA-02423: schema name does not match schema authorization identifier

Cause: a table definition with a schema name prepended to the table name does not match the schema name provided in the authorization clause of a create schema statement.

Action: make sure the schema names match.

ORA-02424: potential circular view references or unknown referenced tables

Cause: the create schema statement contains views that depend on other views in the containing create schema statement or they contain references to unknown tables.

Action: create the dependent views in a separate create schema statement and make sure all referenced tables are either defined in the create schema statement or exist outside the statement.

ORA-02425: create table failed

Cause: a create table statement failed in the create schema statement.

Action: the cause for failure will be presented below this error message. Follow appropriate action(s) as suggested by the subsequent error message.

ORA-02426: privilege grant failed

Cause: a grant privilege statement failed in the create schema statement.

Action: the cause for failure will be presented below this error message. Follow appropriate action(s) as suggested by the subsequent error message.

ORA-02427: create view failed

Cause: a create view statement failed in the create schema statement.

Action: the cause for failure will be presented below this error message. Follow appropriate action(s) as suggested by the subsequent error message.

ORA-02428: could not add foreign key reference

Cause: could not add a foreign key reference because of error in declaration. Either referenced table does not exist or table does not have an unique key.

Action: make sure referenced table exists and/or has unique key

ORA-02429: cannot drop index used for enforcement of unique/primary key

Cause: user attempted to drop an index that is being used as the enforcement mechanism for unique or primary key.

Action: drop the constraint instead of the index.

ORA-02430: cannot enable constraint (<varname>string</varname>) - no such constraint

Cause: the named constraint does not exist for this table.

Action: Obvious

ORA-02431: cannot disable constraint (<varname>string</varname>) - no such constraint

Cause: the named constraint does not exist for this table.

Action: Obvious

ORA-02432: cannot enable primary key - primary key not defined for table

Cause: Attempted to enable a primary key that is not defined for the table.

Action: Need to add a primary key definition for the table.

ORA-02433: cannot disable primary key - primary key not defined for table

Cause: Attempted to disable a primary key that is not defined for the table.

Action: None

ORA-02434: cannot enable unique(<varname>string</varname>) - unique key not defined for table

Cause: attempted to enable a unique key that is not defined for the table.

Action: None

ORA-02435: cannot disable unique(<varname>string</varname>) - unique key not defined for table

Cause: attempted to disable a unique key that is not defined for the table.

Action: None

ORA-02436: date or system variable wrongly specified in CHECK constraint

Cause: An attempt was made to use a date constant or system variable, such as USER, in a check constraint that was not completely specified in a CREATE TABLE or ALTER TABLE statement. For example, a date was specified without the century.

Action: Completely specify the date constant or system variable. Setting the event 10149 allows constraints like "a1 > '10-MAY-96'", which a bug permitted to be created before version 8.

ORA-02437: cannot validate (<varname>string</varname>.<varname>string</varname>) - primary key violated

Cause: attempted to validate a primary key with duplicate values or null values.

Action: remove the duplicates and null values before enabling a primary key.

ORA-02438: Column check constraint cannot reference other columns

Cause: attempted to define a column check constraint that references another column.

Action: define it as a table check constraint.

ORA-02439: Unique index on a deferrable constraint is not allowed

Cause: attempted to enable a deferrable primary key/unique constraint that has an existing unique index on the constraint columns.

Action: Drop the index on the constraint columns or make the constraint not deferrable.

ORA-02440: Create as select with referential constraints not allowed

Cause: create table foo (... ref. con. ...) as select ...;

Action: Create the table as select, then alter the table to add the constraints afterwards.

ORA-02441: Cannot drop nonexistent primary key

Cause: alter table drop primary key - primary key does not exist.

Action: None

ORA-02442: Cannot drop nonexistent unique key

Cause: alter table drop unique (<varname>col list</varname>) - unique specification does not exist.

Action: make sure column list for unique constraint is correct.

ORA-02443: Cannot drop constraint - nonexistent constraint

Cause: alter table drop constraint <constraint_name>

Action: make sure you supply correct constraint name.

ORA-02444: Cannot resolve referenced object in referential constraints

Cause: attempted to define foreign key referencing an object which cannot be resolved to a base table reference

Action: referential constraints can only be defined on objects which can be resolve to base table reference

ORA-02445: Exceptions table not found

Cause: the explicit or implicit declared exceptions table does not exist.

Action: Create the table then issue the enable command again.

ORA-02446: CREATE TABLE ... AS SELECT failed - check constraint violated

Cause: An attempt was made to use a CREATE TABLE ... AS SELECT statement when some rows violated one or more CHECK constraints.

Action: Do not select rows that violate constraints.

ORA-02447: cannot defer a constraint that is not deferrable

Cause: An attempt was made to defer a nondeferrable constraint

Action: Drop the constraint and create a new one that is deferrable

ORA-02448: constraint does not exist

Cause: The named constraint does not exist

Action: Stop trying to do something with a nonexistent constraint

ORA-02449: unique/primary keys in table referenced by foreign keys

Cause: An attempt was made to drop a table with unique or primary keys referenced by foreign keys in another table.

Action: Before performing the above operations the table, drop the foreign key constraints in other tables. You can see what constraints are referencing a table by issuing the following command: SELECT * FROM USER_CONSTRAINTS WHERE TABLE_NAME = "tabnam";

ORA-02450: Invalid hash option - missing keyword IS

Cause: Missing IS keyword.

Action: Specify HASH IS option.

ORA-02451: duplicate HASHKEYS specification

Cause: The HASHKEYS option is specified more than once.

Action: Only specify the HASHKEYS option once.

ORA-02452: invalid HASHKEYS option value

Cause: The specified HASHKEYS option must be an integer value.

Action: Specify an appropriate value.

ORA-02453: duplicate HASH IS specification

Cause: The HASH IS option is specified more than once.

Action: only specify the HASH IS option once.

ORA-02454: Number of hash keys per block (<varname>string</varname>) exceeds maximum of <varname>string</varname>

Cause: The SIZE argument is too small.

Action: Increase the SIZE argument.

ORA-02455: The number of cluster key column must be 1

Cause: When specifying the HASH IS option, the number of key columns must be 1.

Action: Either do not specify the HASH IS option or reduce the number of key columns.

ORA-02456: The HASH IS column specification must be NUMBER(*,0)

Cause: The column specification must specify an integer.

Action: Specify the column definition as type NUMBER(precision, 0).

ORA-02457: The HASH IS option must specify a valid column

Cause: The HASH IS column name is not specified in the cluster definition.

Action: Specify a valid column name.

ORA-02458: HASHKEYS must be specified for a HASH CLUSTER

Cause: The HASHKEYS option must be specified when creating a HASH CLUSTER.

Action: Specify the HASHKEYS option.

ORA-02459: Hashkey value must be a positive integer

Cause: The value of the hash key was not a positive number.

Action: Specify a positive integer.

ORA-02460: Inappropriate index operation on a hash cluster

Cause: An attempt to create a cluster index was issued on a hash cluster.

Action: Do not attempt to create such an index.

ORA-02461: Inappropriate use of the INDEX option

Cause: This option is only valid for non hash clusters.

Action: Do not specify this option.

ORA-02462: Duplicate INDEX option specified

Cause: The INDEX option is specified more than once.

Action: Only specify the INDEX option once.

ORA-02463: Duplicate HASH IS option specified

Cause: The HASH IS option is specified more than once.

Action: Only specify the HASH IS option once.

ORA-02464: Cluster definition can not be both HASH and INDEX

Cause: The cluster can either be a hash or indexed cluster - not both.

Action: Remove either the HASH IS or INDEX options.

ORA-02465: Inappropriate use of the HASH IS option

Cause: This option is only valid for clusters

Action: Do not specify this option

ORA-02466: The SIZE and INITRANS options cannot be altered for HASH CLUSTERS.

Cause: An attempt was made to change the SIZE and INITRANS options after the hash cluster was created.

Action: Do not specify this option.

ORA-02467: Column referenced in expression not found in cluster definition

Cause: A column in the hash is expression was not present in cluster definition.

Action: Recreate the cluster and correct the error in hash expression.

ORA-02468: Constant or system variable wrongly specified in expression

Cause: A constant or system variable was specified in the hash expression.

Action: Recreate the cluster and correct the error in hash expression.

ORA-02469: Hash expression does not return an Oracle Number.

Cause: Result of evaluating hash expression is not an Oracle Number.

Action: Recreate the cluster and correct the error in hash expression.

ORA-02470: TO_DATE, USERENV, or SYSDATE incorrectly used in hash expression.

Cause: An attempt was made to specify SYSDATE, UID, USER, ROWNUM, or LEVEL in hash expression.

Action: Re-create the cluster and correct the error in hash expression.

ORA-02471: SYSDATE, UID, USER, ROWNUM, or LEVEL incorrectly used in hash expression.

Cause: SYSDATE, UID, USER, ROWNUM, or LEVEL are not allowed in hash expressions.

Action: Recreate the cluster and remove the offending keywords.

ORA-02472: PL/SQL functions not allowed in hash expressions

Cause: A PL/SQL function was used in the hash expression.

Action: Recreate the cluster and remove the PL/SQL function.

ORA-02473: Error while evaluating the cluster's hash expression.

Cause: An error occurred while evaluating the clusters hash expression.

Action: Correct the query and retry.

ORA-02474: Fixed hash area extents used (<varname>string</varname>) exceeds maximum allowed (<varname>string</varname>)

Cause: The number of extents required for creating the fixed hash area exceeds the maximum number allowed.

Action: Reduce the number of extents required by increasing the extent allocation sizes within the STORAGE clause.

ORA-02475: maximum cluster chain block count of <varname>string</varname> has been exceeded

Cause: The number of blocks in a cluster chain exceeds the maximum number allowed.

Action: Increase SIZE parameter in CREATE CLUSTER statement or reconsider suitability of cluster key.

ORA-02476: can not create index due to parallel direct load on table

Cause: A parallel direct load is occurring to the specified table.

Action: Retry statement after load is complete.

ORA-02477: can not perform parallel direct load on object <varname>string</varname>

Cause: A parallel direct load is not possible because an index is being created on the table.

Action: Retry load after index creation is complete.

ORA-02478: merge into base segment would overflow MAXEXTENTS limit

Cause: Merge of temporary segment into base segment failed because MAXEXTENTS was larger than the total in the temp and base segments

Action: Use a larger value for MAXEXTENTS on the base segment or make the extents in the temporary segments larger

ORA-02479: error while translating file name for parallel load

Cause: An invalid file name was specified to load data into.

Action: Specify a valid database file.

ORA-02481: Too many processes specified for events (max <varname>string</varname>)

Cause: Too many processes specified than allowed per event.

Action: Enter fewer processes by using ranges or wildcards if possible.

ORA-02482: Syntax error in event specification (<varname>string</varname>)

Cause: Illegal event string

Action: Enter a legal event string

ORA-02483: Syntax error in process specification (<varname>string</varname>)

Cause: Illegal process string

Action: Enter a legal process string

ORA-02484: Invalid _trace_buffers parameter specification (<varname>string</varname>)

Cause: Bad process or size in _trace_buffers INIT.ORA parameter.

Action: n/a

ORA-02485: Invalid _trace_options parameter specification (<varname>string</varname>)

Cause: Bad syntax for _trace_options INIT.ORA parameter.

Action: n/a

ORA-02486: Error in writing trace file <varname>string</varname>

Cause: Error occurred in creating/writing the file.

Action: Check file name and make sure it is constructed properly. Also, check permissions for directories.

ORA-02487: Error in converting trace data

Cause: Incompatible binary trace data was specified.

Action: Check the format of the input data.

ORA-02488: Error encountered when accessing file [<varname>string</varname>] for trace conversion

Cause: An attempt was made to open or access the trace file during a trace conversion.

Action: Check the permissions for both input and output files. Also, check the file compatibility for the trace conversion.

ORA-02490: missing required file size in RESIZE clause

Cause: No value was specified for the RESIZE clause.

Action: Use correct syntax.

ORA-02491: missing required keyword ON or OFF in AUTOEXTEND clause

Cause: The keyword ON or OFF was not specified for the AUTOEXTEND clause.

Action: Use correct syntax.

ORA-02492: missing required file block increment size in NEXT clause

Cause: No value was specified for the NEXT clause.

Action: Use correct syntax.

ORA-02493: invalid file increment size in NEXT clause

Cause: A non-integer value was used for the NEXT clause of the DATAFILE list.

Action: Use correct syntax.

ORA-02494: invalid or missing maximum file size in MAXSIZE clause

Cause: UNLIMITED was not specified, or an invalid integer value was specified, for the MAXSIZE clause in the DATAFILE file list. The MAXSIZE value cannot be smaller than the SIZE value.

Action: Use correct syntax.

ORA-02495: cannot resize file <varname>string</varname>, tablespace <varname>string</varname> is read only

Cause: An attempt was made to resize a data file in a tablespace that is read only.

Action: Change the tablespace to read/write and retry the resize operation.

ORA-02700: osnoraenv: error translating ORACLE_SID

Cause: Two-task driver could not find the value of ORACLE_SID in the environment.

Action: Make sure that the ORACLE_SID environment variable has been properly set and exported.

ORA-02701: osnoraenv: error translating oracle image name

Cause: ORACLE_HOME environment variable not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

ORA-02702: osnoraenv: error translating orapop image name

Cause: ORACLE_HOME environment variable not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

ORA-02703: osnpopipe: pipe creation failed

Cause: The pipe driver failed to create pipes for communications with the orapop process.

Action: You have probably exceeded the maximum number of open file descriptors per user or the system file table is full. Note the operating system error code and contact your system administrator.

ORA-02704: osndopop: fork failed

Cause: The two-task driver could not fork orapop.

Action: Verify that there are enough system resources to support another process. The user or system process limit may have been exceeded, or the amount of free memory or swap space may be temporarily insufficient.

ORA-02705: osnpol: polling of communication channel failed

Cause: The pipe driver failed while polling the communications channel.

Action: Contact your customer support representative.

ORA-02706: osnshs: host name too long

Cause: The length of your host-string specified by the TWO_TASK environment variable exceeds the ORACLE system-imposed limit.

Action: Contact your customer support representative.

ORA-02707: osnacx: cannot allocate context area

Cause: The invoked Unix two-task driver could not allocate heap space for the context area.

Action: Contact your customer support representative.

ORA-02708: osnrntab: connect to host failed, unknown ORACLE_SID

Cause: The invoked Unix two-task driver failed to find an entry in oratab for the sid you supplied.

Action: First, check whether you have read access to oratab, and see if the desired sid is there. Add an entry to oratab for the desired sid, if necessary.

ORA-02709: osnpop: pipe creation failed

Cause: The pipe driver failed to create pipes for two-task communications with the oracle shadow process.

Action: You have probably exceeded the maximum number of open file descriptors per user or the system file table is full. Note the operating system error code and contact your system administrator.

ORA-02710: osnpop: fork failed

Cause: The pipe driver could not fork the oracle shadow process.

Action: Verify that there are enough system resources to support another process. The user or system process limit may have been exceeded, or the amount of free memory or swap space may be temporarily insufficient.

ORA-02711: osnpvalid: write to validation channel failed

Cause: The pipe driver failed to write to the orapop process.

Action: Contact your customer support representative.

ORA-02712: osnpop: malloc failed

Cause: The pipe driver failed to allocate enough heap space for its context area buffers.

Action: Contact your customer support representative.

ORA-02713: osnprd: message receive failure

Cause: The pipe driver failed to read a message from the communications channel.

Action: Contact your customer support representative.

ORA-02714: osnpwr: message send failure

Cause: The pipe driver failed to write a message to the communications channel.

Action: Contact your customer support representative.

ORA-02715: osnpgetbrkmsg: message from host had incorrect message type

Cause: The pipe driver received a message having an unrecognizable message type.

Action: Contact your customer support representative.

ORA-02716: osnpgetdatmsg: message from host had incorrect message type

Cause: The Pipe driver received a message having an unrecognizable message type.

Action: Contact your customer support representative.

ORA-02717: osnpfs: incorrect number of bytes written

Cause: The Pipe driver sent a message that was apparently successful, but the number of bytes transmitted did not match the number of bytes furnished to the driver.

Action: Contact your customer support representative.

ORA-02718: osnprs: reset protocol error

Cause: The two-task driver could not reset the connection.

Action: Contact your customer support representative.

ORA-02719: osnfop: fork failed

Cause: The fast driver could not fork the oracle shadow process.

Action: Verify that there are enough system resources to support another process. The user or system process limit may have been exceeded, or the amount of free memory or swap space may be temporarily insufficient.

ORA-02720: osnfop: shmat failed

Cause: When the fast driver was invoked, processes failed to attach to the shared memory buffer. You probably supplied an illegal shared memory attach address, or the system ran out of data space to accomodate the buffer.

Action: Try invoking the Fast driver later, or use the default attach address.

ORA-02721: osnseminit: cannot create semaphore set

Cause: The Fast driver failed to get a semaphore set.

Action: The system-imposed limit on semaphores or semaphore identifiers may have been exceeded. Read the returned operating system error code and check with your system administrator.

ORA-02722: osnpui: cannot send break message to orapop

Cause: The Pipe driver could not send a break message to orapop.

Action: Contact your customer support representative.

ORA-02723: osnpui: cannot send break signal

Cause: The Pipe driver could not send a break message to the ORACLE shadow process.

Action: Contact your customer support representative.

ORA-02724: osnpbr: cannot send break message to orapop

Cause: The Pipe driver could not send a break message to orapop.

Action: Contact your customer support representative.

ORA-02725: osnpbr: cannot send break signal

Cause: The Pipe driver could not send a break message to the ORACLE shadow process.

Action: Kill system call failed. Check errno and contact customer support.

ORA-02726: osnpop: access error on oracle executable

Cause: The Pipe driver could not access the oracle executable.

Action: Check the permissions on the ORACLE executable and each component of the ORACLE_HOME/bin path.

ORA-02727: osnpop: access error on orapop executable

Cause: The Pipe driver could not access the orapop executable.

Action: Check the permissions on the orapop executable and each component of the ORACLE_HOME/bin path.

ORA-02728: osnfop: access error on oracle executable

Cause: The Fast driver could not access the oracle executable.

Action: Check the permissions on the ORACLE executable and each component of the ORACLE_HOME/bin path.

ORA-02729: osncon: driver not in osntab

Cause: The driver you have specified is not supported.

Action: Check with your database administrator which drivers are supported.

ORA-02730: osnrnf: cannot find user logon directory

Cause: The driver you have specified could not find your logon directory while searching for your local .sqlnet file.

Action: Set and export the HOME environment variable to identify your home directory. Check with your system administrator to make sure that your uid and home directory are correct in the /etc/passwd file.

ORA-02731: osnrnf: malloc of buffer failed

Cause: The specified driver could not find enough heap space to malloc a buffer.

Action: Contact your customer support representative.

ORA-02732: osnrnf: cannot find a matching database alias

Cause: Database alias specified was not identified in either \$HOME/.sqlnet or /etc/sqlnet.

Action: Create the alias in a file called .sqlnet in your home directory for personal use or ask your system administrator to create the alias in /etc/sqlnet for system-wide use.

ORA-02733: osnsnf: database string too long

Cause: While converting a database alias to a database ID, the resulting database ID string exceeded the ORACLE system-imposed limit.

Action: Contact your customer support representative.

ORA-02734: osnftt: cannot reset shared memory permission

Cause: The Fast driver was unable to reset shared memory permissions.

Action: Contact your customer support representative.

ORA-02735: osnfpm: cannot create shared memory segment

Cause: The Fast driver failed to create a shared memory segment for two-task communication.

Action: Check whether the system-imposed limit on shared memory identifiers has already been reached for your system.

ORA-02736: osnfpm: illegal default shared memory address

Cause: The Fast driver failed to establish a default shared memory address.

Action: Contact your customer support representative.

ORA-02737: osnpcl: cannot tell orapop to exit

Cause: The Pipe driver failed to send orapop the command to exit.

Action: Contact your customer support representative.

ORA-02738: osnpwrtrbrkmsg: incorrect number of bytes written

Cause: The pipe driver apparently sent an incomplete break message.

Action: Contact your customer support representative.

ORA-02739: osncon: host alias is too long

Cause: The alias used for a sqlnet host is longer than 161 characters.

Action: Use a shorter alias.

ORA-02750: osnfsmmap: cannot open shared memory file ?/dbs/ftt_<varname>pid</varname>.dbf

Cause: The Fast driver failed to create a shared memory file for two-task communication.

Action: Check the permissions on the directory ?/dbs

ORA-02751: osnfsmmap: cannot map shared memory file

Cause: The Fast driver failed to map a shared memory file for two-task communication.

Action: Contact your customer support representative.

ORA-02752: osnfsmmap: illegal shared memory address

Cause: The Fast driver failed to attach shared memory at the expected location.

Action: Contact your customer support representative.

ORA-02753: osnfsmmap: cannot close shared memory file

Cause: The Fast driver cannot close the shared memory file.

Action: Contact your customer support representative.

ORA-02754: osnfsmmap: cannot change shared memory inheritance

Cause: The Fast driver could not alter the inheritance attributes of the shared memory.

Action: Contact your customer support representative.

ORA-02755: osnfsmcre: cannot create chared memory file ?/dbs/ftt_<varname>pid</varname>.dbf

Cause: The Fast driver failed to create a file for shared memory.

Action: Check the permissions on the directory ?/dbs

ORA-02756: osnfsmnam: name translation failure

Cause: The Fast driver encountered an error translating the shared memory filename ?/dbs/ftt_<varname>pid</varname>.dbf.

Action: Contact your customer support representative.

ORA-02757: osnfop: fork_and_bind failed

Cause: The Fast driver failed to fork a process onto the desired cluster and node number.

Action: Check the desired node number in sercose[0] and cluster ID in sercose[1]. If these seem valid, contact customer support.

ORA-02758: Allocation of internal array failed

Cause: The package was unable to allocate memory for an array because the system ran out of memory.

Action: Either reclaim memory by killing other processes or reboot the machine with more memory.

ORA-02759: Not enough request descriptors available

Cause: All of the package's request descriptors are in use performing other requests.

Action: Either wait until enough requests are done, or shut the package down and re-initialize it with more request descriptors.

ORA-02760: Client close of file failed.

Cause: The client was unable to close a file after forking the servers.

Action: This is a system problem - contact your System Administrator.

ORA-02761: File number to be canceled is negative.

Cause: The file number contained with the sfiov structure is less than zero.

Action: This may be a programming error. If it is not, contact ORACLE support.

ORA-02762: file number to be cancelled is greater than the maximum.

Cause: The file number contained with the sfiov structure is greater than the maximum.

Action: This may be a programming error. If it is not, contact ORACLE support.

ORA-02763: Unable to cancel at least one request

Cause: No requests were found that could be cancelled.

Action: This error can occur if all the requests dealing with that file number have already been filled.

ORA-02764: Invalid package mode

Cause: The mode of the package can only be parallel or duplex.

Action: See `sfa.h` for the correct values.

ORA-02765: Invalid maximum number of servers

Cause: The number of servers given was less than or equal to zero.

Action: Use a number greater than zero.

ORA-02766: Invalid maximum of request descriptors

Cause: The number of request descriptors was less than or equal to zero.

Action: Use a number greater than zero.

ORA-02767: Less than one request descriptor was allocated per server

Cause: The package requires that the number of request descriptors be greater than or equal to the number of servers used.

Action: Use a higher number

ORA-02768: Maximum number of files is invalid

Cause: The maximum number of files to be used by the package was less than or equal to zero.

Action: Use a positive number.

ORA-02769: Setting of handler for SIGTERM failed

Cause: The package was unable to set up handling by the server for the termination signal. This is an internal error.

Action: Contact ORACLE support.

ORA-02770: Total number of blocks is invalid

Cause: The total number of blocks to be allocated for use by the package was not greater than zero.

Action: Use a positive number.

ORA-02771: Illegal request time out value

Cause: The number was not a positive number.

Action: Use a positive number.

ORA-02772: Invalid maximum server idle time

Cause: The time given was not a positive number.

Action: Use a positive number.

ORA-02773: Invalid maximum client wait time

Cause: The time given was not a positive number.

Action: Use a positive number.

ORA-02774: Invalid request list latch time out value

Cause: The time given was not a positive number.

Action: Use a positive number.

ORA-02775: Invalid request done signal

Cause: The signal number was not a positive number.

Action: Use a positive number.

ORA-02776: Value for request done signal exceeds maximum

Cause: The value sent to the package for use as the "request done" signal exceeds the maximum allowed by the operating system.

Action: n/a

ORA-02777: Stat failed on log directory

Cause: The package was unable to get information about the directory in which the log files are to reside.

Action: Check the permissions on the directory or use a different directory name.

ORA-02778: Name given for the log directory is invalid

Cause: The name given for the directory in which the logs are to be kept does not correspond to a directory.

Action: Use a different name.

ORA-02779: Stat failed on core dump directory

Cause: The package was unable to get information about the directory into which the servers are to dump core in the event of an exception.

Action: Check the permissions on the directory or use a different directory name.

ORA-02780: Name given for the core dump directory is invalid

Cause: The name given for the directory in which the server processes are to dump core in the event of an exception does not correspond to a directory.

Action: Use a different name.

ORA-02781: Invalid value given for the timing wanted flag

Cause: The value given was not TRUE or FALSE.

Action: n/a

ORA-02782: Both read and write functions were not specified

Cause: To ensure that the functions act symmetrically, pointers to both the read and write functions must be given.

Action: Either specify both functions or specify neither. The package will supply its own functions.

ORA-02783: Both post and wait functions were not specified

Cause: To ensure that the functions act symmetrically, pointers to both the posting and waiting functions must be given.

Action: Either specify both functions or specify neither. The package will supply its own functions.

ORA-02784: Invalid shared memory ID specified

Cause: The ID of the segment specified for use as the shared buffer region was invalid.

Action: Use a different ID, or let the package specify its own.

ORA-02785: Invalid shared memory buffer size

Cause: The size given for the shared memory segment to be used as the shared buffer region was less than or equal to zero.

Action: Use a positive number.

ORA-02786: Size needed for shared region is greater than segment size

Cause: The size of the shared segment that was specified for the shared buffer region is less than the number of bytes required. The first field of the "additional information" field is the size needed. The second is the size of the segment.

Action: Use a larger size segment or let the package allocate its own.

ORA-02787: Unable to allocate memory for segment list

Cause: The package cannot allocate memory for an internal segment list because the system has run out of memory. The "additional information" field is the amount of memory that the package attempted to allocate.

Action: n/a

ORA-02788: Unable to find kernel process pointer in async process array

Cause: Internal error - Contact ORACLE support.

Action: n/a

ORA-02789: Maximum number of files reached

Cause: The maximum number of files that can be used for asynchronous I/O has been reached.

Action: Shut down the servers and re-initialize the package with a higher number.

ORA-02790: File name is too long

Cause: The length of the name of a file that is being opened for asynchronous I/O is longer than the maximum. The "additional information" field is the maximum length.

Action: Use a shorter name.

ORA-02791: Unable to open file for use with asynchronous I/O

Cause: The package could not open file for some reason.

Action: Check the file name.

ORA-02792: Unable to fstat() a file being used for asynchronous I/O.

Cause: The fstat(2) call on a file being used for asynchronous I/O failed.

Action: Check the file name.

ORA-02793: Close of asynchronous I/O failed.

Cause: The client was unable to close a file being used for asynchronous I/O.

Action: Contact ORACLE support - this should not happen.

ORA-02794: Client unable to get key for shared memory

Cause: The client was unable to get a key so that it obtain shared memory for use with shared memory.

Action: Contact ORACLE support - this is an internal error.

ORA-02795: Request list is empty

Cause: The client was signalled by a server that it was done with a request but the "done" list was empty.

Action: Internal error - contact ORACLE support.

ORA-02796: Done request is not in correct state

Cause: A request is not in the right state.

Action: Internal error - contact ORACLE support.

ORA-02797: No requests available

Cause: No free request descriptors are available.

Action: Wait until some requests are filled and then retry the request, or shutdown the servers and initialize the package with a higher number of requests.

ORA-02798: Invalid number of requests

Cause: The number of operations sent to either sfard() or sfawrite() is less than zero.

Action: This is a user programming error.

ORA-02799: Unable to arm signal handler

Cause: The arming of a signal handler for the "done" signal failed.

Action: Internal error - contact ORACLE support.

ORA-02800: Requests timed out

Cause: Some of the requests for asynchronous input or output were not serviced in the required amount of time.

Action: If the load on the system is high, it is possible that the timeout limit is too low. Reset it with sfainit(). If the server processes are dying due to unexpected signals, this is an internal error, and ORACLE support should be contacted.

ORA-02801: Operations timed out

Cause: Some asynchronous operations timed out in kernel mode.

Action: Internal error - contact ORACLE support.

ORA-02802: No idle servers available in parallel mode

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02803: Retrieval of current time failed

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02804: Allocation of memory failed for log file name

Cause: The client was unable to allocated a buffer for the name of the log file.

Action: Contact your System Administrator.

ORA-02805: Unable to set handler for SIGTPA

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02806: Unable to set handler for SIGALRM

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02807: Allocation of memory for I/O vectors failed.

Cause: The client was unable to allocate memory for the array of I/O vectors that the servers are to use.

Action: Contact your System Administrator.

ORA-02808: Allocation of memory of open files array failed.

Cause: The client was unable to allocate memory for an array of flags that the servers are to use.

Action: Contact your System Administrator.

ORA-02809: Jump buffer not valid

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02810: Unable to make temporary file name for memory mapped file**ORA-02811: Unable to attach shared memory segment****ORA-02812: Bad attach address****ORA-02813: Unable to make temporary file name in order to get key**

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02814: Unable to get shared memory

Cause: Shmget(2) failed.

Action: Check the UNIX number. If you are unsure about what it means, contact ORACLE customer support.

ORA-02815: Unable to attach shared memory

Cause: Shmat(2) failed.

Action: Check the UNIX number. If you are unsure about what it means, contact ORACLE customer support.

ORA-02816: Unable to kill a process

Cause: A server did not die after being sent a kill signal.

Action: The process may be a runaway - contact ORACLE customer support.

ORA-02817: Read failed

Cause: A server could not read a requested amount of data.

Action: Check the call to sfard(). An incorrect file descriptor may have been sent to sfard(). The number in the "additional information" field is the starting block number of the data segment being read in.

ORA-02818: Less than the number of blocks requested was read in

Cause: A server could not read in the request amount of data. The first number in the "additional information" field is the block number being read in. The second is the actual number of bytes that was read in.

Action: This is a programming error.

ORA-02819: Write failed

Cause: A server was unable to perform a write. The number in the "additional information" field is the starting block number of the data segment being written out. The first number in the "additional information" field is the block number being written out. The second is the actual number of bytes that was written out. The disk may have filled up.

Action: Check the UNIX error number.

ORA-02820: Unable to write the requested number of blocks

Cause: A server could not write the requested amount of data out to disk. The disk may have run out of space.

Action: Check the UNIX error number.

ORA-02821: Unable to read the requested number of blocks.

Cause: A server could not read the number of blocks that was requested. The end of the file may have been read.

Action: Check the file on disk.

ORA-02822: Invalid block offset

Cause: A server was unable to seek to the designated block.

Action: Check the UNIX error number.

ORA-02823: Buffer is not aligned.

Cause: The buffer on which an I/O is being done is not on the correct boundary.

Action: Check the calling program.

ORA-02824: Request free list is empty

Cause: The list from which the package allocates request descriptors is empty because all of the descriptors is in use.

Action: Wait until some become free, or initialize the package with a higher number of request descriptors.

ORA-02825: Request on free list was not free

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02826: Illegal block size

Cause: A negative number was given for the I/O block size to be used by the asynchronous I/O package.

Action: This is a programming error - use either a positive number or zero to get the default value.

ORA-02827: Invalid file number

Cause: The file number upon which an operation is to be done is either less than zero or greater than the maximum number of files that can be open.

Action: This is a programming error. Since the calling program should not touch this number, this is a programming error.

ORA-02828: Segment free list is empty

Cause: No segments are available to be allocated.

Action: Free some segments or shut down the package and re-initialize it with a higher number of segments.

ORA-02829: No segment of the proper size is available

Cause: No segment of the proper size is ready for use by the caller.

Action: Free some segments and try again.

ORA-02830: Segment could not be split - no free segments available

Cause: A segment that is larger than that desired could not be split because no free segment was available.

Action: Free some segments and try again.

ORA-02831: Segment deallocation failed - empty segment list

Cause: The caller attempted to deallocate a segment but the "in use" list was empty. This is a programming error.

Action: Check the calling program.

ORA-02832: Segment deallocation failed - segment not on list

Cause: The caller attempted to deallocate a segment that was not on the "in use" list. This is a programming error.

Action: Check the calling program.

ORA-02833: Server was unable to close file

Cause: A server was unable to close a file being used for asynchronous I/O.

Action: See the UNIX error number for more information.

ORA-02834: Server unable to open file

Cause: The server was unable to open a file for use with asynchronous I/O.

Action: Check the UNIX error number for more information.

ORA-02835: Server unable to send signal to client

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02836: Unable to create temporary key file

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02837: Unable to unlink temporary file

Cause: Internal error.

Action: Contact ORACLE support.

ORA-02838: Unable to arm signal handler for the alarm signal

Cause: The arming of a signal handler for the alarm signal failed.

Action: Internal error - contact ORACLE support.

ORA-02839: Sync of blocks to disk failed.

Cause: The server was unable to flush its writes out to disk.

Action: Check the UNIX error number.

ORA-02840: Open of log file by client failed

Cause: The client process was unable to open its log file.

Action: Check the UNIX error number for more information.

ORA-02841: Server died on start up

Cause: A server exited during its initialization process.

Action: Check the servers' logs for more information.

ORA-02842: Client unable to fork a server

Cause: The client could not spawn a server. A possible reason is that the operating system has reached its limit on the number of processes that it can spawn.

Action: Either reduce the number of servers that are to be used, or reconfigure the operating system so that it can handle more processes.

ORA-02843: Invalid value for kernel flag

Cause: An illegal value was given for the kernel flag in the information structure. Only TRUE and FALSE are permitted.

Action: This is a programming error - check the calling routine.

ORA-02844: Invalid value for the leave open flag

Cause: A value was given for the flag that determines whether a file is to be left open after the client checks it to see if the servers can use it. Only TRUE and FALSE are supported.

Action: This is a programming error - check the calling routine.

ORA-02845: Invalid value for the timing wanted flag

Cause: A value was given for the flag that indicates that operations are to be timed out. Only TRUE and FALSE are supported.

Action: This is a programming error - check the calling routine.

ORA-02846: Unkillable server

Cause: A server would not respond to the termination signal. The first number is the number of the server. The second is its UNIX process number. This is an internal problem.

Action: This is an operating system problem.

ORA-02847: Server did not terminate when posted

Cause: A server did not respond to a posted request to shutdown. The first number is the number of the server. The second is its UNIX process number. This is an internal problem.

Action: Contact ORACLE support.

ORA-02848: Asynchronous I/O package is not running

Cause: An operation using the asynchronous I/O package was attempted without first initializing the package using sfainit().

Action: Call sfainit() before using the package.

ORA-02849: Read failed because of an error

Cause: A server could not read the requested amount of data from disk.

Action: Check the UNIX error number.

ORA-02850: File is closed

Cause: A file upon which an asynchronous I/O operation is to be performed has already been closed by the package.

Action: This is a programming error.

ORA-02851: Request list is empty when it should not be

Cause: This is an internal problem.

Action: Contact ORACLE support.

ORA-02852: Invalid critical-section time out value

Cause: The time given was not a positive number.

Action: Use a positive number.

ORA-02853: Invalid server list latch time out value

Cause: The time given was not a positive number.

Action: Use a positive number.

ORA-02854: Invalid number of request buffers

Cause: The value given for "db_slave_buffers" in your INIT.ORA file is less than 0.

Action: Use a number that is greater than or equal to 0.

ORA-02855: Number of requests is less than the number of slaves

Cause: The value given for 'db_slave_buffers' in the initialization parameter file was less than the number specified for the number of slaves, 'db_slaves.'

Action: Specify a number that is greater than that given for 'db_slaves.' Alternatively, specify 0. The kernel will supply the appropriate number.

ORA-02875: smpini: Unable to get shared memory for PGA

Cause: Stated in errno.

Action: Resolve the problem.

ORA-02876: smpini: Unable to attach to shared memory for PGA

Cause: Stated in errno.

Action: Resolve the problem.

ORA-02877: smpini: Unable to initialize memory protection

Cause: The adscpinit program has not been executed.

Action: Execute the adscpinit program as shown in your Installation and Users' Guide. If the problem persists, try rebooting your computer.

ORA-02878: sou2o: Variable smpdidini overwritten

Cause: The variable smpdidini was overwritten, probably by client code.

Action: Verify client code, e.g. Pro*C, for illegal memory access. If the problem occurs outside Single Task operation, contact your customer support representative.

ORA-02879: sou2o: Could not gain access to protected memory

Cause: This is an internal error, note error code in errno.

Action: Report to your customer support representative. Restarting your application or your computer may cure the problem.

ORA-02880: smpini: Could not register PGA for protection

Cause: This is an internal error, note error code in errno.

Action: Report to your customer support representative. Restarting your application or your computer may cure the problem.

ORA-02881: sou2o: Could not revoke access to protected memory

Cause: This is an internal error, note error code in errno.

Action: Report to your customer support representative. Restarting your application or your computer may cure the problem.

ORA-02882: sou2o: Could not register SGA for protection

Cause: This is an internal error, note error code in errno.

Action: Report to your customer support representative. Restarting your application or your computer may cure the problem.

ORA-02899: smscre: Cannot create SGA with Extended Shared Memory feature

Cause: The environment variable EXTSHM was set before starting oracle.

Action: Unset the environment variable EXTSHM and startup oracle.

ORA-03001: unimplemented feature

Cause: This feature is not implemented.

Action: None

ORA-03002: operator not implemented

Cause: This is an internal error.

Action: Contact your customer support representative.

ORA-03007: obsolete feature

Cause: User attempted to use a feature which is no longer supported.

Action: None

ORA-03009: Incompatible OCI function call

Cause: An incompatible OCI function call was issued for new functionality.

Action: Do not use V7 OCI calls for this functionality.

ORA-03100: communication area cannot be allocated; insufficient memory

ORA-03105: internal protocol error

ORA-03106: fatal two-task communication protocol error

ORA-03107: oranet buffer underflow

ORA-03108: oranet: ORACLE does not support this interface version

ORA-03109: oranet buffer overflow

ORA-03110: oranet: ORACLE does not support this SQL version

ORA-03111: break received on communication channel

ORA-03112: a server linked as single-task cannot use SQL*Net

Cause: A statement containing a SQL*Net connect string was issued to the single-task server. For example, a database link was used in a SQL statement.

Action: Do not use SQL*Net connect strings in a single-task environment.

ORA-03113: end-of-file on communication channel

Cause: The connection between Client and Server process was broken.

Action: There was a communication error that requires further investigation. First, check for network problems and review the SQL*Net setup. Also, look in the alert.log file for any errors. Finally, test to see whether the server process is dead and whether a trace file was generated at failure time.

ORA-03114: not connected to ORACLE

ORA-03115: unsupported network datatype or representation

ORA-03116: invalid buffer length passed to a conversion routine

ORA-03117: two-task save area overflow

ORA-03118: two-task coroutine has invalid state

ORA-03119: two-task detected inconsistent datatype specification

Cause: There was both a datatype, and an anonymous datatype declaration found.

Action: Correct the specification.

ORA-03120: two-task conversion routine: integer overflow**ORA-03121: no interface driver connected - function not performed****ORA-03122: attempt to close ORACLE-side window on user side**

Cause: This is an internal error.

Action: Contact your customer support representative.

ORA-03123: operation would block

Cause: This is a status code that indicates that the operation cannot complete now.

Action: None; this is not an error. The operation should be retried again for completion.

ORA-03124: two-task internal error

Cause: Internal error.

Action: Contact your customer support representative.

ORA-03125: client-server protocol violation

Cause: The application received a bad escape sequence from the server and may indicate a problem with the client application user code.

Action: Contact your customer support representative.

ORA-03126: network driver does not support non-blocking operations

Cause: A non-blocking operation was attempted and the network driver does not support non-blocking operations.

Action: Use default blocking operations or use a driver supporting non-blocking operations.

ORA-03127: no new operations allowed until the active operation ends

Cause: An attempt was made to execute a new operation before the active non-blocking operation completed or a new operation was attempted before all the pieces of a column were inserted or fetched.

Action: Execute the new operation after the non-blocking operation completes. If piecewise binds/defines were done, execute the new operation after all the pieces have been inserted or fetched.

ORA-03128: connection is in blocking mode

Cause: The OCI test for non-blocking mode on a connection indicates that the connection is in blocking mode.

Action: If non-blocking mode is required use appropriate OCI calls to change the mode.

ORA-03129: the next piece to be inserted is required

Cause: The application performed a piecewise bind on a column.

Action: Provide the next piece of this bind variable.

ORA-03130: the buffer for the next piece to be fetched is required

Cause: The application performed a piecewise define on the column.

Action: Provide the next buffer for the next piece to be retrieved.

ORA-03131: an invalid buffer was provided for the next piece

Cause: The application either provided the length of the buffer for the next piece to be zero or provided a null pointer.

Action: Verify if the buffer pointer for the next piece is null or if the length is zero.

ORA-03132: two-task default value overflow

Cause: The default value specified for a record field was too large.

Action: Change the default value to fit the field size.

ORA-03133: piggyback function error

ORA-03134: Connections to this server version are no longer supported.

Cause: An attempt was made to connect to an Oracle server of older version.

Action: Please refer to documentation for more details.

ORA-03135: connection lost contact

Cause: 1) Server unexpectedly terminated or was forced to terminate. 2) Server timed out the connection.

Action: 1) Check if the server session was terminated. 2) Check if the timeout parameters are set properly in sqlnet.ora.

ORA-03136: inbound connection timed out

Cause: Inbound connection was timed out by the server because user authentication was not completed within the given time specified by SQLNET.INBOUND_CONNECT_TIMEOUT or its default value

Action: 1) Check SQL*NET and RDBMS log for trace of suspicious connections. 2) Configure SQL*NET with a proper inbound connect timeout value if necessary.

ORA-03137: TTC protocol internal error : [<varname>string</varname>]

[<varname>string</varname>] [<varname>string</varname>]
 [<varname>string</varname>] [<varname>string</varname>]
 [<varname>string</varname>] [<varname>string</varname>]
 [<varname>string</varname>]

Cause: TTC protocol internal error.

Action: Contact Oracle Support Services.

ORA-03138: Connection terminated due to security policy violation

Cause: Connection was terminated due to a security policy violation.

Action: Contact the Database Administrator

ORA-03139: This OCI call has been disabled by the DBA

Cause: The SEC_DISABLE_OLDER_ORACLE_RPCS initialization parameter was enabled.

Action: Contact the Database Administrator

ORA-03140: I/O operation in progress

Cause: The current I/O operation was not complete. The error is typically returned from vectored and/or asynchronous I/O calls.

Action: Perform the necessary operation to complete or abort the current I/O.

ORA-03141: I/O request queue full

Cause: The I/O request queue was full and no more requests could be queued.

Action: Perform the proper operations to complete part or all of the current in-progress I/O requests.

ORA-03142: Session ID: <varname>number</varname> Serial number: <varname>number</varname>

Cause: Connection was lost for the specified session and serial number. This is either due to session being killed or network problems.

Action: Reconnect and if error persists, contact Oracle Support Services.

ORA-03143: Process ID: <varname>string</varname> Thread ID: <varname>string</varname>

Cause: Connection was lost for the specified process ID and thread ID. This is either due to session being killed or network problems.

Action: Reconnect and if error persists, contact Oracle Support Services.

ORA-03144: Process ID: <varname>string</varname>

Cause: Connection was lost for the specified process ID. This is either due to session being killed or network problems.

Action: Reconnect and if error persists, contact Oracle Support Services.

ORA-03145: I/O streaming direction error

Cause: Attempted to PUT data when GET streaming was in progress or attempted to GET data when PUT streaming was in progress.

Action: Complete current stream read or write I/O before attempting I/O in reverse direction.

ORA-03146: Invalid buffer length for TTC field

Cause: A corrupt Two-Task Common (TTC) packet was received.

Action: This is an internal protocol error. Contact Oracle Support Services.

ORA-03147: Missing mandatory TTC field

Cause: A corrupt Two-Task Common (TTC) packet was received.

Action: This is an internal protocol error. Contact Oracle Support Services.

ORA-03148: OCI_ATTR_ROW_COUNT cannot return a row count exceeding UB4MAXVAL. The actual row count is [<varname>string</varname>]

Cause: The row count was larger than UB4MAXVAL. OCI clients using OCI_ATTR_ROW_COUNT cannot see row counts larger than UB4MAXVAL.

Action: Upgrade Oracle client to version 12 client libraries or higher and use OCI_ATTR_UB8_ROW_COUNT instead.

ORA-03149: Invalid Oracle error code

Cause: An invalid Oracle error code was received by the server.

Action: This is an internal protocol error. Contact Oracle Support Services.

ORA-03150: end-of-file on communication channel for database link

Cause: The connection between the client and the remote server process was broken.

Action: Look in the alert.log file of the remote server for any errors. Also, check to see whether the remote server process is dead and whether a trace file was generated at failure time.

ORA-03160: An invalid client operation was requested by the server

Cause: You are using an Oracle client application linked with libraries with lower version than the current server version.

Action: Upgrade client libraries to be same as or higher than the server version.

ORA-03170: deadlocked on readable physical standby (undo segment <varname>string</varname>)

Cause: A new undo segment was added. A query can occasionally deadlock when issued around the time an undo segment is added and used immediately on the primary.

Action: Retry the query. Avoid creating new undo segments when using standby as a regular part of operation.

ORA-03171: Recovery was terminated during query execution

Cause: Recovery was terminated. A query can occasionally deadlock when recovery is terminated because it needs a block with changes that are made after the point at which recovery was terminated.

Action: Retry the query. Avoid cancelling recovery on standby.

ORA-03172: STANDBY_MAX_DATA_DELAY of <varname>string</varname> seconds exceeded

Cause: Standby recovery fell behind the STANDBY_MAX_DATA_DELAY requirement.

Action: Tune recovery and retry the query later, or switch to another standby database within the data delay requirement.

ORA-03173: Standby may not be synced with primary

Cause: ALTER SESSION SYNC WITH PRIMARY did not work because either the standby was not synchronous or in a data-loss mode with regard to the primary, or the standby recovery was terminated.

Action: Make the standby synchronous and no-data-loss with regard to the primary. Make the standby recovery active.

ORA-03174: STANDBY_MAX_DATA_DELAY does not apply to SYS users

Cause: ALTER SESSION SET STANDBY_MAX_DATA_DELAY did not work for SYS users.

Action: Issue ALTER SESSION SET STANDBY_MAX_DATA_DELAY for non-SYS users.

ORA-03175: parameter <varname>string</varname> mismatch

Cause: The value of the %s parameter was not the same in all instances.

Action: Check %s in all instances.

ORA-03176: <varname>string</varname> only works on an open physical standby database

Cause: The database was not an open physical standby database.

Action: Issue the command on an open physical standby database.

ORA-03177: enable read-only violation logging**ORA-03178: duplicate SESSION or GLOBAL specifications**

Cause: Duplicate SESSION or GLOBAL specifications were specified.

Action: Remove the duplicate specification.

ORA-03179: NOCACHE or ORDER sequences cannot be accessed from Active Data Guard standby

Cause: NOCACHE or ORDER sequences were not supported for Active Data Guard standby.

Action: Alter the sequence properties.

ORA-03180: Sequence values cannot be allocated for Oracle Active Data Guard standby.

Cause: Connection to the corresponding primary database failed. The primary database might be down.

Action: Try again later.

ORA-03181: Sequence object no longer exists for Oracle Active Data Guard standby.

Cause: The sequence object might have been dropped by the primary database.

Action: Check the sequence status on the primary database.

ORA-03182: The sequence object is no longer a global sequence for Oracle Active Data Guard standby database.

Cause: The sequence object might have been altered by the primary database.

Action: Check the sequence status on the primary database.

ORA-03200: the segment type specification is invalid

Cause: segment type is not TABLE, INDEX, or CLUSTER

Action: use a correct segment type

ORA-03201: the group number specification is invalid

Cause: the freelist group number was either negative or larger than the the number of freelist groups in the segment

Action: use a correct group number

ORA-03202: the scan limit specification is invalid

Cause: the scan limit did not have a positive integer value the number of freelist groups in the segment

Action: use a correct scan limit

ORA-03203: concurrent update activity makes space analysis impossible

Cause: high volume of user updates interfere with the space analysis

Action: retry the command or lock the underlying objects

ORA-03204: the segment type specification should indicate partitioning

Cause: partition name is specified for the space analysis, but the object type does not indicate partitioning

Action: specify PARTITION in the segment type, if the object is partitioned, otherwise, omit the partition name

ORA-03205: partition name is required when partitioned type is specified

Cause: partition name is not specified for the space analysis, but the object type indicates partitioning

Action: specify partition name, if the object is partitioned, otherwise, specify a non-partitioned type

ORA-03206: maximum file size of (<varname>string</varname>) blocks in AUTOEXTEND clause is out of range

Cause: The maximum file size for an autoextendable file has exceeded the maximum number of blocks allowed.

Action: Reduce the size and retry.

ORA-03207: subpartitioned type must be specified for composite object

Cause: partition type is specified for the space analysis, but the object type indicates composite partitioning

Action: specify subpartition name and subpartition type

ORA-03208: partitioned type must be specified for a non-composite object

Cause: subpartition type is specified for the space analysis, but the object type indicates non-composite partitioning

Action: specify partition name and partition type

ORA-03209: DBMS_ADMIN_PACKAGE invalid file/block specification

Cause: The value of file number or block number is outside of limits or inconsistent

Action: Fix the file number/block number value

ORA-03210: DBMS_ADMIN_PACKAGE invalid option specification

Cause: The value of one of the option parameters is incorrect

Action: Fix the option value

ORA-03211: The segment does not exist or is not in a valid state

Cause: The segment specified in the DBMS_SPACE_ADMIN or DBMS_SPACE operation does not exist or is not in a state appropriate for this operation

Action: Fix the segment specification, or put the segment in the appropriate state.

ORA-03212: Temporary Segment cannot be created in locally-managed tablespace

Cause: Attempt to create a temporary segment for sort/hash/lobs in in permanent tablespace of kind locally-managed

Action: Alter temporary tablespace of user to a temporary tablespace or a dictionary-managed permanent tablespace

ORA-03213: Invalid Lob Segment Name for DBMS_SPACE package

Cause: The Lob Segment specified in the DBMS_SPACE operation does not exist.

Action: Fix the Segment Specification

ORA-03214: File Size specified is smaller than minimum required

Cause: File Size specified for add/resize datafile/tempfile does not allow for the minimum required of one allocation unit.

Action: Increase the specification for file size

ORA-03215: File Size specified for resize is too small

Cause: File Size specified for resize datafile/tempfile causes bitmap control structures to overlap

Action: Increase the specification for file size

ORA-03216: Tablespace/Segment Verification cannot proceed

Cause: Corruptions detected during verification which cannot be dealt with

Action: Do manual verification

ORA-03217: invalid option for alter of TEMPORARY TABLESPACE

Cause: invalid option for alter of temporary tablespace was specified

Action: Specify one of the valid options: ADD TEMPFILE, TEMPFILE ONLINE, TEMPFILE OFFLINE

ORA-03218: invalid option for CREATE/ALTER TABLESPACE

Cause: invalid option for create/alter tablespace of type locally-managed

Action: Specify one of the valid options.

ORA-03219: Tablespace '<varname>string</varname>' is dictionary-managed, offline or temporary

Cause: Operation which is only applicable to permanent, online, locally-managed tablespaces is specified for a tablespace which is either dictionary-managed, offline or temporary

Action: Reissue operation for a different tablespace, mount the tablespace or do not issue it at all, since it does not apply for the given tablespace

ORA-03220: DBMS_ADMIN_PACKAGE required parameter is NULL or missing

Cause: Some of the procedures was called with missing or NULL parameters

Action: Specify the missing parameter

ORA-03221: Temporary tablespaces and temporary segments must have standard block size

Cause: An attempt was made to do one of the following : (1) create a temporary tablespace with a non-standard block size or, (2) alter an existing permanent tablespace of non-standard block size to a temporary tablespace or, (3) issue a DDL statement that would result in the creation of a temporary segment in a tablespace of non-standard block size.

Action: (1) If creating a temporary tablespace, do not specify a block size different from the standard block size. (2) If altering an existing permanent tablespace to a temporary tablespace, ensure that it is of standard block size. (3) Ensure that the user's temporary tablespace is a tablespace having the standard block size.

ORA-03222: average row size and row count must be greater than zero

Cause: Either a bad value passed to dbms_space.create_table_cost() or explain plan did not pass through size information.

Action: Check the row size parameter in dbms_space.create_table_cost(). For explain plan, make sure statistics have been computed for all source tables in the CREATE TABLE AS SELECT statement.

ORA-03223: Bitmap index block addressable limitation reached

Cause: The limitation of addressability of BMIB (Bitmap Index Block) was reached for the current blocksize.

Action: If the segment size has grown greater than addressability of BMIB (Bitmap Index Block), do the following: (1) Partition the table. (2) Move the segment to a tablespace having bigger blocksize.

ORA-03230: segment only contains <varname>string</varname> blocks of unused space above high water mark

Cause: Attempt to preserve too many blocks.

Action: reduce the KEEP amount.

ORA-03231: the INITIAL extent may not be deallocated

Cause: Attempt to deallocate space from the segment which was truncated prior to the 7.3 release.

Action: increase the KEEP amount, or truncate the segment, and reissue the command.

ORA-03233: unable to extend table <varname>string</varname>.<varname>string</varname> subpartition <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: Failed to allocate an extent for table subpartition segment in tablespace.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-03234: unable to extend index <varname>string</varname>.<varname>string</varname> subpartition <varname>string</varname>

`<varname> by <varname>string</varname> in tablespace <varname>string</varname>`

Cause: Failed to allocate an extent for index subpartition segment in tablespace.

Action: Use ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-03235: max # extents (<varname>string</varname>) reached in table <varname>string</varname>.<varname>string</varname> subpartition <varname>string</varname>

Cause: A table subpartition tried to extend past maxextents

Action: If maxextents is less than the system maximum, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params

ORA-03236: max # extents (<varname>string</varname>) reached in index <varname>string</varname>.<varname>string</varname> subpartition <varname>string</varname>

Cause: An index subpartition tried to extend past maxextents

Action: If maxextents is less than the system max, raise it. Otherwise, you must recreate with larger initial, next or pctincrease params.

ORA-03237: Initial Extent of specified size cannot be allocated in tablespace (<varname>string</varname>)

Cause: Too large a size for an initial extent due to freelist group specification

Action: Reduce number of freelist groups specified for segment

ORA-03238: unable to extend LOB segment <varname>string</varname>.<varname>string</varname> subpartition <varname>string</varname> by <varname>string</varname> in tablespace <varname>string</varname>

Cause: An attempt was made to allocate an extent for LOB subpartition segment in tablespace, but the extent could not be allocated because there is not enough space in the tablespace indicated.

Action: Use the ALTER TABLESPACE ADD DATAFILE statement to add one or more files to the tablespace indicated.

ORA-03239: maxextents (<varname>string</varname>) reached in LOB segment <varname>string</varname>.<varname>string</varname> subpartition <varname>string</varname>

Cause: A LOB subpartition segment tried to extend past maxextents.

Action: If maxextents is less than the system maximum, raise it. Otherwise, recreate the subpartition with larger INITIAL, NEXT, or PCTINCREASE parameters.

ORA-03240: User's temporary tablespace same as tablespace being migrated

Cause: Users default temporary tablespace must be different from the tablespace being migrated.

Action: alter users default temporary tablespace to be different.

ORA-03241: Invalid unit size

Cause: User specified an invalid unit size for the tablespace

Action: Specify the correct unit size. To estimate unit size please refer to Oracle Server Administrator's Guide.

ORA-03242: Tablespace migration retried 500 times

Cause: For migration to complete, temporary segments should not be present in the tablespace at the time of migration.

Action: Avoid migrating the tablespace when there is heavy temporary segment creation going on as with object drops.

ORA-03243: destination dba overlaps with existing control information

Cause: Cannot overlap control information during relocation

Action: Please chose another destination address

ORA-03244: No free space found to place the control information

Cause: During migration of tablespace found no place to put the control information. If during bitmaps relocation, found no space at the specified destination.

Action: If during migration, add more space to the tablespace and retry migration. If during bitmaps relocation, specify a destination address where there is enough free space.

ORA-03245: Tablespace has to be dictionary managed, online and permanent to be able to migrate

Cause: Tablespace was not dictionary managed or online or permanent.

Action: Make sure the tablespace is online, permanent and dictionary managed

ORA-03246: Invalid block number specified

Cause: Control information cannot be placed at the specified dba either because the block number specified is beyond the file end or the file is not large enough to accomodate the control information at that location

Action: specify a correct block number

ORA-03247: Invalid block number specified

Cause: Relocation of bitmaps to the said destination will make the tablespace self descriptive

Action: Choose another destination dba.

ORA-03248: Too much of segment creation activity during migration

Cause: Temporary segments were attempted to be created during migration

Action: The error is signalled after retrying migration for 500 times. Run migration when there is less of segment creation activity is going on.

ORA-03249: Uniform size for auto segment space managed tablespace should have atleast <varname>string</varname> blocks

Cause: For the given blocksize, uniform size specified is insufficient

Action: Specify larger extent size and retry

ORA-03250: Cannot mark this segment corrupt

Cause: This segment cannot be marked corrupt because it contains data dictionary objects

Action: Check the segment information and reissue the command.

ORA-03251: Cannot issue this command on SYSTEM tablespace

Cause: It is not permitted to migrate SYSTEM tablespace from locally managed format to dictionary managed format or relocate bitmaps.

Action: Check the tablespace name and procedure name

ORA-03252: initial extent size not enough for LOB segment

Cause: Fatblock size of LOB segment is too big to fit into the initial extent.

Action: Specify a smaller fatblock size or create the LOB segment in other tablespaces with bigger initial extent size.

ORA-03254: unable to execute the sql in read only database

Cause: Unable to create a consistent snapshot of the object in a read only database. Transaction recovery must be performed before opening the database read only.

Action: Open the database read write, allow dead transaction recovery to complete and then open the database read only.

ORA-03261: the tablespace <varname>string</varname> has only one file

Cause: Dropping file from ts which has a single file extent.

Action: Cannot make a tablespace fileless

ORA-03262: the file is non-empty

Cause: Trying to drop a non-empty datafile

Action: Cannot drop a non empty datafile

ORA-03263: cannot drop the first file of tablespace <varname>string</varname>

Cause: Trying to drop the first datafile with which ts is created

Action: Cannot drop the first datafile with which ts is created

ORA-03264: cannot drop offline datafile of locally managed tablespace

Cause: Trying to drop offline datafile in lmts

Action: Try to drop file afetr making it online

ORA-03274: both ALLOCATE EXTENT and DEALLOCATE UNUSED options are specified

Cause: The DEALLOCATE option and the ALLOCATE option are specified in the same command.

Action: Choose one of the options or issue two separate commands.

ORA-03275: duplicate DEALLOCATE option specification

Cause: The DEALLOCATE UNUSED option to ALTER TABLE or ALTER INDEX is specified more than once.

Action: Specify the option at most once.

ORA-03276: duplicate ALLOCATE EXTENT option specification

Cause: The ALLOCATE EXTENT option to ALTER TABLE or ALTER INDEX is specified more than once.

Action: Specify the option at most once.

ORA-03277: invalid SIZE specified

Cause: The specified value must be an integer.

Action: Choose an appropriate integer value.

ORA-03278: duplicate ALLOCATE EXTENT option specification

Cause: An option (DATAFILE, SIZE or INSTANCE) was specified more than once.

Action: Specify each option at most once.

ORA-03279: invalid INSTANCE specified

Cause: The specified value is not recognized as a valid instance name.

Action: Use a valid name.

ORA-03280: invalid DATAFILE filename specified

Cause: A character string literal is expected, but not found.

Action: Specify filenames using character string literals.

ORA-03281: invalid ALLOCATE EXTENT option

Cause: An option other than DATAFILE, SIZE or INSTANCE was specified.

Action: Remove invalid option and retry the command.

ORA-03282: missing ALLOCATE EXTENT option

Cause: No ALLOCATE EXTENT options were specified.

Action: Specified one or more of the following options: DATAFILE, SIZE or INSTANCE.

ORA-03283: specified datafile <varname>string</varname> does not exist

Cause: The datafile does not exist

Action: Retry the option with the correct datafile

ORA-03284: datafile or tempfile <varname>string</varname> is not a member of tablespace <varname>string</varname>

Cause: The specified datafile or tempfile did not belong to the tablespace that the object resides in.

Action: Retry the option with the correct datafile or tempfile.

ORA-03286: ALLOCATE EXTENT not valid for HASH CLUSTERS

Cause: The cluster is a hash cluster, and can not use the allcoate extent option.

Action: n/a

ORA-03287: invalid FREELIST GROUP specified

Cause: The specified FREELIST GROUP number is invalid

Action: Choose a number between 1 and # freelist groups for this object

ORA-03288: both FREELIST GROUP and INSTANCE parameters may not be specified

Cause: Both FREELIST GROUP and INSTANCE were specified in clause

Action: Remove one of the two parameters

ORA-03289: partition name and segment type do not match

Cause: Partition name and segment type specified for space analysis do not match

Action: Specify type PARTITION if the object is partitioned, specify SUBPARTITION if the object is composite

ORA-03290: Invalid truncate command - missing CLUSTER or TABLE keyword

Cause: Invalid object specification given.

Action: Either specify TRUNCATE CLUSTER or TRUNCATE TABLE

ORA-03291: Invalid truncate option - missing STORAGE keyword

Cause: Expected STORAGE keyword

Action: Either specify DROP STORAGE or REUSE STORAGE

ORA-03292: Table to be truncated is part of a cluster

Cause: The table being truncated is a member of a cluster.

Action: Either use TRUNCATE CLUSTER or DROP TABLE

ORA-03293: Cluster to be truncated is a HASH CLUSTER

Cause: Only INDEX CLUSTERS can be truncated.

Action: Drop and recreate the HASH CLUSTER instead of using truncate.

ORA-03296: cannot resize datafile - file <varname>string</varname> not found

Cause: The specified datafile is not available for resizing.

Action: Ensure that the datafile name is valid, and if so, ensure the file is accessible.

ORA-03297: file contains used data beyond requested RESIZE value

Cause: Some portion of the file in the region to be trimmed is currently in use by a database object

Action: Drop or move segments containing extents in this region prior to resizing the file, or choose a resize value such that only free space is in the trimmed.

ORA-03298: cannot shrink datafile - file <varname>string</varname> is under hot backup

Cause: Attempt to shrink a datafile while it is under hot backup. This is not allowed.

Action: Retry shrinking the file after the hot backup completes.

ORA-03299: cannot create dictionary table <varname>string</varname>

Cause: A dictionary table is created upon the first execution of the command 'alter database datafile autoextend on' for a database. This operation did not succeed. The most probable cause for this is insufficient space in the system tablespace.

Action: See action for next error message in error stack.

ORA-04000: the sum of PCTUSED and PCTFREE cannot exceed 100

Cause: the sum of PCTUSED and PCTFREE for a cluster or table exceeds 100

Action: create the table/cluster specifying values whose sum is ≤ 100

ORA-04001: sequence parameter <varname>string</varname> must be an integer

Cause: %s (a sequence parameter) specified was not an integer

Action: create the sequence, giving the specified parameter an integer value

ORA-04002: INCREMENT must be a non-zero integer

Cause: a sequence increment was specified to be zero

Action: specify the increment to be a non-zero value

ORA-04003: sequence parameter <varname>string</varname> exceeds maximum size allowed (<varname>string</varname> digits)

Cause: %s (a sequencer parameter) had too many digits

Action: specify the parameter with the allowed number of digits

ORA-04004: MINVALUE must be less than MAXVALUE

Cause: MINVALUE was specified to be greater than or equal to MAXVALUE

Action: specify a MINVALUE that is less than MAXVALUE

ORA-04005: INCREMENT must be less than MAXVALUE minus MINVALUE

Cause: the INCREMENT specified is $\geq \text{MAXVALUE} - \text{MINVALUE}$

Action: specify an INCREMENT that is $< \text{MAXVALUE} - \text{MINVALUE}$

ORA-04006: START WITH cannot be less than MINVALUE

Cause: the given starting value is less than MINVALUE

Action: make sure that the starting value is $\geq \text{MINVALUE}$

ORA-04007: MINVALUE cannot be made to exceed the current value

Cause: the given MINVALUE would be greater than the current value

Action: always make sure that MINVALUE is \leq the current value

ORA-04008: START WITH cannot be more than MAXVALUE

Cause: the starting value would be larger than MAXVALUE

Action: make sure that the starting value is less than MAXVALUE

ORA-04009: MAXVALUE cannot be made to be less than the current value

Cause: the current value exceeds the given MAXVALUE

Action: make sure that the new MAXVALUE is larger than the current value

ORA-04010: the number of values to CACHE must be greater than 1

Cause: the value in the CACHE clause was one

Action: specify NOCACHE, or a value larger than one

ORA-04011: sequence <varname>string</varname> must range between <varname>string</varname> and <varname>string</varname>

Cause: the value specified for one of the sequence parameters exceeds limits

Action: specify parameter within these limits

ORA-04012: object is not a sequence

Cause: the object specified cannot have sequence ddl's performed on it

Action: re-enter the statement being careful with the spelling of the name

ORA-04013: number to CACHE must be less than one cycle

Cause: number to CACHE given is larger than values in a cycle

Action: enlarge the cycle, or cache fewer values

ORA-04014: descending sequences that CYCLE must specify MINVALUE

Cause: sequences that cycle must have their wrap-wrap specified

Action: re-create the sequence, specifying its wrap-value

ORA-04015: ascending sequences that CYCLE must specify MAXVALUE

Cause: sequences that cycle must have their wrap-wrap specified

Action: re-create the sequence, specifying its wrap-value

ORA-04016: sequence <varname>string</varname> no longer exists

Cause: sequence was dropped while processing its next value.

Action: re-create the sequence

ORA-04017: invalid value <varname>string</varname> (length = <varname>string</varname>) for parameter MAX_DUMP_FILE_SIZE

Cause: The string supplied for the parameter MAX_DUMP_FILE_SIZE was not an integer, an integer followed by 'K', 'M', or 'G', nor the special value UNLIMITED.

Action: Provide a proper value for this parameter.

ORA-04020: deadlock detected while trying to lock object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: While trying to lock a library object, a deadlock is detected.

Action: Retry the operation later.

ORA-04021: timeout occurred while waiting to lock object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: While waiting to lock a library object, a timeout occurred.

Action: Retry the operation later.

ORA-04022: nowait requested, but had to wait to lock dictionary object

Cause: Had to wait to lock a library object during a nowait request.

Action: Retry the operation later.

ORA-04023: Object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname> could not be validated or authorized

Cause: A number of attempts were made to validate or authorize an object but failed.

Action: Please report this error to Oracle Support Services.

ORA-04024: self-deadlock detected while trying to mutex pin cursor <varname>string</varname>

Cause: While trying to mutex pin a cursor, a self-deadlock is detected.

Action: Retry the operation later.

ORA-04025: maximum allowed library object lock allocated for <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: Too many active locks for the object has been allocated. This error can be a result of too many cursors kept open per session.

Action: Close cursors, reduce session_cached_cursors value.

ORA-04027: self-deadlock during automatic validation for object <varname>string</varname>.<varname>string</varname>

Cause: An attempt was made to validate an invalidated object but it failed because of a self-deadlock.

Action: Identify the root cause of the self-deadlock and take corrective action, e.g. compile the invalidated object separately.

ORA-04028: cannot generate diana for object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: Cannot generate diana for an object because of lock conflict.

Action: Please report this error to your support representative.

ORA-04029: error ORA-<varname>string</varname> occurred when querying <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: The table or view being queried might be missing. The error number indicates the error.

Action: Fix the error.

ORA-04030: out of process memory when trying to allocate <varname>string</varname><varname> bytes (<varname>string</varname>,<varname>string</varname>)

Cause: Operating system process private memory was exhausted.

Action: n/a

ORA-04031: unable to allocate <varname>string</varname> bytes of shared memory ("<varname>string</varname>","<varname>string</varname>","<varname>string</varname>","<varname>string</varname>","<varname>string</varname>")

Cause: More shared memory is needed than was allocated in the shared pool or Streams pool.

Action: If the shared pool is out of memory, either use the DBMS_SHARED_POOL package to pin large packages, reduce your use of shared memory, or increase the

amount of available shared memory by increasing the value of the initialization parameters `SHARED_POOL_RESERVED_SIZE` and `SHARED_POOL_SIZE`. If the large pool is out of memory, increase the initialization parameter `LARGE_POOL_SIZE`. If the error is issued from an Oracle Streams or XStream process, increase the initialization parameter `STREAMS_POOL_SIZE` or increase the capture or apply parameter `MAX_SGA_SIZE`.

ORA-04032: pga_aggregate_target must be set before switching to auto mode

Cause: attempt to set `workarea_size_policy` to `AUTO` while `pga_aggregate_target` is not specified

Action: before setting `workarea_size_policy`, set `pga_aggregate_target` to a value representing the total private memory available to the instance. This total is generally the total physical memory available in the system minus what is needed for the SGA minus what is needed for the operating system (e.g. 500MB)

ORA-04033: Insufficient memory to grow pool

Cause: The system had insufficient memory to grow the pool to the specified size.

Action: Specify a smaller value to grow the pool.

ORA-04034: unable to shrink pool to specified size

Cause: The pool could not shrink to the specified size as it could not free memory.

Action: Specify a larger value to which to shrink the pool to.

ORA-04035: unable to allocate <varname>string</varname> bytes of shared memory in shared object cache "<varname>string</varname>" of size "<varname>string</varname>"

Cause: More shared memory is needed than was allocated in the shared object cache.

Action: n/a

ORA-04036: PGA memory used by the instance exceeds PGA_AGGREGATE_LIMIT

Cause: Private memory across the instance exceeded the limit specified in the `PGA_AGGREGATE_LIMIT` initialization parameter. The largest sessions using Program Global Area (PGA) memory were interrupted to get under the limit.

Action: Increase the `PGA_AGGREGATE_LIMIT` initialization parameter or reduce memory usage.

ORA-04041: package specification must be created first before creating package body

Cause: Attempt to create a package body before creating its package specification.

Action: Create the package specification first before creating the package body.

ORA-04042: procedure, function, package, or package body does not exist

Cause: Attempt to access a procedure, function, package, or package body that does not exist.

Action: Make sure the name is correct.

ORA-04043: object <varname>string</varname> does not exist

Cause: An object name was specified that was not recognized by the system. There are several possible causes: - An invalid name for a table, view, sequence, procedure, function, package, or package body was entered. Since the system could not recognize the invalid name, it responded with the message that the named object does not exist. - An attempt was made to rename an index or a cluster, or some other object that cannot be renamed.

Action: Check the spelling of the named object and rerun the code. (Valid names of tables, views, functions, etc. can be listed by querying the data dictionary.)

ORA-04044: procedure, function, package, or type is not allowed here

Cause: A procedure, function, or package was specified in an inappropriate place in a statement.

Action: Make sure the name is correct or remove it.

ORA-04045: errors during recompilation/revalidation of <varname>string</varname>.<varname>string</varname>

Cause: This message indicates the object to which the following errors apply. The errors occurred during implicit recompilation/revalidation of the object.

Action: Check the following errors for more information, and make the necessary corrections to the object.

ORA-04046: results of compilation are too large to support

Cause: Attempt to compile and store a large stored procedure that results in compilation data that is too large for the system to support or store.

Action: Reduce the size of the store procedure by splitting it into smaller stored procedures.

ORA-04047: object specified is incompatible with the flag specified

Cause: The object type implied by the flag does not match the type of object specified.

Action: Specify the correct object, or use the appropriate flag

ORA-04050: invalid or missing procedure, function, or package name

Cause: The required procedure, function, or package name is invalid or missing.

Action: Specify a valid name.

ORA-04051: user <varname>string</varname> cannot use database link <varname>string</varname>.<varname>string</varname>

Cause: During forwarding of a remote object access, an attempt was made to use a non-existent database link or one owned by a user other than the logon user or PUBLIC.

Action: Change your database link structure so that all indirect remote accesses are done from the same userid that originates the request.

ORA-04052: error occurred when looking up remote object <varname>string</varname>.<varname>string</varname>.<varname>string</varname>.<varname>string</varname>

Cause: An error occurred when trying to look up a remote object.

Action: Fix the error. Make sure the remote database system has run CATRPC.SQL to create necessary views used for querying or looking up objects stored in the database.

ORA-04053: error occurred when validating remote object <varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname><varname>string</varname>

Cause: An error occurred when trying to validate a remote object.

Action: Fix the error. Make sure the remote database system has run CATRPC.SQL to create necessary views used for querying or looking up objects stored in the database.

ORA-04054: database link <varname>string</varname> does not exist

Cause: During compilation of a PL/SQL block, an attempt was made to use a non-existent database link.

Action: Either use a different database link or create the database link.

ORA-04055: Aborted: "<varname>string</varname>" formed a non-REF mutually-dependent cycle with "<varname>string</varname>"

Cause: This compilation was aborted because the library unit that was compiled would have formed a non-REF mutually-dependent cycle with some other library units. This happens when an attempt is made to compile types that have attributes of other types that may participate in a cycle with this type. Example: create type t1; create type t2 (a t1); create type t1 (a t2);

Action: Break the cycle (possibly by adding a REF or by using another type).

ORA-04060: insufficient privileges to execute <varname>string</varname>

Cause: Attempt to execute a stored procedure without sufficient privileges.

Action: Get necessary privileges.

ORA-04061: existing state of <varname>string</varname> has been invalidated

Cause: Attempt to resume the execution of a stored procedure using the existing state which has become invalid or inconsistent with the stored procedure because the procedure has been altered or dropped.

Action: Try again; this error should have caused the existing state of all packages to be re-initialized.

ORA-04062: <varname>string</varname> of <varname>string</varname> has been changed

Cause: Attempt to execute a stored procedure to serve an RPC stub which specifies a timestamp or signature that is different from the current timestamp/signature of the procedure.

Action: Recompile the caller in order to pick up the new timestamp.

ORA-04063: <varname>string</varname> has errors

Cause: Attempt to execute a stored procedure or use a view that has errors. For stored procedures, the problem could be syntax errors or references to other, non-existent procedures. For views, the problem could be a reference in the view's defining query to a non-existent table. Can also be a table which has references to non-existent or inaccessible types.

Action: Fix the errors and/or create referenced objects as necessary.

ORA-04064: not executed, invalidated <varname>string</varname>

Cause: Attempt to execute a stored procedure that has been invalidated.

Action: Recompile it.

ORA-04065: not executed, altered or dropped <varname>string</varname>

Cause: Attempt to execute a stored procedure that has been altered or dropped thus making it not callable from the calling procedure.

Action: Recompile its dependents.

ORA-04066: non-executable object, <varname>string</varname>

Cause: Attempt to execute a non-procedure.

Action: Make sure that a correct name is given.

ORA-04067: not executed, <varname>string</varname> does not exist

Cause: Attempt to execute a non-existent stored procedure.

Action: Make sure that a correct name is given.

ORA-04068: existing state of packages<varname>string</varname><varname>string</varname><varname>string</varname> has been discarded

Cause: One of errors 4060 - 4067 when attempt to execute a stored procedure.

Action: Try again after proper re-initialization of any application's state.

ORA-04069: cannot drop or replace a library with table dependents

Cause: An attempt was made to drop or replace a library that has dependents. There could be a table which depends on type which depends on the library being dropped.

Action: Drop all table(s) depending on the type, then retry.

ORA-04070: invalid trigger name

Cause: An invalid trigger name was specified.

Action: Verify that trigger name is not a reserved keyword.

ORA-04071: missing BEFORE, AFTER or INSTEAD OF keyword

Cause: The trigger statement is missing the BEFORE/AFTER/INSTEAD OF clause.

Action: Specify either BEFORE, AFTER or INSTEAD OF.

ORA-04072: invalid trigger type

Cause: An invalid trigger type was given.

Action: Specify either INSERT, UPDATE or DELETE.

ORA-04073: column list not valid for this trigger type

Cause: A column list was specified for a non-update trigger type.

Action: Remove the column list.

ORA-04074: invalid REFERENCING name

Cause: An invalid name was given in the referencing clause.

Action: Verify the referencing name is not a reserved word.

ORA-04075: invalid trigger action

Cause: An statement was given for the trigger action.

Action: Re-specify the trigger action.

ORA-04076: invalid NEW or OLD specification

Cause: An invalid NEW or OLD specification was given for a column.

Action: Re-specify the column using the correct NEW or OLD specification.

ORA-04077: WHEN clause cannot be used with table level triggers

Cause: The when clause can only be specified for row level triggers.

Action: Remove the when clause or specify for each row.

ORA-04078: OLD and NEW values cannot be identical

Cause: The referencing clause specifies identical values for NEW and OLD.

Action: Re-specify either the OLD or NEW referencing value.

ORA-04079: invalid trigger specification

Cause: The create TRIGGER statement is invalid.

Action: Check the statement for correct syntax.

ORA-04080: trigger '<varname>string</varname>' does not exist

Cause: The TRIGGER name is invalid.

Action: Check the trigger name.

ORA-04081: trigger '<varname>string</varname>' already exists

Cause: The TRIGGER name or type already exists.

Action: Use a different trigger name or drop the trigger which is of the same name.

ORA-04082: NEW or OLD references not allowed in table level triggers

Cause: The trigger is accessing "new" or "old" values in a table trigger.

Action: Remove any new or old references.

ORA-04083: invalid trigger variable '<varname>string</varname>'

Cause: The variable referenced in the trigger body is invalid.

Action: See the manual for valid trigger variable types.

ORA-04084: cannot change NEW values for this trigger type

Cause: New trigger variables can only be changed in before row insert or update triggers.

Action: Change the trigger type or remove the variable reference.

ORA-04085: cannot change the value of an OLD reference variable

Cause: Old values can only be read and not changed.

Action: Do not attempt to change an old variable.

ORA-04086: trigger description too long, move comments into triggering code

Cause: The trigger description is limited to 2000 characters (for dictionary storage reasons). The description does not include the text of the "when" clause or the text of the pl/sql code executed for the trigger.

Action: If the trigger description contains a large comment, move that

ORA-04087: cannot change the value of ROWID reference variable

Cause: Rowid's can only be read and not changed.

Action: Do not attempt to change an rowid value.

ORA-04088: error during execution of trigger '<varname>string</varname>.<varname>string</varname>'

Cause: A runtime error occurred during execution of a trigger.

Action: Check the triggers which were involved in the operation.

ORA-04089: cannot create triggers on objects owned by SYS

Cause: An attempt was made to create a trigger on an object owned by SYS.

Action: Do not create triggers on objects owned by SYS.

ORA-04090: '<varname>string</varname>' specifies same table, event and trigger time as '<varname>string</varname>'

Cause: Trigger is of duplicate event and trigger time.

Action: Combine the triggering information into one trigger which is fired at the given time.

ORA-04091: table <varname>string</varname>.<varname>string</varname> is mutating, trigger/function may not see it

Cause: A trigger (or a user defined plsql function that is referenced in this statement) attempted to look at (or modify) a table that was in the middle of being modified by the statement which fired it.

Action: Rewrite the trigger (or function) so it does not read that table.

ORA-04092: cannot <varname>string</varname> in a trigger

Cause: A trigger attempted to commit or rollback.

Action: Rewrite the trigger so it does not commit or rollback.

ORA-04093: references to columns of type LONG are not allowed in triggers

Cause: A trigger attempted to reference a long column in the triggering table.

Action: Do not reference the long column.

ORA-04094: table <varname>string</varname>.<varname>string</varname> is constraining, trigger may not modify it

Cause: A trigger attempted to modify a table that was constraining for some referential constraint of a parent SQL statement.

Action: n/a

ORA-04095: trigger '<varname>string</varname>' already exists on another table, cannot replace it

Cause: Cannot replace a trigger which already exists on a different table than the one being replaced.

Action: Drop the trigger with the same name and re-create it.

ORA-04096: trigger '<varname>string</varname>' has a WHEN clause which is too large, limit 2K

Cause: A trigger's 'when' clause is limited to 2K for dictionary storage reasons. The trigger being created exceeded that size.

Action: Use a smaller 'when' clause. Note, the trigger body could be used to perform the same limiting action as the 'when' clause.

ORA-04097: DDL conflict while trying to drop or alter a trigger

Cause: An attempt was made to concurrently perform two DDL operations on a trigger or trigger table.

Action: Investigate the new state of the trigger and retry the DDL operation, if still appropriate.

ORA-04098: trigger '<varname>string</varname>.<varname>string</varname>' is invalid and failed re-validation

Cause: A trigger was attempted to be retrieved for execution and was found to be invalid. This also means that compilation/authorization failed for the trigger.

Action: Options are to resolve the compilation/authorization errors, disable the trigger, or drop the trigger.

ORA-04099: trigger '<varname>string</varname>' is valid but not stored in compiled form

Cause: A trigger was attempted to be retrieved for execution and was found to be valid, but not stored. This may mean the an upgrade was done improperly from a non-stored trigger release.

Action: Alter compile the trigger to create the trigger in stored form. Also, you may want to review that a proper upgrade was done.

ORA-04930 to ORA-07499

ORA-04930: open sequence number failed or initial state is valid

Cause: Either Shared Sequence Number OS component was not installed properly, or an MC hardware failure may have occurred or a previous instance was not shut down properly.

Action: Verify that there are no background or foreground Oracle processes from a previous instance on this node using the OS command `ps -ef|grep <instance_name>`. Verify that there are no shared memory segments belonging to the user which owns the Oracle installation by issuing the `ipcs -b` OS command. If there are shared memory segments or processes still on the system, use `svrmgrl` to shutdown the instance with the abort option. If the instance is not up, verify that the cluster software and/or the hardware is installed and working. Log in as superuser and issue the `cnxshow` command. Are all of the nodes in the cluster listed? Are they members of the cluster? Is the communications between nodes okay? If the answer to any of these questions is false, contact Digital's customer support organization.

ORA-04931: unable to set initial sequence number value

Cause: A call to the SSN failed to set the sequence number to its initial value, possibly caused by an MC hardware problem.

Action: Verify that the MC hardware is functioning properly. If it is not, contact Digital's customer support organization. If it is, contact Oracle support.

ORA-04932: increment or adjust of sequence number failed

Cause: A call to the SSN failed to increment the sequence number.

Action: Verify that the MC hardware is functioning properly. If it is not, contact Digital's customer support organization. If it is, contact Oracle support.

ORA-04933: initial service identifier is non-zero

Cause: A valid service identifier existed before the sequence number service was opened.

Action: Verify that the instance is completely shut down.

ORA-04934: unable to obtain the current sequence number

Cause: A call to the SSN failed to return its current value. Either there are many errors occurring on the MC hardware, or the sequence number has become invalid and cannot be validated.

Action: Verify that the MC hardware is functioning properly. If it is, contact Oracle Support.

ORA-04935: unable to get/convert SCN recovery lock

Cause: A process has timed out trying to get or convert the SCN recovery lock. Another process probably has the lock in EX or SHR mode, but is not releasing it.

Action: Contact Oracle Support.

ORA-04940: unsupported optimization of Oracle binary, check alert log for more info

Cause: ORACLE binary has been optimized with unsupported options or a required option has not been used.

Action: Check the documentation for a list of supported and required flags for the optimizing utility that you used to optimize ORACLE. Shutdown the instance, optimize ORACLE again with supported combination of options and restart the instance.

ORA-04941: required operating system patch needs to be applied

Cause: The operating system could not return the start time of a process.

Action: Check that the operating system kernel has been patched to return process start time. Apply the required operating system patch and restart the instance.

ORA-06000: NETASY: port open failure

Cause: Autologin unable to open port

Action: Check log file for OS-specific error code

ORA-06001: NETASY: port set-up failure

Cause: Autologin unable to change port attributes

Action: Check log file for OS-specific error code

ORA-06002: NETASY: port read failure

Cause: Autologin unable to read from port

Action: Check log file for OS-specific error code

ORA-06003: NETASY: port write failure

Cause: Autologin unable to write to port

Action: Check log file for OS-specific error code

ORA-06004: NETASY: dialogue file open failure

Cause: Autologin unable to open dialogue file

Action: Check connect string for accuracy/typos

ORA-06005: NETASY: dialogue file read failure

Cause: Autologin unable to read dialogue file

Action: Check log file for OS-specific error code

ORA-06006: NETASY: dialogue execute failure

Cause: Expected response never received

Action: None

ORA-06007: NETASY: bad dialogue format

Cause: Dialogue file contains syntax error

Action: Correct the dialogue file

ORA-06009: NETASY: dialogue filename too long

Cause: Full file spec for dialogue file exceeds 64 bytes

Action: Amend connect string accordingly

ORA-06010: NETASY: dialogue file too long

Cause: Dialogue file exceeds 768 bytes in length

Action: Simplify dialogue (e.g. remove comments, redundant white space), or split into two and link with "more" command

ORA-06011: NETASY: dialogue too long

Cause: One of two: 1. Dialogue contains more than 24 exchange blocks 2. Dialogue send string exceeds 84 bytes in length

Action: Simplify dialogue or split into two and link with "more" command

ORA-06017: NETASY: message receive failure

Cause: Async driver gets I/O error while doing network read operation

Action: Check log file for OS-specific error code and contact your customer support representative.

ORA-06018: NETASY: message send failure

Cause: Async driver gets I/O error while doing network write operation

Action: Check log file for OS-specific error code and contact your customer support representative.

ORA-06019: NETASY: invalid login (connect) string

Cause: Syntax error in login string.

Action: Resubmit with correct string.

ORA-06020: NETASY: initialisation failure

Cause: Async driver unable to complete initialisation

Action: Check log file for OS-specific error code

ORA-06021: NETASY: connect failed

Cause: Async driver unable to establish connection with partner

Action: Check log file for OS-specific error code

ORA-06022: NETASY: channel open failure

Cause: no free channel [should never happen]

Action: Contact your customer support representative.

ORA-06023: NETASY: port open failure

Cause: Async driver unable to open port

Action: Check log file for OS-specific error code

ORA-06024: NETASY: VTM error

Cause: Virtual Terminal Manager unable to read/write to port

Action: Check log file for OS-specific error code

ORA-06025: NETASY: Configuration error

Cause: Async driver genned for server-only, but client service requested

Action: Contact your customer support representative.

ORA-06026: NETASY: port close failure

Cause: Async driver unable to close port

Action: Check log file for OS-specific error code

ORA-06027: NETASY: channel close failure

Cause: Async driver unable to close channel

Action: Check log file for OS-specific error code

ORA-06028: NETASY: unable to initialise for logging

Cause: Async driver unable to initialise for logging I/O

Action: Contact your customer support representative.

ORA-06029: NETASY: port assignment failure

Cause: Async driver unable to assign port to channel [should never happen]

Action: Contact your customer support representative.

ORA-06030: NETDNT: connect failed, unrecognized node name

Cause: Node name specified in host string is unknown (probably misspelled)

Action: Retry with correct node name

ORA-06031: NETDNT: connect failed, unrecognized object name

Cause: Host string contains reference to object (which doesn't exist):

@d:<varname>node</varname>-<varname>obj</varname> => object is ORDN<varname>obj</varname>; when <varname>node</varname> is VMS, the object is ORDN<varname>obj</varname>.COM when <varname>node</varname> is UNIX, the object is ORDN<varname>obj</varname> @d:<varname>node</varname>:"task=<varname>obj</varname>" => object is <varname>obj</varname>; when <varname>node</varname> is VMS, the object is <varname>obj</varname>.COM when <varname>node</varname> is UNIX, the object is <varname>obj</varname>

Action: Retry with correct object name or create the required object on host node

ORA-06032: NETDNT: connect failed, access control data rejected

Cause: Host string contains invalid username/password

Action: Retry with correct username/password

ORA-06033: NETDNT: connect failed, partner rejected connection

Cause: Connection with partner was made but was rejected.

Action: Contact your network administrator.

ORA-06034: NETDNT: connect failed, partner exited unexpectedly

Cause: Connection with host node was made but partner aborted

Action: Make sure object (see 06031, above) is working (for VMS run the command file and make sure that the ORACLE server process starts up); sometimes happens when the network/node is under stress - in this case a retry often works.

ORA-06035: NETDNT: connect failed, insufficient resources

Cause: Insufficient system resources are available to complete the connection; for example, all DECnet channels are in use.

Action: Contact your network administrator.

ORA-06036: NETDNT: connect failed, no response from object

ORA-06037: NETDNT: connect failed, node unreachable

Cause: Host node is down.

Action: Contact your network administrator.

ORA-06038: NETDNT: connect failed, network driver not loaded

ORA-06039: NETDNT: connect failed

Cause: Connect failed for unexpected reason (see OSD error).

Action: Contact your customer support representative.

ORA-06040: NETDNT: invalid login (connect) string

Cause: Syntax error in login string.

Action: Resubmit with correct string.

ORA-06041: NETDNT: disconnect failed

Cause: Driver gets error while doing network close operation

Action: Contact your customer support representative.

ORA-06042: NETDNT: message receive failure

Cause: Driver gets I/O error while doing network read operation

Action: Contact your customer support representative.

ORA-06043: NETDNT: message send failure

Cause: Driver gets I/O error while doing network write operation

Action: Contact your customer support representative.

ORA-06044: NETDNT: connect failed, byte count quota exceeded

Cause: Connect failed because of insufficient byte count quota.

Action: Increase byte count quota.

ORA-06102: NETTCP: cannot allocate context area

Cause: Insufficient dynamic memory available for connection context area.

Action: Contact your customer support representative.

ORA-06105: NETTCP: remote host is unknown

Cause: Host name specified in the login (connect) string is unknown.

Action: Check spelling; make sure name is in the TCP/IP HOST file.

ORA-06106: NETTCP: socket creation failure

Cause: Process open file quota probably exceeded.

Action: Contact your customer support representative.

ORA-06107: NETTCP: ORACLE network server not found

Cause: No entry in SERVICES file for ORACLE server.

Action: Add ("orasrv") entry to the TCP/IP SERVICES file.

ORA-06108: NETTCP: connect to host failed

Cause: Connection attempt to remote host has failed. Probably means that the SQL*Net TCP/IP server on the remote host is not up, or the host itself is not up (check the latter by targeting it with Telnet).

Action: Start the SQL*Net TCP/IP server process on the remote host.

ORA-06109: NETTCP: message receive failure

Cause: I/O error occurred while attempting network read operation.

Action: Contact your customer support representative.

ORA-06110: NETTCP: message send failure

Cause: I/O error occurred while attempting network write operation.

Action: Contact your customer support representative.

ORA-06111: NETTCP: disconnect failure

Cause: Error occurred while closing a socket.

Action: Contact your customer support representative.

ORA-06112: NETTCP: invalid buffer size

Cause: The buffer size specified in the login string exceeds the allowed maximum (of 4096).

Action: Re-submit with valid buffer size.

ORA-06113: NETTCP: Too many connections

Cause: The maximum no. of concurrently open connections has been reached.

Action: Exit an application with an open connection which is no longer required.

ORA-06114: NETTCP: SID lookup failure

Cause: From the remote host's SQL*Net TCP/IP server: the database SID, specified in the login (connect) string, was not recognized.

Action: Add the appropriate SID entry to the CONFIG.ORA file on the remote host (and restart the SQL*Net TCP/IP server).

ORA-06115: NETTCP: unable to create ORACLE logicals

Cause: The host's SQL*Net TCP/IP server was unable to create the necessary logicals required by the ORACLE server process. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your system administrator.

ORA-06116: NETTCP: unable to create ORASRV process

Cause: The host's SQL*Net TCP/IP server was unable to create the ORACLE server process. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your system administrator.

ORA-06117: NETTCP: unable to create ORASRV: quota exceeded

Cause: The host's SQL*Net TCP/IP server was unable to create the ORACLE server process because of quota depletion.

Action: Increase quota allocations to the SQL*Net TCP/IP server process.

ORA-06118: NETTCP: unable to complete handshake with ORASRV

Cause: The ORACLE server process was started but failed to complete its initialization.

Action: Contact your customer support representative.

ORA-06119: NETTCP: spurious client request

Cause: The host's SQL*Net TCP/IP server was unable to recognize this connection request. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06120: NETTCP: network driver not loaded

Cause: The TCP/IP network driver is not loaded.

Action: Check that the TCP/IP driver is loaded correctly.

ORA-06121: NETTCP: access failure

Cause: The host's SQL*Net TCP/IP server was unable to test the accessibility of the SID mapping file (specified in CONFIG.ORA) associated with this connection request. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06122: NETTCP: setup failure

Cause: The host's SQL*Net TCP/IP server was unable to set up the appropriate environment to service this connection request. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06123: NETTCP: cannot set KEEPALIVE

Cause: The host's SQL*Net TCP/IP server was unable to set the socket KEEPLIVE option. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06124: NETTCP: timeout waiting for ORASRV

Cause: The ORACLE server process was started but failed to respond after N secs.

Action: For heavily loaded systems this is not an uncommon occurrence. Increase the value of N (the default is 30) by placing the following entry in the CONFIG.ORA file:

SQLNET ORASRV_WAIT = <no. of secs> which will come into effect the next time the SQL*Net TCP/IP server is started.

ORA-06125: NETTCP: ORASRV exited unexpectedly

Cause: The ORACLE server process was started but exited unexpectedly. Possible causes: 1. Insufficient quotas to run ORASRV 2. ORACLE is not installed See the ORASRV output file for more details; the file will be in the ORA_SQLNET directory and will have a name of the form: ORA_SRVTnn_<varname>SID</varname>.OUT

Action: If appropriate action is not obvious from the ORASRV output file then contact your customer support representative.

ORA-06126: NETTCP: ORASRV unable to open network connection

Cause: The ORACLE server process was started but was unable to open the socket passed to it by TCPSRV.

Action: Contact your customer support representative.

ORA-06127: NETTCP: unable to change username

Cause: The host's SQL*Net TCP/IP server could not establish a PROXY LOGIN connection because the client username is unknown (to the host OS).

Action: Create new user account on host.

ORA-06128: NETTCP: unable to create mailbox

Cause: The host's SQL*Net TCP/IP server was unable to create a mailbox (needed for IPC communication with the ORACLE server process). See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06129: NETTCP: unable to transfer socket ownership to ORASRV

Cause: The host's SQL*Net TCP/IP server was unable to transfer the network communication handle to the ORACLE server process. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06130: NETTCP: host access denied

Cause: The host's SQL*Net TCP/IP server rejected this connection request because the client node does not have access privilege - as determined by the contents of the Valid Node Table (VNT), a component of the host's CONFIG.ORA.

Action: To grant access, add appropriate entry to the host's VNT.

ORA-06131: NETTCP: user access denied

Cause: The host's SQL*Net TCP/IP server rejected this connection request because the client user(name) does not have access privilege - as determined by the contents of the Username Mapping Table (UMT), a component of the host's CONFIG.ORA.

Action: To grant access, add appropriate entry to the host's UMT.

ORA-06132: NETTCP: access denied, wrong password

Cause: The host SQL*Net TCP/IP server rejected this connection request because the client password did not match the host password.

Action: To grant access, get passwords in sync.

ORA-06133: NETTCP: file not found

Cause: The host's SQL*Net TCP/IP server could not find the SID mapping file (specified in CONFIG.ORA) associated with this connection request.

Action: Check CONFIG.ORA for spelling; make correct entry.

ORA-06134: NETTCP: file access privilege violation

Cause: The host's SQL*Net TCP/IP server did not have READ/ EXECUTE permission for the SID mapping file (specified in CONFIG.ORA) associated with this connection request.

Action: Change protection on SID mapping file.

ORA-06135: NETTCP: connection rejected; server is stopping

Cause: The host's SQL*Net TCP/IP server rejected this connection request because it is in the process of stopping.

Action: Re-start SQL*Net TCP/IP server.

ORA-06136: NETTCP: error during connection handshake

Cause: Network I/O failure occurred while communicating with the host's SQL*Net TCP/IP server. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06137: NETTCP: error during connection handshake

Cause: Network I/O failure occurred while communicating with the host's SQL*Net TCP/IP server. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06138: NETTCP: error during connection handshake

Cause: Network I/O failure occurred while communicating with the host's SQL*Net TCP/IP server. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06140: NETTCP: no such user

Cause: A proxy login connect attempt failed because the client username has no counterpart on the host.

Action: n/a

ORA-06141: NETTCP: no privilege for user

Cause: A proxy login connect attempt failed because the SQL*Net TCP/IP server had insufficient privileges to access the proxy account.

Action: Change account protection; change server privileges.

ORA-06142: NETTCP: error getting user information

Cause: A proxy login connect attempt failed because the SQL*Net TCP/IP server was unable to access the proxy account. See the SQL*Net TCP/IP server log file for more details.

Action: Contact your customer support representative.

ORA-06143: NETTCP: maximum connections exceeded

Cause: The connect failed because the maximum concurrent connections supported by the host's SQL*Net TCP/IP server has already been reached.

Action: Wait for a short period and re-try.

ORA-06144: NETTCP: SID (database) is unavailable

Cause: The database administrator on the host has varied the SID offline.

Action: Wait for it to be varied back on-line.

ORA-06145: NETTCP: unable to start ORASRV: images not installed

Cause: The host's SQL*Net TCP/IP server was unable to start the ORACLE server process because the ORACLE protected images were not installed.

Action: Install the images.

ORA-06200: TWOTASK: connect failed, can't create mailbox

ORA-06201: TWOTASK: connect failed, can't attach to mailbox

ORA-06202: TWOTASK: connect failed, can't spawn ORASRV process

ORA-06203: TWOTASK: connect failed, handshake failure

ORA-06204: TWOTASK: connect failed, can't access ORASRV2.COM

ORA-06205: TWOTASK: connect failed, can't create logical name

ORA-06206: TWOTASK: message receive failure

ORA-06207: TWOTASK: message send failure

ORA-06208: TWOTASK: invalid login (connect) string

ORA-06209: TWOTASK: connect failed, mailbox already exists

ORA-06210: TWOTASK: connect failed, ORASRV exited unexpectedly

ORA-06211: TWOTASK: connect failed, timeout waiting for ORASRV

ORA-06212: TWOTASK: connect failed, logical name table is full

ORA-06213: TWOTASK: connect failed

ORA-06214: TWOTASK: connect failed, insufficient quotas to create ORASRV

ORA-06215: TWOTASK: connect failed, ORASRV protected image not installed

ORA-06216: TWOTASK: connect failed, can't find ORASRV image file

ORA-06250: NETNTT: cannot allocate send and receive buffers

Cause: Two-task driver could not allocate data buffers.

Action: There is insufficient memory to run your program. Kill off other processes to free up memory.

ORA-06251: NETNTT: cannot translate address file name

Cause: ORACLE_HOME environment variable not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

ORA-06252: NETNTT: cannot open address file

Cause: The NTT two-task driver could not open a file containing address information.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported. Make sure the instance you are attempting to connect to is actually up and running.

ORA-06253: NETNTT: cannot read arguments from address file

Cause: The NTT two-task driver could not read addressing information from its addressing file.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported. Make sure the instance you are attempting to connect to is actually up and running.

ORA-06254: NETNTT: cannot share connection to cube

Cause: The NTT two-task driver could not share a connection to the cube.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported. Make sure the instance you are attempting to connect to is actually up and running.

ORA-06255: NETNTT: cannot read pid of remote process

Cause: An error occurred while reading the NTT communications link.

Action: Contact your customer support representative.

ORA-06256: NETNTT: remote fork failed

Cause: The Oracle listener process on the cube could not fork off a shadow process.

Action: The instance you are trying to connect to probably doesn't have enough memory to run another shadow process. Ask someone else to log off, or connect to a different instance.

ORA-06257: NETNTT: cannot send command line to shadow process

Cause: An error occurred while writing the NTT communications link.

Action: Contact your customer support representative.

ORA-06258: NETNTT: cannot allocate context area

Cause: Two-task driver could not allocate data buffers.

Action: There is insufficient memory to run your program. Kill off other processes to free up memory.

ORA-06259: NETNTT: cannot read from remote process

Cause: An error occurred while reading the NTT communications link.

Action: Contact your customer support representative.

ORA-06260: NETNTT: cannot write to remote process

Cause: An error occurred while writing the NTT communications linke.

Action: Contact your customer support representative.

ORA-06261: NETNTT: nrange() failed

Cause: The call to 'nrange()' failed while attempting to establish a connection.

Action: Contact your customer support representative.

ORA-06262: NETNTT: nfconn() failed

Cause: The call to 'nfconn()' failed while attempting to establish a connection.

Action: Contact your customer support representative.

ORA-06263: NETNTT: out of memory in pi_connect

Cause: Two-task driver could not allocate data buffers.

Action: There is insufficient memory to run your program. Kill off other processes to free up memory.

ORA-06264: NETNTT: data protocol error

Cause: The NTT two-task driver received an unexpected message type."

Action: Contact your customer support representative.

ORA-06265: NETNTT: break protocol error

Cause: The NTT two-task driver received an unexpected message type."

Action: Contact your customer support representative.

ORA-06266: NETNTT: bad write length

Cause: The NTT two-task driver failed on an internal consistency check.

Action: Contact your customer support representative.

ORA-06267: NETNTT: bad state

Cause: The NTT two-task driver failed on an internal consistency check.

Action: Contact your customer support representative.

ORA-06268: NETNTT: cannot read /etc/oratab

Cause: The NTT two-task driver could not read configuration information from /etc/oratab.

Action: Make sure /etc/oratab exists and is readable. This error may occur if the file is incorrectly formatted. It also may occur if the driver has run out of memory.

ORA-06300: IPA: Disconnect failure

Cause: A fatal error occurred during the disconnect from the server. This was probably caused by inaccessible message queues.

Action: If there is no message queue, restart the SQL*Net IPA servers using ipactl. Otherwise contact your customer support representative.

ORA-06301: IPA: Cannot allocate driver context

Cause: The memory pool is exhausted.

Action: Check the circumstances and try to allocate less memory in your program or adjust the init parameters in your INIT.ORA file and retry.

ORA-06302: IPA: Cannot connect to remote host

Cause: The cause may be one of the following: - there is no ADI server defined to reflect a connection to the specified host. - the remote host is not known by the local system. - the ORACLE kernel on the remote host is not generated with the IPA driver

Action: Check sequentially for the above causes and eliminate the actual cause found.

ORA-06303: IPA: Message send error

Cause: The SQL*Net IPA driver could not write the message into the message queue.

Action: Make sure that the message queue exists and is accessible. If necessary rerun ipactl.

ORA-06304: IPA: Message receive error

Cause: The SQL*Net IPA driver could not read a message from the message queue.

Action: Make sure that the message queue exists and is accessible. If necessary rerun ipactl.

ORA-06305: IPA: Illegal message type

Cause: The communication between user and ORACLE is out of synchronization. This message should not normally be issued.

Action: Contact your customer support representative.

ORA-06306: IPA: Message write length error

Cause: The IPA driver tried to write a message in the queue that was too big for the queue.

Action: Contact your customer support representative.

ORA-06307: IPA: Cannot reset connection

Cause: A fatal error occurred during the resetting of the connection.

Action: Contact your customer support representative.

ORA-06308: IPA: No more connections available

Cause: You have exhausted all your connections.

Action: Try again when some of the current users have logged off.

ORA-06309: IPA: No message queue available

Cause: The SQL*Net IPA servers have not been started.

Action: Run ipactl.

ORA-06310: IPA: Environment variable(s) not set

Cause: Environment variable(s) not set correctly.

Action: Check and correct.

ORA-06311: IPA: Maximum number of servers reached

Cause: Maximum number of servers reached.

Action: Shutdown and restart with an increased maximum number of servers. Note that database links consume one server per link. Be sure to start up enough servers to support database links.

ORA-06312: IPA: Incorrect outgoing service name supplied

Cause: Incorrect outgoing service name supplied.

Action: Check and correct the service name.

ORA-06313: IPA: Shared memory failed to initialise

Cause: The shared memory has not been set up correctly.

Action: Contact your system manager.

ORA-06314: IPA: Event set up failure

Cause: Fatal interprocess communication error.

Action: Contact your system manager.

ORA-06315: IPA: Invalid connect string

Cause: The connect string is malformed.

Action: Check and correct.

ORA-06316: IPA: Invalid database SID

Cause: The SID is unknown at the remote side.

Action: Either the database does not exist, is not running, or there are no reserved servers for that SID.

ORA-06317: IPA: Local maximum number of users exceeded

Cause: The maximum number of simultaneous users of SQL*Net IPA has been exceeded on the local side.

Action: Wait for free connections to become available. If the problem persists, contact your system manager.

ORA-06318: IPA: Local maximum number of connections exceeded

Cause: The maximum number of simultaneous connections that SQL*Net IPA can handle to different hosts has been exceeded on the local side.

Action: Wait for free connections to become available. If the problem persists, contact your system manager.

ORA-06319: IPA: Remote maximum number of users exceeded

Cause: The maximum number of simultaneous users of SQL*Net IPA has been exceeded on the remote side.

Action: Wait for free connections to become available. If the problem persists, contact your system manager.

ORA-06320: IPA: Remote maximum number of connections exceeded

Cause: The maximum number of simultaneous connections that SQL*Net IPA can handle from different hosts has been exceeded on the remote side.

Action: Wait for free connections to become available. If the problem persists, contact your system manager.

ORA-06321: IPA: Cannot reach the remote side

Cause: There has been a timeout on an attempt to connect to a remote server the reason for which is most likely to be the remote SQL*Net IPA software is not running. An alternative reason could be that the remote initiator service name is incorrect.

Action: Check and start the remote SQL*Net software. Check that it is started with the correct service names supplied.

ORA-06322: IPA: Fatal shared memory error

Cause: An internal error has occurred in the shared memory handling.

Action: Contact customer support.

ORA-06323: IPA: Cause event error

Cause: Fatal interprocess communication error.

Action: Contact your system manager.

ORA-06400: NETCMN: No default host string specified

Cause: There was no default host string specified in the configuration and the user didn't specify any explicit connect string.

Action: Either reconfigure the system specifying a default connect string or use an explicit connect string.

ORA-06401: NETCMN: invalid driver designator

Cause: The login (connect) string contains an invalid driver designator.

Action: Correct the string and re-submit.

ORA-06402: NETCMN: error receiving break message

Cause: Error occurred while attempting to read a break message.

Action: Contact your customer support representative.

ORA-06403: Unable to allocate memory.

Cause: System unable to allocate needed virtual memory.

Action: Configure more memory, reduce load, or simply try again.

ORA-06404: NETCMN: invalid login (connect) string

Cause: Syntax error in login string.

Action: Correct string and re-submit.

ORA-06405: NETCMN: reset protocol error

Cause: Unable to reset out of break state.

Action: Contact your customer support representative.

ORA-06406: NETCMN: error sending break message

Cause: Error occurred while attempting to send a break message.

Action: Contact your customer support representative.

ORA-06407: NETCMN: unable to set up break handling environment

Cause: Error occurred while attempting to set up asynchronous handlers for incoming, out-of-band break messages.

Action: Contact your customer support representative.

ORA-06408: NETCMN: incorrect message format

Cause: Message from partner contains bad header.

Action: Contact your customer support representative.

ORA-06413: Connection not open.

Cause: Unable to establish connection.

Action: Use diagnostic procedures to ascertain exact problem.

ORA-06416: NETCMN: error on test

Cause: Error occurred while testing I/O status of the network connection.

Action: Contact your customer support representative.

ORA-06419: NETCMN: server can not start oracle

Cause: The remote server was unable to start an ORACLE process on behalf of the client.

Action: Make sure permissions on the remote ORACLE program are correctly set. Contact your system administrator.

ORA-06420: NETCMN: SID lookup failure

Cause: From the remote host's server: the database SID, specified in the login (connect) string, was not recognized.

Action: Add the appropriate SID entry to the CONFIG.ORA or oratab file on the remote host (restarting the remote server may be needed).

ORA-06421: NETCMN: Error detected in the read-in data

Cause: Error found during recomputation of checksum or CRC.

Action: Possible hardware failures of communication nodes. Contact system administrator immediately.

ORA-06422: NETCMN: Error in sending data

Cause: Unable to transmit data to remote host.

Action: Try reconnect to remote host, and contact your system administrator.

ORA-06423: NETCMN: Error in receiving data

Cause: Unable to receive data from remote host.

Action: Try reconnect to remote host, and contact your system administrator.

ORA-06430: ssaio: Seals do not match

Cause: A function was called with an invalid argument.

Action: Contact your Oracle Customer Support Representative.

ORA-06431: ssaio: Invalid Block number

Cause: The file block number is out of range of the file. The additional information returns the block number.

Action: Verify that the block number is correct. Run dbfsize and check if the block number is in that range. Contact your Oracle Customer Support Representative.

ORA-06432: ssaio: Buffer Not Aligned

Cause: The I/O buffer was not aligned on a 2K boundary.

Action: Contact your Oracle Customer Support Representative.

ORA-06433: ssaio: LSEEK error, unable to seek to requested block.

Cause: The additional information returns the block number

Action: Look up the additional information returned in your operating system reference manual. Verify that the block number is correct.

ORA-06434: ssaio: read error, unable to read requested block from database file.

Cause: The read system call returned an error.

Action: The additional information indicates the block number. Look up the additional information returned in your operating system manual.

ORA-06435: ssaio: write error, unable to write requested block to database file.

Cause: The write system call returned an error.

Action: The additional information indicates the block number. Look up the additional information returned in your operating system manual.

ORA-06436: ssaio: asynchronous I/O failed due to incorrect parameters.

Cause: The Asynchronous I/O system call returned an error.

Action: The additional information indicates the block number. Look up the additional information returned in your operating system manual.

ORA-06437: ssaio: the asynchronous write was unable to write to the database file.

Cause: The Asynchronous I/O system call returned an error.

Action: The additional information indicates the block number. Look up the additional information returned in your operating system manual.

ORA-06438: ssaio: the asynchronous read was unable to read from the database file.

Cause: The Asynchronous I/O system call returned an error.

Action: The additional information indicates the block number. Look up the additional information returned in your operating system manual.

ORA-06439: ssaio: the asynchronous write returned incorrect number of bytes

Cause: This write call may have been truncated. The additional information returns the block number and number of bytes.

Action: Verify that the block number and the number of bytes written are correct.

ORA-06440: ssaio: the asynchronous read returned incorrect number of bytes

Cause: This read call may have been truncated. The additional information returns the block number and number of bytes.

Action: Verify that the block number and the number of bytes read are correct.

ORA-06441: ssvwatev: Incorrect parameter passed to function call

Cause: Either the ORACLE process id, or wait time or event ID is invalid.

Action: The additional information indicates the process id, time and event id.

ORA-06442: ssvwatev: Failed with unexpected error number.

Cause: Some system problems may exists on your system, please check error logs.

Action: The additional information indicates the error number. Look up the additional information returned in your operating system manual.

ORA-06443: ssvpstev: Incorrect parameter passed to function call

Cause: An invalid event ID is passed in to this routine.

Action: The additional information indicates the event id.

ORA-06444: ssvpstev: Failed with unexpected error number.

Cause: Some system problems may exist on your system, please check error logs.

Action: The additional information indicates the error number. Look up the additional information returned in your operating system manual.

ORA-06445: ssvpstevrg: Incorrect parameters passed to function call

Cause: An invalid event id, or the low and high event ID do not exist.

Action: The additional information indicates the error number. It also contains the event id, low boundary and high boundary.

ORA-06446: ssvpstevrg: Failed with unexpected error number.

Cause: Some system problems may exist on your system, please check error logs.

Action: The additional information indicates the error number. Look up the additional information returned in your operating system manual.

ORA-06447: ssvpstp: Incorrect parameter passed to function call

Cause: Invalid oracle process ID is passed in to this routine.

Action: The additional information indicates the process id.

ORA-06448: ssvpstp: Failed with unexpected error number.

Cause: Some system problems may exists on your system, please check error logs.

Action: The additional information indicates the error number. Look up the additional information returned in your operating system manual.

ORA-06449: The list IO or the sysvndor is not installed.

Cause: ORACLE tries to use the sysvndor interface (INIT.ORA parameter use_sysvndor=true) but the UNIX kernel does not have the ORACLE sysvndor interface linked in.

Action: Set use_sysvendor=false in INIT.ORA, if you don't want to use this interface or link the UNIX kernel with this interface so that ORACLE can use it.

ORA-06500: PL/SQL: storage error

Cause: PL/SQL was unable to allocate additional storage. This message normally appears with an ORA-4030 or ORA-4031 error which gives additional information. Sometimes this error can be caused by runaway programs.

Action: 1) Ensure there are no issues or bugs in your PL/SQL program which are causing excessive amounts of memory to be used. 2) Programmatically cause unused objects to be freed (e.g. by setting them to NULL). 3) Increase the amount of shared or process memory (as appropriate) available to you.

ORA-06501: PL/SQL: program error

Cause: This is an internal error message. An error has been detected in a PL/SQL program.

Action: Contact Oracle Support Services.

ORA-06502: PL/SQL: numeric or value error<varname>string</varname>

Cause: An arithmetic, numeric, string, conversion, or constraint error occurred. For example, this error occurs if an attempt is made to assign the value NULL to a variable declared NOT NULL, or if an attempt is made to assign an integer larger than 99 to a variable declared NUMBER(2).

Action: Change the data, how it is manipulated, or how it is declared so that values do not violate constraints.

ORA-06503: PL/SQL: Function returned without value

Cause: A call to PL/SQL function completed, but no RETURN statement was executed.

Action: Rewrite PL/SQL function, making sure that it always returns a value of a proper type.

ORA-06504: PL/SQL: Return types of Result Set variables or query do not match

Cause: Number and/or types of columns in a query does not match declared return type of a result set variable, or declared types of two Result Set variables do not match.

Action: Change the program statement or declaration. Verify what query the variable actually refers to during execution.

ORA-06505: PL/SQL: variable requires more than 32767 bytes of contiguous memory

Cause: A PL/SQL variable was declared with a constraint which required more than 32767 bytes of memory. PL/SQL does not currently support allocations of contiguous memory greater than 32767 bytes.

Action: Consider reducing the constraint in the variable declaration. If that is not possible, try changing the database or national character set to such, that requires less memory for the same constraint. Note: changing the character set will impact execution of all PL/SQL code.

ORA-06508: PL/SQL: could not find program unit being called<varname>string</varname>

ORA-06509: PL/SQL: ICD vector missing for this package

ORA-06510: PL/SQL: unhandled user-defined exception

Cause: A user-defined exception was raised by PL/SQL code, but not handled.

Action: Fix the problem causing the exception or write an exception handler for this condition. Or you may need to contact your application administrator or DBA.

ORA-06511: PL/SQL: cursor already open

Cause: An attempt was made to open a cursor that was already open.

Action: Close cursor first before reopening.

ORA-06512: at <varname>string</varname>line <varname>string</varname>

Cause: Backtrace message as the stack is unwound by unhandled exceptions.

Action: Fix the problem causing the exception or write an exception handler for this condition. Or you may need to contact your application administrator or DBA.

ORA-06513: PL/SQL: index for PL/SQL table out of range for host language array

Cause: An attempt is being made to copy a PL/SQL table to a host language array. But an index in the table is either less than one or greater than the maximum size of the host language array. When copying PL/SQL tables to host language arrays, the table entry at index 1 is placed in the first element of the array, the entry at index 2 is placed in the second element of the array, etc. If an table entry has not been assigned then the corresponding element in the host language array is set to null.

Action: Increase size of host language array, or decrease size of PL/SQL table. Also make sure that you don't use index values less than 1.

ORA-06514: PL/SQL: The remote call cannot be handled by the server

Cause: The remote call has parameters that are cursor variables or lob variables. This cannot be handled by stored procedures on your server.

Action: Avoid using cursor variables or lob variables as parameters for stored procedures on this server or upgrade your server to a version that supports this.

ORA-06515: PL/SQL: unhandled exception <varname>string</varname>

Cause: An exception was raised by PL/SQL code, but not handled. The exception number is outside the legal range of Oracle errors.

Action: Fix the problem causing the exception or write an exception handler for this condition. Or you may need to contact your application administrator or DBA.

ORA-06516: PL/SQL: the Probe packages do not exist or are invalid

Cause: A Probe operation, probably an attempt to initialize the ORACLE server to debug PL/SQL, could not be completed because the Probe packages were not loaded or have become invalid.

Action: DBA should load the Probe packages. This can be done by running the pload.sql script supplied with the RDBMS.

ORA-06517: PL/SQL: Probe error - <varname>string</varname>

Cause: An error occurred while passing a Probe operation to the server for execution.

Action: Refer to the entry for the embedded error message.

ORA-06518: PL/SQL: Probe version <varname>string</varname> incompatible with version <varname>string</varname>

Cause: The current version of Probe is incompatible with the version on the ORACLE server.

Action: Refer to the documentation to ensure that this degree of compatibility is supported.

ORA-06519: active autonomous transaction detected and rolled back

Cause: Before returning from an autonomous PL/SQL block, all autonomous transactions started within the block must be completed (either committed or rolled back). If not, the active autonomous transaction is implicitly rolled back and this error is raised.

Action: Ensure that before returning from an autonomous PL/SQL block, any active autonomous transactions are explicitly committed or rolled back.

ORA-06520: PL/SQL: Error loading external library

Cause: An error was detected by PL/SQL trying to load the external library dynamically.

Action: Check the stacked error (if any) for more details.

ORA-06521: PL/SQL: Error mapping function

Cause: An error was detected by PL/SQL trying to map the mentioned function dynamically.

Action: Check the stacked error (if any) for more details.

ORA-06522: <varname>string</varname>

Cause: ORA-06520 or ORA-065211 could stack this error with a system specific error string.

Action: This error string should give the cause for errors ORA-06520 or ORA-065211

ORA-06523: Maximum number of arguments exceeded

Cause: There is an upper limit on the number of arguments that one can pass to the external function.

Action: Check the port specific documentation on how to calculate the upper limit.

ORA-06524: Unsupported option : <varname>string</varname>

Cause: The option specified is an unsupported feature for external procedures.

Action: Correct the syntax in the external specification

ORA-06525: Length Mismatch for CHAR or RAW data

Cause: The length specified in the length variable has an illegal value. This can happen if you have requested requested a PL/SQL INOUT, OUT or RETURN raw variable to be passed as a RAW with no corresponding length variable. This error can

also happen if there is a mismatch in the length value set in the length variable and the length in the orlvstr or orlraw.

Action: Correct the external procedure code and set the length variable correctly.

ORA-06526: Unable to load PL/SQL library

Cause: PL/SQL was unable to instantiate the library referenced by this referenced in the EXTERNAL syntax. This is a serious error and should normally not happen.

Action: Report this problem to customer support.

ORA-06527: External procedure SQLLIB error: <varname>string</varname>

Cause: An error occurred in sqllib during execution of a Pro* external procedure.

Action: The message text indicates the actual SQLLIB error that occurred. Consult the Oracle Error Messages and Codes manual for a complete description of the error message and follow the appropriate action.

ORA-06528: Error executing PL/SQL profiler

Cause: An error occurred in during execution of a PL/SQL profiler procedure.

Action: Check the stacked errors for more details.

ORA-06529: Version mismatch - PL/SQL profiler

Cause: The PL/SQL profiler package (dbmspb.sql, prvtppb.plb) does not match the version of the code in the server implementing the profiler.

Action: Run the package profload.sql in \$ORACLE_HOME/rdbms/admin to load the correct version of the PL/SQL profiler packages

ORA-06530: Reference to uninitialized composite

Cause: An object, LOB, or other composite was referenced as a left hand side without having been initialized.

Action: Initialize the composite with an appropriate constructor or whole-object assignment.

ORA-06531: Reference to uninitialized collection

Cause: An element or member function of a nested table or varray was referenced (where an initialized collection is needed) without the collection having been initialized.

Action: Initialize the collection with an appropriate constructor or whole-object assignment.

ORA-06532: Subscript outside of limit

Cause: A subscript was greater than the limit of a varray or non-positive for a varray or nested table.

Action: Check the program logic and increase the varray limit if necessary.

ORA-06533: Subscript beyond count

Cause: An in-limit subscript was greater than the count of a varray or too large for a nested table.

Action: Check the program logic and explicitly extend if necessary.

ORA-06534: Cannot access Serially Reusable package <varname>string</varname>

Cause: The program attempted to access a Serially Reusable package in PL/SQL called from SQL context (trigger or otherwise). Such an access is currently unsupported.

Action: Check the program logic and remove any references to Serially Reusable packages (procedure, function or variable references) which might happen in PL/SQL called from sql context (trigger or otherwise).

ORA-06535: statement string in <varname>string</varname> is NULL or 0 length

Cause: The program attempted to use a dynamic statement string that was either NULL or 0 length.

Action: Check the program logic and ensure that the dynamic statement string is properly initialized.

ORA-06536: IN bind variable bound to an OUT position

Cause: The program attempted to bind an IN bind variable to a statement that was expecting an OUT bind variable at that position.

Action: Make sure that an OUT or IN OUT bind mode is specified for the bind argument.

ORA-06537: OUT bind variable bound to an IN position

Cause: The program attempted to bind an OUT bind variable to a statement that was expecting an IN bind variable at that position.

Action: Make sure that an IN or IN OUT bind mode is specified for the bind argument.

ORA-06538: statement violates <varname>string</varname> RESTRICT_REFERENCES pragma

Cause: The program attempted to execute a dynamic statement which does not meet the purity level specified (in the pragma RESTRICT_REFERENCES directive) for the module executing the statement.

Action: Ensure that the dynamic statement meets the purity level specified for the module executing the statement.

ORA-06539: target of OPEN must be a query

Cause: The program attempted to perform an OPEN cursor operation on a dynamic statement that was not a query.

Action: Ensure that the OPEN cursor operation is done on a dynamic query statement.

ORA-06540: PL/SQL: compilation error

Cause: A pl/sql compilation error occurred. However, the user generally will not see this error message. Instead, there will be accompanying PLS-nnnnn error messages.

Action: See accompanying PLS-nnnnn error messages.

ORA-06541: PL/SQL: compilation error - compilation aborted

Cause: A pl/sql compilation error occurred and the compilation was aborted; but the compilation unit was written out to the backing store. However, unlike ora-06545, the

user generally will not see this error message. Instead, there will be accompanying PLS-nnnnn error messages.

Action: See accompanying PLS-nnnnn error messages.

ORA-06542: PL/SQL: execution error

ORA-06543: PL/SQL: execution error - execution aborted

ORA-06544: PL/SQL: internal error, arguments: [<varname>string</varname>],
 [<varname>string</varname>], [<varname>string</varname>],
 [<varname>string</varname>], [<varname>string</varname>],
 [<varname>string</varname>], [<varname>string</varname>],
 [<varname>string</varname>]

Cause: A pl/sql internal error occurred.

Action: Report as a bug; the first argument is the internal error number.

ORA-06545: PL/SQL: compilation error - compilation aborted

Cause: A pl/sql compilation error occurred and the compilation was aborted completely without the compilation unit being written out to the backing store. Unlike ora-06541, the user will always see this error along with the accompanying PLS-nnnnn error messages.

Action: See accompanying PLS-nnnnn error messages.

ORA-06546: DDL statement is executed in an illegal context

Cause: DDL statement is executed dynamically in illegal PL/SQL context. - Dynamic OPEN cursor for a DDL in PL/SQL - Bind variable's used in USING clause to EXECUTE IMMEDIATE a DDL - Define variable's used in INTO clause to EXECUTE IMMEDIATE a DDL

Action: Use EXECUTE IMMEDIATE without USING and INTO clauses to execute the DDL statement.

ORA-06547: RETURNING clause must be used with INSERT, UPDATE, or DELETE statements

Cause: EXECUTE IMMEDIATE with a RETURNING clause is used to execute dynamic UPDATE, INSERT, or DELETE statements only.

Action: use RETURNING clause in EXECUTE IMMEDIATE for INSERT, UPDATE, or DELETE statements only. For other statements, use USING clause instead.

ORA-06548: no more rows needed

Cause: The caller of a pipelined function did not need more rows to be produced by the pipelined function.

Action: Do not catch the NO_DATA_NEEDED exception in an exception handling block.

ORA-06549: PL/SQL: failed to dynamically open shared object (DLL):
 <varname>string</varname>:<varname>string</varname>

Cause: One possible cause might be there are too many DLLs open at the same time.

Action: -----

ORA-06550: line <varname>string</varname>, column <varname>string</varname>:\n<varname>string</varname>

Cause: Usually a PL/SQL compilation error.

Action: n/a

ORA-06551: PL/SQL: Unhandled exception

ORA-06552: PL/SQL: <varname>string</varname>

ORA-06553: PLS-<varname>string</varname>: <varname>string</varname>

ORA-06554: package DBMS_STANDARD must be created before using PL/SQL

Cause: The DBMS specific extensions to PL/SQL's package "STANDARD" are in package "DBMS_STANDARD". This package must be created before using PL/SQL.

Action: Create package "DBMS_STANDARD". The source for this PL/SQL stored package is provided with the distribution.

ORA-06555: this name is currently reserved for use by user SYS

Cause: You tried to create a package named "STANDARD", "DBMS_STANDARD" or "DEBUG_IO". These are currently reserved for use by user SYS.

Action: Choose another name for your package.

ORA-06556: the pipe is empty, cannot fulfill the unpack_message request

Cause: There are no more items in the pipe.

Action: Check that the sender and receiver agree on the number and types of items placed on the pipe.

ORA-06557: null values are not allowed for any parameters to pipe icd's

Cause: Internal error from the dbms_pipe package.

Action: n/a

ORA-06558: buffer in dbms_pipe package is full. No more items allowed

Cause: The pipe buffer size has been exceeded.

Action: n/a

ORA-06559: wrong datatype requested, <varname>string</varname>, actual datatype is <varname>string</varname>

Cause: The sender put different datatype on the pipe than that being requested (package 'dbms_pipe'). The numbers are: 6 - number, 9 - char, 12 - date.

Action: Check that the sender and receiver agree on the number and types of items placed on the pipe.

ORA-06560: pos, <varname>string</varname>, is negative or larger than the buffer size, <varname>string</varname>

Cause: Internal error from the dbms_pipe package.

Action: n/a

ORA-06561: given statement is not supported by package DBMS_SQL

Cause: Attempting to parse an unsupported statement using procedure PARSE provided by package DBMS_SQL.

Action: Only statements which begin with SELECT, DELETE, INSERT, UPDATE, LOCK, BEGIN, DECLARE or << (PL/SQL label delimiter) are supported.

ORA-06562: type of out argument must match type of column or bind variable

Cause: Attempting to get the value of a column or a bind variable by calling procedure COLUMN_VALUE or VARIABLE_VALUE of package DBMS_SQL but the type of the given out argument where to place the value is different from the type of the column or bind variable that was previously defined by calling procedure DEFINE_COLUMN (for defining a column) or BIND_VARIABLE (for binding a bind variable) of package DBMS_SQL.

Action: Pass in an out argument of the correct type when calling procedure COLUMN_VALUE or VARIABLE_VALUE. The right type is the type that was provided when defining the column or binding the bind variable.

ORA-06563: name has too many parts

Cause: The name to be resolved was specified as one of the following: - With three parts (A.B.C) but the A.B parts resolved to an object that did not expose visible nested procedures; the C part could not be resolved. - With two parts (A.B) and the A part resolved to an object that did not expose visible nested procedures; the B part could not be resolved.

Action: Specify the valid name of an object or of a packaged procedure or function without specifying any additional trailing parts.

ORA-06564: object <varname>string</varname> does not exist

Cause: The named object could not be found. Either it does not exist or you do not have permission to access it.

Action: Create the object or get permission to access it.

ORA-06565: cannot execute <varname>string</varname> from within stored procedure

Cause: The named procedure cannot be executed from within a stored procedure, function or package. This function can only be used from pl/sql anonymous blocks.

Action: Remove the procedure from the calling stored procedure.

ORA-06566: invalid number of rows specified

Cause: An invalid number of rows was specified in a call to the procedure DEFINE_COLUMN in the package DBMS_SQL. For a given parsed statement in a given cursor, all columns must be defined to have the same number of rows, so all the calls to DEFINE_COLUMN must specify the same number of rows.

Action: Specify a number that matches that for previously defined columns.

ORA-06567: invalid number of values specified

Cause: An invalid number of values to be bound was specified in a call to the procedure BIND_VARIABLE in the package DBMS_SQL. In order to execute a given parsed statement in a given cursor, the same number of values must have been bound for all bind variables, so when EXECUTE is called, the latest calls to

BIND_VARIABLE must have specified the same number of values to be bound for all bind variables.

Action: Make sure that the same number of values have been bound for all of the bind variables.

ORA-06568: obsolete ICD procedure called

Cause: An obsolete ICD procedure was called by a PL/SQL program. The PL/SQL program was probably written for an earlier release of RDBMS.

Action: Make sure that all PL/SQL programs have been upgraded to the latest release of the RDBMS. This can be accomplished by following upgrade instructions in the README file, or by running the catproc.sql script supplied with the RDBMS.

ORA-06569: Collection bound by bind_array contains no elements

Cause: A collection with zero elements was bound to a bind variable in a call to procedure BIND_ARRAY in the package DBMS_SQL. In order to execute a bind of a collection, the collection must contain at least one element. If no elements are present then at execute time there will be no value for this bind and the statement is meaningless.

Action: Fill the collection with the elements you want to bind and try the bind call again.

ORA-06570: shared pool object does not exist, cannot be pinned/purged

Cause: The specified shared pool shared cursor could not be found, therefore it cannot be pinned/purged.

Action: Make sure that a correct shared cursor name is given. Names are a string of the form 'HHHHHHHH,SDDDDDDDDDD' where the H's are an 8 digit hex number from the 'address' column of v\$sqlarea, and the D's are a 1 to 10 digit decimal number with an optional leading sign (from the 'hash_value' column) Remove the procedure from the calling stored procedure.

ORA-06571: Function <varname>string</varname> does not guarantee not to update database

Cause: There are two possible causes for this message: * A SQL statement references a packaged, PL/SQL function that does not contain a pragma that prevents the database from being updated. * A SQL statement references a stand-alone, PL/SQL function that contains an instruction to update the database.

Action: If the referenced function is a packaged, PL/SQL function: Recreate the PL/SQL function with the required pragma; be certain to include the 'Write No Database State' (WNDS) argument in the argument list of the pragma. If the referenced function is a stand-alone, PL/SQL function: Do not use the function.

ORA-06572: Function <varname>string</varname> has out arguments

Cause: A SQL statement references either a packaged, or a stand-alone, PL/SQL function that contains an OUT parameter in its argument list. PL/SQL functions referenced by SQL statements must not contain the OUT parameter.

Action: Recreate the PL/SQL function without the OUT parameter in the argument list.

ORA-06573: Function <varname>string</varname> modifies package state, cannot be used here

Cause: There are two possible causes for this message: * A SQL statement references a packaged, PL/SQL function that does not contain a pragma containing the 'Write no Package State' (WNPS). * A SQL statement references a stand-alone, PL/SQL function that modifies a package state. A stand-alone, PL/SQL function referenced by a SQL statement cannot modify a package state.

Action: If the function is a packaged, PL/SQL function: Recreate the function and include a pragma containing the 'Write no Package State' (WNPS). If the function is a stand-alone, PL/SQL function: Delete the function from the SQL statement.

ORA-06574: Function <varname>string</varname> references package state, cannot execute remotely

Cause: There are two possible causes for this message: * A remote, packaged function or a remote-mapped, local, packaged function that does not contain a pragma with the 'Write no Package State' (WNPS) and 'Read no Package State' (RNPS) arguments references a package state. * A remote, stand-alone function or a remote-mapped, local, stand-alone function contains a reference to a package state (reads or writes a package variable). Only local functions that are referenced in a SELECT list, VALUES clause of an INSERT statement, or SET clause of an UPDATE statement can modify a package state.

Action: If the function is a packaged function: Recreate the function and include a pragma containing the 'Write no Package State' (WNPS) and 'Read no Package State' (RNPS) arguments. If the function is a stand-alone function: Do not call the function.

ORA-06575: Package or function <varname>string</varname> is in an invalid state

Cause: A SQL statement references a PL/SQL function that is in an invalid state. Oracle attempted to compile the function, but detected errors.

Action: Check the SQL statement and the PL/SQL function for syntax errors or incorrectly assigned, or missing, privileges for a referenced object.

ORA-06576: not a valid function or procedure name

Cause: Could not find a function (if an INTO clause was present) or a procedure (if the statement did not have an INTO clause) to call.

Action: Change the statement to invoke a function or procedure

ORA-06577: output parameter not a bind variable

Cause: The argument corresponding to an IN/OUT or OUT parameter for a function or a procedure or a function return value in a CALL statement must be a bind variable.

Action: Change the argument to a bind variable

ORA-06578: output parameter cannot be a duplicate bind

Cause: The bind variable corresponding to an IN/OUT or OUT parameter for a function or a procedure or a function return value in a CALL statement cannot be a duplicate bind variable.

Action: Change the bind variable to be unique

ORA-06579: Bind variable not big enough to hold the output value

Cause: The bind variable specified by the user is not large enough to hold the output returned by the function or a procedure.

Action: Specify a bind variable of larger size.

ORA-06580: Hash Join ran out of memory while keeping large rows in memory

Cause: Hash Join reserves 3 slots (each slot size = DB_BLOCK_SIZE * HASH_JOIN_MULTIBLOCK_IO_COUNT) for a row. If a row is larger than that, this error will be raised.

Action: Increase HASH_JOIN_MULTIBLOCK_IO_COUNT so that each joined row fits in a slot. HASH_AREA_SIZE may also need to be increased.

ORA-06592: CASE not found while executing CASE statement

Cause: A CASE statement must either list all possible cases or have an else clause.

Action: Add all missing cases or an else clause.

ORA-06593: <varname>string</varname> is not supported with natively compiled PL/SQL modules

Cause: Specified feature is not yet supported for natively compiled PL/SQL modules yet.

Action: Recompile the relevant PL/SQL modules in non-native mode by setting the parameter plsql_compiler_flags to INTERPRETED.

ORA-06594: ICD is unable to compute a result**ORA-06595: REF CURSOR parameters are not supported in forwarded RPC calls**

Cause: An attempt was made to make a forwarded RPC call with a REF CURSOR parameter.

Action: Either call the remote function directly (i.e., not by way of forwarding), or move the remote function to a database where it can be called directly.

ORA-06596: object cannot be purged, object is permanently kept in shared pool

Cause: The specified object was permanently kept, therefore, cannot be purged.

Action: Use DBMS_SHARED_POOL.UNKEEP procedure to unkeep the object and then purge it.

ORA-06597: Failed to increase the session's call stack memory to <varname>string</varname> bytes at a depth of <varname>string</varname> calls. (The current maximum is <varname>string</varname> bytes.)

Cause: PL/SQL program execution used more call stack memory than permitted.

Action: * Ask your DBA to increase the maximum allowed call stack memory. * Decrease the amount of call stack used by the program. This may be accomplished by using fewer, smaller local variables, or by limiting the depth of function call nesting.

ORA-06598: insufficient INHERIT PRIVILEGES privilege

Cause: An attempt was made to run an AUTHID CURRENT_USER function or procedure, or to reference a BEQUEATH CURRENT_USER view, and the owner of that function, procedure, or view lacks INHERIT PRIVILEGES privilege on the calling user.

Action: Either do not call the function or procedure or reference the view, or grant the owner of the function, procedure, or view INHERIT PRIVILEGES privilege on the calling user.

ORA-06599: unsupported LOB operation in RPC call

Cause: An attempt was made to perform certain large object (LOB) date type operations (for example, deep copying of a temporary or abstract LOB on the client side) while performing a remote procedural call (RPC). This is not currently supported.

Action: Perform the LOB operation in question before starting the RPC. Or, perform those LOB operations on the server side instead of the client side.

ORA-06600: LU6.2 Driver: SNA software is not loaded

Cause: The SNA software is not running.

Action: Start the SNA software and try again.

ORA-06601: LU6.2 Driver: Invalid database ID string

Cause: The database string in the connect was invalid.

Action: Provide a valid database string, as defined in documentation.

ORA-06602: LU6.2 Driver: Error allocating context area

Cause: Context area failure.

Action: Contact your local service representative.

ORA-06603: LU6.2 Driver: Error allocating memory

Cause: Operating system refused request for memory.

Action: Contact you local service representative.

ORA-06604: LU6.2 Driver: Unable to allocate session with remote LU

Cause: Allocate system call failed.

Action: Ensure that the SNA software is running and that sessions are free. If this is the case, then check your SNA configuration data for errors. You may have entered an incorrect parameter.

ORA-06605: LU6.2 Driver: Unexpected line turnaround

Cause: SNA software switched from send to receive unexpectedly.

Action: Check the SNA configuration data, particularly parameters associated with a session.

ORA-06606: LU6.2 Driver: Unexpected response from SNA

Cause: A parameter in an SNA call returned an unexpected value.

Action: Attempt to reproduce problem, debug and record the value of the 'what' data parameter at the time of error. Then contact your service representative.

ORA-06607: LU6.2 Driver: Reset occurred in send state

Cause: A reset was issued whilst in send state.

Action: Check the SNA LOG data, if relevent, for further information.

ORA-06608: LU6.2 Driver: Reset occurred in receive state

Cause: A reset was received from the partner whilst in receive state. This may be because the partner deallocated.

Action: Check the SNA LOG data, if relevant, for further information.

ORA-06610: LU6.2 Driver: Failed during deallocation

Cause: LU6.2 driver was unable to deallocate gracefully.

Action: Check the reason for deallocation. Consult the SNA LOG data.

ORA-06611: LU6.2 Driver: Request to send error**ORA-06612: LU6.2 Driver: Send data error****ORA-06613: LU6.2 Driver: Receive and wait error****ORA-06614: LU6.2 Driver: Receive Immediate error****ORA-06615: LU6.2 Driver: Send error****ORA-06616: LU6.2 Driver: Attach to LU failed**

Cause: The SQL*Net LU6.2 driver was unable to attach to the LU specified in the connect string, or was unable to attach to the default LU.

Action: Check that the LU name specified in the connect string, or the default LU name if no LU was specified, is correctly configured and operational.

ORA-06617: LU6.2 Driver: Attach to PU failed**ORA-06618: LU6.2 Driver: Activation of subnetwork failed****ORA-06619: LU6.2 Driver: Unable to activate remote partner****ORA-06620: LU6.2 Driver: Invalid remote partner****ORA-06621: LU6.2 Driver: Allocation error****ORA-06622: LU6.2 Driver: Unable to attach to SNA**

Cause: The SQL*Net LU6.2 driver could not attach to the SNA software on your machine. The most likely cause is that the SNA software is not operational.

Action: Check the status of the SNA software, ensure that it is operational and then try again.

ORA-06700: TLI Driver: incorrect message type from host

Cause: TLI received a message with an unrecognizable message type.

Action: Contact your customer support representative.

ORA-06701: TLI Driver: incorrect number of bytes written

Cause: TLI sent a message that was apparently successful, but the number of bytes transmitted did not match the number of bytes supplied to the driver.

Action: Contact your customer support representative.

ORA-06702: TLI Driver: cannot allocate context area

Cause: TLI could not allocate heap space for the context area.

Action: Contact your customer support representative.

ORA-06703: TLI Driver: send break message failed

Cause: TLI failed to send a break message across the connection.

Action: Contact your customer support representative.

ORA-06704: TLI Driver: receive break message failed

Cause: TLI failed to receive an expected break message.

Action: Contact your customer support representative.

ORA-06705: TLI Driver: remote node is unknown

Cause: TLI could not find your remote host information.

Action: Make sure you specified the hostname correctly on the command line. (Also, check your capitalization and spelling.)

ORA-06706: TLI Driver: service not found

Cause: TLI could not find service information for the specified service name.

Action: If you specified the service name on the command line or with the environment variable TLI_SERVER, make sure you specified it correctly. If the service name is not in the SERVICES file for your protocol, ask your system administrator to add it.

ORA-06707: TLI Driver: connection failed

Cause: TLI failed to establish the connection to a SQL*Net TCP/IP server due to an error encountered by the remote server, which has supplied a string describing the remote error.

Action: See the SQL*Net TCP/IP User's Guide section "orasrv Messages" for the specific cause and action.

ORA-06708: TLI Driver: message receive failure

Cause: TLI encountered an error receiving a message from the communication channel.

Action: Contact your customer support representative.

ORA-06709: TLI Driver: message send failure

Cause: TLI encountered an error sending a message across the communication channel.

Action: Contact your customer support representative.

ORA-06710: TLI Driver: send interrupt break message failed

Cause: TLI failed to send a break message while handling an interrupt signal from the user.

Action: Contact your customer support representative.

ORA-06711: TLI Driver: error on bind

Cause: TLI failed to assign a network address to the communication channel.

Action: Contact your customer support representative.

ORA-06712: TLI Driver: error on accept

Cause: TLI failed to accept a connection request from the client.

Action: Contact your customer support representative.

ORA-06713: TLI Driver: error on connect

Cause: TLI failed to connect the client to the remote server. The network line to the remote host may be down.

Action: Use other network login programs to make sure that the remote host is accessible.

ORA-06720: TLI Driver: SID lookup failure

Cause: The database SID supplied in the database login string was not recognized by the remote host.

Action: Ask your system administrator to add the appropriate SID entry to oratab on the remote host.

ORA-06721: TLI Driver: spurious client req

Cause: The remote TLI server received an undefined request.

Action: Contact your customer support representative.

ORA-06722: TLI Driver: connection setup failure

Cause: The remote TLI server rejected the connection request, and the client was unable to retrieve an error code or message.

Action: Contact your customer support representative.

ORA-06730: TLI Driver: unable to open clone device

Cause: TLI failed to open the Streams clone device associated with the transport provider.

Action: Contact your customer support representative.

ORA-06731: TLI Driver: cannot alloc t_call

Cause: TLI cannot allocate space for the client's connection information.

Action: Contact your customer support representative.

ORA-06732: TLI Driver: cannot alloc t_discon

Cause: TLI cannot allocate space for the client's disconnection information.

Action: Contact your customer support representative.

ORA-06733: TLI Driver: failed to receive disconnect

Cause: TLI failed to receive an expected disconnection message during connection release.

Action: Contact your customer support representative.

ORA-06734: TLI Driver: cannot connect

Cause: TLI failed to connect the client to the remote server.

Action: Check that the remote TLI server is running.

ORA-06735: TLI Driver: client failed to close error conn

Cause: TLI failed to properly close a connection after an error was received.

Action: Contact your customer support representative.

ORA-06736: TLI Driver: server not running

Cause: TLI timed out while attempting to connect to the remote TLI server.

Action: Check that the remote TLI server is running with the status utility for the transport provider you are using. If it is not, ask your system administrator to start it.

ORA-06737: TLI Driver: connection failed

Cause: TLI could not establish a connection to the remote TLI server.

Action: Check that the remote TLI server is running with the status utility for the transport provider you are using.

ORA-06741: TLI Driver: unable to open protocol device

Cause: The TLI server failed to open the Streams device associated with the transport provider.

Action: Contact your customer support representative.

ORA-06742: TLI Driver: cannot alloc t_bind

Cause: The TLI server cannot allocate space for its requested network address.

Action: Contact your customer support representative.

ORA-06743: TLI Driver: cannot alloc t_bind

Cause: The TLI server cannot allocate space for its actual network address.

Action: Contact your customer support representative.

ORA-06744: TLI Driver: listener cannot bind

Cause: The TLI server failed to assign the correct network address on which to listen for connections.

Action: Contact your customer support representative.

ORA-06745: TLI Driver: listener already running

Cause: The network address on which the TLI server awaits connection requests is in use, possibly because the server is already running.

Action: Ensure that the TLI server is not already running. If it is not running and this error message recurs, contact your customer support representative.

ORA-06746: TLI Driver: cannot alloc t_call

Cause: TLI cannot allocate space for the TLI server's connection information.

Action: Contact your customer support representative.

ORA-06747: TLI Driver: error in listen

Cause: The TLI server encountered an error while listening for connection requests.

Action: Contact your customer support representative.

ORA-06748: TLI Driver: cannot allocate t_discon

Cause: TLI cannot allocate space for the TLI server's disconnection information.

Action: Contact your customer support representative.

ORA-06749: TLI Driver: option not allowed across network

Cause: The requested TLI server command must be issued from the same host on which the server is running.

Action: Log in to the remote host and try again.

ORA-06750: TLI Driver: sync failed

Cause: The ORACLE process started by the TLI server was unable to synchronize its inherited connection.

Action: Contact your customer support representative.

ORA-06751: TLI Driver: bound addresses unequal

Cause: The osn check server address failed. The bound server address was not the same as the requested binding address.

Action: Contact your customer support representative.

ORA-06752: TLI: error in signal setup

Cause: A call to sigaction() returned with a system error.

Action: Contact your customer support representative.

ORA-06753: TLI Driver: name-to-address mapping failed

Cause: For SVR4, the netdir_getbyname() call failed for some unknown reason.

Action: Contact your customer service representative.

ORA-06754: TLI Driver: unable to get local host address

Cause: The name of the remote host to connect to was not specified, and the name of the local host cannot be retrieved from the HOSTS file.

Action: Contact your system administrator.

ORA-06755: TLI Driver: cannot close transport endpoint

Cause: The TLI server was unable to close a connection after passing it to an ORACLE process.

Action: Contact your customer support representative.

ORA-06756: TLI Driver: cannot open oratab

Cause: The TLI server could not open the file used to define the locations of remotely accessible databases.

Action: Ask your system administrator to check that the file exists and has the correct permissions.

ORA-06757: TLI Driver: server got bad command

Cause: The TLI server received an invalid command.

Action: Contact your customer support representative.

ORA-06760: TLI Driver: timeout reading orderly release

Cause: TLI was not able to retrieve an expected disconnect message while closing the communication channel.

Action: Contact your customer support representative.

ORA-06761: TLI Driver: error sending orderly release

Cause: TLI encountered an error sending a disconnect message closing the communication channel.

Action: Contact your customer support representative.

ORA-06762: TLI Driver: error reading orderly release

Cause: TLI encountered an error receiving an expected disconnect message while closing the communication channel.

Action: Contact your customer support representative.

ORA-06763: TLI Driver: error sending disconnect

Cause: TLI encountered an error sending a disconnect message closing the communication channel.

Action: Contact your customer support representative.

ORA-06764: TLI Driver: error reading disconnect

Cause: TLI was not able to retrieve an expected disconnect message while closing the communication channel.

Action: Contact your customer support representative.

ORA-06765: TLI Driver: error awaiting orderly release

Cause: TLI encountered an error awaiting a disconnect message while closing the communication channel.

Action: Contact your customer support representative.

ORA-06766: TLI Driver: close failed during release

Cause: TLI failed to close the communication channel after receiving a disconnect message.

Action: Contact your customer support representative.

ORA-06767: TLI Driver: alloc failed during release

Cause: TLI cannot allocate space for disconnection information while closing the communication channel.

Action: Contact your customer support representative.

ORA-06770: TLI Driver: error sending version

Cause: TLI encountered an error while sending its version information during connection establishment.

Action: Contact your customer support representative.

ORA-06771: TLI Driver: error reading version

Cause: TLI encountered an error while awaiting the expected version information during connection establishment.

Action: Contact your customer support representative.

ORA-06772: TLI Driver: error sending command

Cause: TLI encountered an error while sending a command message during connection establishment.

Action: Contact your customer support representative.

ORA-06773: TLI Driver: error reading command

Cause: TLI encountered an error while awaiting the expected command message during connection establishment.

Action: Contact your customer support representative.

ORA-06774: TLI Driver: error sending break mode

Cause: TLI encountered an error while sending break-mode message during connection establishment.

Action: Contact your customer support representative.

ORA-06775: TLI Driver: error reading break mode

Cause: TLI encountered an error while awaiting the expected break-mode message during connection establishment.

Action: Contact your customer support representative.

ORA-06776: TLI Driver: error sending parms

Cause: TLI encountered an error while sending the connection parameters during connection establishment.

Action: Contact your customer support representative.

ORA-06777: TLI Driver: error reading parms

Cause: TLI encountered an error while awaiting the expected connection parameter message during connection establishment.

Action: Contact your customer support representative.

ORA-06778: TLI Driver: error sending ccode

Cause: TLI encountered an error while sending the completion status message during connection establishment.

Action: Contact your customer support representative.

ORA-06779: TLI Driver: error reading ccode

Cause: TLI encountered an error while awaiting the expected completion status message during connection establishment.

Action: Contact your customer support representative.

ORA-06780: TLI Driver: recv error code failed

Cause: TLI encountered an error while awaiting an expected error message during connection establishment.

Action: Contact your customer support representative.

ORA-06781: TLI Driver: error reading negotiation string

Cause: TLI encountered an error while awaiting the expected negotiation message during connection establishment.

Action: Contact your customer support representative.

ORA-06790: TLI Driver: poll failed

Cause: TLI was unable to poll the communication channel for possible incoming messages.

Action: Contact your customer support representative.

ORA-06791: TLI Driver: poll returned error event

Cause: TLI received an unexpected event while polling the communication channel for possible incoming messages.

Action: Contact your customer support representative.

ORA-06792: TLI Driver: server cannot exec oracle

Cause: The remote TLI server was unable to start an ORACLE process on behalf of the client.

Action: Note the operating system error message or number and contact your system administrator. The permissions on the remote ORACLE program may be set incorrectly.

ORA-06793: TLI Driver: server cannot create new process

Cause: The remote TLI server was unable to start an ORACLE process on behalf of the client.

Action: Note the operating system error message or number and contact your system administrator. The remote host may be unable to create any new processes due to a full process table.

ORA-06794: TLI Driver: shadow process could not retrieve protocol info

Cause: The ORACLE process either failed to allocate memory to store the protocol information record, or the protocol rejected the request for some unknown reason.

Action: Contact your customer support representative.

ORA-06800: TLI Driver: SQL*Net SPX client went away during reconnect

Cause: The client process was aborted by the system or the user, and was unable to complete the connection establishment with the server listener process.

Action: Determine cause of client exit, and reattempt connection.

ORA-06801: TLI Driver: listen for SPX server reconnect failed

Cause: An unknown event occurred on the client's listening socket.

Action: Contact your customer support representative.

ORA-06802: TLI Driver: could not open the /etc/netware/yellowpages file

Cause: The /etc/netware/yellowpages file does not exist, or is not readable by the TLI listener process.

Action: Insure the file exists and is readable. Make sure that the server machine's node name, network number, ethernet address, and listening socket number are encoded in the file.

ORA-06803: TLI Driver: the IPX device file could not be opened

Cause: The /dev/ipx file does not exist, or the driver has not been installed in the kernel correctly.

Action: Reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06804: TLI Driver: could not bind an IPX address at initialization

Cause: The IPX driver has not been correctly installed.

Action: Reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06805: TLI Driver: could not send datagram SAP packet for SPX

Cause: The socket endpoint for sending SAP packet was corrupted for some unknown reason.

Action: Contact your customer support representative.

ORA-06806: TLI Driver: could not complete protocol initialization for SPX

Cause: A step in the SPX/IPX protocol initialization failed.

Action: Check the previous error reported, and follow corrective action.

ORA-06807: TLI Driver: could not open ethernet device driver file

Cause: The file /dev/eth does not exist, or the driver it references could not be opened.

Action: The system's real ethernet device file, for example /dev/wd, for the Western Digital ethernet driver, should be linked to the file /dev/eth. If this has been done, insure that the ethernet driver has been installed by completing the TCP/IP installation on your system, and testing a connection. If problem continues, contact your customer support representative for a list of supported ethernet drivers.

ORA-06808: TLI Driver: could not link IPX and ethernet streams

Cause: Either the ethernet driver has not been installed in the system correctly, or the ethernet driver is not supported.

Action: Insure that the ethernet driver has been installed by completing the TCP/IP installation on your system, and testing a connection. If problem continues, contact your customer support representative for a list of supported ethernet drivers.

ORA-06809: TLI Driver: could not clear the IPX ethernet SAP at init

Cause: The IPX driver has not been correctly installed.

Action: Reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06810: TLI Driver: could not set the IPX ethernet SAP at init

Cause: The IPX driver has not been correctly installed.

Action: Reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06811: TLI Driver: could not set the IPX network number at init

Cause: The IPX driver has not been correctly installed, or the network number encoded in the `/etc/netware/yellowpages` file is invalid.

Action: The network number in the yellowpages file should match the four-byte network number of your Novell file server. If this is configured correctly, reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06812: TLI Driver: could not read the ethernet driver's node address

Cause: The ethernet driver is not installed correctly, or does not support this operation.

Action: Contact your customer support representative for a list of supported ethernet drivers.

ORA-06813: TLI Driver: the configured ethernet address is incorrect

Cause: The node address read from the ethernet driver does not match the value encoded in the `/etc/netware/yellowpages` file for this server.

Action: Confirm the correct ethernet node address for your LAN card, and enter this value in the yellowpages file.

ORA-06814: TLI Driver: the SPX device file could not be opened

Cause: The `/dev/nspxd` file does not exist, or the driver has not been installed in the kernel correctly.

Action: Reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06815: TLI Driver: could not link SPX and IPX streams

Cause: The SPX driver has not been correctly installed.

Action: Reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06816: TLI Driver: could not set the SPX SAP address

Cause: The SPX driver has not been correctly installed.

Action: Reinvoke the Oracle root installation. If problem continues, contact your customer support representative.

ORA-06817: TLI Driver: could not read the Novell network address

Cause: The file `$ORACLE_HOME/spx/address` could not be opened for reading and writing.

Action: Make sure `ORACLE_HOME` is set, and the permissions on the `ORACLE_HOME` are read, write. If this file has been unintentionally deleted, run `spxcctl` (net option) to reset the configured Novell network number for SQL*Net SPX.

ORA-06900: CMX: cannot read tns directory

Cause: CMX is not started on your system.

Action: Install and/or start CMX on your system.

ORA-06901: CMX: no local name assigned to local application

Cause: Local application oracmx has no local name assigned

Action: Enter unique local name for oracmx in the tns directory

ORA-06902: CMX: cannot attach to cmx subsystem

Cause: ccp-xxxx is not started

Action: start your ccp software on the communication controller

ORA-06903: CMX: cannot read transport address of remote application

Cause: remote application not entered in tns directory

Action: enter remote application in tns directory

ORA-06904: CMX: no transport address available for remote application

Cause: no local name assigned to remote application

Action: assign local name to remote application

ORA-06905: CMX: connect error

Cause: remote partner not listening

Action: make sure remote node has CMX installed and running make sure oracmx is running on remote host

ORA-06906: CMX: cannot get maximum packet size from CMX

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06907: CMX: error during connect confirmation

Cause: remote partner aborted

Action: contact your customer support representative

ORA-06908: CMX: error during transfer of ORACLE_SID

Cause: remote partner aborted

Action: contact your customer support representative

ORA-06909: CMX: error during acknowledge of ORACLE_SID

Cause: remote partner aborted

Action: contact your customer support representative

ORA-06910: CMX: Cannot start oracle process on remote machine

Cause: oracle process not found or wrong mode (should be 4751)

Action: change /etc/oratab or set mode to 4751

ORA-06911: CMX: t_event returns ERROR

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06912: CMX: write error in datarq

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06913: CMX: error during redirection of connection

Cause: oracmx has been stopped, or user process has been aborted

Action: contact your customer support representative

ORA-06914: CMX: unexpected event during start of oracle

Cause: connect sequence out of sync

Action: contact your customer support representative

ORA-06915: CMX: unknown t_event in datarq

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06916: CMX: error in data read (t_datain)

Cause: remote partner aborted

Action: contact your customer support representative

ORA-06917: CMX: error in data read (too many bytes read)

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06918: CMX: T_NOEVENT during wait for read event

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06919: CMX: error during write request (unknown event)

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06920: CMX: getbrkmsg illegal datatype

Cause: received packets are corrupted

Action: contact your customer support representative

ORA-06921: CMX: getdatmsg illegal datatype

Cause: received packets are corrupted

Action: contact your customer support representative

ORA-06922: CMX: bad write length

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06923: CMX: illegal break condition

Cause: break handling out of sync

Action: contact your customer support representative

ORA-06924: CMX: wrong break message length

Cause: received packets are corrupted

Action: contact your customer support representative

ORA-06925: CMX: disconnect during connect request

Cause: partner is not responding

Action: make sure partner is up and running and reachable

ORA-06926: CMX: T_ERROR during read data

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06927: CMX: T_DATAIN received before all data written

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06928: CMX: wrong ORACLE_SID

Cause: ORACLE_SID is not entered in remote oratab

Action: add ORACLE_SID to remote oratab

ORA-06929: CMX: error when sending ORACLE_SID

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06930: CMX: error when checking ORACLE_SID

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06931: CMX: error during read_properties for server

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06932: CMX: error in local name

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06933: CMX: error during attach

Cause: internal error in CMX

Action: contact your customer support representative

ORA-06950: No error

Cause: SQL*Net AppleTalk error codes base. This is not an error.

Action: None

ORA-06951: Operating system call error

Cause: AppleTalk API received error in VMS system service.

Action: Contact Oracle Customer Support representative.

ORA-06952: Remote end of the communication issued a forward-reset packet.

Cause: Peer program may have aborted

Action: Investigate network problems and try again.

ORA-06953: Not enough virtual memory

Cause: Not enough memory available.

Action: Check VMS process quotas and/or sysgen parameters

ORA-06954: Illegal file name

Cause: Erroneous file name

Action: Check path name for server output file, or SQL*Net Appletalk Logical names and symbols.

ORA-06955: Number of database servers exceed limit

Cause: Too many database connections.

Action: Check ATKSRV_MAXCONparameter in configuration file.

ORA-06956: Failed to get local host name

Cause: Unable to get Appletalk host name.

Action: Check Appletalk configuration.

ORA-06957: No SID is currently available

Cause: Incoming SQL*Net connection specified invalid SID name.

Action: Specify correct SID in connect string and retry.

ORA-06958: Failed to access configuration file

Cause: Unable to access CONFIG.ATK

Action: Check file protections.

ORA-06959: Buffer I/O quota is too small

Cause: Buffered I/O quota exceeded.

Action: Increase BIOlm using AUTHORIZE utility and retry.

ORA-06960: Failed to access log file

Cause: SQL*Net Appletalk listener could not create log file.

Action: Check directory path and protections.

ORA-06961: Insufficient privilege for attempted operation

ORA-06970: X.25 Driver: remote host is unknown

Cause: Host name specified in the login (connect string) is unknown.

Action: Check spelling; make sure name is in the X.25 HOST file.

ORA-06971: X.25 Driver: error while receiving data**ORA-06972: X.25 Driver: error while sending data****ORA-06973: X.25 Driver: invalid buffer size**

Cause: The buffer size specified in the login string must be between 5 and 4096.

Action: Re-submit with valid buffer size.

ORA-06974: X.25 Driver: SID lookup failure

Cause: From the remote host's SQL*Net X.25 server: the database SID, specified in the login (connect) string, was not recognized.

Action: Add the appropriate SID entry to the CONFIG.ORA file on the remote host (and restart the SQL*Net X.25 server).

ORA-06975: X.25 Driver: connect to host failed

Cause: Connection attempt to remote host has failed. Probably means that the SQL*Net X.25 server on the remote host is not up, or the host itself is not up.

Action: Start the SQL*Net X.25 server process on the remote host.

ORA-06976: X.25 Driver: endpoint creation failure

Cause: Process open file quota probably exceeded.

Action: Contact your customer support representative.

ORA-06977: X.25 Driver: X.25 Level 2 failure

Cause: X.25 level 2 is down. X.25 link is not working.

Action: Run system checks to verify functioning of X.25 software. Contact your hardware vendor.

ORA-06978: X.25 Driver: Too many callback tries

Cause: Call back address probably same as called address.

Action: Verify that callback address and called address are different.

ORA-06979: X.25 Driver: server cannot start oracle

Cause: The remote X.25 server was unable to start an ORACLE process on behalf of the client.

Action: Make sure permissions on the remote ORACLE program are correctly set. Contact your system administrator.

ORA-07200: slsid: oracle_sid not set.

Cause: The environment variable \$(ORACLE_SID) is not set.

Action: Set ORACLE_SID environment variable.

ORA-07201: slhom: oracle_home variable not set in environment.

Cause: \$(ORACLE_HOME) environment variable not set.

Action: Set ORACLE_HOME.

ORA-07202: sltn: invalid parameter to sltn.

Cause: The sltn name translation routine was called with invalid arguments. The input, or output strings were either NULL or 0 length.

Action: Probable internal oracle error. Contact customer support.

ORA-07203: sltn: attempt to translate a long environment variable.

Cause: A string was passed to sltn containing a long environment variable. sltn accepts environment names of 30 or less characters.

Action: Shorten environment variable name to less than 30 characters.

ORA-07204: sltn: name translation failed due to lack of output buffer space.

Cause: The sltn routine is given a maximum length buffer to expand the name into. An overflow of this buffer occurred.

Action: Possible internal error. Check output buffer length stored in sercose[0]. Pathnames are limited to 255 characters.

ORA-07205: slgtd: time error, unable to obtain time.

Cause: Time() system call returned an error. Possible OS error.

Action: Check additional information returned. Contact customer support.

ORA-07206: slgtd: gettimeofday error, unable to obtain time.

Cause: Gettimeofday() system call returned an error. Possible OS error.

Action: Check additional information returned. Contact customer support.

ORA-07207: sigpidu: process ID string overflows internal buffer.

Cause: The sigpidu routine is given a maximum length buffer to hold process ID string. An overflow of this buffer occurred.

Action: Internal error. Contact customer support.

ORA-07208: sfwfb: failed to flush dirty buffers to disk.

Cause: The fsync system call returned an error. Possible OS error.

Action: Check additional information returned. Contact customer support.

ORA-07209: sfofi: file size limit was exceeded.

Cause: The size of the file to be opened exceeded the OS limit imposed on this process.

Action: Run osh to increase the file size limit.

ORA-07210: slcpu: getrusage error, unable to get cpu time.

Cause: Getrusage system call returned an error. Possible OS error.

Action: Check additional information returned. Contact customer support.

ORA-07211: slgcs: gettimeofday error, unable to get wall clock.

Cause: Gettimeofday system call returned an error. Possible OS error.

Action: Check additional information returned in OS reference manual. Contact customer support.

ORA-07212: slcpu: times error, unable to get cpu time.

Cause: times system call returned an error. Possible OS error.

Action: Check additional information returned. Contact customer support.

ORA-07213: slgcs: times error, unable to get wall clock.

Cause: times system call returned an error. Possible OS error.

Action: Check additional information returned in OS reference manual. Contact customer support.

ORA-07214: slgunm: uname error, unable to get system information.

Cause: uname system call returned an error. Possible OS error.

Action: Check additional information returned in OS reference manual. Contact customer support.

ORA-07215: slsget: getrusage error.

Cause: Getrusage system call returned an error. Possible OS error.

Action: Check additional information returned. Look for information in OS reference. Contact customer support.

ORA-07216: slghst: gethostname error, unable to get name of current host.

Cause: gethostname system call returned an error. Possible OS error.

Action: Check additional information returned in OS reference manual. Contact customer support.

ORA-07217: sltln: environment variable cannot be evaluated.

Cause: getenv call returned a null pointer.

Action: Set the environment variable and try again.

ORA-07218: slkhst: could not perform host operation

Cause: Unix system() call failed

Action: Examine system error message

ORA-07219: slspool: unable to allocate spooler argument buffer.

Cause: Malloc failed to allocate space to hold spooler arguments.

Action: Check additional information returned in OS reference manual. The process may have run out of heap space. Contact customer support.

ORA-07220: slspool: wait error.

Cause: Wait returned an error, when waiting for spool job to complete. Possible spooler program error.

Action: Check additional information returned. Refer to OS reference manual. Contact customer support.

ORA-07221: slspool: exec error, unable to start spooler program.

Cause: Exec failed when starting line printer spooler command. Likely that either the default line printer command, or ORACLE_LPPROG, is incorrectly set.

Action: Verify default line printer command and ORACLE_LPPROG are set correctly. Set ORACLE_LPPROG to working line printer spooler.

ORA-07222: slspool: line printer spooler command exited with an error.

Cause: The line printer spooler exited with a non-zero return value. This probably indicates an error in spooling file.

Action: Verify that line printer spooler is up. Verify that ORACLE_LPPROG, and ORACLE_LPARG are set properly. Check exit value returned as additional information.

ORA-07223: slspool: fork error, unable to spawn spool process.

Cause: Fork system call failed to create additional process. Probable resource limit reached.

Action: Check additional information returned. Retry operation. Contact system administrator.

ORA-07224: sfnfy: failed to obtain file size limit; errno = <varname>string</varname>.

Cause: The ulimit system call returned an error.

Action: Check errno and contact customer support.

ORA-07225: sldex: translation error, unable to expand file name.

Cause: Additional information returned is error returned from sltln.

Action: Check additional information.

ORA-07226: rtneco: unable to get terminal mode.

Cause: The ioctl call returned an error. Possible OS error.

Action: Check additional information for errno. Contact customer support.

ORA-07227: rtneco: unable to set noecho mode.

Cause: The ioctl call returned an error. Possible OS error.

Action: Check additional information for errno. Contact customer support.

ORA-07228: rtecho: unable to restore terminal to echo mode.

Cause: The ioctl call returned an error. Possible OS error.

Action: Check additional information for errno. Contact customer support.

ORA-07229: slcpuc: error in getting number of CPUs.

Cause: error in mpcntl system call

Action: check errno and contact system administrator

ORA-07230: slemcr: fopen error, unable to open error file.

Cause: Fopen failed to open file.

Action: Try to determine which file was not opened. Check that file exists and is accessible.

ORA-07231: slemcc: invalid file handle, seals do not match.

Cause: Function was called with an invalid argument. The file handle used was not obtained by slemcr.

Action: Internal error. Contact customer support.

ORA-07232: slemcc: fclose error.

Cause: An error was encountered when closing the file. Possible OS error.

Action: Contact system administrator.

ORA-07233: slemcw: invalid file handle, seals do not match.

Cause: Function was called with an invalid file handle. File handle was not obtained by slemcr.

Action: Internal error. Contact customer support.

ORA-07234: slemcw: fseek error.

Cause: Unable to seek to desired position in file. Possible OS error. Possible internal error.

Action: Verify that error message file is intact. Try to regenerate error message file. Contact customer support.

ORA-07235: slemcw: fwrite error.

Cause: Unable to write item to file. Possible OS error. Possible permissions problem.

Action: Retry operation.

ORA-07236: slemop: open error.

Cause: Unable to open error file. Possible permissions problem.

Action: Verify permission on error message file. Check additional information for errno.

ORA-07237: slemcl: invalid file handle, seals do not match.

Cause: Function was called with an invalid file handle. Handle was not obtained by previous call to slemop.

Action: Internal error.

ORA-07238: slemcl: close error.

Cause: Unable to close file. Possible OS error.

Action: Contact system administrator. Check additional information for errno.

ORA-07239: slemrd: invalid file handle, seals do not match.

Cause: Function was called with invalid file handle. Handle was not obtained by call to slemop.

Action: Internal error. Contact customer support.

ORA-07240: slemrd: seek error.

Cause: Unable to seek to desired position in file. Possible OS error.

Action: Check that error file is still intact. Verify space on device. Contact system administrator. Check additional information for errno.

ORA-07241: slemrd: read error.

Cause: Unable to read file. Possible OS error.

Action: Verify that error file is intact. Regenerate error message file. Contact customer support. Check additional information for errno.

ORA-07242: slembfn: translation error, unable to translate error file name.

Cause: Additional information indicates error returned from sltln.

Action: Check additional information.

ORA-07243: supplied buffer not big enough to hold entire line

Cause: supplied buffer was not big enough

Action: Internal error. Contact customer support. Additional information indicates how big the supplied buffer was.

ORA-07244: ssfccf: create file failed, file size limit reached.

Cause: An attempt was made to create a file that exceeds the process's file size limit.

Action: Run osh to raise the file size limit.

ORA-07245: sfccf: unable to lseek and write the last block.

Cause: An attempt was made to move and write to a bad device address.

Action: Check errno. Possible lack of space on device.

ORA-07246: sfofi: open error, unable to open database file.

Cause: sfofi returns an error.

Action: This is an oracle internal error.

ORA-07247: skgfrfms, skgfrnms: read error, unable to read block from database file

Cause: The ioctl() system call returned an error doing VOL_READ_MIRRORS.

Action: Check errno.

ORA-07248: sfwfb: write error, unable to write database block.

Cause: sfwfb returns an error.

Action: This is an oracle internal error.

ORA-07249: slsget: open error, unable to open /proc/pid.

Cause: The open() system call returned an error.

Action: Check that /proc has the right permissions.

ORA-07250: spcre: semget error, unable to get first semaphore set.

Cause: An error occurred when trying to get first semaphore set.

Action: Check errno. Verify that system is configured to have semaphores. Verify that enough semaphores are available. Additional information indicates how many semaphores were requested.

ORA-07251: spcre: semget error, could not allocate any semaphores.

Cause: Semget failed to even allocate a single semaphore. Either they are all in use or the system is not configured to have any semaphores.

Action: Check to see if all semaphores are in use. Check to see if system is configured to have semaphores. Check errno.

ORA-07252: spcre: semget error, could not allocate semaphores.

Cause: Semget system call returned an error. Possible resource limit problem.

Action: Check errno. Verify that enough semaphores are available in system. If additional errors occur in destroying the semaphore sets then sercose[0] will be non-zero. If this occurs, remove the semaphore sets using ipcrm.

ORA-07253: spdes: semctl error, unable to destroy semaphore set.

Cause: Semctl system call returned an error.

Action: Check semaphore sets. May require manual cleanup. Check additional information returned. Consult OS reference manual.

ORA-07254: spdcr: translation error while expanding ?/bin/oracle.

Cause: An error occurred while translating the name of the oracle executable.

Action: Check sercose[0] for error returned from sltln. Perhaps \$(ORACLE_HOME) is not set correctly.

ORA-07255: spini: cannot set up signal handler.

Cause: System failed to set up signal handler.

Action: Check errno and sercose[0] for the signal number that failed.

ORA-07256: sptrap: cannot set up signal handler to catch exceptions.

Cause: System failed to set up signal handler to catch exceptions.

Action: Check errno and sercose[0] for the signal number that failed.

ORA-07257: spdcr: translation error expanding program name.

Cause: Error occurred when expanding program name ora_PNAME_@. The result of this translation is put in argv[0] of oracle process.

Action: Check error returned by sltln returned in sercose[0].

ORA-07258: spdcr: fork error, unable to create process.

Cause: An error occurred when creating a new process.

Action: Check errno. Perhaps a system limit on the number of processes has been exceeded.

ORA-07259: spdcr: exec error, detached process failed in startup.

Cause: An oracle detached process died shortly after startup. Wait() indicated that a child process terminated.

Action: Check ?/dbs directory for trace or core files. Check errno.

ORA-07260: spdcr: wait error.

Cause: Wait system call returned an error.

Action: Check errno.

ORA-07261: spdde: kill error, unable to send signal to process.

Cause: Kill system call returned an error. Possibly an attempt to destroy an already gone process.

Action: Check errno.

ORA-07262: sptpa: sptpa called with invalid process id.

Cause: This is an internal error.

Action: This is an oracle internal error.

ORA-07263: sptpa: kill error.

Cause: Kill system call returned an error. Possible OS error.

Action: Check errno. Additional information indicates the process ID tested.

ORA-07264: spwat: semop error, unable to decrement semaphore.

Cause: Semop system call returned an error. Semaphore set may not exist.

Action: Check errno. Semaphore ID is returned in sercose[0]. Verify semaphore set exists. A possible cause for this error is that a "shutdown abort" was done while this process was running.

ORA-07265: sppst: semop error, unable to increment semaphore.

Cause: Semop system call returned an error. Semaphore set may not exist.

Action: Check errno. Semaphore ID is returned in sercose[0]. Check semaphore set existence. A possible cause for this error is that a "shutdown abort" was done while this process was running.

ORA-07266: sppst: invalid process number passed to sppst.

Cause: Function was passed an invalid oracle process id.

Action: Internal error.

ORA-07267: spwat: invalid process number.

Cause: Function was passed an invalid oracle process id.

Action: Internal error. Additional information indicates the invalid process id.

ORA-07268: szguns: getpwuid error.

Cause: Getpwuid() could not find an entry in the passwd file for a user.

Action: Add an entry for the user in the passwd file.

ORA-07269: spdcr: detached process died after exec.

Cause: Detached process successfully execed, but died shortly thereafter. Additional information indicates exit code, and termination status.

Action: Check termination code for information as to why process exited. Check for core dump or trace file.

ORA-07270: spalck: setitimer error, unable to set interval timer.

Cause: An error occurred while trying to set an interval timer. Probable porting problem.

Action: Check errno.

ORA-07271: spwat: invalid oracle process number.

Cause: Function was called with an invalid oracle process number (0).

Action: Internal oracle error.

ORA-07272: spwat: invalid semaphore set id.

Cause: Semaphore ID fetched from SGA was not initialized to valid value. Additional information returned is semaphore set index, and oracle process number.

Action: Oracle internal error. Check semaphore set index. Check oracle process number.

ORA-07273: sppst: invalid semaphore id.

Cause: Semaphore ID fetched from SGA contained an invalid value. Additional information returned is semaphore set index, and oracle process number.

Action: Oracle internal error. Check semaphore set index. Check oracle process number.

ORA-07274: spdcr: access error, access to oracle denied.

Cause: Unable to access "oracle" program. Verify ?/bin/oracle or \$ORABCKPRG exist, and are executable.

Action: Check errno returned.

ORA-07275: unable to send signal to process

Cause: The kill system call returned an error. Possibly an attempt to signal a process which does not exist.

Action: Check errno.

ORA-07276: no dba group in /etc/group.

Cause: A group has not been set up for dba users.

Action: Contact system administrator. Set up dba group in /etc/group.

ORA-07277: spdde: illegal pid passed as argument.

Cause: A 0 pid was passed to spdde.

Action: Internal error. .

ORA-07278: splon: ops\$username exceeds buffer length.

Cause: Splon constructed an ops\$username logon which exceeded the allotted buffer space.

Action: Use a shorter Unix username, or use an oracle username. Contact customer support.

ORA-07279: spcre: semget error, unable to get first semaphore set.

Cause: An error occurred when trying to get first semaphore set.

Action: Check errno. Verify that system is configured to have semaphores. Verify that enough semaphores are available. Additional information indicates how many semaphores were requested.

ORA-07280: slsget: unable to get process information.

Cause: The ioctl call returned an error. Possible OS error.

Action: Check additional information for errno. Contact customer support.

ORA-07281: slsget: times error, unable to get cpu time.

Cause: times system call returned an error. Possible OS error.

Action: Check additional information returned. Contact customer support.

ORA-07282: sksaprd: string overflow.

Cause: The internal buffer is not big enough to hold the archive control string.

Action: Internal restriction. Try a shorter archive control string.

ORA-07283: sksaprd: invalid volume size for archive destination.

Cause: An invalid volume size was specified.

Action: Specify a valid volume size in archive control string.

ORA-07284: sksaprd: volume size specification not terminated properly.

Cause: Some non-numeric text follows the volume size specification.

Action: Enter a correct archive control string.

ORA-07285: sksaprd: volume size should not be specified for a disk file.

Cause: Volume size was specified for a disk file.

Action: If you are archiving to a disk file, do not specify its volume size.

ORA-07286: sksagdi: cannot obtain device information.

Cause: Stat on the log archiving device failed.

Action: Check the returned OSD error for the reason of failure.

ORA-07287: sksagdi: unsupported device for log archiving.

Cause: Log archiving to this device is unsupported.

Action: Try log archiving to a supported device.

ORA-07290: sksagdi: specified directory for archiving does not exist.

Cause: The specified pathname is not a directory.

Action: Verify that the archive destination directory exists.

ORA-07303: ksmcsg: illegal database buffer size.

Cause: The database buffer size must be a multiple of the database block size, and less than the maximum block size.

Action: Verify that the db_block_size parameter is correct in INIT.ORA.

ORA-07304: ksmcsg: illegal redo buffer size.

Cause: The redo buffer size must be a multiple of machine block size.

Action: Verify that the log_buffer INIT.ORA parameter is correctly set.

ORA-07305: ksmcsg: illegal database buffer size.

Cause: The database buffer size must be a multiple of the extended cache mapping size for indirect data buffers to be used.

Action: Verify that the db_block_size parameter is correct in INIT.ORA, or disable the use_indirect_data_buffers parameter.

ORA-07324: smpall: malloc error while allocating pga.

Cause: Malloc library routine returned an error.

Action: Check errno. Possibly out of swap space.

ORA-07327: smpdal: attempt to destroy pga when it was not mapped.

Cause: Smpdal was called when the PGA had not been previously created.

Action: Internal error.

ORA-07339: spcre: maximum number of semaphore sets exceeded.

Cause: The internal buffer is not big enough to hold the number of semaphore set identifiers requested.

Action: Reconfigure OS to have more semaphores per set.

ORA-07345: The datafile name must not contain the string '..'.

Cause: The specified datafile name contains '..'.

Action: Correct the datafile name and retry the operation.

ORA-07346: slnrm: normalized file name is too long

Cause: After normalizing the specified file name, the resulting file name was too long.

Action: Specify the shorter file name and retry the operation.

ORA-07390: sftopn: translate error, unable to translate file name.

Cause: An error occurred while expanding the file name to open. Additional information returns error generated in translation routine.

Action: Lookup additional error code for further information.

ORA-07391: sftopn: fopen error, unable to open text file.

Cause: Fopen library routine returned an error.

Action: Verify existence and permissions.

ORA-07392: sftcls: fclose error, unable to close text file.

Cause: Fclose library routine returned an error.

Action: Possible internal oracle error.

ORA-07393: unable to delete text file

Cause: An error occurred while deleting a text file.

Action: Verify that the file exists and check additional errors.

ORA-07394: unable to append string to text file

Cause: An error occurred while performing a string put operation.

Action: This is an internal error. Check additional information.

ORA-07400: slemtr: translated name for the message file is too long.

Cause: The name for the message file overflows internal buffer.

Action: Try making the complete path-name of the message file shorter by reorganizing the directory hierarchy.

ORA-07401: sptrap: cannot restore user exception handlers.

Cause: The system failed to restore user exception handlers.

Action: Check errno and sercose[0] for the signal number that failed.

ORA-07402: sprst: cannot restore user signal handler.

Cause: The system failed to restore user signal handlers.

Action: Check errno and sercose[0] for the signal number that failed.

ORA-07403: sfanfy: db_writers parameter not valid.

Cause: The db_writers parameter in INIT.ORA exceeds the system-dependent maximum or is less than 0.

Action: Change the db_writers parameter in INIT.ORA.

ORA-07404: sfareq: Timeout occurred waiting for request to complete.

Cause: The master database writer timed out waiting for a write or close to complete. One of the database writers may have stopped running.

Action: Check all database writer trace files. Shut down the database and try to warm start.

ORA-07405: sptrap: cannot setup alternate signal stack.

Cause: The system failed to setup an alternate signal stack.

Action: Check errno and sercose[0] for the location where it failed.

ORA-07406: slbtpd: invalid number.

Cause: An impossible request for binary to decimal conversion was made.

Action: This conversion cannot be performed.

ORA-07407: slbtpd: invalid exponent.

Cause: An impossible request for binary to decimal conversion was made

Action: This conversion cannot be performed.

ORA-07408: slbtpd: overflow while converting to packed decimal.

Cause: An impossible request for binary to decimal conversion was made.

Action: This conversion cannot be performed.

ORA-07409: slpdtb: invalid packed decimal nibble.

Cause: An impossible request for decimal to binary conversion was made.

Action: This conversion cannot be performed.

ORA-07410: slpdtb: number too large for supplied buffer.

Cause: An impossible request for decimal to binary conversion was made.

Action: This conversion cannot be performed.

ORA-07411: slgfn: full path name too big for supplied buffer.

Cause: The supplied buffer is not big enough to hold the full path name.

Action: The construction of the full path name cannot be performed.

ORA-07412: sfaslv: Error getting entry in asynchronous write array.

Cause: One of the database writer processes could not locate its entry in the SGA.

Action: Contact customer support.

ORA-07415: slpath: allocation of memory buffer failed.

Cause: Malloc() failed to allocate buffer for storing ORACLE_PATH.

Action: System has run out of heap space. Additional information indicates errno.

ORA-07416: slpath: pathname construction failed; lack of output buffer space.

Cause: The slpath routine is given a maximum length buffer to expand the name into. An overflow of this buffer occurred.

Action: Possible internal error. Check output buffer length stored in sercose[0] and constructed pathname length in sercose[1].

ORA-07417: sfareq: One or more database writers not active.

Cause: One or more of the database writer processes is no longer running.

Action: Check the trace files for the database writers. Shut down the database and try to warm start.

ORA-07418: sfareq: Database writer got error in timing function.

Cause: An error occurred when the database writer called the system timing function.

Action: Check the database writer trace file. Shut down database and try to warm start.

ORA-07419: sfareq: Database writer got error in timing function.

Cause: An error occurred when the database writer called the system timing function.

Action: Check the database writer trace file. Shut down database and try to warm start.

ORA-07425: sdpri: error <varname>string</varname> in translating dump file location.

Cause: An oracle error occurred when translating the location of the dump file.

Action: Check the oracle error code.

ORA-07426: spstp: cannot obtain the location of dbs directory.

Cause: An oracle error occurred when translating the location of the dbs directory.

Action: Check additional information for the error returned from sltln.

ORA-07427: spstp: cannot change directory to dbs.

Cause: Chdir system call returned an error. Possible permission problems.

Action: Check additional information for the OS error code.

ORA-07431: fork failed

Cause: The server process was unable to fork a child process.

Action: Verify that there are enough system resources to support another process. The user or system process limit may have been exceeded, or the amount of free memory or swap space may be temporarily insufficient.

ORA-07432: unable to perform nested sleep

Cause: An attempt was made to make a process sleep when it was already sleeping. This platform does not support this capability.

Action: Try the SLEEP command when the process is not sleeping.

ORA-07440: WMON process terminated with error

Cause: The wakeup monitor process died.

Action: Warm start instance.

ORA-07441: function address must be aligned on <varname>string</varname> byte boundary

Cause: An improperly aligned function address was specified.

Action: Use a properly aligned function address.

ORA-07442: function address must be in the range <varname>string</varname> to <varname>string</varname>

Cause: An invalid function address was specified.

Action: Use a valid function address.

ORA-07443: function <varname>string</varname> not found

Cause: An invalid function name was specified.

Action: Use a valid function name.

ORA-07444: function address <varname>string</varname> is not readable

Cause: An invalid function name/address was specified.

Action: Use a valid function name/address.

ORA-07445: exception encountered: core dump [<varname>string</varname>] [<varname>string</varname>] [<varname>string</varname>] [<varname>string</varname>]

Cause: An operating system exception occurred which should result in the creation of a core file. This is an internal error.

Action: Visit My Oracle Support to access the ORA-07445 Lookup tool (reference Note 7445.1) for more information regarding the specific ORA-07445 error encountered. An Incident has been created for this error in the Automatic Diagnostic Repository (ADR). When logging a service request, use the Incident Packaging Service (IPS) from the Support Workbench or the ADR Command Interpreter (ADRCI)

to automatically package the relevant trace information (reference My Oracle Support Note 411.1). The following information should also be gathered to help determine the root cause: - changes leading up to the error - events or unusual circumstances leading up to the error - operations attempted prior to the error - conditions of the operating system and databases at the time of the error Note: The cause of this message may manifest itself as different errors at different times. Be aware of the history of errors that occurred before this internal error.

ORA-07446: sdnfy: bad value '<varname>string</varname>' for parameter <varname>string</varname>.

Cause: The directory specified as the value for the stated parameter could not be used.

Action: Make sure the directory you have specified is a valid directory/file specification.

ORA-07447: ssarena: usinit failed.

Cause: Oracle failed to create a shared arena file.

Action: Use `sercerrno` field to determine cause of failure.

ORA-07448: ssarena: maximum number of shared arenas exceeded.

Cause: Oracle attempted to create more shared arena files than permitted.

Action: Raise the value for `max_arena` in `INIT.ORA`.

ORA-07449: sc: usnewlock failed.

Cause: Oracle failed to acquire a shared arena lock.

Action: Check result code in `sercerrno` to determine the cause of failure.

ORA-07451: slskstat: unable to obtain load information.

Cause: `kstat` library returned an error. Possible OS failure

Action: Check result code in `sercose[0]` for more information.

ORA-07452: specified resource manager plan does not exist in the data dictionary

Cause: User tried to load a resource manager plan that does not exist.

Action: Use a resource manager plan that exists in the data dictionary.

ORA-07453: requested resource manager plan schema does not contain OTHER_GROUPS

Cause: User tried to load a resource manager plan schema that does not contain the `OTHER_GROUPS` group.

Action: Use a resource manager plan schema that contains the `OTHER_GROUPS` group.

ORA-07454: queue timeout, <varname>string</varname> second(s), exceeded

Cause: User session queued for longer than maximum specified queue duration time for consumer group.

Action: Re-submit job at a later time or increase queue timeout.

ORA-07455: estimated execution time (<varname>string</varname> secs), exceeds limit (<varname>string</varname> secs)

Cause: User attempted to execute an operation whose estimated execution time exceeds the limit specified for the consumer group.

Action: Execute job on behalf of another group, or increase limit.

ORA-07456: cannot set RESOURCE_MANAGER_PLAN when database is closed

Cause: An attempt was made to turn on the Resource Manager when the database was closed.

Action: Open the database and try again.

ORA-07457: cannot set _INTERNAL_RESOURCE_MANAGER_PLAN because of FORCE

Cause: An attempt was made to set the _INTERNAL_RESOURCE_MANAGER_PLAN parameter, however this failed because the current RESOURCE_MANAGER_PLAN has the FORCE prefix.

Action: Remove the FORCE prefix from the RESOURCE_MANAGER_PLAN parameter.

ORA-07458: cannot set the RESOURCE_MANAGER_PLAN parameter

Cause: An attempt was made to set the RESOURCE_MANAGER_PLAN parameter, however, this failed because the database was quiesced.

Action: Unquiesce the database.

ORA-07459: cannot restore the RESOURCE_MANAGER_PLAN parameter

Cause: An attempt was made to internally restore the RESOURCE_MANAGER_PLAN parameter to the value before it was internally set. This failed because the current plan was set by the user and therefore did not need to be restored.

Action: No action needed.

ORA-07460: cannot set the RESOURCE_MANAGER_PLAN parameter

Cause: An attempt was made to internally set the RESOURCE_MANAGER_PLAN parameter, however, this failed because the current RESOURCE_MANAGER_PLAN has the FORCE prefix.

Action: Remove the FORCE prefix from the RESOURCE_MANAGER_PLAN parameter.

ORA-07468: spwat: mset error, unable to set semaphore.

Cause: The mset routine returned an error. Semaphore may not exist.

Action: Check result code in sercerrno. Semaphore number returned in sercose[0].

ORA-07469: sppst: mclear error, unable to clear semaphore.

Cause: The mclear routine returned an error. Semaphore may not exist.

Action: Check result code in sercerrno. Semaphore number returned in sercose[0].

ORA-07470: snclget: cannot get cluster number.

Cause: The cluster_status system call failed to get status information for the current cluster.

Action: Check result code in sercose[0]. Possible operating system failure.

ORA-07471: snclrd: name translation error of sgadef.dbf file name.

Cause: Unable to expand out ?/dbs/sgadef@.dbf file name.

Action: Verify \$(ORACLE_HOME) and \$(ORACLE_SID) are properly set. Check error number returned from sltln in sercose[0].

ORA-07472: snclrd: open error when opening sgadef.dbf file.

Cause: open failed when opening the file ?/dbs/sgadef@.dbf

Action: Check errno. Possible permission problem. Verify that the file ?/dbs/sgadef@.dbf exists.

ORA-07473: snclrd: read error when trying to read sgadef.dbf file.

Cause: Read had an error when reading sgadef.dbf file.

Action: Check errno. Verify file exists, and is correct size.

ORA-07474: snclrd: close error, unable to close sgadef.dbf file.

Cause: An error occurred in close, while closing the file "?/dbs/sgadef@.dbf"

Action: Check errno. Possible operating system error.

ORA-07475: slsget: cannot get vm statistics.

Cause: The vm_statistics system call failed to get virtual memory statistics.

Action: Check result code in sercerrno. Possible operating system failure.

ORA-07476: slsget: cannot get mapped memory statistics.

Cause: The vm_mapmem system call failed to get mapped memory statistics.

Action: Check result code in sercerrno. Possible operating system failure.

ORA-07477: scgcmn: lock manager not initialized.

Cause: Lock manager must be initialized before converting locks.

Action: Check result code in sercerrno. Possible lock manager failure.

ORA-07478: scgcmn: cannot get lock status.

Cause: lm_stat_lock failed.

Action: Check result code in sercerrno. Possible lock manager failure.

ORA-07479: scgcmn: cannot open or convert lock.

Cause: lm_open or lm_open_convert failed.

Action: Check result code in sercerrno. Possible lock manager failure.

ORA-07480: snchmod: cannot change permissions on ?/dbs/sgalm.dbf.

Cause: When creating an instance, snlmini could not change the permissions on ?/dbs/sgalm.dbf

Action: Contact your customer support representative.

ORA-07481: snlmatt: cannot attach to lock manager instance.

Cause: lm_attach failed to attach to lock manager instance.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07482: snlmini: cannot create lock manager instance.

Cause: lm_create failed to create lock manager instance.

Action: Check permissions on ?/dbs, and remove ?/dbs/sgalm.dbf if it exists, then retry.

ORA-07483: snlkget: cannot convert(get) lock.

Cause: lm_convert failed to convert(get) lock.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07484: snlkput: cannot convert(put) lock.

Cause: lm_convert failed to put lock value.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07485: scg_get_inst: cannot open instance number lock.

Cause: lm_open failed.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07486: scg_get_inst: cannot convert(get) instance number lock.

Cause: lm_convert failed to get lock value.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07487: scg_init_lm: cannot create lock manager instance.

Cause: lm_create failed.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07488: scgrcl: lock manager not initialized.

Cause: Lock manager must be initialized before releasing locks.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07489: scgrcl: cannot get lock status.

Cause: lm_stat_lock failed during lock release/cancel.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07490: scgrcl: cannot convert lock.

Cause: lm_convert failed during lock release/cancel.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07491: scgrcl: cannot cancel lock request.

Cause: lm_cancel failed during lock release/cancel.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07492: scgrcl: cannot close lock.

Cause: Im_close failed during lock release/cancel.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07493: scgrcl: lock manager error.

Cause: An error was encountered releasing the lock.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07494: scgcm: unexpected error.

Cause: Unknown or unexpected error code.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07495: spwat: Im_wait failed.

Cause: Im_wait failed.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07496: sppst: Im_post failed.

Cause: Im_post failed.

Action: Check result code in sercerno. Possible lock manager failure.

ORA-07497: sdpri: cannot create trace file '<varname>string</varname>'; errno = <varname>string</varname>.

Cause: 1. The trace file could not be created for writing. 2. The trace file is a symbolic link.

Action: 1. Check if the dump directory exists and whether it is writable. 2. Remove the symbolic link.

ORA-07498: spstp: Unable to open /dev/resched.

Cause: The rescheduling driver /dev/resched is not found or is not working properly.

Action: Check installation of the ORACLE rescheduling driver in the AIX kernel.

ORA-07499: spglk: Cannot reschedule.

Cause: The rescheduling driver /dev/resched is not open. This is an internal error and should not occur.

Action: Contact your customer support representative.

ORA-07500 to ORA-09859

ORA-07500: scglaa: \$cantim unexpected return

Cause: VMS system service \$CANTIM returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07501: scgtoa: \$deq unexpected return

Cause: VMS system service \$DEQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07502: scgcmn: \$enq unexpected return

Cause: VMS system service \$ENQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07503: scgcmn: \$setimr unexpected return

Cause: VMS system service \$SETIMR returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07504: scgcmn: \$hiber unexpected return

Cause: VMS system service \$HIBER returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07505: scggt: \$enq parent lock unexpected return

Cause: VMS system service \$ENQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07506: scgrl: \$deq unexpected return on lockid <varname>string</varname>

Cause: VMS system service \$DEQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07507: scgcm: unexpected lock status condition

Cause: A global locking system service returned an unexpected value.

Action: Check for system error message (if any) and refer to VMS documentation, or contact your customer support representative.

ORA-07508: scgfal: \$deq all unexpected return

Cause: VMS system service \$DEQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07509: scgfal: \$deq parent lock unexpected return

Cause: VMS system service \$DEQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07510: scgbrm: \$getlki unexpected return on lockid <varname>string</varname>

Cause: VMS system service \$GETLKI returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07511: sscgctl: \$enq unexpected return for master termination lock

Cause: VMS system service \$ENQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07512: sscgctl: \$enq unexpected return for client termination lock

Cause: VMS system service \$ENQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07513: sscgctl: \$deq unexpected return on cancel of term. lock

Cause: VMS system service \$DEQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07514: scgcan: \$deq unexpected return while canceling lock

Cause: VMS system service \$DEQ returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07534: scging: \$getlki unexpected return on lockid <varname>string</varname>

Cause: VMS system service \$GETLKI returned an unexpected value

Action: Check for system error message and refer to VMS documentation

ORA-07548: sftopn: Maximum number of files already open

Cause: Too many test files open

Action: This is an internal error, please report to Oracle

ORA-07549: sftopn: \$OPEN failure

Cause: VMS system service \$OPEN failed

Action: Examine system error message and refer to VMS documentation

ORA-07550: sftopn: \$CONNECT failure

Cause: VMS system service \$OPEN failed

Action: Examine system error message and refer to VMS documentation

ORA-07551: sftcls: \$CLOSE failure

Cause: VMS system service \$CLOSE failed

Action: Examine system error message and refer to VMS documentation

ORA-07552: sftget: \$GET failure

Cause: VMS system service \$GET failed

Action: Examine system error message and refer to VMS documentation

ORA-07561: szprv: \$IDTOASC failure

Cause: VMS system service \$IDTOASC failed

Action: Examine system error message and refer to VMS documentation

ORA-07562: sldept: extension must be 3 characters

Cause: An extension was found but it is of improper length

Action: This is an internal error, please report to Oracle

ORA-07563: sldept: \$PARSE failure

Cause: VMS system service \$PARSE failed

Action: Examine system error message and refer to VMS documentation

ORA-07564: sldept: wildcard in filename or extension

Cause: A wildcard was used in the file name

Action: Reenter the file name completely

ORA-07565: sldept: \$SEARCH failure

Cause: VMS system service \$SEARCH failed

Action: Examine system error message and refer to VMS documentation

ORA-07568: slspool: \$OPEN failure

Cause: VMS system service \$OPEN failed

Action: Examine system error message and refer to VMS documentation

ORA-07569: slspool: \$CLOSE failure

Cause: VMS system service \$CLOSE failed

Action: Examine system error message and refer to VMS documentation

ORA-07570: szrhc: \$IDTOASC failure

Cause: VMS system service \$IDTOASC failed

Action: Examine system error message and refer to VMS documentation

ORA-07571: szrhc: \$FIND_HELD failure

Cause: VMS system service \$FIND_HELD failed

Action: Examine system error message and refer to VMS documentation

ORA-07572: szrhc: insufficient rolename buffer space

Cause: An OS role name was too long.

Action: Re-define the role name to be of correct length.

ORA-07573: slkht: could not perform host operation

Cause: VMS system service LIB\$SPAWN failed

Action: Examine system error message and refer to VMS documentation

ORA-07574: szrfc: \$GETUAI failure

Cause: VMS system service \$GETUAI failed

Action: Examine system error message and refer to VMS documentation

ORA-07576: sspexst: \$GETJPIW failure on process ID <varname>string</varname>

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07577: no such user in authorization file

Cause: An attempt was made to set an INTERNAL password (for either DBA or OPER privilege), but the corresponding VMS account (either ORA_<varname>sid</varname>_DBA or ORA_<varname>sid</varname>_OPER) hasn't been created yet.

Action: Add a VMS account for ORA_<varname>sid</varname>_DBA and/or ORA_<varname>sid</varname>_OPER before trying to set a password for them.

ORA-07578: szprv: \$FIND_HELD failure

Cause: VMS system service \$FIND_HELD failed

Action: Examine system error message and refer to VMS documentation

ORA-07579: spini: \$DCLEXH failure

Cause: VMS system service \$PARSE failed

Action: Examine system error message and refer to VMS documentation

ORA-07580: spstp: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07581: spstp: cannot derive SID from unexpected process name

Cause: A background process did not have name of correct form

Action: If the job name was changed, restore it, otherwise this is an internal error, please report to Oracle.

ORA-07582: spstp: ORA_SID has illegal value

Cause: The ORA_SID must exist and be less than 6 characters

Action: Consult the VMS Installation guide for information on setting the SID.

ORA-07584: spdcr: invalid value for ORA_sid_(proc_)PQL\$_item

Cause: A logical name used to set a detached process quota value has an invalid value (probably non-numeric).

Action: Examine the values of these logical names, correct the one in error, and retry.

ORA-07585: spdcr: \$PARSE failure

Cause: VMS system service \$PARSE failed

Action: Examine system error message and refer to VMS documentation

ORA-07586: spdcr: \$SEARCH failure

Cause: VMS system service \$SEARCH failed

Action: Examine system error message and refer to VMS documentation

ORA-07587: spdcr: \$CREPRC failure

Cause: VMS system service \$CREPRC failed

Action: Examine system error message and refer to VMS documentation

ORA-07588: spdcr: \$GETJPIW get image name failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07589: spdde: system ID not set

Cause: The logical name ORA_SID doesn't translate to a valid value.

Action: Check the value of ORA_SID in the process that gets the error, and correct the installation or command procedures that caused ORA_SID to be set incorrectly.

ORA-07590: spdde: \$DELPRC failure

Cause: VMS system service \$DELPRC failed

Action: Examine system error message and refer to VMS documentation

ORA-07591: spdde: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07592: sspgprv: Error obtaining required privileges

Cause: While obtaining needed privileges, an error was returned from SYS\$SETPRV.

Action: This is an internal error. Please report to Oracle

ORA-07593: ssprprv: Error release privileges

Cause: While releasing privileges, an error was returned from SYS\$SETPRV.

Action: This is an internal error. Please report to Oracle

ORA-07594: spiip: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07595: sppid: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07596: sptpa: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07597: spguns: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07598: spwat: \$SETIMR failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07599: spwat: \$SCHDWK failure

Cause: VMS system service \$SCHDWK failed

Action: Examine system error message and refer to VMS documentation

ORA-07600: slkmnm: \$GETSYIW failure

Cause: VMS system service \$GETSYIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07601: spguno: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07602: spgto: \$GETJPIW failure

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07605: szprv: \$ASCTOID failure

Cause: VMS system service \$ASCTOID failed

Action: Examine system error message and refer to VMS documentation

ORA-07606: szprv: \$CHKPRO failure

Cause: VMS system service \$CHKPRO failed

Action: Examine system error message and refer to VMS documentation

ORA-07607: szaud: \$SNDOPR failure

Cause: VMS system service \$SNDOPR failed

Action: Examine system error message and refer to VMS documentation

ORA-07608: szprv: \$GETUAI failure

Cause: VMS system service \$GETUAI failed

Action: Examine system error message and refer to VMS documentation

ORA-07609: szprv: \$HASH_PASSWORD failure

Cause: VMS system service \$HASH_PASSWORD failed

Action: Examine system error message and refer to VMS documentation

ORA-07610: \$GETJPIW failed in retrieving the user's MAC privileges

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07612: \$GETUI failed in retrieving the user's clearance level

Cause: VMS system service \$GETUI failed

Action: Examine system error message and refer to VMS documentation

ORA-07613: \$GETJPIW failed in retrieving the user's process label

Cause: VMS system service \$GETJPIW failed

Action: Examine system error message and refer to VMS documentation

ORA-07614: \$CHANGE_CLASS failed in retrieving the user's process label

Cause: VMS system service \$CHANGE_CLASS failed

Action: Examine system error message and refer to SEVMS documentation

ORA-07615: \$CHANGE_CLASS failed in retrieving the specified file label

Cause: VMS system service \$CHANGE_CLASS failed

Action: Examine system error message and refer to SEVMS documentation

ORA-07616: \$CHANGE_CLASS failed in retrieving the specified device label

Cause: VMS system service \$CHANGE_CLASS failed

Action: Examine system error message and refer to SEVMS documentation

ORA-07617: \$FORMAT_CLASS failed translating the binary label to a string

Cause: VMS system service \$FORMAT_CLASS failed because the given binary classification was not valid.

Action: Examine system error message and refer to SEVMS documentation

ORA-07618: \$IDTOASC failed translating a secrecy level

Cause: VMS system service \$IDTOASC failed while looking up the string representation in the rights database of a secrecy level.

Action: Define the entry in the rights database which the binary label you specified references.

ORA-07619: \$IDTOASC failed translating an integrity level

Cause: VMS system service \$IDTOASC failed while looking up the string representation in the rights database of an integrity level.

Action: Define the entry in the rights database which the binary label you specified references.

ORA-07620: smscre: illegal database block size

Cause: An illegal database block size was specified in the parameter file. It must be positive, a multiple of 512, and less than the maximum physical i/o data size.

Action: Change db_block_size in the parameter file to conform to these limits.

ORA-07621: smscre: illegal redo block size

Cause: An illegal redo log buffer size was specified in the parameter file. It must be positive and a multiple of 512.

Action: Change log_buffer in the parameter file to conform to these limits.

ORA-07622: smscre: \$CREATE failure

Cause: While creating the system global area (SGA) backing file, VMS system service \$CREATE failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07623: smscre: \$CRMPSC failure

Cause: While creating the system global area (SGA), VMS system service \$CRMPSC failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07624: smsdes: \$DGBLSC failure

Cause: While deleting the system global area (SGA), VMS system service \$DGBLSC failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07625: smsget: \$MGBLSC failure

Cause: While mapping the system global area (SGA) during logon, VMS system service \$MGBLSC failed. The usual reason is that Oracle has not been started up.

Action: Examine the system error message and refer to VMS documentation. Start up Oracle if it is not already started.

ORA-07626: smsget: sga already mapped

Cause: An attempt to map the SGA during logon failed because it was already mapped. This is an internal error.

Action: Exit your program and try again, and report this to your customer support representative.

ORA-07627: smsfre: \$CRETVA failure

Cause: While unmapping the system global area (SGA) during logoff, VMS system service \$CRETVA failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07628: smsfre: sga not mapped

Cause: An attempt to unmap the SGA during logoff failed because it was not mapped. This is an internal error.

Action: Exit your program and try again, and report this to your customer support representative.

ORA-07629: smpall: \$EXPREG failure

Cause: While extending the program global area (PGA), VMS system service \$EXPREG failed. This often happens when the virtual memory page count quota is exceeded.

Action: Examine the system error message and refer to VMS documentation.

ORA-07630: smpdal: \$DELTVA failure

Cause: While deleting the program global area (PGA) during logoff, VMS system service \$DELTVA failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07631: smcacx: \$EXPREG failure

Cause: While creating or extending a context area, VMS system service \$EXPREG failed. This often happens when the virtual memory page count quota is exceeded.

Action: Examine the system error message and refer to VMS documentation.

ORA-07632: smsrcx: \$DELTVA failure

Cause: While deleting a context area, VMS system service \$DELTVA failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07633: smsdbp: illegal protection value

Cause: The buffer debug function was called with an illegal value. This is an internal error.

Action: Contact your customer support representative.

ORA-07634: smsdbp: \$CRETVA failure

Cause: While attempting to set protection in the database buffer debug mechanism, VMS system service \$CRETVA failed.

Action: Contact your customer support representative.

ORA-07635: smsdbp: \$SETPRT failure

Cause: While attempting to set protection in the database buffer debug mechanism, VMS system service \$SETPRT failed.

Action: Contact your customer support representative.

ORA-07636: smsdbp: \$MGBLSC failure

Cause: While attempting to set protection in the database buffer debug mechanism, VMS system service \$MGBLSC failed.

Action: Contact your customer support representative.

ORA-07637: smsdbp: buffer protect option not specified when sga created

Cause: Trying to change the buffer protect mode when the SGA was not created with buffer protect debug option. This is an internal error.

Action: Contact your customer support representative.

ORA-07638: smsget: SGA pad area not large enough for created SGA

Cause: An attempt was made to map an SGA with software in which the SGA pad area isn't large enough.

Action: Create a smaller SGA, or relink the software with a larger pad.

ORA-07639: smscre: SGA pad area not large enough (<varname>string</varname> bytes required)

Cause: An attempt was made to create an SGA with software in which the SGA pad area isn't large enough.

Action: Create a smaller SGA, or relink the software with a larger pad.

ORA-07640: smsget: SGA not yet valid. Initialization in progress

Cause: An attempt was made to map to the SGA while it was being initialized.

Action: Wait until initialization is complete, and try again.

ORA-07641: smscre: Unable to use the system pagefile for the SGA

Cause: The system global area (SGA) backing file could not be allocated using the system pagefile because the system-wide limit on global pages has been exceeded.

Action: Either increase the VMS system parameter GBLPAGFIL or use a disk file as the SGA backing file.

ORA-07642: smprtset: \$CMKRNL failure

Cause: While attempting to set the protection of a region of memory, an error was returned from the \$CMKRNL system service.

Action: Examine the system error message and refer to VMS documentation.

ORA-07643: smsalo: SMSVAR is invalid

Cause: an internal error

Action: Report this error to Oracle Support Services, provide your INIT.ORA file.

ORA-07645: sszfs: \$CHANGE_CLASS failure

Cause: While attempting to set the label on a file, SEVMS service \$CHANGE_CLASS failed.

Action: Examine the system message and refer to SEVMS system documentation.

ORA-07646: sszfc: \$CREATE failure

Cause: While attempting to create a file, VMS system service \$CREATE failed.

Action: Examine the system message and refer to VMS system documentation.

ORA-07647: sszfc: \$OPEN failure

Cause: While attempting to reopen a file, VMS system service \$OPEN failed.

Action: Examine the system message and refer to VMS system documentation.

ORA-07650: sigunc: \$GETJPIW failure

Cause: While attempting to get the user's terminal device name, user name, user program name, or process name during logon, VMS system service \$GETJPIW failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07655: slsprom:\$TRNLOG failure

Cause: While attempting to translate SYS\$INPUT during a prompt for a password, VMS system service \$TRNLOG failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07656: slsprom:\$GETDVI failure

Cause: While attempting to get device characteristics during a prompt for a password, VMS system service \$GETDVI failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07657: slsprom:\$ASSIGN failure

Cause: While prompting for a password, VMS system service \$ASSIGN failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07658: slsprom:\$QIOW read failure

Cause: While prompting for a password, VMS system service \$QIOW failed.

Action: Examine the system error message and refer to VMS documentation.

ORA-07665: ssrexhd: recursive exception encountered <varname>string</varname> <varname>string</varname> <varname>string</varname> <varname>string</varname> <varname>string</varname> <varname>string</varname>

Cause: A VMS exception occurred while executing in the Oracle exception handler. The message includes the signal number, first and second signal arguments, and exception PC, PSL and R0. This is an internal error.

Action: Contact your customer support representative.

ORA-07670: \$IDTOASC failed translating a secrecy category

Cause: VMS system service \$IDTOASC failed while looking up the string representation in the rights database of a secrecy category.

Action: Define the entry in the rights database which the binary label you specified references.

ORA-07671: \$IDTOASC failed translating an integrity category

Cause: VMS system service \$IDTOASC failed while looking up the string representation in the rights database of an integrity category.

Action: Define the entry in the rights database which the binary label you specified references.

ORA-07672: \$PARSE_CLASS failed translating the string into a binary label

Cause: SEVMS system service \$PARSE_CLASS failed because the given string did not represent a valid classification.

Action: Examine system error message and refer to SEVMS documentation.

ORA-07680: sou2os: another call to Oracle currently executing

Cause: A call to the Oracle shared image entry point occurred from within the shared image. This is an internal error.

Action: Contact your customer support representative.

ORA-07681: sou2os: An error occurred while initializing Oracle

Cause: While attempting to set up the dispatch vectors for the shared image, an error occurred. This is an internal error.

Action: Contact your customer support representative.

ORA-07682: sou2os: set kernel dispatch fail err

Cause: During Oracle shared image entry, a dispatch to kernel mode failed.

Action: Make sure that your shared image is installed with the CMKRNL privilege, then contact your customer support representative.

ORA-07683: sou2os: \$SETPRV reset error

Cause: During an attempt to restore user privileges at Oracle shared image exit, VMS system service \$SETPRV failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07684: sou2os: supervisor stack reset error

Cause: During an attempt to restore the supervisor-mode stack at Oracle shared image exit, VMS system service \$SETSTK failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07685: sou2os: supervisor stack set error

Cause: During an attempt to set the Oracle supervisor-mode stack at Oracle shared image entry, VMS system service \$SETSTK failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07700: sksarch: interrupt received

Cause: An interrupt was received while archiving the logs

Action: Retry operation

ORA-07701: sksatln: internal exception: output buffer too small

Cause: Overflow of buffer for parsing archive control text string

Action: This is an internal error, please report to Oracle

ORA-07702: unrecognized device type in archive text

Cause: Unrecognized device type in archive text

Action: This is an internal error, please report to Oracle

ORA-07703: error in archive text: need '/' after device type

Cause: The archive control text in the ARCHIVE command is invalid; the device type (to indicate a file or tape) must be followed by a '/'.

Action: Refer to the SQLDBA Guide for the proper syntax of the text.

ORA-07704: error in archive text: need ':' after device name

Cause: The archive control text in the ARCHIVE command is invalid; the device name must be followed by a ':'.

Action: Refer to the SQLDBA Guide for the proper syntax of the text.

ORA-07705: sksaprs: device name buffer too small

Cause: The buffer supplied for the device name is too small. This is an internal error.

Action: Contact your customer support representative.

ORA-07706: error in archive text: need disk file name

Cause: The archive control text in the ARCHIVE command is invalid; the disk file name is missing.

Action: Refer to the SQLDBA Guide for the proper syntax of the text.

ORA-07707: error in archive text: need tape label name

Cause: The archive control text in the ARCHIVE command is invalid; the tape label name is missing.

Action: Refer to the SQLDBA Guide for the proper syntax of the text.

ORA-07708: sksaprs: tape label name buffer too small

Cause: The buffer supplied for the tape label is too small. This is an internal error.

Action: Contact your customer support representative.

ORA-07709: sksaprs: archiving to a remote host is not allowed

Cause: The user specified a remote disk for archiving via DECnet.

Action: Archive to a disk on the local host.

ORA-07710: sksaprs: file name buffer too small

Cause: The buffer supplied for the file name is too small. This is an internal error.

Action: Contact your customer support representative.

ORA-07713: sksamtd: could not mount archival device (SYS\$MOUNT failure)

Cause: VMS system service SYS\$MOUNT failed

Action: Examine system error message and refer to VMS documentation

ORA-07715: sksadtd: could not dismount archival device (SYS\$DISMNT failure)

Cause: VMS system service SYS\$DISMNT failed

Action: Examine system error message and refer to VMS documentation

ORA-07716: sksachk: invalid device specification for ARCHIVE

Cause: VMS system service SYS\$GETDVI failed"

Action: Specify a valid device in ARCHIVE control string

ORA-07717: sksaalo: error allocating memory

Cause: VMS system service LIB\$GET_VM failed"

Action: Examine system error message and refer to VMS documentation

ORA-07718: sksafre: error freeing memory

Cause: VMS system service LIB\$FREE_VM failed

Action: Examine system error message and refer to VMS documentation

ORA-07721: scgcm: not enough OS resource to obtain system enqueue

Cause: A call to sys\$enq returned an error indicating that the operating system lacked the resources necessary to create a lock. This is caused by the messages SS\$_EXENQLM or SS\$_INSFMEM.

Action: Free up some of the required resource to allow the creation of the required lock.

ORA-07740: slemop: incorrect handle size (programming error)

Cause: structures used for reading error message files do not match

Action: this is an internal error, please report to Oracle

ORA-07741: slemop: \$OPEN failure

Cause: VMS system service \$OPEN failed

Action: Examine system error message and refer to VMS documentation

ORA-07742: slemop: \$CONNECT failure

Cause: VMS system service \$CONNECT failed

Action: Examine system error message and refer to VMS documentation

ORA-07743: slemop: incorrect error file attributes

Cause: An error message file is of incorrect format

Action: Unless an error file has been changed, report this to Oracle

ORA-07744: slemcl: invalid error message file handle

Cause: seal in passed in handle does not match correct value

Action: this is an internal error, please report to Oracle

ORA-07745: slemcl: \$CLOSE failure

Cause: VMS system service \$CLOSE failed

Action: Check system error and refer to VMS documentation

ORA-07746: slemrd: invalid error message file handle

Cause: seal in passed in handle does not match correct value

Action: this is an internal error, please report to Oracle

ORA-07747: slemrd: \$READ failure

Cause: VMS system service \$READ failed

Action: Check system error and refer to VMS documentation

ORA-07750: slemcr: fopen failure

Cause: An attempt to create a message file failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07751: slemcr: malloc failure

Cause: An attempt to allocate a cache for a newly-created message file failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07753: slemcf: fseek before write failure

Cause: An attempt to seek before writing a message file cache element failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07754: slemcf: fwrite failure

Cause: An attempt to write a message file cache element failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07755: slemcf: fseek before read failure

Cause: An attempt to seek before reading a message file cache element failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07756: slemcf: fread failure

Cause: An attempt to read a message file cache element failed. This is an internal error.

Action: Contact your customer support representative.

ORA-07757: slemcc: invalid handle

Cause: The seal in a passed-in handle does not match correct value. This is an internal error.

Action: Contact your customer support representative.

ORA-07758: slemcw: invalid handle

Cause: The seal in a passed-in handle does not match correct value. This is an internal error.

Action: Contact your customer support representative.

ORA-07759: slemtr: invalid destination

Cause: The destination string provided to the function is too short This is an internal error.

Action: Contact your customer support representative.

ORA-07760: slemtr: \$open failure

Cause: the \$open service failed. This is an internal error

Action: Contact your customer support representative.

ORA-07800: slbtpd: invalid number

Cause: An impossible request for binary to decimal conversion was made

Action: This conversion cannot be performed

ORA-07801: slbtpd: invalid exponent

Cause: An impossible request for binary to decimal conversion was made

Action: This conversion cannot be performed

ORA-07802: slbtpd: overflow while converting to packed decimal

Cause: An impossible request for binary to decimal conversion was made

Action: This conversion cannot be performed

ORA-07803: slpdtb: invalid packed decimal nibble

Cause: An impossible request for decimal to binary conversion was made

Action: This conversion cannot be performed

ORA-07804: slpdtb: number too large for supplied buffer

Cause: An impossible request for decimal to binary conversion was made

Action: This conversion cannot be performed

ORA-07820: sspscn: SYS\$CRELNM failure

Cause: An error was returned from the SYS\$CRELNM function

Action: Check system error and refer to VMS documentation

ORA-07821: sspsdn: SYS\$DELLNM failure

Cause: An error was returned from the SYS\$DELLNM function

Action: Check system error and refer to VMS documentation

ORA-07822: sspscm: SYS\$CREMBX failure

Cause: An error was returned from the SYS\$CREMBX function while trying to create the process dump mailbox.

Action: Check system error and refer to VMS documentation

ORA-07823: sspsqr: \$QIO failure

Cause: An error was returned from \$QIO while trying to queue a read to the process dump mailbox.

Action: Check system error and refer to VMS documentation

ORA-07824: sspsin: \$SETIMR failure

Cause: An error was returned from SYS\$SETIMR while trying to queue a process spin-watch timer.

Action: Check system error and refer to VMS documentation

ORA-07825: sspsck: \$QIO failure at AST level

Cause: An error was returned from SYS\$QIO while trying to read the process dump mailbox.

Action: Check system error and refer to VMS documentation

ORA-07826: sspscm: SYS\$GETDVIW failure

Cause: An error was returned from SYS\$GETDVIW while trying to get information about the process dump mailbox.

Action: Check system error and refer to VMS documentation

ORA-07840: sllfop: LIB\$GET_VM failure

Cause: An error was returned from LIB\$GET_VM while attempting to allocate memory for an i/o vector.

Action: Check system error and refer to VMS documentation

ORA-07841: sllfop: SYS\$OPEN failure

Cause: An error was returned from SYS\$OPEN while attempting to open the data file for reading

Action: Check system error and refer to VMS documentation

ORA-07842: sllfcl: SYS\$CLOSE failure

Cause: An error was returned from SYS\$CLOSE while attempting to close the input data file

Action: Check system error and refer to VMS documentation

ORA-07843: sllfcl: LIB\$FREE_VM failure

Cause: An error was returned from LIB\$FREE_VM while attempting to free the memory for the i/o vector

Action: Check system error and refer to VMS documentation

ORA-07844: sllfop: LIB\$GET_VM failure

Cause: An error was returned from LIB\$GET_VM while attempting to allocate memory for data and index buffers

Action: Check system error and refer to VMS documentation

ORA-07845: sllfcl: LIB\$FREE_VM failure

Cause: An error was returned from LIB\$FREE_VM while attempting to free memory used by data and index buffers

Action: Check system error and refer to VMS documentation

ORA-07846: sllfop: <varname>string</varname> byte record too big for <varname>string</varname> byte user buffer

Cause: The longest record in the file will not fit into the largest data buffer that can be allocated

Action: Modify the RMS file to have smaller records

ORA-07847: sllfop: \$CONNECT failure

Cause: An error was returned by SYS\$CONNECT while attempting to open the data file

Action: Check system error and refer to VMS documentation

ORA-07848: sllfrb: \$GET failure

Cause: An error was returned by SYS\$GET while attempting to read the data file

Action: Check system error and refer to VMS documentation

ORA-07849: sllfsk: \$GET failure

Cause: An error was returned by SYS\$GET while attempting to skip records in the input file

Action: Check system error and refer to VMS documentation

ORA-07850: sllfop: bad option

Cause: You are using a bad option to loader Fixed= is one legal option. Check documentation for others.

Action: Check documentation

ORA-07860: osnsoi: error setting up interrupt handler

Cause: An error occurred while setting up the control interrupt handler

Action: This is an internal error. Contact your Oracle representative.

ORA-07880: sdopnf: internal error

Cause: A list of all files open by this process could not be obtained.

Action: This is an internal error. Contact your customer support representative.

ORA-08000: maximum number of session sequence lists exceeded

Cause: the sequence parent state objects for this session are all used

Action: an internal error; quit the session and begin a new one

ORA-08001: Deprecated

ORA-08002: sequence <varname>string</varname>.CURRVAL is not yet defined in this session

Cause: sequence CURRVAL has been selected before sequence NEXTVAL

Action: select NEXTVAL from the sequence before selecting CURRVAL

ORA-08003: sequence <varname>string</varname>.NEXTVAL exceeds internal limits

Cause: The sequence was created with unsafe values for some of the parameters. The calculation of NEXTVAL cannot be made because it exceeds the legal representation size.

Action: Alter or recreate the sequence number with legal limits.

ORA-08004: sequence <varname>string</varname>.NEXTVAL <varname>string</varname> <varname>string</varname>VALUE and cannot be instantiated

Cause: instantiating NEXTVAL would violate one of MAX/MINVALUE

Action: alter the sequence so that a new value can be requested

ORA-08005: specified row does not exist

Cause: A row with the given rowid does not exist in any of the tables given

Action: check the query for misspellings of table names and the rowid

ORA-08006: specified row no longer exists

Cause: the row has been deleted by another user since the operation began

Action: re-try the operation

ORA-08007: Further changes to this block by this transaction not allowed

Cause: Max locks have been reached for this transaction in this block

Action: Commit changes

ORA-08008: another instance is mounted with USE_ROW_ENQUEUES = <varname>string</varname>

Cause: the shared instance being started does not have the same value for use_row_enqueues as already running instances

Action: ensure that all instances' INIT.ORA files specify the same value for the parameter 'use_row_enqueues'

ORA-08100: index is not valid - see trace file for diagnostics

Cause: Validate Index detected an inconsistency in its argument index

Action: Send trace file to your customer support representative

ORA-08101: index key does not exist file <varname>string</varname>: (root <varname>string</varname>, node <varname>string</varname>) blocks (<varname>string</varname>)

Cause: Internal error: possible inconsistency in index

Action: Send trace file to your customer support representative, along with information on reproducing the error

ORA-08102: index key not found, obj# <varname>string</varname>, file <varname>string</varname>, block <varname>string</varname> (<varname>string</varname>)

Cause: Internal error: possible inconsistency in index

Action: Send trace file to your customer support representative, along with information on reproducing the error

ORA-08103: object no longer exists

Cause: The object has been deleted by another user since the operation began, or a prior incomplete recovery restored the database to a point in time during the deletion of the object.

Action: Delete the object if this is the result of an incomplete recovery.

ORA-08104: this index object <varname>string</varname> is being online built or rebuilt

Cause: the index is being created or rebuild or waited for recovering from the online (re)build

Action: wait the online index build or recovery to complete

ORA-08105: Oracle event to turn off smon cleanup for online index build

Cause: set this event only under the supervision of Oracle development

Action: debugging only

ORA-08106: cannot create journal table <varname>string</varname>.<varname>string</varname>

Cause: The online index builder could not create its journal table

Action: Rename the conflicting table or rerun the SQL statement. There * may be a concurrent online index rebuild on the same object. rename your table in conflict or rerun the SQL statement * there may be a concurrent online index rebuild on the same object.

ORA-08108: may not build or rebuild this type of index online

Cause: only support normal index or IOT top-level index

Action: change your index type

ORA-08109: nosort is not a supported option for online index build

Cause: may not specify nosort for online index build

Action: get rid of nosort in the index creation command

ORA-08110: Oracle event to test SMON cleanup for online index build

Cause: Oracle Kernel test only

Action: Donot set this event(for test only)

ORA-08111: a partitioned index may not be coalesced as a whole

Cause: User attempted to coalesce a partitioned index using ALTER INDEX COALESCE statement, which is illegal

Action: Coalesce the index a (sub)partition at a time (using ALTER INDEX MODIFY (sub)PARTITION COALESCE)

ORA-08112: a composite partition may not be coalesced as a whole

Cause: User attempted to coalesce a composite partition

Action: Coalesce the index a subpartition at a time (using ALTER INDEX MODIFY SUBPARTITION COALESCE)

ORA-08113: composite partition index may not be compressed

Cause: User attempted to compress a composite partition index

Action: create uncompressed composite partition index

ORA-08114: can not alter a fake index

Cause: User attempted to alter a fake index

Action: drop fake index

ORA-08115: can not online create/rebuild this index type

Cause: User attempted to create index type that online doesnot support

Action: use offline index create/rebuild command

ORA-08116: can not acquire dml enough lock(S mode) for online index build

Cause: User attempted to create index online without allowing DML Share lock

Action: allow DML share lock on the base table

ORA-08117: Index Organized Table operation released its block pin

Cause: Block maintenance forced the release of a block pin

Action: Contact your customer support representative

ORA-08118: Deferred FK constraints cannot be enforced, index too big (<varname>string</varname>)

Cause: Deferred Foreign Key constraints cannot be enforced due to the index key being too big and built on a non-default DB_BLOCK_SIZE.

Action: First try to drop the Foreign Key and then the primary key.

ORA-08119: The new initrans will make the index too big

Cause: Specifying the initrans need additional space to hold the index key which might make the index too big

Action: Try giving a smaller initrans value

ORA-08120: Need to create SYS.IND_ONLINE\$ table in order to (re)build index

Cause: Alter index Build/Rebuild online require existing of SYS.IND_ONLINE\$ table.

Action: User/DBA needs to create sys.ind_online\$ before alter the index /rdbms/admin/catcio.sql contains script to create ind_online\$.

ORA-08121: Number of indexes need to be maintained offline exceeds limit for DML

Cause: Too many indexes needed to be maintained. The limit is 2^{16} indexes for each DML statement

Action: Make sure the index maintainance is online. If indexes need to be maintained offline, drop some indexes.

ORA-08122: Online (re)build of index rolled back due to DML conflict

Cause: The online (re)build journal is inconsistent with ongoing DML and cannot be used successfully to complete the online index (re)build.

Action: Reissue the online (re)build operation, after performing any cleanup, if needed.

ORA-08175: discrete transaction restriction violated (<varname>string</varname>)

Cause: An attempt was made to perform an action that is not currently supported in a discrete transaction.

Action: Rollback the transaction, and retry it as a normal transaction.

ORA-08176: consistent read failure; rollback data not available

Cause: Encountered data changed by an operation that does not generate rollback data : create index, direct load or discrete transaction.

Action: In read/write transactions, retry the intended operation. Read only transactions must be restarted.

ORA-08177: can't serialize access for this transaction

Cause: Encountered data changed by an operation that occurred after the start of this serializable transaction.

Action: In read/write transactions, retry the intended operation or transaction.

ORA-08178: illegal SERIALIZABLE clause specified for user INTERNAL

Cause: Serializable mode is not supported for user INTERNAL.

Action: Reconnect as another user and retry the SET TRANSACTION command.

ORA-08179: concurrency check failed

Cause: Encountered data changed by an operation that occurred after a specific snapshot. This is usually used to indicate that a particular cached copy of a datablock is stale. This is used for internal use for now.

Action: refresh the cached copy of the datablock and retry operation.

ORA-08180: no snapshot found based on specified time

Cause: Could not match the time to an SCN from the mapping table.

Action: try using a larger time.

ORA-08181: specified number is not a valid system change number

Cause: supplied scn was beyond the bounds of a valid scn.

Action: use a valid scn.

ORA-08182: operation not supported while in Flashback mode

Cause: user tried to do dml or ddl while in Flashback mode

Action: disable Flashback and re-attempt the operation

ORA-08183: Flashback cannot be enabled in the middle of a transaction

Cause: user tried to do Flashback in the middle of a transaction

Action: do a commit

ORA-08184: attempting to re-enable Flashback while in Flashback mode

Cause: as stated above

Action: disable first before re-enabling

ORA-08185: Flashback not supported for user SYS

Cause: user logged on as SYS

Action: logon as a different (non SYS) user.

ORA-08186: invalid timestamp specified

Cause: as stated above

Action: enter a valid timestamp

ORA-08187: snapshot expression not allowed here

Cause: A snapshot expression using AS OF was specified when not allowed.

Action: Do not use the AS OF clause

ORA-08189: cannot flashback the table because row movement is not enabled

Cause: An attempt was made to perform Flashback Table operation on a table for which row movement has not been enabled. Because the Flashback Table does not preserve the rowids, it is necessary that row movement be enabled on the table.

Action: Enable row movement on the table

ORA-08190: restore point <varname>string</varname> is from a different incarnation of the database

Cause: An attempt was made to perform Flashback Table operation using a restore point from a different incarnation of the database

Action: Provide a restore point from the current database incarnation

ORA-08191: Flashback Table operation is not supported on remote tables

Cause: An attempt was made to perform Flashback Table operation on a remote table. This is not permitted.

Action: Do not perform a Flashback Table operation on remote tables.

ORA-08192: Flashback Table operation is not allowed on fixed tables

Cause: An attempt was made to perform Flashback Table operation on a fixed table. This is not permitted.

Action: Do not perform a Flashback Table operation on fixed tables.

ORA-08193: Flashback Table operation is not allowed on temporary tables

Cause: An attempt was made to perform Flashback Table operation on a temporary table. This is not permitted.

Action: Do not perform a Flashback Table operation on temporary tables.

ORA-08194: Flashback Table operation is not allowed on materialized views

Cause: An attempt was made to perform Flashback Table operation on a materialized view. This is not permitted.

Action: Do not perform a Flashback Table operation on materialized views or snapshot logs.

ORA-08195: Flashback Table operation is not supported on partitions

Cause: An attempt was made to perform Flashback Table operation on a partition. This is not permitted.

Action: Do not perform a Flashback Table operation on partitions.

ORA-08196: Flashback Table operation is not allowed on AQ tables

Cause: An attempt was made to perform Flashback Table operation on AQ tables. This is not permitted.

Action: Do not perform a Flashback Table operation on AQ tables.

ORA-08197: Flashback Table operation is not supported on clustered tables

Cause: An attempt was made to perform Flashback Table operation on a clustered table. This is not permitted.

Action: Do not perform a Flashback Table operation on clustered tables.

ORA-08198: Flashback Table is not supported on object tables, nested tables

Cause: An attempt was made to perform Flashback Table operation on a object table or a nested table or a table with nested table column. This is not permitted.

Action: Do not perform a Flashback Table operation on such tables.

ORA-08199: Flashback Table operation is not supported on this object

Cause: An attempt was made to perform Flashback Table operation on an object on which the operation is not supported.

Action: Do not perform a Flashback Table operation on such objects.

ORA-08205: ora_addr: \$ORACLE_SID not set in environment

Cause: The environment variable ORACLE_SID is not set.

Action: Set the ORACLE_SID environment variable.

ORA-08206: ora_addr: cannot translate address file name

Cause: Cannot translate \$ORACLE_HOME/dbs/sgade\$ORACLE_SID.dbf.

Action: Ensure that ORACLE_HOME and ORACLE_SID are properly set.

ORA-08207: ora_addr: cannot open address file

Cause: The address file could not be opened.

Action: Check that ORACLE is up. Check that the file \$(ORACLE_HOME)/dbs/sgade\$(ORACLE_SID).dbf exists and has correct permissions.

ORA-08208: ora_addr: cannot read from address file

Cause: The address file could not be read.

Action: Check that the file \$(ORACLE_HOME)/dbs/sgade\$(ORACLE_SID).dbf exists and contains a single line of text.

ORA-08209: scngrs: SCN not yet initialized

Cause: The System Commit Number has not yet been initialized.

Action: Contact your customer support representative.

ORA-08210: Requested I/O error

Cause: Oracle requested that an I/O error be returned for this operation.

Action: This should not occur in normal Oracle operation. Contact support.

ORA-08230: smscre: failed to allocate SGA

Cause: The n_core system call failed, maybe due to insufficient memory.

Action: Specify a smaller number of buffers. Check INIT.ORA parameters.

ORA-08231: smscre: unable to attach to SGA

Cause: The process cannot attach to the SGA. This can happen if either the listener can't attach, or the process cannot communicate with the listener.

Action: Verify that the instance is up and running. Contact your customer support representative.

ORA-08232: smsdes: cannot detach from SGA

Cause: Probably, the listener process has died.

Action: Contact your customer support representative.

ORA-08233: smsdes: cannot unmap SGA

Cause: The n_core system call failed while detaching from the SGA.

Action: Note nCX error returned; contact your customer support representative.

ORA-08234: smsget: cannot get instance listener address

Cause: The instance listener address cannot be read from the sgadef file.

Action: Verify \$(ORACLE_HOME) and \$(ORACLE_SID) are set correctly. Additional information gives error return from ora_addr.

ORA-08235: smsget: listener not on this node

Cause: A process wishing to attach to the SGA is on a different node from its instance's listener.

Action: Verify \$(ORACLE_HOME) and \$(ORACLE_SID) are set correctly. Contact your customer support representative.

ORA-08236: smsget: cannot share subcube with listener

Cause: The n_share call failed, probably because the listener has died.

Action: Check if the listener is running, and contact your customer support representative.

ORA-08237: smsget: SGA region not yet created

Cause: Attempting to attach to an SGA which has not yet been created.

Action: Verify that the instance is running. Contact your customer support representative.

ORA-08238: smsfre: cannot detach from SGA

Cause: The n_core system call failed while detaching from the SGA.

Action: Check nCX error, and contact your customer support representative.

ORA-08243: recursive audit operation attempted

Cause: A recursive operation requiring audit was attempted in the middle of an auditing operation. The most likely reason is space management operations needed to free up space in the audit tablespace.

Action: Check space in the tablespace for SYS.AUD\$ and correct the problem.

ORA-08260: ora_addr: cannot open nameserver

Cause: A process could not connect to the nameserver.

Action: Make sure the nameserver is up and running. Additional information gives nameserver's returned status.

ORA-08261: ora_addr: cannot find name in nameserver

Cause: The listener nameserver entry for an instance could not be found.

Action: Make sure the nameserver is up and running. Additional information gives nameserver's returned status.

ORA-08263: ora_addr: cannot free listener address

Cause: The listener nameserver entry could not be freed

Action: Additional information gives nameserver's returned status. Contact your customer support representative.

ORA-08264: ora_addr: cannot close nameserver

Cause: The connection to the nameserver could not be closed.

Action: Additional information gives nameserver's returned status. Contact your customer support representative.

ORA-08265: create_ora_addr: cannot open nameserver

Cause: A process could not connect to the nameserver.

Action: Make sure the nameserver is up and running. Additional information gives nameserver's returned status.

ORA-08266: create_ora_addr: cannot register name in nameserver

Cause: The listener's addressing information could not be registered.

Action: Make sure the nameserver is up and running. Additional information gives nameserver's returned status.

ORA-08267: destroy_ora_addr: cannot close nameserver

Cause: The connection to the nameserver could not be closed.

Action: Additional information gives nameserver's returned status. Contact your customer support representative.

ORA-08268: create_ora_addr: cannot close nameserver

Cause: The connection to the nameserver could not be closed.

Action: Additional information gives nameserver's returned status. Contact your customer support representative.

ORA-08269: destroy_ora_addr: cannot destroy name

Cause: The listener's addressing information could not be removed.

Action: Additional information gives nameserver's returned status. Contact your customer support representative.

ORA-08270: sksachk: Illegal archival control string

Cause: Archive files cannot be created with the given archival control string.

Action: Check that the volume exists

ORA-08271: sksabl: Buffer size not large enough for archive control string

Cause: The given archival control string expands into too many characters.

Action: Reduce archive control string length.

ORA-08274: Out of memory for environment variable

Cause: There is insufficient memory to return the requested value

Action: Reduce memory usage and retry.

ORA-08275: Environment variable unset

Cause: The requested environment variable is not set

Action: Ensure that the variable name requested is correct.

ORA-08276: No room in nameserver for pid

Cause: There is no room to record the pid for a background process

Action: Shutdown abort and restart the database.

ORA-08277: Cannot set environment variable

Cause: There is insufficient memory to expand the environment.

Action: Reduce memory usage and retry.

ORA-08278: Cannot get CPU statistics

Cause: Could not retrieve CPU times because n_stat failed.

Action: Contact customer support.

ORA-08308: sllfop: Cannot open file

Cause: Oracle could not open a file.

Action: Check the Unix errno returned as additional information.

ORA-08309: sllfop: Cannot fstat file

Cause: Oracle could not obtain information about an open file.

Action: Check the Unix errno returned as additional information.

ORA-08310: sllfop: Bad value for recsize

Cause: An illegal value for the record size was specified.

Action: Specify a value for the recsize option that is greater than 0.

ORA-08311: sllfop: bad value for maxrecsize

Cause: An illegal value for the maximum record size was specified.

Action: Specify a value for the maxrecsize option that is greater than 0.

ORA-08312: sllfop: unrecognized processing option

Cause: An unrecognized processing option was specified.

Action: Check the Oracle for nCUBE 2 User's Guide for valid options.

ORA-08313: sllfop: could not allocate buffers

Cause: Memory for the load buffers could not be allocated.

Action: Reduce the maximum record size. Eliminate any unnecessary processes on your current node before running SQL*Loader again.

ORA-08314: sllfcf: Error closing file

Cause: An error occurred trying to close a file.

Action: Check the Unix errno returned as additional information.

ORA-08315: sllfrb: Error reading file

Cause: An error occurred trying to read from a file.

Action: Check the Unix errno returned as additional information.

ORA-08316: slfsk: Error seeking in file.

Cause: The lseek system call returned an error.

Action: Check the Unix errno returned as additional information.

ORA-08317: slfsk: Error seeking in file.

Cause: The lseek system call returned an error.

Action: Check the Unix errno returned as additional information.

ORA-08318: slfsk: Error reading file

Cause: An error occurred trying to read from a file.

Action: Check the Unix errno returned as additional information.

ORA-08319: slfsk: Error reading file

Cause: An error occurred trying to read from a file.

Action: Check the Unix errno returned as additional information.

ORA-08320: scnget: Call to scnget before scnset or scnfnf.

Cause: An internal error

Action: Contact your customer support representative.

ORA-08321: scnmin: NOT IMPLEMENTED YET

Cause: An internal error

Action: Contact your customer support representative.

ORA-08322: scnmin: open/convert of bias lock failed

Cause: A call to the lkmgr failed to open and convert the bias lock

Action: Check to make sure the lkmgr is up.

ORA-08323: scnmin: close of bias lock failed

Cause: A call to the lkmgr failed to close the bias lock

Action: Check to make sure the lkmgr is up.

ORA-08330: Printing not supported

Cause: An attempt was made to automatically spool a file to the printer

Action: None

ORA-08331: Wait operation timed out

Cause: Oracle timed out waiting for an event

Action: Contact your Oracle support representative

ORA-08332: rollback segment #<varname>string</varname> specified not available

Cause: (same as 1545)

Action: (same as 1545). Also, make sure you have created enough rollback segments for the number of instances you are trying to start.

ORA-08340: This command not allowed on nCUBE, only one thread is ever used.

Cause: An illegal command was executed for the nCUBE platform.

Action: There is no need to issue this command.

ORA-08341: On nCUBE, this command can only be executed from instance 1.

Cause: A command that can only be issued on instance 1 was issued elsewhere.

Action: Log on to instance 1 and repeat the command.

ORA-08342: sropen: failed to open a redo server connection

Cause: An error occurred trying to connect to the redo server.

Action: The OS specific error message should tell you what to do.

ORA-08343: srclose: failed to close a redo server connection

Cause: An error occurred trying to close the redo server connection.

Action: The OS specific error message should tell you what to do.

ORA-08344: srapp: failed to send redo data to the redo server

Cause: An error occurred trying to send redo to the redo server.

Action: The OS specific error message should tell you what to do.

ORA-08401: invalid compiler name: <varname>string</varname>

Cause: An invalid compiler name <varname>compname</varname> was passed to a UTL_PG conversion routine.

Action: Correct the compiler name parameter in the PL/SQL code that called the conversion routine.

ORA-08412: error encountered in WMSGBSIZ, size for WMSGBLK is not big enough for warning message

Cause: The WMSGBSIZ is the maximum size for warning message block, it is recommended to be 1024 bytes to 8 kbytes.

Action: Defined WMSGBLK of size between 1k to 8k bytes and update the WMSGBSIZ to the sizeof(WMSGBLK).

ORA-08413: invalid compiler type in FORMAT parameter at <varname>string</varname>

Cause: An invalid compiler type is defined in format control block. The format control block is invalid.

Action: Check to be sure that the format parameter was built by MAKE_RAW_TO_NUMBER_FORMAT or MAKE_NUMBER_TO_RAW_FORMAT, and that it was not accidentally overwritten or modified by the PL/SQL procedure.

ORA-08414: error encountered in <varname>string</varname>

Cause: The function <varname>routine</varname> returned an error. Where <varname>routine</varname> may be: RAW_TO_NUMBER_NUMBER_TO_RAW RAW_TO_NUMBER_FORMAT_NUMBER_TO_RAW_FORMAT MAKE_NUMBER_TO_RAW_FORMAT MAKE_RAW_TO_NUMBER_FORMAT

Action: This message will be preceded by messages providing details about the error. Check those messages to determine what action to take.

ORA-08429: raw data has invalid digit in display type data

Cause: The input raw buffer passed to a UTL_PG RAW_TO_NUMBER conversion routine contained invalid data. The picture mask parameter specified a digit, but the corresponding input from the raw data did not contain a valid digit.

Action: Either the input data is incorrect, or the picture mask is incorrect. Correct the appropriate item.

ORA-08430: raw data missing leading sign

Cause: The input raw buffer passed to a UTL_PG RAW_TO_NUMBER conversion routine had no leading sign, but the mask options parameter specified a leading sign.

Action: Correct the input raw data or the mask options so that they match.

ORA-08431: raw data missing zero as defined in picture

Cause: The picture mask parameter passed to a UTL_PG RAW_TO_NUMBER conversion routine contained a zero, but the corresponding input from the raw data was not a zero.

Action: Either the input data is incorrect, or the picture mask is incorrect. Correct the appropriate item.

ORA-08432: raw data has invalid floating point data

Cause: The input raw data passed to a UTL_PG RAW_TO_NUMBER conversion routine contained invalid floating point data.

Action: Correct the input raw data.

ORA-08433: invalid picture type in convert raw to number

Cause: The picture mask parameter passed to a UTL_PG RAW_TO_NUMBER conversion routine contained non-numeric characters, but the conversion was to a numeric data type.

Action: Correct the picture mask parameter.

ORA-08434: raw data has invalid trailing sign

Cause: The input raw buffer passed to a UTL_PG RAW_TO_NUMBER conversion routine had no trailing sign, but the mask options parameter specified a trailing sign.

Action: Correct the input raw data or the mask options so that they match.

ORA-08435: PICTURE MASK missing the leading sign when SIGN IS LEADING specified

Cause: The input MASK passed to a UTL_PG RAW_TO_NUMBER conversion routine had no leading sign, but the mask options parameter specified a leading sign.

Action: Correct the input raw data or the mask options so that they match.

ORA-08436: raw data has invalid sign digit

Cause: The input raw buffer passed to a UTL_PG RAW_TO_NUMBER conversion routine had an invalid sign digit in the position where the picture mask specified a sign.

Action: Correct the input raw data or the picture mask so that they match.

ORA-08437: invalid picture type in picture mask

Cause: The picture mask parameter passed to a UTL_PG NUMBER_TO_RAW conversion routine contained non-numeric characters, but the conversion was to a numeric data type.

Action: Correct the picture mask parameter.

ORA-08440: raw buffer is too short to hold converted data

Cause: The output raw buffer passed to a UTL_PG NUMBER_TO_RAW conversion routine was not large enough to contain the results of the conversion based on the picture mask.

Action: Increase the raw buffer size to the size necessary to hold the entire result of the conversion.

ORA-08441: closed parenthesis missing in picture mask

Cause: A closed parenthesis was missing from the picture mask passed to a UTL_PG conversion routine.

Action: Correct the picture mask.

ORA-08443: syntax error in BLANK WHEN ZERO clause in mask options

Cause: A syntax error was found in the BLANK WHEN ZERO clause in the mask options parameter passed to a UTL_PG conversion routine. Valid specifications are: BLANK ZERO BLANK ZEROS BLANK ZEROES BLANK WHEN ZERO BLANK WHEN ZEROS BLANK WHEN ZEROES

Action: Correct the mask options parameter.

ORA-08444: syntax error in JUSTIFIED clause in mask options

Cause: A syntax error was found in the JUSTIFIED clause in the mask options parameter passed to a UTL_PG conversion routine. Valid specifications are: JUST JUST RIGHT JUSTIFIED JUSTIFIED RIGHT

Action: Correct the mask options parameter.

ORA-08445: syntax error in SIGN clause in mask options

Cause: A syntax error was found in the SIGN clause in the mask options parameter passed to a UTL_PG conversion routine. Valid specifications are: SIGN LEADING SIGN LEADING SEPARATE SIGN LEADING SEPARATE CHARACTER SIGN TRAILING SIGN TRAILING SEPARATE SIGN TRAILING SEPARATE CHARACTER SIGN IS LEADING SIGN IS LEADING SEPARATE SIGN IS LEADING SEPARATE CHARACTER SIGN IS TRAILING SIGN IS TRAILING SEPARATE SIGN IS TRAILING SEPARATE CHARACTER

Action: Correct the mask options parameter.

ORA-08446: syntax error in SYNCHRONIZED clause in mask options

Cause: A syntax error was found in the SYNCHRONIZED clause in the mask options parameter passed to a UTL_PG conversion routine. Valid specifications are: SYNC SYNC LEFT SYNC RIGHT SYNCHRONIZED SYNCHRONIZED LEFT SYNCHRONIZED RIGHT

Action: Correct the mask options parameter.

ORA-08447: syntax error in USAGE clause in mask options

Cause: A syntax error was found in the USAGE clause in the mask options parameter passed to a UTL_PG conversion routine. Valid specifications are: USAGE DISPLAY USAGE COMP USAGE COMP-3 USAGE COMP-4 USAGE COMPUTATIONAL USAGE COMPUTATIONAL-3 USAGE COMPUTATIONAL-4 USAGE IS DISPLAY USAGE IS COMP USAGE IS COMP-3 USAGE IS COMP-4 USAGE IS COMPUTATIONAL USAGE IS COMPUTATIONAL-3 USAGE IS COMPUTATIONAL-4

Action: Correct the mask options parameter.

ORA-08448: syntax error in DECIMAL-POINT environment clause

Cause: A syntax error was found in the DECIMAL-POINT environment clause parameter passed to a UTL_PG conversion routine. Valid specifications are: DECIMAL-POINT IS COMMA

Action: Correct the environment clause parameter.

ORA-08449: invalid numeric symbol found in picture mask

Cause: An invalid numeric symbol was found in the picture mask parameter passed to a UTL_PG conversion routine.

Action: Correct the picture mask parameter.

ORA-08450: invalid specification of CR in picture mask

Cause: The CR suffix was incorrectly specified in the picture mask parameter passed to a UTL_PG conversion routine. The CR suffix can only appear at the end of a picture mask.

Action: Correct the picture mask parameter.

ORA-08451: invalid specification of DB in picture mask

Cause: The DB suffix was incorrectly specified in the picture mask parameter passed to a UTL_PG conversion routine. The DB suffix can only appear at the end of a picture mask.

Action: Correct the picture mask parameter.

ORA-08452: specification of E in picture mask is unsupported

Cause: The floating point exponent symbol 'E' was specified in the picture mask parameter passed to a UTL_PG conversion routine. The floating point data type is currently not supported by the UTL_PG conversion routines.

Action: Correct the picture mask parameter, and the data, if necessary.

ORA-08453: more than one V symbol specified in picture mask

Cause: The picture mask passed to a UTL_PG conversion routine contained more than one decimal point indicator ('V'). Only one decimal point indicator is allowed in the picture mask.

Action: Correct the picture mask parameter.

ORA-08454: more than one S symbol specified in picture mask

Cause: The picture mask passed to a UTL_PG conversion routine contained more than one operational sign indicator ('S'). Only one operational sign indicator is allowed in the picture mask.

Action: Correct the picture mask parameter.

ORA-08455: syntax error in CURRENCY SIGN environment clause

Cause: A syntax error was found in the CURRENCY SIGN environment clause parameter passed to a UTL_PG conversion routine. Valid specifications are: CURRENCY SIGN IS x where x is a valid currency sign

Action: Correct the environment clause parameter.

ORA-08456: no sign in picture mask but SIGN clause in mask options

Cause: The picture mask parameter passed to a UTL_PG conversion routine contained no sign symbol ('S', '+', or '-'), but the mask options parameter contained a SIGN clause. A sign symbol is required in the picture mask parameter when the mask options parameter contains a SIGN clause.

Action: Correct the picture mask parameter or the mask options parameter.

ORA-08457: syntax error in SEPARATE CHARACTER option of SIGN clause

Cause: A syntax error was found in the SEPARATE CHARACTER option of the SIGN clause in the mask options parameter passed to a UTL_PG conversion routine. Valid specifications are: SEPARATE SEPARATE CHARACTER

Action: Correct the mask options parameter.

ORA-08458: invalid format parameter

Cause: The format parameter passed to a UTL_PG conversion routine was invalid. The format parameter should have been built by a prior call to either MAKE_RAW_TO_NUMBER_FORMAT or MAKE_NUMBER_TO_RAW_FORMAT.

Action: Check to be sure that the format parameter was built by MAKE_RAW_TO_NUMBER_FORMAT or MAKE_NUMBER_TO_RAW_FORMAT, and that it was not accidentally overwritten or modified by the PL/SQL procedure.

ORA-08459: invalid format parameter length

Cause: The format parameter passed to a UTL_PG conversion routine was not the correct length. Format parameters must be 2048 bytes in length.

Action: Check to be sure that the format parameter was built by MAKE_RAW_TO_NUMBER_FORMAT or MAKE_NUMBER_TO_RAW_FORMAT, and that it was not accidentally overwritten or modified by the PL/SQL procedure.

ORA-08460: invalid environment clause in environment parameter

Cause: The environment parameter passed to a UTL_PG conversion routine contained an unsupported or invalid environment clause. Only the CURRENCY SIGN and the DECIMAL-POINT IS COMMA environment clauses are supported.

Action: Correct the environment parameter.

ORA-08462: raw buffer contains invalid decimal data

Cause: The input raw buffer passed to a UTL_PG RAW_TO_NUMBER conversion routine contains invalid decimal data.

Action: Correct the input data.

ORA-08463: overflow converting decimal number to Oracle number

Cause: The output variable passed to a UTL_PG RAW_TO_NUMBER was not large enough to hold the Oracle number resulting from the input decimal number.

Action: Be sure that the input decimal number is valid, and be sure that the output variable is large enough to hold the Oracle number value.

ORA-08464: input raw decimal data contains more than 42 digits

Cause: The input raw buffer passed to a UTL_PG RAW_TO_NUMBER conversion routine contained more than 42 digits. This exceeds the maximum size of an Oracle number.

Action: Correct the raw input buffer.

ORA-08465: input mask contains more than 32 characters

Cause: The input mask passed to UTL_PG numeric conversion routine contained more than 32 characters.

Action: Correct the mask input buffer.

ORA-08466: raw buffer length <varname>string</varname> is too short for <varname>string</varname>

Cause: The input raw buffer passed to a UTL_PG RAW_TO_NUMBER conversion routine was less than %s bytes long, but the picture mask parameter specified that %s bytes of input data were to be converted.

Action: Either the input data is incorrect, or the picture mask is incorrect. Correct the appropriate item.

ORA-08467: error converting Oracle number to <varname>string</varname>

Cause: An error occurred when converting an Oracle number to a COBOL <varname>type</varname> of: DISPLAY COMP-3 or character variable. The Oracle number was not in the correct format.

Action: Correct the call to the conversion routine. The input must be a valid Oracle number variable.

ORA-08468: mask option <varname>string</varname> is not supported

Cause: The mask option <varname>clause</varname> was passed to a UTL_PG conversion routine, but is not supported by UTL_PG. The <varname>clause</varname> can be: USAGE IS POINTER USAGE IS INDEX USAGE IS COMP-1 USAGE IS COMP-2 POINTER

Action: Remove the <varname>clause</varname> from the mask options parameter in the PL/SQL call to UTL_PG.

ORA-08469: must use the SIGN IS SEPARATE clause in mask options

Cause: A signed numeric entry with DISPLAY usage was converted using a non-defaulted character set and its PICTURE character-string contains an S. In these circumstances, a SIGN IS SEPARATE clause must be specified in the mask options.

Action: Either specify a valid SIGN IS SEPARATE clause in the mask options, use the defaulted character set, or don't specify an S in the PICTURE character-string.

ORA-08498: Warning: picture mask '<varname>string</varname>' overrides picture mask option 'USAGE IS <varname>string</varname>' to 'USAGE IS DISPLAY'

Cause: Picture mask USAGE option was overridden by the picture mask.

Action: This is an informational message only. The message may be eliminated by changing the USAGE option to match the picture mask.

ORA-08499: Warning: picture mask options '<varname>string</varname>' ignored by UTL_PG

Cause: Picture mask options such as OCCUR, SYNC and others are not processed by the UTL_PG numeric conversion routines.

Action: This is an informational message only. The message may be eliminated by removing the unnecessary picture mask options from the parameter list passed to the UTL_PG routine.

ORA-09200: sfccf: error creating file

Cause: Could be out of disk space

Action: See OSD error accompanying this message

ORA-09201: sfcopy: error copying file

Cause: Block sizes may not match

Action: See OSD error accompanying this message

ORA-09202: sfifi: error identifying file

Cause: db_block_size specified in init.ora could be incorrect

Action: See OSD error accompanying this message

ORA-09203: sfofi: error opening file

Cause: File attributes may have changed

Action: See OSD error accompanying this message

ORA-09204: sfotf: error opening temporary file

Cause: Incorrect path may have been specified for the file

Action: See OSD error accompanying this message

ORA-09205: sfqio: error reading or writing to disk

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09206: sfrfb: error reading from file

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09207: sfsrd: error reading from file

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09208: sftcls: error closing file

Cause: File may have been corrupted

Action: See OSD error accompanying this message

ORA-09209: sftget: error reading from file

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09210: sftopn: error opening file

Cause: Incorrect path may have been specified for the file

Action: See OSD error accompanying this message

ORA-09211: sfwfb: error writing to file

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09212: sfwfbmt: error writing to file

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09213: slgfn: error fabricating file name

Cause: Filename may be too long

Action: See OSD error accompanying this message

ORA-09214: sfdone: I/O error detected

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09215: sfqio: error detected in IOCompletionRoutine

Cause: File may have been truncated or corrupted

Action: See OSD error accompanying this message

ORA-09216: sdnfy: bad value '<varname>string</varname>' for parameter <varname>string</varname>

Cause: The directory specified as the value for the stated parameter could not be used.

Action: Make sure the directory you have specified is a valid directory/file specification.

ORA-09217: sfsfs: failed to resize file

Cause: Could be out of disk space

Action: See OSD error accompanying this message

ORA-09218: sfrfs: failed to refresh file size

Cause: File may be corrupted or truncated

Action: See OSD error accompanying this message

ORA-09240: smpalo: error allocating PGA memory

Cause: Could be out of memory

Action: See OSD error accompanying this message

ORA-09241: smsalo: error allocating SGA memory

Cause: Could be out of memory

Action: See OSD error accompanying this message

ORA-09242: smscre: error creating SGA**ORA-09243: smsget: error attaching to SGA**

Cause: SGA may not have been created (database not started)

Action: See OSD error accompanying this message

ORA-09244: smprset: error setting memory protections**ORA-09245: smcstk: error switching stacks****ORA-09246: sfsmap: unable to map SGA****ORA-09247: smsdes: error destroying the SGA****ORA-09260: sigpidu: error obtaining process id**

Cause: May be out of resources

Action: See OSD error accompanying this message

ORA-09261: spdcr: error creating detached (background) process

Cause: Could be out of resources

Action: See OSD error accompanying this message

ORA-09262: spdde: error terminating detached (background) process

Cause: Could be out of resources

Action: See OSD error accompanying this message

ORA-09263: spini: error initializing process

Cause: Could be out of memory

Action: See OSD error accompanying this message

ORA-09264: sptpa: error flagging process

Cause: Could be out of resources

Action: See OSD error accompanying this message

ORA-09265: spwat: error temporarily suspending process

Cause: Could be out of resources

Action: See OSD error accompanying this message

ORA-09266: spawn: error starting an Oracle process

Cause: Could be out memory

Action: See OSD error accompanying this message

ORA-09270: szalloc: error allocating memory for security

Cause: Could be out of memory

Action: See OSD error accompanying this message

ORA-09271: szlon: error verifying user name

Cause: Username may be too long

Action: See OSD error accompanying this message

ORA-09272: remote os logon is not allowed

Cause: Remote os login attempted when not allowed.

Action: See OSD error accompanying this message

ORA-09273: szrfc: error verifying role name

Cause: An OS error was returned when verifying the role name.

Action: See OSD error accompanying this message

ORA-09274: szrfc: insufficient role name buffer space

Cause: An OS role name was too long.

Action: See OSD error accompanying this message

ORA-09275: CONNECT INTERNAL is not a valid DBA connection

Cause: CONNECT INTERNAL is no longer supported for DBA connections.

Action: Please try to connect AS SYSDBA or AS SYSOPER.

ORA-09276: All bequeath database links must be loopback database links

Cause: A non-loopback bequeath connect string was supplied for a database link.

Action: Please use a connect string with a different transport protocol, or specify a loopback connect string (one that points to the instance for the current session) using "(PROGRAM=<this instance's ORACLE_HOME>/bin/oracle)" and, optionally, "(ENVS='ORACLE_SID=<this instance's ORACLE_SID>')".

ORA-09280: slfcf: error closing file

Cause: File may be corrupted

Action: See OSD error accompanying this message

ORA-09281: slfop: error opening file

Cause: Possibly incorrect path specified to the file

Action: See OSD error accompanying this message

ORA-09282: slfrb: error reading records

Cause: File could be corrupted

Action: See OSD error accompanying this message

ORA-09283: slfsk: error skipping records

Cause: File could be corrupted

Action: See OSD error accompanying this message

ORA-09284: sllfop: cannot allocate read buffer

Cause: malloc() system call returned an error. The system might have run out of heap space

Action: Check additional information for the OS error.

ORA-09285: sllfop: unrecognizable processing option, incorrect format

Cause: Processing option passed is of incorrect format

Action: Consult your IUG for permissible formats

ORA-09290: sksaalo: error allocating memory for archival

Cause: Could be out of memory

Action: See OSD error accompanying this message

ORA-09291: sksachk: invalid device specified for archive destination

Cause: Unable to access directory

Action: Specify a valid device in ARCHIVE control string

ORA-09292: sksabl: unable to build archive file name

Cause: Bad directory or format specified

Action: Specify a valid directory in 'log_archive_format' and a valid format string in 'log_archive_format' in init.ora

ORA-09293: sksasmo: unable to send message to console

Cause: An error was returned while attempting to send a message to the console operator

Action: See OSD error accompanying this message

ORA-09300: osncon: unable to connect, DPML not available

Cause: Unable to detect the presence of DPML

Action: Restart Windows and retry

ORA-09301: osncon: local kernel only supported in standard mode

Cause: An attempt was made to connect to S: while in enhanced mode

Action: Restart Windows in standard mode

ORA-09310: sclgt: error freeing latch

Cause: Internal error

Action: See OSD error accompanying this message

ORA-09311: slsleep: error temporarily suspending process

Cause: May be out of resources

Action: See OSD error accompanying this message

ORA-09312: slspool: error spooling file to printer

Cause: Could be out of resources

Action: See OSD error accompanying this message

ORA-09313: slsprom: error prompting user

Cause: May be out of resources

Action: See OSD error accompanying this message

ORA-09314: sltln: error translating logical name

Cause: Internal buffer may have overflowed

Action: See OSD error accompanying this message

ORA-09315: sql2tt: two-task error translating ORACLE_EXECUTABLE

Cause: Internal error

Action: See OSD error accompanying this message

ORA-09316: szrpc: unable to verify password for role

Cause: OS roles may not be supported for this platform

Action: See OSD error accompanying this message

ORA-09317: szprv: insufficient privileges

Cause: The password specified is invalid

Action: See OSD error accompanying this message

ORA-09318: slkhst: unable to host out to operating system

Cause: There might not be enough memory for the command or hosting out may not be supported on this platform

Action: See OSD error accompanying this message

ORA-09319: slgtd: unable to obtain the current date and time

Cause: The system time might be set incorrectly

Action: See OSD error accompanying this message

ORA-09320: szrfc: unable to obtain the list of valid OS roles

Cause: OS roles may not be supported on this platform

Action: See OSD error accompanying this message

ORA-09321: slzdtb: unable to convert zoned decimal to binary

Cause: internal error

Action: See OSD error accompanying this message

ORA-09322: slpdtb: unable to convert packed decimal to binary

Cause: internal error

Action: See OSD error accompanying this message

ORA-09330: Session terminated internally by Oracle or by an Oracle DBA

Cause: A client workstation that is abnormally disconnected would cause Oracle to terminate that session after about a minute. This message also appears in the trace file if a shutdown abort is performed.

Action: n/a

ORA-09340: Specified ORACLE_SID is either invalid or too long

Cause: ORACLE_SID must be at the most 4 alphanumeric characters.

Action: n/a

ORA-09341: scumnt: unable to mount database

Cause: Another instance is currently mounting the database

Action: n/a

ORA-09342: Detached process terminated by Oracle during shutdown abort

Cause: The user performed a shutdown abort.

Action: n/a

ORA-09344: spsig: error signalling thread

Cause: This function may not be implemented.

Action: n/a

ORA-09350: Windows 32-bit Two-Task driver unable to allocate context area

Cause: See OSD error accompanying this message

Action: n/a

ORA-09351: Windows 32-bit Two-Task driver unable to allocate shared memory

Cause: See OSD error accompanying this message

Action: n/a

ORA-09352: Windows 32-bit Two-Task driver unable to spawn new ORACLE task

Cause: See OSD error accompanying this message

Action: n/a

ORA-09353: Windows 32-bit Two-Task driver unable to open event semaphore

Cause: See OSD error accompanying this message

Action: n/a

ORA-09354: Windows 32-bit Two-Task driver: ORACLE task unexpectedly died

Cause: See OSD error accompanying this message

Action: n/a

ORA-09360: Windows 3.1 Two-Task driver unable to allocate context area

Cause: See OSD error accompanying this message

Action: n/a

ORA-09361: Windows 3.1 Two-Task driver unable to lock context area

Cause: See OSD error accompanying this message

Action: n/a

ORA-09362: Windows 3.1 Two-Task driver unable to deallocate context area

Cause: See OSD error accompanying this message

Action: n/a

ORA-09363: Windows 3.1 Two-Task driver invalid context area

Cause: See OSD error accompanying this message

Action: n/a

ORA-09364: Windows 3.1 Two-Task driver unable to create hidden window

Cause: See OSD error accompanying this message

Action: n/a

ORA-09365: Windows 3.1 Two-Task driver unable to destroy hidden window

Cause: See OSD error accompanying this message

Action: n/a

ORA-09366: Windows 3.1 Two-Task driver unable to allocate shared memory

Cause: See OSD error accompanying this message

Action: n/a

ORA-09367: Windows 3.1 Two-Task driver unable to deallocate shared memory

Cause: See OSD error accompanying this message

Action: n/a

ORA-09368: Windows 3.1 Two-Task driver unable to spawn ORACLE

Cause: See OSD error accompanying this message

Action: n/a

ORA-09369: Windows 3.1 Two-Task driver bad instance handle

Cause: See OSD error accompanying this message

Action: n/a

ORA-09370: Windows 3.1 Two-Task driver ORACLE task timed out

Cause: See OSD error accompanying this message

Action: n/a

ORA-09700: sclin: maximum number of latches exceeded

Cause: ORACLE wants to use more latches than available.

Action: increase INIT.ORA parameter latch_pages or decrease the amount of shared memory you are using.

ORA-09701: scnfy: maximum number of processes exceeded

Cause: PROCESSES INIT.ORA parameter exceeded.

Action: Decrease the PROCESSES parameter and restart.

ORA-09702: sem_acquire: cannot acquire latch semaphore

Cause: The semaphore used for accessing latches could not be seized

Action: Send trace file to your customer support representative, along with information on reproducing the error.

ORA-09703: sem_release: cannot release latch semaphore

Cause: The semaphore used for accessing latches could not be released

Action: Send trace file to your customer support representative, along with information on reproducing the error.

ORA-09704: sstascre: ftok error in creating test and set pages.

Cause: the ftok() library call failed in sstascre().

Action: Verify that tasdef@.dbf file exists. If it does then this is a possible system failure. Perhaps System V compatibility is not enabled.

ORA-09705: spcre: cannot initialize latch semaphore

Cause: The semaphore used for accessing latches could not be initialized

Action: Send trace file to your customer support representative, along with information on reproducing the error.

ORA-09706: slsget: get_process_stats error.

Cause: get_process_stats system call returned an error. Possible OS error.

Action: Check additional information returned. Look for information in OS reference. Contact customer support.

ORA-09708: soacon: failed to bind socket to port.

Cause: The bind system call failed on the socket.

Action: Check additional information for OS error. Try connecting again.

ORA-09709: soacon: failed to accept a connection.

Cause: The accept system call failed on the socket.

Action: Check additional information for OS error. Try connecting again.

ORA-09710: soarcv: buffer overflow.

Cause: The internal buffer is not big enough to hold the message read.

Action: Internal error. Contact customer support representative.

ORA-09711: orasrv: archmon already connected.

Cause: An existing connection has already been made from archmon to orasrv.

Action: Stop trying to connect.

ORA-09712: orasrv: log archiver already connected.

Cause: An existing connection has already been made from log archiver to orasrv.

Action: Stop trying to connect.

ORA-09714: Two Task interface: cannot obtain puname

Cause: The TXIPC driver cannot obtain the name of the PU. (Possible OS error)

Action: Check if the PUs are named (consistend).

ORA-09715: orasrv: cannot obtain puname

Cause: Orasrv cannot obtain the name of the PU. (Possible OS error)

Action: Check if the PUs are named (consistend).

ORA-09716: kslcll: Unable to fix in-flux lampport latch.

Cause: One Oracle process died while still holding a lampport latch.

Action: Exit (kill) all Oracle user processes. Shutdown (abort) and restart Oracle RDBMS kernel.

ORA-09717: osnsui: maximum number of user interrupt handlers exceeded.

Cause: The internal limit on the number of user interrupt handlers has been exceeded.

Action: Reduce the number of simulataneous logons or reduce the number of user interrupt handlers.

ORA-09718: osnsui: cannot set up user interrupt handler.

Cause: Malloc() failed to allocate space to hold user interrupt handler.

Action: Possible memory resource shortage.

ORA-09719: osncui: invalid handle.

Cause: The handle passed to osncui is out of the valid range.

Action: Use a valid handle.

ORA-09740: slsget: cannot get virtual memory region statistics.

Cause: The vm_region system call failed to get virtual memory region statistics.

Action: Check return code in sercerrno. Possible operating system failure.

ORA-09741: spwat: error waiting for a post.

Cause: Msg_receive system call returned an error. Internal error.

Action: Check return code in sercerrno. Port name is returned in sercose[0].

ORA-09742: sppst: error during a post.

Cause: Msg_send system call returned an error. Internal error.

Action: Check return code in sercerrno. Port name is returned in sercose[0].

ORA-09743: smscre: could not attach shared memory.

Cause: The mmap or write system call returned an error. Internal error.

Action: Contact Oracle support.

ORA-09744: smsget: mmap returned an error.

Cause: The mmap system call returned an error. Internal error.

Action: Contact Oracle support.

ORA-09745: smscre: vm_allocate error, unable to create shared memory.

Cause: Error in system call vm_allocate. Failed to create SGA as a single shared memory segment.

Action: Check result code returned in `sercerno`. Verify that the SGA attach address is valid.

ORA-09746: smscre: shared memory attach address incorrect.

Cause: The vm_allocate system call attached the SGA at an incorrect location.

Action: Verify that the SGA attach address is valid.

ORA-09747: pw_detachPorts: server call pws_detach failed.

Cause: The call pws_detach to (Oracle helper) failed.

Action: Make sure the server is still active. Check the error code returned in `sercerno`, and look for error messages in the server log file.

ORA-09748: pws_look_up: fork failed

Cause: The pws_look_up call could not fork the (Oracle helper) process.

Action: Verify that there are enough system resources to support another process. The user or system process limit may have been exceeded, or the amount of free memory or swap space may be temporarily insufficient.

ORA-09749: pws_look_up: port lookup failure

Cause: The pws_look_up could not find a port to (Oracle helper).

Action: Make sure the (Oracle helper) server has been started correctly by pws_look_up, and that the network name server is still running.

ORA-09750: pw_attachPorts: port_rename failed.

Cause: The port_rename system call failed; possible internal error.

Action: Check return code in `sercerno`, report to Oracle customer support.

ORA-09751: pw_attachPorts: server call pws_attach failed.

Cause: The call pws_attach to (Oracle helper) failed.

Action: Make sure the server is still active. Check the error code returned in `sercerno`, and look for error messages in the server log file.

ORA-09752: pw_attachPorts: port_allocate failed.

Cause: The port_allocate system call failed; possible resource exhaustion.

Action: Check return code in `sercerno`, report to Oracle customer support.

ORA-09753: spwat: invalid process number.

Cause: Function was passed an invalid oracle process id.

Action: Internal error. Additional information indicates the invalid process id.

ORA-09754: sppst: invalid process number passed to sppst.

Cause: Function was passed an invalid oracle process id.

Action: Internal error. Contact Oracle support.

ORA-09755: osngpn: port allocation failure.

Cause: The port_allocate system call failed.

Action: Possible system resource shortage; check the error code in sercerno.

ORA-09756: osnpns: no port in the name server.

Cause: osnpns could not find the given named port in the name server.

Action: Check the error code in sercerno. Make sure the shadow process and network name server are still running.

ORA-09757: osnipn: port allocation failure.

Cause: The port_allocate system call failed.

Action: Possible system resource shortage; check the error code in sercerno.

ORA-09758: osnipn: could not check port in name server.

Cause: The netname_check_in call failed.

Action: Check the error code in sercerno. Make sure the network name server is running.

ORA-09759: osnsbt: bad message received.

Cause: The msg_receive system call failed, or received a bad message.

Action: Internal error. Report the error code returned in sercerno.

ORA-09760: osnpui: cannot send break message

Cause: The Pipe driver could not send a break message to the ORACLE shadow process break thread.

Action: Contact your customer support representative.

ORA-09761: pw_destroyPorts: server call pws_stop_instance failed.

Cause: The call pws_stop_instance to (Oracle helper) failed.

Action: Make sure the server is still active. Check the error code returned in sercerno, and look for error messages in the server log file.

ORA-09762: sNeXT_instanceName: translation error.

Cause: A failure was detected while translating the value of ORACLE_SID.

Action: Make sure ORACLE_SID is defined, and that it is of legal length.

ORA-09763: osnmpx: send/receive error exchanging Mach ports.

Cause: The Mach driver failed to exchange port information with the other side of the connection. Either msg_send (sercose[0] == 1) or msg_receive (sercose[0] == 2) failed.

Action: Check return code in sercerno. Make sure both sides of the connection are still running.

ORA-09764: osnmop: access error on oracle executable

Cause: The Mach driver could not access the oracle executable.

Action: Check the permissions on the ORACLE executable and each component of the ORACLE_HOME/bin path.

ORA-09765: osnmop: fork failed

Cause: The Mach driver could not fork the oracle shadow process.

Action: Verify that there are enough system resources to support another process. The user or system process limit may have been exceeded, or the amount of free memory or swap space may be temporarily insufficient.

ORA-09766: osnmop: buffer allocation failure.

Cause: The Mach driver failed to allocate enough vm space for its I/O buffers.

Action: Decrease the value of buffer_size parameter in the Two-Task driver hoststring.

ORA-09767: osnmfs: bad return code from msg_send.

Cause: The msg_send system call failed while flushing the Mach driver's send buffer.

Action: Internal error. Contact your customer support representative.

ORA-09768: osnmgetmsg: could not read a message

Cause: The msg_receive system call returned a failure code while waiting for a message in the Mach driver.

Action: Internal error. Contact your customer support representative.

ORA-09769: osnmbr: cannot send break message

Cause: The Mach driver could not send a break message to the ORACLE shadow process break thread.

Action: Internal error. Contact your customer support representative.

ORA-09770: pws_look_up: translation failure.

Cause: The pws_look_up routine failed to translate the name of the (Oracle helper) executable.

Action: Make sure ORACLE_SID and ORACLE_HOME are set and correct. Additional information gives the translation error code.

ORA-09771: osnmwrtbrkmsg: bad return code from msg_send.

Cause: The msg_send system call failed while sending a Mach driver break.

Action: Internal error. Contact your customer support representative.

ORA-09772: osnpmetbrkmsg: message from host had incorrect message type

Cause: The Mach driver received a message having an unrecognizable message type.

Action: Internal error. Contact your customer support representative.

ORA-09773: osnmgetdatmsg: message from host had incorrect message type

Cause: The Mach driver received a message having an unrecognizable message type.

Action: Internal error. Contact your customer support representative.

ORA-09774: osnmui: cannot send break message

Cause: The Mach driver could not send a break message to the ORACLE shadow process break thread.

Action: Internal error. Contact your customer support representative.

ORA-09775: osnmrs: reset protocol error

Cause: The Mach two-task driver could not reset the connection.

Action: Internal error. Contact your customer support representative.

ORA-09776: pws_look_up: access error on (Oracle helper) executable

Cause: The pws_look_up call could not access the (Oracle helper) executable.

Action: Check the permissions on the (Oracle helper) executable and each component of the ORACLE_HOME/bin path.

ORA-09777: osnpbr: cannot send break message

Cause: The pipe driver could not send a break message to the ORACLE shadow process break thread.

Action: Internal error. Contact your customer support representative.

ORA-09778: snyfyport: failure allocating the notify port.

Cause: The routine failed to allocate or set the task's notify port.

Action: Possible operating system error. Contact Oracle support.

ORA-09779: snyGetPort: failure to allocate a port.

Cause: The port_allocate system call failed; system resources might be exhausted.

Action: Possible operating system error. Contact Oracle support.

ORA-09786: slfop: open error, unable to open file.

Cause: Open system call returned an error.

Action: Check errno.

ORA-09787: slfop: unrecognizable processing option, incorrect format.

Cause: Processing option passed is of incorrect format.

Action: Consult your IUG for permissible formats.

ORA-09788: slfrb: unable to read file.

Cause: Read system call returned an error.

Action: Check errno. Verify file exists.

ORA-09789: slfsk: unable to read file.

Cause: Read system call returned an error.

Action: Check errno. Verify file exists.

ORA-09790: slfcf: unable to close file.

Cause: Close system call returned an error.

Action: Check errno.

ORA-09791: slembdf: translation error, unable to translate error file name.

Cause: Additional information indicates error returned from sltln.

Action: Check additional information.

ORA-09792: slfop: cannot allocate read buffer.

Cause: Malloc system call returned an error. The system might have run out of heap space.

Action: Check additional information for the OS error.

ORA-09793: szguns: length of user name is greater than buffer.

Cause: The length of the name of the user being looked up is longer than size of the buffer provided by the calling routine.

Action: This is an internal error. Contact Oracle Support Services.

ORA-09794: szrbuid: length of role name is greater than buffer.

Cause: The length of the name of the role being looked up is longer than size of the buffer provided by the calling routine.

Action: This is an internal error. Contact Oracle Support Services.

ORA-09795: szrbuid: malloc of role structure failed.

Cause: The allocation of memory for an internal structure used to hold a role descriptor failed.

Action: Check the UNIX error number for a possible operating system failure.

ORA-09796: szrbuid: malloc of role name failed.

Cause: The allocation of memory for an internal buffer used to hold the name of a role failed.

Action: Check the UNIX error number for a possible operating system failure.

ORA-09797: Failed to get O/S MAC privileges.

Cause: The operating system would not allow the retrieval of this process' privileges.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services.

ORA-09798: Label comparison failed.

Cause: The comparison of two binary labels failed.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services.

ORA-09799: File label retrieval failed.

Cause: ORACLE was unable to get a label attached to a file.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services.

ORA-09800: Process sensitivity label retrieval failed.

Cause: ORACLE was unable to get the sensitivity label for a process.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services.

ORA-09801: Unable to get user ID from connection

Cause: ORACLE was unable to retrieve the user's ID number from the SQL*Net connection.

Action: Check the UNIX error number for a possible operating system error. Also check the "additional information" field for the SQL*Net error. If there is no error, contact Oracle Support Services.

ORA-09802: Conversion of binary label to string failed.

Cause: ORACLE was unable to convert a binary label to a string.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services.

ORA-09803: Allocation of string buffer failed.

Cause: a buffer used to hold the name of the file for which a label was to be obtained could not be allocated.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services. The number of bytes that ORACLE attempted to allocate is in the "Additional Information" field.

ORA-09804: Class conversion from binary to ORACLE failed.

Cause: ORACLE was unable to convert a class component from binary format to ORACLE format.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services.

ORA-09805: conversion of category number to string failed.

Cause: ORACLE was unable to translate a category number to its corresponding string representation failed.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services. The category number is contained in the "Additional information" field.

ORA-09806: Allocation of label string buffer failed.

Cause: a temporary buffer used to hold a label could not be allocated.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services. The number of bytes that ORACLE attempted to allocate is in the "Additional Information" field.

ORA-09807: Conversion of label from string to binary failed.

Cause: ORACLE was unable to convert the string representation of a label to binary format.

Action: Re-enter a valid label.

ORA-09808: Could not obtain user clearance.

Cause: ORACLE was unable to get a user's clearance level.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact Oracle Support Services.

ORA-09809: Unable to get user's group ID from connection

Cause: ORACLE was unable to retrieve the user's group ID number from the SQL*Net connection.

Action: Check the UNIX error number for a possible operating system error. Also check the "additional information" field for the SQL*Net error. If there is no error, contact Oracle Support Services.

ORA-09810: Unable to get process ID from connection

Cause: ORACLE was unable to retrieve the user's process ID number from the SQL*Net connection.

Action: Check the UNIX error number for a possible operating system error. Also check the "additional information" field for the SQL*Net error. If there is no error, contact Oracle Support Services.

ORA-09811: Unable to initialize package.

Cause: ORACLE was unable to initialize the library used to obtain security information.

Action: This is an internal error. Contact Oracle Support Services.

ORA-09812: Unable to get user clearance from connection

Cause: ORACLE was unable to retrieve the user's operating system session clearance from the SQL*Net connection.

Action: Check the UNIX error number for a possible operating system error. Also check the "additional information" field for the SQL*Net error. If there is no error, contact Oracle Support Services.

ORA-09813: Unable to get directory status

Cause: ORACLE was unable to determine if a directory is multilevel.

Action: Check the UNIX error number for a possible operating system error. If there is no error, contact Oracle Support Services.

ORA-09814: Unable to expand file name

Cause: ORACLE was unable to expand the name of a file that resides in multilevel directory.

Action: Check the UNIX error number for a possible operating system error. If there is no error, contact Oracle Support Services.

ORA-09815: File name buffer overflow

Cause: The buffer that ORACLE uses to hold the expanded name of a too small.

Action: This is an internal error. Contact Oracle Support Services.

ORA-09816: Unable to set effective privileges

ORA-09817: Write to audit file failed.

Cause: ORACLE was unable to write an entry to the file used as the audit trail.

Action: Check the UNIX error number for a possible operating system error. If there is no error, contact Oracle Support Services.

ORA-09818: Number is too large

Cause: ORACLE was unable to convert a component string to a number because the number is larger than the largest possible value for an integer. The additional information field specifies the maximum.

Action: Correct the string and repeat the conversion.

ORA-09819: Number exceeds maximum legal value

Cause: the number specified for a component was greater than the maximum value allowed for that component.

Action: Change the component to a value less than the maximum and repeat the conversion. The maximum component number is contained in the "Additional information" field.

ORA-09820: Conversion of class string to numeric representation failed.

Cause: ORACLE was unable to convert a class string to a number because all of the characters in the string were not numeric.

Action: Change the string to be either all numbers or all non-numeric characters and repeat the conversion.

ORA-09821: Numeric label is not valid

Cause: A label specified in ORACLE numeric format was found not to be valid.

Action: Re-enter a valid label. Consult your system's encodings for valid numeric component values.

ORA-09822: Translation of audit file name failed.

Cause: Oracle was unable to translate the value of the AUDIT_FILE_DEST initialization parameter.

Action: Check the UNIX error number for a possible operating system error. If there is no error, contact Oracle Support Services.

ORA-09823: device name is too long

Cause: The name of a device was too long to fit into an internal buffer. The additional information field contains the length of the device name.

Action: This is an internal error. Contact Oracle Support Services.

ORA-09824: Unable to enable allowmacaccess privilege.

Cause: ORACLE was not able to turn on allowmacaccess privilege so that it could do a label comparison.

Action: Check the UNIX error number. If it indicates that ORACLE does not have the allowmacaccess privilege, add the allowmacaccess privilege to the potential privilege set of \$ORACLE_HOME/bin/oracle using chpriv (1M). If the executable already has the allowmacaccess privilege, contact Oracle Support Services.

ORA-09825: Unable to disable allowmacaccess privilege.

Cause: ORACLE was not able to turn off the allowmacaccess privilege after doing a label comparison.

Action: This is an internal error. Contact Oracle Support Services.

ORA-09826: SCLIN: cannot initialize atomic latch.

Cause: System call `atomic_op()` return error.

Action: Check additional information in the trace file.

ORA-09827: SCLGT: atomic latch return unknown error.

Cause: System call `atomic_op()` return unexpected error.

Action: Check additional information in the trace file.

ORA-09828: SCLFR: atomic latch return error.

Cause: System call `atomic_op()` return unexpected error.

Action: Check additional information in the trace file.

ORA-09829: pw_createPorts: server call pws_start_instance failed.

Cause: The call `pws_start_instance` to (Oracle helper) failed; system resources might be exhausted.

Action: Make sure the server is still active. Check the error code returned in `sercerrno`, and look for error messages in the server log file.

ORA-09830: snyAddPort: failed to perform a remote procedure call.

Cause: The `msg_rpc` system call returned an error.

Action: Internal error. Contact Oracle support.

ORA-09831: snyStartThread: failed to build the server port set.

Cause: The routine failed to build a port set on which to listen for requests.

Action: Possible operating system failure. Contact Oracle support.

ORA-09832: infoCallback: bad message format.

Cause: The routine received an incorrectly formatted request.

Action: Internal error. Contact Oracle support.

ORA-09833: addCallback: bad message format.

Cause: The routine received an incorrectly formatted request.

Action: Internal error. Contact Oracle support.

ORA-09834: snyGetPortSet: failed to collect info on a port.

Cause: The `port_status` system called failed.

Action: Possible operating system error. Contact Oracle support.

ORA-09835: addCallback: callback port is already in a set.

Cause: The port to be added to the callback list is already in a port set.

Action: Internal error. Contact Oracle support.

ORA-09836: addCallback: could not add a port to the callback set.

Cause: The `port_set_add` system called failed.

Action: Possible operating system error. Contact Oracle support.

ORA-09837: addCallback: could not add allocate a callback link.

Cause: The malloc library call failed to allocate space for a callback link.

Action: Possible operating system error. Contact Oracle support.

ORA-09838: removeCallback: failure removing the callback port.

Cause: The port port_set_remove system call failed.

Action: Possible operating system error. Contact Oracle support.

ORA-09839: removeCallback: callback port is not in the callback set.

Cause: The port to be removed to the callback list is not in the callback port set.

Action: Internal error. Contact Oracle support.

ORA-09840: soacon: Name translation failure.

Cause: sltln() could not translate the named pipe ?/dbs/mon2arch_@.

Action: Make sure that the ORACLE_HOME specified for this ORACLE_SID in oratab is correct.

ORA-09841: soacon: Name translation failure.

Cause: sltln() could not translate the named pipe ?/dbs/arch2mon_@.

Action: Make sure that the ORACLE_HOME specified for this ORACLE_SID in oratab is correct.

ORA-09842: soacon: Archmon unable to create named pipe.

Cause: mknod() failed to create named pipe ?/dbs/mon2arch_@.

Action: Your current OS login may lack write permission for the ORACLE_HOME/dbs directory. Only userids in the dba group of a given instance can run archmon for that ORACLE_SID. Make sure that the ORACLE_HOME directory is correct in oratab.

ORA-09843: soacon: Archmon unable to create named pipe.

Cause: mknod() failed to create named pipe ?/dbs/arch2mon_@.

Action: Your current OS login may lack write permission for the ORACLE_HOME/dbs directory. Only userids in the dba group of a given instance can run archmon for that ORACLE_SID. Make sure that the ORACLE_HOME directory is correct in oratab.

ORA-09844: soacon: Archmon unable to open named pipe.

Cause: open() failed to open named pipe ?/dbs/mon2arch_@.

Action: Only the oracle dba can run archmon. Make sure that your current OS login has owner or group search permission for the ORACLE_HOME/dbs directory. The max number of open files may have been exceeded.

ORA-09845: soacon: Archmon unable to open named pipe.

Cause: open() failed to open named pipe ?/dbs/arch2mon_@.

Action: Only the oracle dba can run archmon. Make sure that your current OS login has owner or group search permission for the ORACLE_HOME/dbs directory. The max number of open files may have been exceeded.

ORA-09846: soacon: ARCH unable to open named pipe.

Cause: open() failed to open named pipe ?/dbs/mon2arch_@.

Action: Make sure that the OS userid of the currently running database has search permission for the ORACLE_HOME/dbs directory. The max number of open files may have been exceeded.

ORA-09847: soacon: ARCH unable to open named pipe.

Cause: open() failed to open named pipe ?/dbs/arch2mon_@.

Action: Make sure that the OS userid of the currently running database has search permission for the ORACLE_HOME/dbs directory. The max number of open files may have been exceeded.

ORA-09848: soawrt: Unable to write to named pipe.**ORA-09849: soarcv: Unable to read from named pipe.****ORA-09850: soacon: Archmon unable to lock named pipe.**

Cause: fcntl() failed to set write lock on named pipe ?/dbs/arch2mon_@.

Action: Make sure that archmon is not already active on another terminal for this ORACLE_SID. Only one archmon session is allowed at a time for a given instance.

ORA-09851: soacon: Archmon unable to lock named pipe.

Cause: fcntl() failed to set read lock on named pipe ?/dbs/mon2arch_@.

Action: Make sure that archmon is not already active on another terminal for this ORACLE_SID. Only one archmon session is allowed at a time for a given instance.

ORA-09853: snyRemovePort: bad return code from request.

Cause: The request to remove a port from the callback set returned a failure code.

Action: Possible operating system error. Contact Oracle support.

ORA-09854: snyPortInfo: bad return code from request.

Cause: The request to collect info on a port in the callback set returned a failure code.

Action: Possible operating system error. Contact Oracle support.

ORA-09855: removeCallback: bad message format.

Cause: The routine received an incorrectly formatted request.

Action: Internal error. Contact Oracle support.

ORA-09856: smpalo: vm_allocate error while allocating pga.

Cause: The vm_allocate system call returned an error.

Action: Check returned error. Possibly out of system resources.

ORA-09857: smprset: vm_protect error while protecting pga.

Cause: The vm_protect system call returned an error.

Action: Internal error. Contact Oracle support.

ORA-09858: sfngat: the input file name is not in the OMF format

Cause: The function sfngat() received a filename which is not an OMF file name.

Action: Further diagnostic information should be in the error stack.

ORA-09859: sfngat: the input file name is not in the autobackup OMF format

Cause: The function sfngat() received a filename which is not an autobackup OMF file name.

Action: Further diagnostic information should be in the error stack.

ORA-09870 to ORA-12100

ORA-09870: spini: failure initializing maximum number of open files.

Cause: ulimit system call returned an error.

Action: Check errno.

ORA-09871: TASDEF_NAME: translation error while expanding ?/dbs/tasdef@.dbf.

Cause: Failure of sltn(?/tasdef@.dbf) while creating test and set pages.

Action: Check additional return error for more information.

ORA-09872: TASDEF_CREATE: create failure in creating ?/dbs/tasdef@.dbf.

Cause: Create() failed when trying to create the tasdef file.

Action: Verify permissions on \$(ORACLE_HOME)/dbs directory.

ORA-09873: TASDEF_OPEN: open error when opening tasdef@.dbf file.

Cause: Unable to open tasdef@.dbf file.

Action: Check errno. Possible permission problem. Verify that tasdef@.dbf file exists.

ORA-09874: TASDEF_READ: read error, unable to read tasdef@.dbf file.

Cause: Read system call returned an error when attempting to read ?/dbs/tasdef@.dbf.

Action: Check errno returned. Sgadf file may be corrupted or incompatible with oracle version.

ORA-09875: TASDEF_WRITE: write error when writing ?/dbs/tasdef@.dbf file.

Cause: Write call failed.

Action: Check errno returned. Possibly out of space on device.

ORA-09876: TASDEF_CLOSE: unable to close ?/dbs/tasdef@.dbf file.

Cause: Close system call returned an error.

Action: Check errno returned. Possible operating system failure.

ORA-09877: sstascre: shmget error, unable to get a shared memory segment.

Cause: Error in shmget.

Action: Check errno returned. Verify that enough shared memory is available on the system.

ORA-09878: sstascre/sstasat: shmat error, unable to attach tas write page

Cause: Error in shmat.

Action: Check errno returned. Verify that enough shared memory is available on the system.

ORA-09879: sstascre/sstasat: shmat error, unable to attach tas read page

Cause: Error in shmat.

Action: Check errno returned. Verify that enough shared memory is available on the system.

ORA-09880: sstasfre/sstasdel: shmdt error, unable to detach tas write page

Cause: Error in shmdt.

Action: Check errno returned.

ORA-09881: sstasfre/sstasdel: shmdt error, unable to detach tas read page

Cause: Error in shmdt.

Action: Check errno returned.

ORA-09882: sstasfre/sstasdel: shmctl error, unable to remove tas shm page

Cause: Error in shmctl.

Action: Check errno returned.

ORA-09883: Two Task interface: oratab file does not exist

Cause: The oratab file does not exist.

Action: Install oracle before you use it or recreate the oratab file.

ORA-09884: Two Task interface: SID doesn't match current PU

Cause: You are trying to start oracle on another PU than you configured oracle on or there is no entry for this SID in oratab file.

Action: Start oracle with this SID on its designated PU (see oratab file). Or install the new database with SID.

ORA-09885: osnTXtt: cannot create TXIPC channel

Cause: The TXIPC driver failed to create pipes for two-task communications with the oracle shadow process.

Action: You have probably exceeded the maximum number of open file descriptors per user or the system file table is full. Note the operating system error code and contact your system administrator.

ORA-09886: osnTXtt: translation error while expanding txipc@.trc.

Cause: Failure of sltln(txipc@.trc) while creating debug channel.

Action: Check additional return error for more information.

ORA-09887: osnTXtt: Failed to create/open debug channel.**ORA-09888: osnTXtt: txipc channel creation failed**

Cause: The txipc driver failed to create channels for two-task communications with the oracle shadow process.

Action: You have probably exceeded the maximum number of open file descriptors per user or the system file table operating system error code and contact your system administrator.

ORA-09889: osnTXtt: access error on oracle executable

Cause: The txipc driver could not access the oracle executable.

Action: Check the permissions on the ORACLE executable and each component of the ORACLE_HOME/bin path.

ORA-09890: osnTXtt: malloc failed

Cause: The txipx driver failed to allocate enough heap space for its context area buffers.

Action: Contact your customer support representative.

ORA-09908: slkmnm: gethostname returned error code.

Cause: The system call gethostname returned an error.

Action: This is most likely an internal error. Make sure gethostname is successful in other contexts, and if so contact Oracle support.

ORA-09909: Malloc of scratch buffer failed.

Cause: Memory needed for a temporary buffer could not be allocated. The additional information field contains the number of bytes that ORACLE attempted to allocate.

Action: Check the UNIX error number. It is probable that the system has run out of memory. If there is no error, contact ORACLE support.

ORA-09910: Unable to find ORACLE password file entry for user.

Cause: No entry exists for the user in the ORACLE password file.

Action: Have the database administrator install a password entry by running orapasswd.

ORA-09911: Incorrect user password.

Cause: The password entered by the user was incorrect.

Action: Enter the correct password.

ORA-09912: Malloc of name buffer(s) failed.

Cause: ORACLE was unable to allocate memory for one or both of the buffers that are used to hold the name of DBA and the operator users.

Action: Check the UNIX error number. It is probable that the system has run out of memory. If there is no error, contact ORACLE support.

ORA-09913: Malloc of dummy name failed.

Cause: ORACLE was unable to allocate memory for the user name that is to be used in the encryption of the user's password.

Action: Check the UNIX error number. It is probable that the system has run out of memory. If there is no error, contact ORACLE support.

ORA-09914: Unable to open the ORACLE password file.

Cause: ORACLE could not open the password file for reading.

Action: Check the UNIX error number. If the error number indicates that the file does not exist, have the database administrator create the file by running orapasswd. If the

error number indicates insufficient permissions, ask the database administrator to change the permissions. Otherwise, contact ORACLE customer support.

ORA-09915: Password encryption failed.

Cause: ORACLE was unable to encrypt a password.

Action: This is an internal error - contact ORACLE customer support.

ORA-09916: Required password was not specified.

Cause: A user attempted to connect as "internal," but did not specify a password.

Action: Connect as internal again and specify a password.

ORA-09918: Unable to get user privileges from SQL*Net

Cause: ORACLE was unable to retrieve the user's privilege set from the SQL*Net connection.

Action: Check the UNIX error number for a possible operating system error. Also check the "additional information" field for the SQL*Net error. If there is no error, contact ORACLE support.

ORA-09919: Unable to set label of dedicated server

Cause: ORACLE was unable to set the label of the dedicated to server to the required value.

Action: Check the UNIX error number for a possible operating system error. Also, check the privileges on the oracle executable. It should have at least "allowmacaccess" privilege.

ORA-09920: Unable to get sensitivity label from connection

Cause: ORACLE was unable to retrieve the user's sensitivity label from the SQL*Net connection.

Action: Check the UNIX error number for a possible operating system error. Also check the "additional information" field for the SQL*Net error. If there is no error, contact ORACLE support.

ORA-09921: Unable to get information label from connection

Cause: ORACLE was unable to retrieve the user's information label from the SQL*Net connection.

Action: Check the UNIX error number for a possible operating system error. Also check the "additional information" field for the SQL*Net error. If there is no error, contact ORACLE support.

ORA-09922: Can't spawn process - background log directory not created properly

Cause: ORACLE was unable to spawn a background process because the directory that will hold trace files of the background processes was not created properly.

Action: Examine the directory pointed to by the initialization parameter "background_dump_dest". Make sure that all of the following is true: 1. The directory exists. 2. The name indeed points to a directory, and is not a file. 3. The directory is accessible and writable to the ORACLE user.

ORA-09923: Can't spawn process - user log directory not created properly

Cause: ORACLE was unable to spawn a background process because the directory that holds the trace files of the dedicated server processes was not created properly.

Action: Examine the directory pointed to by the initialization parameter "user_dump_dest". Make sure that all of the following is true: 1. The directory exists. 2. The name indeed points to a directory, and is not a file. 3. The directory is accessible and writable to the ORACLE user.

ORA-09924: Can't spawn process - core dump directory not created properly

Cause: ORACLE was unable to spawn a background process because the directory that holds the core dumps produced by ORACLE processes in the event of exceptions was not created properly.

Action: Examine the directory pointed to by the initialization parameter "core_dump_dest". Make sure that all of the following is true: 1. The directory exists. 2. The name indeed points to a directory, and is not a file. 3. The directory is accessible and writable to the ORACLE user.

ORA-09925: Unable to create audit trail file

Cause: ORACLE was not able to create the file being used to hold audit trail records.

Action: Check the UNIX error number for a possible operating system error. If there is no error, contact ORACLE customer support.

ORA-09926: Unable to set effective privilege set of the server

Cause: A dedicated server was unable to set its own privilege set.

Action: Check the privileges granted to the ORACLE executable. It must have at least "allowmacaccess" privilege.

ORA-09927: Unable to set label of server

Cause: ORACLE was not able to set the label of a server to a new value.

Action: Check the privileges on \$ORACLE_HOME/bin/oracle. Make sure that it has "allowmacaccess" privilege.

ORA-09928: Unable to restore the label of server

Cause: ORACLE was unable to restore the label of the server to the value that it had before raising it to database high.

Action: This is an internal error - contact ORACLE support.

ORA-09929: GLB of two labels is invalid

Cause: The result of a greatest lower bound operation on two labels was not valid.

Action: Repeat the operation with two different labels. Consult the system encoding file for the values of valid labels.

ORA-09930: LUB of two labels is invalid

Cause: The result of a least upper bound operation on two labels was not valid.

Action: Repeat the operation with two different labels. Consult the system encoding file for the values of valid labels.

ORA-09931: Unable to open ORACLE password file for reading

Cause: An attempt to open a password file for reading failed.

Action: Make sure that the permissions on the file have not been changed so that the ORACLE user cannot open it.

ORA-09932: Close of ORACLE password file failed.

Cause: An attempt to close a password file failed.

Action: Check the UNIX error number for the specific reason.

ORA-09933: Deletion of old password file failed.

Cause: The removal of the old password file failed.

Action: Check the UNIX error number for the specific reason.

ORA-09934: Link of current password file to old failed.

Cause: ORACLE was unable to create a link so that the old password file could be saved.

Action: Check the UNIX error number for the specific reason.

ORA-09935: Unlink of current password file failed.

Cause: ORACLE was unable to complete the saving of the current password file.

Action: Check the UNIX error number for the specific reason.

ORA-09936: Open of ORACLE password file for write failed.

Cause: ORACLE was unable to create a password file.

Action: Check the UNIX error number for the specific reason.

ORA-09937: Chmod of ORACLE password file failed.

Cause: ORACLE was unable to change a password file to be readonly.

Action: Check the UNIX error number for the specific reason.

ORA-09938: Save of signal handlers failed.

Cause: ORACLE was unable to save the previous values of selected signal handlers.

Action: This is an internal error. Contact ORACLE support.

ORA-09939: Restoration of signal handlers failed.

Cause: ORACLE was unable to restore the previous values of selected signal handlers.

Action: This is an internal error. Contact ORACLE support.

ORA-09940: ORACLE password file header is corrupt

Cause: The header of one of the password files was not in the format that ORACLE expected.

Action: Check the headers of both files. The header should be in the format "FILE VERSION: N.N.N.N.N EXECUTABLE VERSION: N.N.N.N.N" where N is a number. Remove the corrupt file(s) and re-run "orapasswd".

ORA-09941: Version of orapasswd or installer is older than file.

Cause: The version of orapasswd or installer that is being run is older than that of the ORACLE password file. Since the file version is only changed when the format is changed, this error means that the executable is using a different format than that with which the file was created.

Action: Run a version of the installer or orapasswd whose version is the same or later than that of the file.

ORA-09942: Write of ORACLE password file header failed.

Cause: The attempt to write out the header of the ORACLE password file failed.

Action: Check the operating system error number. It is possible that the file system became full.

ORA-09943: Allocation of memory for password list component failed.

Cause: When it is building a list of password file entries, ORACLE allocates memory for various components. One of the allocations failed.

Action: Check the operating system error number. The system has probably run out of memory.

ORA-09944: Password entry is corrupt.

Cause: An entry in an ORACLE password file was not in the format that ORACLE expected.

Action: Removed the corrupt file(s) and re-run "orapasswd."

ORA-09945: Unable to initialize the audit trail file

Cause: ORACLE unable to write header information to the file being used as the audit trail.

Action: Check the UNIX error number for a possible operating system error. If there is no error, contact ORACLE customer support.

ORA-09946: File name too long for buffer

Cause: The buffer that was to be used to hold a file name was determined to be too short for the generated name. This will happen if the translated name for either a trace file or an audit file is longer than the maximum allowed, which on many ports is 256 characters.

Action: Use a shorter file name.

ORA-09947: Unable to allocate connection attributes structure

Cause: ORACLE was not able to allocate the memory needed to hold the attributes of the SQL*Net connection. The "Additional Information" field holds the number of bytes that ORACLE attempted to allocate.

Action: Check the UNIX error number. It is probable that the system has run out of memory. If there is no error, contact ORACLE customer support.

ORA-09948: Process information label retrieval failed.

Cause: ORACLE was unable to get the information label for a process.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact ORACLE support.

ORA-09949: Unable to get client operating system privileges

Cause: ORACLE was unable to get the operating system privileges for the client process.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact ORACLE support.

ORA-09950: Unable to get server operating system privileges

Cause: ORACLE was unable to get its privileges from the operating system.

Action: This is an error that should never happen. Contact ORACLE customer support.

ORA-09951: Unable to create file

Cause: ORACLE was unable to create a file.

Action: Check the UNIX error number for a possible operating system failure. If there is no error, contact ORACLE support.

ORA-09952: scgcmn: lk_open_convert unexpected return: open failed

Cause: The distributed lock manager returned an unexpected value

Action: Check for system error message and refer to the distributed lock manager documentation or contact your customer support representative.

ORA-09953: scggc: unexpected return of a lock convert

Cause: The distributed lock manager returned an unexpected value

Action: Check for lock manager error message and refer to DLM documentation refer to the distributed lock manager documentation or contact your customer support representative.

ORA-09954: scgcc: unexpected return status to callback of lock close

Cause: The distributed lock manager returned an unexpected value

Action: Check for lock manager error message and refer to DLM documentation refer to the distributed lock manager documentation or contact your customer support representative.

ORA-09955: scgcan: unexpected return status when canceling a lock

Cause: DLM system service x returned an unexpected value

Action: Check for system error message and refer to DLM documentation refer to the distributed lock manager documentation or contact your customer support representative.

ORA-09956: scgcm: unexpected lock status condition

Cause: A global locking system service returned an unexpected value.

Action: Check for system error message (if any) and refer to refer to the distributed lock manager documentation or contact your customer support representative.

ORA-09957: Unable to send termination request to IMON

Cause: The attempt to send a termination signal to IMON failed.

Action: This is an internal error, contact ORACLE support.

ORA-09958: IMON: two processes with the same ORACLE pid are active

Cause: The IMON process was unable to add an entry for a server process because another active process occupies the slot.

Action: This is an internal error, contact ORACLE support.

ORA-09959: IMON: deletion of a process failed.

Cause: The IMON process was unable to delete a server process from its process ID array because no entry for the process could be found.

Action: This is an internal error, contact ORACLE support.

ORA-09960: Unable to establish signal handler for termination signal

Cause: ORACLE was unable to set up a handler for the signal used to notify it that the instance was shutting down.

Action: This is an internal error, contact ORACLE support.

ORA-09961: Unable to restore termination signal handler

Cause: ORACLE failed to set the handler for the termination signal to its previous value.

Action: This is an internal error, contact ORACLE support.

ORA-09962: lk_group_create error in scggrc**ORA-09963: lk_group_attach error in scggra****ORA-09964: lk_group_detach error in scggrd****ORA-09966: failure in translation while expanding ?/dbs/lk for lock file**

Cause: Oracle failed to translate ?/dbs/lk, when creating a file name for the database mount lock or the instance startup/shutdown lock.

Action: Check additional return errors for more information.

ORA-09967: unable to create or open lock file

Cause: Oracle failed, when making an open system call, inorder to acquire a file lock used by the database mount lock or the instance startup/shutdown lock.

Action: Check errno for more information.

ORA-09968: unable to lock file

Cause: The system call for locking a file returned an error when trying to acquire a database mount lock or the instance startup/shutdown lock.

Action: Check errno for more information.

ORA-09969: unable to close or remove lock file

Cause: The close system call or unlink system call returned an error.

Action: Check errno for more information.

ORA-09974: skxfidini: Error Initializing SDI Channel

Cause: The process was unable to initialize the SDI channel properly.

Action: Correct the operating system error and retry the operation.

ORA-09975: kxfspini: Error Initializing SDI Process

Cause: The process was unable to attach to the SDI channel.

Action: Verify that the SDI process specific limits correctly configured. Correct the operating system error and retry the operation.

ORA-09976: skxfqdini: Error Creating Port

Cause: The process was unable to create a communications endpoint.

Action: Verify that the SDI port specific limits correctly configured. Correct the operating system error and retry the operation.

ORA-09977: skxfqhini: Error Connecting

Cause: The process was unable to connect to another endpoint.

Action: Verify that the SDI port specific limits correctly configured. Check that the other node(s) is part of the cluster and operating properly. Correct the operating system error and retry the operation.

ORA-09978: skxfqhdel: Error Disconnecting from another endpoint.

Cause: The process was unable to disconnect cleanly from another endpoint.

Action: Check that the other node(s) are part of the cluster and operating properly. Check the instance and processes on the other node(s). Correct the operating system error and retry the operation.

ORA-09979: skxfqhsnd: Error Sending a message to another endpoint

Cause: The process was unable to send a message to an existing endpoint.

Action: Check that the other node(s) are part of the cluster and operating properly. Check the instance and processes on the other node(s). Correct the operating system error and retry the operation.

ORA-09980: skxfqdrcv: Error Receiving a message from another endpoint

Cause: The process encountered an error while trying to receive a message.

Action: Check that the other node(s) are part of the cluster and operating properly. Check the instance and processes on the other node(s). Correct the operating system error and retry the operation.

ORA-09981: skxfqdreg: Error Adding a page to the SDI buffer pool

Cause: The process was unable to add a page to the SDI buffer pool.

Action: Correct the operating system error and retry the operation.

ORA-09982: skxfqddrg: Error Removing a page from the SDI buffer pool

Cause: The process was unable to remove a page to the SDI buffer pool.

Action: Correct the operating system error and retry the operation.

ORA-09983: skxfidsht: Error shutting down SDI channel

Cause: The process was unable shut down the SDI channel

Action: Check the SDI persistent resources using SDI tools. Verify that all processes exited cleanly and the instance is safely shut down. Delete any remaining SDI channel IDs associated with the current instance.

ORA-09984: SGA file \$ORACLE_HOME/dbs/sgade\$ORACLE_SID.dbf does not exist

Cause: file does not exist or is not accessible

Action: Restart the instance to create the SGA definition file.

ORA-09985: SGA definition file could not be read

Cause: UNIX read() operation failed

Action: check errno and take appropriate action.

ORA-09986: wrong number of bytes read from SGA definition file

Cause: Struct skgmsdef size differs from no. of bytes read from SGA file

Action: Compare the two struct definitions and ensure that they are identical in size and structure.

ORA-09987: unable to attach to SGA in READ-ONLY mode

Cause: The instance is not up, or SGA segments are not read-accessible

Action: Verify that the instance is up and read permissions for the SGA segments are set.

ORA-09988: error while detaching SGA

Cause: skgmsdef struct is corrupted and/or segment addresses are modified

Action: Safely shut down instance and mount SGA segments again.

ORA-09989: attempt to use invalid skgmsdef struct pointer

Cause: Pointer to skgmsdef struct used without validating it

Action: Assign a valid address to the skgmsdef struct pointer before using it.

ORA-10226: trace CR applications of undo for data operations

ORA-10227: verify (multi-piece) row structure

ORA-10228: trace application of redo by kcochk

ORA-10229: simulate I/O error against datafiles

ORA-10230: KSFD block repair test event

ORA-10231: skip corrupted blocks on _table_scans_

ORA-10232: dump corrupted blocks symbolically when kcbgotten

ORA-10233: skip corrupted blocks on index operations

ORA-10234: trigger event after calling kcrapc to do redo N times

ORA-10235: check memory manager internal structures

ORA-10236: dump redo on object no. or block type mismatch errors 1410/8103

ORA-10237: simulate ^C (for testing purposes)

ORA-10238: instantiation manager

ORA-10239: multi-instance library cache manager

ORA-10240: dump dba's of blocks that we wait for

ORA-10241: remote SQL execution tracing/validation

ORA-10242: suppress OER 2063 (for testing distrib w/o different error log)

ORA-10243: simulated error for test <varname>string</varname> of K2GTAB latch cleanup
Cause: levels 1..6 for insert, 7..11 for delete

Action: n/a

ORA-10244: make tranids in error msgs print as 0.0.0 (for testing)
Cause: also makes "alter system enable distributed recovery" synchronous

Action: n/a

ORA-10245: Testing event used by server I/O ksfd/ksfq module

ORA-10246: print trace of PMON actions to trace file

ORA-10247: Turn on scgcmn tracing. (VMS ONLY)

ORA-10248: turn on tracing for dispatchers

ORA-10249: turn on tracing for multi-stated servers

ORA-10250: Trace all allocate and free calls to the topmost SGA heap

ORA-10251: check consistency of transaction table and undo block

ORA-10252: shared IO pool error simulation

ORA-10253: limit SQL text returned from X\$KGLNA[1]

ORA-10254: trace cross-instance calls

ORA-10255: pl/sql parse checking

ORA-10256: shared server debug event

ORA-10257: trace shared server load balancing

ORA-10258: force shared servers to be chosen round-robin

ORA-10259: get error message text from remote using explicit call
Cause: for npigem coverage testing (normally called only for V5 remote)

Action: n/a

ORA-10260: limit size (<varname>string</varname>) of the PGA heap set by event 10261 exceeded

Cause: The PGA memory use exceeded the limit set by the event 10261.

Action: Check event 10261 settings.

ORA-10261: limit the size of the PGA heap

Cause: The limit was one kilobyte times the level of the event. If the PGA grows bigger than this, signal an external error.

Action: n/a

ORA-10262: Don't check for memory leaks

Cause: Setting this event to level one causes memory leak checking to be disabled. Setting this event to any other non-zero number allows that number to be used as a threshold value when checking for memory leaks in the PGA, SGA, and UGA heaps.

Action: n/a

ORA-10263: Don't free empty PGA heap extents

Cause: This is useful for debugging since watchpoints are lost on free

Action: n/a

ORA-10265: Keep random system generated output out of error messages

Cause: so test system files don't diff

Action: n/a

ORA-10266: Trace OSD stack usage

Cause: Porters should implement this to help them debug their stack implementations. It should be used in at least smcstk().

Action: n/a

ORA-10267: Inhibit KSEDMP for testing

Cause: Some tests may generate internal or fatal errors on purpose.

Action: LEVEL used by KSEDMP is one less than level of this event.

ORA-10268: Don't do forward coalesce when deleting extents

Cause: setting this event keeps kts from coalescing forward at each extent when dropping a temp segment.

Action: n/a

ORA-10269: Don't do coalesces of free space in SMON

Cause: setting this event prevents SMON from doing free space coalesces

Action: n/a

ORA-10270: Debug shared cursors

Cause: Enables debugging code in shared cursor management modules

Action: n/a

ORA-10271: distributed transaction after COLLECT**ORA-10272: distributed transaction before PREPARE****ORA-10273: distributed transaction after PREPARE****ORA-10274: distributed transaction before COMMIT****ORA-10275: distributed transaction after COMMIT****ORA-10276: distributed transaction before FORGET****ORA-10277: Cursor sharing (or not) related event (used for testing)****ORA-10278: Internal testing****ORA-10279: Simulate block corruption in kdb4chk****ORA-10280: Internal testing - segmentation fault during crash recovery****ORA-10281: maximum time to wait for process creation**

Cause: used to override the default SPMXWAIT, level = timeout in sec.

Action: n/a

ORA-10282: Inhibit signalling of other backgrounds when one dies

Cause: Used in KSB

Action: n/a

ORA-10284: simulate zero/infinite asynch I/O buffering

Cause: Used in KCF, level=1 out of space (red), level=2 infinite (green)

Action: n/a

ORA-10285: Simulate control file header corruption**ORA-10286: Simulate control file open error****ORA-10287: Simulate archiver error****ORA-10288: Do not check block type in ktrget**

ORA-10289: Do block dumps to trace file in hex rather than formatted

ORA-10290: Internal sequence tracing event

ORA-10429: enable tracing of global enqueue service IPC calls

ORA-10430: enable ges/gcs dynamic remastering event trace

ORA-10431: enable verification messages on pi consistency

ORA-10432: enable tracing of global cache service fusion calls

ORA-10433: global enqueue service testing event

ORA-10434: enable tracing of global enqueue service multiple LMS

ORA-10435: enable tracing of global enqueue service deadlock detection

ORA-10436: enable global cache service duplicate ping checking

ORA-10437: enable trace of global enqueue service S optimized resources

ORA-10438: force lowest node to be master of all gcs resources

ORA-10439: enable tracing of global cache service fusion calls - part 2

ORA-10440: enable global enqueue service inquire resource modes trace

ORA-10441: enable diagnosability daemon (DIAG) trace

ORA-10442: enable trace of kst for ORA-01555 diagnostics

ORA-10443: reserved for data layer diagnostics and debugging

ORA-10444: enable DLM timeout testing

ORA-10445: enable tracing of LMS priority management

ORA-10446: reserved for data layer diagnostics and debugging

ORA-10447: reserved for data layer diagnostics and debugging

ORA-10448: reserved for data layer diagnostics and debugging

ORA-10449: enable trace of kst for undo manageability features diagnostics

ORA-10450: signal ctrl-c in kdddca (drop column) after n rows

ORA-10451: Force heap segment compression bypassing compatibility checks

ORA-10452: Cannot do block media recovery; media recovery session may be in progress

Cause: A media recovery, RMAN, or flashback database session may have been in progress when an attempt was made to perform block media recovery on the standby database.

Action: Check for and cancel any conflicting recovery session and perform block media recovery on the standby database.

ORA-10453: Dump compression statistics to trace file**ORA-10454: Disable column reordering during compression****ORA-10455: Do Compression Block Checking****ORA-10456: cannot open standby database; media recovery session may be in progress**

Cause: A media recovery, RMAN, or flashback database session may have been in progress on a mounted instance of a standby database when an attempt was made to open the standby database.

Action: Check for and cancel any conflicting recovery session and open the standby database.

ORA-10457: cannot close standby database due to active media recovery

Cause: A media recovery session was in progress on a standby database when an attempt was made to close the standby database.

Action: Cancel the media recovery session and close the standby database.

ORA-10458: standby database requires recovery

Cause: A standby database was in a state requiring media recovery when an attempt was made to open the standby database.

Action: Perform the necessary recovery and open the standby database.

ORA-10459: cannot start media recovery on standby database; conflicting state detected

Cause: An attempt was made to perform media recovery on a standby database while another instance was performing recovery on the standby database, had the standby database open, or a data file move operation was in progress.

Action: Close the standby on all other instances, cancel any conflicting recovery session or data file move operation, and perform manual recovery.

ORA-10460: Perform backward tablescans for consistent read reduction**ORA-10461: Simulate control file corruption during write operation****ORA-10462: enable recovery debug module****ORA-10463: enable controlfile test****ORA-10464: enable incremental checkpoint debug for split brain check****ORA-10465: force slave death during parallel crash recovery**

ORA-10466: enable HARD check for block write

ORA-10467: amplify control file record expansion for testing

ORA-10468: log writer debug module

ORA-10469: error creating control file backup, no checkpoint
