CLSCH-03686: failed to retrieve server pool {0} configuration for the database {1}

Cause: An attempt to retrieve Oracle Cluster Health Analysis Service configuration for the specified database on the server pool failed.

Action: Examine the accompanying error messages for details.

CLSCH-03687: failed to retrieve Oracle Cluster Health Analysis Service configuration for the specified database {0}

Cause: An attempt to retrieve Oracle Cluster Health Analysis Service configuration for the specified database failed.

Action: Examine the accompanying error messages for details.

CLSCH-03688: failed to retrieve Oracle Cluster Health Analysis Service configuration for the specified server pool {0}

Cause: An attempt to retrieve Oracle Cluster Health Analysis Service configuration details for the specified serverpool failed.

Action: Examine the accompanying error messages for details.

CLSCH-03689: failed to retrieve the cluster configuration for Oracle Cluster Health Analysis Service

Cause: An attempt to retrieve the cluster configuration for Oracle Cluster Health Analysis Service failed.

Action: Examine the accompanying error messages for details.

CLSCH-03690: A SQL error occurred while retrieving information from Grid Infrastructure Management Repository.

Cause: An SQL error occurred while connecting to or reading from Grid Infrastructure Management Repository.

Action: Examine the accompanying error messages for details.

CLSCH-03704: no model found

Cause: An attempt to query models failed because no models existed in the database. This is an internal error.

Action: Contact Oracle Support Services.

CLSCH-03708: invalid attempt to remove or rename a base model

Cause: An attempt to remove or rename a base model was rejected.

Action: Reconsider the need for the request, or specify a model that is not a base model.

CLSCH-03709: successfully dumped the CHA statistics to location "{0}"

Cause: Status message.

Action: None

CLSCH-03710: conflicting start and end times for dump

Cause: The specified end date and time for a CHA dump was not later than the start date and time.

Action: Specify a dump end date and time later than the start date and time.

CLSCH-03711: No data exists between start time {0} and end time {1}.

Cause: A query calibration command specified a time range in which no data existed in the database.

Action: Specify a time range with existing data.

CLSCH-03712: 'dataset' {0} not found

Cause: A query calibration command specified an unknown 'dataset' name.

Action: Specify a known 'dataset' name.

CLSCH-03713: invalid command line syntax at '{0}'

Cause: The syntax of the command was incorrect.

Action: Examine the usage provided for this command and retry using correct syntax.

CLSCH-03714: Start time {0} is not earlier than end time {1}.

Cause: Specified end time was earlier than the start time.

Action: Retry, specifying an end time that is later than the start time.

CLSCH-03715: No monitored data exists in the database.

Cause: A query calibration command was executed when there was no monitored data in the database.

Action: Monitor the target for some time and then retry the command.

CLSCH-03716: Specified time is smaller than the allowed minimum {0} hours.

Cause: An attempt to modify the retention time for targets failed because the specified time was smaller than the allowed minimum retention time.

Action: Retry, specifying a retention time that is greater than or equal to the minimum retention time.

CLSCH-03717: max retention successfully set to {0} hours

Cause: Status message.

Action: None

CLSCH-03718: repository successfully resized for {0} targets

Cause: Status message.

Action: None

CLSCH-03719: The specified KPI {0} is not supported for clusters.

Cause: An attempt to run the command 'chactl query calibration' or 'chactl calibrate' was rejected because the specified Key Performance Indicator (KPI) was not supported for clusters.

Action: Consult the product documentation for a list of supported KPIs. Retry the command using a supported KPI.

CLSCH-03720: The specified KPI {0} is not supported for databases.

Cause: An attempt to run the command 'chactl query calibration' or 'chactl calibrate' was rejected because the specified Key Performance Indicator (KPI) was not supported for databases.

Action: Consult the product documentation for a list of supported KPIs. Retry the command using a supported KPI.

CLSCH-03721: Path to specified file is invalid.

Cause: An attempt to execute the 'chactl' command was rejected because the path specified in the command was invalid.

Action: Retry, specifying a valid path.

CLSCH-03722: Specified file already exists.

Cause: An attempt to execute the 'chactl' command was rejected because the file already existed.

Action: Retry the command specifying a path name that does not correspond to an existing file.

CLSCH-03723: Could not read or write to the specified file.

Cause: An attempt to execute the 'chactl' command was rejected because an I/O error occurred. The accompanying messages provide detailed failure information.

Action: Examine the accompanying error messages for details and retry after fixing the issues reported.

CLSCH-03724: The specified model was calibrated on a different OS

Cause: An attempt to import the specified model was rejected because it was calibrated on a different OS.

Action: Calibrate the model on the same OS as is running in the cluster to which the model will be imported, and then retry the import operation.

CLSCH-03725: The database version is not supported for monitoring.

Cause: An attempt to start monitoring a database was rejected because the database version was not supported for monitoring.

Action: Consult the product documentation for supported database versions.

CLSCH-03726: Unable to resize the repository for the specified number of entities. An additional {0} GB of free space is required.

Cause: An attempt to execute the command 'chactl resize repository' was rejected because there was not sufficient space in the diskgroup hosting the Grid Infrastructure Management Repository (GIMR).

Action: Retry the command after adding storage to disk group hosting the GIMR.

CLSCH-03727: Unable to shrink the repository because the datafile contains data beyond the requested resize value.

Cause: An attempt to run the command 'chactl resize repository' was rejected because the datafile contained data beyond the requested resize value.

Action: Retry the command with -force option. All the monitoring data will be deleted.

CLSCH-03728: The number of data samples may not be sufficient for calibration.

Cause: An attempt to run 'chactl query calibration' detected that the number of samples in the specified time intervals may not be sufficient for calibration.

Action: Retry the command specifying longer time intervals.

CLSCH-03729: The number of data samples {0} is below the required number of data samples {1}.

Cause: An attempt to calibrate the model was rejected because the number of samples in the specified time intervals was not sufficient for calibration.

Action: Retry the command specifying longer time intervals.

CLSCH-03730: not enough space for the model in the tablespace

Cause: An attempt to create a model was rejected because there was not enough space in the tablespace.

Action: Remove a model using the command 'chactl remove model', and then retry the operation.

CLSCH-03731: Another calibration session is running.

Cause: An attempt to calibrate the model was rejected because there was another calibration session already running.

Action: Retry the command after the other calibration has completed.

CLSCH-03732: Specified file format is not supported.

Cause: An attempt to export the repository was rejected because the specified file format was not supported.

Action: The list of supported file formats can be found by running the command 'chactl export -help'. Retry the command specifying a supported file format.

CLSCH-03733: export file already exist at location {0}

Cause: An attempt to export the repository was rejected because an export file already exists at the specified location.

Action: Retry the command after deleting all the export files from the directory.

CLSCH-03734: Another export session is running.

Cause: An attempt to export the repository was rejected because there was another export session already running.

Action: Retry the command after the other export has completed.

CLSCH-03735: successfully exported the CHA schema to location "{0}"

Cause: Status message.

Action: None

CLSCH-03736: Specified time is larger than the allowed maximum {0} hours.

Cause: An attempt to modify the retention time for targets was rejected because the specified time was larger than the indicated maximum allowed retention time.

Action: Retry, specifying a retention time that is less than or equal to the maximum retention time.

CLSCH-03737: Warning: Based on the available table space and the number of entities monitored, the available retention time is limited to {0} hrs.

Cause: A status inquiry caused a recalculation of the available retention time based on the number of monitored entities and the available table space that resulted in the indicated time, which is less than the initially specified retention time.

Action: To have the available retention time conform to the desired retention time, increase the tablespace size using 'chactl resize repository' or reduce the number of monitored entities or revise the goal for retention time using 'chactl set maxretention'.

CLSCH-03738: Specified number of entities to be monitored is less than the allowed minimum {0}.

Cause: An attempt to resize the repository failed because the specified number of entities to be monitored was not at least the allowed minimum number.

Action: Retry, specifying a number of entities to be monitored that is greater than or equal to the minimum number of entities.

CLSCH-03739: Specified number of entities to be monitored is greater than the allowed maximum {0}.

Cause: An attempt to resize the repository failed because the specified number of entities to be monitored was not less than the allowed maximum number of entities.

Action: Retry, specifying a number of entities to be monitored that is less than or equal to the maximum number of entities.

CLSCH-03740: Required space {0}GB is available.

Cause: Status message.

Action: None

CLSCH-03741: Required space {0}GB is not available. An additional {1}GB of free space would be required.

Cause: Status message.

Action: None

CLSCH-03743: not enough space in the repository to retain {0} hours of data

Cause: An attempt to monitor the target was rejected because there was not enough space in the repository to monitor the target with the minimum retention time.

Action: Increase the repository size by using the command 'chactl resize repository', or stop monitoring other targets, and then retry the operation.

CLSCH-03744: Warning: The current retention time is below the max retention time.

Cause: The current retention time is below the specified maximum retention time because there is not enough space in the repository.

Action: To increase the retention time, increase the repository size using the command 'chactl resize repository', or stop monitoring some targets.

CLSCH-03745: Monitoring data generated by model {0} still exists.

Cause: An attempt to rename a model was rejected because monitoring data generated by the indicated model still existed although the model no longer existed.

Action: Specify a different model name.

CLSCH-03746: Export command must be executed on node {0} where the GIMR database is running.

Cause: An attempt to export the repository was rejected because the Grid Infrastructure Management Repository (GIMR) database was not running on the node where the command was issued.

Action: Retry the command on the indicated node. If this is a member cluster, use -membercluster option.

CLSCH-03747: Option -membercluster is permitted only on the Domain Services Cluster.

Cause: Option -membercluster was specified on a cluster which was not a Domain Services Cluster.

Action: Retry the command on the Domain Services Cluster or without -membercluster option.

CLSCH-03748: Cluster '{0}' does not exist in the cluster domain.

Cause: The specified cluster did not exist in the cluster domain.

Action: Specify a cluster name that exists.

CLSCH-03749: failed to connect to Grid Infrastructure Management Repository

Cause: An authentication error occurred while connecting to Grid Infrastructure Management Repository.

Action: Ensure that the user running chactl is also the owner of the Cluster Ready Services (CRS) home.

CLSCH-03750: successfully exported the CHA schema to location "{0}" on the node where the Grid Infrastructure Management Repository database is running

Cause: Status message.

Action: None

CLSCH-03751: The specified input file is invalid.

Cause: chactl command was rejected because the input file was invalid. The file was either corrupted, or in an invalid format.

Action: Replace the file with a valid input file and reissue the command.

CLSCH-03752: The command is not supported without GIMR.

Cause: The Grid Infrastructure Management Repository (GIMR) was not configured. The specified command requires GIMR to be configured.

Action: Retry the command after configuring the GIMR.

CLSCH-03753: Option {0} is not supported without GIMR.

Cause: The Grid Infrastructure Management Repository (GIMR) was not configured. The specified option requires GIMR to be configured.

Action: Retry the command without the specified option.

CLSCH-03754: The specified command is not supported on the Domain Services Cluster.

Cause: The specified command was not supported on the Oracle Domain Services Cluster.

Action: None

CLSCH-03755: The specified user is not a member of the {0} Oracle group.

Cause: The CHACTL command was rejected because either the input user was invalid or was not a member of the Oracle group.

Action: Reissue the command with a valid user name.

CLSCH-03756: Restart Oracle Cluster Health Analysis Service (OCHAD) using the 'srvctl stop cha' command followed by the 'srvctl start cha' command for the change to take effect.

Cause: None

Action: None

CLSCH-03757: Failed to start monitoring , because the model {0} which is configured to be used for the target no longer exists. Please resubmit the command using -model option.

Cause: The CHACTL monitor command was rejected because the configured model for target database/host was removed by the user using chactl remove model command.

Action: Reissue the command with valid model name using -model argument.

CLSCH-03758: Failed to start monitoring because Oracle Cluster Health Analysis Service (OCHAD) is offline. Monitoring is enabled and will start when OCHAD starts up.

Cause: An attempt to start monitoring the specified database failed because OCHAD was offline.

Action: Start OCHAD using the 'srvctl start cha' command.

CLSCH-03759: Option -clustername is permitted only on the cluster where GIMR is running.

Cause: Option -clustername was specified on a cluster which did not have Grid Infrastructure Management Repository (GIMR) running locally.

Action: Retry the command on the cluster where GIMR is running.

CLSCH-03760: Export command must be executed on node {0} where the GIMR database is running.

Cause: An attempt to export the repository was rejected because the Grid Infrastructure Management Repository (GIMR) database was not running on the node where the command was issued.

Action: Retry the command on the indicated node.

CLSCH-03761: Warning: {0} option has been deprecated. Please use new option {1}.

Cause: A deprecated option was specified on the command line.

Action: Use the suggested new option or run the command with -help for more information.

CLSCH-03762: not enough samples for a histogram

Cause: Status message.

Action: None

CLSCH-03763: Option {0} does not match the status of the mgmtdb resource.

Cause: An attempt to update the mgmtdb resource dependency failed because the option -enable or -disable did not match the status of the mgmtdb resource.

Action: Enable the mgmtdb resource before running the command with the -enable option or disable the mgmtdb resource before running the command with the -disable option.

CLSCH-03764: The command is not supported without local GIMR.

Cause: The Grid Infrastructure Management Repository (GIMR) was not configured locally. The specified command requires GIMR to be configured locally.

Action: Reconsider the need for the request.

10

CLSDNSSD-00000 to CLSDNSSD-03999

CLSDNSSD-00000: no error.

Cause: Operation was successful.

Action: No action needed.

CLSDNSSD-00001: unknown error has occurred.

Cause: an unknown error has occurred.

Action: Contact Oracle Support Services.

CLSDNSSD-00002: no such name.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00003: memory allocation failed.

Cause: The DNS service discovery component was unable to allocate enough memory.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Support Services should be contacted.

CLSDNSSD-00004: invalid parameter.

Cause: An parameter which had an invalid value was passed by the caller to the DNS service discovery library. This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00005: invalid reference.

Cause: An unknown DNS record reference was encountered.

Action: Contact Oracle Support Services.

CLSDNSSD-00006: invalid state.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00007: invalid flags.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00008: unsupported operation.

Cause: The DNS service discovery component attempted to perform an operation not supported by the library.

Action: Contact Oracle Support Services.

CLSDNSSD-00009: uninitialized.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00010: service already registered.

Cause: The user attempted to register a service that was already registered.

Action: A service should only be registered once.

CLSDNSSD-00011: service name conflict.

Cause: The user attempted to register a service whose name already exists.

Action: A different service name needs to be used.

CLSDNSSD-00012: invalid data in record.

Cause: The DNS service discovery component attempted to use a record with invalid data. This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00013: firewall.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00014: client software incompatible with server.

Cause: The version of the client software used by the DNS service discovery interface is not compatible with the version of the server software.

Action: Contact Oracle Support Services.

CLSDNSSD-00015: bad interface index.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00016: update refused.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00017: no such record.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00018: no auth.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00019: no such key.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00020: NAT Traversal.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00021: Double NAT traversal.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00022: invalid time stamp in record

Cause: A DNS record contained an invalid time stamp. This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00023: invalid service type: "string".

Cause: The user specified a service type which does not conform to the standard specified by RFC's 1034 and RFC 1123. The service type must be one or more characters and must start and end with a letter or digit. The interior characters may be letters, digits, or hyphens.

Action: Specify a service type which conforms to the RFC.

CLSDNSSD-00024: internal error: bad key

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00025: internal error: transient

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00026: service not running

Cause: The background daemon was not running.

Action: Contact Oracle Support Services.

CLSDNSSD-00027: internal error: NAT port mapping unsupported

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00028: internal error: NAT port mapping disabled

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00029: No Router

Cause: Either a router was not configured or there was no network connectivity.

Action: Contact Oracle Support Services.

CLSDNSSD-00030: internal error: polling mode

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSDNSSD-00031: Query Time Out

Cause: The query timed out. Either the external DNS server sent a negative response or the select call timed out.

Action: Contact Oracle Support Services.

CLSDNSSD-03999: unknown error: *number*.

Cause: A DNS error code was returned that is not known to the system. This is an internal error.

Action: Contact Oracle Support Services.

CLSGN-00000 to CLSGN-00567

CLSGN-00000: no error\n

Cause: Operation was successful.

Action: No action needed.

CLSGN-00003: unknown command: "*string*"\n

Cause: The command entered was invalid.

Action: Specify a valid command.

CLSGN-00018: parameter has no default value.

Cause: An attempt was made to reset the value of a parameter for which there is no default value.

Action: Specify a parameter which has a default value.

CLSGN-00023: "*string*" is only available in interactive mode.\n

Cause: An attempt was made to run or get help for a command from the command line which is available only in interactive mode.

Action: Change to interactive mode to run the command.

CLSGN-00024: Oracle Grid Naming Service Daemon (GNSD) aborted on node *string*.

Cause: The server aborted on the specified node.

Action: Contact Oracle Support Services.

CLSGN-00025: Creation of name object for configuration file "*string*" failed.\n

Cause: It was not possible to create a name object for the configuration file.

Action: Examine the rest of the stack for the exact reason.

CLSGN-00028: Open of configuration file "*string*" failed.\n

Cause: The open of the configuration file failed.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00029: Read of configuration file "*string*" failed.\n

Cause: A read of the configuration file failed.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00030: Close of configuration file "*string*" failed.\n

Cause: It was not possible to close the configuration file.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00031: Server failed to start:\n*string*

Cause: The GNS server failed to start due to an error encountered by the server.

Action: Examine the message that accompanies this one for details. Also, take a look at the server log files for more information.

CLSGN-00032: Unexpected end of line found in record "*string*".\n

Cause: The line ended unexpectedly. For example, the line might have ended before the end of a quoted string was found.

Action: Specify a correctly formatted line.

CLSGN-00033: Too few arguments for value of parameter "*string*" Minimum: *number*\n

Cause: Not enough arguments were specified for a parameter.

Action: Specify the required number of arguments.

CLSGN-00034: Too many arguments for value of parameter "*string*" Maximum: *number*\n

Cause: The number of arguments specified for a parameter was greater than maximum allowed.

Action: Specify the required number of arguments.

CLSGN-00035: Record "*string*" contains too few fields. Minimum: *number*. Specified: *number*.\n

Cause: The entry for a parameter in the configuration file does not contain the required number of fields.

Action: Correct the entry to have the required number of fields.

CLSGN-00036: Record "*string*" contains too many fields. Maximum: *number*. Specified: *number*.\n

Cause: The entry for a parameter in the configuration file contains more than the maximum number of fields.

Action: Correct the entry to have the required number of fields.

CLSGN-00040: invalid value for integer parameter: "*string*": "*string*"\n

Cause: The value specified for an integer parameter was not an integer.

Action: Specify a correct value, either decimal or hexadecimal. Hexadecimal values start with the string "0x".

CLSGN-00041: invalid value for boolean parameter "*string*": "*string*"\n

Cause: The value specified for a boolean parameter was not a boolean value.

Action: Specify a correct value. Correct values include: TRUE/FALSE, YES/NO, ON/OFF, and 1/0.

CLSGN-00043: invalid configuration method: "*string*"\n

Cause: An unknown type was specified for the method used to store configuration information.

Action: Specify a valid type.

CLSGN-00044: no file name specified.\n

Cause: No name was specified for a configuration method which uses a file as the repository.

Action: Specify a file name.

CLSGN-00045: initialization failed: *string*\n

Cause: The initialization of GNS failed.

Action: Please examine the accompanying message for the exact reason.

CLSGN-00046: no value found for parameter "*string*".\n

Cause: A value was not specified for the parameter.

Action: Specify a parameter.

CLSGN-00051: unsupported query type: "*string*"

Cause: The query type passed in is not supported by GNS.

Action: Specify a supported query type.

CLSGN-00052: Initialization of OCR at level *number* failed.\n *string*\n

Cause: Initialization of OCR to the specified level failed.

Action: Examine the error message to determine what occurred.

CLSGN-00054: Invalid IP address: *string*

Cause: The IP address specified is neither in the v4 or v6 format.

Action: Specify a correct address.

CLSGN-00058: Invalid number of arguments specified: *number*.\n

Cause: The client program sent the wrong number of arguments over for a command.

Action: This error should not ordinarily be seen. Contact Oracle Support Services.

CLSGN-00059: Unknown command: *number*.\n

Cause: The server received an unknown command from the client.

Action: This error should never happen. If it does, contact Oracle Support Services.

CLSGN-00060: Conversion of string value "*string*" failed with error *number*.\n

Cause: The value of a parameter sent over from the client to number failed.

Action: Specify a valid parameter value.

CLSGN-00061: Internal error.\n

Cause: An unexpected error occurred. The rest of the error stack contains details about the error.

Action: This error should never happen. If it does, contact Oracle Support Services.

CLSGN-00062: Server spawn failed: could not access subdirectory *string* under *string*.\n

Cause: The server process could not be spawned because the directory where the program resides could not be located or accessed.

Action: Make sure that the server directory exists and can be accessed by the user starting the program.

CLSGN-00063: Server spawn failed: executable not accessible: directory: *string* file: *string*\n

Cause: The server program could not be accessed.

Action: Make sure the server executable exists and can be accessed by the user starting the program.

CLSGN-00064: spawn of server *string* failed.\n

Cause: The client was unable to start the server process.

Action: More details about the failure can be found in messages that follow.

CLSGN-00065: Unable to create backup for configuration file *string*

Cause: The GNS server was unable to create a backup configuration file.

Action: Check the permissions in the configuration directory. Make sure that the GNS process is permitted to create files there.

CLSGN-00068: Service advertisement stop failed.\n

Cause: GNS encountered an error when it tried to stop the advertisement of its service.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00069: Service registration failed.\n

Cause: GNS was unable to register itself with Resource Discovery.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00070: Service location failed.\n

Cause: The client program was not able to locate a GNS server.

Action: Examine the message following this one for a possible cause.

CLSGN-00071: Transport initialization failed.\n

Cause: GNS was unable to initialize the transport that it uses to communicate between the client and server.

Action: Examine the messages following this one for the cause of the error.

CLSGN-00072: Connection to server failed.\n

Cause: GNS was unable to initialize the transport that it was used to communicate between the client and server.

Action: The message following indicates the exact error that occurred.

CLSGN-00073: Send failed\n

Cause: GNS was unable to send data either from the client to the server or from the server to the client.

Action: The message following indicates the exact error that occurred.

CLSGN-00074: Wait for client connection failed\n

Cause: An error occurred while the server was waiting for a connection from the client.

Action: The message following indicates the exact error that occurred.

CLSGN-00075: Receive failed.\n

Cause: GNS was unable to receive data from its peer process.

Action: The message following indicates the exact error that occurred.

CLSGN-00076: *string* Packet ignored: *string*.\n

Cause: The packet was ignored by the server because it was invalid. This may be caused by another process sending malformed packets.

Action: Use system tools to determine if a non-GNS process is sending data to the server.

CLSGN-00077: Invalid DNS message received.\n

Cause: The Grid Naming Service (GNS) server received a query which was not of the correct format. This could be due to an error by the server or because a malicious process is sending the GNS server invalid packets.

Action: The error is informational and should not ordinarily be visible to a user. If it is seen, contact Oracle Support Services.

CLSGN-00078: No space in left in buffer. Buffer size: *number*.\n

Cause: The buffer provided was too small to fit a piece of data.

Action: This error should ordinarily not be visible to users. If it appears, contact Oracle Support Services.

CLSGN-00079: Bonjour initialization failed.\n

Cause: The function called to initialize Bonjour for use by GNS failed.

Action: Examine the accompanying Bonjour error and take corrective action.

CLSGN-00080: Wait failed.\n

Cause: The wait for data to be received from another process failed.

Action: This error should ordinarily not be visible to users. If it appears, contact Oracle Support Services.

CLSGN-00081: The GNS service is not running.\n

Cause: The GNS service could not be contacted because it is not running.

Action: Start the GNS service.

CLSGN-00082: The GNS service is already running.\n

Cause: An attempt was made to start the GNS service, but it was already running.

Action: Shut down the GNS service before trying to start it.

CLSGN-00083: Invalid option: "*string*".\n

Cause: An unknown option was specified either to a client program or the server.

Action: Specify a supported option.

CLSGN-00086: Service location initialization failed.\n

Cause: The GNS client failed when it tried to initialize the Resource Discovery subsystem.

Action: Examine the message following this one. It will indicate the cause. If it is a number, consult rdret.h.

CLSGN-00087: Listen on endpoint "*string*" failed.\n

Cause: The server was unable to listen for requests on the specified endpoint.

Action: The accompanying GIPC error should be examined for the exact error.

CLSGN-00088: Listen on *string* port *number* failed due to a lack of privileges.\n

Cause: The server was unable to listen on the specified port because it does not have privilege to do so. On Linux and Unix systems, this can occur because the server is not running as the root user.

Action: Run the server as a user with the needed privileges.

CLSGN-00089: Not enough arguments specified for the "*string*" option. Number specified: *number*. Minimum number: *number*.\n

Cause: Enough arguments were not specified for a command.

Action: Specify the minimum number of arguments.

CLSGN-00090: Too many arguments specified for the "*string*" option. Number specified: *number* Maximum number: *number*.\n

Cause: Too many arguments arguments specified for a command.

Action: Specify the required number of arguments.

CLSGN-00099: Multicast DNS server not running.\n

Cause: GNS was unable to send a query to the multicast DNS server because it is not running.

Action: Start the multicast DNS server.

CLSGN-00100: The alias "*string*" already exists.\n

Cause: The specified alias already exists.

Action: Specify an alias which does not exist.

CLSGN-00101: The alias "*string*" does not exist.\n

Cause: An alias for a name could not be found.

Action: Specify an alias which exists.

CLSGN-00102: The name "*string*" does not exist.\n

Cause: The specified name could not be found.

Action: Specify a name which exists.

CLSGN-00109: No interfaces available.\n

Cause: GNS was unable to find any interfaces on which it can listen for requests. This error is likely caused by the incorrect specification of the list of interfaces on which GNS is not to listen. Alternatively, it may be caused by an error in system configuration.

Action: Correct the list of prohibited interfaces if it was set incorrectly. If this is not the case, check the system configuration.

CLSGN-00110: One or threads failed - check log.\n

Cause: One or more GNS failed unexpectedly.

Action: Check the log file to determine the exact reasons.

CLSGN-00111: Acquisition of privileges needed to perform operation failed.

Cause: An attempt to acquire the privileges needed failed.

Action: Examine the attached message for more details.

CLSGN-00112: Platform initialization failed.\n

Cause: GNS was unable to initialize the layer the provides system-specific services.

Action: Examine the accompanying message for details.

CLSGN-00120: Creation of configuration file "*string*" failed.\n

Cause: The creation of the new version of the configuration file failed.

Action: Examine the rest of the error stack for the exact reason.

CLSGN-00121: Trace level set to *number*.

Cause: This is an information message to indicate that the trace level was set.

Action: No action is needed.

CLSGN-00122: Dynamic messaging initalization failed - error *number*

Cause: The facility used to control the GNS server dynamically failed.

Action: This error should not be seen in normal use. Contact Oracle Support Services if it appears.

CLSGN-00127: Privileged user "*string*" does not exist.

Cause: The user which GNS is to run as in order to run operations which require special privileges does not exist.

Action: Specify a user which does exist on the host. This user must have the ability to listen for requests from the DNS server.

CLSGN-00128: Unprivileged user "*string*" does not exist.

Cause: The user which GNS is to run as in order to perform operations which do not require special privileges does not exist.

Action: Specify a user which exists.

CLSGN-00129: Privileged group "*string*" does not exist.

Cause: The group to which a user must belong in order to perform administrative operations does not exist.

Action: Specify a group which exists on the host.

CLSGN-00130: no privileges to access OCR key "*string*".

Cause: It was not possible to retrieve the specified key from OCR because the user does not have the required privileges.

Action: Either run the command as a user which has the required privileges or configure OCR to allow retrieval of the key.

CLSGN-00131: no privileges to get value for OCR key "*string*".

Cause: It was not possible to retrieve the specified value from OCR because the user does not have the required privileges.

Action: Either run the command as a user which has the required privileges or configure OCR to allow retrieval of the key.

CLSGN-00132: user "*string*" not authorized to run command.

Cause: A user tried to run a command but has no permission to do so.

Action: Run the command as a user which has the proper privileges.

CLSGN-00133: Exception received:\n*string*

Cause: An exception occurred on the server process.

Action: Examine the exception for details.

CLSGN-00134: Invalid name: "*string*".

Cause: The name to be used for a GNS operation was not valid. The name may have no domain or be qualified with the name of subdomain serviced by GNS.

Action: Specify a correct name.

CLSGN-00135: Mandatory parameter "*string*" is not configured.

Cause: A value was not configured for a mandatory parameter.

Action: Configure a value in the parameter repository.

CLSGN-00136: Query for network address for name "*string*" failed.

Cause: The query for network addresses for the given name failed.

Action: Examine the accompanying errors for for more information. If the errors indicate that the name does not exist, register it using `srvctl`.

CLSGN-00138: No thread names specified.

Cause: The command requires at least one thread name to be specified.

Action: Specify at least one thread name.

CLSGN-00139: Invalid thread name "*string*"

Cause: The name of the thread was unknown to GNS.

Action: Specify a valid thread name.

CLSGN-00140: OCR key "*string*" does not exist.

Cause: The specified key cannot be found in the Oracle Cluster Registry.

Action: Specify a key that exists This exception often happens when trying to retrieve a configuration parameter.

CLSGN-00141: The address "*string*" already exists.

Cause: A mapping for a address to a name already exists.

Action: Specify an address which does not exist.

CLSGN-00142: Open of OCR key "*string*" failed.

Cause: An error occurred while trying to open the root OCR used by GNS.

Action: Examine the accompanying exceptions for more information about the error. This error may be caused by mis-configuration.

CLSGN-00143: Subdomain "*string*" already exists.

Cause: An attempt was made to create a GNS subdomain which already exists.

Action: Specify a subdomain which does not exist.

CLSGN-00144: Subdomain "*string*" does not exist.

Cause: The specified GNS subdomain does not exist.

Action: Specify a subdomain which exists.

CLSGN-00147: Address "*string*" for name "*string*" is not serviced by GNS.

Cause: The specified address is not served by GNS.

Action: Specify a different address or change the subnet mask used by GNS.

CLSGN-00149: Address "*string*" does not exist.

Cause: The specified address is not known to GNS.

Action: Specify a valid address.

CLSGN-00150: Alias "*string*" is invalid.

Cause: The name of the alias to be advertised was not valid. The name may have no domain or be qualified with the name of subdomain serviced by GNS.

Action: Specify a correct alias.

CLSGN-00151: Name domain "*string*" does not match GNS subdomain "*string*"

Cause: The domain specified for the name does not specify the subdomain served by GNS.

Action: Either specify the correct domain or just specify the name of the host.

CLSGN-00152: Self-check failed.

Cause: The self-check performed by GNS failed.

Action: Verify that DNS has been configured so that it forwards queries for the GNS domain to the IP address on which the GNS server is listening. Otherwise contact Oracle Support Services.

CLSGN-00153: Length of subdomain "*string*": *string* exceeds the maximum: *string*.

Cause: The name specified for the subdomain to be served by GNS is longer than the maximum.

Action: Specify a shorter subdomain name.

CLSGN-00154: Invalid subdomain: "*string*"

Cause: The name of the subdomain does not conform to Internet standards. It must meet the following requirements: 1. Only alphanumeric characters, periods and hyphens are allowed; 2. It must start and end with an alphanumeric character; 3. Consecutive periods are not allowed. In addition, the subdomain must not end with ".local" as it is reserved for multicast DNS.

Action: Specify a subdomain in the correct format.

CLSGN-00155: trace level *number* is less than the minimum *number* - ignoring.

Cause: The trace level specified is lower than the minimum supported.

Action: Specify a valid trace level.

CLSGN-00156: trace level *number* is greater than the maximum *number*. Using the maximum value instead.

Cause: The trace level specified is greater than the maximum supported.

Action: Specify a valid trace level.

CLSGN-00158: Initialization or shut down in progress.

Cause: GNS was unable to process a command because it is either starting up or shutting down.

Action: If the server is starting up, try the command again in a few seconds. The server is shutting down, try the command again after the server has restarted.

CLSGN-00161: Failed to set GNS trace level: *string*.

Cause: The call to set the trace level on the GNS server failed.

Action: Examine the accompanying error message for details.

CLSGN-00162: Name "*string*" and address "*string*" will not be advertised due to configuration change.

Cause: When GNS attempted to advertise a name and address upon re-start, it failed because the address can no longer be serviced. This can happen if the subnet used by GNS was changed between the time that GNS was stopped and it was started.

Action: If this result was expected, the error can be ignored. Otherwise, the subnet needs to be changed in OCR and GNS needs to be stopped and re-started.

CLSGN-00163: connection with Cluster Synchronization Services failed. Error: *number*.*\n*

Cause: GNS was unable to contact Cluster Synchronization Services in order to retrieve the name of the cluster.

Action: This error is most probably caused by the Cluster Synchronization Services daemon being down. If the daemon is running, contact Oracle Support Services and provide them with the error code.

CLSGN-00164: Failed to retrieve cluster name: Error: *number*.

Cause: GNS was unable to get the name of the cluster from Cluster Synchronization Services.

Action: This error is most probably caused by the Cluster Synchronization Services daemon being down. If the daemon is running, contact Oracle Support Services and provide them with the error code.

CLSGN-00165: Running as user "*string*" which is not privileged.

Cause: GNS is not running as a privileged user e.g. root.

Action: Start GNS as a privileged user.

CLSGN-00166: Creation of OCR key "*string*" failed.*\n string*

Cause: GNS was unable to create the specified OCR key.

Action: Examine the accompanying error for details about what occurred. This error may be caused by mis-configuration.

CLSGN-00167: Operation is unsupported.

Cause: An operation was attempted which is not currently supported by GNS.

Action: Do not attempt the operation.

CLSGN-00168: Name advertisement or alias re-creation failed.

Cause: When GNS starts, it re-creates the advertisements and aliases that existed when it was shut down. The attempt to re-create an advertisement or alias failed.

Action: This error should not occur in normal use. Contact Oracle Support Services.

CLSGN-00169: Spawn of thread "*string*" failed.

Cause: GNS was unable to spawn a thread. This may be due to low system resources.

Action: If the memory or processes in use on the system are too high, reduce one or both and restart GNS. If this is not the case, contact Oracle Support Services.

CLSGN-00170: Thread "*string*" failed on startup.

Cause: A GNS thread failed when it tried to start.

Action: Examine the alert log and and trace file (if any) for details about the error.

CLSGN-00171: Invalid alias "*string*" specified for name "*string*"

Cause: The name of the alias to be advertised was not valid. The name must have no domain or be qualified with the name of subdomain serviced by GNS.

Action: Specify an alias whose name is in the correct format.

CLSGN-00172: Domain given in alias "*string*" for name "*string*" does not match GNS domain "*string*".

Cause: The domain specified for an alias does not match the domain serviced by GNS.

Action: Either specify the correct domain or do not specify a domain and GNS will use its domain as the default.

CLSGN-00173: GNS has not been configured.

Cause: An operation on the Grid Naming Service (GNS) failed because GNS had not been configured.

Action: Configure GNS and retry the operation.

CLSGN-00174: Packet replay detected - dropping connection.

Cause: GNS received a duplicate packet from a client. The connection was dropped as a consequence.

Action: Examine the trace file for details. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00175: Invalid packet received - dropping connection.

Cause: The packet was ignored by the server because it was invalid. This may be caused by another process sending malformed packets. This error is usually accompanied by another error which describes the exact error that occurred.

Action: Use system tools to determine if a non-GNS process is sending data to the server.

CLSGN-00176: Packet security check failed.

Cause: The check of the security attributes of a packet failed.

Action: Check the trace file for details about the failure. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00177: Invalid packet type received.

Cause: GNS received a packet whose type is unknown.

Action: Check the trace file for details about the failure. It is possible that a malicious user is attempting to send an invalid packet to GNS.

CLSGN-00178: Resolution of name "*string*" failed.

Cause: GNS failed to retrieve the address of the specified name.

Action: Check to make sure that an address for the name has been registered with GNS. If it is configured, check to make sure that DNS has been properly configured.

CLSGN-00179: No forwarded query received from DNS for name in "*string*" domain, check DNS configuration

Cause: A query was not forwarded from DNS to GNS for a name in the subdomain that it services.

Action: Check the configuration of DNS. Make sure that it contains the required forwarding directive contained in the following message.

CLSGN-00180: If BIND is being used and the zone is being forwarded, the entry will likely look like the following:

Cause: This message is displayed when the GNS self-check fails.

Action: Ensure that the configuration of DNS has the entry listed in the message that follows this one.

CLSGN-00182: *string* Unable to resolve self-check name.

Cause: This is an informational message which accompanies other messages describing a self-check failure.

Action: Examine the accompanying error messages for more information as to the cause of the problem.

CLSGN-00183: Number of retries exceeded maximum: *number*.

Cause: An operation failed after the maximum number of retries.

Action: Examine the accompanying message(s) for the reasons to why this error occurred.

CLSGN-00184: Operation has to be retried.

Cause: An operation failed because it could not be performed at this time and should be tried again later`.

Action: Examine the accompanying message(s) for details about the operation that was performed.

CLSGN-00185: Invalid argument.

Cause: An argument was passed to a function which was incorrect. In the case of a string, for example, a string will be invalid if it is null or has a zero length.

Action: Supply a valid argument.

CLSGN-00186: Insufficient privileges.

Cause: The user attempted an operation for which he or she does not have sufficient privileges.

Action: Either have the system administrator grant the needed privileges or re-try the operation as a user which has the needed privileges.

CLSGN-00187: Listening address "*string*" is not on the public network.

Cause: The address specified as the address on which GNS is to listen is not on the public network.

Action: Specify a different address which is on the public network.

CLSGN-00188: The value for parameter "*string*": *number* may only be from *number* to *number*.

Cause: The value for a parameter is outside the range of permitted values.

Action: Specify a value within the range.

CLSGN-00190: No records found for "*string*".

Cause: No records could be found for the specified name in GNS.

Action: Specify a name which exists in GNS.

CLSGN-00191: No records registered.

Cause: A query was made for the names registered in GNS but none were found.

Action: Re-run the query after names have been advertised.

CLSGN-00192: *string* Open of OCR key "*string*" failed.\n *string*

Cause: GNS was unable to open the specified OCR key.

Action: Examine the accompanying error for details about what occurred.

CLSGN-00193: Deletion of OCR key "*string*" failed.\n *string*

Cause: GNS was unable to delete the specified OCR key.

Action: Examine the accompanying error for details about what occurred.

CLSGN-00194: Time needed for resolution of name "*string*": *string* ms exceeded threshold of *string* ms

Cause: Name resolution took longer than the expected time.

Action: This may indicate a problem in the network or DNS configuration and should be investigated by each administrator.

CLSGN-00197: Self-check failed due to failure in name resolution.

Cause: The self-check failed because it was not possible to resolve the self-check name into the address used for reference.

Action: Examine the errors that follow the message for further information as to the cause.

CLSGN-00201: first self-check name resolution failed.

Cause: GNS was unable to resolve the name that it uses for the self-check the first time after it started.

Action: Examine the logs for more information about the error.

CLSGN-00202: first self-check failed.

Cause: GNS was unable run the self-check the first time after it started.

Action: Examine the logs for more information about the error.

CLSGN-00205: self-check failed while in "recovery" state.

Cause: The self-check had previously succeeded after a failure but has failed again.

Action: Examine the logs for more information about the failure.

CLSGN-00206: Creation of a network endpoint failed.

Cause: The creation of a listening endpoint failed.

Action: Examine the accompanying error stack for more information about the error.

CLSGN-00207: Creation of a network endpoint failed due to lack of permissions.

Cause: The creation of a listening endpoint failed because the server did not have the needed permissions.

Action: Examine the accompanying error stack for more information about the error.

CLSGN-00208: Network endpoint "*string*" already in use.

Cause: The creation of an endpoint failed because another process is using it.

Action: If another GNS instance is running, this error is expected. Otherwise, terminate the process using the address or start GNS on another node.

CLSGN-00209: Listen for DNS requests failed. IP address *string* port number is in use.

Cause: Listening for requests from the DNS server(s) failed because another process is using the address.

Action: If another GNS instance is running, this error is expected. Otherwise, terminate the process using the address or start GNS on another node.

CLSGN-00210: failed to get value for OCR key "*string*".\n *string*

Cause: It was not possible to retrieve the specified value from OCR.

Action: Examine the accompanying error stack for more information about the error.

CLSGN-00211: OCR batch operation failed.\n *string*

Cause: Setting a set of OCR key values failed.

Action: Examine the accompanying error stack for more information about the error.

CLSGN-00215: no service specified

Cause: The service was required in an SRV record, but not specified.

Action: Specify a the service.

CLSGN-00216: invalid SRV service: "*string*"

Cause: The service specified was not valid.

Action: Specify a valid service.

CLSGN-00217: no target specified in SRV record

Cause: The target was required in an SRV record, but not specified.

Action: Specify a target for the SRV record.

CLSGN-00218: invalid SRV record target: "string"

Cause: The target in the SRV record specified was not a valid DNS name.

Action: Specify a valid SRV record target. It must be a valid DNS name.

CLSGN-00219: SRV record for service: "string" does not exist

Cause: An SRV record for the specified service did not exist.

Action: Specify a service which exists.

CLSGN-00220: SRV record for service "string" already exists

Cause: An SRV record for the specified service already existed.

Action: Specify a service which does not exist.

CLSGN-00221: invalid SRV record port number: *number*. Maximum port number is *number*

Cause: The value specified for the port number of an SRV record was invalid.

Action: Specify a value which less than or equal to the maximum value.

CLSGN-00222: invalid SRV record priority: *number*. Maximum priority is *number*

Cause: The value specified for the priority of an SRV record was invalid.

Action: Specify a value which less than or equal to the maximum value.

CLSGN-00223: invalid SRV record weight: *number*. Maximum weight is *number*

Cause: The value specified for the weight of an SRV record was invalid.

Action: Specify a value which less than or equal to the maximum value.

CLSGN-00224: No SRV record name specified

Cause: The name of the SRV record was not specified.

Action: Specify a name.

CLSGN-00225: Invalid SRV record name: "string"

Cause: The name specified for the SRV record was not a valid DNS name.

Action: Specify a valid DNS name. See RFC 1034 for details.

CLSGN-00226: Invalid SRV record protocol: "string"

Cause: The protocol specified for the SRV record was not valid.

Action: Specify a valid protocol or nothing to get the default.

CLSGN-00229: No SRV record protocol specified

Cause: The protocol for the SRV record was not specified.

Action: Specify a protocol.

CLSGN-00234: No PTR records found for "*string*"

Cause: No PTR records could be found for the specified name.

Action: Either add PTR records for the name or specify another name.

CLSGN-00235: PTR record already exists for "*string*"

Cause: An attempt was made to add a PTR record which already exists.

Action: Specify a PTR record which does not exist.

CLSGN-00236: TXT record already exists for "*string*"

Cause: An attempt was made to add a TXT record which already exists.

Action: Specify a TXT record which does not exist.

CLSGN-00237: No TXT records found for "*string*"

Cause: No TXT records could be found for the specified name.

Action: Either add TXT records for the name or specify another name.

CLSGN-00238: Length of TXT record (*string* bytes) exceeds maximum length (*number*)

Cause: The TXT record was longer than the maximum.

Action: Specify a shorter record.

CLSGN-00239: Invalid TXT record

Cause: The TXT record specified does not conform with the standard (RFC 1035).

Action: Specify a record which conforms with the standard.

CLSGN-00240: Invalid PTR record: "*string*"

Cause: The PTR record specified does not conform with the standard (RFC 1035).

Action: Specify a record which conforms with the standard.

CLSGN-00241: Record "*string*" already exists.

Cause: An attempt was made to add a record which already exists.

Action: Specify a record which does not exist or use force option to replace existing record.

CLSGN-00242: Record type *string* for record "*string*" does not exist.

Cause: An attempt was made to query a record which does not exist.

Action: Specify a record which is already registered with GNS.

CLSGN-00243: Length of name "*string*" (*number*) exceeds maximum allowed *number*

Cause: The length of a name specified exceeds the allowed limit.

Action: Specify a shorter name.

CLSGN-00244: Length of qualified name "*string.string*" (*number*) exceeds maximum allowed *number*

Cause: The length of a name plus the GNS subdomain specified exceeded the allowed limit.

Action: Specify a shorter name.

CLSGN-00246: No name specified for a PTR record.

Cause: A name was not specified for a Pointer Resource (PTR) record.

Action: Specify a name which complies with the syntax described in RFC 1034 issued by the Internet Engineering Task Force (www.ietf.org).

CLSGN-00247: No target specified for a PTR record.

Cause: A name was not specified as the target of the Pointer Resource (PTR) record.

Action: Specify a name which complies with the syntax described in RFC 1034 issued by the Internet Engineering Task Force (www.ietf.org).

CLSGN-00248: No name specified for TXT record.

Cause: A name was not specified for a text (TXT) record.

Action: Specify a name which complies with the syntax described in RFC 1034 issued by the Internet Engineering Task Force (www.ietf.org).

CLSGN-00249: No value specified for a TXT record.

Cause: A value was not specified for a text (TXT) record.

Action: The value of a TXT record is a set of keyword and value pairs separated by commas. The values must comply with the syntax described in RFC 1464 issued by the Internet Engineering Task Force (www.ietf.org).

CLSGN-00250: No name specified for refresh.

Cause: A name was not specified for a refresh operation.

Action: Specify a name which complies with the syntax described in RFC 1034 issued by the Internet Engineering Task Force (www.ietf.org). The name must correspond to a record which exists in Grid Naming Service (GNS).

CLSGN-00251: GNS attempt to re-bind listening endpoints failed.

Cause: GNS rebind failed.

Action: Examine the accompanying error messages for details about the error.

CLSGN-00253: Invalid key

Cause: A key supplied for an operation is invalid.

Action: Supply a valid key.

CLSGN-00254: Open of credentials file "*string*" failed.

Cause: Opening the specified credentials file failed.

Action: Specify a file which exists and has the proper permissions. The file must be readable by the user performing the operation.

CLSGN-00255: Credentials file "*string*" does not exist.

Cause: The credentials file specified could not be found.

Action: Specify a file that exists.

CLSGN-00256: Initialization of credentials import failed.

Cause: The steps required to initialize the import of credentials failed.

Action: Examine the accompanying errors for details about the failure.

CLSGN-00257: Credentials file "*string*" already exists.

Cause: The credentials file specified already exists.

Action: Specify a file that does not exist.

CLSGN-00258: Credentials file "*string*" could not be created.

Cause: The credentials file specified could not be created.

Action: Specify a file which does not exist or is writable to the user performing the export.

CLSGN-00259: Initialization of credentials export failed.

Cause: The steps required to initialize the export of credentials failed.

Action: Examine the accompanying errors for details about the failure.

CLSGN-00260: Credential verification failed.

Cause: GNS was unable to verify the contents of a credentials file.

Action: Examine the accompanying errors for the cause.

CLSGN-00261: Import of credentials failed.

Cause: An error occurred while importing credentials used to contact the GNS server.

Action: Examine the accompanying errors for more information.

CLSGN-00262: Export of credentials failed.

Cause: An error occurred while exporting credentials used to contact the GNS server.

Action: Examine the accompanying errors for more information.

CLSGN-00263: Length of service instance "*string*": *string* exceeds maximum: *number*.

Cause: The length of the specified service instance exceeded the maximum allowed.

Action: Specify a shorter service instance.

CLSGN-00264: Invalid service instance: "*string*".

Cause: The service instance contained characters which are not allowed under the draft standard for DNS-based service discovery (see <http://files.dns-sd.org/draft-cheshire-dnsext-dns-sd.txt>)

Action: Specify a service instance which complies with the standard.

CLSGN-00265: The number of discovery addresses found exceeds the maximum of two.

Cause: More than two discovery addresses were found in the cluster configuration.

Action: Use 'srvctl modify gns' to correct the discovery addresses. If this does not resolve the problem, contact Oracle Support Services.

CLSGN-00266: Both of the discovery addresses are of the same type.

Cause: The Grid Naming Service (GNS) configuration was found to have two IPv4 or two IPv6 discovery addresses.

Action: Use 'srvctl modify gns' to correct the discovery addresses. If this does not resolve the problem, contact Oracle Support Services.

CLSGN-00267: All discovery addresses in the GPnP profile are invalid.

Cause: No addresses were found in the Grid Plug and Play (GPnP) profile which could be used to locate an instance of the Grid Naming Service (GNS).

Action: Use 'srvctl modify gns' to correct the discovery addresses. If this does not resolve the problem, contact Oracle Support Services.

CLSGN-00268: Initialization of GPnP failed.

Cause: An attempt to initialize Grid Plug and Play (GPnP) while modifying the Grid Naming Service (GNS) configuration failed.

Action: Examine the accompanying error messages for details.

CLSGN-00269: Failed to get GPnP profile or profile value.

Cause: An attempt to access the Grid Plug and Play (GPnP) profile or a value within the profile failed while modifying Grid Naming Service (GNS) configuration.

Action: Examine the accompanying error messages for details.

CLSGN-00270: Failed to set discovery address.

Cause: An attempt to modify Grid Naming Service (GNS) discovery address failed.

Action: Examine the accompanying error messages for details.

CLSGN-00272: Thread has been stopped.

Cause: This error is used internally by GNS to indicate that a thread has been stopped.

Action: This error should not occur in normal use. Contact Oracle Support Services.

CLSGN-00500: credentials extraction failed

Cause: The attempt to validate the provided Grid Naming Service (GNS) credentials failed.

Action: Examine the accompanying errors for more information.

CLSGN-00501: credentials initialization failed

Cause: Initialization of the subsystem used for credentials validation failed.

Action: Generally, this error should not be visible. If it occurs, contact Oracle Support Services.

CLSGN-00502: CRS initialization failed: *string*

Cause: Grid Naming Service (GNS) was unable to initialize Cluster Ready Services (CRS) for its use.

Action: Examine the accompanying errors for more information about the error.

CLSGN-00503: CRS operation "*string*" failed with error: *number*

Cause: A Cluster Ready Services (CRS) operation failed.

Action: This error should not occur in normal use. Contact Oracle Support Services.

CLSGN-00504: unsupported version: *string*

Cause: The version of an object or operation was not supported by Grid Naming Service (GNS).

Action: This error should not occur in normal use. Contact Oracle Support Services.

CLSGN-00508: OCR is not available

Cause: The Oracle Cluster Registry (OCR) was not available yet for use by Grid Naming Service (GNS).

Action: This error should not occur in normal use. Contact Oracle Support Services.

CLSGN-00509: Import of GNS key failed.

Cause: An error occurred while importing GNS key.

Action: Examine the accompanying error messages.

CLSGN-00510: CRS is not running

Cause: An operation which attempted to access the Oracle Cluster Registry failed because the Cluster Ready Services (CRS) was not running.

Action: Run the 'crsctl check crs' command to determine if CRS is running. If it is running, contact Oracle Support Services. Otherwise, restart CRS.

CLSGN-00511: GNS client cluster data already exists.

Cause: An attempt to import client data failed because client data has already been imported.

Action: Use 'srvctl modify gns -clientdata' to modify existing client data.

CLSGN-00512: Unsupported record type: *string*

Cause: The record type specified was unsupported.

Action: Specify a supported record type.

CLSGN-00513: Empty or corrupt import file: *string*

Cause: Credential import failed because the import file was empty or corrupt.

Action: Specify a valid import file and try again.

CLSGN-00514: Removal of GNS credentials failed.

Cause: An error occurred while removing the GNS credentials from client cluster.

Action: Examine the accompanying error messages.

CLSGN-00515: *string* failed to set the ownership for OCR key "*string*".\n *string*

Cause: GNS was unable to set the ownership for OCR key.

Action: Examine the accompanying error message for details about what occurred.

CLSGN-00516: File "*string*" is not a valid file.

Cause: The attempted operation failed because the file referenced by the indicated pathname was of the wrong type.

Action: Specify a valid file and retry.

CLSGN-00517: length of component "*string*": *string* exceeds the maximum: *number*

Cause: The length of a component of a name exceeded the maximum allowed.

Action: Specify a shorter component.

CLSGN-00518: Thread group "*string*" failed to stop.

Cause: A group of threads belonging to the Grid Naming Service (GNS) process failed to stop. This can happen if one or more threads in the group becomes unresponsive because of a system problem.

Action: This error can be ignored if the GNS process stops despite this error. If the GNS process does not stop, contact Oracle Support Services.

CLSGN-00519: Thread "*string*" failed to stop.

Cause: A thread belonging to the Grid Naming Service (GNS) process failed to stop. This can happen if the thread becomes unresponsive because of a system problem.

Action: This error can be ignored if the GNS process stops despite this error. If the GNS process does not stop, contact Oracle Support Services.

CLSGN-00520: invalid PTR target: "*string*"

Cause: An invalid string was specified for the target of a PTR record. The target must be a valid DNS name.

Action: Specify a target which complies with the syntax described in RFC 1034 issued by the Internet Engineering Task Force (www.ietf.org). The target must correspond to a record which exists in Grid Naming Service (GNS).

CLSGN-00521: No port available.

Cause: The Grid Naming Service (GNS) was unable to find a port to listen on.

Action: This error should not generally occur. Contact Oracle Support Services.

CLSGN-00522: invalid instance role: "*string*"

Cause: The instance role specified was not a valid role.

Action: Specify a valid GNS instance role name.

CLSGN-00523: No value found for "*string*" attribute.

Cause: The Grid Naming Service (GNS) did not get any value for for the indicated CRS attribute.

Action: Examine the accompanying error messages for details.

CLSGN-00524: NS query for subdomain "*string*" failed.

Cause: The Grid Naming Service (GNS) was unable to contact the Domain Name System (DNS) to get the name server (NS) record for the subdomain that it serves.

Action: Examine the accompanying errors and address any issues found. This error may be transient and thus may be ignored. If it persists, contact Oracle Support Services.

CLSGN-00525: no instance information found for subdomain "*string*"

Cause: No name server (NS) record for the Grid Naming Service instance was found in the Domain Name System (DNS).

Action: Request the DNS administrator to add an NS record for the GNS subdomain.

CLSGN-00526: invalid instance name: "*string*"

Cause: The name of this instance of the Grid Naming Service either contained characters which are not valid in a DNS label or was longer than the maximum length of a DNS label.

Action: The Grid Naming Service (GNS) uses the name of the cluster as its instance name. Specify a cluster name which complies with the syntax described in RFC 1034 issued by the Internet Engineering Task Force (www.ietf.org).

CLSGN-00527: primary instance "*string*" already running on cluster "*string*"

Cause: Start of primary GNS instance failed because it was already running. There must be only one primary GNS instance running in a multi-cluster environment.

Action: If desired, stop the running GNS instance with command 'srvctl stop gns' and then start the new primary instance on this cluster.

CLSGN-00528: failed to get data from zone

Cause: A zone transfer failed because the fetch of a record from a transfer message failed.

Action: Examine the accompanying error messages for details.

CLSGN-00529: failed to verify zone data

Cause: Zone data received was not in the expected format.

Action: Examine the accompanying error messages for details.

CLSGN-00530: failed to save the received zone

Cause: An attempt to save the zone data on a peer instance failed.

Action: Examine the accompanying error messages for details.

CLSGN-00531: domain name in zone does not match configured domain

Cause: A zone operation failed because an invalid domain name was found in a transfer message.

Action: Examine the accompanying error messages for details.

CLSGN-00532: Signature verification failed.

Cause: The verification of the signature attached to a record failed.

Action: This error should not be seen ordinarily. If it appears, contact Oracle Customer Service and provide details about how and when the error occurred.

CLSGN-00533: The record TTL *string* does not match existing records with TTL *string*.

Cause: A record with the same type with a different time to live was detected. This is a violation of RFC 4034 issued by the Internet Engineering Task Force (www.ietf.org).

Action: Either create the new record with the same time to live as the existing record or remove the existing record and create a new one.

CLSGN-00534: Validation of record failed.

Cause: An error occurred while validating a record.

Action: This error should not be seen ordinarily. If it appears, contact Oracle Customer Service and provide details about how and when the error occurred. Please supply any other messages which accompanied this one.

CLSGN-00535: failed to get the CRS active version

Cause: An operation failed because it could not get CRS active version.

Action: Examine the accompanying error messages for details.

CLSGN-00536: Initialization of OLR at level *number* failed.

Cause: Initialization of OLR to the specified level failed.

Action: Examine the accompanying error messages for details.

CLSGN-00537: failed to set zone data

Cause: An advertise operation failed because an error occurred when setting zone data.

Action: Examine the accompanying error messages for details.

CLSGN-00538: GNS instance role is already "*string*".

Cause: An attempt was made to modify the GNS instance role, but it was running with the specified role.

Action: None

CLSGN-00539: Primary GNS instance was not found.

Cause: An attempt to modify the GNS instance role to primary failed because no existing primary instance was found and the '-force' option was not supplied.

Action: If desired, use '-force' option to promote the current GNS i instance to primary role.

CLSGN-00540: Primary instance was found.

Cause: An attempt to modify the GNS instance role to primary failed because a primary instance was found and the '-force' option was supplied.

Action: Omit the '-force' option and try the operation again.

CLSGN-00541: failed to send modify role command to primary

Cause: An attempt to modify the GNS instance role failed because propagation to the primary instance was unsuccessful.

Action: Examine the accompanying error messages for details.

CLSGN-00542: failed to modify instance role

Cause: An operation to modify the GNS instance role failed.

Action: If desired, use the '-force' option to promote the GNS instance to primary instance.

CLSGN-00545: failed to get the CRS software version

Cause: An operation failed because it could not get CRS software version.

Action: Examine the accompanying error messages for details.

CLSGN-00546: GNS cannot be removed because one or more leaf nodes are present.

Cause: Removing GNS failed because one or more leaf nodes were still running in the cluster.

Action: Delete the leaf nodes or change them to hub role, then retry the GNS remove operation.

CLSGN-00547: failed to get node information from CSS

Cause: A GNS operation failed because it could not get node information from CSS.

Action: Examine the accompanying error messages for details.

CLSGN-00548: Name "%(1)" expired.

Cause: The specified name expired.

Action: Contact Oracle Support Services.

CLSGN-00549: Record expired.

Cause: The specified record expired.

Action: Contact Oracle Support Services.

CLSGN-00550: GNS failed to upgrade records.

Cause: An error occurred while upgrading Grid Naming Service (GNS) records.

Action: Contact Oracle Support Services.

CLSGN-00551: Role cannot be modified on a GNS client cluster.

Cause: An attempt to change the role of a Grid Naming Service (GNS) client cluster was rejected because the role can only be modified on a (GNS) server cluster.

Action: If the cluster is not a GNS client cluster, the message was issued in error. Contact Oracle Support Services.

CLSGN-00552: Section *string* cannot be found in the Cluster Manifest File *string*.

Cause: An attempt to process the Cluster Manifest File failed because the indicated section for the Grid Naming Service (GNS) was not found.

Action: Recreate the Cluster Manifest File in the Domain Services Cluster by exporting the GNS credential and provide the new Cluster Manifest File during the interview.

CLSGN-00553: Cluster "*string*" is already registered.

Cause: An attempt was made to register the specified cluster with the Grid Naming Service (GNS) but an entry for the cluster already existed. A cluster can only be registered once.

Action: Specify a different cluster name.

CLSGN-00554: Cluster "*string*" is not registered.

Cause: An attempt was made to perform an operation from the specified cluster with the Grid Naming Service (GNS) but the cluster was not registered with GNS.

Action: Either specify a different cluster name or register the cluster.

CLSGN-00555: Clusters are still registered.

Cause: An attempt was made to delete the primary instance of the Grid Naming Service (GNS) but clusters were still registered with it.

Action: Either select another instance to be the primary or delete the registrations for the clients.

CLSGN-00556: Only the primary instance may perform the operation.

Cause: An operation failed because it was attempted on an instance of the Grid Naming Service (GNS) which is not primary.

Action: Examine the accompanying error messages for for more details.

CLSGN-00557: Cluster is not authorized.

Cause: An attempt by the Grid Naming Service (GNS) server to perform an operation encountered an unexpected authorization error.

Action: Contact Oracle Support Services.

CLSGN-00558: Invalid cluster GUID "*string*".

Cause: The cluster GUID was invalid. A GUID may only contain ASCII characters.

Action: Retry the operation, specifying a valid cluster GUID.

CLSGN-00559: Cluster registration failed.

Cause: The registration of a cluster with the Grid Naming Service (GNS) failed. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages, resolve the problems indicated there and then retry the operation.

CLSGN-00560: Rename of cluster "*string*" to "*string*" failed.

Cause: The Grid Naming Service (GNS) server attempted to rename a cluster but the operation failed.

Action: Contact Oracle Support Services and supply the accompanying messages.

CLSGN-00561: Invalid cluster GUID: "*string*". Length: *string*. Required length: *string* characters.

Cause: The cluster GUID was invalid. Its length must match the specified value.

Action: Retry the operation, specifying a valid cluster GUID of the required length.

CLSGN-00562: failed to generate certificate for cluster "*string*"

Cause: An attempt to create a member cluster failed because an error occurred in generating a member cluster certificate as part of creating the manifest file.

Action: Contact Oracle Support Services and supply the accompanying errors.

CLSGN-00563: Wallet creation failed.

Cause: An attempt to create an instance of the Grid Naming Service was not fully successful. The wallet that holds security information about the instance could not be created.

Action: Contact Oracle Support Services and supply the messages that accompany this one.

CLSGN-00564: Wallet retrieval failed.

Cause: An attempt to execute a command on the Grid Naming Service failed because the wallet needed to verify the identity of the cluster where the command is being invoked could not be retrieved.

Action: Contact Oracle Support Services and supply the messages that accompany this one.

CLSGN-00565: Authentication failed.

Cause: A command attempted on the Grid Naming Service (GNS) server failed because it was not possible to verify the identity of the cluster from the command was being sent.

Action: Contact Oracle Support Services and supply the messages that accompany this one.

CLSGN-00566: Wallet for cluster *string* does not exist.

Cause: A command failed because the wallet needed to access the Grid Naming Service (GNS) server does not exist.

Action: Run `srvctl` to add the cluster to GNS.

CLSGN-00567: Failed to drop Grid Naming Service privileges.

Cause: An attempt to start the Grid Naming Service failed because the server was not able to switch from the root user to a less-privileged user.

Action: Contact Oracle Support Services and supply the messages that accompany this message.

CLSMDNS-00000 to CLSMDNS-02255

CLSMDNS-00000: no error

Cause: A command completely successfully.

Action: No action is needed.

CLSMDNS-00001: GIPC endpoint creation failed.

Cause: An attempt to create a GIPC endpoint for use multicast operations failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00002: bind failed.

Cause: An attempt to bind an address to a GIPC endpoint failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00003: address creation failed.

Cause: An attempt to create a GIPC address failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00004: attribute setting failed.

Cause: An attempt to set an attribute on a GIPC endpoint or address failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00005: interface registration failed.

Cause: The registration of an interface with mDNS failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00006: failed to get name server list.

Cause: An attempt to get the list of available name servers failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00007: mDNS initialization failed.

Cause: The initialization of the mDNS subsystem failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00008: start of host query failed.

Cause: The query for hosts from mDNS failed to start.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00009: stop of host query failed.

Cause: Termination of the query for hosts from mDNS failed.

Action: Examine the accompanying error (if any) and the log file for details as to why the operation failed.

CLSMDNS-00010: Initialization of name server name retrieval failed.

Cause: The initialization of the retrieval of the names of the name servers used by multicast DNS failed.

Action: Examine the accompanying messages(s) that detail the platform error(s) for details about the exception.

CLSMDNS-00011: retrieval of name server name failed.

Cause: The retrieval of the name of a name server to be used by multicast DNS failed.

Action: Examine the accompanying messages(s) that detail the platform error(s) for details about the exception.

CLSMDNS-00012: no name servers found.

Cause: No name servers were found that could be used by multicast DNS.

Action: Check the system configuration and ensure that or more DNS name servers are configured, operating and accessible.

CLSMDNS-00013: Send of response to DNS server failed.

Cause: An attempt to send a response to a query from the DNS server failed.

Action: Examine accompanying exceptions for details about the exact error.

CLSMDNS-00015: invalid record type: *number*

Cause: The DNS server sent a record whose type is unknown.

Action: This is a warning message which can be ignored because the error should occur very infrequently. If the error occurs frequently, Oracle Customer Support should be contacted.

CLSMDNS-02000: unknown error.

Cause: An unknown error occurred. This error can occur when the multicast DNS server is not running.

Action: If the multicast server is not running, start it and try the operation again. If it is running, this is an internal error and Oracle Customer Support should be contacted with details about how and when the error occurred.

CLSMDNS-02001: no such name exists.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02002: memory allocation failure.

Cause: The allocation of process memory failed.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

CLSMDNS-02003: invalid parameter.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02004: invalid reference.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02005: invalid state.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02006: invalid flags.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02007: operation is unsupported.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02008: uninitialized.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02009: no cache.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02010: record or service is already registered.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02011: name conflict found.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02012: Invalid.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02013: Firewall.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02014: Incompatible.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02015: invalid interface.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02016: Refused.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02017: no such record.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02018: no authentication.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02019: no such key.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02020: error occurred while passing through NAT.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02021: double NAT encountered.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02022: invalid time.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02023: invalid signature.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02024: invalid key.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02025: transient error.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02250: connection pending.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02251: connection failed.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02252: connection established.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02253: more memory needed for cache.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02254: configuration changed.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

CLSMDNS-02255: memory free needed.

Cause: This error is internal and should not ordinarily be seen by the user.

Action: Contact Oracle Customer Support.

13

CLSNS-00000 to CLSNS-00041

CLSNS-00000: no error

Cause: Operation was successful.

Action: No action needed.

CLSNS-00001: unspecified error

Cause: An unknown error occurred. This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00002: memory allocation of *number* bytes failed

Cause: An operation failed because it was not possible to allocate enough process memory.

Action: If memory is low on the system, terminate other processes and/or threads and try the operation again. Otherwise, this is an internal error and Oracle Customer Support should be contacted.

CLSNS-00003: Buffer *string* is too small. Required: *number* bytes, provided: *number* bytes.

Cause: An operation failed because the buffer supplied was too small.

Action: Retry with a buffer of the required size or more.

CLSNS-00004: length of value "*string*": *number* exceeds maximum: *number*

Cause: The value specified exceeds the maximum allowed.

Action: Specify a shorter value. This error can occur when creating a TXT record. If it occurs in another context, it is an internal error. In that case, contact Oracle Customer Support and provide details about how and when the error occurred

CLSNS-00005: operation timed out

Cause: A name resolution operation took too long to complete.

Action: This can happen on a heavily loaded system, for example. Retry the operation a few more times. If it still does not succeed, contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00006: duplicate object

Cause: An operation failed because specified object already exists.

Action: Specify an object name that does not already exist.

CLSNS-00007: object not found

Cause: An operation failed because the specified object was not found.

Action: Specify a valid object name which is already registered with name server.

CLSNS-00008: invalid argument: *string*

Cause: This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00009: invalid context

Cause: This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00010: invalid DNS message received

Cause: An operation failed because invalid DNS message received.

Action: Examine the accompanying error messages for more information.

CLSNS-00011: corrupt list

Cause: This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00012: corrupt record

Cause: An operation failed because a corrupted or malformed record was found.

Action: Examine the accompanying error messages for more information.

CLSNS-00013: invalid property

Cause: This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00014: invalid operation code

Cause: This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00015: invalid record type: *number*

Cause: An operation failed because an invalid record type was supplied.

Action: Specify a valid record type and try the operation again.

CLSNS-00016: invalid flags: *0xnumber*

Cause: An internal interface was passed an invalid argument. This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00017: invalid status: *number*

Cause: A DNS message was received whose status is not known.

Action: If this is a response, the name server may be incorrectly configured and the response should be ignored. If this is a query, it is an internal error. Contact Oracle Support Services and provide details about how and when the error occurred.

CLSNS-00018: invalid section: *number*

Cause: This is an internal error.

Action: Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00019: communications failure

Cause: It was not possible to contact a naming service.

Action: Examine the accompanying errors to determine what the cause may be.

CLSNS-00020: DNS configuration retrieval failed

Cause: Retrieval of configuration information failed.

Action: Examine any accompanying errors and logs for more information.

CLSNS-00021: permission denied

Cause: An operation failed because the user did not have the necessary permissions.

Action: Examine any accompanying errors and logs for more information.

CLSNS-00022: credential retrieval failure

Cause: An operation failed because the user did not have the necessary credentials.

Action: Examine any accompanying errors and logs for more information.

CLSNS-00023: connection to GNS failed

Cause: The connection to the GNS server failed.

Action: Examine the accompanying errors for more information about the error.

CLSNS-00024: unable to initialize GNS

Cause: It was not possible to initialize the GNS server for the cluster.

Action: Determine if GNS is running. If it is not, ask the administrator to start it. If GNS is running, it is an error and Oracle Customer Support should be contacted with the details of the error.

CLSNS-00025: unable to locate GNS

Cause: It was not possible to locate the GNS server for the cluster.

Action: Determine if GNS is running. If it is not, ask the administrator to start it. If GNS is running, it is an error and Oracle Customer Support should be contacted with the details of the error.

CLSNS-00026: failed to resolve name with GNS

Cause: It was not possible to resolve a name with GNS.

Action: Examine the accompanying errors for details. If the name is indeed advertised with GNS, please contact Oracle Customer Support.

CLSNS-00027: operation is unsupported

Cause: The specified operation is not supported.

Action: This is an internally-visible error and should not ordinarily be seen by users. Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00028: no space for record in message

Cause: Not enough space exists in a DNS message for a record.

Action: This is an internally-visible error and should not ordinarily be seen by users. Contact Oracle Customer Support and provide details about how and when the error occurred.

CLSNS-00029: advertisement of name "*string*" failed

Cause: Advertisement of the records attached to specified name failed.

Action: Examine the accompanying error messages for more information.

CLSNS-00030: deletion of name "*string*" failed

Cause: Deletion of the records attached to the specified name failed.

Action: Examine the accompanying error messages for more information.

CLSNS-00031: refresh of name "*string*" failed

Cause: Refresh of the records attached to the specified name failed.

Action: Examine the accompanying error messages for more information.

CLSNS-00032: retrieval of GPnP profile failed

Cause: The retrieval of the Grid Plug and Play profile failed.

Action: See the accompanying error messages for more information.

CLSNS-00033: initialization of GPnP failed

Cause: The initialization of Grid Plug and Play failed.

Action: See the accompanying error messages for more information.

CLSNS-00034: number of retries exceeded maximum: *number*

Cause: The retries allotted for an operation exceeded the maximum.

Action: Check to see if the name service being used is functioning correctly.

CLSNS-00035: Invalid IP address: *string*

Cause: GNS discovery address was not in IPv4 nor IPv6 format.

Action: Specify an address using IPv4 or IPv6 format.

CLSNS-00036: domain "*string*" not found

Cause: A query for information about the specified instance failed because the instance could not be found in the Domain Name System (DNS).

Action: Specify the name of an instance that exists in DNS.

CLSNS-00037: Signature verification failed.

Cause: The verification of the signature attached to a record failed.

Action: This error should not be seen ordinarily. If it appears, contact Oracle Customer Service and provide details about how and when the error occurred.

CLSNS-00038: GNS has not been configured.

Cause: A service advertisement or location failed because the Grid Naming Service (GNS) had not been configured.

Action: Configure GNS and retry the operation.

CLSNS-00039: failed to initialize OCR

Cause: An internal operation invoked an API which attempted to initialize the Oracle Cluster Registry (OCR) and encountered an error. Accompanying error messages provide additional failure detail.

Action: Examine the accompanying error messages for more information, resolve issues raised and retry the operation.

CLSNS-00040: failed to retrieve the old cluster names

Cause: An internal API attempted to retrieve an old cluster names from Oracle cluster registry (OCR) and encountered an error. OCR unavailability could be the potential cause of this error. Accompanying error messages provide additional failure detail.

Action: Examine the accompanying error messages for more information, resolve issues raised and retry the operation.

CLSNS-00041: failure to contact name servers *string*

Cause: The resolution of a name or service failed because none of the configured name servers could be contacted.

Action: Examine the accompanying messages for more information about the problem, correct any issues found and retry the operation. If the Grid Naming Service (GNS) is the name server, use the command 'srvctl status gns' to check that it is running.

CLSR-00001 to CLSR-06507

CLSR-00001: Oracle error *number* encountered

Cause: Oracle-related error is encountered.

Action: Check alert log and trace file for more detail.

CLSR-00002: Oracle error encountered while executing *string*

Cause: Oracle-related error is encountered while executing a request.

Action: Check alert log for more detail.

CLSR-00003: ORACLE_HOME environment variable not set

Cause: ORACLE_HOME environment variable is not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

CLSR-00004: Error encountered at *string*, category=*number*, operation=*string*, OS error=*number*

Cause: Operating system error occurred.

Action: Check for the error message for more detail.

CLSR-00005: Error encountered during memory allocation

Cause: System memory is insufficient.

Action: Check the availability of memory in the system before retrying.

CLSR-00006: Error encountered when writing file *string*

Cause: Error when writing file.

Action: Check the permission of the file and the existence of its path.

CLSR-00007: Error encountered when reading file *string*

Cause: Error when reading file.

Action: Check the permission and existence of the file.

CLSR-00501: Error *number* encountered when connecting to EVM daemon

Cause: Error encountered when connecting to EVM daemon.

Action: Check status of EVM daemon and log file for detail.

CLSR-00502: Error *number* encountered when subscribing an EVM event

Cause: Error encountered when subscribing an EVM event.

Action: Contact customer support.

CLSR-00503: Error *number* encountered when creating an EVM event

Cause: Error encountered when creating an EVM event.

Action: Contact customer support.

CLSR-00504: Error *number* encountered when posting an EVM event

Cause: Error encountered when posting an EVM event.

Action: Contact customer support.

CLSR-00505: Empty event type is specified

Cause: Empty event type is specified.

Action: Try again with a valid event type.

CLSR-00506: Unmatched resource name prefix *string* is specified

Cause: Specified resource name prefix does not match as required.

Action: Try again with a valid resource name prefix.

CLSR-00507: The length of the facility name *string* exceeds the limit (*number*)

Cause: The given facility name is too long.

Action: Try again with a short facility name.

CLSR-00508: Invalid message number *number*

Cause: An incorrect message number is specified.

Action: Try again with a correct message number.

CLSR-00509: Unable to initialize NLS

Cause: Failed to initialize callback structure for NLS.

Action: Contact customer support.

CLSR-00510: Unable to load NLS data

Cause: Failed to initialize NLS data loading.

Action: Not action required as default data loading will be used.

CLSR-00511: Error *number* encountered when handling incoming EVM message

Cause: Error encountered when handling incoming EVM message.

Action: Check log file for detail.

CLSR-00512: Invalid CAA trigger event type [*string*]

Cause: Invalid CAA trigger event type is specified.

Action: Try again with a valid type.

CLSR-00513: Message file is not found

Cause: The requested OCI message file is not found.

Action: Check if the message file is properly installed.

CLSR-00514: Unable to locate PMON [*pid=string*]

Cause: Cannot find PMON with this pid.

Action: Check the existence of PMON.

CLSR-00515: A service member is already running on this node

Cause: There is a service member of the same service running on this node.

Action: No action required as the service member will try to start on another node.

CLSR-00516: No service provider found at this node

Cause: No suitable service provider is found on this node.

Action: No action required as the service member will try to start on another node.

CLSR-00517: Failed to register a service name

Cause: The requested service name cannot be registered.

Action: Check log file for detail.

CLSR-00518: Failed to register a preconnect service name

Cause: The requested preconnect service name cannot be registered.

Action: Check log file for detail.

CLSR-00519: No instance found

Cause: No instance is found running for the database resource.

Action: No action required as the database resource will fail itself.

CLSR-00520: No service member found

Cause: No service member is found running for the composite service resource.

Action: No action required as the composite service resource will fail itself.

CLSR-00521: Event *string* is rejected by EVM daemon

Cause: No template has been registered for the event or caller is not authorized to post the event.

Action: Check if there is a template registered for this event and the authority of posting this event.

CLSR-00522: Resource *string* is not registered

Cause: CRS resource is not registered.

Action: Register the CRS resource.

CLSR-00523: Resource *string* is not enabled

Cause: CRS resource is not enabled.

Action: Enable the CRS resource.

CLSR-00524: Resource *string* is stopping, resource *string* cannot start

Cause: Resource cannot start because its composite resource is stopping.

Action: Retry to start the resource when its composite resource is not stopping.

CLSR-00525: prsr initialization failed

Cause: See the related error message.

Action: Run crs_stat to make sure CSS and OCR working properly.

CLSR-00526: Failed to retrieve database configuration in OCR

Cause: See the related error message.

Action: Run `crs_stat` to make sure CSS and OCR working properly and database configuration in ocr is initialized.

CLSR-00527: OCR operation failed

Cause: See related error messages about the OCR operation.

Action: Fix the related error. Then try again.

CLSR-00528: RACGONS: host and port number already configured in OCR

Cause: host and port number already configured in OCR.

Action: None

CLSR-00529: RACGONS: host and port number to be removed does not exist

Cause: host and port number to be removed is not configured in OCR.

Action: None

CLSR-00530: Can not get user name

Cause: Error caused by OSD layer.

Action: Contact Oracle support.

CLSR-00531: Can not get primary group name

Cause: There is no primary group for this OS.

Action: Not fatal. None.

CLSR-01001: Unsupported open mode *number* is specified

Cause: Unsupported open mode is specified for mounting database.

Action: Retry again with a valid open mode.

CLSR-01002: Unable to process instance startup

Cause: `ORACLE_HOME` environment variable not set.

Action: Make sure that the `ORACLE_HOME` environment variable has been properly set and exported.

CLSR-01003: Error *number* encountered during mounting database

Cause: Unexpected error occurs when mounting database.

Action: Check current status of database before retrying.

CLSR-01004: Failed to mount database

Cause: Database cannot be mounted by an instance.

Action: Check alert log for error detail.

CLSR-01005: Error *number* encountered during altering database open mode

Cause: Unexpected error occurs when altering database open mode.

Action: Check current database status.

CLSR-01006: Unable to process instance shutdown

Cause: ORACLE_HOME environment variable not set.

Action: Make sure that the ORACLE_HOME environment variable has been properly set and exported.

CLSR-01007: Connection to database was not established

Cause: Connection to database is failed to establish.

Action: Make sure connection and environment are properly set up.

CLSR-01008: Error *number* encountered during querying for PMON status

Cause: Unexpected error encountered when querying v\$process for PMON.

Action: Check alert log and connection to database.

CLSR-01009: database management module failed to start

Cause: Error encountered during initializing database management module.

Action: Check previous error message for detail.

CLSR-01010: Unable to record PMON pid to *string*

Cause: Failed to write os pid for PMON to file.

Action: Check file system for disk space and access privilege.

CLSR-01011: Invalid instance startup mode [*string*] is specified

Cause: Invalid startup mode is specified.

Action: Retry again with a valid startup mode.

CLSR-01012: Invalid instance stop mode [*string*] is specified

Cause: Invalid stop mode is specified.

Action: Retry again with a valid stop mode.

CLSR-06500: Invalid input arguments

Cause: Invalid input arguments are specified.

Action: Retry again with a valid argument.

CLSR-06501: Exceeds maximum number of arguments

Cause: Too many input arguments are specified.

Action: Retry again with correct number of arguments.

CLSR-06502: Failed to connect to database '*string*' as user '*string*'

Cause: Failed to connect to database.

Action: Check database and log file for details.

CLSR-06503: Service name already registered

Cause: Requested service name has been registered by another service.

Action: Choose another service name and retry registration again.

CLSR-06504: Service name not in SERVICE_NAMES

Cause: Requested service name is not registered.

Action: Make sure the correct service name is specified in the request.

CLSR-06505: SERVICE_NAMES found null and fixed

Cause: SERVICE_NAMES parameter becomes null after the delete operation.

Action: Not action required as SERVICE_NAMES is set to default value.

CLSR-06506: Error *number* encountered when executing *string*

Cause: Error occurred when executing the SQL statement.

Action: Check alert log for more detail.

CLSR-06507: Cannot add to SERVICE_NAMES, SERVICE_NAMES will be too long

Cause: Adding the service name will exceed the limit of SERVICE_NAMES.

Action: Change the configuration to avoid SERVICE_NAMES becomes too long.

CLSRSC-00001 to CLSRSC-06005

CLSRSC-00001: Insufficient privileges to execute this script

Cause: The script was invoked by a non-root or a non-administrator user.

Action: Run the script as the root or administrative user.

CLSRSC-00003: No value set for the required parameter '*string*'

Cause: The required parameter file is missing, or no value is set for the parameter yet.

Action: Use the correct parameter file and provide each parameter with a valid value.

CLSRSC-00004: No value passed as Oracle CRS home

Cause: No value was passed as Oracle CRS home.

Action: None

CLSRSC-00005: The Oracle CRS home '*string*' does not exist

Cause: The Oracle CRS home does not exist.

Action: Make sure that the Oracle Grid Infrastructure software is properly installed.

CLSRSC-00006: No value passed as Oracle Clusterware name

Cause: No value was passed as Oracle Clusterware name.

Action: None

CLSRSC-00007: The OCR location file '*/etc/oracle/ocr.loc*' is corrupted

Cause: The OCR location file '*/etc/oracle/ocr.loc*' is corrupted.

Action: Make sure that the '*/etc/oracle*' directory is empty if this is a fresh install.

CLSRSC-00008: No value passed as OCR locations

Cause: No value was passed as OCR locations.

Action: None

CLSRSC-00009: No value passed as OLR locations

Cause: No value was passed as OLR locations.

Action: None

CLSRSC-00010: The VIP resource was not created due to VIP address not available.

Cause: There was an error in obtaining a VIP address from the DHCP server.

Action: Run the command '*cluvfy comp dhcp*' to check the DHCP server.

CLSRSC-00011: No value passed for OLR locations

Cause: No value was passed as OLR locations.

Action: None

CLSRSC-00012: The ASM resource ora.asm did not start

Cause: There was an error in starting the ASM resource.

Action: Check the accompanying messages and contact Oracle Support Services.

CLSRSC-00013: The file '*string*' does not exist

Cause: The specified file does not exist.

Action: None

CLSRSC-00014: CSS is configured for single instance Oracle databases

Cause: The current configuration is for previous installation.

Action: Delete this configuration using the command 'localconfig delete' before proceeding with Oracle RAC configuration.

CLSRSC-00015: No value passed for host name

Cause: No value was passed as the host name.

Action: None

CLSRSC-00016: No value passed for Oracle CRS user

Cause: No value was passed as Oracle crs user.

Action: None

CLSRSC-00017: Invalid GPnP setup

Cause: GPnP directories do not exist.

Action: Make sure that GPnP directories must exist.

CLSRSC-00018: The GPnP peer wallet file '*string*' does not exist or is not readable

Cause: The GPnP peer wallet file does not exist or is not readable.

Action: None

CLSRSC-00019: 9i GSD is running on the Cluster nodes (*string*)

Cause: 9i GSD is running on the Cluster nodes.

Action: Stop the GSD and re-run 'root.sh' on UNIX platforms or 'gridconfig.bat' on Windows.

CLSRSC-00020: Invalid network type in the network specification string '*string*'. Only 'public' and 'cluster_interconnect' are allowed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00021: No value passed for the directory name

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00022: The directory '*string*' does not exist

Cause: The specified directory does not exist.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00023: No value passed for the file name

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00024: No value passed for the host name.

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00025: Unable to find the command '*string*' to stop Clusterware

Cause: Cannot stop Clusterware because the required executable file does not exist.

Action: Make sure that the Oracle Grid Infrastructure software is properly installed.

CLSRSC-00026: The file system of '*string*' is invalid

Cause: The root is not able to perform any operations on this file system.

Action: Check export options on NAS filer and make sure that the file system is not corrupted.

CLSRSC-00027: The GPnP configuration reader wallet in given directory '*string*' is missing

Cause: The setup in GPnP configuration directory is incomplete.

Action: Make sure that the Oracle Grid Infrastructure software is properly installed.

CLSRSC-00028: The GPnP configuration reader wallet in given directory '*string*' is invalid

Cause: The setup in GPnP configuration directory is invalid.

Action: Make sure that the Oracle Grid Infrastructure software is properly installed.

CLSRSC-00029: Invalid GPnP configuration directories. The cluster-wide '*string*' and node-specific '*string*' must be different

Cause: Invalid configuration was found while verifying the GPnP local and cluster-wide setup.

Action: None

CLSRSC-00030: No parameters specified to query from GPnP profile '*string*'

Cause: The required parameters were not supplied while querying from GPnP profile.

Action: None

CLSRSC-00031: GPnP profile signature verification failed

Cause: The signature status string was not found in the output of 'gnptool' execution.

Action: If error persists, contact Oracle Support Services.

CLSRSC-00032: The '*string*' file is not readable

Cause: No read access to the specified file.

Action: Check the permissions on this file and make sure it is readable.

CLSRSC-00033: The OLR from version '*string*' is missing or unusable for upgrade

Cause: Invalid OLR file was found during upgrade.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00034: IPv6 is currently not supported

Cause: Attempt was made to use IPv6.

Action: None

CLSRSC-00035: The value set for the parameter 'CRS_NODEVIPS' is null

Cause: No value set for the parameter 'CRS_NODEVIPS'.

Action: Set 'CRS_NODEVIPS' parameter in 'crsconfig_params' and re-run 'rootupgrade.sh'. The format is as follows: CRS_NODEVIPS='node1-vip/ node1-netmask/node1-interface,node2-vip/node2-netmask/ node2-interface'.

CLSRSC-00036: The file '*string*' does not exist to proceed with deconfiguration

Cause: Some files are missing in the Grid Infrastructure Home.

Action: Contact Oracle Support Services.

CLSRSC-00037: Run the deconfiguration script with a -force option.

Cause: The deconfiguration failed due to a missing file.

Action: Perform the deconfiguration using the -force option and manually stop any processes running from the GI home.

CLSRSC-00038: Oracle Clusterware stack is not active on this node

Cause: Oracle Clusterware is not running on this node.

Action: Restart the Clusterware stack using 'crsctl start crs' and retry.

CLSRSC-00039: Oracle Restart stack is not active on this node

Cause: Oracle SIHA stack is not running on this node.

Action: Restart the SIHA stack using 'crsctl start has' and retry.

CLSRSC-00040: No value passed for owner name

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00041: No value passed for group name

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00042: No value passed for the file or directory name

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00043: No value passed for permissions

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00044: The init script file name passed is null

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00045: The init script file '*string*' does not exist

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00046: Error: '*string*' does not exist

Cause: The specified file or directory does not exist.

Action: None

CLSRSC-00047: The Oracle Home User *string* does not match the Oracle Home User *string* of the Grid Infrastructure homes currently in use in this cluster.

Cause: An attempt to switch to a different Grid Infrastructure home was rejected because the Oracle Home User of the destination home did not match the Oracle Home User of the Grid Infrastructure homes currently in use for the cluster.

Action: Specify a destination Grid Infrastructure home with the current Oracle Home User.

CLSRSC-00048: Failure in execution, multi-line command is not supported.

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00049: Directory in which to create Oracle Notification Server wallet does not exist.

Cause: The root script did not find the directory to create Oracle Notification Server wallet.

Action: Examine the root script logs for errors during the creation of the directory such as lack of space or permissions, rectify the errors and rerun the root script.

CLSRSC-00050: failed to create wallet for use by Oracle Notification Service (ONS)

Cause: The root script was unable to write the ONS wallet file in the wallet directory.

Action: Examine the root script logs for errors during the creation of the wallet, such as lack of space or permissions, rectify the errors and rerun the root script.

CLSRSC-00051: failed to add certificate to wallet to be used by Oracle Notification Service (ONS)

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00052: failed to get the HAIP address

Cause: An attempt to get the HAIP address using ifconfig failed.

Action: Examine the accompanying error messages.

CLSRSC-00101: Could not copy OCR locations

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00102: Could not delete the OLR file '*string*' (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00103: An error occurred while accessing the file '*string*'

Cause: The specified file does not exist or is not readable.

Action: Make sure the file exists and it has read and execute access.

CLSRSC-00104: Could not execute '*string -g*' and read output (error: *string*)

Cause: Unable to execute the specified command.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00105: Failed to copy '*string*' to '*string*' (error: *string*)

Cause: An error occurred while copying the specified file.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00106: Copy of older local-only OCR failed

Cause: An error occurred while copying over older local-only OCR to SIHA home.

Action: None

CLSRSC-00107: Start of GNS failed

Cause: This is a status message.

Action: None

CLSRSC-00108: Failed to start VIP on node '*string*'

Cause: This is a status message.

Action: None

CLSRSC-00109: Start of ASM diskgroup failed

Cause: This is a status message.

Action: None

CLSRSC-00110: Failed to start the specified SCAN VIP

Cause: This is a status message.

Action: None

CLSRSC-00111: Failed to start the specified SCAN listener

Cause: This is a status message.

Action: None

CLSRSC-00112: Start of the CVU resource failed

Cause: This is a status message.

Action: None

CLSRSC-00113: Start of ASM instance failed

Cause: This is a status message.

Action: None

CLSRSC-00114: Force stop of ASM instance failed

Cause: This is a status message.

Action: None

CLSRSC-00115: Start of resource '*string*' failed

Cause: This is a status message.

Action: None

CLSRSC-00116: Stop of resource '*string*' failed

Cause: This is a status message.

Action: None

CLSRSC-00117: Failed to start Oracle Clusterware stack from the Grid Infrastructure home *string*

Cause: An error occurred while starting Oracle Clusterware stack.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00119: Start of the exclusive mode cluster failed

Cause: Internal error.

Action: If the problem persists, Contact Oracle Support Services

CLSRSC-00120: Timed out waiting for the CRS stack to start

Cause: Internal error.

Action: If the problem persists,contact Oracle Support Services.

CLSRSC-00121: Timed out waiting for the GPnPD to start

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00122: Failed to create a root wallet for Oracle Cluster GPnP

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00123: Failed to create a root certificate for Oracle Cluster GPnP

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00124: Failed to export root certificate for Oracle Cluster GPnP

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00125: Failed to create a peer wallet for Oracle Cluster GPnP

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00126: Failed to create a profile reader wallet for Oracle Cluster GPnP

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00127: Failed to create a provisioning authority wallet for Oracle Cluster GPnP

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00128: Failed to make a peer wallet for Oracle Cluster GPnP. Could not add private key to a wallet

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00129: Failed to make a provisioning authority wallet for Oracle Cluster GPnP. Could not add private key to a wallet.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00130: Failed to make a peer wallet for Oracle Cluster GPnP. Could not export a certificate request from a wallet.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00131: Failed to make a provisioning authority wallet for Oracle Cluster GPnP. Could not export a certificate request from a wallet.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00132: Failed to make a peer wallet for Oracle Cluster GPnP. Could not create a peer certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00133: Failed to make a provisioning authority wallet for Oracle Cluster GPnP. Could not create a PA certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00134: Failed to make a peer wallet for Oracle Cluster GPnP. Could not add a root TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00135: Failed to make a profile reader wallet for Oracle Cluster GPnP. Could not add a root TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00136: Failed to make a provisioning authority wallet for Oracle Cluster GPnP. Could not add a root TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00137: Failed to make a peer wallet for Oracle Cluster GPnP. Could not add a PA TP certificate.

Cause: Internal Error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00138: Failed to make a provisioning authority wallet for Oracle Cluster GPnP. Could not add a peer TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00139: Failed to make a profile reader wallet for Oracle Cluster GPnP. Could not add a PA TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00140: Failed to make a profile reader wallet for Oracle Cluster GPnP. Could not add a peer TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00141: Failed to make a peer wallet for Oracle Cluster GPnP. Could not add a PA TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00142: Failed to make a provisioning authority wallet for Oracle Cluster GPnP. Could not add a peer TP certificate.

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00143: Failed to *string* a peer profile for Oracle Cluster GPnP using 'gnptool' (error code *string*)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00144: Failed to sign a peer profile for Oracle Cluster GPnP using 'gnptool' (error code *string*)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00145: Failed to verify a peer profile '*string*' with WRL='*string*' using 'gpnptool' (error code *string*)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00146: Failed to take cluster-wide GPnP setup as local

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00147: Failed to get parameter values from GPnP profile '*string*'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00148: Errors occurred while setting GPnP wallets ownership/permissions

Cause: Failed to set GPnP wallets ownership/permissions.

Action: None

CLSRSC-00149: Creation of Oracle GPnP wallets failed for host '*string*'

Cause: Failed to create Oracle GPnP wallets for the specified host.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00150: Creation of Oracle GPnP peer profile failed for host '*string*'

Cause: Failed to create Oracle GPnP peer profile for the specified host.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00151: Failed to promote local GPnP setup to other cluster nodes

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00152: Could not set ownership on '*string*'

Cause: Failed to set ownership on the specified file or directory.

Action: None

CLSRSC-00153: Could not set permissions on '*string*'

Cause: Failed to set permissions on the specified file or directory.

Action: None

CLSRSC-00154: Check of resource "*string*" failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00155: Replace of older local-only OCR failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00156: Error creating local-only OCR

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00157: Failed to create Oracle Cluster Registry configuration

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00158: Failed to reset the OCR location in 'srvconfig.loc' file

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00159: Failed to initialize Oracle Cluster Registry for cluster

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00160: Failed to create local-only OCR using the command '*string*'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00161: Pin node using the command '*string*' failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00162: Upgrade of ASM Windows Service failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00163: ASM rolling upgrade action failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00164: ASM upgrade failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00165: Backup of file '*string*' failed

Cause: The copy of the file to a backup file failed.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00166: Failed to stop or deconfigure older version Cluster Support Services daemon.

Cause: There was an error during the operation.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00167: Restore of file '*string*' failed

Cause: The copy of the file from a backup file failed.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00168: Could not delete the file '*string*' (error: *string*)

Cause: Unable to delete the specified file.

Action: None

CLSRSC-00169: Failed to create or upgrade OLR

Cause: The 'ocrconfig -local -upgrade' command failed.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00170: Failed to deconfigure Oracle ASM (error code *string*)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00171: Failed to get a list of CSS nodes from OCR

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00172: Failed to get a list of interfaces from OCR

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00173: Error: *string* \nError getting networks interface information using 'oifcfg'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00174: Error: *string* \nAn error occurred while executing the command 'olsnodes'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00175: Failed to write the checkpoint '*string*' with status '*string*' (error code *string*)

Cause: An attempt to execute the root script failed because of a failure to write the indicated checkpoint file. Additional failure information is provided in the accompanying messages.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-00176: Failed to write contents of pfile '*string*' for checkpoint '*string*' (error code *string*)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00177: Failed to add (property/value):('string'/'string') for checkpoint 'string' (error code string)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00178: Failed to get property value for property 'string' for checkpoint 'string' (error code string)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00179: Failed to get value of 'string' for checkpoint 'string' (error code string)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00180: An error occurred while executing the command 'string'

Cause: Failed to execute the indicated command. Additional failure information is provided in the accompanying messages.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-00181: Failed to find earlier version database home

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00182: Failed to add the resource for ASM diskgroup 'string'

Cause: An internal error occurred while creating the ASM diskgroup resource.

Action: Contact Oracle Support Services.

CLSRSC-00183: OCR manual backup operation failed (error code string)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00184: Configuration of ASM failed

Cause: Errors occurred while configuring ASM via 'asmca'.

Action: See 'asmca' logs for details. If the problem persists, contact Oracle Support Services.

CLSRSC-00185: Could not open file string (error: string)

Cause: An error occurred while attempting to open a specified file.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00186: Failed to copy file from local path 'string' to remote path 'string' for given list of nodes 'string'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00187: Failure with signal 'string' from command 'string'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00188: Failed to create keys in Oracle Local Registry

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00189: Failed to add type 'ora.registry.acfs.type'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00190: Failed to add resource 'ora.registry.acfs'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00191: Failed to stop Oracle Clusterware stack

Cause: An error occurred while stopping Oracle Clusterware stack.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00192: Unable to stop Oracle Restart

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00193: Platform-specific setup failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00195: Failed to create OHASD resources for cluster and ASM

Cause: An error occurred while adding OHASD resource types and resources.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00196: ACFS driver install actions failed

Cause: An error occurred while installing ACFS drivers using the 'acfsroot install' command.

Action: Examine the accompanying messages from the 'acfsroot install' command, correct the problem and retry.

CLSRSC-00197: Cluster configuration upgrade failed

Cause: This is a status message.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00198: Initial cluster configuration failed

Cause: This is a status message.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00199: Timed out waiting for OHASD to start

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00200: Failed to create HA resources for HAS daemon and ASM

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00201: Failed to start CSS daemon

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00202: Failed to start EVM daemon

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00203: Failed to stop resources from database home '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00204: Failed to downgrade OCR to version '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00205: Failed to uninstall ADVM/ACFS

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00206: Could not open file *string* for reading (error: *string*)

Cause: An error occurred while attempting to open a specified file for reading.

Action: Check that the file exists and has the proper permissions.

CLSRSC-00207: Could not open file *string* for writing (error: *string*)

Cause: An error occurred while attempting to open a specified file for writing.

Action: Check that the file exists and has the proper permissions.

CLSRSC-00208: Could not open file *string* for appending (error: *string*)

Cause: An error occurred while attempting to open a specified file for appending.

Action: Check that the file exists and has the proper permissions.

CLSRSC-00209: Could not move '*string*' to '*string*' (error: *string*)

Cause: An error occurred while moving the specified file.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00210: Current Oracle Cluster Registry location '*string*' in file '*string*' and the diskgroup '*string*' do not match

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00211: Current Oracle Cluster Registry mirror location '*string*' in file '*string*' and the diskgroup '*string*' do not match

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00213: Failure in reading file '*string*' (error: *string*)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00214: Failed to start the resource '*string*'

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00215: Could not open file '*string*' to read permissions (error: *string*)

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00216: Insufficient free space available in Cluster Health Monitor repository '*string*'

Cause: The available space was less than the minimum space required (1024 MB).

Action: Run the command 'oclumon manage -repos reploc <new_path>' to change Cluster Health Monitor repository and make sure its free space meets the minimum requirement.

CLSRSC-00217: Could not open file '*string*' to write permissions (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00218: Failed to install the OHASD startup script (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00219: Unable to get Oracle owner for the home '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00220: Unable to retrieve database home information

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00221: The patch '*string*' apply failed for home '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00222: The patch '*string*' apply successful for home '*string*'

Cause: This is a status message.

Action: None

CLSRSC-00223: The patch '*string*' rollback failed for home '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00224: The patch '*string*' rollback successful for home '*string*'

Cause: This is a status message.

Action: None

CLSRSC-00225: The prepatch execution for database home failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00226: The postpatch execution for database home failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00227: Patch information file '*string*' does not exist. Not a valid GI Bundle patch.

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00228: Timed out waiting for server assignments

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00242: Failed to start Oracle Grid Plug and Play (GPNP) component

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00243: Failed to upgrade the voting disks for Cluster Synchronization Service

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00244: Failed to start Cluster Synchronization Service in clustered mode

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00245: Failed to start Cluster Time Synchronization Service (CTSS)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00246: HAIP startup failure considered fatal, terminating ...

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00247: Failed to start ASM

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00248: Failed to upgrade Oracle Clusterware Repository

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00249: Failed to start Cluster Ready Services

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00250: Failed to start Event Manager

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00251: Oracle Clusterware stack start initiated but failed to complete

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00252: Old CRS Home directory is invalid

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00253: Failed to call 'gethostbyname' with the argument '*string*' (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00254: Could not create the directory '*string*' (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00255: Could not create the file '*string*' (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00256: Could not eval *string*: *string*

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00257: Cluster Time Synchronization Service start in exclusive mode failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00258: Failed to configure and start ASM

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00259: Oracle Clusterware Repository configuration failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00260: Clusterware exclusive mode start of Cluster Ready Services failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00261: Failed to add voting disks

Cause: An attempt to add voting disks failed.

Action: Contact Oracle Support Services.

CLSRSC-00262: Failed to promote local GPnP setup to other cluster nodes

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00267: CSS could not exit exclusive mode

Cause: An attempt to stop running OHASD resources failed.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00268: ORACLE_HOME is not set in the environment

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00269: Failed to add base type cluster_resource

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00270: Failed to register Clusterware type '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00271: Failed to add resource '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00272: Could not close file '*string*' (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00273: Failed to register the resource 'string' with the OHASD

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00274: Mismatching host to VIP IPs specified

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00275: No more elements in crs_nodevip_list

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00276: Unable to get VIP info for new node

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00277: Failed to perform new node configuration

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00278: Failed to perform last node configuration for upgrade

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00279: Failed to perform first node non rolling asm upgrade tasks for cluster

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00280: Failed to perform first node tasks for cluster modeling upgrade

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00281: Failed to set active version of Oracle Clusterware

Cause: An error occurred while executing the 'crsctl set crs activeversion' command.

Action: Correct the problem indicated in the accompanying messages, and then retry.

CLSRSC-00284: Failed to perform last node tasks for cluster modeling upgrade

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00285: Failed to perform upgrade configuration from old 11.2 install

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00286: Failed to add Grid Infrastructure node applications

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00287: FirstNode configuration failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00288: Failed to start Grid Infrastructure node applications

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00289: Could not get existing VIP information

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00290: Error: validation of Single Instance CSS failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00291: Error: validation of 9i GSD failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00292: Error: validation of OLR config failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00293: Error: validation of OCR location '*string*' failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00294: CSS cannot be run in realtime mode

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00296: No configuration parameter file was specified

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00297: Configuration parameter file '*string*' could not be found

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00298: The Oracle CRS home path not found in the configuration parameters

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00299: The configuration parameter file '*string*' is not valid

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00300: Parameter '*string*' not defined

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00301: Error in validate_ocrconfig

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00302: Unable to delete old services

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00303: Cannot complete the upgrade without the voting file list

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00304: Failed to upgrade ASM for Oracle Restart configuration

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00305: Failed to upgrade ASM in a rolling fashion for Oracle Clusterware configuration

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00306: Failed to upgrade ASM in a nonrolling fashion for Oracle Clusterware configuration

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00307: Failed to upgrade ASM service a rolling fashion for Oracle clusterware configuration

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00308: Failed to get non-FQDN host name

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00309: Failed to get node network interfaces, error: (*string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00310: Could not open log file *string* for append (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00311: Failed to verify resources

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00312: Failed to verify HA resources

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00313: Error: '*string*' is an unknown Operating System

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00314: Failed to call '*tolower_host*' (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00315: Clusterware configuration check failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00316: OLR configuration failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00317: Failed to register Oracle OHASD service

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00318: Failed to start Oracle OHASD service

Cause: An attempt to start the Oracle OHASD service failed.

Action: Check the alert log and the accompanying messages and retry after correcting the problem.

CLSRSC-00319: Unable to stop running CSS

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00320: Migration of older version *local_only* to SIHA failed

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00323: Error: readlink failed (error: *string*)

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00324: Could not open old init.cssd

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00325: Configure Oracle Grid Infrastructure for a Cluster ... succeeded

Cause: This is a status message.

Action: None

CLSRSC-00326: Configure Oracle Grid Infrastructure for a Cluster ... failed

Cause: Internal error.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00327: Successfully configured Oracle Restart for a standalone server

Cause: This is a status message.

Action: None

CLSRSC-00328: Removing Clusterware entries in file '*string*'

Cause: This is a status message.

Action: None

CLSRSC-00329: Replacing Clusterware entries in file '*string*'

Cause: This is a status message.

Action: None

CLSRSC-00330: Adding Clusterware entries to file '*string*'

Cause: This is a status message.

Action: None

CLSRSC-00331: Failure initializing entries in file '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00332: CRS resources for listeners are still configured

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00333: Failed to remove database listener

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00334: Failed to remove database listener, but continuing to deconfigure with force option

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00335: Successfully downgraded Oracle Clusterware stack on this node

Cause: This is a status message.

Action: None

CLSRSC-00336: Successfully deconfigured Oracle Clusterware stack on this node

Cause: This is a status message.

Action: None

CLSRSC-00337: Successfully deconfigured Oracle Restart stack

Cause: This is a status message.

Action: None

CLSRSC-00338: Successfully downgraded OCR to version *string*

Cause: This is a status message.

Action: None

CLSRSC-00348: The Oracle Restart stack failed to stop

Cause: There was a failure in stopping the Oracle Restart stack.

Action: Stop the stack with 'crsctl stop has -f' and rerun the root script.

CLSRSC-00349: The Oracle Clusterware stack failed to stop

Cause: There was a failure in stopping the Oracle Clusterware stack.

Action: Stop the stack with 'crsctl stop crs -f' and rerun the root script.

CLSRSC-00350: Cannot configure two CRS instances on the same cluster

Cause: CRS is already configured on this node.

Action: Must deconfigure before proceeding with the configuration of new home.

CLSRSC-00351: Improper Oracle Clusterware configuration found on this host

Cause: There was an existing configuration found.

Action: Deconfigure the existing cluster configuration before starting to configure a new Clusterware.

CLSRSC-00352: CRS is already configured on this node for the CRS home location *string*

Cause: There was an attempt to configure the cluster when the cluster is already configured.

Action: None

CLSRSC-00353: Run '*string*/crs/install/*string* -deconfig' to deconfigure existing failed configuration and then re-run '*string*'

Cause: There was an attempt to configure the cluster when a prior failed configuration was not cleaned up.

Action: Perform the action specified in the message.

CLSRSC-00354: Error: invalid interface

Cause: Internal error.

Action: Contact Oracle Support Services.

CLSRSC-00355: Error: Cannot change directory to '*string*', invalid Berkeley Database path

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00356: Error in opening directory '*string*'

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00357: Failed to stop current Oracle Clusterware stack during upgrade

Cause: An error occurred while executing the 'crsctl stop crs -f' command from the current CRS home.

Action: Either manually stop the current Oracle Clusterware stack or reboot the local node to properly clean up the processes started by Oracle Clusterware, and then rerun rootupgrade.sh.

CLSRSC-00359: Unable to get owner information for the executable *string*

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00360: Owner '*string*' of the old CRS home differs from owner '*string*' of the new CRS home

Cause: The new CRS home was installed as the wrong OS user.

Action: Install the new CRS home as the owner of the old CRS home.

CLSRSC-00361: The Oracle Cluster Repository (OCR) check failed

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00362: The pre-upgrade checks failed, aborting the upgrade

Cause: One or more pre-upgrade checks failed. This message is accompanied by others providing details of the error.

Action: Correct the problem indicated by the accompanying messages and retry.

CLSRSC-00363: User ignored prerequisites during installation

Cause: Informational message.

Action: None

CLSRSC-00364: Failed to propagate ASM credentials to the other nodes

Cause: An attempt to copy the ASM credentials to all remote cluster nodes failed

Action: Contact Oracle Support Services.

CLSRSC-00365: Failed to create credentials for ASM on the local node

Cause: Internal Error

Action: Contact Oracle Support Services.

CLSRSC-00366: Failed to import credentials for ASM

Cause: Internal Error

Action: Contact Oracle Support Services.

CLSRSC-00367: The value set for the parameter 'GNS_ADDR_LIST' is null

Cause: No GNS address was found while configuring the big cluster discovery address.

Action: Contact Oracle Support Services.

CLSRSC-00368: Failed to set the node role '*string*' for the local node

Cause: An error occurred while executing the 'crsctl set node role' command.

Action: Examine the accompanying messages from the 'crsctl set node role' command, correct the problem and retry.

CLSRSC-00370: Cloud Cluster requires Cloud ASM Server

Cause: Cloud ASM Server was not configured in the cluster.

Action: Contact Oracle Support Services.

CLSRSC-00371: Failed to add flex ASM configuration

Cause: An error occurred while executing the 'srvctl add asm -flex' command.

Action: Correct the problem indicated in the accompanying messages, and then retry.

CLSRSC-00372: Failed to enable ASM proxy configuration

Cause: An error occurred while executing the 'srvctl enable asm -proxy' command.

Action: Correct the problem indicated in the accompanying messages, and then retry.

CLSRSC-00373: Failed to start ASM proxy instance

Cause: An error occurred while executing the command 'srvctl start asm -proxy'. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages, and retry the operation.

CLSRSC-00375: Failed to copy ASM credentials to the GPnP directory

Cause: An error occurred while processing a copy operation.

Action: Correct the problem indicated in the accompanying messages, and then retry.

CLSRSC-00376: Failed to get the configured node role for the node *string*

Cause: An error occurred while executing the 'crsctl get node role config -node *nodename*' command.

Action: Examine the accompanying messages from the 'crsctl get node role config -node *nodename*' command, correct the problem and retry.

CLSRSC-00377: Failed to create ASM credential domains

Cause: An error occurred while executing the 'crsctl add credmaint -path -ASM [-local]' command.

Action: Contact Oracle Support Services.

CLSRSC-00378: Failed to get the configured node role for the local node

Cause: An error occurred while executing the 'crsctl get node role config' command.

Action: Examine the accompanying messages from the 'crsctl get node role config' command, correct the problem and retry.

CLSRSC-00379: Invalid path for the password file used by ASM

Cause: The path for the password file used by ASM was not properly set in ASM configuration.

Action: Contact Oracle Support Services.

CLSRSC-00380: Failed to create the Rapid Home Provisioning Server credential domain

Cause: An error occurred while executing the 'crsctl add credmaint -path GRIDHOME' command.

Action: Contact Oracle Support Services.

CLSRSC-00381: Failed to create the Grid Plug and Play (GPnP) credential domain

Cause: The reason for this issue was one of the following: - The 'crsctl add credmaint -path <path_name>' command failed because the requesting user was not root (UNIX) or Administrator (WINDOWS). - An internal error occurred while executing the 'crsctl add credmaint -path /gpnP' command.

Action: (a) Check if the command 'crsctl add credmaint -path <path_name>' is requested by the root(UNIX) or Administrator (WINDOWS). (b) Contact Oracle Support Services.

CLSRSC-00398: Failed to retrieve old Grid Infrastructure home location during upgrade

Cause: An attempt to locate the previous version Oracle Clusterware home location failed during upgrade, possibly because its configuration was corrupt or removed.

Action: Contact Oracle Support Services.

CLSRSC-00399: Failed to retrieve the network configuration during upgrade

Cause: Private interconnect configuration could not be retrieved from the previous version Oracle Clusterware, possibly because its configuration was corrupt or removed.

Action: Contact Oracle Support Services.

CLSRSC-00400: A system reboot is required to continue installing.

Cause: The installation of new drivers requires a node reboot to continue the install.

Action: Reboot the node and rerun the install or patch configuration step.

CLSRSC-00404: Failed to upgrade Cluster Health Monitor service in rolling fashion for Oracle Clusterware configuration.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00405: Unable to access old configuration file *string* of Cluster Health Monitor.

Cause: Old Cluster Health Monitor configuration file was absent.

Action: None

CLSRSC-00406: Failed to find new administrative directory *string* of Cluster Health Monitor.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00408: Failed to create new configuration file *string* of Cluster Health Monitor.

Cause: New configuration file of Cluster Health Monitor could not be created.

Action: Ensure that you have the required OS authority or permissions for creating the indicated file.

CLSRSC-00409: Failed to patch Cluster Health Monitor service for Oracle Clusterware configuration.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00410: Cannot change directory to '*string*'.

Cause: During OCFS upgrade, an attempt to change to the indicated file system directory failed.

Action: Ensure that the directory ORACLE_HOME\cfs exists

CLSRSC-00411: A system reboot is required before using OCFS.

Cause: The existing OCFS driver could not be unloaded.

Action: Reboot the local node.

CLSRSC-00412: Failed to enable CRS after successfully installing the ACFS drivers.

Cause: After successfully configuring ACFS during an install, upgrade, or patch, the root script failed to enable CRS again, using the command 'crsctl enable crs'.

Action: Correct the errors accompanying the failure of the enable command and rerun the install configuration step.

CLSRSC-00413: Failed to disable CRS in preparation for a node reboot.

Cause: After a failure to install ACFS drivers, CRS is disabled. This allows the user to reboot and install the drivers for the new version successfully.

Action: Correct the errors accompanying the failure of the disable command, run 'crsctl disable crs', reboot, and continue the install configuration step.

CLSRSC-00415: Failed to delete voting disks

Cause: An attempt to delete voting disks failed.

Action: Contact Oracle Support Services.

CLSRSC-00416: Failed to retrieve old Grid Infrastructure configuration data during downgrade

Cause: An attempt to collect the older version Oracle Clusterware configuration data failed during downgrade, possibly because the upgrade of the first node had not reached a point where the configuration had been modified, or the configuration was corrupt or had been removed.

Action: Rerun rootupgrade.sh. Contact Oracle Support Services if the problem persists.

CLSRSC-00418: Failed to create the ADVN volume resource for device *string*.

Cause: An error occurred while executing the 'srvctl add volume' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-00419: An error occurred attempting to query the volume resource.

Cause: An error occurred while executing the 'srvctl status volume' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-00420: The ACFS registration for device '*string*' on mount path '*string*' could not be registered with CRS.

Cause: An error occurred while executing the 'acfsutil registry -a' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-00421: An error occurred attempting to query the file system resource.

Cause: An error occurred while executing the 'srvctl status // filesystem' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-00422: Failed to perform ACFS registry upgrade.

Cause: An error occurred while performing the ACFS registry upgrade.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-00423: Failed to stop database listener

Cause: An error occurred while stopping the database listener.

Action: Try to stop the database listener manually using 'srvctl stop listener' command.

CLSRSC-00424: Failed to stop database listener, but continuing to deconfigure with force option

Cause: An error occurred while stopping the database listener.

Action: None

CLSRSC-00425: Failed to create the ACFS drivers resource but continuing with the installation

Cause: An error occurred while creating the ACFS drivers resource.

Action: Check if your OS kernel is supported and run 'acfsroot enable' to create and start the ACFS drivers resource.

CLSRSC-00426: Failed to create and start the ACFS drivers resource but continuing with the patching

Cause: An error occurred while creating and starting the ACFS drivers resource.

Action: Check if your OS kernel is supported and run 'acfsroot enable' to create and start the ACFS drivers resource.

CLSRSC-00427: failed to remove OCR file *string* on ASM using command *string*

Cause: An error occurred while executing the 'asmcmd rm' command.

Action: Examine the accompanying messages, correct the problem and retry.

CLSRSC-00428: Existing OCR configuration found, aborting the configuration. Rerun configuration setup after deinstall.

Cause: While configuring a new cluster, OCR was found to be already configured.

Action: Deinstall and rerun configuration setup.

CLSRSC-00429: The Oracle Clusterware force upgrade was aborted

Cause: One or more pre-upgrade checks failed.

Action: Address the issues reported by accompanying messages and follow the suggested action.

CLSRSC-00430: Failed to start rolling patch mode

Cause: An error occurred while executing the 'crsctl start rollingpatch' command.

Action: Examine the accompanying messages, correct the problem and retry.

CLSRSC-00431: Failed to stop rolling patch mode

Cause: An error occurred while executing the 'crsctl stop rollingpatch' command.

Action: Examine the accompanying messages, correct the problem and retry.

CLSRSC-00432: Invalid destination CRS home

Cause: The CRS home specified by '-dstcrshome' was identical to the current CRS home.

Action: Remove '-dstcrshome *path to CRS home*' from the command line or specify a different CRS home.

CLSRSC-00433: This command is deprecated and has been replaced by 'rootcrs.pl -postpatch'

Cause: A deprecated command was issued.

Action: Use 'rootcrs.pl -postpatch'. See usage for complete command line options.

CLSRSC-00434: An operating system reboot is required to continue the deconfiguration.

Cause: The uninstall of the ACFS drivers failed. An operating system reboot is required to continue the deconfiguration.

Action: Reboot the node and Autostart the deconfiguration step.

CLSRSC-00435: Failed to enable CRS after successfully uninstalling the ACFS drivers.

Cause: After successfully deconfiguring ACFS during a downgrade, the root script failed to re-enable CRS using the command 'crsctl enable crs'.

Action: Correct the errors accompanying the failure of the enable command and rerun the deconfiguration step.

CLSRSC-00436: Failed to disable CRS in preparation for a node reboot.

Cause: An attempt to disable CRS in preparation for a system reboot failed. The reboot is associated with a failed removal of ACFS drivers.

Action: Correct the errors accompanying the failure of the disable command, run 'crsctl disable crs', reboot, and continue the deconfiguration step.

CLSRSC-00437: Failed to add the management database listener

Cause: An error occurred while adding the management database listener.

Action: Rerun the root.sh script after resolving the problem indicated by the accompanying messages.

CLSRSC-00438: There is a mismatch between the node list and node role list in '*string*/crs/install/crsconfig_addparams'

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00440: Failed to copy GPnP setup from a remote node *string* that belongs to an upgraded cluster

Cause: The remote node was unreachable or has not completed upgrade processing.

Action: Make sure the given node can be reached and it has been successfully upgraded, and then rerun the 'rootupgrade.sh -join -existingNode *node name*' command.

CLSRSC-00442: Failed to copy Oracle Clusterware configuration files from existing nodes

Cause: During the operation of adding nodes, an attempt to copy configuration files from an existing node failed because no node was unreachable or user equivalence did not work.

Action: Ensure that at least one node can be reached and user equivalence is properly configured between the local node and existing nodes, and then rerun the 'root.sh' command. Contact Oracle Support Services if the problem persists.

CLSRSC-00443: An active CSS daemon was found during CSS exclusive mode startup

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00444: The 'root.sh' command must first be run on node '*string*' where the OUI session was invoked

Cause: The node where the 'root.sh' command was running was not the node on which the OUI session was invoked.

Action: Run the 'root.sh' command on the node where the OUI was invoked.

CLSRSC-00445: The Oracle Grid Infrastructure has already been upgraded to [string]

Cause: The rootupgrade.sh was successfully executed on all cluster nodes.

Action: No further action is required.

CLSRSC-00446: The upgrade has not yet been performed on this node

Cause: The rootupgrade.sh was not yet executed on the local node, and the force option was specified.

Action: Rerun rootupgrade.sh without the force option on the local node.

CLSRSC-00447: The upgrade has not yet been performed on node *string*

Cause: The force option was supplied when some nodes in the cluster have not yet been upgraded. The upgrade cannot be forced to complete while some nodes running Oracle Clusterware have not yet been upgraded.

Action: Rerun rootupgrade.sh without force option on the specified node.

CLSRSC-00448: Cluster-wide Grid Plug and Play profile not found on this node

Cause: The Grid Plug and Play profile was not found on this node. The node may have been unreachable when the profile was created and distributed during an earlier upgrade operation.

Action: First, force completion of the earlier upgrade on the other nodes using 'rootupgrade.sh -force'. Then issue 'rootupgrade.sh -join -existingNode <node_name>' on the local node to rejoin this node to the cluster. Alternatively, remove this node from the cluster and then add it back.

CLSRSC-00449: Failed to retrieve the value of attribute 'check_interval' for CVU resource during upgrade

Cause: An attempt to retrieve the value of attribute 'check_interval' for CVU resource failed during upgrade, possibly because its configuration was corrupt or removed.

Action: Contact Oracle Support Services.

CLSRSC-00450: Failed to determine if the CVU resource was configured

Cause: During upgrade, an attempt to determine if CVU resource was configured failed, possibly because its configuration was corrupt or removed.

Action: Contact Oracle Support Services.

CLSRSC-00451: failed to deconfigure the last Hub node because there are still active Leaf nodes: *string*

Cause: An attempt to deconfigure the last Hub node in the cluster found one or more Leaf nodes still active.

Action: Deconfigure all other nodes before deconfiguring the last Hub node.

CLSRSC-00452: Failed to upgrade ASM on the current node during attempt to join an upgraded cluster

Cause: The ASM upgrade invoked during node join failed.

Action: Examine the accompanying messages, correct the problem and rerun the 'rootupgrade.sh -join -existingNode *node name*' command.

CLSRSC-00453: An operating system reboot is required to continue the downgrade

Cause: The reinstall of the older version of Oracle ASM Cluster file system (ACFS) drivers failed. An operating system reboot is required to continue the downgrade.

Action: Reboot the node before running 'crsctl start crs' from the older version of CRS home.

CLSRSC-00454: Failed to initiate the upgrade of Oracle Clusterware

Cause: An error occurred while executing the 'crsctl startupgrade' command.

Action: Rerun the rootupgrade.sh script and contact Oracle Support Services if the problem persists.

CLSRSC-00455: Failed attempt to initiate patch on a Leaf node

Cause: Pre-patch failed because of an attempt to execute 'rootcrs.pl -prepatch' on a Leaf node before any Hub node being patched.

Action: Run the 'rootcrs.pl -prepatch' command on a Hub node first, before running it on the current node.

CLSRSC-00456: The Oracle Grid Infrastructure has already been configured.

Cause: An attempt to run the configuration script was aborted because it had already been successfully executed on this node.

Action: No further action is required.

CLSRSC-00457: Oracle Restart is currently configured and cannot be deconfigured using this Oracle Clusterware deconfiguration command.

Cause: A request to deconfigure Oracle Clusterware was rejected because the existing configuration was Oracle Restart.

Action: Run the command 'roothas.pl -deconfig' to deconfigure Oracle Restart.

CLSRSC-00460: failed to start Oracle Restart stack

Cause: An error occurred when the Oracle Restart stack was automatically restarted during installation or configuration processing.

Action: Retry the configuration script root.sh. If the problem persists, contact Oracle Support Services

CLSRSC-00461: Failed to retrieve OCR locations

Cause: An error occurred while executing the 'ocrcheck -config -details' command.

Action: Correct the problem indicated in the accompanying messages.

CLSRSC-00462: Failed to copy OCR location configuration file to remote nodes

Cause: An attempt to copy configuration file to remote nodes failed because the target node was unreachable or user equivalence did not work.

Action: Ensure that the remote nodes can be reached and user equivalence is properly configured across the cluster nodes, and then rerun the 'root.sh' command. Contact Oracle Support Services if the problem persists.

CLSRSC-00463: The deconfiguration or downgrade script could not stop current Oracle Clusterware stack.

Cause: An error occurred while executing the 'crsctl stop crs -f' command from the current CRS home.

Action: After deconfiguration or downgrade completes, either manually stop the current Oracle Clusterware stack or reboot the local node to properly clean up the processes started by Oracle Clusterware.

CLSRSC-00464: Starting retrieval of the cluster configuration data

Cause: Retrieval of the cluster configuration data from the older version of Oracle Grid Infrastructure stack has started.

Action: None

CLSRSC-00465: Retrieval of the cluster configuration data has successfully completed.

Cause: Retrieval of the cluster configuration data from the older version of Oracle Grid Infrastructure stack has successfully completed.

Action: None

CLSRSC-00466: Starting shutdown of the current Oracle Grid Infrastructure stack

Cause: Shutdown of the older version of Oracle Grid Infrastructure stack has started.

Action: None

CLSRSC-00467: Shutdown of the current Oracle Grid Infrastructure stack has successfully completed.

Cause: Shutdown of the older version of Oracle Grid Infrastructure stack has successfully completed.

Action: None

CLSRSC-00468: Setting Oracle Clusterware and ASM to rolling migration mode

Cause: An attempt has been made to set Oracle Clusterware and ASM to rolling migration mode.

Action: None

CLSRSC-00469: Successfully set Oracle Clusterware and ASM to rolling migration mode

Cause: An operation to set Oracle ASM to rolling migration mode has successfully completed.

Action: None

CLSRSC-00470: Starting non-rolling migration of Oracle ASM

Cause: An attempt has been made to initiate non-rolling migration of Oracle ASM.

Action: None

CLSRSC-00471: Successfully initiated non-rolling migration of Oracle ASM

Cause: An operation to initiate non-rolling migration of Oracle ASM has successfully completed.

Action: None

CLSRSC-00472: Attempting to export the OCR

Cause: An attempt has been made to export the OCR.

Action: None

CLSRSC-00473: Successfully exported the OCR

Cause: The OCR has successfully been exported.

Action: None

CLSRSC-00474: Initiating upgrade of resource types

Cause: An attempt has been made to initiate upgrade of resource types.

Action: None

CLSRSC-00475: Upgrade of resource types successfully initiated.

Cause: Upgrade of resource types has successfully started.

Action: None

CLSRSC-00476: Finishing upgrade of resource types

Cause: An attempt has been made to finish upgrade of resource types.

Action: None

CLSRSC-00477: Successfully completed upgrade of resource types

Cause: Upgrade of resource types has successfully completed.

Action: None

CLSRSC-00478: Setting Oracle Clusterware active version on the last node to be upgraded

Cause: An attempt has been made on the last node to be upgraded to set the Oracle Clusterware active version.

Action: None

CLSRSC-00479: Successfully set Oracle Clusterware active version

Cause: An operation initiated on the last node to be upgraded to set Oracle Clusterware active version has successfully completed.

Action: None

CLSRSC-00480: Starting the process of upgrading local listeners

Cause: The process of upgrading local listeners has started.

Action: None

CLSRSC-00481: Successfully completed the process of upgrading local listeners

Cause: The process of upgrading local listeners has successfully completed.

Action: None

CLSRSC-00482: Running command: 'string'

Cause: An attempt has been made to run the command mentioned in the message.

Action: None

CLSRSC-00483: unable to run 'rootcrs.pl -prepatch' to perform rolling, in-place patching for shared Grid Infrastructure home

Cause: In the course of patching a shared Grid Infrastructure home, an attempt to execute the 'rootcrs.pl -prepatch' command failed because rolling in-place patching of a shared home is not allowed.

Action: Reissue the 'rootcrs.pl -prepatch' command with the '-nonrolling' or '-dstcrshome' option specified .

CLSRSC-00484: error querying CRS software version on node '*string*'

Cause: An error occurred while executing the 'crsctl query crs softwareversion' command.

Action: Correct the problem indicated in the accompanying messages and then rerun rootupgrade.sh. Contact Oracle Support Services if the problem persists.

CLSRSC-00485: Local port=*string* and remote port=*string* should not be same.

Cause: The rootupgrade script was aborted because the specified local and remote ports were the same.

Action: Rerun the rootupgrade.sh script after changing the port numbers.

CLSRSC-00487: Check for ASM compatibility version failed during downgrade.

Cause: An attempt to downgrade the current node failed because the ASM compatibility version was already advanced after upgrade.

Action: Downgrade is not allowed in this case. Contact Oracle Support Services for further action.

CLSRSC-00488: Patching the Grid Infrastructure Management Repository database failed.

Cause: An error occurred when executing the 'sqlpatch -db -MGMTDB' command' to patch the Grid Infrastructure Management Repository database.

Action: Address the issues reported by accompanying messages and rerun the 'rootcrs.pl -postpatch' command. If the problem persists, contact Oracle Support Services.

CLSRSC-00489: Stopping the Grid Infrastructure Management Repository database failed.

Cause: An error occurred while executing the 'srvctl stop mgmtdb' command.

Action: Examine the accompanying messages, correct the problem and rerun the 'rootcrs.pl -postpatch' command.

CLSRSC-00490: Starting the Grid Infrastructure Management Repository database failed.

Cause: An error occurred while executing the 'srvctl start mgmtdb' command.

Action: Examine the accompanying messages, correct the problem and rerun the 'rootcrs.pl -postpatch' command.

CLSRSC-00491: Failed to disable the Grid Infrastructure Management Repository database

Cause: An error occurred while executing the 'srvctl disable mgmtdb' command.

Action: Examine the accompanying messages, correct the problem and rerun the 'rootcrs.pl -postpatch' command.

CLSRSC-00492: Failed to enable the Grid Infrastructure Management Repository database

Cause: An error occurred while executing the 'srvctl enable mgmtldb' command.

Action: Examine the accompanying messages, correct the problem and rerun the 'rootcrs.pl -postpatch' command.

CLSRSC-00493: failed to initiate rolling patch on the current node because there is only one active HUB node

Cause: An attempt to execute the 'rootcrs.pl -prepatch' command failed because there was only one active HUB node.

Action: Reissue the 'rootcrs.pl -prepatch' command with the '-nonrolling' option specified or configure more than one active HUB node in the cluster.

CLSRSC-00494: Failed to execute this command. Current directory is under an ACFS mount point.

Cause: An attempt to execute a command that would result in a forced / shutdown of ACFS was rejected because the current directory is on an ACFS file system. Consequently, the forced shutdown of ACFS would terminate the execution of the attempted command.

Action: Ensure that the current shell has no dependencies on ACFS file systems (i.e. current directory not on ACFS and not a sub-shell of a process whose working directory is on ACFS) and retry the command.

CLSRSC-00495: failed to get active role for the node *string*

Cause: An error occurred while executing the command 'crsctl get node role status - node *nodename*'.

Action: Examine the accompanying messages, correct the problem and retry.

CLSRSC-00496: failed to get active role for the local node

Cause: An error occurred while executing the command 'crsctl get node role status'.

Action: Examine the accompanying messages, correct the problem and retry.

CLSRSC-00497: failed to retrieve the configured cluster mode

Cause: An error occurred while executing the command 'crsctl get cluster mode config'.

Action: Examine the accompanying messages, correct the problem and retry.

CLSRSC-00498: invalid cluster mode

Cause: An internal error. The cluster mode returned by the command 'crsctl get cluster mode config' was neither 'standard' nor 'flex'.

Action: Contact Oracle Support Services.

CLSRSC-00499: Stopping the Grid Infrastructure Management Repository database failed.

Cause: An error occurred while executing the 'srvctl stop mgmtldb' command.

Action: Examine the accompanying messages, correct the problem and rerun rootupgrade.sh.

CLSRSC-00500: Starting the Grid Infrastructure Management Repository database failed.

Cause: An error occurred while executing the 'srvctl start mgmtldb' command.

Action: Examine the accompanying messages, correct the problem and rerun rootupgrade.sh.

CLSRSC-00501: failed to disable the Grid Infrastructure Management Repository database

Cause: An error occurred while executing the 'srvctl disable mgmtldb' command.

Action: Examine the accompanying messages, correct the problem and rerun rootupgrade.sh.

CLSRSC-00502: failed to enable the Grid Infrastructure Management Repository database

Cause: An error occurred while executing the 'srvctl enable mgmtldb' command.

Action: Examine the accompanying messages, correct the problem and rerun rootupgrade.sh.

CLSRSC-00503: Deleting the Grid Infrastructure Management Repository database failed.

Cause: An attempt to connect to the GI Management Repository database failed or an error occurred while executing the SQL statement 'drop database'.

Action: Examine the accompanying messages, correct the problem and rerun rootupgrade.sh.

CLSRSC-00504: The root script cannot proceed on this node *string* until the current first-node operations have finished on the first node *string*.

Cause: An attempt to run the root script on this node failed because the root script was still running on the first node and had not yet completed.

Action: Allow the root script to complete execution on the first node and then restart the root script on this node.

CLSRSC-00505: The root script cannot proceed on this node *string* because the root script encountered errors during execution on the first node *string*.

Cause: An attempt to run the root script on this node failed because the root script encountered errors during execution on the first node.

Action: Correct the problems indicated by the root script on the first node and rerun the script on that node. Following successful completion on the first node, restart the root script on this node.

CLSRSC-00506: The root script cannot proceed on this node *string* because the first-node operations have not completed and the first node *string* has crashed or gone offline.

Cause: An attempt to run the root script on this node failed because the root script did not completed successfully on the first node, and the first node has crashed or gone offline.

Action: Rerun the root script on any of the remaining nodes supplying the -force option to cause it to act as the first node.

CLSRSC-00507: The root script cannot proceed on this node *string* because either the first-node operations have not completed on node *string* or there was an error in obtaining the status of the first-node operations.

Cause: An attempt to run the root script on this node was rejected because the root script had not completed (and may not have been started) on the first node or there was an error in obtaining the status of the first node.

Action: Ensure that the root script has successfully completed execution on the first node and then restart the root script on this node. The first node is the node where the installer runs.

CLSRSC-00508: The root script cannot be started with the `-first -force` option on this node *string*, while the original first node *string* is still online.

Cause: An attempt to run the root script supplying the `-first -force` option on this node failed because the first node was still online.

Action: Run the root script on the first node. Following successful completion on the first node, restart the root script on this node.

CLSRSC-00509: invalid ASM mode

Cause: This is an internal error. The ASM mode was an undefined value at this point.

Action: Contact Oracle Support Services.

CLSRSC-00510: failed to delete the voting file on diskgroup '*string*' during deconfiguration

Cause: The attempt to remove a voting file failed because an error occurred while executing the command `'crsctl delete css votedisk +diskgroup'`.

Action: Retry the above command manually. If the problem persists, contact Oracle Support Services.

CLSRSC-00511: failed to set Oracle Clusterware and ASM to rolling migration mode

Cause: An error occurred while executing the command `'crsctl start rollingupgrade'`.

Action: Correct the problem indicated in the accompanying messages and rerun `rootupgrade.sh`.

CLSRSC-00512: failed to force node *string* as the first node because it is not a hub node

Cause: An attempt to run the root script supplying the `-force` option on this node has failed because it is not a hub node.

Action: Run the root script with the `-force` option on a hub node.

CLSRSC-00514: failed to reset cardinality of Flex ASM to original value

Cause: An error occurred while attempting to reset Flex ASM cardinality, either in retrieving the previously stored value using `'crsctl status resource'` or in restoring the previous value using `'srvctl modify asm'`.

Action: Examine the accompanying messages, correct the problem and rerun `rootupgrade.sh`.

CLSRSC-00515: Starting OCR manual backup.

Cause: An attempt has been made to generate OCR manual backup.

Action: None

CLSRSC-00516: OCR manual backup successful.

Cause: OCR manual backup completed normally.

Action: None

CLSRSC-00518: cannot open directory '*string*'

Cause: An attempt to open the specified directory has failed.

Action: Ensure that the user running root script has read permission on the directory.

CLSRSC-00519: cannot move directory *string* to directory *string*

Cause: An attempt to move the source directory has failed.

Action: Ensure that the user running root script has read permission on the source directory and write permission on destination directory.

CLSRSC-00520: Clusterware version on this node too old to join target cluster

Cause: An attempt to join the current node to an upgraded cluster failed because the join is not supported for nodes with Oracle Clusterware older than version 11.2.0.1.

Action: Delete this node and then add this node back into Clusterware using the 'add node' operation.

CLSRSC-00524: Setting Oracle Clusterware to rolling migration mode

Cause: The command 'crsctl start rollingupgrade *version*' to initiate rolling migration of Oracle Clusterware was issued.

Action: None

CLSRSC-00525: Successfully set Oracle Clusterware to rolling migration mode

Cause: The command 'crsctl start rollingupgrade *version*' to initiate a rolling migration of Oracle Clusterware completed successfully.

Action: None

CLSRSC-00526: The root script cannot run with the '-first -force' options to force current node *string* as the first node.

Cause: An attempt to run the root script with options '-first -force' on this node failed because first-node operations had already been done.

Action: Run the root script on this node without the options '-first -force'.

CLSRSC-00527: The root script cannot run with the '-force' option to force current node *string* as the last node during fresh install (case: first-node operations complete).

Cause: An attempt to run the root script with option '-force' on this node failed because there are no last node operations for a fresh install, and the first-node operations had been done.

Action: Run the root script on this node without the option '-force'.

CLSRSC-00528: The root script cannot run with the '-force' options to force current node *string* which is the installer node as the last node during upgrade before first-node operations have been done.

Cause: An attempt to run the root script with option '-force' on installer node failed because the first-node operations had not been done.

Action: Run the root script on this node without the option '-force'.

CLSRSC-00529: The root script cannot run with the '-force' option to force current node *string* as the last node during fresh install (case: first-node operations not complete).

Cause: An attempt to run the root script with option '-force' on this node failed because there are no last node operations for a fresh install, and the first-node operations had not been done.

Action: Run the root script on this node with the options '-first -force'.

CLSRSC-00530: The root script cannot run with the '-force' option to force current node *string* which is a non-installer node as the last node during upgrade before first-node operations have been done.

Cause: An attempt to run the root script with option '-force' on a non- installer node failed because the first-node operations had not been done.

Action: Run the root script on this node with the options '-first -force'.

CLSRSC-00531: The root script does not need the '-first -force' options to force current node *string* as the first node.

Cause: An attempt to run the root script with options '-first -force' on this node failed because the '-first -force' options were not needed on installer node.

Action: Run the root script on this node without the options '-first -force'.

CLSRSC-00537: The root script failed to copy the OCR backup file from node *string* to shared storage.

Cause: An error occurred while copying the OCR backup file to shared storage.

Action: Examine the accompanying messages, correct the problem indicated and rerun rootupgrade.sh.

CLSRSC-00538: The root script failed to get the name of the OCR backup file on the ASM diskgroup.

Cause: An error occurred while getting the OMF name of the OCR backup file using the 'asmcmd find' command.

Action: Examine the accompanying messages from the 'asmcmd find' command, and correct the problem indicated.

CLSRSC-00539: There is at least one expired OCR backup on the ASM diskgroup, and the root script failed to remove it from the ASM diskgroup.

Cause: An error occurred while removing the expired OCR backup file using the 'asmcmd rm' command.

Action: Examine the accompanying messages from the 'asmcmd rm' command, and correct the problem indicated.

CLSRSC-00540: The root script failed to get a unique name of the OCR backup file on the ASM diskgroup using *string*.

Cause: There are more than one OMF names corresponding to the given OCR backup file name.

Action: Remove the expired OCR backup file from the ASM diskgroup using 'asmcmd rm' command.

CLSRSC-00545: Voting files are not found.

Cause: The voting files are either removed by an earlier operation or the query for the voting files failed.

Action: Run 'crsctl query css votedisk' to check if the voting files are configured.

CLSRSC-00546: The Grid Infrastructure processes identified by the following PIDs (*string*) are still active.

Cause: There were still some of Grid Infrastructure processes running after shutting down the Grid Infrastructure stack.

Action: Run the 'crsctl stop crs -force' command again, or 'rootcrs.pl -prepatch -cleanpids' to terminate active processes before continuing the patch process.

CLSRSC-00549: The root script cannot downgrade this node *string* with last node operations because the Grid Infrastructure stack is up on at least one other cluster node.

Cause: An attempt to run the root script with last node operations on this node failed because there was at least one other cluster node with its Grid Infrastructure stack up.

Action: Run the root script on this node after the Grid Infrastructure stack is down on all other cluster nodes.

CLSRSC-00550: Local node *string* failed to check the status of the Grid Infrastructure stack of other cluster nodes.

Cause: An attempt to downgrade this node with last node operations failed because the root script failed to check the status of the Grid Infrastructure stack of other cluster nodes by starting CSS in exclusive mode.

Action: Correct the problem indicated in the accompanying messages and then retry downgrade.

CLSRSC-00551: unable to start rolling mode upgrade due to nodes running or to prior non-rolling upgrade

Cause: The cluster was either previously upgraded in non-rolling mode or the Oracle Grid Infrastructure stack has been started on some nodes after the non-rolling upgrade installer interview.

Action: Shutdown the Oracle Grid Infrastructure stack on all other nodes and then rerun rootupgrade.sh.

CLSRSC-00554: unable to perform an online downgrade after the cluster was upgraded completely

Cause: An attempt to downgrade a node failed because the option '-online' was specified in the downgrade command after the cluster had been upgraded completely.

Action: Reissue the downgrade command on this node without '-online' option.

CLSRSC-00556: Oracle Clusterware stack on this node has been successfully downgraded. There were some errors which can be ignored.

Cause: The downgrade was successful, but stopping the Oracle Clusterware afterwards failed.

Action: Retry the stop operation by running 'crsctl stop crs -f' from the higher version home.

CLSRSC-00557: Oracle Clusterware stack on this node has been successfully deconfigured. There were some errors which can be ignored.

Cause: The deconfiguration was successful, but stopping the Oracle Clusterware afterwards failed.

Action: Retry the stop operation by running 'crsctl stop crs -f' from the higher version home.

CLSRSC-00558: failed to deconfigure ASM

Cause: There was an error in deconfiguring ASM.

Action: Examine the accompanying messages and correct the problem.

CLSRSC-00561: The Oracle Grid Infrastructure has already been deconfigured on this node: *string*.

Cause: An attempt to run the deconfiguration script was rejected because it had already been successfully executed on this node.

Action: No further action is required.

CLSRSC-00562: The specified disk group cannot be dropped on this cluster because services '*string*' of this cluster are still in use by other clusters: '*string*'.

Cause: An attempt to remove disk groups during server deconfiguration found a disk group that was still in use by one or more clusters that are using the ASM storage, GIMR and/or RHP services of this cluster.

Action: Deconfigure or deinstall the client clusters first, then deconfigure with '-force' option or deinstall this server cluster.

CLSRSC-00563: Failed to remove the CVU resource and type during upgrade.

Cause: An error occurred when removing the CVU resource and type during upgrade.

Action: Examine the accompanying messages and correct the problem indicated and retry.

CLSRSC-00564: Failed to disable the CVU resource during upgrade.

Cause: An error occurred when disabling the CVU resource during upgrade.

Action: Examine the accompanying messages and correct the problem indicated and retry.

CLSRSC-00566: Failed to enable and start the CVU resource during upgrade.

Cause: An error occurred when enabling and starting the CVU resource during upgrade.

Action: Examine the accompanying messages and correct the problem indicated and retry.

CLSRSC-00567: Beginning Oracle Grid Infrastructure configuration.

Cause: Oracle Grid Infrastructure configuration processing was started on this node.

Action: None

CLSRSC-00568: invalid public network information retrieved

Cause: This is an internal error. The public network information retrieved was invalid at this point.

Action: Contact Oracle Support Services.

CLSRSC-00569: failed to configure the public network in an application cluster

Cause: An attempt to configure the public network in an application cluster failed because an error occurred during execution of the 'srvctl add network' command. The accompanying error messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and retry root.sh.

CLSRSC-00570: failed to configure an application VIP for an application cluster

Cause: An attempt to configure an application VIP for an application cluster failed because an error occurred during execution of the 'appvipcfg create' command. The accompanying error messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and retry root.sh.

CLSRSC-00571: failed to copy file '*string*' from node '*string*' to file '*string*' on local node

Cause: An attempt to copy a configuration file from a remote node failed because the target node was unreachable or user equivalence did not work.

Action: Ensure that the remote node can be reached and user equivalence is properly configured across the cluster nodes, and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00583: Invalid option

Cause: An invalid command option was supplied.

Action: Reissue the command with valid options.

CLSRSC-00584: The resource '*string*' is unexpectedly not online after starting the Grid Infrastructure stack.

Cause: There was an error in starting the indicated resource.

Action: Start the resource manually using srvctl and if the problem persists, contact Oracle Support Services.

CLSRSC-00585: failed to set the cluster type to '*string*'

Cause: An attempt to set the cluster to the indicated type failed because an error occurred during execution of the command 'crsctl set cluster type'. The accompanying error messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and retry root.sh.

CLSRSC-00586: failed to remove the application VIP '*string*' in an application cluster

Cause: An attempt to remove the indicated application VIP in an application cluster failed because an error occurred during execution of the command 'appvipcfg delete'. The accompanying error messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and retry deconfiguration.

CLSRSC-00587: failed to remove the public network in an application cluster

Cause: An attempt to remove the public network in an application cluster failed because an error occurred during execution of the command 'srvctl remove network'. The accompanying error messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and retry deconfiguration.

CLSRSC-00588: failed to deconfigure Oracle Clusterware stack on this node

Cause: This is a status message.

Action: None

CLSRSC-00589: failed to deconfigure Oracle Restart on this node

Cause: This is a status message.

Action: None

CLSRSC-00591: successfully downgraded Oracle Clusterware stack on this node

Cause: This is a status message.

Action: None

CLSRSC-00592: Run 'crsctl start crs' from home *string* on each node to complete downgrade.

Cause: This is a status message.

Action: None

CLSRSC-00593: failed to downgrade Oracle Clusterware stack on this node

Cause: This is a status message.

Action: None

CLSRSC-00596: failed to configure Oracle Restart for a standalone server

Cause: An error occurred during the configuration of Oracle Restart for a standalone server. Specific details were included in the accompanying messages.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00599: failed to start the Rapid Home Provisioning server

Cause: An error occurred when starting Rapid Home Provisioning server.

Action: Check the accompanying error messages.

CLSRSC-00600: failed to stop the Rapid Home Provisioning server

Cause: An error occurred when stopping Rapid Home Provisioning server.

Action: Check the accompanying error messages.

CLSRSC-00601: failed to upgrade the Rapid Home Provisioning repository

Cause: An error occurred when upgrading the Rapid Home Provisioning repository.

Action: Check the accompanying error messages.

CLSRSC-00602: failed to disable resource *string* on node *string*

Cause: The execution of the script rootupgrade.sh did not complete because an error occurred while executing the command 'crsctl modify resource'.

Action: Examine the accompanying messages, correct reported problems and retry rootupgrade.sh.

CLSRSC-00603: failed to retrieve ACFS resources that are enabled and online

Cause: An attempt to retrieve qualified ACFS resources failed because an error occurred during execution of the command 'crsctl stat res'. The accompanying error messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry rootupgrade.sh.

CLSRSC-00604: The value of attribute VOLUME_DEVICE for the ACFS resource *string* is empty.

Cause: This is an internal error. The value of attribute VOLUME_DEVICE for the specified ACFS resource should already have been set.

Action: Contact Oracle Support Services.

CLSRSC-00606: failed to configure '*string*' as the Oracle Cluster Registry (OCR) backup location

Cause: An error occurred while configuring the Oracle Cluster Registry (OCR) backup location.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00607: The prerequisite checks related to component *string* failed during the patching.

Cause: An error was raised in one of the checks done for the patching. This message is accompanied by others providing details of the error.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00608: failed to write key '*string*' to the Oracle Cluster Registry (OCR)

Cause: An error occurred when writing the given key to the Oracle Cluster Registry (OCR).

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00609: Check for ACFS driver support failed.

Cause: An error occurred while checking whether ACFS drivers are supported, using the command 'acfsdriverstate supported'.

Action: Examine the accompanying messages, correct the problem, and retry.

CLSRSC-00611: failed to set the value of the parameter '*string*' for Cluster Synchronization Service

Cause: An error occurred when setting the value of the given parameter.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. If the problem persists contact Oracle Support Services.

CLSRSC-00612: failed to create backup disk group '*string*'

Cause: An error occurred while creating the backup disk group via 'asmca'.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00613: failed to downgrade the local node because the first node has not been successfully upgraded

Cause: An attempt to downgrade the local node failed because the first node had not been successfully upgraded.

Action: Start the older version GI stack if the older version stack has been shut down during upgrade. If the problem persists contact Oracle Support Services.

CLSRSC-00614: failed to get the list of configured diskgroups

Cause: An error occurred while getting the list of diskgroups using the 'asmcmd lsdg' command.

Action: Examine the accompanying messages from the 'asmcmd lsdg' command, and correct the problem indicated.

CLSRSC-00616: failed to downgrade the last Hub node because there are still active Leaf nodes: *string*

Cause: An attempt to downgrade the last Hub node in the cluster found one or more Leaf nodes still active.

Action: Downgrade all other nodes before downgrading the last Hub node.

CLSRSC-00617: Check for active Leaf nodes not yet downgraded failed on node *string*.

Cause: During the downgrade of current node, an attempt to check whether there were any active Leaf nodes not yet downgraded failed because the GI stack was down on the current node.

Action: Start the GI stack and retry the downgrade on the indicated node, which will abort and require intervention if active Leaf nodes in need of downgrading are discovered. Alternatively, to bypass the automated check and finish the downgrade, make sure any active Leaf nodes have been downgraded and retry the downgrade on the indicated node with the '-force' option.

CLSRSC-00618: failed to deconfigure the current node *string* because there may be active Leaf nodes and the '-force' option was not supplied

Cause: An attempt to check whether there were any active Leaf nodes not yet deconfigured failed.

Action: Rerun deconfiguration with '-force' option after making sure all active Leaf nodes have been successfully deconfigured.

CLSRSC-00619: failed to store the result after checking if the directory '*string*' is shared among nodes

Cause: The root script failed to store the information after checking if the given directory is shared among nodes.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00620: The configuration parameter OPC_NAT_ADDRESS does not include data for node '*string*'.

Cause: The root script could not configure the OPC_NAT_ADDRESS for the given node because the node was not present in the configuration parameter OPC_NAT_ADDRESS.

Action: Verify the value of the OPC_NAT_ADDRESS parameter, add the missing information, and rerun the root script.

CLSRSC-00621: could not retrieve the node number for node '*string*'

Cause: During the post configuration operations, an attempt to retrieve the node number for the indicated node failed.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00622: failed to add ASM proxy configuration

Cause: An error occurred while executing the 'srvctl add asm -proxy' command.

Action: Correct the problem indicated in the accompanying messages, then rerun the root script.

CLSRSC-00623: failed to disable ASM proxy configuration

Cause: An error occurred while executing the 'srvctl disable asm -proxy' command.

Action: Correct the problem indicated in the accompanying messages, then rerun the root script.

CLSRSC-00624: The value of attribute ENABLED for the HAIP resource is invalid.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00629: Failed to downgrade local node *string* because the OCR backup file is not on NAS shared storage. OCR backup file '*string*' must be copied to path '*string*' before rerunning downgrade on local node.

Cause: An attempt to downgrade the local node was rejected because the OCR backup file was not on NAS shared storage.

Action: Copy the OCR backup file to the indicated NAS shared storage location, then rerun the downgrade.

CLSRSC-00630: Failed to downgrade local node *string* because the OCR backup file is not on ASM shared storage. Issue the command '*string*' on the OCR master node *string* to copy the backup to ASM shared storage, then retry the downgrade with the '-force' option.

Cause: An attempt to downgrade the local node was rejected because the OCR backup file was not on ASM shared storage.

Action: Issue the indicated command on the OCR master node to copy the backup file to ASM shared storage, then retry the downgrade with the '-force' option.

CLSRSC-00631: failed to generate GUID (Globally Unique Identifier) for site '*string*'

Cause: An error occurred while generating GUID for the indicated site.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00632: failed to retrieve the status of the management database

Cause: An error occurred while retrieving the status of the management database.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00634: cannot get the site information for node *string*

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00635: Failed to get EXTENDED_CLUSTER_SITE_GUIDS from parameter file *string*. Manually copy the parameter file from an existing cluster node that has been configured.

Cause: An error occurred while reading the EXTENDED_CLUSTER_SITE_GUIDS from the parameter file because the parameter file was corrupt.

Action: Copy the parameter file from an existing cluster node that has been configured and rerun the root script.

CLSRSC-00636: The site name *string* for node *string* is invalid.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00637: failed to update the GPnP profile '*string*' with sequence number *string*

Cause: An error occurred when updating the indicated GPnP profile using the 'gpnptool edit' command.

Action: Examine the accompanying messages, correct the problems indicated if possible and retry. Otherwise Contact Oracle Support Services.

CLSRSC-00638: failed to start the Oracle Grid Infrastructure stack during downgrade

Cause: An error occurred while starting the Oracle Grid Infrastructure stack during downgrade on the local node.

Action: Ensure that all active Leaf nodes have been downgraded and retry the downgrade specifying the '-force' option.

CLSRSC-00639: failed to copy GPnP setup from existing nodes

Cause: During the configuration of the local node, an attempt to copy configuration files from an existing node failed because no node was reachable or user equivalence did not work.

Action: Ensure that at least one node can be reached and user equivalence is properly configured between the local node and existing nodes, and then rerun the 'root.sh' command. Contact Oracle Support Services if the problem persists.

CLSRSC-00640: To complete the downgrade operation, ensure that the node inventory on all nodes points to the configured Grid Infrastructure home '*string*'.

Cause: A downgrade operation prompted the user to ensure that the node inventory on all nodes points to the indicated Grid Infrastructure home. This step is required to complete the downgrade operations.

Action: On each node, update the node inventory to point to the indicated Grid Infrastructure home. Refer to the product documentation to update the node inventory.

CLSRSC-00641: failed to remove the file *string* from nodes *string*

Cause: An error occurred while executing the 'cluutil' command to remove the indicated file from the indicated cluster nodes.

Action: Manually remove the indicated file on the indicated nodes.

CLSRSC-00642: mismatch between nodes to add and sites

Cause: Root script failed because OUI input was not properly validated prior to install. This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00643: The site name *string* for added node *string* is invalid.

Cause: Root script failed because the site name from OUI input was not properly validated prior to install. This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00644: failed to retrieve the cluster class

Cause: An error occurred while executing the command 'crsctl get cluster class'.

Action: Examine the accompanying messages, correct the problem and retry.

CLSRSC-00645: Rapid Home Provisioning repository upgrade failed.

Cause: An internal error occurred when upgrading the Rapid Home Provisioning repository.

Action: Check accompanying messages and contact Oracle Support Services.

CLSRSC-00646: failed to install cvuqdisk RPM

Cause: While installing Grid Infrastructure, an attempt to install the cvuqdisk RPM failed. This is an internal error. ASM disk validation cannot be performed without this RPM, but installation will continue.

Action: Install the required version of the cvuqdisk RPM using the fix up action or manual steps as listed in the documentation.

CLSRSC-00647: failed to remove file *string\string*

Cause: An attempt to remove the indicated file failed with the error shown.

Action: Correct the problem indicated in the appended error and remove the indicated file manually.

CLSRSC-00648: No CELL configured with the site name '*string*'.

Cause: While configuring the Grid Infrastructure on Oracle Exadata, an attempt to retrieve the site and site GUID for the indicated site failed because none of the CELLS were associated with the indicated site.

Action: Either run the command 'cellcli -e alter cell siteName=<site_name>' with the indicated site to associate a CELL with the site, or delete the site using the command 'crsctl delete cluster site <site_name>', and then rerun the root script. Contact Oracle Support Services if the problem persists.

CLSRSC-00649: failed to disable the file system resource *string*

Cause: An error occurred while executing the command 'srvctl disable filesystem'. The accompanying error messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry the command.

CLSRSC-00650: failed to enable the file system resource *string*

Cause: An error occurred while executing the command 'srvctl enable filesystem'. The accompanying error messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry the command.

CLSRSC-00651: One or more deconfiguration steps failed, but the deconfiguration process continued because the -force option was specified.

Cause: An attempt to deconfigure Oracle Clusterware encountered one or more failures. The deconfiguration process continued after each failure because the -force option was specified. The preceding error messages provide detailed failure information.

Action: Examine the preceding error messages and address the issues described.

CLSRSC-00652: The member cluster GUID '*string*' in the ASM section is different from the member cluster GUID '*string*' in the GIMR section of the Cluster Manifest File '*string*'.

Cause: While configuring the Member Cluster, an attempt to retrieve the Cluster Globally Unique Identifier (GUID) from the Cluster Manifest File found different GUIDs in the Automatic Storage Management (ASM) and Grid Infrastructure Management Repository (GIMR) sections of the Cluster Manifest File. This is an internal error.

Action: Recreate the Cluster Manifest File in the Domain Services Cluster specifying all the required domain services. Rerun the installer and provide the new Cluster Manifest File during the interview.

CLSRSC-00653: Failed to retrieve GUIDs from both the ASM section and the GIMR section of the Cluster Manifest File '*string*'.

Cause: While configuring the Member Cluster, an attempt was made to retrieve the Cluster Globally Unique Identifier (GUID) from the Cluster Manifest File, but neither the Automatic Storage Management (ASM) section nor the Grid Infrastructure Management Repository (GIMR) sections of the file contained a GUID. This is an internal error.

Action: Recreate the Cluster Manifest File in the Domain Services Cluster specifying all the required domain services. Rerun the installer and provide the new Cluster Manifest File during the interview.

CLSRSC-00654: failed to set the network interface classification

Cause: An error occurred while executing the 'oifcfg setif' command to set the network interface classification. The accompanying error messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry the root script.

CLSRSC-00655: failed to delete the Clusterware configuration from the disk groups

Cause: An error occurred while deleting the Clusterware configuration from the disk groups because execution of the command 'kfod op=groups' failed to list the disk groups used by Clusterware.

Action: Correct the problems indicated in the accompanying messages and retry the root script. If the problem persists, retry the root script with -force option.

CLSRSC-00656: The disk group '*string*' containing the Oracle ASM password file '*string*' is not mounted.

Cause: An attempt to run the root script failed because the disk group where the Oracle ASM password file was stored was not mounted.

Action: Issue the command 'asmcmd mount *diskgroup*' to mount the indicated disk group and retry the root script.

CLSRSC-00657: The disk group '*string*' containing the Oracle ASM SPFILE '*string*' is not mounted.

Cause: An attempt to run the root script failed because the disk group where the Oracle ASM SPFILE was stored was not mounted.

Action: Issue the command 'asmcmd mount *diskgroup*' to mount the indicated disk group and retry the root script.

CLSRSC-00658: Inconsistencies detected in the Oracle ASM disk group '*string*' metadata.

Cause: An attempt to run the root script failed because an inconsistency was detected in the metadata for the indicated disk group. The accompanying messages provide detailed failure information.

Action: Issue the command 'asmcmd chkdg --repair' to fix the inconsistency and retry the root script.

CLSRSC-00659: failed to retrieve the Oracle ASM SPFILE location

Cause: An attempt to run the root script failed because the Oracle ASM SPFILE location could not be retrieved. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry the root script.

CLSRSC-00660: failed to retrieve the Oracle ASM password file location

Cause: An attempt to run the root script failed because the location of the Oracle ASM password file could not be retrieved. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry the root script.

CLSRSC-00661: The Oracle ASM password file does not exist at location *string*.

Cause: An attempt to run the root script failed because the Oracle ASM password file did not exist at the indicated location.

Action: Ensure that the Oracle ASM password file exists at the indicated location. Refer to the product documentation to modify the location of the ASM password file. Retry the root script.

CLSRSC-00662: failed to read key '*string*' from the Oracle Cluster Registry (OCR)

Cause: An attempt to execute the root script failed because an error occurred when reading the indicated key from the Oracle Cluster Registry (OCR). The accompanying messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00663: failed to delete key '*string*' from the Oracle Cluster Registry (OCR)

Cause: An attempt to execute the root script failed because an error occurred when deleting the indicated key from the Oracle Cluster Registry (OCR). The accompanying messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00667: found multiple ASM password files under '*string*'

Cause: An attempt to execute the root script failed because multiple ASM password files were found in the indicated directory.

Action: Refer to the product documentation for information about password file names and locations. Ensure that there is only one ASM password file in the indicated directory, then rerun the root script.

CLSRSC-00668: Failed to get the configured node role for the node *string*

Cause: An error occurred while retrieving the node role for the local node. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages, then retry the operation.

CLSRSC-00669: Local node '*string*' failed to rejoin the upgraded cluster, missing '-join' option to rootupgrade.sh.

Cause: An attempt to upgrade the indicated node did not complete successfully because the script rootupgrade.sh was executed without the '-join' option, which prevented the node from rejoining the upgraded cluster.

Action: Rerun the rootupgrade.sh script with '-join' option.

CLSRSC-00670: failed to configure the node due to unexpected parameter settings

Cause: An attempt to configure the node was rejected because unexpected configuration parameters were found in the parameter settings. This can occur if the node was deconfigured but not deleted or by running root.sh on an upgraded node.

Action: 1. To configure a node that has been deconfigured but not deleted, it must first be deleted completely. Delete and then re-add the node before configuring. 2. If the problem was that root.sh was run during an upgrade, run rootupgrade.sh to do the upgrade.

CLSRSC-00671: Pre-patch steps for patching GI home successfully completed.

Cause: This is a status message.

Action: None

CLSRSC-00672: Post-patch steps for patching GI home successfully completed.

Cause: This is a status message.

Action: None

CLSRSC-00673: Multiple sites '*string*' are associated with the site GUID '*string*'.

Cause: An attempt to check the site and site GUID information failed because multiple sites were associated with the indicated site GUID.

Action: If this problem occurred on an Oracle Exadata Database Machine (Exadata), issue the command 'cellcli alter cell siteID= *site GUID*', and then rerun the root script. If this problem did not occur on an Exadata machine, contact Oracle Support Services.

CLSRSC-00674: Multiple site GUIDs '*string*' are associated with the site name '*string*'.

Cause: An attempt to check the site and site GUID information failed because multiple site GUIDs were associated with the indicated site name.

Action: If this problem occurred on an Oracle Exadata Database Machine (Exadata), issue the command 'cellcli alter cell siteName= *site name*', and then rerun the root script. If this problem did not occur on an Exadata machine, contact Oracle Support Services.

CLSRSC-00675: Cluster-wide Grid Plug and Play profile not found on this node.

Cause: The Grid Plug and Play profile was not found on this node. The node may have been unreachable when the profile was created and distributed during an earlier install operation.

Action: Resolve the network connectivity issue and then resume the installation.

CLSRSC-00676: failed to install the USM driver

Cause: An attempt to install the USM driver was rejected because the environment variable ODMDIR was not set.

Action: Set the environment variable ODMDIR and retry the operation.

CLSRSC-00677: mismatch between site name and site GUID

Cause: An attempt to execute the root script failed because the OUI input was not properly validated prior to install. This is an internal error.

Action: Contact Oracle Support Services.

CLSRSC-00678: failed to stop one or more applications using the GIMR database

Cause: An error occurred while attempting to stop one or more applications using the Grid Infrastructure Management Repository (GIMR) database. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages, then retry the operation.

CLSRSC-00679: failed to disable ACFS resources with the older Clusterware

Cause: An error occurred while disabling ACFS resources during upgrade. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages, then retry the operation.

CLSRSC-00680: Successfully converted Oracle Autostart to a one node cluster.

Cause: This is a status message.

Action: None

CLSRSC-00681: failed to convert Oracle Autostart to a one node cluster

Cause: An error occurred during the conversion of Oracle Autostart to a one node cluster. Specific details were included in the accompanying error messages.

Action: Correct the problems indicated in the accompanying error messages and then rerun the root script.

CLSRSC-00683: failed to add OCR to Oracle ASM disk group *string*

Cause: An error occurred while adding Oracle Cluster Registry (OCR) to the indicated Oracle ASM disk group. Specific details were included in the accompanying error messages.

Action: Correct the problems indicated in the accompanying error messages and then rerun the root script.

CLSRSC-00684: failed to delete OCR from location *string*

Cause: An error occurred while deleting Oracle Cluster Registry (OCR) from the indicated existing location. Specific details were included in the accompanying error messages.

Action: Correct the problems indicated in the accompanying error messages and then rerun the root script.

CLSRSC-00685: failed to migrate the voting files to Oracle ASM disk group *string*

Cause: An error occurred while migrating voting files to the indicated Oracle ASM disk group. Specific details were included in the accompanying error messages.

Action: Correct the problems indicated in the accompanying error messages and then rerun the root script.

CLSRSC-00686: failed to increase the size of the file '*string*' to *string*MB (error: *string*)

Cause: An attempt to configure a disk group on NAS failed because an error occurred while increasing the size of the indicated file. The indicated operating system error provides specific failure information.

Action: Review the accompanying operating system error for additional details. Ensure that the indicated file system has sufficient free space. Correct the problem and rerun the root script.

CLSRSC-00687: Internal error for: *string*

Cause: An internal error occurred. The included value is an internal identifier.

Action: Oracle internal error. Contact Oracle Support Services.

CLSRSC-00690: failed to start one or more applications which use the GIMR database

Cause: An error occurred while attempting to start one or more applications which use the Grid Infrastructure Management Repository (GIMR) database. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages, then retry the operation.

CLSRSC-00694: failed to validate CRS entities for upgrade, aborting the upgrade

Cause: An attempt to upgrade CRS was aborted because an error occurred while performing pre-upgrade checks on CRS entities. Accompanying error messages provide detailed failure information.

Action: Review the root script logs for error information during the pre-upgrade checks. Contact Oracle Support Services for further action.

CLSRSC-00696: failed to remove Grid Infrastructure node applications

Cause: An error occurred while attempting to remove node applications. The accompanying messages provided detailed failure information.

Action: Examine the accompanying messages, resolve the indicated problems, and then retry the operation.

CLSRSC-00697: Failed to get the value of environment variable '*string*' from the environment file '*string*'

Cause: An attempt to read the value of the indicated environment variable from the indicated environment file failed, either because the file could not be read, or because the variable was missing from the file.

Action: Ensure that the indicated file exists and is readable, and that the indicated variable exists in the file.

CLSRSC-00698: Successfully upgraded Oracle Restart to Oracle Autostart.

Cause: This is a status message.

Action: None

CLSRSC-00699: Failed to upgrade Oracle Restart to Oracle Autostart.

Cause: An error occurred while attempting to upgrade to Oracle Autostart. Additional failure information is provided in the accompanying messages.

Action: Correct the problems indicated in the accompanying messages and retry the upgrade.

CLSRSC-00700: Disk group '*string*' contains invalid characters in its name.

Cause: An attempt to upgrade Oracle ASM to version 12.2.0.2.0 or higher was rejected because one or more disk group names contained invalid characters. Starting in version 12.2.0.2.0, disk group names should only contain letters, numbers, and the underscore character.

Action: Use the 'renamedg' tool to change the disk group name to a valid name. Then, change the names of the disks by mounting the disk group in restricted mode and using the ASM SQL command 'ALTER DISKGROUP diskgroupname RENAME DISKS ALL'. Ensure all control files used by this disk group point to the new disk group name by using the SQL command 'ALTER SYSTEM SET CONTROL_FILES'. Specify the new disk group name for the database and update the disk group, server parameter file and password file configuration using the command 'srvctl modify database -db <db_unique_name> -spfile *spfile* -pwfile <password_file_path> -diskgroup <new_dg_name>', and then retry the upgrade operation.

CLSRSC-00701: failed to stop Oracle Clusterware

Cause: An error occurred while executing the command 'crsctl stop cluster'.

Action: Stop Oracle Clusterware with the command 'crsctl stop cluster -f' and rerun the root script.

CLSRSC-00702: failed to convert the storage access on local node *string*

Cause: An attempt to convert the storage access on the local node was rejected because the operation was only supported on an Oracle Member Cluster using the Oracle ASM service from the Domain Services Cluster.

Action: Rerun the command on an Oracle Member Cluster.

CLSRSC-00703: Successfully converted storage access on local node *string*.

Cause: This is a status message.

Action: None

CLSRSC-00704: Successfully converted storage access on Oracle Member Cluster *string*.

Cause: This is a status message.

Action: None

CLSRSC-00708: failed to create directory *string* in directory *string*

Cause: An attempt to run the root script failed because an error occurred in creating the indicated directory in the indicated target directory.

Action: Ensure that the indicated target directory is writable and retry executing the root script.

CLSRSC-00709: failed to read the Cluster Manifest File *string*

Cause: An attempt to modify storage access of the member cluster failed because the Cluster Manifest File was not valid.

Action: Verify that the Cluster Manifest File is valid and accessible. Ensure that the user has read access permission for the Cluster Manifest File, and then rerun the root script.

CLSRSC-00710: Adding node aborting because a Grid Infrastructure software upgrade is in progress.

Cause: An attempt to add a node failed because execution of the root script aborted after detecting that a Grid Infrastructure (GI) software upgrade was in progress.

Action: Following successful completion of the GI upgrade processing on all nodes, and then retry the add-node operation from the beginning.

CLSRSC-00711: failed to modify resource *string* during upgrade

Cause: The execution of the script rootupgrade.sh did not complete because an error occurred while modifying the indicated resource using the command 'crsctl modify resource'.

Action: Examine the accompanying messages, correct reported problems and retry rootupgrade.sh.

CLSRSC-00712: failed to save the attributes of the OHASD resources

Cause: An attempt to record the values of the OHASD resource attributes failed because an error occurred while retrieving the values of the attributes of the OHASD resource. This message is accompanied by others providing details of the error.

Action: Correct the problems indicated by the accompanying messages and retry.

CLSRSC-00713: failed to update the attributes of the OHASD resources

Cause: An attempt to update the OHASD resources attributes failed. This message is accompanied by others providing details of the error.

Action: Correct the problems indicated by the accompanying messages and retry.

CLSRSC-00714: failed to retrieve the value of resource attributes during upgrade

Cause: The execution of the script rootupgrade.sh did not complete because an error occurred while executing the command 'crsctl query resource'.

Action: Examine the accompanying messages, correct reported problems and retry rootupgrade.sh.

CLSRSC-00715: failed to copy the RHP configuration file *string* during downgrade

Cause: An attempt to downgrade the Oracle Clusterware failed because an error occurred in copying the Rapid Home Provisioning (RHP) configuration files to the Oracle base. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry.

CLSRSC-00716: RHP could not be configured in local mode. Continuing with the Grid Infrastructure configuration to complete the install or upgrade.

Cause: An attempt to configure Rapid Home Provisioning (RHP) in local mode failed. The accompanying messages provide detailed failure information.

Action: After completion of the install or upgrade, examine the accompanying messages and resolve the indicated issues. Then configure RHP using the command 'srvctl add rhpserver - diskgroup *dname* -storage *storage-path* -local'.

CLSRSC-00717: failed to initiate the conversion of a Standalone Cluster to a Member Cluster on a non-standalone cluster

Cause: An attempt to initiate the conversion of a Standalone Cluster to a Member Cluster failed, because the operation was not supported on a non-standalone cluster.

Action: Retry executing the root script on a Standalone Cluster.

CLSRSC-00718: Succeeded extracting cluster information on a Standalone Cluster. Copy the contents of the directory '*string*' to the Domain Services Cluster before proceeding to the next step.

Cause: This is a status message.

Action: None

CLSRSC-00719: failed to create a manifest file for a Member Cluster on a non-Domain Services Cluster

Cause: An attempt to create a manifest file for a Member Cluster failed, because the operation was not initiated on a Domain Services Cluster.

Action: Retry executing the root script on the Domain Services Cluster serving the Member Cluster.

CLSRSC-00720: failed to initiate the conversion to a Member Cluster because the versions of the Standalone Cluster and the Domain Services Cluster do not match

Cause: An attempt to initiate the conversion to a Member Cluster failed, because the versions of the Standalone Cluster and the Domain Services Cluster did not match. The clusters must have the same version.

Action: Ensure that both clusters have the same version before attempting to convert a Standalone Cluster to a Member Cluster.

CLSRSC-00721: Succeeded creating the Member Cluster configuration manifest file. Copy the manifest file '*string*' to the Standalone Cluster before converting it to a Member Cluster.

Cause: This is a status message.

Action: None

CLSRSC-00722: The local node has been successfully converted to a Member Cluster node.

Cause: This is a status message.

Action: None

CLSRSC-00723: failed to initiate the conversion to a Member Cluster for cluster with version less than 19c

Cause: An attempt to initiate the conversion to a Member Cluster failed, because the cluster version was lower than 19c, and conversion to Member Cluster was supported only for versions 19c and above.

Action: Upgrade the cluster to at least version 19c, and then retry executing the root script.

CLSRSC-00725: The rootcrs script is not running from the home being patched, which should be '*string*'.

Cause: An attempt to patch the home failed, because the rootcrs script was not running from the home being patched.

Action: Rerun the rootcrs script from the home indicated in the message.

CLSRSC-00726: failed to set root script upgrade end marker

Cause: An attempt to execute the root script failed due to an unexpected error encountered in setting the root script upgrade end marker. The accompanying messages provide detailed failure information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00731: unable to join the local node to a cluster that's not completely upgraded

Cause: An attempt to join the local node was rejected because the cluster to be joined had not been completely upgraded.

Action: Finish upgrade on the cluster and then retry joining this node to the upgraded cluster.

CLSRSC-00732: The Oracle home *string* does not exist on the nodes *string*.

Cause: The given Oracle home was not found on some nodes.

Action: Contact Oracle Support Services.

CLSRSC-00733: failed to delete the Oracle service '*string*'

Cause: An error occurred while trying to delete the Oracle service.

Action: Delete the indicated service using Service Control with commands "sc.exe stop" and "sc.exe delete", and then retry the operation. If the problem persists, contact Oracle Support Services.

CLSRSC-00734: Failed to determine the last node for upgrade

Cause: The upgrade failed due to an error in setting the last node name in the Oracle Cluster Registry.

Action: This is an internal error, contact Oracle Support Services.

CLSRSC-00735: A non-rolling upgrade failed due to active remote nodes '*string*'

Cause: The indicated nodes were down at the time the upgrade was initiated, but now they are found to be running.

Action: To perform a non-rolling upgrade, stop the Grid Infrastructure stack on the remote nodes and rerun the root script on this node. To perform a rolling upgrade, exit and rerun gridSetup.

CLSRSC-00736: failed to retrieve GUID (Globally Unique Identifier) for ASM

Cause: An error occurred while accessing GUID.

Action: Correct the problem indicated in the accompanying messages and then retry the operation. Contact Oracle Support Services if the problem persists.

CLSRSC-00737: failed to retrieve cell configuration information

Cause: An error occurred while accessing the configuration information from the cell.

Action: Correct the problem indicated in the accompanying messages and then retry the operation. Contact Oracle Support Services if the problem persists.

CLSRSC-00738: failed to find a node number for the current node '*string*'

Cause: Could not find the current node in the node list.

Action: Internal Error. Contact Oracle Support Services.

CLSRSC-00739: cannot run the postpatch operation because the prepatch operation did not complete successfully

Cause: An attempt to run the postpatch operation failed because the prepatch operation did not complete successfully.

Action: Complete the prepatch operation and then retry the postpatch operation.

CLSRSC-00740: inconsistent options specified to the postpatch command

Cause: An attempt to run the postpatch operation was rejected because the specified option ('-nonrolling' or '-dstcrshome') was not earlier specified in the prepatch operation. The options specified in the prepatch and postpatch operations must be the same.

Action: Retry the postpatch operation, specifying the same options that were previously specified in the prepatch operation.

CLSRSC-00741: invalid storage type provided for Oracle Cluster Registry

Cause: The storage type provided for the Oracle Cluster Registry was invalid.

Action: Provide a valid ASM disk group or a shared NFS or Oracle Cluster File System (OCFS) location for Oracle Cluster Registry.

CLSRSC-00742: failed to disable ASM configuration

Cause: An error occurred while executing the 'srvctl disable asm' command.

Action: Correct the problem indicated in the accompanying messages, then rerun the root script.

CLSRSC-00743: failed to create key '*string*' in the Oracle Cluster Registry (OCR)

Cause: An attempt to execute the root script failed because an error occurred when creating the indicated key in the Oracle Cluster Registry (OCR). The accompanying messages provide detailed failure information.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00744: File *string* not found

Cause: The specified file either does not exist or is not accessible.

Action: Ensure the file is available for read and execute access.

CLSRSC-00745: Failed to configure ASM.

Cause: There was a failure when configuring ASM.

Action: Correct the problem indicated in the accompanying messages and then rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00746: Waiting for nodes '*string*' to complete the upgrade before proceeding with last node operations.

Cause: This is a status message.

Action: None

CLSRSC-00747: The root script cannot proceed on this node *string* until the upgrade is successfully completed on nodes '*string*'.

Cause: An attempt to run the root script on this node failed because the root script had not completed on the specified nodes.

Action: Ensure that the root script upgrade has successfully completed execution on the specified nodes and then restart the root script on this node.

CLSRSC-00748: failure while waiting for all nodes to successfully complete the upgrade

Cause: An error occurred while waiting for all nodes to complete the upgrade.

Action: Correct the problem indicated in the accompanying message and then retry the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00749: Prepatch operations have already been performed successfully.

Cause: The checkpoint for ROOTCRS_PREPATCH contains a SUCCESS value, which indicates the prepatch operations have already been performed successfully.

Action: None

CLSRSC-00750: Another invocation of the root script is running.

Cause: The invocation of the root script is stopped because another invocation is running.

Action: Wait for the current invocation of the root script to finish.

CLSRSC-00751: incorrect invocation of script *string* in an Oracle Restart environment

Cause: The Oracle Clusterware root script was invoked in an Oracle Restart environment.

Action: Run the root script for Oracle Restart instead.

CLSRSC-00752: incorrect invocation of script *string* called on a Grid Infrastructure cluster node

Cause: The Oracle Restart root script was invoked on a Grid Infrastructure cluster node.

Action: Run the root script for Oracle Clusterware instead.

CLSRSC-00753: Flex ASM credentials are not found at *string*

Cause: The Flex ASM credentials are not found when upgrading from a Flex ASM configuration.

Action: Contact Oracle Support Services.

CLSRSC-00754: Cannot do an upgrade to the home *string* since the major release version *string* is same as the version of the configured home *string*

Cause: The upgrade script was incorrectly invoked outside an upgrade context.

Action: To apply an RU or a patch, use the patching procedure.

CLSRSC-00755: Cannot patch to the home *string* since its major release version *string* is different from the version *string* of the configured home *string*

Cause: The patching script was incorrectly invoked outside a patching context.

Action: To do an upgrade, use the upgrade procedure.

CLSRSC-00756: Aborting the deconfiguration because a Grid Infrastructure upgrade is in progress

Cause: There was an attempt to deconfigure while the Grid Infrastructure (GI) upgrade was in progress, which is disallowed.

Action: If the intention is to remove the GI configuration, use the delete node procedure or the deinstall tool.

CLSRSC-00757: The oracle binary is not linked appropriately with RAC.

Cause: An attempt to run the root script failed because the oracle binary was not linked with `rac_on` for a cluster environment.

Action: Relink the oracle binary by executing `cd <GI_home>/rdbms/lib; make -f ins_rdbms.mk rac_on ioracle`.

CLSRSC-00758: The oracle binary is not linked appropriately without RAC.

Cause: An attempt to run the root script failed because the oracle binary was linked with `rac_on` for a Oracle Restart environment.

Action: Relink the oracle binary by executing `cd <GI_home>/rdbms/lib; make -f ins_rdbms.mk rac_off ioracle`.

CLSRSC-00759: Upgrading Oracle Grid Infrastructure (GI) without performing downgrade after an online abort is not supported

Cause: An attempt to run the upgrade script failed because the GI upgrade was aborted online, but the GI was not yet downgraded.

Action: Rerun the upgrade after downgrading the GI.

CLSRSC-00761: Empty site name for the local host *string*.

Cause: An attempt to execute the root script failed due to an unexpected error encountered in retrieving the value from the configuration information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00762: Empty site GUID for the local site name *string*.

Cause: An attempt to execute the root script failed due to an unexpected error encountered in retrieving the value from the configuration information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00763: failed to upgrade Grid Plug and Play (GPnP) wallets

Cause: An attempt to upgrade GPnP wallets failed due to an unexpected error.

Action: Address the issues raised in the accompanying messages and rerun the GPnP wallet upgrade script. If the problem persists, contact Oracle Support.

CLSRSC-00897: ACFS driver unload actions failed

Cause: An error occurred while unloading ACFS drivers using the 'acfsload stop' command. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages, resolve the indicated problems, and then retry the operation.

CLSRSC-00898: failed to import ACFS Credentials for this Member Cluster

Cause: An attempt to run the root script failed because of a failure to set up the ACFS Remote resources, which could not be accomplished because the ACFS credentials could not to be imported into the Oracle Cluster Registry (OCR) from the provided Cluster Manifest File. Additional failure information is provided in the accompanying ACFS messages.

Action: Correct the problems indicated in the accompanying ACFS messages and retry the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00899: failed to start the ACFS Remote resources

Cause: An attempt to run the root script failed because of a failure to start the ACFS Remote resources.

Action: Correct the problems indicated in the accompanying ACFS messages and retry the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-00900: Failed to change the modification time on file '*string*'. Error '*string*'.

Cause: An attempt to change the modification time on the indicated file failed.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00901: The destination GI home specified for out-of-place patching is the same as the configured GI home.

Cause: Either the destination GI home supplied in the command line for out-of-place patching was the same as the active GI home where the GI stack was running, or the current GI home was already switched to the destination GI home as part of out-of-place patching.

Action: None

CLSRSC-00902: Zero-Downtime Oracle Grid Infrastructure Patching not supported for the current operating system: *string*.

Cause: An attempt to use the `-transparent` option during the postpatch operation was rejected because that option was not supported on the indicated operating system.

Action: Reissue the postpatch command without the `-transparent` option.

CLSRSC-00903: Zero-Downtime Oracle Grid Infrastructure Patching is not supported for Oracle Restart.

Cause: An attempt to use the `-transparent` option during the postpatch operation for an Oracle Restart Standalone Configuration was rejected because that option was not supported for that configuration.

Action: Reissue the postpatch command without the `-transparent` option.

CLSRSC-00905: Zero-Downtime Oracle Grid Infrastructure Patching is only supported for out-of-place patching.

Cause: An attempt to use the `-transparent` option during the postpatch operation was rejected because the `-dstcrshome` option was required, but was not provided.

Action: Reissue the postpatch command without the `-transparent` option, or with both the `-transparent` option and the `-dstcrshome` option.

CLSRSC-00906: Zero-Downtime Oracle Grid Infrastructure Patching requires at least 2 Hub nodes to be running.

Cause: An attempt to use the `-transparent` option during the postpatch operation was rejected because the Cluster had only one Hub node running.

Action: Reissue the postpatch command without the `-transparent` option, or at a time when at least two Hub nodes are running.

CLSRSC-00907: Zero-Downtime Oracle Grid Infrastructure Patching is not supported on a Leaf node.

Cause: An attempt to use the `-transparent` option during the postpatch operation was rejected because the command was issued on an Oracle Clusterware Leaf node.

Action: Reissue the postpatch command without the `-transparent` option or reissue the postpatch command on a Hub node.

CLSRSC-00908: The `-nodriverupdate` option is required for out-of-place Zero-Downtime Oracle Grid Infrastructure Patching.

Cause: An attempt to use the `-transparent` option during the postpatch operation was rejected because the `-nodriverupdate` option was required, but was not provided. The `-nodriverupdate` option was required because the drivers contained in the patch were different from the drivers specified in the Grid Infrastructure inventory.

Action: Reissue the postpatch command without the `-transparent` option, or with both the `-transparent` option and the `-nodriverupdate` option.

CLSRSC-00909: Oracle Clusterware is not running on this node.

Cause: An attempt to use the -transparent option during the postpatch operation was rejected because the Oracle Clusterware was not running.

Action: Reissue the postpatch command without the -transparent option or at a time when Oracle Clusterware is running.

CLSRSC-00910: Improper option specified for command rootcrs.pl -postpatch -transparent

Cause: An attempt to re-execute the root script to perform post patch processing with the -transparent option was rejected because it had not been specified in the previous post patch run.

Action: Retry executing the root script with -postpatch but without the -transparent option.

CLSRSC-00911: Zero-Downtime Oracle Grid Infrastructure Patching is supported only for standalone cluster.

Cause: An attempt to perform postpatch processing using the -transparent option was rejected because the cluster class is not a standalone cluster.

Action: Reissue the postpatch command without the -transparent option.

CLSRSC-00912: Zero-Downtime Oracle Grid Infrastructure Patching is supported only for Oracle Clusterware version 18.0.0.0.0 or later.

Cause: An attempt to perform postpatch processing using the -transparent option was rejected because the Oracle Clusterware active version on the cluster was earlier than 18.0.0.0.0.

Action: Reissue the postpatch command without the -transparent option, or after the cluster has been upgraded to version 18.0.0.0.0 or later.

CLSRSC-00913: Zero-Downtime Oracle Grid Infrastructure Patching cannot be performed because the system is busy.

Cause: An attempt to perform postpatch processing using the -transparent option were rejected because there was not enough resources to execute transparent patching.

Action: Reissue the postpatch command without the -transparent option, or at a time when the system is less busy.

CLSRSC-00914: ASM prepatch operation failed.

Cause: An attempt to perform prepatch for ASM failed.

Action: Correct the problems indicated in the accompanying messages and retry the root script.

CLSRSC-00915: ASM postpatch operation failed.

Cause: An attempt to perform postpatch for ASM failed.

Action: Correct the problems indicated in the accompanying messages and retry the root script.

CLSRSC-00916: Failed to connect to ASM instance with DBI.

Cause: An attempt to perform operation in ASM with DBI failed because ASM connection failed or the ASM instance handle is invalid.

Action: Ensure that the ASM is connected and ASM instance handle is valid. Retry the root script.

CLSRSC-00917: Failed to online all disks during ASM postpatch.

Cause: An attempt to online all disks during ASM postpatch failed.

Action: Ensure that all disks in all diskgroups are online during postpatch. Retry the root script.

CLSRSC-00918: Zero-Downtime Oracle Grid Infrastructure Patching cannot be performed because the Cluster Synchronization Services misscount does not meet the time required. The current Cluster Synchronization Services misscount is *string* seconds.

Cause: An attempt to perform postpatch processing using the -transparent option was rejected because there was not enough time to execute transparent patching. At least 30 seconds Cluster Synchronization Services misscount is required.

Action: Reissue the postpatch command without the -transparent option or change the Cluster Synchronization Services misscount to 30 seconds or higher.

CLSRSC-00919: Failed to update the available Oracle drivers versions.

Cause: An error occurred while updating the versions of available drivers.

Action: Oracle drivers version will be updated on the next Oracle Clusterware start. To force an update, stop and start Oracle Clusterware.

CLSRSC-00920: failed to unlock the GI home since the configuration file *string* does not exist

Cause: The home being unlocked is not configured.

Action: Run the unlock operation by providing the GI home using the -dstcrshome option.

CLSRSC-00921: failed to register Oracle High Privileged Mode (Oracle HPM) service

Cause: Internal error.

Action: If the problem persists, contact Oracle Support Services.

CLSRSC-00922: failed to start Oracle High Privileged Mode (Oracle HPM) service

Cause: An attempt to start the Oracle High Privileged Mode (Oracle HPM) service failed.

Action: Check the alert log and accompanying messages, correct the problem, and retry.

CLSRSC-00925: Invalid value for the parameter *string* in the crsconfig_params file

Cause: The value of the indicated parameter is not valid or it conflicts with other parameter settings.

Action: Check the settings, correct the problem and retry.

CLSRSC-01001: Failed to add resource OC4J

Cause: An error occurred while executing the 'svctl add oc4j' command.

Action: Correct the problem indicated in the accompanying messages.

CLSRSC-01002: Failed to create or update the wallet APPQOSADMIN

Cause: An error occurred while creating the wallet.

Action: Correct the problem indicated in the accompanying messages.

CLSRSC-01003: Failed to start resource OC4J

Cause: An error occurred while executing the 'svctl start oc4j' command.

Action: Correct the problem indicated in the accompanying messages.

CLSRSC-01004: Failed to enable resource OC4J

Cause: An error occurred while executing the 'svctl enable oc4j' command.

Action: Correct the problem indicated in the accompanying messages.

CLSRSC-01005: Failed to disable resource OC4J

Cause: An error occurred while executing the 'svctl disable oc4j' command.

Action: Correct the problem indicated in the accompanying messages.

CLSRSC-01006: Failed to create the wallet APPQOSADMIN or associated users during upgrade.

Cause: An error occurred while creating the wallet APPQOSADMIN or the users oc4jadmin and qosadmin during the upgrade.

Action: Respond as follows: 1 - Correct the problem indicated in the accompanying messages. 2 - Rerun rootupgrade.sh.

CLSRSC-01007: Failed to start OC4J resource

Cause: An error occurred while executing the 'svctl start oc4j' command.

Action: Respond as follows: 1 - Correct the problem indicated in the accompanying messages. 2 - Rerun rootupgrade.sh.

CLSRSC-01008: The script *string* either does not exist or is not executable.

Cause: The specified script did not exist or was not executable.

Action: Make sure the script exists and it has execute access.

CLSRSC-01009: failed to stop resource OC4J

Cause: An error occurred while executing the 'svctl stop oc4j' command.

Action: Correct the problems indicated in the accompanying messages and rerun rootupgrade.sh

CLSRSC-01100: failed to add resource 'qosmserver'

Cause: An error occurred while executing the 'svctl add qosmserver' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-01101: failed to enable resource 'qosmserver'

Cause: An error occurred while executing the 'svctl enable qosmserver' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-01102: failed to start resource 'qosmserver'

Cause: An error occurred while executing the 'svctl start qosmserver' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-01103: failed to disable resource 'qosmserver'

Cause: An error occurred while executing the 'svctl disable qosmserver' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-01104: failed to stop resource 'qosmserver'

Cause: An error occurred while executing the 'srvctl stop qosmserver' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-01105: failed to create the credential store for resource 'qosmserver'

Cause: An error occurred while executing the 'qosctl -install' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-01106: failed to upgrade the credential store for resource 'qosmserver'

Cause: An error occurred while executing the 'qosctl -upgrade' command.

Action: Correct the problem indicated in the accompanying messages and retry.

CLSRSC-01107: failed to copy the 'ora.qosmserver' configuration file *string* during downgrade

Cause: An attempt to downgrade the 'ora.qosmserver' failed because an error occurred while copying the configuration files to the Oracle base. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry.

CLSRSC-01108: failed to copy the 'ora.qosmserver' configuration files from the Oracle Home *string* to the Oracle base *string*.

Cause: An error occurred while copying the 'ora.qosmserver' configuration files to the Oracle base. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry.

CLSRSC-01109: failed to delete the 'ora.qosmserver' configuration files from Oracle Base *string*.

Cause: An error occurred while deleting the 'ora.qosmserver' configuration files in the Oracle Base. The accompanying messages provide detailed failure information.

Action: Correct the problems indicated in the accompanying messages and retry.

CLSRSC-02000: Failed to enable CRS after successfully installing the OKA drivers.

Cause: After successfully configuring OKA during an install, upgrade, or patch, the root script failed to enable CRS again, using the command 'crsctl enable crs'.

Action: Correct the errors accompanying the failure of the enable command and rerun the install configuration step.

CLSRSC-02001: Failed to disable CRS in preparation for a node reboot.

Cause: After failure to install OKA drivers, an attempt to disable CRS in preparation for a node reboot was unsuccessful.

Action: Correct the errors accompanying the failure of the disable command, run 'crsctl disable crs', reboot, and resume the install configuration step.

CLSRSC-02002: Failed to enable CRS after successfully uninstalling the OKA drivers.

Cause: After successfully deconfiguring OKA during a downgrade, the root script failed to re-enable CRS using the command 'crsctl enable crs'.

Action: Correct the errors accompanying the failure of the enable command and rerun the deconfiguration step.

CLSRSC-02003: An operating system reboot is required to continue the deconfiguration.

Cause: The uninstall of the OKA drivers failed. An operating system reboot is required to continue the deconfiguration.

Action: Reboot the node and restart the deconfiguration step.

CLSRSC-02004: Failed to disable CRS in preparation for a node reboot.

Cause: An attempt to disable CRS in preparation for a system reboot failed. The reboot is associated with a failed removal of OKA drivers.

Action: Correct the errors accompanying the failure of the disable command, run 'crsctl disable crs', reboot, and continue the deconfiguration step.

CLSRSC-02006: Failed to create the OKA drivers resource but continuing with the installation

Cause: An error occurred while creating the OKA drivers resource.

Action: Contact Oracle Support Services.

CLSRSC-02007: OKA driver install actions failed

Cause: An error occurred while installing OKA drivers using the 'okaroot install' command.

Action: Examine the accompanying messages from the 'okaroot install' command, correct the problem and retry.

CLSRSC-02008: A system reboot is required to continue installing.

Cause: The installation of new OKA drivers requires a node reboot to continue the install.

Action: Reboot the node and rerun the install configuration step.

CLSRSC-02009: Failed to create and start the OKA drivers resource but continuing with patching

Cause: An error occurred while creating and starting the OKA drivers resource.

Action: Check if your OS kernel is supported and run 'okaroot enable' to create and start the OKA drivers resource.

CLSRSC-02501: The AFD driver install actions failed.

Cause: An error occurred while installing the AFD driver using the 'afdroot install' command.

Action: Examine the accompanying messages from the 'afdroot install' command, correct the problem and retry.

CLSRSC-02502: A system reboot is required to continue installing.

Cause: Installation of the new AFD driver requires a reboot to continue.

Action: Reboot the node and rerun the install configuration step.

CLSRSC-02503: Failed to add resource '*string*'

Cause: An error occurred while attempting to add AFD resource.

Action: Correct the problem indicated in the accompanying messages and retry the command.

CLSRSC-02504: Failed to rescan devices with 'afdtool -rescan'

Cause: An error occurred while executing the 'afdtool -rescan' command.

Action: Correct the problem indicated in the accompanying messages and retry the command.

CLSRSC-02505: An operating system reboot is required to continue the operation.

Cause: The uninstall of the AFD driver failed. An operating system reboot is required to continue the upgrade or deconfiguration.

Action: Reboot the node and restart the operation.

CLSRSC-02506: An operating system reboot is required at the end of the deinstall.

Cause: The uninstall of the AFD driver failed. An operating system reboot is required to complete the deinstall.

Action: Reboot the node after deinstall.

CLSRSC-02601: Failed to add Oracle Cluster Health Analysis resource

Cause: An error occurred while executing the 'srvctl add cha' command.

Action: Correct the problem indicated in the accompanying messages and retry the command.

CLSRSC-02602: Failed to forcibly add Oracle Cluster Health Analysis resource

Cause: An error occurred while executing the 'srvctl add cha -force' command.

Action: Correct the problem indicated in the accompanying messages and retry the command.

CLSRSC-02603: Failed to start Oracle Cluster Health Analysis resource

Cause: An error occurred while executing the 'srvctl start cha' command.

Action: Correct the problem indicated in the accompanying messages and retry the command.

CLSRSC-02604: Failed to set the TARGET to ONLINE for Oracle Cluster Health Analysis resource

Cause: An error occurred while executing the 'srvctl start cha' command.

Action: Correct the problem indicated in the accompanying messages and retry the command.

CLSRSC-02605: failed to export Oracle Cluster Health Analysis user models

Cause: An error occurred while exporting user models of Oracle Cluster Health Analysis.

Action: Check the read permissions on User models and write permissions on Grid Home.

CLSRSC-03000: Invalid object '*string*' specified on command line.

Cause: The object specified on the command line was not recognized.

Action: Use appcluster.pl with the --help option to display valid options. Ensure that a valid option is specified.

CLSRSC-03002: Oracle Clusterware has already been configured for non-database applications.

Cause: A request to configure Oracle Clusterware for non-database applications was rejected because Clusterware is already configured for non-database applications.

Action: If this is the expected state then this is not an error. If it is not then Oracle Clusterware can be de-configured and configured.

CLSRSC-03003: Cannot configure Oracle Restart for non-database applications (Clusterware is only for clusters).

Cause: A request to configure Oracle Clusterware for non-database applications was rejected because Oracle Grid Infrastructure for a stand-alone server (Oracle Restart) was configured.

Action: De-configure Oracle Restart and configure Oracle Clusterware.

CLSRSC-03004: Failed to gather the configuration information for the node applications.

Cause: An error occurred while gathering the configuration information for the node applications.

Action: Correct the problem indicated in the accompanying messages, and then retry.

CLSRSC-04000: Oracle Autonomous Health Framework (AHF) is not supported on this platform.

Cause: Informational message.

Action: None

CLSRSC-04001: Installing Oracle Autonomous Health Framework (AHF).

Cause: Informational message.

Action: None

CLSRSC-04002: Successfully installed Oracle Autonomous Health Framework (AHF).

Cause: This is a status message.

Action: None

CLSRSC-04003: Successfully patched Oracle Autonomous Health Framework (AHF).

Cause: This is a status message.

Action: None

CLSRSC-04004: Failed to install Oracle Autonomous Health Framework (AHF). Grid Infrastructure operations will continue.

Cause: The Installation of Oracle Autonomous Health Framework (AHF) failed with the accompanying errors.

Action: The Oracle Autonomous Health Framework (AHF) will not be available, but Grid Infrastructure operation is unaffected. Address the issues reported by accompanying messages and retry using the command '<GI_Home>/crs/install/ahf_setup -crshome <GI_Home>'. If the problem persists, contact Oracle Support Services for further action.

CLSRSC-04005: Failed to patch Oracle Autonomous Health Framework (AHF). Grid Infrastructure operations will continue.

Cause: An attempt to patch Oracle Autonomous Health Framework (AHF) failed with the accompanying errors.

Action: The Oracle Autonomous Health Framework (AHF) may not be available, but Grid Infrastructure operation is unaffected. Address the issues reported by accompanying messages and retry using the command '<GI_Home>/crs/install/ahf_setup -crshome <GI_Home>'. If the problem persists, contact Oracle Support Services for further action.

CLSRSC-04006: Removing Oracle Autonomous Health Framework (AHF).

Cause: Informational message.

Action: None

CLSRSC-04007: Successfully removed Oracle Autonomous Health Framework (AHF).

Cause: This is a status message.

Action: None

CLSRSC-04008: Failed to remove Oracle Autonomous Health Framework (AHF) from home location '*string*'. Grid Infrastructure operations will continue.

Cause: The accompanying errors occurred while running the Oracle Autonomous Health Framework (AHF) uninstall script.

Action: The Oracle Autonomous Health Framework (AHF) may not be available, but Grid Infrastructure operation is unaffected. Address the issues reported by accompanying messages and retry using the command '<GI_Home>/bin/ahfctl uninstall'. If the problem persists, contact Oracle Support Services for further action.

CLSRSC-04009: Starting Oracle Autonomous Health Framework (AHF).

Cause: Informational message.

Action: None

CLSRSC-04010: Successfully started Oracle Autonomous Health Framework (AHF).

Cause: This is a status message.

Action: None

CLSRSC-04011: Failed to start Oracle Autonomous Health Framework (AHF). Grid Infrastructure operations will continue.

Cause: The Oracle Autonomous Health Framework (AHF) failed to start with the accompanying errors.

Action: The Oracle Autonomous Health Framework (AHF) failing to start, but Grid Infrastructure operation is unaffected. Address the issues reported by accompanying messages and retry using the command '<GI_Home>/bin/ahfctl start'. If the problem persists, contact Oracle Support Services for further action.

CLSRSC-04012: Shutting down Oracle Autonomous Health Framework (AHF).

Cause: Informational message.

Action: None

CLSRSC-04013: Successfully shut down Oracle Autonomous Health Framework (AHF).

Cause: This is a status message.

Action: None

CLSRSC-04014: Failed to shut down Oracle Autonomous Health Framework (AHF). Grid Infrastructure operations will continue.

Cause: The Oracle Autonomous Health Framework (AHF) did not shut down for patching with the accompanying errors.

Action: A forcible stop will be issued so that patching can proceed, so no action is required.

CLSRSC-04015: Performing install or upgrade action for Oracle Autonomous Health Framework (AHF).

Cause: Informational message.

Action: None

CLSRSC-04016: Oracle Autonomous Health Framework (AHF) '*string*' not found. Grid Infrastructure operations will continue.

Cause: Informational message.

Action: None

CLSRSC-05000: -ip option used when network is DHCP.

Cause: An attempt was made to use the -ip option when the network was using the Dynamic Host Configuration Protocol (DHCP).

Action: When DHCP is used, the IP address is specified by DHCP. Do not specify the -ip option when the network is DHCP.

CLSRSC-05001: GNS is not enabled.

Cause: An attempt to create an application VIP using appvipcfg was rejected because the Grid Naming Service (GNS) had not been enabled when the Dynamic Host Configuration Protocol (DHCP) was in use. GNS is required when the network is configured to use DHCP.

Action: Ensure that GNS is configured before attempting to create a VIP using appvipcfg when DHCP is in use.

CLSRSC-05002: IP address was up or already in use.

Cause: An attempt was made to use an IP address that was up or already in use by another resource.

Action: Use a different IP address.

CLSRSC-05101: conversion to extended cluster failed

Cause: An attempt to convert the cluster to an extended cluster encountered an error. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages, resolve the problems identified, and retry the operation.

CLSRSC-05102: Oracle Clusterware services are not running on node '*string*'

Cause: An attempt to convert the cluster to an extended cluster failed because the node did not have all Oracle Clusterware services running.

Action: Start Oracle Clusterware services on the node using the command 'crsctl start crs' and retry the operation.

CLSRSC-05103: unable to add site '*string*' to configuration

Cause: An attempt to convert the cluster to an extended cluster failed because there was an error while adding a site to the configuration. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages, resolve the problems identified, and retry the operation.

CLSRSC-05104: unable to associate node '*string*' to site '*string*'

Cause: An attempt to convert the cluster to an extended cluster failed because an error was encountered while associating a node to one of the sites configured. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages, resolve the problems identified, and retry the operation.

CLSRSC-05105: invalid or missing argument '*string*'

Cause: An attempt to convert the cluster to an extended cluster failed because the indicated arguments were invalid or missing.

Action: Retry the operation passing valid arguments. The command 'rootcrs.sbs -help' displays the available options and arguments.

CLSRSC-05106: Invalid number of sites '*string*'. The number of sites cannot exceed '*string*'.

Cause: An attempt to convert the cluster to an extended cluster was rejected because the number of sites specified was greater than the maximum allowed.

Action: Retry the operation specifying a number of sites which is less than or equal to the maximum allowed.

CLSRSC-05107: invalid site name '*string*' specified

Cause: An attempt to convert the cluster to an extended cluster was rejected because an invalid site name was specified.

Action: Retry the operation and specify a site name which is at least one character long but no more than 15 characters in length. A site name consists of alphanumeric characters and the hyphen (-) character (a..z,A..Z,0..9,-). It cannot begin or end with the hyphen (-) character.

CLSRSC-05108: 'rootcrs.pl -converttoextended -first' has not been issued

Cause: An attempt to convert the cluster to an extended cluster failed because the '-first' option was not specified.

Action: Retry the operation specifying the '-first' option on this node or retry the operation after the command 'rootcrs.pl -converttoextended -first' has completed successfully on another node.

CLSRSC-05109: site '*string*' does not exist in the cluster configuration

Cause: An attempt to convert the cluster to an extended cluster failed because the option '-first' was not passed and the site name passed was not configured in the cluster.

Action: Retry the operation, either providing a site name that exists in the configuration or specifying the '-first' option.

CLSRSC-05110: unable to update ASM cardinality to '*string*'

Cause: An attempt to convert a cluster to an extended cluster failed because an error was encountered while updating the ASM cardinality. The accompanying messages provide detailed failure information.

Action: Examine the accompanying messages, resolve the problems identified, and retry the operation.

CLSRSC-05111: Node '*string*' is a Leaf node.

Cause: An attempt to convert a cluster to an extended cluster failed because the indicated node was a Leaf node. An extended cluster cannot have Leaf nodes.

Action: Update the node role from Leaf to Hub using the command 'crsctl set node role', and retry the operation.

CLSRSC-05112: unable to get the current ASM cardinality

Cause: The command 'srvctl config asm -inner' failed to return the ASM cardinality.

Action: Examine the accompanying messages, resolve the problems identified, and retry the operation.

CLSRSC-06000: failed to generate cluster root certificate wallet file

Cause: An attempt to execute the root script failed due to an unexpected error encountered in generating the cluster root certificate wallet file. The accompanying messages provide detailed failure information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-06001: failed to store cluster root certificate in OLR-CREDSTORE

Cause: An attempt to execute the root script failed due to an unexpected error encountered in storing the cluster root certificate in OLR-CREDSTORE. The accompanying messages provide detailed failure information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-06002: failed to store cluster root certificate in OCR-CREDSTORE

Cause: An attempt to execute the root script failed due to an unexpected error encountered in storing the cluster root certificate in OCR-CREDSTORE. The accompanying messages provide detailed failure information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-06003: failed to create cluster root certificate domain in the CREDSTORE.**Command: 'string'**

Cause: An attempt to execute the root script failed due to an unexpected error encountered in creating the cluster root certificate domain in the CREDSTORE. The accompanying messages provide detailed failure information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-06004: failed to retrieve cluster root certificate from OCR-CREDSTORE

Cause: An attempt to execute the root script failed due to an unexpected error encountered in retrieving the cluster root certificate from OCR-CREDSTORE. The accompanying messages provide detailed failure information.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSRSC-06005: failed to change owner of cluster root certificate to Windows LP user.

Cause: An attempt to change owner of root certificate to Windows LP user failed.

Action: Address the issues raised in the accompanying messages and rerun the root script. If the problem persists, contact Oracle Support Services.

CLSS-00001 to CLSS-03202

CLSS-00001: skgxn not active

Cause: The skgxn service is required, but is not active

Action: Verify that the clusterware skgxn is active and restart it if necessary

CLSS-00002: unable to determine local node number. type *string*

Cause: Either the skgxn service is unavailable, or the OCR configuration is incomplete/inaccurate.

Action: Verify that the clusterware skgxn is active and restart it if necessary. Additionally validate that the clusterware installation was successful, and that the local node was entered in the node listings.

CLSS-00003: unable to determine cluster name. type *string*

Cause: Name of the cluster cannot be determined from configuration.

Action: Verify that the clusterware installation was successful and that the OCR registry is available.

CLSS-00004: unable to allocate memory resources

Cause: Memory allocation routines failed.

Action: Validate that the system has sufficient memory resources to use the product.

CLSS-00099: logfile open failed for *string*, err *string*

Cause: The log file could not be opened, with error type err

Action: Verify that the log directory specified during installation exists and that the ocspd executable has permission to create a file in that directory

CLSS-00100: configuration data access failed for key *string*

Cause: Access of the configuration data indicated by key failed with error code error

Action: Verify that the clusterware installation was successful and that the OCR registry is accessible

CLSS-00101: Oracle Cluster Repository mismatch with node *string*. (*string* != *string*)

Cause: A remote node is accessing a different set of configuration. This situation can be caused by attempting to reinstall while there are active cluster nodes.

Action: Verify that the local and remote nodes are accessing the same Oracle Cluster Repository.

CLSS-00102: initialization failure: [*string*] [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: A general initialization failure occurred.

Action: Contact Oracle Customer Service for more information.

CLSS-00103: unable to read configuration information for node *string*

Cause: Incomplete configuration information for the specified node was found.

Action: Validate the integrity of the Oracle Cluster Repository, restoring it from backup if necessary.

CLSS-00200: local node *string* not listed in configuration

Cause: The OCR configuration information does not list this node as a member of the cluster

Action: Verify that the clusterware installation was successful and that the node has not been added since installation

CLSS-01200: skgxn error: category *string*, operation *string*, loc *string*

Cause: The skgxn service encountered an error, the information in the error message is vendor supplied diagnostic information

Action: Report this error to the vendor who supplied the skgxn

CLSS-02000: reconfiguration successful, incarnation *string* with *string* nodes

Cause: A rconfiguration has completed successfully

Action: None

CLSS-02001: local node number *string*, master node number *string*

Cause: Informational message regarding this incarnation

Action: None

CLSS-02200: Received node deletion request for active node *string*.

Cause: User attempted to delete a node from the configuration before shutting it down.

Action: Shut down the specified node and retry the node deletion.

CLSS-02201: endpoint already in use: *string*

Cause: The specified endpoint is already in use. Another process is using the endpoint.

Action: Shut down the other process, and retry the startup attempt.

CLSS-02202: voting device access took an excessive amount of time. (*string* sec)

Cause: A read or write to the voting device took an unacceptable amount of time.

Action: Contact the disk hardware vendor for information on improving the availability of the disk.

CLSS-02203: unable to access voting device: *string*

Cause: The CSS daemon received a failure using the voting device.

Action: Examine the permissions on the voting device. If this failure occurred later than boot time, then access to the voting device was lost.

CLSS-02204: voting device not configured. [*string*] [*string*]

Cause: A voting device was not supplied during configuration.

Action: The voting device assists in ensuring data integrity and is required by the CSS daemon. Configure a voting device and restart the cluster.

CLSS-02205: remote node *string* signaled our eviction via voting device: cause *string*

Cause: A remote node of the cluster evicted the local node due to network failure or due to software failure in the local CSS daemon.

Action: Verify the stability of the private network between the local node and the specified remote node.

CLSS-02206: local node evicted by vendor node monitor

Cause: The Operating System vendor's node monitor evicted the local node.

Action: Examine the vendor node monitor's logs for relevant information.

CLSS-02207: error *string* getting status from vendor node monitor

Cause: The CSS daemon received a failure interacting with the vendor node monitor. The local node may have been evicted or the vendor node monitor may have been shut down.

Action: Examine the vendor node monitor's logs for relevant information.

CLSS-03000: reconfiguration successful, incarnation *string* with *string* nodes

Cause: A rconfiguration has completed successfully

Action: None

CLSS-03001: local node number *string*, master node number *string*

Cause: Informational message regarding this incarnation

Action: None

CLSS-03200: timed out waiting on nested reconfiguration

Cause: The current reconfiguration hung. A network failure may have \ occurred.

Action: The local node will terminate itself to cause remote nodes to enter a nested reconfiguration. This may allow the cluster to continue operation.

CLSS-03201: An attempt to begin a nested reconfiguration failed.

Cause: unable to cancel previous reconfiguration to begin a new one

Action: None

CLSS-03202: out of sync with master: [*string*] [*string*] [*string*] [*string*]

Cause: Consistency checks between the local node and the master failed.

Action: The local daemon will terminate itself to ensure that the surviving cluster is all properly coordinated.

CLST-01101 to CLST-03203

CLST-01101: assigning default private interconnect name *string* for node *string*

Cause: A private interconnect name was not specified. The node name was used as a default instead.

Action: Verify that the node name refers to IP addresses on the private interconnect. Using a non-private network can cause performance and stability issues.

CLST-01102: assigning default host name *string* for node *string*

Cause: A host name for the node was not specified. The node name was used as a default instead.

Action: If the node name is not equal to the host name, the host name must be supplied to clscfg. Failure to do so will cause the Cluster Ready Services daemons not to function.

CLST-01103: existing configuration version (*string*) detected

Cause: An existing configuration was detected.

Action: Informational message only. No action is required. clscfg will not modify the existing configuration unless explicitly requested with the -force flag.

CLST-01104: successfully determined required configuration for all components

Cause: clscfg was able to determine the proper configuration requirements.

Action: Informational message only. No action is required. clscfg will attempt to write the configuration next.

CLST-01105: An existing configuration was detected. It was not overwritten.

Cause: An existing configuration was detected, and clscfg chose not to overwrite it.

Action: This message may be ignored if it is seen as part of starting any node other than the first one. The -force option can be used to override this decision, but if it is used when there are active cluster members, failure CLSS-0101 and data integrity issues are likely.

CLST-01301: successfully deleted *string* of *string* configuration values

Cause: clscfg completed a portion of the delete operation.

Action: Informational message only. No action is required. If some of the values were not deleted, another error message should be visible with more information.

CLST-01302: successfully deleted *string* of *string* configuration keys

Cause: clscfg completed a portion of the delete operation.

Action: Informational message only. No action is required. If some of the keys were not deleted, another error message should be visible with more information.

CLST-01303: successfully rolled back delete operation

Cause: The delete node operation failed, but the configuration was properly restored to its original state.

Action: Informational message only. No action is required.

CLST-01304: node deletion successful

Cause: The delete node operation succeeded.

Action: Informational message only. No action is required.

CLST-01401: formatting voting device: *string*

Cause: clscfg started formatting the voting device.

Action: Informational message only. No action is required.

CLST-01501: tried to delete key *string* but it was not there

Cause: clscfg attempted to delete a key as part of a delete operation, but it had already been deleted.

Action: Informational message only. No action is required. This might be an indication of corrupted configuration, or a previous delete operation that did not complete.

CLST-01901: configuring TCP ports *string*, *string*, *string*, and *string*

Cause: The specified ports were configured for use with the Cluster Ready Services Daemons.

Action: Informational message only. No action is required. To change the ports used, specify 4 alternate ports with "-t". Example: -t 1001,1002,1003,1004

CLST-01902: configuring node: node number *string*, node name *string*

Cause: This node configuration was requested.

Action: Informational message only. No action is required. To alter the list of nodes re-run the install and specify a different set of nodes, or make use of the add and delete node install options after the current install is complete.

CLST-01903: configuring node: host name *string*, private interconnect name *string*

Cause: This node configuration was requested.

Action: Informational message only. No action is required. To alter the list of nodes re-run the install and specify a different set of nodes, or make use of the add and delete node install options after the current install is complete.

CLST-01904: creating configuration with user (*string*) and group (*string*)

Cause: The configuration was set up with the specified user and group.

Action: Informational message only. No action is required. Some configuration information will only be accessible to members of the specified group. Note: On Windows platforms the group may be blank.

CLST-01999: Warning: -force specified. Overwriting existing configuration.

Cause: The -force parameter was supplied.

Action: The -force parameter will cause clscfg to overwrite the existing configuration. If used while a Cluster Ready Services cluster is actively running, this can cause instability and data integrity exposures.

CLST-02101: Too many nodes were specified. limit is *string*

Cause: Too many nodes were specified on command line.

Action: Retry the operation with a smaller number of simultaneous changes.

CLST-02102: Node *string* specified is out of range. Maximum node number is *string*.

Cause: A node was specified with node number out of range.

Action: Retry the operation with a smaller node number.

CLST-02103: Unable to parse TCP port options specified.

Cause: Arguments to the -t flag were not valid port numbers, or some number other than 4 ports were supplied.

Action: Correct the arguments to the -t flag and rerun the operation.

CLST-02104: TCP port *string* is out of bounds.

Cause: The TCP port specified was not a valid port number.

Action: Specify an another port. Usually TCP ports need to be between 1001 and 65,535.

CLST-02105: missing required parameter -l with language ID information

Cause: The -l parameter was required for the requested operation.

Action: Supply the -l parameter with the proper language ID.

CLST-02106: missing required parameter -o with path to ORA_CRS_HOME

Cause: The -o parameter was required for the requested operation.

Action: Supply the -o parameter with the proper path.

CLST-02107: failure configuring component *string*

Cause: The Oracle Cluster Repository configuration for the specified component was unsuccessful.

Action: Look for other error information and contact Oracle support.

CLST-02108: missing required parameter -q with path to the voting device

Cause: The -q parameter was required for the requested operation.

Action: Supply the -q parameter with a valid path for the voting device.

CLST-02109: missing required parameter -c with a cluster name

Cause: The -c parameter was required for the requested operation.

Action: Supply the -c parameter with a name for the cluster.

CLST-02110: missing required parameter -nn with the list of nodenames

Cause: The -nn parameter was required for the requested operation.

Action: Supply a list of node names with the format:
nodenameA,nodenumA,nodenameB,nodenumB,...

CLST-02201: node *string* already exists in the configuration with node number *string*

Cause: A node name specified for the add node operation conflicted with the existing configuration.

Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02202: private interconnect name *string* is already assigned to node number *string*

Cause: The private interconnect name specified for the add node operation conflicted with the existing configuration.

Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02203: Host name *string* is already assigned to node number *string*.

Cause: The host name specified for the add node operation conflicted with the existing configuration.

Action: Choose an alternate node to add to the cluster, or give the new node a unique name, or delete the previous node, then retry.

CLST-02204: Node number *string* is already assigned to node *string*.

Cause: The node number specified for the add node operation conflicted with the existing configuration.

Action: Chose an alternate node to add to the cluster, or give the new node a unique node number, or delete the previous node, then retry.

CLST-02301: failure *string* validating configuration of node *string*

Cause: clscfg was unable to validate existing configuration of the specified node.

Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02302: failure *string* validating configuration of private interconnect name *string*

Cause: clscfg was unable to validate existing configuration of the specified node.

Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02303: failure *string* validating configuration of node with host name *string*

Cause: clscfg was unable to validate existing configuration of the specified node.

Action: Validate the integrity of the Cluster Ready Services install on the local node, or choose another node to delete.

CLST-02304: node name *string* for node *string* does not match existing node name *string*

Cause: The node name specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02305: node number *string* for node *string* does not match existing node number *string*

Cause: The node number specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02306: private interconnect name *string* for node *string* does not match *string*

Cause: The private interconnect name specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02307: host name *string* for node *string* does not match existing host name *string*

Cause: The host name specified in a delete operation did not match the existing configuration.

Action: Specify the correct information describing the node you intend to delete, then retry.

CLST-02308: concurrent node deletion suspected when deleting key *string*

Cause: A key being deleted by the current operation was deleted by another process during the small amount of time between opening it for deletion and actually deleting it. An attempt to execute multiple separate delete operations may have occurred, and may have corrupted the configuration.

Action: Verify the integrity of the Oracle Cluster Repository, and restore from backup if necessary. If only one clscfg process was active on the cluster this may be ignored.

CLST-02309: failure updating the configuration in node deletion

Cause: clscfg was unable to modify the existing configuration for node deletion. The existing configuration was probably not harmed.

Action: Verify the integrity of the Cluster Ready Services install on the local node, and retry.

CLST-02310: CSS daemon refused node deletion, status *string*. attempting rollback

Cause: Cluster Synchronization Services daemon refused the node deletion.

Action: One or more of the designated nodes may still be active. clscfg will now attempt to roll back the deletion process. The Cluster Ready Services daemons must be shut down on a node before any attempt to remove them from the configuration. More information on why the attempt was refused may be available in the Cluster Synchronization Service logfile.

CLST-02311: failure rolling back node deletion. configuration irrecoverable

Cause: clscfg attempted to roll back the deletion process after a failure and was unable to do so. Configuration was partially deleted and left in an inconsistent state.

Action: Shut down the cluster and restore the Oracle Cluster Repository from backup.

CLST-02312: failed to completely delete node configuration

Cause: The node deletion was mostly successful, and should be functional in this state. Some portions of the configuration were not successfully deleted.

Action: This can be ignored. The safer choice is to restore the Oracle Cluster Repository from backup, and attempt the delete again. Adding any of the deleted nodes back to the configuration in the future may fail if this is ignored.

CLST-02401: failure *string* querying maximum configurable node number

Cause: clscfg was unable to determine the legitimate range of node numbers.

Action: Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02402: failure *string* querying existing configured node list

Cause: clscfg was unable to retrieve the list of currently configured nodes.

Action: Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02403: failure *string* querying the maximum node name size

Cause: clscfg was unable to determine the size of the largest node name.

Action: Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02404: failure *string* querying the cluster name

Cause: clscfg was unable to determine the existing cluster name.

Action: Verify the integrity of the Cluster Ready Services install on the local node.

CLST-02405: failure formatting voting device (*string*) at [*string*] [*string*] [*string*]

Cause: clscfg failed to format the voting device.

Action: Verify the path and permissions set on the voting device.

CLST-02501: failure *string* opening configuration for write operation

Cause: clscfg was attempting to open the current configuration for write access.

Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.

CLST-02502: failure *string* writing new configuration

Cause: clscfg was attempting to write new configuration data.

Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.

CLST-02503: failure *string* opening configuration for delete operation

Cause: clscfg received an error while attempting to delete part of the existing configuration.

Action: Verify the integrity of the Oracle Cluster Repository. Shut down the cluster and restore OCR from backup if necessary.

CLST-02504: failure *string* writing configuration to disk

Cause: clscfg received a failure writing information to the Oracle Cluster Repository.

Action: Verify the settings for the Oracle Cluster Repository and retry.

CLST-02901: The number of Oracle Cluster Repository keys exceeds limit of *string*.

Cause: clscfg ran out of internal space for keys during install.

Action: Re-run the install and specify a smaller list of nodes. When that completes, use the add node option to add the remaining nodes.

CLST-02902: The number of Oracle Cluster Repository keys exceeds limit of *string*.

Cause: clscfg ran out of internal space for keys during delete node.

Action: Re-run the delete node operation and delete fewer nodes at once.

CLST-02903: unable to allocate *string* bytes of memory at location: *string*

Cause: clscfg was unable to allocate enough memory to service the request.

Action: Ensure that the specified amount of memory will be available and retry the operation.

CLST-02904: failure *string* in SCLS API at *string*

Cause: clscfg was unable to query for information about the system setup.

Action: Contact Oracle support with the additional information printed just after this message.

CLST-02905: add, install, delete, concepts, and local are mutually exclusive

Cause: clscfg was run with two different mode flags. All mode flags are mutually exclusive.

Action: Correct the command line and try again.

CLST-02906: Clustername should be between 1 and *string* letters.

Cause: cluster name supplied with -c argument was the wrong size.

Action: Supply an alternate cluster name of an appropriate length.

CLST-02907: unknown parameter *string* supplied

Cause: An unknown parameter was passed to clscfg.

Action: Use "clscfg -help" or "clscfg -concepts" for more information.

CLST-02908: unable to determine local hostname

Cause: clscfg was unable to determine the local hostname.

Action: Verify the operating system host name configuration.

CLST-02909: The requested operation requires High Availability privileges.

Cause: The current user did not have High Availability privileges.

Action: Log in as a different user and retry the operation.

CLST-02910: Failure *string* contacting the CRS daemon.

Cause: clscfg was unable to communicate with the CRS daemon.

Action: The requested operation must be performed from an active cluster node. Validate the pre-existing installation on the local machine, or perform the operation from another node.

CLST-02911: failure *string* contacting the CSS daemon

Cause: clscfg was unable to communicate with the CSS daemon.

Action: The requested operation must be performed from an active cluster node. Validate the pre-existing installation on the local machine, or perform the operation from another node.

CLST-02999: Untranslated failure: [*string*] [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: A failure with no translation occurred.

Action: Contact Oracle Customer Support for more information.

CLST-03100: See the documentation for usage information.

Cause: Incorrect or insufficient arguments were passed to crsuser.

Action: Read documentation for instructions on how to use this tool.

CLST-03101: Enter the password for user *string*.

Cause: crsuser requires the password to register the user.

Action: Enter the requested password.

CLST-03102: Operation successful.

Cause: The operation succeeded.

Action: None

CLST-03200: internal error: [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: A failure with no translation occurred.

Action: Contact Oracle Customer support for more information.

CLST-03201: unexpected argument: *string*

Cause: crsuser failed to parse the arguments, or an unknown argument was passed.

Action: Supply the correct arguments and try again.

CLST-03202: Memory allocation failure for *string* bytes.

Cause: crsuser was unable to allocate memory.

Action: Free up some system memory and try again.

CLST-03203: insufficient privileges for action: *string*

Cause: The current user did not have sufficient privileges.

Action: Log in as another user and try again.

CLSU-00100 to CLSU-00915

CLSU-00100: operating system function: *string* failed with error data: *string*

Cause: A call to an Operating System dependent service or function returned an error indication. The message includes the name of the function and the returned error data. The latter varies by platform but typically is numeric; on most platforms it is the value of C "errno" after the failing call.

Action: This error normally is accompanied by other (higher-level) messages describing the operation that is affected by the failure. It may also include one or more of messages 101, 103, and 104 providing additional error details. All of the messages should be examined to assess the error, which may have a very ordinary cause and correction, such as an input file failing to open because the supplied name was misspelled.

CLSU-00101: operating system error message: *string*

Cause: This message accompanies message 100 above when the Operating System dependent error data can be converted into a text message. On most Oracle platforms the message is a text representation of the C "errno" value reported in message 100.

Action: See message 100.

CLSU-00102: operating system interface detected an error

Cause: This message is issued instead of messages 100-101 when a "logical" error condition (rather than failure of an Operating System function call) is detected at an Operating System specific interface. The error condition is further described by accompanying message(s), including 103 and 104.

Action: This error normally is accompanied by other (higher-level) messages describing the operation that is affected by the failure. In most cases it will also include messages 103 and 104, providing additional details about the error. All of the messages should be examined to assess the error, which may have a very ordinary cause and correction, such as a missing required environment variable.

CLSU-00103: error location: *string*

Cause: This message accompanies message 100, 102, or 105 and identifies a location in Oracle program code that encountered the error.

Action: See message 100, 102, or 105. This information normally is useful only when reporting the error condition to Oracle as a potential code bug.

CLSU-00104: additional error information: *string*

Cause: This message accompanies message 100, 102, or 105 and supplies additional information related to the error condition. A single error may include multiple lines of additional information.

Action: See message 100, 102, or 105.

CLSU-00105: operating system interface has reported an internal failure

Cause: This message indicates that an Operating System dependent interface within Oracle code has detected internal corruption or some other evidence of internal program failure.

Action: This message may be accompanied by other (higher-level) messages indicating the product operation that was affected by the failure. It may also be accompanied by either or both of messages 103 and 104. All situations reporting this condition should be referred to Oracle Support for resolution.

CLSU-00106: An improper operating system error display was attempted

Cause: During processing of an error condition, an attempt was made to format or display Operating System dependent error data, but the error data structure was found to indicate "no error".

Action: This error should be reported to Oracle Support for resolution.

CLSU-00107: operating system function: *string*; failed with error data: *string*; at location: *string*

Cause: A call to an operating system-dependent service or function returned an error. The message includes the name of the function, the returned error data, and error location. Error data varies by platform but typically is numeric. On most platforms, it is the value of C "errno" after the failing call.

Action: This error is normally accompanied by other (higher-level) messages describing the operation that is affected by the failure. It can also include one or more of messages 101 and 104 providing additional error details. All of the messages should be examined to assess the error, which may have a very ordinary cause and correction, such as an input file failing to open because the supplied name was misspelled.

CLSU-00110: The program failed to allocate *string* bytes of memory at location *string*.

Cause: An attempt to allocate memory failed unexpectedly. Either there was not enough memory or there was no memory available at all.

Action: Contact Oracle Support Services.

CLSU-00111: The program attempted to free a NULL pointer at location *string*.

Cause: The program tried to free a NULL pointer.

Action: Contact Oracle Support Services.

CLSU-00200: ** Error stack contains *number* records, newest first:\n**

Cause: The collection of errors about to be presented contains this many following records.

Action: This and the following data should be reported to Oracle Support for resolution.

CLSU-00201: ** Error stack end ****\n**

Cause: This marks the end of a collection of errors

Action: The preceding data should be reported to Oracle Support for resolution.

CLSU-00220: csem FATAL exception: *string*

Cause: Something unrecoverable happened in CLSEM.

Action: Report to Oracle Support.

CLSU-00221: ERROR printed by clsecho: *string*

Cause: An error printed by clsecho

Action: Report to Oracle Support.

CLSU-00222: WARNING printed by clsecho: *string*

Cause: A warning

Action: Note the text

CLSU-00223: Info printed by clsecho: *string*

Cause: Information printed by clsecho

Action: Report to Oracle Support.

CLSU-00300: Syntax error: expected token *string* at marker "*string*" in source "*string*"

Cause: The source string had an unexpected value at the marked location.

Action: Provide a string with correct syntax.

CLSU-00301: Syntax error: unexpected token *string* at marker "*string*" in source "*string*"

Cause: The source string had an incorrect value at the marked location.

Action: Provide a string with correct syntax.

CLSU-00302: Syntax error: unterminated quote in source "*string*"

Cause: The source string lacked a closing quote.

Action: Provide a string with correct syntax.

CLSU-00600: Internal Error [*string*] [*string*] [*string*] [*string*] [*string*]

Cause: An unexpected error occurred.

Action: Contact Oracle Support Services.

CLSU-00912: An error was received from an operating system API:\n*string*

Cause: One or more operating system-specific errors were noticed.

Action: Contact Oracle Support Services.

CLSU-00913: The program failed to allocate *string* bytes.

Cause: An attempt to allocate memory failed.

Action: Contact Oracle Support Services.

CLSU-00914: The buffer of length *string* is too short for the operation.

Cause: Either a buffer was too short, or a value was too long for the buffer.

Action: Contact Oracle Support Services.

CLSU-00915: failed to locate device driver '*string*'

Cause: The device driver has not been ported to this operating system.

Action: Contact Oracle Support Services.

CLSW-00001 to CLSW-01000

CLSW-00001: Cluster Wallet operation failed

Cause: This is generic internal error for Cluster Wallet.

Action: Contact Oracle Customer Support.

CLSW-00002: Out of heap memory.

Cause: The program ran out of heap memory.

Action: Retry the operation when more memory is available.

CLSW-00003: Error in the cluster registry (OCR) layer. [number] [string]

Cause: An error occurred in the cluster registry layer while performing a cluster wallet operation.

Action: Ensure correct operation of cluster registry by inspecting ocr error (oerr proc *ocrerror*), by using *ocrcheck* and *ocrdump*, and retry the operation.

CLSW-00004: Error in the network security layer. [number] [string]

Cause: An error occurred in the network security layer while performing a cluster wallet operation.

Action: Inspect the network security error (oerr ora *nzerr*), and take corrective action to ensure correct operation.

CLSW-00005: Cannot perform cluster wallet operation because one of the parameters is NULL.

Cause: Program tried a cluster wallet operation using a NULL parameter.

Action: Check the parameters, and retry the operation.

CLSW-00006: Cannot perform cluster wallet operation because the context is invalid.

Cause: The cluster wallet context passed was invalid.

Action: Initialize the cluster wallet and retry the operation.

CLSW-00007: Cannot perform cluster wallet operation because one of the parameters is invalid. [number] [string]

Cause: Program tried a cluster wallet operation using an invalid parameter.

Action: Check the parameters, and retry the operation.

CLSW-00008: The cluster wallet to be created already exists.

Cause: The program tried to create a cluster wallet that already exists.

Action: Retry the operation after unsetting the `CLSW_FLAGS_WALLET_CREATE`

CLSW-00009: The cluster wallet to be operated on does not exist.

Cause: Program tried to access a cluster wallet which does not exist.

Action: Check to see if the cluster wallet exists and try the operation

CLSW-00010: Error in the NLS services.

Cause: An error occurred in the NLS services while performing a cluster wallet operation.

Action: Check to see if the message file exists in \$ORACLE_HOME/has/mesg/clsw*.msb

CLSW-00011: Cannot perform cluster wallet operation because data stored in the registry is invalid.

Cause: The data stored in the registry cannot be converted to a wallet.

Action: Delete the registry key associated with the wallet and recreate the wallet.

CLSW-00012: User is not authorized to perform the cluster wallet operation. [number] [string]

Cause: Program tried an operation on a cluster wallet for which it does not have permission.

Action: Check to see if program is run as the correct user.

CLSW-00013: Error in the clusterware operating system (SCLS) services. [string]

Cause: An error occurred in the SCLS services while performing a cluster wallet operation.

Action: Check to see if NIS/LDAP on Unix and Active Directory Service on Windows has been correctly configured.

CLSW-00014: Wallet type 'string' is not supported on this operating system.

Cause: The program tried a cluster wallet operation using a wallet type that is not supported on current operating system.

Action: This is an internal error. Contact oracle support services.

CLSW-00015: Alias 'string' already exists in wallet type 'string'.

Cause: A request to add the specified alias to the wallet failed because the alias already existed in the wallet.

Action: Add an alias that does not already exist in the wallet. The password for an alias that already exists can be modified using the command 'crsctl modify wallet'.

CLSW-00016: Alias 'string' was not found in wallet type 'string'.

Cause: A request to modify the specified alias in the wallet failed because the alias did not exist in the wallet.

Action: Ensure that the alias exists in the wallet type specified. A new alias can be added to a wallet type using the command 'crsctl add wallet'.

CLSW-00017: User 'string' is not allowed to create wallet of type 'string'.

Cause: An attempt to create the wallet of the indicated type was rejected because the wallet should not be created by indicated user.

Action: Run the program as the correct user. Wallets of type 'CVUDB' must be created by the owner of the Oracle database home.

CLSW-01000: Enter Password:

Cause: This is a prompt to user to enter password.

Action: Enter password.

CLSWS-01001 to CLSWS-01018

CLSWS-01001: URL '*string*' HTTP method *string*

Cause: The program is making an HTTP request as shown.

Action: None

CLSWS-01002: The *string* of size *string* is bigger than the limit *string*.

Cause: Either the program was in error, or it was being asked to handle more data than was considered reasonable.

Action: If the size is reasonable, contact Oracle Support Services.

CLSWS-01004: An invalid value *string* was given for option '*string*'.

Cause: The value given is not valid for the option.

Action: Provide a valid value for the option.

CLSWS-01005: The URL is invalid: '*string*'.

Cause: The URL provided is invalid in some way.

Action: Provide a valid URL.

CLSWS-01006: A bad user:pass string was provided. It had no colon.

Cause: The string given for a "user:password" didn't have the separating colon.

Action: Provide a string with a colon separated user and password.

CLSWS-01007: The program received an HTTP client error, code *string* (*string*) from '*string*'.

Cause: An error was detected in the HTTP exchange.

Action: Determine if there is a client, network, or server problem.

CLSWS-01008: The program was given a malformed HTTP header, '*string*'.

Cause: The program was given an invalid HTTP header.

Action: If possible, complain to the sender.

CLSWS-01009: No 'user:pass' was provided for authentication.

Cause: The operation required a "user:password" string, but none was given.

Action: Provide the needed "user:password" value.

CLSWS-01010: An incorrect value '*string*' was given for argument '*string*'.

Cause: Internal Error.

Action: Contact Oracle Support Services.

CLSWS-01011: The program got a network client error *string (string)* from location *'string'*.

Cause: There was a network error in the operation.

Action: If possible, resolve the network or server failure.

CLSWS-01012: The program found an invalid value *'string'* instead of the expected *'string'* for argument *'string'*.

Cause: Internal Error

Action: Contact Oracle Support Services

CLSWS-01013: There was no Oracle Wallet provided for use by SSL or TLS.

Cause: The program needed an Oracle Wallet to use for secure network operation, but none was provided.

Action: Provide a valid Oracle Wallet for the operation.

CLSWS-01014: The provided Oracle Wallet was invalid for use by SSL or TLS.

Cause: There was something wrong with the Oracle Wallet give for use with secure network operation. It may be malformed, there may have been an incorrect or missing Wallet password.

Action: Provide a valid Oracle Wallet with the correct Wallet password.

CLSWS-01015: The program had an error processing JSON, error *string (string)*.

Cause: There was invalid JSON given, or a program error.

Action: If the JSON is valid, contact Oracle Support Services. If it is not, try to contact the JSON provider.

CLSWS-01016: The program experienced an error making a network connection.

Cause: The address and port may be wrong, or the server may be down.

Action: Verify the address information is correct, and check if the server is operating properly.

CLSWS-01017: The program received an unexpected response from the server.

Cause: The response did not contain something the program expected to receive.

Action: Contact Oracle Support Services.

CLSWS-01018: The operation did not succeed, and no error data was collected.

Cause: Internal program error.

Action: Contact Oracle Support Services.

CLSX-00000 to CLSX-00600

CLSX-00000: No Error

Cause: Success.

Action: No action needed.

CLSX-00200: Program ending with error code *string* (*string*).

Cause: The command completed with the indicated error condition.

Action: Examine the accompanying error messages and respond accordingly.

CLSX-00201: Not enough arguments were supplied to the '*string*' command.

Cause: Insufficient arguments were provided to the command.

Action: Refer to command inline help.

CLSX-00202: Target '*string*' is not wrap.

Cause: An object other than wrap was specified after the command verb.

Action: Refer to command inline help.

CLSX-00203: Unknown verb '*string*' for target '*string*'.

Cause: An unknown verb was given for a wrap target.

Action: Specify a valid verb for a wrap target.

CLSX-00204: Keyword '*string*' did not specify a value.

Cause: A value was not specified for the keyword.

Action: Provide a value or do not specify the argument.

CLSX-00205: Argument '*string*' is specified multiple times.

Cause: An argument was specified more than once.

Action: Specify the argument once.

CLSX-00206: Must have *-i file* before *-section name*.

Cause: A *-section name* argument was found before *-i file*.

Action: Correct the order of the arguments.

CLSX-00207: Argument *string* *propname* must immediately follow *-section section*.

Cause: A property argument was misplaced relative to *-section*.

Action: Correct the order of the arguments.

CLSX-00208: Unexpected argument '*string*' to verb '*string*'.

Cause: An incorrect argument was supplied with the indicated verb.

Action: Correct the specified argument or verb.

CLSX-00209: No output file given to 'string'.

Cause: The verb requires an output file, and none was given.

Action: Specify the output file using `-o outfile`.

CLSX-00210: Unable to process input wrap file 'string'.

Cause: An error occurred while processing an input wrap file.

Action: Refer to the accompanying error messages and respond accordingly.

CLSX-00211: Unable to process output wrap file 'string'.

Cause: An error occurred while processing an output wrap file.

Action: Refer to the accompanying error messages and respond accordingly.

CLSX-00212: Existing section 'string' will not be replaced.

Cause: A section with the specified name already exists in the output file and the `-replace` argument was not specified.

Action: Resolve the duplication or specify `-replace`.

CLSX-00213: No input file given to 'string'.

Cause: Command requires an input file, and none was given.

Action: Specify an input file using `-i infile`.

CLSX-00214: File 'string' has sections:

Cause: This is an informational message only.

Action: None

CLSX-00215: Property 'string' not found.

Cause: The property name specified with `-p[roperty] name` was not found.

Action: Supply the correct property name or remove the argument from query.

CLSX-00216: No sections marked for delete; copying all.

Cause: The delete operation did not specify what to delete.

Action: If not intending to copy everything, specify what to delete.

CLSX-00217: No input file for verb 'string'; creating empty output file 'string'.

Cause: The delete operation was invoked without an input file which produced an empty output file.

Action: Unless an empty wrap file is needed, specify an input file.

CLSX-00218: Unable to open wallet locator 'string'.

Cause: An error occurred opening the wallet for sign or verify operation.

Action: Check wallet resource locator (WRL). Examine accompanying error messages and respond accordingly.

CLSX-00219: Unable to find credentials for `-wallet_dn 'string'` in wallet 'string'.

Cause: Specified credentials were not found in the given wallet.

Action: Ensure that the correct credential designated name (DN) is supplied.

CLSX-00220: Wrap signature is not valid against wallet '*string*' and -wallet_dn '*string*'.

Cause: Wrap signature did not verify against the given wallet and designated name (DN).

Action: Check the given wallet, designated name (DN), and wrap.

CLSX-00221: Wrap signature is valid.

Cause: Wrap signature successfully verified against the given wallet and designated name (DN).

Action: None

CLSX-00222: Section '*string*' signature is not valid against wallet '*string*', -wallet_dn '*string*'.

Cause: Section signature did not verify against the given wallet and designated name (DN).

Action: Check the given wallet, designated name (DN), and wrap.

CLSX-00223: Section '*string*' signature is valid.

Cause: Section signature was successfully verified against the given wallet and designated name (DN).

Action: None

CLSX-00224: Wrap signed.

Cause: Wrap was successfully signed.

Action: None

CLSX-00225: Section '*string*' signed.

Cause: Section was successfully signed.

Action: None

CLSX-00226: Section '*string*' not found in wrap file '*string*'.

Cause: Section with the given name was not found in the input file.

Action: Specify the correct section name.

CLSX-00227: Section '*string*' copied to output.

Cause: Section with the given name was successfully copied to the output.

Action: None

CLSX-00228: Wrap file '*string*' has no sections.

Cause: This is an informational message only.

Action: None

CLSX-00229: Wrap not signed.

Cause: Wrap had no signature.

Action: Sign document before trying to verify signature.

CLSX-00230: Section '*string*' not signed.

Cause: Section had no signature.

Action: Sign section before trying to verify signature.

CLSX-00231: Section '*string*' deleted.

Cause: Section was successfully deleted.

Action: None

CLSX-00600: Internal error: [*string string string string string string*].

Cause: An unexpected error condition was detected. Included in the brackets are an internal identifier, error message, and applicable parameters.

Action: Contact Oracle Support Services.

CLSZM-00101 to CLSZM-00617

CLSZM-00101: Operation denied.

Cause: The operation was denied by security policy.

Action: Invoke the operation as a user that has privilege to execute the operation.

CLSZM-00102: The program did not find an object of type *string* with the name '*string*'.

Cause: An object with the requested name does not exist.

Action: Specify a name that exists, or create it first.

CLSZM-00103: The program failed to create a *string* object with the name '*string*', which already exists.

Cause: Making an object failed because it already existed with that name.

Action: Specify a name that does not already exist.

CLSZM-00104: The given name '*string*' was too long. The maximum length is *string*.

Cause: A request was given a longer name than is allowed.

Action: Provide a shorter name.

CLSZM-00105: The program could not add another entry to the ACL. The maximum number of entries is *string*.

Cause: The program failed to add to an entry to an ACL.

Action: Consider using roles to simplify the ACL.

CLSZM-00106: The program failed to add role *string* to role *string* because it would cause a loop.

Cause: Adding sub-role would cause role to include itself.

Action: Simplify the role inclusions.

CLSZM-00107: The program could not destroy a busy *string* object. A *string* object was still using it.

Cause: There are references to the object in other objects, and destroying it would cause inconsistencies.

Action: Delete the references first, or do a recursive destroy.

CLSZM-00108: The program failed an operation on a *string* object with the name '*string*' because it was deleted from the repository.

Cause: The object has been deleted by another process or user, so this operation could not proceed.

Action: Understand why it was deleted, and consider alternative action.

CLSZM-00600: The program detected an unspecified internal error [*string*] [*string*] [*string*] [*string*] [*string*].

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00601: The program found a buffer that was too short. It was *string*, and needed to be at least *string*.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00602: The program received a repository error, details follow.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00603: The program detected a bad repository handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00604: The program detected a bad entity handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00605: The program detected a bad entity iterator handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00606: The program detected a bad anyuser handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00607: The program detected a bad anyuser iterator handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00608: The program detected a bad authuser handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00609: The program detected a bad role handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00610: The program detected a bad role iterator handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00611: The program detected a bad ACL handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00612: The program detected a bad ACE handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00613: The program detected a bad ACE iterator handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00614: The program detected a bad privilege iterator handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00615: The program detected bad privilege bits *string*.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00616: The program detected a bad password iterator handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CLSZM-00617: The program detected a bad password handle.

Cause: Internal program error.

Action: Report to Oracle Support Services.

CRJA-00010 to CRJA-00015

CRJA-00010: Resource "{0}" timeout while performing "{1}" action

Cause: The specified resource was timed out while performing specified action. This may not indicate a problem if it occurred while starting or stopping the CRS stack.

Action: Check if the resource is online after a while. Otherwise, contact Oracle Support Services.

CRJA-00015: The cluvfy process is still running. Waiting for clean action on "ora.cvu" resource.

Cause: This is a progress message while stopping the Configuration Verification Utility (CVU) resource. The CVU agent found that the cluvfy process was still running.

Action: None

CRS-00001 to CRS-48104

CRS-00001: Message ID *string-number* not found.

Cause: The message for the given message id is not found in any language.

Action: Make sure the product is setup correctly on the system.

CRS-00002: *string*:Internal list corruption. trace file: "*string*"

Cause: An internal error was detected during trace file flush processing.

Action: Contact Oracle Support Services.

CRS-00003: An error occurred while attempting to open file "*string*". Additional diagnostics: *string*

Cause: An error was encountered while attempting to open the specified file.

Action: Examine the additional diagnostics, if available, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00004: logging terminated for the process. log file: "*string*"

Cause: One or more file system errors were encountered which caused logging to be terminated for this process.

Action: Examine preceding Alert log messages for details on the error or errors that occurred. Restart the process to reenale logging.

CRS-00005: file "*string*" deleted after close failure

Cause: This message is informational. An attempt to close the specified file failed. The contents of the file after a close error are undefined. The file has been successfully deleted. Log data are lost.

Action: None

CRS-00006: file rotation processing continues for file: "*string*"

Cause: This message is informational and indicates only that a preceding error was not sufficiently severe to terminate file rotation which might otherwise be the case.

Action: None

CRS-00007: failed to open new log file "*string*"

Cause: The file system encountered an error while attempting to open the specified file during log file rotation. Log data are lost.

Action: Review the preceding Alert log message CRS-0011 and attempt to resolve any file system environmental problems indicated. Otherwise, contact Oracle Support Services.

CRS-00008: opened new file "*string*" after close failure

Cause: This message is informational. Log data are lost.

Action: None

CRS-00009: file "*string*" reopened

Cause: An error was encountered during rotation processing so that file rotation could not proceed. The original file, which had been closed, was successfully reopened.

Action: Review Alert log messages that precede this message that identify the file system error or errors encountered. If the additional diagnostic data in a preceding alert log message indicate a file system environmental problem, attempt to correct it. Otherwise contact Oracle Support Services.

CRS-00011: An error occurred while attempting to close file "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered when attempting to close the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00012: An error occurred while attempting to rename file "*string*" to "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered when attempting to rename the source file to the destination file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00013: An error occurred while attempting to check for the existence of file "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to determine if the specified file existed.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00014: An error occurred while attempting to delete file "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to delete the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00015: An error occurred while attempting to flush file "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to flush the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00016: An error occurred while attempting to free the file name object for file "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to free the file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00017: An error occurred while attempting to create a file name object for file "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00018: An error occurred while attempting to reopen file "*string*" during file rotation. Additional diagnostics: *string*

Cause: An error was encountered while attempting to reopen the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00019: Log file rotation terminated. log file: "*string*"

Cause: One or more file system errors were encountered which caused log file rotation to be terminated for the process. Although log file rotation has been terminated, logging continues.

Action: Review Alert log messages that precede this alert log message that identify the file system error or errors encountered. If the additional diagnostic data in a preceding alert log message indicate a file system environmental problem, attempt to correct it. Otherwise contact Oracle Support Services. To reenable file rotation the process must be restarted.

CRS-00020: An error occurred while attempting to create a file name object for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00021: An error occurred while attempting to check for the existence of file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to determine if the specified file existed.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00022: An error occurred while attempting to change access permissions and privileges for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to change access permissions and privileges for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00023: An error occurred while attempting to create default permissions for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create default file permissions for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00024: An error occurred while attempting to create a file name object for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file name object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00025: An error occurred while attempting to create a file object for file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00026: failed to create one or more file name objects to rename "*string*" to "*string*" during file rotation processing

Cause: An error was encountered while attempting to create one of more file name objects for the specified files.

Action: Contact Oracle Support Services.

CRS-00027: An error occurred while attempting to determine the size of file "*string*" during file open processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to determine the size of the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00028: An error occurred while attempting to write the banner for file "*string*". Additional diagnostics: *string*

Cause: An error was encountered while attempting to write the banner record to the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00029: An error occurred while attempting to flush file "*string*" after the banner record was written. Additional diagnostics: *string*

Cause: An error was encountered while attempting to flush the specified file after writing the banner record.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00030: An invalid file type was encountered while attempting to perform file synchronization. Additional diagnostics: *string* ftype: *number*

Cause: An invalid file type specification was encountered by file synchronization services.

Action: Contact Oracle Support Services.

CRS-00031: An error occurred while attempting to flush file "*string*" during file synchronization processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to flush the specified file during file synchronization processing.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00032: An error occurred while attempting to create a file object for file "*string*" during generate-file-name processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00033: An error occurred while attempting to create a file object for file "*string*" during generate-file-name processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to create a file object for the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00034: An error occurred while attempting to open file "*string*" during generate-file-name processing. Additional diagnostics: *string*

Cause: An error was encountered while attempting to open the specified file.

Action: Examine the additional diagnostics, if any, and attempt to correct any file system environmental problems if indicated. Otherwise, contact Oracle Support Services.

CRS-00035: An invalid pointer to an internal control structure was encountered while attempting to open a log file. Additional diagnostics: *string*

Cause: An invalid pointer was encountered when attempting to open a file. Logging is disabled for the process.

Action: Contact Oracle Support Services.

CRS-00036: An error occurred while attempting to open file "*string*". Additional diagnostics: Path: *string*. Filename: *string*. rc: *number*

Cause: An error was encountered while attempting to open the specified file.

Action: Review the preceding alert log messages and attempt to resolve any file system environmental problems indicated. Otherwise, contact Oracle Support Services.

CRS-00037: An error occurred while attempting to write to file "*string*". Additional diagnostics: *string*

Cause: An error was encountered while attempting to write to the specified file. Logging is disabled for the process.

Action: Review preceding Alert log messages and attempt to resolve any file system environmental problems indicated. Otherwise, contact Oracle Support Services

CRS-00038: An invalid pointer to an internal control structure was encountered while attempting to open a trace file. Additional diagnostics: *string*

Cause: An invalid pointer was encountered when attempting to open a trace file. Tracing is disabled for the process.

Action: Contact Oracle Support Services.

CRS-00039: An error occurred while attempting to open trace file "*string*". Additional diagnostics: Path: *string*. Filename: *string*. rc: *number*

Cause: An error was encountered while attempting to open the specified file. Tracing was disabled for the process.

Action: Review the preceding alert log messages and attempt to resolve any file system environmental problems indicated. Otherwise, contact Oracle Support Services.

CRS-00040: Trace logging terminated for the process. trace file: "*string*"

Cause: One or more file system errors were encountered which caused tracing to be terminated for this process.

Action: Examine preceding Alert log messages for details on the error or errors that occurred. Restart the process to reenale logging.

CRS-00041: Trace file rotation terminated for the process. Trace file: "*string*"

Cause: One or more file system errors were encountered which caused trace file rotation to be terminated for the process. Although trace file rotation has been terminated, tracing continues.

Action: Review Alert log messages that precede this alert log message that identify the file system error or errors encountered. If the additional diagnostic data in a preceding alert log message indicate a file system environmental problem, attempt to correct it. Otherwise contact Oracle Support Services. To reenale trace file rotation the process must be restarted.

CRS-00066: The thread passing trace information to ADR has been non-responsive for *number* minutes and *number* seconds. Additional diagnostics: process name: *string*, process ID: *string*, thread ID: *string*

Cause: The diagnostic infrastructure attempted to pass trace information to the Automatic Diagnostic Repository (ADR) and encountered a problem. This is an internal error.

Action: Contact Oracle Support Services.

CRS-00067: The thread passing alert information to ADR has resumed after *number* minutes and *number* seconds. Additional diagnostics: process name: *string*, process ID: *string*, thread ID: *string*

Cause: A thread in the diagnostic infrastructure that became non-responsive for the indicated period while attempting to pass trace information to the Automatic Diagnostic Repository (ADR) became responsive again for unknown reasons. This situation could be indicative of an internal problem.

Action: If this situation recurs, contact Oracle Support Services.

CRS-00068: The thread passing alert information to ADR has been non-responsive for *number* minutes and *number* seconds. Additional diagnostics: process name: *string*, process ID: *string*, thread ID: *string*

Cause: The diagnostic infrastructure attempted to pass trace information to the Automatic Diagnostic Repository (ADR) and encountered a problem. This is an internal error.

Action: Contact Oracle Support Services.

CRS-00069: The thread passing trace information to ADR has resumed after *number* minutes and *number* seconds. Additional diagnostics: process name: *string*, process ID: *string*, thread ID: *string*

Cause: A thread in the diagnostic infrastructure that became non-responsive for the indicated period while attempting to pass trace information to the Automatic Diagnostic Repository (ADR) became responsive again for unknown reasons. This situation could be indicative of an internal problem.

Action: If this situation recurs, contact Oracle Support Services.

CRS-00184: Cannot communicate with the CRS daemon.

Cause: The CRS daemon on the local node is either not running or there was an internal communication error with the CRS daemon.

Action: Check if the CRS daemon process is running on the local node.

CRS-00210: Could not find resource '*string*'.

Cause: An attempt was made to operate on a resource that is not registered.

Action: Ensure that the resource name is specified correctly using the command 'crsctl status resource'.

CRS-00211: Resource '*string*' has already been registered.

Cause: An attempt was made to register a resource that is already registered.

Action: Ensure that the resource name is specified correctly and retry the command.

CRS-00213: Could not register resource '*string*'.

Cause: There was an internal error while registering the resource.

Action: Check the CRS daemon log file.

CRS-00214: Could not unregister resource '*string*'.

Cause: There was an internal error while unregistering the resource.

Action: Check the CRS daemon log file.

CRS-00215: Could not start resource '*string*'.

Cause: There was an internal error while starting the resource.

Action: Check the CRS daemon log file.

CRS-00216: Could not stop resource '*string*'.

Cause: There was an internal error while stopping the resource.

Action: Check the CRS daemon log file.

CRS-00217: Could not relocate resource '*string*'.

Cause: There was an internal error while relocating the resource.

Action: Check the CRS daemon log file.

CRS-00218: Could not restart the resource '*string*' on the original node.

Cause: There was an internal error while restarting the resource.

Action: Check the CRS daemon log file.

CRS-00219: Could not update resource '*string*'.

Cause: There was an internal error while updating the resource.

Action: Check the CRS daemon log file.

CRS-00220: Resource '*string*' has invalid resource profile.

Cause: Invalid attributes in the resource profile.

Action: Run the command 'crsctl status type' to identify the invalid attributes. Modify these attributes using the command 'crsctl modify type'.

CRS-00221: Resource '*string*'s action script cannot be found.

Cause: The action script has been deleted from the file system.

Action: Run 'crsctl status resource -p' to determine the action script location, and check for its existence.

CRS-00223: Resource '*string*' has placement error.

Cause: Based on the placement policy for the resource, there was no available host to which the resource could failover or start.

Action: Check the target host for the resource and restart the resource using the 'crsctl start resource' command.

CRS-00230: Member '*string*' is not in the cluster.

Cause: The hostname was not found in the cluster.

Action: Check the hostnames in the cluster.

CRS-00232: Cluster member is down. Cannot perform operation.

Cause: The node on which CRS is attempting to start the resource is down.

Action: Start the node and retry the operation.

CRS-00233: Resource or relatives are currently involved with another operation.\n

Cause: Another CRS daemon was operating on the same resource.

Action: Wait for a minute and try the command or operation again.

CRS-00253: CRS configuration error, the CRS default directory is not set in Oracle Cluster Registry.

Cause: The Oracle Cluster Registry key which contains the user default CRS key is not initialised.

Action: Check the CRS configuration. If necessary reinstall CRS.

CRS-00254: authorization failure

Cause: The user permissions were insufficient to operate on the resource.

Action: Check the permissions associated with the resource using 'crsctl getperm resource' and set the appropriate user permissions using 'crsctl setperm resource'.

CRS-00255: CRSD is not running in privileged mode. Insufficient permissions to run this command.

Cause: The CRS daemon was not running as the privileged user.

Action: Check if the CRS daemon is running as root (UNIX) or Administrator (Windows).

CRS-00256: Username conflicts with the owner of the resource.

Cause: An attempt was made to give separate user level permissions for the owner of the resource.

Action: Check the owner of the resource and the user being given permissions.

CRS-00257: Groupname conflicts with the primary group of the resource.

Cause: An attempt was made to give separate group level permissions for the primary group of the resource.

Action: Check the primary group of the resource and the group being given permissions.

CRS-00258: Invalid ACL string format.

Cause: An invalid permission string (ACL) was supplied.

Action: Check the syntax of the permission string (ACL).

CRS-00259: Owner of the resource does not belong to the group.

Cause: The owner of the resource does not belong to the expected group.

Action: If this resource is owned by the root user, check if the root user belongs to the dba group.

CRS-00271: CRSD shutdown is already in progress.\n

Cause: crsctl stop command is issued before waiting for a prior stop command to finish.

Action: Wait for the currently running shutdown command to complete before issuing subsequent command.

CRS-00272: This command remains for backward compatibility only

Cause: A deprecated command was issued.

Action: For all new use cases, use the replacement.

CRS-00273: This command is deprecated and has been replaced by 'string'

Cause: A deprecated command was issued.

Action: For all new use cases, use the replacement.

CRS-00274: This command is deprecated and its functionality incorporated into 'string'

Cause: A deprecated command was issued.

Action: For all new use cases, use the replacement.

CRS-00275: This command is not supported in Oracle Restart environment.

Cause: One of the "crs_" commands was issued in an Oracle Restart environment.

Action: Use the corresponding crsctl command.

CRS-00325: Unable to process the command; CRS upgrade is in progress.

Cause: A command that cannot be executed when CRS upgrade is in progress was issued.

Action: Retry the command after the CRS upgrade is complete.

CRS-00402: Could not make safe directory('string')

Cause: Unable to create safe directory.

Action: Check if you have proper permissions and sufficient space on the disk to create the directory.

CRS-00403: Could not change working directory to safe directory('string')

Cause: Unable to change directory to safe directory.

Action: Check if safe directory exists and if you have proper permissions.

CRS-00406: Could not create lock directory ('string')

Cause: Unable to create lock directory.

Action: Check if you have proper permissions and sufficient space on the disk to create the directory.

CRS-00407: Another CRSD may be running, could not obtain lock file 'string'.

Cause: Unable to obtain lock file as another CRSD may be running.

Action: Stop the existing CRSD before attempting to start CRSD again.

CRS-00413: Could not initialize the Cluster Synchronization Services context

Cause: Unable to communicate with the cluster services.

Action: Verify that the Cluster Synchronization Services Daemon is properly configured and is running.

CRS-00414: Could not establish Event Manager connection

Cause: Unable to communicate with Event Manager daemon.

Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.

CRS-00451: CRS configuration error, unable to initialize Oracle Cluster Registry.

Cause: The Oracle Cluster Registry that contains information about the CRS configuration is unavailable.

Action: Check the OCR configuration using the ocrcheck utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

CRS-00452: CRS configuration error, unable to find CRSD Connection Information in Oracle Cluster Registry.

Cause: The Oracle Cluster Registry key which contains the user default CRSD connection is not initialized.

Action: Check the OCR configuration using the ocrcheck utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

CRS-00453: CRS configuration error, unable to find Instance Information in Oracle Cluster Registry.

Cause: The Oracle Cluster Registry key which contains the Instance's information is not initialized.

Action: Check the OCR configuration using the ocrcheck utility and resolve any issues it reports. If the problem persists, contact Oracle Support Services.

CRS-00471: Node number is not found

Cause: Cluster Synchronization Services is unable to retrieve the node name.

Action: Verify your cluster installation, including any vendor cluster ware. If necessary reinstall the cluster.

CRS-00472: Node name is not found

Cause: Cluster Services is unable to retrieve the node name.

Action: Verify your cluster installation, including any vendor cluster ware. If necessary reinstall the cluster.

CRS-00602: Encountered operating system error '*string*' while authenticating user '*string*'. Details at *string* in *string*.

Cause: The operating system experienced an error when Clusterware authenticated the specified user.

Action: Verify that the authentication service in your environment is functioning correctly. If the problem persists, contact Oracle Support Services.

CRS-00700: Oracle High Availability Service aborted due to failure to allocate memory. Details at *string* in *string*.

Cause: Memory allocation failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00701: Oracle High Availability Service aborted due to failure to obtain identity of the running process. Details at *string* in *string*.

Cause: Failed to retrieve user id.

Action: Check <crs_home> owner and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00702: Oracle High Availability Service aborted due to failure to run as privileged user. Details at *string* in *string*.

Cause: Oracle High Availability Service was not running as privileged user.

Action: On Unix, restart Cluster Ready Service as privileged user using 'crsctl stop crs -f' followed by 'crsctl start crs'. On Windows, check the privileges of the Oracle High Availability Service and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00703: Oracle High Availability Service aborted due to failure to initialize the communication context. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00704: Oracle High Availability Service aborted due to Oracle Local Registry error [*string*]. Details at *string* in *string*.

Cause: Oracle Local Registry aborted with an error. Look at the associated error message to determine the underlying issue.

Action: Solve the underlying issue and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00708: Oracle High Availability Service aborted due to failure to retrieve ORA_CRS_HOME environment variable. Details at *string* in *string*.

Cause: An environment variable required by Oracle High Availability Service failed to be set at initialization.

Action: Run 'rootcrs.pl -unlock' followed by 'rootcrs.pl -patch' and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00709: Oracle High Availability Service aborted due to failure to initialize ORA_CRS_HOME path. Details at *string* in *string*.

Cause: Oracle High Availability Service ORA_CRS_HOME path could not be initialized.

Action: Check for execute permissions on the Grid Infrastructure home or <crs_home> and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00712: Oracle High Availability Service aborted due to failure to initialize the network layer with error [*number*]. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00713: An error occurred initializing the Reboot Advisory Monitor: error code [*number*]. Details at *string* in *string*.

Cause: An error occurred initializing the Reboot Advisory Monitor component of Oracle High Availability Service. This error is not fatal; Oracle High Availability Service processing continues.

Action: Examine the Clusterware alert log for messages providing details of the error. If the error is correctable, do so and then restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If no messages are found or you do not understand how to correct the problem, contact Oracle Support Services.

CRS-00714: Oracle Clusterware Release *number.number.number.number.number*.

Cause: The Oracle High Availability Services Daemon (OHASD) was started as part of a general start of the Oracle Clusterware stack on this node.

Action: None

CRS-00715: Oracle High Availability Service has timed out waiting for init.ohasd to be started.

Cause: The Oracle High Availability Service requires that initd start init.ohasd to successfully initialize.

Action: 1. Check the run level to ensure that you are in the correct runlevel using `cluvfy` ("`cluvfy stage -pre crsinst -n nodelist`"); 2. If the run level is correct, diagnose the reason for `init.d` not starting `init.oahasd`.

CRS-00716: Oracle High Availability Service failed to initialize ADR automatic purge. Details at *string* in *string*.

Cause: An attempt to initialize automatic purge processing for the Automatic Diagnostic Repository (ADR) failed. This error is not fatal, but automated periodic removal of ADR trace and related data will not occur.

Action: ADR data can be purged manually using the ADRCI command line tool. However, repeated occurrences of this message should be reported to Oracle Support Services.

CRS-00800: Cluster Ready Service aborted due to failure to allocate memory. Details at *string* in *string*.

Cause: Memory allocation failed.

Action: Restart Cluster Ready Service using `'crsctl stop crs -f'` followed by `'crsctl start crs'`. If the problem persists, contact Oracle Support Services.

CRS-00801: Cluster Ready Service aborted due to failure to obtain identity of the running process. Details at *string* in *string*.

Cause: Failed to retrieve user id.

Action: Check `<crs_home>` owner and restart Cluster Ready Service using `'crsctl stop crs -f'` followed by `'crsctl start crs'`. If the problem persists, contact Oracle Support Services.

CRS-00802: Cluster Ready Service aborted due to failure to run as privileged user. Details at *string* in *string*.

Cause: Cluster Ready Service was not running as privileged user.

Action: On Unix, restart Cluster Ready Service as privileged user using `'crsctl stop crs -f'` followed by `'crsctl start crs'`. On Windows, check the privileges of the Oracle High Availability Service and restart Cluster Ready Service using `'crsctl stop crs -f'` followed by `'crsctl start crs'`. If the problem persists, contact Oracle Support Services.

CRS-00803: Cluster Ready Service aborted due to failure to initialize the communication context. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using `'crsctl stop crs -f'` followed by `'crsctl start crs'`. If the problem persists, contact Oracle Support Services.

CRS-00804: Cluster Ready Service aborted due to Oracle Cluster Registry error [*string*]. Details at *string* in *string*.

Cause: Oracle Cluster Registry aborted with an error. Look at the associated error message to determine the underlying issue.

Action: Solve the underlying issue and restart Cluster Ready Service using `'crsctl stop crs -f'` followed by `'crsctl start crs'`. If the problem persists, contact Oracle Support Services.

CRS-00805: Cluster Ready Service aborted due to failure to communicate with Cluster Synchronization Service with error [*number*]. Details at *string* in *string*.

Cause: The Cluster Synchronization Service is unreachable.

Action: Restart Cluster Ready Service using `'crsctl stop crs -f'` followed by `'crsctl start crs'`. If the problem persists, contact Oracle Support Services.

CRS-00806: Cluster Ready Service aborted due to failure to retrieve the local node name. Details at *string* in *string*.

Cause: The Cluster Synchronization Service node name is not accessible.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00807: Cluster Ready Service aborted due to failure to check version compatibility. Details at *string* in *string*.

Cause: Oracle Cluster Registry content is not compatible with this version of Cluster Ready Service.

Action: Start the correct version of Cluster Ready Service. If the problem persists, contact Oracle Support Services.

CRS-00808: Cluster Ready Service aborted due to failure to retrieve ORA_CRS_HOME environment variable. Details at *string* in *string*.

Cause: An environment variable required by Cluster Ready Service failed to be set at initialization.

Action: Run 'rootcrs.pl -unlock' followed by 'rootcrs.pl -patch' and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00809: Cluster Ready Service aborted due to failure to initialize ORA_CRS_HOME path. Details at *string* in *string*.

Cause: Cluster Ready Service ORA_CRS_HOME path could not be initialized.

Action: Check for execute permissions on the Grid Infrastructure home or <crs_home> and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00810: Cluster Ready Service aborted due to failure to communicate with Event Management Service with error [*number*]. Details at *string* in *string*.

Cause: The Event Management Service is unreachable.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00811: Cluster Ready Service aborted due to failure to build dependency graph. Details at *string* in *string*.

Cause: There exists inconsistencies in the resources dependencies.

Action: Check the resources dependencies and restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00812: Cluster Ready Service aborted due to failure to initialize the network layer with error [*number*]. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00813: Cluster Ready Service aborted due to failure to initialize the network layer with error [*string*]. Details at *string* in *string*.

Cause: The network layer initialization failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-00814: Cluster Ready Service aborted due to failure to start thread with error [number]. Details at string in string.

Cause: Thread creation failed.

Action: Restart Cluster Ready Service using 'crsctl stop crs -f' followed by 'crsctl start crs'. If the problem persists, contact Oracle Support Services.

CRS-01001: The OCR was formatted using version number.

Cause: Successfully formatted the OCR location(s).

Action: None

CRS-01002: The OCR was restored from file string.

Cause: The OCR was successfully restored from a backup file as requested by the user.

Action: None

CRS-01003: The OCR format was downgraded to version number.

Cause: The OCR was successfully downgraded to an earlier block format as requested by the user.

Action: None

CRS-01004: The OCR was imported from string.

Cause: Successfully imported the OCR contents from a file.

Action: None

CRS-01005: Oracle Clusterware upgrade was completed. Version has changed from [number, string] to [number, string]. Details in string.

Cause: The Oracle Clusterware was successfully upgraded to a version.

Action: None

CRS-01006: The OCR location string is inaccessible. Details in string.

Cause: An error occurred while accessing the OCR.

Action: Use the ocrcheck command to validate the accessibility of the device and its block integrity. Check that the OCR location in question has the correct permissions. Determine whether this behavior is limited to one node or whether it occurs across all of the nodes in the cluster. Use the ocrconfig command with the -replace option to replace the OCR location.

CRS-01007: The OCR/OCR mirror location was replaced by string.

Cause: The OCR location was successfully replaced as requested by the user.

Action: None

CRS-01008: Node string is not responding to OCR requests. Details in string.

Cause: Error in communicating to the OCR server on a peer node. This OCR did not receive a notification regarding its peer's death within the specified time.

Action: Contact Oracle Support Services.

CRS-01009: The OCR configuration is invalid. Details in *string*.

Cause: The OCR configuration on this node does not match the OCR configuration on the other nodes in the cluster.

Action: Determine the OCR configuration on the other nodes in the cluster on which Oracle Clusterware is running by using the ocrcheck command. Run the ocrconfig command with the -repair option to correct the OCR configuration on this node.

CRS-01010: The OCR mirror location *string* was removed.

Cause: The OCR location was successfully removed as requested by the user.

Action: None

CRS-01011: OCR cannot determine that the OCR content contains the latest updates. Details in *string*.

Cause: The OCR could not be started. The OCR location configured on this node does not have the necessary votes and might not have the latest updates.

Action: Ensure that the other nodes in the cluster have the same OCR location configured. If the configuration on the other nodes in the cluster does not match, then run the ocrconfig command with the -repair option to correct the configuration on this node. If the configurations on all of the nodes match, use the ocrdump command to ensure that the existing OCR location has the latest updates. Run the ocrconfig command with the -overwrite option to correct the problem. If the se procedures do not correct the problem, then contact Oracle Support Services.

CRS-01012: The OCR service started on node *string*.

Cause: The OCR was successfully started.

Action: None

CRS-01013: The OCR location in an ASM disk group is inaccessible. Details in *string*.

Cause: An error occurred while accessing the OCR file in an ASM disk group.

Action: Use the 'asmcmd' command to verify if the ASM instance is active. If the ASM instance aborted, it will be restarted automatically. Use 'ocrcheck -config' to discover the OCR locations configured, and verify using 'asmcmd' that the disk group in question is mounted. Mount the disk group if it is not mounted. Validate if the behavior is limited to one node or whether it occurs across all of the nodes in the cluster. If nothing works, use the 'ocrconfig' command with the '-replace' or '-delete' option to replace or remove the OCR location.

CRS-01014: Failed to import Oracle Cluster Registry from file *string*

Cause: Unable to read data from the import file and import to the cluster registry

Action: Check availability of the cluster registry and the details of the failure from the log file

CRS-01015: A request to terminate the Cluster Ready Service on node *string* completed successfully. Details at *string* in *string*.

Cause: The Cluster Ready Service on the above listed node did not respond to an earlier request within the specified time. The Cluster Ready Service will be terminated to prevent any possible cluster hangs.

Action: Check the Oracle Clusterware alert log on the listed node for any problems. Check for any reason that might not allow the Cluster Ready Service to run optimally on the listed node. Verify network accessibility to the listed node from other nodes in the cluster. If the problem persists, contact Oracle Support Services.

CRS-01016: The Cluster Ready Service on this node terminated because it detected a failure while upgrading the Oracle Cluster Registry format. Details at *string* in *string*.

Cause: The Cluster Ready Service on the node coordinating the upgrade of the Oracle Cluster Registry format terminated.

Action: The Oracle Cluster Registry format upgrade will be completed by another node in the cluster. The Cluster Ready Service on the node listed above will be automatically restarted, and will be able to function as soon as the upgrade completes. If the problem persists, contact Oracle Support Services.

CRS-01017: The Cluster Ready Service on this node terminated because it was unable to open the import file while upgrading the Oracle Cluster Registry format. Details at *string* in *string*.

Cause: There was a failure accessing the import file on this node. The Cluster Ready Service on this node may not have been active during the Oracle Cluster Registry format upgrade.

Action: The Oracle Cluster Registry format upgrade will be completed by another node in the cluster. The Cluster Ready Service on this node will be automatically restarted, and will be able to function as soon as the upgrade completes. If the problem persists, contact Oracle Support Services.

CRS-01018: Automatically repaired invalid Oracle Cluster Registry configuration on this node. Details at *string* in *string*.

Cause: The OCR configuration on this node did not match with the OCR configuration on the other nodes in the cluster; therefore, it was automatically repaired.

Action: If this occurs repeatedly, contact Oracle Support Services.

CRS-01019: The Oracle Cluster Registry (OCR) Service exited on host *string*. Details at *string* in *string*.

Cause: The OCR Service encountered an internal error.

Action: Collect the Oracle Clusterware alert log and the Cluster Ready Services Daemon (CRSD) log indicated in the message, and contact Oracle Support Services.

CRS-01020: The Oracle Cluster Registry has invalid contents. Details at *string* in *string*.

Cause: Some of the Oracle Cluster Registry contents were invalid.

Action: Check the log file indicated in the message for more details. Use the 'ocrcheck' command to detect errors, and the 'ocrdump' command to review the registry contents. If problems exist, the registry may need to be recovered or restored. If the problem persists, contact Oracle Support Services.

CRS-01021: The Oracle Cluster Registry backup file in an ASM disk group is inaccessible. Details in *string*.

Cause: Oracle Cluster Registry backup location did not exist, wasn't mounted correctly, or did not have the required permissions.

Action: Ensure that the backup location exists, that it is mounted correctly and visible to all nodes in the cluster, and that its permissions are correct. Check the ASM entries in the alert log file for more details.

CRS-01022: Oracle Clusterware was forcibly upgraded without upgrading nodes *string*. Version has changed from [*number*, *string*] to [*number*, *string*]. Details in *string*.

Cause: Oracle Clusterware was forcibly upgraded when the above listed nodes were not upgraded.

Action: Delete the above listed nodes using the procedure documented in the Oracle Clusterware documentation. If the nodes later become accessible, they can be added back into the cluster.

CRS-01024: The Cluster Ready Service on this node terminated because the ASM instance was not active on this node. Details at *string* in *string*.

Cause: The Cluster Ready Service on the node terminated because the ASM instance was no longer active.

Action: The Cluster Ready Services on this node will be automatically restarted. If the problem persists, contact Oracle Support Services.

CRS-01025: Oracle Clusterware was upgraded to version [*string*] on all nodes, but the cluster active version is still [*string*]. Details in [*string*].

Cause: The cluster upgrade did not complete because the root upgrade script failed on the last node, the root upgrade script was interrupted by the user, or the cluster upgrade is ongoing.

Action: Check the Oracle Clusterware alert log on all nodes for any problems. Rerun the root upgrade script on the last node to completion, and ensure that the cluster active version has changed using the 'crsctl query crs activeversion' command. If the problem persists, run diagcollection.pl and contact Oracle Support Services.

CRS-01026: Oracle Clusterware patch has completed. The patch level has changed from [*number*] to [*number*]. Details in *string*.

Cause: The Oracle Clusterware was successfully patched.

Action: None

CRS-01027: The Oracle Cluster Registry (OCR) location in an ASM disk group [*string*] does not have sufficient space. Details at *string* in *string*.

Cause: Unable to increase the size of OCR file in the above listed disk group as the disk group was out of space.

Action: Delete unused files from the disk group or add additional disks to the disk group. Refer to Oracle Clusterware administration documentation to know about the space requirements for OCR in ASM disk group.

CRS-01028: The Oracle Cluster Registry backup location *string* is inaccessible from node *string*. Details in *string*.

Cause: The backup location provided did not exist, was not mounted correctly, or did not have the required permissions.

Action: Ensure that the backup location exists, that it is mounted correctly and visible to all nodes in the cluster, and that the permissions are correct. If the backup location is an ASM disk group, check the ASM entries in the alert log file for more details.

CRS-01029: The Oracle Cluster Registry backup file *string* is corrupt. Details at *string* in *string*.

Cause: The backup file created by the periodic backup of the Oracle Cluster Registry (OCR) failed to pass the post-backup sanity check. Either the OCR was corrupted or the backup was faulty.

Action: If the fault was introduced during the backup generation, then it will be corrected during the next backup generation, and no action is required. If the subsequent backup is also faulty, then the Oracle Cluster Registry might be corrupt. Contact Oracle Support Services.

CRS-01030: The Oracle Cluster Registry backup file *string* could not be validated. Details at *string* in *string*.

Cause: The indicated Oracle Cluster Registry (OCR) backup file could not be validated due to validation process not starting or failing to run the validation check.

Action: If the backup was attempted as part of an automatic periodic backup, then no action is needed. If the backup was attempted as part of a manual backup, then try the backup again. If the problem persists, contact Oracle Support Services.

CRS-01031: The Oracle Cluster Registry operation encountered ASM error. Details at *string* in *string*.

Cause: The Oracle Cluster Registry (OCR) operation could not be completed due to the referenced ASM errors.

Action: Check the referenced log file for more detailed failure information.

CRS-01110: Oracle Clusterware upgrade is in unknown state [*number*].\n

Cause: There was an internal error upgrading the Oracle Clusterware.

Action: Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01111: Error upgrading the active version of Oracle Clusterware:\n*string*.\n

Cause: There was an internal error upgrading the active version of Oracle Clusterware.

Action: Use the command 'crsctl check crs' to verify that the CRS Service is running. Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01112: failed to set Oracle Clusterware active version *string*

Cause: There was an internal error upgrading the Oracle Clusterware.

Action: Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01114: Invalid active version [*string*] passed

Cause: An invalid active version was passed.

Action: Use the 'crsctl query crs softwareversion' command to retrieve a valid active version.

CRS-01115: Oracle Clusterware has already been upgraded.\n

Cause: Oracle Clusterware is already running in highest possible operating version.

Action: None

CRS-01116: Upgrade of the active version of Oracle Clusterware has been aborted.\n

Cause: One of the Oracle Clusterware components have failed to upgrade within the expected time.

Action: Check the Oracle Clusterware alert log and the CRS daemon log for additional information.

CRS-01117: Error upgrading the active version of Oracle Clusterware.\n

Cause: An attempt was made to change the Oracle Clusterware active version before all nodes were upgraded.

Action: Run root.sh script on all nodes in the cluster. If the problem persists, contact Oracle Support Services.

CRS-01119: Unable to complete Oracle Clusterware upgrade while nodes *string* have not yet upgraded.\n

Cause: An attempt was made to change the Oracle Clusterware active version before all known nodes had been upgraded. Note that some of the nodes listed in the message may no longer be current or recent cluster members.

Action: Issue the 'olsnodes' command to list current and recent cluster members. Any nodes listed in the error message, but not listed by 'olsnodes' have not been active recently, and should be deleted using the procedure documented in the Oracle Clusterware documentation. The currently or recently active cluster members listed by 'olsnodes' should be upgraded, or, if no longer needed, deleted: 1) Run the rootupgrade.sh script on each node to be retained. 2) Delete nodes no longer desired using the procedure documented in the Oracle Clusterware documentation. Once all of the nodes listed in the message have been upgraded or deleted, run the rootupgrade.sh script on an upgraded node to complete the upgrade. If one or more nodes could not be upgraded or deleted, forcibly upgrade the cluster using the procedure documented in the Oracle Clusterware documentation.

CRS-01121: Oracle Clusterware was forcibly upgraded without upgrading nodes *string*.\n

Cause: Oracle Clusterware was forcibly upgraded when the above listed nodes were not upgraded.

Action: Delete the above listed nodes using the procedure documented in the Oracle Clusterware documentation. If the nodes later become accessible, they can be added back into the cluster.

CRS-01124: Invalid active version [*string*] retrieved.

Cause: An invalid active version was retrieved from the configuration.

Action: Contact Oracle Support Services.

CRS-01129: Rejecting rolling upgrade mode change because Oracle ASM is in an unexpected state.

Cause: A request to reset rolling upgrade mode was rejected because Oracle ASM was in an unexpected state.

Action: Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01130: Rejecting rolling upgrade mode change because Oracle IO Server is in an unexpected state.

Cause: A request to reset rolling patch mode was rejected because Oracle IO Server was in an unexpected state.

Action: Retry the 'crsctl set crs activeversion' command. If the problem persists, contact Oracle Support Services.

CRS-01131: The cluster was successfully set to rolling upgrade mode.

Cause: A 'crsctl start rollingupgrade' command completed successfully.

Action: None

CRS-01132: The cluster is in rolling upgrade mode.

Cause: The cluster was already running in rolling upgrade mode.

Action: None

CRS-01133: There was an error setting Oracle Clusterware to rolling upgrade mode.

Cause: There was an error setting Oracle Clusterware to rolling upgrade mode.

Action: Use the command 'crsctl check crs' to verify that the Cluster Ready Services (CRS) is active, and inspect the accompanying Clusterware-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl start rollingupgrade' command. If the problem persists, contact Oracle Support Services.

CRS-01134: There was an error setting Oracle ASM to rolling upgrade mode.

Cause: There was an error setting Oracle ASM to rolling upgrade mode.

Action: Use the command 'srvctl status asm' to verify that the Oracle ASM instance is active, and inspect the accompanying ASM-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl start rollingupgrade' command. If the problem persists, contact Oracle Support Services.

CRS-01135: There was an error setting Oracle IO Server to rolling upgrade mode.

Cause: There was an error setting Oracle IO Server to rolling upgrade mode.

Action: Use the command 'srvctl status ioserver' to verify that the Oracle IO Server instance is active, and inspect the accompanying IO Server-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl start rollingupgrade' command. If the problem persists, contact Oracle Support Services.

CRS-01136: Rejecting the rolling upgrade mode change because the cluster is being patched.

Cause: The rolling upgrade mode change was rejected because the cluster was being patched.

Action: Complete applying the patch on all nodes in the cluster before retrying the 'crsctl start rollingupgrade' command.

CRS-01137: Rejecting the rolling upgrade mode change because the cluster was forcibly upgraded.

Cause: The rolling upgrade mode change was rejected because the cluster was forcibly upgraded.

Action: Delete the nodes that were not upgraded using the procedure documented in the Oracle Clusterware documentation. Retry the 'crsctl start rollingupgrade' command after completing the above steps.

CRS-01138: There was an error setting the cluster to rolling upgrade mode.

Cause: There was an internal error setting the cluster to rolling upgrade mode.

Action: Retry the 'crsctl start rollingupgrade' command. If the problem persists, contact Oracle Support Services.

CRS-01139: Invalid version [*string*] passed

Cause: An invalid version was passed.

Action: Use the version returned by the 'crsctl query crs releaseversion' command issued from the Oracle Grid Infrastructure home to which you are upgrading.

CRS-01140: The passed version [*string*] cannot be less than or equal to the release version [*string*].

Cause: A version was passed that was less than or equal to the release version.

Action: Verify that the version of the Oracle Grid Infrastructure home to be upgraded to is greater than the current Oracle Grid Infrastructure home.

CRS-01141: The passed version [*string*] cannot be less than or equal to the cluster active version [*string*].

Cause: A version was passed that was less than or equal to the cluster active version.

Action: Verify that the version of the Oracle Grid Infrastructure home to be upgraded to is greater than the cluster active version.

CRS-01142: The cluster cannot be set to rolling upgrade mode because Oracle Clusterware is not active on at least one remote node.

Cause: The cluster could not be set to rolling upgrade mode because Oracle Clusterware was not active on any of the remote nodes.

Action: Start Oracle Clusterware on at least one remote node and retry the 'crsctl start rollingupgrade' command, or retry upgrade using the non-rolling option.

CRS-01143: There was an error setting Oracle ACFS to rolling upgrade mode.

Cause: An attempt to initiate a rolling upgrade failed because an error occurred while attempting to set the Oracle ASM Cluster File System (Oracle ACFS) mode to 'rolling'. The accompanying Oracle ACFS specific messages provide further failure details.

Action: Use the command 'srvctl status filesystem' to verify that the Oracle ASM Cluster File System is active, and inspect the accompanying Oracle ACFS specific error messages to see if there is a correctable problem. If so, correct the problem and retry the command 'crsctl start rollingupgrade'. If the problem persists, contact Oracle Support Services.

CRS-01151: The cluster was successfully set to rolling patch mode.\n

Cause: A 'crsctl start rollingpatch' command completed successfully.

Action: None

CRS-01152: The cluster is in rolling patch mode.

Cause: The cluster was already running in rolling patch mode.

Action: None

CRS-01153: There was an error setting Oracle Clusterware to rolling patch mode.

Cause: There was an error setting Oracle Clusterware to rolling patch mode.

Action: Use the command 'crsctl check crs' to verify that the Cluster Ready Services (CRS) is active, and inspect the accompanying Clusterware-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl start rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01154: There was an error setting Oracle ASM to rolling patch mode.

Cause: There was an error setting Oracle ASM to rolling patch mode.

Action: Use the command 'srvctl status asm' to verify that the Oracle ASM instance is active, and inspect the accompanying ASM-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl start rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01155: There was an error setting Oracle IO Server to rolling patch mode.

Cause: There was an error setting Oracle IO Server to rolling patch mode.

Action: Use the command 'srvctl status ioserver' to verify that the Oracle IO Server instance is active, and inspect the accompanying IO Server-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl start rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01156: Rejecting the rolling patch mode change because the cluster is in the middle of an upgrade.

Cause: The rolling patch mode change was rejected because the cluster was undergoing an upgrade.

Action: None

CRS-01157: Rejecting the rolling patch mode change because the cluster was forcibly upgraded.

Cause: The rolling patch mode change was rejected because the cluster was forcibly upgraded.

Action: Delete the nodes that were not upgraded using the procedure documented in the Oracle Clusterware documentation. Retry the 'crsctl start rollingpatch' or 'crsctl stop rollingpatch' command after completing the above steps.

CRS-01158: There was an error setting the cluster to rolling patch mode.

Cause: There was an internal error setting the cluster to rolling patch mode.

Action: Retry the 'crsctl start rolling patch' command. If the problem persists, contact Oracle Support Services.

CRS-01159: The cluster cannot be set to rolling patch mode because Oracle Clusterware is not active on at least one remote node.

Cause: The cluster could not be set to rolling patch mode because Oracle Clusterware was not active on any of the remote nodes.

Action: Start Oracle Clusterware on at least one remote node and retry the 'crsctl start rollingpatch' command, or retry patching using the non-rolling option.

CRS-01161: The cluster was successfully patched to patch level [number].ln

Cause: A 'crsctl stop rollingpatch' command completed successfully.

Action: None

CRS-01162: Rejecting rolling patch mode change because the patch level is not consistent across all nodes in the cluster. The patch level on nodes *string* is not the same as the expected patch level [number] found on nodes *string*.

Cause: The 'crsctl stop rollingpatch' command was rejected because all the nodes in the cluster were not patched to the same patch level.

Action: Make sure all the nodes in the cluster have been patched to the same patch level using the 'crsctl query crs softwarepatch *host*' command. Retry the 'crsctl stop rollingpatch' command after patching the required nodes.

CRS-01163: There was an error resetting Oracle Clusterware rolling patch mode.

Cause: There was an error resetting Oracle Clusterware rolling patch mode.

Action: Use the command 'crsctl check crs' to verify that the Cluster Ready Services (CRS) is active, and inspect the accompanying Clusterware-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl stop rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01164: There was an error resetting Oracle ASM rolling patch mode.

Cause: There was an error resetting Oracle ASM rolling patch mode.

Action: Use the command 'srvctl status asm' to verify that the Oracle ASM instance is active, and inspect the accompanying ASM-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl stop rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01165: There was an error resetting Oracle IOServer rolling patch mode.

Cause: There was an error resetting Oracle IOServer rolling patch mode.

Action: Use the command 'srvctl status ioserver' to verify that the Oracle IOServer instance is active, and inspect the accompanying IOServer-specific error messages to see if there is a correctable problem. If so, correct the problem and retry the 'crsctl stop rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01166: Rejecting rolling patch mode change because Oracle ASM is in [string] state.

Cause: A request to reset rolling patch mode was rejected because Oracle ASM was in an unexpected state.

Action: Retry the 'crsctl stop rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01167: Rejecting rolling patch mode change because Oracle IOServer is in [string] state.

Cause: A request to reset rolling patch mode was rejected because Oracle IOServer was in an unexpected state.

Action: Retry the 'crsctl stop rollingpatch' command. If the problem persists, contact Oracle Support Services.

CRS-01168: There was an error resetting the cluster rolling patch mode.

Cause: There was an internal error resetting the cluster rolling patch mode.

Action: Retry the 'crsctl stop rolling patch' command. If the problem persists, contact Oracle Support Services.

CRS-01169: The cluster is consistent and the cluster active patch level is [number].

Cause: The cluster has already completed the rolling patch procedure.

Action: None

CRS-01170: Rejecting rolling patch mode change because the patch has not been applied yet. The software patch level [number] on this node is not the same as the expected patch level [number].

Cause: The 'crsctl stop rollingpatch' command was rejected because the patch level did not match with the configured software patch level.

Action: Complete applying the patch on this node, and verify the patch level using the 'crsctl query crs softwarepatch host' command. Retry the 'crsctl stop rollingpatch' command.

CRS-01171: Rejecting rolling patch mode change because the patch level is not consistent across all nodes in the cluster. The patch level on nodes string is not the same as the patch level [number] found on nodes string.

Cause: The 'crsctl stop rollingpatch' command was rejected because all the nodes in the cluster were not patched to the same patch level.

Action: Verify the list of patches applied on a node by issuing the 'crsctl query crs releasepatch' command. Apply the requisite patches. Make sure all the nodes in the cluster have been patched to the same patch level using the 'crsctl query crs softwarepatch' command. Retry the 'crsctl stop rollingpatch' command after patching the required nodes.

CRS-01181: There was an error retrieving Oracle Clusterware release patch level.

Cause: There was an internal error retrieving the Oracle Clusterware release patch level.

Action: Contact Oracle Support Services.

CRS-01182: Oracle Clusterware release patch level is [number] and the complete list of patches [string] have been applied on the local node. The release patch string is [string].\n

Cause: None, this is an informational message.

Action: None

CRS-01183: Oracle Clusterware release patch level is [number] and an incomplete list of patches [string] have been applied on the local node.\n

Cause: There was an error retrieving the complete list of patches.

Action: Contact Oracle Support Services.

CRS-01184: Oracle Clusterware release patch level is [number] and no patches have been applied on the local node. The release patch string is [string].\n

Cause: None, this is an informational message.

Action: None

CRS-01191: There was an error retrieving Oracle Clusterware software patch level.

Cause: There was an internal error retrieving the Oracle Clusterware software patch level.

Action: Contact Oracle Support Services.

CRS-01192: Oracle Clusterware patch level on node *string* is [*number*].\n

Cause: None, this is an informational message.

Action: None

CRS-01201: CRSD started on node *string*.

Cause: CRSD has started, possibly due to a CRS start, or a node reboot or a CRSD restart.

Action: None Required. You can run the command 'crsctl check crsd' to validate the health of the CRSD.

CRS-01202: CRSD aborted on node *string*. Error [*string*]. Details in *string*.

Cause: Fatal Internal Error. Check the CRSD log file to determine the cause.

Action: Determine whether the CRSD gets auto-started.

CRS-01203: Failover failed for the CRS resource *string*. Details in *string*.

Cause: Failover failed due to an internal error. Examine the contents of the CRSD log file to determine the cause.

Action: None

CRS-01204: Recovering CRS resources for node *string*.

Cause: CRS resources are being recovered, possibly because the cluster node is starting up online.

Action: Check the status of the resources using the 'crsctl status resource' command.

CRS-01205: Auto-start failed for the CRS resource *string*. Details in *string*.

Cause: This message comes up when the auto-start for the resource has failed during a reboot of the cluster node.

Action: Start the resources using the 'crsctl start resource' command.

CRS-01206: Resource *string* is in the UNKNOWN state. Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.

Cause: Resource went into an unknown state because the check or the stop action on the resource failed.

Action: Make sure the resource is completely stopped, then use the 'crsctl stop -f' command.

CRS-01207: There are no more restart attempts left for resource *string*. Restart the resource manually using the crsctl command.

Cause: The Oracle Clusterware is no longer attempting to restart the resource because the resource has failed and the Oracle Clusterware has exhausted the maximum number of restart attempts.

Action: Use the 'crsctl start' command to restart the resource manually.

CRS-01208: Cluster Ready Service terminating, unable to start successfully. Details at *string* in *string*.

Cause: Cluster Ready Service could not initialize successfully.

Action: Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

CRS-01209: Cluster Ready Service terminating, failed to register with group '*string*'. Details at *string* in *string*.

Cause: Cluster Ready Service could not initialize successfully.

Action: Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

CRS-01210: Cluster Ready Service failed to update group data. Details at *string* in *string*.

Cause: Cluster Ready Service failed to update the group private data with new leader.

Action: Restart Cluster Ready Service using the command 'crsctl start clusterware'. If the problem persists, contact Oracle Support Services.

CRS-01211: Cluster Ready Service noticed abnormal termination by Cluster Synchronization Service. Details at *string* in *string*.

Cause: Cluster Ready Service terminating due to abnormal termination of Cluster Synchronization Service layer.

Action: Contact Oracle Support Services.

CRS-01212: Cluster Ready Service received invalid update for group private data. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01213: Cluster Ready Service failed to retrieve user information. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01214: Cluster Ready Service failed to initialize OLR context. Details at *string* in *string*.

Cause: Cluster Ready Service unable to access local registry.

Action: Use the ocrcheck utility to detect errors in the OLR. If problems exist, the registry may need to be recovered or restored.

CRS-01215: Cluster Ready Service could not get the local node number. Details at *string* in *string*.

Cause: Cluster Ready Service could not retrieve the local node incarnation number.

Action: Contact Oracle Support Services.

CRS-01216: Cluster Ready Service could not determine node list. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01217: Cluster Ready Service unable to get node name. Details at *string* in *string*.

Cause: Cluster Ready Service could not determine node name.

Action: Contact Oracle Support Services.

CRS-01218: Cluster Ready Service error during initialization. Details at *string* in *string*.

Cause: Cluster Ready Service could not initialize underlying layers successfully.

Action: Contact Oracle Support Services.

CRS-01219: Cluster Synchronization Service not available. Details at *string* in *string*.

Cause: Cluster Ready Service was unable to initialize access to CSS, which is required.

Action: Contact Oracle Support Services.

CRS-01220: Cluster Ready Service could not retrieve local node number. Details at *string* in *string*.

Cause: Cluster Ready Service could not retrieve node number for local node.

Action: Contact Oracle Support Services.

CRS-01221: Cluster Ready Service failed to retrieve local node name. Details at *string* in *string*.

Cause: Cluster Ready Service could not retrieve node name.

Action: Contact Oracle Support Services.

CRS-01222: Cluster Ready Service failed to retrieve maximum group size. Details at *string* in *string*.

Cause: Cluster Ready Service could not retrieve value for maximum group size.

Action: Contact Oracle Support Services.

CRS-01223: Cluster Ready Service error while reading cluster active version. Details at *string* in *string*.

Cause: Could not retrieve cluster active version.

Action: Contact Oracle Support Services.

CRS-01224: Server authentication exception encountered, exception text is '*string*'. Details at *string* in *string*.

Cause: Cluster Ready Service encountered error while authenticating user.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01225: Invalid identity exception encountered, exception text is '*string*'. Details at *string* in *string*.

Cause: Cluster Ready Service could not verify user identity.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01226: Failed to create message to send to policy engine. Details at *string* in *string*.

Cause: Cluster Ready Service encountered communication error.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01227: Error during initialization of communication subsystem. Details at *string* in *string*.

Cause: Cluster Ready Service encountered communication error during initialization.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01228: Error while setting up user interface server. Details at *string* in *string*.

Cause: Cluster Ready Service encountered communication error.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01229: Error while listening for events. Details at *string* in *string*.

Cause: Cluster Ready Service encountered communication error.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01231: Failed to open key '*string*' in OCR. Details at *string* in *string*.

Cause: This is an internal error.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01232: Could not get security attribute for system key '*string*' in OCR. Details at *string* in *string*.

Cause: Encountered error while reading system key attributes in OCR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01233: Failed to initialize batch handler for OCR. Details at *string* in *string*.

Cause: Could not initialize batch handler for multiwrite in OCR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01234: Encountered error while setting key value for key '*string*' in OCR. Details at *string* in *string*.

Cause: Encountered an error while executing a batch write in OCR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01235: Error while executing batch for multi writes in OCR. Details at *string* in *string*.

Cause: Encountered an error while executing a batch write in OCR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01236: Error enumerating subkeys for key '*string*' in OCR. Details at *string* in *string*.

Cause: Encountered an error while reading subkey values in OCR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01237: Failed to retrieve the maximum value supported in OCR. Details at *string* in *string*.

Cause: Could not read the maximum value size from registry.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01238: Failed to add a delete key operation for key '*string*' to a batch in OCR. Details at *string* in *string*.

Cause: Encountered internal error while deleting key in OCR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01239: Cluster Ready Service aborted due to an unexpected error [*string*]. Details at *string* in *string*.

Cause: This is an unexpected error. Look at the associated error message to fix the underlying issue.

Action: If the problem persists, contact Oracle Support Services.

CRS-01301: Oracle High Availability Service started on node *string*.

Cause: Oracle High Availability Service has started, possibly due to a Clusterware start, or a node reboot.

Action: None Required.

CRS-01302: Oracle High Availability Service aborted on node *string*. Error [*string*]. Details in *string*.

Cause: Fatal Internal Error. Check the Oracle High Availability Service log file to determine the cause.

Action: Determine whether the Oracle High Availability Service gets auto-started.

CRS-01303: Failover failed for the OHAS resource *string*. Details in *string*.

Cause: Failover processing for the specified resource did not complete. Examine the contents of the Oracle High Availability Service log file to determine the cause.

Action: None

CRS-01304: Recovering OHAS resources for node *string*.

Cause: Oracle High Availability Service resources are being recovered, possibly because the cluster node is starting up online.

Action: Check the status of the resources using the `crsctl` command.

CRS-01305: Auto-start failed for the OHAS resource *string*. Details in *string*.

Cause: This message comes up when the auto-start for the resource has failed during a reboot of the cluster node.

Action: Start the resources using the '`crsctl start resource`' command.

CRS-01306: Resource *string* is in an unknown state. Make sure the resource is completely stopped, then use the '`crsctl stop -f`' command.

Cause: Resource went into an unknown state because the check or the stop action on the resource failed.

Action: Make sure the resource is completely stopped, then use the '`crsctl stop -f`' command.

CRS-01307: There are no more restart attempts left for resource *string*. Restart the resource manually using the `crsctl` command.

Cause: The Oracle Clusterware is no longer attempting to restart the resource because the resource has failed and the Oracle Clusterware has exhausted the maximum number of restart attempts.

Action: Use the 'crsctl start resource' command to restart the resource manually.

CRS-01308: Oracle High Availability Service terminating, unable to start successfully. Details at *string* in *string*.

Cause: Oracle High Availability Service could not initialize successfully.

Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01309: Oracle High Availability Service terminating, failed to register with group '*string*'. Details at *string* in *string*.

Cause: Oracle High Availability Service could not initialize successfully.

Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01310: Oracle High Availability Service failed to update group data. Details at *string* in *string*.

Cause: Oracle High Availability Service failed to update the group private data with new leader.

Action: Restart your clusterware installation. If the problem persists, contact Oracle Support Services.

CRS-01311: Oracle High Availability Service noticed abnormal termination by Cluster Synchronization Service. Details at *string* in *string*.

Cause: Oracle High Availability Service terminating due to abnormal termination of Cluster Synchronization Service layer.

Action: Contact Oracle Support Services.

CRS-01312: Oracle High Availability Service received invalid update for group private data. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01313: Oracle High Availability Service failed to retrieve user information. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01314: Oracle High Availability Service failed to initialize OLR context. Details at *string* in *string*.

Cause: Oracle High Availability Service unable to access local registry.

Action: Use the ocrcheck utility to detect errors in the OLR. If problems exist, the registry may need to be recovered or restored.

CRS-01315: Oracle High Availability Service could not get the local node number. Details at *string* in *string*.

Cause: Oracle High Availability Service could not retrieve the local node incarnation number.

Action: Contact Oracle Support Services.

CRS-01316: Oracle High Availability Service could not determine node list. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01317: Oracle High Availability Service unable to get node name. Details at *string* in *string*.

Cause: Oracle High Availability Service could not determine node name.

Action: Contact Oracle Support Services.

CRS-01318: Oracle High Availability Service error during initialization. Details at *string* in *string*.

Cause: Oracle High Availability Service could not initialize underlying layers successfully.

Action: Contact Oracle Support Services.

CRS-01319: Cluster Synchronization Service not available. Details at *string* in *string*.

Cause: Oracle High Availability Service was unable to initialize access to CSS, which is required.

Action: Contact Oracle Support Services.

CRS-01320: Oracle High Availability Service could not retrieve local node number. Details at *string* in *string*.

Cause: Oracle High Availability Service could not retrieve node number for local node.

Action: Contact Oracle Support Services.

CRS-01321: Oracle High Availability Service failed to retrieve local node name. Details at *string* in *string*.

Cause: Oracle High Availability Service could not retrieve node name.

Action: Contact Oracle Support Services.

CRS-01322: Oracle High Availability Service failed to retrieve maximum group size. Details at *string* in *string*.

Cause: Oracle High Availability Service could not retrieve value for maximum group size.

Action: Contact Oracle Support Services.

CRS-01323: Oracle High Availability Service error while reading cluster active version. Details at *string* in *string*.

Cause: Could not retrieve cluster active version.

Action: Contact Oracle Support Services.

CRS-01324: Server authentication exception encountered, exception text is '*string*'. Details at *string* in *string*.

Cause: Oracle High Availability Service encountered error while authenticating user.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01325: Invalid identity exception encountered, exception text is 'string'. Details at *string in string*.

Cause: Oracle High Availability Service could not verify user identity.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01326: Failed to create message to send to policy engine. Details at *string in string*.

Cause: Oracle High Availability Service encountered communication error.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01327: Error during initialization of communication subsystem. Details at *string in string*.

Cause: Oracle High Availability Service encountered communication error during initialization.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01328: Error while setting up user interface server. Details at *string in string*.

Cause: Oracle High Availability Service encountered communication error.

Action: This is an internal error. Contact Oracle Support Services..

CRS-01329: Error while listening for events. Details at *string in string*.

Cause: Oracle High Availability Service encountered communication error.

Action: This is an internal error. Contact Oracle Support Services..

CRS-01330: Oracle High Availability Services aborted due to internal error.

Cause: Fatal Internal Error. Check the Oracle High Availability Service log file to determine the cause.

Action: Determine whether the Oracle High Availability Service gets auto-started.

CRS-01331: Failed to open key 'string' in OLR. Details at *string in string*.

Cause: This is an internal error.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01332: Could not get security attribute for system key 'string' in OLR. Details at *string in string*.

Cause: Encountered error while reading system key attributes in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01333: Failed to initialize batch handler for OLR. Details at *string in string*.

Cause: Could not initialize batch handler for multiwrite in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01334: Encountered error while setting key value for key 'string' in OLR. Details at *string in string*.

Cause: Encountered an error while executing a batch write in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01335: Error while executing batch for multi writes in OLR. Details at *string* in *string*.

Cause: Encountered an error while executing a batch write in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01336: Error enumerating subkeys for key '*string*' in OLR. Details at *string* in *string*.

Cause: Encountered an error while reading subkey values in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01337: Failed to retrieve the maximum value supported in OLR. Details at *string* in *string*.

Cause: Could not read the maximum value size from registry.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01338: Failed to add a delete key operation for key '*string*' to a batch in OLR. Details at *string* in *string*.

Cause: Encountered internal error while deleting key in OLR.

Action: This is an internal error. Contact Oracle Support Services.

CRS-01339: Oracle High Availability Service aborted due to an unexpected error [*string*]. Details at *string* in *string*.

Cause: Look at the associated error message to fix the underlying issue.

Action: If the problem persists, contact Oracle Support Services.

CRS-01340: Node '*string*' has a pending role change; Oracle High Availability Services needs to be restarted.

Cause: A 'crsctl stop cluster' command was run after a node's role has changed.

Action: Run 'crsctl stop crs' and 'crsctl start crs' on the node for the node role change to take effect.

CRS-01401: EVMD started on node *string*.

Cause: EVMD has started either because of a CRS start, a node reboot, or an EVMD restart.

Action: None required. You can run the 'crsctl check evmd' command to validate the health of EVMD.

CRS-01402: EVMD aborted on node *string*. Error [*string*]. Details in *string*.

Cause: EVMD has aborted due to an internal error. Check the EVMD log file to determine the cause.

Action: Determine whether the EVMD is auto-started and contact Oracle Support Services.

CRS-01403: The Event Management Service terminated on node *string*. Listening port *number* is in use by another application. Details in *string*.

Cause: The Event Management Service has aborted because the configured listening port is being used by another application on this node.

Action: Make the listening port listed above available. Restart the Event Management Service using 'crsctl start crs' or 'crsctl start cluster' command.

CRS-01601: CSSD Reconfiguration complete. Active nodes are *string*.

Cause: A node joined or left the cluster.

Action: None

CRS-01602: CSSD aborted on node *string*. Error [*string*]; details in *string*.

Cause: The CSS daemon aborted on the listed node with the listed return code.

Action: Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01603: CSSD on node *string* has been shut down.

Cause: The CSS daemon on the listed node was terminated.

Action: None

CRS-01604: CSSD voting file is offline: *string*; details at *string* in *string*.

Cause: The indicated voting file became unusable on the local node either because it was being replaced or because it was not accessible.

Action: 1. No action necessary if the voting file was replaced. 2. If the voting file was not replaced then verify that the filesystem containing the indicated voting file is available on the local node.

CRS-01605: CSSD voting file is online: *string*; details in *string*.

Cause: The CSS daemon has detected a valid configured voting file.

Action: None

CRS-01606: The number of voting files available, *number*, is less than the minimum number of voting files required, *number*, resulting in CSSD termination to ensure data integrity; details at *string* in *string*

Cause: The number of voting files has decreased to a number of files that is insufficient.

Action: Locate previous 1604, 1613, 1614 and 1615 messages and take action as indicated by those messages.

CRS-01607: Node *string* is being evicted in cluster incarnation *number*; details at *string* in *string*.

Cause: The local node has detected that the indicated node is still active, but not able to communicate with this node, so is forcibly removing the indicated node from the cluster.

Action: Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01608: This node was evicted by node *number*, *string*; details at *string* in *string*.

Cause: The local node was evicted by the indicated node.

Action: Collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01609: This node is unable to communicate with other nodes in the cluster and is going down to preserve cluster integrity; details at *string* in *string*.

Cause: Communication was lost with some nodes of the cluster and this node detected that another sub-cluster was designated to be the surviving sub-cluster. This node went down to preserve data integrity.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If there do not appear to be any network problems, 1. collect the CSS daemon logs, system messages and any CSS daemon core files from all nodes and 2. contact Oracle Support.

CRS-01610: Network communication with node *string (number)* has been missing for 90%% of the timeout interval. If this persists, removal of this node from cluster will occur in *number.number* seconds

Cause: Heartbeat messages were not received from the node. This could be due to network problems or failure of the listed node.

Action: If the node was removed, check that the private interconnect network used by the cluster is functioning properly, including all the cables, network cards, switches, routers, and so forth between this node and listed node. Correct any problems discovered.

CRS-01611: Network communication with node *string (number)* has been missing for 75%% of the timeout interval. If this persists, removal of this node from cluster will occur in *number.number* seconds

Cause: Heartbeat messages were not received from the node. This could be due to network problems or failure of the listed node.

Action: If the node was removed, check that the private interconnect network used by the cluster is functioning properly, including all the cables, network cards, switches, routers, and so forth between this node and listed node. Correct any problems discovered.

CRS-01612: Network communication with node *string (number)* has been missing for 50%% of the timeout interval. If this persists, removal of this node from cluster will occur in *number.number* seconds

Cause: Heartbeat messages were not received from the node. This could be due to network problems or failure of the listed node.

Action: If the node was removed, check that the private interconnect network used by the cluster is functioning properly, including all the cables, network cards, switches, routers, and so forth between this node and listed node. Correct any problems discovered.

CRS-01613: No I/O has completed after 90%% of the maximum interval. If this persists, voting file *string* will be considered not functional in *number* milliseconds.

Cause: Voting device I/O did not complete for a long time. This could be due to some error with the device on which the voting file exists or in some element in the path of the I/O to the device.

Action: If the voting file was removed, verify that the device is working properly including all the elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds indicated. Failure of a majority of devices will result in node reboot.

CRS-01614: No I/O has completed after 75%% of the maximum interval. If this persists, voting file *string* will be considered not functional in *number* milliseconds.

Cause: Voting device I/O did not complete for a long time. This could be due to some error with the device on which the voting file exists or in some element in the path of the I/O to the device.

Action: If the voting file was removed, verify that the device is working properly including all the elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds indicated. Failure of a majority of devices will result in node reboot.

CRS-01615: No I/O has completed after 50%% of the maximum interval. If this persists, voting file *string* will be considered not functional in *number* milliseconds.

Cause: Voting device I/O did not complete for a long time. This could be due to some error with the device on which the voting file exists or in some element in the path of the I/O to the device.

Action: If the voting file was removed, verify that the device is working properly including all the elements in the I/O path. The voting file listed will be considered inactive in the number of milliseconds indicated. Failure of a majority of devices will result in node reboot.

CRS-01616: The BMC device used for IPMI at IP address *string* is not properly configured for ADMIN access; details at *string* in *string*

Cause: The IPMI BMC is not configured to support the ADMIN access methods required by Oracle Clusterware.

Action: Consult the clusterware admin manual for proper procedures in configuring BMC. Use the BMC configuration tool (ipmitool or ipmiutil) command to check and verify that the current configuration supports either MD5 or password validation for ADMIN access.

CRS-01617: The information required to do node kill for node *string* is incomplete; details at *string* in *string*

Cause: Incomplete config information stored in Cluster Registry for node kill.

Action: Make sure all the information pertaining to the node kill method

CRS-01618: The requested node kill information change could not be validated by node *string*; details at *string* in *string*

Cause: Unable to validate the node kill information for this node.

Action: Additional information can be found in the CRS alert log of the node that performed the validation.

CRS-01619: The node kill information of node *string* could not be validated by this node due to failure in connecting to the IPMI device; details at *string* in *string*

Cause: Unable to validate the node kill information for this node.

Action: Additional information can be found in the CSSD logs.

CRS-01620: The node kill information of node *string* could not be validated by this node due to invalid authorization information; details at *string* in *string*

Cause: Unable to validate the kill information for this node.

Action: Additional information can be found in the CSSD logs.

CRS-01621: The IPMI configuration data for this node stored in the Oracle registry is incomplete; details at *string* in *string*

Cause: All the necessary information such as IPMI username, password and IP address are not present.

Action: Make sure all the information(BMC IPMI username, password and IP address) are present. Use commands 'crsctl set css ipmiaddr' and 'crsctl set css ipmiadmin' for this.

CRS-01622: The IPMI node kill information could not be validated due to inability to connect to the IPMI device at BMC IP address provided *string*; details at *string* in *string*

Cause: Unable to validate the BMC IPMI IP address provided.

Action: Additional information can be found in the CSSD logs.

CRS-01623: The IPMI node kill information of BMC at IP address *string* could not be validated due to invalid authorization information. The BMC username provided is '*string*'; details at *string* in *string*

Cause: Unable to validate the BMC IPMI UserName and password provided.

Action: Additional information can be found in the CSSD logs.

CRS-01624: The requested Node kill information change succeeds vacuously because there is no other node in cluster to validate.

Cause: Unable to validate the credentials because this is the sole node in the cluster.

Action: To complete the validation, shut down the clusterware stack on this node, start another node and restart the stack on this node.

CRS-01625: Node *string*, number *number*, was shut down

Cause: A Clustware stack shutdown command was issued for a node in the cluster and was observed by this node.

Action: None required.

CRS-01626: A Configuration change request completed successfully

Cause: A Configuration change request completed successfully.

Action: None required.

CRS-01627: A Configuration change request failed because another configuration change is in progress; Details at *string* in *string*

Cause: Another configuration change is in still in progress.

Action: Wait until the other command completes and reissue the command if necessary. Message 1626 would be printed if the command succeeds.

CRS-01628: A Configuration change request failed because read of existing voting files failed; Details at *string* in *string*

Cause: CSSD was not able to read the lease blocks of a majority of Voting files which is an indication of a problem with the voting files.

Action: Run the command 'crsctl query css votedisk' to get the list of currently working voting files. User may delete problematic voting file or use a different set.

CRS-01629: A Configuration change request failed because write to new voting files failed; Details at *string* in *string*

Cause: A voting file write failed, causing the associated configuration change to fail. This often results from adding a voting file that is not accessible to one or more nodes.

Action: Confirm that voting files added in a configuration change are accessible and writeable from all cluster nodes. If they are, contact Oracle Customer Support.

CRS-01630: A configuration change request failed because not all the new voting files were discovered; Details at *string* in *string*

Cause: One or more of the voting files being added were not discovered. Message 1638 identifies the unique ID(s) of the file(s) that could not be found.

Action: Verify if the discovery string is adequate to discover the new voting files. If not, modify discovery string using command 'crsctl replace discoverystring xxxxx'.

CRS-01631: A configuration change request failed because one or more nodes are not a sufficient Clusterware version level; Details at *string* in *string*

Cause: One or more nodes are not a sufficient version level.

Action: Configuration change would not be successful until all nodes are at the latest version. Try after all the nodes are upgraded.

CRS-01632: Node *string* is being removed from the cluster in cluster incarnation number

Cause: The local node is removing the indicated node from the cluster because it appears to be dead.

Action: Verify that the node that was removed, or the Oracle Clusterware on that node, was down. The CRS alert log of the node that was removed has information regarding why the node, or clusterware on the node, was no longer active. If the node was still up and Oracle Clusterware still active on that node, collect the CSS daemon logs from all nodes and any CSS daemon core files and contact Oracle Support.

CRS-01633: CSSD failed to register group *string* in vendor clusterware; details at *string* in *string*

Cause: The local node is not able to register the group of vendor clusterware.

Action: Verify that the vendor clusterware is installed and configured correctly.

CRS-01634: CSSD is unable to determine cluster name; details at *string* in *string*

Cause: Name of the cluster cannot be determined from configuration.

Action: Verify that Oracle Clusterware installation was successful.

CRS-01635: CSSSD failed to initialize vendor clusterware; details at *string* in *string*

Cause: The local node is not able to attach vendor clusterware.

Action: Verify that the vendor clusterware is installed and configured correctly.

CRS-01636: The CSS daemon was started in exclusive mode but found an active CSS daemon on node *string* and is terminating; details at *string* in *string*

Cause: The CSS daemon was started in exclusive mode, which requires that the clusterware stack is down on all other nodes to ensure data integrity. A CSS daemon was detected on another node, so the CSS daemon on this node is terminating.

Action: Stop the Oracle clusterware stack that is running on the indicated node.

CRS-01637: Unable to locate configured voting file with ID *string*; details at *string in string*

Cause: The voting file with unique the ID indicated in the message was not found during the voting file discovery phase of CSS initialization.

Action: Verify that all configured voting files are accessible on this node. Any voting files that are not accessible should be removed and replaced with accessible voting files using the appropriate 'crsctl' commands.

CRS-01638: Unable to locate voting file with ID *string* that is being added to the list of configured voting files; details at *string in string*

Cause: The voting file with the unique ID indicated in the message was not found during the voting file discovery phase of CSS initialization. This voting file is in the process of being added to the list of configured voting files.

Action: Verify that all voting files to be added are accessible on this node. Any voting files that are not accessible should be removed and replaced with accessible voting files using the appropriate 'crsctl' commands.

CRS-01639: Rejecting configuration change *number:number* because another configuration change is already in progress; details at *string in string*

Cause: A configuration change was requested, but another configuration change is already in progress and only one configuration change may be processed at a time.

Action: Wait for the current configuration change to complete, then resubmit this configuration change.

CRS-01640: Rejecting configuration change *number:number* because one or more new voting files in the new configuration could not be found; details at *string in string*

Cause: A configuration change that involved the addition of voting files is being rejected because some of the new voting files were not located.

Action: Verify that the voting file name is correct and that it is accessible on this node, if the voting files are not managed by ASM. Message number 1638 provides greater detail.

CRS-01641: Rejecting configuration change *number:number* because only *number* of the required *number* voting files of the new configuration were located; details at *string in string*

Cause: A configuration change that involved a change to the list of voting files is being rejected because a sufficient number of voting files in the new configuration could not be located.

Action: Verify that all voting files in the new configuration are accessible on this node.

CRS-01642: Node *number* is using a different CSS configuration from the one used by this node; this node is terminating to preserve integrity; details at *string in string*

Cause: Another node in the cluster is using a different set of CSS configuration values, such as misscount or voting files. Inconsistency can result in data corruption, so this node is terminating to avoid data corruption.

Action: Collect Clusterware alert log and the CSSD log indicated in the message as well as the CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01643: Failed to format the CSS voting disk *string*

Cause: Problems were encountered attempting to access the voting file.

Action: Verify that the voting file can be accessed, the file exists, has the proper ownership and permissions, etc.

CRS-01644: The initialization of the EXADATA fencing facility failed in start with error *ORA-number*; details at *string in string*

Cause: The start of the initialization of the EXADATA fencing facility failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01645: The initialization of the EXADATA fencing facility failed in completion with error *ORA-number*; details at *string in string*

Cause: The completion of the initialization of the EXADATA fencing facility failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01646: Creation of a EXADATA fence identifier failed with error *ORA-number*; details at *string in string*

Cause: An attempt to create an identifier for a fence to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01647: Initialization of a EXADATA fence failed with error *ORA-number*; details at *string in string*

Cause: An attempt to initiate a fence to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01648: Completion of queued EXADATA fence requests failed with error *ORA-number*; details at *string in string*

Cause: Previously queued fence requests to an EXADATA device failed with the error code shown.

Action: See the Action section of the error message shown.

CRS-01649: An I/O error occurred for voting file: *string*; details at *string in string*.

Cause: The listed voting file became inaccessible.

Action: Verify that the filesystem containing the listed voting file is available on the local node.

CRS-01650: Configuration change *number:number* rejected by node *number string*; details at *string in string*

Cause: A new configuration change request from this node was not accepted due to another node rejecting the change.

Action: Check the CRS alert log of the node rejecting this configuration change for more details.

CRS-01651: Configuration change *number:number* rejected because it would make the active version of node *number* lower than the current setting *string* of this node; details at *string* in *string*

Cause: A new configuration change request from another node was not accepted because the new Active Version in the request is lower than this node's Active Version.

Action: Ensure that the new Active Version is not lower than the current Active Version of the nodes in the cluster.

CRS-01652: Starting clean up of CRSD resources.

Cause: Clean up of the resources registered in CRSD started.

Action: None

CRS-01653: The clean up of the CRSD resources failed.

Cause: Clean up of the resources registered in CRSD failed.

Action: Check the CRS alert log.

CRS-01654: Clean up of CRSD resources finished successfully.

Cause: Clean up of the resources registered in CRSD finished.

Action: None

CRS-01655: CSSD on node *string* detected a problem and started to shutdown.

Cause: The CSS daemon on the listed node detected a problem and started to shutdown.

Action: Check the CRS alert log.

CRS-01656: The CSS daemon is terminating due to a fatal error from thread: *string*; Details at *string* in *string*

Cause: A fatal error occurred during CSS daemon processing.

Action: Check for prior errors logged in the alert log. Correct any errors that can be corrected. If there are no errors shown, or the errors cannot be resolved, contact Oracle support

CRS-01657: Unable to obtain the voting file discovery string; Details at *string* in *string*

Cause: An attempt to obtain the voting file discovery string from the profile failed, causing the CSS daemon to fail.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as all CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01658: There is a mismatch of the initial cluster incarnation among the cluster nodes; Details at *string* in *string*

Cause: An internal error occurred.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as all CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01659: An attempt to kill node *string* failed; Details at *string* in *string*

Cause: To protect data integrity a node kill was attempted for the indicated node, but it failed.

Action: Collect the Clusterware alert log and the CSSD log of this node as well as the CSS daemon logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01660: The CSS daemon shutdown has completed

Cause: A command to shut down the CSS daemon was issued by a user and the shutdown processing is completed. The CSS daemon is terminated.

Action: No action is required.

CRS-01661: The CSS daemon is not responding. If this persists, a reboot will occur in *number* milliseconds; details are at *string* in *string*.

Cause: The Cluster Synchronization Service daemon (CSSD) Agent or Monitor was not receiving responses from the CSS daemon. This message was a warning that the node would be rebooted after the indicated time unless responses were received. If CSS responded before the time elapsed, no reboot would have occurred, and the timers would have been reset.

Action: If the reboot occurred, collect the Oracle Clusterware alert log and the CSSD log of this node as well as the CSS daemon logs of all other nodes in the cluster, and contact Oracle Support Services.

CRS-01662: Member kill requested by node *string* for member number *number*, group *string*

Cause: A request to kill a member of the indicated group was issued by a process on the indicated node.

Action: No action is required.

CRS-01663: Member kill issued by PID *string* for *number* members, group *string*. Details at *string* in *string*.

Cause: A member kill request was issued by the indicated process for the members belonging to the indicated group.

Action: No action is required.

CRS-01664: No voting files found; switching node role to 'leaf'.

Cause: A node attempting to start as a Hub node was not able to find a voting file.

Action: No action is required.

CRS-01665: maximum number of cluster Hub nodes reached; the CSS daemon is terminating

Cause: A node attempting to start as a Hub node found the maximum number of Hub nodes already active.

Action: If the configured node role is 'auto', no action is required for the node to restart as a Leaf node. If the configured node role is 'hub', then the configured role must be changed to a Leaf node using 'crsctl set node role leaf' or the Hub size must be increased using 'crsctl set cluster hubsize'.

CRS-01666: no Hub nodes found; switching node role to 'hub'

Cause: A node attempting to start as a Leaf node was unable to locate any Hub nodes.

Action: No action is required.

CRS-01667: node *string* not allowed to join because the maximum number of Hub nodes has been reached

Cause: A node attempting to start as a Hub node found the maximum number of Hub nodes already active.

Action: No action is required.

CRS-01668: operation is not allowed on a Leaf node

Cause: An unsupported operation was requested on a Leaf node.

Action: Retry this operation on a Hub node.

CRS-01669: The number of voting files available *number* is less than the minimum number of voting files required *number*.

Cause: The number of voting files has decreased to a number of files that is insufficient.

Action: Look in the alert log for related messages such as 1714, 1604, 1613, 1614 and 1615 and act accordingly.

CRS-01670: Leaf node could not find any Hub nodes to connect to; details at *string in string*

Cause: A Leaf node attempted to join the cluster but could not find a Hub node to which to connect.

Action: Verify that the clusterware stack is up and running on at least one Hub node and, if not, start the stack on one or more Hub nodes. Verify that the Grid Naming Service (GNS) resource is active on a Hub node. If not, start it on at least one node. Check if the network connectivity is viable to all Hub nodes that have the clusterware stack running. If the Leaf node startup has exhausted its retry attempts, it may be necessary to start the clusterware stack manually on the Leaf node. Contact Oracle Support Services if all of the above is verified and the Leaf node is not able to find any Hub nodes to which to connect.

CRS-01671: The value for parameter *string* is outside the allowed range of *number to number*. *number* ports reserved for clusterware process.

Cause: An attempt was made to set a parameter with invalid value.

Action: Set the parameter with a value in the indicated range.

CRS-01672: The number of voting files currently available *number* has fallen to the minimum number of voting files required *number*. Further reduction in voting files will result in eviction and loss of functionality

Cause: The Cluster Synchronization Service daemon (CSSD) has detected that the number of voting files currently available is equal to the minimum number of voting files required on the node. There is risk of node eviction in the case of another voting disk failure.

Action: Restore access to voting files or configure additional voting disks so that the number of voting files currently available is more than the minimum number of voting files required.

CRS-01673: A Configuration change request failed because a node in the cluster is being patched; Details at *string in string*

Cause: An attempt to change configuration was rejected because a node in the cluster was being patched.

Action: Retry the command after the patching operation has completed.

CRS-01674: CSSD Reconfiguration completed for addition of the nodes *string*. Active nodes are *string*.

Cause: New nodes joined the cluster.

Action: None

CRS-01675: CSSD Reconfiguration completed for the removal of nodes *string* since the surviving cluster has access to the public network. Active nodes are *string*.

Cause: Reconfiguration was done for removal of the indicated nodes. The active nodes were a part of the surviving cluster because one or more of them were connected to the public network.

Action: None

CRS-01676: CSSD Reconfiguration completed for the removal of nodes *string* since the surviving cluster has a running ASM instance. Active nodes are *string*.

Cause: Reconfiguration was done for removal of the indicated nodes. The active nodes were a part of the surviving cluster because one or more of them had a running ASM instance.

Action: None

CRS-01677: CSSD Reconfiguration completed for the removal of nodes *string* since the surviving cluster has a larger number of nodes. Active nodes are *string*.

Cause: Reconfiguration was done for removal of the indicated nodes. The active nodes were a part of the surviving cluster because they had a larger number of nodes.

Action: None

CRS-01678: CSSD Reconfiguration completed for the removal of nodes *string* since the surviving cluster satisfies server pool configuration best. Active nodes are *string*.

Cause: Reconfiguration was done for removal of the indicated nodes. The active nodes were a part of the surviving cluster because they satisfied the server pool configuration best.

Action: None

CRS-01679: CSSD Reconfiguration completed for the removal of nodes *string* since the surviving cluster has a higher number *number* of CSS CRITICAL objects. Active nodes are *string*.

Cause: Reconfiguration was done for removal of the indicated nodes. The active nodes were a part of the surviving cluster because they had a higher number of resources and nodes marked as CSS CRITICAL.

Action: None

CRS-01680: CSSD Reconfiguration completed for the removal of nodes *string*. Active nodes are *string*.

Cause: Reconfiguration was done for removal of the indicated nodes.

Action: None

CRS-01681: CSSD on node *string* is going down because this node does not have access to the public network.

Cause: Removal of the node was done because this node was not a part of a cluster which had access to the public network.

Action: None

CRS-01682: CSSD on node *string* is going down because this node does not have a running ASM instance.

Cause: Removal of the node was done because this node was not a part of a cluster with a running ASM instance.

Action: None

CRS-01683: CSSD on node *string* is going down because this node is not a part of a cluster having a larger number of nodes.

Cause: Removal of the node was done because this node was not a part of a cluster that had the largest number of nodes.

Action: None

CRS-01684: CSSD on node *string* is going down because this node is not a part of cluster that satisfies server pool configuration best.

Cause: Removal of the node was done because this node was not in the part of the cluster that satisfied server pool configuration best.

Action: None

CRS-01685: CSSD on node *string* is going down because this node is not critical to CSSD.

Cause: Removal of the node was done because this node was not in the part of the cluster that is critical to CSSD.

Action: None

CRS-01686: CSSD on node *string* is going down.

Cause: CSSD on the indicated node went down.

Action: None

CRS-01687: CSSD on node *string* is going down because this node does not have the minimum number of voting files required to survive in the cluster.

Cause: Removal of the node was done because this node did not have the minimum number of voting files required to survive in the cluster.

Action: None

CRS-01688: CSSD on node *string* is going down because it got evicted by node *string*.

Cause: The indicated node was evicted by the other indicated node.

Action: None

CRS-01689: Cluster Synchronization Services daemon on node *string* is going down because another required clusterware component is not running on the node.

Cause: Removal of the indicated node was done because the node did not have all of the required clusterware components running.

Action: None

CRS-01690: The CRS home file system is not responsive. If this persists, a reboot occurs in *number* milliseconds; details are at *string* in *string*.

Cause: The Cluster Synchronization Service daemon (CSSD) agent detected that the Cluster Ready Services (CRS) home was not responsive. This message was a

warning that the node would be rebooted after the indicated time unless responses were received. If CRS home recovered before the time elapsed, no reboot would have occurred and the timers would have been reset.

Action: If the reboot occurred, collect the Oracle Clusterware alert log and the CSSD log of this node as well as the CSS daemon logs of all other nodes in the cluster, and contact Oracle Support Services.

CRS-01691: CSSD reconfiguration completed for the configuration change of parameter *string*. Active nodes are *string*.

Cause: The reconfiguration resulting from the change to the indicated parameter was successfully completed.

Action: None

CRS-01692: CSSD reconfiguration completed for the addition of voting file *string*. Active nodes are *string*.

Cause: The reconfiguration resulting from the addition of the indicated voting file was successfully completed.

Action: None

CRS-01693: CSSD reconfiguration completed for the removal of voting file *string*. Active nodes are *string*.

Cause: The reconfiguration resulting from the removal of the indicated voting file was successfully completed.

Action: None

CRS-01694: CSSD reconfiguration completed for the replacement of voting file *string* with voting file *string*. Active nodes are *string*.

Cause: The reconfiguration resulting from the replacement of the indicated voting files was successfully completed.

Action: None

CRS-01695: CSSD recovery attempt failed for instance *number* started at *number*; details at *string* in *string*.

Cause: An internal error occurred.

Action: Collect the Oracle Clusterware alert log and the Cluster Synchronization Service daemon (CSSD) as well as all CSSD logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01696: CLSDADR *string* thread in CSSD is missing heartbeat attempting recovery; details in *string*.

Cause: An internal error occurred.

Action: Collect the Oracle Clusterware alert log and the Cluster Synchronization Service daemon (CSSD) as well as all CSSD logs of all other nodes in the cluster and contact Oracle Support Services.

CRS-01697: Member kill *number* issued for PID *string* by node *number* for *number* members, group *string*. Details at *string* in *string*.

Cause: A member kill request was issued for the indicated process for the members belonging to the indicated group by the indicated node.

Action: No action is required.

CRS-01698: CSSD received shutdown request *string* from client PID *string*, CSSD aborting from thread: *string*. Details in *string*.

Cause: SHUTDOWN has been received from the client due to failure in client side.

Action: Check the PID and analyze further the reason for client to send SHUTDOWN request. NOT CSS issue.

CRS-01699: Recovery procedure is waiting for old *string* PID number to terminate at 50*string* of recovery timeout. If this persists node will be rebooted in *number* ms. Details in *string*

Cause: An internal error occurred.

Action: Collect the Oracle clusterware alert log and the Cluster Synchronization Service daemon agent log along with CSSD logs.

CRS-01700: Group *string* has *number* maximum supported members registered. Details in *string*.

Cause: A member join request was received but the group has reached the maximum value.

Action: Check the client PID for each join request to determine the reason why the client send it. NOT CSS issue.

CRS-01701: Initialization of the required component GIPC failed; details at *string* in *string*

Cause: The initialization of the communications component GIPC failed, causing the CSSD startup to fail.

Action: Collect alert log and the CSSD log indicated in the message and contact Oracle Support Services.

CRS-01702: Initialization of the required component OLR failed; details at *string* in *string*

Cause: The initialization of the local repository component OLR failed, causing the CSSD startup to fail.

Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01703: Initialization of the required component GPNP failed because the GPNP server daemon is not up; details at *string* in *string*

Cause: The initialization of the configuration profile service failed because the associated server is not up, causing the CSSD startup to fail.

Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01704: Initialization of the required component *string* failed; details at *string* in *string*

Cause: The initialization of a component required by the CSS daemon failed, causing the CSSD startup to fail

Action: Collect clusterware alert log and daemon logs and contact Oracle Support Services.

CRS-01705: Found *number* configured voting files but *number* voting files are required, terminating to ensure data integrity; details at *string* in *string*

Cause: The voting file discovery was unable to locate a sufficient number of valid voting files to guarantee data integrity and is terminating to avoid potential data corruption.

Action: Delete the voting files that are no longer available, as indicated by message number 1637, using appropriate 'crsctl' commands, run either on another node where the clusterware stack is active, or by starting the clusterware stack in exclusive mode.

CRS-01706: Found *number* of *number* voting files in a pending configuration change but *number* voting files are required, terminating to ensure data integrity; details at *string* in *string*

Cause: The voting file discovery was unable to locate a sufficient number of voting files from the new configuration when a configuration change to add or delete voting files is in progress. The CSS daemon is terminating to avoid potential data corruption.

Action: Delete the voting files that are no longer available, as indicated by message number 1638, using appropriate 'crsctl' commands, run either on another node where the clusterware stack is active, or by starting the clusterware stack in exclusive mode.

CRS-01707: Lease acquisition for node *string* number *number* completed

Cause: CSSD acquired a node number through a lease acquisition procedure.

Action: None

CRS-01708: Lease acquisition failed for node *string* because all lease slots are in use; Details at *string* in *string*

Cause: The node failed to acquire a lease because all the lease slots were found to be occupied by other nodes.

Action: Using olsnodes command get the list of leased nodes. Delete the unused nodes using appropriate crsctl command.

CRS-01709: Lease acquisition failed for node *string* because no voting file has been configured; Details at *string* in *string*

Cause: At least one voting file is required for CSSD to function properly. No voting files have been configured.

Action: Add at lease one voting file using appropriate crsctl command.

CRS-01710: Lease acquisition failed for node *string* because CSSD failed to access majority of voting files; Details at *string* in *string*

Cause: A majority of the voting files are not accessible by a node.

Action: Delete the voting files that are no longer available, as indicated by message number 1637, using appropriate 'crsctl' commands, run either on another node where the Clusterware stack is active, or by starting the Clusterware stack in exclusive mode.

CRS-01711: Increasing the number of leases available for new nodes from *number* to *number*

Cause: All the currently available leases are being used. Hence the number of leases available are increased.

Action: None

CRS-01712: Failed to save the node number acquired for node *string*; Details at *string in string*

Cause: CSSD failed to save the node number acquired during startup. The node number is saved to speed up the subsequent startup. Hence this is not a real problem but just a performance degradation on the next startup.

Action: Collect Clusterware alert log, CSSD logs and OHASD logs indicated in the message and contact Oracle Support Services.

CRS-01713: CSSD daemon is started in *string* mode

Cause: CSSD has been started on the node.

Action: None

CRS-01714: Unable to discover any voting files, retrying discovery in *number* seconds; Details at *string in string*

Cause: No voting files were discovered. Possible reasons include: - The filesystems the voting files are on are not available - The voting files have been deleted - The voting files are corrupted

Action: Verify that the filesystems that the voting files are on are active and that the voting files have not been damaged. If necessary, start the clusterware stack in exclusive mode using 'crsctl start crs -excl' and add voting files using 'crsctl add css votedisk' or 'crsctl replace votedisk'

CRS-01715: A failure occurred in the CSS daemon during initialization; Details at *string in string*

Cause: A fatal error occurred during the initialization of the CSS daemon.

Action: Check for prior errors logged in the alert log. Correct any errors that can be corrected. If there are no errors shown, or the errors cannot be resolved, contact Oracle Support Services

CRS-01716: The CSS daemon cannot join the cluster because the software version *string* is lower than the active version *string*; Details at *string in string*

Cause: The cluster has been upgraded to the active version indicated in the message, but this node is at a lower software version, as indicated in the message.

Action: Upgrade this node to the active version indicated in the message

CRS-01717: The CSS daemon has detected a voting file add during startup and is waiting for the add to complete; Details at *string in string*

Cause: A voting file add started on another node is in progress while this CSS daemon is starting. To avoid the potential for data corruption, the CSS daemon on this node must wait for the add to complete.

Action: This is normally a temporary condition that is automatically resolved. If the clusterware stack cannot start on any node, this condition may be corrected by starting the clusterware stack in exclusive mode using 'crsctl start crs -excl' followed by 'crsctl stop crs' on one node. This will automatically correct the condition and the clusterware can be started normally on all nodes.

CRS-01718: The CSS daemon is unable to continue due to a failure in required component *string*.

Cause: A component required by the Cluster Synchronization Service (CSS) daemon has failed. The CSS daemon is unable to continue and is failing.

Action: See the alert log for more detailed messages indicating the nature of the problem and the location of additional information regarding this error.

CRS-01719: Cluster Synchronization Service daemon ('string') 'string (ostid:number)' not scheduled for 'number' msecs.

Cause: Excessive system load prevented threads in the Cluster Synchronization Service daemon (CSSD/ONMD) from being scheduled for execution from the time indicated in the message. This indicates the system was overloaded.

Action: Take steps to reduce the system load or increase system resources to handle the load.

CRS-01720: Cluster Synchronization Services daemon (CSSD) is ready for operation.

Cause: Cluster Synchronization Services daemon (CSSD) is fully initialized and functional. CSSD group membership services has started. Services dependent on CSSD can start using cluster synchronization services.

Action: None

CRS-01721: Cluster Synchronization Service daemon (CSSD) was unable to complete initialization for fence type string.

Cause: The Cluster Synchronization Service daemon (CSSD) failed to complete initialization for the indicated fence type, most likely because of a failure in the associated support entity. The entities CSSD depends on are ASM, DISKMON. Messages in the alert log from DISKMON or ASM may supply additional details.

Action: Contact Oracle Support Services.

CRS-01722: Cluster Synchronization Service daemon encountered an internal error.

Cause: CSSD failed due to an internal error.

Action: Contact Oracle Support Services.

CRS-01723: Cluster Synchronization Services daemon (CSSD) exited because it failed to spawn thread string.

Cause: Cluster Synchronization Services failed to spawn the indicated critical thread due to an operating system error. The accompanying message provides additional details on failed system call.

Action: Contact Oracle Support Services.

CRS-01724: CSSD agent failed to spawn CSSD process

Cause: The Cluster Synchronization Services daemon could not be started because the operating system failed to spawn the process.

Action: Contact Oracle Support Services.

CRS-01725: Encountered operating system error 'string' while performing operation 'string'.

Cause: The operating system encountered an error for the indicated operation.

Action: Contact Oracle Support Services.

CRS-01726: Process failed to run in real-time priority. Details at string in string.

Cause: CSSD, CSSDMONITOR or CSSDAGENT failed to set real-time priority.

Action: Contact Oracle Support Services.

CRS-01727: Network communication between this node '*string*' (*number*) and node '*string*' (*number*) re-established. Node removal no longer imminent.

Cause: None.

Action: None

CRS-01728: The majority of voting files are accessible on *number* sites, however *number* sites are required, terminating to ensure data integrity; details at *string* in *string*

Cause: A check on voting file accessibility prompted by a voting file management operation, periodic voting file access or lease acquisition determined that a majority of voting files on a majority of sites were not accessible by the local node.

Action: Delete the voting files that are no longer available, as indicated by message CRS-01637, using the appropriate 'crsctl' commands. Run the crsctl command either on another node where the clusterware stack is active, or by starting the clusterware stack in exclusive mode.

CRS-01729: CSSD failed to start because the clusterware stack was not shutdown in the expected manner.

Cause: The possible reasons include: - A clusterware stack shutdown in Zero Downtime GI Patching mode was not issued prior to this start attempt - A clusterware stack shutdown in Zero Downtime GI Patching mode was issued but it failed

Action: Restart the clusterware stack normally without the Zero Downtime GI Patching mode option.

CRS-01730: Cluster Synchronization Service daemon failed to change process priority due to an operating system error '*string*'.

Cause: An attempt to change the process priority failed.

Action: Contact Oracle Support Services.

CRS-01731: Storage cell '*string*' is inaccessible from this node; however it is still accessible from node '*string*'; terminating to ensure data integrity; details at '*string*' in '*string*'.

Cause: There was a connectivity problem between this node and the storage cell.

Action: Contact Oracle Support Services.

CRS-01732: CSSD-GPNPD handshake in unicast mode failed; details at '*string*' in '*string*'.

Cause: Initialization with Grid Plug and Play (GPNP) component failed causing Cluster Synchronization Service Daemon (CSSD) to fail during startup.

Action: Collect clusterware alert log, daemon logs, and contact Oracle Support Services.

CRS-01733: IPMIUTIL binary path not specified. Node incapable of IPMI operations; details at '*string*' in '*string*'.

Cause: The fully quantified path to the ipmiutil binary was not present.

Action: Make sure the fully quantified path to the ipmiutil binary is present. Use command 'crsctl set ipmi binaryloc' on every cluster node.

CRS-01734: Cluster Synchronization Services miscount setting was changed from *number* to *number*.

Cause: A configuration change request to change Cluster Synchronization Services miscount completed successfully.

Action: None

CRS-01735: Fence request issued for an entity node *number* with a timeout of *number*.

Cause: Fence requested from client.

Action: None

CRS-01736: Fence request from node *string* is being escalated to evict node *string*.

Cause: Fence requested was not successful.

Action: None

CRS-01737: Member kill from node *string* is being escalated to evict node *string*.

Cause: Member kill requested was not successful.

Action: None

CRS-01738: CSS is starting *string* recovery of thread *string* with a timeout of *number* millisecond.

Cause: A failure occurred in a Cluster Synchronization Service (CSS) daemon thread.

Action: None

CRS-01739: CSS has successfully completed *string* recovery in *number* millisecond.

Cause: Cluster Synchronization Service (CSS) daemon has recovered from a failure.

Action: None

CRS-01740: Cluster Synchronization Services recovery of thread *string* has failed due to *string*.

Cause: A failure occurred during CSSD recovery.

Action: None

CRS-01741: Cluster Synchronization Services is starting special meltdown due to a failure in *string* during recovery.

Cause: A failure occurred during CSSD recovery.

Action: None

CRS-01742: Cluster Synchronization Services has successfully completed special meltdown due to a failure in *string* during recovery.

Cause: A failure occurred during CSSD recovery.

Action: None

CRS-01743: Cluster Synchronization Services is currently undergoing reconfig hence recovery will not be performed; details at *string* in *string*

Cause: A failure occurred in a CSSD thread while CSSD was undergoing reconfig.

Action: None

CRS-01744: Cluster Synchronization Services is currently undergoing reconfig hence ZIP will not be performed; details at *string* in *string*

Cause: ZIP action failed as CSSD was undergoing reconfig.

Action: None

CRS-01745: Cluster Synchronization Service will not undergo recovery due to *string*; details at '*string*' in '*string*'.

Cause: A fatal error occurred during CSS daemon processing.

Action: None

CRS-01801: Cluster *string* configured with nodes *string*.

Cause: None.

Action: None

CRS-01802: Node *string* added to cluster.

Cause: None.

Action: None

CRS-01803: Node *string* deleted from cluster.

Cause: None.

Action: None

CRS-01804: Node *string* upgraded to version *string*.

Cause: None.

Action: None

CRS-01805: Unable to connect to the CSS daemon, return code *number*

Cause: Could not initialize the CSS connection.

Action: Verify that the CSS daemon is running and restart it if it is not up. Retry the operation.

CRS-01806: An error occurred when obtaining the node number of this host, return code *number*

Cause: The request for node number of this node failed.

Action: Verify that the CSS daemon is running and restart it if not. Retry the operation that failed after restart. Look for error messages from the CSS daemon in the alert log indicating any problems.

CRS-01807: An internal cluster configuration command failed in an OCR/OLR operation. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-01808: Node-specific configuration for node *string* in Oracle Local Registry was upgraded to version *string*.

Cause: None.

Action: None

CRS-01809: The cluster configuration command failed to open OCR or OLR key *string*. Details at *string* in *string*.

Cause: An expected or required piece of configuration is missing from the cluster or local registry.

Action: Use the ocrcheck utility to detect errors, and the ocrdump utility to review the registry contents. If problems exist, the registry may need to be recovered or restored. If the problem persists, contact Oracle Support Services.

CRS-01810: Node-specific configuration for node *string* in Oracle Local Registry was patched to patch level *number*.

Cause: None.

Action: None

CRS-01811: Node *string* patched to patch level *number*.

Cause: None.

Action: None

CRS-01812: An attempt to use the same network as both public and private was rejected.

Cause: Distinct networks must be used as public and cluster interconnect.

Action: Retry install using distinct networks for public and private interconnect.

CRS-01901: CRS service setting (*string*) is changed from [*string*] to [*string*].

Cause: None.

Action: None

CRS-02001: memory allocation error when initiating the connection

Cause: failed to allocate memory for the connection with the target process.

Action: None

CRS-02002: connection by user *string* to *string* refused

Cause: User command cannot connect to the target process.

Action: The user may not have sufficient privilege to connect.

CRS-02003: error *number* encountered when connecting to *string*

Cause: Connection to the target process failed.

Action: Examine whether the connection is made properly. Retry again at a later time if necessary.

CRS-02004: error *number* encountered when sending messages to *string*

Cause: User command cannot communicate with the target process properly.

Action: Retry again at a later time.

CRS-02005: timed out when waiting for response from *string*

Cause: the target process does not return acknowledgment in time.

Action: Retry again at a later time.

CRS-02006: error *number* encountered when receiving messages from *string*

Cause: no meta or response message was received from the target process.

Action: Retry again at a later time.

CRS-02007: invalid component key name *<string>* used

Cause: the given component key name could not be recognized.

Action: re-run the command with a valid component key name.

CRS-02008: invalid message type *<number>* used

Cause: an unrecognized message type was sent.

Action: Retry with a valid command again.

CRS-02009: unable to get authentication for user *string*

Cause: current user was not authenticated for connection.

Action: Log in as another user and try again.

CRS-02010: invalid response message from *string*

Cause: Response message has incorrect format.

Action: Retry again at a later time.

CRS-02011: no response at index *number* in response message from *string*

Cause: Response message did not contain a response at the specified index.

Action: If this is an unexpected result, retry again at a later time.

CRS-02012: syntax error in command

Cause: The command syntax is not valid.

Action: Issue 'crsctl debug -h' to see command syntax details. Watch out for ',' vs. ';'.

CRS-02013: user *string* does not have the required privileges

Cause: An attempt to make a diagnostic connection to a Clusterware daemon failed because the user does not have required privileges.

Action: Use system tools to identify the user of the specified daemon process. Log on as the same user as the specified daemon process and try again.

CRS-02101: The OLR was formatted using version *number*.

Cause: Successfully formatted the OLR location(s).

Action: None

CRS-02102: The OLR was restored from file *string*.

Cause: The OLR was successfully restored from a backup file as requested by the user.

Action: None

CRS-02103: The OLR format was downgraded to version *number*.

Cause: The OLR was successfully downgraded to an earlier block format as requested by the user.

Action: None

CRS-02104: The OLR was imported from *string*.

Cause: Successfully imported the OLR contents from a file.

Action: None

CRS-02105: The OLR upgrade was completed. Version has changed from *number* to *number*. Details in *string*.

Cause: The OLR was successfully upgraded to a newer block format.

Action: None

CRS-02106: The OLR location *string* is inaccessible. Details in *string*.

Cause: An error occurred while accessing the OLR.

Action: Use the "ocrcheck -local" command to validate the accessibility of the device and its block integrity. Check that the OLR location in question has the correct permissions.

CRS-02112: The OLR service started on node *string*.

Cause: The OLR was successfully started.

Action: None

CRS-02114: Failed to import Oracle Local Registry from file *string*

Cause: Unable to read data from the import file and import to the local registry

Action: Check availability of the local registry and the details of the failure from the log file

CRS-02119: The Oracle Local Registry (OLR) Service exited on host *string*. Details at *string* in *string*.

Cause: The OLR Service encountered an internal error.

Action: Collect the Oracle Clusterware alert log and the Oracle High Availability Services Daemon (OHASD) log indicated in the message, and contact Oracle Support Services.

CRS-02120: The Oracle Local Registry has invalid contents. Details at *string* in *string*.

Cause: Some of the Oracle Local Registry contents were invalid.

Action: Check the log file indicated in the message for more details. Use the 'ocrcheck -local' command to detect errors, and the 'ocrdump -local' command to review the registry contents. If problems exist, the registry may need to be recovered or restored. If the problem persists, contact Oracle Support Services.

CRS-02129: The Oracle Local Registry backup file *string* is corrupt. Details at *string* in *string*.

Cause: The backup file created by the periodic backup of the Oracle Local Registry (OLR) failed to pass the post-backup sanity check. Either the OLR was corrupted or the backup was faulty.

Action: If the fault was introduced during the backup generation, then it will be corrected during the next backup generation, and no action is required. If the subsequent backup is also faulty, then the Oracle Local Registry might be corrupt. Contact Oracle Support Services.

CRS-02130: The Oracle Local Registry backup file *string* could not be validated. Details at *string* in *string*.

Cause: The indicated Oracle Local Registry (OLR) backup file could not be validated due to validation process not starting or failing to run the validation check.

Action: Re-attempt to backup the Oracle Local Registry (OLR). If the problem persists, contact Oracle Support Services.

CRS-02301: Grid Plug and Play : *string*

Cause: This conveys a message from the Grid Plug and Play (GPnP) layer to the alert log.

Action: Look up the imbedded message and respond accordingly.

CRS-02302: Cannot get Grid Plug and Play (GPnP) profile. Error *string* (*string*).

Cause: Get Grid Plug and Play (GPnP) profile operation failed.

Action: n/a

CRS-02303: Grid Plug and Play Daemon (GPMPD) is not running on local node.

Cause: Grid Plug and play Daemon (GPMPD) is not running on local node. GPnP request cannot be completed.

Action: Make sure GPMPD is running and retry the operation.

CRS-02304: GPnP profile signature verification failed. *string* request aborted.

Cause: GPnP profile used in GPnP request or request result does not have a valid signature.

Action: If error persists, contact Oracle Support Services.

CRS-02305: GPnP resource discovery (MDNSD) is not running on local node.

Cause: GPnP resource discovery failed.

Action: Make sure resource discovery service (MDNSD) runs on local node.

CRS-02306: Grid Plug and Play Daemon (GPMPD) on host "*string*" not found.

Cause: Remote Grid Plug and Play Daemon (GPMPD) on requested host were not found in resource discovery results.

Action: Make sure host is up, clusterware GPnP services (MDNSD and GPMPD) are up and running and network connection is operational.

CRS-02307: No Grid Plug and Play services on requested remote hosts.

Cause: Failed to find operational GPnP services on remote host(s).

Action: Make sure GPnP services (MDNSD and GPMPD) are up and running on remote hosts, and network connection is operational.

CRS-02310: Failed to initialize security facility.

Cause: Error occurred while initializing Grid Plug and Play (GPnP) security component.

Action: If the problem persists, contact Oracle Support Services.

CRS-02311: Failed to initialize Resource Discovery. RD error: *string*. Make sure RD providers installed properly.

Cause: Error occurred while initializing Grid Plug and Play (GPnP) Resource Discovery (RD).

Action: If the problem persists, contact Oracle Support Services.

CRS-02312: Failed to initialize XML Developer's Kit (XDK). XDK error *string*.

Cause: Error occurred while initializing XML Developer's Kit component (XDK).

Action: If the problem persists, contact Oracle Support Services.

CRS-02313: Failed to initialize GIPC communication layer. GIPC error: *string*.

Cause: Error occurred while initializing GIPC communication layer.

Action: If the problem persists, contact Oracle Support Services.

CRS-02314: Cannot initialize locking subsystem.

Cause: Error occurred while initializing locking subsystem.

Action: If the problem persists, contact Oracle Support Services.

CRS-02315: Failed to initialize Grid Plug and Play (GPnP) certkey providers.

Cause: GPnP certkey provider(s) data was not found or corrupt.

Action: If the problem persists, contact Oracle Support Services.

CRS-02316: Cannot initialize Grid Plug and Play (GPnP), *string (string)*.

Cause: General GPnP initialization failure.

Action: If the problem persists, contact Oracle Support Services.

CRS-02317: Cannot get local Grid Plug and Play (GPnP) security keys (wallet).

Cause: GPnP wallet(s) directory or files were not found or corrupt.

Action: If the problem persists, contact Oracle Support Services.

CRS-02318: Grid Plug and Play Daemon(GPNPD) is not found.

Cause: Local Grid Plug and Play Daemon (Grid Plug and Play Daemon(GPNPD) is not found.

Action: Make sure Grid Plug and Play Daemon(GPNPD) is running.

CRS-02319: No cluster name found in Grid Plug and Play (GPnP) profile.

Cause: Profile is invalid - it must specify a mandatory clustername parameter.

Action: Contact Oracle Support Services.

CRS-02320: No sequence number found in Grid Plug and Play (GPnP) profile.

Cause: Profile is invalid - it must specify a mandatory profile sequence parameter.

Action: Contact Oracle Support Services.

CRS-02321: Flex Cluster mode configuration not found in Grid Plug and Play (GPnP) profile.

Cause: The Profile did not have Flex Cluster mode configuration and could not be used to bring up the stack in Flex Cluster mode.

Action: Contact Oracle Support Services.

CRS-02322: Cannot get local Grid Plug and Play (GPnP) profile. Error initializing GPnP profile cache providers.

Cause: Local GPnP setup was invalid.

Action: Contact Oracle Support Services.

CRS-02323: Error initializing one of the Grid Plug and Play (GPnP) profile cache providers.

Cause: Local GPnP setup was invalid.

Action: Contact Oracle Support Services.

CRS-02324: Errors occurred while trying to push Grid Plug and Play (GPnP) profile.

Cause: GPnP profile update partially failed.

Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.

CRS-02325: Unable to get Grid Plug and Play (GPnP) profile from requested cluster nodes.

Cause: Get GPnP profile from remote nodes failed.

Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.

CRS-02326: Grid Plug and Play (GPnP) profile is different across cluster nodes. *string*.

Cause: GPnP profile was different across cluster nodes.

Action: Try to repeat the update. If the problem persists, contact Oracle Support Services.

CRS-02327: Grid Plug and Play Daemon(GPNPD) already running on node *string*. Terminating.

Cause: Grid Plug and Play Daemon (GPNPD) instance was already running on node.

Action: Bring down existing GPNPD instance first.

CRS-02328: Grid Plug and Play Daemon(GPNPD) started on node *string*.

Cause: Grid Plug and Play Daemon (GPNPD) started on node.

Action: None

CRS-02329: Grid Plug and Play Daemon(GPNPD) on node *string* shut down.

Cause: Grid Plug and Play Daemon (GPNPD) was shut down by request.

Action: None

CRS-02330: Grid Plug and Play Daemon(GPNPD) failed to start listening for GPnP peers.

Cause: Grid Plug and Play Daemon (GPNPD) failed to open server endpoint.

Action: Check GPNPD logs for the cause. If the problem persists, contact Oracle Support Services.

CRS-02331: Error getting Grid Plug and Play (GPnP) profile from "string".

Cause: Get remote GPnP profile from remote node operation failed.

Action: Retry request. If the problem persists, contact Oracle Support Services.

CRS-02332: Error pushing Grid Plug and Play (GPnP) profile to "string".

Cause: Push GPnP profile to remote node operation failed.

Action: Retry request. If the problem persists, contact Oracle Support Services.

CRS-02333: Could not write Grid Plug and Play (GPnP) profile to local cache.

Cause: Grid Plug and Play Daemon (GPNPD) cannot save GPnP profile to local cache.

Action: Make sure there is at least 10MB of free disk space in Clusterware home. If the problem persists, contact Oracle Support Services.

CRS-02334: Could not delete pending Grid Plug and Play (GPnP) profile from local cache.

Cause: Grid Plug and Play Daemon (GPNPD) cannot delete GPnP profile from local cache.

Action: If the problem persists, contact Oracle Support Services.

CRS-02335: Could not write pending Grid Plug and Play (GPnP) profile to local cache.

Cause: Grid Plug and Play Daemon (GPNPD) cannot save GPnP profile to local cache.

Action: Make sure there is at least 10MB of free disk space in Clusterware home. If the problem persists, contact Oracle Support Services.

CRS-02336: Grid Plug and Play Daemon (GPNPD) failed get local GPnP profile and cannot continue. Check gpnpd/gpnp client logs.

Cause: Grid Plug and Play Daemon (GPNPD) cannot find a profile in local cache, and cannot continue.

Action: Contact Oracle Support Services.

CRS-02339: Grid Plug and Play Daemon(GPNPD) advertisement with *string* failed. This may block some cluster configuration changes. Advertisement attempts will continue.

Cause: Grid Plug and Play Daemon (GPNPD) failed to advertise itself with a specified service (for example, Multicast Domain Name Service Daemon (MDNSD) or Oracle Grid Naming Service (GNS)). Advertisement attempts will continue at regular intervals, and alerts will periodically be issued.

Action: Make sure the specified service is running and wait for the success message CRS-2337 before changing the cluster configuration.

CRS-02340: Errors occurred while processing received Grid Plug and Play (GPnP) message.

Cause: Invalid GPnP message received.

Action: Check gpnp client and GPNPD logs for details. If the problem persists, contact Oracle Support Services.

CRS-02341: Grid Plug and Play Daemon (GPNPD) on node *string* shutting down on signal *number*.

Cause: Grid Plug and Play Daemon is shutting down due to received signal.

Action: Contact your cluster administrator.

CRS-02342: Grid Plug and Play (GPnP) messaging received error : *string* (*string*).

Cause: GPnP message error received.

Action: If the problem persists, contact Oracle Support Services.

CRS-02343: Grid Plug and Play Daemon(GPNPD) is unable resolve peer host name "*string*" to sync profile. Details at *string* in *string*.

Cause: Hostname of peer Grid Plug and Play Daemon (Grid Plug and Play Daemon(GPNPD)) cannot be resolved.

Action: Verify that DNS hostname resolution is working for the peer node or its IP address is defined in the /etc/hosts.

CRS-02401: The Cluster Time Synchronization Service started on host *string*.

Cause: The Cluster Time Synchronization Service successfully started on the listed node.

Action: None

CRS-02402: The Cluster Time Synchronization Service aborted on host *string*. Details at *string* in *string*.

Cause: The Cluster Time Synchronization Service aborted due to an internal error. Check the Cluster Time Synchronization Service log file to determine the cause.

Action: Determine whether the Cluster Time Synchronization Service has auto-started.

CRS-02403: The Cluster Time Synchronization Service on host *string* is in observer mode.

Cause: The Cluster Time Synchronization Service detected an active vendor time synchronization service on at least one node in the cluster.

Action: Oracle Clusterware requires a time synchronization service in active mode. Oracle Clusterware will work with a vendor service or the Cluster Time Synchronization Service. If you want to change the Cluster Time Synchronization Service to active mode, stop and deconfigure the vendor time synchronization service on all nodes.

CRS-02404: The Cluster Time Synchronization Service detects that the local time is significantly different from the mean cluster time. Details in *string*.

Cause: The difference between the local time and the time on the reference node was too much to be corrected.

Action: Shutdown the Oracle Clusterware on the local node. Adjust the clock via native platform or OS methods. Restart the Oracle Clusterware on the local node.

CRS-02405: The Cluster Time Synchronization Service on host *string* is shutdown by user

Cause: The Cluster Time Synchronization Service on listed node was terminated by a user.

Action: None

CRS-02406: The Cluster Time Synchronization Service timed out on host *string*. Details in *string*.

Cause: A Cluster Time Synchronization Service action failed. The information from the reference node was discarded.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If no network problems are found, 1. Run diagcollection.pl. 2. Contact Oracle Support Services.

CRS-02407: The new Cluster Time Synchronization Service reference node is host *string*.

Cause: A new Cluster Time Synchronization Service reference node has been elected.

Action: None

CRS-02408: The clock on host *string* has been updated by the Cluster Time Synchronization Service to be synchronous with the mean cluster time.

Cause: The clock was updated to be in sync with the mean cluster time.

Action: None

CRS-02409: The clock on host *string* differs from mean cluster time by *number* microseconds. No action has been taken because the Cluster Time Synchronization Service is running in observer mode.

Cause: The system clock on the indicated host differed from the mean cluster time by more than 1000 microseconds. No action was taken because the Cluster Time Synchronization Service was running in observer mode.

Action: Verify correct operation of the vendor time synchronization service on the node.

CRS-02410: The Cluster Time Synchronization Service on host *string* is in active mode.

Cause: The Cluster Time Synchronization Service did not detect an active vendor time synchronization service on any node in the cluster.

Action: None. If a vendor time synchronization service is preferred to the Cluster Time Synchronization Service, then configure and start the vendor time synchronization service on all nodes to change the Cluster Time Synchronization Service to observer mode.

CRS-02411: The Cluster Time Synchronization Service will take a long time to perform time synchronization as local time is significantly different from mean cluster time. Details in *string*.

Cause: The difference between the local time and the time on the reference node was too much to be synchronized in a short period.

Action: (Optional) Shutdown and restart the Oracle Clusterware on this node to instantaneously synchronize the time with the reference node.

CRS-02412: The Cluster Time Synchronization Service detects that the local time is significantly different from the mean cluster time. Details in *string*.

Cause: The difference between the local time and the time on the reference node was too large. No action has been taken as the Cluster Time Synchronization Service was running in observer mode.

Action: Verify correct operation of the vendor time synchronization service on the node. Alternatively, if you want to change the Cluster Time Synchronization Service to active mode, stop and deconfigure the vendor time synchronization service on all nodes.

CRS-02413: The Cluster Time Synchronization Service is unable to perform step time synchronization due to high network latency with the reference node. The local time is not significantly different from the mean cluster time. The Cluster Time Synchronization Service is entering slew time synchronization mode.

Cause: The Cluster Time Synchronization Service experienced high network latency. The local time was not significantly different from the mean cluster time; therefore, the Cluster Time Synchronization Service will maintain the system time with slew time synchronization.

Action: Determine the root cause of high network latency, and perform appropriate repair if necessary.

CRS-02414: The Cluster Time Synchronization Service is unable to perform step time synchronization due to high network latency with the reference node. The local time is significantly different from the mean cluster time. The Cluster Time Synchronization Service is aborting.

Cause: The Cluster Time Synchronization Service experienced high network latency. The local time was significantly different from the mean cluster time; therefore, the Cluster Time Synchronization Service is aborting.

Action: Shut down the Oracle Clusterware on the local node. Determine the root cause of high network latency. Perform appropriate repair if necessary, then restart the Oracle Clusterware on the local node.

CRS-02415: Resource '*string*' cannot be registered because its owner '*string*' is not the same as the Oracle Restart user '*string*'.

Cause: The resource indicated in the message could not be registered because it was owned by a user other than the Oracle Restart user.

Action: Resubmit as the Oracle Restart user.

CRS-02416: The Cluster Time Synchronization Service is in observer mode.

Cause: The Cluster Time Synchronization Service detected an active vendor time synchronization service on at least one node in the cluster.

Action: Oracle Clusterware requires a time synchronization service in active mode. Oracle Clusterware will work with a vendor service or the Cluster Time Synchronization Service. If you want to change the Cluster Time Synchronization Service to active mode, stop and deconfigure the vendor time synchronization service on all nodes.

CRS-02417: The Cluster Time Synchronization Service is in active mode.

Cause: The Cluster Time Synchronization Service did not detect an active vendor time synchronization service on any node in the cluster.

Action: None. If a vendor time synchronization service is preferred to the Cluster Time Synchronization Service, then configure and start the vendor time synchronization service on all nodes to change the Cluster Time Synchronization Service to observer mode.

CRS-02418: The clock on host *string* differs from mean cluster time by *number* microseconds. The Cluster Time Synchronization Service will not perform time synchronization because the time difference is beyond the permissible offset of *number* seconds. Details in *string*.

Cause: The Cluster Time Synchronization Service exited because it detected a time offset from mean cluster time on the indicated node of more than the indicated permissible value.

Action: Shutdown Oracle Clusterware on the indicated host. Adjust the clock using native platform or operating system methods, and then restart Oracle Clusterware on the indicated host.

CRS-02500: Cannot stop resource '*string*' as it is not running

Cause: A request to stop a resource that is not running was received.

Action: Check the current state of the resource, it should no longer be running.

CRS-02501: Resource '*string*' is disabled

Cause: The resource is currently disabled and so may not be operated on.

Action: Enable the resource and re-submit your request.

CRS-02502: Resource '*string*' has dependency error because of resource '*string*'

Cause: The attempted operation has failed because of a dependency on the specified resource.

Action: Ensure that the intended operation is still desired. If so, the specified resource and its state need to be evaluated to decide on the corrective action.

CRS-02503: Resource '*string*' is in UNKNOWN state and must be stopped first

Cause: The resource cannot be acted upon when it is in the UNKNOWN state.

Action: Stop the resource manually, make sure it is OFFLINE, and then re-submit the request.

CRS-02504: Resource '*string*' cannot be placed on any online servers that satisfy its placement policy

Cause: The resource cannot be placed because of the constraints imposed by its placement policy.

Action: Either change the placement policy of the resource or re-evaluate the request.

CRS-02505: Another operation is being performed on '*string*'. Retry later

Cause: Another operation is being performed on the specified object.

Action: Typically, waiting and retrying or using a way to queue the request are the two choices to proceed.

CRS-02506: Operation on '*string*' has been cancelled

Cause: A scheduled or running operation has been cancelled.

Action: None

CRS-02507: Unsupported modifier '*string*' in dependency '*string*'

Cause: The modifier is not a valid one.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02508: Incomplete specification of dependency '*string*'

Cause: The specification does not have the dependent object specified.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02509: Resource type '*string*' used in dependency '*string*' does not exist or is not registered.

Cause: The resource type referenced by the dependency specification is not found.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02510: Resource '*string*' used in dependency '*string*' does not exist or is not registered.

Cause: The resource referenced by the dependency specification is not found.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02511: Attribute '*string*' cannot be specified on per-X basis for resource '*string*'

Cause: The specified attribute is specified on per-X basis, which is not allowed for this attribute.

Action: Remove the specification.

CRS-02512: Attribute format for '*string*' is invalid in resource '*string*'

Cause: The specification does not follow valid format.

Action: Correct the specification and re-submit the request.

CRS-02513: Attribute format for '*string*' is invalid

Cause: The specification does not follow valid format.

Action: Correct the specification and re-submit the request.

CRS-02514: Dependency attribute specification '*string*' is invalid in resource '*string*'

Cause: The specification of relations does not follow valid format.

Action: Correct the specification and re-submit the request.

CRS-02515: Circular dependency found for resource '*string*'

Cause: The resource dependency specification has a circular dependency.

Action: Circular dependencies are disallowed. Change the profile and re-submit.

CRS-02516: Server pool is not specified for resource '*string*'

Cause: The resource profile does not have server pool specified.

Action: Either specify a an existing server pool or HOSTING_MEMBERS in the profile and re-submit the request.

CRS-02517: Required attribute '*string*' is not specified for resource '*string*'

Cause: A required attribute is missing from the resource profile.

Action: Add the attribute to the profile and re-submit the request.

CRS-02519: Either '*string*' or '*string*' must be specified when '*string*' is '*string*'

Cause: Neither or both of the parameters was specified.

Action: Specify exactly one of the two and re-submit.

CRS-02520: Invalid value '*string*' for attribute '*string*'

Cause: The value specified for the attribute is inappropriate or invalid.

Action: Review the value, correct the problem and re-submit the request.

CRS-02521: Read-only attribute '*string*' cannot be modified

Cause: An attempt was made to modify a read-only attribute.

Action: None

CRS-02522: No value is specified

Cause: There is nothing specified for the value.

Action: Provide a valid value.

CRS-02523: Invalid characters are used when specifying the value

Cause: 1 or more characters used to specify a value are inappropriate.

Action: Provide a valid value.

CRS-02524: Value specification may only contain '*string*' '*string*' '*string*' '*string*' '*string*' '*string*'

Cause: The value specified is not any of the allowed.

Action: The value must be one of the allowed ones, as specified. Provide a valid one.

CRS-02525: All instances of the resource '*string*' are already running; relocate is not allowed because the force option was not specified

Cause: All instances of the resource are running and the start request does not have the force option specified.

Action: Either specify the force option or re-evaluate the need for the request.

CRS-02526: There are no available instances of resource '*string*' to start on '*string*'

Cause: All instances of the resource are already running or otherwise unavailable to be started on the specified server.

Action: Create more instances or re-evaluate the need for the request.

CRS-02527: Unable to start '*string*' because it has a '*string*' dependency on '*string*'

Cause: Start/relocate of the resource is impossible because it has a dependency on another entity which prevents it from being able to start.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Follow up on the action recommended for that message.

CRS-02528: Unable to place an instance of '*string*' as all possible servers are occupied by the resource

Cause: Out of possible servers to place the resource on, all already host an instance of the resource.

Action: You need to add more servers or change the resource placement parameters to allow placement on additional servers.

CRS-02529: Unable to act on '*string*' because that would require stopping or relocating '*string*', but the force option was not specified

Cause: Acting on the resource requires stopping or relocating other resources, which requires that force option be specified, and it is not.

Action: Re-evaluate the request and if it makes sense, set the force option and re-submit.

CRS-02530: Unable to stop '*string*' because '*string*' has a stop-time '*string*' dependency on it

Cause: Stopping the resource is impossible because it has a dependency on another resource and there is a problem with that other resource.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Follow up on the action recommended for that message.

CRS-02531: Internal error while operating on '*string*'

Cause: General-purpose message for highly unexpected internal errors.

Action: This message will usually be preceded by another one with a more specific problem description. Contact Oracle Support Services.

CRS-02532: OCR write failed for '*string*'

Cause: Unknown, but would usually imply corruption or unavailability of the OCR or a lack of permissions to update keys or a software defect in the OCR code.

Action: Validate that OCR is accessible, validate that key permissions match. Contact Oracle Support Services.

CRS-02533: Server '*string*' is down. Unable to perform the operation on '*string*'

Cause: The server is down and therefore the operation cannot be performed.

Action: Try using a different server.

CRS-02534: Resource type '*string*' is not registered

Cause: The specified resource type is not registered.

Action: Re-evaluate the request.

CRS-02535: Resource type '*string*' does not have attribute '*string*' and thus it cannot be updated

Cause: An non-existing attribute cannot be modified.

Action: Re-evaluate the request.

CRS-02536: Required attribute '*string*' is not specified for '*string*'

Cause: A required attribute is missing from the entity's profile.

Action: Add the attribute to the profile and re-submit the request.

CRS-02537: Resource type '*string*' cannot be extended directly; use its extensions instead

Cause: The type cannot be extended.

Action: Use a type that extends this one.

CRS-02538: Value for attribute '*string*' is of incorrect type (string is expected)

Cause: The type of the value is not correct.

Action: Re-submit the request with the value specified in proper type.

CRS-02539: A resource with the name '*string*' is already registered

Cause: A resource with specified name is already registered.

Action: Use a unique name for the new resource.

CRS-02540: Value for attribute '*string*' is of incorrect type (integer is expected)

Cause: The type of the value is not correct.

Action: Re-submit the request with the value specified in proper type.

CRS-02541: Server pool '*string*' is not registered

Cause: The specified server pool is not registered.

Action: Re-evaluate the request.

CRS-02542: The tag '*string*' is mentioned in both '*string*' and '*string*' attributes, which is conflicting

Cause: The same tag is used to specify exclusive as well as overlapping server pools. These requirements cannot be satisfied simultaneously.

Action: Remove the tag from one of the attributes.

CRS-02543: The type is not specified for attribute '*string*'

Cause: Value type specification is missing for the attribute.

Action: Specify a proper type and re-submit.

CRS-02544: The name '*string*' is longer than the allowed maximum of '*number*' characters

Cause: The name is too long.

Action: Use a shorter name.

CRS-02545: Cannot operate on '*string*'. *string*

Cause: The entity specified is currently locked as part of another operation.

Action: Re-submit the request later.

CRS-02546: Server '*string*' is not online

Cause: Operation is invalid because the specified server is not online.

Action: Provide an online server name.

CRS-02547: Update of an internal or read-only attribute '*string*' for resource '*string*' is not allowed

Cause: Internal and read-only attributes may not be updated.

Action: Exclude internal and read-only attributes from your request.

CRS-02548: A cyclical dependency on '*string*' is detected from '*string*'

Cause: There is a cycle in the dependency graph. Cycles are disallowed.

Action: Re-evaluate the dependency graph.

CRS-02549: Resource '*string*' cannot be placed on '*string*' as it is not a valid candidate as per the placement policy

Cause: The resource cannot be placed because of the constraints imposed by its placement policy.

Action: Either change the placement policy of the resource or re-evaluate the request.

CRS-02550: Resource '*string*' cannot be failed-over because it has other non-OFFLINE instances on the server '*string*'

Cause: The resource cannot be failed-over from the specified server because it has other non-OFFLINE instances still available on that server and fail-over can only be done on all instances of the resource on the server as a whole.

Action: None

CRS-02551: Resource '*string*' cannot be failed-over because it is of type '*string*', which cannot relocate

Cause: Local resources cannot be relocated from one server to another.

Action: None

CRS-02552: There are no available instances of resource '*string*' to start.

Cause: All instances of the resource are in the ONLINE or UNKNOWN state.

Action: Re-evaluate the need for the request.

CRS-02553: Server pool '*string*' cannot be unregistered as it does not exist

Cause: The server pool you are trying to remove does not exist.

Action: Make sure the server pool you are trying to remove exists.

CRS-02554: Server pool '*string*' cannot be unregistered as it is referenced by resource '*string*'

Cause: The server pool you are trying to remove has references to it.

Action: Make sure the server pool you are trying to remove is not referenced by other entities.

CRS-02555: Resource '*string*' cannot be relocated as it is a local resource

Cause: The request is impossible to complete as local resources never relocate.

Action: Re-evaluate the request.

CRS-02556: Resource '*string*' cannot be restored to its original state after a failed relocate attempt

Cause: After an unsuccessful attempt to relocate a resource, crsd was unable to restore the resource.

Action: Manual intervention may be required. Re-try starting the resource.

CRS-02557: Server pool '*string*' cannot be unregistered as it is referenced by server pool '*string*'

Cause: The server pool you are trying to remove has references to it.

Action: Make sure the server pool you are trying to remove is not referenced by other entities.

CRS-02558: Resource type '*string*' may not be unregistered as there are types that are based on it.

Cause: Types may not be unregistered if they have derived types.

Action: Remove derived types first, then remove this one.

CRS-02559: Resource type '*string*' may not be unregistered as it has the following resources:*string*

Cause: Types may not be unregistered if they have resources registered.

Action: Remove the specified resources first, then remove the type.

CRS-02560: Resource type '*string*' does not exist

Cause: The resource type referenced does not exist.

Action: Specify a correct type.

CRS-02561: Resource type '*string*' may not be unregistered as it is referenced by resource '*string*'

Cause: Types may not be unregistered if they are referenced in resource dependencies.

Action: Make sure there are no existing resources that reference this type in their dependencies.

CRS-02562: Resource '*string*' cannot be relocated as it is not running

Cause: Only currently running resources can be relocated.

Action: Make sure the resource is running before issuing the request.

CRS-02563: Attempt to start resource '*string*' on '*string*' has failed. Will re-retry on '*string*' now.

Cause: Undirected (no target member) start of a resource has failed for the server; a retry is in progress.

Action: None, this is an informational message.

CRS-02564: Failed to relocate resource '*string*'. Will attempt to restore it on '*string*' now.

Cause: Resource relocate operation was unable to relocate the resource to any of the possible servers.

Action: None, this is an informational message.

CRS-02565: Attempt to relocate resource '*string*' to '*string*' has failed. Will re-retry on '*string*' now.

Cause: Undirected (no target member) relocate of a resource has failed for the server; a retry is in progress.

Action: None, this is an informational message.

CRS-02566: User '*string*' does not have sufficient permissions to operate on resource '*string*', which is part of the dependency specification.

Cause: User does not have permissions to operate on the resource as it will prevent the current resource from starting or staying online in future.

Action: The user performing the operation must have access privileges to operate on the entire resource dependency tree. The user must either be given those privileges by modifying the dependent resources' access rights or another user having permissions should perform this operation.

CRS-02567: Error while parsing the default value for attribute '*string*'

Cause: The default value specified is not proper.

Action: Make sure the value is proper for its type.

CRS-02568: Base resource type name '*string*' does not exist

Cause: The name of a base type used is not valid.

Action: Use an existing type as a base.

CRS-02569: Unsupported value type is used in attribute '*string*'

Cause: An unsupported value type was specified in the attribute's definition.

Action: Use one of the supported types.

CRS-02570: Internal Error: Number of objects '*number*' is different from number of lists '*number*'

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02571: Dependency kind '*string*' is specified more than once for resource '*string*'

Cause: A dependency kind is used more than once in the profile of the resource.

Action: Combine multiple specifications of the same dependency kind into a single clause.

CRS-02572: '*string*' is not a supported Special Value

Cause: The specified identifier is not a valid Special Value.

Action: Check the value for correctness.

CRS-02573: ACL entry for owner field is missing.

Cause: The complete value for the ACL attribute has been provided but it is missing a mandatory entry specifying permissions for the owner.

Action: Include permissions for the owner in the value of ACL attribute.

CRS-02574: ACL entry for primary group field is missing.

Cause: The complete value for the ACL attribute has been provided but it is missing a mandatory entry specifying permissions for the primary group.

Action: Include permissions for the primary in the value of ACL attribute.

CRS-02575: ACL entry for users other than the owner and those belonging to primary group is missing.

Cause: The ACL attribute is missing a mandatory entry specifying permissions for users other than the owner and those belonging to the primary group.

Action: Include permissions for other users in the value of ACL attribute.

CRS-02576: User '*string*' is not a member of group '*string*'

Cause: The group that the caller claims to be a member of has no such user by configuration.

Action: Make sure the group is configured to have the calling user as a member.

CRS-02577: Use of '*string*' in attributes and values is not allowed

Cause: A disallowed character was detected.

Action: Retry without the disallowed character.

CRS-02578: Value of '*string*' (*number*) may not be greater than that of '*string*' (*number*)

Cause: The specified values do not make sense - one may not be less than the other.

Action: Use valid values.

CRS-02579: Value '*number*' may not be less than '*number*'

Cause: The value is less than the allowed minimum.

Action: Use a proper value.

CRS-02580: Value '*number*' is neither '*number*' nor '*number*'

Cause: The value must be one of the two and it is neither.

Action: Use a proper value.

CRS-02581: Value '*string*' is not any of the following '*string*', '*string*', '*string*'

Cause: The value must be one of the ones specified and it is not.

Action: Use a proper value.

CRS-02582: Value '*string*' does not follow expected format: *n*[*s*]*d*[*m*]*w*[*h*]

Cause: The value specification does not follow required format.

Action: Use a proper value.

CRS-02583: Value '*number*' must be in the '*number*' - '*number*' range

Cause: The value is not within the allowed range.

Action: Use a proper value.

CRS-02584: Value '*string*' is not allowed here

Cause: The value is not proper in this context.

Action: Use a proper value.

CRS-02585: Deletion of built-in resource types is not allowed

Cause: An attempt was made to delete a built-in resource type.

Action: Removal of built-in types is not allowed.

CRS-02586: Deletion of a running resource '*string*' requires the force option

Cause: An attempt was made to delete a resource that is still running.

Action: Stop the resource first using the 'crsctl stop resource' command. If the resource cannot be stopped, specify the force option to the 'crsctl delete' command.

CRS-02587: Attribute '*string*' is internal and thus may not be overridden in type '*string*'

Cause: Attributes defined in built-in resource types that are internal to the subsystem may never be overridden in user-defined resource types.

Action: Do not specify this attribute in the new user-defined type.

CRS-02588: A cyclical dependency on '*string*' is detected from '*string*' via type '*string*'

Cause: There is a cycle in the dependency graph, via a resource type. Cycles are disallowed.

Action: Re-evaluate the dependency graph.

CRS-02589: Relation modifier '*string*' is invalid for relation kind '*string*'

Cause: An unexpected relation modifier is specified.

Action: Use defined modifiers only.

CRS-02590: A resource name may not be empty or contain spaces

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02591: A server pool name may not be empty or contain spaces

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02592: A type name may not be empty or contain spaces

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02593: Comparator value '*string*' in the filter specification is not supported

Cause: An unsupported comparator was supplied.

Action: Use a supported value.

CRS-02594: Filter specification '*string*' is invalid

Cause: The filter specification invalid or empty.

Action: Provide a valid filter or do not specify you have one.

CRS-02595: Server pool '*string*' has already been registered

Cause: A server pool with this name has already been registered.

Action: Provide a name that is not currently in use.

CRS-02596: Modifications to the '*string*' attribute of server pools are not supported

Cause: Changes to the value of the attribute are not allowed.

Action: Create a different pool with the desired value and use it.

CRS-02597: Server '*string*' may not be moved to pool '*string*'

Cause: Because of one or more of configuration-related constraints, the move of the server is not a valid operation at the time.

Action: Re-evaluate the request's validity in the context of the entire error stack.

CRS-02598: Server pool '*string*' is already at its maximum size of '*number*'

Cause: The pool is already at the maximum.

Action: The request is impossible to execute.

CRS-02599: Server '*string*' is not in a parent pool of '*string*'

Cause: The server is not in a parent pool of the pool in question.

Action: The request is impossible to execute.

CRS-02600: Server '*string*' is already in another top-level server pool

Cause: The server is already consumed by a different top-level pool and all such pools are exclusive as far as server ownership.

Action: The request is impossible to execute.

CRS-02601: Server '*string*' is not explicitly mentioned as a candidate by server pool '*string*'

Cause: The server is not in the list of names the pool allows as candidates.

Action: Use a server that is in the specified group.

CRS-02602: Server '*string*' is in server pool '*string*' which is exclusive with server pool '*string*'

Cause: The server is already in a pool that's configured to be exclusive with the one at hand.

Action: The request is impossible to execute.

CRS-02603: Server '*string*' cannot be assigned to server pool '*string*' because it is not a top-level pool

Cause: Server movement is only supported between top-level server pools.

Action: The request is impossible to execute as such an action is not supported.

CRS-02604: Server '*string*' is already assigned to server pool '*string*'

Cause: Server movement makes no sense: the server is already in the target pool.

Action: Check the request validity.

CRS-02605: Server '*string*' cannot be relocated from server pool '*string*' because the pool disallows transfers

Cause: The server pool is configured not to allow server transfers.

Action: Check the request validity.

CRS-02606: Server '*string*' may not be relocated from server pool '*string*' because it is not above its minimum size

Cause: Server pools of identical or higher importance may not be used to steal servers from if they are not above their minimum size.

Action: Update the configuration of server pools by either changing the importance or the minimum size or both and then re-submit the request.

CRS-02607: Attribute '*string*' has not been specified on per-X basis for resource '*string*'

Cause: The specified attribute has not been specified on per-X basis for this resource.

Action: Check the per-X attribute for the resource, fix and resubmit.

CRS-02608: Attribute '*string*' is not a per-X value and cannot be removed

Cause: The specified attribute is not a per-X value.

Action: Check the per-X attribute for the resource, fix and resubmit.

CRS-02609: Server '*string*' may not be relocated to server pool '*string*' as the pool disallows transfers

Cause: The server pool is configured not to allow server transfers.

Action: Check the request validity.

CRS-02610: Server '*string*' is unavailable

Cause: The server is not available at the moment.

Action: Check available servers and rerun the request with an active server.

CRS-02611: Server pool '*string*' is built-in and may not be deleted

Cause: Built-in server pools may never be deleted.

Action: None

CRS-02612: Server pools do not have attribute named '*string*'

Cause: An unsupported attribute was provided as part of the register or update request.

Action: Double check the attributes that are supplied.

CRS-02613: Could not find resource '*string*'.

Cause: An attempt was made to operate on a resource that is not registered.

Action: Check if the resource is registered.

CRS-02614: Could not find resource type '*string*'.

Cause: An attempt was made to operate on a resource type that is not registered.

Action: Check if the resource type is registered.

CRS-02615: Could not find server pool '*string*'.

Cause: An attempt was made to operate on a server pool that is not registered.

Action: Check if the server pool is registered.

CRS-02616: The owner of resource type '*string*' does not have sufficient permissions to operate on resource type '*string*', from which it is directly or indirectly derived.

Cause: Update of a resource type in the current manner is not allowed as it will severely limit operations on the current resource type and will potentially prevent resources of derived types from starting or staying online in future.

Action: If access privileges must be changed, then they need to be changed bottom-up in a dependency.

CRS-02617: Incorrect value of attribute flags has been specified for attribute *string*. Only READONLY flag can be changed for a type attribute.

Cause: Attempt was made to update the flag on a resource type attribute. The only change allowed is to the readonly property of the attribute.

Action: Provide correct value of the attribute flag.

CRS-02618: Cannot change data type *string* of existing attribute *string* to type *string*.

Cause: Attempt was made to update the data type of attribute value.

Action: Data type of the attribute cannot be changed.

CRS-02619: Server pool '*string*' may not be edited

Cause: The pool's attributes may not be edited.

Action: None

CRS-02620: Attribute '*string*' of server pool '*string*' may not be edited

Cause: Editing of the attribute of the server pool is not allowed.

Action: None

CRS-02621: Server '*string*' is assigned to '*string*' to which you have no permission. The operation is not authorized.

Cause: The operation requires making the specified server a placement candidate for the resources owned by the requesting user. However, this is not allowed because the user is not authorized to utilize the server.

Action: Either specify another server that's in the pool you are authorized to use or request that a cluster administrator gives you access to the pool to which the server is currently assigned.

CRS-02622: Server '*string*' is not assigned to any server pool and thus may only be specified by a cluster administrator

Cause: The operation makes use of the server that's not currently assigned to a server pool and the requesting user is not a cluster administrator. Because of that use of the server cannot be authorized at the moment.

Action: Either request a cluster administrator to perform the operation for you or wait until the server has joined the cluster and is assigned to a pool to which you have an x-permission.

CRS-02623: Server pool '*string*' cannot accept server '*string*' because its name is not specified in '*string*'

Cause: Only servers whose names are mentioned in the attribute may be assigned to the pool.

Action: None

CRS-02624: One of '*string*', '*string*' must be specified when '*string*' is '*string*'

Cause: Neither of the parameters was specified.

Action: Specify either of the two and re-submit.

CRS-02625: Owner of resource '*string*' does not have execute permission to pool '*string*' and may not use it

Cause: Resource profile references a server pool to which the owner of the resource does not have the X-permission.

Action: Either have the pool's permission changed appropriately or use a different pool.

CRS-02626: Owner of server pool '*string*' does not have execute permission to parent server pool '*string*'

Cause: Parent pool does not have the X-permission for the pool's parent.

Action: Either have the desired parent pool's permission changed appropriately or use a different pool.

CRS-02627: You must have execute permission on pool '*string*' to relocate server '*string*'

Cause: The client requesting the operation does not have proper permissions to the specified pool.

Action: Acquire required permissions or use another server/pool. Permissions can be added by an authorized user using 'crsctl setperm' command.

CRS-02628: Server pool '*string*' may not be a parent of itself

Cause: An attempt was made to make a server pool a parent of itself.

Action: Re-evaluate the server pool dependencies.

CRS-02629: Only cluster administrators are allowed to create top-level server pools

Cause: An attempt was made to create a server pool that has no parent pools. Creation of such pools is only allowed for cluster administrators.

Action: Either acquire the role of cluster administrator or have one create the pool for you.

CRS-02630: Only cluster administrators are allowed to create local resources

Cause: An attempt was made to create a local resource which is only allowed for cluster administrators.

Action: Either acquire the role of cluster administrator or have one create the resource for you.

CRS-02631: Only cluster administrators are allowed to create cluster resources that may run anywhere in the cluster

Cause: An attempt was made to create a cluster resource that may run anywhere in the cluster which is only for cluster administrators.

Action: Either acquire the role of cluster administrator or have one create the resource for you.

CRS-02632: There are no more servers to try to place resource '*string*' on that would satisfy its placement policy

Cause: After one or more attempts, the system ran out of servers that can be used to place the resource and satisfy its placement policy.

Action: None

CRS-02633: server pool '*string*' not found in policy '*string*'

Cause: An attempt was made to change the configuration of a server pool in the policy set, but the server pool was not configured to be managed by the policy set.

Action: Modify the SERVER_POOLS attribute of the policy set to contain the name of the server pool.

CRS-02640: Required resource '*string*' is missing.

Cause: A resource that's configured as required is not registered.

Action: Register the missing resource or update the dependency specification so as to the missing resource is not required for start.

CRS-02641: The value of '*string*' cannot override that defined in the resource's type: '*string*'

Cause: Agent filename cannot be overridden on per-resource basis.

Action: Define a sub-type that uses the agent. Then create a resource of this new type.

CRS-02642: Relocate resource is not a valid command for this configuration

Cause: A relocate command was issued in the configuration where it is not possible in principle.

Action: None

CRS-02643: The server pool(s) where resource '*string*' could run have no servers

Cause: All of the server pools the resource uses (and has permissions to use) have no servers assigned.

Action: Either make sure there are active servers in the pools or use different pools for the resource.

CRS-02644: No hosting members of '*string*' are either online or are allowed to be used by the resource

Cause: No server out of the enumerated as hosting members is online or, if it is, may be used by the resource.

Action: You need to either add more servers into the cluster or request permission to pools to which currently available servers are assigned.

CRS-02645: Cannot create resources of type '*string*'

Cause: The type is abstract.

Action: Only concrete extensions of the type can be created.

CRS-02646: '*string*' must have a default value if specified

Cause: This attribute must have a default value if specified.

Action: Modify the type definition so that the attribute is removed or has a valid default value.

CRS-02647: Attribute '*string*' may not be a negative value

Cause: A negative value was provided for an attribute which only accepts non-negative values.

Action: Specify a non-negative number.

CRS-02648: Configuration of resource '*string*' prevents it from starting on any online servers.

Cause: An attempt was made to start a resource, but the resource configuration prevented it from starting.

Action: Check resource configuration.

CRS-02649: Attribute '*string*' of '*string*' is internally managed and may not be specified

Cause: An internal attribute was specified as part of an add/modify request.

Action: Re-execute the request without any internal attribute.

CRS-02650: Resource '*string*' is configured to run only on '*string*' and cannot be started on '*string*'

Cause: An attempt was made to start a resource on a server where it cannot run given its placement configuration.

Action: Make sure you start resources where they are configured to run.

CRS-02651: Resource alias '*string*' must use special values to be unique for each server

Cause: Resource alias name must resolve to a unique identifier for every server in the cluster. To achieve that, special values that yield different values on for each server must be used.

Action: You need to special an alias with special variables that will make it unique for every server.

CRS-02652: *string* is a resource and only resource instances can be relocated.

Cause: An attempt was made to relocate a resource.

Action: Make sure you supply a resource instance rather than a resource.

CRS-02653: Special value evaluation must be associated with a resource instance

Cause: Because some special values are per-server, each special value evaluation request must be associated with a resource instance.

Action: Specify a server for the resource using -k or -n.

CRS-02660: Resource '*string*' or all of its instances are disabled

Cause: This is an API return code for requests that cannot be performed because the resource is disabled.

Action: Look at the detailed error messages that should always accompany this error.

CRS-02661: All instances of resource '*string*' are disabled

Cause: All instances of the resource instances are disabled.

Action: In order to change a resource state through CRS, its instances need to be enabled.

CRS-02662: Resource '*string*' is disabled on server '*string*'

Cause: The resource was disabled on the specified server.

Action: Either re-enable, or use a different server.

CRS-02663: Resource instance of '*string*' with *string=number*, *string=number* is disabled

Cause: The resource instance whose cardinality/degree is specified is disabled.

Action: Either re-enable or use a different resource instance.

CRS-02664: Resource '*string*' is already running on '*string*'

Cause: The resource is already running everywhere it may run.

Action: None

CRS-02665: Resource '*string*' is disabled on '*string*'

Cause: The resource is disabled on every server it is configured to start on.

Action: None

CRS-02666: Resource '*string*' is disabled on '*string*' and is already running on '*string*'

Cause: The resource is disabled on every server it is configured to start on.

Action: None

CRS-02667: Resource '*string*' with *string=string* may only run on servers assigned to *string* and *string*, both of which are empty

Cause: The resource's placement policy only allows it to run on servers assigned to the specified pools, and they are all empty.

Action: Either change the placement policy of the resource, or change the cluster configuration so that there are servers in those pools.

CRS-02668: The value of attribute '*string*' (*number*) may not be above '*number*'

Cause: Attribute value specified is above the allowed maximum.

Action: Use a value below the specified maximum.

CRS-02669: The value is out of range. Maximum allowed value is '*number*'

Cause: Attribute value is out of the valid range.

Action: The value needs to be in a valid range.

CRS-02670: Unable to start/relocate '*string*' because '*string*' has a stop-time '*string*' dependency on it

Cause: Start/relocate of the resource is impossible because another resource has a stop-time dependency on it and the action requires stopping that resources.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource. Follow up on the action recommended for that message.

CRS-02671: Error processing attribute '*string*': *string*

Cause: The value specified for the attribute was inappropriate or invalid.

Action: Refer to the documentation and retry the request specifying a valid value for the indicated attribute.

CRS-02672: Attempting to start '*string*' on '*string*'

Cause: This is a status message.

Action: None

CRS-02673: Attempting to stop '*string*' on '*string*'

Cause: This is a status message.

Action: None

CRS-02674: Start of '*string*' on '*string*' failed

Cause: This is a status message.

Action: None

CRS-02675: Stop of '*string*' on '*string*' failed

Cause: This is a status message.

Action: None

CRS-02676: Start of '*string*' on '*string*' succeeded

Cause: This is a status message.

Action: None

CRS-02677: Stop of '*string*' on '*string*' succeeded

Cause: This is a status message.

Action: None

CRS-02678: '*string*' on '*string*' has experienced an unrecoverable failure

Cause: This is a status message.

Action: Perform whatever steps necessary to reset the state.

CRS-02679: Attempting to clean '*string*' on '*string*'

Cause: This is a status message.

Action: None

CRS-02680: Clean of '*string*' on '*string*' failed

Cause: This is a status message.

Action: None

CRS-02681: Clean of '*string*' on '*string*' succeeded

Cause: This is a status message.

Action: None

CRS-02682: It is locked by '*string*' for command '*string*' issued from '*string*'

Cause: This message is generated for operations that have a locking conflict.

Action: None

CRS-02683: It is locked by '*string*' for command '*string*'

Cause: This message is generated for operations that have a locking conflict.

Action: None

CRS-02714: '*string*' is specified multiple times in '*string*' of '*string*'

Cause: The specified value is specified multiple times.

Action: Remove duplicates and retry.

CRS-02715: Update to attribute AGENT_FILENAME is not currently supported. Recreate the resource type with new value.

Cause: Attempt was made to update AGENT_FILENAME attribute.

Action: Delete existing resource type and add it back with the new value.

CRS-02716: Failure threshold exhausted for resource '*string*'

Cause: The resource instance has failed more times than allowed in the specified time interval. It will not be restarted automatically.

Action: Identify and fix the problem. Restart the resource manually thereafter.

CRS-02717: Server '*string*' is not in any of the server pool(s) hosting resource '*string*'

Cause: An attempt was made to start a resource on a server that is not currently an active server in any of the resource's server pool(s).

Action: Use a server name that is currently an active server of the resource's server pools(s).

CRS-02718: Server '*string*' is not a hosting member of resource '*string*'

Cause: An attempt was made to start the resource on a server not listed as a hosting member of the resource.

Action: Use a server name that is listed as a hosting member.

CRS-02719: Resource '*string*' may not be started on server '*string*' because the server is not in either '*string*' or '*string*' server pools

Cause: The resource's placement policy only allows it to run in the specified server pools. An attempt was made to start it on a server assigned to a different pool.

Action: Either use a different server or set the value of SERVER_POOLS to *, which will allow the resource to run on any server.

CRS-02720: '*string*' is a resource alias for '*string*' and cannot be updated

Cause: An attempt was made to update a resource as if it were a resource.

Action: Update the resource which this alias refers to instead.

CRS-02721: '*string*' is a resource alias for '*string*' and cannot be unregistered

Cause: An attempt was made to unregister a resource alias as if it were a resource.

Action: Either unregister the resource which this alias refers to or modify its ALIAS_NAME attribute to not have a resource alias.

CRS-02722: The instance of resource '*string*' may only run on '*string*'; check on '*string*' is unnecessary

Cause: A check was issued on a server for a resource instance that may only run on a particular server.

Action: Issue a check on the server where the resource instance is supposed to be run.

CRS-02723: No instance of resource '*string*' found on '*string*'

Cause: A check was issued on a server for a resource which does not have any offline instances and no running instances on that server.

Action: Issue a check on a server where a resource instance might be running.

CRS-02724: Modifications to the built-in resource type 'string' are not allowed

Cause: An attempt was made to modify a built-in resource type.

Action: Modification of built-in resource types is not allowed.

CRS-02725: User *string* does not have permission to operate on resource *string*.

Cause: Access control list on the resource do not permit the user to operate on the resource.

Action: Access privileges on the resource must be honored or this user must be given appropriate permissions.

CRS-02726: Invalid permissions specified for access control.

Cause: Access permissions are specifies using 'r', 'w', 'x' and '-' characters to indicate read, write and execute permissions. '-' indicates no access of any kind.

Action: Check format for the permissions string and re-run the command with the correct string.

CRS-02727: Acl entry '*string*' has been specified more than once.

Cause: Access permissions for the entry have been specified more than once.

Action: Specify permissions for each entry only once and rerun the command.

CRS-02728: A resource type with the name '*string*' is already registered

Cause: A resource type with such name is already registered.

Action: Use a unique name for the new resource type.

CRS-02729: Attribute '*string*' cannot be overridden for a resource type

Cause: An attribute was specified that is not allowed in a resource type.

Action: Do not use the attribute specified in the error message for a resource type.

CRS-02730: Resource '*string*' depends on resource '*string*'

Cause: An attempt was made to unregister a resource that is referenced by another resource in the dependency specification(s).

Action: Either remove the reference to this resource or the other resource first. Alternatively, the operation can be retried with a force option.

CRS-02731: Resource '*string*' is already running on server '*string*'

Cause: The resource is already running on the server; relocate is impossible.

Action: Select another server.

CRS-02732: Resource '*string*' is already starting on server '*string*'

Cause: The resource is currently starting on the server.

Action: Wait for the request to complete.

CRS-02733: Failed to stop all required resources on '*string*'; the server will be restored into the original server pool(s)

Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. That did not happen and thus the server was placed back into the its original server pool(s).

Action: Manual intervention in stopping resources is required. The operation can be retried thereafter. Alternatively, another server can be used.

CRS-02734: Failed to stop all required resources on '*string*'; the server will stay in RECONFIGURING state

Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. Since that did not happen, the server will be kept in the RECONFIGURING state until the resources that did not stop have been stopped or unregistered.

Action: Manually stop the resources that did not stop or unregister them.

CRS-02735: The operation requires relocating resource '*string*' from server '*string*'

Cause: The operation would end up relocating the resource and the force option is not specified.

Action: Add more servers to the cluster, stop or relocate the resource, or use the force option for the same command.

CRS-02736: The operation requires stopping resource '*string*' on server '*string*'

Cause: The operation would end up stopping the resource and the force option is not specified.

Action: Add more servers to the cluster, stop or relocate the resource, or use the force option for the same command.

CRS-02737: Unable to register server pool '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02738: Unable to modify server pool '*string*' as this will affect running resources and resource groups, but the force option was not specified

Cause: One or more running resources and/or resource groups would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources and resource groups mentioned right before this error, or use the force option for the same command.

CRS-02739: Unable to relocate server '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, use a different server, or use the force option for the same command.

CRS-02740: Failed to relocate server '*string*' to server pool '*string*'. The server has been restored to original server pool(s).

Cause: In order to successfully relocate a server, all resources that cannot run in the new server pool(s) must be stopped. That did not happen and thus the server was placed back into the its original server pool(s).

Action: Manual intervention in stopping or unregistering resources is required. The operation can be retried thereafter. Alternatively, another server can be used.

CRS-02741: A value must be specified for attribute '*string*'

Cause: The attribute was not given a value.

Action: Provide a value and retry.

CRS-02742: The update of resource '*string*' would lose track of one or more running instances

Cause: An attempt was made to modify the configuration of the resource such that one or more currently running instance will be lost track of (the new configuration would change the resource to have fewer instances).

Action: Stop the resource and resubmit.

CRS-02743: Unable to register resource '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02744: Unable to modify resource '*string*' as this will affect running resources, but the force option was not specified

Cause: One or more running resources would be affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02745: Unable to relocate server *string* because it results in violation of a pool *string* constraint

Cause: The requested move was rejected because it would cause either the source or target pool (or both) to violate a pool size constraint, as indicated.

Action: Either change the pool size constraint(s) to accommodate your intent with this move, or choose a different server to move.

CRS-02746: Cannot act on the instance of resource '*string*' which is last known to have run on '*string*' where Cluster Ready Services are not properly functioning

Cause: The resource had been running on the server in the past but currently there's no way to know if it's still running there because the Cluster Ready Services daemon does not appear to be running on the server. To prevent possible configuration violation, any attempt to start the resource instance on another server is rejected.

Action: The underlying problem preventing Cluster Resource Services on the server from functioning properly must be addressed. Only then the resources that used to run there can be operated on again. Alternatively, the server may be shut down or the clusterware stack on it stopped completely.

CRS-02747: Server reconfiguration has failed to stop resources '*string*' on server '*string*'. Resources that did not stop must be stopped or unregistered manually. Details at *string* in *string*.

Cause: The specified resources could not be stopped.

Action: Stop the specified resources manually using and retry the last action.

CRS-02748: Failed to stop resource '*string*' during server reconfiguration on server '*string*'.

Cause: The specified resources could not be stopped.

Action: Stop the specified resources manually and retry the last action.

CRS-02749: A write of OCR server data '*string*' failed. Details at *string* in *string*.

Cause: Could not persist data to OCR.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02750: Cardinality violation detected on server '*string*', resource '*string*' is in unexpected state. Details at *string* in *string*.

Cause: The specified resource was in an unexpected state.

Action: Manually restart the resource.

CRS-02751: Cannot create new resource, the resource type '*string*' is not supported. Details at *string* in *string*.

Cause: The specified resource had an incorrect base type.

Action: Check the attributes for the resource and add it using crsctl again.

CRS-02752: Unable to write event sequence number to OCR. Details at *string* in *string*.

Cause: Could not update OCR with event sequence number.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02753: Timed out waiting for the server pools to be unfrozen.

Cause: Timed out while waiting for a client to unfreeze the pools it froze.

Action: If the problem persists, contact Oracle Support Services.

CRS-02754: Unable to change locks for a running operation '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02755: Error reading type definition for type '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02756: Invalid tag for command '*string*'. Details at *string* in *string*.

Cause: An invalid command was received by the CRS daemon.

Action: Contact Oracle Support Services.

CRS-02757: Command '*string*' timed out waiting for response from the resource '*string*'. Details at *string* in *string*.

Cause: Timeout occurred while waiting for response to specified command.

Action: Check that the server targeted by the command is online and responsive.

CRS-02758: Resource '*string*' is in an unknown state.

Cause: Unable to determine the current state of specified resource.

Action: Manually restart the resource.

CRS-02759: Failed to read repository key for NLS language '*string*'. Details at *string* in *string*.

Cause: The key for the specified language could not be read from OCR.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02760: Policy engine failed to initialize internal types. Details at *string* in *string*.

Cause: Error during initialization of internal data.

Action: If the problem persists, contact Oracle Support Services.

CRS-02761: Consistency problem in registry while processing resource '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02762: Unable to find type '*string*' in registry while processing resource '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services

CRS-02763: Error while reading resources. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02764: CRSADMIN and CRSUSER keys are not in repository. Details at *string* in *string*.

Cause: Error with repository. Required keys are not present.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02765: Resource '*string*' has failed on server '*string*'.

Cause: The specified resource was no longer running.

Action: The resource will be automatically brought back online. Use crsctl to confirm that it is online.

CRS-02766: Received state change for disabled resource '*string*' from server '*string*'.

Cause: Received command to change state for a resource that was disabled.

Action: None

CRS-02767: Resource state recovery not attempted for '*string*' as its target state is OFFLINE

Cause: Target state for resource was OFFLINE. Clusterware will not attempt to recover it.

Action: None

CRS-02768: Failure threshold exhausted by resource '*string*'.

Cause: The specified resource failed too many times. No further restart attempts will be made.

Action: Fix the underlying cause of resource failure and manually restart the resource.

CRS-02769: Unable to failover resource '*string*'.

Cause: Could not failover the specified resource.

Action: Restart the resource manually.

CRS-02770: Resource target '*string*' is offline; will not restart.

Cause: The target state of the specified resource was offline.

Action: None

CRS-02771: Maximum restart attempts reached for resource '*string*'; will not restart.

Cause: Specified resource had been restarted too many times.

Action: Change the maximum restart parameter of the resource, and restart it manually.

CRS-02772: Server '*string*' has been assigned to pool '*string*'.

Cause: The specified server had been assigned to a server pool.

Action: None

CRS-02773: Server '*string*' has been removed from pool '*string*'.

Cause: The specified server had been removed from a server pool.

Action: None

CRS-02774: Failed to save resource '*string*' to the repository. Details at *string* in *string*.

Cause: Could not update repository with resource details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02775: Failed to update resource '*string*'. Details at *string* in *string*.

Cause: Could not update repository with resource details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02776: Failed to update server pool '*string*'. Details at *string* in *string*.

Cause: Could not update repository with server pool details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02777: Failed to delete resource '*string*' from repository. Details at *string* in *string*.

Cause: Unable to update resource details in repository.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02778: Failed to delete server pool '*string*' from repository. Details at *string* in *string*.

Cause: Could not update repository with server pool details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02779: Failed to delete type '*string*' from repository. Details at *string* in *string*.

Cause: Failed to update repository.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02780: Could not find Access Control List for resource '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02781: Error during registration for resource '*string*'. Details at *string* in *string*.

Cause: Error occurred during registration callback of new resource.

Action: Contact Oracle Support Services.

CRS-02782: Unable to find attributes for resource '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02783: Internal error in local placement policy for resource '*string*'. Details at *string* in *string*.

Cause: Internal error in CRS Policy Engine.

Action: Contact Oracle Support Services.

CRS-02784: Internal error, invalid server '*string*' in local placement policy. Details at *string* in *string*.

Cause: Internal error in CRS Policy Engine.

Action: Contact Oracle Support Services.

CRS-02785: Failed to register resource '*string*'. Details at *string* in *string*.

Cause: Could not update repository with resource details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02786: Failed to register server pool '*string*'. Details at *string* in *string*.

Cause: Could not update repository with server pool details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02787: Server pool '*string*' has fallen below its minimum size. Details at *string* in *string*.

Cause: The specified server pool has fallen below its minimum size and will be reconfigured.

Action: None

CRS-02788: Server reconfiguration failed to stop resources '*string*'. The server '*string*' has been restored into the original pool(s).

Cause: The specified resources could not be stopped.

Action: Stop the specified resources manually and retry the last action.

CRS-02789: Cannot stop resource '*string*' as it is not running on server '*string*'

Cause: An request to stop a resource on a server where it is not running was received

Action: Check the current state of the resource; it should no longer be running on that server.

CRS-02790: Starting shutdown of Cluster Ready Services-managed resources on server '*string*'

Cause: Shutdown of Cluster Ready Services and the resources it manages has started on the specified server.

Action: None

CRS-02791: Starting shutdown of Oracle High Availability Services-managed resources on '*string*'

Cause: Shutdown of Oracle High Availability Services and the resources it manages has started on the indicated server.

Action: None

CRS-02792: Shutdown of Cluster Ready Services-managed resources on '*string*' has completed

Cause: Shutdown of Cluster Ready Services and the resources it manages on the indicated server has completed.

Action: None

CRS-02793: Shutdown of Oracle High Availability Services-managed resources on '*string*' has completed

Cause: Shutdown of Oracle High Availability Services and the resources it manages has completed on the indicated server.

Action: None

CRS-02794: Shutdown of Cluster Ready Services-managed resources on '*string*' has failed

Cause: The failure is associated with one or more of the resources affected by this command on the indicated server."

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02795: Shutdown of Oracle High Availability Services-managed resources on '*string*' has failed

Cause: The failure is associated with one or more of the resources affected by this command on the indicated server."

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02796: The command may not proceed when Cluster Ready Services is not running

Cause: This command must stop Cluster Ready Services-managed resources. However, Cluster Ready Services is not running, which does not mean its resources are not running.

Action: The underlying reason for Cluster Ready Services not running needs to be resolved and the command retried. Alternatively, the command can be retried with the force option.

CRS-02797: Shutdown is already in progress for '*string*', waiting for it to complete

Cause: Another shutdown command was issued for the indicated server in the past and it is currently in progress. This command will wait until the original command completes and then complete as well.

Action: None

CRS-02798: State change received for resource '*string*' from unexpected server '*string*'. Details at '*string*' in '*string*'.

Cause: A state change was reported for an instance of the resource from a server where the resource was never started.

Action: Shutdown the resource on the unexpected server

CRS-02799: Failed to shut down resource '*string*' on '*string*'

Cause: Shut down failed because the listed resource failed to stop.

Action: Error message(s) preceding this one should have the details about the resources that refused to shut down. Either manually stop those resources or retry with the force option.

CRS-02800: Cannot start resource '*string*' as it is already in the INTERMEDIATE state on server '*string*'

Cause: An attempt was made to start a resource that is already in the INTERMEDIATE state.

Action: Determine why the resource is in the INTERMEDIATE state based on the value of the STATE_DETAILS attribute. If it is due to a check timeout, no action is needed. Otherwise, manual intervention is required to bring the resource out of the INTERMEDIATE state.

CRS-02801: No instance of the resource '*string*' should be running

Cause: An attempt was made to relocate resource and the resource's instances to be relocated have TARGET=OFFLINE.

Action: Restart the resource to change the value of the TARGET attribute to ONLINE. Examining the value of the INTERNAL_STATE attribute can be used to determine if the instances are being operated on currently.

CRS-02802: Purging events not published within 15 minutes

Cause: The events could not be published to the Event Manager Daemon either because it is down or there are errors doing the publish.

Action: Check the status of the Event Manager Daemon.

CRS-02803: Attribute '*string*' has already been declared in a derived type '*string*'

Cause: An attempt was made to add a new attribute definition to a resource type that has an identically named attribute already defined in one or more derived types. Attributes declared in base types can be overridden in derived ones, but the opposite is not allowed.

Action: Pick a different attribute name or delete the derived type(s), resubmit, and then add derived types back.

CRS-02805: Unable to start '*string*' because it has a '*string*' dependency on resource type '*string*' and no resource of that type can satisfy the dependency

Cause: Start/relocate of the resource is impossible because it has a dependency on a resource type no resource of which can currently be used to satisfy the dependency.

Action: This message will normally be coupled with one or more other messages that detail the nature of the problem for each existing resource of the type.

CRS-02806: Failed to create stop operation for resource '*string*'

Cause: Creating the stop operation did not complete successfully.

Action: Error message(s) preceding this one should have more details about the problem. Try shutting down the resource manually, or retrying with the force option.

CRS-02807: Resource '*string*' failed to start automatically.

Cause: This message comes up when the automatic start for the resource has failed during a reboot of the cluster node or restart of the clusterware stack. See previous resource specific messages for more details.

Action: Use 'crsctl start resource' to start the resource manually.

CRS-02809: Failed to update cluster configuration policy set. Details at *string* in *string*.

Cause: Could not update repository with new configuration data.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02810: Cluster configuration policy set is corrupted. Details at *string* in *string*.

Cause: Could not read the configuration data from the repository.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02814: Server category '*string*' does not exist.

Cause: A request was received that referenced a non-existing server category.

Action: Make sure a registered server category is used.

CRS-02815: Server category '*string*' is already registered.

Cause: A request to register a server category with a duplicate name was received.

Action: Use a unique name.

CRS-02816: Server category '*string*' cannot be unregistered as it is referenced by resource '*string*'.

Cause: The server category you are trying to remove has references to it.

Action: Make sure the server category you are trying to remove is not referenced by other entities.

CRS-02817: Server category '*string*' cannot be unregistered as it is referenced by server pool '*string*'.

Cause: The server category you are trying to remove has references to it.

Action: Make sure the server category you are trying to remove is not referenced by other entities.

CRS-02818: Failed to delete server category '*string*' from repository. Details at *string* in *string*.

Cause: Could not update repository with server category details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02819: Failed to save server category '*string*'. Details at *string* in *string*.

Cause: Could not update repository with server pool details.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02820: Required attribute '*string*' is missing for configuration policy '*string*'.

Cause: A required attribute was not specified.

Action: Make sure the attribute is specified.

CRS-02821: Fatal error while validating configuration policy '*string*'.

Cause: There's a problem with the configuration data in the specified policy.

Action: This message always follows the actual error description.

CRS-02822: Server pool '*string*' is not declared in the policy set.

Cause: Each configuration policy may only define server pool. configuration for the pools declared to be a part of the policy set.

Action: Either remove the server pool from the policy, change its name, or extend the policy set to include the pool's name.

CRS-02823: The new active policy name '*string*' was not found.

Cause: An attempt to activate non-existent policy was made.

Action: Use a registered policy's name instead.

CRS-02824: '*string*' is reserved for a built-in configuration policy and cannot be used.

Cause: This name is reserved for a built-in object.

Action: Use a different name.

CRS-02825: Configuration policy '*string*' already exists.

Cause: A configuration policy name specified was defined multiple times.

Action: Make sure each policy is only defined once.

CRS-02826: Server pools cannot be removed from the configuration policy set without activating a new policy at the same time.

Cause: Server pools can be removed from the configuration policy set only if the command also activates a policy.

Action: To remove the server pools from the system, activate a new policy with the update. To remove the server pools from the policy control only, resubmit with the -ksp option.

CRS-02828: Failed to stop resource while attempting CARDINALITY modification

Cause: An attempt to stop a resource during CARDINALITY modification failed.

Action: Use 'crsctl stop resource' to stop the resource manually and then retry the update operation.

CRS-02829: Update operation cannot proceed because it would need to stop resources.

Cause: An update to CARDINALITY would require the operation to stop resources.

Action: Either manually stop enough resources using 'crsctl stop resource' or specify the force option to have them selected for you.

CRS-02830: A server category name may not be empty or contain spaces.

Cause: A name must not be empty or contain space character(s).

Action: Specify a valid name.

CRS-02831: Either '*string*' or '*string*' may be specified, but never both.

Cause: Two mutually exclusive attributes were used at the same time, which is not allowed.

Action: Use either one or the other.

CRS-02833: Either '*string*' or '*string*' must be specified, or both.

Cause: At least one of the two attributes must have a value.

Action: Specify a value for either or both.

CRS-02834: One of '*string*', '*string*' or '*string*' must be specified when '*string*' is '*string*'.

Cause: One attribute of the three is required for this configuration.

Action: Specify a value for one attribute of the three.

CRS-02835: Resource '*string*' cannot start on server '*string*' as the server does not belong to the resource's server category.

Cause: This resource may only run on the servers that belong to the server category of the resource.

Action: Pick a server that belongs to the category.

CRS-02836: When using a server category, the resource must have 'string' attribute set to 'string'.

Cause: An attempt was made to register a resource that uses a server category and yet is not configured to utilize any available server.

Action: Set the attribute to the required value.

CRS-02837: There are no servers that belong to the server category 'string' of resource 'string'.

Cause: The resource cannot be started as there are no available servers that belong to its category.

Action: Add servers to the cluster or change the category to be more inclusive.

CRS-02838: 'string' is not a valid attribute of server categories.

Cause: An attempt was made to set a value for an attribute which does not belong to server categories.

Action: Use a valid attribute.

CRS-02839: Cluster Ready Services' active version is below required level of 'string'.

Cause: An attempt was made to use functionality that is only available starting from the specified active version.

Action: Upgrade to the minimum required version.

CRS-02840: Resource instance 'string' does not exist.

Cause: A request was received that referenced a nonexistent resource instance.

Action: Make sure a registered resource instance is used.

CRS-02841: 'string' must be a resource instance.

Cause: This command may only be issued on a resource instance but the supplied reference was to an object of a different type.

Action: Use a registered resource instance.

CRS-02842: Action 'string' on resource 'string' timed out.

Cause: The action did not complete within the allotted time.

Action: None

CRS-02843: Unable to complete processing of the 'string' action for resource 'string' on server 'string' as Cluster Ready Services is not reachable.

Cause: The processing of the specified action was aborted because Cluster Ready Services was no longer reachable.

Action: Unless the clusterware stack was stopped or the server was rebooted, Cluster Ready Services will restart momentarily. The action can be retried thereafter.

CRS-02844: Waiting for resource 'string' to start on server 'string'.

Cause: The resource is now expected to start on the server.

Action: None

CRS-02845: Waiting for resource '*string*' to stop on server '*string*'.

Cause: The resource is now expected to stop on the server.

Action: None

CRS-02846: There is no active action on resource instance '*string*'

Cause: An attempt was made to finish an action on the resource instance while no corresponding attempt to start the action was found or an attempt to start the action was timed out before a request to finish the action arrived.

Action: Check the state of the resource and re-do the complete cycle if needed.

CRS-02847: Authorization failure: OS User '*string*' does not exist on server '*string*'

Cause: The specified operating system user does not exist on the specified server. Cluster Ready Services requires that all users used by the resource it manages exist on each server of the cluster.

Action: Add the specified operating user on the specified server.

CRS-02848: Error while reading resources: Resource: *string* . Error: *string* Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02849: Authorization failure: Resource [*string*]

Cause: A resource operation could not be performed because authorization checking failed.

Action: Check the ownership, group, and permissions associated with the resource and ensure that the associated operating system user and group definitions are consistent on all cluster nodes.

CRS-02850: Start of '*string*' on '*string*' has been delayed to maintain concurrency limit of *number*.

Cause: The configured concurrent start action limit was reached.

Action: The start action will automatically resume as soon as possible.

CRS-02851: Stop of '*string*' on '*string*' has been delayed to maintain concurrency limit of *number*.

Cause: The configured concurrent stop action limit was reached.

Action: The stop action will automatically resume as soon as possible.

CRS-02852: Conflicting specification of server pool and server.

Cause: Server pool name and server name were specified in a start command.

Action: Specify either server pool name or servername, not both.

CRS-02853: Unknown server pool name: '*string*' .

Cause: The server pool name given to start/stop command did not exist.

Action: Specify a valid server pool name.

CRS-02854: Resource '*string*' cannot be started in a server pool because it is a local resource.

Cause: A local resource name was given to start/stop command.

Action: Specify a cluster resource name.

CRS-02855: Resource '*string*' is not configured to run in server pool '*string*'.

Cause: An attempt was made to start or stop the resource in a server pool where resource was not configured to run.

Action: Modify resource's attribute to have this server pool or specify a different resource.

CRS-02856: Unknown names for server pools or for filters.

Cause: An invalid value was supplied for the '-s' or '-w' argument in a start/stop command or to the API calls.

Action: Provide valid server pool names or filter attributes.

CRS-02857: Cannot stop resource '*string*' because it is not running in server pool '*string*'.

Cause: A resource stop request specified a server pool on which the resource is not running.

Action: Check the current state of the resource; it should no longer be running in that server pool.

CRS-02858: User '*string*' does not have permission to run action '*string*' on resource '*string*'.

Cause: A username and/or group was specified for the action permissions, but the current user is not included in the specification.

Action: Use 'crsctl modify' to update the ACTIONS attribute for this resource to add the current user to the permission list for this action, or remove all user and group specifications to enable universal access.

CRS-02859: Cannot run action '*string*' on resource '*string*' because the resource is not online.

Cause: A resource action operation could not be performed because the resource was not online.

Action: Ensure the resource is online before attempting to run an action.

CRS-02862: Cannot update the ACTIONS attribute, because the input is not valid

Cause: A resource update operation could not be performed, because the input value is not vvalid.

Action: Ensure the ACTIONS name attribute is specified in 32 or less US7ASCII characters. Ensure users and groups are prefixed with the appropriate identifier, either "user:" or "group:"

CRS-02863: Cannot restart resource '*string*' because it is not running.

Cause: A resource restart action was not performed because the resource is not running.

Action: Ensure that the resource which needs to be restarted is up and running.

CRS-02865: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resources of type '*string*'.

Cause: An exclusion dependency was configured without the right to preempt a running resource.

Action: Pick a different server or stop the other resource(s) on this server.

CRS-02866: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resources of type '*string*' and the force option was not specified.

Cause: An exclusion dependency was configured but the force option was not used to stop the running resource(s).

Action: Either pick a different server or use the force option.

CRS-02867: Server pool '*string*' cannot be added to the policy set.

Cause: The Generic server pool as well as its sub-pools cannot be added to the policy set.

Action: Remove the pool from SERVER_POOL_NAMES attribute.

CRS-02868: '*string*' is not a valid attribute of configuration policies.

Cause: An attempt was made to set a value for an attribute which does not belong to configuration policies.

Action: Use a valid attribute.

CRS-02869: '*string*' is not a valid attribute of the policy set.

Cause: An attempt was made to set a value for an attribute which does not belong to the policy set.

Action: Use a valid attribute.

CRS-02870: An OCR write operation has failed during upgrade of the object schema.

Cause: While performing CRS upgrade as part of the clusterware upgrade, an OCR write operation has failed.

Action: Examine the clusterware alert log for more information about OCR failures.

CRS-02871: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resource '*string*'.

Cause: An exclusion dependency was configured between the two resources without the right to preempt a running resource.

Action: Pick a different server or stop the other resource on this server.

CRS-02872: Resource '*string*' cannot be started on server '*string*' because it has an exclusion dependency with resource '*string*' and the force option is not used.

Cause: An exclusion dependency was configured between the two resources but the force option was not used to stop the running resource.

Action: Either pick a different server or use the force option.

CRS-02874: Could not restart resource '*string*' on server '*string*'.

Cause: A required part of restart operation has failed.

Action: Check the preceding errors to see the cause and take appropriate action.

CRS-02875: Failed to record shutdown information in OLR.

Cause: An attempt to record information during a normal shutdown failed. This will cause the shutdown to be regarded as unplanned on the next startup, and may lead to some driver resources being disabled.

Action: Use the ocrconfig and ocrcheck utilities to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02876: Disabled resource '*string*' due to OHASD crashes

Cause: OHASD crashes have exceeded the autostart thresholds set for this resource, and the resource has been disabled as a result.

Action: Use crsctl config to look up whether a resource has been disabled, and crsctl enable/disable to manually change the status.

CRS-02877: Owner '*string*' of the entity '*string*' does not belong to the '*string*' group.

Cause: The owner of an entity being configured was not a member of the required group.

Action: The user, issuing the command, needs to be configured to be in the group.

CRS-02878: Failed to restart resource '*string*'

Cause: An attempt to start the resource has failed.

Action: If failover is not enabled, try manually starting the resource on a different server. If failover is enabled, the resource has been failed over, and any problems are reported in subsequent messages.

CRS-02879: Cannot update the ALERT_TEMPLATE attribute, because the input is not valid

Cause: A resource update operation could not be performed, because the input value is not valid.

Action: Ensure that valid attributes are specified in a space separated list.

CRS-02880: Incorrect specification of dependency '*string*', only one modifier may be specified.

Cause: During resource update, an exclusion dependency specified more than the maximum of one modifier.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02881: Additional exclusion dependency discovered on resource '*string*' within the same dependency tree.

Cause: During resource update, a dependency specified more than the maximum of one exclusion per hard dependency tree.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02882: Unable to place an instance of resource '*string*' due to an exclusion dependency on '*string*'.

Cause: The resource cannot be placed because of the constraints imposed by its start dependencies.

Action: Either change the resource start dependencies or re-evaluate the request.

CRS-02883: Resource '*string*' failed during Clusterware stack start.

Cause: During Clusterware startup, automatic startup of the indicated resource succeeded but the resource failed before Clusterware startup completed.

Action: Retry starting Clusterware.

CRS-02884: Server '*string*' cannot be used for resource placement currently.

Cause: The server is currently configured such that it cannot be used for resource placement.

Action: Use a different server.

CRS-02885: cannot stop the last server in Domain Service Cluster with active member cluster named '*string*'

Cause: An attempt to stop the last server in the Domain Service Cluster was rejected because this cluster was still serving the indicated client cluster and perhaps other member clusters."

Action: Stop the active member clusters that use this Domain Service Cluster first, or specify the '-f' option."

CRS-02886: Required component '*string*' of Oracle Grid Infrastructure is missing.

Cause: An attempt to start the Oracle Grid Infrastructure stack failed because the indicated required resource was not found. This is an internal error.

Action: Contact Oracle Support Services.

CRS-02890: An administrator-managed database cannot be configured on a non-Hub server '*string*'.

Cause: An attempt was made to register a database on a server whose role is not 'hub' or the node is currently down.

Action: Use only online servers configured as Hub servers.

CRS-02891: Policy-managed databases can only be configured in server pools that use '*string*' category.

Cause: An attempt was made to configure a database using a server pool that does not currently use a category that includes only nodes with the specified role.

Action: Either use an existing server pool that uses such a category or create and use a server pool with such category.

CRS-02892: In order to use '*string*' in resources of '*string*' type, '*string*' must be set to '*string*' and '*string*' must be set to '*string*'.

Cause: An attempt was made to use an attribute such that other attributes must be set to specific values.

Action: Resubmit with the mentioned attributes set to the mentioned values.

CRS-02893: Cannot stop ASM instance on server '*string*' because it is the only instance running.

Cause: An attempt was made to stop the last ASM instance in the cluster, which would lead to a complete cluster outage.

Action: Reissue the request when there are at least two ASM instances running in the cluster.

CRS-02894: Cannot stop the ASM resource because it will lead to a complete cluster outage.

Cause: An attempt was made to stop all ASM instances in the cluster, which would lead to a complete cluster outage.

Action: Reissue the request by specifying a concrete node name.

CRS-02895: DEGREE attribute is unsupported.

Cause: An attempt was made to add a resource with DEGREE attribute.

Action: Remove the DEGREE attribute from the add command.

CRS-02896: Cannot restart resource '*string*' because the restart capability of this resource is disabled.

Cause: The resource did not restart automatically because the attribute "ALLOW_RESTART" of this resource was set to "useronly".

Action: Set the attribute "ALLOW_RESTART" of this resource to "default" or start the resource manually.

CRS-02897: attempt *number* of *number* to start resource *string* failed

Cause: An attempt to start the indicated resource failed. The resource was configured to attempt to start multiple times. When this failure was reported, there were more attempts remaining to start the resource.

Action: None

CRS-02898: Value of attribute '*string*' cannot be greater than that of attribute '*string*'.

Cause: An attempt to provide an incorrect attribute value combination failed.

Action: Reissue the command with the corrected value.

CRS-02900: User '*string*' does not exist on node '*string*'.

Cause: An attempt was made to add an unknown username to the CRS Administrator list.

Action: Reissue the command with a known username. Or create the user on the node(s) specified, and reissue the command.

CRS-02901: Not authorized to modify the CRS Administrator list.

Cause: An attempt was made to modify the CRS Administrator list by a user not belonging to the CRS Administrator list.

Action: Either acquire the role of cluster administrator or have one modify the CRS Administrator list for you.

CRS-02904: Parameter '*string*' for 'relocate' is not a singleton resource.

Cause: A relocate request specified a resource that is not singleton.

Action: Specify a singleton resource or a filter that resolves to an instance of the resource.

CRS-02905: Server pools in a policy do not have ACL attribute

Cause: A 'crsctl modify serverpool' command specified an ACL attribute with -policy or -all_policies.

Action: Omit ACL from the attributes.

CRS-02906: Server category '*string*' cannot be unregistered as it is referenced by server pool '*string*' in policy '*string*'.

Cause: The server category you are trying to remove has references to it in a policy.

Action: Make sure the server category you are trying to remove is not referenced by other entities in the policy.

CRS-02907: Resource '*string*' is not completely configured, and hence cannot be operated upon.

Cause: A request was made without specifying the PID_FILES or EXECUTABLE_NAMES.

Action: Specify a value for PID_FILES and/or EXECUTABLE_NAMES attribute, or specify values for STOP_PROGRAM, CHECK_PROGRAM and CLEAN_PROGRAMS attributes.
2908 no longer used

CRS-02909: Server '*string*' cannot be assigned to server pool '*string*' because its current role is not '*string*'.

Cause: An attempt was made to assign a server to the server pool that did not have the specified role. Only servers with the specified role can be assigned to this server pool.

Action: Retry using a different server.

CRS-02910: Unable to register server category '*string*' as this will affect running resources, but the force option was not specified.

Cause: One or more running resources were affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02911: Unable to modify server category '*string*' as this will affect running resources, but the force option was not specified.

Cause: One or more running resources were affected by the operation.

Action: Add more servers to the cluster, stop or relocate the resources mentioned right before this error, or use the force option for the same command.

CRS-02912: Unable to start resource '*string*' on server '*string*' because resource dependencies require stopping it on a different server.

Cause: A start request failed because resource dependencies would require stopping the resource in order to start it somewhere else.

Action: Manually stop the resource before starting it elsewhere.

CRS-02913: 'autostart delay' value '*string*' is invalid.

Cause: The command specified an 'autostart delay' time that was non-numeric or negative.

Action: Specify a non-negative numeric value for the 'autostart delay' argument.

CRS-02914: 'autostart servercount' value '*string*' is invalid.

Cause: The command specified an 'autostart servercount' value that was non-numeric or negative.

Action: Specify a positive numeric value for the 'autostart servercount' argument.

CRS-02915: Failed to update 'autostart delay' (*string*) or 'autostart servercount' (*string*). Details at *string* in *string*.

Cause: A request to update the automatic start details failed because of incorrect input values.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-02917: The '*string*' server pool cannot be removed from the system.

Cause: The command to remove the server pool from the policy set would have caused it to be removed from the system completely.

Action: Reissue the 'crsctl modify policyset' command with the -ksp option.

CRS-02918: Authorization failure: operating system group '*string*' does not exist on server '*string*'

Cause: The specified operating system group does not exist on the specified server. Cluster Ready Services requires that all groups used by the resources it manages exist on each server of the cluster.

Action: Add the specified operating system group on the specified server.

CRS-02919: Resource '*string*' has no instances to act upon.

Cause: An attempt was made to act on a resource that has no resource instances because it is configured to run on servers that have never existed in the cluster.

Action: Retry the command when the resource has instances.

CRS-02920: Unable to activate policy '*string*' because this will affect running resources, but the force option was not specified.

Cause: An attempt to activate a new policy would have affected one or more running resources but the force option was not specified.

Action: Reevaluate the request and if it makes sense, set the force option and resubmit.

CRS-02921: Unable to register policy because attribute '*string*' for resource '*string*' does not have the POLICY_CONFIG flag.

Cause: An attempt was made to specify resource attributes in the policy that do not have the POLICY_CONFIG flag.

Action: Only attributes that can be policy managed and have the POLICY_CONFIG flag can be specified in a policy definition.

CRS-02922: The attribute '*string*' is not supported for resource type '*string*'.

Cause: An attempt to update a CRS resource specified an attribute that is not associated with the resource type.

Action: Specify only attributes that are associated with the type of resource being updated.

CRS-02923: The EXPRESSION attribute cannot accept '*string*' as a server configuration attribute.

Cause: An attempt was made to set a server configuration attribute that cannot be used with the EXPRESSION attribute.

Action: Use a valid attribute.

CRS-02924: The EXPRESSION attribute contains invalid value 'string' for server configuration attribute 'string'.

Cause: An attempt was made to set a value which cannot be assigned to a server configuration attribute.

Action: Use a valid value.

CRS-02925: The dependency modification 'string' for the targets 'string' has an unknown dependency or incorrect syntax.

Cause: An attempt was made to modify an existing dependency without providing a known dependency or the correct modification syntax.

Action: Refer to the Oracle Clusterware documentation for an explanation of supported dependencies and the resource dependency modification syntax.

CRS-02926: Cannot find a match for target 'string' in the modification list for dependency 'string'.

Cause: There was no existing dependency that had the same target to be modified.

Action: Supply the correct target for the dependency modification.

CRS-02927: The requested action for the resource 'string' was aborted due to a timeout.

Cause: The timeout specified for a custom action was reached before the action could complete.

Action: Revise the timeout setting and retry the action.

CRS-02928: The dependency on type 'string' cannot be accepted because it is specified multiple times.

Cause: A duplicate type was assigned as a dependency to a resource.

Action: Revise the dependency list to ensure that no duplicate types exist.

CRS-02929: The dependency on resource 'string' cannot be accepted because it is specified multiple times.

Cause: A duplicate resource was assigned as a dependency to a resource.

Action: Revise the dependency list to ensure that no duplicate resources exist.

CRS-02930: The server category 'string' cannot be deleted because it is still a dependency for one or more resources.

Cause: An attempt was made to delete a server category that was still a dependency for one or more resources.

Action: Either modify the dependency attributes of the associated resources or delete those resources and try again.

CRS-02931: Server category 'string' used in dependency 'string' does not exist or is not registered.

Cause: An attempt was made for the current resource to have a dependency on a server category that does not exist.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02932: The dependency on server category '*string*' is not supported for a resource type.

Cause: An attempt to specify a server category dependency for a resource type failed because server category dependency is only supported for a resource.

Action: Omit the server category dependency.

CRS-02933: The server category name for the relation '*string*' is missing.

Cause: The server category name was expected for the resource dependency, but it was not supplied.

Action: Provide the server category name when resubmitting the request.

CRS-02949: The dispersion dependency '*string*' is specified with multiple modifiers.

Cause: An attempt to specify the dispersion dependency failed because multiple modifiers were specified where at most one is supported.

Action: Check the specification of the dependency, fix the problem indicated, and resubmit the request.

CRS-02961: Consistency problem in registry while processing category '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02962: Consistency problem in registry while processing server pool '*string*'. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-02963: Consistency check for all entities managed by the Cluster Ready Services has completed successfully.

Cause: None.

Action: None

CRS-02964: cannot run resource '*string*' on server '*string*' because the server needs an additional *number* MB of memory

Cause: An attempt to start a resource on a server failed because the server needed the indicated additional memory to satisfy the memory requirements of the resource.

Action: Change the placement policy of the resource to expand the server selections, change the memory requirement of the resource, or add more memory to the server to which the resource is directly assigned.

CRS-02965: cannot run resource '*string*' on server '*string*' because the server needs *number* additional CPUs

Cause: An attempt to start a resource on a server failed because the server needed additional CPUs to satisfy the CPU requirement of the resource.

Action: Change the placement policy of the resource to expand the server selections, change the CPU requirement of the resource, or add more CPUs to the server to which the resource is directly assigned.

CRS-02966: There are no servers satisfying the placement policy for resource '*string*'.

Cause: An attempt to start a resource on servers that were available according to the placement policy failed because none of those servers could satisfy the requirements of the resource.

Action: Change the placement policy of the resource to expand the server selections, change the requirements of the resource, or upgrade the configurations of the eliminated servers.

CRS-02967: Resource instance '*string*' is unable to start because it is scheduled for deletion.

Cause: An online relocate attempt on this resource failed to stop the specified resource instance. The resource instance is scheduled for deletion when it stops.

Action: Use 'crsctl stop resource' to stop the resource instance manually.

CRS-02968: authorization failure updating attribute '*string*'

Cause: Write access permission was not granted to this user to modify the attribute.

Action: Either omit the attribute, or issue the command from an operating system user who has the required permission.

CRS-02969: cannot add resource '*string*' because a resource group exists with the same name

Cause: An attempt to add a resource failed because a resource group with the same name was already registered.

Action: Reissue the command specifying a different name for the new resource.

CRS-02970: Value '*string*' is invalid, must be one of: '*string*', '*string*', '*string*', or '*string*'.

Cause: An attempt to change an attribute value of a resource was rejected because the indicated value was specified, when it must have been one of the other values indicated in the message.

Action: Retry modifying the resource attribute value specifying one of the allowed values as shown in the error message.

CRS-02971: cannot run resource ora.asm on server '*string*' on quarantined site '*string*'

Cause: An attempt to run resource ora.asm on the indicated server was rejected because that server was in the specified site, which was quarantined so that no ASM client or instance could run there.

Action: Do the following: 1) Verify that all ASM disk groups are mounted on the site that is not quarantined. 2) Issue 'ALTER DISKGROUP *name* ONLINE ALL' for each disk group. 3) Verify that all disks from these disk groups are ONLINE. 4) Verify that all disks from these disk groups are accessible from the quarantined site. Once verified, issue the command 'crsctl modify cluster site <site_name> -s rejuvenate' on the quarantined site to rejuvenate it. If more information is needed, please refer to Oracle Clusterware Administration and Deployment Guide.

CRS-02972: There are no servers satisfying the CPU and memory requirements for resource '*string*'.

Cause: An attempt to start the indicated resource failed because there were no servers available that meet the CPU-count and memory requirements of that resource.

Action: If possible, change the CPU or memory requirements of the resource or add more CPUs or memory to the servers in the cluster.

CRS-02973: The WORKLOAD_CPU '*number*' exceeds the remaining value of '*number*' on server '*string*'.

Cause: An attempt to modify a resource failed because the specified CPU count exceeded the remaining available value indicated in the message.

Action: Retry modifying the resource attribute value specifying a value less than the available value as shown in the message.

CRS-02974: unable to act on resource '*string*' on server '*string*' because that would require stopping or relocating resource '*string*' but the appropriate force flag was not specified

Cause: The attempted operation on the indicated resource and server was rejected because it would have required stopping or relocating the additional resource as shown. The appropriate force flag would have been required to allow the additional effects.

Action: Reevaluate the request, and if appropriate, retry the operation specifying the force flag appropriate for the tool.

CRS-02975: duplicate attempt to complete Transparent HA for resource '*string*' rejected

Cause: An attempt to end the transparent High Availability (HA) action on the indicated resource instance was rejected because the same action was already pending on that resource instance."

Action: None

CRS-02976: The workload maximum memory '*number*' MB exceeds the available memory size of '*number*' MB.

Cause: An attempt to modify a resource failed because the specified workload maximum memory exceeded the available value indicated in the message.

Action: Retry modifying the resource attribute value specifying a value less than or equal to the available value as shown in the message.

CRS-02977: The specified value '*number*' exceeds the available CPU capacity on node '*string*'

Cause: An attempt to modify the attribute WORKLOAD_CPU_CAP was rejected because the new value would have caused the total CPU utilization to exceed 100% on the node given in the message.

Action: Check the CPU utilization on the mentioned node and re-issue the modify command with an appropriate value.

CRS-02981: Value '*string*' is invalid, must be one of: '*string*', '*string*', or '*string*'.

Cause: An attempt to set a resource attribute to the indicated value was rejected because that value was invalid.

Action: Retry modifying the resource attribute value specifying one of the allowed values as shown in the error message.

CRS-02982: Reserved attribute '*string*' cannot be specified as an attribute for a resource type.

Cause: An attempt to supply the indicated attribute to a resource type was rejected because the attribute was reserved. This would typically occur if the user attempted to reuse an attribute in use in another cluster.

Action: In case of the typical case above, do not specify the reserved attribute to add a resource type. The reserved attribute will be automatically set by CRS. If the specified attribute coincidentally conflicted with the reserved attribute, retry adding the resource type choosing an attribute name not reserved by Cluster Ready Services.

CRS-02983: There are no servers satisfying the CPU requirements for resource '*string*'.

Cause: An attempt to start the indicated resource failed because there were no servers available that meet the available CPU requirements of that resource.

Action: If possible, change the CPU requirements of the resource or add more CPUs to the servers in the cluster.

CRS-02984: There are no servers satisfying the CPU requirements for resource group '*string*'.

Cause: An attempt to start the indicated resource group failed because there were no servers available that meet the available CPU requirements of that resource group.

Action: If possible, change the CPU requirements of the resource group or add more CPUs to the servers in the cluster.

CRS-02985: Resource '*string*' used in attribute link '*string*' does not exist or is not registered.

Cause: The resource referenced by the attribute link specification was not found.

Action: Check the specification of the attribute link, fix the problem indicated, and resubmit the request.

CRS-02986: Resource '*string*' used in attribute link '*string*' does not have attribute '*string*'.

Cause: The resource referenced by the attribute link specification did not have the desired attribute in its resource type.

Action: Check the specification of the attribute link, fix the problem indicated, and resubmit the request.

CRS-02989: Resource '*string*' used in attribute link '*string*' is part of a circular link.

Cause: The resource referenced by the attribute link specification referred to itself.

Action: Check the specification of the attribute link, fix the problem indicated, and resubmit the request.

CRS-02990: Resource '*string*' is referenced by one or more resources.

Cause: An attempt to unregister a resource failed because another resource depended on it for an attribute link.

Action: Reissue the command after removing all attribute links referring to the resource to be unregistered.

CRS-02991: Resource '*string*' used in attribute link '*string*' uses a special value for attribute '*string*'.

Cause: The resource referenced by the attribute link specification contained a special value.

Action: Check the specification of the attribute link, fix the problem indicated, and resubmit the request.

CRS-02992: insufficient permissions to modify attribute '*string*' on resource '*string*'

Cause: Modification of the specified attribute required Oracle Grid Infrastructure user or root (UNIX) or Administrator (WINDOWS).

Action: Retry the modification with the correct permissions.

CRS-02993: Value '*number*' is invalid for attribute '*string*', must be greater than or equal to '*number*'.

Cause: An attempt to set a value for the indicated attribute was rejected because the specified value was invalid.

Action: Retry modifying the resource attribute with a valid value.

CRS-02994: Value '*number*' is invalid for attribute '*string*', must be in increments of '*number*'.

Cause: An attempt to set a value for the indicated attribute was rejected because the specified value was invalid.

Action: Retry modifying the resource attribute with a valid value.

CRS-02995: Attribute '*string*' cannot be added to an existing resource type.

Cause: An attempt to add a new attribute with the FLEX_ prefix to an existing resource type was rejected.

Action: Use a different attribute name.

CRS-02996: Cluster Ready Services cannot shut down on node '*string*' because that would require stopping the last running instance of resource '*string*', which would affect resource '*string*' on node '*string*'.

Cause: Shutdown of Cluster Ready Services failed because of a resource dependency.

Action: Start another instance of the required resource or stop all dependent resources on other nodes.

CRS-03501: The Cluster Health Analysis service started on host *string*.

Cause: The Cluster Health Analysis service was successfully started on the listed node.

Action: None

CRS-03502: The Cluster Health Analysis service aborted on host *string*. Details at *string* in *string*.

Cause: The Cluster Health Analysis service aborted due to an internal error.

Action: Determine whether the Cluster Health Analysis service has automatically restarted by checking the Oracle Clusterware alert log. If the problem persists, contact Oracle Support Services.

CRS-03503: The Cluster Health Analysis service on host *string* is shutting down.

Cause: The Cluster Health Analysis service on the listed node was terminated.

Action: None

CRS-04000: Command *string* failed, or completed with errors.

Cause: The specified command did not complete successfully. If the command performs multiple operations internally, one or more of those operations experienced an error that is reported in a previous message.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04016: Key '*string*' is missing in the OCR.

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04017: Failed to get the value for key '*string*' from OCR.

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04038: Cannot delete invalid user '*string*' from CRS Admin list.

Cause: An attempt was made to delete an invalid username from the CRS Admin list.

Action: Reissue the command with a valid username.

CRS-04040: The value of attribute '*string*' contains the following invalid characters: '*string*'

Cause: An attribute value with invalid characters was specified.

Action: Reissue the command and provide valid characters for the attribute value.

CRS-04044: CRS Administrator List: *string*

Cause: Output message, not an error.

Action: None

CRS-04046: Invalid Oracle Clusterware configuration.

Cause: The Oracle Clusterware configuration is invalid.

Action: Configure Oracle Clusterware or Oracle Restart.

CRS-04047: No Oracle Clusterware components configured.

Cause: No Oracle Clusterware components have been configured.

Action: Configure Oracle Clusterware or Oracle Restart.

CRS-04050: Rejecting the command because the cluster active version [*string*] is less than the required cluster active version [*string*]

Cause: The command was rejected because the cluster active version was less than the required cluster active version.

Action: Reissue the command with a valid cluster active version.

CRS-04200: Failed to initialize a security context during wallet IPMI credentials creation.\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04201: Hash context initialization failure during wallet IPMI credentials creation\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04202: String hashing failed during wallet credentials creation\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04203: Hashing creation error during wallet credentials creation\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04204: Failed to initialize the IPMI credentials wallet: *string*\n

Cause: While trying to initialize the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04205: Failed to open the IPMI credentials wallet. The wallet does not exist.\n

Cause: The wallet does not exist.

Action: Configure the wallet for the IPMI device using 'crsctl set'\n"

CRS-04206: Error reading IPMI credentials wallet: '*string*'\n

Cause: While trying to read the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04207: Error writing IPMI credentials wallet: '*string*'\n

Cause: While trying to write the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04208: Unexpected error encountered during lookup of IPMI credentials in the wallet\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using 'crsctl set' and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04209: IPMI credentials not contained in the wallet\n

Cause: The wallet has not been configured.

Action: Configure the wallet for the IPMI device using 'crsctl set'\n"

CRS-04210: Failed to obtain the length of IPMI credentials while accessing the wallet.\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04211: Failed to allocate memory\n

Cause: Insufficient system memory resources.

Action: Correct the system memory resources problem and retry.

CRS-04212: Failed to obtain the secret from the wallet.\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04213: Secret from wallet has incorrect size\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04214: crsctl *string* and *string* wallet versions of IPMI do not match.\n

Cause: A mismatch occurred between the IPMI versions of crsctl and the Cluster Synchronization Services Daemon.

Action: Check proper installation and configuration of crsctl and the Cluster Synchronization Services Daemon.

CRS-04215: Wallet secret encoding error\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04216: Unexpected error configuring the wallet contents\n

Cause: Possible corruption in wallet or internal error.

Action: Reconfigure the IPMI wallet using "crsctl set" and then retry the operation. If the retry fails call Oracle Support Services.

CRS-04217: Unexpected error saving IPMI credentials wallet: *string*\n

Cause: While trying to save the IPMI credentials wallet, the cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04218: Unable to access an IPMI device on this system\n

Cause: A test for the availability of an IPMI device failed. This can occur if: - the IPMI device driver is not installed, - the installed device driver is not supported by Oracle, - IPMI is not supported on this platform or operating system, - no IPMI device is present, or - an IPMI device is present but not configured.

Action: Verify that IPMI hardware supporting IPMI version 1.5 or greater is present and supported on this server, that the IPMI device is configured and the device driver is properly installed.

CRS-04219: Failed to open the wallet. User must be the creator of the wallet: *string*\n

Cause: Not the owner/creator of the wallet. The cluster wallet subsystem returned an error included with this message.

Action: Retry as the owner/creator of the wallet. If necessary, also see the documentation and follow the directions for the displayed error.

CRS-04221: Must specify a password\n

Cause: No password entered in response to password prompt.

Action: Specify a password which matches the local servers IPMI BMC password.

CRS-04222: Supplied password was greater than *number* bytes\n

Cause: The password specified was too long for the IPMI device.

Action: Supply a password with a length no greater than the indicated size while still matching the password used to configure the IPMI device. Retry.

CRS-04223: Username is greater than *number* bytes\n

Cause: The username specified was too long for the IPMI device.

Action: Supply a username with a length no greater than the indicated size while still matching the username used to configure the IPMI device. Retry.

CRS-04224: Unable to communicate with the Cluster Synchronization Services daemon to update IPMI values.\n

Cause: crsctl modified the IPMI credential wallet but could not notify the Cluster Synchronization Services Daemon.

Action: Retry after assuring the Cluster Synchronization Services Daemon is functioning by executing csscheck.

CRS-04225: Unexpected authorization error while creating the IPMI credentials wallet: *string*\n

Cause: Error creating the IPMI credentials wallet. The cluster wallet subsystem returned an unexpected error. The error is included with this message.

Action: See the documentation and follow the directions for the displayed error and retry.

CRS-04226: Unexpected authorization error while saving the IPMI credentials wallet: *string*\n

Cause: While attempting to save the IPMI credentials wallet, the cluster wallet subsystem returned an authorization error. The text of the authorization error text is included with this message. This error was unexpected, and might have been due to an internal error, because wallet creation should be authorized for anyone, and, if the wallet was pre-existing, it had already been read after proper authorization checks.

Action: Consult the documentation for the included message to investigate the root cause of the authorization error, and retry the "set" operation if indicated. If this fails, contact Oracle Support Services.

CRS-04227: The configuration data is stored but IPMI IP address is required to complete the change. The change cannot be validated until the information is complete.\n

Cause: IPMI IP address was missing. To complete the clients's IPMI login change request, all of the information such as IPMI username, password, and IP address, must be present.

Action: Execute 'crsctl set css ipmiaddr'.

CRS-04228: Value of attribute '*string*' is missing\n

Cause: The user did not provide a value for the attribute.

Action: Provide a value using the format *attrName=value*, where *value* may be empty single quotes.

CRS-04229: The IPMI information change was successful\n

Cause: The IPMI address and authorization information have been validated and the change completed.

Action: None required.

CRS-04230: A device was found where the IPMI device should be, but the device is not an IPMI device\n

Cause: The IPMI driver may not be configured or supported by this host.

Action: Check the configuration of the IPMI driver and verify the server's support of an IPMI version 1.5 or greater device.

CRS-04231: IPMI device and/or driver found\n

Cause: An IPMI device and/or device driver was identified on the machine. Detection mechanisms for IPMI hardware vary by platform.

Action: None required.

CRS-04232: The configuration data is stored but IPMI authorization information is required to complete the change. The change cannot be validated until the information is complete.\n

Cause: IPMI authorization information was missing. To complete the clients's IPMI login change request, all of the information such as IPMI username, password, and IP address, must be present.

Action: Execute 'crsctl set css ipmiadmin'.

CRS-04233: New IPMI configuration data stored, but failed validation by remote node.\n

Cause: The supplied configuration data was stored in the Oracle registry, but the resulting configuration could not be used for IPMI access by a remote node. The stored IP address and/or IPMI admin credentials is/are incorrect.

Action: The validating node is identified in the CRS alert log, and further details can be found in the alert log on that node. Verify the credentials for the local IPMI device and reset the configuration using commands 'crsctl set css ipmiadmin' and 'crsctl set css ipmiaddr'

CRS-04234: IPMI configuration unset and registry entries deleted.\n

Cause: Requested operation successful. However, if the CRS stack was able to access and use the deleted configuration data, it will continue to do so until it is restarted.

Action: None required. Enter new configuration data or restart the CRS stack if desired.

**CRS-04235: Failed to delete the IPMI configuration from the Oracle Registry:
'string'\n**

Cause: An error was encountered in the Oracle registry sub-system while trying to clear IPMI configuration and delete the IPMI configuration entries. The detailed error message is included with this message.

Action: See the documentation and follow the directions for the displayed error.

CRS-04236: Oracle Clusterware configured to use IPMI\n

Cause: The Oracle Registry contains complete configuration data for IPMI.

Action: None required.

CRS-04237: Oracle Clusterware is not fully configured to use IPMI\n

Cause: The Oracle Registry does not contain complete configuration data for IPMI.

Action: None required.

**CRS-04238: failed to load the Oracle Home User wallet from the file
system\n'string'\n**

Cause: Could not load the wallet from the file system.

Action: Check whether the wallet file exists, and retry the operation.

CRS-04251: Failed to change the discovery string\n

Cause: An internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04252: Failed to update the profile with the new discovery string\n

Cause: An internal error happened when updating the discovery string in the profile.

Action: Contact Oracle Support Services.

**CRS-04253: The discovery string can not be changed because the voting files
are on ASM\n**

Cause: Changing the discovery string is allowed only if the voting files are not on ASM.

Action: None

CRS-04254: The discovery string has already been set to this value\n

Cause: The value being passed is the same as the current discovery string.

Action: Pass a different discovery string if necessary.

**CRS-04255: Not able to find the current configured voting files with the
provided discovery string\n**

Cause: The supplied discovery string does not discover the voting files that are currently configured.

Action: Pass a different discovery string that includes the location of the current configured voting files.

CRS-04256: Updating the profile\n

Cause: An update to the profile is being performed.

Action: None

CRS-04257: Voting file discovery string successfully replaced

Cause: A request to replace a discovery string completed.

Action: None

CRS-04258: Addition and deletion of voting files are not allowed because the voting files are on ASM

Cause: A voting file add or delete request was issued, but voting files have been configured on ASM storage. Once voting files are configured for ASM, changes in the configuration can be made only with 'crsctl replace votedisk'.

Action: Use 'crsctl replace votedisk' to modify the voting file configuration.

CRS-04259: Only one ASM diskgroup may be specified

Cause: If the voting files will be on ASM, no more than one diskgroup should be specified.

Action: Specify the correct ASM diskgroup.

CRS-04260: Voting file *string* is already configured

Cause: The location provided is already configured as a voting file.

Action: Specify another location that is not a current voting file.

CRS-04261: Diskgroup *string* is already configured with voting files

Cause: The diskgroup name provided is already configured with voting files.

Action: Specify another location for the voting files.

CRS-04262: Failure when retrieving information from the GPnP profile

Cause: An internal error happened when accessing GPnP profile.

Action: Contact Oracle Support Services.

CRS-04263: This operation is not allowed

Cause: Replacing a list of non-ASM voting files with a different list of voting files is not supported.

Action: To change the list of non-ASM voting files and add new voting files, use 'crsctl add css votedisk *vfile* ... *vfile*'.

CRS-04264: The operation could not be validated

Cause: An internal error happened during the validation of the discovery string.

Action: Contact Oracle Support Services.

CRS-04265: The operation cannot be performed because the profile is busy with another operation

Cause: Another operation on the profile is taking place.

Action: Let the other operation finish and retry.

CRS-04266: Voting file(s) successfully replaced

Cause: A request to replace a voting files(s) completed.

Action: None

CRS-04267: Error while updating the profile with ASM discovery string

Cause: An internal error happened while updating the ASM discovery string.

Action: Contact Oracle Support Services.

CRS-04268: '-name' option is allowed only with APPQOSDB or CVUDB type wallets

Cause: The '-name' option was specified in a wallet command for other than APPQOSDB or CVUDB type wallet.

Action: Use the '-name' option only for actions on APPQOSDB or CVUDB type wallets.

CRS-04269: Successful get priority *number string* for Cluster Synchronization Services.

Cause: The 'get' operation was performed successfully.

Action: None

CRS-04271: Voting file creation in other than an ASM disk group prohibited in this cluster.

Cause: An attempt was made to create voting files outside the ASM disk group.

Action: Specify an ASM disk group for voting file creation or replacement.

CRS-04272: error while identifying voting files in use

Cause: More than one voting file was identified for the cluster.

Action: Contact Oracle Support Services.

CRS-04273: Creation of voting files in an ASM disk group not allowed using the command 'crsctl add votedisk'.

Cause: An attempt was made to create voting file in the ASM disk group with the command 'crsctl add votedisk'.

Action: Use 'crsctl replace votedisk' to add or replace the voting files in ASM disk group.

CRS-04274: Command not supported in this cluster.

Cause: An attempt was made to add voting file(s) in a client cluster with the command 'crsctl add votedisk'.

Action: Use 'crsctl replace votedisk' to add or replace the voting file in client clusters.

CRS-04275: Command 'crsctl add css votedisk' command is invalid.

Cause: An attempt to add a voting file using 'crsctl add css votedisk' was rejected because voting files are only supported on ASM disk group. Changes in configuration can be made only with 'crsctl replace votedisk'.

Action: Use 'crsctl replace votedisk' to add the voting files.

CRS-04276: Command 'crsctl delete css votedisk' command is invalid.

Cause: An attempt to delete a voting file using 'crsctl delete css votedisk' was rejected because voting files are present in ASM disk group.

Action: Use 'crsctl replace votedisk' to replace the voting files.

CRS-04399: Command no longer supported. Use 'crsctl get tracefileopts css' or 'crsctl set tracefileopts css' instead.\n

Cause: The specified command is no longer supported and has been replaced.

Action: Use command 'crsctl get tracefileopts css' or 'crsctl set tracefileopts css'. For the complete syntax enter 'crsctl get tracefileopts -help' or 'crsctl set tracefileopts -help'.

CRS-04402: The CSS daemon was started in exclusive mode but found an active CSS daemon on node *string*, number *string*, and is terminating

Cause: An attempt to start the CSS daemon in exclusive mode failed because an active CSS daemon was detected on the indicated node. Starting CSS in exclusive mode requires that the clusterware stack be down on all other nodes to ensure data integrity.

Action: If this message displays as part of the install process, no action is required. Otherwise, stop the Oracle Clusterware stack that is running on the indicated node. If vendor clusterware is in use, stop it on all nodes as well. After stopping all other clusterware, retry starting CSS in exclusive mode.

CRS-04404: The following nodes did not reply within the allotted time:\n*string*

Cause: The clusterized command timed out before the specified nodes responded to the command.

Action: Check if the nodes are online; also check for communications problems. Consider issuing the command locally on the specified node(s).

CRS-04405: The following nodes are unknown to Oracle High Availability Services:\n*string*

Cause: The local Oracle High Availability Services is not in contact with Oracle High Availability Services on the specified nodes.

Action: Check if the nodes are online and Oracle High Availability Services is running. Check for communications problems and consider issuing the command locally on the specified node(s).

CRS-04406: Oracle High Availability Services synchronous start failed.

Cause: A start of Oracle High Availability Services with the '-wait' or '-waitas' option did not complete successfully. This message is preceded by others describing errors that occurred.

Action: Examine the error messages preceding this message and correct the problems they describe.

CRS-04407: Values bigger than 10 are not allowed for parameter *string*.\n

Cause: This parameter does not allow values higher than 10.

Action: Use a value between 0 and 10.

CRS-04408: Node '*string*' configured role successfully changed; restart Oracle High Availability Services for new role to take effect.

Cause: The 'crsctl set node role' command was run to change the role of a node in a Flex Cluster.

Action: Restart Oracle High Availability Services on the node by running 'crsctl stop crs' and 'crsctl start crs'.

CRS-04409: Node '*string*' is already configured in '*string*' role.

Cause: A 'crsctl set node role' command specified the role already configured for the node."

Action: Specify a different role or a different node, if appropriate.

CRS-04411: The role of node *string* cannot be converted to 'leaf'.

Cause: An attempt was made to modify the role of the last remaining configured 'hub' node to 'leaf' node, which is not allowed or the node is already a 'leaf' node."

Action: If role of this node must to be modified to 'leaf', first bring up another node as a 'hub' node to ensure that there is always at least one 'hub' node.

CRS-04412: Attribute '*string*' does not exist.

Cause: An attempt was made to obtain the value for a nonexistent attribute.

Action: Verify the attribute name was specified as intended or retry with a valid attribute.

CRS-04413: The following message was received from node '*string*':

Cause: The mentioned node has sent a message indicating the status of the executed command.

Action: See the following message for the status.

CRS-04414: The specified 'crsctl set trace' or 'crsctl get trace' command is no longer supported.\n

Cause: A request was made to modify or acquire a component trace level which could not be carried out because the designated component tracing is no longer performed, making the concept of component trace level no longer applicable.

Action: None

CRS-04415: cannot stop all the Hub Nodes; clusterware stack is still up and running on a Leaf Node

Cause: An attempt to stop all the Hub Nodes was rejected because the clusterware stack was still running on a Leaf Node, which needs to be connected to a Hub Node."

Action: Stop all the stacks on the Leaf Nodes first, or keep at least one stack up and running on a Hub Node."

CRS-04416: Server attribute '*string*' successfully changed. Restart Oracle High Availability Services for new value to take effect.

Cause: The 'crsctl set' command was run to change the server attribute of a node in a Flex Cluster, however the new value had not taken effect.

Action: To have the new value take effect restart Oracle High Availability Services on the node by running 'crsctl stop crs' and 'crsctl start crs'.

CRS-04417: cannot start Leaf Nodes; no clusterware stacks running on any Hub Nodes

Cause: An attempt to start one or more Leaf Nodes was rejected because no clusterware stack was running on any Hub Node. Leaf nodes need to be connected to a Hub Node.

Action: Retry after ensuring that stacks are running on Hub Nodes.

CRS-04468: could not retrieve the software patch level because host *string* is not a cluster member\n

Cause: The software patch level could not be retrieved for the indicated host because it is not a cluster member.

Action: Specify a host name that belongs to the cluster.

CRS-04477: Oracle Cluster Registry security attributes cannot be initialized.\n

Cause: An attempt to initialize the Oracle Cluster Registry (OCR) security attributes failed because CRS could not obtain either the user name or the user group name.

Action: Report the error to Oracle Support Services.

CRS-04481: Unable to spawn a process.\n

Cause: There was an internal error while spawning a process.

Action: Report the error to Oracle Support.

CRS-04482: A child process terminated abnormally.\n

Cause: A child process exited due to an internal error.

Action: Report the error to Oracle Support.

CRS-04602: Failed *number* to add voting file *string*.\n

Cause: An attempt to add a voting file failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD; 15- insufficient privileges for this operation; 19- version incompatibility between client and server;

Action: Respond based on the return code as follows: 15 - adjust privileges or use a different userid 19 - ensure that compatible versions are installed others - report to Oracle Support Services

CRS-04608: Failure *number* with Cluster Synchronization Services while deleting voting disk.\n

Cause: An attempt to delete a voting disk failed. The number following "Failed" is a return code, which can be: 1 - internal OCSSD server error; 8 - rejected by OCSSD; 15- insufficient privileges for this operation; 16- either the specified voting disk does not exist or you tried to delete the last remaining voting disk; 19- version incompatibility between client and server.

Action: Respond based on the return code as follows: 15 - adjust privileges or use a different userid; 16 - review the voting disk configuration displayed by 'crsctl query css votedisk' and correct your request accordingly; 19 - ensure that compatible versions are installed; others - report to Oracle Support Services.

CRS-04615: Software version query failed for node *string*\n

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04625: Failure to allocate *number* bytes for username.\n

Cause: System is out of memory.

Action: Free up memory on system and retry.

CRS-04626: The requested setting must be between *number* and *number*.\n

Cause: An attempt to change a setting to an out of bounds value.

Action: Retry with the setting within the proper limits.

CRS-04627: Unable to lock the configuration before making changes. *number*\n

Cause: Failure in a CSS API acquiring a lock.

Action: Retry or contact support for information on the error code.

CRS-04628: Change to configuration failed, but was successfully rolled back.\n

Cause: See accompanying messages for explanation of cause.

Action: No action is required. This indicates that no damage was done.

CRS-04629: Unable *number* to mark unformat information on voting file *string*\n

Cause: Probably an unreadable / unwritable voting file was being removed.

Action: If cause is correct, this is ignorable, but not ideal.

CRS-04630: Unable to apply correct permissions to new voting file *string*.\n

Cause: An attempt to set permissions on a new voting file failed. This message is accompanied by others that provide OS-specific details of the error.

Action: Examine the OS-specific error and correct it if possible; otherwise, specify a different voting file.

CRS-04631: Unable *number* to undo initialization of voting file.\n

Cause: Could not roll back format of voting file.

Action: Disk should be cleaned out before an attempt to add again.

CRS-04632: Unable *number* to roll back OCR settings for voting file.\n

Cause: Could not remove temporary changes to OCR adding voting file.

Action: Shut down the cluster and restart. New voting file must be removed with "crsctl delete css votedisk".

CRS-04633: This could take several minutes.\n

Cause: CRS daemons is engaged in an activity take could potentially take a long time.

Action: None

CRS-04634: Retrying stop resources.\n

Cause: crsctl command is trying again to stop resources.

Action: None

CRS-04635: Internal error '*number*' while attempting to send shutdown request

Cause: This is an internal error.

Action: If retrying does not work, contact Oracle support

CRS-04636: Failure *number* in clsvrelversion

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04637: Oracle High Availability Services release version on the local node is [*string*]\n

Cause: Output message, not an error.

Action: None

CRS-04646: Disk group *string* does not exist or is not mounted.\n

Cause: The indicated disk group was not found or was not mounted.

Action: Create or mount the Disk group before use.

CRS-04651: No resources found on server '*string*'.

Cause: The server has no resources associated with it.

Action: Provide a server with resources running.

CRS-04652: Failure *number* in clsvswersion for the local node

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04653: Server name '*string*' contains invalid characters.

Cause: The name provided contains invalid characters.

Action: Use a server name with only alphanumeric characters.

CRS-04654: Server '*string*' could not be found.

Cause: The name provided is not a known server's name.

Action: Use a known server's name.

CRS-04655: Resource '*string*' could not be found.

Cause: The name provided is not a known resource's name.

Action: Use a known resource's name.

CRS-04656: Resource '*string*' is not running on server '*string*'.

Cause: The resource is not on the server the user specified.

Action: User must type a known server.

CRS-04657: Source and destination servers are the same.

Cause: The source and destination servers may not be the same.

Action: Specify a different destination server.

CRS-04658: The clusterware stack on node *string* is not completely down.\n

Cause: There is indication that the clusterware stack is still up.

Action: Shut down the entire clusterware stack before deleting the node.

CRS-04659: Error while trying to unpin node *string*.\n

Cause: An internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04660: Could not find node *string* to delete.\n

Cause: The node to be deleted could not be found because it has not been a member of this cluster recently.

Action: Check the name provided. If the name is correct, the node has been automatically deleted because it was inactive for a long time and no further action is required to delete the node from the cluster.

CRS-04661: Node *string* successfully deleted.\n

Cause: A request to delete a node completed.

Action: None

CRS-04662: Error while trying to delete node *string*.\n

Cause: Some internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04663: could not find node *string* to pin\n

Cause: The indicated node was not an active Hub node in the cluster.

Action: Ensure that the node name is correct, is a Hub node, and that Oracle Clusterware is running on the node.

CRS-04664: Node *string* successfully pinned.\n

Cause: A request to pin a node completed.

Action: None

CRS-04665: Error while trying to pin node *string*.\n

Cause: An internal error happened during this operation.

Action: Contact Oracle Support Services.

CRS-04666: Could not find node *string* to unpin.\n

Cause: An unpin request specified a node that is not an active hub node in the cluster.

Action: Ensure that the node name is correct, that it is a hub node, and that Oracle Clusterware is running on the node.

CRS-04667: Node *string* successfully unpinned.\n

Cause: A request to unpin a node completed.

Action: None

CRS-04668: This ASM diskgroup does not contain voting disks to be deleted\n

Cause: The ASM diskgroup name provided does not contain voting files.

Action: Provide the right ASM diskgroup name.

CRS-04669: Failed to set parameter *string* to *number* due to conflicting parameter *string*; the new value for *string* must be less than *number*.\n

Cause: An attempt was made to set a new value to a configuration parameter which conflicts with another parameter's current value.

Action: Set the value of this parameter to a lower value than what is indicated in the message.

CRS-04670: Failed to unset parameter *string* due to conflicting parameter *string* currently set to *number*.\n

Cause: An attempt was made to unset a configuration parameter which conflicts with another parameter's current value.

Action: Set the conflicting parameter to a value which can coexist with proposed parameter change before submitting this parameter change.

CRS-04671: This command is not supported for ASM diskgroups.\n

Cause: The command 'crsctl add css votedisk' contains one or more ASM diskgroups in the list of voting files. Voting files may be migrated to and from ASM, but diskgroups cannot be added or deleted.

Action: Use an appropriate 'crsctl set' command to add ASM diskgroups. Use 'crsctl replace votedisk' command to migrate voting files to ASM.

CRS-04672: Successfully backed up the Voting File for Cluster Synchronization Service.\n

Cause: The backup of the voting file completed successfully.

Action: None

CRS-04673: Oracle High Availability Services version on the local node is [string]\n

Cause: Output message, not an error.

Action: None

CRS-04674: Cannot add invalid user 'string' to CRS Admin list.

Cause: An attempt was made to add an invalid username to the CRS Admin list.

Action: Reissue the command with a valid username.

CRS-04677: Failed to get string for Cluster Synchronization Services.\n

Cause: An internal error happened during this operation for Cluster Synchronization Services.

Action: Contact Oracle Support Services.

CRS-04678: Successful get string number for Cluster Synchronization Services.\n

Cause: The 'get' operation was performed successfully.

Action: None

CRS-04681: Failed to unset priority for Cluster Synchronization Services.\n

Cause: An internal error happened during this operation for Cluster Synchronization Services.

Action: Contact Oracle Support Services.

CRS-04682: Successful unset priority for Cluster Synchronization Services.\n

Cause: The 'unset' operation was performed successfully.

Action: None

CRS-04683: failed to set parameter 'string' to number for Cluster Synchronization Services with error number\n

Cause: A 'crsctl set' command failed. The number following "error" is a return code, which can be: 1 - internal OCSSD server error 15 - insufficient privileges for this operation

Action: Respond based on the return code as follows: 15 - Adjust privileges or use a different user ID. others - Contact Oracle Support Services.

CRS-04684: Successful set of parameter string to number for Cluster Synchronization Services.\n

Cause: The 'set' operation was performed successfully for Cluster Synchronization Services.

Action: None

CRS-04687: Shutdown command has completed with errors.

Cause: Processing of a shutdown command has completed with errors.

Action: Refer to preceding error message(s) for information about the errors that occurred.

CRS-04688: Oracle Clusterware is already stopped on server '*string*'

Cause: Oracle Clusterware is not running on the indicated server.

Action: None

CRS-04689: Oracle Clusterware is already stopped

Cause: Oracle Clusterware is not running.

Action: None

CRS-04690: Oracle Clusterware is already running on '*string*'

Cause: Oracle Clusterware is already running on the indicated server.

Action: None

CRS-04691: Oracle Clusterware is already running

Cause: Oracle Clusterware is already running.

Action: None

CRS-04692: Cluster Ready Services is online in exclusive mode

Cause: Cluster Ready Services is limited to providing internal services to other Oracle Clusterware components. External Cluster Ready Services are not available.

Action: When in exclusive mode, Oracle Clusterware components are dedicated to the repair or reconfiguration of the Oracle Cluster Registry, voting files or both. Oracle Clusterware should be down and remain down on every other cluster node. Only commands that check or stop the stack, interact with Cluster Synchronization Services or aid in Clusterware repair or reconfiguration should be issued.

CRS-04693: Failed to back up the voting file for Cluster Synchronization Service.\n

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-04694: Number of voting files cannot exceed *number*. Failed to add voting files.\n

Cause: The request to add voting files would cause the maximum number allowed to be exceeded.

Action: Specify fewer voting files to add so that the maximum is not exceeded, or include the `-purge` option on `'crsctl add css votedisk'` to replace the existing set of files with an allowable number of new files.

CRS-04695: Voting disk addition failed because this disk *string* is a duplicate of an existing voting disk with matching File Universal ID *string*.\n

Cause: This disk is already a part of the current cluster.

Action: None needed.

CRS-04696: Failed to set parameter *string* to *number* due to conflicting parameter *string*; the new value for *string* must be greater than *number*.

Cause: An attempt was made to set a new value to a configuration parameter which conflicts with another parameter's current value.

Action: Set the value of this parameter to a higher value than what is indicated in the message.

CRS-04697: This command must be executed by Operating System user '*string*'.

Cause: A crsctl command was executed by the wrong Operating System user.

Action: The specified Operating System user should execute the command.

CRS-04698: Error code *number* in retrieving the patch level

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04699: Error code *number* in retrieving the cluster configuration type

Cause: Internal error.

Action: Contact Oracle Support Services.

CRS-04700: The Cluster Time Synchronization Service is in Observer mode.

Cause: Vendor time synchronization software exists on at least one of the nodes in the cluster.

Action: None

CRS-04701: The Cluster Time Synchronization Service is in Active mode.

Cause: Vendor time synchronization software is not detected on any of the nodes in the cluster.

Action: None

CRS-04702: Offset (in msec): *string*

Cause: None

Action: None

CRS-04703: The Cluster Time Synchronization Service is Offline.

Cause: The Cluster Time Synchronization Service is not running on the current node.

Action: None

CRS-04704: Shutdown of Clusterware failed on node *string*.

Cause: The shutdown did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04705: Start of Clusterware failed on node *string*.

Cause: The start did not complete successfully. One or more of the internal operations experienced an error that is reported in previous messages.

Action: Examine the error message(s) preceding this message and correct the problem(s) they describe.

CRS-04708: Server name is missing

Cause: The server name provided was empty or no name was provided.

Action: Provide a valid server name.

CRS-04724: failed to get the attribute hubsize

Cause: An attempt to get the 'hubsize' attribute failed because the Oracle Clusterware stack was down.

Action: Start the Oracle Clusterware stack and retry the command.

CRS-04727: invalid type '*string*' specified

Cause: An invalid resource or resource group type starting with 'ora.' was specified. Resource or resource group types starting with 'ora.' are reserved for Oracle internal resource types.

Action: Retry the command with a valid resource or resource group type.

CRS-04728: failed to get the attribute hubsize because CSSD is down

Cause: An attempt to retrieve the 'hubsize' attribute failed because the Cluster Synchronization Services daemon (CSSD) was not running. CSSD is required for retrieving this attribute.

Action: Start the CSSD and retry the command.

CRS-04729: Error code *number* in Oracle ASM Cluster File System (Oracle ACFS) upgrade API

Cause: An attempted software upgrade encountered the indicated error while setting the Oracle ACFS upgrade mode. This is an internal error.

Action: Contact Oracle Support Services and provide the indicated error code.

CRS-04730: Command aborted due to an internal error\n

Cause: An inconsistent internal state was detected.

Action: Call Oracle Support Services.

CRS-04731: Specified file *string* could not be created.\n

Cause: JAZN configuration file required by the OC4J container could not be created.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04732: Could not be open file *string*.\n

Cause: JAZN configuration file required by the OC4J container could not be opened.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created by oracle owner of clusterware home.

CRS-04733: File *string* does not exist.\n

Cause: The JAZN configuration file required by the OC4J container does not exist.

Action: Ensure that the directory path exists and that its permissions will allow the file to be created oracle owner of the clusterware home.

CRS-04734: Filename was not specified.\n

Cause: filename was not supplied or was an empty string.

Action: Re-try the command by specifying a valid JAZN configuration filename.

CRS-04735: Expected OCR key does not exist\n

Cause: An infrastructure error occurred because a required OCR key was missing.

Action: Call Oracle Support Services.

CRS-04736: Operation on OCR key failed\n

Cause: Operation on OCR key failed due to an OCR error.

Action: Re-issue the command as oracle owner of clusterware home.

CRS-04737: Failed to allocate *number* bytes of memory\n

Cause: Could not allocate memory for internal buffers due to insufficient system memory resources

Action: Correct the system memory resources problem and retry the command

CRS-04738: Size of file *string* is too large\n

Cause: Specified file size exceeds 65536 bytes.

Action: Re-issue the command after reducing the size of the file.

CRS-04739: Could not close file *string* \n

Cause: Due to an internal error the specified file could not be closed

Action: Re-issue the command after verifying disk space, permissions and path.

CRS-04740: I/O operation on file *string* failed.\n

Cause: Due to an internal error an I/O operation on the specified file failed.

Action: Call Oracle Support if the problem persists.

CRS-04741: Insufficient permissions on OCR key\n

Cause: Operation on OCR key failed due to insufficient permissions.

Action: Re-issue the command as oracle owner of clusterware home.

CRS-04742: OCR updated with contents of *string* (New = *number*, Old = *number* bytes)

Cause: set jazn command was issued and OCR key was updated.

Action: None Required.

CRS-04743: File *string* was updated from OCR(Size: *number*(New), *number*(Old) bytes)

Cause: get jazn command was issued and specified file was updated with the contents from OCR key.

Action: None Required.

CRS-04744: The CSSD is not running with real-time priority. It is running with priority base + nice.\n

Cause: Priority value returned from 'crsctl get css priority' was as displayed. In single instance high availability configurations, the Cluster Synchronization Services daemon (CSSD) always has priority Base + Nice and does not run real-time or at elevated priority.

Action: None Required.

CRS-04748: Disabling multicast outside Oracle Cloud environment failed.

Cause: An attempt to disable use of multicast outside of the Oracle cloud environment was rejected because multicast was required for node discovery in non-cloud environments.

Action: None

CRS-04749: Enabling multicast inside Oracle Cloud environment failed.

Cause: An attempt to enable use of multicast in the Oracle cloud environment was rejected because multicast was not supported for node discovery in the Oracle Cloud environment.

Action: None

CRS-04752: A reconfiguration to remove node *string* is still in progress.\n

Cause: A reconfiguration attempt to remove the node from a cluster could not be completed.

Action: Retry the command after waiting for a few minutes.

CRS-04753: A request to purge lease of node *string* failed.\n

Cause: An attempt to purge lease of a node failed.

Action: None

CRS-04754: Enabling multicast inside Oracle Database Appliance failed.

Cause: An attempt to enable use of multicast in the Oracle Database Appliance environment was rejected because multicast was not supported for node discovery in this environment.

Action: None

CRS-04839: Required attribute '*string*' is missing for '*string*'.

Cause: A required attribute was not specified.

Action: Make sure the attribute is specified.

CRS-04840: Attribute '*string*' cannot be specified using this command.

Cause: An attribute was specified that cannot be used with this command.

Action: Server pool configuration can be changed or created using 'crsctl modify policyset' and 'crsctl modify serverpool -policy' commands.

CRS-04843: Policy '*string*' does not exist.

Cause: An invalid policy name was specified.

Action: Verify the name.

CRS-04846: Configuration policy set has an invalid profile.

Cause: An invalid policy set definition was specified. Missing elements or duplicate elements may be present in the profile.

Action: Verify the contents of the policy set profile and resubmit the command.

CRS-04847: File '*string*' does not exist.

Cause: The specified file name for the command did not exist or could not be opened.

Action: Verify the file name and resubmit the command.

CRS-04848: Policy '*string*' appears more than once in a policy set file.

Cause: A policy was defined more than once in the profile.

Action: Verify the contents of the policy and remove the duplicate policy.

CRS-04849: Server pool '*string*' appears more than once for policy '*string*' in the policy set file.

Cause: A server pool was defined more than once in the profile for the same policy.

Action: Verify the contents of the policy and remove the duplicate server pool.

CRS-04873: At least one attribute must be specified for this command.

Cause: The 'crsctl eval modify' command was run without specifying any attributes.

Action: Rerun the command with at least one attribute specified.

CRS-04891: Invalid value of level specified.

Cause: An invalid value for output level was specified. Output level can only be 1, 2 or 3.

Action: Rerun the command with a level of 1, 2 or 3.

CRS-04922: Module *string*: *string* ignored; module level out of bounds (valid range *number* - *number*)

Cause: An attempt to set a log or trace level supplied a level that is out of range for the module.

Action: Specify a log or trace level within the valid range.

CRS-04923: *string* module: *string* ignored; module level is invalid (range 0 - 65535)

Cause: The module log level was invalid (range 0 - 65535).

Action: Specify a log level within the valid range (0 - 65535).

CRS-04925: 'all' module keyword was specified with other module names

Cause: The module keyword 'all' already refers to all module names.

Action: When referring to all modules, use 'all' without duplicate references to other module names.

CRS-04932: Failed to get the current cluster mode

Cause: There was an internal error while getting cluster mode.

Action: Contact Oracle Support Services.

CRS-04933: Cluster mode set to "flex"; restart Oracle High Availability Services on all nodes for cluster to run in "flex" mode.

Cause: Cluster mode was changed to "flex", which requires a cluster restart.

Action: Restart Oracle High Availability Services on all nodes for cluster to run in "flex" mode.

CRS-04934: Failed to set the cluster mode

Cause: There was an internal error while setting cluster mode.

Action: Contact Oracle Support Services.

CRS-04937: Unable to set the cluster mode.

Cause: An attempt was made to set the cluster mode to 'flex' but Grid Naming Service(GNS) was not configured.

Action: Configure GNS and try again to set the cluster mode to 'flex'.

CRS-04940: Cluster must run in standard or flex mode to use this command

Cause: An attempt was made to set the cluster mode but machine is not running as a cluster.

Action: Cluster must be in standard or flex mode to change the cluster mode.

CRS-04942: Cluster mode set to "standard"

Cause: Cluster mode is changed. Cluster will shut down now.

Action: None

CRS-04953: CSS already running in nonexclusive mode

Cause: An exclusive mode CRS stack start was attempted when CSS was already running in nonexclusive mode.

Action: Stop the CRS stack first and then start in exclusive mode.

CRS-04954: CRSD already running in nonexclusive mode

Cause: An exclusive mode CRS stack start was attempted when CRSD was already running in nonexclusive mode.

Action: Stop the CRS stack first and then start in exclusive mode.

CRS-04955: CSS failed to start in exclusive mode

Cause: An exclusive mode CRS stack start was attempted but CSS failed to start in exclusive mode.

Action: Check the Clusterware alert log for errors. Correct the reported error(s) and retry.

CRS-04956: CRSD failed to start in exclusive mode

Cause: An exclusive mode CRS stack start was attempted but CRSD failed to start in exclusive mode.

Action: Check the Clusterware alert log for errors. Correct the reported error(s) and retry. Msg 4957 continued in msg 6561

CRS-04967: Input values are out of range for parameter *string*

Cause: A value was provided which was out of range for this parameter.

Action: Specify a value which is appropriate for this parameter.

CRS-04968: Invalid values for parameter *string*. Specify either 0 or 1.

Cause: A value was provided which was out of range for this parameter.

Action: Specify a value which is appropriate for this parameter.

CRS-04969: Specified server attribute *string* does not exist

Cause: A nonexistent attribute was specified for get/set command.

Action: Specify an attribute that exists. Run 'crsctl stat res *resourcename* -p' to list all the attributes of that resource.

CRS-04973: Flex ASM must be enabled before switching the cluster mode to 'flex'

Cause: An attempt to change the cluster mode to 'flex' failed because Flex ASM is not enabled.

Action: Enable Flex ASM before changing the cluster mode. Refer to Oracle Automatic Storage Management Administrator's Guide for configuring Flex ASM.

CRS-04977: Cluster cannot be converted from 'flex' mode to 'standard' mode

Cause: An attempt was made to set the cluster mode to standard from flex mode.

Action: If a cluster needs to be converted to standard mode, reinstall Clusterware.

CRS-04980: Duplicate value *string* specified for resource attribute *string*

Cause: A duplicate value was specified for a resource attribute.

Action: Specify only one value for a resource attribute.

CRS-04981: Duplicate value *string* specified for type attribute keyword *string*

Cause: A duplicate value was specified for a type attribute keyword.

Action: Specify only one value for DEFAULT_VALUE, FLAGS and TYPE per type attribute.

CRS-04982: Valid type attribute keyword *string* specified outside a type attribute

Cause: A valid type attribute keyword was specified outside a type attribute.

Action: Specify the ATTRIBUTE type attribute keyword before specifying the DEFAULT_VALUE, FLAGS or TYPE type attribute keywords.

CRS-04983: Invalid type attribute keyword *string* specified

Cause: An invalid type attribute keyword was specified.

Action: Specify only the valid type attribute keywords ATTRIBUTE, DEFAULT_VALUE, FLAGS and TYPE.

CRS-04984: Duplicate definition for type attribute *string*

Cause: The same type attribute was named on more than one ATTRIBUTE keyword.

Action: Define a type attribute only once.

CRS-04985: The value '*string*' of FLAGS attribute is invalid.

Cause: An invalid flag value was specified.

Action: Flag values may be combined using the '|' character as a separator.

CRS-04986: This command is for Oracle's internal use only

Cause: A command meant for internal use was specified.

Action: Refer to 'crsctl -h' for list of commands available for use.

CRS-04989: Module *string*: *string* ignored; module level out of bounds (valid range *number* - *number*)

Cause: An attempt to set a log or trace level supplied a level that is out of range for the module.

Action: Specify a log or trace level within the valid range.

CRS-04990: Issued command does not support filter in this version of CRS.

Cause: The command was rejected because a filter (-w) was specified. Filters are not currently supported for this command.

Action: Reissue the command without the filter.

CRS-04991: Could not delete the resource because it does not exist.

Cause: An attempt to delete a resource failed because the resource specification did not identify an existing resource. Either there was no resource with the specified name, or no resource satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource or a filter that will select an existing resource.

CRS-04992: Could not delete the server pool because it does not exist.

Cause: An attempt to delete a server pool failed because the server pool specification did not identify an existing server pool. Either there was no server pool with the specified name, or no server pool satisfied the specified filter.

Action: Reissue the command specifying the name of an existing server pool or a filter that will select an existing server pool.

CRS-04993: Could not delete the server category because it does not exist.

Cause: An attempt to delete a server category failed because the server category specification did not identify an existing server category. Either there was no server category with the specified name, or no server category satisfied the specified filter.

Action: Reissue the command specifying the name of an existing server category or a filter that will select an existing server category.

CRS-04994: Could not delete the resource type because it does not exist.

Cause: An attempt to delete a resource type failed because the resource type specification did not identify an existing resource type. Either there was no resource type with the specified name, or no resource type satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource type or a filter that will select an existing resource type.

CRS-04995: The command '*string*' is invalid in crsctl. Use srvctl for this command.

Cause: An attempt was made to use an unsupported command in crsctl.

Action: Use srvctl for the mentioned command.

CRS-04996: Command ('crsctl *string* policysset') is not supported in this version of CRS.

Cause: The command was rejected because policy-based management is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-04997: Command ('crsctl *string* category') is not supported in this version of CRS.

Cause: The command was rejected because the server category is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-04998: Command ('crsctl eval *string* ') is not supported in this version of CRS.

Cause: The command was rejected because What-If is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-04999: Command ('crsctl *string* policy') is not supported in this version of CRS.

Cause: The command was rejected because policy-based management is not a supported feature in this release.

Action: If this error occurs during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher.

CRS-05000: Expected resource *string* does not exist in agent process

Cause: The expected resource must have been created by Oracle Configuration tools.

Action: Check that the resource was not manually deleted. If not the case call Oracle Support.

CRS-05001: Expected dependency in resource *string* on a resource of type *string* does not exist

Cause: The expected resource dependency must have been created by Oracle Configuration tools.

Action: Check that the resource dependency was not manually removed.

CRS-05002: Agent action was aborted

Cause: Agent action was aborted either due to action timeout expiry or the user canceled the action.

Action: Retry the operation.

CRS-05003: Invalid attribute value: '*string*' for attribute *string*

Cause: An attribute value passed to the Agent was NULL or invalid.

Action: Give the correct value to the attribute and retry.

CRS-05004: Cannot find listener endpoint for listener *string*

Cause: listener endpoint not found.

Action: Check listener.ora for that listener.

CRS-05005: IP Address: *string* is already in use in the network

Cause: The VIP resource attempted to use an IP address already in use in the network.

Action: Use srvctl to re-create vip or scanvip specifying an IP address which is not being used in the network and retry the operation.

CRS-05006: Unable to automatically select a network interface which has subnet mask *string* and subnet number *string*

Cause: The subnet mask and subnet number configured for the resource did not match the subnet mask and subnet number of any network interface on this node.

Action: Provide a subnet mask and subnet number which matches at least one network interface's subnet mask and subnet number using `srvctl remove` and `add vip` and retry the operation.

CRS-05007: Cannot remove the primary IP *string* from the network interface

Cause: The primary IP of the network interface was incorrectly configured as the VIP.

Action: Use `'srvctl remove'` and `'srvctl add vip'` or `'srvctl remove'` and `'srvctl add scan'` to provide the correct IP address for the VIP and retry the operation.

CRS-05008: Invalid attribute value: *string* for the network interface

Cause: The network interface value did not match the subnet mask and subnet number of any network interface on the node.

Action: Modify the network interface's value such that the subnet mask and subnet number matches the subnet mask and subnet number of at least one network interface on the node using `'srvctl remove'` and `'srvctl add vip'` and retry the operation.

CRS-05009: The VIP address *string* does not belong to the subnet *string*

Cause: The VIP's subnet number and the network interface's subnet number did not match.

Action: Make the VIP's subnet number match the network interface's subnet number using `'srvctl remove'` and `'srvctl add vip'` or `'srvctl remove'` and `'srvctl add scan'` and retry the operation.

CRS-05010: Update of configuration file "*string*" failed: details at "*string*" in "*string*"

Cause: An attempt to open the specified file failed. Common causes are that the file does not exist, or the file permissions prohibit access.

Action: Check that the file exists and has the proper permissions.

CRS-05011: Check of resource "*string*" failed: details at "*string*" in "*string*"

Cause: The check of the database or Automatic Storage Management instance failed.

Action: Check the database or ASM instance alert log and the referenced Oracle Clusterware trace file for additional information. Recover the instance if necessary.

CRS-05012: Check of service resource "*string*" failed: details at "*string*" in "*string*"

Cause: The check of the preconnect service failed because it could not run on the same node as the main service.

Action: Check the referenced Oracle Clusterware trace file for additional information. Start the preconnect service on a different node.

CRS-05013: Agent "*string*" failed to start process "*string*" for action "*string*": details at "*string*" in "*string*"

Cause: The named agent failed to start the named process for the named action.

Action: Check the referenced Oracle Clusterware trace file for additional operating system specific information. Refer to operating system documentation to correct the error.

CRS-05014: Agent "*string*" timed out starting process "*string*" for action "*string*": details at "*string*" in "*string*"

Cause: The named agent aborted the named process because the process failed to respond within the timeout period.

Action: Check the agent log files for further information

CRS-05015: Agent timed out waiting for a response from the DHCP server

Cause: Agent and the DHCP server were not able to communicate with each other. Common causes of this failure are due to the DHCP server not running, or improper DHCP server configuration, or the DHCP server running out of DHCP leases.

Action: Identify the cause of the problem from the DHCP server log files. If the problem is due to the DHCP server running out of leases, increase the number of addresses which can be served by the DHCP server.

CRS-05016: Process "*string*" spawned by agent "*string*" for action "*string*" failed: details at "*string*" in "*string*"

Cause: The named process failed to complete successfully.

Action: Check details in the agent log for error information from the spawned process.

CRS-05017: The resource action "*string string*" encountered the following error: *lnstring*. For details refer to "*string*" in "*string*".

Cause: An error occurred during the resource action.

Action: Examine the accompanying error messages and respond accordingly.

CRS-05018: Clusterware has disabled an IP route associated with destination "*string*" and interface "*string*". For details, refer to "*string*" in "*string*".

Cause: A potentially conflicting route in the same subnet used by the address for the redundant interconnect was found and removed to prevent routing conflicts.

Action: Validate that the route described was not actually in use.

CRS-05019: All OCR locations are on ASM disk groups [*string*], and none of these disk groups are mounted. Details are at "*string*" in "*string*".

Cause: OCR was configured on ASM disk groups, and all of the listed disk groups failed to mount. The possible causes are: 1. A disk was not accessible. 2. A disk in a normal or high redundancy disk group failed after the most recent dismount. 3. The ASM_DISKSTRING in the SPFILE or the GPnP profile was incorrect.

Action: Check the ASM alert logs for more information. To correct disk access or failure issues either: a) restore access to the disks in the disk group and mount the disk group (via ASMCMD or SQL). or b) Issue a force mount to the disk group to offline missing disks and mount a normal or high redundancy disk group. To correct the ASM_DISKSTRING in the SPFILE and propagate the change to the GPnP profile, in sqlplus, issue the SQL command "ALTER SYSTEM SET ASM_DISKSTRING <discovery_string> ...", see Setting Oracle ASM Initialization Parameters in the Automatic Storage Management Administrator's Guide

CRS-05020: Not all endpoints are registered for listener *string*

Cause: Listener agent failed to register all endpoints to listener.

Action: Check listener log file for that listener.

CRS-05021: Check of storage failed: details at "string" in "string"

Cause: The check of ASM storage failed because the storage was not accessible.

Action: Check Clusterware alert log and the referenced Oracle Clusterware trace file for additional information.

CRS-05022: Stop of resource "string" failed: current state is "string"

Cause: The named resource failed to stop.

Action: Ensure there are no users of the resource and reissue the stop.

CRS-05023: Failed to unmount file system "string"; details at "string" in "string"

Cause: The named file system resource failed to unmount.

Action: Determine which OS processes are accessing the mount point using an OS command such as 'fuser' or 'lsof' for Unix based platforms or 'handle' for Windows. Close, shut down, or terminate applications and processes accessing the mount point, then retry.

CRS-05024: Unmounting file system "string"

Cause: A 'stop' of the file system resource mounted on the indicated path started.

Action: This is an informational message only.

CRS-05025: File system "string" unmounted

Cause: A 'stop' of the file system resource mounted on the indicated path completed normally.

Action: This is an informational message only.

CRS-05026: Failed to clean mount point "string"; details at "string" in "string"

Cause: The clean of the volume failed because one or more processes on the system were accessing the mount point.

Action: Determine which OS processes are accessing the mount point using an OS command such as 'fuser' or 'lsof' for Unix based platforms or 'handle' for Windows. Close, shut down, or terminate applications and processes accessing the mount point, then retry.

CRS-05027: The ASM instance on node "string" cannot be stopped because it is currently being used by Cluster Ready Services.

Cause: An attempt to stop the ASM instance on the indicated server failed because Cluster Ready Services was using that ASM instance.

Action: Use 'crsctl stop crs' or 'crsctl stop cluster' to stop the Cluster Ready Services on the node.

CRS-05028: Cannot start resource "string" because the resource it depends on, "string", failed to start on the same node

Cause: The resource could not be started because the resource on which it depends failed to start on the same node.

Action: Manually start the dependency resource and then the resource on the same node.

CRS-05029: Agent failed to initialize ARP devices required for starting the HAIP resource

Cause: The resource could not be started because the ARP devices failed to start on the same node.

Action: Manually check the ARP devices on the same node and then start the resource.

CRS-05030: The resource action "*string string*" completed with the following error: *string*

Cause: An error occurred during the resource action.

Action: Examine the accompanying error messages and respond accordingly.

CRS-05031: invalid instance open mode: '*string*'

Cause: The instance open mode passed to the Agent was invalid.

Action: Provide a correct instance open mode and retry.

CRS-05032: incompatible instance open mode: '*string*' with the role of the database in an Oracle Data Guard configuration: '*string*'

Cause: The instance open mode passed to the Agent was invalid for the role of the database in an Oracle Data Guard configuration.

Action: Provide a correct instance open mode or change the role of the database in an Oracle Data Guard configuration and retry.

CRS-05033: Open mode '*string*' is incompatible with the current instance state '*string*'.

Cause: An attempt to change the instance to the specified open mode failed because the specified mode was incompatible with the current instance state.

Action: Reissue the command with a correct instance open mode.

CRS-05034: failed to get instance connection

Cause: Agent process failed to get an instance connection. Internal error.

Action: If error persists, contact Oracle Support Services.

CRS-05037: Database does not have the required fix for bug '*string*'.

Cause: A patch in the database was not applied.

Action: Contact Oracle Support Services.

CRS-05038: Oracle home '*string*' was not configured correctly.

Cause: The 'oracle' executable was not relinked in the Oracle home or, on Windows platforms, the %ORACLE_HOME%\bin\oracle.key file did not exist, or the Windows registry key specified in %ORACLE_HOME%\bin\oracle.key did not exist.

Action: Relink the Grid Infrastructure executables as described in the Oracle Grid Infrastructure Installation Guide for your operating system.

CRS-05039: Oracle executable '*string*' was not present in Oracle home '*string*'.

Cause: The 'oracle' executable was not found in the expected location when checking if Oracle home was configured correctly.

Action: Relink the Grid Infrastructure executables as described in the Oracle Grid Infrastructure Installation Guide for your operating system.

CRS-05040: Start action for preconnect service resource '*string*' failed because base service name '*string*' is running.

Cause: An attempt to start a preconnect service was rejected because its associated base service was already running on the instance.

Action: Either issue the start request on another node or stop the base service and reissue the start on this node.

CRS-05041: No available network interface found for network classification *string*. Confirm that network interfaces for that classification are UP and RUNNING.

Cause: There was a problem when initializing the network interface list for highly available IP (HAIP).

Action: Confirm that network interfaces for that classification are UP and RUNNING on this node.

CRS-05042: failed to check whether service has any connected Java sessions

Cause: An unexpected internal error occurred.

Action: If the error persists, contact Oracle Support Services.

CRS-05043: An I/O control request to determine whether Infiniband ACLs are enabled failed with error: '*string*'.

Cause: During listener start, an OS 'ioctl' request failed.

Action: Examine the accompanying error message, resolve the problem reported, and restart the listener.

CRS-05044: Socket creation for communication failed with error: '*string*'.

Cause: During listener start, an OS system call 'socket' failed.

Action: Examine the accompanying error message, resolve the problem reported, and restart the listener.

CRS-05045: Reader farm service '*string*' does not exist in the database '*string*'.

Cause: During the specified reader farm service start or check action, it was found that the service did not exist in the indicated database.

Action: Restart the non-reader farm service of the database so that the reader farm service is created in the database and then start a reader farm service.

CRS-05046: Reader farm service '*string*' does not exist in the PDB '*string*' of database '*string*'.

Cause: During the specified reader farm service start or check action, it was found that the service did not exist in the indicated PDB of the indicated database.

Action: Restart the non-reader farm service of the PDB so that the reader farm service is created in the PDB and then start a reader farm service.

CRS-05047: SCAN listener *string* has endpoints registered on incorrect SCAN VIPs.

Cause: A periodic check by the the listener agent detected that the SCAN listener had endpoints registered on incorrect SCAN VIPs.

Action: Restart the SCAN listener. If the error persists, contact Oracle Support Services.

CRS-05048: Failure communicating with CRS to access a resource profile or perform an action on a resource

Cause: An attempt to access a resource profile or perform an action on a resource encountered an error attempting to communicate with Oracle Cluster Ready Services (CRS).

Action: If this error did not occur while bringing the clusterware stack up or down, please contact Oracle Support Services. Otherwise, retry the operation when the clusterware stack is up.

CRS-05049: Oracle Clusterware has removed the duplicate IP address *string* on interface *string*.

Cause: An automatic periodic scan of network interfaces determined that the indicated IP address was plumbed on multiple nodes, probably because of a missing ping response. The Network agent removed the duplicate address.

Action: If there is no evidence of system load on the nodes on which the duplicate address is discovered or if this problem is seen frequently, contact Oracle Support Services.

CRS-05050: HAIP failover due to network interface *string* not functioning

Cause: There was a problem with the network interface used for highly available IP (HAIP).

Action: Confirm that the network interface is up and running on this node.

CRS-05052: invalid host name or IP address '*string*'

Cause: The VIP resource had an incorrect or invalid value for USR_ORA_VIP.

Action: Modify the VIP resource with the correct host name or IP address using the command 'srvctl modify vip'.

CRS-05054: Direct NFS Client control for Oracle home '*string*' is not enabled

Cause: An attempt to start the database instance failed because direct NFS Client control was not enabled for the 'oracle' executable in the Oracle home which was configured to access storage indirectly.

Action: Enable Direct NFS Client control for the Oracle home as described in the Database Installation Guide for this operating system, and retry the operation.

CRS-05055: unable to connect to an ASM instance because no ASM instance is running in the cluster

Cause: An attempt to start the ora.storage resource failed because an ASM instance was not running on any node in the cluster.

Action: Restart the stack using 'crsctl stop crs -f' and 'crsctl start crs'.

CRS-05056: unable to connect to an ASM instance because the ASM listener is not running on the node where the ASM instance is running

Cause: An attempt to start the ora.storage resource failed because the ASM listeners were not running on any node where the ASM instance was running in the cluster.

Action: Start the ASM listener using 'srvctl start listener' command.

CRS-05057: unable to connect to an ASM instance because the ASM instance has not registered any ASM listener endpoints

Cause: An attempt to start the ora.storage resource failed because the ASM instances failed to register any ASM listener endpoints.

Action: Check if the ASM instance and ASM listener are running on any node in the cluster. Then, on this node, check the LISTENER_NETWORKS parameter value of the ASM instance and restart the ASM instance if this parameter value is empty.

CRS-05058: OHASD with PID *string* is not responding and is terminated.

Cause: Oracle High Availability Services Daemon (OHASD) failed to respond and is being restarted.

Action: None

CRS-05059: The operating system version is not supported by Oracle ASM Filter Driver.

Cause: Oracle ASM Filter Driver was incompatible with the current operating system version. Therefore, it was not activated.

Action: Ensure that the operating system version is supported by Oracle ASM Filter Driver. If this situation recurs, contact Oracle Support Services.

CRS-05060: Query of pluggable database '*string*' in the database '*string*' failed with error '*number*'.

Cause: During the service start or check action, the query of the pluggable database in the indicated database failed.

Action: Correct the error and retry. Ensure that the pluggable database exists in the database or a valid pluggable database attribute for the service. Check the V\$PDBS view to see if the pluggable / database exists.

CRS-05061: Clusterware failed to add HAIP route associated with destination '*string*' and interface '*string*'. For details, refer to '*string*' in '*string*'.

Cause: A temporary operating system error occurred while adding the route.

Action: Validate that the route described can be added manually.

CRS-05062: Oracle binary file '*string*' does not exist on node *string*.

Cause: The Oracle binary file does not exist on the indicated node.

Action: Correct the value of Oracle Home of the resource or make sure Oracle Home is installed correctly.

CRS-05063: The start of instance '*string*' is still in progress on node '*string*'

Cause: The timeout has been reached, instance startup will continue.

Action: Wait for the instance startup.

CRS-05064: Listener Agent "*string*" timed out while starting. Warning: Review net listener logs. Listener might not have started.

Cause: The Listener agent aborted the lsnrctl because the process failed to respond within the timeout period.

Action: Check the listener agent and net listener log files for further information

CRS-05065: The check for disk group '*string*' encountered the following error: '*string*'. For details refer to '*string*' in '*string*'.

Cause: An error occurred in the resource.

Action: Examine the accompanying error messages and respond accordingly.

CRS-05068: The file '*string*' is not owned by root.

Cause: A request to start RHP resource was rejected because the file indicated is not owned by root.

Action: Execute the following post-patch command as "root" user. <ORACLE_HOME>/perl rhp/patch/rootrhp.pl home=\$ORACLE_HOME -post -start_rhp patchHome=<patch_home_path>

CRS-05100: One or more attributes were not found for the entity.

Cause: The operation failed because the entity lacked one or more attributes.

Action: Provide the required attributes and retry the operation.

CRS-05101: The specified entity was not found in the entity list.

Cause: The Cluster Ready Services daemon was unable to locate the input entity in its entity list.

Action: Retry the operation after deleting the entity and registering it again.

CRS-05102: The entity is already registered.

Cause: An attempt was made to register an entity that was already registered.

Action: If the specification of the entity was incorrect, retry the operation with the correct entity specification.

CRS-05103: The entity is not registered.

Cause: An attempt was made to operate on an entity that was not registered.

Action: If the specification of the entity was incorrect, retry specifying the correct entity otherwise register the entity and retry the operation.

CRS-05104: The registration of the entity failed.

Cause: An attempt to register an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and retry the registration.

CRS-05105: Unregistering the entity failed.

Cause: An attempt to unregister an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to unregister the entity again.

CRS-05106: The entity failed to start.

Cause: An attempt to start an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to start the entity again.

CRS-05107: The entity failed to stop.

Cause: An attempt to stop an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to stop the entity again.

CRS-05108: The entity failed to relocate.

Cause: An attempt to relocate an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to relocate the entity again.

CRS-05109: The status code is invalid.

Cause: The status code was not of the type enum CLSCRS_STAT.

Action: Verify that the status code argument is a valid code returned from the CLSCRS API and retry.

CRS-05110: The entity failed to update.

Cause: An attempt to update an entity failed. The preceding error messages provide additional details.

Action: Correct the issues described in the accompanying error messages and try to update the entity again.

CRS-05111: The entity has an invalid profile.

Cause: There were invalid attributes in the entity profile.

Action: Check the entity profile, remove any invalid attributes and retry the operation.

CRS-05112: The action script of the entity cannot be found.

Cause: The action script of the entity specified by the attribute ACTION_SCRIPT could not be located.

Action: Ensure that the attribute ACTION_SCRIPT exists and specifies a valid script for the entity.

CRS-05113: The entity has a dependency error.

Cause: An attempt to operate on an entity failed because of the resulting effect on one or more dependent entities. Preceding messages provide details on the nature of the problem.

Action: Take the corrective action as suggested by the preceding messages and resubmit the operation.

CRS-05114: A placement error was encountered while attempting to operate on the entity.

Cause: Based on the placement policy for the entity, there was no available server to which the entity could failover or start.

Action: Check the target server for the entity and restart the entity using the 'crsctl start' command.

CRS-05115: The specified server is not in the cluster.

Cause: The specified server name did not designate a server in the cluster.

Action: Check the server names in the cluster and retry the operation specifying a server that is a member of the cluster.

CRS-05116: The operation on the entity has been cancelled.

Cause: A scheduled or running operation was cancelled.

Action: None

CRS-05117: An internal error occurred while operating on the entity.

Cause: There was an internal error. This message will be preceded by another message with a more specific problem description.

Action: Review the accompanying error messages and contact Oracle Support Services.

CRS-05118: The entity or all of its instances are disabled.

Cause: The attempted request could not be serviced because the entity was disabled.

Action: Enable the entity and retry the operation.

CRS-05119: The active version of Cluster Ready Services is below the required level.

Cause: An attempt was made to use the functionality that has only been available beginning with the active version specified in the preceding message.

Action: Upgrade to the minimum required version stated in the preceding message.

CRS-05120: The requested action for the entity was aborted due to a timeout.

Cause: The timeout specified for a custom action was reached before the action could complete.

Action: Revise the timeout setting and retry the action.

CRS-05121: The operation cannot be completed due to invalid arguments.

Cause: Invalid arguments were specified to execute the CRS command.

Action: Check the arguments and specify only valid arguments to the command.

CRS-05122: The entity could not be registered due to a type mismatch.

Cause: The registration of an entity failed because the input entity type to the API did not match the type of the entity to be registered.

Action: Specify the correct entity type to register the entity.

CRS-05123: The resource validity check failed due to an invalid resource type.

Cause: The value of the attribute TYPE for the resource was not 'application'.

Action: Specify the value 'application' for the resource attribute TYPE.

CRS-05124: The entity has one or more attributes missing.

Cause: The validity check failed to find one or more of the attributes NAME, TYPE or ACTION_SCRIPT for the entity.

Action: Update the entity to have the missing attributes.

CRS-05125: The action script does not exist for the entity.

Cause: The validity check on the entity failed to find the file specified in the attribute ACTION_SCRIPT of the entity.

Action: Provide the full path to an existing file for the attribute ACTION_SCRIPT.

CRS-05126: The entity has invalid hosting servers for the placement policy.

Cause: Either the attribute HOSTMEM_REQ was not set or was empty for the entity.

Action: Either set the attribute HOSTMEM_REQ or set the attribute PLACEMENT to 'balanced'.

CRS-05127: The attribute HOSTING_MEMBERS must not be specified for the entity.

Cause: The attribute HOSTING_MEMBERS was specified for the entity with the balanced placement policy.

Action: Either unset the attribute HOSTING_MEMBERS or set the entity's placement policy to be 'favored' or 'restricted'.

CRS-05128: The value of the attribute HOSTING_MEMBERS for the entity is invalid.

Cause: The value of the attribute HOSTING_MEMBERS for the entity contained one or more of the characters: ';', ' ' or ': '.

Action: Remove the invalid characters from the value of the attribute HOSTING_MEMBERS.

CRS-05129: An invalid placement policy was specified for the entity.

Cause: The attribute PLACEMENT for the entity was set to an invalid value.

Action: Set the attribute PLACEMENT to either 'favored', 'restricted', or 'balanced'.

CRS-05130: An invalid value was specified for the attribute AUTO_START.

Cause: The attribute AUTO_START of the entity was set to an invalid value.

Action: Set the attribute AUTO_START to either 'always', 'never', or 'restore'.

CRS-05131: One or more attribute of the entity are set to invalid values.

Cause: An attempt was made to set the attribute to a value of different type.

Action: Check the attributes and set the value to the appropriate type.

CRS-05132: The entity list is not empty.

Cause: The entity list passed to receive the information for the queried CRS entities was not empty.

Action: Create an empty list to pass as the output argument and retry.

CRS-05133: The generated connection key is too long.

Cause: The size of the environment variables HOST and HOSTNAME were greater than 255 characters.

Action: Set the environment variables HOST and HOSTNAME to values whose length is no more than 255 characters.

CRS-05134: Crash dump from CSS was not enabled.

Cause: Crash dump from Cluster Synchronization Services (CSS) could not be enabled because Linux kdump service was not active.

Action: Configure and enable the Linux kdump service to collect the crash dump information. See My Oracle Support note 2049919.1. After enabling the Linux kdump service, set the CSS REBOOT_OPTS attribute to NODUMP and then to

```
CRASHDUMP to ensure that the REBOOT_OPTS value is updated. #crsctl modify res
ora.cssd -attr "REBOOT_OPTS=NODUMP" -init #crsctl modify res ora.cssdmonitor -attr
"REBOOT_OPTS=NODUMP" -init #crsctl modify res ora.cssd -attr
"REBOOT_OPTS=CRASHDUMP" -init #crsctl modify res ora.cssdmonitor -attr
"REBOOT_OPTS=CRASHDUMP" -init
```

CRS-05151: Memory could not be allocated.

Cause: An attempt to allocate memory for an entity failed.

Action: Check the system logs, correct the condition and retry the operation.

CRS-05152: The pointer to the context is invalid.

Cause: A null pointer was passed as a pointer to the context.

Action: Create a valid context and pass its address to the requested operation.

CRS-05153: The entity pointer is invalid.

Cause: A null pointer was passed to the API for the entity name or the entity value."

Action: Allocate memory for the entity name and the entity value and pass in the valid pointers to the API.

CRS-05154: The input attribute name not found in the entity's attribute list.

Cause: An attempt was made to modify a nonexistent attribute of an entity.

Action: Provide an existing attribute of the entity and retry the operation.

CRS-05155: The end of the entity list was reached.

Cause: An attempt was made to search beyond the end of the entity list.

Action: None

CRS-05156: The entity has no attributes.

Cause: An attempt was made to get the attribute list for an entity that has no attributes.

Action: Check the entity name that is being passed. If it's correct then delete the entity, register it with correct attributes and retry the operation.

CRS-05157: The pointer to the operation status message in the entity structure is null.

Cause: The message pointer in the entity structure was null. The entity maybe corrupted.

Action: Delete the entity, register the entity and retry the operation.

CRS-05158: The entity list could not be found.

Cause: An attempt was made to perform an operation on an entity list, but no valid entity list was passed.

Action: None

CRS-05159: The specified entity already exists.

Cause: An attempt was made to add an entity that already exists.

Action: Check the entity name to be added. If it is correct and the existing entity must be recreated, then delete the entity and retry the operation.

CRS-05160: The entity list is empty.

Cause: The query failed because the entity list was empty.

Action: Retry the query supplying the intended list of entities.

CRS-05161: The entity name contains invalid characters.

Cause: An attempted operation was rejected because the specified entity name contained invalid characters.

Action: Retry the operation specifying a valid entity name.

CRS-05162: The name of a resource or a filter contains invalid characters.

Cause: An attempted operation was rejected because the specified resource name or the filter name contained invalid characters.

Action: Retry the operation specifying a valid resource name or the filter name.

CRS-05164: The attribute name is longer than 255 characters.

Cause: An attempt was made to use an attribute name with a length of more than 255 characters.

Action: Use an attribute name shorter than 255 characters and retry the operation.

CRS-05165: The supplied buffer is too small for the filter to string conversion.

Cause: The buffer supplied to the API was too small to hold the output string.

Action: Increase the buffer size and pass it to the API.

CRS-05166: The specified return code is invalid.

Cause: The return code was not of the type 'enum clscrsret'.

Action: Verify that the return code argument is a valid code returned from the CLSCRS API and retry.

CRS-05167: The value contains invalid characters.

Cause: An attempted operation was rejected because the specified attribute name or value contained invalid characters.

Action: Retry the operation using valid characters.

CRS-05168: unable to communicate with ohasd

Cause: An attempt to establish a connection with the Oracle High Availability Services daemon (ohasd) failed.

Action: Ensure that ohasd is running, and then retry the operation.

CRS-05501: Unable to connect to eONS server on port *number*

Cause: The eONS server may not be active or listening on a different port.

Action: Ensure that the eONS resource is ONLINE and listening on the above port.

CRS-05502: Invalid event template *string*

Cause: The event template specified is invalid.

Action: The event template format must be <PROPERTY|ELEMENT>(attribute name=<literal|%resource attribute name%>) ...

CRS-05503: Error creating the eONS subscriber

Cause: The eONS server may not be active.

Action: Ensure that the CRS eONS resource is in ONLINE state.

CRS-05504: Node down event reported for node '*string*'.

Cause: The specified node was not responsive.

Action: Restart the specified node.

CRS-05601: MDNS: *string*

Cause: None, generic bypass mdns message.

Action: None

CRS-05602: mDNS service stopping by request.

Cause: MDNSD stopping by OHASD request.

Action: None

CRS-05705: Failed to get required resources

Cause: There was an internal error while evaluating the required resources for the subject resource.

Action: Contact Oracle Support Services.

CRS-05706: No more members to consider

Cause: There was no host found on which to start the resource based on the placement policy.

Action: Check the placement policy and the required resources for the subject resource.

CRS-05707: Failed after successful dependency consideration

Cause: There was no host found on which to start the resource based on the placement policy.

Action: Check the placement policy and the required resources for the subject resource.

CRS-05709: Resource '*string*' is already running on member '*string*'

Cause: An attempt was made to start a resource on a host while it is already running on that host.

Action: This is an insignificant error. Check the operation being performed.

CRS-05801: Agent path is null or does not resemble a filesystem path

Cause: Unable to spawn the agent program because of incorrect agent path.

Action: Fix the agent path using 'crsctl modify type'.

CRS-05802: Unable to start the agent process

Cause: An attempt to start the agent process failed.

Action: Ensure that the agent path is correct and has the proper permissions, and retry the command.

CRS-05805: Missing the required action callback in agent

Cause: Unable to execute resource's command.

Action: Ensure that agent executable or action script contains the missing function.

CRS-05809: Failed to execute '*string*' value of '*string*' for '*string*'. Error information '*string*', Category : *number*, OS error : *number*

Cause: Unable to spawn the resource action script due to incorrect path value or incorrect permissions or other OS error.

Action: Correct the action script path and permissions or check and fix the reported OS error.

CRS-05810: Attempt to add a duplicate resource '*string*'. Details at *string* in *string*.

Cause: An identical resource was already being monitored.

Action: Rename the resource and retry the operation.

CRS-05811: Failed to read ORA_CRS_HOME from environment. Details at *string* in *string*.

Cause: The ORA_CRS_HOME environment variable was not set correctly.

Action: This variable is set during CRS installation. If necessary, reinstall CRS.

CRS-05812: Could not get local hostname. Details at *string* in *string*.

Cause: The hostname could not be read.

Action: Check that the hostname for the local machine is valid. If the problem persists, contact Oracle Support Services.

CRS-05813: Could not change directory to '*string*'. Details at *string* in *string*.

Cause: The specified path is inaccessible to the agent process.

Action: Check that the specified path exists.

CRS-05814: Agent '*string*' started with invalid arguments. Details at *string* in *string*.

Cause: An invalid parameter was supplied to the agent.

Action: Contact Oracle Support Services.

CRS-05815: Agent '*string*' could not find any base type entry points for type '*string*'. Details at *string* in *string*.

Cause: Action entry points were not defined for this agent.

Action: No action necessary if this is a script agent. If this is not a script agent, define action points in your agent code.

CRS-05816: Agent '*string*' could not start implicit monitoring for resource '*string*'. Details at *string* in *string*.

Cause: The resource was currently disabled and hence could not be monitored.

Action: Enable the resource.

CRS-05817: Caught exception from user code for command '*string*'. Details at *string* in *string*.

Cause: An exception was thrown from the user code when an action entry point was called.

Action: This is due to an error in the agent user code. Modify the agent's code to resolve this.

CRS-05818: Aborted command '*string*' for resource '*string*'. Details at *string* in *string*.

Cause: Execution of the specified command was aborted due to a timeout.

Action: Restart the resource manually. If the problem persists, contact Oracle Support Services.

CRS-05819: Could not abort command '*string*' for resource '*string*'. Details at *string* in *string*.

Cause: Attempt to abort the specified command failed.

Action: Define an abort action entry point for the agent.

CRS-05820: Agent '*string*' failed to initialize server process address. Details at *string* in *string*.

Cause: Agent could not connect to the server process.

Action: Contact Oracle Support Services.

CRS-05821: Agent '*string*' is started with wrong user '*string*'. Details at *string* in *string*.

Cause: An incorrect owner was specified for the agent.

Action: Make sure CRSD has enough privileges to spawn programs as the value specified as the 'owner' in the ACL attribute.

CRS-05822: Agent '*string*' disconnected from server. Details at *string* in *string*.

Cause: Agent could not connect to server process.

Action: Contact Oracle Support Services.

CRS-05823: Could not initialize agent framework. Details at *string* in *string*.

Cause: Initialization of the agent failed.

Action: Contact Oracle Support Services.

CRS-05824: Could not initialize server connect string '*string*'. Details at *string* in *string*.

Cause: Incorrect server connect string was specified in the environment.

Action: Contact Oracle Support Services.

CRS-05825: Agent '*string*' is unresponsive and will be restarted. Details at *string* in *string*.

Cause: The specified agent did not respond and will be restarted automatically.

Action: None

CRS-05826: Agent '*string*' could not read environment variable '*string*'. Details at *string* in *string*.

Cause: The agent could not read a required environment variable.

Action: Contact Oracle Support Services.

CRS-05827: Could not find information for resource '*string*'. Details at *string* in *string*.

Cause: The specified resource was not found in the internal list of resources.

Action: Check the agent parameters and restart the resource manually.

CRS-05828: Could not start agent '*string*'. Details at *string* in *string*.

Cause: Creation of the agent process failed.

Action: Contact Oracle Support Services.

CRS-05829: Failed to get definition for resource '*string*'. Details at *string* in *string*.

Cause: The definition of the resource could not be determined.

Action: Delete the resource and add it again using the crsctl command.

CRS-05830: Invalid path '*string*' found for agent filename. Details at *string* in *string*.

Cause: The path that was specified for the agent was incorrect.

Action: Check that the path exists and is readable.

CRS-05831: Agent '*string*' has exceeded maximum failures and has been disabled. Details at *string* in *string*.

Cause: The specified agent has failed too many times.

Action: Contact Oracle Support Services.

CRS-05832: Agent '*string*' was unable to process commands. Details at *string* in *string*.

Cause: Agent was unable to process commands.

Action: Contact Oracle Support Services.

CRS-05833: Cleaning resource '*string*' failed as part of reboot-less node fencing

Cause: A resource 'clean' action associated with reboot-less node eviction encountered an error. This is an expected occurrence in most cases.

Action: None

CRS-05834: Resource '*string*' monitoring disabled due to repeated agent failures. Details at *string* in *string*.

Cause: A cluster resource was disabled because it was causing repeated agent failures.

Action: Restart the resource after resolving the problems with the agent.

CRS-05835: Agent version incapable of processing this command

Cause: A request encountered an older agent version that is not capable of processing that request.

Action: Upgrade the agent to the Clusterware version.

CRS-05836: Agent '*string*' version '*string*' cannot process command. Details at *string* in *string*.

Cause: A request encountered an older agent version that is not capable of processing that request.

Action: Upgrade the agent to the Clusterware version.

CRS-05837: Unable to open environment file '*string*'.

Cause: The environment file specified could not be opened.

Action: Verify that the filename, its location and its permissions are correct.

CRS-05838: Syntax error in environment file '*string*'.

Cause: The environment file specified did not have key value pairs in the correct format.

Action: Correct the key value format and retry. Consult the administration document for the correct format.

CRS-05839: The requested action '*string*' for the resource '*string*' on server '*string*' was aborted due to a timeout.

Cause: The timeout specified for a custom action was reached before the action could complete.

Action: Revise the timeout setting and retry the action.

CRS-05840: Agent '*string*' failed to start. Details at '*string*' in '*string*'.

Cause: The agent process failed to start.

Action: Review accompanying messages and alerts. If the problem persists, contact Oracle Support Services.

CRS-06001: User does not have permission to start CRSD.

Cause: Unable to start CRSD due to insufficient permissions.

Action: Start CRSD as a privileged user.

CRS-06007: Could not communicate with Event Manager.

Cause: Unable to communicate with Event Manager daemon.

Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.

CRS-06015: Oracle Clusterware has experienced an internal error. Details at *string* in *string*.

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-06016: Resource auto-start has completed for server *string*

Cause: CRS has completed startup of resources on the specified server.

Action: None

CRS-06017: Processing resource auto-start for servers: *string*

Cause: The blocking start of Oracle High Availability Services has updated its list of servers to process.

Action: None

CRS-06021: Could not set system resource limits for Clusterware: "*ulimit -string string*".

Cause: A ulimit command issued internally to set system resource limits failed.

Action: Ensure that the correct resource limit values are set in the user profile and limits.conf.

CRS-06022: Starting Oracle High Availability Services-managed resources

Cause: Oracle High Availability Services is attempting to start resources for the local server.

Action: None

CRS-06023: Starting Oracle Cluster Ready Services-managed resources

Cause: Oracle Cluster Ready Services is attempting to start resources for the cluster.

Action: None

CRS-06024: Completed start of Oracle Cluster Ready Services-managed resources

Cause: Oracle Cluster Ready Services has started resources for the cluster.

Action: None

CRS-06026: Stopping Oracle Cluster Ready Services

Cause: Oracle Cluster Ready Services was stopped on at least one server.

Action: None

CRS-06027: Starting Oracle Cluster Ready Services

Cause: Oracle Cluster Ready Services was started on at least one server.

Action: None

CRS-06028: Starting Oracle Cluster Ready Services-managed resources on server '*string*'

Cause: Oracle Cluster Ready Services has started managed resources on the specified server.

Action: None

CRS-06504: '*string*' cannot be specified as an attribute.

Cause: An effort was made to explicitly specify an attribute that cannot be specified by the user

Action: Remove the mentioned attribute, and re-issue the command.

CRS-06505: Format of the EXPRESSION attribute '*string*' is invalid

Cause: The EXPRESSION attribute is invalid.

Action: Provide a valid value for the EXPRESSION attribute. Msg 6506 continued in msg 6562

CRS-06530: cannot set node role because cluster is not configured in "flex" mode

Cause: An attempt to set a node's role using 'crsctl set node role' was rejected because the cluster is not running in "flex" mode. Node roles can only be set for nodes in "flex" clusters.

Action: Reissue the command after the cluster is configured in "flex" mode."

CRS-06531: Issued command is not supported in this version of CRS.

Cause: The command was rejected because the related feature is not supported in this release.

Action: If this error occurred during rolling upgrade, wait for the upgrade to finish. Otherwise, upgrade to the required release or higher. Msg 6532 continued in msg 6566

CRS-06535: Cannot restart resource '*string*' as a part of a dependency because the auto start capability of this resource has been disabled.

Cause: An attempt was made to start a resource due to a dependency requirement, but the resource could not be started automatically because the auto start capability of this resource was disabled.

Action: Enable auto start for the resource.

CRS-06538: Could not set the cluster type to '*string*'. The cluster type has already been set.

Cause: An attempt was made to change the cluster type, which has already been set. The cluster type can only be set once.

Action: Restart the cluster to reset its type.

CRS-06573: cannot set node role because GNS is not configured in the cluster

Cause: An attempt to set a node's role using 'crsctl set node role' was rejected because the cluster was not configured with GNS. Node roles can only be set to leaf if GNS is configured.

Action: Reissue the command after configuring GNS in the cluster.

CRS-06581: Node '*string*' does not belong to any site.

Cause: An attempt to query a node failed because the indicated name did not belong to any site.

Action: Issue the command 'olsnodes' to retrieve the list of the nodes in the cluster.

CRS-06583: Disk '*string*' does not belong to any site.

Cause: An attempt to query a disk failed because no disk with the indicated name could be found on any site.

Action: Issue the command 'asmcmd lsdisk' to retrieve the list of the disks in the cluster.

CRS-06592: Site '*string*' cannot be added, deleted or quarantined because the cluster is not operating in extended mode.

Cause: An attempt to add, delete or quarantine a site was rejected because the cluster was not operating in extended mode.

Action: Reconfigure the cluster in extended mode.

CRS-06593: Site '*string*' cannot be deleted because the site still has nodes.

Cause: An attempt to delete a site was rejected because there were nodes present on that site.

Action: Delete the cluster nodes from the site before deleting the site.

CRS-06594: Site '*string*' cannot be deleted because the site still has disks.

Cause: An attempt to delete a site was rejected because there were disks present on that site.

Action: Delete the disks from the site before deleting the site.

CRS-06599: cannot set the node's role to Leaf on an extended cluster

Cause: An attempt to set a node's role to Leaf was rejected because the cluster was configured as an extended cluster where only Hub Nodes were supported.

Action: None

CRS-06602: No password specified.\n

Cause: A password was not entered in response to the password prompt.

Action: Enter a password.

CRS-06603: Cannot modify '*string*' policy.

Cause: An attempt was made to modify a read-only policy.

Action: Specify a policy that is not read-only.

CRS-06705: Oracle Clusterware Release Version ('*string*') does not match Software Version ('*string*'). Oracle Clusterware cannot be started.

Cause: Oracle Clusterware was started from an older home that has since been upgraded.

Action: Start Oracle Clusterware from the upgraded home. Also, check the CRS home configured in `olr.loc` and the `/etc/init.d/ohasd` script to make sure they have not been accidentally changed.

CRS-06706: Oracle Clusterware Release patch level ('*number*') does not match Software patch level ('*number*'). Oracle Clusterware cannot be started.

Cause: Oracle Clusterware was started from an older home that has since been patched.

Action: Start Oracle Clusterware from the patched home. Also, check the CRS home configured in `olr.loc` and the `/etc/init.d/ohasd` script to make sure they have not been accidentally changed.

CRS-06707: init.ohasd is not running.

Cause: Oracle High Availability Services startup failed because there was no `init.ohasd` running.

Action: 1. Check the run level to ensure that you are in the correct runlevel using `cluvfy` ("`cluvfy stage -pre crsinst -n nodelist`"); 2. If the run level is correct, diagnose the reason for `init.d` not starting `init.ohasd`.

CRS-06749: unable to get the software version

Cause: The `crsctl` query failed because the software version could not be retrieved. Either the clusterware stack was down, or the user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack or run the query as a privileged user.

CRS-06750: unable to get the active version

Cause: The `crsctl` query failed because the active version could not be retrieved. Either the clusterware stack was down, or the user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack or run the query as a privileged user.

CRS-06751: unable to get the software patch version

Cause: The `crsctl` query failed because the software patch version could not be retrieved. Either the clusterware stack was down, or the user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack or run the query as a privileged user.

CRS-06752: Active version query failed.

Cause: The crsctl query failed because the active version could not be retrieved.

Action: See the accompanying error message and respond.

CRS-06753: Software patch query failed.

Cause: The crsctl query failed because the software patch version could not be retrieved.

Action: See the accompanying error message and respond.

CRS-06754: Software version query failed for node *string*.

Cause: The crsctl query failed to retrieve the software version.

Action: See the accompanying error message and respond.

CRS-06761: Invalid value for QoS Management policy management key '*string*' in OCR.

Cause: An invalid value for Quality of Service Management policy management key was found in the OCR.

Action: Contact Oracle Support Services.

CRS-06762: Unable to use CRCTL for Policy Management because Quality of Service Management (QoS) is managing the Clusterware policies.

Cause: CRCTL cannot be used for Policy Management because Quality of Service Management is configured to manage Clusterware policies.

Action: Use Quality of Service Management for Policy Management.

CRS-06763: Maximum size specified for the cluster activity log is non-numeric.

Cause: A non-numeric value was specified for the maximum size of the cluster activity log.

Action: Specify a maximum size that is a numeric value. Msg 6764 continued in msg 6568

CRS-06771: An invalid value was specified for argument *string*.

Cause: Invalid values were specified on the command line for the argument.

Action: Provide a positive non-zero integer value for the mentioned argument.

CRS-06773: Value out of range for argument *string*.

Cause: An attempt to modify trace file options specified a value out of range. Either the value for the -filesize keyword was less than 1MB or greater than 2GB or the value for the -numsegments keyword was greater than 4294967295.

Action: Specify a valid value for the identified keyword and retry the command.

CRS-06775: Daemon *string*: Get trace file options request failed.

Cause: An unexpected internal error occurred.

Action: Contact Oracle Support Services.

CRS-06776: Daemon *string*: Set trace file options request failed.

Cause: An unexpected internal error occurred.

Action: Contact Oracle Support Services.

CRS-06777: The command '*string*' cannot be used for entity names starting with 'ora.'

Cause: An attempt was made to use an unsupported entity name in CRSCTL.

Action: Provide an entity name that does not start with 'ora.'

CRS-06782: Retention time specified for the cluster activity log is non-numeric.

Cause: A non-numeric value was specified for the retention time of the cluster activity log.

Action: Specify a retention time in hours that is numeric.

CRS-06783: cannot set the node's role to Leaf on a *string*

Cause: An attempt to set a node's role to Leaf was rejected because the cluster configuration supports only Hub nodes.

Action: None

CRS-06797: operation not supported for daemon '*string*', which has a fixed port number

Cause: An attempt to set the port number for the indicated daemon was rejected because the daemon has a fixed, well-known port number.

Action: None. Do not attempt to set port numbers for daemons with pre-set port numbers.

CRS-06798: Port number *number* is already being used by some other daemon.

Cause: An attempt to assign the indicated port number to a daemon was rejected because the port number was already in use.

Action: Retry the operation specifying a port number that is not in use.

CRS-06799: operation not allowed because it is not fixed-port environment

Cause: An attempt to set the port number for a daemon was rejected because it was not a fixed-port environment.

Action: Enable fixed-port and try setting the port number.

CRS-06802: Either TLS Cipher Suite *string* is invalid or last in active cipher list

Cause: An attempt to add/delete cipher in disabled list was rejected because either it is invalid cipher or it is the only cipher remaining cipher which can be used for TLS Handshake.

Action: check if cipher is correct. If cipher is correct then please delete at least one cipher from denied list.

**CRS-06900: Autorecover successfully resolved *string*. Details at *string*, *string*.
ln**

Cause: Autorecover automatically identified and resolved the indicated problem.

Action: If there is a real bug, then contact Oracle Support Services with the indicated details.

**CRS-06901: Autorecover failed to resolve problem *string*. Details at *string*, *string*.
ln**

Cause: Autorecover could not resolve the indicated problem.

Action: Contact Oracle Support Services with the indicated details.

CRS-06902: Autorecover detected memory leak. Process *string* terminated. Details at *string, string.ln*

Cause: Autorecover detected and corrected a process leaking memory.

Action: None

CRS-06903: Autorecover issued a stop for primary CRSD on node *string*. Details at *string, string.ln*

Cause: Autorecover detected and corrected a malfunctioning primary Cluster Ready Services daemon(CRSD).

Action: None

CRS-06904: Autorecover issued a start for Oracle ASM listener resource instance *string*. Details at *string, string.ln*

Cause: Autorecover detected and attempted to fix the state of an Oracle Automatic Storage Management(Oracle ASM) listener instance.

Action: None

CRS-06905: Autorecover detected a problem *string* in observer mode. Details at *string, string.ln*

Cause: Autorecover noticed the problem in observer mode.

Action: Process the 'crsctl set autorecover *problem* enabled' command to allow autorecover to automatically remedy this problem.

CRS-07000: Generic GPnP success

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07001: Generic GPnP error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07002: Not enough memory

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07003: GPnP facility initialization failed

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07004: This feature is unsupported or not implemented

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07005: Requested item not found

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07006: Insufficient buffer size

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07007: Error in file I/O operation

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07008: Invalid permissions for the operation

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07009: Bad authority id

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07010: Key does not exist

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07011: Bad key

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07012: Hostname not found

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07013: Grid Plug and Play Daemon(GPNPD) daemon is not running

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07014: Attempting to set a bad value

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07015: Bad hostname value

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07016: Bad authority id value

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07017: Not a cluster member

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07025: Duplicate profile

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07026: Profile is not given or not available

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07027: Badly formed profile

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07028: Profile is too big to be valid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07029: Profile is older than the current

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07030: Profile exists in memory only, not saved

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07031: Request retry message from Grid Plug and Play Daemon(GPNPD)

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07032: Value already set in profile

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07040: Generic XML error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07041: GPnP XML profile is not well formed

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07047: Communication timeout

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07053: Resource discovery error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07056: OCR Init error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07057: Reinit OCR to a different bootlevel

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07058: OCR error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07065: GPnP wallet error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07066: Requested GPnP wallet is not found

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07067: Invalid GPnP wallet password given

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07068: GPnP wallet is too big to be valid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07069: GPnP wallet is corrupted or invalid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07070: Bad or missing private key in GPnP wallet

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07071: Bad or missing public key in GPnP wallet

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07076: Failed to init crypto libraries

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07085: GPnP profile unsigned

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07086: GPnP profile signature invalid

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07087: GPnP profile valid peer signature

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07088: GPnP profile valid PA signature

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07089: GPnP profile was signed with a different wallet

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07090: Grid Naming Service (GNS) error

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07095: GPnP tool usage

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07096: GPnP tool version

Cause: This is an internal error.

Action: Contact Oracle Support Services.

CRS-07098: Grid Plug and Play (GPnP) daemon or GPnP tool failed to export the GPnP wallets from credential storage to file system '*string*'.

Cause: The reason for this issue was one of the following: - GPnP lock file <ORACLE_BASE>/crsdata/HOST/gpnp/fswallet.lck was missing. - An Internal error occurred.

Action: (a) If GPnP lock file <ORACLE_BASE>/crsdata/HOST/gpnp/fswallet.lck is missing, then: - An external process deleted the GPnP lock file. - Stop Oracle Grid Infrastructure stack, create the GPnP lock file and start Oracle Grid Infrastructure stack will export the GPnP wallets from credential storage to file system. (b) If GPnP lock file is not missing, then Contact Oracle Support Services for internal errors.

CRS-07500: The Oracle Grid Infrastructure process '*string*' failed to establish Oracle Grid Interprocess Communication (GIPC) high availability connection with remote node '*string*'.

Cause: The reason for this issue was one of the following: - Multicast interfaces were not working as expected and, therefore, the GIPC daemon on the local node failed to establish the GIPC high availability bootstrap connection with the remote node GIPC daemon. - The GIPC daemon failed to start on either the local node or the remote node. - The firewall configuration was preventing communication between the two nodes.

Action: (a) Execute the cluvfy binary on the local node and check the multicast functionality between the local node and the remote node. (b) If multicast is working fine, then check the status of the GIPC daemon on both of the nodes. Check the alert log on both of the nodes for GIPC daemon issues. (c) Execute the cluvfy binary on the local node and check the transmission control protocol/user datagram protocol (TCP/UDP) connectivity between the local node and the remote node.

CRS-07501: The Oracle Grid Infrastructure process '*string*' does not have enough permissions to open the shared memory file <ORACLE_BASE>/crsdata/*string*/shml/*string.**

Cause: The reason for this issue was one of the following: - The user running this process does not have permissions to open the shared memory file. - The shared memory file permissions were not correct.

Action: (a) Check the status of the Oracle Grid Interprocess Communication (GIPC) daemon and check the existence of GIPC daemon shared memory file. (b) If the GIPC daemon is online and if the GIPC daemon shared memory file exists, then check the file permissions of the GIPC daemon shared memory file. If the permissions are not set correctly, investigate to determine the reason. (c) Check the user that is running the process has the access rights.

CRS-07502: The Oracle Grid Infrastructure process '*string*' failed to open the shared memory file <ORACLE_BASE>/crsdata/*string*/shml/*string.**

Cause: The reason for this issue was one of the following: - The Oracle Grid Interprocess Communication (GIPC) daemon failed to start. - The GIPC daemon shared memory was deleted accidentally.

Action: (a) If the GIPC daemon is not online, then investigate to determine the reason and try to start GIPC daemon using 'crsctl start res ora.gipcd -init' command. (b) If the GIPC daemon is online, but the shared memory file does not exist, then: - An external process deleted the GIPC daemon shared memory file. - Restarting the Oracle Grid Infrastructure stack restarts the GIPC daemon and, upon GIPC daemon restart, the shared memory file is re-created.

CRS-07503: The Oracle Grid Infrastructure process '*string*' observed communication issues between node '*string*' and node '*string*', interface list of local node '*string*' is '*string*', interface list of remote node '*string*' is '*string*'.

Cause: The reason for this issue was one of the following: - All the private interconnects were down either on the local node or on the remote node. - The firewalls were configured incorrectly. - The remote node went down abruptly. - The process on the remote node was hung.

Action: (a) Check the status of private interconnects on both the nodes. (b) Execute the cluvfy binary and check the transmission control protocol/user datagram protocol (TCP/UDP) connectivity between the local node and the remote node. (c) Check if the process on the remote node is running. (d) Check if the Oracle Grid Interprocess

Communication (GIPC) high availability threads of the remote process are running. (e) Check for the scheduler issues on the local node and the remote node.

**CRS-07504: Insufficient space on the disk for creating the shared memory file.
Additional diagnostics: shared memory file size: 'number' bytes.**

Cause: The Oracle Grid Interprocess Communication (GIPC) daemon failed to create the shared memory map file because of lack of disk space.

Action: Increase the disk space and restart the GIPC daemon. - On AIX the shared memory map file will be created at "/etc/oracle/maps/", increase the disk space on which the directory "/etc/oracle/maps" is mounted - On LINUX, HPUX, and SOLARIS operating systems the shared memory file will be created at "<ORACLE_BASE>/crsdata/hostname/shm/", increase the disk space on which the directory "<ORACLE_BASE>/crsdata/hostname/shm/" is mounted.

CRS-07505: Bootstrap connection with node 'string' considered dead because of idle connection.

Cause: The local bootstrap process did not receive any messages from the peer bootstrap process in the last 10 minutes. The reason for this issue was one of the following: - All the private interconnects were down either on the local node or on the remote node. - The bootstrap process on the remote node went down abruptly. - The bootstrap process on the remote node was hung. - The network had issues.

Action: (a) Check the status of the private interconnects on both nodes. (b) Check if the process on the remote node is running. (c) Check if the Oracle Grid Interprocess Communication (GIPC) high availability threads of the remote process are running. (d) Execute the cluvfy binary and check the transmission control protocol/user datagram protocol (TCP/UDP) connectivity between the local node and the remote node.

CRS-07506: Failed to establish bootstrap connection with node 'string'

Cause: The reason this issue was one of the following: - All the private interconnects were down either on the local node or on the remote node. - The bootstrap process on the remote node was not running. - The process on the remote node was hung. - The network had issues. - There were multicast issues either on the local node or on the remote node.

Action: (a) Check the status of the private interconnects on both nodes. (b) Check if the process on the remote node is running. (c) Check if the Oracle Grid Interprocess Communication (GIPC) high availability threads of the remote process are running. (d) Execute the cluvfy binary and check the transmission control protocol/user datagram protocol (TCP/UDP) connectivity between the local node and the remote node. (e) Execute the cluvfy binary on the local node and check the multicast functionality between the local node and the remote node.

CRS-07507: The Oracle Grid Interprocess Communication daemon process failed to create its LISTEN endpoint.

Cause: The possible reason for this issue was that either the 'root' certificate or 'subordinate' certificate were not configured correctly.

Action: Check if the root certificate and subordinate certificates are configured correctly.

CRS-07508: The Oracle Grid Interprocess Communication (GIPC) high availability 'worker thread' is not scheduled correctly on 'string' process.

Cause: The reason for this issue was one of the following: - The system was heavily loaded. - The operating system scheduler had issues.

Action: Reduce the load on the system or add a new node to the existing cluster.

CRS-07509: The 'worker thread' of Oracle Grid Interprocess communication (GIPC) has been non-responsive for '*number*' milliseconds. Additional diagnostics: process name: '*string*'.

Cause: The reason for this issue was one of the following: - The 'worker thread' was not scheduled by the operating system in a timely manner. - The 'worker thread' Oracle Grid Interprocess Communication (GIPC) was hung.

Action: (a) Check if the 'worker thread' of Oracle Grid Interprocess Communication (GIPC) is hung. (b) Reduce the load on the system or add a new node to the existing cluster, if the system is heavily loaded.

CRS-07510: The 'daemon thread' of Oracle Grid Interprocess communication (GIPC) has been non-responsive for '*number*' milliseconds. Additional diagnostics: process name: '*string*'.

Cause: The reason for this issue was one of the following: - The 'daemon thread' was not scheduled by the operating system in a timely manner. - The 'daemon thread' of Oracle Grid Interprocess Communication (GIPC) was hung.

Action: (a) Check if the 'daemon thread' of Oracle Grid Interprocess Communication (GIPC) is hung. (b) Reduce the load on the system or add a new node to the existing cluster, if the system is heavily loaded.

CRS-07511: There is a delay of more than '*number*' milliseconds in processing the Oracle Grid Infrastructure process requests by the 'worker thread' of Oracle Grid Interprocess Communication(GIPC). Additional Diagnostics: number of messages delayed '*number*'

Cause: The reason for this issue was one of the following: - The 'worker thread' was not scheduled by the operating system in a timely manner. - The system was heavily loaded. - The 'worker Thread' was busy in handling other requests.

Action: (a) Reduce the load on the system or add a new node to the existing cluster, if the system was heavily loaded. (b) Check if the 'worker Thread' is busy in handling other requests.

CRS-07512: There is a delay or more than '*number*' milliseconds in reading the received messages. Additional Diagnostics: number of messages delayed '*number*'

Cause: The reason for this issue was one of the following: - The Oracle Grid Infrastructure process was not scheduled by the operating system in a timely manner. - The system was heavily loaded. - The Oracle Grid Infrastructure process did not handle the Grid Interprocess Communication (GIPC) events in a timely manner.

Action: (a) Reduce the load on the system or add a new node to the existing cluster, if the system is heavily loaded. (b) Check if the process is busy in handling other requests.

CRS-07513: The domain socket file '*string*' or its associated lock file is deleted.

Cause: The reason for this issue was one of the following: - A privileged user process incorrectly or accidentally deleted the domain socket file.

Action: Check which process deleted the domain socket file.

CRS-07514: The deleted domain socket file '*string*' and its associated lock file is restored.

Cause: The Oracle Grid Interprocess Communication (GIPC) restored the deleted domain socket file and its associated lock file.

Action: No Action required, this is Oracle internal recovery mechanism.

CRS-07515: The Oracle Grid Interprocess Communication (GIPC) observed high network traffic. Additional diagnostics: remote node name: 'string', number of messages sent to remote node: 'number', time lapsed since high traffic start: 'number' milliseconds.

Cause: The system was heavily loaded.

Action: No action required, this is Oracle internal diagnostics.

CRS-07516: The Oracle Grid Interprocess Communication (GIPC) failed to allocate memory 'number'.

Cause: Memory allocation failure occurred due to lack of memory space or the shared memory corruption.

Action: Report this error to Oracle Support Services.

CRS-07517: The Oracle Grid Interprocess Communication (GIPC) failed to identify the Fast Node Death Detection (FNDD).

Cause: Disabled Fast Node Death Detection (FNDD) occurred due to initialization failures or feature was not available.

Action: Report this error to Oracle Support Services, if Fast Node Death Detection supposed to be available.

CRS-07518: Fast node death detection (FNDD) reporting node 'string' is unreachable.

Cause: Either there was a physical network connectivity issue between the remote node and local node or the remote node was rebooted.

Action: If an unreachable node is not expected, contact Oracle Support Services.

CRS-07519: The Oracle Cluster Synchronization Services daemon (CSSD) is forcing node reachability checks continuously. In the last 'number' milliseconds, it sent force reachability checks 'number' times.

Cause: Either there was a physical network connectivity issue between the remote node and the local node or the remote node was rebooted.

Action: No action required, this is Oracle internal diagnostics.

CRS-08000: unable to obtain local host name for reboot advisory log file scan

Cause: An attempt to retrieve the local host name failed. The scan for reboot advisory files will not use host name criteria and so may report occurrences for other nodes as well as this one.

Action: Report this error to Oracle Support Services.

CRS-08001: an error occurred accessing reboot advisory log file location: string

Cause: The scan for reboot advisory log files was unable to access the indicated file system location. The location was skipped, so any reboot advisory files that it contains will not be reported. This message is accompanied by CLSU- messages containing details of the access error.

Action: Respond based on the error described by the accompanying CLSU- messages. This may involve re-creating the directory or changing its permissions.

CRS-08002: an error occurred searching reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files was unable to read the next file name from the indicated file system location. No further processing of reboot advisory files from that location occurs. This message is accompanied by CLSU- messages containing details of the access error.

Action: Respond based on the error described by the accompanying CLSU- messages.

CRS-08003: reboot advisory log file: *string* is unexpectedly empty

Cause: The scan for reboot advisory log files encountered a file that was empty. This might happen (rarely) if a component is initializing its use of reboot advisory at the same time the scan is running. Processing of other files in the location continues.

Action: Frequent occurrence of this message should be reported to Oracle Support Services.

CRS-08004: an error occurred reading reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced a read error on a reboot advisory file. No further processing is done for that file, but the scan continues with other files. This message is accompanied by CLSU- messages containing details of the read error.

Action: Respond based on the accompanying CLSU- messages.

CRS-08005: an error occurred closing reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced a close error on a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the close error.

Action: Report this error to Oracle Support Services.

CRS-08006: an error occurred opening reboot advisory log file: *string*

Cause: The scan for reboot advisory log files experienced an error when it opened a reboot advisory file. The scan continues with other files. This message is accompanied by CLSU- messages containing details of the open error.

Action: If the error indicated in the accompanying CLSU- messages is one that can be corrected, do so. Otherwise, report this error to Oracle Support Services.

CRS-08007: an error occurred closing reboot advisory log file location: *string*

Cause: The scan for reboot advisory log files experienced an error when it closed the indicated file system location. Processing of other reboot advisory locations (if any) continues normally. This message is accompanied by CLSU- messages containing details of the close error.

Action: Report this error to Oracle Support Services.

CRS-08008: *string*

Cause: Operating system error data related to reboot advisory file processing was returned. The error data is packaged in a CLSU- message that follows "CRS-08008:". One or more of these messages appears after a message announcing the error condition.

Action: Look up the embedded CLSU- message for an explanation of the operating system error data. If there is no CLSU- message ID present, contact Oracle Support Services.

CRS-08009: reboot advisory log file: *string* contains invalid data (length *number*, error code *number*)

Cause: A reboot advisory log record read from the indicated file contained incorrect data.

Action: Report this error to Oracle Support Services.

CRS-08010: invalid network reboot advisory message detected (length *number*, error code *number*)

Cause: A reboot advisory record received over the network was improperly formed or contained incorrect data.

Action: Report this error to Oracle Support Services.

CRS-08011: reboot advisory message from host: *string*, component: *string*, with time stamp: *string*

Cause: A reboot advisory message was detected. During Oracle Clusterware startup on a given host, messages recently written to disk on that host before a reset or reboot are detected and announced. Subsequently, network reboot advisory messages may be announced as they occur. These are reported by hosts other than the one being reset or rebooted. This message is accompanied by other messages containing details on what led to the reset or reboot. The time stamp in this message begins with either 'U' (denoting UTC time) or 'L' (denoting local time as viewed by the issuing host). Note that a given reset or reboot event can produce multiple occurrences of these messages on multiple hosts in the cluster.

Action: Use the reboot advisory message(s) to determine why Oracle Clusterware caused a reset or reboot of the affected host, and respond accordingly. Refer to the discussion of reboot advisories in the Oracle Clusterware administration documentation for additional guidance.

CRS-08012: reboot advisory message from a higher Oracle Clusterware version detected

Cause: A reboot advisory message from a higher version installation of Oracle Clusterware was detected. This is an expected occurrence with network reboot advisories when there are nodes with a higher Oracle Clusterware version than this node (such as during an upgrade). It is an unexpected condition with file reboot advisories.

Action: The reboot advisory message is displayed in a following CRS-08013 message in a "raw" text form. In the case of network reboot advisories, the explanatory message text should be readable and useful to determine the cause of the node reboot. If the reboot advisory message is from a file, report this message to Oracle Support Services.

CRS-08013: reboot advisory message text: *string*

Cause: An explanatory text message associated with a reboot advisory announced in a preceding CRS-08011 or CRS-08012 message was displayed. These text messages are always written in US English locale.

Action: Refer to the descriptions of messages CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08014: reboot advisory binary data (*number bytesstring*) follows:

Cause: Binary data associated with a reboot advisory message was displayed. It is followed by one or more lines of CRS-08015 message containing the binary data formatted in

hexadecimal. If an asterisk appears inside the parentheses, an invalid data length was detected.

Action: Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08015: *number string*

Cause: Hexadecimal display of binary data included in a reboot advisory log message was displayed. The first number is an offset and is followed by up to 16 bytes of data.

Action: Refer to the description of message CRS-08011 and -08012, and to the Oracle Clusterware documentation on reboot advisories.

CRS-08016: an error occurred determining the location for reboot advisory log files

Cause: The search for reboot advisory log files was unable to determine the file system location used for those files. Processing of reboot advisory files is skipped. This message is accompanied by CLSU- messages containing failure details. This is an internal error.

Action: Report this error to Oracle Support Services.

CRS-08017: location: *string* has *number* reboot advisory log files, *number* were announced and *number* errors occurred

Cause: This summary message is written during Oracle Clusterware startup if one or more reboot advisory log files was found and examined.

Action: This message is informational, but if the error count is nonzero the associated messages (earlier in the alert log) should be examined.

CRS-08018: warning: missing cluster identity data for reboot advisory message validation

Cause: During Oracle Clusterware start up, an attempt to obtain the identity of the cluster failed. Processing continues normally, but network reboot advisories from nodes in other clusters may be reported in this cluster's alert log.

Action: Report this error to Oracle Support Services.

CRS-08019: warning generated by the initialization of the reboot advisory in the CSS agent, *string*

Cause: During initialization of the reboot advisory, a warning was generated

Action: Report this warning to Oracle Support Services.

CRS-08020: error generated by the initialization of the reboot advisory in the CSS agent, *string*

Cause: During initialization of the reboot advisory, an error was generated.

Action: Report this error to Oracle Support Services.

CRS-08216: Invalid rejection code received from policy engine: *string*. Contact Oracle Support Services for more help.

Cause: CRCTL client received an invalid rejection code.

Action: Report the accompanying warning to Oracle Support Services.

CRS-08271: invalid flag or combination of flags given for the 'eval' command

Cause: The 'crsctl eval' command was executed with an invalid combination of flags.

Action: Reexecute the command with a valid combination of flags.

CRS-08273: The specified server '*string*' is already a part of the cluster.

Cause: An attempt to evaluate the addition of a server using the 'crsctl eval add server' command was rejected because the indicated name provided specified a server that was already a member of the cluster.

Action: Retry the command with the correct name of a server that is not already a member of the cluster.

CRS-08274: This evaluation did not generate any actions.

Cause: The execution of an 'eval' command indicated that the subsequent execution of the candidate command would not result in CRS actions affecting the configuration or resources managed by Oracle Clusterware.

Action: None

CRS-08500: Oracle Clusterware *string* process is starting with operating system process ID *string*

Cause: The indicated service or component of Oracle Clusterware began execution.

Action: None

CRS-08501: Oracle Clusterware *string* process with operating system process ID *string* is ending with return value *number*

Cause: The indicated service or component of Oracle Clusterware ended execution.

Action: None

CRS-08502: Oracle Clusterware *string* process with operating system process ID *string* failed in initialization

Cause: The indicated service or component of Oracle Clusterware was unable to complete initialization.

Action: Report this error to Oracle Support Services.

CRS-08503: Oracle Clusterware process *string* with operating system process ID *string* experienced fatal signal or exception code *string*.

Cause: The indicated service or component of Oracle Clusterware encountered a fatal exception.

Action: Report this error to Oracle Support Services.

CRS-08504: Oracle Clusterware *string* process with operating system process ID *string* is exiting

Cause: The indicated service or component of Oracle Clusterware ended execution using the operating system 'exit' function.

Action: None

CRS-08505: Oracle Clusterware *string* process with operating system process ID *string* encountered internal error *string-number*

Cause: The indicated service or component of Oracle Clusterware encountered an internal error, causing an ADR incident to be raised.

Action: Contact Oracle Support Services and report the internal error code displayed in the message.

CRS-08506: internal error code, arguments: [string], [string], [string], [string], [string], [string], [string], [string], [string]

Cause: This is the generic internal error number for Cluster Ready Services (CRS) program exceptions. This indicated that a process encountered a low-level, unexpected condition.

Action: An incident has been created for this error in the Automatic Diagnostic Repository (ADR). When logging a service request, use the Incident Packaging Service (IPS) from the Support Workbench or the ADR Command Interpreter (ADRCI) to automatically package the relevant trace information. The following information should also be gathered to help determine the root cause: - Changes leading up to the error. - Events or unusual circumstances leading up to the error. - Operations attempted prior to the error. - Conditions of the operating system and databases at the time of the error. Note: The cause of this message may manifest itself as different errors at different times. Be aware of the history of errors that occurred before this internal error.

CRS-08507: soft internal error, arguments: [string], [string], [string], [string], [string], [string], [string], [string]

Cause: There was an internal inconsistency that did not crash a process.

Action: Report this as a bug.

CRS-09000: Failed to allocate memory.

Cause: During initialization, memory could not be allocated.

Action: Report this error to Oracle Support Services.

CRS-09001: Internal Error

Cause: An internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09003: Cluster Health Monitor is not supported in this configuration.

Cause: Grid Infrastructure Management Repository was not configured.

Action: Re-Install Grid Infrastructure and ensure that Grid Infrastructure Management Repository is configured.

CRS-09004: Error reading from standard input

Cause: Could not read commands from the command line.

Action: Report this error to Oracle Support Services.

CRS-09005: Quoted string not ended

Cause: An unmatched " was found in the command entered.

Action: Put in the corresponding quote or remove the unmatched quote.

CRS-09006: Could not set environment, exiting.

Cause: Error occurred during initialization of oclumon.

Action: Report this to Oracle Support Services.

CRS-09007: failed to contact 'osysmond' daemon

Cause: An attempt to get cluster mode was unable to contact the 'osysmond' daemon.

Action: Ensure that the ora.crf resource is running and, if not, start it.

CRS-09008: Unknown verb string

Cause: Unknown or invalid verb passed to oclumon.

Action: Use 'oclumon -h' in command line or help command in interactive mode to see the supported verbs.

CRS-09009: Error string: Parsing error. Invalid arguments specified.

Cause: Invalid or unknown arguments passed.

Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09010: Error string: mandatory data not supplied

Cause: Mandatory data not supplied to the command.

Action: Refer to product documentation or to command online help for an explanation of verbs and arguments.

CRS-09011: Error string: Failed to initialize connection to the Cluster Logger Service

Cause: Error occurred while connecting to the Cluster Logger Service.

Action: Ensure that Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the given node.

CRS-09012: Error string: Error sending query to the Cluster Logger Service

Cause: Error occurred while sending query to the Cluster Logger Service.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the specified node.

CRS-09013: Error string: Invalid data received from the Cluster Logger Service

Cause: Invalid or unknown data received from the Cluster Logger Service.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the specified node.

CRS-09014: Error: Corrupt reply from the Cluster Logger Service

Cause: Invalid or unknown data received from the Cluster Logger Service.

Action: Make sure that the version of both master and client installation is same. Also, check the connectivity between master and client using the 'ping'.

CRS-09017: Error: Invalid or unknown reply received from the Cluster Logger Service

Cause: Error occurred in the data received.

Action: Make sure that the version of both master and client installation is same. Also, check the connectivity between master and client.

CRS-09018: Error string: No arguments supplied

Cause: No argument was supplied with the command.

Action: Some commands need arguments with them. Refer to the product documentation or to the online help display.

CRS-09019: Error string: No parameter string supported

Cause: A wrong parameter was passed with the command.

Action: Refer to the command help and pass the correct parameters.

CRS-09020: Error string: No master node name specified

Cause: The master node name was not specified in the command.

Action: Pass the appropriate master node name with the command.

CRS-09021: Error string: Invalid or no start time specified

Cause: A start time was not specified or the time was passed in the wrong format.

Action: Pass the correct start time. For correct format, refer to command help.

CRS-09022: Error string: Invalid or no end time specified

Cause: A end time was not specified or the time was passed in the wrong format.

Action: Pass the correct end time. For correct format, refer to command help.

CRS-09023: Error string: Time not specified or in wrong format or invalid

Cause: Time was not specified or was invalid.

Action: Pass the correct and valid time. For correct format, refer to command help.

CRS-09024: Error string: No node name specified

Cause: Node name not specified.

Action: Provide a node name in the command. Refer to the product documentation or to the command online help for information.

CRS-09025: Error string: No disk ID name specified

Cause: Disk ID was not specified in the command with -diskid.

Action: Pass a valid disk ID with -diskid option.

CRS-09026: Error string: No parameter specified

Cause: The parameter was not specified in the query.

Action: Pass appropriate parameter for query. Refer to the product documentation or to the command online help for information.

CRS-09027: Error string: Parameter string is not supported with this verb

Cause: Invalid or unknown parameter passed.

Action: Pass the correct parameter. Refer to the product documentation or to the command online help for information.

CRS-09028: Error string: No NIC ID specified

Cause: NIC ID was not specified in the command with -nicid.

Action: Pass a valid NIC ID with -nic option.

CRS-09029: Error string: No PID specified

Cause: PID was not specified in the command with -pid.

Action: Pass a valid PID with -pid option.

CRS-09030: Error string: No region specified

Cause: Incorrect or no region specified with -c option.

Action: Pass a valid region with -c option. Refer to the product documentation or to the command online help for information.

CRS-09031: Error string: Argument string not supported with this verb

Cause: Unknown or invalid argument passed with the command.

Action: Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09032: Invalid hour specified in the time argument

Cause: Invalid hour in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09033: Invalid minutes specified in the time argument

Cause: Invalid minutes in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09034: Invalid seconds specified in the time argument

Cause: Invalid seconds in the time string was passed.

Action: Pass a valid time string in accordance with the format. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09035: Arguments not in proper format, or invalid arguments

Cause: Invalid arguments specified.

Action: Pass a valid verb and correct arguments for it. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09036: Invalid Cluster Health Monitor repository size specified

Cause: Non-numeric value or value out of range specified for Cluster Health Monitor repository size.

Action: Specify Cluster Health Monitor repository size in the valid range. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09037: string Error: Node name not specified. -disk, -nic or -proc need node name

Cause: The required node name was not specified for -disk, -nic or -proc.

Action: Provide a node name with -n option. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09038: Error: -s and -e need to be specified together

Cause: Either -s or -e is missing.

Action: Start and end time need to be specified together for range queries, which cannot be unbounded. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09039: Error string: -i is not allowed with the range query

Cause: The -i option was specified on a oclumon range query.

Action: Use -i only in continuous mode. Refer to the command inline help or product documentation for more information.

CRS-09040: Error string: Band value not specified or incorrect

Cause: The band value was not specified with -t option or was invalid.

Action: Provide a valid band value. Refer to the product documentation or to the command online help for information on supported arguments..

CRS-09041: Error string: The -repos argument was specified without an option.

Cause: -repos was not specified with the option, generating a parsing error.

Action: Provide a valid option to -repos. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09042: Error string: No size specified with 'checkretentiontime'

Cause: A valid value was not specified with 'checkretentiontime'.

Action: Provide a valid numerical value with 'checkretentiontime'. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09043: Error string: Non-numeric or invalid value for size: string

Cause: An invalid or non-numeric value was specified for size.

Action: Provide a valid numeric size. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09044: No key specified with -getkey

Cause: An option was not specified with -getkey.

Action: Provide a valid key as an option with -getkey.

CRS-09045: No key specified for -get

Cause: An option was not specified with -get.

Action: Provide a valid option with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09046: Invalid key specified

Cause: An unknown key was specified with -get.

Action: Provide a supported key with -get. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09047: Error string: Error Dumping Log (return code: number) for node string

Cause: An error occurred while dumping local log.

Action: Report this error to Oracle Support Services. Cluster Health Monitor repository directory may be unreachable, unreadable or incorrect.

CRS-09048: Error string: No data received from the Cluster Logger Service after number attempts

Cause: Data was not received from the Cluster Logger Service after the specified number of attempts or data was not available.

Action: None

CRS-09049: Error string: Cannot get environment variable CRFHOME

Cause: An internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09050: Error string: Too many host names

Cause: Too many host names were specified.

Action: Provide valid number of host names. Refer to the product documentation or to the command online help for information.

CRS-09051: Error string: Invalid interval size specified

Cause: Non-numeric or invalid interval specified.

Action: Provide a valid numerical value for interval size. Refer to the product documentation or to the command online help for information

CRS-09052: Error string: string control not supported

Cause: The specified debug control was not supported.

Action: Provide a supported control. Refer to the product documentation or to the command online help for information.

CRS-09053: Key:value pair missing

Cause: A required key:value pair was missing.

Action: Provide a valid key:value pair. Refer to the product documentation or to the command online help for information

CRS-09054: Incomplete or invalid parameters string

Cause: Incomplete or invalid parameters supplied.

Action: Provide the complete and correct parameters. Refer to the product documentation or to the command online help for information

CRS-09055: module:level specified in invalid format or invalid value

Cause: Invalid format or value specified for module:level.

Action: Provide correct module:level. Refer to the product documentation or to the command online help for information

CRS-09056: Error string: Invalid Cluster Health Monitor repository location specified

Cause: Invalid Cluster Health Monitor repository location specified.

Action: Provide a directory with read and write permissions for Cluster Health Monitor repository location. Refer to the product documentation or to the command online help for information.

CRS-09057: Error string: No response received from the Cluster Logger Service

Cause: No data received from the Cluster Logger Service for the query.

Action: Ensure that the Cluster Logger Service is running and reachable from the client node by using the 'ping' command for the specified node.

CRS-09058: Error string: A non-root user is not allowed to see or change the log levels.

Cause: The log level could not be changed due to authentication failure.

Action: Ensure that this command is run as root.

CRS-09059: Error string: Changing log level failed due to connection failure

Cause: A connection failure occurred while changing the log.

Action: Ensure that the daemons are running and are reachable.

CRS-09060: Error string: Unable to send message due to memory allocation failure

Cause: Memory could not be allocated for debug message.

Action: Report this error to Oracle Support Services.

CRS-09061: Error string: Accessing the log level failed due to response time-out.

Cause: A time out happened while waiting for response.

Action: Report this error to Oracle Support Services.

CRS-09062: Error string: Error accessing the log level.

Cause: An error occurred while accessing the log level.

Action: Report this error to Oracle Support Services.

CRS-09063: Given time range is more than 1 hour

Cause: The time range specified with showtrail command was more than one hour.

Action: Provide a range of less than 1 hour for showtrail.

CRS-09064: Error string: Accessing the log level is failed due to a connection failure. Cannot connect to daemon string.

Cause: A connection failure occurred while accessing the log level.

Action: Ensure that the specified daemon is running and reachable.

CRS-09065: Disk ID not found

Cause: Given disk ID was not found or not present in the interesting list.

Action: Provide a disk ID which is available at the start of the query range.

CRS-09066: Process ID not found

Cause: Given process ID was not found.

Action: Provide a process ID which is available at the start of the query range.

CRS-09067: NIC ID not found

Cause: Given NIC ID was not found.

Action: Provide a correct NIC ID.

CRS-09068: Error *string*: -allnodes and -n must not be used together

Cause: Both -allnodes and -n were supplied on a dumpnodeview command.

Action: Specify either -allnodes or -n with specific nodes.

CRS-09069: The new Cluster Health Monitor repository location is *string*.

Cause: The Cluster Health Monitor repository location was successfully replaced.

Action: None

CRS-09070: The new Cluster Health Monitor repository retention time is *number* seconds.

Cause: The Cluster Health Monitor repository retention time was successfully modified.

Action: None

CRS-09071: Internal error in Cluster Health Analysis during problem analysis

Cause: An internal error occurred during problem analysis.

Action: Contact Oracle Support Services.

CRS-09072: Internal error in Cluster Health Analysis report output

Cause: An internal error occurred while reporting a problem.

Action: Contact Oracle Support Services.

CRS-09073: No problems to display

Cause: No problems were found that matched the selection criteria specified to the 'oclumon analyze' command.

Action: None

CRS-09074: No component specified to the component argument

Cause: An 'oclumon analyze' command was issued without a component.

Action: Provide a component to the 'oclumon analyze' command. Refer to the product documentation or to the command online help for information.

CRS-09075: Invalid component name '*string*' specified as the component argument

Cause: An 'oclumon analyze' command was issued with an invalid component.

Action: Pass a valid component to the 'oclumon analyze' command. Refer to the product documentation or to the command online help for information on supported arguments.

CRS-09076: Error loading the required Cluster Health models

Cause: The required Cluster Health models did not exist, did not have the required permission, or had an invalid format.

Action: Ensure that the Cluster Health models are present in the 'cdata/model' subdirectory of the Oracle Grid Infrastructure home, and that their permissions are correct. If the problem persists, check for entries in the oclumon log file for more details.

CRS-09077: Invalid path '*string*' was specified as the data directory argument

Cause: An 'oclumon analyze' command was issued specifying a data directory that does not exist or is not accessible to the user.

Action: Pass a valid path to the 'oclumon analyze' command. Look at accompanying messages for more information.

CRS-09078: Invalid severity value '*string*' provided as the severity argument

Cause: An 'oclumon analyze' command was issued with an invalid severity value.

Action: Pass a valid severity value to the 'oclumon analyze' command. Refer to the product documentation or to the command online help for information.

CRS-09079: No instance name specified for the instance argument

Cause: An 'oclumon' command was issued without an instance name.

Action: Provide an instance name with the 'oclumon' command. Refer to the product documentation or to the command online help for information.

CRS-09080: data for other nodes of cluster cannot be viewed from this node

Cause: An 'oclumon dumpnodeview -n' command was issued for other nodes from a leaf node.

Action: Refer to the Cluster Health Monitor documentation for more information.

CRS-09081: Internal error in Cluster Health calibration

Cause: An internal error occurred during cluster health model calibration.

Action: Contact Oracle Support Services.

CRS-09082: Insufficient permission to execute command. Require privileged user

Cause: A non-privileged user attempted to execute a command requiring privilege.

Action: Issue the command again as a privileged user.

CRS-09083: No database name specified for the database argument

Cause: An 'oclumon' command was issued without a database name.

Action: Provide a database name with the 'oclumon' command. Refer to the product documentation or to the command online help for information.

CRS-09084: Error *string*: Node name is greater than *string* bytes

Cause: An 'oclumon' command was issued with a node name that was too long.

Action: Supply a node name no greater than the indicated size with the 'oclumon' command and retry. Refer to the product documentation or to the command online help for information.

CRS-09085: Model name missing or invalid for the model argument

Cause: The previous oclumon command was rejected because it did not include a valid model name.

Action: Reissue the oclumon command providing a valid model name. Refer to the product documentation or to the command online help for information.

CRS-09086: Server pool name missing or invalid for the server pool argument

Cause: The previous oclumon command was rejected because it did not include a valid server pool name.

Action: Reissue the oclumon command providing a valid server pool name. Refer to the product documentation or to the command online help for information.

CRS-09087: Server pool name specified in a cluster without user-defined server pools

Cause: The previous oclumon command was rejected because it was issued with a server pool name on a cluster without user-defined server pools.

Action: Reissue the oclumon command without a server pool name. Refer to the product documentation or to the command online help for information.

CRS-09088: Node name specified in a cluster with user-defined server pools

Cause: The previous oclumon command was rejected because it was issued with a node name on a cluster with user-defined server pools.

Action: Reissue the oclumon command without a node name. Refer to the product documentation or to the command online help for information.

CRS-09089: Parameter '*string*' is not supported in combination with parameter '*string*'.

Cause: The command was rejected because the combination of parameters passed was invalid.

Action: Refer to the product documentation or to the online help for the command and reissue the command with the correct parameters.

CRS-09090: Error *string*: Parameter '*string*' is specified multiple times.

Cause: The previous 'oclumon' command was rejected because the parameter listed in the message was specified multiple times.

Action: Refer to the product documentation or to the online help for the command and reissue the command with the correct parameters.

CRS-09091: database name '*string*' is invalid

Cause: An 'oclumon' command was issued with an invalid database name.

Action: Provide a valid database name with the 'oclumon' command. Refer to the product documentation or to the online help for the command for information.

CRS-09092: No instance of database '*string*' is active on this node.

Cause: The 'oclumon calibrate' command was rejected because no instance of the above listed database was active on the local node.

Action: Issue the 'srvctl start database' command to start the above listed database. Issue the 'srvctl status database' command to retrieve a list of nodes on which the database instances are online. Issue the 'oclumon calibrate' command again from a node on which the database instance is online. Refer to the product documentation or to the online help for the command for information.

CRS-09093: Database '*string*' of type '*string*' is not supported in a cluster with user-defined server pools.

Cause: An 'oclumon' command was issued with an administrator-managed database in a cluster with user-defined server pools.

Action: Reconfigure the database to be policy-managed using the 'srvctl modify database' command to enable monitoring by the Oracle Cluster Health Analysis service. Verify the monitoring status using the 'srvctl status cha' command. Re-issue the 'oclumon calibrate'

command. Refer to the product documentation or to the online help for the command for information.

CRS-09100: Error setting Cluster Health Monitor repository size

Cause: An error occurred while setting Cluster Health Monitor repository size on the Cluster Logger Service.

Action: Report this error to Oracle Support Services.

CRS-09101: Error updating Cluster Health Monitor repository size in configuration file.

Cause: An error occurred while writing the Cluster Health Monitor repository size to configuration files.

Action: Report this error to Oracle Support Services.

CRS-09102: No data for the node at the specified time

Cause: Data was not found for the specified node.

Action: This is an informational message only.

CRS-09103: No data available

Cause: Data was not available for the query.

Action: Make sure the System Monitor Service is running on the specified node.

CRS-09104: No data available for the specified nodes

Cause: Data was not available for specified nodes.

Action: Make sure the System Monitor Service is running on the specified nodes.

CRS-09105: Internal Error on master

Cause: An internal error on master caused this error.

Action: Report this error to Oracle Support Services.

CRS-09106: Data requested was outside Cluster Health Monitor retention time limits.

Cause: A request for data outside Cluster Health Monitor repository limit caused this error.

Action: Data needs to be requested in the proper Cluster Health Monitor repository limits. Refer to the product documentation for more information.

CRS-09107: Start time greater than end time

Cause: A start time greater [or later] than end time caused an error.

Action: Make sure the start time is less than the end time for the specified range query.

CRS-09108: Threshold out of acceptable range

Cause: A threshold was specified that is outside the allowed range.

Action: Make sure threshold is within the acceptable range. Refer documentation or online help for more information

CRS-09109: New Cluster Health Monitor repository location same as the old location on node *string*

Cause: The new location specified for Cluster Health Monitor repository is same as the old location.

Action: Provide a different location for Cluster Health Monitor repository. Refer documentation or online help for more information.

CRS-09110: Cluster Health Monitor repository location not changed as the location specified does not exist on node *string*.

Cause: The new location specified for Cluster Health Monitor repository does not exist.

Action: Provide a different location for Cluster Health Monitor repository. Refer documentation or online help for more information.

CRS-09111: Error updating Cluster Health Monitor repository location *string* in configuration file.

Cause: An error occurred while writing the Cluster Health Monitor repository location to configuration files.

Action: Report this error to Oracle Support Services.

CRS-09114: Cluster Health Monitor repository location change failed on one or more nodes. Aborting location change.

Cause: An error occurred while setting Cluster Health Monitor repository location on the Cluster Logger Service.

Action: Retry specifying a valid location.

CRS-09116: Cluster Health Monitor repository retention change failed on one or more nodes. Aborting retention change.

Cause: An error occurred while setting Cluster Health Monitor repository size on the Cluster Logger Service.

Action: Retry specifying a valid location.

CRS-09117: Grid Infrastructure Management Repository configuration error *ln string*

Cause: Grid Infrastructure Management Repository configuration error occurred.

Action: Take the following steps. 1) Examine the accompanying ORA-nnnnn or CRS-nnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtldb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09118: Grid Infrastructure Management Repository connection error *ln string*

Cause: Grid Infrastructure Management Repository connection error occurred.

Action: Take the following steps. 1) Examine the accompanying ORA-nnnnn or CRS-nnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtldb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09119: Warning: *string* option has been deprecated and will be ignored.

Cause: A deprecated option was specified on the command line. The option was ignored.

Action: Check the documentation for the new syntax of the command.

CRS-09120: oclumon was not able to connect to the Grid Infrastructure Management Repository because an authorization failure occurred. Instring

Cause: An authorization failure occurred when connecting to the Grid Infrastructure Management Repository.

Action: Run the 'srvctl config mgmtldb' command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the 'mgmtca' command to reset the passwords in the wallet. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09121: oclumon was not able to connect to the Grid Infrastructure Management Repository because no listener was available.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed because no Grid Infrastructure Management Repository listener was running.

Action: Use the 'srvctl status mgmtlsnr' command to confirm that Grid Infrastructure Management Repository listener is running. If it is not, start it using the 'srvctl start mgmtlsnr' command. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09122: oclumon was not able to retrieve the security keys from the wallet.

Cause: An attempt to retrieve the security keys from the wallet failed.

Action: Run the 'crsctl query wallet -type MGMTDB' command to verify that the wallet exists. If the problem persists, contact Oracle Support Services.

CRS-09123: oclumon was not able to connect to the Grid Infrastructure Management Repository because a Cluster Synchronization Services request failed.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed due to a Cluster Synchronization Services failure.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09124: Cluster Health Monitor repository retention change failed. Aborting retention change. Error: *string*

Cause: An error occurred while setting the Cluster Health Monitor repository size on the cluster logger service.

Action: Take the following steps. 1) Examine the accompanying ORA-nnnnn or CRS-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtldb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09125: Error *string*: Node name *string* is unknown or invalid. No data found for this node in Grid Infrastructure Management Repository.

Cause: The 'oclumon' command could not be carried out as entered because the node name cited in the message was invalid. The cited node name was ignored and the query executed with any remaining names.

Action: Reissue the 'oclumon' command, if desired, supplying a valid name for the node name cited in the message. Refer to the product documentation or to command online help for information.

CRS-09126: Cluster Health Monitor repository retention change failed. Error: retention space is lower than size permitted.

Cause: An attempt to set the Cluster Health Monitor repository size on the cluster logger service was rejected because the specified size was smaller than the permitted minimum size.

Action: Retry the command specifying a retention size larger or equal to the minimum size of 1 GB.

CRS-09127: Error *string*: Too many PIDs

Cause: The command 'oclumon dumpnodeview -pid' failed because too many PIDs were specified.

Action: Refer to the product documentation or to the command online help for information and reissue the command specifying a valid number of PIDs.

CRS-09128: Error *string*: Write operation is not permitted.

Cause: The command 'oclumon dumpnodeview -dir <dir_name>' failed because the user was not allowed to write in the specified directory.

Action: Ensure that the user has write permission for the specified directory and retry.

CRS-09129: Error *string*: Directory does not exist.

Cause: The command 'oclumon dumpnodeview -dir <dir_name>' failed because the specified directory did not exist.

Action: Create the specified directory and retry.

CRS-09130: Error: 'dumpnodeview' option -v or -verbose conflicts with additional view options.

Cause: The command 'oclumon dumpnodeview' failed because either -v or -verbose option was specified in addition to other view options (-system, -process, -cpu, etc.). The verbose options imply the inclusion of every part.

Action: Retry the operation specifying other options without -v or -verbose or specifying -v or -verbose without other options.

CRS-09131: Warning, argument *string* occurs multiple times in the command line.

Cause: A request to execute the command 'oclumon manage -get <args..>' included multiple occurrences of the indicated argument. The command was executed normally.

Action: To avoid issues, observe proper command syntax and avoid repeating arguments.

CRS-09132: Error, Cannot enable or disable feature *string*. It is not currently supported on this operating system.

Cause: A request to enable or disable a particular feature was issued where the feature was not supported.

Action: None

CRS-09133: Warning: *string* option has been deprecated. Please use new option *string*.

Cause: A deprecated option was specified on the command line.

Action: Use the suggested new option or follow the `oclumon dumpnodeview -help` for more information.

CRS-09134: Not able to connect Grid Infrastructure Management Repository, redirecting the command: 'oclumon dumpnodeview local'.

Cause: The command 'oclumon dumpnodeview' failed because either a database configuration failed or a database connection failed.

Action: None

CRS-09135: Redirection to `oclumon dumpnodeview local` failed since `-n` option does not have the local hostname. Hence No data found.

Cause: The command 'oclumon dumpnodeview local' does not support `-n` option with peer host name specified."

Action: None

CRS-09500: The System Monitor Service aborted on host *string*. Details at *string* in *string*.

Cause: The System Monitor Service aborted due to an internal error.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09501: The Cluster Logger Service aborted on host *string*. Details at *string* in *string*.

Cause: The Cluster Logger Service aborted due to an internal error.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09502: The Cluster Health Monitor repository location *string* is inaccessible. Details at *string* in *string*.

Cause: An error occurred while accessing the Cluster Health repository.

Action: Check that the Cluster Health Monitor repository location in question has the correct permissions. Determine whether this behavior is limited to one node or whether it occurs across all of the nodes in the cluster. Use the 'oclumon manage -repos reploc *location*' command to replace the Cluster Health Monitor repository location.

CRS-09503: The System Monitor Service on this host is unable to communicate with the Cluster Logger Service on host *string*, and will log the Cluster Health Monitor data to the local repository.

Cause: Communication was lost with the Cluster Logger Service node.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If network problems are not found, execute the following steps: 1. Run `diagcollection.pl`. 2. Contact Oracle Support Services.

CRS-09504: The Cluster Logger Service on host *string* is dropping the Cluster Health Monitor node view. Details at *string* in *string*.

Cause: The Cluster Logger Service was unable to insert Cluster Health Monitor node view into Cluster Health Monitor repository .

Action: Contact Oracle Support Services.

CRS-09505: The Cluster Health Monitor repository is deleted due to corruption and the Cluster Logger Service is disabled on *string*. Details at *string* in *string*.

Cause: A critical error occurred while operating on Cluster Health Monitor repository.

Action: Contact Oracle Support Services.

CRS-09506: The System Monitor Service local repository is disabled on the host *string*. Details at *string* in *string*.

Cause: An internal error occurred while writing to the System Monitor Service local repository.

Action: Contact Oracle Support Services.

CRS-09507: The maximum Cluster Health Monitor repository retention time is reached. Deleting the oldest Cluster Health Monitor node views in age order.

Cause: The maximum time for which the oldest Cluster Health Monitor node view will be available on Cluster Health Monitor repository was reached.

Action: If necessary, use 'oclumon manage -repos changerepossize *size*' command to change the retention time.

CRS-09508: The Cluster Health Monitor repository retention time cannot be changed due to lack of disk space on node *string*.

Cause: The Cluster Health Monitor retention time condition could not be fulfilled because the Cluster Health Monitor repository ran out of disk space at run time at the repository location.

Action: Use the 'oclumon manage -repos reploc *location*' command to replace the Cluster Health Monitor repository with a disk location that has at least 1GB of available space per cluster node.

CRS-09509: The new Cluster Logger Service master is *string*.

Cause: A new Cluster Logger Service master node was elected.

Action: None

CRS-09510: The new Cluster Logger Service replica is *string*.

Cause: A new Cluster Logger Service replica node was elected.

Action: None

CRS-09511: The System Monitor Service was not able to collect disk information on node *string*.

Cause: There was a problem in reading the disk-related information.

Action: Confirm that disks are properly configured and usable on the indicated node. If no issues are found and the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09512: The System Monitor Service was not able to collect network interface card information on node *string*.

Cause: There was a problem in reading the network interface card related information.

Action: Confirm that network interface cards are properly configured and usable on the indicated node. If no issues are found and the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09513: The version of the Grid Infrastructure Management Repository [*string*] is incompatible with the version of the Oracle Clusterware [*string*].

Cause: During startup, the Cluster Logger Service found that the version of Grid Infrastructure Management Repository was older than that of the Oracle Clusterware.

Action: Upgrade the Grid Infrastructure Management Repository to a version which is at least that of the Oracle Clusterware.

CRS-09514: The Cluster Logger Service encountered an unexpected error during inserting the data into the Grid Infrastructure Management Repository. *Instring*.

Cause: An unexpected Oracle error was returned by the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtdb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09515: The Cluster Logger Service encountered an unexpected error during deleting the data from Grid Infrastructure Management Repository. *Instring*.

Cause: An unexpected Oracle error was returned by the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtdb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09516: Encountered an unexpected error during querying the data from Grid Infrastructure Management Repository. *Instring*.

Cause: An unexpected Oracle error was returned by the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtdb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09517: An unrecoverable configuration error occurred in the Grid Infrastructure Management Repository. Details at *string* in *string*. *Instring*

Cause: An unexpected condition happened in the Grid Infrastructure Management Repository.

Action: 1) Examine the accompanying ORA-nnnnn error messages. If possible, correct the issue reported. 2) Issue a 'srvctl status mgmtldb' command to determine the status of the Grid Infrastructure Management Repository database. If it is not online, examine the database instance alert log to determine what happened. 3) If you are unable to determine or correct the problem, contact Oracle Support Services.

CRS-09518: The Cluster Logger Service was not able to connect to the Grid Infrastructure Management Repository because an authorization failure occurred. Instring

Cause: An authorization failure occurred when connecting to the Grid Infrastructure Management Repository.

Action: Run the 'srvctl config mgmtldb' command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the 'mgmtca' command to reset the passwords in the wallet. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09519: The Cluster Logger Service was not able to connect to the Grid Infrastructure Management Repository because no listener was available.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed because no Grid Infrastructure Management Repository listener was running.

Action: Use the 'srvctl status mgmtlsnr' command to confirm that Grid Infrastructure Management Repository listener is running. If it is not, start it using the 'srvctl start mgmtlsnr' command. If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09520: The storage of Grid Infrastructure Management Repository is *number*%% full. The storage location is '*string*'.

Cause: The storage of Grid Infrastructure Management Repository was close to full. This storage can be a shared file system or an Oracle ASM disk group.

Action: Make sure there is sufficient free space in repository location.

CRS-09521: Grid Infrastructure Management Repository was not available on the node *string*. The System Monitor Service will store the data in its local repository on all nodes. Instring

Cause: Grid Infrastructure Management Repository was initializing or was shutting down when the Cluster Logger Service tried to connect, insert or delete the data.

Action: Check if the Grid Infrastructure Management Repository is online using the 'srvctl status mgmtldb' command. If it is offline, start it using the 'srvctl start mgmtldb' command.

CRS-09522: The Cluster Logger Service was not able to retrieve the security keys from the wallet.

Cause: The Cluster Logger Service could not get the security keys due a wallet read failure.

Action: Run the 'crsctl query wallet -type MGMTDB' command to verify that the wallet exists. If the problem persists, contact Oracle Support Services.

CRS-09523: The Cluster Logger Service was not able to connect to the Grid Infrastructure Management Repository because a Cluster Synchronization Services request failed.

Cause: An attempt to connect to the Grid Infrastructure Management Repository failed due to a Cluster Synchronization Services failure.

Action: If the problem persists, run 'diagcollection.pl' and contact Oracle Support Services.

CRS-09524: The System Monitor Service on this host is unable to communicate with the Cluster Logger Service on host *string*, and will log the Cluster Health Analysis data to the local repository.

Cause: Communication was lost with the Cluster Logger Service node.

Action: Verify all network connections between cluster nodes and repair any problematic connections. If network problems are not found, execute the following steps: 1. Run `diagcollection.pl`. 2. Contact Oracle Support Services.

CRS-09525: The Cluster Health Analysis local repository is disabled on host *string*. Details at *string* in *string*.

Cause: An internal error occurred while writing to the Cluster Health Analysis local repository.

Action: Contact Oracle Support Services.

CRS-09526: The Cluster Logger Service was unable to reset the password for Cluster Health Monitor.

Cause: A password reset failure occurred when the Cluster Logger Service tried to reset the Cluster Health Monitor password after finding that the password had expired.

Action: Run the `'srvctl config mgmtdb'` command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the `'mgmtca setpasswd -user CHM'` command to reset the password for Cluster Health Monitor. If the problem persists, run `'diagcollection.pl'` and contact Oracle Support Services.

CRS-09527: The Cluster Logger Service was unable to reset the password for Cluster Health Analysis.

Cause: A password reset failure occurred when the Cluster Logger Service tried to reset the Cluster Health Analysis password after finding that the password had expired.

Action: Run the `'srvctl config mgmtdb'` command to verify that Grid Infrastructure Management Repository has been created successfully. If not, run the `'mgmtca setpasswd -user CHA'` command to reset the password for Cluster Health Analysis. If the problem persists, run `'diagcollection.pl'` and contact Oracle Support Services.

CRS-09528: The Grid Infrastructure Management Repository exceeded the size set for it; disabling logging.

Cause: An internal error caused the size of the Grid Infrastructure Management Repository to be reset to an unexpectedly large value. Logging was disabled to prevent further problems.

Action: Contact Oracle Support Services.

CRS-09600: Failed to initialize *string* daemon

Cause: An error occurred during initialization.

Action: Report this error to Oracle Support Services.

CRS-09603: Failed to read configuration files

Cause: An error encountered while retrieving information from configuration files.

Action: Report this error to Oracle Support Services.

CRS-09607: Cannot spawn thread for *string*

Cause: An error encountered while spawning thread.

Action: Report this error to Oracle Support Services.

CRS-09608: ASM disk method failed

Cause: An error encountered with ASM disks configuration.

Action: Report this error to Oracle Support Services.

CRS-09609: Encountered cssd failure. Reinitializing CSSD layer.

Cause: An error was encountered with CSSD layer while retrieving information.

Action: Report this error to Oracle Support Services.

CRS-09610: Encountered a fatal internal error. Daemon *string* exiting.

Cause: A fatal error occurred with CSSD layer.

Action: Report this error to Oracle Support Services.

CRS-09611: Mark *string* disks encountered errors

Cause: An error occurred while accessing disk.

Action: Report this error to Oracle Support Services.

CRS-09612: Mark *string* disks failed

Cause: A fatal error occurred while accessing disk.

Action: Report this error to Oracle Support Services.

CRS-09615: Disk method Failure : *string*

Cause: Internal error occurred.

Action: Report this error to Oracle Support Services.

CRS-09616: Daemon started : *string*

Cause: A daemon process started successfully.

Action: None

CRS-09617: Invalid message type encountered

Cause: An invalid or corrupted message was received.

Action: Report this error to Oracle Support Services.

CRS-09618: Daemon stopped : *string*

Cause: A daemon process stopped successfully.

Action: None

CRS-09619: All Cluster Health Monitor (CHM) data is permanently deleted because CHM table space size is reduced from *number* MB to *number* MB.

Cause: A request to reduce the size of the Cluster Health Monitor (CHM) table space resulted in the deletion of all CHM data. This is informational.

Action: None

CRS-09620: Cluster Health Monitor (CHM) table space size is increased to *number* MB from *number* MB.

Cause: A request to increase the size of the Cluster Health Monitor (CHM) table space was issued and resulted in the indicated additional space. This is informational.

Action: None

CRS-09621: CHM table space size is *number* MB and free space is *number* MB.

Cause: A request for information about the space allocated to Cluster Health Monitor (CHM) table space returned the indicated space statistics.

Action: None

CRS-10002: failed to allocate memory

Cause: Memory allocation failed.

Action: Correct the system memory problem and retry.

CRS-10004: unable to reach *string* address from local node

Cause: An attempt to reach the IP address specified failed.

Action: Make sure that the specified IP address is a valid IP address and is assigned to an interface. Make sure that there are no firewalls between local node and node on which specified IP address is hosted.

CRS-10005: unable to determine local host name

Cause: The host name could not be determined.

Action: Check that the host name for the local machine is valid. Look at the accompanying messages. If the problem persists, contact Oracle Support Services.

CRS-10006: APPVIP type needs a VIP name. Specify a VIP name using *-vip* commandline option.

Cause: VIP resource name was missing in the command line for APPVIP type.

Action: Specify a VIP name using *-vip* option.

CRS-10008: unable to generate client ID for VIP type *string*, cluster name *string*, VIP resource name *string*

Cause: An attempt to generate client ID for the specified cluster name, VIP type and resource name failed.

Action: Ensure that the cluster name and VIP resource name do not exceed 252 characters. Make sure that VIP type is a valid VIP type. Refer to 'crsctl get clientid - help' for more information.

CRS-10010: unable to discover DHCP server in the network listening on port *number* for client ID *string*

Cause: An attempt to discover DHCP server listening on port specified failed.

Action: Ensure that the DHCP servers exist on the network and are listening on port specified. If they are listening on a different port then specify that port using the *-port* option. For more information refer to help for 'crsctl discover dhcp' command.

CRS-10011: unable to request DHCP lease for client ID *string* on port *number*

Cause: An attempt to request DHCP lease for the specified client ID on specified port failed.

Action: Ensure that there are DHCP servers with IP addresses available on the network. If other DHCP servers are available which are listening on a different port specify an alternative port using the -port option. For more information refer to help for 'crsctl request dhcp' command.

CRS-10013: unable to release DHCP lease for client ID *string*, on port *number*

Cause: An attempt to release DHCP lease for the specified client ID on specified port failed.

Action: Ensure that there are DHCP servers listening on port specified. If the DHCP server is listening on a different port specify an alternative port using -port option. For more information refer to help for 'crsctl release dhcp' command.

CRS-10014: HOSTVIP type needs a node name. Specify a node name using -n option.

Cause: Node name was missing in the command line for HOSTVIP type.

Action: For HOSTVIP type node name needs to be specified via -n option.

CRS-10015: VIP type *string* is invalid

Cause: An invalid VIP type was specified for DHCP client ID generation.

Action: Ensure that the VIP type is a valid VIP type. Refer to 'crsctl get clientid -help' for more information.

CRS-10016: error obtaining local host DNS resolver configuration

Cause: An attempt to obtain local host DNS configuration failed.

Action: Make sure that the user executing the command has sufficient permission to read local system configuration.

CRS-10017: the *number* name servers configured on this system exceeds the *number* maximum allowed

Cause: An attempt to obtain local host DNS configuration failed because more name servers were found than allowed on this operating system.

Action: Reduce the number of name servers configured to the maximum allowed.

CRS-10023: Domain name look up for name *string* failed.

Cause: An attempt to query DNS servers for name specified failed.

Action: Look at accompanying messages for more information on the failure.

CRS-10029: could not verify if port *number* at address *string* is in use

Cause: An attempt to verify if port at address specified is in use failed.

Action: Make sure that the user has permission to create socket at port specified. For ports < 1024 user should be root. Also look at the accompanying messages for more information.

CRS-10030: could not verify if port *number* on local node is in use

Cause: An attempt to verify if port specified on local node is in use failed.

Action: Make sure that the user has permission to create socket at port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10033: could not stop the DNS listening daemon running on port *number* at address *string*

Cause: An attempt to stop the DNS listening daemon running on port and address specified failed.

Action: Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10034: could not stop the DNS listening daemon running on port *number* on local node

Cause: An attempt to stop the DNS listening daemon on local node running on port specified failed.

Action: Make sure that the user has permission to send packets at the port specified. For ports < 1024 the user should be root. Also look at the accompanying messages for more information.

CRS-10035: invalid name server '*string*' specified in command line

Cause: An invalid IPv4 address was specified on the command line for -dnsserver option.

Action: Specify a valid IPv4 address on the command line.

CRS-10036: value for command line parameter '*string*' is not an integer

Cause: An invalid value was specified for the specified command line parameter.

Action: Resubmit the request with an integer value.

CRS-10038: invalid IP address '*string*' specified

Cause: An invalid IPv4 or IPv6 address was supplied on command line.

Action: Supply an IP address that conforms to IETF RFC-791 or IETF RFC-2373.

CRS-10039: invalid subnet '*string*' specified

Cause: An invalid IPv4 or IPv6 subnet was supplied on the command line.

Action: Supply a subnet address that conforms to IETF RFC-950 or IETF RFC-5942.

CRS-10040: unable to get list of network interfaces

Cause: An attempt to retrieve the list of network interfaces failed.

Action: Look at the accompanying messages for more information.

CRS-10041: subnet '*string*' is not configured on the node

Cause: The subnet specified did not match subnet of any network interface on this node.

Action: Specify a subnet that matches at least one network interface's subnet on this node.

CRS-10043: DNS daemon is not listening on port *number* at address *string*

Cause: An attempt to check if the DNS daemon is listening on port and address specified failed.

Action: Make sure that the address specified is reachable. Make sure that there is no firewall between the node on which this command was run and the address specified. Also look at the accompanying messages for more information.

CRS-10044: invalid cluster name '*string*' specified

Cause: An invalid cluster name was supplied to the CRSCTL utility.

Action: Specify a cluster name which is at least one character long but no more than 63 characters in length. The cluster name consists of alphanumeric characters and the hyphen (-) character (a..z,A..Z,0..9,-). It cannot begin or end with the hyphen (-) character.

CRS-10045: invalid node name '*string*' specified

Cause: An invalid node name was supplied to the CRSCTL utility.

Action: Specify a node name which is at least one character long but no more than 63 characters in length. The node name consists of alphanumeric characters and the hyphen (-) character (a..z,A..Z,0..9,-). It cannot begin or end with the hyphen (-) character.

CRS-10046: invalid client ID '*string*' specified

Cause: An invalid client ID was supplied to the CRSCTL utility.

Action: The client ID can be obtained by running the command 'crsctl get clientid dhcp'.

CRS-10047: invalid query type '*string*' specified

Cause: An invalid DNS query type was supplied to crsctl.

Action: Supply a query type of A for an IPv4 address or AAAA for an IPv6 address.

CRS-10048: Name '*string*' was not resolved to an address of the specified type by name servers '*string*'.

Cause: An attempt to look up an address of a specified type for the indicated name using the name servers shown did not yield any addresses of the requested type.

Action: Retry the request providing a different name or querying for a different IP address type.

CRS-10051: CVU found following errors with Clusterware setup : *string*

Cause: A resource-specific error was detected by the Clusterware Verification Utility (CVU). This message is accompanied by others providing details of the error condition.

Action: Respond based on the accompanying messages.

CRS-10100: Execution of crswrapexece.pl script with arguments '*string*' fails.

Cause: crswrapexece.pl script failed when executed with the specific arguments.

Action: Check system log and crswrapexece.log for more details. Contact Oracle Support Services.

CRS-10101: Internal Error

Cause: Execution of crswrapexece.pl script failed due to missing argument.

Action: Contact Oracle Support Services.

CRS-10102: Failure to open environment file *string*.

Cause: The crswrapexece.pl script failed to open the environment file, which might be caused by hostname change or user edits.

Action: Check for the existence and permission of the environment file.

CRS-10103: Found *string* syntax errors in environment file *string*.

Cause: crswrapexece.pl found syntax errors in the provided environment file.

Action: Check and fix syntax error in the indicated environment file. If the problem persists, contact Oracle Support Services.

CRS-10104: Executable *string* does not reside in *string*.

Cause: The script crswrapexece.pl attempted to invoke the indicated executable, which was not found in the proper directory.

Action: This error is unexpected and should not normally occur. Contact Oracle Support Services.

CRS-10105: Executable *string* is not a file.

Cause: The script crswrapexece.pl attempted to invoke the indicated executable, but the executable is not a file.

Action: This error is unexpected and should not normally occur. Contact Oracle Support Services.

CRS-10106: Executable *string* does not exist.

Cause: The script crswrapexece.pl could not find the specified executable.

Action: This error is unexpected and should not normally occur. Contact Oracle Support Services.

CRS-10131: Failure to create named pipe *string*. Details [*string*].

Cause: The specified named pipe could not be created. Oracle High Availability Service would not be able to restart if crashes.

Action: Check for the existence and permission of the parent directory, where the named pipe was created.

CRS-10132: Oracle High Availability Service was restarted at least *string* times within the last *string* seconds. Stop auto-restarting Oracle High Availability Service.

Cause: Oracle High Availability Service was restarted too rapidly within a short period of time.

Action: Check the Oracle High Availability Service log file to determine the cause. If the problem persists, contact Oracle Support Services.

CRS-10201: Internal error

Cause: An unexpected condition was detected in the cluster event module.

Action: Contact Oracle Support Services.

CRS-10202: Failed to allocate process memory

Cause: Insufficient system memory resources.

Action: Correct the system memory resources problem and retry. If this does not appear to be caused by an operating system issue, contact Oracle Support Services.

CRS-10203: Could not connect to the Event Manager daemon

Cause: Unable to communicate with Event Manager daemon.

Action: Run the 'crsctl check evmd' command to determine whether Event Manager daemon is properly configured and is running.

CRS-10250: Database name is required to access database wallets. Use -name option to supply a database name.

Cause: The option -name was missing on the command line.

Action: For APPQOSDB wallet types -name is a mandatory parameter. Retry the command with -name option.

CRS-10251: User name is required to create OSUSER wallets. Use -user option to supply a username.

Cause: The option -user was missing on the command line.

Action: For OSUSER wallet types -user is a mandatory parameter. Retry the command with -user option.

CRS-10253: Warning: *string* option has been deprecated.

Cause: A deprecated option was specified on the command line.

Action: Check the documentation for the new syntax of the command.

CRS-10301: Unable to contact Oracle high availability service on peer nodes for cluster wide commands. Details at *string* in *string*.

Cause: Multicast Domain Name Server (mDNS) or Grid Plug and Play (GPnP) or both daemons on the local node were not running.

Action: If you are shutting down the Clusterware stack, this is expected. If you had issued a cluster wide command, reissue the command after the stack has been restarted. If you are not shutting down the stack, the missing component(s) may have failed and may restart automatically. Any cluster wide commands can be retried after a few seconds. However, the failure should be investigated and reported to Oracle Support Services.

CRS-10302: Oracle high availability service on peer nodes is reachable. Details at *string* in *string*.

Cause: Oracle high availability service on peer nodes was reachable.

Action: None

CRS-10401: Internal error in credentials processing.

Cause: An unexpected condition was detected in the credentials module.

Action: Contact Oracle Support Services.

CRS-10402: Failed to allocate process memory.

Cause: There were insufficient system memory resources.

Action: Correct the system memory resources problem and retry. If this does not appear to be caused by an operating system issue, contact Oracle Support Services.

CRS-10403: Could not connect to credential storage: *string*.

Cause: An attempt to communicate with Oracle Cluster Registry (OCR) or Oracle Local Registry (OLR) credential storage failed.

Action: Run the 'crsctl check crs' command to determine whether Cluster Ready Services or Oracle High Availability Services are online.

CRS-10405: Credential domain already exists.

Cause: The provided credential domain already existed.

Action: Specify another credential domain path.

CRS-10406: Authorization error.

Cause: The user did not have permissions to view or modify the provided credential information.

Action: Use a different user to view or modify the credential information.

CRS-10407: Credential domain does not exist.

Cause: The provided credential domain did not exist.

Action: Specify another credential domain path or create the credential domain.

CRS-10408: Credential set already exists.

Cause: The provided credential set already existed.

Action: Specify another credential domain path to which the credential set will be added.

CRS-10409: Credential target already exists.

Cause: The provided credential target already existed.

Action: Specify another credential target name, or modify the value of the existing one.

CRS-10410: Credential set member does not exist.

Cause: The provided credential set member did not exist.

Action: Specify another credential set member or create a new member.

CRS-10411: Credential set does not exist.

Cause: The provided credential set did not exist.

Action: Specify another credential set or create a new member.

CRS-10412: Security layer returned failure: *string*.

Cause: Credential operation failed due to error from security layer.

Action: Depending on the reason, this operation may be retried after correcting the situation.

CRS-10413: Invalid argument specified for attribute.

Cause: An invalid argument was found for a given attribute.

Action: Rerun the command using correct value.

CRS-10414: User name or group name does not match the owner or group of the credential object.

Cause: Credential permissions for the owner could not be modified because the user name did not match the owner of the credential.

Action: Specify the owner's user ID in the argument to change owner's permission.

CRS-10415: ACL string is missing the user or group modifier.

Cause: The access control list (ACL) string did not specify whether user's or group's permission needs to be changed.

Action: Specify the correct format in the argument and rerun the command.

CRS-10416: Credentials target does not exist.

Cause: The provided credentials target did not exist.

Action: Specify another credentials target.

CRS-10417: The directory '*string*' does not exist.

Cause: The specified directory did not exist.

Action: Provide a directory for which the user has read and write permissions.

CRS-10418: The directory '*string*' is not accessible.

Cause: An attempt to access the specified directory failed.

Action: Ensure that the user has read and write permissions on the directory.

CRS-10419: Unable to open file '*string*' for read access.

Cause: An attempt to open the specified file for read access failed.

Action: Ensure that the user has read access permission on the file.

CRS-10420: Unable to open file '*string*' for write access.

Cause: An attempt to open the specified file for write access failed.

Action: Ensure that the user has write access permission on the file.

CRS-10421: Section name does not exist.

Cause: The credentials could not be imported because the provided section name did not exist in the XML file.

Action: Verify the sections included in the credentials file and retry the import supplying the correct section name.

CRS-10422: Credential set of type '*string*' does not support the specified attribute '*string*'.

Cause: An attempted operation on a credential set of the indicated type was rejected because it specified an attribute that was not valid for credential sets of that type.

Action: Retry the operation specifying an attribute supported for the set.

CRS-10423: Credential file specified is either empty or corrupt.

Cause: Credential import failed because the import file was empty or corrupt.

Action: Specify a valid credential file and try again.

CRS-10424: Credential domain *string* is incomplete or improperly formed.

Cause: An attempt to access the credential domain failed because it was incomplete or improperly formed.

Action: Contact Oracle Support Services.

CRS-10425: This credential cannot be printed for security reasons.

Cause: An attempt was made to get or print security information.

Action: Do not perform the operation.

CRS-10502: failed to delete site '*string*' because it was the last remaining site

Cause: An attempt to delete the indicated site was rejected because it was the last remaining site.

Action: Execute the command 'crsctl query cluster site -all' to list the the existing sites. Refer to the command inline help or product documentation for more information.

CRS-10503: invalid site name '*string*' specified

Cause: The indicated string was provided where a site name was required, but it was not a valid site name.

Action: Specify a site name which is at least one character long but no more than 15 characters in length. A site name consists of alphanumeric characters and the hyphen character (a..z,A..Z,0..9,-). It cannot begin or end with the hyphen (-) character.

CRS-10504: The configured site name '*string*' is invalid.

Cause: A failure occurred while retrieving site information. The configured site name was invalid.

Action: Contact Oracle Support Services.

CRS-10505: The number of sites defined is more than the maximum.

Cause: A failure occurred while retrieving site information. There were more sites defined than the maximum allowed.

Action: Contact Oracle Support Services.

CRS-10506: The site GUID '*string*' configured for site '*string*' is invalid.

Cause: A failure occurred while retrieving site information. The configured site Globally Unique Identifier (GUID) was syntactically invalid.

Action: Contact Oracle Support Services.

CRS-10507: Host '*string*' not assigned to a site.

Cause: A failure occurred while retrieving the site assignment for the indicated host. The host has not been assigned to any site.

Action: Contact Oracle Support Services.

CRS-10508: The site '*string*' does not exist.

Cause: An attempt to query or delete a site failed because the indicated name had not been defined as a site name.

Action: Execute the command 'crsctl query cluster site -all' to list the the existing sites. Retry the original command with a site name that has been defined.

CRS-10509: The site '*string*' already exists.

Cause: An attempt to define an additional site failed because the indicated name had already been defined as a site name.

Action: To define an additional site, execute the command 'crsctl query cluster site -all' to list the existing sites. Retry the original command with a site name that has not already been defined.

CRS-10510: The site GUID '*string*' configured for host '*string*' is invalid.

Cause: A failure occurred while retrieving the site information for the indicated host. The site GUID configured for the indicated host was invalid.

Action: Contact Oracle Support Services.

CRS-10511: failed to add site '*string*' because the number of sites cannot exceed *number*

Cause: The maximum number of sites were already defined.

Action: To add the indicated site name, execute the command 'crsctl query cluster site -all' to list the existing sites, delete an existing site using the command 'crsctl delete cluster site', and retry the original command. Refer to the command inline help or product documentation for more information.

CRS-10512: invalid site GUID '*string*' specified

Cause: An attempt to add a site required for an Exadata Cell was rejected because the supplied Globally Unique Identifier (GUID) was syntactically invalid.

Action: Retry the command specifying the Globally Unique Identifier (GUID) as a text string of 16 hexadecimal digits (0-f) without a hyphen (-) character or the hexadecimal literal prefix (0x). Refer to the command inline help or product documentation for more information.

CRS-10513: failed to add site '*string*' because specified GUID '*string*' is already configured

Cause: An attempt to add the indicated site with the indicated Globally Unique Identifier (GUID) was rejected because a site with that GUID had already been defined.

Action: Execute the command 'crsctl query cluster site -all' to list the existing sites. Retry the original command with a site GUID that has not already been configured.

CRS-10701: Internal error in cluster management module.

Cause: An unexpected condition was detected in the cluster management module.

Action: Contact Oracle Support Services.

CRS-10702: could not find cluster property '*string*'

Cause: The specified cluster property was not found.

Action: Contact Oracle Support Services.

CRS-10703: invalid cluster class '*string*' retrieved

Cause: An invalid cluster class was retrieved from the configuration.

Action: Contact Oracle Support Services.

CRS-11001: could not find connection information

Cause: A requested operation involving another cluster could not be carried out because connection information could not be found for the Cross-cluster Dependency Proxies (CDP) daemon for that cluster.

Action: Contact Oracle Support Services.

CRS-11002: could not find resource '*string*' on cluster '*string*'

Cause: A requested operation involving the indicated resource on the cluster shown could not be carried out because the resource did not exist on that cluster.

Action: Create the resource on the appropriate cluster and retry the command.

CRS-11003: could not connect to cluster '*string*'

Cause: A requested operation involving the indicated cluster could not be carried out because a connection to the Cross-cluster Dependency Proxies (CDP) daemon for that cluster could not be established or had timed out.

Action: Start the Cross-cluster Dependency Proxies (CDP) daemon on the appropriate cluster and retry the command.

CRS-29000: Oracle VM Manager job failed with the following error:\n*string*

Cause: The Oracle Virtual Machine (Oracle VM) Manager was unable to complete the action due to the indicated error.

Action: Consult Oracle Virtual Machine (Oracle VM) documentation if the problem persists.

CRS-29001: could not find Grid Infrastructure virtual machine '*string*'

Cause: The name specified for the Grid Infrastructure virtual machine was not found.

Action: Specify a known virtual machine, or create a new virtual machine with the specified name and add it to the Oracle Clusterware cluster.

CRS-29002: could not find a virtual machine with the ID '*string*'

Cause: The ID specified for the virtual machine was not found.

Action: Specify a known virtual machine, or create a new virtual machine with the specified ID.

CRS-29003: could not find a virtual machine with the name or ID '*string*'

Cause: Either the name or the ID provided for the virtual machine was not found.

Action: Specify a known virtual machine, or create a new virtual machine with the specified name or ID.

CRS-29004: not authorized to perform the Oracle VM Manager operation

Cause: The Oracle Virtual Machine (Oracle VM) user name and password combination did not work, or the user did not have permission to perform the action requested.

Action: Update the user's password using the 'srvctl modify ovmm' command, or specify a different user who has the correct permissions.

CRS-29005: could not connect to the Oracle VM Manager on host *string* at port *string*

Cause: A connection to the Oracle Virtual Machine (Oracle VM) Manager could not be established or timed out.

Action: Start the Oracle VM Manager on the appropriate host and port, or specify a different host or port using the 'srvctl modify ovmm' command.

CRS-29006: could not find Oracle VM Manager credentials

Cause: Authentication credentials were not found for the Oracle Virtual Machine (Oracle VM) Manager.

Action: Create or modify the credentials by using the 'srvctl {add | modify} ovmm' command.

CRS-29200: The libvirt virtualization library encountered the following error: *lnstring*

Cause: The libvirt virtualization library was unable to complete the action due to the indicated error.

Action: Consult libvirt documentation if the problem persists.

CRS-29201: could not find a KVM with the UUID '*string*' on node *string*, and no XML description given

Cause: No Kernel-based Virtual Machine (KVM) matching the Universally Unique Identifier (UUID) was found on the node, and no XML domain description was provided so that it could be defined.

Action: Specify a known KVM, or create a new KVM with the specified UUID, or provide an XML domain description for the KVM.

CRS-29202: could not find a KVM with the name or UUID '*string*' on node *string*, and no XML description given

Cause: The name or the Universally Unique Identifier (UUID) provided for the Kernel-based Virtual Machine (KVM) was not found on the node, nor was an XML domain description given so that it could be defined.

Action: Specify a known KVM, or create a new KVM with the specified name or UUID, or provide an XML domain description for the KVM.

CRS-29203: error while defining Kernel-based Virtual Machine (KVM) from XML description file *string*: *string*

Cause: There was an error reading the file.

Action: Ensure that the file exists and has the appropriate permissions.

CRS-29204: The library *libvirt.so* is not found in directory *string*.

Cause: *libvirt-libs* package was not installed on your system or *libvirt.so* was not found under the path specified in *LIBVIRT_DIR* attribute of the Kernel-based Virtual Machine (KVM) resource.

Action: Install '*libvirt-libs*' package in the default location to manage Kernel-based Virtual Machine (KVM) under Clusterware or update the *LIBVIRT_DIR* attribute of the KVM resource to contain the directory containing *libvirt.so*.

CRS-29205: A required libvirt api is not found. Details in *string*.

Cause: Error initializing cluster-libvirt interface.

Action: A required libvirt api was not found. Ensure that the supported version of *libvirt-libs* package is installed.

CRS-29206: Unable to perform live migration: cannot determine node to migrate from.

Cause: Cluster Ready Services (CRS) unable to retrieve *LAST_SERVER* resource attribute.

Action: This is an internal error. Contact Oracle Support Services, and perform regular offline migration instead.

CRS-29208: Unable to communicate with libvirt daemon.

Cause: Unable to connect to libvirt daemon, which manages the Kernel-based Virtual Machines (KVMs).

Action: Check to make sure libvirt daemon (service libvirtd) is running, and start it up if necessary.

CRS-33210: could not find resource group '*string*'

Cause: An attempt was made to operate on a resource group that is not registered.

Action: Ensure that the resource group name is specified correctly using the command 'crsctl status resourcegroup'.

CRS-33500: cannot stop resource group '*string*' because it is not running

Cause: A request to stop a resource group that is not running was received.

Action: Check the current state of the resource group; it should no longer be running.

CRS-33501: Resource group '*string*' is disabled.

Cause: The resource group is currently disabled and so may not be operated on.

Action: Enable the resource group and re-submit your request.

CRS-33503: Resource group '*string*' is in UNKNOWN state and must be stopped first.

Cause: An attempt to start a resource group failed because the group state was UNKNOWN.

Action: Stop the resource group manually, make sure it is OFFLINE, and then re-submit the request.

CRS-33504: cannot start resource group '*string*' because no online server satisfies its placement policy

Cause: An attempt to start the indicated resource group failed because no online server satisfies the constraints imposed by its placement policy.

Action: Reissue the command after modifying the placement policy for the resource group or adding appropriate servers to the cluster.

CRS-33509: Resource group type '*string*' used in dependency '*string*' does not exist or is not registered.

Cause: An attempt to configure the dependencies of a resource group was rejected because the indicated resource group type does not exist.

Action: Reissue the command specifying a valid resource group type.

CRS-33510: Resource group '*string*' used in dependency '*string*' does not exist or is not registered.

Cause: An attempt to configure the dependencies of a resource group was rejected because the indicated resource group does not exist.

Action: Reissue the command specifying a valid resource group.

CRS-33514: Dependency attribute specification '*string*' is invalid in resource group '*string*'.

Cause: An attempt to configure the dependencies of a resource group failed because of errors in the dependency specification.

Action: Check the accompanying error messages and reissue the command after correcting the dependency specification.

CRS-33515: Circular dependency found for resource group '*string*'.

Cause: An attempt to configure the dependencies of a resource group resulted in a circular dependency and was rejected.

Action: Reissue the command after correcting the cause of the circular dependency.

CRS-33516: Server pool is not specified for resource group '*string*'.

Cause: The resource group profile does not have a server pool specified.

Action: Specify an existing server pool in the profile and re-submit the request.

CRS-33517: Required attribute '*string*' is not specified for resource group '*string*'.

Cause: A required attribute is missing from the resource group profile.

Action: Add the attribute to the profile and resubmit the request.

CRS-33525: All instances of the resource group '*string*' are already running; relocate is not allowed because the -force option was not specified.

Cause: All instances of the resource group are running and the start request did not have the -force option specified.

Action: Either specify the -force option or re-evaluate the need for the request.

CRS-33526: There are no available instances of resource group '*string*' to start on node '*string*'

Cause: All instances of the resource group were already running or otherwise unavailable to be started on the specified server.

Action: Create more instances or re-evaluate the need for the request.

CRS-33527: unable to start resource group '*string*' because it has a '*string*' dependency on resource group '*string*'

Cause: Start or relocate of the resource group is impossible because it has a dependency on another entity which prevents it from being able to start.

Action: This message will usually be coupled with another one that details the nature of the problem with the other resource group. Follow up on the action recommended for that message.

CRS-33528: unable to start an instance of resource group '*string*' because instances are already running on all possible servers.

Cause: An attempt to start an instance of the indicated resource group failed because instances of that resource group were already running on all servers available for that resource.

Action: Reissue the command after adding more servers or modifying the resource group's placement policy to select more servers.

CRS-33529: unable to act on resource group '*string*' on server '*string*' because that would require stopping or relocating resource group '*string*' but the -force option was not specified

Cause: The attempted operation on the indicated resource group and server was rejected because it would have required stopping or relocating the additional resource group as shown. The -force option would have been required to allow the additional effects.

Action: Reevaluate the request and, if appropriate, specify the `-force` option and resubmit.

CRS-33534: Resource group type '*string*' is not registered.

Cause: The specified resource group type is not registered.

Action: Re-evaluate the request or specify a registered type.

CRS-33539: A resource group with the name '*string*' is already registered.

Cause: A resource group with specified name was already registered.

Action: Use a unique name for the new resource group.

CRS-33547: illegal attempt to update internal or read-only attribute '*string*' for resource group '*string*'

Cause: An internal or read-only attribute of the resource group was specified in the update resource group request.

Action: Exclude internal and read-only attributes from your request.

CRS-33552: There are no available instances of resource group '*string*' to start.

Cause: An attempt to start a resource group failed because all instances of the resource group were already in the ONLINE state.

Action: Reevaluate the request.

CRS-33555: cannot relocate local resource group '*string*'

Cause: An attempt to relocate the indicated resource group failed because resource groups of type local cannot relocate to another server.

Action: Reissue the command specifying only relocatable resource groups.

CRS-33556: Resource group '*string*' cannot be restored to its original state after a failed relocate attempt.

Cause: After an unsuccessful attempt to relocate a resource group, CRSD was unable to restore the resource group.

Action: Manual intervention may be required. Re-try starting the resource group.

CRS-33558: Resource group type '*string*' cannot be unregistered because there are types that are based on it.

Cause: An attempt was made to unregister a resource group type that has other types inherited from it.

Action: Remove inherited types first, then remove this one.

CRS-33559: Resource group type '*string*' cannot be unregistered because it has the following resource groups: *string*

Cause: An attempt was made to unregister a resource group type when resource groups based on that type exist.

Action: Remove the specified resource groups first, then remove the type.

CRS-33560: Resource group type '*string*' does not exist.

Cause: An attempt was made to unregister a resource group type that does not exist.

Action: Specify a registered resource group type.

CRS-33561: Resource group type '*string*' cannot be unregistered because it is referenced by resource group '*string*'.

Cause: An attempt was made to unregister a resource group type when other resource groups are dependent on the type.

Action: Make sure there are no existing resource groups that reference this type in their dependencies.

CRS-33562: Resource group '*string*' cannot be relocated because it is not running.

Cause: An attempt to relocate the resource group failed because it was not running.

Action: Ensure that the resource group is running before issuing the request.

CRS-33564: Failed to relocate resource group '*string*'. Will attempt to restore it on '*string*' now.

Cause: Relocate of a resource group failed on all possible servers and is now being restarted on original server.

Action: None, this is an informational message.

CRS-33565: Attempt to relocate resource group '*string*' to '*string*' has failed. Will re-retry on '*string*' now.

Cause: Relocate of a resource group has failed for the server; a retry is in progress.

Action: None, this is an informational message.

CRS-33568: Base resource group type '*string*' does not exist.

Cause: An attempt was made to register a resource group type with an unknown base type.

Action: Use an existing type as a base. Run 'crsctl status resourcegroup' to list registered resource group types.

CRS-33571: Dependency type '*string*' is specified more than once for resource group '*string*'.

Cause: An attempt to configure the dependencies of a resource group was rejected because a dependency type was used more than once in the profile of the resource group.

Action: Reissue the command after combining multiple specifications of the same dependency type into a single clause.

CRS-33585: cannot unregister built-in resource group type

Cause: An attempt was made to delete a built-in resource group type.

Action: Specify a resource group type that is not built-in.

CRS-33607: cannot specify attribute '*string*' on a per-server basis

Cause: An attempt was made to register or update a resource group with an invalid per-server attribute.

Action: Check the permitted per-server attributes for the resource group, fix and resubmit. Run 'crsctl status resourcegroup' to check the attributes of the resource group.

CRS-33613: could not find resource group '*string*'

Cause: An attempt was made to operate on a resource group that is not registered.

Action: Check if the resource group is registered. Run 'crsctl status resourcegroup' to list all registered resource groups.

CRS-33625: The owner of resource group '*string*' does not have execute permission on pool '*string*'.

Cause: An attempt to start a resource group referenced a server pool on which the owner of the resource group lacks execute permission.

Action: Either have the pool's permission changed appropriately or use a different pool.

CRS-33632: There are no more servers to attempt to place resource group '*string*' that would satisfy its placement policy.

Cause: An operation to start, relocate or failover the indicated resource group failed after attempts were made on all available servers.

Action: Reissue the command after rectifying the failure condition.

CRS-33640: Required resource group '*string*' is missing.

Cause: A resource group that's configured as required is not registered.

Action: Register the missing resource group or update the dependency specification so as to the missing resource group is not required for start.

CRS-33643: The server pools where resource group '*string*' could run have no servers.

Cause: An attempt to start a resource group failed because all the configured server pools have no servers assigned.

Action: Either make sure there are active servers in the pools or use different pools for the resource group.

CRS-33644: No hosting members of resource group '*string*' are online or are allowed to be used by the resource group.

Cause: An attempt to start a resource group failed because no server specified as hosting member is online or, if it is, may be used by the resource group.

Action: Either add more servers to the cluster or request permission to pools to which currently available servers are assigned.

CRS-33645: cannot create resource groups of abstract type '*string*'

Cause: An attempt to create a resource group specified an abstract resource group type.

Action: Specify a concrete resource group type for the resource group.

CRS-33667: Resource Group '*string*' with *string=string* may only run on servers assigned to pools *string* and *string*, both of which are empty.

Cause: An attempt to start a resource group failed because its placement policy only allows it to run on servers assigned to the specified pools, and they are all empty.

Action: Either change the placement policy of the resource group, or change the cluster configuration so that there are servers in those pools.

CRS-33668: unable to start resource '*string*' on server '*string*' because the server does not have required '*number*' amount of CPU available '*number*'

Cause: Starting or relocation of the resource was not possible, because the resource required more CPU than available on the server.

Action: Use a different server, stop running resources on the server, or use the force option to see if the resource can be started by stopping lower ranked resources.

CRS-33672: Attempting to start resource group '*string*' on server '*string*'

Cause: This is a status message.

Action: None

CRS-33673: Attempting to stop resource group '*string*' on server '*string*'

Cause: This is a status message.

Action: None

CRS-33674: Start of resource group '*string*' on server '*string*' failed.

Cause: This is a status message.

Action: None

CRS-33675: Stop of resource group '*string*' on server '*string*' failed.

Cause: This is a status message.

Action: None

CRS-33676: Start of resource group '*string*' on server '*string*' succeeded.

Cause: This is a status message.

Action: None

CRS-33677: Stop of resource group '*string*' on server '*string*' succeeded.

Cause: This is a status message.

Action: None

CRS-33717: Server '*string*' is not in any of the server pools hosting resource group '*string*'.

Cause: An attempt was made to start a resource group on a server that is not currently an active server in any of the resource group's server pools.

Action: Use a server name that is currently an active server of the resource group's server pools.

CRS-33718: Server '*string*' is not a hosting member of resource group '*string*'.

Cause: An attempt was made to start the resource group on a server not listed as a hosting member of the resource group.

Action: Use a server name that is listed as a hosting member.

CRS-33719: Resource group '*string*' cannot be started on server '*string*' because the server is not in either '*string*' or '*string*' server pools.

Cause: The resource group's placement policy only allows it to run in the specified server pools. An attempt was made to start it on a server assigned to a different pool.

Action: Either use a different server or set the value of SERVER_POOLS to *, which will allow the resource to run on any server.

CRS-33722: The instance of resource group '*string*' can only run on server '*string*'; check on server '*string*' is unnecessary.

Cause: A check was issued on a server for a resource group instance that can only run on a particular server.

Action: Issue a check on the server where the resource group instance is supposed to be run.

CRS-33723: No instance of resource group '*string*' found on server '*string*'.

Cause: A check command failed because the resource group was not running on the specified server and no offline instances were available for the resource group.

Action: Reissue the command, specifying a server where a resource group instance might be running.

CRS-33728: A resource group type with the name '*string*' is already registered.

Cause: An attempt to register a resource group type specified a name that is already registered.

Action: Use a unique name for the new resource group type.

CRS-33729: Attribute '*string*' cannot be overridden for a resource group type.

Cause: An attribute was specified that is not allowed in a resource group type.

Action: Do not specify the indicated attribute for a resource group type.

CRS-33730: Resource group '*string*' depends on resource group '*string*'.

Cause: An attempt to unregister a resource group failed because another resource group is dependent on it.

Action: Reissue the command after removing all dependencies on the resource group to be unregistered.

CRS-33731: The resource group '*string*' is already running on target server '*string*'.

Cause: An attempt to relocate the indicated resource group failed because the resource group was already running on the indicated server.

Action: No action is required.

CRS-33736: cannot proceed with command because it requires stopping resource group '*string*' on server '*string*'

Cause: The command failed because the force option was not specified to stop the indicated resource groups.

Action: Reissue the command after adding more servers to the cluster or specify the force option.

CRS-33779: Failed to delete resource group type '*string*' from repository. Details at *string* in *string*.

Cause: An attempt to delete a resource group type encountered an internal error while updating the repository.

Action: Use the ocrcheck utility to detect errors in OCR. If problems exist, the registry may need to be recovered or restored.

CRS-33789: cannot stop resource group '*string*' because it is not running on server '*string*'

Cause: An request to stop a resource group on a server where it is not running was received.

Action: Check the current state of the resource group; it should no longer be running on that server.

CRS-33801: No instance of resource group '*string*' should be running.

Cause: An attempt to relocate a resource group was rejected because the TARGET attributes of the instances of the resource group were set to OFFLINE.

Action: Restart the resource group to change the value of the TARGET attribute to ONLINE.

CRS-33805: cannot start resource group '*string*' because it has a '*string*' dependency on resource group type '*string*' and no resource group of that type can satisfy the dependency

Cause: An attempt to start the indicated resource group failed because a resource group of the indicated type did not exist to satisfy the dependency.

Action: Reissue the command after registering a resource group of the indicated type.

CRS-33828: failed to stop resource group while attempting CARDINALITY modification

Cause: An attempt to stop a resource group during CARDINALITY modification failed.

Action: Use 'crsctl stop resourcegroup' to stop the resource group manually and then retry the update operation.

CRS-33835: Resource group '*string*' cannot start on server '*string*' because the server does not belong to the resource group's server category.

Cause: An attempt to start the resource group group failed because the server specified does not belong to the server category of the resource group.

Action: Specify a server that belongs to the category.

CRS-33837: There are no servers that belong to the server category '*string*' of resource group '*string*'.

Cause: The resource group cannot be started as there are no available servers that belong to its category.

Action: Add servers to the cluster or change the category to be more inclusive.

CRS-33855: Resource group '*string*' is not configured to run in server pool '*string*'.

Cause: An attempt was made to start or stop the resource group in a server pool where the resource group was not configured to run.

Action: Modify resource group's attribute to have this server pool or specify a different resource group.

CRS-33857: cannot stop resource group '*string*' because it is not running in server pool '*string*'

Cause: A resource group stop request specified a server pool on which the resource group is not running.

Action: Check the current state of the resource group; it should no longer be running in that server pool.

CRS-33858: attempt *number of number* to start resource group *string* failed

Cause: An attempt to start the indicated resource group failed. The resource group was configured to attempt to start multiple times. When this failure was reported, there were more attempts remaining to start the resource group.

Action: None

CRS-33865: cannot start resource group '*string*' on server '*string*' as it has an exclusion dependency with resource groups of type '*string*'

Cause: An attempt to start a resource group failed because an exclusion dependency was configured between the resource group and a type without the option to preempt a running resource group.

Action: Either reissue the command and specify a different server or first stop the other resource group on the specified server and reissue the command.

CRS-33866: cannot start resource group '*string*' on server '*string(2)s*' because it has an exclusion dependency with resource groups of type '*string*' and the force option was not used

Cause: An attempt to start a resource group failed because an exclusion dependency was configured between the resource group and a type but the force option was not used to stop the running resource group.

Action: Reissue the command and specify a different server or use the force option.

CRS-33871: cannot start resource group '*string*' on server '*string*' as it has an exclusion dependency with resource group '*string*'

Cause: An attempt to start a resource group failed because an exclusion dependency was configured between the two resource groups without the option to preempt a running resource group.

Action: Either reissue the command and specify a different server or first stop the other resource group on the specified server and reissue the command.

CRS-33872: cannot start resource group '*string*' on server '*string(2)s*' because it has an exclusion dependency with resource group '*string*' and the force option was not used

Cause: An attempt to start a resource group failed because an exclusion dependency was configured between the two resource groups but the force option was not used to stop the running resource group.

Action: Reissue the command and specify a different server or use the force option.

CRS-33904: cannot relocate resource group '*string*' because it is not a singleton resource group

Cause: A relocate resource group request specified a resource group that has multiple instances.

Action: Reissue the request specifying a singleton resource group or use a filter that resolves to an instance of the group.

CRS-33919: Resource group '*string*' has no instances to act upon.

Cause: An attempt was made to act on a resource group that has no instances because it is configured to run on servers that have never existed in the cluster.

Action: Retry the command when the resource group has instances.

CRS-33969: cannot add resource group '*string*' because a resource exists with the same name

Cause: An attempt to add a resource group failed because a resource with the same name was already registered.

Action: Reissue the command specifying a different name for the new resource group.

CRS-34911: cannot delete the resource group because it does not exist

Cause: An attempt to delete a resource group failed because the resource group specification did not identify an existing resource group. Either there was no resource group with the specified name, or no resource group satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource group or a filter that will select an existing resource group.

CRS-34912: cannot delete the resource group type because it does not exist

Cause: An attempt to delete a resource group type failed because the resource group type specification did not identify an existing resource group type. Either there was no resource group type with the specified name, or no resource group type satisfied the specified filter.

Action: Reissue the command specifying the name of an existing resource group type or a filter that will select an existing resource group type.

CRS-34913: Restored the state of resource group '*string*' on server '*string*'

Cause: This is a status message.

Action: None

CRS-34914: Resource '*string*' is already a member of resource group '*string*'.

Cause: An attempt was made to add a resource to a group while the resource was already a member of another group.

Action: Reissue the command after removing the resource from its current group.

CRS-34915: cannot add local resource '*string*' to cluster resource group '*string*'

Cause: An attempt was made to add a local resource to a cluster resource group. Only cluster resources can be added to a cluster resource group.

Action: Reissue the command by specifying only cluster resources.

CRS-34916: cannot add cluster resource '*string*' to local resource group '*string*'

Cause: An attempt was made to add a cluster resource to a local resource group. Only local resources can be added to a local resource group.

Action: Reissue the command by specifying only local resources.

CRS-34917: Resource '*string*' cannot be added to resource group '*string*' because their '*string*' attribute values are not identical.

Cause: An attempt was made to add a resource to a resource group when the resource's profile is not compatible with the group.

Action: Reissue the command after updating the resource's profile to match the resource group's profile or specify a compatible resource group.

CRS-34918: cannot register resource group '*string*' because CRITICAL_RESOURCES attribute is not specified

Cause: An attempt was made to add a resource group without specifying the critical resources of the group.

Action: Reissue the command after designating some resource(s) as critical for the group.

CRS-34919: cannot register resource group '*string*' because critical resource '*string*' is not a member of the group

Cause: An attempt was made to add or update a resource group and an invalid resource was specified as critical.

Action: Reissue the command after correcting the CRITICAL_RESOURCES attribute of the group or specify the -force option.

CRS-34920: Dependency type '*string*' not supported for resource '*string*' because it is a member of resource group '*string*'

Cause: A dependency type was specified for a resource that is not supported when a resource is a member of a group.

Action: Reissue the command, specifying a supported dependency type.

CRS-34921: Resource '*string*' cannot have a dependency on resource '*string*' because they are not members of the same resource group.

Cause: An attempt was made to define a dependency between resources who are not members of the same resource group.

Action: Reissue the command, specifying a target resource that is member of the group.

CRS-34922: cannot modify internal resource group '*string*'

Cause: An attempt was made to modify an internal resource group created by Oracle Clusterware.

Action: Reissue the command by specifying an appropriate resource group.

CRS-34923: cannot delete internal resource group '*string*'

Cause: An attempt was made to delete an internal resource group created by Oracle Clusterware.

Action: Reissue the command by specifying an appropriate resource group.

CRS-34924: cannot start resource group '*string*' because it is incomplete

Cause: An attempt to start a resource group failed because it had not been completely populated.

Action: Check the RESOURCE_LIST and CRITICAL_RESOURCES attributes of the resource group, ensure they are not blank and retry.

CRS-34925: cannot start resource '*string*' outside of its resource group '*string*'

Cause: An attempt to start the indicated critical resource of the indicated resource group failed because critical resources cannot be started independently of the group.

Action: Start the resource group and that will start the critical resources of the group.

CRS-34926: cannot start resource '*string*' because its resource group '*string*' is not running

Cause: An attempt to start the indicated resource of the indicated resource group failed because the resource group was not online.

Action: Start the resource group before attempting to start the resources of the group.

CRS-34927: cannot stop resource '*string*' outside of its resource group '*string*'

Cause: An attempt to stop the indicated resource of the indicated resource group failed because it was a critical resource necessary for continuing group operation.

Action: To stop the indicated resource, stop the entire resource group.

CRS-34928: cannot modify critical resources of a resource group when it is running

Cause: An attempt was made to modify the CRITICAL_RESOURCES attribute of a resource group when it was running.

Action: Reissue the command after stopping the resource group on all servers.

CRS-34929: cannot remove critical resource '*string*' from resource group '*string*'

Cause: An attempt was made to remove a critical member resource of a resource group.

Action: Reconsider the removal. If it is necessary, update the CRITICAL_RESOURCES attribute of the group to categorize the resource as not critical, then reissue this command.

CRS-34930: cannot remove resource '*string*' from resource group '*string*' because another resource in the group '*string*' is dependent on it

Cause: An attempt was made to remove a member resource of a group when other group members were dependent on it.

Action: Reconsider the removal. If it is necessary, update other resources in the group to remove dependencies on the indicated resource, then reissue the command.

CRS-34931: cannot remove resource '*string*' from resource group '*string*' because it is dependent on other resources in the group

Cause: An attempt was made to remove a member resource of a group when it was dependent on other resources in the group.

Action: Reconsider the removal. If it is necessary, update the indicated resource to remove all dependencies, then reissue the command.

CRS-34932: cannot delete resource '*string*' because it is a member of resource group '*string*'

Cause: An attempt was made to delete a resource that was a member of a resource group.

Action: Reissue the command after removing the resource from the resource group.

CRS-34933: cannot start resource group '*string*' because it is in debug mode

Cause: An attempt to start the resource group failed because the DEBUG attribute was set to 1.

Action: Reissue the command after setting the DEBUG attribute of the resource group to 0.

CRS-34934: cannot set resource group '*string*' to debug mode because it is ONLINE

Cause: An attempt to update the DEBUG attribute of the resource group failed because it was running.

Action: Reissue the command after stopping the resource group on all servers.

CRS-34935: cannot clear debug mode of resource group '*string*' because some members are ONLINE

Cause: An attempt to update the DEBUG attribute of the resource group failed because some member resources were running.

Action: Reissue the command after stopping all member resources of the indicated group.

CRS-34939: Resource group '*string*' is not running on server '*string*'.

Cause: An attempt to relocate the resource group failed because it was not running on the specified server.

Action: Ensure that the correct server is specified and reissue the command.

CRS-34940: cannot add resource '*string*' to resource group '*string*' because the resource is online

Cause: An attempt to add a resource to a resource group was rejected because the resource was online.

Action: Reissue the command after stopping the resource on all servers.

CRS-34941: cannot delete resource group '*string*' because it has member resources

Cause: An attempt to delete a resource group failed because it had member resources.

Action: Reissue the command after removing all resources from the group.

CRS-34942: User '*string*' does not have sufficient permissions to update the resource group '*string*'.

Cause: An attempt to update the resource group of a resource was rejected because the user did not have update privileges on the resource group.

Action: Reissue the command after update privileges have been granted on the resource group.

CRS-34943: cannot add resource '*string*' to resource group '*string*' because the resource group owner '*string*' cannot operate on the resource

Cause: An attempt to add a resource to a resource group was rejected because the resource group owner did not have execute privileges on the resource.

Action: Reissue the command after granting execute privileges on the resource to the resource group owner.

CRS-34944: Resource group '*string*' cannot be started because the critical resource '*string*' is disabled.

Cause: An attempt to start the indicated resource group failed because a critical resource was disabled.

Action: Reissue the command after enabling the indicated critical resource.

CRS-34945: cannot configure attribute '*string*' because the resource is a member of a resource group

Cause: An attempt to update an attribute of a member resource was rejected because that attribute cannot be configured at an individual resource level.

Action: Reissue the command after removing the indicated attribute.

CRS-34946: Invalid dependency modifier '*string*' specified for a group member resource.

Cause: An attempt to configure the dependencies of a resource was rejected because the indicated modifier was invalid for resources belonging to a group.

Action: Reissue the command without the indicated modifier in the dependency specification of the resource.

CRS-34947: Resource group '*string*' is already running on '*string*'.

Cause: This is a status message.

Action: None

CRS-34948: cannot start resource group '*string*' because critical resource '*string*' is not a member of the group

Cause: An attempt was made to start a resource group and an invalid resource was specified as critical.

Action: Reissue the command after correcting the CRITICAL_RESOURCES attribute of the group.

CRS-34949: resource group instance '*string*' is in unknown state on server '*string*'

Cause: An attempt to enable a resource group was rejected because the resource group instance was in an inconsistent state.

Action: Reissue the command after ensuring that all of the resource group instances and member resource instances are stopped.

CRS-34950: cannot relocate instance of resource group '*string*' because it is not running

Cause: An attempt was made to relocate an instance of a resource group that was not running.

Action: Reissue the command without selecting the specified instance.

CRS-34951: cannot relocate instance of resource '*string*' because it is a member of resource group '*string*'

Cause: An attempt to explicitly relocate an instance of a resource failed because the resource was a member of a resource group.

Action: Reevaluate the request or relocate the resource group.

CRS-34959: Oracle Grid Infrastructure cannot be patched in this manner when the cluster has only one node.

Cause: An attempt was made to patch Oracle Grid Infrastructure home in an unsupported configuration.

Action: Retry when at least two nodes are online.

CRS-34960: leaving resource '*string*' on server '*string*' while patching Oracle Grid Infrastructure

Cause: This is a status message.

Action: None

CRS-34961: cannot patch Oracle Grid Infrastructure without an ASM instance running on another node

Cause: An attempt to patch the Oracle Grid Infrastructure home was rejected because there was no available ASM instance running on another node of the cluster.

Action: Retry when an ASM instance is running on any other node of the cluster.

CRS-34962: cannot add resource '*string*' to resource group '*string*' because the resource group has a dependency on that resource

Cause: An attempt to add a resource to a resource group was rejected because the resource group has start or stop dependency on that resource.

Action: Remove the dependency and try again.

CRS-40002: No activities match the query.

Cause: There were no activities found in the cluster activity log that matched the query provided.

Action: Verify the query parameters and retry.

CRS-40003: Cluster Synchronization Services is unavailable.

Cause: The requested operation failed because of a failure to communicate with the Cluster Synchronization Services daemon.

Action: Run the command 'crsctl check css' to determine whether the Cluster Synchronization Services daemon is properly configured and is running.

CRS-40004: authorization wallet not found

Cause: An attempt to access the cluster activity log failed because the authorization wallet could not be found.

Action: Contact Oracle Support Services.

CRS-40005: internal error

Cause: An unexpected condition was detected in the cluster activity log module.

Action: Contact Oracle Support Services.

CRS-40006: unable to allocate process memory

Cause: The requested operation failed because of a failure to allocate process memory. This was probably due to a lack of system resources.

Action: Correct the system memory resources problem and retry. If this does not appear to be caused by an operating system issue, contact Oracle Support Services.

CRS-40007: unable to connect to the Event Manager daemon

Cause: The requested operation failed because of a failure to communicate with the Event Manager daemon.

Action: Run the command 'crsctl check evmd' to determine whether the Event Manager daemon is properly configured and is running.

CRS-40008: insufficient permission for accessing the cluster activity log

Cause: A non-privileged user attempted to view or modify the cluster activity log.

Action: Issue the command again as a privileged user.

CRS-40009: invalid filter expression '*string*'

Cause: An attempt to access the cluster activity log failed because the specified filter was invalid.

Action: Correct the syntax of the filter being provided and try again.

CRS-40010: invalid regular expression '*string*'

Cause: An attempt to access the cluster activity log failed because the specified regular expression was invalid.

Action: Correct the syntax of the regular expression being provided and try again.

CRS-40011: unable to connect to the Oracle Cluster Registry: *string*

Cause: An attempt to communicate with the Oracle Cluster Registry (OCR) or the Oracle Local Registry (OLR) failed.

Action: Run the command 'crsctl check crs' to determine whether Cluster Ready Services or Oracle High Availability Services are online.

CRS-40012: Cluster activity log is not supported in this configuration.

Cause: The Grid Infrastructure Management Repository was not configured.

Action: Re-Install Grid Infrastructure and ensure that the Grid Infrastructure Management Repository is configured.

CRS-40013: cluster activity log maximum size below minimum of 100 MB

Cause: An attempt to set the maximum size of the cluster activity log specified a value less than the minimum of 100 MB.

Action: Specify a maximum size of 100 MB or more.

CRS-40014: invalid timestamp '*string*'

Cause: An attempt to access the cluster activity log failed because the specified timestamp was invalid.

Action: Reissue the command with a valid timestamp. Refer to the command line help for more information.

CRS-40015: invalid duration '*string*'

Cause: An attempt to access the cluster activity log failed because the specified duration was invalid.

Action: Reissue the command with a valid duration. Refer to the command line help for more information.

CRS-40016: Setting the maximum size for cluster activity log failed.

Cause: The cluster activity log maximum size could not be modified.

Action: See the accompanying error message and respond accordingly.

CRS-40017: Setting the retention time for cluster activity log failed.

Cause: The cluster activity log retention time could not be modified.

Action: Examine the accompanying error messages and respond accordingly.

CRS-40018: invalid combination of parameters 'timestamp_before', 'timestamp_after' and 'timestamp_duration'

Cause: The parameters 'timestamp_before', 'timestamp_after' and 'timestamp_duration' were all specified as part of the cluster activity log query.

Action: Retry the cluster activity log query with a valid parameter combination.

CRS-40019: Resize operation for cluster activity log failed because the maximum size or retention time specified was too large. Detailed error: 'string'

Cause: The value specified for the maximum size or retention time of the cluster activity log was too large and could not be accommodated.

Action: Specify a lower value for maximum size or retention time.

CRS-40020: The operation will delete all entries in cluster activity log. Rerun with '-f' option.

Cause: The operation to shrink the cluster activity log was issued without the '-f' option.

Action: If appropriate, reissue the command with the '-f' option.

CRS-40021: The cluster activity log operation failed. Detailed error: 'string'

Cause: The operation attempted on the cluster activity log failed. The accompanying error message provides detailed failure information.

Action: Examine the accompanying error message, resolve the issues indicated there, and then retry the operation.

CRS-40022: The cluster activity log data cannot be queried. Detailed error: 'string'

Cause: The cluster activity log data could not be accessed because the cluster activity log repository was being restructured.

Action: Retry the operation after 5 minutes.

CRS-41003: unable to get the last active timestamp

Cause: The crsctl query failed because the last active timestamp could not be retrieved. Either the clusterware stack was down, or the requesting user was not root (UNIX) or Administrator (WINDOWS).

Action: Bring up the clusterware stack using the command 'crsctl start crs' and retry the query or retry the query as a privileged user.

CRS-41004: Last active timestamp query failed for node string.

Cause: The crsctl query failed to retrieve the last active timestamp for the indicated node.

Action: Examine the accompanying error message, address issues reported and retry the query.

CRS-41006: Node string is not a leaf node.

Cause: An attempt to list the last active timestamp for the indicated node was rejected because that node was not a leaf node.

Action: Rerun the command from a leaf node or specifying a leaf node that is a cluster member or was a cluster member.

CRS-41016: failure getting the cluster configuration

Cause: An attempt to get additional configuration information from the Grid Infrastructure Management Repository (GIMR) failed. This is an internal error.

Action: Contact Oracle Support Services.

CRS-41017: permission to retrieve the cluster configuration denied

Cause: An attempt to retrieve the configuration failed because the stack was down and permission to retrieve the cluster configuration with the stack down was denied.

Action: Run the query when the Oracle Clusterware stack is up or as a privileged user such as root (on UNIX) or administrator (on Windows).

CRS-41018: failure getting the local node number from Cluster Synchronization Services (return code *number*)

Cause: An attempt to execute the command 'crsctl get node role status' failed because Cluster Synchronization Services (CSS) was not running.

Action: Ensure that the CSS daemon is running on this node, and then retry the operation.

CRS-41019: the active status role of node '*string*' is unknown

Cause: An attempt to execute the command 'crsctl get node role status' failed for the indicated node because Cluster Synchronization Services (CSS) was not running.

Action: Ensure that CSS daemon is running on the indicated node, and then retry the operation.

CRS-41021: Cluster class is already set to '*string*'.

Cause: A 'crsctl set cluster class' command specified an already configured cluster class.

Action: Retry the operation, specifying a different cluster class.

CRS-41022: The cluster class is successfully set to '*string*'.

Cause: A 'crsctl set cluster class' command completed successfully.

Action: None

CRS-41033: communication error in contacting Oracle Clusterware processes

Cause: An attempted CRCTL command failed because of a problem in the parser. This is an internal error.

Action: Contact Oracle Support Services.

CRS-41041: Reading shared memory statistics for the process '*string*' failed

Cause: An attempt was made to read the shared memory segment of the process // which did not exist.

Action: Ensure that the process exists and execute the command.

CRS-41053: checking Oracle Grid Infrastructure for file permission issues

Cause: Oracle Grid Infrastructure stack failed to start. This could be due to a file permission issue.

Action: Correct all the permission issues reported, if any, to eliminate this as the possible cause, and then retry.

CRS-41054: Invalid version of ipmiutil. Version *string* detected, version *string* or above required.

Cause: The binary path provided was to an unsupported version of ipmiutil tool.

Action: Specify a binary path to a supported version of ipmiutil tool.

CRS-41055: insufficient permission to run the command

Cause: An attempt was made to run the command by a user who was not an Oracle Grid Infrastructure user or root (UNIX) or Administrator (WINDOWS).

Action: Rerun the command as a correct user.

CRS-41057: Unable to verify ipmiutil version number. Version *string* or above is required. Some Intelligent Platform Management Interface features may not work as expected.

Cause: The binary path provided was to an unsupported version of ipmiutil tool.

Action: Specify a binary path to a supported version of ipmiutil tool.

CRS-42002: operation not supported for single-instance high availability configurations

Cause: An attempt was made to execute a command to rename a cluster, which was not supported in the current single-instance high availability configuration.

Action: None

CRS-42003: operation only supported for standalone cluster

Cause: An attempt to rename a cluster was rejected because that operation was only supported for standalone cluster configurations.

Action: None

CRS-42005: failed to set the cluster name

Cause: There was an internal error while setting the cluster name.

Action: Contact Oracle Support Services.

CRS-42006: cluster name is invalid

Cause: An attempt to rename a cluster was rejected because an invalid cluster name was specified.

Action: Rerun the command with a valid cluster name. A valid cluster name should be at least one character long but no more than 15 characters in length. The cluster name consists of alphanumeric characters and the hyphen (-) character (a..z,A..Z,0..9,-). It cannot begin or end with the hyphen (-) character. It cannot begin with a numeric character.

CRS-42007: operation not supported for clusters where an RHP Server or an RHP Client is configured

Cause: An attempt to rename a cluster was rejected because that operation was not supported for clusters where an RHP Server or an RHP Client is configured.

Action: None

CRS-42008: operation not supported for clusters where Quality of Service Management is configured and is in use

Cause: An attempt to rename a cluster was rejected because that operation was not supported for clusters where Quality of Service Management was configured and was in use.

Action: None

CRS-42009: failed to rename the cluster because the Grid Infrastructure Management Repository (GIMR) is configured remotely

Cause: An attempt to rename a cluster was rejected because that operation was not supported for clusters where GIMR is configured remotely.

Action: None

CRS-42010: failed to rename the cluster because the Grid Infrastructure Management Repository (GIMR) is providing service for other clusters

Cause: An attempt to rename a cluster was rejected because that operation was not supported for clusters where GIMR provides service for other clusters.

Action: None

CRS-42216: No interfaces are configured on the local node for interface definition *string*; available interface definitions are *string*.

Cause: Grid Interprocess Communication (GIPC) failed to find any interfaces on the local node for interface definitions configured in the Grid Plug and Play (GPnP) profile.

Action: Configure the GPnP profile with the correct interface definitions or configure the local node interfaces according to the GPnP profile.

CRS-42300: Warning: Diskmon capability initialization (save and set) failed. [loc: *string*; syscall: *string*; error: *number*]

Cause: Diskmon was unable to save and set capabilities needed to execute as an Oracle user.

Action: This limits diskmon from executing certain Reliable Datagram Socket (RDS) commands when required. Contact Oracle Support services.

CRS-42301: Diskmon encountered split-brain with database node '*number*' in monitoring storage server '*string*'.

Cause: Diskmon could not establish healthy heartbeat with a storage server while other database nodes were able to at the same time.

Action: Contact Oracle Support services.

CRS-42302: Diskmon encountered split-brain with database node '*number*' during the membership reconfiguration.

Cause: Diskmon on the leader node receives a cell health check response during reconfiguration.

Action: Contact Oracle Support services.

CRS-42303: Diskmon encountered split-brain with database node '*number*' over RCFG (reconfiguration) leader during the membership reconfiguration.

Cause: Diskmon terminated when there were two reconfiguration leaders.

Action: Contact Oracle Support Services.

CRS-46854: Successfully restarted resource '*string*'.

Cause: An attempt to restart a failed resource succeeded.

Action: None

CRS-46858: This command cannot be executed from a node which is not member of the cluster.

Cause: An attempt to execute a command from a node that is not a member of the cluster failed.

Action: Execute the command from a node which is member of the cluster.

CRS-46864: The specified value of the attribute '*string*' of '*string*' exceeds the maximum allowed size of *number* bytes.

Cause: Size of the attribute value string exceeded the maximum allowed size.

Action: Retry the operation, providing a value smaller than the maximum allowed size.

CRS-48000: Unable to communicate with the Oracle High Privileged Mode services daemon.

Cause: Possibly due to non running of the corresponding Windows service.

Action: Start the service using Windows service control manager.

CRS-48001: Oracle High Privileged Mode services daemon received an invalid argument.

Cause: Invalid argument was supplied.

Action: Resubmit with valid parameters.

CRS-48002: Failed to allocate memory.

Cause: Memory allocation request failed.

Action: Try restarting the service using Windows service control manager. If problem persists, contact Oracle Support Services.

CRS-48003: Starting of the requested Windows service failed.

Cause: Oracle High privileged Mode services experienced a failure in starting the service.

Action: See the accompanying Windows specific error and correct the problem.

CRS-48004: Creation of Windows symbolic links failed.

Cause: Oracle High Privileged Mode services experienced a failure in creating symbolic links.

Action: See the accompanying Windows specific error and correct the problem.

CRS-48005: Creation of the requested Windows service failed.

Cause: Oracle High Privileged Mode service experienced a failure in creating Windows service.

Action: See the accompanying Windows specific error and correct the problem.

CRS-48101: This command is not supported on this platform.

Cause: The command to query driver versions was not supported because Oracle drivers were not supported on this platform.

Action: None

CRS-48102: Operating system user '*string*' does not exist on the server '*string*'.

Cause: User who ran the command did not exist on the specified server of the cluster.

Action: Add the user or login with the right credentials and ensure user exists on all members of the cluster.

CRS-48103: Operating system group '*string*' does not exist on the server '*string*'.

Cause: User's group to which the running user belonged to did not exist on the specified server of the cluster.

Action: Create the group and ensure group exists on all members of the cluster.

CRS-48104: Failed to authenticate the operating system user or group for the entity '*string*'.

Cause: The specified operating system user or group did not exist on one of the nodes in the cluster. Oracle Cluster Ready Services required that all users and groups used by the entity it managed existed on each server of the cluster. Check the alert.log for user or group details.

Action: Add the specified operating user or group on the specified server.

CSKM-01000 to CSKM-01112

CSKM-01000: invalid command line option {0}

Cause: The requested operation was rejected because of the indicated command line option was invalid.

Action: Review the command usage and retry using valid options.

CSKM-01001: invalid number of arguments for the command line option {0}

Cause: The requested operation was rejected because of the number of arguments supplied was invalid for the specified command line option.

Action: Review the command usage and retry using the correct number of arguments.

CSKM-01002: invalid input arguments for the command line option {0}

Cause: The requested operation was rejected because the arguments supplied were invalid for the specified command line option.

Action: Review the command usage and retry using valid arguments.

CSKM-01003: Unexpected error: {0}

Cause: The requested command execution failed unexpectedly. The appended error from the Java Virtual Machine provides detailed failure information.

Action: Retry the command, and if the error persists, contact Oracle Support Services.

CSKM-01004: Request failed; Cluster Ready Services not available.

Cause: Command execution failed because Cluster Ready Services was not running on the local node.

Action: Start Cluster Ready Services on the local node and retry the command.

CSKM-01005: Failed to create wallet: {0}

Cause: An error occurred while performing wallet operation.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry, and if the error persists, contact Oracle Support Services.

CSKM-01006: Failed to perform operation on wallet: {0}

Cause: An error occurred while performing wallet operation.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry, and if the error persists, contact Oracle Support Services.

CSKM-01102: error while performing node rekey action

Cause: A node rekey action failed because of an unexpected error. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry the command.

CSKM-01104: error while exporting cluster trusted certificates to file {0}

Cause: An attempt to export the cluster trusted certificates failed because of an unexpected error. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry the command.

CSKM-01106: error while generating node key in file {0}

Cause: An attempt to generate the node key failed because of an unexpected error. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry the command.

CSKM-01108: error while printing cluster root public certificate to file {0}

Cause: An attempt to print the cluster root public certificate failed because of an unexpected error. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry the command.

CSKM-01110: error while generating cluster root certificate

Cause: An attempt to generate the cluster root certificate failed because of an unexpected error. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry the command.

CSKM-01112: error while copying the JRE cacerts to file {0}

Cause: An attempt to copy the JRE cacerts file failed because of an unexpected error. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages for details, resolve the issues raised and retry the command.

DBT-00001 to DBT-50003

DBT-00001: Error encountered in initialization of configuration tool.

Cause: An unexpected error occurred while initializing the configuration tool.

Action: Refer to the logs or contact Oracle Support Services. *FQN:

oracle.assistants.common.base.resource.AssistantBaseErrorCode.ASSISTANT_TOOL_INIT_FAILED_ERR

DBT-00002: The file *string* is not accessible.

Cause: Current user may not have read permission.

Action: Ensure that the current user has permission to read the file %s. *FQN:

oracle.assistants.common.base.resource.AssistantBaseErrorCode.FILE_NOT_ACCESSIBLE_ERR

DBT-00003: The file *string* is not valid.

Cause: Syntactically incorrect response file. Either unexpected variables are specified or expected variables are not specified in the file.

Action: Refer the latest product specific response file template *FQN:

oracle.assistants.common.base.resource.AssistantBaseErrorCode.INVALID_FILE_ERR

DBT-00004: The file *string* is not found.

Cause: The file %s is either not accessible or does not exist.

Action: Give a correct file location. (Note: relative path is not supported) *FQN:

oracle.assistants.common.base.resource.AssistantBaseErrorCode.FILE_NOT_FOUND_ERR

DBT-00005: The format of the given response file is not supported.

Cause: The response file format was incorrect or not supported.

Action: Use response files of type %s. *FQN:

oracle.assistants.common.base.resource.AssistantBaseErrorCode.UNKNOWN_RESPONSE_FILE_FORMAT_ERR

DBT-00006: The logging directory could not be created.

Cause: %s does not have the required privileges or is invalid.

Action: Verify path is valid and has the right privileges. *FQN:

oracle.assistants.common.base.resource.AssistantBaseErrorCode.LOGGINGDIR_CREATION_FAILED_ERR

DBT-00007: User does not have the appropriate write privileges.

Cause: User does not have the required write privileges on %s .

Action: Verify user privileges. *FQN:

oracle.assistants.common.base.resource.AssistantBaseErrorCode.USER_INSUFFICIENT_WRITE_PRIVILEGES_ERR

DBT-00008: Current user *string* is not an administrator user.

Cause: The user running the assistant application does not have administrator privilege.

Action: Run the assistant application with an administrator user. *FQN:
oracle.assistants.common.base.resource.AssistantBaseErrorCode.USER_IS_NOT_A
DMIN_ERR

DBT-00009: Unable to configure logging for the application.

Cause: The logging directory is either null or empty.

Action: n/a *FQN:
oracle.assistants.common.base.resource.AssistantBaseErrorCode.LOGGINGDIR_NU
LL_ERR

DBT-00101: The variable (*string*) cannot be removed.

Cause: The specified variable has been referred in the value of one or more input fields. One such referenced value is: %s

Action: Either update the value of all referenced input fields to appropriate value or retain the variable. *FQN:
oracle.assistants.common.base.resource.AssistantBaseErrorCode.REFERENCE_FO
UND_FOR_REMOVED_VARIABLE_ERR

DBT-00102: Incorrect format is used to reference a variable in the value (*string*). Use *string*<variable_name>*string* format to refer variables in the value.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.base.resource.AssistantBaseErrorCode.INCORRECT_VA
RIABLE_FORMAT_FOUND_ERR

DBT-00103: The referenced variable (*string*) is not defined.

Cause: Either invalid variable name is used in the value (%s) or the specified variable is not defined.

Action: Use already defined variables to specify a value. *FQN:
oracle.assistants.common.base.resource.AssistantBaseErrorCode.UNKNOWN_VARI
ABLE_FOUND_ERR

DBT-00104: Unable to load the variables from the specified file (*string*).

Cause: Either specified file doesnt have readable permission or the file is not in properties file format.

Action: Refer to the logs to correct the issue or specify alternative variables file location. *FQN:
oracle.assistants.common.base.resource.AssistantBaseErrorCode.UNABLE_TO_LO
AD_VARIABLES_FROM_FILE_ERR

DBT-00105: Invalid initialization parameters xml file ({0}). Either application could not detect initialization parameters xml file or contains syntactically incorrect information

Cause: n/a

Action: Contact Oracle Support Services or refer to the software manual. *FQN:
 oracle.assistants.common.base.resource.AssistantBaseErrorCode.INVALID_INIT_PARAMS_XML_ERR

DBT-00106: Error in loading the Initialization parameters file.

Cause: n/a

Action: Contact Oracle Support Services or refer to the software manual. *FQN:
 oracle.assistants.common.base.resource.AssistantBaseErrorCode.INIT_PARAMS_XML_LOAD_ERR

DBT-00108: Incorrect value passed to a command line argument.

Cause: Exception encountered : %s

Action: n/a *FQN:
 oracle.assistants.common.base.resource.AssistantBaseErrorCode.INCORRECT_ARGUMENT_VALUE_ERR

DBT-00201: Invalid *string* wallet location *string*.

Cause: The specified %s wallet location does not exist, is not a directory, or has no files in it.

Action: Specify a valid location for the %s wallet. This location must be a directory containing the wallet files. *FQN:
 oracle.assistants.common.base.resource.AssistantBaseErrorCode.INVALID_WALLET_LOCATION_ERR

DBT-01402: Unable to check whether the specified node (*string*) is part of any existing server pools in the Oracle Grid Infrastructure.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_GET_SERVER_POOLS_FOR_NODE_WARN

DBT-01403: Creation of server pool (*string*) will have effect on the following resources - *string*.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.SERVER_POOL_CREATION_EFFECTS_RESOURCES_ERR

DBT-05501: There are no Admin Managed databases detected on the system.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.ERROR_GETTING_ADMIN_MANAGED_DBS_WARN

DBT-05502: There are no Single Instance databases detected on the system.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.ERROR_GETTING_SI_DBS_WARN

DBT-05503: The Oracle Grid Infrastructure is not running on the system.

Cause: The Oracle Grid Infrastructure is not configured or not running on the system.

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.GRID_INFRASTRUCTURE_I
S_NOT_RUNNING_WARN

DBT-05504: Unable to create sql script output file under the directory (string).

Cause: The specified location is not a directory or user does not have a write permission to create log file.

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.INVALID_SQL_OUTPUT_LO
G_DIR_ERR

DBT-05505: Unable to execute sql script: (string).

Cause: n/a

Action: Refer to the log file for more information. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_EXECUTE_Q
UERY_OR_COULD_NOT_CONNECT_ERR

DBT-05506: Unable to load the details of the database (string).

Cause: Unable to connect to the database or unable to execute sql statements.

Action: Refer to the log file for more information. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_LOAD_DBDE
TAILS_ERR

DBT-05507: Unable to detect the configured redo log groups for the database instance (string).

Cause: Error occurred while loading the configured redo log groups details.

Action: Ensure that the database is running. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_DETECT_RE
DO_LOG_GROUPS_WARN

DBT-05508: Unable to detect the configured undo tablespace for the database instance (string).

Cause: Error occurred while loading the configured undo tablespace details.

Action: Ensure that the database is running. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_DETECT_UN
DO_TABLESPACE_WARN

DBT-05509: Failed to connect to the specified database (string).

Cause: OS Authentication might be disabled for this database (%s).

Action: Specify a valid sysdba user name and password to connect to the database.

*FQN:

oracle.assistants.common.resource.AssistantErrorCode.FAILED_TO_CONNECT_TO
_DB_WARN

DBT-05510: Clone template cannot be created with remotely running databases.

Cause: n/a

Action: Specify the SID of locally running database to create a clone template. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.REMOTE_CONN_NOT_ALLOWED_FOR_CLONE_TEMPLATE_ERR

DBT-05511: Specified database (*string*) does not exist.

Cause: n/a

Action: Provide an existing database. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.DB_DOES_NOT_EXIST_ERR

DBT-05512: Unable to detect Cluster managed databases on the system.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.ERROR_GETTING_CLUSTER_MANAGED_DBS_WARN

DBT-05513: Failed to connect to the database (*string*).

Cause: Specified database credential is not valid to connect to the database (%s).

Action: Specify a valid sysdba user name and password to connect to the database. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.FAILED_TO_CONNECT_TO_DB_USING_CREDENTIALS_WARN

DBT-05514: Failed to connect to the database (*string*).

Cause: Specified connection string (%s) or SYSDBA credential is not valid to connect to the database.

Action: Specify a valid connection string or SYSDBA credential to connect to the database.
 *FQN:

oracle.assistants.common.resource.AssistantErrorCode.FAILED_TO_CONNECT_TO_DB_USING_CONNECTION_STRING_ERR

DBT-05515: Failed to load the control file attributes.

Cause: Error occurred while loading the control file attributes from the database.

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_GET_CONTROLFILE_ATTRIBUTES_WARN

DBT-05516: Failed to load database details.

Cause: Database info object is null.

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.INVALID_DBINFO_OBJECT_ERR

DBT-05517: Unable to execute script (*string*).

Cause: n/a

Action: Refer to the log file for more information. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_EXECUTE_SCRIPT_ERR

DBT-05518: The tablespace selected (*string*) does not exist in the database.

Cause: n/a

Action: Select an existing tablespace. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.TABLESPACE_NOT_EXIST_ERR

DBT-05519: Failed to connect to the database using the dblink (*string*).

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.FAILED_TO_CONNECT_TO_DB_USING_DBLINK_ERR

DBT-05520: Failed to drop the database link (*string*).

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.FAILED_TO_DROP_DBLINK_ERR

DBT-05601: The list of nodes in the Oracle Grid Infrastructure could not be retrieved.

Cause: n/a

Action: Verify if the Oracle Grid Infrastructure is configured and running on the system. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.NODES_RETRIEVAL_WARN

DBT-05602: Unable to determine the cluster mode of the configured Oracle Grid Infrastructure.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.CLUSTER_MODE_RETRIEVAL_ERR

DBT-05603: The list of hub nodes in the Oracle Grid Infrastructure could not be retrieved.

Cause: n/a

Action: Verify if Oracle Grid Infrastructure is configured and running on the system. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.HUB_NODES_RETRIEVAL_ERR

DBT-05604: Unable to retrieve the cluster node numbers from the Oracle Grid Infrastructure.

Cause: n/a

Action: Ensure that Oracle Grid Infrastructure is running on the local node. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.NODE_NUMBER_RETRIEVAL_WARN

DBT-05605: The list of Leaf nodes in the Oracle Grid Infrastructure could not be retrieved.

Cause: n/a

Action: Verify if Oracle Grid Infrastructure is configured with leaf nodes and running on the system. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.LEAF_NODES_RETRIEVAL_WARN

DBT-05701: The Oracle home user account verification failed.

Cause: n/a

Action: Use valid Oracle home user account credentials. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.VALID_WINDOWS_USER_WARN

DBT-05751: '*string*' did not resolve to an IP address.

Cause: Unable to detect the IP address for the host name.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INVALID_HOST_NAME_ERR

DBT-05752: '*string*' could not be resolved using TCP/IP host name lookup.

Cause: n/a

Action: Provide valid host name that is resolvable using TCP/IP host name lookup. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.HOST_NAME_NOT_RESOLVED_ERR

DBT-05801: There are no ASM disk groups detected.

Cause: ASM may not be configured, or ASM disk groups are not created yet.

Action: Create ASM disk groups, or change the storage location to File System. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.ASM_NOT_CONFIGURED_ERR

DBT-05802: Creating password file on diskgroup (*string*) would fail since it requires compatible.asm of version (*string*) or higher. Current compatible.asm version is '*string*'.

Cause: n/a

Action: Choose a diskgroup with correct value for compatible.asm attribute. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INCOMPATIBLE_ASM_DISKGROUP_VERSION_ERR

DBT-05803: Unable to connect to ASM instance using connection string (*string*).

Cause: The specified ASMNMP password is incorrect or the ASM instance is not running.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.FAILED_TO_CONNECT_TO_ASM_ERR

DBT-05804: The selected diskgroup (*string*) is not compatible to place the database related files.

Cause: The diskgroup (%s) is having \compatible.rdbms\ attribute set to %s. But database can be created on a diskgroup which has this attribute set to '%s' or lower version.

Action: Update the \compatible.rdbms\ attribute in the diskgroup selected or specify a different diskgroup. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INCOMPATIBLE_RDBMS_VERSION_OF_DISKGROUP_ERR

DBT-05805: The value (*string*) specified for the initialization parameter 'compatible' is lower than the RDBMS compatibility (*string*) set in the ASM disk group (*string*).

Cause: n/a

Action: Choose a template with correct value for the 'compatible' initialization parameter. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.INCOMPATIBLE_INIT_PARAMETER_VERSION_ERR

DBT-05806: An older ASM instance was found.

Cause: Automatic Storage Management (ASM) %s instance is found.

Action: Upgrade the existing ASM instance to version %s.. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.OLDER_ASM_INSTANCE_VERSION_FOUND

DBT-05900: Unable to check if Oracle home user password is required or not.

Cause: n/a

Action: Check the configuration of the Oracle home user in the Oracle home. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.ORACLE_HOME_USER_PASSWORD_REQUIREMENT_CHECK_ERR

DBT-05901: Unable to detect Oracle home user.

Cause: n/a

Action: Check the configuration of the Oracle home user in the Oracle home. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.ORACLE_HOME_USER_RETRIEVAL_ERR

DBT-05902: The owner of the Oracle home (*string*) could not be determined.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.ORACLE_HOME_USER_NOT_FOUND_ERR

DBT-06001: '*string*' cannot be empty.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.EMPTY_OR_NULL_VALUE_ERR

DBT-06002: Selected disk group (*string*) is not found.

Cause: n/a

Action: Specify a disk group that is accessible from the system. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.ASM_DISK_GROUP_NOT_FOUND_ERR

DBT-06003: The selected disk group (*string*) does not have sufficient space available.

Cause: The selected disk group has only (%s%s) of space.

Action: Use Automatic Storage Management Configuration Assistant to add more disks to the selected disk group, or create a new disk group with at least (%s%%s) of space. *FQN: oracle.assistants.common.resource.AssistantErrorCode.INSUFFICIENT_SPACE_IN_ASM_DISKGROUP_ERR

DBT-06004: The File System type of the specified location (*string*) is not supported.

Cause: Current Oracle home is not an Enterprise Edition home. Only ACFS location or ASM storage are supported to create database in a non-Enterprise Edition Oracle home.

Action: n/a *FQN: oracle.assistants.common.resource.AssistantErrorCode.FS_LOCATION_NOT_SUPPORTED_FOR_NON_EE_HOME_ERR

DBT-06005: '*string*' contains invalid characters.

Cause: n/a

Action: Choose a '%s' containing only alphanumeric characters and a few additional characters that are allowed for your platform. *FQN: oracle.assistants.common.resource.AssistantErrorCode.ASSISTANT_COMMON_BADCHARS_ERR

DBT-06006: Unable to create directory: (*string*).

Cause: Proper permissions are not granted to create the directory or there is no space left in the volume.

Action: n/a *FQN: oracle.assistants.common.resource.AssistantErrorCode.ASSISTANT_COMMON_DIRECTORY_CREATION_ERR

DBT-06007: The specified location (*string*) is invalid.

Cause: The specified location is not found on the system or is detected to be a file.

Action: n/a *FQN: oracle.assistants.common.resource.AssistantErrorCode.ASSISTANT_COMMON_INVALID_FILE_STORAGE_LOCATION_ERR

DBT-06008: The path specified for '*string*' is invalid.

Cause: Path specified for '%s' contains one or more directories which exceeds maximum folder name length.

Action: Specify the location with directory name that is not greater than (%s) characters. *FQN: oracle.assistants.common.resource.AssistantErrorCode.ASSISTANT_COMMON_FOLDER_NAME_LENGTH_EXCEEDED_ERR

DBT-06009: The location specified (*string*) for '*string*' is not shared across cluster nodes (*string*).

Cause: n/a

Action: n/a *FQN: oracle.assistants.common.resource.AssistantErrorCode.ASSISTANT_COMMON_FILE_STORAGE_LOCATION_NOT_SHARED_ERR

DBT-06010: The specified location (*string*) is on Oracle Clustered File System.

Cause: n/a

Action: Oracle Clustered File System is not a supported file system for Oracle RAC database. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.ASSISTANTS_COMMON_LOCATION_ON_OCFS_ERR

DBT-06011: '*string*' specified (*string*) is on ASM. Custom sub directories cannot be created on ASM for this configuration.

Cause: n/a

Action: Specify ASM diskgroup without sub directories for '%s'. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.ASSISTANT_COMMON_INVALID_ASM_STORAGE_LOCATION_ERR

DBT-06012: The current user does not have permissions to operate the ACFS resource for location (*string*).

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.CURRENT_USER_HAS_NO_PERMISSION_ON_ACFS_ERR

DBT-06013: The size of the datafile (*string*)MB is less than the required minimum size (*string*)MB.

Cause: Bigfile option is selected for the tablespace of the datafile. To create tablespace with bigfile option, the datafile needs to be greater than %sMB size.

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.BIGFILE_TABLESPACE_MIN_DATA_FILE_SIZE_ERR

DBT-06101: There is no available free port in the range (*string*)-(*string*) across the cluster nodes: (*string*).

Cause: n/a

Action: Verify the availability of free port across cluster nodes. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.NO_AVAILABLE_FREE_PORT_IN_RANGE_ERR

DBT-06102: Unable to retrieve database common name from the wallet folder: (*string*).

Cause: n/a

Action: Refer to the log file for more information. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_GET_DATABASE_CN_FROM_WALLET_ERR

DBT-06103: The port (*string*) is already in use.

Cause: n/a

Action: Specify a free port. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.PORT_NOT_AVAILABLE_ERR

DBT-06104: Unable to retrieve configured listeners from Oracle Grid Infrastructure home.

Cause: n/a

Action: Refer log file for more information. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_GET_GRID_HOME_LISTENERS_WARN

DBT-06201: '*string*' password cannot be empty.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.PASSWORD_NOT_SUPPLIED_ERR

DBT-06202: '*string*' password and '*string*' confirm password do not match.

Cause: n/a

Action: Ensure that both '%s' password and '%s' confirm password are same. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.PASSWORDS_NOT_MATCH_ERR

DBT-06203: '*string*' is not specified.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.ARG_VALUE_NOT_SUPPLIED_ERR

DBT-06204: The specified DBSNMP password is not valid. Verify and try again.

Cause: Unable to connect to the database with the specified password.

Action: Verify the correctness of the password and the database status. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INVALID_DBSNMP_PASSWORD_ERR

DBT-06205: The '*string*' password cannot be empty.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.PASSWORD_IS_EMPTY_ERR

DBT-06206: The '*string*' password length cannot exceed *string* characters.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.PASSWORD_EXCEED_LENGTH_ERR

DBT-06207: The '*string*' password entered is invalid.

Cause: Passwords should not contain %s.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.PASSWORD_INVALID_ERR

DBT-06208: The '*string*' password entered does not conform to the Oracle recommended standards.

Cause: a. Oracle recommends that the password entered should be at least %s characters in length, contain at least 1 uppercase character, 1 lower case character and 1 digit [0-9].
b. The password entered is a keyword that Oracle does not recommend to be used as password

Action: Specify a strong password. If required refer Oracle documentation for guidelines. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.PASSWORD_COMPLEXITY_ERR

DBT-06209: The specified ASMSNMP password is not valid. Verify and try again.
 Cause: Unable to connect to the ASM instance with the specified password.

Action: Verify the correctness of the password and the status of the ASM instance.
 *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.INVALID_ASMSNMP_PASSWORD_ERR

DBT-06211: Oracle home value is not specified.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.ORACLE_HOME_IS_EMPTY_ERR

DBT-06212: The *string* password entered does not conform to the Oracle recommended standards.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.PASSWORD_IS_NOT_COMPLEX_BY_ORAPWD_ERR

DBT-06213: The specified TDE wallet password is not valid. Verify and try again.

Cause: The configured TDE wallet password is not matching with the specified password.

Action: Verify the correctness of the password and the status of the database instance. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.INVALID_TDE_WALLET_PASSWORD_ERR

DBT-06301: Unable to check if the location specified (*string*) is on shared file system.

Cause: The location specified might not have the required permissions or the location is not shared across the cluster nodes (%s).

Action: Specify a valid shared location across cluster nodes. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_SHARED_LOCATION_WARN

DBT-06302: Unable to check for available free space on ACFS mount point (*string*).

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_RETRIEVE_ACFS_FREESPACE_ERR

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_PERM_FOR_OHUSER_ERR

DBT-06610: Unable to retrieve the current Oracle home user credentials.

Cause: n/a

Action: Verify the correctness of the Oracle home user configuration. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_RETRIEVE_OHUSER_ERR

DBT-06611: Unable to check existence of file (*string*) on remote node (*string*).

Cause: User equivalence may not be setup between the local node and the remote nodes or sufficient file permissions are not set.

Action: Verify user equivalence across nodes and ensure sufficient file permissions are set. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNEXPECTED_REMOTE_FILE_CHECK_FAILURE_ERR

DBT-06801: Specified Fast Recovery Area size (*stringstring*) is less than the recommended value.

Cause: Fast Recovery Area size should at least be three times the database size (%s%s).

Action: Specify Fast Recovery Area Size to be at least three times the database size. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.FRA_SIZE_SHOULD_BE_THREETIMES_DB_SIZE_WARN

DBT-06802: Archive log location cannot be empty.

Cause: When archiving is enabled and Fast Recovery Area is not specified, at least one Archive Log Destination must be specified.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.EITHER_FRA_OR_ARCHIVE_LOG_LOCATION_SHOULD_BE_SPECIFIED_ERR

DBT-06803: Archive format entered (*string*) is invalid.

Cause: n/a

Action: Specify a valid archive format. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INVALID_ARCHIVE_FORMAT_ERR

DBT-06804: Specified Archive log location is invalid.

Cause: Archive log location value is specified as USE_DB_RECOVERY_FILE_DEST but Fast Recovery Area (FRA) option is not selected.

Action: Specify valid location for Archive log location or select FRA option. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INVALID_ARCHIVE_LOG_DEST_ERR

DBT-06901: Unable to replace variables in string (*string*).

Cause: n/a

Action: Make sure that the specified string is syntactically correct and the variables used in this string are defined. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_REPLACE_VARIABLES_ERR

DBT-07001: Specified credentials for Enterprise Manager Cloud Control configuration are invalid.

Cause: Unable to establish connection to the Enterprise Manager Cloud Control using the credentials- OMS host: %s, OMS port: %s, Admin user: %s and the specified password.

Action: Verify the details specified for Enterprise Manager Cloud Control configuration. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INVALID_OMS_CREDENTIALS_ERR

DBT-07101: Unable to load the pdb metadata file (*string*).

Cause: n/a

Action: Check the existence and the validity of the pdb metadata file. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_LOAD_PDB_XML_ERR

DBT-07201: Unable to retrieve database instances running on node (*string*).

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_RETRIEVE_INSTANCES_ERR

DBT-07501: Unable to check permissions of Oracle home (*string*).

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_LSNR_HOME_PERMS_ERR

DBT-07502: Selected listener (*string*) is not running.

Cause: n/a

Action: Specify a listener which is running. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.SELECTED_LISTENER_NOT_RUNNING_ERR

DBT-07503: A listener with name (*string*) already exists.

Cause: n/a

Action: Specify a different name for listener. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.LISTENER_ALREADY_EXISTS_ERR

DBT-07504: Selected listener (*string*) cannot be used for database registration as there is a name conflict with the listeners on the target Oracle home.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.LISTENER_NAME_CONFLICT_ERR

DBT-07505: Selected listener (*string*) does not exist.

Cause: n/a

Action: Specify an existing listener. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.SELECTED_LISTENER_NON_EXISTENT

DBT-07506: Unable to start the listener (*string*) in the Oracle home.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_START_LISTENER_WARN

DBT-07507: Unable to detect SCAN listeners.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_DETECT_SCAN_LISTENERS_WARN

DBT-07508: Unable to detect if SCAN listener is running.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_DETECT_SCAN_LISTENER_RUNNING_WARN

DBT-08001: Invalid directory service credentials.

Cause: n/a

Action: Verify the directory service credentials and the correctness of the configuration file (ldap.ora). *FQN:

oracle.assistants.common.resource.AssistantErrorCode.DS_AUTHENTICATION_ERR

DBT-08002: Unable to establish connection with the directory server.

Cause: An access violation occurred while connecting to the directory server using the user distinguished name (%s).

Action: Verify the directory service credentials and the correctness of the configuration file (ldap.ora). *FQN:

oracle.assistants.common.resource.AssistantErrorCode.DIR_SERVICE_ACCESS_ERROR

DBT-08003: Unable to establish connection with the directory server.

Cause: Unknown error occurred while trying to access the directory service using the user distinguished name (%s).

Action: Verify the directory service credentials and the correctness of the configuration file (ldap.ora). *FQN:

oracle.assistants.common.resource.AssistantErrorCode.UNKNOWN_DIR_SERVICE_ACCESS_ERROR

DBT-08004: Directory service is not configured in the Oracle home.

Cause: The directory service configuration file (ldap.ora) is not found or not configured correctly in the Oracle home.

Action: Verify the correctness of the directory service configuration. If required, use Network Configuration Assistant (NetCA) to perform the configuration. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.DIR_SERVICE_NOT_CONFIGURED_ERROR

DBT-08005: Directory service user distinguished name and/or directory service password cannot be empty.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.DIR_SERVICE_NAME_OR_PASSWORD_NULL_ERROR

DBT-08006: Invalid wallet password.

Cause: Wallet password found in the wallet location is not matching with the specified password.

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.INVALID_WALLET_PASSWORD_ERROR

DBT-08007: Wallet password specified is not as per Oracle recommended standards.

Cause: Wallet password must have a minimum length of eight characters and contain alphabets combined with numbers or special characters.

Action: Specify a strong password. If required, refer Oracle documentation for the guidelines. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.WALLET_PASSWORD_NOT_PER_POLICY_ERROR

DBT-08008: The version of schema or context of directory service installed is not compatible for database configuration.

Cause: n/a

Action: Refer the log file for more details on the detected configuration. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.OID_VERSION_NOT_COMPATIBLE_WARN

DBT-08010: A database with name (*string*) is already registered with Directory service. Proceeding with this name will overwrite the existing configuration details in the Directory service.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.DB_ALREADY_REGISTERED_WITH_DIR_SERVICE_WARN

DBT-08011: The specified database (*string*) is not registered with Directory service to perform the unregistration operation.

Cause: n/a

Action: Verify the existence of the Directory service configuration and the specified credentials. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.DB_NOT_REGISTERED_WITH_DIR_SERVICE_ERR

DBT-08012: A database with name (*string*) is already registered with Directory service.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.DB_ALREADY_REGISTERED_WITH_DIR_SERVICE_ERR

DBT-08013: Invalid LDAP access type value.

Cause: The value provided for LDAP access type is not valid for configuring the directory service.

Action: Specify a valid value for LDAP access type: %s or %s. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.INVALID_LDAP_ACCESS_TYPE_ERR

DBT-08014: The selected Container database (*string*) is not configured with Active Directory.

Cause: Directory Service Integration can be configured in PDB only when it is configured in the Container database.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.CDB_NOT_CONFIGURED_WITH_AD_ERR

DBT-08015: Unable to authenticate with the provided directory service credentials.

Cause: n/a

Action: Verify the correctness of the directory service credentials and configuration file (ldap.ora) before proceeding. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.DS_AUTHENTICATION_WARN

DBT-08020: Unable to get the assigned servers for the server pool (*string*).

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_GET_ASSIGN
ED_NODES_FOR_SERVERPOOL_ERR

DBT-08021: Unable to get free servers for server pool creation.

Cause: n/a

Action: Verify the availability of free servers in the Oracle Grid Infrastructure configuration. *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_GET_FREE_N
ODES_FOR_SERVERPOOL_ERR

DBT-08022: Unable to check if the specified server pool (*string*) exists.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_IF_S
ERVER_POOL_EXISTS_ERR

DBT-08030: Unable to check if the current user has Oracle Grid Infrastructure admin privileges.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_CRS
_ADMIN_PRIV_ERR

DBT-08051: Unable to check if node (*string*) is a Leaf node.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_IF_N
ODE_IS_LEAF_ERR

DBT-08052: Unable to check the node role for (*string*).

Cause: Add instance can be performed on hub nodes only, but unable to determine the role of the specified node.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_IF_N
ODE_IS_HUB_ADD_INST_ERR

DBT-08053: Unable to check the node role for (*string*).

Cause: Admin managed database can be created on hub nodes only, but unable to determine the role of the specified node.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.UNABLE_TO_CHECK_IF_N
ODE_IS_HUB_ADMIN_DB_ERR

DBT-08101: The selected PDB (*string*) is not open.

Cause: PDB has to be open in READ WRITE mode to perform the configuration.

Action: n/a *FQN:
oracle.assistants.common.resource.AssistantErrorCode.PDB_NOT_OPEN_ERR

DBT-08102: The selected PDB(s) (*string*) do not exist.

Cause: n/a

Action: Select existing PDB(s) in the container database %s. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.NON_EXISTENT_PDB_SELECTED_ERR

DBT-08103: PDB name has to be specified for PDB management operation.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.NO_PDB_SELECTED_ERR

DBT-08104: The selected PDB (*string*) is in (*string*) status. PDB operations can be performed only in NORMAL status.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.PDB_STATUS_NOT_NORMAL_ERR

DBT-08105: The selected PDB (*string*) is in restricted mode. PDB operations cannot be performed in restricted mode.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.common.resource.AssistantErrorCode.PDB_RESTRICTED_MODE_ERR

DBT-08106: Specified Remote PDB (*string*) does not exist.

Cause: n/a

Action: Specify existing Remote PDB from the container database. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.NON_EXISTENT_REMOTE_PDB_SELECTED_ERR

DBT-08107: Configure TDE option is not selected for the PDB creation.

Cause: TDE needs to be configured in PDB as the source database is configured with TDE.

Action: Specify configure TDE as true to create the PDB. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.CONFIGURE_TDE_NOT_SELECTED_PDB_ERR

DBT-08108: Configure TDE option is selected for the PDB creation.

Cause: TDE cannot be configured in PDB as the source database is not configured with TDE.

Action: Do not specify configure TDE option to create the PDB. *FQN:

oracle.assistants.common.resource.AssistantErrorCode.CONFIGURE_TDE_SELECTED_ON_NON_TDE_PDB_ERR

DBT-08109: Configure TDE option is not specified for the database creation.

Cause: TDE needs to be configured in database as the source database is configured with TDE.

Action: Specify configure TDE as true to create the database. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.CONFIGURE_TDE_NOT_SELECTED_ERR

DBT-08111: Creation of encrypted PDB cannot be done on a database as the source database is not configured with TDE.

Cause: Encrypted PDB cannot be plugged to a database as the source database is not configured with TDE.

Action: Please specify a database where TDE is configured to plug the encrypted PDB. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.CREATE_ENCRYPTED_PDB_ON_TDE_DISABLED_DB_ERR

DBT-08112: TDE wallet location of the specified primary database '*string*' is not specified.

Cause: Specified primary database is detected as TDE configured database. However the location for TDE wallet is not specified.

Action: Copy the primary database TDE wallet file (only ewallet.p12 file) to the local file system and specify the folder path as source database TDE wallet location. *FQN:
 oracle.assistants.common.resource.AssistantErrorCode.PRIMARY_DB_TDE_WALLET_BACKUP_LOC_NOT_SPECIFIED_ERR

DBT-08113: *string* database TDE wallet password is not specified.

Cause: n/a

DBT-10006: DBCA supported operations can be performed only by the Oracle home owner (*string*). User running DBCA (*string*) is not the owner of the Oracle home (*string*).

Cause: n/a

Action: Invoke DBCA with the same user as the Oracle home owner. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DBCA_INCORRECT_USER_EXECUTING_ERR

DBT-10007: Oracle Grid Infrastructure Management Repository (GIMR) cannot be created using the (*string*) template.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MGMTDB_CREATION_NOT_USING_MGMT_TEMPLATES_ERR

DBT-10008: Oracle database cannot be created using the (*string*) template.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DB_CREATION_USING_MGMT_TEMPLATES_ERR

DBT-10009: Oracle GDB Name for XE edition is invalid.

Cause: n/a

Action: GDB name for XE edition should be XE. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_GDB_NAME_XE_ERR

DBT-10010: Database cannot be created in the current oracle home (*string*).

Cause: Grid Infrastructure Management Database is configured in the current oracle home. Additional databases cannot be created in this home.

Action: Use a different oracle home to create database. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DBCA_HOME_SAME_AS_MGMT_HOME_ERR

DBT-10011: Incorrect ownership/permissions detected for the file (*string*).

Cause: Following nodes does not have required file ownership/permissions: %s

Action: Run the Oracle Home root script as the root user to fix the permissions. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.NO_PROPER_FILE_OWNERSHIP_PERMISSIONS_ERR

DBT-10012: Error while checking Oracle base home location *string*.

Cause: Oracle base home location might be missing or with incorrect permission.

Action: Check the presence of the directory or run roohctl -init to create missing directories.

*FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.ORACLE_BASE_HOME_LOCATION_ERR

DBT-10201: *string* operation cannot be performed.

Cause: There are no databases present on the system.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.NO_DB_AVAILABLE_ERR

DBT-10202: Oracle RAC Instance Management operation cannot be performed.

Cause: The RAC environment is not enabled on the system.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.NOT_RAC_ENVIRONMENT_ERR

DBT-10203: Oracle RAC Instance Management operation cannot be performed.

Cause: Oracle RAC Instance management operation can be performed only on Admin Managed Oracle RAC databases.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.NO_ADMIN_DB_AVAILABLE_ERR

DBT-10301: The length of the PDB name must be between 1 and *string* characters.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_NAME_LENGTH_ERR

DBT-10302: PDB name specified (*string*) is invalid.

Cause: PDB name should start with an alphabetical character and may include alphanumeric characters, and the _ character.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_PDB_NAME_ERR

DBT-10303: PDB name cannot be the same as the Container database name.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_NAME_MATCH_GDB_NAME_ERR

DBT-10304: Oracle home user password is not correct.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.ORACLE_HOME_USER_PASSWORD_INCORRECT_ERR

DBT-10305: The specified password is one of the keywords and is not allowed.

Cause: The password cannot be any of the following - CHANGE_ON_INSTALL,MANAGER, or DBSNMP.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DB_PASSWORD_NOT_ALLOWED_WARN

DBT-10306: PDB name cannot be same as the service name of Oracle RAC One Node database.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_NAME_MATCH_RACONE_SERVICE_NAME_ERR

DBT-10309: PDB name (*string*) cannot be same as the RAC One Node database service name.

Cause: n/a

Action: Modify the PDB prefix name or the RAC One Node database service name.

*FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_NAME_MATCH_FROM_MULTIPLE_CREATION_RACONE_SERVICE_NAME_ERR

DBT-10310: PDB name (*string*) cannot be same as the RAC One Node database service name.

Cause: n/a

Action: Modify the RAC One Node database service name. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_NAME_CDB_TMPLT_MATCH_FROM_MULTIPLE_CREATION_RACONE_SERVICE_NAME_ERR

DBT-10311: Same PDB name (*string*) is used for more than one PDB.

Cause: n/a

Action: Specify unique PDB names for each PDB. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DUPLICATE_PDB_NAME_FOUND_ERR

DBT-10312: Additional PDBs cannot be created when Container database template is specified to create a database.

Cause: n/a

Action: Do not specify PDB count if Container database template is specified to create a database. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.ADDITIONAL_PDB_CREATION_NOT_SUPPORTED_WARN

DBT-10313: A container database cannot be created from template *string*.

Cause: A container database cannot be created from a database clone template that was created from a non-container database.

Action: Select a structural template, a Container database template or an Oracle shipped template. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.NON_CDB_USER_PROVIDED_TEMPLATE_FOR_CDB_CREATION_ERR

DBT-10314: The *string* cannot be empty.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.VALUE_NULL_OR_EMPTY_ERR

DBT-10315: Specified *string* cannot exceed (*string*) characters.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_NAME_LENGTH_ERR

DBT-10316: Specified *string* (*string*) contains characters that are not allowed.

Cause: n/a

Action: Specify a valid %s that starts with an alphabet and excludes characters (%s). *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_DB_NAME_ERR

DBT-10317: Specified *string* (*string*) already exists.

Cause: n/a

Action: Specify a different %s that does not already exist. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_ALREADY_EXISTS_ERR

DBT-10318: Specified RAC One database service name (*string*) is invalid.

Cause: RAC One service name should start with an alphabet followed by letter, digits, or an underscore (_).

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_RAC_ONE_SERVICE_NAME_ERR

DBT-10319: RAC One service name (*string*) cannot be the same as the global database name.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.RAC_ONE_SERVICE_NAME_GDB_NAME_SAME_ERR

DBT-10320: RAC One service name has a domain part that cannot exceed *string* characters.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.RAC_ONE_SERVICE_DOMAIN_LENGTH_ERR

DBT-10321: The *string* specified does not start with alphabetic character.

Cause: n/a

Action: Specify a (%s) that starts with an alphabet and contains only alphanumeric characters. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DB_NAME_SHOULD_START_WITH_ALPHA_ERR

DBT-10322: The *string* specified contains non alphanumeric characters.

Cause: n/a

Action: Specify a %s that starts with an alphabet and contains only alphanumeric characters. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DB_NAME_CONTAINS_INVALID_CHARS_ERR

DBT-10323: The (*string*) specified is a SQL reserved word.

Cause: n/a

Action: Specify a different value for (%s). *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PROVIDED_VALUE_IS_RESERVED_WORD_ERR

DBT-10324: The SID does not match with the first eight characters of the specified global database name.

Cause: n/a

Action: SID should match with the first eight characters of the specified global database name in Policy Managed database. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SID_NOT_SAME_AS_GDB_IN_POLICY_MANAGED_ERR

DBT-10325: *string* option is not specified.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.OPTION_NOT_SELECTED_ERR

DBT-10326: Value of DB Name is not specified in the GDB Name.

Cause: n/a

Action: Specify a valid GDB Name. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.EMPTY_DB_NAME_ERR

DBT-10327: Derived SID (*string*) already exists.

Cause: SID is derived from the first 8 alphanumeric characters of the GDB name and this should be unique in Policy Managed database creation.

Action: Specify a different GDB name. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DERIVED_SID_ALREADY_EXISTS

DBT-10328: Specified *string (string)* may have a potential conflict with an already existing database on the system.

Cause: n/a

Action: Specify a different %s that does not conflict with existing databases on the system.
*FQN: oracle.assistants.dbca.resource.DBCAErrorCode.DB_GDB_NAME_EXIST_WARN

DBT-10329: Specified *string (string)* contains NON-ASCII characters that are not allowed.

Cause: n/a

Action: Specify a valid %s that contains ASCII characters. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NON_ASCII_CHAR_ERR

DBT-10330: Container database (CDB) creation option is not selected.

Cause: You have specified the database template (%s) which represents container database (CDB) information. But, you have not selected to create container database (CDB). Only container database (CDB) can be created using this template.

Action: Select container database (CDB) creation option. Alternatively specify different database template *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NON_CDB_CREATION_USING_CDB_CLONE_TEMPLATE_ERR

DBT-10331: Specified *string (string)* may have a potential conflict with an already existing database on the system.

Cause: The specified %s without the trailing numeric characters (%s) may have a potential conflict with an already existing database on the system.

Action: Specify a different %s that does not conflict with existing databases on the system.
*FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DB_PREFIX_EXISTING_DB_WARN

DBT-10332: SID (*string*) already exists and is running on the machine.

Cause: Renaming database requires connecting to the sid (%s) to retrieve database information. If a database with same SID already exists, there could be loss of service.

Action: Make sure that database with SID (%s) does not exist on the box. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OLD_SID_SERVICE_EXISTS_ERR

DBT-10333: Container database (CDB) creation option is not selected.

Cause: Non-CDB creation is not supported.

Action: Make sure container database (CDB) option is selected. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NON_CDB_CREATION_NOT_SUPPORTED_ERR

DBT-10334: Oracle SID name for XE edition is invalid.

Cause: n/a

Action: SID name for XE edition should be XE. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_SID_NAME_XE_ERR

DBT-10335: Value of DBName or DBUniqueName is empty.

Cause: Value of dbName and dbUniqueName cannot be empty.

Action: Pass gdbName value or dbName and dbUniqueName values. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DB_NAME_OR_DB_UNIQUE_NAME_NOT_SPECIFIED_ERR

DBT-10336: Standard Edition High Availability service name (*string*) cannot be the same as the global database name.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.SEHA_SERVICE_NAME_GDB_NAME_SAME_ERR

DBT-10337: Specified Standard Edition High Availability database service name (*string*) is invalid.

Cause: Standard Edition High Availability service name should start with an alphabet followed by letter, digits, or an underscore (_).

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_SEHA_SERVICE_NAME_ERR

DBT-10338: Standard Edition High Availability service name has a domain part that cannot exceed *string* characters.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.SEHA_SERVICE_DOMAIN_LENGTH_ERR

DBT-10339: The configuration you selected cannot support failover of the Oracle Standard Edition High Availability instance.

Cause: Failover is not supported when less than two nodes are selected and cluster is installed on more than one node.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.SEHA_FAILOVER_WARN

DBT-10501: The specified template file (*string*) cannot be read.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TEMPLATE_FILE_CANNOT_BE_READ_ERR

DBT-10502: No database was selected to create the template.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NO_DATABASE_SELECTED_ERR

DBT-10503: Template file is not specified.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TEMPLATE_FILE_NOT_SPECIFIED_ERR

DBT-10504: Unable to load the specified template (*string*).

Cause: The specified template data might not be in the expected format.

Action: Verify the format of the template. *FQN:
 oracle.assistants.dbca.util.resource.DBCAUtilErrorCode.UNABLE_TO_LOAD_TEMPLATE_ERR

DBT-10505: Unable to generate html document for the template.

Cause: Internal error occurred while creating html document.

Action: Refer to the logs or contact Oracle Support Services. *FQN:
 oracle.assistants.dbca.util.resource.DBCAUtilErrorCode.UNABLE_TO_CREATE_HTML_DOCUMENT_ERR

DBT-10506: Unable to generate html document for the template.

Cause: Internal error occurred while converting html document to string format.

Action: Refer to the logs or contact Oracle Support Services. *FQN:
 oracle.assistants.dbca.util.resource.DBCAUtilErrorCode.UNABLE_TO_CONVERT_HTML_DOC_TO_TEXT_FORMAT_ERR

DBT-10507: Invalid template file specified (*string*).

Cause: The given template is not compliant to the expected schema.

Action: Verify the correctness of the template syntactically and semantically. Alternatively contact Oracle Support Services. *FQN:
 oracle.assistants.dbca.util.resource.DBCAUtilErrorCode.INVALID_TEMPLATE_FORMAT_ERR

DBT-10508: Invalid template file specified (*string*).

Cause: The given template path is not a valid file path or the template file is not accessible in the local file system.

Action: Verify the presence of the template file (%s) and ensure it is accessible. *FQN:
 oracle.assistants.dbca.util.resource.DBCAUtilErrorCode.INVALID_TEMPLATE_FILE_ERR

DBT-10531: Selected template (*string*) cannot be used for this operation.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TEMPLATE_CREATION_NOT_SUPPORTED_FROM_MGMT_TEMPLATES_ERR

DBT-10601: (*string*) cannot be created in the current Oracle home.

Cause: Oracle home is not RAC enabled.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.RAC_SELECTED_BUT_HOME_IS_NOT_RAC_ENABLED_ERR

DBT-10602: (*string*) database cannot be created in this system.

Cause: Oracle Grid Infrastructure is not configured on the system.

Action: Configure Oracle Grid Infrastructure prior to creation of (%s). Refer to Oracle Grid Infrastructure Installation Guide for installation and configuration steps. *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.RAC_SELECTED_BUT_CRS_NOT_CONFIGURED_ERR

DBT-10603: Oracle RAC software is not present on candidate nodes (*string*) of the serverpool (*string*).

Cause: n/a

Action: Install Oracle RAC software on all the candidate nodes before doing database configuration. *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.RAC_SOFTWARE_NOT_PRESENT_ON_CANDIDATE_NODES_ERR

DBT-10604: Standard Edition High Availability database creation is not supported in this environment.

Cause: The specified Oracle Home does not support Standard Edition High Availability database creation.

Action: Refer to Oracle Database documentation. *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.SEHA_NOT_SUPPORTED_ERR

DBT-10605: Standard Edition High Availability database creation is not supported in this environment.

Cause: This Oracle Home version does not support Standard Edition High Availability database creation.

Action: Oracle Home version must be %sc or higher. *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.SEHA_VERSION_NOT_SUPPORTED_ERR

DBT-10800: Random password could not be generated for *string* account.

Cause: n/a

Action: Refer log file for more information. *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.COULD_NOT_GENERATE_RANDOM_PASSWORD_ERR

DBT-10900: Unable to get instance number for new instance addition.

Cause: Instance number may not have been generated for the new instance.

Action: Refer log file for more details. *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.INSTANCE_NUMBER_NOT_UPDATED_ERR

DBT-10901: Required undo tablespace is more than the number of instances.

Cause: n/a

Action: Refer log file for more details. *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.REQUIRED_UNDO_TABLESPACE_MORE_THAN_INSTANCE_NAMES_ERR

DBT-10902: StorageSettings backup cloning failed.

Cause: n/a

Action: Refer log file for more details. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.STORAGE_SETTINGS_BACKUP_CLONE_FAILED_WARN

DBT-10903: Unable to get thread number for new instance addition.

Cause: Thread number may not have been generated for the new instance.

Action: Refer log file for more details. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.THREAD_NUMBER_NOT_UPDATED_ERR

DBT-10904: Specified size properties for tablespace *string* is invalid.

Cause: n/a

Action: Specify values in *initial size:increment size:max size* format. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_TABLESPACE_PROPERTIES_COUNT_ERR

DBT-10951: Template file (*string*) already exists and will be overwritten.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TEMPLATE_FILE_ALREADY_EXISTS_WARN

DBT-10952: SYS user does not have DV_PATCH_ADMIN privileges.

Cause: n/a

Action: Grant DV_PATCH_ADMIN privileges to the SYS user to create a template from a database where Database Vault is configured. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DV_OWNER_PERM_REQUIRED_ERR

DBT-10953: One or more Pluggable database(s) (*string*) in the Container database are not open.

Cause: All pluggable databases in the Container database should be open to perform a configuration.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_STATUS_NOT_OPEN_ERR

DBT-10954: The space in the template file name will be replaced with underscore(_).

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TEMPLATE_NAME_WITH_SPACE_WARN

DBT-10955: One or more Pluggable database(s) (*string*) are in closed state. Selected configurations will not be performed on these PDBs

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_STATUS_NOT_OPEN_WARN

DBT-10956: Template file (*string*) already exists on the cloud container.

Cause: n/a

Action: Specify a different template name. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TEMPLATE_EXISTS_ON_CLOUD_ERR

DBT-10957: The specified template file (*string*) does not exist on the cloud container.

Cause: n/a

Action: Specify an existing template name. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TEMPLATE_DOES_NOT_EXIST_ON_CLOUD_ERR

DBT-10958: Failed to download the specified template file (*string*) from the object store.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.FAILED_TO_DOWNLOAD_TEMPLATE_FROM_CLOUD_ERR

DBT-10959: Template file (*string*) already exists.

Cause: n/a

Action: Specify a different template name. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.CLONE_TEMPLATE_FILE_ALREADY_EXISTS_ERR

DBT-10960: Failed to download the specified file (*string*) from the object store.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.FAILED_TO_DOWNLOAD_FILE_FROM_CLOUD_ERR

DBT-11001: Oracle Managed Files (OMF) option is not selected for storage in Policy Managed database.

Cause: OMF option needs to be selected in order to enable Database to dynamically create required redolog groups and undo tablespaces when database server pool cardinality is increased.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.USE_OMF_FOR_POLICY_DB_ERR

DBT-11002: Use SPFile option is not selected in the DBCA template.

Cause: Oracle RAC database creation requires Use SPFile option to be selected in the DBCA template.

Action: Specify a DBCA template with Use SPFile option selected. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.RAC_USE_SPFILE_SHOULD_BE_TRUE_ERR

DBT-11003: ASM storage option is selected for datafile location. However Oracle Managed Files (OMF) option is not selected.

Cause: OMF option is recommended when datafiles are placed in ASM storage.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.USE_OMF_FOR_ASM_WARN

DBT-11004: Unable to validate ASM. There is no disk group detected.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.ASM_INSTANCE_NOT_VALIDATED_ERR

DBT-11006: PMEM FS storage option is selected for datafile location. However Oracle Managed Files (OMF) option is not selected.

Cause: OMF option is mandatory when datafiles are placed in PMEM File Store storage.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.USE_OMF_FOR_PMEMFS_ERR

DBT-11007: Specified file system location '*string*' is not supported as a database file location for Standard Edition High Availability database.

Cause: n/a

Action: Specify a location that is either an Oracle ASM diskgroup or Oracle ACFS path.

*FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.FS_NOT_SUPPORTED_FOR_DB_SEHA_ERR

DBT-11101: The block size (*string*) for the tablespace *string* does not match the configured block size (*string*).

Cause: n/a

Action: To use block size of (%s), set initialization parameter %s. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.INCORRECT_BLOCK_SIZE_ERR

DBT-11151: Character set specified (*string*) is invalid.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_CHARACTER_SET_ERR

DBT-11152: National character set specified (*string*) is invalid.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_NATIONAL_CHARACTER_SET_ERR

DBT-11153: Character set specified (*string*) is different from that of the character set (*string*) in the template. Character set mismatch may cause data truncation.

Cause: n/a

Action: Make sure the character sets uses the same encoding scheme. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DIFF_CHARSET_FROM_TEMPLATE_WARN

DBT-11201: PGA size specified is too small.

Cause: n/a

Action: PGA size of at least (%s%s) is recommended. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MIN_PGA_NOT_PROVIDED_WARN

DBT-11202: Buffer cache size specified is too small.

Cause: n/a

Action: Buffer cache of at least (%s%s) is recommended. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MIN_BUFFER_CACHE_NOT_PROVIDED_WARN

DBT-11203: Java pool size specified is too small.

Cause: n/a

Action: Java pool size of at least (%s%s) is recommended. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MIN_JAVA_POOL_NOT_PROVIDED_WARN

DBT-11204: Memory target specified is too small.

Cause: n/a

Action: Memory target size of at least (%s%s) is recommended. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MIN_MEMORY_REQUIRED_NOT_AVAILABLE_WARN

DBT-11205: Specified shared pool size does not meet the recommended minimum size requirement. This might cause database creation to fail.

Cause: n/a

Action: Specify at least (%s%s) for shared pool size. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NOT_ENOUGH_SHARED_POOL_WARN

DBT-11206: Shared pool size specified is too small.

Cause: n/a

Action: Shared pool size of at least (%s%s) is recommended. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MIN_SHARED_POOL_NOT_PROVIDED_WARN

DBT-11207: Specified SGA size is greater than the shmmax on the system. The database creation might fail with ORA-27125 - Unable to create shared memory segment error.

Cause: n/a

Action: Specify SGA size lesser than or equal to the shmmax on the system. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NOT_ENOUGH_SGA_WARN

DBT-11208: SGA size specified is too small.

Cause: n/a

Action: SGA size of at least (%s%s) is recommended. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MIN_SGA_REQUIRED_NOT_AVAILABLE_WARN

DBT-11209: Current available memory is less than the required available memory (*stringstring*) for creating the database.

Cause: Following nodes do not have required available memory : %s

Action: Refer to Database Administration Guide for more details as how database uses various memory parameters. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.NOT_ENOUGH_MEMORY_AVAILABLE_WARN

DBT-11210: Automatic Memory Management is not supported on your current operating system.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.AMM_NOT_FEASIBLE_UNSUPPORTED_OS_ERR

DBT-11211: The Automatic Memory Management option is not allowed when the total physical memory is greater than *stringGB*.

Cause: The current total physical memory is %sGB.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.AMM_NOT_FEASIBLE_WITH_PHYSICAL_MEMORY_GREATER_THAN_LIMIT_ERR

DBT-11212: Automatic Memory Management is not a feasible option on the system.

Cause: There is no %s volume configured on the system.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.AMM_NOT_FEASIBLE_NO_DEV_SHM_VOLUME_ERR

DBT-11213: Automatic Memory Management is not a feasible option on the system.

Cause: There is not enough free space on volume %s to allocate %sMB on nodes %s.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.AMM_NOT_FEASIBLE_NOT_ENOUGH_VOLUME_SPACE_NODES_ERR

DBT-11214: Automatic Memory Management is not a feasible option on the system.

Cause: There is not enough free space on volume %s to allocate %sMB.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.AMM_NOT_FEASIBLE_NOT_ENOUGH_VOLUME_SPACE_ERR

DBT-11215: Shared pool size is not provided.

Cause: n/a

Action: Specify a value for shared pool size. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SHARED_POOL_NOT_PROVIDED_ERR

DBT-11216: You have specified Manual Shared Memory Management configuration option but the values for the corresponding initialization parameters are not provided. Database will be configured with default memory values.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.MANUAL_MEMORY_MANAGEMENT_NO_VALUE_SPECIFIED_WARN

DBT-11217: Unable to check available shared memory on specified node(s) (*string*).

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.FAILED_CHECK_AVL_SHARED_MEMORY_WARN

DBT-11218: Some nodes do not have sufficient available shared memory.

Cause: Following node(s) do not have sufficient shared memory. Node name, required value in %s, and actual value in %s for each node is displayed below. %s

Action: Increase available shared memory. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.NOT_ENOUGH_AVL_SHARED_MEMORY_WARN

DBT-11219: Maximum of memory percentage (*string*) is allocated for the database creation, which might lead to ORA-00700: SOFT INTERNAL ERROR during database creation.

Cause: Sum of sga and 2*pga is equal to or exceeding 90% of total physical memory.

Action: Specify lesser values for memory parameters. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.MAX_MEMORY_PERCENTAGE_SELECTED_WARN

DBT-11501: Oracle RAC database instance management operation is not feasible on the selected database *string*.

Cause: Oracle RAC database instance management operation cannot be performed on single instance Oracle database, Oracle RAC One Node database, or Policy Managed Oracle RAC databases.

Action: Select Admin Managed RAC database for instance management. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.SELECTED_DB_NOT_FEASIBLE_FOR_INSTANCE_MGMT_ERR

DBT-11502: The instance (*string*) is not running on the local node.

Cause: A locally running instance is required to perform the selected operation.

Action: Specify a locally running database, or execute DBCA on a node where the database instance is running. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.LOCAL_INSTANCE_NOT_RUNNING_ERR

DBT-11503: The instance (*string*) is not running on the local node. This may result in partial delete of Oracle database.

Cause: A locally running instance is required for complete deletion of Oracle database instance and database files.

Action: Specify a locally running database, or execute DBCA on a node where the database instance is running. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.LOCAL_INSTANCE_NOT_RUNNING_WARN

DBT-11504: The selected node is already part of an existing server pool (*string*) that is hosting Policy Managed databases.

Cause: n/a

Action: Specify a different node for creating a database or adding instance. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NODE_PART_OF_SERVER_POOL_ERR**DBT-11505: Maximum PDBs limit reached for the selected Container database.**

Cause: A Container database can only contain up to (%s) PDBs, including the seed.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MAX_PDB_LIMIT_REACHED_ERR**DBT-11506: Creation of more than *string* PDB requires Enterprise Edition license.**

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MAX_PDB_LIMIT_REACHED_SE_ERR**DBT-11507: No PDBs were found in the selected Container database.**

Cause: n/a

Action: Select a Container database that has at least one PDB in it. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NO_PDBS_PRESENT_ERR**DBT-11508: The selected database is not a Container database.**

Cause: PDB operations can be performed only on a Container database.

Action: n/a *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.NOT_A_CDB_ERR

DBT-11509: The selected database (*string*) is not open.

Cause: Database should be in read/write mode to perform any configuration.

Action: n/a *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.DB_NOT_OPEN_ERR

DBT-11510: Oracle Database Vault (DV) is enabled in the selected *string* (*string*).

Cause: Database Vault should be disabled to perform any configuration update in the %s.

Action: Disable Database Vault in the selected %s (%s) and try again. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DV_ALREADY_ENFORCED_ERR**DBT-11511: No node is available for adding an instance because the database (*string*) has instances on all nodes of the cluster.**

Cause: n/a

Action: Extend the Oracle Grid Infrastructure Clusterware by adding more nodes before performing this operation. Refer to Oracle Grid Infrastructure Installation Guide on how to extend the Clusterware. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NO_NODE_AVAILABLE_FOR_ADD_INSTANCE_ERR**DBT-11512: No locally running instances found.**

Cause: n/a

Action: Specify a locally running database. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NO_LOCAL_INSTANCE_RUNNING_ERR

DBT-11513: The detected Oracle SID (*string*) differs from the specified database (*string*). This delete operation will delete the database associated with the Oracle SID.

Cause: n/a

Action: Verify if name mismatch is expected. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SOURCE_DB_MISMATCH_SID_W
ARN

DBT-11514: The detected Oracle SID (*string*) for the specified database (*string*) refers to an another existing database.

Cause: The database deletion operation cannot be continued as the instance_name initialization parameter of the specified database refers to an another existing database.

Action: Verify the instance_name initialization parameter of both databases and resolve the conflicts. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SOURCE_DB_REFERS_TO_EXIS
TING_DATABASE_ERR

DBT-11515: SYSDBA user name is not specified.

Cause: SYSDBA user credential required to perform '%s' operation in the database (%s).

Action: Specify a valid sysdba user name *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SYS_DB_USER_NAME_EMPTY_E
RR

DBT-11516: The password for SYSDBA user (*string*) is not specified.

Cause: SYSDBA user password is required to perform '%s' operation in the database (%s).

Action: Specify a valid password for user '%s'. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SYS_DB_USER_PASSWORD_EM
PTY_ERR

DBT-11517: Source database is not specified.

Cause: You have not specified a source database to perform '%s' operation.

Action: Specify a valid source database information. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SOURCE_DB_NOT_SPECIFIED_E
RR

DBT-11518: Oracle Database Vault (DV) is not installed in the selected *string* (*string*).

Cause: DV option should be installed in order to configure DV in the %s.

Action: Install DV option in the selected %s (%s) and try again. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DV_NOT_ENABLED_ERR

DBT-11519: Oracle Database Vault (DV) is already configured in the selected *string* (*string*).

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DV_ALREADY_CONFIGURED_ER
R

DBT-11520: The selected database (*string*) is not in open or mounted mode.

Cause: Database should be in open or mounted mode to perform any configuration.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DB_NOT_IN_OPEN_OR_MOUNTED_MODE_ERR

DBT-12001: Specified user will be created as a common user in Container database. Common user name should start with C##.

Cause: n/a

Action: Specify a user name that starts with C##. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_CDB_DV_OWNER_AS_COMMON_USER_ERR

DBT-12002: *string* specified is not valid.

Cause: n/a

Action: Specify a user name that does not start with C##. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_DV_OWNER_AS_COMMON_USER_ERR

DBT-12003: Specified user will be created as a local user in Pluggable database. Local user should not start with C##.

Cause: n/a

Action: Specify a user that does not start with C##. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_PDB_DV_OWNER_AS_LOCAL_USER_ERR

DBT-12004: The specified *string* (*string*) conflicts with Oracle reserved word.

Cause: n/a

Action: Specify a different %s. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DV_OWNER_NAME_IS_RESERVED_WORD_ERR

DBT-12005: The (*string*) specified is either too short or too long.

Cause: The (%s) must be at least 2 characters and at most 30 characters long.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DV_OWNER_NAME_LENGTH_ERR

DBT-12006: *string* contains characters that are not allowed.

Cause: n/a

Action: Specify %s without any of the below characters. (%s) *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DV_OWNER_NAME_WITH_BAD_CHARS_ERR

DBT-12007: The Database Vault owner and Database Vault account manager cannot be same.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DV_MANAGER_SAME_AS_OWNER_ERR

DBT-12008: The *string* password is same as either Database Vault owner or Database Vault account manager.

Cause: n/a

Action: Database Vault owner and Database Vault account manager should have different passwords. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DV_PASSWORD_SAME_AS_USER_NAME_ERR

DBT-12009: The specified password does not meet the Oracle recommended standards.

Cause: The %s password must be at least %s and at most %s characters long. Additionally, the password must contain at least one alphabet, one digit, and one non-alphanumeric character. The non-alphanumeric character must be one of the following: pound(#), percent(%), carat(^), dash(-), underscore(_), plus(+), tilde(~), open bracket([), close bracket()], period(.), or comma(,).

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DV_PASSWORD_COMPLEXITY_WARN

DBT-12010: The *string* password cannot contain any consecutive repeating characters.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DV_PASSWORD_WITH_REPEATED_CHARS_ERR

DBT-12011: Invalid LBACSYS password.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.INCORRECT_LBACSYS_PASSWORD_ERR

DBT-12013: The LBACSYS account is locked. This account needs to be unlocked to configure Label Security on selected PDB.

Cause: n/a

Action: Unlock the LBACSYS account to proceed. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.LBACSYS_ACCOUNT_LOCKED_ERROR

DBT-12101: A database with name (*string*) is already registered with directory service. Proceeding with this name will overwrite the existing configuration details in the directory service.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_ALREADY_REGISTERED_WITH_DIR_SERVICE_WARN

DBT-12102: Oracle Label Security (OLS) cannot be configured with Oracle Internet Directory (OID) if database is not chosen to be registered with OID.

Cause: n/a

Action: Register database with OID in order to configure OLS with OID. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DIR_SERVICE_NOT_SELECTED_ERR**DBT-12103: Oracle Label Security (OLS) cannot be configured with Oracle Internet Directory (OID) if database (*string*) is not registered with OID.**

Cause: n/a

Action: Register database with OID in order to configure OLS with OID. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.CANNOT_SELECT_OID_WITH_UNREGISTERED_DB_ERR**DBT-12104: The specified database (*string*) is not registered with directory service.**

Cause: n/a

Action: Register the specified database or verify the directory service credentials. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DB_NOT_REGISTERED_WITH_DIRECTORY_ERR**DBT-12105: Database wallet already exists for the current database with a different wallet password. Proceeding with this password will overwrite the existing wallet file for this database.**

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NEED_TO_MODIFY_WALLET_FILE_UI_WARN**DBT-12106: There is no listener associated with the database, that is required for the correct configuration of Oracle Label Security (OLS) with Oracle Internet Directory (OID).**

Cause: n/a

Action: Register the database with a listener. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.CANNOT_SELECT_OID_WITHOUT_REGISTERED_LISTENERS_WARN**DBT-12107: There is no listener associated with the database, that is required for the correct configuration of directory service.**

Cause: n/a

Action: Register the database with a listener. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.CANNOT_REGISTER_DS_WITHOUT_REGISTERED_LISTENERS_ERR**DBT-12108: Database wallet already exists for the current database with a different wallet password.**

Cause: n/a

Action: Specify the correct wallet password or delete the existing wallet and try again. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.NEED_TO_MODIFY_WALLET_FILE_SILENT_ERR

DBT-12109: Oracle Label Security (OLS) cannot be configured without Oracle Internet Directory (OID) on the PDB when CDB is configured for OLS with OID.

Cause: n/a

Action: Configure OLS with OID or deselect OLS configure option for PDB. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OLS_WITHOUT_OID_NOT_SUPPORTED_IN_PDB_ERR**DBT-12110: The PDBs configured in the selected Container Database (*string*) will not be unregistered with the Directory Service.**

Cause: Since each PDB inside the selected Container Database can have different Directory Service configurations, it is recommended to unregister the PDBs manually.

Action: Refer Oracle documentation on how to unregister PDB with the Directory Service. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.UNREGISTER_PDB_MANUALLY_WARN

DBT-12111: Oracle Label Security is already configured in the selected pluggable database (*string*).

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.OLS_ALREADY_CONFIGURED_IN_PDB_ERR

DBT-12112: Oracle Label Security (OLS) cannot be configured with Oracle Internet Directory (OID) on the PDB when CDB is configured for standalone OLS only.

Cause: n/a

Action: Configure standalone OLS or deselect OLS configure option for PDB. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OLS_WITH_OID_NOT_SUPPORTED_IN_PDB_ERR**DBT-12113: OLS can be configured in PDB only when it is configured on Container database.**

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.CDB_NOT_CONFIGURED_WITH_OLS_ERR

DBT-12114: Enable the OLS option in the PDB to do configuration or deselect the configure OLS option .

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.OLS_DISABLED_IN_PDB_ERR

DBT-12115: Oracle Label Security (OLS) is configured with directory service in the selected database (*string*). Unregistering the database with directory service might cause OLS to not function as expected.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OLS_WITH_OID_CONFIG_DISCOVERED_WARN

DBT-12116: Unable to create wallet to use for two-way authentication with the directory service: *string*

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_CREATE_2WAY_SSL_WALLET_ERR

DBT-12117: The certificate file (*string*) does not exist.

Cause: n/a

Action: Verify the correctness of the certificate path. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.SSL_CERTIFICATE_NOT_FOUND_ERR

DBT-12501: SYSTEM password for sample schema cannot be null or empty.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.SYSTEM_PASSWORD_FOR_SAMPLE_SCHEMA_NULL_ERR

DBT-12502: Unable to connect to database with the specified SYSTEM password.

Cause: n/a

Action: Specify a valid SYSTEM password. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_SYSTEM_PASSWORD_FOR_SAMPLE_SCHEMA_ERR

DBT-12503: Local node should be member of at least one of the specified serverpools (*string*) for sample schema configuration.

Cause: n/a

Action: Configure local node to be a member of a server pool. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_CONFIGURE_SAMPLE_SCHEMA_ERR

DBT-12504: For Policy Managed database, database instance may come up on local node depending on node availability. Sample schema on local node will be configured only when database instance comes up on local node.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.SAMPLE_SCHEMA_DISALLOWED_ON_NEW_POOL_WARN

DBT-12506: The option *string* is selected to be installed. But prerequisite options *string* is not selected.

Cause: n/a

Action: Select all the prerequisite options for %s option. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DEPENDENTS_NOT_SELECTED_ERR

DBT-12507: DBCA does not allow sample schemas to be configured in container database with more than one PDBs.

Cause: n/a

Action: Choose only one PDB to be created in the container database. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_CREATE_SAMPLE_SCHEMA_FOR_MULTIPLE_PDB_ERR**DBT-12508: Option (*string*) cannot be configured in this home.**

Cause: n/a

Action: Deselect the option to continue. Proceeding without deselection will exclude the option from configuration. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OPTION_CANNOT_BE_CONFIGURED_WARN**DBT-12509: Option *string* is enabled in the PDBs but not in the CDB.**

Cause: This option must be enabled in the CDB in order to be included in the PDBs.

Action: Enable the option %s in the CDB. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OPTION_MUST_BE_ENABLED_IN_CDB_ERR**DBT-12510: The database option '*string*' is not feasible to be installed in the current Oracle home.**

Cause: The current Oracle home does not have required licensing to install the specified database option or does not have all required configuration files.

Action: Refer Oracle database edition licensing information and database option specific documentation to know the list of supported database options. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OPTION_NOT_FEASIBLE_ERR**DBT-12511: The specified tablespace '*string*' cannot be used for the database component '*string*' installation.**

Cause: n/a

Action: Specify different tablespace name. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OPTION_TABLESPACE_NOT_FEASIBLE_ERR**DBT-12512: The option *string* is selected to be installed on PDBs. But prerequisite options *string* is not selected.**

Cause: n/a

oracle.assistants.dbca.resource.DBCAErrorCode.INCORRECT_PDB_ARCHIVE_FILE_ERR

DBT-15002: The specified metadata file (*string*) is not valid.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.INCORRECT_PDB_METADATA_ERR

DBT-15003: PDB with name (*string*) already exists in the container database.

Cause: n/a

Action: Specify a different PDB name. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_NAME_ALREADY_EXISTS_ERR

DBT-15004: The specified PDB Admin user name (*string*) is invalid.

Cause: User name can contain only alphanumeric characters and underscore (_), dollar sign (\$), or pound sign (#), and should not start with C##.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_PDB_ADMIN_USER_ERR

DBT-15005: PDB requires (*string*) datafiles to be created. Maximum number of data files specified in initialization parameter db_files (*string*) exceeded for the Container database.

Cause: n/a

Action: Increase the value of initialization parameter db_files in the container database.

*FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_MAX_DATAFILES_COUNT_EXCEEDED_ERR

DBT-15006: PDB datafiles location (*string*) is not empty. It is recommended to have an empty directory for PDB datafiles.

Cause: n/a

Action: Specify a different location for storing PDB datafiles. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_DATAFILE_LOC_NOT_EMPTY_WARN

DBT-15007: Work area location cannot be null or empty.

Cause: n/a

Action: Specify an existing work area location to unzip the pdb archive file. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.WORK_AREA_NOT_PROVIDED_ERR

DBT-15008: The specified work area location (*string*) is on ASM.

Cause: n/a

Action: Specify an existing file system location for work area. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.WORK_AREA_ON_ASM_ERR

DBT-15009: The specified work area location (*string*) does not exist.

Cause: n/a

Action: Specify an existing location for work area. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.WORK_AREA_NOT_EXISTING_ERR

DBT-15010: The selected PDB (*string*) has tablespaces with different block sizes.

Cause: Unplugging PDB using file set option is not supported for tablespaces having different block sizes.

Action: Select a different PDB. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PDB_WITH_DIFF_BLOCK_SIZE_ERR

DBT-15011: Selected PDB (*string*) has one or more datafiles on ASM.

Cause: Unplugging PDB using PDB Archive option is not supported for PDB with datafiles on ASM.

Action: Select a different PDB. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PDB_ON_ASM_ERR

DBT-15012: (*string*) is not a valid file name.

Cause: n/a

Action: Specify a new file name under an existing directory location. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PDB_FILE_SPECIFIED_IS_DIR_ERR

DBT-15013: The file (*string*) already exists in the same location.

Cause: n/a

Action: Specify a non existing file for %s. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PDB_FILE_EXISTS_ERR

DBT-15014: The parent directory specified for *string* (*string*) does not exist.

Cause: n/a

Action: Specify an existing directory location for %s. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PDB_PARENT_FILE_NOT_EXISTS_ERR

DBT-15015: A user with name (*string*) already exists in the database.

Cause: n/a

Action: Specify a non existing PDB admin user. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_ADMIN_USER_NOT_UNIQUE_ERR

DBT-15016: Specified PDB metadata file is not compatible to create a PDB in the selected CDB. This might impact the PDB creation process and PDB might be in mount mode at the end of this operation.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_INCOMPATIBLE_WARN

DBT-15017: PDB Source type is not specified.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_SOURCE_TYPE_NULL_ERR

DBT-15018: Specified pluggable database is of a higher version '*string*' than the selected container database (*string*).

Cause: Pluggable database version should be lesser than or equal to the target container database version.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_XML_VERSION_INCOMPATIBLE_ERR

DBT-15019: Incompatible location type for PDB creation.

Cause: Selected container database is configured with OMF, hence PDB will be placed in the same OMF location.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_INCOMPATIBLE_LOCATION_TYPE_WARN

DBT-15020: Invalid PDB backup data file.

Cause: n/a

Action: Specify an existing PDB backup data file. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_BACKUP_FILE_NOT_EXIST_ERR

DBT-15021: Invalid PDB backup data file.

Cause: PDB backup data file %s cannot be read.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_BACKUP_FILE_CANNOT_BE_READ_ERR

DBT-15022: PDB datafiles destination locations are not specified for the copyPDBFiles option.

Cause: n/a

Action: Specify PDB datafiles destination location using fileNameConvert command line option. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.FILE_NAME_CONVERT_NOT_SPECIFIED_ERR

DBT-15023: Database files are found in PDB datafiles location (*string*).

Cause: The directory for PDB datafiles is not empty.

Action: Specify a different location for storing PDB datafiles. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_DATAFILE_LOC_IN_USE_ERR

DBT-15024: There is an already existing PDB (*string*) with the same PDB identifier of the specified PDB backup.

Cause: You have selected to plug a PDB using PDB backup without clone option. But, there is an already existing PDB (%s) with the same PDB identifier as the specified PDB backup.

Action: Either select clone option to create new PDB or specify different PDB backup.

*FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_WITH_SAME_DBID_EXISTS_ERR

DBT-15025: Oracle Database Vault (DV) is not configured and enabled in the container database (*string*).

Cause: DV should be configured and enabled in the container database (%s) to perform DV configuration in the pluggable database (%s).

Action: Configure and enable DV in container database and try again. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DV_NOT_CONFIGURED_AND_ENFORCED_IN_DB_ERR

DBT-15026: Specified PDB metadata file is not compatible to create a PDB in the selected CDB.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_INCOMPATIBLE_ERR

DBT-15027: Selected ASM PDB datafile location (*string*) does not exist.

Cause: It has been detected that ASM instance is not running on local node. PDB directory has to be present in the selected diskgroup when local ASM instance is not present.

Action: Create the directory (%s) on ASM diskgroup and retry the operation. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.ASM_DIR_EXISTENCE_ERR

DBT-15028: Source PDB is not specified.

Cause: You have selected to create a PDB from another PDB but source PDB name is not specified.

Action: Specify a valid source PDB name. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SOURCE_PDB_NOT_SPECIFIED_ERR

DBT-15029: Performing operations on PDB\$SEED is not allowed.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_SEED_OPERATION_NOT_ALLOWED

DBT-15030: The Pluggable database (*string*) will be closed and opened in read only mode to perform the clone operation.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_RESTART_REQUIRED_WARN

DBT-15031: Initialization parameter *string* is not modifiable at the Pluggable Database (PDB) level.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_INIT_PARAM_NOT_MODIFIABLE_ERR

DBT-15032: The Pluggable database timezone (*string*) is not valid.

Cause: n/a

Action: Specify timezone value as an offset value of UTC in the format +HH:MM or -HH:MM or as a timezone region name. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_TIMEZONE_NOT_VALID_ERR

DBT-15033: The Pluggable database clone operation is not supported in the current version (*string*) of Oracle home.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_LOCAL_CLONE_NOT_SUPPORTED_IN_DG_ENV_ERR

DBT-15034: The relocate pluggable database operation is not supported in the current version (*string*) of Oracle home.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.RELOCATE_PDB_NOT_SUPPORTED_IN_CURRENT_VERSION_ERR

DBT-15035: Oracle supplied tablespaces such as SYSTEM,SYSAUX can not be excluded from pdb creation operation

DBT-16002: The database will be restarted in order to configure the chosen options.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_RESTART_REQUIRED_WARN

DBT-16003: Pluggable database configuration operation cannot be performed.

Cause: Either no configuration update is specified for the pluggable database or specified options are already configured on the given pluggable database.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.NO_CONFIG_MODIFICATION_IN_
 PDB_ERR

DBT-16004: The *string* command line argument is not valid for configuring a Pluggable database.

Cause: n/a

Action: Remove %s from the list of command line arguments. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.ARGUMENT_NOT_ALLOWED_IN_
 PDB_CONFIG_ERR

DBT-16005: The specified TDE wallet login type *string* is not supported for RAC database.

Cause: n/a

Action: Specify the alternative value for the TDE wallet login type. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.NO_TDE_WALLET_CONFIG_ON_
 RAC_FOR_LOCAL_AUTO_LOGIN_ERR

DBT-16006: The specified transparent data encryption algorithm type *string* is not supported.

Cause: n/a

Action: Specify the alternate value for the TDE algorithm type. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.NO_TDE_WALLET_ALGORITHM_
 ERR

DBT-16007: The specified transparent data encryption wallet mode *string* is not supported on the provided environment.

Cause: n/a

Action: Specify the united mode for wallet type. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.ISOLTAED_TDE_SUPPORTED_ONLY_ON_CLOUD_ENV_ERR

DBT-16008: TDE wallet directory (*string*) is not empty. It is recommended to have an empty directory for TDE wallet.

Cause: n/a

Action: Specify a different location for creating TDE wallet. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_WALLET_DIR_NOT_EMPTY_ERR

DBT-16009: There is an already existing entry in sqlnet.ora for TDE wallet location.

Cause: Only one database can be created with tdeWalletLocation in sqlnet.ora file.

Action: Use TDE wallet root option to create multiple databases with TDE wallet. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_WALLET_LOCATION_EXISTS_IN_SQLNET_ERR

DBT-16010: The specified argument for TDE wallet root is not supported in *string* version of database home.

Cause: n/a

Action: Use alternate options to create TDE in a database. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_WALLET_ROOT_NOT_SUPPORTED_ERR

DBT-16011: Specified tablespace *string* for encryption is not available in the template

Cause: n/a

Action: Specify tablespace which is available in the template. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_TABLESPACE_ENCRYPTION_NOT_SUPPORTED_ERR

DBT-16012: Encryption of tablespace *string* is not supported in the current version of Oracle home

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_TABLESPACE_ENCRYPTION_NOT_SUPPORTED_IN_ORACLEHOME_ERR

DBT-16013: Encryption of all tablespaces is not supported in the current version of Oracle home.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_ENCRYPTION_ALL_TBSPS_NOT_SUPPORTED_ERR

DBT-16014: Specified TDE wallet login type '*string*' for '*string*' keystore configuration is not supported.

Cause: n/a

Action: Specify AUTO_LOGIN or LOCAL_AUTO_LOGIN wallet type. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_WALLET_LOGIN_TYPE_ERR

DBT-16015: Specified KMS key OCID '*string*' is not valid.

Cause: Validation for KMS key OCID has failed on node '%s'

Action: Make sure that specified key OCID '%s' is correct and KMS server access policies are setup correctly for this database system in the Oracle Cloud Infrastructure. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_KMS_KEY_OCID_VALIDATION_ERR

DBT-16016: Required package '*string*' for TDE configuration is not installed on node '*string*'

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_REQUIRED_LIB_NOT_FOUND_ERR

DBT-16017: TDE keystore migration/reverse-migration is not supported in the current version of Oracle home.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_KEYSTORE_MIGRATION_NOT_SUPPORTED_ERR

DBT-16018: Database is already configured with HSM based TDE keystore. File to HSM migration can not be performed

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.HSM_ENABLED_ERR

DBT-16019: Database is not configured with HSM based TDE keystore. HSM to File reverse migration can not be performed

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.HSM_NOT_ENABLED_ERR

DBT-16020: Failed to create database specific KMS configuration file (cdb.json) on node '*string*'

Cause: n/a

Action: Refer log file for more details. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.CDB_JSON_CREATION_FAILURE_ERR

DBT-16021: Unable to open the TDE wallet for the database

Cause: Exception occurred while opening the TDE wallet

Action: Refer log file for more details. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.OPEN_TDE_WALLET_FAILED_ERR

DBT-16022: Unable to add/update HSM credentials to TDE wallet '*string*'

Cause: Exception occurred while updating HSM credentials in the TDE wallet

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.ADD_HSM_CREDENTIALS_FAILED_ER
R

DBT-16023: Unable to delete HSM credentials present in TDE wallet '*string*'

Cause: Exception occurred while updating the sqlnet.ora

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DELETE_HSM_CREDENTIALS_FAILED_
ERR

DBT-16024: Unable to update the ENCRYPTION_WALLET_LOCATION entry in sqlnet.ora

Cause: n/a

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SQLNET_TDE_UPDATE_FAILED_ERR

DBT-16025: Keystore migrate failed during FILE to HSM conversion.

Cause: Exception occurred while executing the 'administer key management migrate' sql command

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.MIGRATE_KEYSTORE_FAILED_ERR

DBT-16026: Keystore reverse migrate failed during HSM to FILE conversion.

Cause: Exception occurred while executing the 'administer key management reverse migrate' sql command.

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.REVERSE_MIGRATE_KEYSTORE_FAIL
E_ERR

DBT-16027: Unable to rotate the master encryption.

Cause: Exception occurred while executing the 'administer key management set key' sql command.

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.ROTATE_MASTER_KEY_FAILED_ERR

DBT-16028: Unable to create the autologin wallet for the database.

Cause: Exception occurred while executing the 'administer key management create auto_login keystore' sql command.

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.CREATE_AUTOLOGIN_WALLET_FAILED_
_ERR

DBT-16029: Master key for the new PDB cannot be set in this environment.

Cause: Specified database is detected as Data Guard environment. Setting the master key for newly created database would affect dataguard MRP (Managed Recovery Process) process.

Action: Specify flag (%s) to skip master key generation for this operation. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.MASTER_KEY_CANNOT_BE_SET_IN_DG_ENV_ERR

DBT-16030: Unable to validate the TDE keystore password.

Cause: Exception occurred while running the mkstore command to verify the TDE keystore password.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.KEYSTORE_PASSWORD_VERIFICATION_ERR

DBT-16031: TDE keystore password is not valid

Cause: Unable to open the wallet using the provided TDE keystore credentials.

Action: Specify the correct TDE keystore credentials. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TDE_KEYSTORE_PASSWORD_INVALID_ERR

DBT-16032: Argument to confirm the successful run of the operation on primary database is not specified.

Cause: The operation needs to be completed on primary database before proceeding on standby database.

Action: Run the operation on primary database and specify the confirmation argument to proceed. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_SUC_NOT_FOUND_ERR

DBT-16033: Specified primary database wallet tar file *string* is not in tar file format.

Cause: n/a

Action: Specify primary database wallet tar file to proceed with the operation on standby database. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_TDE_WALLET_NOT_IN_TAR_FORMAT_ERR

DBT-16034: Primary database wallet tar file not found in specified location *string*.

Cause: n/a

Action: Make sure existence and readability permission of wallet tar file to proceed with the operation on standby database. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_TDE_WALLET_TAR_NOT_FOUND_ERR

DBT-16035: Primary database wallet tar file is not specified.

Cause: n/a

Action: Specify primary database wallet files tar to proceed with the operation on standby database. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.NO_PRIMARY_TDE_WALLET_TAR_SPECIFIED_ERR

DBT-16036: Unable to enable the Data Guard configuration between primary and standby database.

Cause: Exception occurred while enabling the Data Guard configuration.

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.ENABLE_DG_CONFIG_FAILED_ERR

DBT-16037: REDO sync between the standby and primary database failed or not completed.

Cause: n/a

Action: Verify the sync between the primary and standby database. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.REDO_SYNC_FAILED_ERR

DBT-16038: Unable to extract primary database wallet to standby wallet location.

Cause: n/a

Action: Make sure primary database wallet tar file %s contains the required wallet files *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_TDE_WALLET_EXTRACTION_FAILED_ERR

DBT-16039: Unable to load the TDE keystore config method for the database.

Cause: Either TDE keystore is not configured or exception occurred while loading the TDE config method.

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.TDE_KEYSTORE_CONFIG_METHOD_NOT_LOADED_ERR

DBT-16040: Unable to disable the Data Guard configuration between primary and standby database.

Cause: Exception occurred while disabling the Data Guard configuration.

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DISABLE_DG_CONFIG_FAILED_ERR

DBT-16041: TDE Keys file (*string*) already exists.

Cause: n/a

Action: Specify a different TDE Keys file name. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.TDE_KEYS_FILE_ALREADY_EXISTS_ERR

DBT-16042: TDE related operations can not be performed on the database (*string*).

Cause: TDE wallet is not configured on the database (%s).

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.TDE_WALLET_NOT_CONFIGURED_ERR

DBT-16043: Operation 'setKMSKeyVersion' is not supported on the FILE based TDE keystore.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.SET_KEY_VERSION_NOT_SUPPORTED_ON_FILE_BASED_KEYSTORE_ERR

DBT-16044: Argument to confirm the successful run of the operation on standby database is not specified.

Cause: The operation needs to be completed on all standby databases before proceeding on primary database.

Action: Run the operation on standby databases and specify the confirmation argument to proceed. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_SUC_NOT_FOUND_ERR

DBT-16045: Required master key ID is not provided for this operation.

Cause: n/a

Action: Specify the required master key ID. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_MASTER_KEY_ID_REQUIRE_D_ERR

DBT-16046: Master key ID (*string*) provided does not match with the value associated in KMS server for KMS key version OCID (*string*).

Cause: n/a

Action: Specify the valid master key ID or KMS key version OCID. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.MKID_MISMATCH_WITH_KEY_VERSION_ERR

DBT-16047: Unable to close the TDE wallet for the database

Cause: Exception occurred while closing the TDE wallet

Action: Refer log file for more details. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.CLOSE_TDE_WALLET_FAILED_ERR

DBT-16048: Failed to retrieve KMS primary key for the database '*string*'.

Cause: Specified database is detected as KMS enabled database. However unable to retrieve the primary key OCID details from the configuration file '%s'.

Action: Verify the existence and correctness of KMS configuration file for the specified database *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.GET_KMS_PRIMARY_KEY_FAILED_ERR

DBT-16051: Archive log mode is not enabled in the primary database.

Cause: n/a

Action: Primary database should be configured with archive log mode for creating a duplicate or standby database. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_DB_NOT_IN_ARCHIVE_LOG_MODE_ERR

DBT-16052: The value (*string*) specified for the initialization parameter db_name is not same as primary database name (*string*).

Cause: In order to create standby database, the database name should be same as primary database. However, either the specified db_name initialization parameter or the first 8 character of the specified gdb name is not matching the primary database name.

Action: Specify a same value for db_name initialization parameter or update the GDB name value in such a way that first 8 characters of host name part of it is matching the primary database name. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_DB_NAME_NOT_SAME_AS_PRIMARY_DB_NAME_ERR

DBT-16053: Duplicate database location contains ASM location paths.

Cause: ASM is not configured on this system.

Action: Specify appropriate database location for duplicate database. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.ASM_NOT_CONFIGURED_ON_DUPLICATE_TARGET_ERR

DBT-16054: The datafile location (*string*) used for duplicate database creation is not empty.

Cause: n/a

Action: Specify valid empty directory for datafile location. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DUPLICATE_DB_LOCATION_ALREADY_CONTAINS_DATAFILE_ERR

DBT-16055: The control file (*string*) used for duplicate database already exists.

Cause: n/a

Action: Specify a valid control file location. Ensure that valid datafile location or Fast Recovery Area location is specified. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DUPLICATE_DB_LOCATION_ALREADY_CONTAINS_CONTROLFILE_ERR

DBT-16056: Specified primary database is not a Single Instance (SI) database.

Cause: Duplicate database operation is supported only for SI databases.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_DB_RAC_ERR

DBT-16057: Specified primary database is a container database (CDB).

Cause: Duplicate database operation is supported only for non container databases.

Action: n/a *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_CDB_ERR

DBT-16058: Database configuration type is not specified.

Cause: One of the configuration types SI, RAC, or RAC One Node must be specified.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_CONFIG_TYPE_REQUIRED_ERR

DBT-16059: Database deployment type is not specified.

Cause: One of the deployment types Admin Managed or Policy Managed must be specified.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_DEPLOYMENT_TYPE_REQUIRED_ERR

DBT-16060: Specified standby database creation is not supported in Standard Edition home.

Cause: Standby database creation is supported only in Enterprise Edition home.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_DB_CREATION_NOT_SUPPORTED_ERR

DBT-16061: Specified primary database tde wallet location (*string*) is on ASM.

Cause: n/a

Action: Specify an existing file system location for primary database tde wallet location. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_DB_TDE_WALLET_BACKUP_LOC_ON_ASM_ERR

DBT-16062: Transparent Data Encryption (TDE) is not enabled in the primary or source database.

Cause: In order to create duplicate database with Transparent Data Encryption (TDE) option, primary or source database should be configured with TDE option.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PRIMARY_DB_TDE_NOT_CONFIGURED_ERR

DBT-17001: You have chosen to ignore some of the prerequisites for this DBCA operation. This may impact DBCA operation.

Cause: n/a

Action: Ensure that the failed prerequisites are fixed before proceeding. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.USER_IGNORED_PREREQ_WARNING

DBT-18001: Database requires *string* datafiles to be created. However the value specified for initialization parameter *db_files* (*string*) is lower than the required value.

Cause: The initialization parameter *db_files* represents the maximum number of datafiles that can be created on this database, but the specified value for this initialization parameter is lower than the number of datafiles to be created for this database.

Action: Increase the value of initialization parameter *db_files* in the database. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.EXCEEDED_MAX_NUMBER_OF_DATAFILES_ERR

DBT-18002: This database will result into approximately *string* datafiles to be created, which exceeds the default value of initialization parameter *db_files* (*string*). The value of *db_files* will be set to *string*.

Cause: The initialization parameter *db_files* represents the maximum number of datafiles that can be created on this database. Based on the inputs provided, the expected number of datafiles that will get created will exceed the default value of *db_files*.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.EXCEEDED_DEFAULT_NUMBER_OF_DATAFILES_WARN

DBT-18003: Transparent Data Encryption (TDE) is supported only for Enterprise Edition of database.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TDE_NOT_SUPPORTED_FOR_NON_EE_ERR

DBT-18004: Specified properties for tempfile (*string*) is invalid.

Cause: n/a

Action: Specify values in *initial size:increment size:max size* format. You could use UNLIMITED for max size. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.TEMP_FILE_PROPERTIES_VALUE_ERR

DBT-18005: Specified Size properties for file (*string*) is invalid.

Cause: n/a

Action: Specify Size values in *initial size:increment size:max size* format. You could use UNLIMITED for max size. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.FILE_SIZE_PROPERTIES_VALUE_ERR

DBT-19001: Move database files configuration cannot be performed along with other configuration options.

Cause: n/a

Action: Specify move database files option without remaining configuration options *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.OTHER_CONFIG_OPTIONS_SPECIFIED_ERR

DBT-19002: Move database files cannot do configuration of Fast Recovery Area.

Cause: Fast Recovery Area is not enabled in the source database. Move database files operation cannot do fresh configuration of recovery files.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.FRA_NOT_CONFIGURED_IN_SOURCE_DB_ERR

DBT-19003: Oracle Managed Files (OMF) option cannot be set to false.

Cause: OMF option is enabled in source database. Move database files operation cannot disable the OMF option.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.OMF_CONFIGURED_IN_SOURCE_DB_ERR

DBT-19004: Oracle Database Vault (DV) is configured in the source database.

Cause: Source database configured with Oracle Database Vault (DV) option is not supported for moving database files.

Action: Disable Oracle Database Vault (DV) in the source database before moving database files. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.MOVEDB_DV_ENABLED_ERR

DBT-19101: The specified single instance database (*string*) is a member of a Data Guard configuration that has fast-start failover enabled.

Cause: n/a

Action: Fast-start failover must be disabled in before converting database to RAC. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.FAILOVER_STATUS_ENABLED_ERR

DBT-19102: The specified single instance database (*string*) is a member of a Data Guard configuration that has maximum protection mode enabled.

Cause: n/a

Action: Maximum protection mode must be disabled before converting database to RAC. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.MAX_PROTECTION_ENABLED_ERR

DBT-19103: Source Oracle home version *string* and target Oracle home version *string* are different.

Cause: RAC Conversion of single instance database is possible only when the versions are same.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.VERSION_MISMATCH_BETWEEN_SRC_AND_TARGET_HOME_ERR

DBT-19104: PDBSettings backup cloning failed.

Cause: n/a

Action: Refer log file for more details. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PDB_SETTINGS_BACKUP_CLONE_FAILED_WARN

DBT-19201: This operation will delete template file *string* along with database backup files associated with it.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DELETE_TEMPLATE_WARN

DBT-19202: The Database Configuration Assistant will delete the Oracle instances and datafiles for your database. All information in the database will be destroyed.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DELETE_INSTANCE_WARN

DBT-19301: Update DB Files Locations with new database name has failed.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.RENAME_DB_UPDATE_DATAFILE_STEP_FAILED

DBT-19302: Update DB entries for new database name has failed.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.RENAME_DB_UPDATE_DB_ENTRY_STEP_FAILED

DBT-19303: RMAN restore failed while performing rename database operation.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.RENAME_DB_RMAN_RESTORE_STEP_FAILED

DBT-19401: Archive log mode is not enabled in the (*string*) database.

Cause: (%s) database should be configured with archive log mode to perform the operation.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_NOT_IN_ARCHIVELOG_MODE_ERR

DBT-19402: Local undo mode is not enabled in the (*string*) container database.

Cause: Local undo mode should be enabled in the (%s) container database to perform the operation.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_LOCAL_UNDO_NOT_ENABLED_ERR

DBT-19403: (*string*) user does not have (*string*) privilege in the remote container database.

Cause: n/a

Action: Specify user with (%s) privilege in the remote container database to perform the operation. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.NO_PRIVILEGE_FOR_USER_ON_REMOTE_DB_ERR

DBT-19404: Specified database link user (*string*) does not exist in the database(*string*).

Cause: n/a

Action: Specify an existing database link user. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DBLINK_USER_NOT_EXIST_ERR

DBT-19405: Database link (*string*) is already exists.

Cause: n/a

Action: n/a *FQN: oracle.assistants.dbca.resource.DBCAErrorCode.DBLINK_EXIST_ERR

DBT-19406: Local CDB(*string*) and Remote CDB(*string*) APEX option are different.

Cause: Local CDB(%s) has APEX option enabled (%s) and Remote CDB(%s) has APEX option enabled (%s).

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.APEX_OPTIONS_MISMATCH_ERR

DBT-19407: Database option (*string*) is not installed in Local CDB (*string*).

Cause: The database options installed on the Remote CDB(%s) must be the same as the database options installed on the Local CDB(%s).

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_OPTIONS_MISMATCH_ERR

DBT-19408: Incompatible location type for PDB operation. Pluggable database operation cannot be performed.

Cause: Remote CDB(%s) is configured with Oracle Managed Files (OMF) option. Local CDB(%s) is not configured with OMF option.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DB_OMF_TO_NONOMF_NOTSUPPORTED_ERR

DBT-19409: There is an already existing PDB (*string*) with the same GUID of the specified remote PDB.

Cause: You have selected to relocate a PDB from a remote database. But, there is an existing local PDB (%s) with the same GUID as the specified remote PDB.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_WITH_SAME_GUID_EXISTS_ERR

DBT-19410: Refreshable Pluggable database cannot be opened in read/write mode.

Cause: n/a

Action: Specify a valid open mode for refreshable Pluggable database. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.REFRESHABLE_PDB_READ_WRITE_MODE_ERR

DBT-19411: Invalid credentials specified for remote pdb tde key file.

Cause: Unable to validate the remote pdb tde key file with the specified credentials

Action: Export the remote pdb tde key into a file using administer key management command with export password. Specify the exported key file path along with its credentials and retry the operation *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_REMOTE_PDB_TDE_KEY_EXPORTED_FILE_PASSWORD_ERR

DBT-19412: Specified remote pdb tde key file (*string*) is invalid

Cause: Specified remote tde key file does not exist or invalid or not readable

Action: Export the remote pdb tde key into a file using administer key management command with export password. Specify the exported key file path along with its credentials and retry the operation *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_REMOTE_PDB_TDE_KEY_EXPORTED_FILE_ERR

DBT-19413: Remote pdb tde key exported file path not specified.

Cause: Unable to validate the remote pdb tde key file with the specified credentials

Action: Export the remote pdb tde key into a file using administer key management command with export password. Specify the exported key file path along with its credentials and retry the operation *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.INVALID_REMOTE_PDB_TDE_KEY_EXPORTED_FILE_PATH_ERR

DBT-19414: Remote pdb clone operation can not be performed.

Cause: Specified source database '%s' is having higher compatible value than the target (destination) database '%s'. Compatible initialization parameter value detected on source database is '%s' where as target database is set to '%s'.

Action: Choose a target database which is having the compatible parameter value higher or equal to source database. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.HIGHER_COMPATIBLE_VALUE_ON_SOURCE_PDB_ERR

DBT-19415: Unable to verify the compatibility initialization parameters on specified source database and target (destination) database.

Cause: An unexpected error occurred when detecting the required parameter information.

Action: Refer to the log file for more information. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_VERIFY_COMPATIBLE_VALUE_ERR

DBT-19416: The current operation of pluggable database to a higher version target container database requires an upgrade procedure to be performed.

Cause: Database version detected on pluggable database is '%s' whereas version detected of target container database is '%s'.

Action: Refer to the command documentation and verify the argument selection. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.REMOTE_PDB_REQUIRES_UPGRADE_ERR

DBT-19417: Pluggable database does not require upgrade as part of the current operation.

Cause: Database version detected on pluggable database and target container database is '%s'.

Action: Verify the command line arguments to not include the option to upgrade the pluggable database. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.REMOTE_PDB_DOES_NOT_REQUIRE_UPGRADE_ERR

DBT-19418: Unable to validate the pluggable database *string* and target container database versions.

Cause: An unexpected error occurred when detecting pluggable database and target container database versions.

Action: Refer to the log file for more information and verify that both databases are up and in an accessible open state. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_VERIFY_DB_VERSIONS_ERR

DBT-19419: The operation cannot proceed due the selected databases are from different release versions.

Cause: The detected versions where the following ones: %s

Action: Verify the selected databases are from the same release version and try again.

*FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DATABASE_VERSION_MISMATCH_ERR

DBT-19420: Specified PDB (*string*) cannot be cloned/relocated to the target database (*string*)

Cause: Source PDB timezone version (%s) is higher compare to the target database timezone version (%s)

Action: Update the timezone version in the target database and retry the operation *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.TIMEZONE_VERSION_FILES_MISMATCH_ERR

DBT-19501: Unable to run secure command. The secure command failed with following message: 'string'

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.SECURE_COMMAND_EXECUTION_FAIL_ERR

DBT-19502: Command 'string' execution has failed on nodes string.

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.COMMAND_EXECUTION_FAILED_ON_NODES_ERR

DBT-19503: Command 'string' execution has failed.

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.COMMAND_EXECUTION_FAILED_ERR

DBT-19504: PILOT configuration failed

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PILOT_CONFIGURATION_FAILED_ERR

DBT-19505: Job 'string' status has not been updated at the end of execution.

Cause: Job status need to be updated based on success or failure of the execution.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.JOB_STATUS_NOT_UPDATED_ERR

DBT-19506: Required patches (string) are not present in the Oracle home 'string'.

Cause: Apply the required patches (%s) and re-try the operation.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PATCHES_NOT_FOUND_ERR

DBT-19507: Unable to extract the plugin XML (string).

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PLGIN_XML_EXTRACTION_FAILED_ERR

DBT-19508: Unable to initialize the pilot application for the plugin (string).

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PILOT_APP_INITIALIZATION_FAILED_ERR

DBT-19509: Unable to load extracted plugin XML (*string*).

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PLUGIN_XML_LOADING_FAILED_ERR**DBT-19510: Unable to run the plugin using pilot application.**

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PILOT_APP_EXECUTION_FAILED_ERR**DBT-19511: Unable to load the pilot application.**

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PILOT_APP_LOADING_FAILED_ERR**DBT-19512: Unable to load the last run of the pilot application.**

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PILOT_LAST_EXECUTION_LOADING_FAILED_ERR**DBT-19513: Unable to resume the previous session.**

Cause: Unable to find the checkpoint file of the last session.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_RETRIEVE_LAST_CHECKPOINT_FILE_ERR**DBT-19514: An error occurred during an internal Pilot operation.**

Cause: n/a

Action: Refer application log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DBCA_COMMON_PILOT_EXCEPTION**DBT-19515: Unable to revert the plugin '*string*' configurations**

Cause: '%s' job is attempted

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.REVERT_OF_MIGRATION_NOT_ALLOWED_ERR**DBT-19601: Data Guard broker is disabled.**

Cause: This operation requires Data Guard broker to be enabled.

Action: Verify that the '%s' initialization parameter of database %s is set to TRUE. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.DG_BROKER_IS_DISABLED_ERR**DBT-19602: Unable to check Pluggable database '*string*' existence in primary database '*string*'.**

Cause: n/a

Action: Verify that the primary database '%s' is running. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_CHECK_PDB_EXISTENCE_IN_PRIMARY_ERR

DBT-19603: Pluggable database '*string*' does not exist in primary database '*string*'.

Cause: n/a

Action: Verify that the primary database '%s' is running. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.PDB_DOES_NOT_EXIST_IN_PRIMARY_ERR

DBT-19604: Unable to validate current archive log deletion policy in database '*string*'.

Cause: n/a

Action: Verify that the database '%s' is running. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_CHECK_ARCHIVELOG_DELETION_POLICY_ERR

DBT-19605: The current archive log deletion policy in database '*string*' is not supported for this operation.

Cause: This operation requires archive log deletion policy to be set to NONE.

Action: Change the archive log deletion policy to NONE in database '%s'. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.ARCHIVELOG_DELETION_POLICY_NOT_NONE_ERR

DBT-19606: PDB creation operation cannot be performed on the specified PDB '*string*'.

Cause: The specified database is detected as a standby database and the PDB is not in mounted mode. PDB creation operation on standby database can be completed only when the PDB is in mounted mode.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_PDB_NOT_IN_MOUNTED_MODE_FOR_CREATION_ERR

DBT-19607: Primary database and Standby database sync operation is not completed.

Cause: Standby and primary database not synced after %s seconds.

Action: n/a *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_SYNC_OPERATION_NOT_COMPLETE_ERR

DBT-19608: Data Guard broker utility (dgmgrl) is not ready to perform the operation

Cause: n/a

Action: Make sure that the initialization parameter '%s' is set to TRUE and verify the dgmgrl log for more information. *FQN:
 oracle.assistants.dbca.resource.DBCAErrorCode.DATA_GUARD_BROKER_NOT_AVAILABLE_ERR

DBT-19609: Unable to retrieve primary database information.

Cause: Failed to retrieve primary database information from Data Guard broker utility (dgmgrl).

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_GET_PRIMARY_DB_INFO_ERR

DBT-19610: Specified standby database '*string*' redo is not in sync with primary database

Cause: Primary database has thread-scn '%s' generated. However they are not applied on standby. Standby database has thread-scn '%s' applied.

Action: Verify redo received and applied on standby are same. If not copy the missing archive log files and restart the managed recovery operations *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_IS_NOT_IN_SYNC_WITH_PRIMARY_REDO_WARN

DBT-19611: Specified standby database '*string*' redo is not in sync with primary database

Cause: Primary database has thread-scn '%s' generated. However they are not applied on standby. Standby database has thread-scn '%s' applied.

Action: Verify redo received and applied on standby are same. If not copy the missing archive log files and restart the managed recovery operations *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_IS_NOT_IN_SYNC_WITH_PRIMARY_REDO_ERR

DBT-19612: Primary database and Standby database sync operation is not completed.

Cause: Standby and primary database not synced after %s seconds.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.STANDBY_SYNC_OPERATION_NOT_DONE_WARN

DBT-19613: Unable to load standby databases while validating redolog sync with standby

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_LOAD_STANDBY_DBS_ERR

DBT-19614: Unable to load redolog sync details while validating redolog sync with standby

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_LOAD_REDOLOG_SYNC_DETAILS_ERR

DBT-19701: Unable to fetch the master key ID from the given KMS key version OCID '*string*'.

Cause: n/a

Action: Refer log file for more information. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.UNABLE_TO_FETCH_MASTER_KEY_ID_ERR

DBT-19801: TDE is already configured in the selected database (*string*).

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_ALREADY_CONFIGURED_ERR

DBT-19802: TDE configuration operation cannot be performed.

Cause: No additional configuration options can be specified when configuring TDE in the database.

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.ONLY_CONFIGURE_TDE_VALIDATION_ERR

DBT-19803: The specified keystore config method (*string*) is not supported for the current operation.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.TDE_KEYSTORE_CONFIG_METHOD_NOT_SUPPORTED_ERR

DBT-19901: Specified PMEM File Store Device Mount (*string*) is not a valid device path.

Cause: n/a

Action: Specify a valid PMEM File Store Device path. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PMEMFS_PMEM_MOUNT_DEVICE_NOT_VALID_ERR

DBT-19902: PMEMFS Storage is not configured.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PMEMFS_STORAGE_NOT_CONFIGURED_ERR

DBT-19903: Specified PMEMFS Storage size value (*string*) is incorrect.

Cause: n/a

Action: Specify a valid PMEM FS size value. *FQN:
oracle.assistants.dbca.resource.DBCAErrorCode.PMEMFS_SIZE_INCORRECT_ERR

DBT-19904: The specified PMEM File Store Name *string* contains non alphanumeric characters.

Cause: n/a

Action: Specify %s that starts with an alphabet and contains only alphanumeric characters. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PMEMFS_NAME_CONTAINS_INVALID_CHARS_ERR

DBT-19905: The specified PMEM File Store Name does not start with alphabetic character.

Cause: n/a

Action: Specify a (%s) that starts with an alphabet and contains only alphanumeric characters. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PMEMFS_NAME_SHOULD_START_WITH_ALPHA_ERR

DBT-19906: Specified PMEM File Store Name *string* cannot exceed (*string*) characters.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PMEMFS_NAME_LENGTH_ERR

DBT-19907: PMEMFS storage option is selected for datafile location.

Cause: PMEMFS storage option is supported only for a Single Instance (SI) database.

Action: n/a *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.PMEMFS_STORAGE_NOT_SUPPORTED_ERR

DBT-19908: Database initialization parameter open_links is set to 0 (zero) on the specified target database '*string*'.

Cause: This operation requires database link to be created on target database. Hence the above mentioned initialization parameter to be set to non-zero value.

Action: Update the open_links initialization parameter to non-zero value on the specified target database %s and then retry the operation. *FQN:

oracle.assistants.dbca.resource.DBCAErrorCode.DB_OPEN_LINKS_IS_ZERO_ERR

DBT-20001: Select a database to upgrade or move.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.DATABASE_NOT_SELECTED_ERR

DBT-20002: There are no databases detected on the system.

Cause: DBUA relies on oratab entries and Oracle Grid Infrastructure software as its source for detecting Oracle Single Instance and RAC databases. It did not detect any Oracle database configured on the system from these sources.

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_EMPTY_CACHE_ERR

DBT-20003: Specified database *string* is not detected on the system.

Cause: DBUA relies on oratab entries and Oracle Grid Infrastructure software as its source for detecting Oracle Single Instance and RAC databases. It did not detect the specified database configured on the system from these sources.

Action: Verify that the dbname or SID of the selected database is correct. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_SID_NOT_FOUND_IN_CACHE_ERR

DBT-20004: OS authentication is disabled. Specify the corresponding SYSDBA credentials.

Cause: n/a

Action: n/a *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_SYSDBA_CREDENTIALS_REQD_ERR
```

DBT-20005: The SYSDBA username and password are not specified. Verify and try again.

Cause: n/a

Action: n/a *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_SYSDBA_INCOMPLETE_CREDENTIALS_REQD_ERR
```

DBT-20006: The specified user *string* does not have SYSDBA privileges to perform the selected operation.

Cause: n/a

Action: n/a *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_SYSDBA_PRIVILEGES_REQD_ERR
```

DBT-20007: Specified SYSDBA credentials are not correct. Specify the correct SYSDBA credentials and try again.

Cause: n/a

Action: n/a *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_SYSDBA_CREDENTIALS_INVALID_ERR
```

DBT-20008: There is no database instance running on the local node.

Cause: There was no local instance running for the selected database on the current system.

Action: Ensure that there is an instance configured on the local node or start DBUA on the node where local instance is running. *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_LOCAL_INSTANCE_REQD_ERR
```

DBT-20009: Specified database *string* is not running. DBUA started the database for information loading and to perform the required validations.

Cause: n/a

Action: n/a *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_NOT_RUNNING_WARN
```

DBT-20010: Specified database *string* could not be started.

Cause: n/a

Action: Start the database manually and try again. *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_NOT_STARTING_UP_ERR
```

DBT-20011: Oracle home *string* is not enabled with RAC option.

Cause: n/a

Action: Launch DBUA from an Oracle home that has the RAC option enabled. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_RAC_NOT_ENABLED_ER
RR

DBT-20012: A RAC enabled database in Oracle home *string* was selected. However, it was detected that the Oracle Grid Infrastructure is not currently running. Start the Oracle Grid Infrastructure and try again.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_CRIS_NOT_RUNNING_ER
RR

DBT-20013: The selected database version *string* is higher than the Oracle home version *string*.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_HIGHER_VER_ERR

DBT-20014: A direct upgrade of *string* database to Oracle Database release *string* is not supported.

Cause: DBUA has detected that the version of the selected database is lower than the supported versions for upgrade. Following are the supported database versions for upgrade: %s.

Action: Upgrade the database to one of the supported versions for upgrade, and then upgrade to %s version. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_NOT_SUPPORTED_VER
_ERR

DBT-20015: The version of the selected database could not be determined.

Cause: n/a

Action: Verify and/or start the database manually. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_UNKNOWN_VER_ERR

DBT-20016: The selected database cannot be upgraded as it is already running at *string* version.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_NOT_SELECTABLE_ER
R

DBT-20017: The database *string* is not in a READ/WRITE open mode.

Cause: n/a

Action: Open the database in READ/WRITE mode and try again. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_NOT_OPENED_ERR

DBT-20018: The version of Oracle Grid Infrastructure software (*string*) is lower than required (*string*).

Cause: DBUA has detected that the Oracle Grid Infrastructure version is lower than the selected database version.

Action: Upgrade the Grid Infrastructure and try again. *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_CRS_VERSION_MISMATCH_ERR
```

DBT-20019: The version of Oracle Grid Infrastructure software (*string*) is lower than required (*string*). Oracle High Availability service registration will be skipped.

Cause: n/a

Action: Upgrade the Grid Infrastructure and try again if you need the selected database to be registered to the Oracle High Availability service. *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_CRS_VERSION_MISMATCH_WARN
```

DBT-20020: The PDB seed of the database *string* could not be opened in a valid mode.

Cause: DBUA was not able to open the PDB seed on the selected database.

Action: Verify and/or start the PDB seed manually. *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_PDBSEED_NOT_OPENED_ERR
```

DBT-20021: The current Oracle home *string* does not have the required *string* licence to perform the *string* operation.

Cause: n/a

Action: n/a *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_EDITIONS_NOT_COMPATIBLE_ERR
```

DBT-20022: The specified database uses disk group(s) *string* that have access control enabled.

Cause: When the access control parameter is enabled, the database wont be able to access its files within the mentioned diskgroup(s) after the upgrade.

Action: Disable the access control parameter on the ASM instance as a privileged user and try again. Once the database upgrade finishes you can re-enable the access control parameter on the mentioned diskgroups. *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.DISKGROUPS_ACL_ENABLED_ERR
```

DBT-20023: The software under Oracle home location *string* is not configured on all the nodes of the selected database.

Cause: n/a

Action: Verify that the nodes configured for the Oracle home %s match the nodes configured for the selected database and try again. *FQN:

```
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_NODES_NOT_EQUIVALENT_WARN
```

DBT-20024: The local instance for the specified database *string* could not be started.

Cause: n/a

Action: Start the local instance manually and try again. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_INSTANCE_NOT_STARTING_UP_ERR

DBT-20025: The version of one or more pluggable databases could not be detected to determine the upgrade status of the database.

Cause: DBUA was not able to open the detected pluggable databases to determine the version.

Action: Verify that there are no pluggable databases in MOUNT state and try again. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_UNKNOWN_PDB_VERSION_ERR

DBT-20026: This operation is not supported for Oracle Real Application Cluster databases on Standard Edition (SE).

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_SE2_RAC_NOT_SUPPORTED_ERR

DBT-20027: The current operation is not supported for non container databases (CDB).

Cause: n/a

Action: Plug the selected database into an existing container database and try again. For more details, refer to Oracle documentation. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_NONCDB_NOT_SUPPORTED_ERR

DBT-20028: The Oracle home *string* has an already existing entry in sqlnet.ora for TDE wallet location that conflicts with the configured TDE wallet for the *string* database.

Cause: Only one TDE wallet configuration can be configured in the sqlnet.ora file.

Action: Verify the TDE wallet configuration and try again. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_TDE_WALLET_SQLNET_CONFLICT_ERR

DBT-20029: Partial selection of PDBs in a CDB for upgrade is not allowed. All PDBs in the CDB must be upgraded.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_PDB_SELECTION_NOT_ALLOWED

DBT-20030: Selected PDB(s) *string* are opened in restricted mode.

Cause: DBUA has detected PDB(s) that are open in RESTRICTED mode. This may cause issues during the upgrade.

Action: Open the PDB(s) %s in non RESTRICTED mode. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_IN_RESTRICTED_MODE_WARN

DBT-20031: The selected PDB(s) *string* are not part of the selected container database. Verify and try again.

Cause: DBUA was not able to detect the following PDB(s) %s in the selected container database.

Action: Verify the pluggable database selection and try again. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_NOT_EXISTING_PDB_ERR

DBT-20032: The selected PDB(s) *string* have already been upgraded or are in a newer version than the required one. Verify and try again.

Cause: DBUA has detected that the selected PDB(s) belong to a version equal or greater than the container database.

Action: Verify the pluggable database selection and try again. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_UPGRADED_PDB_ERR

DBT-20033: There are no selected pluggable databases (PDB) for upgrade. Select at least one and try again.

Cause: n/a

Action: n/a *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_NO_SELECTED_PDB_ERR

DBT-20034: The selected PDB(s) *string* do not have a valid input as priority value.

Cause: The upgrade priority for pluggable databases must be in numeric format.

Action: Specify a valid numeric value as priority of the selected PDB(s). *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_INVALID_PDB_PRIORITY_FORMAT_ERR

DBT-20035: The selected PDB(s) *string* have an invalid upgrade priority value.

Cause: The upgrade priority value has to be within the allowed ranges[1-4096].

Action: Refer to Oracle documentation. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_OUT_OF_RANGE_PDB_PRIORITY_ERR

DBT-20036: The selected PDB(s) *string* are currently not plugged to the selected container. Verify and try again.

Cause: DBUA has detected that some PDB(s) are in UNPLUGGED state within the selected container database.

Action: n/a *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_PDBS_NOT_PLUGGED_ERR

DBT-20037: The selected PDB(s) *string* are currently not opened. Verify and try again.

Cause: DBUA has detected that some PDB(s) are in MOUNTED state within the selected container database.

Action: n/a *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_PDBS_NOT_OPENED_ERR

DBT-20038: The selected PDB(s) *string* are not in a required version for a Container Database (CDB) upgrade. Verify and try again.

Cause: DBUA has detected that some PDB(s) belong to a version that is not supported by the selected container database.

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_PDBS_NOT_IN_SYNC_ERR

DBT-20039: The PDBs that are not selected will be in MIGRATE mode after the CDB gets upgraded, making them unavailable until they are upgraded.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_PLUG_PDBS_PENDING_WARN

DBT-20040: The password for Oracle home user cannot be empty.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.ORACLE_HOME_USER_PASSWORD_EMPTY_ERR

DBT-20041: Specified Oracle home user password is incorrect.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.ORACLE_HOME_USER_PASSWORD_INCORRECT_ERR

DBT-20050: Database upgrade is not supported from Oracle Home with Oracle Home User *string* to an Oracle Home with Windows Built-In account.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.ORACLE_HOME_USER_TO_LOCAL_SYSTEM_ERR

DBT-20051: Database *string* is not supported from Oracle Home with Oracle Home User *string* to a Oracle Home with Oracle Home User *string*.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.ORACLE_HOME_USERS_DIFFERENT_ERR

DBT-20052: Database *string* is not supported from Oracle Home with Oracle Home User *string* to an Oracle Home with Windows Virtual Account.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.ORACLE_HOME_USERS_TO_VIRTUAL_USER_ERR

DBT-20053: Database *string* is not supported from Oracle Home with Windows Virtual Account to an Oracle Home with Oracle Home User *string*.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.VIRTUAL_USER_TO_ORACLE_HOME_USER_ERR

DBT-20054: Database upgrade is not supported from Oracle Home with Windows Virtual Account to an Oracle Home with Windows Built-In account.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.VIRTUAL_USER_TO_LOCAL_SYSTEM_ERR

DBT-20055: Oracle Real Application Cluster Database upgrade is not supported from Oracle Home with non domain Oracle Home user *string*.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.ORACLE_HOME_USER_IS_NOT_DOMAIN_USER_FOR_RAC

DBT-20060: One or more Oracle upgrade pre-checks resulted in warning conditions that may require further review.

Cause: n/a

Action: Refer to the pre-upgrade results location for details: %s *FQN:
 oracle.assistants.dbua.resource.ErrorCode.PREREQ_HAS_WARNINGS

DBT-20061: One or more Oracle upgrade pre-checks resulted in error conditions that require further review.

Cause: n/a

Action: Refer to the pre-upgrade results location for details: %s *FQN:
 oracle.assistants.dbua.resource.ErrorCode.PREREQ_HAS_ERRORS

DBT-20062: One or more of the pre-upgrade checks on the database have resulted into error conditions that must be addressed before proceeding. It is not recommended to ignore them.

Cause: n/a

Action: n/a *FQN: oracle.assistants.dbua.resource.ErrorCode.PREREQ_IGNORED

DBT-20070: The specified custom script(s) do not exist: *string*

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.OPTIONS_CUSTOM_SCRIPT_ERR

DBT-20071: The Timezone upgrade will not be executed because the Timezone version of the *string* Oracle Home could not be loaded.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.OPTIONS_TZ_UPGRADE_NOT_FEASIBLE_WARN

DBT-20072: In case that Timezone upgrade is desired, it is recommended to perform the recompilation of invalid objects as well.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.OPTIONS_TZ_UPGRADE_OBJ_RECOMPILE_DEPENDENCY_WARN

DBT-20080: There is no path specified for new RMAN backup.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_EMPTY_RMAN_PATH_ERR

DBT-20081: The specified RMAN backup path could not be created: *string*

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NOT_ABLE_TO_CREATE_RMAN_PATH_ERR

DBT-20082: The specified RMAN backup path is not a valid directory: *string*

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NOT_A_DIR_RMAN_PATH_ERR

DBT-20083: The specified RMAN backup path could not be set with the required permissions: *string*

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NOT_WRITEABLE_RMAN_PATH_ERR

DBT-20084: There is no restore script specified for the existing RMAN backup.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_EMPTY_RMAN_SCRIPT_ERR

DBT-20085: Archive Log must be enabled in order to support GRP based backup.

Cause: DBUA has detected that the selected database is not in Archive Log mode which is required for a GRP-based backup.

Action: Enable the Archive Log mode on the selected database or select other recovery option available. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NOT_GRP_CAPABLE_ERR

DBT-20086: The provided GRP for backup is invalid for the selected database.

Cause: DBUA has detected that the provided GRP is not available in the selected database.

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_INVALID_GRP_ERR

DBT-20087: The following warning was detected while checking the storage requirements for backup: *string*

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_STORAGE_WARN

DBT-20088: The following error was detected while checking the storage requirements for backup: *string*

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_STORAGE_ERR

DBT-20089: The following files from the latest RMAN backup are missing: *string*

Cause: DBUA has detected that there are some files corresponding to the selected RMAN backup that are not currently present on the system.

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_MISSING_RECOVERY_FILES_ERR

DBT-20090: There are no records for the files related to the latest RMAN backup.

Cause: DBUA has detected that there are no files currently associated to the selected RMAN backup.

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NO_RECOVERY_FILES_ERR

DBT-20091: DBUA was not able to connect to the database to validate the files from the latest RMAN backup.

Cause: DBUA was not able to connect to the selected database to validate the files of the selected RMAN backup.

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NO_DB_CONNECTION_FOR_RECOVERY_FILES_ERR

DBT-20092: The following error(s) were encountered during the validation of the backup set of the latest RMAN backup: *string*.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_INVALID_RMAN_BACKUPSET_ERR

DBT-20093: There are no records of an existing backup set related to the latest RMAN backup.

Cause: DBUA has detected that there are no RMAN backup records corresponding to the latest timestamp.

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NO_RMAN_BACKUPSET_ERR

DBT-20094: DBUA was not able to connect to the database to validate the latest RMAN backup set.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NO_DB_CONNECTION_FOR_RMAN_BACKUPSET_ERR

DBT-20095: db_recovery_file_dest parameter needs to be set to a valid location. Current location is: *string*

Cause: DBUA has detected that the current value of the db_recovery_file_dest on the selected database points to an invalid location. This parameter is required for new GRP creation for backup.

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NO_RECOVERY_DEST_ERR

DBT-20096: The upgrade cannot proceed because 'compatible' parameter will be updated to meet the minimum for this release and that cannot be done if there are GRP(s) present in the database.

Cause: DBUA has detected that there are existing or new GRP(s) to be created, which is not allowed for cases where the 'compatible' parameter needs to be updated.

Action: Remove all the existing GRP(s) on the current database and select another backup strategy. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_GRP_COMPATIBLE_PARAMETER_ERR

DBT-20097: Insufficient space for the RMAN backup at the selected location *string*.

Cause: The location %s does not have enough space for the new RMAN backup.

Action: Ensure the location has at least %s MB of space for the new RMAN backup. *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_INSUFFICIENT_RECOVERY_BACKUP_LOCATION_SPACE

DBT-20098: DBUA was not able to connect to the database to validate the space available for the RMAN backup.

Cause: DBUA was not able to connect to the selected database to validate the space available for the RMAN backup.

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NO_DB_CONNECTION_FOR_BACKUP_LOCATION_CHECK

DBT-20100: Error while updating database parameters.

Cause: n/a

Action: n/a *FQN:

oracle.assistants.dbua.resource.ErrorCode.SETUP_DRIVER_DB_UPDATE_PARAMS_ERR

DBT-20101: Error while performing setup required for database upgrade.

Cause: n/a

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SETUP_DRIVER_DB_SETUP_ERR

DBT-20102: Flashback database feature is not enabled for the selected database.

Cause: DBUA has detected that the selected database does not have Flashback feature enabled which is required to take a GRP-based backup.

Action: Enable the Flashback feature on the selected database or select the other recovery option available. *FQN:
 oracle.assistants.dbua.resource.ErrorCode.FLASHBACK_FEATURE_NOT_AVAILABLE

DBT-20103: GRP based backups are not allowed for PDB conversion operations.

Cause: GRP based backups are not supported while converting a non-CDB to PDB.

Action: If a backup is required as part of this operation, specify a RMANN based backup strategy for this operation. *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_NO_GRP_ALLOWED_ERR

DBT-20104: All the Guaranteed Restore Points (GRP) on the database will be lost during the conversion to PDB.

Cause: DBUA has detected that there are GRP records stored on the database.

Action: n/a *FQN:
 oracle.assistants.dbua.resource.ErrorCode.SELECT_RECOVERY_GRP_LOSS_WARN

DBT-20120: The following Oracle database for the current operation is not a container database (CDB): *string*

Cause: The current operation requires that the target Oracle database must be a CDB.

Action: Ensure that the selected database as target CDB meets the requirement and try again. *FQN:
 oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_NO_TARGET_CDB_ERR

DBT-20121: The following Oracle database for the current operation is not a non container database (CDB): *string*

Cause: The current operation requires that the source Oracle database must be a non CDB.

Action: Ensure that the selected database as source non CDB meets the requirement and try again. *FQN:
 oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_NO_SOURCE_NONCDB_ERR

DBT-20122: The following pluggable database (PDB) already exists on the selected target container database (CDB): *string*

Cause: n/a

Action: Verify the database selection or specify another target PDB name using the targetPDBName option and try again. *FQN:

oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_CONFLICTING_PDB_NAME_ERR

DBT-20123: The selected databases for the operation have incompatible storage types: *string* and *string*

Cause: The current operation requires both databases to have the same storage type (File system or Oracle ASM).

Action: Ensure that the selected databases meet the requirement and try again. *FQN:
oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_INCOMPATIBLE_STORAGE_ERR

DBT-20124: An unexpected error occurred while validating the target Pluggable Database (PDB) datafile location.

Cause: An error occurred while DBUA was gathering the information to validate the target PDB datafile location.

Action: n/a *FQN:
oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_STORAGE_CHECK_UNEXPECTED_ERR

DBT-20125: The provided pluggable database metadata file was not found or is not accessible: *string*

Cause: n/a

Action: Verify and try again. *FQN:
oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_NON_EXISTING_METADATA_XML_ERR

DBT-20126: One or more plug compatibility errors were detected on the following pluggable database metadata XML file: *string*

Cause: The following compatibility errors were detected: %s

Action: Refer to Oracle documentation to address the detected errors. *FQN:
oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_INVALID_METADATA_XML_ERR

DBT-20127: The target PDB data location could not be detected for the current operation.

Cause: DBUA could not detect a default location for the target PDB data files.

Action: Use the -targetPDBDataLocation option to specify the target PDB data location.
*FQN:
oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_STORAGE_CHECK_INVALID_ERR

DBT-20128: An inconsistent configuration for data file creation was detected for the following database: *string*

Cause: The detected configuration for data file creation is not the same in database and its corresponding SPFILE.

Action: Verify the configured value for the 'db_create_file_dest' parameter on database and SPFILE and try again. *FQN:
oracle.assistants.dbua.resource.ErrorCode.CONVERT_UPGRADE_DB_CREATE_FILE_INCONSISTENT_ERR

DBT-20150: Database move or upgrade is not allowed for database in Oracle home *string* where GIMR database is configured.

Cause: The source or target Oracle home is the Oracle home where GIMR database is configured.

Action: Select a different Oracle home to move or upgrade the database. *FQN:
oracle.assistants.dbua.resource.ErrorCode.SELECT_DATABASE_GIMR_HOME_MOVE_ERR

DBT-50000: Unable to check available system memory.

Cause: An exception occurred while checking kernel parameter.

Action: n/a *FQN:
oracle.assistants.common.resource.CVUErrCode.UNABLE_TO_CHECK_AVAILABLE_MEMORY_ERR

DBT-50001: Unable to check the value of kernel parameter

Cause: n/a

Action: n/a *FQN:
oracle.assistants.common.resource.CVUErrCode.UNABLE_TO_CHECK_KERNEL_PARAM_ERR

DBT-50002: Unable to check for available free shared memory

Cause: Unable to check for available free shared memory on nodes %s.

Action: n/a *FQN:
oracle.assistants.common.resource.CVUErrCode.UNABLE_TO_CHECK_FREE_SHARED_MEMORY_WARN

DBT-50003: Unable to check the ownership and permission of the file *string*.

Cause: An exception occurred while checking the ownership and permission of the file.

Action: n/a *FQN:
oracle.assistants.common.resource.CVUErrCode.UNABLE_TO_CHECK_FILE_OWNERSHIP_PERMISSIONS_ERR

DBV-00200 to DBV-00201

DBV-00200: Block, DBA *number*, already marked corrupt

Cause: The block was previously corrupted. It has been marked as corrupt by the Oracle database server.

Action: If the block is not currently allocated to a database object, then no action is required. If the block is allocated, then the options and required action depend on the type and nature of the object which owns the block. To repair an allocated block, perform block or file media recovery.

DBV-00201: Block, DBA *number*, marked corrupt for invalid redo application

Cause: The block was marked corrupt by the Oracle database server for invalid redo application, ex: media recovery of a NOLOGGING object or direct loaded data.

Action: If the block is not currently allocated to a database object, then no action is required. If the block is allocated, then the object will need to be rebuilt, or data to be reloaded.

DGM-05103 to DGM-17540

DGM-05103: one or more data files were not found

Cause: One or more data files for the specified standby pluggable database was not found.

Action: Ensure that the files associated with the standby pluggable database exist in the right location and then start Redo Apply services using the EDIT PLUGGABLE DATABASE SET STATE=APPLY-ON command.

DGM-05104: specified state is not valid

Cause: An invalid state was specified for the command.

Action: Specify a valid state and reissue the command. Valid states are APPLY-ON or APPLY-OFF.

DGM-16900: Unable to initialize client

Cause: The client could not be initialized.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16901: Unable to initialize environment

Cause: The database environment could not be allocated and initialized.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16902: Unable to allocate handle

Cause: The database handle could not be allocated.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16903: Unable to connect to database using *string*

Cause: The Data Guard command-line interface (DGMGRL) was unable to connect to the database using the specified connect identifier.

Action: Check the connect identifier and ensure the instance or host is reachable.

DGM-16904: Unable to set attribute

Cause: The server attributes could not be set.

Action: Check additional error messages.

DGM-16905: Failed.

Cause: The command failed to execute.

Action: Check additional error messages.

DGM-16906: Unable to accept commands: no memory

Cause: No memory was available for the attempted operation.

Action: Check your system and retry the command.

DGM-16909: Fatal error - quitting...

Cause: A fatal error was encountered.

Action: See additional error messages and/or contact Oracle Support Services.

DGM-16910: Unable to issue command to server

Cause: Command could not be issued to the server.

Action: See additional error messages and/or contact Oracle Support Services.

DGM-16912: Unrecognized command "*string*", try "help"

Cause: An unrecognized command was issued.

Action: Try again using a valid command.

DGM-16916: Missing site name, try "help"

Cause: The site name is missing from the command.

Action: Try the command again using correct syntax.

DGM-16934: *ltstart up instance "string" of database "string"*

Cause: The operation completed successfully and requires a restart of the specified instance. DGMGRL was unable to restart the instance.

Action: Start the specified instance manually.

DGM-16943: *ltconnect to instance "string" of database "string"*

Cause: The operation required DGMGRL to connect to a specific instance to complete, but DGMGRL could not automatically connect to the given instance.

Action: Connect to the specified instance and issue the command again.

DGM-16944: Failover succeeded, new primary is "*string*".

Cause: The failover command completed successfully."

Action: No action is required.

DGM-16945: Syntax error before or at "*string*"

Cause: The command could not be processed because of a syntax error in the named token.

Action: Try the command again using valid syntax.

DGM-16948: Unable to switchover, primary database is still "*string*"

Cause: The switchover operation could not be executed due to the errors reported with this error message. The primary role has not been changed.

Action: Correct the errors and try the SWITCHOVER command again.

DGM-16949: Object "*string*" was not found

Cause: The named object was not found.

Action: Try the command again using a valid database name.

DGM-16951: Unable to failover

Cause: The failover operation could not be executed due to the errors reported with this error message.

Action: Correct the errors and try the FAILOVER command again.

DGM-16952: Configuration details cannot be determined by DGMGRL

Cause: The broker configuration could not be found.

Action: 1) The Data Guard broker process (DMON) could not be contacted. Verify that the DMON process is running. 2) No broker configuration currently exists. You must create one. 3) You are connected to a standby database in the broker configuration that has either been disabled or deleted. While the standby is in this state, the details of the broker configuration are not available on the standby database. Connect to the primary database and reissue the command. 4) You are connected to a database in the broker configuration that must be reinstated or reinstantiated. While in this state, details of the broker configuration are not available. Either reinstate or re instantiate the database and reissue the command, or connect to the primary database and reissue the command.

DGM-16953: XML document is too long

Cause: The length of the XML document exceeded the internal limit.

Action: This is an internal error. Contact Oracle Support Services.

DGM-16959: No response from broker server process

Cause: No response was received from the broker server process (DMON).

Action: The Data Guard broker process (DMON) is not available. Verify that the DMON process is running and retry the command.

DGM-16960: Status not available

Cause: The status could not be retrieved.

Action: The Data Guard broker process (DMON) is not available. Verify that the DMON process is running and retry the command.

DGM-16979: Unable to log in to the primary or standby database

Cause: The username or password used by the observer to log in to the primary database and fast-start failover target standby database did not have valid SYSDBA or SYSDG credentials.

Action: Ensure that the primary database and fast-start failover target database are using a remote login password file. Ensure that the SYSDBA or SYSDG password is the same at both databases and that the SYSDBA or SYSDG password is used in the CONNECT command. Start the observer again.

DGM-16991: Two or more resources have the name "string"

Cause: The named resource exists on more than one site.

Action: Use the ON SITE clause and reissue the command.

DGM-16999: Instance "string" was not found

Cause: The named instance could not be found.

Action: Try the command again using a valid instance name.

DGM-17000: Two or more instances have the name "string"

Cause: The named instance exists on more than one database.

Action: Use the ON DATABASE clause and reissue the command.

DGM-17007: Unsupported platform, observer cannot start

Cause: The Observer was started on an operating system that does not support multi-threading.

Action: Start the Observer on an operating system that supports multi-threading.

DGM-17009: New primary database "*string*" is opening...

Cause: The Data Guard broker is opening the specified new primary database. The new primary database is ready to accept transactions once it is open.

Action: None

DGM-17016: failed to retrieve status for database "*string*"

Cause: DGMGRL could not retrieve the StatusReport property from the given database and thus could not report the database status.

Action: See accompanying messages for details.

DGM-17017: unable to determine configuration status

Cause: The Data Guard broker could not execute a health check at the moment, so the configuration status could not be determined.

Action: See accompanying messages for details.

DGM-17023: far sync instance "*string*" was not found

Cause: A far sync instance with the given name was not found in the configuration.

Action: Try the command again using a valid far sync instance name. If the name refers to a database, use the corresponding database command syntax instead.

DGM-17025: member "*string*" was not found

Cause: A member with the specified name was not found in the configuration.

Action: Try the command again using a valid member name. If the name refers to a far sync instance, use the corresponding far sync instance command syntax instead, or use the member keyword instead.

DGM-17032: Wildcard string not supported for this command

Cause: The wildcard string was specified instead of an object name.

Action: Supply an object name instead of the wildcard string and retry the command.

DGM-17048: unable to open and lock the target file "*string*"

Cause: The target file could not be opened or could not be locked for exclusive access.

Action: Ensure that the observer has the correct operating system privileges to write the file and that there is no other Observer using the same file. Try the command again.

DGM-17049: unable to get the length of the target file "*string*"

Cause: An attempt to get the length of the target file failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17050: unable to allocate enough memory for file buffer

Cause: An attempt to allocate enough memory for the file buffer failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17051: unable to read the target file "*string*"

Cause: An attempt to read the target file failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17067: unable to retrieve the local host name

Cause: An attempt to retrieve the local host name failed.

Action: This is an internal error. Contact Oracle Support Services.

DGM-17088: observer external ID "*string*" is invalid

Cause: An invalid observer external ID was specified. A valid observer external ID should be 1, 2 or 3.

Action: Ensure the specified observer external ID is valid.

DGM-17090: unable to connect to database: no memory

Cause: Not enough memory was available for the attempted operation.

Action: Check your system and retry the command.

DGM-17105: Invalid value specified for the TRACE_LEVEL option.

Cause: An invalid value was specified for the TRACE_LEVEL option.

Action: Valid values for the TRACE_LEVEL option are USER or SUPPORT. Specify one of these values and retry the command.

DGM-17147: command not supported by the Oracle version running on database *string*

Cause: The DGMGRL CLI command could not be completed because the CLI was connected to a database that was running an older version of Oracle.

Action: Use another command or a version of the DGMGRL CLI that is the same as the version of Oracle the database is running.

DGM-17148: Invalid value specified for the WAIT option.

Cause: An invalid value was specified for the WAIT option.

Action: Valid values for the WAIT option are positive integers. Specify a positive interger value and rerun the command.

DGM-17152: invalid value "*string*" specified in file operation option

Cause: An invalid valued was specified for the file operation option.

Action: Valid values for the file operation option are CREATE, REPLACE and APPEND.

DGM-17175: Failed to set session container to *string*.

Cause: The DGMGRL CLI was unable to set the session container to the pluggable database identified in the error message text.

Action: Check that the pluggable database exists or look for errors that may have been recorded in the database alert log and correct them before retrying the command.

DGM-17176: Unable to query PDB_PLUG_IN_VIOLATIONS.

Cause: The DGMGRL CLI was unable to query the PDB_PLUG_IN_VIOLATIONS table.

Action: Check that the container is set to CDB\$ROOT and that the container is open. Also check for any errors in the database alert log and correct them before retrying the command.

DGM-17290: Role change detected. This database may no longer be the primary database.

Cause: A role change was performed to a standby database in this configuration.

Action: Check if a role change has been performed to a standby database in this configuration. If a role change has been performed, this database needs to be reinstated or re-created from a copy of the new primary database. If a role change has not been performed and you want to open this database, enable the configuration and then open the database.

DGM-17295: Parameter "*string*" not updated.

Cause: The specified parameter corresponds to a property managed by Data Guard broker on members prior to Oracle Database release 19c.

Action: Use the EDIT command with the SET PROPERTY clause.

DGM-17297: This command requires a bequeath connection to the database.

Cause: The command failed because a bequeath connection was not created to the database. A bequeath connection is required because the database instance must be restarted.

Action: Connect to the database using a bequeath connection and retry the command.

DGM-17298: The DIRECTORY-LOCATION parameter was not specified.

Cause: The command failed because a DIRECTORY-LOCATION parameter was not specified and the database did not have a local archival destination established.

Action: Specify a value for the DIRECTORY-LOCATION parameter and retry the command.

DGM-17299: No local archival destinations are available.

Cause: The command failed because there were no local archival destinations available. Local archival requires a LOG_ARCHIVE_DEST_n initialization parameter numbered 10 or lower.

Action: If possible, clear a LOG_ARCHIVE_DEST_n initialization parameter numbered 10 or lower and retry the command.

DGM-17300: The SIZE parameter was not specified.

Cause: The command failed because the SIZE parameter was not specified when the DB_RECOVERY_FILE_DEST_SIZE initialization parameter was not set.

Action: Specify a value for the SIZE parameter and retry the command.

DGM-17301: Server parameter (SPFILE) not in use for RAC database.

Cause: The command failed because the database was a RAC database and a server parameter file was not configured.

Action: Create a server parameter file for the database, restart all instances of the database to use the server parameter file, and then retry the command.

DGM-17328: The DIRECTORY_LOCATION parameter must be specified to enable Flashback Database.

Cause: The command failed because Flashback Database cannot be enabled if the DB_RECOVERY_FILE_DEST initialization parameter is not set.

Action: Specify DIRECTORY_LOCATION parameter and retry the command.

DGM-17379: Configuration "*string*" was not found.

Cause: A configuration with the specified name was not found.

Action: Try the command again using a valid configuration name. If the name refers to a configuration, use the corresponding configuration command syntax instead.

DGM-17380: Option is missing, try the command again with at least one option.

Cause: An option was not specified with the VALIDATE DATABASE STRICT command. There must be at least one option specified.

Action: Try the command again using the correct syntax.

DGM-17381: *string string* is disabled.

Cause: The command could not be completed because the specified member was disabled.

Action: If the operation references a pluggable database, and the container database that it is in is enabled, connect to that database and try the command again. Otherwise, enable the configuration and retry the command.

DGM-17408: Verification of successful migration requires apply services to be stopped.

Cause: Verification of pluggable database migration to another container database from a physical standby database requires redo apply services to be stopped.

Action: Stopping redo apply creates an apply lag situation on the standby database. If a verification of a pluggable database migration is required, re-issue the command with the IMMEDIATE option.

DGM-17416: SECRET and KEYSTORE IDENTIFIED BY clauses are required.

Cause: The pluggable database to migrate has TDE master keys. The keystore password of the destination's multitenant container database is required. A secret phrase and the keystore password of the destination's multitenant container database must be given.

Action: Use clause SECRET and KEYSTORE IDENTIFIED BY to specify a secret and the keystore password of the destination's multitenant container database.

DGM-17445: Source pluggable database '*string*' must be open in read/write mode for this operation.

Cause: The source pluggable database was not open in read/write mode.

Action: Open the source pluggable database in read/write mode and retry the operation.

DGM-17450: not protected

Cause: The source pluggable database was not protected with an active target standby pluggable database.

Action: Check the status and connectivity with the target container database.

DGM-17465: Cannot remove configuration *string*.

Cause: Configuration could not be removed since the primary database contained either an active source or a target Data Guard pluggable database.

Action: Retry the operation when there are no active source or target Data Guard pluggable databases.

DGM-17474: Failed to stop redo transport services at database *string*.

Cause: The operation completed successfully but the attempt to stop redo transport services failed.

Action: Stop redo transport services by setting the source database state to TRANSPORT-OFF.

DGM-17479: invalid initialization parameter name "*string*" specified

Cause: An invalid initialization parameter name was specified for the operation.

Action: Reissue the command with a valid parameter name.

DGM-17488: Warning: DGConnectIdentifier '*string*' does not have the same translation on all members.

Cause: The specified connect identifier did not translate to the same connect descriptor on all members.

Action: Ensure that each member has the same translation for the specified connect descriptor.

DGM-17507: The source and target container databases cannot be the same.

Cause: The specified source and target multitenant container database (CDB) were the same name or same DBID.

Action: Specify distinct multitenant container databases.

DGM-17515: The ASM alias of data file *string* is not in the expected location.

Cause: In order to reuse the standby database data files during the migration of a pluggable database, the data file must not have an ASM alias, or its alias located in <DB_UNIQUE_NAME>/GUID of pluggable database/DATAFILE.

Action: Remove the ASM alias of the specified data file and issue the command again.

DGM-17516: A multitenant container standby database in the Data Guard Broker configuration must be specified.

Cause: The command did not specify the multitenant container standby database in the Data Guard Broker configuration as being the migration source or destination.

Action: Use clause SOURCE STANDBY or DESTINATION STANDBY to specify a standby database in the broker configuration as being the migration source or destination, and issue the command again.

DGM-17537: KEYFILE and SOURCE IDENTIFIED BY clauses are required.

Cause: To migrate a pluggable database with TDE master keys from a standby database, the keys need to be exported to a file and imported from the file at the destination's database. A key file path and the keystore password of the pluggable database to migrate must be given.

Action: Use clause KEYFILE and SOURCE KEYSTORE IDENTIFIED BY to specify a key file and the keystore password of the pluggable database to migrate.

DGM-17540: Environment does not support Data Guard per Pluggable Database.

Cause: Data Guard per Pluggable Database command was attempted when the environment did not support it.

Action: Data Guard per Pluggable Database operations require two primary container databases in independent, enabled configurations.

DIA-24280 to DIA-51705

DIA-24280: invalid input value for parameter *string*

Cause: The parameter has been provided a negative, out of range, or NULL input value.

Action: Correct the input value such that it is valid, and is within the range as specified in the documentation.

DIA-24281: invalid access past the maximum size of LOB parameter *string*

Cause: The value of positional or size parameters exceeded the maximum allowed LOB size of (4 Gigabytes - 1) * DB_BLOCK_SIZE.

Action: Correct the input values for amount and offset such that their sum is less than or equal to (4 Gigabytes - 1) * DB_BLOCK_SIZE. If an error occurs in a read or write loop, check the looping conditions and offset increments.

DIA-24292: no more tables permitted in this sorted hash cluster

Cause: A sorted hash cluster only supports a maximum of 2 tables

Action: n/a

DIA-24295: max key length (*string*) for sorted hash cluster exceeded

Cause: Sorted hash clusters have a maximum key size

Action: n/a

DIA-24296: error in processing the XML configuration file *string*

Cause: Parameters or their values were specified incorrectly in the configuration file.

Action: Check and correct the configuration parameters or their values.

DIA-24300: bad value for mode

Cause: An undefined mode value was specified.

Action: Check that the correct mode is selected and that an allowed value for that mode is specified.

DIA-24301: null host specified in thread-safe logon

Cause: An HDA was not specified in the logon call while running in a thread safe environment.

Action: Make sure that HDA is not NULL when calling the logon routine.

DIA-24302: host connection in use by another thread

Cause: An attempt was made to use the host connection while it was in use by another thread.

Action: Wait for another thread to finish before using this connection.

DIA-24303: call not supported in non-deferred linkage

Cause: One of the calls that is supported in deferred mode linkage exclusively was invoked when the client was linked non-deferred.

Action: Use this call in deferred mode of linkage.

DIA-24304: datatype not allowed for this call

Cause: Data of this datatype cannot be sent or fetched in pieces.

Action: Use other bind or define calls for this datatype.

DIA-24305: bad bind or define context

Cause: The call was executed on a cursor for which this is invalid.

Action: Verify that this call is valid for this cursor. For example, Get piece information and set piece information are valid on a cursor if appropriate binds and defines have been done on this cursor.

DIA-24306: bad buffer for piece

Cause: A zero length buffer or a null buffer pointer was provided.

Action: Verify that the buffer pointing to this piece or its length is non-zero. The buffer pointer for the next piece or its length can be zero if it is the last piece to be inserted and there are no more data for the column.

DIA-24307: Length provided in piecewise bind operation exceeded the maximum size.

Cause: The length of the piece exceeded the maximum size provided in an Oracle Call Interface (OCI) bind by position or bind by name call.

Action: Verify that the length of this piece plus the cumulative length of all the previous pieces is not more than the maximum size allowed by the application.

DIA-24308: illegal define position

Cause: Call to modify attributes was done for a non-existent position

Action: Verify that a define has been done for this position

DIA-24309: already connected to a server

Cause: This server handle is already attached to a server.

Action: Disconnect from the server and then retry the call to establish a connection.

DIA-24310: length specified for null connect string

Cause: The connect string is null, but a length was specified for it.

Action: Set length to zero if connect string is null.

DIA-24311: memory initialization failed

Cause: Cannot initialize user memory.

Action: Contact customer support.

DIA-24312: illegal parameters specified for allocating user memory

Cause: An illegal size or null pointer was specified for user memory.

Action: Specify a legal size and a valid pointer for user memory.

DIA-24313: user already authenticated

Cause: A user has already been authenticated on this service handle.

Action: Terminate the service context before using it for another user.

DIA-24314: service handle not initialized

Cause: The server context did not exist.

Action: Establish the server context in the service context.

DIA-24315: illegal attribute type

Cause: An illegal attribute type was specified for the handle.

Action: Consult user manual to specify an attribute valid for this handle.

DIA-24316: illegal handle type

Cause: An illegal handle type was specified.

Action: Consult user manual to specify a valid handle type.

DIA-24317: define handle used in a different position

Cause: A define was done with an existing handle on a different position.

Action: Specify the same position as before on a re-define.

DIA-24318: call not allowed for scalar data types

Cause: This call is valid only for object types.

Action: Verify that the data-type for this variable is an object type

DIA-24320: unable to initialize a mutex

Cause: An attempt to initialize a mutex failed.

Action: Contact customer support.

DIA-24321: inconsistent parameters passed

Cause: One of the three memory function pointers is null or non-null.

Action: Verify that either all the memory functions are null or non-null.

DIA-24322: unable to delete an initialized mutex

Cause: An attempt to delete an initialized mutex failed.

Action: Contact customer support.

DIA-24323: value not allowed

Cause: A null or invalid value was passed in for a mandatory parameter.

Action: Verify that all mandatory parameters are properly initialized.

DIA-24324: service handle not initialized

Cause: An attempt was made to use an improper service context handle.

Action: Verify that the service context handle has all the parameters initialized prior to this call.

DIA-24325: this OCI operation is not currently allowed

Cause: An attempt was made to use a context handle outside its scope.

Action: Verify that the context handle is set to a service context handle that has been converted to a logon data area for other OCI calls. The logon data area must be converted back to a service context before it can be used.

DIA-24326: handle passed in is already initialized

Cause: An attempt was made to pass an initialized handle.

Action: Verify that the parameter passed in to retrieve a handle does not already point to a handle.

DIA-24327: need explicit attach before authenticating a user

Cause: A server context must be initialized before creating a session.

Action: Create and initialize a server handle.

DIA-24328: illegal attribute value

Cause: The attribute value passed in is illegal.

Action: Consult the users manual and specify a legal attribute value for the handle.

DIA-24329: invalid character set identifier

Cause: The character set identifier specified was invalid.

Action: Specify a valid character set identifier in the OCI call.

DIA-24330: internal Oracle Call Interface error

Cause: An internal Oracle Call Interface (OCI) error has occurred.

Action: Contact Oracle Support.

DIA-24331: user buffer too small

Cause: The user buffer to contain the output data is too small.

Action: Specify a bigger buffer.

DIA-24332: invalid object type

Cause: An invalid object type is requested for the describe call.

Action: Specify a valid object type to the describe call.

DIA-24333: zero iteration count

Cause: An iteration count of zero was specified for the statement

Action: Specify the number of times this statement must be executed

DIA-24334: no descriptor for this position

Cause: The application is trying to get a descriptor from a handle for an illegal position.

Action: Check the position number.

DIA-24335: cannot support more than 1000 columns

Cause: The number of columns exceeds the maximum number supported.

Action: Specify a number of columns less than 1000.

DIA-24336: invalid result set descriptor

Cause: The result set descriptor should have valid data fetched into it before it can be converted to a statement handle

Action: Fetch valid data into the descriptor before attempting to convert it into a statement handle

DIA-24337: statement handle not prepared

Cause: A statement cannot be executed before making preparing a request.

Action: Prepare a statement before attempting to execute it.

DIA-24338: statement handle not executed

Cause: A fetch or describe was attempted before executing a statement handle.

Action: Execute a statement and then fetch or describe the data.

DIA-24339: cannot set server group name after connecting to server

Cause: An attempt was made to set the server group in a server handle after connecting to the server. However, once the connection is established to a server, the server group name cannot be set anymore.

Action: Attach to the server after setting the server group name in the server handle.

DIA-24340: cannot support more than 255 columns

Cause: The number of columns exceeds maximum supported by the server.

Action: Limit your operation to 255 columns.

DIA-24341: bad mode specified

Cause: OCI_ENV_NO_MUTEX mode was specified for a non-threaded client.

Action: OCI_ENV_NO_MUTEX may be specified when OCI_THREADED had been specified at process initialization.

DIA-24342: unable to destroy a mutex

Cause: An attempt to destroy a mutex failed.

Action: Contact Oracle Support Services.

DIA-24343: user defined callback error

Cause: The only valid return value for a user defined callback function is OCI_CONTINUE or OCI_ROWCBK_DONE. Any other value will cause this error.

Action: Ensure that OCI_CONTINUE or OCI_ROWCBK_DONE is returned from the user-defined callback function.

DIA-24344: success with compilation error

Cause: A sql/plsql compilation error occurred.

Action: Return OCI_SUCCESS_WITH_INFO along with the error code

DIA-24345: A Truncation or null fetch error occurred

Cause: A truncation or a null fetch error"

Action: Please ensure that the buffer size is long enough to store the returned data.

DIA-24347: Warning of a NULL column in an aggregate function

Cause: A null column was processed by an aggregate function

Action: An OCI_SUCCESS_WITH_INFO is returned.

DIA-24348: Update or Delete without Where

Cause: An update or delete was executed without where clause

Action: An OCI_SUCCESS_WITH_INFO is returned.

DIA-24349: Array DML row counts not available

Cause: One of the following occurred: -The attribute in OCIAttrGet was used incorrectly. -The version of the database used does not support this feature -There was an error in the array DML for all of the iterations.

Action: Ensure that the statement is an array DML and also ensure that the database version is Oracle 12 or higher and the correct mode is used.

DIA-24350: OCI call not allowed

Cause: OCI used is not permitted from external procedures.

Action: Refer to user manual for usage restrictions.

DIA-24351: invalid date passed into OCI call

Cause: A bad date was passed into one of the OCI calls.

Action: Check your date bind values and correct them.

DIA-24352: invalid COBOL display type passed into OCI call

Cause: A bad COBOL display type was passed into one of the OCI calls.

Action: Check your COBOL display type bind values and correct them.

DIA-24353: user buffer too small to accommodate COBOL display type

Cause: User supplied buffer for a COBOL display type was too small to accommodate fetched number.

Action: Increase the allocation for COBOL display type buffer.

DIA-24354: number fetched too large to fit in COBOL display type buffer.

Cause: The number fetched was beyond the range that can be displayed.

Action: Please check the number in the database.

DIA-24355: attempt to store a negative number in an Unsigned Display type.

Cause: An attempt was made to convert a negative number into an unsigned display type.

Action: Please check the number in the database or change the defined datatype.

DIA-24356: internal error while converting from to COBOL display type.

Cause: An internal error was encountered during conversion to COBOL display type.

Action: Contact customer support.

DIA-24357: internal error while converting from to OCIDate.

Cause: An internal error was encountered during conversion to OCIDate type.

Action: Contact customer support.

DIA-24358: OCIBindObject not invoked for a Object type or Reference

Cause: OCIBindObject was not invoked resulting in an incomplete bind specification for a Object Type or Reference.

Action: Please invoke the OCIBindObject call for all Object Types and References.

DIA-24359: OCIDefineObject not invoked for a Object type or Reference

Cause: OCIDefineObject was not invoked resulting in an incomplete bind specification for a Object Type or Reference.

Action: Please invoke the OCIDefineObject call for all Object Types and References.

DIA-24360: Type Descriptor Object not specified for Object Bind/Define

Cause: Type Descriptor Object is a mandatory parameter for Object Types Binds and Defines.

Action: Please invoke the OCIBindObject() or OCIDefineObject() call with a valid Type Descriptor Object.

DIA-24361: basic bind call not invoked before invoking advanced bind call

Cause: One of the basic bind calls was not invoked on this bind handle before performing an advanced bind call.

Action: Please invoke the advanced bind call on this bind handle only after performing a basic bind call.

DIA-24362: improper use of the character count flag

Cause: When the character count flag is set, then the maximum size of the buffer in the server should be specified as a non-zero value.

Action: Use a non-zero value for the maximum size of the buffer in the server.

DIA-24363: measurements in characters illegal here

Cause: Measurements in characters instead of bytes are illegal if either the server's or client's character set is varying width.

Action: If either the client's or server's character set is varying width then do not use the OCI_ATTR_CHAR_COUNT attribute for the bind handle. Use OCI_ATTR_MAXDATA_SIZE instead.

DIA-24364: internal error while padding blanks

Cause: An internal error has occurred while attempting to blank pad string data. This error should not occur normally.

Action: Contact customer support.

DIA-24365: error in character conversion

Cause: This usually occurs during conversion of a multibyte character data when the source data is abnormally terminated in the middle of a multibyte character.

Action: Make sure that all multibyte character data is properly terminated.

DIA-24366: migratable user handle is set in service handle

Cause: This occurs during user authentication, a migratable user handle has been set in the service handle.

Action: Service handle must not be set with migratable user handle when it is used to authenticate another user.

DIA-24367: user handle has not been set in service handle

Cause: This occurs during authentication of a migratable user. the service handle has not been set with non-migratable user handle.

Action: Service handle must be set with non-migratable user handle when it is used to authenticate a migratable user.

DIA-24368: OCI mutex counter non-zero when freeing a handle

Cause: This is an internal OCI error.

Action: Contact customer support.

DIA-24369: required callbacks not registered for one or more bind handles

Cause: No callbacks have been registered for one or more of the bind handles which are part of the RETURNING clause.

Action: The bind handles which are to receive data in a DML statement with a RETURNING clause must have their mode set as DATA_AT_EXEC and callback functions must be registered for these bind handles using OCIBindDynamic.

DIA-24370: illegal piecewise operation attempted

Cause: Data of a certain datatype that does not support piecewise operation is being sent or fetched in pieces.

Action: Always set the piece value to OCI_ONE_PIECE for datatypes that does not support piecewise operation.

DIA-24371: data would not fit in current prefetch buffer

Cause: An internal OCI error has occurred.

Action: Please contact Oracle customer support.

DIA-24372: invalid object for describe

Cause: The object to be described is not valid. It either has compilation or authorization errors.

Action: The object to be described must be valid.

DIA-24373: invalid length specified for statement

Cause: The length specified for the statement is either 0 or too large.

Action: Specify a valid length for the statement.

DIA-24374: define not done before fetch or execute and fetch

Cause: The application did not define output variables for data being fetched before issuing a fetch call or invoking a fetch by specifying a non-zero row count in an execute call.

Action: Issue OCI define calls for the columns to be fetched.

DIA-24375: Cannot use V6 syntax when talking to a V8 server

Cause: V6 syntax is no longer supported in V8 server.

Action: Change syntax to V7 syntax or higher.

DIA-24376: cannot register/get user callback for non-environment handle

Cause: A user callback registration or get was attempted on a handle which is not an environment handle.

Action: Pass the environment handle to register/get user callback.

DIA-24377: invalid OCI function code

Cause: An invalid Oracle Call Interface (OCI) function code was used.

Action: Use a valid OCI function code.

DIA-24378: user callbacks not allowed for this call

Cause: An attempt was made to register a user callback for an OCI call for which it not allowed to register user callbacks.

Action: Do not register user callback for this OCI call.

DIA-24379: invalid user callback type

Cause: An invalid type of user callback was specified.

Action: Specify a valid user callback type.

DIA-24380: invalid mode specification

Cause: The mode parameter in an OCI call is invalid

Action: Use only valid mode parameter

DIA-24381: error(s) in array DML

Cause: One or more rows failed in the DML.

Action: Refer to the error stack in the error handle.

DIA-24382: statement handled already executed or described

Cause: The Statement handle was already executed or described successfully.

Action: Perform an OCIStmtPrepare again before OCI_PARSE_ONLY.

DIA-24383: Overflow segment of an IOT cannot be described

Cause: The name specified in the OCIDescribeAny call referred to an IOT overflow segment.

Action: Use OCIDescribeAny to describe only documented objects.

DIA-24384: Application context size is not initialized

Cause: The size of the application context must be initialized before populating each context element.

Action: Issue OCIAttrSet with OCI_ATTR_CTX_SIZE to initialize context size

DIA-24385: Application context size or index is not valid

Cause: The size or index of the application context must be non-zero and non-negative.

Action: Use an appropriate value for the size.

DIA-24386: statement/server handle is in use when being freed

Cause: This is an internal OCI error.

Action: The user should reset in-use flag in statement handle before freeing the handle.

DIA-24387: Invalid attach driver

Cause: Trying to attach using the wrong driver

Action: Relink the application in the right mode

DIA-24388: Unsupported functionality in fast path mode

Cause: Feature not supported in fast path mode

Action: Avoid using the functionality in this mode

DIA-24389: Invalid scrollable fetch parameters

Cause: All the requested rows in this fetch could not be received.

Action: Check the fetch orientation, scroll offset, OCI_ATTR_CURRENT_POSITION and number of rows in OCISmtFetch2 call. If required, change some of above parameters and fetch again.

DIA-24390: Unsupported scrollable cursor operation

Cause: The scrollable cursor execute or fetch has failed.

Action: Check the documentation for supported types, and other restrictions while using scrollable cursors.

DIA-24391: invalid fetch operation

Cause: Scrollable cursor operation requested with non-scrollable cursor.

Action: Check if the statement was executed in the scrollable mode. Else the only acceptable orientation is OCI_FETCH_NEXT that ignores the scroll offset parameter.

DIA-24392: no connection pool to associate server handle

Cause: OCIServerAttach called in OCI_POOL mode but no connection pool found to associate the server handle.

Action: 1) Verify that OCIConnectionPoolCreate is called before calling OCIServerAttach. 2) Verify that the database link specified in OCIServerAttach matches with that of the connection pool database link.

DIA-24393: invalid mode for creating connection pool

Cause: Mode specified in OCIConnectionPoolCreate is invalid.

Action: Use a valid mode.

DIA-24394: invalid mode for destroying connection pool

Cause: Mode specified in OCIConnectionPoolDestroy is invalid.

Action: Use a valid mode.

DIA-24395: cannot reinitialize non-existent pool

Cause: OCIConnectionPoolCreate was not called in OCI_DEFAULT mode for this pool handle.

Action: Create a connection pool prior to reinitializing it.

DIA-24396: invalid attribute set in server handle

Cause: Attribute OCI_ATTR_NONBLOCKING_MODE has been set on the server handle and attached in OCI_POOL mode. Connection pooling does not support non blocking mode.

Action: Do not set the OCI_ATTR_NONBLOCKING_MODE attribute on the server handle while attaching in OCI_POOL mode.

DIA-24397: error occurred while trying to free connections

Cause: An internal error occurred while trying to free connections.

Action: Contact customer support.

DIA-24398: connection pool already exists

Cause: A connection pool has already been created for the specified pool handle.

Action: 1) Specify a different pool handle to create a new connection pool. 2) If you wish to modify the pool parameters, call OCIConnectionPoolCreate in OCI_CPOOL_REINITIALIZE mode.

DIA-24399: invalid number of connections specified

Cause: An invalid combination of minimum, maximum and increment number of connections was specified in the OCIConnectionPoolCreate call.

Action: Specify a valid combination of parameters.

DIA-24400: error occurred while creating connections in the pool

Cause: The database link specified in OCIConnectionPoolCreate might be an invalid one.

Action: Specify a valid database link.

DIA-24401: cannot open further connections

Cause: Sufficient number of connections are not present in the pool to execute the call. No new connections can be opened as the connMax parameter supplied in OCIConnectionPoolCreate has been reached.

Action: Call OCIConnectionPoolCreate in OCI_CPOOL_REINITIALIZE mode and increase the value of the connMax parameter.

DIA-24402: error occurred while creating connections in the pool

Cause: The username and password specified in OCIConnectionPoolCreate might be invalid.

Action: Specify a valid username and password.

DIA-24403: error occurred while trying to destroy the connection pool

Cause: Some connections in the pool were busy when an attempt to destroy the connection pool was made.

Action: Ensure no connections from the pool are being used.

DIA-24404: connection pool does not exist

Cause: An attempt was made to use the connection pool before creating it.

Action: Create the connection pool.

DIA-24405: error occurred while trying to create connections in the pool

Cause: An internal error occurred while creating connections in the pool.

Action: Contact customer support.

DIA-24406: API mode switch is disallowed when a call is in progress.

Cause: A mode switch from OCI8 to OCI7 was attempted in a callback.

Action: The user should perform the API mode switch either prior to initiating the top call or after the main call is done.

DIA-24407: connection pool already exists

Cause: A connection pool has already been created for the specified pool name.

Action: Specify a different pool name to create a new connection pool.

DIA-24408: could not generate unique server group name

Cause: An internal error occurred while generating unique server group name.

Action: Contact customer support.

DIA-24409: client cannot understand the object

Cause: The client cannot process all the new features in the object.

Action: Upgrade the client so that features like inheritance and SQLJ objects can be used.

DIA-24410: scrollable cursor max size exceeded

Cause: Result set size exceeded the max limits.

Action: Check the documentation for allowable maximum result set size for scrollable cursors. Re-execute with a smaller expected result set size or make the cursor non-scrollable.

DIA-24411: Session pool already exists.

Cause: A session pool has already been created for the specified pool handle.

Action: 1) Specify a different pool handle to create a new session pool. 2) If you wish to modify the pool parameters, call OCISessionPoolCreate in OCI_SPOOL_REINITIALIZE mode.

DIA-24412: Cannot reinitialize non-existent pool

Cause: OCISessionPoolCreate was not called in OCI_DEFAULT mode for this pool handle.

Action: Create a session pool prior to reinitializing it.

DIA-24413: Invalid number of sessions specified

Cause: An invalid combination of minimum, maximum, max per shard and increment number of sessions was specified in the OCISessionPoolCreate call.

Action: Specify a valid combination of parameters.

DIA-24414: Only *number* sessions could be started.

Cause: The number of sessions specified by the minSess parameter of OCISessionPoolCreate could not be started, possibly because the value supplied was larger than that supported by the server."

Action: This is a warning. Check the maximum number of sessions allowed on the server.

DIA-24415: Missing or null username.

Cause: Username and password must be specified when pool is created in this mode.

Action: Specify a valid username and password.

DIA-24416: Invalid session Poolname was specified.

Cause: An attempt was made to use a Session Pool that does not exist.

Action: Create a Session Pool before using it.

DIA-24417: Session pool size has exceeded the maximum limit

Cause: The number of sessions has exceeded the maximum size of the Session Pool.

Action: This is a warning. You can tune the session pool with appropriate minimum and maximum parameters.

DIA-24418: Token based authentication does not support heterogeneous session pool.

Cause: An attempt was made to authenticate a user from an external Identity Provider to Oracle Database using heterogenous session pool.

Action: Change the session pool mode used for connecting to Oracle Database to homogenous.

DIA-24419: Proxy sessions are not supported in this mode.

Cause: A proxy session was requested for from a Session Pool which does not support proxy sessions.

Action: Do not specify mode OCI_CRED_PROXY.

DIA-24420: OCISessionRelease must be used to release this session.

Cause: The session was retrieved using OCISessionGet, and an attempt has been made to release it using a call other than OCISessionRelease.

Action: Call OCISessionRelease.

DIA-24421: OCISessionRelease cannot be used to release this session.

Cause: The session was not retrieved using OCISessionGet, and an attempt has been made to release it using OCISessionRelease.

Action: Release the session using an appropriate call.

DIA-24422: error occurred while trying to destroy the Session Pool

Cause: An attempt was made to destroy the session pool while some sessions in the pool were busy.

Action: Ensure that no sessions from the pool are being used OR call OCISessionPoolDestroy with mode set to OCI_SPD_FORCE.

DIA-24423: Cannot set the ROWID attribute - OCI_ATTR_FETCH_ROWID

Cause: An attempt was made to set the implicit ROWID attribute.

Action: Use a SELECT ... FOR UPDATE statement that has not previously been described or executed before setting this ROWID attribute.

DIA-24424: Invalid attempt to define at position 0

Cause: An invalid attempt was made to call OCIDefineByPos for position 0.

Action: Ensure that the implicit ROWID attribute, OCI_ATTR_FETCH_ROWID, is set on the statement handle before doing the execute.

DIA-24425: Invalid mode passed when defining at position 0

Cause: An invalid mode was passed to OCIDefineByPos.

Action: Ensure a valid mode is passed to OCIDefineByPos when defining at position 0.

DIA-24427: Invalid attributes on user handle

Cause: Some of the attributes set on the user handle were not allowed in pooled mode.

Action: Unset the attributes on the user handle and call OCISessionGet or use sessions that are not pooled.

DIA-24428: Sessions with SYSDBA privileges are not supported in this mode.

Cause: A session with SYSDBA privileges was requested from a Session Pool which does not support sessions with SYSDBA privileges.

Action: Do not specify mode OCI_SESSGET_SYSDBA.

DIA-24429: External authentication is not supported in this mode.

Cause: An externally authenticated session was requested from a Session Pool which does not support external authentication.

Action: Do not specify mode OCI_SESSGET_CREDEXT.

DIA-24430: Null values for sqltext and key were specified.

Cause: An attempt was made to call OCIStmtPrepare2 and neither sqltext nor key were specified.

Action: Specify valid values for sqltext or key or both.

DIA-24431: Statement does not exist in the cache

Cause: The statement that was requested for does not exist in the statement cache.

Action: Please request for a valid statement.

DIA-24432: The statement that was returned is not tagged.

Cause: A tagged statement was requested for, but an untagged statement has been returned.

Action: This is a warning. Please modify and tag the statement as desired.

DIA-24433: This statement has already been prepared using OCISstmtPrepare2.

Cause: A statement that was earlier prepared using OCISstmtPrepare2 is now being reprepared using OCISstmtPrepare.

Action: Please use a different statement handle.

DIA-24434: OCISstmtRelease called before OCISstmtPrepare2.

Cause: An attempt was made to release a statement without first preparing it using OCISstmtPrepare2.

Action: Call OCISstmtPrepare2 before OCISstmtRelease.

DIA-24435: Invalid Service Context specified.

Cause: The statement was prepared using a service context that is different from the one specified in OCISstmtExecute.

Action: Please specify the same service context that the statement was prepared with.

DIA-24436: Invalid statement Handle.

Cause: OCIHandleFree called on a statement that was prepared using OCISstmtPrepare2.

Action: Release the statement using OCISstmtRelease.

DIA-24437: OCISstmtExecute called before OCISstmtPrepare2.

Cause: An attempt was made to execute a statement without first preparing it using OCISstmtPrepare2.

Action: Call OCISstmtPrepare2 before OCISstmtExecute.

DIA-24438: Invalid Authentication Handle specified.

Cause: The statement was prepared using an authentication handle that is different from the one specified in OCISstmtExecute.

Action: n/a

DIA-24439: success with PLSQL compilation warning

Cause: A plsql compilation warning occurred.

Action: Return OCI_SUCCESS_WITH_INFO along with the error code.

DIA-24440: OCI Easy Install mode cannot be initialized

Cause: An internal OCI error has occurred.

Action: Please contact Oracle customer support.

DIA-24441: Invalid cookie, resend sql text

Cause: An internal OCI error has occurred.

Action: Please contact Oracle customer support.

DIA-24442: SCN exceeds the capability of the target OCI database or client

Cause: An attempt was made to transfer a system change number (SCN) to an Oracle database or client that is older than Release 12.2 and the SCN exceeds the maximum value that such a system can handle.

Action: If needed, update the target database or client to Release 12.2 or higher.

DIA-24443: error status from OCI call: *string*

Cause: Oracle Call Interface (OCI) returned status.

Action: Contact Oracle Support Services.

DIA-24444: TTC RPC (*string*) not allowed by the security policy configured on the database

Cause: The database security policy configuration did not allow the specified Two-Task Common (TTC) RPC.

Action: Do not use functionality that issues the specified TTC RPC which is disallowed by the database security policy.

DIA-24445: object type input parameter in TTC RPC not allowed by the security policy configured on the database

Cause: The database security policy configuration did not allow object types as input parameters (including IN bind variables) in Two-Task Common (TTC) RPCs.

Action: Do not use the functionality that relies on object type input parameter usage in a TTC RPC.

DIA-24446: OCI worker thread pool task queue is full.

Cause: The maximum number of tasks were scheduled in the Oracle Call Interface (OCI) worker thread pool.

Action: Submit this task at a later time.

DIA-24447: OCI worker thread pool failed to initialize

Cause: The Oracle Call Interface (OCI) worker thread pool creation failed internally.

Action: Contact Oracle Support Services for more information.

DIA-24448: Internal handle allocation for *string* Handle failed

Cause: Handle allocation failed internally.

Action: Contact Oracle Support Services.

DIA-24449: could not reexecute statement after server side metadata changes

Cause: Statement from statement cache executed after server side metadata changes.

Action: Restart the application after column metadata changes or call OCISstmtRelease() with OCI_STRLS_CACHE_DELETE mode and reattempt the database operation.

DIA-24450: Cannot pre-process OCI statement

Cause: An error occurred during statement pre-processing. E.g., SQL statement has invalid usage of N' or Q' literals.

Action: Correct the SQL statement.

DIA-24451: *string*, *string*, maximum call depth exceeded

Cause: The program had too many levels of recursion.

Action: Restructure the program to eliminate some levels of recursion.

DIA-24452: value_sz exceeding SB4MAXVAL is not supported

Cause: value_sz specified in OCIBindByPos2, OCIBindByName2 or OCIDefineByPos2 exceeds SB4MAXVAL and is not supported in this release.

Action: Specify a value less than or equal to SB4MAXVAL for value_sz in OCIBindByPos2, OCIBindByName2 or OCIDefineByPos2.

DIA-24453: number of application context settings supplied during authentication has exceeded the supported limit of number settings

Cause: The number of application context settings supplied during authentication exceeded the specified limit.

Action: Reduce the number of application context settings that are passed during authentication.

DIA-24454: client host name is not set

Cause: The network host name in files like /etc/hosts was not set.

Action: Set the host name and try again.

DIA-24456: invalid OCI function code

Cause: An invalid Oracle Call Interface (OCI) function code was used.

Action: Use a valid OCI function code.

DIA-24457: OCISessionGet() could not find a free session in the specified timeout period

Cause: The contention on OCI Session Pool is high.

Action: Increase the timeout for OCISessionGet() using the OCI_ATTR_SPOOL_WAIT_TIMEOUT setting or reduce the number of threads accessing the pool concurrently.

DIA-24458: OCISessionGet() timed out trying to find a free session to the desired shard and max connections per shard limit is reached

Cause: OCISessionGet() could not find a free session to the appropriate shard in the specified timeout period. No new sessions can be opened to the shard either as the number of connections open to the shard is already at the value specified by OCI_ATTR_SPOOL_MAX_PER_SHARD.

Action: Increase value of OCI_ATTR_SPOOL_MAX_PER_SHARD or increase the timeout specified by or use OCI_SPOOL_ATTRVAL_WAIT

DIA-24459: OCISessionGet() timed out waiting for pool to create new connections

Cause: The OCISessionGet() timeout expired waiting for OCI Session Pool to create new sessions

Action: Retry the request later. Use OCISessionGet() with OCI_SPOOL_ATTRVAL_TIMEDWAIT mode (with an appropriate OCI_ATTR_SPOOL_WAIT_TIMEOUT setting) or OCI_SPOOL_ATTRVAL_WAIT mode.

DIA-24460: Native Net Internal Error

Cause: Internal error.

Action: This error should not normally occur. If it persists, please contact your customer service representative.

DIA-24461: operation not permitted because OCISessionPoolDestroy() is in progress

Cause: One or more of the following was true: 1. OCISessionGet() was invoked while OCISessionPoolDestroy() was in progress. 2. OCISessionPoolDestroy() was invoked while another OCISessionPoolDestroy() was in progress.

Action: Do not invoke OCISessionGet() or OCISessionPoolDestroy() while another OCISessionPoolDestroy() is in progress.

DIA-24462: OCI Encountered internal error (*number*) from sharding library

Cause: OCI encountered an internal error when calling into the sharding library

Action: Contact Oracle Support Services

DIA-24463: invalid index passed into OCIPShardConnStrGet() call

Cause: Index passed to OCIPShardConnStrGet() exceeds shard count

Action: Check index value passed to OCIPShardConnStrGet() call

DIA-24464: OCI Session Pool does not support pooling sessions of different server types specified in the connect string *string*

Cause: Value for "SERVER=" clause of connect data for all descriptors in the description list of the connect string did not match.

Action: Set same value for "SERVER=" clause in connect data for all descriptors in the description list of the connect string mentioned in the error message.

DIA-24480: invalid OCI mode

Cause: An attempt was made to invoke OCI API with an invalid mode.

Action: Provide the OCI API with legitimate mode.

DIA-24481: Failed to initialize multithreaded environment

Cause: Operating system did not support multithreaded mode.

Action: Use single thread mode instead.

DIA-24482: Pool size was less than 1 in shared mode

Cause: Pool size must be positive in shared mode.

Action: Set a positive pool size.

DIA-24483: Invalid parameters were passed into environment creation call

Cause: Invalid parameters were passed into the environment creation call. Check the passed in parameters for the following conditions: -envp should not be NULL - xtrmem_sz should not be negative -Either both xtrmem_sz and usrmempp have to be provided. Or, neither should be provided.

Action: Pass in legitimate parameters.

DIA-24484: Setting authentication handle not allowed after pool create

Cause: An attempt was made to set the authentication handle on session pool handle after OCISessionPoolCreate.

Action: Set the authentication handle on session pool handle before calling OCISessionPoolCreate.

DIA-24485: Invalid attributes in session pool authentication handle

Cause: Some of the attributes set on the authentication handle being set on the session pool handle are invalid.

Action: Unset the illegal attributes on the authentication handle being set on session pool handle and then call OCIAAttrSet. Refer to OCI documentation for details.

DIA-24486: Conflicting attributes in session pool authentication handle

Cause: Some attributes could not be set both on the authentication handle passed to OCISessionGet and the authentication handle set on session pool handle.

Action: Unset the conflicting attributes on the authentication handle and call OCISessionGet.

DIA-24487: Invalid properties or values provided for OCISessionGet

Cause: Some of the properties or their values provided during OCISessionGet with mode OCI_SESSGET_MULTIPROPERTY_TAG were invalid.

Action: Provide valid properties and values when calling OCISessionGet with mode OCI_SESSGET_MULTIPROPERTY_TAG. Refer to Oracle Call Interface documentation for details.

DIA-24488: Invalid properties or values provided for OCISessionRelease

Cause: Some of the properties or their values provided during OCISessionRelease with mode OCI_SESSRLS_MULTIPROPERTY_TAG were invalid.

Action: Provide valid properties and values when calling OCISessionRelease with mode OCI_SESSRLS_MULTIPROPERTY_TAG. Refer to Oracle Call Interface documentation for details.

DIA-24489: reserved OCI error

Cause: A reserved Oracle Call Interface (OCI) error has occurred.

Action: Contact Oracle Support Services.

DIA-24490: error while getting shard instances

Cause: There was a mismatch in the shard keys or group keys with the corresponding connect string.

Action: Check if the keys are properly specified along with the corresponding connection string.

DIA-24491: attempt to get sharding-related topology information failed

Cause: An unexpected error was encountered while building and processing sharding-related information.

Action: Contact Oracle Support Services.

DIA-24492: Shard library initialization failed

Cause: An attempt to initialize the shard library failed.

Action: Contact Oracle Support Services.

DIA-24493: general sharding error

Cause: An unexpected error was encountered while processing sharding-related information.

Action: Contact Oracle Support Services.

DIA-24494: error in constructing shard key or shard group key

Cause: An invalid column value was passed.

Action: Pass in a column value in the appropriate format specified by the data type.

DIA-24495: OCISessionGet() timed out waiting for a suitable writable chunk

Cause: There was no instance available with a writable chunk for the specified shard key at the time the OCISessionGet() request was issued. This may be a transient condition due to chunk migration.

Action: Retry the request later. If needed, increase the timeout specified in OCI_ATTR_SPOOL_WAIT_TIMEOUT to minimize or eliminate the chances of running into this error during chunk migrations.

DIA-24496: OCISessionGet() timed out waiting for a free connection

Cause: There was no free connection as the pool reached its maximum and all connections were in use at the time the request was issued.

Action: Retry the request later. Use OCISessionGet() with OCI_SPOOL_ATTRVAL_TIMEDWAIT mode (with an appropriate OCI_ATTR_SPOOL_WAIT_TIMEOUT setting) or OCI_SPOOL_ATTRVAL_WAIT mode. If needed, increase the maximum size of the OCI session pool.

DIA-24497: PL/SQL fix up callback name too long

Cause: The PL/SQL fix up callback name was too long.

Action: Use a shorter PL/SQL fix up callback name.

DIA-24498: OCIShardingKey usage is not supported with OCISessionBegin()

Cause: OCIShardingKey was set on user handle passed to OCISessionBegin().

Action: Use OCISessionGet() instead of OCISessionBegin().

DIA-24499: Setting session get mode not allowed after pool create

Cause: An attempt was made to set the OCI_ATTR_SPOOL_GETMODE attribute on session pool handle after OCISessionPoolCreate.

Action: Set the OCI_ATTR_SPOOL_GETMODE attribute on session pool handle before calling OCISessionPoolCreate.

DIA-24500: invalid UTF16 mode

Cause: UTF16 mode is allowed only at environment handle creation time.

Action: Remove UTF16 mode for functions other than OCIEnvCreate()

DIA-24501: invalid UTF16 string passed in

Cause: Non-UTF16 string is passed in while UTF16 string is expected

Action: Check the parameter which is actually a string

DIA-24502: codepoint length overflows

Cause: Returned buffer has more codepoints than allowed

Action: Set OCI_MAXCHAR_SIZE large enough to accommodate

DIA-24503: codepoint length overflows for piecewise operation

Cause: Accumulated codepoint length exceeds allowed codepoint length

Action: Set OCI_MAXCHAR_SIZE large enough to accommodate

DIA-24504: data length larger than expected

Cause: Incoming data larger than receiving buffer

Action: Set OCI_MAXDATA/MAXCHAR_SIZE appropriately or remove the setting

DIA-24505: cannot change character set id on the handle

Cause: Attempts to change character set id on non-environment handles

Action: Only try to change character set id on environment handles

DIA-24506: invalid attempt to change character set id on env handle

Cause: Attempts to change character set id after other handles have been allocated from the env handle

Action: Change character set id after creating environment handle but before allocating any handles from it.

DIA-24507: invalid combination of character set ids

Cause: Attempts to set one character set id as zero

Action: Set both charset and ncharset as zero or non-zero in OCIEnvNlsCreate()

DIA-24508: Buffer is not aligned correctly.

Cause: Alignment error occurred in buffer when converting between character sets.

Action: Align buffer appropriately. For UTF16 buffer, pass a ub2 pointer.

DIA-24509: OCI function currently not supported in UTF16 mode.

Cause: Attempt to call an OCI function that was not supported in OCI_UTF16ID mode.

Action: Remove the offending function or do not create an OCI environment with OCI_UTF16ID mode or OCI_UTF16ID character set ID.

DIA-24510: Invalid value of POOL_PURITY is specified in connect string

Cause: Invalid value of POOL_PURITY was specified in connect string. Valid value was either SELF or NEW.

Action: Check the value of POOL_PURITY in connect string.

DIA-24511: Invalid value of POOL_CONNECTION_CLASS is specified in connect string.

Cause: The specified value was either empty or exceeded MAX allowed.

Action: Use a non-empty value or within the MAX allowed.

DIA-24512: sharding key is not provided while connecting to a sharded database

Cause: OCIShardingKey was not set to the auth handle through OCIAttrSet.

Action: Set OCIShardingKey to the auth handle before checking sessions out from the pool.

DIA-24530: User not authorized to access column value.

Cause: Column security is enabled and column value is not authorized.

Action: The program needs to handle this error and take appropriate action.

DIA-24531: Column value authorization is unknown.

Cause: Column security is unknown for the column.

Action: Verify the fetched data. It may or may not contain a meaningful value because it is probably the result of an expression that operated on unauthorized values.

DIA-24536: Warning - column authorization unknown.

Cause: Column security is unknown for one or more columns.

Action: Verify the fetched data. It may or may not contain a meaningful value because it is probably the result of an expression that operated on unauthorized values.

DIA-24542: PRELIM mode logon not allowed to a pluggable database

Cause: PRELIM mode logon was attempted to a pluggable database.

Action: Create PRELIM mode connections to CDB\$ROOT only.

DIA-24543: instance startup or shutdown not allowed in pluggable database

Cause: An instance startup or shutdown operation was attempted when connected to a pluggable database.

Action: Perform instance startup or shutdown operations by connecting to CDB\$ROOT.

DIA-24544: Oracle RAC One Node instance is already running.

Cause: An instance startup failed because an instance of the Oracle RAC One Node database was already running on one of the cluster nodes.

Action: In Oracle RAC One Node, avoid any attempt to start a second instance by any means while the instance is already running.

DIA-24550: unhandled signal #number received. string

Cause: Serious error: signal received

Action: Refer to the platform-specific signal code, and see if the application code caused the error. Otherwise, record all error state and notify Oracle Support Services.

DIA-24557: error string encountered while handling error string; exiting server process

Cause: A second-level error occurred in an Oracle server process that required that process to exit.

Action: None. If an excessive number of incidents are dumped, contact Oracle Support Services.

DIA-24558: syntax error encountered in the input string

Cause: The string to be validated had a syntax error.

Action: Remove the syntax error and try again.

DIA-24559: The input string attempts to insert or substitute another substring.

Cause: The input string attempted to insert or substitute a Name Value Pair or SQL syntax.

Action: Validate the string.

DIA-24560: general input validation error

Cause: The input string had issues other than the syntax error.

Action: Check if the input string length or mode are passed accordingly and then try again.

DIA-24601: bind buffer not allocated by caller

Cause: A valid buffer was not provided for the bind call.

Action: Provide a non-NULL pointer for the bind call, and a valid length for the buffer.

DIA-24750: incorrect size of attribute

Cause: Transaction ID attribute size is incorrect.

Action: Verify that the size parameter is correct.

DIA-24752: OCI_TRANS_NEW flag must be specified for local transactions

Cause: Application attempted to start a local transaction without using OCI_TRANS_NEW.

Action: Use OCI_TRANS_NEW when starting local transactions.

DIA-24753: local transactions cannot be detached

Cause: An attempt to detach a local transaction was made.

Action: Local transactions may only be committed or rolled back.

DIA-24754: cannot start new transaction with an active transaction

Cause: An attempt to start a new transaction was made when there was an active transaction.

Action: Commit, rollback or detach the existing transaction before starting a new transaction.

DIA-24755: OCI_TRANS_NOMIGRATE, OCI_TRANS_JOIN options are not supported

Cause: These flags are currently not supported.

Action: No action required.

DIA-24756: transaction does not exist

Cause: An invalid transaction identifier or context was used or the transaction has completed.

Action: Supply a valid identifier if the transaction has not completed and retry the call.

DIA-24757: duplicate transaction identifier

Cause: An attempt was made to start a new transaction with an identifier already in use by an existing transaction.

Action: Verify that the identifier is not in use.

DIA-24758: not attached to the requested transaction

Cause: An attempt was made to detach or complete a transaction that is not the current transaction.

Action: Verify that the transaction context refers to the current transaction.

DIA-24759: invalid transaction start flags

Cause: An invalid transaction start flag was passed.

Action: Verify that only one of the following values is specified: OCI_TRANS_NEW, OCI_TRANS_JOIN, OCI_TRANS_RESUME, or OCI_TRANS_PROMOTE.

DIA-24760: invalid isolation level flags

Cause: An invalid isolation level flag was passed.

Action: Verify that only one of following values - OCI_TRANS_READONLY, OCI_TRANS_READWRITE, OCI_TRANS_SERIALIZABLE is used.

DIA-24761: transaction rolled back

Cause: The application tried to commit a transaction and the server rolled it back.

Action: No action required.

DIA-24762: server failed due to unspecified error

Cause: An internal error has occurred in the server commit protocol.

Action: Contact customer support.

DIA-24763: transaction operation cannot be completed now

Cause: The commit or rollback cannot be performed now because the session cannot switch to the specified transaction.

Action: Retry the operation later.

DIA-24764: transaction branch has been heuristically committed

Cause: This is an informational message.

Action: No action required.

DIA-24765: transaction branch has been heuristically rolled back

Cause: This is an informational message.

Action: No action required.

DIA-24766: transaction branch has been partly committed and aborted

Cause: This is an informational message.

Action: No action required.

DIA-24767: transaction branch prepare returns read-only

Cause: The transaction is read-only, or this is the outcome of an optimization for two-phase commit protocol.

Action: None. Informational only.

DIA-24768: commit protocol error occurred in the server

Cause: This is an internal error.

Action: Contact customer support

DIA-24769: cannot forget an active transaction

Cause: Transaction identifier refers to an active transaction.

Action: Verify that the identifier of an active transaction was not passed as an argument.

DIA-24770: cannot forget a prepared transaction

Cause: Transaction identifier refers to a prepared transaction.

Action: Verify that the identifier of a prepared transaction was not passed as an argument.

DIA-24771: cannot detach, prepare or forget a local transaction

Cause: Service handle contains a local transaction context.

Action: Verify that the transaction context does not refer to a local transaction.

DIA-24772: Cannot mix tightly-coupled and loosely-coupled branches

Cause: Application attempted to start a transaction with a global transaction identifier and a wrong option.

Action: Verify that all branches of a global transaction are started with either OCI_TRANS_TIGHT or OCI_TRANS_LOOSE option. If the application is correct and uses distributed updates, contact customer support.

DIA-24773: invalid transaction type flags

Cause: OCI_TRANS_TIGHT or OCI_TRANS_LOOSE mode was not specified.

Action: Verify that the right parameters are being used.

DIA-24774: cannot switch to specified transaction

Cause: The transaction specified in the call refers to a transaction created by a different user.

Action: Create transactions with the same authentication so that they can be switched.

DIA-24775: cannot prepare or commit transaction with non-zero lock value

Cause: An attempt was made to detach the transaction with a non-zero lock value.

Action: Detach the transaction with lock value set to zero and then try to prepare or commit the transaction.

DIA-24776: cannot start a new transaction

Cause: An attempt was made to start a new transaction when session was already attached to an existing transaction.

Action: End the current transaction before creating a new transaction.

DIA-24777: use of non-migratable database link not allowed

Cause: The transaction, which needs to be migratable between sessions, tried to access a remote database from a non-multi threaded server process.

Action: Perform the work in the local database or open a connection to the remote database from the client. If multi threaded server option is installed, connect to the Oracle instance through the dispatcher.

DIA-24778: cannot open connections

Cause: The migratable transaction tried to access a remote database when the session itself had opened connections to remote database(s).

Action: Close the connection(s) in the session and then try to access the remote database from the migratable transaction. If the error still occurs, contact Oracle customer support.

DIA-24779: detach not allowed with open remote cursor

Cause: The migratable transaction tried to detach from the current session while having an open remote cursor.

Action: Close any open remote cursor prior to detach.

DIA-24780: cannot recover a transaction while in an existing transaction

Cause: An attempt was made to commit or roll back a transaction while in a different transaction, and the transaction for which the action is requested is in a recovery state (this happens if it is idle too long).

Action: Detach from the current transaction and retry the operation.

DIA-24781: branches don't belong to the same global transaction

Cause: The list of xids passed into kpotxmp() don't have the same gtrid

Action: n/a

DIA-24782: Cannot detach from a non-migratable transaction

Cause: An attempt was made to detach from a non-migrateable transaction.

Action: Either commit or rollback the transaction.

DIA-24783: Cannot switch non-migratable transactions

Cause: An attempt was made to prepare/commit a txn different from current.

Action: n/a

DIA-24784: Transaction exists

Cause: An attempt was made to start a transaction, while attached to a non-migrateable transaction

Action: n/a

DIA-24785: Cannot resume a non-migratable transaction

Cause: An attempt was made to resume a non-migrateable transaction.

Action: n/a

DIA-24786: separated transaction has been completed

Cause: The current transaction has been completed by another process.

Action: Start a new transaction

DIA-24787: remote cursors must be closed before a call completes

Cause: The previous operation did not close all the remote cursors it opened. Since separated transactions are enabled, this is not allowed.

Action: Close all remote cursors in each call, or start a regular (non-separated) transaction.

DIA-24788: cannot switch to specified transaction (server type)

Cause: The transaction specified was created by a shared server and the requestor is a dedicated server, or the transaction was created by a dedicated server and the requestor is a shared server.

Action: All parts of this application should connect as dedicated or as shared.

DIA-24789: start not allowed in recursive call

Cause: Oracle RM will not start/resume a branch in a recursive call

Action: Reconsider your application stack design

DIA-24790: cannot mix OCI_TRANS_RESUME and transaction isolation flags

Cause: An attempt was made to change the isolation level of an existing transaction.

Action: No action required

DIA-24791: invalid transaction start flags

Cause: An invalid transaction start flag was passed.

Action: Verify that OCI_TRANS_LOOSE was not passed along with OCI_TRANS_JOIN, OCI_TRANS_RESUME. Also, verify that other flags (such as OCI_TRANS_SEPARABLE) passed by the client are supported by the version of the Oracle server.

DIA-24792: cannot mix services in a single global transaction

Cause: Oracle RM will not serve global (distributed) transaction requests if branches are created using different services

Action: Configure clients such that those participating in the same distributed transaction use the same service name.

DIA-24794: no active DTP service found

Cause: Oracle RM will not serve global (distributed) transaction requests until DTP services are configured in RAC. It is possible that a service was stopped while transactions were in-flight.

Action: Provision/Start DTP services first.

DIA-24795: Illegal *string* attempt made

Cause: An illegal attempt was made to commit/rollback current transaction

Action: Use appropriate commit/rollback mechanism

DIA-24796: operation completed; resume of original transaction rolled back

Cause: The commit, rollback, or prepare completed successfully, but the current transaction for this thread was rolled back.

Action: If desired, retry the current transaction. If the operation was prepare, then end transaction appropriately with a commit or rollback operation.

DIA-24797: cannot promote the current transaction to a distributed transaction

Cause: An illegal attempt was made to promote the current transaction.

Action: Verify that OCI_ATTR_XID, OCI_ATTR_INTERNAL_NAME, and OCI_ATTR_EXTERNAL_NAME attributes have been set properly, and verify that the current transaction has neither performed IDL or PDML operations, nor already been a distributed transaction. Also, verify that the local transaction is in the same isolation level if the isolation flag value is set.

DIA-24798: cannot resume the distributed transaction branch on another instance

Cause: An attempt was made to resume a distributed transaction branch that is physically located on another RAC instance.

Action: Get a connection to the instance where the transaction branch is located.

DIA-24801: illegal parameter value in OCI lob function

Cause: One of the parameter values in the OCI lob function is illegal.

Action: Check every parameter in the OCI Lob function call to make sure they are correct. Offsets should be greater than or equal to one.

DIA-24802: user defined lob read callback error

Cause: The only valid return value for a user defined lob read callback function is OCI_CONTINUE. Any other value will cause this error.

Action: Verify that OCI_CONTINUE is returned from the user defined lob read callback function.

DIA-24803: illegal parameter value in lob read function

Cause: Internal error .

Action: This error should not normally occur. If it persists, please contact your customer service representative.

DIA-24804: Lob read/write functions called while another OCI LOB read/write streaming is in progress

Cause: Internal error.

Action: Wait for the ongoing LOB streaming call to finish before issuing the next server call, or use OCIBreak() abort the current LOB streaming call.

DIA-24805: LOB type mismatch

Cause: When copying or appending LOB locators, both source and destination LOB locators should be of the same type.

Action: Pass the same type of LOB locators for copying or appending.

DIA-24806: LOB form mismatch

Cause: When reading from or writing into LOBs, the character set form of the user buffer should be same as that of the LOB.

Action: Make sure that the buffer you are using to read or write has the same form as that of the LOB.

DIA-24807: LOB form mismatch

Cause: When copying or appending LOBs, both source and destination LOB locators should have the same character set form.

Action: Pass locators of the same character set form for copying or appending LOBs.

DIA-24808: streaming of lob data is not allowed when using lob buffering

Cause: Attempted to stream lob data via the polling mode or a callback when lob buffering was enabled for the input lob locator.

Action: Lob buffering is useful when reading/writing small amounts of lob data so streaming should not be necessary. Rewrite the OCILobRead/OCILobWrite call so that it does not use streaming. If streaming of data is required, lob buffering should not be used. In this case, flush buffers associated with the input lob locator as necessary, disable buffering on the input lob locator and reissue the OCILobRead/OCILobWrite call.

DIA-24809: amount specified will not fit in the lob buffers

Cause: LOB buffering is enabled for the input lob locator so buffering will be used. However, the amount of lob data to read or write is larger than what the lob buffers can hold.

Action: Either disable buffering on the input lob locator and reissue the command or pass a smaller amount.

DIA-24810: attempting to write more data than indicated

Cause: While writing into a LOB, more data was supplied than indicated.

Action: If data is written in pieces, then make sure that you do not provide more data in the pieces (cumulatively), than you indicated.

DIA-24811: less data provided for writing than indicated

Cause: While writing into a LOB, less data was provided than indicated.

Action: If writing data in single pieces, then make sure that the buffer length specified is big enough to accommodate the data being provided. If data is written in pieces, then make sure that all the data has been provided before specifying OCI_LAST_PIECE.

DIA-24812: character set conversion to or from UCS2 failed

Cause: If the database character set is varying-width, the CLOB/NCLOB value is implicitly converted to or from UCS2. This implicit conversion failed.

Action: Contact Oracle Worldwide Support.

DIA-24813: cannot send or receive an unsupported LOB

Cause: An attempt was made to send a LOB across the network, but either the server does not support the LOB sent by the client, or the client does not support the LOB sent by the server. This error usually occurs when the client and server are running different versions of Oracle.

Action: Use a version of the Oracle that supports the LOB on both the client and the server.

DIA-24814: operation not allowed for temporary LOBs

Cause: Temporary LOB locators are not allowed in the operation. For example: OCILobAssign only takes persistent LOB locators as parameters, not temporary LOBs.

Action: Use OCILobLocatorAssign for temporary LOBs instead. Note that OCILobLocatorAssign can also be used for persistent LOBs, in which case it will behave the same as OCILobAssign.

DIA-24815: Invalid character set form

Cause: An invalid character set form was passed into an OCI LOB function. For example, the only valid cs form for OCILobCreateTemporary() is OCI_DEFAULT(0), SQLCS_IMPLICIT(1) or SQLCS_NCHAR(2).

Action: Specify a valid character set form.

DIA-24816: Expanded non LONG bind data supplied after actual LONG or LOB column

Cause: A Bind value of length potentially > 4000 bytes follows binding for LOB or LONG.

Action: Re-order the binds so that the LONG bind or LOB binds are all at the end of the bind list.

DIA-24817: Unable to allocate the given chunk for current lob operation

Cause: The given size is increased to accommodate the number of bytes from server due to varying width db char/nchar set.

Action: Use smaller chunk sizes when you have character set conversion between client/server or perform piece-wise read or write.

DIA-24818: Operation not permitted on Abstract LOBs

Cause: Abstract LOB locators were not allowed in the operation. For example, OCILobAssign only takes persistent LOB locators as parameters, not Abstract (i.e., client-side created) LOBs.

Action: Avoid the operation on Abstract LOBs.

DIA-24819: Illegal reference count encountered for a temporary LOB

Cause: Internal error.

Action: This error should not normally occur. If it persists, contact Oracle Support Services.

DIA-24820: different LOB function called while another OCI LOB call is in progress

Cause: An attempt was made to execute a new Oracle Call Interface (OCI) LOB call while another OCI LOB call was in progress.

Action: Wait for the ongoing LOB streaming call to finish before issuing the next server call, or use OCIBreak() to abort the current LOB streaming call.

DIA-24821: LOB prefetch size supplied is larger than the supported limit.

Cause: A very large LOB prefetch size was specified during a query.

Action: Reduce the prefetch size to an acceptable value.

DIA-24822: operation not allowed for value LOBs

Cause: An attempt was made to execute a disallowed large object (LOB) operation on a value LOB.

Action: Execute only allowed LOB operations on value LOBs. Only read operations are allowed on value LOBs.

DIA-24823: operation not allowed for read-only LOB

Cause: An attempt was made to execute a large object (LOB) write operation on a read-only LOB.

Action: Execute only read LOB operations on read-only LOBs.

DIA-24824: LOB QUERY property cannot be used at partition level.

Cause: An attempt was made to set LOB QUERY property at partition level.

Action: Use the 'query as' syntax at the table level instead.

DIA-24825: invalid use of LOB_VALUE operator

Cause: The LOB_VALUE operator could not be used in certain operations. For example, in DML-returning or select-for-update operations.

Action: Remove the LOB_VALUE operator.

DIA-24826: value LOB no longer available

Cause: An attempt was made to access a value LOB that was freed automatically.

Action: Finish reading from value LOBs before the next SQL fetch.

DIA-24827: illegal byte amount parameter value in LOB read function

Cause: Invalid byte amount value passed in the large object (LOB) read function.

Action: If character amount is 0 then byte amount must be greater than or equal to maximum client character width.

DIA-24828: server does not support LOB array read or write operation

Cause: Application used large object (LOB) array APIs while server did not support large object (LOB) array read or write operation.

Action: Use large object (LOB) OCI API to read or write.

DIA-24850: failed to startup shared subsystem

Cause: While attempting to initialize OCI in shared mode, a problem was encountered in starting up the shared subsystem.

Action: Contact Oracle Customer support.

DIA-24851: failed to connect to shared subsystem

Cause: While attempting to initialize OCI in shared mode, a problem was encountered in connecting the process to the shared subsystem.

Action: Contact Oracle Customer Support.

DIA-24852: protocol error during statement execution

Cause: An internal protocol error occurred while receiving describe data from the server during execution of a statement.

Action: Contact Oracle Customer Support.

DIA-24853: failed to connect thread to shared subsystem

Cause: While attempting to initialize OCI in shared mode, a problem was encountered in connecting the thread to the shared subsystem.

Action: Contact Oracle Customer Support.

DIA-24854: invalid pieceinfo provided

Cause: While making the first call to write LOB data, an invalid pieceinfo value provided.

Action: Correct the call to use OCI_ONE_PIECE or OCI_FIRST_PIECE. If using OCCI, make sure to call writeBuffer before calling writeLastBuffer.

DIA-24855: attempt to pass a LOB locator over an invalid database link

Cause: There was an attempt to send a LOB locator over a database link which was different from the one on which it was obtained.

Action: Ensure that remote LOB locators are passed back on the same database link from which they were obtained.

DIA-24900: invalid or unsupported mode parameter passed in call

Cause: The mode parameter passed into the OCI Client Notification call is incorrect.

Action: Please correct the mode parameter passed into OCI.

DIA-24901: handles belonging to different environments passed into an OCI call

Cause: All handles passed into an OCI call should belong to the same environment. In the call that returned this error, handles belonging to different environments were passed in.

Action: Please ensure that the handle parameters in the call to come from the same OCI Environment.

DIA-24902: invalid subscription name or name-length in subscription handle

Cause: The subscription handle passed into the OCI call does not have a proper name or name-length attribute.

Action: Please set the name and name-length attributes using the OCIAttrSet() call.

DIA-24903: invalid namespace attribute passed into OCI call

Cause: The subscription handle passed into the OCI call does not have a proper namespace attribute.

Action: Please set the namespace attribute using the OCIAttrSet() call.

DIA-24904: invalid callback attribute passed into OCI call

Cause: The subscription handle passed into the OCI call does not have a proper callback attribute.

Action: Please set the callback attribute using the OCIAttrSet() call.

DIA-24905: invalid recipient protocol attribute passed into OCI call

Cause: The subscription handle passed into the OCI call did not have a proper recipient protocol attribute.

Action: Please set the recipient protocol attribute using the OCIAttrSet() call.

DIA-24906: invalid recipient attribute passed into OCI call

Cause: The subscription handle passed into the OCI call did not have a proper recipient attribute.

Action: Please set the recipient attribute using the OCIAttrSet() call.

DIA-24907: invalid pair of callback and recipient protocol attributes

Cause: The subscription handle passed into the OCI call can't have both the callback defined and a recipient protocol other than OCI_SUBSCR_PROTO_OCI at the same time.

Action: Please set the appropriate callback and recipient protocol attributes using the OCIAttrSet() call.

DIA-24908: invalid recipient presentation attribute

Cause: The subscription handle passed into the OCI call does not have a valid recipient presentation attribute.

Action: Set the recipient presentation attribute using the OCIAttrSet() call

DIA-24909: call in progress. Current operation cancelled

Cause: The OCI call was invoked when another call on the connection was in progress.

Action: Check if the OCI call is supported when the call is in progress under special conditions; for example, if it is being used by a signal handler.

DIA-24911: Cannot start listener thread at specified port

Cause: Thread already running at a different port.

Action: Set the correct port in the environment handle or let the system choose the port.

DIA-24912: Listener thread failed. *string*

Cause: Thread listening for event notification exited because of an error. The error encountered is appended to the error message.

Action: The client needs to be restarted.

DIA-24913: Event to enable NLS validation

Cause: N/A

Action: Set this event in your environment to enable NLS character validation even when character sets are the same for client/server.

DIA-24914: Notification crash test

Cause: N/A

Action: THIS IS NOT A USER ERROR NUMBER/MESSAGE. THIS DOES NOT NEED TO BE TRANSLATED OR DOCUMENTED.

DIA-24915: Cannot start Listener at specified IP address

Cause: Thread was already listening at a different IP address.

Action: Set the correct IP address in the environment handle or let the system choose the correct IP address.

DIA-24916: cannot use IP address attribute before release 11.2 compatible notifications

Cause: An attempt was made to use OCI_ATTR_SUBSCR_IPADDR attribute before release 11.2 compatible notifications.

Action: Change the compatibility to 11.2.

DIA-24917: OCI notification client trace event

Cause: N/A

Action: THIS IS NOT A USER ERROR NUMBER/MESSAGE. THIS DOES NOT NEED TO BE TRANSLATED OR DOCUMENTED.

DIA-24918: secure notification mode not supported

Cause: An attempt was made to use OCI_SECURE_NOTIFICATION before release 12.0 compatible notifications.

Action: Change the compatibility to 12.0.

DIA-24919: subscription to Fast Application Notification failed

Cause: An error occurred while subscribing to Fast Application Notification. This could be due to problems in the Oracle clusterware configuration.

Action: Look at the client trace files for additional information. Ensure that the Oracle clusterware is properly configured.

DIA-24920: column size too large for client

Cause: Client attempted to fetch a column whose size is larger than the maximum size that can be handled by the client.

Action: Upgrade the client stack to Oracle 12c or higher.

DIA-24922: cannot send or receive an SCN value which is too high for the current compatibility setting

Cause: An attempt was made to send or receive a high value system change number (SCN) over the network, but either the sever or client does not support such a high value SCN. This error usually occurs when either the server or client compatibility is lower than 12.2.

Action: Be sure the database compatibility is 12.2 or above on both the client and server.

DIA-24923: event notification not supported for *string*

Cause: An event notification operation was invoked on an unsupported object type or schema.

Action: Refer to the documentation for supported object types and schema.

DIA-24940: invalid combination of *string* namespace, *string* presentation and *string* receive protocol

Cause: An invalid combination of namespace, presentation and receive protocol was specified during notification registration. Currently, only AQ namespace is supported with XML presentation. Non-AQ namespace is not supported for e-mail and HTTP receive protocols.

Action: Please change the register call appropriately.

DIA-24941: invalid combination of notification grouping attributes

Cause: An invalid combination of notification grouping attributes was specified. Currently, only TIME notification grouping class is supported. If notification grouping class is zero, all other notification grouping attributes must be zero.

Action: Refer to documentation and change the attributes appropriately.

DIA-24942: cannot use ntfns grouping attributes on before release 11.0 compatible ntfns

Cause: An attempt was made to use notification grouping on before release 11.0 compatible notifications.

Action: Change the compatibility to 11.0.

DIA-24943: cannot use ntfn grouping with this receive protocol, presentation and/or QoS

Cause: An attempt was made to use notification grouping with e-mail or HTTP receive protocol or XML presentation or payload delivery or reliable QoS. Currently, only OCI and PLSQL receive protocols and default presentation are supported with notification grouping.

Action: Refer to documentation and change the call appropriately.

DIA-24944: cannot use timeout or grouping with ANONYMOUS namespace

Cause: An attempt was made to use timeout or grouping with ANONYMOUS namespace. Currently, timeout and grouping are supported only with AQ and DBCHANGE namespaces.

Action: Refer to documentation and change the call appropriately.

DIA-24945: cannot use context, QOS and timeout attributes of notification on lower than 10.2 compatible notifications

Cause: An attempt was made to use context, QOS and timeout attributes of notification on lower than 10.2 compatible notifications.

Action: Change the database compatibility to 10.2.

DIA-24946: invalid registration callback

Cause: An attempt was made to use a reserved callback for notification registration.

Action: Choose a different name for the notification callback and change the register call appropriately.

DIA-24947: Invalid namespace attribute specified for the subscription *string*

Cause: An attempt was made to register with invalid namespace attribute.

Action: Refer to documentation and change the namespace appropriately.

DIA-24948: number of registrations for this subscription exceeds the limit

Cause: The maximum number of registrations already existed for this subscription.

Action: Change the queue policy or close any existing registrations and try again.

DIA-24950: unregister failed, registration not found

Cause: The registration that was asked to be unregistered could not be found.

Action: Please check the callback function name and the subscription name in the unregister call.

DIA-24951: EMON tracing event

Cause: N/A

Action: Event used to trace EMON. *Note: THIS IS NOT A USER ERROR NUMBER/ MESSAGE. THIS DOES NOT NEED TO BE TRANSLATED OR DOCUMENTED.

DIA-24952: register, unregister or post has incorrect collection count

Cause: The register, unregister or post function was invoked with a collection that was smaller than the size specified by the parameter to the function.

Action: Please check the function's use and ensure that the size parameter is correct.

DIA-24960: the attribute *string* is greater than the maximum allowable length of *number*

Cause: The user attempted to pass an attribute that is too long

Action: Shorten the specified attribute and retry the operation.

DIA-24962: connect string could not be parsed, error = *string*

Cause: The address portion of the connect string could not be parsed. The client may be using a format of the connect string that the server does not understand.

Action: Correct the connect string.

DIA-24964: ALTER SESSION SET CONTAINER error

Cause: An attempt to switch to a PDB with different settings such as character set, time zone or time zone file version on an Oracle 12c Release 1 (12.1) or earlier client failed.

Action: Upgrade client to Oracle 12 Release 2 (or later) to support such operations.

DIA-24969: iteration count of *number* not supported for this statement

Cause: This statement was not supported with iteration count greater than one.

Action: Execute the statement with an iteration count of one.

DIA-24970: Oracle Database client cannot handle SQL function codes exceeding 255.

Cause: Oracle Database clients earlier than release 21c cannot handle SQL function codes larger than 255.

Action: Upgrade the Oracle Database client library to release 21c or later.

DIA-24981: deferred SGA thread spawn failed

Cause: This is an internal error.

Action: None

DIA-24982: deferred SGA segment allocation failed, index = *string* location = *string*

Cause: System-defined shared memory limits are inadequate for Oracle.

Action: Consult the alert file for details.

DIA-24983: Process (*string*) failed to attach to deferred SGA segments.

Cause: The process failed to attach to deferred SGA segments.

Action: Consult the alert file for details and contact Oracle Support Services.

DIA-24984: SGA allocation slaves termination failed

Cause: This is an internal error.

Action: None

DIA-25000: invalid use of bind variable in trigger WHEN clause

Cause: A bind variable was used in the when clause of a trigger.

Action: Remove the bind variable. To access the table columns use (new/old).column_name.

DIA-25001: cannot create this trigger type on this type of view

Cause: INSTEAD OF triggers can be created on any view which is not an Editioning View, while BEFORE and AFTER triggers may only be created on Editioning Views.

Action: Change the trigger type to INSTEAD OF or change the view on which you are attempting to create a DML trigger.

DIA-25002: cannot create INSTEAD OF triggers on tables

Cause: Only BEFORE or AFTER triggers can be created on a table.

Action: Change the trigger type to BEFORE or AFTER.

DIA-25003: cannot change NEW values for this column type in trigger

Cause: Attempt to change NEW trigger variables of datatype object, REF, nested table, VARRAY or LOB datatype which is not supported.

Action: Do not change the NEW trigger variables in the trigger body.

DIA-25004: WHEN clause is not allowed in INSTEAD OF triggers

Cause: WHEN clause is specified in an INSTEAD OF trigger.

Action: Remove the WHEN clause when creating an INSTEAD OF trigger.

DIA-25005: cannot CREATE INSTEAD OF trigger on a read-only view

Cause: attempt to create an INSTEAD OF trigger on a view created with read-only option. The view cannot be updated using INSTEAD OF triggers.

Action: Do not create the trigger.

DIA-25006: cannot specify this column in UPDATE OF clause

Cause: Attempt to create a trigger on update of a column whose datatype is disallowed in the clause, such as LOB and nested table.

Action: Remove the UPDATE OF clause.

DIA-25007: functions or methods not allowed in WHEN clause

Cause: PLSQL function call or method invocation is not allowed in the WHEN clause when creating a trigger.

Action: Remove the function call or method invocation from the WHEN clause.

DIA-25008: no implicit conversion to LOB datatype in instead-of trigger

Cause: When inserting or updating a view using instead-of trigger, the new value for a LOB view column is of a different datatype.

Action: Specified a LOB value as the new value for the LOB view column.

DIA-25009: Nested table clause allowed only for INSTEAD OF triggers

Cause: Triggers on nested tables can only be created on view columns using INSTEAD OF triggers.

Action: Use view nested table columns for defining nested table triggers.

DIA-25010: Invalid nested table column name in nested table clause

Cause: The column name specified in the nested table clause of an INSTEAD OF trigger does not correspond to a nested table column.

Action: Specify a nested table column on which the trigger is to be defined.

DIA-25011: cannot create trigger on internal AQ table

Cause: An attempt was made to try to create a trigger on a table that is used internally to support the Advanced Queueing (AQ) feature.

Action: Do not create the trigger.

DIA-25012: PARENT and NEW values cannot be identical

Cause: The referencing clause specifies identical values for PARENT and OLD.

Action: Re-specify either the PARENT or NEW referencing value.

DIA-25013: OLD and PARENT values cannot be identical

Cause: The referencing clause specifies identical values for OLD and PARENT.

Action: Re-specify either the OLD or PARENT referencing value.

DIA-25014: cannot change the value of a PARENT reference variable

Cause: Parent values can only be read and not changed.

Action: Do not attempt to change a Parent variable.

DIA-25015: cannot perform DML on this nested table view column

Cause: DML cannot be performed on a nested table view column except through an INSTEAD OF trigger

Action: Create an INSTEAD OF trigger over the nested table view column and then perform the DML.

DIA-25016: cannot specify column list for insert into nested table view column

Cause: A column list cannot be specified for inserts into the nested table view column.

Action: Specify all the columns for insert into the nested table.

DIA-25017: cannot reference NEW ROWID for movable rows in before triggers

Cause: NEW ROWID was referenced in a before row trigger which is defined on an index-organized table, or a partitioned table with enabled movement of rows. The ROWID cannot be computed in a before row update trigger because it depends on the actual values of the row

Action: Remove references to NEW ROWID from the trigger definition.

DIA-25018: conflicting trigger *string* already exists

Cause: Conflicting instead of DDL trigger on schema/database already exists.

Action: Remove the old trigger

DIA-25019: too much concurrency

Cause: cannot pin the database/schema because of too much concurrency

Action: try the operation later

DIA-25020: renaming system triggers is not allowed

Cause: renaming system triggers is not allowed

Action: Drop the trigger, and create a new one for the same

DIA-25021: cannot reference a trigger defined on another table

Cause: Referenced trigger in the FOLLOWS clause was defined on another table.

Action: Create the referenced trigger on the same table

DIA-25022: cannot reference a trigger of a different type

Cause: Referenced trigger in the FOLLOWS or PRECEDES clause was either a different type or not a compound trigger.

Action: Create the referenced trigger as the same type or a compound trigger.

DIA-25023: Cyclic trigger dependency is not allowed

Cause: A cycle of trigger dependency can be formed.

Action: Do not create a trigger that can formed a cyclic dependency.

DIA-25024: cannot specify FOLLOWS for a REVERSE CROSSSESSION trigger

Cause: The FOLLOWS clause was specified when creating the REVERSE CROSSSESSION trigger.

Action: Do not create a REVERSE CROSSSESSION trigger with a FOLLOWS clause.

DIA-25025: cannot specify PRECEDES clause

Cause: The PRECEDES clause was specified when creating a FORWARD CROSSSESSION trigger or a regular trigger.

Action: Do not create a FORWARD CROSSSESSION or a regular trigger with a PRECEDES clause.

DIA-25026: FOR EACH ROW was specified with compound triggers

Cause: FOR EACH ROW is not allowed with compound triggers.

Action: Remove the FOR EACH ROW clause.

DIA-25027: compound triggers cannot be used as system triggers

Cause: Compound trigger was defined as system trigger.

Action: Do not use compound trigger as system trigger.

DIA-25028: regular trigger body can not start with keyword COMPOUND

Cause: Regular triggers body should start with BEGIN/DECLARE etc .

Action: Fix the syntax and recompile.

DIA-25029: compound triggers should always start with keyword COMPOUND

Cause: Compound trigger body was started with incorrect keyword.

Action: Fix the syntax and recreate.

DIA-25030: crosssession trigger cannot be owned by a non-editioned user

Cause: An attempt was made to create a crosssession trigger in a schema where triggers were not editionable.

Action: Enable editions for the user for triggers and then create the crosssession trigger.

DIA-25031: only a crosssession trigger may be specified

Cause: The trigger specified was not a crosssession trigger.

Action: Specify a crossedition trigger.

DIA-25032: crossedition trigger cannot be created in ORA\$BASE

Cause: An attempt was made to create crossedition trigger in the ORA\$BASE edition.

Action: Do not create a crossedition trigger in the ORA\$BASE edition.

DIA-25033: triggers cannot be executed at this time

Cause: An attempt was made to execute a trigger when the session was almost finished.

Action: Do not attempt to DML with triggers that are expected to execute when session has almost ended.

DIA-25034: cannot bypass trigger owned by another user

Cause: An attempt was made to do DML from a crossedition trigger on an object that has a non-crossedition trigger owned by another user. DML from a crossedition trigger bypasses the running of non-crossedition triggers; this cannot be allowed for triggers owned by other users.

Action: Permit the non-crossedition trigger to be bypassed by attaching it to the editioning view rather than the table, moving one of the triggers to be in the same schema as the other, or explicitly disabling the non-crossedition trigger.

DIA-25035: cannot perform DML on remote object from a crossedition trigger

Cause: An attempt was made to do DML from a crossedition trigger that would modify data in a remote database. DML from a crossedition trigger has special rules applied regarding what triggers will fire as part of that DML; these special rules cannot be applied across database links and therefore the DML cannot be allowed.

Action: Perform the DML in a helper function separate from the crossedition trigger itself; the special rules are not applied when the DML is not issued from within the crossedition trigger itself.

DIA-25100: TABLESPACE option can only be used with ALTER INDEX REBUILD

Cause: The TABLESPACE option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD TABLESPACE tablespace name.

DIA-25101: duplicate REBUILD option specification

Cause: The REBUILD option to ALTER INDEX is specified more than once.

Action: Specify the option at most once.

DIA-25102: PARALLEL option can only be used with ALTER INDEX REBUILD

Cause: The PARALLEL option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25103: NOPARALLEL option can only be used with ALTER INDEX REBUILD

Cause: The NOPARALLEL option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25104: UNRECOVERABLE option can only be used with ALTER INDEX REBUILD

Cause: The UNRECOVERABLE option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25105: RECOVERABLE option can only be used with ALTER INDEX REBUILD

Cause: The RECOVERABLE option to ALTER INDEX was used without the REBUILD option.

Action: Use ALTER INDEX REBUILD.

DIA-25106: only one of PARALLEL or NOPARALLEL clause may be specified

Cause: PARALLEL was specified more than once, NOPARALLEL was specified more than once, or both PARALLEL and NOPARALLEL were specified in an ALTER INDEX REBUILD statement.

Action: Remove all but one of the PARALLEL or NOPARALLEL clauses.

DIA-25107: duplicate TABLESPACE option specification

Cause: the TABLESPACE was specified more than once in an ALTER INDEX REBUILD statement.

Action: Remove all but one of the TABLESPACE clauses.

DIA-25108: standby lock name space exceeds size limit of *string* characters

Cause: The lock name space for the standby database exceeded the maximum string length.

Action: Change initialization parameter `_STANDBY_LOCK_NAME_SPACE` to a character string of less than the specified characters.

DIA-25109: standby lock name space has illegal character '*string*'

Cause: An invalid lock name space was specified for the standby database. The lock name space for the standby database can only contain A-Z, 0-9, '_', '#', '\$', '.' and '@' characters.

Action: Change initialization parameter `_STANDBY_LOCK_NAME_SPACE` to a valid character string.

DIA-25110: NOSORT may not be used with a bitmap index

Cause: An attempt was made to create a bitmap index using the NOSORT option.

Action: Remove NOSORT from the CREATE BITMAP INDEX statement.

DIA-25111: creation of BITMAP cluster indices is not supported

Cause: An attempt was made to create a cluster index with the BITMAP attribute.

Action: Remove BITMAP from the CREATE INDEX statement.

DIA-25112: maximum number of BITMAP index columns is 30

Cause: Too many columns were specified for the index.

Action: Create an index on fewer columns.

DIA-25113: GLOBAL may not be used with a bitmap index

Cause: An attempt was made to create a bitmap index using the GLOBAL option.

Action: Remove GLOBAL from the CREATE BITMAP INDEX statement, and/or add a LOCAL partition descriptor if the table is partitioned.

DIA-25114: invalid file number specified in the DUMP DATAFILE/TEMPFILE command

Cause: An invalid file number was used in dumping a datafile or tempfile.

Action: Specify a valid file number.

DIA-25115: duplicate BLOCK option specification

Cause: BLOCK (MIN/MAX) was specified more than once in the DUMP DATAFILE/TEMPFILE command.

Action: Specify only one BLOCK option.

DIA-25116: invalid block number specified in the DUMP DATAFILE/TEMPFILE command

Cause: An invalid block number was used in dumping a datafile or tempfile.

Action: Specify a valid block number.

DIA-25117: MIN/MAX/Block Number expected

Cause: A value other than MIN/MAX, or a block number was entered in the DUMP DATAFILE/TEMPFILE command.

Action: Correct the syntax.

DIA-25118: invalid DUMP DATAFILE/TEMPFILE option

Cause: An invalid option was specified for the DUMP DATAFILE/TEMPFILE command.

Action: Correct the syntax.

DIA-25119: LOGGING/NOLOGGING option already specified

Cause: In CREATE TABLESPACE, the LOGGING and/or NOLOGGING options were specified more than once.

Action: Remove all but one of the logging specifications.

DIA-25120: MINIMUM EXTENT option already specified

Cause: In CREATE TABLESPACE, the MINIMUM EXTENT option was specified more than once.

Action: Remove all but one of the MINIMUM EXTENT specifications.

DIA-25121: MINIMUM EXTENT value greater than maximum extent size

Cause: In CREATE/ALTER TABLESPACE, the value specified for the MINIMUM EXTENT option was greater than the maximum extent size.

Action: Choose a lower value for the MINIMUM EXTENT option.

DIA-25122: Only LOCAL bitmap indexes are permitted on partitioned tables

Cause: An attempt was made to create a global bitmap index on a partitioned table.

Action: create a local bitmap index instead.

DIA-25123: Too many components specified in the name.

Cause: Specifying more components to a name than allowed.

Action: Check the name specified for the operation.

DIA-25124: Database link name not allowed.

Cause: Specifying a database link name when it is not permitted.

Action: Check the name specified for the operation.

DIA-25125: BUFFER_POOL/FLASH_CACHE/CELL_FLASH_CACHE storage option not allowed

Cause: An attempt was made to specify the BUFFER_POOL, FLASH_CACHE, or CELL_FLASH_CACHE storage option. This option may only be specified during - CREATE or ALTER TABLE - CREATE or ALTER CLUSTER - CREATE or ALTER INDEX

Action: Remove this option and retry the statement.

DIA-25126: Invalid name specified for BUFFER_POOL/FLASH_CACHE/CELL_FLASH_CACHE

Cause: The name of the cache hints specified by was invalid. The only valid names for BUFFER_POOL are KEEP, RECYCLE and DEFAULT. The only valid names for FLASH_CACHE and CELL_FLASH_CACHE are KEEP, NONE and DEFAULT.

Action: Use a valid name or remove the BUFFER_POOL, FLASH_CACHE, or CELL_FLASH_CACHE clause.

DIA-25127: RELY not allowed in NOT NULL constraint

Cause: An attempt to set RELY on for NOT NULL constraint.

Action: only NORELY may be specified for a NOT NULL constraint.

DIA-25128: No insert/update/delete on table with constraint (*string.string*) disabled and validated

Cause: Try to insert/update/delete on table with DISABLE VALIDATE constraint.

Action: Change the constraint's states.

DIA-25129: cannot modify constraint (*string*) - no such constraint

Cause: the named constraint does not exist for this table.

Action: Obvious

DIA-25130: cannot modify primary key - primary key not defined for table

Cause: An attempt was made to modify a primary key that was not defined for the table.

Action: None

DIA-25131: cannot modify unique(*string*) - unique key not defined for table

Cause: attempted to modify a unique key that is not defined for the table.

Action: None

DIA-25132: UNIQUE constraint (*string.string*) disabled and validated in ALTER TABLE EXCHANGE PARTITION

Cause: The ALTER TABLE EXCHANGE PARTITION statement could not be issued while the partition and the table had disabled and validated unique constraints and the unique keys in the partition were not mutually exclusive from the rest of the table.

Action: Change the constraint's status.

DIA-25133: duplicate SINGLE TABLE option specified

Cause: The SINGLE TABLE option was specified more than once.

Action: Specify the SINGLE TABLE option only once.

DIA-25134: keyword TABLE expected

Cause: The keyword TABLE is missing from the SINGLE TABLE option.

Action: Place the keyword TABLE after the keyword SINGLE in the command.

DIA-25135: cannot use the SINGLE TABLE option

Cause: The SINGLE TABLE option is only valid for hash clusters.

Action: Do not specify the SINGLE TABLE option.

DIA-25136: this cluster can contain only one table

Cause: An attempt was made to store more than one table in a cluster that was created with the SINGLE TABLE option.

Action: Do not attempt to store more than one table in the cluster.

DIA-25137: Data value out of range

Cause: Value from cast operand is larger than cast target size.

Action: Increase size of cast target.

DIA-25138: *string* initialization parameter has been made obsolete

Cause: An obsolete initialization parameter has been specified

Action: The system will come up, but parameters must be examined

DIA-25139: invalid option for CREATE TEMPORARY TABLESPACE

Cause: An invalid option appears.

Action: Specify one of the valid options: TEMPFILE, EXTENT MANAGEMENT LOCAL, UNIFORM

DIA-25140: *string* space policy cannot be specified for the *string* extent management

Cause: An invalid option appears.

Action: Make sure that for LOCAL extent management UNIFORM or AUTOALLOCATE is specified, and for DICTIONARY extent management UNIFORM or AUTOALLOCATE are not specified

DIA-25141: invalid EXTENT MANAGEMENT clause

Cause: An invalid option appears for EXTENT MANAGEMENT clause

Action: Specify one of the valid options: UNIFORM SIZE, AUTOALLOCATE

DIA-25142: default storage clause specified twice

Cause: default storage clause was specified twice for create tablespace

Action: Specify it once.

DIA-25143: default storage clause is not compatible with allocation policy

Cause: default storage clause was specified for a tablespace with AUTOALLOCATE or UNIFORM policy

Action: Omit the storage clause

DIA-25144: invalid option for CREATE TABLESPACE with TEMPORARY contents

Cause: An invalid option appears.

Action: Specify one of the valid options: EXTENT MANAGEMENT DICTIONARY, USER

DIA-25145: allocation policy already specified

Cause: In CREATE TABLESPACE, the allocation policy was specified more than once, for example, AUTOALLOCATE and UNIFORM.

Action: Remove all but one of the allocation policy specifications.

DIA-25146: EXTENT MANAGEMENT option already specified

Cause: In CREATE TABLESPACE, the EXTENT MANAGEMENT option was specified more than once.

Action: Remove all but one of the EXTENT MANAGEMENT specifications.

DIA-25147: UNIFORM SIZE value greater than maximum extent size

Cause: In CREATE/ALTER TABLESPACE, the value specified for the UNIFORM SIZE option was greater than the maximum extent size.

Action: Choose a lower value for the UNIFORM SIZE option.

DIA-25148: ONLINE option not permitted

Cause: An attempt was made to specify ONLINE for ALTER TABLE MOVE on a table that is not index-organized. The ONLINE option is currently supported only for index-organized tables.

Action: Remove the ONLINE option from the command.

DIA-25149: Columns of UROWID type may not be indexed

Cause: An attempt was made to create an index on a column of UROWID type

Action: Remove the column from the list of indexed columns

DIA-25150: ALTERING of extent parameters not permitted

Cause: An attempt was made to alter the extent parameters for a segment in a tablespace with autoallocate or uniform extent allocation policy.

Action: Remove the appropriate extent parameters from the command.

DIA-25151: Rollback Segment cannot be created in this tablespace

Cause: An attempt was made to create a rollback segment in a tablespace with autoallocate extent allocation policy.

Action: Specify a different tablespace for the rollback segment

DIA-25152: TEMPFILE cannot be dropped at this time

Cause: An attempt was made to drop a TEMPFILE being used by online users

Action: The TEMPFILE has been taken offline. Try again, later.

DIA-25153: Temporary Tablespace is Empty

Cause: An attempt was made to use space in a temporary tablespace with no files.

Action: Add files to the tablespace using ADD TEMPFILE command.

DIA-25154: column part of USING clause cannot have qualifier

Cause: Columns that are used for a named-join (either a NATURAL join or a join with a USING clause) cannot have an explicit qualifier.

Action: Remove the qualifier.

DIA-25155: column used in NATURAL join cannot have qualifier

Cause: Columns that are used for a named-join (either a NATURAL join or a join with a USING clause) cannot have an explicit qualifier.

Action: Remove the qualifier.

DIA-25156: old style outer join (+) cannot be used with ANSI joins

Cause: When a query block uses ANSI style joins, the old notation for specifying outer joins (+) cannot be used.

Action: Use ANSI style for specifying outer joins also.

DIA-25157: specified block size *string* is not valid

Cause: An attempt was made to create a tablespace with a block size that was not supported.

Action: Specify a valid block size that is either the standard block size or one of 2K, 4K, 8K, 16K, or 32K subject to the maximum and minimum block sizes supported by the platform.

DIA-25158: Cannot specify RELY for foreign key if the associated primary key is NORELY

Cause: RELY was specified for the foreign key constraint, when the associated primary key constraint was NORELY.

Action: Change the option of the primary key also to RELY.

DIA-25159: Must specify a valid tablespace number

Cause: A valid tablespace number was missing.

Action: Specify a valid tablespace number.

DIA-25160: Must specify a valid relative data block address

Cause: A valid relative data block address was missing.

Action: Specify a valid relative data block address.

DIA-25161: Cannot have both DBA and RDBA options

Cause: Both the DBA and RDBA options were passed to ALTER SYSTEM DUMP REDO.

Action: Use either the DBA option or the RDBA option but not both.

DIA-25162: Must specify both RDBA MIN and RDBA MAX options

Cause: Only one RDBA option was passed to ALTER SYSTEM DUMP REDO.

Action: Specify both RDBA MIN and RDBA MAX.

DIA-25163: Invalid tablespace number or relative data block address

Cause: The relative data block address was invalid for the given tablespace number or the table space number was invalid.

Action: Specify a valid tablespace number or relative data block address.

DIA-25164: The tag expression is too complex.

Cause: The statement tag value was not specified using a simple expression.

Action: Reduce the complexity of the statement tag expression. For example, assign the tag expression to a variable and reference the variable in the error logging clause.

DIA-25165: number of passwords in statement exceeds maximum limit of *string*

Cause: The SQL statement had more passwords than the maximum limit allowed.

Action: Reconstruct the SQL statement to have a number of passwords less than or equal to the maximum allowed.

DIA-25175: no PRIMARY KEY constraint found

Cause: A PRIMARY KEY constraint must be defined for a table with this organization

Action: Define a PRIMARY KEY

DIA-25176: storage specification not permitted for primary key

Cause: Storage parameters cannot be defined for a PRIMARY KEY constraint for a table with this organization

Action: Remove storage specification for primary key

DIA-25177: UNRECOVERABLE option not permitted

Cause: The UNRECOVERABLE option may not be specified for a primary key for a table with this organization

Action: Remove UNRECOVERABLE option for primary key

DIA-25178: duplicate PCTTHRESHOLD storage option specification

Cause: The storage option PCTTHRESHOLD is specified more than once.

Action: Specify storage options at most once.

DIA-25179: invalid PCTTHRESHOLD storage option value

Cause: The specified value must be a positive integer.

Action: Specify an appropriate value.

DIA-25180: PCTTHRESHOLD only valid for certain table organizations

Cause: PCTTHRESHOLD can only be specified for tables with certain organizations.

Action: Remove the PCTTHRESHOLD option.

DIA-25181: missing ON keyword for NESTED INDEX

Cause: ON keyword required to specify nested index column nest

Action: Add ON keyword

DIA-25182: feature not currently available for index-organized tables

Cause: An attempt was made to use one or more of the following feature(s) not currently supported for index-organized tables: CREATE TABLE with LOB/BFILE/VARRAY columns, partitioning/PARALLEL/CREATE TABLE AS SELECT options, ALTER TABLE with ADD/MODIFY column options, CREATE INDEX ALTER TABLE MOVE with LOB/PARALLEL

Action: Do not use the disallowed feature(s) in this release.

DIA-25183: index-organized table top index segment is in a different tablespace

Cause: An attempt was made to drop a tablespace which contains an index only table's overflow segment but not the top index segment"

Action: find index-organized tables which span the tablespace being dropped and some other tablespace(s). Drop these tables.

DIA-25184: column name expected

Cause: A column name is not present where required by the CREATE TABLE for specifying last column to be included in the index segment of the index-organized table

Action: Specify a column name where required by the syntax.

DIA-25185: index column other than last can not be specified for INCLUDE clause

Cause: An index column name other than the last is specified as including column

Action: Specify either a column name which is not part of index-organized table primary key index , or the last key column of the primary key for the INCLUDING clause.

DIA-25186: INCLUDING clause specified for index-organized table without OVERFLOW

Cause: INCLUDING clause of a CREATE TABLE is an valid option only for index-organized tables with OVERFLOW clause (at creation time) or if an OVERFLOW segment already exists (at ALTER time).

Action: Specify OVERFLOW clause for the index-organized table : For ALTER, perform ADD OVERFLOW first.

DIA-25187: specified exceptions table form incorrect

Cause: The specified table does not have the proper field definitions.

Action: Specify the correct table to use.

DIA-25188: cannot drop/disable/defer the primary key constraint for index-organized tables or sorted hash cluster

Cause: An attempt was made to DROP, DISABLE, or DEFER the primary key constraint for an index-only table. This is not allowed.

Action: Do not DROP, DISABLE, or DEFER the primary key constraint for an index-only table.

DIA-25189: illegal ALTER TABLE option for an index-organized table

Cause: While altering an index-organized table, an attempt was made to enter either the PCTFREE or PCTUSED value for IOT top index segment.

Action: Remove the illegal option(s).

DIA-25190: an index-organized table maintenance operation may not be combined with other operations

Cause: ALTER TABLE statement attempted to combine an index-organized table maintenance operation (e.g. changing physical attributes) with some other operation (e.g. ADD constraint) which is illegal

Action: Ensure that a index-organized table maintenance operation is the sole operation specified in ALTER TABLE statement;

DIA-25191: cannot reference overflow table of an index-organized table

Cause: An attempt to directly access the overflow table of an index-organized table

Action: Issue the statement against the parent index-organized table containing the specified overflow table.

DIA-25192: invalid option for an index-organized table

Cause: An attempt to specify one or more of the following options for an index-organized table: [NO]CACHE, NO LOGGING, CLUSTER

Action: Remove the illegal option(s)

DIA-25193: cannot use COMPRESS option for a single column key

Cause: An attempt to use COMPRESS option on single column key

Action: Remove the COMPRESS option.

DIA-25194: invalid COMPRESS prefix length value

Cause: The specified value must be a positive integer less than the number of key columns

Action: Specify an appropriate value.

DIA-25195: invalid option for index on an index-organized table

Cause: An attempt to specify one or more of the following options for index on an IOT: BITMAP, REVERSE, PCTUSED

Action: Specify an appropriate option.

DIA-25196: keyword MOVE in ALTER TABLE MOVE must immediately follow *table name*

Cause: MOVE specified after one/more other ALTER options

Action: Change order of options, MOVE should be first Remove the illegal option(s)

DIA-25197: an overflow segment already exists for the indexed-organized table

Cause: An attempt was made to ADD OVERFLOW segment on an index-organized table that already has an overflow segment

Action: No action required.

DIA-25198: partitioning method is not supported for index-organized table

Cause: An unsupported partitioning method was specified.

Action: Select a different partitioning scheme. Consult the documentation for supported partitioning methods.

DIA-25199: partitioning key of a index-organized table must be a subset of the primary key

Cause: An attempt to specify a partitioning key which is not a prefix of the primary key of the index-organized table

Action: Select a different partitioning key

DIA-25200: invalid value *string*, QUEUE_NAME should be [SCHEMA.]NAME

Cause: A NULL parameter was specified for QUEUE_NAME.

Action: Specify a non-NULL queue name.

DIA-25201: invalid value, VISIBILITY should be ON_COMMIT or IMMEDIATE

Cause: An invalid value specified for parameter VISIBILITY.

Action: Specify either ON_COMMIT or IMMEDIATE.

DIA-25202: invalid value NULL, *string* should be non-NULL

Cause: A NULL value was specified for the parameter.

Action: Specify a non-NULL value.

DIA-25203: invalid value *string*, DELAY should be non-negative

Cause: A negative value or NULL was specified for DELAY.

Action: Specify a non negative integer for DELAY.

DIA-25204: invalid value, SEQUENCE_DEVIATION should be BEFORE or TOP

Cause: An invalid SEQUENCE_DEVIATION was specified.

Action: Specify either the option 'BEFORE' or 'TOP'.

DIA-25205: the QUEUE *string.string* does not exist

Cause: The specified queue does not exist.

Action: Create the queue first before specifying it for enqueue or dequeue.

DIA-25206: enqueue failed, enqueue to exception queue *string.string* not permitted

Cause: An attempt was made to enqueue to an exception queue.

Action: Try enqueueing to another queue.

DIA-25207: enqueue failed, queue *string.string* is disabled from enqueueing

Cause: The queue has been stopped to prevent any further enqueueing.

Action: Enable the queue first by using an administrative operation.

DIA-25208: RELATIVE_MSGID must be specified if SEQUENCE_DEVIATION is BEFORE

Cause: A relative message identifier should be specified if sequence deviation is specified as BEFORE.

Action: Either specify an existing relative message identifier or don't specify sequence deviation as BEFORE.

DIA-25209: invalid value *string*, EXPIRATION should be non-negative or NEVER

Cause: The expiration is less than zero or NULL.

Action: Specify a valid value for `expire_after` which should be greater than or equal to zero or NEVER.

DIA-25210: invalid value for RELATIVE_MSGID, no message in queue with that msgid

Cause: No message in the queue with the message ID equal to the specified RELATIVE_MSGID.

Action: Try again with a valid RELATIVE_MSGID.

DIA-25211: invalid DELAY specified when using sequence deviation

Cause: The DELAY specified in the enqueue is greater than the delay of the message with the given relative message id.

Action: Set the DELAY to be less than or equal to the delay of the message with the given relative message id. If the TOP option is used the delay must be less than or equal to the delay of all the messages in the queue.

DIA-25212: invalid PRIORITY specified when using sequence deviation

Cause: The PRIORITY specified in the enqueue is less than the priority of the message with the given relative message id.

Action: Set the PRIORITY to be less than the delay of the message with the given relative message ID. If the TOP option is used, the priority must be greater than or equal to the priority of all the messages in the queue.

DIA-25213: message with specified RELATIVE_MSGID has been dequeued

Cause: The message specified by the RELATIVE_MSGID field in the sequence deviation BEFORE option has been dequeued.

Action: No action required. This is an informational message only.

DIA-25214: cannot specify delay or expiration for enqueue to exception queue

Cause: A message was enqueued to the exception queue with either delay or expiration specified.

Action: Enqueue a message without delay or expiration.

DIA-25215: user_data type and queue type do not match

Cause: A user tries to enqueue an object to a queue that was created for objects of different type.

Action: Try enqueue again with an object of the right type.

DIA-25216: invalid recipient, either NAME or ADDRESS must be specified

Cause: Both attributes, NAME and ADDRESS, were specified null for one of the recipients in the recipient list.

Action: Specify a non-null NAME or ADDRESS for the recipient.

DIA-25217: enqueue failed, visibility must be IMMEDIATE for queue *string.string*

Cause: An attempt was made to enqueue to a non-persistent queue without setting visibility to IMMEDIATE.

Action: Set visibility to IMMEDIATE.

DIA-25218: enqueue failed, delay must be zero for queue *string.string*

Cause: An attempt was made to enqueue to a non-persistent queue with delay greater than zero seconds.

Action: Set delay to zero.

DIA-25219: enqueue failed, sequence deviation not allowed for queue *string.string*

Cause: An attempt was made to enqueue to a non-persistent queue with sequence deviation specified.

Action: Do not specify sequence deviation.

DIA-25220: enqueue failed, signature not specified for a non-repudiable queue

Cause: An attempt was made to enqueue to a non-repudiable queue without specifying the signature

Action: Give the signature

DIA-25221: enqueue failed, signature specified queue not supporting non-repudiation

Cause: An attempt was made to enqueue to a queue specifying the signature for a queue not supporting non-repudiation

Action: Remove the signature

DIA-25222: enqueue failed, complete sender info. not provided for a queue supporting non-repudiation

Cause: An attempt was made to enqueue to a queue without giving the complete sender information (name) for a queue supporting non-repudiation

Action: Provide the sender information

DIA-25223: user_data type used is not supported

Cause: An attempt was made to enqueue data into a non persistent queue that is of a type other than the supported raw or object type.

Action: Enqueue the message again with data of raw or object type.

DIA-25224: sender name must be specified for enqueue into secure queues

Cause: An attempt was made to enqueue into a secure queue without specifying a sender name.

Action: Enqueue the message with sender name specified.

DIA-25225: invalid value *string*, DEQUEUE_MODE should be REMOVE or BROWSE or LOCKED

Cause: An invalid parameter has been specified for DEQUEUE_MODE.

Action: Specify either REMOVE, BROWSE or LOCKED.

DIA-25226: dequeue failed, queue *string.string* is not enabled for dequeue

Cause: The queue has not been enabled for dequeue.

Action: Enable the queue using START_QUEUE.

DIA-25227: Propagation job *string* doesn't exist

Cause: The job doesn't exist in AQ\$_SCHEDULES or cache.

Action: n/a

DIA-25228: timeout or end-of-fetch during message dequeue from *string.string*

Cause: One of the following happened: * The user-specified dequeue wait time passed. * The end of the queue was reached but no message was retrieved. * An external event was set to break the blocking dequeue.

Action: Try dequeue again with the appropriate WAIT_TIME or the FIRST_MESSAGE option.

DIA-25229: error on transformation of message *string string*

Cause: There was an error when transforming a message at enqueue, dequeue or propagation time.

Action: Correct the transformation function.

DIA-25230: invalid value *string*, WAIT should be non-negative

Cause: A negative value has been specified for WAIT.

Action: specify a non negative value or FOREVER.

DIA-25231: cannot dequeue because CONSUMER_NAME not specified

Cause: A user tried to dequeue from a queue that has been created for multiple consumers but a CONSUMER_NAME was not been specified in the dequeue options.

Action: Specify the CONSUMER_NAME in the dequeue options.

DIA-25232: duplicate recipients specified for message

Cause: An enqueue was performed with duplicate queue agents in the recipients parameter.

Action: Remove the duplicate queue agent and retry the call.

DIA-25233: invalid parameter specified for NAVIGATION

Cause: An invalid parameter has been specified for NAVIGATION.

Action: Choose one of FIRST_MESSAGE, NEXT_MESSAGE or NEXT_TRANSACTION. Use FIRST_MESSAGE for dequeuing the first message that satisfies the criterion, NEXT_MESSAGE for dequeuing the next message that satisfies the criterion, and NEXT_TRANSACTION for moving to a set of messages enqueued by another transaction.

DIA-25234: NEXT_TRANSACTION navigation option invalid for queue table *string.string*

Cause: The NEXT_TRANSACTION navigation option was used in a dequeue from a queue in a queue table that was not created for transactional grouping.

Action: Specify either FIRST_MESSAGE or NEXT_MESSAGE as the navigation option. If you want to dequeue messages using transactional grouping create the queue in a queue table that has transactional grouping enabled.

DIA-25235: fetched all messages in current transaction from *string.string*

Cause: The NEXT_TRANSACTION navigation option was used in a dequeue when there were no more messages that belong to the same transaction.

Action: Use the NEXT_TRANSACTION navigation option to move to the next also use the FIRST_MESSAGE option to start from the head of the queue again.

DIA-25236: buffer too small for user data

Cause: The variable or buffer used for the OUT parameter payload was too small for the user data to be dequeued.

Action: Increase the size of the buffer or the size of the variable. The maximum size allowed is 32K.

DIA-25237: navigation option used out of sequence

Cause: The NEXT_MESSAGE or NEXT_TRANSACTION option was specified after dequeuing all the messages.

Action: Reset the dequeuing position using the FIRST_MESSAGE navigation option and then specify the NEXT_MESSAGE or NEXT_TRANSACTION option.

DIA-25238: too many recipients specified for message destination *string*

Cause: An ENQUEUE was performed with more than 32 recipients for the given destination (address).

Action: Reduce the number of recipients to 32 or less, and retry the call.

DIA-25239: message ID not supplied when dequeuing from exception queue *string.string*

Cause: An attempt was made to dequeue from a release 8.0-compatible exception queue without including a message ID in the dequeue options.

Action: Check the application to ensure that the queue name has been specified correctly. If the queue name is correct supply a message ID when dequeuing from a release 8.0-compatible exception queue. Otherwise, upgrade the queue_table containing the queue to release 8.1-compatible using the DBMS_AQADM.MIGRATE_QUEUE_TABLE procedure.

DIA-25240: multiple dequeue criteria specified in dequeue options

Cause: An attempt was made to dequeue by specifying more than one dequeue criteria in the dequeue options. You are permitted to specify either message ID or dequeue condition or correlation ID, or neither.

Action: To dequeue a message, specify a message ID or a dequeue condition or a correlation ID in the dequeue options, but do not specify multiple of them together. If you want to dequeue in the queue's sort order, then do not specify either the message ID or dequeue condition or correlation ID in the dequeue options.

DIA-25241: cannot change correlation ID from *string* to *string* without FIRST_MESSAGE option

Cause: An attempt was made to change the correlation ID while using the NEXT_MESSAGE or NEXT_TRANSACTION option for dequeuing.

Action: To use a correlation ID that is different from the previous dequeue call, reset the dequeuing position by using the FIRST_MESSAGE navigation option.

DIA-25242: cannot change subscriber name from *string* to *string* without FIRST_MESSAGE option

Cause: An attempt was made to change the subscriber name while using the NEXT_MESSAGE or NEXT_TRANSACTION option for dequeuing.

Action: To use a subscriber name that is different from the previous dequeue call, reset the dequeuing position by using the FIRST_MESSAGE navigation option.

DIA-25243: CONSUMER_NAME cannot be specified when dequeuing from exception queue *string.string*

Cause: An attempt was made to dequeue from an exception queue by specifying the CONSUMER_NAME in the dequeue options. CONSUMER_NAME can only be specified when dequeuing from a normal queue created for multiple consumers.

Action: Specify only the message id in the dequeue options to dequeue a message from an exception queue.

DIA-25244: dequeue index key not found, QUEUE *string*, rowid *string*

Cause: An internal error was encountered. There may be an inconsistency in the queue table index.

Action: Contact your Oracle customer support representative. You may need to provide the trace file and information about reproducing the error.

DIA-25245: agent name cannot be specified if address is a single-consumer queue or an exception queue

Cause: The agent name for the agent in the LISTEN call was specified when the agent address was a single-consumer queue or an exception queue.

Action: Do not specify the agent name.

DIA-25246: listen failed, the address *string* is an 8.0 style exception queue

Cause: An 8.0 style exception queue was specified in the agent-list for the LISTEN call.

Action: Specify a normal 8.0 style queue or an 8.1 style queue in the agent-list.

DIA-25247: *string* is not a recipient of specified message

Cause: The consumer name specified in the dequeue options is not a recipient of the message specified by the message id.

Action: Ensure that the agent specified by the consumer name is a recipient of the message specified by the message id.

DIA-25248: duplicate agent specified in the agent list

Cause: An agent was specified more than once in the agent list of the LISTEN call.

Action: Remove the duplicate agent specification(s), and retry the call.

DIA-25249: dequeue failed, dequeue not allowed for queue *string.string*

Cause: An attempt was made to dequeue from a non-persistent queue.

Action: Dequeue from a different queue.

DIA-25250: Cannot specify a remote recipient for the message

Cause: A recipient for the message enqueued to a non-persistent queue had a non-local address.

Action: Do not specify the address field or specify the queue which is the target of the enqueue

DIA-25251: exceeded maximum number of recipients for message

Cause: An attempt was made to issue an ENQUEUE call that exceeded the maximum number (1024) of recipients per message.

Action: Reduce the number of recipients to 1024 or less, and retry the call.

DIA-25252: listen failed, the address *string* is a non-persistent queue

Cause: A non-persistent queue was specified as an address for an agent in the LISTEN call.

Action: Specify a normal queue as address for the agent, and retry the LISTEN call.

DIA-25253: listen failed, queue *string.string* is not enabled for dequeue

Cause: An attempt was made to specify a queue that is not enabled for dequeue in a LISTEN call.

Action: Enable the queue for dequeue using START_QUEUE, and retry the LISTEN call.

DIA-25254: time-out in LISTEN while waiting for a message

Cause: The specified wait time elapsed and there were no messages for any of the agents in the agent-list or an external event was set to break the blocking listen.

Action: Try the LISTEN call with an appropriate time-out.

DIA-25255: incorrect subscription string *string*

Cause: An incorrect subscription string was specified with OCIRegister.

Action: Specify a subscription string using the [CONSUMER:]SCHEMA.QUEUE form.

DIA-25256: consumer cannot be specified with a single-consumer queue or an exception queue

Cause: An attempt was made to specify a consumer in the subscription string when registering for notification on a single-consumer queue or an exception queue.

Action: Do not specify the consumer in the subscription string.

DIA-25257: consumer must be specified with a multi-consumer queue

Cause: An attempt was made to register on a multi-consumer queue without specifying a consumer in the subscription string.

Action: Specify a consumer in the subscription string.

DIA-25258: cannot register for notifications on an 8.0 style exception queue

Cause: An attempt was made to specify an 8.0 style exception queue in the subscription string of OCIRegister.

Action: Specify a normal queue or a non-persistent queue.

DIA-25259: cannot specify protocol for agent

Cause: The user specified the protocol attribute for an agent in the agent list.

Action: Do not specify the protocol attribute of the agent object type.

DIA-25260: AQ latch cleanup testing event

Cause: N/A.

Action: event used for AQ statistics latch cleanup testing.

DIA-25261: JOB_QUEUE_PROCESSES must be at least 2 for AQ propagation

Cause: AQ Propagator encountered a setting for JOB_QUEUE_PROCESSES that is insufficient for AQ propagation.

Action: Set the number of JOB_QUEUE_PROCESSES to at least 2 for AQ propagation.

DIA-25262: agent name cannot be NULL if address is a multi-consumer queue

Cause: The name for the agent in the LISTEN call was not specified when the agent address was a multi-consumer queue.

Action: Specify a non-NULL name for the agent.

DIA-25263: no message in queue *string.string* with message ID *string*

Cause: An attempt was made to dequeue a message with a specific message ID, but no such message exists in the queue.

Action: Try dequeue again with a valid message ID.

DIA-25264: cant get signature for this queue

Cause: An attempt was made to dequeue the signature from this queue, which is not receiver non-repudiable.

Action: Try dequeue again without the get signature option

DIA-25265: specified signature for a queue which does not support receiver non-repudiation

Cause: An attempt was made to dequeue the message from a queue which does not support receiver non-repudiation, but the signature was specified for verification.

Action: Try dequeue again without the signature.

DIA-25266: didnt try to dequeue by message id. with the signature

Cause: The signature was specified for a queue, but the dequeue was not done by message id.

Action: Try dequeue again by message id.

DIA-25267: did not specify the signature for a receiver non-repudiable queue

Cause: The signature was not specified for a receiver non-repudiable queue.

Action: Try dequeue again along with the signature.

DIA-25268: didnt dequeue in browse mode with get signature option

Cause: The dequeue was not performed in browse mode with get signature option

Action: Try dequeue again in browse mode

DIA-25269: cannot specify signature with get signature option

Cause: The signature was not required for the dequeue with the get signature option.

Action: Try dequeue again without the signature in dequeue options.

DIA-25270: sender info does not match with the actual sender of the message

Cause: The sender info. and the message id. do not match

Action: Provide the right sender info. Try dequeue again without the signature in dequeue options

DIA-25271: queue table not found for the given queue

Cause: The queue table does not exist for the given queue

Action: Provide the right queue name

DIA-25272: Signature does not exist for the given reciever and message id.

Cause: Signature does not exist for the given reciever and message id.

Action: Check the message id. and the reciever's information

DIA-25273: AQ QMN process alternate cleanup event

Cause: N/A.

Action: event used for AQ QMN alternate cleanup mode.

DIA-25274: AQ Buffered Queue event

Cause: N/A.

Action: event used for AQ Buffered Queue mode.

DIA-25276: table specified is not a queue table

Cause: An invalid queue table name is specified.

Action: Check the dictionary views to see if the table is a queue table.

DIA-25277: cannot grant or revoke object privilege on release 8.0 compatible queues

Cause: An attempt was made to grant or revoke object privilege on release 8.0 style queues.

Action: Convert the release 8.0 compatible queue table to release 8.1 compatible using DBMS_AQADM.MIGRATE_QUEUE_TABLE before granting or revoking object privilege.

DIA-25278: grantee name cannot be NULL

Cause: An attempt was made to specify NULL for the grantee parameter.

Action: Specify a valid grantee parameter.

DIA-25279: dequeue as select not supported before 8.2

Cause: Dequeue as select not supported before 8.2.

Action: Dont use select condition while dequeuing

DIA-25280: complete sender information not provided to non-repudiate sender

Cause: complete sender information not provided to non-repudiate sender

Action: Provide the complete sender information

DIA-25281: complete reciever information not provided to non-repudiate reciever

Cause: complete reciever information not provided to non-repudiate reciever

Action: Provide the complete reciever information

DIA-25282: message id. not provided for non-repudiation

Cause: message id. was not provided

Action: Provide the message id.

DIA-25283: either agent's name or address needed for non-repudiation

Cause: neither agent's name nor address provided for non-repudiation"

Action: Provide the agent info.

DIA-25284: Invalid value *string* for *string*

Cause: An Invalid value or NULL was specified for the parameter.

Action: Check the documentation for valid values.

DIA-25285: Invalid value *string* for *array_mode*

Cause: An Invalid value or NULL was specified for the *array_mode*.

Action: Check the documentation for valid values.

DIA-25286: Invalid number of elements in the message properties array

Cause: Number of elements in the message properties array do not match the number of elements in the payload array.

Action: Create a message property array with one element (that applies for all the elements in the payload array) or create a message property array with the same number of elements as there are in the payload array.

DIA-25287: Invalid value *string*, *string* should be non-negative

Cause: An Invalid value or NULL was specified for the parameter.

Action: Specify a non negative integer.

DIA-25288: AQ HTTP propagation encountered error, status-code *number*, *string*

Cause: AQ propagation's HTTP request to the propagation servlet at the specified address encountered an error

Action: Specify a valid address in the connect string of the propagation destination dblink, the dblink user has the correct permissions, check if the AQ propagation servlet was properly installed.

DIA-25289: Buffer Already Exists

Cause: Buffer already exists for the specified queue.

Action: None

DIA-25290: Cannot complete operation on queue *string* with existing messages

Cause: Queue already has messages. Cannot complete operation

Action: Truncate the queue before adding/dropping a buffer

DIA-25291: Buffer does not exist for the specified queue

Cause: Buffer does not exist for the specified queue

Action: Operation on the buffer cannot be performed. create the buffer

DIA-25292: Buffer operations are not supported on the queue

Cause: Buffer operations are not supported on the specified queue type

Action: Buffered operations are only supported on to 8.1 style queues, which do not have transaction grouping.

DIA-25293: Lob attributes must be null for buffered operations

Cause: Enqueue of a buffered message with a non-null lob attribute was attempted

Action: Set the lob attributes to null before enqueueing the buffered message

DIA-25294: Cannot propagate user buffered messages to a database with version lower than 10.2

Cause: Propagation of user buffered messages was attempted to a database with version lower than 10.2.

Action: Do not propagate buffered messages to the database.

DIA-25295: Subscriber is not allowed to dequeue buffered messages

Cause: Subscriber is only allowed to dequeue persistent messages

Action: Drop the subscriber and re-create it, or dequeue only persistent messages for the subscriber

DIA-25296: Queue Table *string* has a buffered queue *string*

Cause: Buffered message was enqueueued by specifying delay or sequence deviation.

Action: Do not specify delay or sequence deviation when enqueueing buffered messages.

DIA-25298: Only immediate visibility mode supported for buffered message enqueue or dequeue

Cause: A visibility of `dbms_aq.ON_COMMIT` was supplied with the buffered message enqueue or dequeue

Action: Supply a visibility of `dbms_aq.IMMEDIATE`

DIA-25299: Invalid message delivery_mode

Cause: Invalid value was specified for delivery mode

Action: Specify `dbms_aq.BUFFERED` or `dbms_aq.PERSISTENT` during Enqueue or `dbms_aq.BUFFERED`, `dbms_aq.PERSISTENT` or `dbms_aq.PERSISTENT_OR_BUFFERED` during Dequeue and Listen.

DIA-25300: Cannot drop buffer for queue with buffered subscribers

Cause: Cannot drop buffer for queue with buffered subscribers

Action: Either drop buffered subscribers or forcibly drop the buffer

DIA-25301: Cannot enqueue or dequeue user buffered messages to a database with version lower than 10.2

Cause: Enqueue or dequeue of user buffered messages was attempted to queues in a database with version lower than 10.2.

Action: Do not attempt to enqueue or dequeue user buffered messages.

DIA-25302: Operation not possible for non-buffered queue *string*

Cause: Last enqd/ackd message is only supported for buffered queues

Action: The operation is not supported.

DIA-25303: Buffered operation allowed only on the owner instance

Cause: Operation was not performed on the owner instance.

Action: Perform operation on the owner instance.

DIA-25304: Cannot use priority order queues for capture LCRs

Cause: Capture LCRs can only use commit time or enqueue time ordered queues.

Action: Use the appropriate type of queue for captured LCRs.

DIA-25305: enqueue failed, expiration must be zero for queue *string.string*

Cause: An attempt was made to enqueue to a buffered queue with expiration greater than zero seconds.

Action: Set expiration to zero.

DIA-25306: Cannot connect to buffered queue's owner instance

Cause: cannot connect to the owner instance of the buffered queue

Action: set listener information in REMOTE_LISTENERS or LOCAL_LISTENERS initialization parameter.

DIA-25307: Enqueue rate too high, flow control enabled

Cause: Subscribers could not keep pace with the enqueue rate.

Action: Try enqueue after waiting for some time.

DIA-25310: Subscriber is Notification only; dequeue not supported

Cause: Notification only subscribers are not allowed to dequeue.

Action: Recreate subscriber if necessary.

DIA-25311: *string* not supported for non-persistent queue

Cause: Specified QOS is not supported for non-persistent queues.

Action: Specify the right QOS.

DIA-25312: Cannot specify nonzero sender protocol

Cause: Sender protocol was specified during an enqueue operation.

Action: Specify the enqueue sender protocol as null or zero.

DIA-25313: a queue may not subscribe to itself for propagation

Cause: The specified subscriber had a NULL name and an address equal to the queue name.

Action: Provide a valid subscriber and retry the operation.

DIA-25314: a commit-time queue table cannot be migrated to 8.0

Cause: An attempt was made to migrate a commit-time queue table to an unsupported compatibility level.

Action: Provide an appropriate compatibility level, and retry the operation.

DIA-25315: unsupported configuration for propagation of buffered messages

Cause: An attempt was made to propagate buffered messages with the database link pointing to an instance in the destination database which is not the owner instance of the destination queue.

Action: Use queue to queue propagation for buffered messages.

DIA-25316: Late in the current transaction to begin an Enqueue/Dequeue operation

Cause: Check if the Enqueue/Dequeue operation is performed via triggers on Materialized Views which isn't supported.

Action: Triggers on materialized views aren't supported. Workarounds are on-demand materialized views or execution of trigger code within an autonomous txn.

DIA-25317: Propagation stopped because of instance shutdown

Cause: A propagation job has stopped because the instance is shutting down.

Action: No user action is required.

DIA-25318: Propagation stopped because of instance affinity change

Cause: A propagation job has stopped because its instance affinity has changed.

Action: No user action is required. The job will restart on the appropriate instance.

DIA-25319: Queue table repartitioning aborted

Cause: During instance restart in an Oracle RAC environment, queue table repartitioning aborted due to errors.

Action: Look at the incident generated for this error and report the problem to Oracle Support Services.

DIA-25320: Failed to create, alter, or remove Subscriber

Cause: There is a pending enqueue or dequeue operation on this queue from the same session.

Action: Either COMMIT or ROLLBACK pending enqueue or dequeue operation before attempting to create, alter, or remove the subscriber.

DIA-25321: enqueue failed, user property specified but queue *string.string* is not an 8.1 style queue

Cause: user properties can only be specified when enqueueing into 8.1 style queues.

Action: Specify an 8.1 style queue or pass user property as NULL.

DIA-25322: message priority is out of range

Cause: The message priority range of 0 to 9 was exceeded.

Action: Set the message priority in the range of 0 to 9.

DIA-25323: incorrect input to the seek call - *string*

Cause: Some fields in one or more elements of the input array were incorrect.

Action: Correct the fields of the specified elements.

DIA-25324: The seek requested by element *string* of input array can skip a message that is not dequeued in shard *string*.

Cause: An attempt was made to skip a message that was not dequeued.

Action: Set the SKIP_OPTION in the seek call to NO_DISCARD_SKIPPED or DISCARD_SKIPPED and retry the seek operation.

DIA-25325: The *string* field of queue properties is incorrect.

Cause: Invalid input in the queue properties was specified.

Action: Correct the specified field in the queue properties.

DIA-25326: Array *string* operation failed for message at index *string*

Cause: Array operation fails for the message at specified index. Look at the remainder of the error stack to see what the problem was.

Action: Fix cause of error and retry array operation.

DIA-25327: Array size is invalid

Cause: Array size must be a positive, non-zero integer.

Action: Use corrected array size and retry array operation.

DIA-25328: *string* argument size *string* is smaller than array size

Cause: The size of the argument is smaller than the given array size.

Action: Lower array size or use a larger sized input argument.

DIA-25329: AQ array operations not allowed on 8.0 queues

Cause: An array enqueue/dequeue was attempted on an 8.0 queue.

Action: Use single enqueue/dequeue with this queue.

DIA-25330: PL/SQL associative arrays may not be used with AQ array operations

Cause: A PL/SQL associative array was provided for the payload parameter in an enqueue/dequeue array operation.

Action: Use VARRAY or NESTED TABLE types with AQ array operations.

DIA-25331: cannot downgrade because there are commit-time queue tables

Cause: An attempt was made to downgrade a database that has commit-time queue tables.

Action: Drop all commit-time queue tables before attempting the downgrade.

DIA-25332: Invalid release value *string* for queue table compatible parameter

Cause: The release level given for the queue table compatible parameter is invalid

Action: Specify a valid release value for the queue table compatible parameter

DIA-25333: Buffered Queue to Queue propagation did not connect to the correct instance

Cause: Queue to Queue propagation for buffered messages didn't connect to the correct instance, most likely because service was not started for the destination queue.

Action: No user action is required. Propagation will start the service for the destination queue and retry.

DIA-25334: Buffered propagation must restart as the destination queue was recreated/moved

Cause: Buffered propagation destination queue was recreated or its ownership was moved to another instance during propagation.

Action: No user action is required. Propagation will reinitialize its metadata and retry.

DIA-25335: AQ array operations not allowed for buffered messages

Cause: An array enqueue/dequeue was attempted for buffered messages

Action: Use single enqueue/dequeue for buffered messages or an array size of one.

DIA-25336: Cannot contact instance *string* during Streams AQ operation

Cause: The specified instance was not responding to AQ requests.

Action: Set parameter `aq_tm_processes` to a non-zero value. If the problem persists, contact Oracle Support Services.

DIA-25337: Cannot propagate in queue-to-queue mode to a database with version lower than 10.2

Cause: Remote subscriber with `queue_to_queue` mode set to TRUE was added. The remote subscriber is on a database version lower than 10.2. Propagation was scheduled to a destination database with version lower than 10.2.

Action: Remove the remote subscriber with `queue_to_queue` mode and add the subscriber back with `queue_to_queue` set to FALSE. Unschedule the queue-to-queue propagation and schedule propagation in queue-to-dblink mode.

DIA-25338: operation '*string*' is not allowed for sync_capture '*string*'

Cause: An attempt was made to execute the specified operation for a `sync_capture` process.

Action: Remove the offending call.

DIA-25339: STREAMS '*string*' must be sync_capture

Cause: The specified capture STREAMS did not exist or was not a `sync_capture` process.

Action: Remove the offending call.

DIA-25340: must use commit-time queue for sync_capture

Cause: An attempt was made to create a `sync_capture` without using a commit-time queue.

Action: Rerun statement with a commit-time queue.

DIA-25341: sync_capture does not support "string"."string" because of the following reason:

Cause: sync_capture encountered a table with an unsupported property. The most common reason is an unsupported column data type.

Action: Revise the Capture rules to skip over the table in question. One option is to remove the rule that captures changes from the unsupported table. Check DBA_STREAMS_TABLE_RULES to determine the rule on the table specified in the error. Also query the DBA_STREAMS_UNSUPPORTED view to determine which tables are not supported by STREAMS and for what reason. For potential workarounds to certain unsupported properties, see Metalink.

DIA-25342: cannot downgrade because there are apply processes for user buffered messages

Cause: An attempt was made to downgrade a database that has apply process for user-buffered messages.

Action: Drop all the apply processes for user-buffered messages before attempting the downgrade.

DIA-25343: Streams error queue cannot be exported

Cause: An attempt was made to export a database that has apply errors.

Action: Delete or reexecute errors before attempting the export.

DIA-25344: statement has bind variables

Cause: Current API could not handle a statement with bind variables.

Action: Use alternative API which handles bind variables.

DIA-25345: requested AQ minimum Oracle Streams Pool size *string* greater than Oracle Streams Pool size *string*

Cause: The minimum value requested for the Oracle Streams Advanced Queuing (AQ) pool size was greater than the Oracle Streams pool size.

Action: Set the minimum value for the Oracle Streams AQ pool size to less than or equal to the Oracle Streams pool size.

DIA-25346: requested AQ maximum Oracle Streams Pool size *string* less than AQ minimum Oracle Streams Pool size *string*

Cause: The maximum value requested for the Oracle Streams Advanced Queuing (AQ) pool size was less than the minimum value of the Oracle Streams (AQ) pool size.

Action: Set the maximum value for the Oracle Streams AQ pool size to greater than or equal to the minimum value of the Oracle Streams AQ pool size.

DIA-25347: Dequeue operation on sharded queue is not possible.

Cause: Dequeue of a buffered subscriber or JMS sharded queue failed with OCIAQDeq().

Action: Use OCIAQDeq2() for buffered subscribers and JMS sharded queues.

DIA-25348: cannot connect to shard owner instance *string* of database *string*

Cause: An Oracle Advanced Queuing (AQ) operation was attempted at a non-owner instance of the shard which could not establish an internal connection to it.

Action: Set the listener information in the REMOTE_LISTENERS or LOCAL_LISTENERS initialization parameter. If the REMOTE_LISTENERS or LOCAL_LISTENERS initialization parameter is already set, then retry the operation from the suggested owner instance.

DIA-25349: A parallel *string* operation is in progress for *string*.

Cause: An Oracle Database Advanced Queuing (AQ) operation was attempted when another parallel operation seek, enqueue, or dequeue was already in progress.

Action: Retry the operation again after the parallel operation is over.

DIA-25350: maximum number of concurrent transaction branches exceeded

Cause: the limit on the number of concurrent transaction branches has been reached

Action: Increase the INIT.ORA parameter 'transactions' and restart the system.

DIA-25351: transaction is currently in use

Cause: The transaction is currently used by a different session.

Action: Do not switch to a transaction attached to some other session.

DIA-25352: no current transaction

Cause: The user session is not attached to any transaction.

Action: Do not attempt to detach when there is no current transaction.

DIA-25353: branch marked for deletion

Cause: The branch specified cannot be killed immediately because another session is using the branch, but it has been marked for kill. This means it will be deleted as soon as possible after the current uninterruptable operation is completed.

Action: No action is required for the branch to be deleted.

DIA-25400: must replay fetch

Cause: A failure occurred since the last fetch on this statement. Failover was able to bring the statement to its original state to allow continued fetches.

Action: This is an internally used error message and should not be seen by the user.

DIA-25401: can not continue fetches

Cause: A failure occurred since the last fetch on this statement. Failover was unable to bring the statement to its original state to allow continued fetches.

Action: Reexecute the statement and start fetching from the beginning

DIA-25402: transaction must roll back

Cause: A failure occurred while a transaction was active on this connection.

Action: The client must roll back.

DIA-25403: could not reconnect

Cause: The connection to the database has been lost, and attempts to reconnect have failed.

Action: Manually reconnect.

DIA-25404: lost instance

Cause: The primary instance has died.

Action: This is an internally used error message and should not be seen by the user.

DIA-25405: transaction status unknown

Cause: A failure occurred while a transaction was attempting to commit. Failover could not automatically determine instance status.

Action: The user must determine the transaction's status manually.

DIA-25406: could not generate a connect address

Cause: Failover was unable to generate an address for a backup instance.

Action: Contact Oracle customer support.

DIA-25407: connection terminated

Cause: The connection was lost while doing a fetch.

Action: This is an internally used error message and should not be seen by the user.

DIA-25408: can not safely replay call

Cause: The connection was lost while doing this call. It may not be safe to replay it after failover.

Action: Check to see if the results of the call have taken place, and then replay it if desired.

DIA-25409: failover happened during the network operation,cannot continue

Cause: The connection was lost when fetching a LOB column.

Action: Failover happened when fetching LOB data directly or indirectly. Please replay the top level statement.

DIA-25410: Application requested failover retry

Cause: The application failover callback requested failover retry.

Action: None. Informational only.

DIA-25411: transaction replay was not successful

Cause: Replay was not able to restore the transaction state to match the pre-failover state.

Action: Manually determine if it is safe to resubmit the transaction.

DIA-25412: transaction replay disabled by call to *string*

Cause: The application called an Oracle Call Interface (OCI) function that is not supported with transactional failover.

Action: Manually recover the pending transaction.

DIA-25413: transaction replay disabled by user request

Cause: The application explicitly disabled transaction replay by setting attribute OCI_ATTR_TRANSACTIONAL_TAF=FALSE.

Action: This message is informational only.

DIA-25414: Uncommitted transaction detected after TAF callback.

Cause: The Transparent Application Failover (TAF) callback started a transaction and did not commit or rollback prior to exiting.

Action: End the transaction with a COMMIT or a ROLLBACK prior to exiting the TAF callback.

DIA-25415: Application Continuity replay initiation timeout exceeded.

Cause: Application Continuity replay was attempted after REPLAY_INITIATION_TIMEOUT expired. The value for REPLAY_INITIATION_TIMEOUT is configured for the service to which the application is connected.

Action: Manually recover the pending transaction.

DIA-25416: Retry current call

Cause: Failover successfully recovered an in-flight transaction.

Action: Re-execute the current call.

DIA-25417: replay disabled; call (*string*) too large to record

Cause: Oracle Call Interface (OCI) Application Continuity replay was attempted after a large call that could not be recorded due to excessive memory requirements.

Action: Break up the call into smaller pieces and retry failover, or manually retry the user operation.

DIA-25418: transaction replay disabled by the use of object type in function *string*

Cause: The application used an Oracle Call Interface (OCI) object type that is not supported with transactional failover.

Action: Manually recover the pending transaction.

DIA-25419: transaction replay disabled in function *string* by the use of unsupported type *string*

Cause: The application used an Oracle Call Interface (OCI) type that is not supported with transactional failover.

Action: Manually recover the pending transaction.

DIA-25420: more than *number* non-fetch calls in request; replay disabled

Cause: Application Continuity failover was attempted after executing a request with a large number of Oracle Call Interface (OCI) calls, so replay of the request was not possible.

Action: Resubmit and consider partitioning application work into more requests with fewer OCI calls in each request.

DIA-25421: more than *number* fetch calls in request; replay disabled

Cause: Application Continuity failover was attempted after executing a request with a large number of Oracle Call Interface (OCI) Fetch calls, so replay of the request was not possible.

Action: Resubmit and consider partitioning application work into more requests with fewer OCI calls in each request.

DIA-25422: more than *number* cursor calls in request; replay disabled

Cause: Application Continuity failover was attempted after executing a request with a large number of Oracle Call Interface (OCI) OCISstmtPrepare2 calls, so replay of the request was not possible.

Action: Resubmit and consider partitioning application work into more requests with fewer OCI calls in each request.

DIA-25425: connection lost during rollback

Cause: The connection was lost while issuing a rollback and the application failed over.

Action: The connection was lost and failover happened during rollback. If the transaction is not externally coordinated, then Oracle implicitly rolled back, so no action is required. Otherwise examine pending_trans\$ to determine if "rollback force" is required.

DIA-25426: remote instance does not support shared dblinks

Cause: A shared dblink is being used to connect to a remote instance that does not support this feature because it is an older version.

Action: Use a normal dblink if you need to connect to this instance.

DIA-25427: cannot downgrade database links after database link data dictionary has been upgraded

Cause: An attempt was made to downgrade after the upgrade of the database link data dictionary.

Action: Drop the database links before attempting the downgrade.

DIA-25428: authentication failure while connecting through database link

Cause: An attempt to connect using the database link failed.

Action: Ensure connection details for the database link are correct.

DIA-25429: Break request cannot be propagated over shared database link.

Cause: No call in progress over shared database link.

Action: No action required. This is an informational message only.

DIA-25430: connected user database links are not supported in proxy session

Cause: A connected user database link is being used to connect to a remote database from a proxy user session.

Action: No action required. This was an informational message only.

DIA-25431: Connection with protocol *string* is disallowed by the outbound_dblink_protocols parameter.

Cause: An attempt to connect using the database link failed because the network protocol used for the database link is disallowed.

Action: Either set the value of the outbound_dblink_protocols initialization parameter appropriately to include the required protocol or change the protocol used by the database link to conform to the protocols allowed by the outbound_dblink_protocols parameter.

DIA-25433: User *string* does not have INHERIT REMOTE PRIVILEGES privilege on connected user *string*.

Cause: An attempt was made to use a connected user database link inside a definer's rights function, procedure or view, and the owner of the function, procedure or view lacked INHERIT REMOTE PRIVILEGES privilege on the connected user.

Action: Either do not start the function, procedure or view, or grant the owner of the function, procedure or view INHERIT REMOTE PRIVILEGES privilege on the connected user.

DIA-25434: Connected user database link usage by the common user *string* is not allowed.

Cause: The COMMON_SCHEMA_ACCESS lockdown profile feature was disabled.

Action: Either do not use the database link as a common user or have the administrator enable COMMON_SCHEMA_ACCESS lockdown profile feature.

DIA-25435: Database link cannot be used after failing over with Transparent Application Continuity.

Cause: The use of database link was detected in the failed-over session while Transparent Application Continuity was in use.

Action: Consider whether the application can use Transaction mode of Application Continuity that supports failover with database links. (Use FAILOVER_TYPE=TRANSACTION). Use Fast Application Notification with Oracle connection pools for planned maintenance.

DIA-25436: invalid table alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the table values specified had an invalid alias.

Action: Check the valid table aliases in the evaluation context, and try again with a valid alias.

DIA-25437: duplicate table value for table alias: *string*

Cause: An attempt to evaluate was made, which failed because some of the table values specified had the same table alias.

Action: Check the table values specified, and try again with only one value per table.

DIA-25438: invalid variable name: *string*

Cause: An attempt to evaluate was made, which failed because one of the variable values specified had an invalid name.

Action: Check the valid variable names in the evaluation context, and try again with a valid name.

DIA-25439: duplicate variable value for variable: *string*

Cause: An attempt to evaluate was made, which failed because some of the variable values specified had the same variable name.

Action: Check the variable names specified, and try again with only one value per variable.

DIA-25440: invalid table alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the column values specified had an invalid table alias.

Action: Check the valid table aliases in the evaluation context, and try again with a valid name.

DIA-25441: duplicate column value for table alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the column values supplied a value for a table alias, which already had a table value supplied.

Action: Check the table and column values specified, and try again with either a table value or column values for each table alias.

DIA-25442: too many column values for table alias: *string*

Cause: An attempt to evaluate was made, which failed because too many column values were supplied for the specified table alias.

Action: Check the column values specified, and try again with the right number of column values.

DIA-25443: duplicate column value for table alias: *string*, column number: *string*

Cause: An attempt to evaluate was made, which failed because duplicate column values were supplied for the specified table alias and column number.

Action: Check the column values specified, and try again with only one column value for each table alias, and column number.

DIA-25444: invalid ROWID: *string* for table alias: *string*

Cause: An attempt to evaluate was made, which failed because an invalid ROWID was supplied for the specified table alias.

Action: Check the column values specified, and try again with only one column value for each table alias, and column number.

DIA-25445: invalid column number: *string* for table alias: *string*

Cause: An attempt to evaluate was made, which failed because an invalid column number was supplied for the specified table alias as a part of a column value.

Action: Check the column values specified, and try again with a valid column number.

DIA-25446: duplicate column value for table alias: *string*, column: *string*

Cause: An attempt to evaluate was made, which failed because duplicate column values were supplied for the specified table alias and column name.

Action: Check the column values specified, and try again with only one column value for each table alias, and column name.

DIA-25447: encountered errors during evaluation of rule *string.string*

Cause: An attempt to evaluate was made, which failed during the evaluation of the specified rule.

Action: Check the rule and the values passed to evaluate, and try again with valid values.

DIA-25448: The *string string.string* has errors.

Cause: An attempt to load the specified rule or expression failed due to errors in the rule or expression.

Action: Check the rule or expression and retry the operation.

DIA-25449: invalid variable name: *string*

Cause: An attempt to evaluate was made, which failed because one of the attribute values specified had an invalid variable name.

Action: Check the valid variable names in the evaluation context, and try again with a valid name.

DIA-25450: error *string* during evaluation of rule set *string.string*

Cause: The specified error occurred during evaluation of the rule set.

Action: Check the error and take appropriate action.

DIA-25451: too many attribute values for variable: *string*

Cause: An attempt to evaluate was made, which failed because too many attribute values were supplied for the specified variable.

Action: Check the attribute values specified, and try again with the right number of attribute values.

DIA-25452: duplicate attribute value for variable: *string*, attribute: *string*

Cause: An attempt to evaluate was made, which failed because duplicate attribute values were supplied for the specified variable and attribute name.

Action: Check the attribute values specified, and try again with only one attribute value for each variable, and attribute name.

DIA-25453: invalid iterator: *string*

Cause: An attempt to get rule hits or to close an iterator was made, which failed because an invalid iterator was passed in.

Action: Check the iterator, and try again with a valid iterator.

DIA-25454: error during evaluation of rule set: *string.string* for iterator: *string*

Cause: An attempt to get rule hits for an iterator was made, which failed because of an error in evaluation of the specified rule set.

Action: Check the validity of the rule set and try again.

DIA-25455: evaluation error for rule set: *string.string*, evaluation context: *string.string*

Cause: An attempt to evaluate the specified rule set using the evaluation context specified failed due to some errors.

Action: Check additional errors signalled to determine the problem.

DIA-25456: rule set was modified or evaluation terminated for iterator: *string*

Cause: An attempt to get rule hits was made, which failed because the underlying rule set was modified after the iterator was returned.

Action: Try again after re-evaluating the rule set.

DIA-25457: evaluation function *string* returns failure

Cause: The specified evaluation function returned a failure during evaluation, causing evaluation to terminate.

Action: Check arguments to evaluate and retry.

DIA-25458: Value not supplied for *string string*

Cause: Variable or table column values were not supplied for evaluation.

Action: Supply all the required variable and column data points for Independent Expression Evaluation.

DIA-25459: Data conversion for *string string* failed

Cause: The attempt to convert data to the data type of the variable or column failed.

Action: Supply the correct data for variable or column.

DIA-25461: rule set not specified

Cause: An attempt to evaluate was made, which failed because the ruleset name specified was null.

Action: Check the rule set name, and try again with a valid name.

DIA-25462: evaluation context not specified

Cause: An attempt to evaluate was made, which failed because the evaluation context specified was null.

Action: Check the evaluation context name, and try again with a valid name.

DIA-25463: table alias not specified

Cause: An attempt to evaluate was made, which failed because one of the table values specified had a NULL alias name.

Action: Check the list of table values, and try again with a valid alias name.

DIA-25464: ROWID not specified for table alias: *string*

Cause: An attempt to evaluate was made, which failed because the table value for the specified table alias had a NULL ROWID.

Action: Check the list of table values, and try again with a valid ROWID.

DIA-25465: variable name not specified

Cause: An attempt to evaluate was made, which failed because one of the variable values specified had a NULL variable name.

Action: Check the list of variable values, and try again with a valid variable name.

DIA-25466: data not specified for variable name: *string*

Cause: An attempt to evaluate was made, which failed because the variable value for the specified variable name had NULL data.

Action: Check the list of variable values, and try again with valid data.

DIA-25467: table alias not specified

Cause: An attempt to evaluate was made, which failed because one of the column values specified had a NULL alias name.

Action: Check the list of column values, and try again with a valid alias name.

DIA-25468: column name not specified for alias: *string*

Cause: An attempt to evaluate was made, which failed because one of the column values for the specified alias name had a NULL column name.

Action: Check the list of column values, and try again with a valid column name.

DIA-25469: data not specified for alias: *string* column name: *string*

Cause: An attempt to evaluate was made, which failed because the column value for the specified alias and column name had NULL data.

Action: Check the list of column values, and try again with valid data.

DIA-25470: duplicate attribute value for variable: *string*

Cause: An attempt to evaluate was made, which failed because one of the attribute values supplied a value for a variable, which already had a variable value supplied.

Action: Check the variable and attribute values specified, and try again with either a variable value or attribute values for each variable.

DIA-25471: attribute name not specified for variable: *string*

Cause: An attempt to evaluate was made, which failed because one of the attribute values for the specified variable had a NULL attribute name.

Action: Check the list of attribute values, and try again with a valid attribute name.

DIA-25472: maximum open iterators exceeded

Cause: The open rule hit iterators in the session exceeded $2 * OPEN_CURSORS$.

Action: Close some rule hit iterators.

DIA-25473: cannot store *string* in rule action context

Cause: The user attempted to put unsupported data types, such as LOBs and evolved ADTs, into the rule action context.

Action: Use only supported data types in rule action context.

DIA-25476: use pre-5523578 behaviour when looking up enabled roles

Cause: N/A

Action: Derive the enabled roles under the rules engine using the old method that existed before the fix to bug 5523578.

DIA-25477: hot cursor limit reached: *string*

Cause: An attempt to mark a cursor as hot failed because maximum number of allowable cursors were marked hot.

Action: Unmark any other hot cursor using `dbms_shared_pool.unmarkhot` and retry operation.

DIA-25500: database is not open

Cause: Database must be open to perform ALTER SYSTEM QUIESCE RESTRICTED command.

Action: Open the database and retry this command.

DIA-25501: ALTER SYSTEM QUIESCE RESTRICTED command failed

Cause: Database resource manager failed to change plan.

Action: Look at the alert logs to see detailed description of the error.

DIA-25502: concurrent ALTER SYSTEM QUIESCE/UNQUIESCE command is running

Cause: There is a concurrent ALTER SYSTEM QUIESCE RESTRICTED or ALTER SYSTEM UNQUIESCE command running in the system.

Action: Contact the database administrator who is responsible for the concurrent command.

DIA-25503: cannot open database because the database is being quiesced

Cause: Database cannot be opened because the system is being or has been quiesced.

Action: Open the database after the system has been quiesced.

DIA-25504: the system is already in quiesced state

Cause: Cannot quiesce the system because the system is already quiesced.

Action: n/a

DIA-25505: the system is not in quiesced state

Cause: Cannot unquiesce the system because the system is not in quiesced state.

Action: n/a

DIA-25506: resource manager has not been continuously on in some instances

Cause: Cannot quiesce the system because resource manager has not been continuously on since startup in this or some other instances.

Action: n/a

DIA-25507: resource manager has not been continuously on

Cause: Cannot quiesce the system because resource manager has not been continuously on since startup.

Action: n/a

DIA-25508: database is not mounted

Cause: Database must be mounted to perform ALTER SYSTEM UNQUIESCE command.

Action: Mount the database and retry this command.

DIA-25509: operation on "*string*".*string*.*string* not allowed

Cause: A column has been added to a replicated table, but replication support processing has not completed.

Action: Wait until replication support processing has completed before updating the column

DIA-25510: quiesce not supported for the root container

Cause: Could not quiesce the root container.

Action: This operation is not supported for the root container.

DIA-25511: quiesce not supported for pluggable databases

Cause: Could not quiesce the pluggable database.

Action: This operation is not supported for pluggable databases.

DIA-25526: bad format of `_DB_MTTTR_SIM_TARGET`: *string*

Cause: One value in `_DB_MTTTR_SIM_TARGET` is not a valid MTTR.

Action: Alter the value of `_DB_MTTTR_SIM_TARGET`.

DIA-25527: bad format of `_DB_MTTTR_SIM_TARGET`

Cause: One value in `_DB_MTTTR_SIM_TARGET` is empty.

Action: Set the value of `_DB_MTTTR_SIM_TARGET` properly.

DIA-25528: too many candidate MTTRs are specified in `_DB_MTTTR_SIM_TARGET`

Cause: Too many candidate MTTRs are specified in `_DB_MTTTR_SIM_TARGET`.

Action: Alter the value of `_DB_MTTTR_SIM_TARGET`.

DIA-25530: `FAST_START_MTTTR_TARGET` is not specified

Cause: An attempt to start MTTR advisory was made, which failed because `FAST_START_MTTTR_TARGET` was not specified.

Action: Set `FAST_START_MTTTR_TARGET`.

DIA-25531: MTTR specified is too small: *string*

Cause: The current `FAST_START_MTTTR_TARGET` setting or a candidate MTTR setting is too small for MTTR advisory.

Action: Set a larger `FAST_START_MTTTR_TARGET` or candidate MTTR.

DIA-25532: MTTR specified is too large: *string*

Cause: The current `FAST_START_MTTTR_TARGET` setting or a candidate MTTR setting is too large for MTTR advisory.

Action: Set a smaller `FAST_START_MTTTR_TARGET` or candidate MTTR.

DIA-25533: `FAST_START_IO_TARGET` or `LOG_CHECKPOINT_INTERVAL` is specified

Cause: An attempt to start MTTR advisory was made, which failed because either `FAST_START_IO_TARGET` or `LOG_CHECKPOINT_INTERVAL` was specified.

Action: Set `FAST_START_IO_TARGET` and `LOG_CHECKPOINT_INTERVAL` to 0.

DIA-25551: process not initialized in threaded mode

Cause: OCI process started without threaded mode.

Action: Specify `OCI_THREADED` mode when calling `OCIEnvCreate()`/
`OCIEnvNLSCreate()`.

DIA-25600: Invalid shard: *string*

Cause: An invalid shard ID was specified.

Action: Specify valid shard and retry the queueing operation.

DIA-25601: Maximum number of shards are already created for the queue *string.string*

Cause: Maximum number of shards were already created.

Action: Please review SHARD_NUM and SHARD_MAX parameters of the queue using GET_QUEUE_PARAMETER and SET_QUEUE_PARAMETER API.

DIA-25602: Migration is already running on the queue *string.string*.

Cause: INIT_MIGRATION is already executed on the queue.

Action: Do not call the API twice.

DIA-25603: Migration has not started on the queue *string.string*.

Cause: INIT_MIGRATION API was not called on the queue.

Action: Call INIT_MIGRATION API first to initiate the migration.

DIA-25604: Migration can only run on classic queue and queue *string.string* is not classic queue.

Cause: Migration API input parameter was not a classic queue.

Action: Insert a valid classic queue as an input parameter to the migration API.

DIA-25605: Migration cannot run because *string* feature is unsupported in Transactional Event Queues.

Cause: The migration API captured the unsupported feature.

Action: Review the unsupported feature details from the migration status table and call the API again.

DIA-25606: This operation is restricted because migration is ongoing.

Cause: This operation was restricted because the migration operation was running.

Action: Process this operation after migration is completed.

DIA-25607: cannot execute *string* migration because *string* is not empty. You can use PURGE_QUEUE_MESSAGES API

Cause: The queue was not empty.

Action: Either consume messages in the queue using dequeue API or use PURGE_QUEUE_MESSAGES API to drain the messages.

DIA-25608: wrong value entered for *string* input parameter

Cause: The input parameter was not in the valid range.

Action: Choose a valid input parameter value.

DIA-25609: switch queue code path for migration routing

Cause: JDBC layer managed the routing.

Action: No action is needed; used for internal switching.

DIA-25610: cannot assign same Transactional Event Queue name to multiple migration queues

Cause: Either CQNAME was not specified, or TEQNAME was specified in the INIT_MIGRATION API call.

Action: Either specify CQNAME or do not specify TEQNAME.

DIA-25700: Current configuration does not use Transport Layer Security (TLS). Token based authentication requires TLS with server authentication.

Cause: An attempt was made to authenticate a user from an external Identity Provider to Oracle Database using unsecured channel.

Action: Change the protocol used for connecting to Oracle Database to TLS.

DIA-25702: Role mapping for IAM_PRINCIPAL_NAME is not supported.

Cause: An attempt was made to map role to IAM_PRINCIPAL_NAME.

Action: Create shared role mapping to IAM_GROUP_NAME.

DIA-25704: Current configuration does not use SSL_SERVER_DN_MATCH=TRUE. Token based authentication requires SSL_SERVER_DN_MATCH=TRUE with server authentication.

Cause: An attempt was made to authenticate a user from an external Identity Provider to Oracle Database using SSL_SERVER_DN_MATCH=FALSE.

Action: Change SSL_SERVER_DN_MATCH used for connecting to Oracle Database to true.

DIA-25705: Schema *string* doesn't exist.

Cause: An attempt was made to grant schema privileges on a schema which did not exist.

Action: Ensure that the schema specified in ON SCHEMA exists.

DIA-25707: The token is invalid.

Cause: An attempt was made to authenticate a user from an external Identity Provider to Oracle Database using an invalid token.

Action: Request a new token and try again. If the new token also returns this error, check with your IT help desk for the correct process to request a database access token.

DIA-25708: The expiration time of the token has passed.

Cause: An attempt was made to authenticate a user from an external Identity Provider to Oracle Database using an expired token.

Action: Request a new authorization token used for connecting to Oracle Database.

DIA-25709: schema privileges not granted to '*string*'

Cause: A schema privilege you tried to revoke was not granted to the user.

Action: Make sure the privileges you are trying to revoke are granted.

DIA-25710: schema privilege granted with a different scope to '*string*'

Cause: An attempt was made to revoke a schema privilege that was granted with a different scope.

Action: Specify the correct value for the CONTAINER clause.

DIA-25711: The private key is missing or invalid.

Cause: An attempt was made to authenticate a user from an external Identity Provider to Oracle Database using an invalid or missing private key.

Action: Request a new token and try again. If the new private key also returns this error, check with your IT help desk for the correct process to request a database access token.

DIA-25712: could not lock object *string.string*

Cause: An attempt to lock the object failed.

Action: Retry the operation. If the operation continues to fail, contact Oracle Support Services.

DIA-25713: User could not be locked.

Cause: Timeout occurred while trying to take a lock on user.

Action: Retry the operation later.

DIA-25714: invalid value of PASSWORD_AUTH or TOKEN_AUTH in the client configuration

Cause: An attempt was made to authenticate a user from an external Identity Provider to Oracle Database using invalid PASSWORD_AUTH or TOKEN_AUTH value. This parameter can be found in SQLNET.ORA, TNSNAMES.ORA, or used as part of the connect string.

Action: Specify the correct PASSWORD_AUTH or TOKEN_AUTH value. Refer to the Oracle Database documentation for the allowed values.

DIA-25800: Maximum length of a saga entity cannot exceed 107

Cause: The length of the saga broker, coordinator or the participant being created exceeded the maximum allowable length.

Action: Retry the operation after reducing the length of the saga entity.

DIA-25801: Unsupported version '*string*'

Cause: An attempt was made to perform a saga operation with an unsupported version.

Action: Retry the operation after specifying the correct version or use the default version.

DIA-25802: Insufficient privileges to access schema *string*

Cause: An attempt was made to perform a saga operation with an invalid or inaccessible schema.

Action: Retry the operation after specifying the correct or accessible schema.

DIA-25803: Saga entity *string* already exists

Cause: The saga broker, coordinator or the participant being created already existed.

Action: Retry the operation after specifying a different name.

DIA-25804: Saga entity *string* does not exist

Cause: The saga broker, coordinator or the participant did not exist.

Action: Retry the operation after specifying a different name.

DIA-25805: Saga entity *string* cannot be dropped

Cause: An attempt was made to drop a saga broker or coordinator which still had saga participants attached to it.

Action: Retry the operation after dropping all the saga participants attached to this broker or coordinator.

DIA-25806: Missing package or execution rights for package '*string*'.*string*'

Cause: An attempt was made to register a saga package that did not exist or execution rights on the saga package were missing.

Action: Retry the operation after specifying the correct or accessible package.

DIA-25807: Callback package cannot be registered for a coordinator

Cause: An attempt was made to register a saga package for a coordinator.

Action: No action required.

DIA-25808: Participant or coordinator database link cannot be null

Cause: An attempt was made to add a participant or coordinator with a null database link when broker database link was non-null.

Action: Retry the operation after specifying the correct database link for the participant or specifying a null broker database link.

DIA-25809: Unable to make remote calls using database link '*string*'

Cause: An attempt was made to add or drop a participant with an invalid or inaccessible broker database link.

Action: Retry the operation after specifying the correct database link for the broker.

DIA-25810: Saga entity *string* already exists at broker

Cause: The saga coordinator or the participant being created was already managed by the specified broker.

Action: Retry the operation after specifying a different name.

DIA-25811: Saga entity *string* cannot be created

Cause: An attempt was made to create a saga participant or coordinator with an invalid broker name or schema.

Action: Retry the operation after specifying the correct broker name or schema.

DIA-25812: Cannot drop queue table '*string*'

Cause: An attempt to drop the saga entity failed because the queue table associated with the entity could not be dropped.

Action: Retry the operation or contact administrator to manually drop queue table associated with this entity.

DIA-25813: Cannot clear dictionary entry for entity '*string*'

Cause: An attempt to drop the saga entity failed because the dictionary table entry associated with this entity could not be cleared.

Action: Retry the operation or contact administrator to manually clear the dictionary table entry associated with this entity.

DIA-25814: Cannot unschedule propagation for queue '*string*'

Cause: An attempt to drop the saga entity failed because the propagation schedule associated with this entity could not be uncheduled.

Action: Retry the operation or contact administrator to manually unchedule the propagation schedule associated with this entity.

DIA-25815: Cannot unregister notification callback for queue '*string*'

Cause: An attempt to drop or update the saga entity failed because the notification callback associated with this entity could not be unregistered.

Action: Retry the operation or contact administrator to manually unregister the notification callback associated with this entity.

DIA-25816: Cannot update dictionary entry for entity '*string*'

Cause: An attempt to update the saga entity failed because the dictionary table entry associated with this entity or broker could not be updated.

Action: Retry the operation or contact administrator to manually update the dictionary table entry associated with this entity.

DIA-25817: Drop operation failed for entity '*string*'

Cause: An attempt to drop the saga entity failed either at broker database or locally.

Action: Retry the operation after verifying the broker still exists.

DIA-25818: Invalid coordinator name '*string*'

Cause: An attempt was made to create a saga participant with an invalid coordinator name.

Action: Retry the operation after specifying the correct coordinator name.

DIA-25819: Unauthorized access

Cause: An attempt was made to perform a saga operation using a participant that the current user did not own.

Action: No action required.

DIA-25820: Invalid opcode *string*

Cause: An attempt was made to perform a saga operation using an invalid opcode.

Action: No action required.

DIA-25821: Invalid saga id *string*

Cause: An attempt was made to perform a saga operation using an invalid saga id.

Action: Retry the operation after specifying the correct saga id.

DIA-25822: Cannot drop subscriber for queue '*string*'

Cause: An attempt to drop the saga entity failed because the subscriber associated with this entity could not be dropped.

Action: Retry the operation or contact administrator to manually drop the subscriber associated with this entity.

DIA-25824: Cannot enroll participant for saga id '*string*'

Cause: An attempt to enroll a saga participant failed because the saga id did not exist or the initiator of the saga was not found or the saga was already committed or rolledback.

Action: No action required.

DIA-25950: missing where clause in join index specification

Cause: An attempt to create a join index was made, which failed because no valid where clause was found.

Action: Ensure that a where clause with valid join conditions is specified in the create index statement.

DIA-25951: join index where clause cannot contain OR condition

Cause: An attempt to create a join index was made, which failed because there was an OR branch in the where clause.

Action: Reformulate the where clause without using ORs.

DIA-25952: join index must only contain inner equi-joins

Cause: An attempt to create a join index was made, which failed because it included a predicate which wasn't an equi-inner join.

Action: Remove the inappropriate predicate.

DIA-25953: join index cannot be a functional index

Cause: An attempt to create a join index was made, which failed because a functional index was requested or necessary (such as is the case for indexing columns using timezone).

Action: Remove any functional indexing columns.

DIA-25954: missing primary key or unique constraint on dimension

Cause: An attempt to create a join index was made, which failed because one or more dimensions did not have an appropriate constraint matching the join conditions.

Action: Ensure that the where clause is correct (contains all of the constraint columns) and that an enforced constraint is on each dimension table.

DIA-25955: all tables must be joined in the where clause

Cause: An attempt to create a join index was made, which failed because one of the tables in the from clause did not appear in the where clause.

Action: Ensure that the where clause contains all from clause tables.

DIA-25956: join index cannot be created on tables owned by SYS

Cause: An attempt to create a join index was made, which failed because one of the tables was owned by SYS.

Action: Ensure that no join index related table is owned by SYS.

DIA-25957: join index where clause cannot contain cycles

Cause: An attempt to create a join index was made, which failed because the where clause contains a cycle.

Action: Ensure that the where clause is in the form of a star or snowflake schema.

DIA-25958: join index where clause predicate may only contain column references

Cause: An attempt to create a join index was made, which failed because a predicate in the where clause contained something other than a simple column.

Action: Ensure that the where clause only contains columns.

DIA-25959: join index must be of the bitmap type

Cause: An attempt to create a join index was made, which failed because no bitmap keyword was used.

Action: Make the index a bitmap index.

DIA-25960: join index cannot be based on a temporary table

Cause: An attempt to create a join index was made, which failed because one of the tables was temporary.

Action: Ensure no underlying tables are temporary.

DIA-25961: join index prevents dml cascade constraint operation

Cause: An attempt to execute dml resulted in the need to perform dml on another table because of a cascade constraint. The join index only allows one of its underlying tables to be modified at a time.

Action: Drop the join index or remove the constraint.

DIA-25962: join index prevents multitable insert or merge

Cause: An attempt to execute an merge or multitable insert on a table that was used to create a bitmap join index was made. Merge and multitable inserts are not supported on tables that were used to create a bitmap join index.

Action: Drop the join index.

DIA-25963: join index must be created on tables

Cause: An attempt to create a join index was made, which failed because the from clause contains non table object.

Action: Ensure that the from clause only contains tables.

DIA-25964: column type incompatible with join column type

Cause: The datatype of the join column is incompatible with the datatype of the joined column.

Action: Select a compatible datatype for the join column.

DIA-25965: fact table must be included in the from clause

Cause: An attempt to create a join index was made, which failed because the from clause does not contain the fact table.

Action: Ensure that the from clause contains the fact table.

DIA-25966: join index cannot be based on an index organized table

Cause: An attempt to create a join index was made, which failed because one of the tables was an index organized table.

Action: Ensure no underlying tables are index organized.

DIA-26000: partition load specified but table *string* is not partitioned

Cause: The Loader control file contains a PARTITION clause but the table being loaded is not partitioned.

Action: Remove the partition specification from the SQL*Loader control file and retry the load.

DIA-26001: Index *string* specified in SORTED INDEXES does not exist on table *string*\n

Cause: A nonexistent index was specified in the SORTED INDEXES clause.

Action: Do not specify as a SORTED INDEX.

DIA-26002: Table *string* has index defined upon it.\n

Cause: Parallel load was specified into a table which has index defined upon it.

Action: Drop index(es) defined upon table, or don't use parallel load, or use SKIP_INDEX_MAINTENANCE option.

DIA-26003: parallel load not supported for index-organized table *string*.\n

Cause: Parallel load is not supported for index-organized tables.

Action: load the index-organized table without the PARALLEL option.

DIA-26004: Tables loaded through the direct path may not be clustered\n

Cause: User attempted to load a clustered table via the direct path.

Action: Use the conventional path.

DIA-26005: Invalid handle for direct path load\n

Cause: In direct path load, the handle passed in does not match the type listed.

Action: Verify the handle and type are correct.

DIA-26006: Incorrect bind variable in column *string*'s sql expression - *string*\n

Cause: In direct path load, the bind variables listed in the sql expression do not match the input argument column names.

Action: Verify all the input arguments are listed in the expression as bind variables, and all the bind variables are listed as input arguments to the expression. Or verify that there were no errors in executing the OCI statements when getting the bind variable list.

DIA-26007: invalid value for SETID or OID column\n

Cause: The value passed in a Direct Path API stream for a column containing a SETID or OID has an invalid value. SETIDs and Object IDs must be either 16 bytes of RAW data or 32 bytes of hexadecimal characters.

Action: Regenerate the Direct Path API stream with a valid value for the SETID column.

DIA-26008: Invalid syntax or bind variable in SQL string for column *string*.\n*string*\n

Cause: See following error message for more information. A SQL string cannot have quoted strings improperly terminated. A bind variable in a SQL string cannot have a length of 0, cannot exceed maximum length of 30 characters, and cannot be missing a double quote.

Action: Fix the SQL string. See following error for more information.

DIA-26009: stream verification error: *string*\n

Cause: An error has occurred in a Data Pump stream verification operation.

Action: Contact Oracle Support Services.

DIA-26010: Column *string* in table *string* is NOT NULL and is not being loaded

Cause: A column which is NOT NULL in the database is not being loaded and will cause every row to be rejected.

Action: Load the column by specifying the NOT NULL column in the INTO TABLE clause in the SQL*Loader control file.

DIA-26011: Cannot load type *string* into column *string* in table *string*

Cause: A column can only store data of type declared for that column. And a substitutable column can only store data of valid subtypes of the supertype declared for that column.

Action: Check that the type or subtype specified is valid for that column.

DIA-26012: header in file *string* has an incompatible version number

Cause: A dump file was specified for a load operation whose version number is incompatible with the dump file version currently produced by the Oracle server on the system. Usually this message indicates that the dump file was produced by a newer version of the Oracle server.

Action: Load this dump file using the same version of the Oracle server that created the file.

DIA-26013: List allocated may not be big enough

Cause: There seems to be a discrepancy between the size for a list or buffer allocated by direct path api and the size needed.

Action: Contact Oracle Customer Support.

DIA-26014: unexpected error on *string string* while retrieving *string*

Cause: The SQL error was returned from an OCISstmtExecute call.

Action: Correct the SQL error that was returned.

DIA-26015: Array column *string* in table *string* is not supported by direct path

Cause: User attempted to load an array column via the direct path.

Action: Use the conventional path.

DIA-26016: Virtual column *string* in table *string.string* cannot be loaded by direct path

Cause: You attempted to load an virtual column using the direct path.

Action: Virtual columns cannot be loaded using the direct path.

DIA-26017: global indexes not allowed for direct path load of table partition *string*

Cause: Global indexes are defined on a table when direct path loading a single partition of the table.

Action: Remove the global index from the named table and retry the operation.

DIA-26018: Column *string* in table *string* does not exist

Cause: Column specified in the loader control file does not exist.

Action: Make sure the column exists and that you have privileges on it. Correct the loader control file if it is wrong.

DIA-26019: Column *string* in table *string* of type *string* not supported by direct path

Cause: The Specified column of SQL column type %s is not supported by the direct path loader.

Action: If the column is NULLable, remove it from the control file description. Then it will be loaded as a NULL.

DIA-26020: index *string.string* loaded successfully with *string* keys

Cause: Non-partitioned index information put to loader log file.

Action: None. Informational only.

DIA-26021: index *string.string* partition *string* loaded successfully with *string* keys

Cause: Partitioned index information put to loader log file.

Action: None. Informational only.

DIA-26022: index *string.string* was made unusable due to:

Cause: A Non-partitioned index was made index unusable due to the error displayed below this error.

Action: Depending on the error, either rebuild the index, or drop and re-create it.

DIA-26023: index *string.string* partition *string* was made unusable due to:

Cause: A partition of a partitioned index was made index unusable due to error displayed below this error.

Action: Depending on the error, either rebuild the index partition, or drop and re-create the entire index.

DIA-26024: SKIP_UNUSABLE_INDEXES requested and index segment was initially unusable

Cause: User requested SKIP_UNUSABLE_INDEXES option, and the index segment was in unusable state prior to the beginning of the load.

Action: Informational only. User will need to either rebuild the index or index partition, or re-create the index.

DIA-26025: SKIP_INDEX_MAINTENANCE option requested

Cause: User requested that index maintenance be skipped on a direct path load.

Action: The listed index was put into Index Unusable state due to the user requesting that index maintenance be skipped. Either rebuild the index or index partitions, or drop and re-create the index.

DIA-26026: unique index *string.string* initially in unusable state

Cause: A unique index is in IU state (a unique index cannot have index maintenance skipped via SKIP_UNUSABLE_INDEXES).

Action: Either rebuild the index or index partition, or use SKIP_INDEX_MAINTENANCE if the client is SQL*Loader.

DIA-26027: unique index *string.string* partition *string* initially in unusable state

Cause: A partition of a unique index is in IU state (a unique index cannot have index maintenance skipped via SKIP_UNUSABLE_INDEXES).

Action: Either rebuild the index or index partition, or use SKIP_INDEX_MAINTENANCE if the client is SQL*Loader.

DIA-26028: index *string.string* initially in unusable state

Cause: An index is in IU state prior to the beginning of a direct path load, it cannot be maintained by the loader.

Action: Either rebuild the index, re-create the index, or use either SKIP_UNUSABLE_INDEXES or SKIP_INDEX_MAINTENANCE (Sql*Loader only).

DIA-26029: index *string.string* partition *string* initially in unusable state

Cause: A partition of an index is in IU state prior to the beginning of a direct path load, it cannot be maintained by the loader.

Action: Either rebuild index partition, re-create the index, or use either SKIP_UNUSABLE_INDEXES or SKIP_INDEX_MAINTENANCE (Sql*Loader only).

DIA-26030: index *string.string* had *string* partitions made unusable due to:

Cause: A logical index error occurred on a partitioned index which affected one or more index partitions, which are listed below this message.

Action: The affected index partitions will have to be re-built, or, the entire index dropped and re-created.

DIA-26031: index maintenance error, the load cannot continue

Cause: A index error occurred during the index maintenance phase of a direct path load. The load cannot continue. See error message below this message.

Action: See action for the error message which follows this one.

DIA-26032: index *string.string* loading aborted after *string* keys

Cause: An index error occurred during direct-load of an index-organized table. Loading had to be aborted. No rows were loaded.

Action: Check the key just following the number of keys mentioned above. This key caused the index problem mentioned in an earlier message.

DIA-26033: column *string.string* encryption properties differ for source or target table

Cause: The source and destination columns did not have the same encryption properties.

Action: For security reasons, check that the source and target table have the same encryption properties.

DIA-26034: Column *string* does not exist in stream\n

Cause: Column specified in the column list does not exist in the stream.

Action: Make sure the column exists or remove it from the list.

DIA-26035: Error attempting to encrypt or decrypt column

Cause: An error occurred while attempting to encrypt or decrypt a database column.

Action: Verify correct encryption key was specified.

DIA-26036: subpartition load specified but table *string* is not subpartitioned\n

Cause: The Loader control file contains a PARTITION clause but the table being loaded is not subpartitioned.

Action: Remove the subpartition specification from the SQL*Loader control file and retry the load.

DIA-26037: must specify partition name(s) for system partitioned table *string*\n

Cause: An attempt was made to load a system partitioned table with no partition name(s) specified.

Action: Specify the partition name(s) explicitly.

DIA-26038: attempt to write audit record for SQL*Loader direct path load of *string.string* failed with error code: *number*\n

Cause: An attempt to write an audit record during a SQL*Loader direct path load failed.

Action: Contact Oracle Support Services.

DIA-26040: Data block was loaded using the NOLOGGING option\n

Cause: Trying to access data in block that was loaded without redo generation using the NOLOGGING/UNRECOVERABLE option

Action: Drop the object containing the block.

DIA-26041: DATETIME/INTERVAL datatype conversion error\n

Cause: The column could not be converted from DATETIME datatype to internal DATETIME/CHARACTER datatype.

Action: Contact Oracle Customer Support.

DIA-26045: REF column *string* expects *string* arguments; found *string*.\n

Cause: The number of arguments for the REF column is incorrect.

Action: Specify the correct number of input arguments for REFs. 1. Unscoped system-generated REFs can have exactly 1 or 2 input arguments. a) It has exactly 1 input argument (one for the OID value) if a fixed table name was specified through OCI_DIRPATH_EXPR_REF_TBLNAME. b) It has exactly 2 input arguments (one for the table name and one for the OID value) if a fixed table name was not specified through OCI_DIRPATH_EXPR_REF_TBLNAME. 2. Scoped system-generated REFs can have 1 or 2 input arguments. Because a table name argument is not needed for a scoped ref, only 1 argument (OID value) is expected. But if the table name argument is given, it's still accepted. 3. Scoped primary-key REFs with N columns in its primary-key OID can have N or N+1 input arguments. Because a table name argument is not needed for a scoped ref, only N arguments (making up the OID value) is expected. But if the table name argument is given, it's still accepted.

DIA-26046: REF column *string* expects scoped table name *string*; user passed in *string*.\n

Cause: The scoped table name passed in by the user does not match the name in the schema.

Action: Specify the correct table name for the scoped REF column.

DIA-26048: Scoped REF column has wrong table name.\n

Cause: The scoped table name passed in by the user does not match the name in the schema.

Action: Specify the correct table name for the scoped REF column.

DIA-26049: Unscoped REF column has non-existent table name.\n

Cause: The table name passed in by the user does not exist in the schema.

Action: Specify a valid table name for the unscoped REF column.

DIA-26050: Direct path load of domain index is not supported for this column type.\n

Cause: Direct path can not load a domain index of that column type.

Action: Drop the index and try again or load using conventional path.

DIA-26051: internal error parsing packed decimal format string

Cause: A packed decimal field with a non-zero scale factor is mapped to a character column. In order to perform the datatype conversion, a numeric format string must be created based on the input field's precision and scale specifications. Direct path loader encountered an error in creating this format string.

Action: Examine the packed decimal field's precision and scale specifications and make sure that they contain valid values.

DIA-26052: Unsupported type *number* for SQL expression on column *string*.\n

Cause: The direct path api does not support a SQL expression on a column of that type.

Action: Make sure the types are correct.

DIA-26053: Row was not loaded due to conversion error.\n

Cause: The current row was not loaded due to a conversion error.

Action: Continue with the load anyways. 260xx - 260xx Direct Path API

DIA-26054: Direct Path Context prepared for a different mode than operation requested.\n

Cause: The user prepared the direct path context for one operation (Load, Unload, Convert), but then tried to perform a different operation.

Action: Make sure the direct path context mode and operation matches.

DIA-26055: Invalid buffer specified for direct path unload\n

Cause: The user specified a zero length or null buffer to be used for the Direct Path Unload operation.

Action: Specify a valid buffer and length.

DIA-26056: Requested direct path operation on a view is not supported.\n

Cause: An attempt was made to load into a view using direct path that has user-defined types, XML data, object type table or SQL expressions.

Action: Do not attempt to use direct path when loading a view that has nonscalar columns or when using SQL expressions on input columns.

DIA-26057: Conversion is not necessary for this direct path stream.\n

Cause: User attempted to convert a direct path stream that does not require conversion.

Action: Load the stream without conversion it.

DIA-26058: unexpected error fetching metadata for column *string* in table *string*\n

Cause: The direct path API encountered an unexpected error while retrieving metadata for a column.

Action: Contact Oracle support.

DIA-26059: Data is too large for column *string*\n

Cause: The direct path API encountered a column that can not be loaded because the input data is too large for a column.

Action: Make the target column larger.

DIA-26060: Can not convert type identifier for column *string*\n

Cause: The direct path API encountered a type identifier for a column that can not be loaded because a mapping can not be found for the input value.

Action: Verify the input data.

DIA-26061: Concurrent direct unloads is not allowed.\n

Cause: User attempted a direct unload when another is still in progress.

Action: Complete the current direct unload before starting another.

DIA-26062: Can not continue from previous errors.\n

Cause: User attempted to continue a direct path load after receiving an error which indicates the load can not continue.

Action: Address the original error that was returned.

DIA-26063: Can not flashback to specified SCN value - Wrap: *string* Base: *string*.\n

Cause: User specified an SCN which occurs before the last time the table definition was modified.

Action: Specify a more recent SCN.

DIA-26064: Invalid SCN specified - Wrap: *string* Base: *string*.\n

Cause: User specified an invalid SCN.

Action: Specify a valid SCN.

DIA-26065: check constraint cannot reference column, *string*, in direct path load\n

Cause: An enabled check constraint was found on a column stored as a lob.

Action: Either disable the check constraint before loading the table data using the direct path mode, or use the conventional path mode instead.

DIA-26066: cannot load duplicate tables with a domain index because not all domain index keys are being loaded\n

Cause: User SQLLDR control file loaded the same table multiple times but did not load all domain index keys for each INTO clause.

Action: Load all domain index keys when loading the table multiple times.

DIA-26076: cannot set or reset value after direct path structure is allocated

Cause: Client attempted to set or reset the number of rows in a direct path structure after it has already been allocated and initialized. Attributes used is one of the following: - OCI_ATTR_NUM_ROWS: to set # of rows in a direct path column array - OCI_ATTR_DIRPATH_DCACHE_SIZE: to set size of a date cache (default is 0) -

OCI_ATTR_DIRPATH_DCACHE_DISABLE: to set whether data cache will be disabled on overflow (default is FALSE)

Action: Set the following attributes before: - OCI_ATTR_NUM_ROWS: before calling OCIHandleAlloc for column array - OCI_ATTR_DIRPATH_DCACHE_SIZE: before calling OCIDirPathPrepare - OCI_ATTR_DIRPATH_DCACHE_DISABLE: before calling OCIDirPathPrepare

DIA-26077: direct path column array is not initialized

Cause: Client attempted to allocate a column array for a direct path function context before allocating a column array for the table-level direct path context.

Action: Allocate the table-level direct path context's column array via OCIHandleAlloc before allocating column arrays for direct path function contexts.

DIA-26078: file "*string*" is not part of database being loaded

Cause: A parallel load file was specified which is not part of the database.

Action: Check filename and pathname for correctness.

DIA-26079: file "*string*" is not part of table *string.string*

Cause: A parallel load file was specified which is not in the tablespace of the table being loaded.

Action: Check to make sure that the specified parallel load file is in the tablespace of the table being loaded.

DIA-26080: file "*string*" is not part of table *string.string* partition *string*

Cause: A parallel load file was specified which is not in the tablespace of the table (partition, subpartition) being loaded. When a partitioned table is being loaded, the file must be in the tablespace of every partition or subpartition (i.e. each (sub)partition must be in the same tablespace).

Action: Specify a different parallel load file, or no file at all.

DIA-26082: load of overlapping segments on table *string.string* is not allowed

Cause: Client application is attempting to do multiple direct path load operations on the same table, but the segments overlap.

Action: Check the partition names (subname attribute of the direct path context) being loaded. Make sure you are not loading a table, and a partition of the same table. Make sure you are not loading a partition, and a sub-partition within the same partition.

DIA-26083: unsupported direct path stream version *string*

Cause: The stream version requested is not supported by the server.

Action: Check to make sure that the VERSION attribute of the direct stream is not being set to an invalid value.

DIA-26084: direct path context already finished

Cause: An OCIDirPathLoadStream operation was attempted after OCIDirPathFinish was called. Once a direct path operation has been finished, no more data can be loaded.

Action: Check program logic to make sure OCIDirPathLoadStream is not called after OCIDirPathFinish.

DIA-26085: direct path operation must start its own transaction

Cause: A direct path operation is being attempted within a transaction that has already been started.

Action: Commit the transaction and Prepare the direct path operation again.

DIA-26086: direct path does not support triggers

Cause: A direct path operation is being attempted on a table which has enabled triggers.

Action: Disable the triggers on the table and try again.

DIA-26088: scalar column "*string*" must be specified prior to LOB columns

Cause: All scalar columns (i.e. non-LOB and non-LONG columns) must be specified by the client of the direct path API prior to specifying any LOB columns.

Action: Specify all scalar columns prior to specifying any LOB columns.

DIA-26089: LONG column "*string*" must be specified last

Cause: A client of the direct path API specified a LONG column to be loaded, but the LONG column was not the last column to be specified.

Action: Specify the LONG column last.

DIA-26090: row is in partial state

Cause: A direct path operation is being finished or a data save request has been made, but the table for which the request is being made on has a row in partial state. The row must be completed before the segment high water marks can be moved.

Action: Either complete the row, or abort the direct path operation.

DIA-26091: requested direct path operation not supported

Cause: A direct path operation was requested that is not supported

Action: Do not use that operation. Currently, UNLOAD is not supported.

DIA-26092: only LONG or LOB types can be partial

Cause: A column which is not a LONG or LOB had the OCI_DIRPATH_COL_PARTIAL flag associated with it. Only LONG or LOB type columns can be loaded in pieces.

Action: Do not use the OCI_DIRPATH_COL_PARTIAL flag for the column.

DIA-26093: input data column size (*number*) exceeds the maximum input size (*number*)

Cause: The user attempted to specify a column size (%d) that exceeded the maximum allowable input size (%d)."

Action: Make sure the input column metadata matches the column definition.

DIA-26094: stream format error: input column overflow

Cause: An input stream contained data for more input columns than specified by the client of the direct path API.

Action: Make sure that the stream being loaded is for the correct table. Check initialization sequence.

DIA-26095: unprocessed stream data exists

Cause: Either a OCIDirPathLoadStream call was made which provided more stream data prior to the server being able to fully process the stream data that it already has, or a OCIDirPathFinish call was made when the server had unprocessed stream data.

Action: Most likely an application mis-use of the direct path API. Make sure that the stream is not being reset inadvertently prior to any previous stream data being processed, or, that OCIDirPathFinish is not being called prematurely (i.e. stream pushed, error encountered and LoadStream not called to process the remainder of the stream before Finish is called.)

DIA-26096: transfer size too small for row data (*number* bytes required)

Cause: Either the transfer buffer size specified, or the default transfer buffer size (if you did not specify a size), is too small to contain a single row of the converted row data.

Action: Set the transfer buffer size attribute of the direct path context to be larger.

DIA-26097: unsupported conversion required for column *string*

Cause: The conversion required for the column was not supported. For example, conversion from date to number was not supported.

Action: Ensure that the type is correct for the source and destination.

DIA-26098: direct path context is not prepared

Cause: A direct path api function was called with a direct path context which has not been prepared.

Action: Make sure all necessary attributes in the direct path context have been set, and the context is prepared via OCIDirPathPrepare.

DIA-26099: direct path context is already prepared

Cause: OCIDirPathPrepare was called with a context that has already been prepared.

Action: Free the direct path context, set necessary attributes, and call OCIDirPathPrepare.

DIA-26100: unused error

Cause: This error is not used.

Action: No action required.

DIA-26101: tablespace # in file header is *string* rather than *string* for file *string*

Cause: The tablespace number in the file header is inconsistent with that in the control file.

Action: Check if the control file has been migrated correctly. Retry with the correct control file and data file.

DIA-26102: relative file # in file header is *string* rather than *string* for file *string*

Cause: The relative file number in the file header is inconsistent with that in the control file.

Action: Check if the control file has been migrated correctly. Retry with the correct control file and data file.

DIA-26103: V6 or V7 data file used to create control file

Cause: The file header of the referenced file is in V6 or V7 format.

Action: Either remove the file from the create control file command, or somehow migrate the file header to V8 format.

DIA-26104: unexpected error on *string string* while locking object, return code: *string*, obj: *string*

Cause: An attempt to lock the object failed.

Action: Retry the operation. If the operation continues to fail, contact Oracle Support Services.

DIA-26500: error on caching "*string*". "*string*"

Cause: Attempt to cache the replication information which is unavailable in the catalog for the object.

Action: Use `dbms_reputil.sync_up_rep` to validate the replication catalog, or use `dbms_reputil.make_internal_pkg` to validate internal package.

DIA-26501: RepAPI operation failure

Cause: An external RepAPI operation failed.

Action: consult detail error message.

DIA-26502: error resignal

Cause: An internal service failed and signalled an error"

Action: consult detail error message.

DIA-26503: internal RepAPI operation failure on object *string.string*

Cause: An unexpected internal RepAPI failure was detected

Action: Contact Oracle support.

DIA-26504: operation not implemented

Cause: The caller requested a RepAPI operation that was not implemented

Action: Do not issue this call.

DIA-26505: unexpected internal null

Cause: An internal buffer control structure was NULL

Action: Verify that sufficient memory resources are available to RepAPI.

DIA-26506: null global context

Cause: An internal buffer control structure was NULL

Action: Verify that sufficient memory resources are available to RepAPI.

DIA-26507: null master connection

Cause: The master connection handle was or became invalid.

Action: Verify that the master connection is valid.

DIA-26508: null materialized view connection

Cause: The client connection handle was or became invalid.

Action: Verify that the client connection is valid.

DIA-26509: null materialized view control structure

Cause: An internal materialized view control structure could not be obtained.

Action: Check that the owner and users provided are correct.

DIA-26510: materialized view name: '*string*' is greater than max. allowed length of *string* bytes

Cause: The specified materialized view name was too long.

Action: Shorten the materialized view name.

DIA-26511: master table '*string.string*' not found

Cause: A RepAPI operation was attempted against a non-existent or invalid master table

Action: Verify that the master table object exists.

DIA-26512: error pushing transaction to def\$error

Cause: An unexpected error occurred while sending an def\$error rpc to the master site

Action: Verify that the DBMS_DEFER package is valid and executable by the RepAPI client. Contact the local or master site administrator, if necessary.

DIA-26513: push error: master proc. *string*\$RP.*string* failed for trans:*string* seq:*string*

Cause: A conflict/error occurred at the master site while executing a \$RP.rep_insert(), rep_update(), or rep_delete() function which was not handled by conflict resolution logic at the master.

Action: Notify master site system administrator or DBA.

DIA-26514: object '*string.string*' not found

Cause: The specified object was expected but not found.

Action: Verify that the specified object exists and is valid.

DIA-26515: no master log available for '*string.string*'

Cause: The specified master log was not found or available for the named table.

Action: Create the master log at the master site or correct any problems that may exist with the log.

DIA-26516: no push transaction acknowledgement

Cause: RepAPI was unable to confirm that the last pushed transaction was successfully committed by the master site.

Action: Verify that the communications link between the local site and the master site is still valid. If the transaction has not been committed at the master, repush the transaction.

DIA-26517: materialized view control entry for '*string.string*' was not found

Cause: The specified materialized view catalog control record was not found.

Action: Verify that the local materialized view catalog is valid and that the local materialized view is properly defined.

DIA-26518: push queue synchronization error detected

Cause: Client tried to repush a transaction has already been committed at the master site. A common cause of this problem is an error at the local site in initializing or updating the local site transaction sequence mechanism.

Action: Verify that transaction data that RepAPI was attempting to repush to the master site exists at the master table and is valid and consistent with the local site. If this error

occurs, redundantly identified transactions are ignored and then purged from the local updatable materialized view logs. Check that the local site is correctly assigning new transactionIDs and is not accidentally generating non-unique values.

DIA-26519: no memory available to allocate

Cause: There was no memory left for the RepAPI process. This error may occur when RepAPI is trying to allocate a new table buffer area.

Action: Shutdown one or more local applications to attempt to free heap memory and retry the RepAPI operation.

DIA-26520: internal memory failure

Cause: An internal memory error was detected.

Action: Check if other errors have occurred or determine if any local application may have corrupted the memory subsystem.

DIA-26521: rpc initialization error

Cause: An error occurred during the initialization of a PL/SQL rpc.

Action: Verify that the procedure to be invoked exists and is valid at the master site and is executable by the RepAPI user.

DIA-26522: rpc execution error

Cause: An error occurred during the execution of a PL/SQL rpc.

Action: Check the error messages from the remote procedure and fix any remote site problems that may be preventing the execution of the invoked rpc.

DIA-26523: rpc termination error

Cause: An error occurred during the termination of a PL/SQL rpc. This is usually caused by master site being unable to close an opened cursor or if RepAPI cannot deallocate internal memory.

Action: Fix any server side problems first, determine if the RepAPI memory subsystem has been corrupted.

DIA-26524: nls subsystem initialization failure for product=*string*, facility=*string*

Cause: The NLS product/facility error message file could not be located or properly initialized.

Action: Check that the error message directory and file(s) have been properly installed.

DIA-26525: session connection attempt failed for *string* (@*string*)

Cause: A connection could not be established to the specified database using the provided connection string.

Action: Check that the user, password, connect string, names services, network, and any remote site listener process are properly installed and working.

DIA-26526: materialized view sql ddl parse/expansion failed for *string.string*

Cause: The client sql materialized view definition query could not be properly parsed by the master Oracle site.

Action: Check that materialized view ddl sql is compatible with the currently connected version of Oracle and does not violate any of the RepAPI sql limitations or restrictions.

DIA-26527: local store callback init phase failed for 'string.string'

Cause: The client callback failed during its INIT phase for the named object.

Action: Verify that the objects referenced by the client callback exist and are valid. Refer to the vendor-specific callback error code reference to diagnose the local problem. Record all error state and notify Oracle support.

DIA-26528: local store callback proc phase failed for 'string.string'

Cause: The client callback failed during its PROC phase for the named object.

Action: Refer to the vendor-specific callback error code reference to diagnose the local problem. Record all error state and notify Oracle support.

DIA-26529: local store callback term phase failed for 'string.string'

Cause: The client callback failed during its TERM phase for the named object.

Action: Refer to the vendor-specific callback error code reference to diagnose the local problem. Record all error state and notify Oracle support.

DIA-26530: unable to build materialized view refresh control list

Cause: The materialized view control list could not be constructed. This is generally the result of an error while accessing the local materialized view catalog.

Action: Verify that the named materialized view(s) are properly defined and valid.

DIA-26532: replication parallel push simulated site failure

Cause: A parallel push executed with event 26531 enabled raises this error to simulation failure of network or destination site.

Action: Do not enable the event for normal operation.

DIA-26534: collision: tranID number ignored and purged

Cause: A transaction that was pushed had a transaction ID that collided with a transaction that was previously pushed and committed at the master site.

Action: See the action section for E_QUEUESYNC (26518).

DIA-26535: number byte row cache insufficient for table with rowsize=number

Cause: A transaction that was pushed had a transaction ID that collided with a transaction that was previously pushed and committed at the master site.

Action: Increase the RepAPI row buffer size or reduce the width of the replicated tables.

DIA-26536: refresh was aborted because of conflicts caused by deferred transactions

Cause: There are outstanding conflicts logged in the DEFERROR table at the materialized view's master site.

Action: Resolve the conflicts in the master DEFERROR table and refresh again after the table is empty. Alternatively, refresh with REFRESH_AFTER_ERRORS, even if there are conflicts in the master's DEFERROR table. Proceeding despite conflicts can result in an updatable materialized view's changes appearing to be temporarily lost, until a refresh succeeds after the conflicts are resolved.

DIA-26563: renaming this table is not allowed

Cause: An attempt was made to rename a replicated table, an updatable materialized view table, a table that had logical partition tracking created, or the master table of a materialized view for which a materialized view log was created.

Action: Either, drop the logical partition tracking, unregister the replicated table with `dbms_repcat.drop_master_reobject`, or use the recommended procedure to rename the master table of a materialized view.

DIA-26564: *string* argument is not of specified type

Cause: User passed type of the given argument number doesn't match with the type of the argument in the stored arguments.

Action: Invoke correct type procedure (i.e. `get_XXX_arg`)

DIA-26565: Call to *type_arg* made before calling `dbms_defer.call`

Cause: User invoked `type_arg` procedure before starting a deferred call

Action: Invoke various procedures in the correct order.

DIA-26566: Couldn't open connect to *string*

Cause: Failed to open connection using given dblink

Action: Make sure that the dblink is valid and remote m/c is up.

DIA-26571: *string.string.string*: number of arguments (*string*) does not match replication catalog

Cause: number of arguments does not match replication catalog

Action: examine total number of arguments for the rpc call

DIA-26572: *string.string.string*: argument *string* does not match replication catalog

Cause: the (rpc) call is corrupted

Action: examine total number of arguments and each argument for the rpc call

DIA-26575: remote database does not support replication parallel propagation

Cause: The remote database has a version lower than Oracle 8.0 and hence does not understand replication parallel propagation.

Action: Use serial propagation or upgrade the remote database to Oracle 8.0 or above.

DIA-26576: cannot acquire SR enqueue

Cause: An attempt to acquire the SR enqueue in exclusive mode failed.

Action: n/a

DIA-26577: PRESERVE TABLE can not be used when dropping old style materialized view *string.string*\n

Cause: The materialized view consists of a view and a container table.

Action: Drop the materialized view without PRESERVE TABLE option.

DIA-26578: No capture in this multitenant container database associated with queue *"string"*.

Cause: An outbound server's queue was not associated with a capture from the same multitenant container database (CDB) before adding or starting an outbound server.

Action: Execute the DBMS_STREAMS_ADM.CREATE_CAPTURE procedure to create a capture before adding or starting an outbound server.

DIA-26579: Restarting capture worker because *string* PDBs have been assigned to capture worker.

Cause: Capture worker restarted because there were too many pluggable databases (PDBs) assigned to it.

Action: None. The Shared Capture Service will restart.

DIA-26580: Must use *string.string* procedure for shared capture *string*.

Cause: An incorrect procedure was executed for a shared capture."

Action: Run the suggested procedure.

DIA-26581: LCR packing error (*number* bytes remaining, required *number* bytes).

Cause: There was not enough space in the LCR buffer to pack the logical change record (LCR).

Action: Capture will automatically restart.

DIA-26582: cannot alter this parameter because previous ALTER statement is in progress

Cause: An attempt was made to alter the parameter when the previous operation was still in progress.

Action: Retry after the previous ALTER statement is complete.

DIA-26583: modifying *string* parameter requires SID='*' qualifier

Cause: The SID='*' qualifier was not specified in the command. The setting for the specified parameter must be exactly the same on all Oracle RAC database instances.

Action: Reenter the command using SID='*' or without the SID qualifier.

DIA-26584: Altering '*string*' parameter requires SCOPE=BOTH.

Cause: An attempt was made to alter a system parameter without SCOPE=BOTH.

Action: Reexecute the statement with SCOPE=BOTH.

DIA-26585: cannot configure more shared capture instances than number of Oracle RAC instances (*string*)

Cause: The specified NUM_INSTANCES was greater than the number of Oracle RAC instances.

Action: Retry the operation with a lower number of instances.

DIA-26586: Shared Capture Service has already been enabled.

Cause: An attempt was made to enable the Shared Capture Service when it was already enabled.

Action: Disable the service before enabling it.

DIA-26587: cannot disable Shared Capture Service while there are PDBs still registered to it

Cause: An attempt was made to disable Shared Capture Service while there were pluggable databases (PDBs) registered to it.

Action: Query the CDB_SHARED_CAPTURE_PDBS view from the root container to check which PDBs are still registered and unregister all Extracts from those PDBs.

DIA-26588: Shared Capture Service is not enabled.

Cause: Shared Capture Service was not enabled.

Action: Run the DBMS_SHARED_CAPTURE_ADM.ENABLE_SERVICE procedure to enable the service before retrying the operation.

DIA-26589: cannot stop Shared Capture Service while there are PDBs still registered to it

Cause: An attempt was made to stop Shared Capture Service while there were pluggable databases (PDBs) registered to it.

Action: Perform one of the following: 1) Retry the same command with FORCE argument set to TRUE. 2) Check the CDB_SHARED_CAPTURE_PDBS view to see which PDBs are still registered and unregister all Extracts from those PDBs.

DIA-26590: The JOB_QUEUE_PROCESSES parameter must be greater than zero.

Cause: Parameter JOB_QUEUE_PROCESSES was set to zero.

Action: Run the ALTER SYSTEM statement to increase the parameter value.

DIA-26591: The specified tablespace is not an automatic segment space management tablespace.

Cause: Shared Capture Service required an automatic segment space management tablespace.

Action: Specify an automatic segment space management tablespace.

DIA-26592: An invalid tablespace name specified.

Cause: An attempt was made to use SYS, SYSAUX, or SYSEXT for the Shared Capture Service.

Action: Specify a valid tablespace name.

DIA-26593: cannot drop capture *string* because one or more PDBs are currently registered to this capture

Cause: One or more pluggable databases (PDBs) were currently registered to the specified capture.

Action: Retry dropping the capture with the FORCE option set to TRUE or unregister all PDBs from the capture then re-drop the capture.

DIA-26594: Change table *string* for PDB *string* has been dropped.

Cause: The specified change table was dropped.

Action: Delete the pluggable database (PDB) Extract then register and re-create it.

DIA-26595: Pluggable database (PDB) '*string*' is already captured by '*string*'.

Cause: The specified PDB was captured by the Shared Capture Service.

Action: Provide another pluggable database name.

DIA-26596: Updating parameter *string* is not allowed for Shared Capture Service.

Cause: An attempt was made to update a forbidden parameter.

Action: Remove the specified parameter.

DIA-26650: *string string* background process *string* might not be started successfully

Cause: An error occurred during creation of a capture or apply background process.

Action: Review V\$STREAMS_CAPTURE and V\$STREAMS_APPLY_COORDINATOR views for the status of these processes. Also check the trace file for more information.

DIA-26651: Unable to start or stop capture process *string*

Cause: An attempt was made to start or stop a capture process while another capture process was concurrently starting or stopping.

Action: You cannot concurrently start or stop capture processes. Wait before attempting to start or stop additional capture processes.

DIA-26652: Capture *string* did not start properly and is currently in state *string*

Cause: An attempt to restart a capture process failed.

Action: Review V\$STREAMS_CAPTURE view for the state of the capture process. Also check the trace files for more information.

DIA-26653: Apply *string* did not start properly and is currently in state *string*

Cause: An attempt to restart an apply process failed.

Action: Streams: Review V\$STREAMS_APPLY% views for the state of the apply process. Also check the trace files for more information. XStream: Review V\$XSTREAM_APPLY% views for the state of the apply process. Also check the trace files for more information. GoldenGate: Review V\$GG_APPLY% views for the state of the apply process. Also check the trace files for more information.

DIA-26654: Capture *string* attempted to connect to apply *string* already configured for *string*

Cause: An attempt was made by a GoldenGate, XStream or Streams Capture or XStream In to connect to an Apply that is already connected in the other mode.

Action: You cannot connect a capture to an apply already configured for another apply mode. Create or connect to another apply.

DIA-26655: Invalid *string* specified for *string* procedure

Cause: An attempt was made to execute the specified procedure with an invalid SCN value.

Action: Resubmit procedure with a valid SCN value.

DIA-26656: supplemental logging version error: *string*

Cause: The supplemental logging versions of capture side and apply side are incompatible.

Action: For incompatibility caused by a newer apply side, please bypass or migrate the incompatible logs manually and consider upgrading or patching the capture side. For incompatibility caused by an unrecognizable version group or an older apply side, please upgrade or patch the apply side. For invalid versions, the logs might have been corrupted; please verify the integrity of the supplemental logging data on the capture side.

DIA-26660: Invalid action context value for *string*

Cause: The value specified in the action context is invalid for use in GoldenGate, XStream or Streams.

Action: Check that the type and value are correct.

DIA-26662: unable to process *string* data dictionary information for object

Cause: The database was unable to process Oracle GoldenGate, XStream or Oracle Streams data dictionary for this object.

Action: Check that the compatibility for the database supports the object, and check the trace file for information about the object.

DIA-26663: error queue for apply process *string* must be empty

Cause: The error queue for this apply process contains error entries.

Action: Execute or delete errors in the error queue.

DIA-26664: cannot create *string* process *string*

Cause: An attempt was made to create a GoldenGate, XStream or Streams process when another was being created concurrently.

Action: Wait for the creation of the other GoldenGate, XStream or Streams process to finish before attempting to create the process.

DIA-26665: *string* process *string* already exists

Cause: An attempt was made to create a GoldenGate, XStream or Streams process that already exists.

Action: Either specify another process or remove the existing GoldenGate, XStream or Streams process.

DIA-26666: cannot alter *string* process *string*

Cause: An attempt was made to alter a GoldenGate, XStream or Streams process that is currently running.

Action: Stop the GoldenGate, XStream or Streams process with FORCE parameter set to TRUE and reissue the command.

DIA-26667: invalid *string* parameter *string*

Cause: An attempt was made to specify an invalid parameter.

Action: Check the documentation for valid parameters.

DIA-26668: *string* process *string* exists

Cause: An attempt to remove the component failed because it is associated with the GoldenGate, XStream or Streams process.

Action: Either remove the process manually or specify the "cascade" option in `dbms_streams_adm.remove_queue`.

DIA-26669: parameter *string* inconsistent with parameter *string*

Cause: An attempt was made to specify a subprogram parameter value that is inconsistent with another parameter value.

Action: Check the documentation for valid parameter values.

DIA-26670: No capture is found for queue '*string*'

Cause: An attempt was made to add an XStream outbound server to a queue using uncommitted data mode when no co-located XStream capture was configured for that queue.

Action: Change to committed data mode or configure a local XStream capture for the specified queue then retry the operation.

DIA-26671: maximum number of *string* processes exceeded

Cause: Cannot create additional GoldenGate, XStream or Streams processes since the maximum number of processes has been reached.

Action: Remove existing GoldenGate, XStream or Streams processes and retry the operation.

DIA-26672: timeout occurred while stopping *string* process *string*

Cause: Timeout occurred while waiting for a GoldenGate, XStream or Streams process to shut down.

Action: Retry the operation. If the error persists, try stopping the process with the FORCE option, or contact Oracle Support Services.

DIA-26673: duplicate column name *string*

Cause: An attempt was made to specify a duplicate column name in an LCR.

Action: Remove the duplicate column and retry the operation.

DIA-26674: Column mismatch in '*string.string*' (LCR: *string* type=*string*; DB: *string* type=*string*)

Cause: The columns in the LCR were not the same or not found in the database table.

Action: Alter the database table.

DIA-26675: cannot create *string* capture process *string*

Cause: GoldenGate, XStream or Streams capture process could not be created because one or more parameters contain invalid value.

Action: Refer to trace file for more details.

DIA-26676: Table '*string.string*' has *string* columns in the LCR and *string* columns in the replicated site

Cause: The number of columns in the LCR was not the same as the the replicated site.

Action: Alter the table structure

DIA-26677: *string* downstream capture process *string* cannot proceed

Cause: Database global name has been set to a value which is same as the source database name of the downstream capture process.

Action: Change database global name to a value other than the source database name for the downstream capture.

DIA-26678: *string* downstream capture process for source database *string* must be created at database *string* first

Cause: A GoldenGate, XStream or Streams downstream capture process was nonexistent when this operation was attempted.

Action: Create a GoldenGate, XStream or Streams downstream capture process, then retry the operation.

DIA-26679: operation not allowed on LOB or LONG columns in LCR

Cause: Certain operations on LOB/LONG columns of the LCR through rule-based transformations, DML handlers, or error handlers were not allowed.

Action: Do not perform restricted operations on LOB or LONG columns in LCRs. See the documentation for operations that are restricted on LOB/LONG columns in LCRs.

DIA-26680: object type not supported

Cause: The specified object type is not supported.

Action: Retry with a supported object type.

DIA-26681: command type not supported

Cause: The specified command type is not supported.

Action: Retry with a supported command type.

DIA-26682: invalid value for publication_on

Cause: The publication_on parameter should be either 'Y' or 'N'

Action: Retry with a proper value for publication_on.

DIA-26683: invalid value for value_type

Cause: The value_type parameter should be either 'OLD' or 'NEW'

Action: Retry with proper value_type.

DIA-26684: invalid value for value_type

Cause: The value_type parameter should be one of 'OLD', 'NEW' or '*'

Action: Retry with proper value_type.

DIA-26685: cannot apply transactions from multiple sources

Cause: Transactions from multiple sources were sent to the same apply process.

Action: Create multiple apply processes and create appropriate rules so that transactions from only one source reach an apply process.

DIA-26686: cannot capture from specified SCN

Cause: An attempt was made to specify an invalid SCN.

Action: Retry with a valid SCN.

DIA-26687: no instantiation SCN provided for "string"."string" in source database "string"

Cause: Object SCN was not set. If the object is a table, then both fields will be filled, for example "SCOTT"."EMP". If the object is a schema, only one field will be set, for example "SCOTT"."". And if the object is the entire database, no fields will be set, for example ""."".

Action: Set the SCN by calling DBMS_APPLY_ADM.SET_%_INSTANTIATION_SCN

DIA-26688: missing key in LCR

Cause: Metadata mismatch, or not enough information in the user generated LCR.

Action: Alter the database object, or provide all defined keys in the LCR.

DIA-26689: column datatype mismatch in LCR

Cause: The datatypes of columns in the LCR are not the same as the datatypes in the database object.

Action: Alter the database object.

DIA-26690: datatype not supported at non-Oracle system

Cause: One of the columns of the LCR being applied was of a datatype not supported by either the target non-Oracle system or by the Oracle transparent gateway through which the apply is being done.

Action: Do not apply data of this type. If possible, filter out columns containing such datatypes before applying.

DIA-26691: operation not supported at non-Oracle system

Cause: The apply process attempted an operation that is either not supported by the non-Oracle system or by the Oracle transparent gateway through which the apply is being done. Some kinds of DML (like procedure and function calls) and all DDL will cause this error to be raised.

Action: Do not attempt to apply such LCRs to non-Oracle systems. If possible, filter out such LCRs before applying.

DIA-26692: invalid value *string*, *string* should be in *string* format

Cause: The parameter specified was not in the correct format.

Action: Specify the parameter value in the correct format.

DIA-26693: *string string* process dropped successfully, but error occurred while dropping rule set *string*

Cause: An attempt to drop an unused rule set failed after dropping the GoldenGate, XStream or Streams process successfully.

Action: Check existence of rule set and manually drop if necessary.

DIA-26694: error while enqueueing into queue *string.string*

Cause: An error occurred while enqueueing a message.

Action: If the situation described in the next error on the stack can be corrected, do so.

DIA-26695: error on call to *string*: return code *string*

Cause: A locking related call failed.

Action: Try the call again after fixing the condition indicated by the return code.

DIA-26696: no *string* data dictionary for object with number *string* and version number *string* from source database *string*

Cause: An attempt to access the database object failed because the data dictionary for the object was either never populated or it was purged.

Action: Make sure the GoldenGate, XStream or Streams data dictionary is created by calling DBMS_CAPTURE_ADM.PREPARE_%_INSTANTIATION.

DIA-26697: LCR contains extra column '*string*'

Cause: The LCR contained more columns than the replicated table.

Action: Alter the database object.

DIA-26698: *string* did not have a *string* rule set

Cause: The GoldenGate, XStream or Streams client does not have a rule set of the indicated type.

Action: Verify that the GoldenGate, XStream or Streams client has a rule set of the specified type, and retry the operation.

DIA-26699: *string* message consumer *string* already exists

Cause: An attempt was made to create a GoldenGate, XStream or Streams message consumer that already exists.

Action: Either specify another message consumer or remove the existing GoldenGate, XStream or Streams message consumer.

DIA-26701: *string* process *string* does not exist

Cause: An attempt was made to access a GoldenGate, XStream or Streams process which does not exist.

Action: Check with the relevant security views for the correct name of the object.

DIA-26705: cannot downgrade capture process after Streams data dictionary has been upgraded

Cause: An attempt was made to downgrade a capture process after it has upgraded the GoldenGate, XStream or Streams data dictionary.

Action: Drop the capture process before attempting the downgrade.

DIA-26706: cannot downgrade capture process

Cause: An attempt was made to downgrade a capture process that has a higher version than the downgrade release version.

Action: Drop the capture process after capture has finished consuming all the redo logs before attempting the downgrade.

DIA-26708: remote DDL not supported by STREAMS : *dblink string*

Cause: The apply process attempted to apply a DDL LCR via a *dblink*. This is not supported.

Action: Do not attempt to apply DDL LCRs via a *dblink*. If possible, filter out DDL LCRs before applying.

DIA-26709: remote file server (RFS) restart due to real-time mining change in Oracle GoldenGate

Cause: The remote file server (RFS) process was restarted due to a change in the real-time mining option of Oracle GoldenGate.

Action: No action required. This is an informational message only.

DIA-26710: incompatible version marker encountered during Capture

Cause: Capture process cannot mine redo from a version higher than the current software release version.

Action: Drop and recreate the capture process.

DIA-26711: remote table does not contain a primary key constraint

Cause: The master table for remote apply does not contain a primary key constraint or the primary key constraint has been disabled.

Action: Create a primary key constraint on the master table or enable the existing constraint.

DIA-26712: remote object is "*string*"."*string*"\@"*string*"

Cause: See the preceding error message to identify the cause. This message names the remote object, usually a table or view, for which an error occurred when GoldenGate, XStream or Streams tried to access it for remote apply.

Action: See the preceding error message.

DIA-26713: remote object does not exist or is inaccessible

Cause: GoldenGate, XStream or Streams replication could not access the named table or view at a remote database to apply changes.

Action: Confirm that the given remote table or view exists and is accessible through the given database link. When using a Heterogeneous Services database link to access a non-Oracle system, it may be necessary to check administration details for network connections at the non-Oracle system.

DIA-26714: User Error *string* encountered during apply process

Cause: An error was encountered during an apply process.

Action: Query the DBA_APPLY_ERROR view to determine the error and take the appropriate action.

DIA-26715: time limit reached

Cause: The specified time limit was reached for the GoldenGate, XStream or Streams process.

Action: Restart the GoldenGate, XStream or Streams process, increasing the TIME_LIMIT parameter if necessary.

DIA-26716: message limit reached

Cause: The specified message limit was reached for the Capture process.

Action: Restart the Capture process, increasing the MESSAGE_LIMIT parameter if necessary.

DIA-26717: SCN limit reached

Cause: The specified SCN limit was reached for the GoldenGate, XStream or Streams process.

Action: Change the MAXIMUM_SCN parameter, then restart the GoldenGate, XStream or Streams process.

DIA-26718: transaction limit reached

Cause: The specified transaction limit was reached for the Apply process.

Action: Restart the Apply process, increasing the TRANSACTION_LIMIT parameter if necessary.

DIA-26721: enqueue of the LCR not allowed

Cause: An apply process attempted to enqueue an LCR with a LONG column. This is not supported.

Action: Modify rules or unset the enqueue destination to prevent LCRs with LONG columns from being enqueued by the apply process.

DIA-26723: user "*string*" requires the role "*string*"

Cause: The caller did not have the specified role or called the procedure from a definer's rights package or procedure.

Action: Grant the specified role to the caller. If the procedure is called from a definer's rights package or procedure, change the definer's rights package or procedure to an invoker's rights package or procedure. Or grant all the privileges for the specified role explicitly.

DIA-26724: only SYS is allowed to set the Capture or Apply user to SYS.

Cause: The Capture or Apply user was specified as SYS by a user other than SYS.

Action: Set SYS as the Capture or Apply user while logged in as SYS.

DIA-26725: cannot downgrade apply handlers

Cause: An attempt was made to downgrade apply handlers that are not associated with a local database object, or the apply handlers are associated with a specific apply process.

Action: Drop the associated apply handlers before attempting the downgrade.

DIA-26726: standby and DOWNSTREAM_REAL_TIME_MINE are incompatible

Cause: An attempt was made to set the standby database and DOWNSTREAM_REAL_TIME_MINE option of the Oracle GoldenGate, XStream or Oracle Streams capture process on the same database.

Action: Do not attempt to set the DOWNSTREAM_REAL_TIME_MINE option for a Oracle GoldenGate, XStream or Oracle Streams capture process on a standby database. Do not attempt to change a database role to standby if there exists a capture process with the DOWNSTREAM_REAL_TIME_MINE parameter set to Y.

DIA-26727: Cannot alter queue_to_queue property of existing propagation.

Cause: The queue_to_queue property was specified for an existing propagation.

Action: Pass NULL for the queue_to_queue argument.

DIA-26730: *string* '*string*' already exists

Cause: An attempt to use FILE GROUP, FILE GROUP VERSION, or FILE GROUP FILE failed because the item in question already exists.

Action: Remove the object if appropriate and re-attempt the operation.

DIA-26731: *string* '*string*' does not exist

Cause: A FILE GROUP, FILE GROUP VERSION, or FILE GROUP FILE was specified that does not exist.

Action: Make sure the object exists and re-attempt the operation.

DIA-26732: invalid file group *string* privilege

Cause: The specified privilege number that was specified is invalid.

Action: Check specification of `dbms_file_group` for valid privileges.

DIA-26733: timed-out waiting for file group lock

Cause: The procedure waited too long while getting a lock to perform a file group repository operation.

Action: Retry the operation.

DIA-26734: different datafiles_directory_object parameter must be specified

Cause: The attempted operation involved datafiles platform conversion which required the `datafiles_directory_object` parameter to be specified for placing the converted data files.

Action: Retry the operation after specifying a valid `datafiles_directory_object` parameter. This directory must be different from the directory objects for any of the datafiles for the specified file group version.

DIA-26735: operation not allowed on the specified file group version

Cause: One or more datafiles or export dump file(s) were missing from the specified file group version.

Action: Retry the operation after adding all the data files and Data Pump dump file(s) to the specified version.

DIA-26736: Data Pump error

Cause: A Data Pump error occurred when the procedure performed a File Group Repository operation.

Action: Check the error stack and trace file for error details.

DIA-26737: version *string* already has an export dump file

Cause: A Data Pump dump file was added to a file group version that already has a dump file.

Action: Remove the existing dump file if appropriate, and retry the operation.

DIA-26738: *string 'string'* is not empty

Cause: The FILE GROUP or FILE GROUP VERSION being dropped contained objects.

Action: Remove the child objects, then retry the operation.

DIA-26740: cannot downgrade because there are file groups

Cause: An attempt was made to downgrade a database that has file groups.

Action: Drop all file groups before attempting the downgrade.

DIA-26741: cannot assemble lob

Cause: An attempt was made to assemble lob, but the compatibility of the source database for the LOB information is lower than 10.2.0.

Action: Set `ASSEMBLE_LOBS` to `FALSE` in the DML or error handler while this handler is processing LOB information from a source database with a compatibility level lower than 10.2.0.

DIA-26742: Maximum number of ignored transactions exceeded

Cause: An attempt was made to add more than the allowed number of ignored transactions.

Action: Please clear the current list of ignored transactions.

DIA-26744: *string* capture process "*string*" does not support "*string*".*string* because of the following reason: *string*

Cause: GoldenGate, XStream or Streams capture encountered a table with an unsupported property. The most common reason is an unsupported column data type.

Action: Revise the Capture rules to skip over the table in question. One way might be to add a negative rule excluding changes from the unsupported table from being captured. Streams: Also query the DBA_STREAMS_UNSUPPORTED view to determine which tables are not supported by Streams and for what reason. Consider adding negative rules for any tables that may be captured, but are present in this view. XStream: Also query the DBA_XSTREAM_OUT_SUPPORT_MODE view to determine which tables are not supported by XStream and for what reason. Consider adding negative rules for any tables that may be captured, but are present in this view. GoldenGate: Also query the DBA_GOLDENGATE_SUPPORT_MODE view to determine which tables are not supported by GoldenGate and for what reason. Consider adding EXCLUDETABLE statements for any tables that may be captured, but are present in this view. For potential workarounds to certain unsupported properties, see Metalink.

DIA-26745: cursors (*string*) are not sufficient

Cause: The maximum number of open cursors was too small for GoldenGate, XStream or Streams Apply.

Action: Increase the value of open_cursors.

DIA-26746: DDL rule "*string*".*string* not allowed for this operation

Cause: A DDL rule was specified for this operation.

Action: Specify a non-DDL rule for this operation.

DIA-26747: The one-to-many transformation function *string* encountered the following error: *string*

Cause: The specified transformation function encountered an error.

Action: Ensure that the function does not process or return DDL LCRs. Also ensure that the function does not return NULL.

DIA-26748: The one-to-one transformation function *string* encountered the following error: *string*

Cause: The specified transformation function encountered an error.

Action: Ensure that the function does not return an LCR that has a different type from the LCR which was passed to the function. Also ensure that the function does not return NULL. For DDL transformation functions, creating and returning a new DDL LCR is not allowed.

DIA-26752: Unsupported LCR received for "*string*".*string*

Cause: GoldenGate, XStream or Streams capture process received an LCR with unsupported operation from LogMiner.

Action: Stream: If this object is listed in DBA_STREAMS_UNSUPPORTED view, modify rules to prevent changes made to this object from getting captured. XStream: If this object is listed in DBA_XSTREAM_OUT_SUPPORT_MODE view, modify rules to prevent changes made to this object from getting captured. GoldenGate: If this object is listed in DBA_GOLDENGATE_SUPPORT_MODE view, modify rules to prevent changes made to this object from getting captured.

DIA-26753: Mismatched columns found in 'string.string'

Cause: The columns in the LCR were not the same as the table in the database.

Action: Alter the database table.

DIA-26754: cannot specify both one-to-one transformation function *string* and one-to-many transformation function *string*

Cause: Both a one-to-one transformation function and a one-to-many transformation function were specified for a rule.

Action: Remove either the one-to-one transformation function, or the one-to-many transformation function.

DIA-26760: Could not find message number *string* for transaction with id *string*

Cause: Error

Action: Contact Oracle support"

DIA-26761: Standby Redo Logs not available for real time mining

Cause: Standby Redo Logs required for real time mining by downstream capture process were not available.

Action: Check the configuration of Standby Redo Logs and retry the operation at a later time. To start the capture process without real time mining property, reset DOWNSTREAM_REAL_TIME_MINE parameter of the capture process and retry the operation.

DIA-26762: Cannot autogenerate name for parameter *string* because of the following reason: *string*

Cause: An error was encountered while attempting to generate a name for a parameter which was passed a NULL value.

Action: If possible, fix the error, otherwise specify the parameter name explicitly.

DIA-26763: invalid file type "*string*"

Cause: An invalid file type was specified for the ASM file.

Action: Check documentation for valid ASM file types.

DIA-26764: invalid parameter "*string*" for local capture "*string*"

Cause: An invalid parameter was specified for the local capture process.

Action: Check documentation for valid parameters.

DIA-26765: invalid parameter "*string*" for downstream capture "*string*"

Cause: An invalid parameter was specified for the downstream capture process.

Action: Check documentation for valid parameters.

DIA-26766: Unexpected redo pattern encountered by LogMiner

Cause: LogMiner encountered an unexpected redo pattern. This is usually caused by tables with unsupported data types or newer table features.

Action: Remove the capture rule for the table and restart capture.

DIA-26767: Not enough redo log information for LogMiner

Cause: Direct-path SQL with NOLOGGING option or a SQL*Loader operation with UNRECOVERABLE clause was specified for the table.

Action: Remove the capture rule for the table and restart capture.

DIA-26768: Maximum number of unsupported tables exceeded

Cause: An attempt was made to add more than the allowed number of unsupported tables.

Action: Clear the current list of unsupported tables.

DIA-26781: Nested table not supported

Cause: Any DML to Nested table is not supported if the table or its parent is being replicated.

Action: n/a

DIA-26785: Object has a NULL value

Cause: A method was invoked on a NULL object.

Action: Initialize the object with a non-NULL value.

DIA-26786: A row with key *string* exists but has conflicting column(s) *string* in table *string*

Cause: The row to update or delete exists in the table but had conflicting value for some columns.

Action: For Streams and XStream, please define a conflict resolution, or resolve the conflict and execute the error transaction using DBMS_APPLY_ADM.EXECUTE_ERROR. For logical standby, please verify the status of the database guard to ensure local modifications are not allowed, then re-instantiate the table and contact support if the problem persists. For GoldenGate, configure Conflict Resolution (CDR) or REPERROR handler for the table and restart replicat.

DIA-26787: The row with key *string* does not exist in table *string*

Cause: The row to update or delete does not exist in the table.

Action: For Streams and XStream, please define a conflict resolution, or resolve the conflict and execute the error transaction using DBMS_APPLY_ADM.EXECUTE_ERROR. For logical standby, please verify the status of the database guard to ensure local modifications are not allowed, then re-instantiate the table and contact support if the problem persists. For GoldenGate, configure Conflict Resolution (CDR) or REPERROR handler for the table and restart replicat.

DIA-26788: The column *string* is not encrypted in the local database.

Cause: The column in the destination database is NOT encrypted while it is encrypted in the source database.

Action: Set the corresponding column property in the destination database to 'encrypted' or change the apply parameter, PRESERVE_ENCRYPTED_COLS, to 'N' to suppress the error.

DIA-26789: Cannot split propagation *string* because only one propagation originates from its source queue "*string*".*string*"

Cause: Only one propagation originated from the propagation source queue.

Action: Please do not split this propagation.

DIA-26790: Requesting a lock on *string* "*string*" timed out

Cause: Could not get a lock on the object because another process was holding the lock.

Action: Please try later.

DIA-26791: Cannot split or merge propagation "*string*"

Cause: A process tried to split or merge this propagation, but failed and left STREAMS in an inconsistent state.

Action: Query DBA_RECOVERABLE_SCRIPT_BLOCKS view, and roll back the script which tried to split or merge this propagation.

DIA-26792: Invalid source database name *string*

Cause: The value for the source database global name was not valid.

Action: Specify a valid database global name. If the source database is not the local database, check the listener is up and running.

DIA-26793: Number of capture processes that enqueued message to queue "*string*".*string*" not equal to one

Cause: Split-merge API requires only one capture process enqueued message to the queue where the propagation originated

Action: Please drop one capture, or split or merge another propagation.

DIA-26794: Hierarchically enabled tables not supported

Cause: Hierarchically enabled tables are not supported.

Action: Disable hierarchy for the table.

DIA-26795: Cannot modify an LCR received from an XStream outbound server

Cause: An attempt was made to modify an LCR generated by an XStream outbound server.

Action: Clone the LCR generated by the XStream outbound server by using the provided OCILCR* functions, such as OCILCRNew, OCILCRHeaderSet, and OCILCRRowColumnInfoSet. Then modify the cloned LCR.

DIA-26798: LOB logical change record (LCR) missing LOB column in table "*string*".*string*"

Cause: The apply slave could not fill update LOB because of missing LOB column.

Action: Check that all LOB columns have been sent correctly.

DIA-26799: unique constraint *string.string* violated for table *string.string* with column values *string*

Cause: The row to update or insert violated the unique constraint.

Action: For XStreams, define a conflict resolution, or resolve the conflict and execute the error transaction using DBMS_APPLY_ADM.EXECUTE_ERROR.

DIA-26800: Apply not the only subscriber for "string"."string".

Cause: The combined capture and apply optimization could not be used since Apply was not the lone subscriber to the queue.

Action: Apply has to be the only subscriber to the queue.

DIA-26801: More than one subscriber for "string"."string".

Cause: Multiple subscribers were found when the combined capture and apply optimization was configured to only work for one subscriber.

Action: Configure a single subscriber, apply or propagation for the queue, or enable the optimization for multiple subscribers.

DIA-26802: Queue "string"."string" has messages.

Cause: The combined capture and apply optimization could not be used since the queue had messages.

Action: Make sure queue is empty before starting apply and capture.

DIA-26803: Subscribers have changed for queue "string"."string".

Cause: The combined capture and apply optimization could not be used since the subscribers had changed.

Action: Optimization can be used only if the queue has a single subscriber.

DIA-26804: Apply "string" is disabled.

Cause: The apply process was disabled or aborted.

Action: Start the apply process.

DIA-26805: Queue "string"."string" has rule based subscribers.

Cause: The combined capture and apply optimization could not be used since the queue had rule based subscribers.

Action: Make sure queue has no rule based subscribers before starting apply and capture.

DIA-26806: Remote database could not support combined capture and apply optimization.

Cause: The remote database has a version lower than Oracle 11.0 and hence does not understand combined capture and apply optimization.

Action: Upgrade the remote database to Oracle 11.0 or above in order to use the combined capture and apply optimization.

DIA-26807: Database link is not NULL for Apply with the name "string" .

Cause: The combined capture and apply optimization could not be used since apply_database_link was not NULL.

Action: Drop and recreate the apply with NULL value for apply_database_link.

DIA-26808: Apply process string died unexpectedly.

Cause: Apply process died unexpectedly.

Action: Check your system for anomalies and restart apply. If this error persists, contact Oracle Support Services. See trace file for more details.

DIA-26809: Capture aborted: checkpoint-free mode requires combined capture and apply mode.

Cause: The requirements for combined capture and apply mode were broken.

Action: Restore the combined capture and apply mode and then restart the capture. If combined capture and apply mode is no longer desired, drop the existing checkpoint-free capture and create another one that will take checkpoints.

DIA-26810: Apply "*string*" on database "*string*" is in the mode of combined capture and apply.

Cause: The combined capture and apply optimization could not be used because Apply was already in the mode of combined capture and apply.

Action: Do not configure two captures for one apply.

DIA-26811: Client has already attached to *string* apply "*string*".

Cause: The client has already attached to the specified apply process.

Action: Detach apply process before reattach.

DIA-26812: An active session currently attached to XStream server "*string*".

Cause: An attempt was made to attach to the specified XStream server while another session was attached to it.

Action: Retry when there is no session attaching to the specified XStream server.

DIA-26813: The value for argument "ARRAY_SIZE" is too small

Cause: The value for argument "ARRAY_SIZE" was less than the number of columns in the requested column list.

Action: Check the return value for "NUM_COLUMNS" parameter then allocate all input arrays to at least that size and invoke the same OCI function again.

DIA-26814: The value for argument *string* exceeds maximum *string*

Cause: The value for specified value exceeded the maximum allowed.

Action: Correct the value of specified argument.

DIA-26815: Error from Apply Network Receiver for Apply "*string*" and Capture "*string*".

Cause: The Apply Network Receiver aborted due to an unexpected error.

Action: Query DBA_APPLY_ERROR to determine the error and then restart the Capture and Apply.

DIA-26816: *string* apply process "*string*" (OS id *string*) is exiting due to ORA-*string*.

Cause: An apply process encountered an unexpected error.

Action: Query DBA_APPLY to examine the status of Apply and restart Apply if needed.

DIA-26817: *string* capture process "*string*" is unable to communicate with capture server *string* during initialization.

Cause: Capture server might not be started properly

Action: Fix any errors during capture server creation and re-start capture process

DIA-26818: *string* capture process *string* receives an error from capture server.

Cause: Capture server received an error.

Action: Check log for error details.

DIA-26819: *string* capture server for apply "*string*" and capture "*string*" encounters disabled or aborted propagation "*string*".

Cause: Propagation was disabled or aborted.

Action: Start propagation.

DIA-26820: *string* capture server for apply "*string*" and propagation "*string*" becomes active and needs join capture process "*string*".

Cause: Capture server was waiting for propagation or apply to start

Action: Capture process needs restart (done automatically).

DIA-26821: No propagation process found between source queue "*string*".*string*" and destination queue "*string*".*string*".

Cause: Propagation has not been configured.

Action: Configure a propagation between specified queues and restart capture.

DIA-26822: Failure in creating capture servers (kvs error code *string*).

Cause: Failure in ksv slave creation.

Action: Identify the actual ksv error and act accordingly.

DIA-26823: *string* capture server *string* is unable to communicate with capture process "*string*".

Cause: Capture process was not started properly or was aborted.

Action: If Oracle GoldenGate, XStream or Streams capture process was stopped, then restart the capture process. Otherwise, fix any errors during the capture process creation and restart the capture process.

DIA-26824: user-defined XStream callback error

Cause: A value other than OCI_CONTINUE or OCI_SUCCESS was returned for the user-defined XStream callback function. Any returned value other than OCI_CONTINUE or OCI_SUCCESS is invalid.

Action: Verify that either OCI_CONTINUE or OCI_SUCCESS is returned from the user-defined XStream callback function.

DIA-26825: STREAMS process "*string*" is not configured as an XStream outbound server.

Cause: An attempt was made to attach to a STREAMS apply process, which was not configured as an XStream outbound server.

Action: Check the apply name or re-create the apply process as an XStream outbound server.

DIA-26826: *string* apply coordinator and apply slave are unable to communicate.

Cause: GoldenGate, XStream or Streams Apply process may have died unexpectedly.

Action: Check your system for anomalies and restart apply. If this error persists, contact Oracle Support Services. See trace file for more details.

DIA-26827: Insufficient privileges to attach to XStream outbound server "*string*".

Cause: Sufficient privileges were not granted to attach to the specified XStream outbound server.

Action: Query DBA_XSTREAM_OUTBOUND view to get the connect_user value for the specified outbound server. Then modify the application to connect to the outbound server's database using this value.

DIA-26828: XStream outbound server "*string*" requires combined capture and apply mode.

Cause: The specified XStream outbound server was not in combined capture and apply mode.

Action: Restore the combined capture and apply mode and then restart the capture.

DIA-26829: Cannot set "DISABLE_ON_ERROR" parameter to 'N'.

Cause: An attempt was made to change the "DISABLE_ON_ERROR" parameter for an XStream outbound server to 'N'.

Action: Remove invalid statement.

DIA-26830: Cannot define handler for an XStream outbound server.

Cause: An attempt was made to define a handler for an XStream outbound server.

Action: Remove invalid statement.

DIA-26831: Cannot delete or execute error transaction from XStream outbound server "*string*".

Cause: An attempt was made to delete or execute an error transaction from the specified XStream outbound server.

Action: Remove invalid statement.

DIA-26832: Unable to create XStream outbound server "*string*" due to existing handler.

Cause: An attempt was made to create the specified XStream outbound server while there was a handler defined for the specified server.

Action: Use DBMS_APPLY_ADM.SET_DML_HANDLER procedure to remove all handlers defined on the specified server then retry statement.

DIA-26833: *string* failed to update acknowledgment SCN for propagation "*string*" from capture "*string*" to apply "*string*".

Cause: propagation might have been modified after GoldenGate, XStream or Streams was started.

Action: Ensure propagation is configured properly and restart GoldenGate, XStream or Streams.

DIA-26834: Unable to alter parameter '*string*' because *string* capture process is not configured to run locally

Cause: An attempt was made to alter the specified capture parameter when the GoldenGate, XStream or Streams capture process was not configured to run on the local database.

Action: Remove the invalid parameter or use DBMS_CAPTURE_ADM.ALTER_CAPTURE procedure to alter the parameter.

DIA-26835: The source database for XStream outbound server "*string*" is invalid

Cause: An attempt was made to add an XStream outbound server with a source database that was different from the associated capture's source database.

Action: Correct the value for the 'source_database' parameter in the call.

DIA-26836: The specified rules must be created from the same subsetting condition

Cause: An attempt was made to remove an outbound server's subset rules when the specified INSERT, UPDATE, and DELETE rules were not created from the same subsetting condition.

Action: Correct the rules in the statement.

DIA-26837: Server "*string*" is not an XStream inbound server

Cause: An attempt was made to execute a procedure not appropriate on an XStream inbound server.

Action: Replace with a procedure appropriate for an XStream inbound server and resubmit.

DIA-26838: Setting apply parameter "*string*" is not permitted for XStream Outbound Server

Cause: An attempt was made to set an apply parameter that was not applicable for XStream Outbound Server.

Action: Configure XStream Outbound Server using valid parameters. Check the documentation for valid parameter values.

DIA-26839: Apply tag for apply "*string*" is not permitted for XStream Outbound Server

Cause: An attempt was made to set an apply tag that was not applicable for XStream Outbound Server.

Action: Do not set the apply tag when using XStream Outbound Server.

DIA-26840: Combined capture and apply optimization is disabled because *string* is unable to identify an apply for the source database "*string*".

Cause: There were multiple Streams apply processes using the same queue which made combined capture and apply (CCA) optimization not possible.

Action: If Streams performance is an issue, check the "Combined Capture and Apply Optimization" chapter in the "Oracle Streams Concepts and Administration" book. Then reconfigure the Streams processes to meet this optimization's requirements.

DIA-26841: No subscribers are found for queue "*string*". "*string*".

Cause: No propagation or apply was configured for the specified queue.

Action: Configure propagation or apply for the specified queue.

DIA-26842: Setting apply directive "*string*" is not permitted for XStream Outbound Server

Cause: An attempt was made to set an apply directive that was not applicable for XStream Outbound Server.

Action: Configure XStream Outbound Server using valid directives. Check the documentation for valid directives.

DIA-26843: Local propagation "*string*" found for capture queue "*string*". "*string*".

Cause: The combined capture and apply optimization could not be used because a local propagation was attached to the capture queue.

Action: Remove the local propagation and restart capture.

DIA-26844: Found "*string*" active automatic split jobs for *string* Capture "*string*" in DBA_STREAMS_SPLIT_MERGE

Cause: Only one active split job is allowed for each GoldenGate, XStream or Streams Capture, but multiple active automatic split jobs were found in DBA_STREAMS_SPLIT_MERGE.

Action: Check trace to see how the jobs were submitted and drop them.

DIA-26845: Found "*string*" active split rows with the same cloned *string* Capture "*string*" in DBA_STREAMS_SPLIT_MERGE

Cause: In DBA_STREAMS_SPLIT_MERGE, for active split rows, the column CLONED_CAPTURE_NAME should be unique. However, multiple rows were found whose ACTION_TYPE column is 'SPLIT', ACTIVE column is 'ACTIVE' and have the same CLONED_CAPTURE_NAME.

Action: Check trace to see how the rows were inserted and call DBMS_STREAMS_ADM.RECOVER_OPERATION() for error recovery.

DIA-26846: Found "*string*" active automatic merge jobs for cloned *string* Capture "*string*" in DBA_STREAMS_SPLIT_MERGE

Cause: Only one active merge job is allowed for each cloned GoldenGate, XStream or Streams Capture, but multiple active automatic merge jobs were found in DBA_STREAMS_SPLIT_MERGE.

Action: Check trace to see how the jobs were submitted and drop them.

DIA-26847: Found invalid *string* type: "*string*"

Cause: Invalid GoldenGate, XStream or Streams type to split off was found. Type should only be 'PROPAGATION'(1) or 'APPLY'(2).

Action: Check trace to see how the invalid GoldenGate, XStream or Streams type was created and correct it.

DIA-26848: Split a nonexistent Streams Capture process "*string*" in job "*string*"

Cause: The job attempted to split a non-existent original Streams Capture.

Action: Drop the split job, or wait until the Streams Capture comes to existence.

DIA-26849: Split a nonsplittable *string* Capture process "*string*" in job "*string*"

Cause: The job tried to split a GoldenGate, XStream or Streams Capture that was not splittable. That is, the Capture either had less than two subscribers, or it was not the only Capture of its queue.

Action: Drop the split job, or wait until the GoldenGate, XStream or Streams Capture becomes splittable.

DIA-26850: Changes to queue subscribers were detected by *string* capture process.

Cause: The subscribers for capture queue might have changed.

Action: Capture process will restart automatically.

DIA-26851: Unable to connect to apply "*string*" because it has connected to another capture.

Cause: Another capture process is already connected to apply.

Action: Wait for the connected capture process to terminate or abort the connected capture process.

DIA-26852: Invalid NULL value for *column_value* parameter.

Cause: NULL is not allowed to be passed as the column value.

Action: Replace NULL with a proper AnyData instance containing NULL, e.g., `sys.AnyData.ConvertVarchar2(NULL)`, as the column value if the column value is NULL.

DIA-26853: invalid *cca* maximum percentage *string*

Cause: Specified percentage value was not in range 0 - 100.

Action: Specify a percentage value in the range 0 - 100.

DIA-26854: *string string* has no enqueue or dequeue privileges to the queue.

Cause: The GoldenGate, XStream or Streams user did not have enqueue or dequeue privilege to the queue.

Action: Grant GoldenGate, XStream or Streams user enqueue or dequeue privileges to the queue.

DIA-26855: *string string* has insufficient database privilege to access the queue.

Cause: The GoldenGate, XStream or Streams user did not have sufficient database privilege to access the queue.

Action: Grant GoldenGate, XStream or Streams user database privileges to access the queue.

DIA-26856: STREAMS *string* has insufficient database privilege to access the queue.

Cause: The GoldenGate, XStream or Streams user did not have sufficient database privilege to access the queue.

Action: Grant GoldenGate, XStream or Streams user database privileges to access the queue.

DIA-26857: LCR position cannot be null (*XID=string*).

Cause: The position of an LCR in the specified transaction was null.

Action: Use OCILCRHeaderSet to define the LCR position.

DIA-26858: LCR position must be strictly increasing (XID='string', LCR position='string', previous position='string').

Cause: The position of an LCR in the specified transaction was less than or equal to the previous LCR in transaction.

Action: Use OCILCRHeaderSet to correct the LCR position.

DIA-26859: Server "string" is not an XStream outbound server

Cause: An attempt was made to execute a procedure not appropriate on an XStream outbound server.

Action: Replace with a procedure appropriate for an XStream outbound server and resubmit.

DIA-26860: Different transactions must have different transaction IDs (XID='string', LCR position='string', previous commit position='string').

Cause: The position of an LCR in the specified transaction was greater than the position of the previous commit LCR in transaction with same transaction ID.

Action: Use different transaction IDs for different transactions.

DIA-26862: LCR position must be greater than the processed low position of the XStream inbound server (XID='string', LCR position='string').

Cause: The position of a logical change record (LCR) in the specified transaction was less than or equal to the processed low position of the XStream inbound server.

Action: Use OCILCRHeaderSet to correct the LCR position.

DIA-26863: Job "string" showing as an active job in DBA_STREAMS_SPLIT_MERGE does not exist in DBA_SCHEDULER_JOBS.

Cause: An active job showing in DBA_STREAMS_SPLIT_MERGE did not exist. It may have been dropped accidentally or something was wrong with it.

Action: Check trace to identify the problem and call DBMS_STREAMS_ADM.RECOVER_OPERATION() for error recovery.

DIA-26864: Error occurred in string automatic job: "string"

Cause: An error has happened inside GoldenGate, XStream or Streams automatic job.

Action: Check trace for more detail.

DIA-26865: must send a COMMIT LCR to end transaction 'string' before sending another transaction

Cause: An attempt was made by a client application to send LCRs for a new transaction before sending a COMMIT LCR for the specified transaction.

Action: Modify the client application to send a COMMIT LCR at the end of the specified transaction.

DIA-26866: The Queue of string Apply process "string" is not changeable.

Cause: Not all of the conditions for the Queue of a GoldenGate, XStream or Streams Apply process to be changeable were met. Conditions are: -The Apply process is not running. -The Apply process has no error. -The Apply process has no spilling. -The Apply process is not used for XStream Outbound or Inbound Servers. -The Apply process is a local Apply process. -The corresponding GoldenGate, XStream or Streams Capture process should be stopped.

Action: Make sure all of the conditions are met.

DIA-26867: *string* must be called during OCIXStreamOutLCRReceive execution

Cause: An attempt was made to execute the specified function while OCIXStreamOutLCRReceive call was not in progress.

Action: Check your program and make sure the specified call is invoked during OCIXStreamOutLCRReceive callback function.

DIA-26868: *string* must be called during OCIXStreamInLCRSend execution

Cause: An attempt was made to execute the specified function while OCIXStreamInLCRSend call was not in progress.

Action: Check your program and make sure the specified call is invoked during OCIXStreamInLCRSend callback function.

DIA-26869: must attach to an XStream inbound server before executing *string* function

Cause: An attempt was made to invoke the specified function before executing OCIXStreamInAttach call.

Action: Add OCIXStreamInAttach call before the specified function.

DIA-26870: cannot call *string* while OCIXStreamInLCRCallbackSend call is still executing.

Cause: An attempt was made to invoke the specified call while OCIXStreamInLCRCallbackSend call was executing.

Action: Check your program and remove the specified call when there is an OCIXStreamInLCRCallbackSend call in progress.

DIA-26871: unexpected *string* call (expecting *string*)

Cause: Could be one of the following reasons: 1) An attempt was made to invoke OCIXStreamInChunkSend when the most recent LCR or chunk sent did not have the OCI_XSTREAM_MORE_ROW_DATA flag set; 2) An attempt was made to invoke OCIXStreamInLCRSend when the most recent LCR or chunk sent had OCI_XSTREAM_MORE_ROW_DATA flag set.

Action: n/a

DIA-26872: must attach to an XStream outbound server before executing *string* function

Cause: An attempt was made to invoke the specified function before executing OCIXStreamOutAttach call.

Action: Add OCIXStreamOutAttach call before the specified function.

DIA-26873: cannot call *string* while OCIXStreamOutLCRCallbackReceive call is still executing.

Cause: An attempt was made to invoke the specified call while OCIXStreamOutLCRCallbackReceive call was executing.

Action: Check your program and remove the specified call when there is an OCIXStreamOutLCRCallbackReceive call in progress.

DIA-26874: *string* Capture process "*string*" cannot be split.

Cause: An attempt was made to split a GoldenGate, XStream or Streams Capture process that could not be split. That is, the Capture process either had less than two subscribers, or it was not the only Capture process of its queue.

Action: Wait until the GoldenGate, XStream or Streams Capture process can be split.

DIA-26875: Timeout while *string* automatic split job "*string*" waits for the subscriber "*string*" of Capture process "*string*" to acknowledge split

Cause: To split a subscriber of a GoldenGate, XStream or Streams Capture process, an automatic split job needs to wait until the subscriber acknowledges the split. The wait timed out.

Action: n/a

DIA-26876: invalid processed low-watermark (current position=*string*; new position=*string*)

Cause: An attempt was made to set the processed low-watermark to a value that was less than the current processed low-watermark.

Action: Correct the processed low-watermark in OCIXStreamOutProcessedLWMSets call.

DIA-26877: must reattach after an OCIXStreamOut call was interrupted

Cause: An attempt was made to execute another OCIXStreamOut API when an earlier call was interrupted because the XStream outbound server was disabled or the client requested cancellation of the operation.

Action: Execute OCIXStreamOutAttach call to reattach to the same XStream outbound server.

DIA-26878: inconsistent input LCR (LCR is '*string*' type, expecting '*string*')

Cause: An attempt was made to send an LCR that was not consistent with the specified LCR type.

Action: Correct your application to specify an LCR type that agrees with the LCR to be sent.

DIA-26879: "SET_ENQUEUE_DESTINATION" directive is not permitted on rules used by XStream outbound server "*string*"

Cause: One or more rules, used by the specified XStream outbound server, had SET_ENQUEUE_DESTINATION directive defined.

Action: Execute the following: 1) Execute query SELECT xr.rule_owner, xr.rule_name, xr.rule_set_owner, xr.rule_set_name FROM dba_apply_enqueue e, dba_xstream_rules xr WHERE e.rule_owner = xr.rule_owner AND e.rule_name = xr.rule_name AND xr.streams_name = *specified outbound server*; 2) For each rule returned, execute DBMS_APPLY_ADM.SET_ENQUEUE_DESTINATION procedure to set the destination queue to null, or execute DBMS_RULE_ADM.REMOVE_RULE to remove that rule from its associated rule set.

DIA-26880: "SET_EXECUTE" directive is not permitted on rules used by XStream outbound server "*string*"

Cause: One or more rules, used by the specified XStream outbound server, had SET_EXECUTE directive defined.

Action: Execute the following: 1) Execute query SELECT xr.rule_owner, xr.rule_name, xr.rule_set_owner, xr.rule_set_name FROM dba_apply_execute e, dba_xstream_rules xr

WHERE e.rule_owner = xr.rule_owner AND e.rule_name = xr.rule_name AND xr.streams_name = *specified outbound server*; 2) For each rule returned, use DBMS_APPLY_ADM.SET_EXECUTE procedure to set the EXECUTE parameter to TRUE, or use DBMS_RULE_ADM.REMOVE_RULE to remove that rule from its associated rule set.

DIA-26881: ORA-string: string raised in string automatic string job:"string"."string" for Capture process "string" and cloned Capture process "string".

Cause: An error was raised in a GoldenGate, XStream or Streams automatic split/merge job for the given original and cloned Capture processes.

Action: Check the corresponding split/merge row in DBA_STREAMS_SPLIT_MERGE view, alert log and trace file for details.

DIA-26882: Timeout while string automatic split/merge job:"string"."string" tried to lock Capture process "string".

Cause: The GoldenGate, XStream or Streams Capture process could be locked by other automatic split/merge jobs.

Action: No action required. The GoldenGate, XStream or Streams automatic split/merge job will retry automatically.

DIA-26883: Timeout due to string Apply process "string" while merge original Capture process "string" and cloned Capture process "string".

Cause: When merging two GoldenGate, XStream or Streams Capture processes, the merge needs to wait until the Apply process of the cloned Capture process goes ahead of the slowest subscriber of the original Capture process. This wait timed out.

Action: Make sure the GoldenGate, XStream or Streams Apply process still works properly.

DIA-26884: Not allowed to specify OCI_LCR_ROW_COLVAL_OLD with OCILCR_NEW_ONLY_MODE.

Cause: An attempt was made to call OCILCRRowColumnInfoGet function with OCI_LCR_ROW_COLVAL_OLD and OCILCR_NEW_ONLY_MODE.

Action: Change OCI_LCR_ROW_COLVAL_OLD to OCI_LCR_ROW_COLVAL_NEW or remove OCILCR_NEW_ONLY_MODE argument.

DIA-26885: OCIXStreamInCommit called before OCIXStreamInFlush

Cause: An attempt was made to call OCIXStreamInCommit before calling OCIXStreamInFlush.

Action: Call OCIXStreamInFlush prior to calling OCIXStreamInCommit.

DIA-26886: LCR commit position ('string') must be greater than the applied high position of the XStream inbound server (position='string').

Cause: The position of the commit logical change record (LCR) was less than or equal to the applied high position of the XStream inbound server.

Action: Set the commit position higher than the applied high position.

DIA-26887: Insufficient privileges to attach to XStream inbound server "string".

Cause: Sufficient privileges were not granted to attach to the specified XStream inbound server.

Action: Query DBA_XSTREAM_INBOUND view to get the apply_user value for the specified XStream outbound server. Then, modify the application to connect to the inbound server's database using this value.

DIA-26888: Redo compatibility must be release 10.2 or later.

Cause: XStream Out redo compatibility was not release 10.2 or later.

Action: Drop the outbound server.

DIA-26889: LOB assembly not supported for PDML parent transaction *string*, child transaction *string*.

Cause: LOB assembly is not supported for PDML transactions.

Action: Disable LOB assembly, or filter out the PDML transaction.

DIA-26890: Invalid update LCR on Oracle Sequence "*string*".*string*"

Cause: The new value column list of an update LCR on an Oracle Sequence did not have non-null columns "CYCLE#", "INCREMENT\$", "CACHE" and "HIGHWATER".

Action: Make sure the new value column list has all the required columns. This might be a user error if the LCR is from an XStream In client.

DIA-26891: Target Oracle Sequence "*string*".*string*" has inconsistent parameters with the source.

Cause: The source and target Oracle Sequences did not have the identical cache size, increment value, and cycle flag needed for replication purposes.

Action: Make sure the source and target Oracle Sequences have identical parameters. This might be a user error if the LCR is from an XStream In client.

DIA-26892: XStream feature not supported

Cause: The XStream feature was not supported.

Action: No action necessary.

DIA-26893: Input LCR must be a commit LCR

Cause: The input LCR was not a commit LCR.

Action: Make sure the input LCR is a commit LCR.

DIA-26894: Invalid "*string*" in Apply Progress redo

Cause: The value of the field reported was possibly corrupted.

Action: Contact Oracle Support Services.

DIA-26895: Setting parameter "*string*" of Streams process "*string*" is only permitted for Oracle GoldenGate or XStream.

Cause: An attempt was made to set a parameter that is only allowed for XStream.

Action: Oracle GoldenGate license is needed to use this parameter.

DIA-26896: Attempted to connect multiple Oracle GoldenGate Capture processes, including "*string*", with XStream outbound server "*string*" through queue "*string*".*string*"

Cause: An attempt was made to connect multiple Oracle GoldenGate Capture processes through a queue with the XStream outbound server.

Action: Each XStream outbound server can only connect with one co-located Capture process. Remove extra Capture processes.

DIA-26897: Unable to start *string* capture "*string*" because its subscribers "*string*" and "*string*" have different purpose

Cause: An attempt was made to start an Oracle Capture process but it failed to start because its subscribers had conflicting purpose.

Action: Remove one of the specified subscribers from the capture queue.

DIA-26898: Unable to create "*string*" because there is an Oracle Capture process using the same queue "*string*". "*string*"

Cause: An attempt was made to create an inbound server using the same queue that was used by an Oracle Capture process.

Action: Resubmit the statement using another queue name.

DIA-26899: internal *string* error

Cause: An internal Streams, XStream or GoldenGate error has occurred.

Action: Please contact Oracle customer support.

DIA-26900: Streams failed to update data dictionary table for propagation "*string*" from capture "*string*" to apply "*string*".

Cause: The data dictionary table was corrupted.

Action: Validate the data dictionary table to restart GoldenGate, XStream or Streams capture process.

DIA-26901: *string* propagation sender in the combined capture and apply mode is to be suspended while apply is disabled.

Cause: The corresponding subscriber was dropped or split.

Action: No action necessary.

DIA-26902: *string* propagation sender in the combined capture and apply mode is to be suspended while apply is enabled.

Cause: The corresponding subscriber was dropped or split.

Action: No action necessary.

DIA-26903: Invalid edition name "*string*"

Cause: The edition associated with the LCR did not exist in the destination database.

Action: Check if the edition needs to be created manually on the destination database or if the CREATE EDITION statement for this edition has been applied properly on the destination database.

DIA-26904: Invalid bind variable "*string*" in LCR field expression.

Cause: In the statement handler, the bind variables listed in the SQL expression did not match the allowed Logical Change Record field names.

Action: Verify that all the bind variables listed in the expression are legal Logical Change Record fields.

DIA-26905: Invalid LCR method expression "*string*" in statement handler.

Cause: The Logical Change Record method listed was not allowed in the statement handler.

Action: Verify that the Logical Change Record method listed in the expression is a legal DBMS_LCR method.

DIA-26906: No change handler exists.

Cause: There was no change handler for the specified apply, operation, source table, change table, and capture values.

Action: Query DBA_APPLY_CHANGE_HANDLERS view to find the correct change handler.

DIA-26907: Insufficient privileges to set converge tag

Cause: Privileges were insufficient to set converge tag.

Action: The invoker needs EXECUTE_CATALOG_ROLE or execute privilege on DBMS_STREAMS_ADM to set converge tag. Grant appropriate privileges to the invoker.

DIA-26908: XStream API must be executed using a dedicated server process.

Cause: An attempt was made to execute XStream API using a shared server process.

Action: Replace the connect string in the client application to use a dedicated server process.

DIA-26909: cannot reexecute an eager error

Cause: An attempt was made to reexecute an eager error transaction. An eager transaction is applied before the apply process sees the commit or rollback for the transaction.

Action: Fix the cause of the eager error and restart the apply process. When apply is restarted, capture will automatically resend the transaction, and the transaction will be applied by the apply process.

DIA-26910: user error *string* encountered in eager mode

Cause: An error was encountered during eager apply. An eager transaction is applied before the apply process sees the commit or rollback for the transaction. If an error occurs during an eager transaction, the transaction will be rolled back.

Action: Query the DBA_APPLY_ERROR view to determine the error and take the appropriate action. The apply process will need to be restarted to apply the transaction that had the error. When apply is restarted, capture will automatically resend the transaction, and the transaction will be applied by the apply process.

DIA-26911: invalid oldest position (current position=*string*; new position=*string*)

Cause: An attempt was made to set the oldest position to a value that was less than the current value.

Action: Correct the oldest_position argument in OCIXStreamOutProcessedLWMSet2 call.

DIA-26912: not allowed to invoke '*string*' while in committed data-only mode

Cause: An attempt was made to call the specified API while the attached XStream server was in committed data-only mode.

Action: Perform one of the following: 1) If the invalid call is OCIXStreamOutProcessedLWMSet2, then change it to OCIXStreamOutProcessedLWMSet or pass a null oldest_position to OCIXStreamOutProcessedLWMSet2 call. 2) If the invalid call is OCIXStreamInProcessedLWMGet2, then change it to

OCIStreamInProcessedLWMGet or pass a null oldest_position to OCIStreamInProcessedLWMGet2 call.

DIA-26913: must connect to instance *string* where *string* server "*string*" is running

Cause: The client application was not connected to the same Oracle RAC instance as the specified Oracle GoldenGate or XStream server.

Action: Connect to the specified instance using the network service name obtained from the following query: SELECT network_name FROM all_queues q, all_xstream_outbound ob WHERE q.owner = ob.queue_owner AND q.name = ob.queue_name AND server_name = '<server_name>';

DIA-26914: Unable to communicate with *string* capture process "*string*" from outbound server "*string*".

Cause: Capture process might not have been started properly or was aborted.

Action: If Oracle GoldenGate or XStream capture process was stopped, then restart the capture process. Otherwise, query the DBA_CAPTURE view to determine the reason and take the appropriate action. If the error is ORA-4031, either increase the initialization parameter STREAMS_POOL_SIZE or increase the capture parameter MAX_SGA_SIZE or increase both. Refer to the XStream documentation for additional information on these parameters.

DIA-26915: Unable to return Logical Change Record (LCR) information due to missing data dictionary.

Cause: The current session was unable to return the requested information on the given LCR due to missing dictionary data on that LCR.

Action: Detach and reattach the XStream outbound server. Then retry the current call.

DIA-26916: Must call OCIPOGGRedoLogOpen function before OCIPOGGRedoLogRead

Cause: An attempt was made to call OCIPOGGRedoLogRead before calling OCIPOGGRedoLogOpen.

Action: Add OCIPOGGRedoLogOpen call before OCIPOGGRedoLogRead.

DIA-26917: OCIPOGG API must be executed using a dedicated server process.

Cause: An attempt was made to execute OCIPOGG API using a shared server process.

Action: Replace the connect string in the client application to use a dedicated server process.

DIA-26918: Must use '*string*' procedure for outbound server "*string*".

Cause: An attempt was made to execute START_APPLY on an outbound server that uses uncommitted data mode.

Action: Use the specified procedure instead.

DIA-26919: Capture "*string*" is not associated with queue "*string*".*string*".

Cause: The capture specified in the ADD_OUTBOUND procedure was not associated with the specified queue.

Action: Resubmit the ADD_OUTBOUND procedure after removing either the capture_name or the queue_name argument.

DIA-26920: *string* outbound server "*string*" has been stopped.

Cause: The specified outbound server was stopped.

Action: Execute START_OUTBOUND procedure to restart the outbound server or execute OCIXStreamOutAttach function to reattach to the outbound server.

DIA-26921: Cannot alter the start SCN or time of *string* Capture "*string*".

Cause: An attempt was made to alter the start SCN or time for a capture while other outbound servers were still attached to it.

Action: Execute the following: 1) Get the names of other outbound servers currently attached to the specified Capture using the query: SELECT server_name FROM dba_xstream_outbound WHERE (status = 'ATTACHED') AND (server_name '<altered_server>') AND (capture_name = '<specified_capture_name>'); 2) Detach the client application from each server_name returned. 3) Retry the operation.

DIA-26922: user *string* does not have LOGMINING privilege

Cause: An attempt was made to start the capture process or attach to an outbound server when the specified user did not have LOGMINING privilege.

Action: Grant LOGMINING privilege to the specified user and resubmit the failed operation.

DIA-26923: cannot configure *string* outbound server "*string*" with *string* capture "*string*" due to different purpose

Cause: An attempt was made to configure an outbound server with a capture used for different purpose.

Action: Execute the following: 1) Get the purpose of each capture and its associated queue: SELECT capture_name, queue_owner, queue_name, purpose FROM dba_capture; 2) Resubmit the statement using a queue or capture with the same purpose.

DIA-26924: cannot configure *string* using "*string*".*string* queue because it is used by "*string*" for *string* purpose

Cause: An attempt was made to configure the specified process using a queue already used by another process for different purpose.

Action: Resubmit the statement using another queue of the same purpose.

DIA-26925: cannot configure outbound server "*string*" with capture "*string*" because it is not using apply-state checkpoint

Cause: An attempt was made to configure an outbound server with a capture not using apply-state checkpoint.

Action: Specify a different capture in the ADD_OUTBOUND procedure or re-create the capture and resubmit the statement.

DIA-26926: Unable to attach because capture "*string*" is missing dictionary redo logs

Cause: The specified capture was unable to locate the dictionary redo log.

Action: Check the state of the specified capture from gv\$streams_capture to determine the SCN or filename of the missing log file. Confirm that the filename exists and is accessible online and also in the DBA_REGISTERED_ARCHIVED_LOG view. In addition, for local capture, confirm that an entry exists for the file in the V\$ARCHIVED_LOG view. If an entry is missing, it can be added using the ALTER DATABASE REGISTER LOGFILE command, specifying the keyword LOGICAL LOGFILE or PHYSICAL LOGFILE as appropriate.

DIA-26927: Unable to communicate with *string* capture process "*string*" from outbound server "*string*".

Cause: A timeout occurred while waiting for capture to respond.

Action: Check the state of the specified capture from GV\$XSTREAM_CAPTURE view. Determine the reason for capture's unresponsiveness. If streams_pool_size is not set or set with an inadequate value, consider setting or increasing the value of this parameter.

DIA-26928: Unable to communicate with *string* apply coordinator process "*string*" from outbound server "*string*".

Cause: A timeout occurred while waiting for apply coordinator to respond.

Action: Check the state of the specified apply coordinator from GV\$STREAMS_APPLY_COORDINATOR view. Determine the reason for apply coordinator's unresponsiveness. If streams_pool_size is not set or set with an inadequate value, consider setting or increasing the value of this parameter.

DIA-26929: altering an outbound server with a remote capture is not allowed

Cause: An attempt was made to alter an outbound server with a remote capture.

Action: None

DIA-26930: User "*string*" does not have privileges to perform this operation

Cause: An attempt was made to create, alter, or drop a process that has a different user (such as capture user or apply user) than the invoking user.

Action: Perform this operation as the owner of the process. Alternatively, perform the operation with the DBA role enabled.

DIA-26931: This procedure can only be invoked from the root container.

Cause: An attempt was made to execute a procedure in a multitenant container database (PDB) or a non-container database.

Action: Execute the procedure from the root container.

DIA-26932: Streams configuration is not allowed in a container database.

Cause: An attempt was made to configure a Streams environment in a container database.

Action: None

DIA-26933: Cannot start Streams process "*string*" while in a container database.

Cause: An attempt was made to start the specified Streams process while in a container database.

Action: None

DIA-26934: Streams synchronous capture is not supported in a container database.

Cause: An attempt was made to perform a DML operation on a table being captured by a Streams synchronous capture in a container database.

Action: Remove all Streams synchronous captures then reexecute the DML operation.

DIA-26935: Unsupported type *string.string* for parameter for procedure *string.string.string.ln*

Cause: Apply encountered a procedure call with a parameter with an unsupported type.

Action: Modify the rules to filter out the procedure call.

DIA-26936: must execute OCIPOGGCaptureAttach before invoking *string* function

Cause: An attempt was made to invoke the specified function before executing OCIPOGGCaptureAttach call.

Action: Add OCIPOGGCaptureAttach call before the specified function.

DIA-26937: client has already attached to *string* capture "*string*".

Cause: The client was already attached to the specified capture.

Action: Detach from the specified capture before reattaching.

DIA-26938: cannot pack LCR into LCR buffer (buffer size is *string*, LCR size is *string*)

Cause: The logical change record (LCR) buffer was not large enough to store the current LCR.

Action: Increase the buffer size in the OCIPOGGCaptureAttach call.

DIA-26939: *string* capture "*string*" is disabled.

Cause: The capture process was disabled or aborted.

Action: Start the capture process.

DIA-26940: OCIPOGGCapture API must be executed using a dedicated server process.

Cause: An attempt was made to execute OCIPOGGCapture API using a shared server process.

Action: Replace the connect string in the client application to use a dedicated server process.

DIA-26941: unable to perform LOB assembly for table *string.string*

Cause: The apply process was unable to perform the LOB assembly for a DML for the specified table.

Action: Verify that the storage type for the columns are compatible at the source and destination.

DIA-26942: LCR should not contain old value for column *string* in table *string.string*

Cause: The LCR contained old values for LOB, XMLType and object columns.

Action: Remove old values for any LOB, XMLType and object columns in the LCR.

DIA-26943: cross PDB operation not allowed

Cause: An attempt was made to perform an operation on a container database different from the container database where the call was made.

Action: Log into the root container or into the container where you want to perform the requested action.

DIA-26944: User "*string*" attempted to invoke a procedure without proper permissions.

Cause: An attempt was made to invoke a procedure without proper permissions.

Action: Grant the user any of the roles for using Oracle GoldenGate. The roles are OGG_CAPTURE_ADMIN, OGG_APPLY_ADMIN, and OGG_APPLY_PROCREP.

DIA-26945: unsupported hint *string*

Cause: The specified hint was not supported.

Action: Remove the hint from the SQL statement.

DIA-26946: OCIPOGGRedoLog API not supported in CDB.

Cause: An attempt was made to call an OCIPOGGRedoLog API in a multitenant container database (CDB).

Action: Do not call the OCIPOGGRedoLog API in a CDB.

DIA-26947: Oracle GoldenGate replication is not enabled.

Cause: The 'enable_goldengate_replication' parameter was not set to 'true'.

Action: Set the 'enable_goldengate_replication' parameter to 'true' and retry the operation. Oracle GoldenGate license is needed to use this parameter.

DIA-26948: Streams API must be executed using a dedicated server process.

Cause: The dblink configured for the propagation from the capture queue to the apply queue is using a shared server connection.

Action: Modify the dblink for this propagation to use a dedicated server connection.

DIA-26949: Advanced Replication is not allowed in a container database.

Cause: An attempt was made to configure an advanced replication in a multitenant container database (CDB).

Action: Do not call the Advanced Replication API in a CDB.

DIA-26951: table "*string*"."*string*" has column data type not supported by conflict resolution

Cause: A conflict was detected, but unsupported columns prevented resolving the conflict.

Action: Remove conflict resolution configuration for tables with LOB, LONG, XML, object, or extended types.

DIA-26952: could not clone from the specified clone_capture_name *string* while creating capture process *string*

Cause: The specified clone_capture_name could not be used as a clone candidate while creating the capture process.

Action: Re-create the capture without setting clone_capture_name.

DIA-26953: source database character set is not a subset of the mining database character set

Cause: An attempt was made to configure a downstream capture but the source database character set was not a subset of the mining database character set.

Action: Use AL32UTF8 character set or other compatible character set for the mining database.

DIA-26954: invalid protocol (opcode *string*) received during XStream execution

Cause: An internal protocol error occurred while executing an XStream function.

Action: Contact Oracle Support Services.

DIA-26955: cannot capture TIMESTAMP WITH LOCAL TIME ZONE data type

Cause: The capture process was unable to capture TIMESTAMP WITH LOCAL TIME ZONE data type because the source database time zone was not available.

Action: Refer to My Oracle Support Note 1928808.1 to set the source database time zone for the specified capture process.

DIA-26956: capture *string* created successfully but the source database time zone is not available

Cause: The capture process was created successfully; however, it will not be able to capture TIMESTAMP WITH LOCAL TIME ZONE data type unless the source database time zone is set.

Action: Refer to My Oracle Support Note 1928808.1 to set the source database time zone for the specified capture process.

DIA-26957: LCR identifier length is invalid.

Cause: A logical change record (LCR) identifier with an incompatible length was used.

Action: Use an LCR identifier compatible with release 12.2 or higher specification.

DIA-26958: LCR identifier version is invalid.

Cause: An invalid logical change record (LCR) identifier version number was used.

Action: Use an LCR identifier version compatible with release 12.2 or higher specification.

DIA-26959: SCN value does not fit in SCN version 1.

Cause: The system change number (SCN) value was too big to fit in the original SCN specification.

Action: Use an SCN value compatible with the original SCN specification.

DIA-26960: automatic CDR already configured for table "*string*".*string*"

Cause: Automatic conflict detection and resolution was already configured.

Action: Remove the automatic conflict detection and resolution configuration and retry.

DIA-26961: automatic CDR not configured for table "*string*".*string*"

Cause: Automatic conflict detection and resolution was not configured.

Action: None

DIA-26962: automatic CDR delta resolution not configured for column "*string*"

Cause: Automatic conflict detection and resolution delta resolution was not configured.

Action: None

DIA-26963: automatic CDR column group cannot be created

Cause: Automatic conflict detection and resolution was configured with column granularity.

Action: Remove the column-level configuration and retry.

DIA-26964: column "*string*" already assigned to a column group

Cause: The column was already part of a column group.

Action: Remove the column from the column group and retry.

DIA-26965: column group name "*string*" not available

Cause: The column group name was already in use.

Action: Remove the existing column group and retry.

DIA-26967: delete tombstone table "*string*". "*string*" cannot be dropped

Cause: An attempt was made to drop a delete tombstone table.

Action: Remove the automatic conflict detection and resolution from the base table.

DIA-26968: column group "*string*" not found

Cause: The column group did not exist.

Action: Check if the column group needs to be created.

DIA-26969: column "*string*" not part of column group "*string*"

Cause: The column did not belong to the column group.

Action: Check the column list and retry.

DIA-26970: table "*string*" does not contain a primary key constraint

Cause: An attempt was made to configure automatic conflict detection and resolution with delete tombstones on a table without a primary key.

Action: Add a primary key and retry.

DIA-26971: resolution column "*string*" not present

Cause: The resolution column was not set in the logical change record (LCR).

Action: Manually resolve the conflict.

DIA-26972: An apply process attempted to modify the SYSAUX tablespace.

Cause: An ALTER TABLESPACE DDL to SYSAUX was attempted by Oracle GoldenGate, XStream or Streams process.

Action: Only SYS is allowed to modify SYSAUX.

DIA-26973: Automatic CDR not supported for table "*string*". "*string*" which has unsupported column "*string*".

Cause: Automatic conflict detection and resolution (CDR) support for long, nested table or non-scalar abstract data type (ADT) attribute column failed. CDR did not support long, nested table or non-scalar ADT attribute columns.

Action: None

DIA-26974: Apply process is stuck in synchronous error handling mode.

Cause: The apply process ran out of memory or queue space while suspended for synchronous error handling.

Action: Restart Oracle GoldenGate Replicat process.

DIA-26975: Only one instance of an Oracle GoldenGate downstream live standby is permitted.

Cause: An attempt was made to create an additional capture session for an Oracle GoldenGate downstream live standby system.

Action: None

DIA-26976: Oracle Streams is no longer supported.

Cause: An attempt was made to use a feature of Oracle Streams.

Action: None

DIA-26977: Parameter '*string*' is not a valid parameter for an XStream inbound server.

Cause: An attempt was made to alter a parameter that was not valid for an XStream inbound server.

Action: None

DIA-26978: cannot specify more than 1000 key columns

Cause: An attempt was made to define more than 1000 key columns.

Action: Reduce the number of key columns.

DIA-26979: missing BLOCKING keyword

Cause: Syntax error.

Action: Use the correct syntax: ENABLE/DISABLE GOLDENGATE BLOCKING MODE.

DIA-26980: missing MODE keyword

Cause: Syntax error.

Action: Use the correct syntax: ENABLE/DISABLE GOLDENGATE BLOCKING MODE.

DIA-26981: operation was unsupported during Oracle GoldenGate blocking mode

Cause: An unsupported operation was attempted while Oracle GoldenGate was in blocking mode.

Action: Execute ALTER DATABASE DISABLE GOLDENGATE BLOCKING MODE and retry the operation.

DIA-26982: unable to drop minimal supplemental logging when Oracle GoldenGate blocking mode is enabled

Cause: Minimal supplemental logging could not be dropped while Oracle GoldenGate Blocking was enabled.

Action: Issue ALTER DATABASE DISABLE GOLDENGATE BLOCKING MODE, then reissue the command.

DIA-26984: Automatic Conflict Detection and Resolution site priority action can only be OVERWRITE or IGNORE

Cause: Site priority action was ambiguous.

Action: Choose either OVERWRITE or IGNORE as site priority action.

DIA-26985: Automatic Conflict Detection and Resolution conflict resolution require keyvers column '*string.string*'

Cause: ACDR conflict resolution other than latest timestamp requires keyver.

Action: Alter the database table to add keyver with ACDR procedures.

DIA-26986: cannot *string* Oracle GoldenGate downstream capture process *string*

Cause: The Oracle GoldenGate downstream capture process could not be created or dropped because the capture process failed to acquire a lock to enable or disable the client.

Action: Refer to the trace file for more details.

DIA-26987: cannot rename delete tombstone table

Cause: Renaming a delete tombstone table was not supported.

Action: Do not rename an Oracle GoldenGate automatic conflict detection and resolution delete tombstone table.

DIA-26988: Cannot grant Oracle GoldenGate privileges. The procedure GRANT_ADMIN_PRIVILEGE is disabled.

Cause: An attempt was made to grant privileges for using Oracle GoldenGate by calling the DBMS_GOLDENGATE_AUTH.GRANT_ADMIN_PRIVILEGE procedure. Starting with Oracle Database release 23c, the procedure has been disabled and replaced by roles.

Action: Grant the corresponding Oracle GoldenGate roles: OGG_CAPTURE role for using Extract. OGG_APPLY role for using Replicat. OGG_APPLY_PROCREP role for using procedural replication with Replicat.

DIA-26989: Cannot grant XStream privileges. The procedure GRANT_ADMIN_PRIVILEGE is disabled.

Cause: An attempt was made to grant privileges for using XStream by calling the DBMS_XSTREAM_AUTH.GRANT_ADMIN_PRIVILEGE procedure. Starting with Oracle Database release 23c, the procedure has been disabled and replaced by roles.

Action: Grant the corresponding XStream roles: XSTREAM_CAPTURE role for using the XStream Out APIs. XSTREAM_APPLY role for using the XStream In APIs.

DIA-26990: cannot modify or drop columns or constraints on tombstone table key

Cause: Modifications and drops of tombstone table key columns and constraints was not allowed.

Action: If you need to make modifications to the tombstone table key columns or constraints, remove the tombstone table and re-add it.

DIA-26991: Automatic Conflict Detection and Resolution conflict resolution cannot format existing data timestamp'

Cause: ACDR conflict resolution is unable to format existing data timestamp.

Action: Fix the existing data timestamp provided.

DIA-26992: cannot create a capture in CDB root when database has a DGPDB

Cause: An attempt was made to create an Oracle GoldenGate or XStream Out capture in a multitenant container database (CDB) root on a database where a Data Guard per Pluggable Database existed and this was not allowed.

Action: If possible, create the capture from within the pluggable database (PDB) of interest.

DIA-26993: Cannot have unique index on Automatic Conflict Detection and Resolution enabled blockchain or immutable table *string.string*.

Cause: Automatic Conflict Detection and Resolution could not be added to this blockchain or immutable table because a unique index is present.

Action: Remove the unique index and instead create a unique constraint.

DIA-26994: Can have only one unique or primary key constraint on Automatic Conflict Detection and Resolution enabled blockchain or immutable table *string.string*.

Cause: Automatic Conflict Detection and Resolution could not be added to this blockchain or immutable table because there was not exactly one unique or primary key constraint.

Action: Have at most a single unique constraint or primary key.

DIA-26995: Automatic Conflict Detection and Resolution is not supported on version v1 blockchain or immutable table *string.string*.

Cause: Automatic Conflict Detection and Resolution is not supported on version v1 blockchain or immutable tables.

Action: If Automatic Conflict Detection and Resolution is needed, the table data will need to be moved to a version v2 immutable or blockchain table.

DIA-26996: Automatic Conflict Detection and Resolution procedure is not supported for blockchain or immutable table *string.string*.

Cause: Only add and remove Automatic Conflict Detection and Resolution procedures are supported on blockchain or immutable tables. Column groups, delta resolution, setting columns unused, and custom handlers features are not supported for blockchain or immutable tables.

Action: If changes besides the unsupported features are needed in the Automatic Conflict Detection and Resolution configuration then the configuration will need to be removed and then added with the new configuration.

DIA-26997: Automatic Conflict Detection and Resolution cannot be added to blockchain or immutable table *string.string*.

Cause: Automatic Conflict Detection and Resolution could not be added to this blockchain or immutable table because of the option requested. Neither column resolution nor custom handlers are supported

Action: Remove the unsupported option requested.

DIA-26998: Invalid JSON update at table *string.string* column *string*.

Cause: LCR column metadata indicated data format is JSON update but it cannot be parsed.

Action: Consult XStream Interface in the Oracle Call Programmer's Guide for valid column flags and formats.

DIA-27000: skgfsbi: failed to initialize storage subsystem (SBT) layer

Cause: sbtinit returned an error, additional information indicates error

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27001: unsupported device type

Cause: the specified device type is supported on this platform

Action: check V\$BACKUP_DEVICE for supported device types

DIA-27002: function called with invalid device structure

Cause: internal error, additional information indicates which function encountered error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27003: cannot open file on device allocated with NOIO option

Cause: internal error, a file is being created/retrieved on a device allocated with NOIO option, additional information indicates which function encountered error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27004: invalid blocksize specified

Cause: Internal error. Blocksize specified was incorrect for the device on which the file was created. Additional information indicated the specified blocksize and the function that encountered the error.

Action: Check for the trace file and contact Oracle Support Services.

DIA-27005: cannot open file for async I/O on device not supporting async

Cause: internal error, a file is being opened for async I/O on a device that does not support async I/O, additional information indicates which function encountered error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27006: sbtremove returned error

Cause: additional information indicates error returned by sbtremove, and the function that encountered the error

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27007: failed to open file

Cause: sbtopen returned error, additional information indicates error returned from sbtopen, and the function that encountered the error

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27008: function called with invalid file structure

Cause: Internal error. Additional information indicated the function that encountered the error.

Action: Check for the trace file and contact Oracle Support Services.

DIA-27009: cannot write to file opened for read

Cause: internal error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27010: skgfwrt: write to file failed

Cause: sbtwrite returned error, additional information indicates error returned from sbtwrite

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27011: skgfrd: cannot read from file opened for write

Cause: internal error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27012: skgfrd: read from file failed

Cause: sbtread returned error, additional information indicates error returned from sbtread

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27013: skgfqdel: cannot delete an open file

Cause: internal error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27014: skgfqini: translation error while expanding SS_UDMPDIR

Cause: Failure of sltln in skgfqini

Action: Check additional return error for more information.

DIA-27015: skgfcls: failed to close the file

Cause: sbtclose returned error, additional information indicates error returned from sbtclose

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27016: skgfcls: sbtinfo returned error

Cause: additional information indicates error returned from sbtinfo

Action: verify that vendor's storage subsystem product is operating correctly

DIA-27017: skgfcls: media handle returned by sbtinfo exceeds max length(SSTMXQMH)

Cause: media handle string length exceeds SSTMXQMH

Action: verify that vendor's storage subsystem product is operating correctly, and that the platform limit (SSTMXQMH) is at least 64 (the limit specified for sbtinfo). additional information indicates the media handle string length returned by sbtinfo, and the limit (SSTMXQMH)

DIA-27018: BLKSIZE is not a multiple of the minimum physical block size

Cause: User-specified BLKSIZE (blocking factor) is not a multiple of the minimum block size that is permitted on this platform.

Action: Two ADDITIONAL INFORMATION messages are displayed which show the blocking factor provided by the user and the minimum physical block size. Specify a BLKSIZE that is an integral multiple of the minimum block size.

DIA-27019: tape filename length exceeds limit (SBTOPMXF)

Cause: length of tape filename provided to sequential I/O OSD functions is too long

Action: additional information indicates in which function this error is encountered, the length of filename provided, and the limit on filename

DIA-27020: named devices not supported

Cause: the platform or the specified device type does not support named devices

Action: do not specify device name or use a device type that supports named devices. Use V\$BACKUP_DEVICE view to see what device types and names (if any) are available.

DIA-27021: sequential file handle must be specified

Cause: The filename which will be passed to sbtopen was not specified.

Action: Specify a filename and continue. If this is a backup set being created via Recovery Manager, use the 'format' option to specify the backup piece handle name.

DIA-27022: skgfsbi: could not allocate memory for media manager

Cause: Oracle could not allocate memory required by the media management software which is linked with Oracle to provide backup/restore services.

Action: Increase the amount of memory available to the Oracle process and retry the backup/restore.

DIA-27023: skgfsbi: media manager protocol error

Cause: The media management software which is linked with Oracle to provide backup/restore services did not provide its function pointer structure to Oracle.

Action: This is an internal error in the media management product. Contact the media management vendor.

DIA-27024: skgfsbi: sbtinit2 returned error

Cause: sbtinit2 returned an error. This happens during a backup or restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27025: skgfsbi: invalid media manager context area size

Cause: The media management software requested a context area size which is greater than the maximum allowable size.

Action: This is an internal error in the media management product. Contact the media management vendor.

DIA-27026: skgfrls: sbtend returned error

Cause: sbtend returned an error. This happens during a backup or restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27027: sbtremove2 returned error

Cause: sbtremove2 returned an error. This happens when deleting a backup file.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27028: skgfcrc: sbtbackup returned error

Cause: sbtbackup returned an error. This happens when creating a backup file during a backup operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27029: skgfrtrv: sbtrestore returned error

Cause: sbtrestore returned an error. This happens when retrieving a backup file during a restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27030: skgfwrt: sbtwrite2 returned error

Cause: sbtwrite2 returned an error. This happens while writing a backup file during a backup operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27031: mirror resilvering functions not supported

Cause: internal error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27032: failed to obtain file size limit

Cause: getrlimit system call returned an error

Action: check errno

DIA-27033: failed to obtain file size limit

Cause: ulimit system call returned an error

Action: check errno

DIA-27034: maximum length of ORACLE_SID exceeded

Cause: too many characters in the ORACLE_SID string

Action: rename the ORACLE_SID to a string of up to the maximum number of characters specified for your system

DIA-27035: logical block size is invalid

Cause: logical block size for oracle files must be a multiple of the physical block size, and less than the maximum

Action: block size specified is returned as additional information, check init.ora parameters, additional information also indicates which function encountered the error

DIA-27036: translation error, unable to expand file name

Cause: additional information indicates stln/slnrm error, and also indicates which function encountered the error

Action: check additional information

DIA-27037: unable to obtain file status

Cause: stat system call returned an error, additional information indicates which function encountered the error

Action: check errno

DIA-27038: created file already exists

Cause: trying to create a database file, but file by that name already exists

Action: verify that name is correct, specify reuse if necessary

DIA-27039: create file failed, file size limit reached

Cause: an attempt was made to create a file that exceeds the process's file size limit, additional information indicates which function encountered the error

Action: raise the file size limit

DIA-27040: file create error, unable to create file

Cause: create system call returned an error, unable to create file

Action: verify filename, and permissions

DIA-27041: unable to open file

Cause: open system call returned an error, additional information indicates which function encountered the error

Action: check errno

DIA-27042: not enough space on raw partition to fulfill request

Cause: The file was too large for a raw partition. Additional information indicates which function encountered an error.

Action: Check the trace file and contact Oracle Support Services.

DIA-27043: unable to seek to beginning of file

Cause: seek system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27044: unable to write the header block of file

Cause: write system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27045: unable to close the file

Cause: close system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27046: file size is not a multiple of logical block size

Cause: file size as indicated by stat is not correct, additional information indicates which function encountered the error

Action: verify that the file has not been overwritten or truncated

DIA-27047: unable to read the header block of file

Cause: read system call failed, additional information indicates which function encountered the error

Action: check errno

DIA-27048: skgfifi: file header information is invalid

Cause: possibly trying to use a non-database file as a database file

Action: verify that file is a database file

DIA-27049: unable to seek to and read the last block

Cause: an attempt was made to seek to and read the last block in file, additional information indicates which function encountered error

Action: check errno

DIA-27050: function called with invalid file information structure

Cause: There was an internal error. Additional information indicates which function encountered an error.

Action: Check for a trace file and contact Oracle Support Services.

DIA-27052: unable to flush file data

Cause: fsync system call returned error, additional information indicates which function encountered the error

Action: check errno

DIA-27053: blocksize in file header not a multiple of logical block size

Cause: the logical block size is invalid, additional information indicates the logical block size and the blocksize in the file header

Action: use a different logical block size, or do not reuse file

DIA-27054: NFS file system where the file is created or resides is not mounted with correct options

Cause: The file was on an NFS partition and either reading the mount tab file failed or the partition was not mounted with the correct mount option.

Action: Make sure mount tab file has read access for Oracle user and the NFS partition where the file resides is mounted correctly. For the list of mount options to use refer to your platform specific documentation.

DIA-27055: failed to allocate disk space

Cause: The call to allocate disk space failed. Additional information indicates the function that errored out and the space requested.

Action: Check errno. It might indicate a more detailed reason for failure.

DIA-27056: could not delete file

Cause: unlink system call returned error

Action: check errno

DIA-27057: cannot perform async I/O to file

Cause: internal error, query is being asked about async vector I/O when the file does not support async I/O

Action: Check for the trace file and contact Oracle Support Services.

DIA-27058: file I/O question parameter is invalid

Cause: internal error, invalid query is being asked

Action: Check for the trace file and contact Oracle Support Services.

DIA-27059: could not reduce file size

Cause: An attempt to reduce file size using ftruncate system call returned an error.

Action: Check for additional errno messages for more information.

DIA-27060: could not set close-on-exec bit on file

Cause: fcntl system call returned error

Action: check errno

DIA-27061: waiting for async I/Os failed

Cause: aiowait function returned error

Action: check errno

DIA-27062: could not find pending async I/Os

Cause: There should have been some async I/Os in the system but a blocking aiowait indicates that there are no more I/Os. It could be either because of an Oracle bug or the vendor's OS bug, or it could be due to a NFS server not responding.

Action: Check Oracle trace file, OS message files and contact Oracle Support.

DIA-27063: number of bytes read/written is incorrect

Cause: the number of bytes read/written as returned by aiowait does not match the original number, additional information indicates both these numbers

Action: check errno

DIA-27064: cannot perform async I/O to file

Cause: internal error, asked to perform async I/O when IOV indicates that it cannot be performed on the file

Action: Check for the trace file and contact Oracle Support Services.

DIA-27065: cannot perform async vector I/O to file

Cause: internal error, asked to perform async vector I/O when it cannot be performed on the file

Action: Check for the trace file and contact Oracle Support Services.

DIA-27066: number of buffers in vector I/O exceeds maximum

Cause: internal error, number of buffers in vector I/O exceeds maximum allowed by the OSD, additional information indicates both these numbers

Action: Check for the trace file and contact Oracle Support Services.

DIA-27067: size of I/O buffer is invalid

Cause: internal error, buffer size is either 0, or greater than SSTIOMAX or not a multiple of logical block size, additional information indicates where in function the error was encountered and the buffer size

Action: Check for the trace file and contact Oracle Support Services.

DIA-27068: I/O buffer is not aligned properly

Cause: internal error, buffer is not aligned to SSIOALIGN boundary, additional information indicates where in function the error was encountered and the buffer pointer

Action: Check for the trace file and contact Oracle Support Services.

DIA-27069: attempt to do I/O beyond the range of the file

Cause: internal error, the range of blocks being read or written is outside the range of the file, additional information indicates the starting block number, number of blocks in I/O, and the last valid block in the file

Action: Check for the trace file and contact Oracle Support Services.

DIA-27070: async read/write failed

Cause: aioread/aiowrite system call returned error, additional information indicates starting block number of I/O

Action: check errno

DIA-27071: unable to seek to desired position in file

Cause: lseek system call returned error, additional information indicates block number in file to which seek was attempted

Action: check errno

DIA-27072: File I/O error

Cause: read/write/readv/writev system call returned error, additional information indicates starting block number of I/O

Action: check errno

DIA-27073: Trying to close a file which has async I/Os pending to be dequeued

Cause: internal error, the file is being closed but not all async I/Os to the file have been dequeued, additional information indicates number of I/Os pending on the file

Action: Check for the trace file and contact Oracle Support Services.

DIA-27074: unable to determine limit for open files

Cause: The getrlimit() system call returned an error.

Action: Check errno.

DIA-27075: SSTMOFRC constant too large

Cause: internal error

Action: Check for the trace file and contact Oracle Support Services.

DIA-27076: unable to set limit for open files

Cause: The setrlimit() system call returned an error.

Action: Check errno.

DIA-27077: too many files open

Cause: internal error, the number of files opened through skgfofi has reached the limit

Action: Check for trace file and contact Oracle Support.

DIA-27078: unable to determine limit for open files

Cause: The getrlimit() system call returned an error.

Action: Check errno.

DIA-27079: unable to set async IO limit

Cause: The setting of the limit for async I/O has failed.

Action: Check errno.

DIA-27080: too many files open

Cause: The number of files opened has reached the system limit.

Action: Check the error, and set system configuration values.

DIA-27081: unable to close the file

Cause: The close() system call failed.

Action: Check errno.

DIA-27083: waiting for async I/Os failed

Cause: The aio_waitn() library call returned an error.

Action: Check errno.

DIA-27084: unable to get/set file status flags

Cause: The fcntl() system call with F_GETFL/F_SETFL flag returned an error.

Action: Check errno.

DIA-27085: Asynchronous I/O operation failed

Cause: lio_listio() system call returned an error.

Action: Check errno. Also, determine if the disk space is sufficient.

DIA-27086: unable to lock file - already in use

Cause: the file is locked by another process, indicating that it is currently in use by a database instance.

Action: determine which database instance legitimately owns this file.

DIA-27087: Unable to get share lock. File not readable.

Cause: A share lock request was made on a file that did not have read access.

Action: Ensure that the file has read-only or read/write access.

DIA-27088: unable to get file status

Cause: file not open or file descriptor is invalid.

Action: Make sure the file is open and the descriptor is valid.

DIA-27089: unable to release advisory lock

Cause: The release of the file lock failed because: * Either the file descriptor was invalid, or * The process was interrupted, or * The kernel failed due to other reasons

Action: Check the additional error messages for more information about the cause of the error.

DIA-27090: Unable to reserve kernel resources for asynchronous disk I/O

Cause: The system call to reserve kernel resources for asynchronous I/O has failed.

Action: Check errno

DIA-27091: unable to queue I/O

Cause: read/write/readv/writev system call returned error, additional information indicates starting block number of I/O

Action: check errno

DIA-27092: size of file exceeds file size limit of the process

Cause: an attempt was made to open a file that exceeds the process's file size limit (ulimit), additional information shows the current limit (logical blocks) and the size of the file (logical blocks)

Action: increase the processes file size limit (ulimit) and retry

DIA-27093: could not delete directory

Cause: rmdir system call returned error

Action: check errno

DIA-27094: raw volume used can damage partition table

Cause: A raw device with VTOC information was provided as a database file.

Action: Make sure the disk partition that is provided to Oracle does not start at sector 0

DIA-27095: fail to get the disk sector size

Cause: The system call to get the sector size failed. Additional information indicates which function encountered the error.

Action: Check error number.

DIA-27096: fail to get file size

Cause: The system call to get file size failed. Additional information indicates which function encountered the error.

Action: Check error number.

DIA-27097: failed to set Access Control List ownership for ASM devices

Cause: The system call to set ACL ownership for ASM devices failed. Additional information indicates which function encountered the error.

Action: Refer to Microsoft documentation for an explanation of the accompanying error code and text.

DIA-27098: failed to rename file

Cause: The system call to change the file name failed. Additional information indicates which function encountered the error.

Action: Check the Oracle trace file for additional information on file name and reason for failure.

DIA-27099: failed to create file

Cause: The system call to create this file type in this file system failed. Check if the creation of this file type is supported in this file system. Additional information indicates which function encountered the error.

Action: Refer to Oracle documentation for additional details.

DIA-27100: shared memory realm already exists

Cause: Tried to start duplicate instances, or tried to restart an instance that had not been properly shutdown

Action: Use a different instance name, or cleanup the failed instance's SGA

DIA-27101: shared memory realm does not exist

Cause: Unable to locate shared memory realm

Action: Verify that the realm is accessible

DIA-27102: out of memory

Cause: Out of memory

Action: Consult the trace file for details

DIA-27103: internal error

Cause: internal error

Action: contact Oracle support

DIA-27104: system-defined limits for shared memory was misconfigured

Cause: System-defined shared memory limits were inadequate for Oracle.

Action: Consult the alert file for details.

DIA-27105: unable to support any system page size for shared memory allocation

Cause: Current configuration was not supported by any system page size.

Action: Consult the alert file for details.

DIA-27106: system pages not available to allocate memory

Cause: System page count for supported page sizes was misconfigured.

Action: Configure system page count as recommended in the alert file.

DIA-27107: AUTO value for USE_LARGE_PAGES parameter is no longer supported.

Cause: The USE_LARGE_PAGES configuration parameter was set to AUTO.

Action: Refer to the alert file for details.

DIA-27108: shared global area (SGA) creation failed due to configuration issue

Cause: System configuration issue.

Action: Refer to the alert file for details.

DIA-27109: Setting of values for parameters related to SGA creation is not compatible.

Cause: Values set for parameters used in creating the system global area (SGA) were not compatible.

Action: Check the alert log and relevant trace file for more information. Modify the parameter values that are incompatible.

DIA-27120: unable to remove shared memory segment

Cause: shmctl() call failed

Action: check permissions on segment, contact Oracle support

DIA-27121: unable to determine size of shared memory segment

Cause: shmctl() call failed

Action: check permissions on segment, contact Oracle support

DIA-27122: unable to protect memory

Cause: mprotect() call failed

Action: contact Oracle support

DIA-27123: unable to attach to shared memory segment

Cause: shmat() call failed

Action: check permissions on segment, contact Oracle support

DIA-27124: unable to detach from shared memory segment

Cause: shmdt() call failed

Action: contact Oracle support

DIA-27125: unable to create shared memory segment

Cause: shmget() call failed

Action: contact Oracle support

DIA-27126: unable to lock shared memory segment in core

Cause: insufficient privileges to lock shared memory segment in core

Action: make sure process is running with necessary privileges.

DIA-27127: unable to unlock shared memory segment

Cause: insufficient privileges to unlock shared memory segment

Action: make sure process is running with necessary privileges.

DIA-27128: unable to determine pagesize

Cause: sysconf() call failed

Action: contact Oracle support

DIA-27133: unable to determine stacksize

Cause: getrlimit() call failed

Action: Contact Oracle Support Services.

DIA-27134: unable to set stacksize

Cause: setrlimit() call failed

Action: Contact Oracle Support Services.

DIA-27135: Operating System hard stack limit is set too low

Cause: Operating System hard stack limit was set too low.

Action: Check additional information for current and minimum limit. Increase the Operating System hard stack limit and retry.

DIA-27136: MPMT and VLM are both enabled

Cause: When the `_mpmt_enabled` parameter is set to TRUE, none of the following parameters should be set to TRUE: `* use_indirect_buffers` `* _db_block_cache_protect` `* _db_block_cache_clone`

Action: Either turn off Multi Process Multi Threads (MPMT) or turn off all the other parameters.

DIA-27137: unable to allocate large pages to create a shared memory segment

Cause: Parameter `USE_LARGE_PAGES` set to only, but large pages were not configured properly

Action: Check alert file for more information

DIA-27138: unable to allocate large pages with current parameter setting

Cause: The `USE_LARGE_PAGES` parameter setting was not compatible with other parameters used.

Action: Check the alert log for more information. Modify the `USE_LARGE_PAGES` parameter setting, or adjust the other parameters. Large pages are compatible with `SGA_TARGET`, `SGA_MAX_SIZE` and `SHARED_POOL_SIZE` parameters. Large pages are not / compatible with `MEMORY_TARGET`, `MEMORY_MAX_TARGET` and `_DB_BLOCK_CACHE_PROTECT` parameters. The database instance using Exadata storage and large System Global Area (SGA) must set `USE_LARGE_PAGES` to `ONLY` or `AUTO_ONLY`.

DIA-27139: unable to reserve Oracle VM mapping in process address space

Cause: The address space region was already mapped.

Action: Contact Oracle Support Services.

DIA-27140: attach to post/wait facility failed

Cause: The program attempted to initialize the post/wait facility, but the facility could not be attached.

Action: Check for additional errors and contact Oracle Support.

DIA-27141: invalid process ID

Cause: process operation attempted using invalid process ID

Action: contact Oracle Support

DIA-27142: could not create new process

Cause: OS system call

Action: check errno and if possible increase the number of processes

DIA-27143: OS system call failure

Cause: OS system call failed

Action: check errno and contact Oracle support

DIA-27144: attempt to kill process failed

Cause: OS system call error

Action: check errno and contact Oracle Support

DIA-27145: insufficient resources for requested number of processes

Cause: OS system call error

Action: check errno and contact Oracle Support

DIA-27146: post/wait initialization failed

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27147: post/wait reset failed

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27148: spawn wait error

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27149: assignment out of range

Cause: internal error, requested conversion too large for type

Action: contact Oracle Support

DIA-27150: attempt to notify process of pending oradebug call failed

Cause: OS system call

Action: check errno contact Oracle Support

DIA-27151: buffer not large enough to hold process ID string

Cause: internal error

Action: contact Oracle Support

DIA-27152: attempt to post process failed

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27153: wait operation failed

Cause: OS system called failed

Action: check errno contact Oracle Support

DIA-27154: post/wait create failed

Cause: internal error, multiple post/wait creates attempted simultaneously

Action: check errno and contact Oracle Support

DIA-27155: could not execute file

Cause: OS system call failed

Action: check errno and contact Oracle Support

DIA-27156: request for process information failed

Cause: internal error

Action: contact Oracle Support

DIA-27157: OS post/wait facility removed

Cause: the post/wait facility for which the calling process is awaiting action is removed from the system

Action: check errno and contact Oracle Support

DIA-27158: process control failure

Cause: Oracle was unable to set the specified process control.

Action: Consult the Oracle Administrator's Guide.

DIA-27159: failure setting process scheduling priority

Cause: Oracle was unable to set the scheduling priority desired.

Action: Consult the Oracle Administrator's Guide.

DIA-27160: process requested to perform operation

Cause: The current process was requested to perform an operation by another process.

Action: This is used internally; no action is required.

DIA-27161: request for Oracle binary information failed

Cause: The program was unable to get information about the Oracle binary.

Action: Check for additional errors and contact Oracle support.

DIA-27162: thread creation failed

Cause: The program was unable to create a thread.

Action: Check errno and contact Oracle support.

DIA-27163: out of memory

Cause: The program ran out of memory when allocating a temporary data structure.

Action: Increase the amount of memory on the system.

DIA-27164: tried to join detached thread

Cause: The program tried to join a detached thread.

Action: This is an internal error; contact Oracle support.

DIA-27165: tried to join thread that does not exist

Cause: The program tried to join a thread that does not exist.

Action: This is an internal error; contact Oracle support.

DIA-27166: tried to join current thread

Cause: A thread in the program tried to join itself.

Action: This is an internal error; contact Oracle support.

DIA-27168: Translation from hostname to network address failed

Cause: Internal error

Action: Contact Oracle Support Services.

DIA-27180: failed to create memory protection key

Cause: An attempt to create a memory protection key for a virtual memory range failed.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27181: failed to destroy memory protection key

Cause: An attempt to destroy a memory protection key for a virtual memory range failed.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27182: failed to protect virtual memory range using memory protection key

Cause: An attempt to protect a virtual memory range using a memory protection key failed.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27183: unable to locate symbol name in the SGA (system global area) symbol table

Cause: An attempt was made to locate or operate on a symbol that was not present in the SGA symbol table.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27184: specified symbol number is not in the range of symbols in the SGA (system global area) table

Cause: An attempt was made to locate or operate on a symbol that was not present in the SGA symbol table.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27185: buffer of insufficient length specified for reading symbol data

Cause: An attempt was made to read the symbol data using a read buffer of insufficient length.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27186: large buffer specified for writing into symbol data

Cause: An attempt was made to write into the symbol data using a write buffer of length greater than the symbol maximum size.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27187: SGA (system global area) symbol table operations not supported

Cause: An attempt was made to do a system global area (SGA) symbol table operation, but symbol table operations were not enabled for database, Oracle Automatic Storage Management (Oracle ASM) instances or non-Linux setups.

Action: Check errno in the trace file and contact Oracle Support Services.

DIA-27188: specification for parameter controlling the number of granules per SGA file is invalid

Cause: Setting of the parameter that controls the number of granules per system global area (SGA) file was not compatible with the other parameters used. The number of granules per SGA file cannot be greater than 1 when the SGA shrink functionality is enabled.

Action: Check the alert log for more information. Set the parameter that controls the number of granules per SGA file to 1 or appropriately modify the parameters to disable the SGA shrink functionality.

DIA-27190: skgfrd: sbtread2 returned error

Cause: sbtread returned an error. This happens while reading a backup file during a restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27191: sbtinfo2 returned error

Cause: sbtinfo2 returned an error. This happens while retrieving backup file information from the media manager's catalog.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27192: skgfcls: sbtclose2 returned error - failed to close file

Cause: sbtclose2 returned an error. This happens while closing a backup file during a backup or restore operation.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27193: sbtinfo2 did not return volume label

Cause: sbtinfo2 did not return the volume label information for the backup file that was just created.

Action: This is an internal error in the media management product. Contact the media management vendor.

DIA-27194: skgfdvcmd: sbtcommand returned error

Cause: sbtcommand returned an error. This happens when an rman SEND command is issued.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27195: proxy copy not supported

Cause: An attempt was made to do a proxy backup or restore, but the media management software installed with Oracle does not support proxy copy.

Action: Re-run the backup in non-proxy mode, or contact the media management vendor if the software is supposed to support proxy copy.

DIA-27196: skgfbk: sbtpcbbackup returned error

Cause: sbtpcbbackup returned an error. This happens when a proxy backup is begun.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27197: skgfprs: sbtpcrestore returned error

Cause: sbtpcrestore returned an error. This happens when a proxy restore is begun.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27198: skgfpyl: sbtpcvalidate returned error

Cause: sbtpcvalidate returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27199: skgfpyt: sbtpcstatus returned error

Cause: sbtpcstatus returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27200: skgfpyg: sbtpcstart returned error

Cause: sbtpcstart returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27201: skgfpcm: sbtpccommit returned error

Cause: sbtpccommit returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27202: skgfpen: sbtpcend returned error

Cause: sbtpcend returned an error. This happens during a proxy backup or restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27203: skgfpqb: sbtpcquerybackup returned error

Cause: sbtpcquerybackup returned an error. This happens during a proxy backup.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27204: skgfpqr: sbtpcqueryrestore returned error

Cause: sbtpcqueryrestore returned an error. This happens during a proxy restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27205: skgfpqn: sbtpccancel returned error

Cause: sbtpccancel returned an error. This happens during a proxy restore.

Action: This error is returned from the media management software which is linked with Oracle. There should be additional messages which explain the cause of the error. This error usually requires contacting the media management vendor.

DIA-27206: requested file not found in media management catalog

Cause: A backup file used in a recovery manager catalog maintenance command was not found in the media management catalog.

Action: Retry the command with a different file.

DIA-27207: syntax error in device PARMS - parentheses mismatch or missing

Cause: User-supplied PARMS value has incorrect syntax.

Action: Retry the command with correct syntax: ENV=(..) BLKSIZE=nnnn

DIA-27208: syntax error in device PARMS - environment variable value missing

Cause: User-supplied PARMS value has incorrect syntax.

Action: Retry the command with correct syntax: ENV=(var1=val1,var2=val2,..)

DIA-27209: syntax error in device PARMS - unknown keyword or missing =

Cause: User-supplied PARMS value has incorrect syntax. The server expected to find ENV or BLKSIZE, but found an unknown keyword.

Action: Retry the command with correct syntax: ENV=(..) BLKSIZE=nnnn

DIA-27210: syntax error in device PARMS

Cause: User-supplied PARMS value has incorrect syntax.

Action: Retry the command with correct syntax: ENV=(..) BLKSIZE=nnnn

DIA-27211: Failed to load Media Management Library

Cause: User-supplied SBT_LIBRARY or libobk.so could not be loaded. Call to dlopen for media library returned error. See Additional information for error code.

Action: Retry the command with proper media library. Or re-install Media management module for Oracle.

DIA-27212: some entrypoints in Media Management Library are missing

Cause: media library does not have one of the following entrypoints : sbtinfo, sbtread, sbtwrite, sbtremove, sbtopen, sbtclose, sbtinit

Action: Retry the command with proper media library.

DIA-27213: failed to unload Media Management Library

Cause: dlclose for media library returned error. See Additional Additional information for error code.

Action: contact Oracle Support.

DIA-27214: skgfrsfe: file search failed

Cause: The FindNextFile function returned unexpected error.

Action: Check errors on the error stack for an explanation why the search for files could not be successfully executed.

DIA-27215: skgfgsmcs: sbtinfo2 returned unknown file

Cause: During an sbtinfo2() call, the media management software returned information about an unknown backup file.

Action: Contact the media management vendor.

DIA-27216: skgfgsmcs: sbtinfo2 returned a malformed response

Cause: The media management software returned a malformed response during an sbtinfo2() call.

Action: Contact the media management vendor.

DIA-27217: failed to load Media Management Library from secure location

Cause: SBT libraries were not installed in a secure location.

Action: Remove SBT_SECURE parameter or Request third party vendors to provide patch that installs SBT libraries in secured locations as mandated by Oracle.

DIA-27218: failed to read Oracle ACFS mirror

Cause: An attempt to communicate with the Oracle Advanced Cluster File System (Oracle ACFS) kernel driver failed.

Action: Check errors on the error stack for an explanation of why communication with Oracle ACFS was not successful.

DIA-27219: syntax error in device PARMS - quotes missing or mismatch

Cause: The user-supplied PARMS value had incorrect syntax. Either quotes were missing or there was a mismatch in the ENV parameter.

Action: Retry the command with matching quotes inside ENV parameter.

DIA-27230: OS system call failure

Cause: OS system call failed

Action: check errno and contact Oracle support

DIA-27231: unable to close file

Cause: A file could not be closed.

Action: See accompanying errors.

DIA-27232: unable to get file information

Cause: Information about the file could not be obtained.

Action: See accompanying errors.

DIA-27233: file is not an ELF file

Cause: A file was not an ELF file.

Action: Check for file corruption and contact Oracle Support Services.

DIA-27234: unable to read file

Cause: A file could not be read.

Action: See accompanying errors.

DIA-27235: unable to map file region into memory

Cause: A file region could not be mapped into memory.

Action: See accompanying errors.

DIA-27236: unable to unmap file from memory

Cause: A file region could not be unmapped from memory.

Action: See accompanying errors.

DIA-27237: ELF file is not a relocatable object file

Cause: An ELF file was not the expected type.

Action: Supply the expected type of file.

DIA-27238: ELF file is not an executable

Cause: An ELF file was not the expected type.

Action: Supply the expected type of file.

DIA-27239: ELF file is not a shared object file

Cause: An ELF file was not the expected type.

Action: Supply the expected type of file.

DIA-27240: ELF file does not have a required section

Cause: An ELF file did not have a required section.

Action: Contact Oracle Support Services.

DIA-27241: ELF-shared library has multiple sections of the same type

Cause: An ELF-shared library had multiple sections of the same type.

Action: Contact Oracle Support Services.

DIA-27242: ELF file has invalid hash table entry size

Cause: An ELF file had an invalid hash table entry size.

Action: Contact Oracle Support Services.

DIA-27243: ELF file has too many relocation sections

Cause: An ELF file had too many relocation sections.

Action: Contact Oracle Support Services.

DIA-27244: unable to determine base value for data relocation from ELF file

Cause: An ELF file was missing important information.

Action: Contact Oracle Support Services.

DIA-27245: unable to dlopen() binary image

Cause: A file could not be accessed via dlopen().

Action: See accompanying errors and make file available.

DIA-27246: unable to open file

Cause: A file could not be opened.

Action: See accompanying errors and make file available.

DIA-27247: unable to add a file section

Cause: A file section could not be added.

Action: Contact Oracle Support Services.

DIA-27248: operating system call failure

Cause: Operating system call failed.

Action: Contact Oracle Support Services.

DIA-27250: OS system call failure

Cause: OS system call failed

Action: check errno and contact Oracle support

DIA-27270: Memory allocation for a group list object failed.

Cause: An attempt was made to allocate memory for a group list object.

Action: Contact Oracle Support to determine if this an operating system issue or an internal Oracle error.

DIA-27271: Group name lookup in operating system failed.

Cause: A process failed to determine the members of a UNIX group.

Action: This is an internal error. When encountered, please contact Oracle Support Services for assistance.

DIA-27275: operating system debug library call failure

Cause: Operating system debug library call failed.

Action: This is an internal error. Contact Oracle Support Services.

DIA-27276: operating system call failure

Cause: Operating system call failed.

Action: This is an internal error. Contact Oracle Support Services.

DIA-27277: invalid address

Cause: Incorrect or badly formatted address was supplied.

Action: Specify a valid address.

DIA-27278: no debug attribute found

Cause: The expected debug attribute was not found.

Action: This object file is malformed, use different object file.

DIA-27279: Cannot find referred type.

Cause: Malformed debug object.

Action: This object file is malformed, use different object file.

DIA-27280: debug information is not found

Cause: Could not find requested debug information.

Action: Use an object file with proper debug information.

DIA-27300: OS system dependent operation:*string* failed with status: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27301: OS failure message: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27302: failure occurred at: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27303: additional information: *string*

Cause: OS system call error

Action: contact Oracle Support

DIA-27351: conflicting values of job attributes *string* and *string*

Cause: The values of two attributes passed in to the CREATE_JOBS call or the JOB object constructor conflicted with each other. This is usually because both attributes cannot be non-NULL at the same time.

Action: Resolve the conflict by changing the value of one of the attributes and issue the call again.

DIA-27353: job attribute *string* is missing

Cause: An attribute needed to fully specify a job was not passed in to a call to CREATE_JOBS or the JOB object constructor.

Action: Issue the call again with the required attribute set.

DIA-27354: attribute *string* cannot be set for *string* jobs

Cause: The CREATE_JOBS call or the JOB object constructor was called with an argument that is illegal in the case of lightweight or in-memory jobs.

Action: Set the argument to the default value and issue the call again.

DIA-27356: invalid job argument

Cause: An invalid job argument was passed into either the CREATE_JOBS call or the JOB object constructor.

Action: Correct the argument value and issue the call again.

DIA-27357: duplicate reference to job object *string*

Cause: The scheduler CREATE_JOBS call had two or more references to the same job.

Action: Eliminate the duplicate references and issue the call again.

DIA-27359: duplicate reference to attribute *string* of job *string*

Cause: The scheduler SET_JOB_ATTRIBUTES call had two or more references to a specific attribute of a job.

Action: Eliminate the duplicate references and issue the call again.

DIA-27361: scheduler API invoked with illegal or inconsistent arguments

Cause: A DBMS_SCHEDULER API call was invoked with either illegal or inconsistent arguments.

Action: Refer to scheduler documentation for the call, make the necessary changes and issue the call again.

DIA-27362: batch API call completed with errors

Cause: Some of the commands submitted to a scheduler batch API call could not be successfully carried out because of errors. Other commands in the batch may have completed successfully.

Action: Check the view SCHEDULER_JOB_ERRORS to see which commands failed and why. Make the appropriate corrections and submit the failed commands again.

DIA-27363: invalid program for *string* job

Cause: An attempt was made to create a lightweight or in-memory job using an invalid program. A program used in a lightweight or in-memory job has to be enabled, has to be in the same schema as the job, and the program action has to be either a PL/SQL block or a stored procedure.

Action: Use a valid program for the lightweight job.

DIA-27364: remote database "*string*" already registered as *string*

Cause: The user attempted to register a remote database that was already registered.

Action: To update the registration information, the REPLACE argument of the REGISTER_REMOTE_DATABASE procedure should be set to TRUE. If the registration information is already current, no further action is needed.

DIA-27365: job has been notified to stop, but failed to do so immediately

Cause: The job specified in the stop_job command cannot be stopped immediately (because it is rolling back or blocked on a network operation), but it has been notified to stop. This means it will be stopped as soon as possible after its current uninterruptable operation is done.

Action: No action is required for the job to be stopped, but calling `stop_job` with force (if you have the privilege) may cause the job to be stopped sooner.

DIA-27366: job "*string*"."*string*" is not running

Cause: An attempt was made to stop a job that was not running.

Action: Verify the status of the job. If the job is running but this message is still being returned, contact Oracle support.

DIA-27367: program "*string*"."*string*" associated with this job is disabled

Cause: An attempt was made to run a job whose program has been disabled.

Action: Reenable the program before running the job.

DIA-27369: job of type *string* failed with exit code: *string*

Cause: A problem was encountered while running a job of type EXECUTABLE. The cause of the actual problem is identified by the exit code.

Action: Correct the cause of the exit code and reschedule the job.

DIA-27370: job slave failed to launch a job of type EXECUTABLE

Cause: The scheduler ran into an error when the job slave tried to start a job of type EXECUTABLE. The rest of the error stack will provide more detailed information on what the exact problem was.

Action: Correct the problem specified in the error stack and reschedule the job.

DIA-27371: jobs of type EXECUTABLE are not supported on this platform

Cause: The user tried to create a job or program of type EXECUTABLE on a platform where such jobs are not supported.

Action: Switch to a different platform or create a different type of job or program.

DIA-27372: length of action and arguments exceeds platform limit *string*

Cause: The total length of the job or program action and the arguments exceeds the platform limit specified.

Action: Reduce the total length by specifying fewer and/or shorter arguments

DIA-27373: unknown or illegal event source queue

Cause: The source queue specified for the event based job or event based schedule was either not found or was of the wrong type.

Action: Check if the queue exists. If it does make sure it is a multiple consumer queue and it is a post 8.1 compatible queue. Single consumer queues and old-style queues cannot be used as event source queues.

DIA-27374: insufficient privileges on event source queue

Cause: The job owner had insufficient privileges on the event source queue that was specified for the job.

Action: The job owner has to have dequeue privileges on event source queue or he has to have manage queue or dequeue any queue system privileges. Make sure one of these privileges is granted.

DIA-27375: valid agent name must be specified for secure queues

Cause: The queue specified for the event based job or schedule was a secure queue and either no agent name was specified or an invalid agent name was specified.

Action: If no agent name was specified, retry the call with a valid agent name. If the agent name was valid, check if the agent is currently subscribed to the queue and, in the case of jobs, check if the agent has been authorized to act as the job owner.

DIA-27376: event condition cannot be NULL

Cause: A null event condition was passed in for an event based job or schedule. This is not allowed.

Action: Pass in a legal event condition.

DIA-27377: windows cannot have event based schedules

Cause: Event based schedules for windows are currently not supported.

Action: Use a time-based schedule instead.

DIA-27378: cannot stop jobs of type EXECUTABLE on this platform

Cause: An attempt was made to stop a job of type EXECUTABLE on a platform where the stop operation was not supported.

Action: If the attempt to stop the job was made with the FORCE option set to FALSE, try again but change the FORCE option to TRUE.

DIA-27379: INSTANCE_ID attribute conflicts with job class settings

Cause: The value of the INSTANCE_ID attribute of the job conflicted with the value of the SERVICE attribute of its job class.

Action: Change the value of the INSTANCE_ID attribute or place the job in a job class whose settings do not conflict with the INSTANCE_ID attribute. Then re-enable the job.

DIA-27380: not enough units to satisfy the constraint

Cause: There were not enough resources to satisfy the constraint.

Action: Add more resource units.

DIA-27381: job cannot run, state is RESOURCE_UNAVAILABLE

Cause: The job could not run because one of the resources was in a BLOCKED_ALL_JOBS state.

Action: Change the resource to either ENFORCE_CONSTRAINTS or IGNORE_CONSTRAINTS.

DIA-27382: job type *string* has errors in the job action

Cause: There were errors in the job action when the FAIL_ON_SCRIPT_ERROR job attribute was set to TRUE.

Action: Ensure that the job action has no errors or set FAIL_ON_SCRIPT_ERROR job attribute to FALSE. FAIL_ON_SCRIPT_ERROR is only valid for SQL_SCRIPT, BACKUP_SCRIPT, EXECUTABLE and EXTERNAL_SCRIPT job types.

DIA-27398: Job *string* cannot be enabled. The associated program has been dropped.

Cause: The program associated with this job was force dropped. The job could not be enable.

Action: Retry with a job that has a valid program.

DIA-27399: job type EXECUTABLE requires the CREATE EXTERNAL JOB privilege

Cause: The owner of a job of type EXECUTABLE does not have the CREATE EXTERNAL JOB system privilege.

Action: Grant the CREATE EXTERNAL JOB system privilege to the job owner or create another job in a schema which does have the CREATE EXTERNAL JOB system privilege.

DIA-27400: In a PDB, the JOB_QUEUE_PROCESSES initialization parameter can only be set to 1000 or 0.

Cause: A value other than 1000 or 0 was specified for the JOB_QUEUE_PROCESSES initialization parameter. Inside a pluggable database (PDB), the JOB_QUEUE_PROCESSES initialization parameter can only accept the values of 1000 or 0 to indicate whether or not jobs should run in the PDB.

Action: Specify a proper value for this parameter.

DIA-27411: Empty or NULL string is not a valid repeat interval.

Cause: An empty or NULL string was provided as a repeat interval for a window, a job or a schedule.

Action: Specify a valid repeat interval. For example, 'FREQ=DAILY;BYHOUR=8;BYMINUTE=0;BYSECOND=0' for a job that executes daily at 8 a.m. For a PL/SQL expression, ensure that it evaluates to a specific point in time and not NULL.

DIA-27412: repeat interval or calendar contains invalid identifier: *string*

Cause: The calendar string or calendar definition for the repeat interval of a job, schedule or window contained an unsupported keyword or reference to an undefined calendar.

Action: Correct the repeat interval such that it no longer contains the invalid keyword.

DIA-27413: repeat interval is too long

Cause: The repeat interval consisted of a calendar string larger than the maximum size allowed.

Action: Use a shorter calendar string for the repeat interval.

DIA-27414: Invalid *string* clause value

Cause: The BY clause value was not recognized or was out-of-range for the frequency specified.

Action: Specify a valid BY clause value.

DIA-27415: repeat interval or calendar must start with a frequency clause

Cause: The specified calendar string for the repeat interval did not start with a frequency clause.

Action: Create a repeat interval that starts with a frequency clause, for example 'FREQ=YEARLY;BYMONTH=FEB'

DIA-27416: BYDAY clause in repeat interval or calendar contains an invalid weekday

Cause: The BYDAY clause of the repeat interval contained a value that did not represent a weekday.

Action: Use the correct three letter abbreviations for weekdays, for example MON for Monday and FRI for Friday.

DIA-27417: BYWEEKNO clause requires YEARLY clause

Cause: A repeat interval or calendar contained a BYWEEKNO clause with a frequency other than yearly.

Action: Remove the BYWEEKNO clause or change the frequency to YEARLY.

DIA-27418: syntax error in repeat interval or calendar

Cause: The repeat interval or calendar definition was not recognized as valid syntax.

Action: Specify a valid repeat interval.

DIA-27419: unable to determine valid execution date from repeat interval

Cause: The specified repeat interval contained conflicting clauses that made it impossible to ever find a matching date, e.g., 'FREQ=YEARLY;BYMONTH=FEB;BYMONTHDAY=31'. Alternatively, the scheduler reached its maximum number of attempts to try to find a valid execution date. This occurs when theoretically there is a valid execution date far in the future, but the scheduler took too many attempts to determine this date.

Action: Remove the conflicting clauses, or simplify the repeat interval so that it is easier to determine the next execution date.

DIA-27420: Following message from *string* interval interpreter

Cause: The repeat interval or calendar definition was not recognized as valid syntax.

Action: Specify a valid repeat interval.

DIA-27421: calendar expression restriction *string* encountered

Cause: The calendar expression was not valid because a limit test failed. For example, the maximum value of the interval that can be specified in the INTERVAL clause is limited to a value derived from the frequency clause.

Action: Specify a valid calendar definition.

DIA-27422: usage of *string* not supported in embedded calendar application "*string*". "*string*"

Cause: The main calendar definition used an embedded calendar in an INCLUDE, EXCLUDE, INTERSECT, or FREQ clause for which extra limitations apply.

Action: Remove the specific clause from the calendar definition.

DIA-27423: calendar clause *string* specified more than once

Cause: The calendar definition contained a clause that was specified twice or more times.

Action: Append the values in the second clause to the first clause and remove the second clause.

DIA-27424: calendar clauses *string* and *string* are incompatible

Cause: The calendar definition contained clauses that were incompatible.

Action: Change or remove either clause.

DIA-27425: instance_id cannot be specified if database is not in Oracle RAC mode

Cause: 'stop_job' was called with 'instance_id' outside Oracle RAC mode.

Action: Do not specify this parameter for 'stop_job' unless in Oracle RAC mode.

DIA-27431: chain "string"."string" has a user-managed rule set

Cause: An attempt was made to modify a rule set that is not managed by the Scheduler.

Action: Modify the rule set directly using the dbms_rule_adm package or create another chain without specifying a rule set.

DIA-27432: step "string" does not exist for chain "string"."string"

Cause: The step specified does not exist for the given chain.

Action: Reissue the command using a step that exists for this chain.

DIA-27433: cannot alter state of step "string" for job "string"."string" to string

Cause: The step cannot be changed to the requested state. The state of a running step cannot be changed. A step which is running or has already run cannot be run again.

Action: Wait until the step has finished running.

DIA-27434: cannot alter chain step job "string"."string"."string"

Cause: A step job of a running chain cannot be altered, only stopped or dropped.

Action: Stop or drop the chain step job or alter the running chain step instead.

DIA-27435: chain job terminated abnormally

Cause: A chain job has ended abnormally. The error code for the running chain could not be retrieved.

Action: No action necessary. The job will run again when it is scheduled to.

DIA-27436: Scheduler agent operation failed with message: string

Cause: The Scheduler agent encountered an unexpected error when trying to perform the specified action.

Action: Review the provided message and the Scheduler agent log for information on how to fix the issue or contact Oracle Support Services.

DIA-27451: string cannot be NULL

Cause: An attempt was made to set a NOT NULL scheduler attribute to NULL.

Action: Reissue the command using a non-NULL value for the specified attribute.

DIA-27452: "string" is an invalid name for a database object.

Cause: An invalid name was used to identify a database object.

Action: Reissue the command using a valid name.

DIA-27453: "string" is an invalid job or program argument name.

Cause: An invalid job or program argument name was specified.

Action: Reissue the command using a valid name for this argument.

DIA-27454: argument name and position cannot be NULL

Cause: The name or position of a program or job argument was defined as NULL.

Action: Reissue the command providing either a valid argument name or valid argument position.

DIA-27455: Only "SYS" is a valid schema for a *string*.

Cause: A non-SYS schema was specified for an object that must be in the SYS schema.

Action: Reissue the command, leaving out the schema name or using the schema name of SYS.

DIA-27456: not all arguments of program "*string*". "*string*" have been defined

Cause: The number_of_arguments attribute of the named program did not match the actual number of arguments that have been defined.

Action: Define as many arguments as the number of arguments, or change the number of arguments.

DIA-27457: argument *string* of job "*string*". "*string*" has no value

Cause: No value was provided for the job argument with the specified position.

Action: Provide a value for the job argument using any of the set_job_xxxx_value() routines. Or, when using a named program, specify a default value for the corresponding argument of the program.

DIA-27458: A program of type PLSQL_BLOCK cannot have any arguments.

Cause: An attempt was made to create or enable a program of type PLSQL_BLOCK with arguments. This is not allowed.

Action: Change the number of arguments to zero, or change the type of the program.

DIA-27459: A program of type EXECUTABLE must have character-only arguments.

Cause: A program of type EXECUTABLE was created or enabled with one or more arguments of non-character datatypes.

Action: Change the arguments to be of character-only datatypes.

DIA-27460: cannot execute disabled job "*string*". "*string*"

Cause: An attempt was made to run a job that is disabled.

Action: Enable the job and then reschedule the job.

DIA-27461: The value for attribute *string* is too large.

Cause: The value that was provided for the specified attribute was too large.

Action: Reissue the command using a smaller or shorter value.

DIA-27463: invalid program type *string*

Cause: An invalid program type was specified.

Action: Reissue the command using a valid program type.

DIA-27464: invalid schedule type *string*

Cause: An invalid schedule type was specified.

Action: Reissue the command using a valid schedule type.

DIA-27465: invalid value *string* for attribute *string*

Cause: An invalid value was provided for the specified attribute.

Action: Reissue the command using a valid value for this attribute.

DIA-27467: invalid datatype for *string* value

Cause: The value provided for the named scheduler attribute was of an invalid datatype.

Action: Reissue the command using a value of the correct datatype.

DIA-27468: "*string*".*string* is locked by another process

Cause: An attempt was made to read or modify the state of the named scheduler object when another process was also updating the same object and held the lock.

Action: Retry the operation. Scheduler locks are held for a very short duration. If the error persists, contact Oracle Support.

DIA-27469: *string* is not a valid *string* attribute

Cause: A nonexistent attribute was specified.

Action: Reissue the command using a valid attribute for that specific scheduler object.

DIA-27470: failed to re-enable "*string*".*string* after making requested change

Cause: A change was made to an enabled scheduler object that caused it to become disabled.

Action: Alter the object so that it becomes valid and then enable it.

DIA-27471: window "*string*".*string* is already closed

Cause: An attempt was made to close a window that was not open.

Action: No action required.

DIA-27472: invalid metadata attribute *string*

Cause: An invalid metadata attribute was specified.

Action: Reissue the command using a valid metadata attribute.

DIA-27473: argument *string* does not exist

Cause: An argument which was specified does not exist.

Action: Reissue the command using an argument name defined by the program or using a valid argument position.

DIA-27474: cannot give both an argument name and an argument position

Cause: An argument was specified using both a name and a position.

Action: Reissue the command using either the argument name or the argument position but not both.

DIA-27475: unknown *string* "*string*".*string*

Cause: The specified object did not exist, privileges were not granted, or the object was of the wrong type.

Action: Specify an object of the correct type on which you have privileges.

DIA-27476: "string"."string" does not exist

Cause: A database object was specified that does not exist.

Action: Reissue the command using an object that exists or create a new object and then reissue this command.

DIA-27477: "string"."string" already exists

Cause: An attempt was made to create an object with a name that has already been used by another object in the same schema.

Action: Reissue the command using a different name or schema.

DIA-27478: job "string"."string" is running

Cause: An attempt was made to drop a job that is currently running.

Action: Stop the job and then reissue the command, or reissue the command specifying the force option to stop the job first.

DIA-27479: Cannot string "string"."string" because other objects depend on it

Cause: An attempt was made to drop or disable a scheduler object that has jobs associated with it without specifying the force option.

Action: Alter the associated jobs so they do not point to the scheduler object being dropped or disabled and then reissue the command. Alternatively reissue the command specifying the force option. If the force option is specified and a scheduler object is being dropped, all associated jobs will be disabled.

DIA-27480: window "string" is currently open

Cause: An attempt was made to drop a window that is currently open, or to manually open a window while another window is already open.

Action: Close the window that is open and then reissue the command, or reissue the command while setting the force option to TRUE.

DIA-27481: "string"."string" has an invalid schedule

Cause: An attempt was made to enable a job or window that has an invalid schedule.

Action: Alter the schedule of the job or window so that it is valid and then reissue the enable command.

DIA-27482: The scheduler credential "string"."string" is unusable.

Cause: An attempt was made to use a scheduler credential for which the key to decrypt its password was lost. Therefore, the password of the credential could not be retrieved.

Action: Reset the PASSWORD attribute of the credential by calling DBMS_CREDENTIAL.UPDATE_CREDENTIAL.

DIA-27483: "string"."string" has an invalid END_DATE

Cause: An attempt was made to enable a job or window that has an invalid end_date. Either the end_date is before the start_date or the end_date is in the past.

Action: Alter the job or window so that the end date becomes valid (possibly null) and then reissue the command.

DIA-27484: Argument names are not supported for jobs without a program.

Cause: An attempt was made to set or reset a job argument by using the name of the argument. Identifying job arguments by their name is only supported in combination with jobs that are based on programs. Jobs that are not using a program cannot have named arguments.

Action: Use argument position instead of name and then issue the command again.

DIA-27485: argument "*string*" already exists at a different position

Cause: An attempt was made to create or replace an argument with a name that is already used by an argument at a different position.

Action: Use a different name for the argument or drop or alter the argument which already exists with this name and then reissue the command.

DIA-27486: insufficient privileges

Cause: An attempt was made to perform a scheduler operation without the required privileges.

Action: Ask a sufficiently privileged user to perform the requested operation, or grant the required privileges to the proper user(s).

DIA-27487: invalid object privilege for a *string*

Cause: The granted object privilege is not valid for the specified scheduler object.

Action: Check the scheduler documentation to verify which object privileges can be granted on which scheduler objects.

DIA-27488: unable to set *string* because *string* was/were already set

Cause: An attempt was made to set an object's attribute even though one or more conflicting attributes of the same object had already been set.

Action: Set the other conflicting attributes to NULL and then reissue the command.

DIA-27489: unable to process job "*string*"."*string*" from job class "*string*"

Cause: An error was encountered while processing the named job from the specified job class.

Action: Resolve the error for this job and then reissue the command. See the next error message on the stack to find out what the error for the job is.

DIA-27490: cannot open disabled window "*string*"."*string*"

Cause: The user tried to open a disabled window.

Action: Enable the window and then try to open it again.

DIA-27491: repeat_interval and start_date cannot both be NULL

Cause: An attempt was made to set both repeat_interval and start_date to equal NULL for a Scheduler window or schedule.

Action: If either repeat_interval or start_date is set to equal NULL, the other should be set to a non-NULL value.

DIA-27492: unable to run job "*string*"."*string*": scheduler unavailable

Cause: A job run with current session set to false can not be issued if the scheduler is not active. Check value of job_queue_processes parameter, issue

dbms_job.set_enabled(true), database is in upgrade/migrate mode, database is in data guard mode, or scheduler attribute SCHEDULER_DISABLED is set to TRUE

Action: Run the job in the current session or activate the scheduler

DIA-27493: In-memory job "*string.string*" cannot be modified

Cause: Once enabled, the full in-memory job could not be further modified.

Action: The only actions that can be taken now are to stop or drop the job.

DIA-27494: operation not permitted on lightweight and in-memory jobs

Cause: An attempt was made to perform an action that was not permitted.

Action: Check Oracle Scheduler documentation to see which actions can be performed on the desired job.

DIA-27495: attribute *string* cannot be set for in-memory jobs

Cause: An attempt was made in a CREATE or SET_ATTRIBUTE call to set an attribute that could not be set for run-time in-memory jobs.

Action: If you need to set this attribute, use either regular or lightweight jobs.

DIA-27496: credential "*string*"."*string*" is disabled

Cause: An attempt was made to run a job, file watcher or external procedure whose credential was disabled.

Action: Reenable the credential before running the job, file watcher or external procedure.

DIA-27497: operation is not permitted inside a pluggable database

Cause: This operation was not permitted in a pluggable database.

Action: Log into the root database and retry the operation.

DIA-27498: resource constraint object type mismatch

Cause: Not all of the resource constraints of a resource were of the same type.

Action: Delete existing constraints for the resource.

DIA-27499: in-memory job metadata is too large

Cause: The in-memory job was too large. Due to the need to keep in-memory jobs efficient and performing well, we limit the size of in-memory job metadata to 8 kilobytes. This includes the space used for job argument values.

Action: Reduce the size of the job metadata and try again. If all the metadata is needed, then you should create some other type of job.

DIA-27500: inter-instance IPC error

Cause: This is an operating system/cluster interconnect error.

Action: Check the extra information and contact Oracle Support Services.

DIA-27501: IPC error creating a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27502: IPC error deleting OSD context

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27503: IPC error attempting to cancel request

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27504: IPC error creating OSD context

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27505: IPC error destroying a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27506: IPC error connecting to a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27507: IPC error disconnecting from a port

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27508: IPC error sending a message

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27509: IPC error receiving a message

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27510: IPC error waiting for a request to complete

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27512: IPC error posting a process

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27513: parameter *string* contains invalid value *string*

Cause: The program could not identify the value as an IP address.

Action: Change the value to be a valid IP address.

DIA-27514: IPC error copying memory to remote process

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27515: inadequate memlock limit or driver settings

Cause: Inter Process Communication(IPC) queue creation failed due to inadequate memlock limit or driver settings.

Action: Set a higher memlock limit and review the network driver settings to ensure that this limit is accepted.

DIA-27528: Transport: *string* required by *string* is not available

Cause: The IP addresses assigned to the instance did not support the specified transport.

Action: Check the IP addresses used in the alert log and contact Oracle Support Services.

DIA-27529: IPC IP address *string* is not available.

Cause: The IP address assigned to the instance was not associated with any network adapters.

Action: Ensure that the IP address is assigned to a network adapter.

DIA-27532: IPC global name service error

Cause: The global name space service used by KSXP reported an error

Action: Check additional error messages in the process trace file and contact Oracle Support Services.

DIA-27541: NMON event service background process terminated with error

Cause: The NMON event service process died.

Action: No action required.

DIA-27542: Failed to unprepare a buffer prepared for remote update

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27543: Failed to cancel outstanding IPC request

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27544: Failed to map memory region for export

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27545: Fail to prepare buffer for remote update

Cause: This is an operating system/cluster interconnect error.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27546: Oracle compiled against IPC interface version *string.string* found version *string.string*

Cause: A misconfiguration or installation error occurred.

Action: Install the IPC library for this release of Oracle.

DIA-27547: Unable to query IPC OSD attribute *string*

Cause: This is an operating system-dependent IPC error.

Action: Contact Oracle support Services.

DIA-27548: Unable to unprepare IPC buffer

Cause: This is an operating system-dependent IPC error.

Action: Contact Oracle support Services.

DIA-27550: Target ID protocol check failed. tid vers=*string*, type=*string*, remote instance number=*string*, local instance number=*string*

Cause: The local Oracle Real Application Cluster instance and remote instance are running with incompatible implementation of the inter-instance IPC protocol library. A misconfiguration or installation error occurred.

Action: Check additional error messages in the alert log and the process trace file.

DIA-27552: exception accessing GSM in Oracle RAC cluster

Cause: Global Shared Memory (GSM) was used to provide shared memory semantics on an Oracle RAC cluster. An error occurred while accessing GSM hosted on a remote node.

Action: Contact Oracle Support Services.

DIA-27553: incompatible IPC settings in Oracle RAC cluster

Cause: Inter-process Communication (IPC) settings were not compatible with other instances in the Oracle RAC cluster.

Action: Check additional error messages in the alert log and IPC0 trace file.

DIA-27601: Cell storage initialization failed, cell library error code [*string*]

Cause: Cell storage client did not succeed in initializing.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27602: Failure to publish network status information, cell library error code [*string*]

Cause: Network status information publishing failed.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27603: Cell storage I/O error, I/O failed on disk *string* at offset *string* for data length *string*

Cause: Cell storage I/O read or write failed, possibly due to a configuration problem or a hardware failure.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27604: Cell storage ioctl error, ioctl failed on disk *string*

Cause: ioctl operation on a cell storage disk failed.

Action: Check the value of errno and contact Oracle Support Services.

DIA-27605: Smart I/O failed as a handle could not be obtained to the cell "*string*" as the cell is not accessible.

Cause: The cell could have been unavailable.

Action: Ensure the cell is available. Check the network connectivity.

DIA-27606: Smart I/O failed because the diskgroup was found to be unmounted. tablespace number: "string", file number: "string"

Cause: The diskgroup to which the specified file belongs was found to be unmounted.

Action: Ensure that the diskgroup to which the specified file belongs is mounted.

DIA-27607: Smart I/O failed because there were no online disks. tablespace number: "string", file number: "string"

Cause: There were no online disks found for the specified file.

Action: Ensure the diskgroup to which the specified file belongs to is mounted. Ensure that the disks are online. Check the availability of cells and check the network.

DIA-27608: Smart I/O failed because the disk "string" on the cell "string" was not open. error code: "string", "string"

Cause: The specified disk on the specified cell could not be opened.

Action: Ensure the cell is available. Check the network.

DIA-27609: Smart I/O failed due to a network error to the cell "string". error code "string", "string"

Cause: The specified cell could not be connected to.

Action: Ensure that the cell is available. Check the network.

DIA-27610: Smart I/O failed due to shortage of memory on the cell "string"

Cause: The specified cell had a shortage of memory to perform smart I/O.

Action: Reduce the parallel degree or number of Oracle sessions executing smart I/O.

DIA-27611: Smart I/O failed due to a block corruption detected on the host. The block was received from cell "string". disk: "string", block: "string", disk offset: "string"

Cause: The data block indicated was corrupted on the host, but a corruption was not found on the cell.

Action: This may be due to a transient network error or a real block corruption. Check your network for any errors. Analyze the segment to which the file belongs. If there is indeed a corruption, try to restore the block using RMAN block recovery. If there is a trace file, report the errors in it to Oracle Support Services. If analyze did not report an error and network did not have any error, report the problem to Oracle Support Services as this appears to be a software error.

DIA-27612: Smart I/O failed due to a block corruption detected on the cell "string". disk: "string", block: "string", disk offset: "string"

Cause: The data block indicated was found to be corrupted on the cell.

Action: This may be due to a software error or a real data corruption. Analyze the segment. If there is indeed a block corruption, try to restore the block using RMAN block level recovery. If there is a trace file, report the errors in it to Oracle Support Services. If analyze did not report an error, report the problem to Oracle Support Services as this appears to be a software error.

DIA-27613: Smart I/O failed due to an I/O error on the cell "string". disk: "string", block: "string", disk offset: "string" I/O size: "string"

Cause: An I/O request failed on the specified cell and disk.

Action: Check the specified disk on the cell.

DIA-27614: Smart I/O failed due to an error "*string*, *string*" from the cell "*string*". disk: "*string*", block: "*string*", disk offset: "*string*" I/O size: "*string*"

Cause: An I/O request failed, due to an internal error on the specified cell and disk.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27615: Smart I/O file to ASM disk translation failed with error: *string*.

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27616: ASM Allocation Unit: *string*

Cause: This error message is usually accompanied by another message, indicating the real problem. This message exists to provide additional information to Oracle Support Services.

Action: Check the next error message.

DIA-27617: Smart I/O failed because of an internal error. Cell "*string*", disk "*string*", cell library error code "*string*, *string*", error information "*string*"

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27618: Smart I/O failed because of an internal error. Cell "*string*", cell library error code "*string*, *string*", error information "*string*"

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27619: Smart I/O failed because of an internal error when determining the time zone file version. Error code "*string*"

Cause: An internal error caused a smart I/O operation to fail.

Action: Report the problem to Oracle Support Services along with the process trace file and alert log.

DIA-27621: The value of *string* is not valid for parameter *string*

Cause: Incorrect value is specified for an internal parameter.

Action: This parameter should only be set by Oracle Support Services. Check the additional diagnostic information in the trace file and contact Oracle Support Services for recommendations on setting this parameter.

DIA-27623: Cell automation SQL action failed

Cause: Cell automation manager or worker process failed to execute SQL action through OCI recursive call.

Action: Check the alert log and process trace file for additional information. Contact Oracle Support Services if the errors specified in the trace file cannot be corrected.

DIA-27624: Smart I/O failed because the number of reconnects to the cell "*string*" exceeded the maximum allowed "*string*".

Cause: The number of reconnects to a cell exceeded the maximum allowed. This problem indicates a possible network problem or a software problem on the cell.

Action: If the cellsv is being restarted repeatedly, in a short interval, check the system load. The problem may be corrected by rebooting the cell. If the system is not overloaded, the repeated restarts are likely due to software problem. Report the problem to Oracle Support Services along with alert log and trace files. If the cellsv is not restarting, the problem may be in the IB network. Check the network between the host and all the cells.

DIA-27625: Exadata configuration failed.

Cause: One or both of the files, cellinit.ora and cellip.ora, were either invalid or missing.

Action: Check if the files, cellinit.ora and cellip.ora, are both present. They can be found in the \$OSSCONF directory. If both are present, check if their contents are valid and correct. If the files are invalid or missing, produce files with valid information in the \$OSSCONF directory. For information on how to set up these files, see the Exadata Users Guide.

DIA-27626: Exadata error: *string* (*string*)

Cause: The cause of this error is dependent on the context in which this error is reported.

Action: See the primary error reported with this error.

DIA-27627: Software edition incompatible with Exadata storage.

Cause: Oracle Exadata can be used only with Oracle Database Enterprise Edition.

Action: Check if Oracle is linked with the Enterprise Edition options.

DIA-27628: An invalid value was specified for the parameter *string*.

Cause: An invalid value was specified for a parameter.

Action: Check the additional diagnostic information in the trace file and contact Oracle Support Services if further help is required.

DIA-27629: External table smart I/O failed because the cell is not accessible.

Cause: The cell was unavailable.

Action: Ensure the cell is available.

DIA-27631: External encryption or decryption is disabled.

Cause: Either decryption was disabled in the cellinit.ora initialization parameter file, or the cryptography mode requested by the database was incompatible with what was available on the cell.

Action: No action is necessary. The Exadata cell returns data in pass-through mode when encryption or decryption is required.

DIA-27777: Event set to enable MGA tracing

Cause: An event was set to enable MGA tracing on the system.

Action: If the event was set by request of Oracle Support Services, no action is needed. If not, please contact Oracle Support Services as setting this event can degrade the performance of your database or have other side-effects.

DIA-27778: MGA namespace is already marked for deletion.

Cause: Managed Global Area (MGA) namespace was already marked for deletion. No further attaches are allowed.

Action: This is a diagnostic message; no action is needed.

DIA-27779: MGA segment creation failure

Cause: The Managed Global Area (MGA) segment creation failed.

Action: Check other error messages for additional information.

DIA-27780: MGA segment deletion failure

Cause: The Managed Global Area (MGA) segment deletion failed.

Action: Check other error messages for additional information.

DIA-27781: MGA segment attach failure

Cause: The Managed Global Area (MGA) segment attach failed.

Action: Check other error messages for additional information.

DIA-27782: MGA segment detach failure

Cause: The Managed Global Area (MGA) segment detach failed.

Action: Check other error messages for additional information.

DIA-27800: invalid configuration (*string*) for event creation (*string*)

Cause: An invalid configuration value was specified while creating the event.

Action: Make sure all configuration values are valid and retry the operation. Consult the manuals for valid configuration values. If the issue persists, contact Oracle Support Services.

DIA-27801: event notification handle not valid

Cause: The event notification handle was not valid.

Action: None

DIA-27890: invalid namespace context type

Cause: The namespace context type was invalid.

Action: None

DIA-27891: Namespace invalid *string*

Cause: An invalid parameter was passed to namespace layer.

Action: None

DIA-27892: invalid namespace context handle

Cause: The namespace context handle was invalid.

Action: None

DIA-27893: given namespace context handle not attached

Cause: The namespace context handle not attached.

Action: None

DIA-27894: given namespace context handle attached

Cause: The namespace context handle attached.

Action: None

DIA-28000: The account is locked.

Cause: The wrong password was used for FAILED_LOGIN_ATTEMPTS consecutive login attempts, or the DBA locked the account, or the user was a common user locked in the root container.

Action: Wait for the PASSWORD_LOCK_TIME to elapse or contact the DBA to unlock the account manually using the ALTER USER command with the ACCOUNT UNLOCK clause. The PASSWORD_LOCK_TIME is the password profile limit which specifies how long the account remains in the LOCKED (TIMED) status after the wrong password was used for FAILED_LOGIN_ATTEMPTS consecutive login attempts. A user's account status can be found in the ACCOUNT_STATUS column of the DBA_USERS view.

DIA-28001: The password has expired.

Cause: The user's account expired and the password must be changed. This occurred if any of the following was true: * The database administrator caused the user's account to expire by using the ALTER USER PASSWORD EXPIRE statement. * The user's account was associated with a password profile with a limited password life, and the user's password had not been changed in accordance with the PASSWORD_LIFE_TIME parameter. * The user's account was created as part of either a database import inside a Pluggable Database (PDB) or as a clone of an existing PDB. And the user's password did not meet the requirements of the mandatory profile enforced in the PDB.

Action: Change the password or contact the Database Administrator to understand the rules for choosing the new password which complies with the mandatory password profile.

DIA-28002: the password will expire within *string* days

Cause: The password of the user's account expired and entered the grace period and should be changed. This can happen if any of the following is true: * The user account was associated with a password profile with a limited password grace period. * The user account was created as part of either a database import inside a Pluggable Database (PDB) or clone of an existing PDB and the user's password did not meet the requirements of the mandatory profile (that was configured with a limited password grace period) enforced in the PDB. Since the password grace period has not yet elapsed, the user is not prompted to input a new password and an ORA-28002 warning message will continue to be displayed upon each successful login to the user account, until the user changes their password. After the grace period has elapsed, the password expires and until the user successfully changes their password their login will continue to fail with an ORA-28001 error.

Action: Change the password or contact the database administrator to understand the rules for choosing the new password which complies with the mandatory profile.

DIA-28003: password verification for the specified password failed

Cause: The new password did not meet the necessary complexity specifications and the password_verify_function failed

Action: Enter a different password. Contact the DBA to know the rules for choosing the new password

DIA-28004: invalid argument for function specified in PASSWORD_VERIFY_FUNCTION *string*

Cause: The password verification function does not have the required number and type of input/output arguments and/or the return argument

Action: Check the manual to find out the format of the password verification function

DIA-28005: invalid logon flags

Cause: The flags are not properly set or conflicting flags are set in making calls

Action: Call the function with appropriate flags set.

DIA-28006: conflicting values for parameters *string* and *string*

Cause: The parameters PASSWORD_REUSE_TIME and PASSWORD_REUSE_MAX cannot both be set. One parameter should be unlimited while other is set

Action: Set one value to UNLIMITED explicitly

DIA-28007: the password cannot be reused

Cause: The password cannot be reused for the specified number of days or for the specified number of password changes

Action: Try the password that you have not used for the specified number of days or the specified number of password changes Refer to the password parameters in the CREATE PROFILE statement

DIA-28008: invalid old password

Cause: old password supplied is wrong; Hence user cannot be authenticated using old password

Action: Supply the correct old password for authentication

DIA-28009: connection as SYS should be as SYSDBA or SYSOPER

Cause: connect SYS/password is no longer a valid syntax

Action: Try connect SYS/password as SYSDBA or connect SYS/password as SYSOPER

DIA-28010: cannot expire external users, global users, or users with no authentication method

Cause: If a user account is created as IDENTIFIED EXTERNALLY, IDENTIFIED GLOBALLY, NO AUTHENTICATION, this account cannot be expired.

Action: Expire the password of a user that has "PASSWORD" as its AUTHENTICATION_TYPE in DBA_USERS views.

DIA-28011: the password has expired; change your password now

Cause: The password of the user's account has expired. Since the user's account is associated with a password profile with an UNLIMITED password grace period, the user will not be prompted to input a new password (as normally happens for accounts with a limited grace period). Instead, ORA-28011 warning message will continue to be displayed upon each successful login to the user account, until the user changes their password.

Action: Change the password or contact the database administrator.

DIA-28012: connection as *string* should use AS *string*

Cause: An attempt was made to connect as an administrative user without using AS SYSBACKUP, AS SYSDG, or AS SYSKM.

Action: Try connecting with AS SYSBACKUP, AS SYSDG, or AS SYSKM.

DIA-28013: the password has expired

Cause: The password of the proxy user expired.

Action: Connect directly as proxy user to change the password or contact the DBA.

DIA-28014: cannot drop administrative user or role

Cause: An attempt was made to drop an administrative user or role. An administrative user or role can be dropped only by SYS during migration mode.

Action: Drop the administrative user or role during migration mode.

DIA-28015: account unlock attempted on read-only database but a conflicting account lockout on the primary exists

Cause: An attempt to unlock an account on a read-only database was prevented, because the account was previously marked as locked on the primary database. All attempts to unlock the account on the read-only database will be prevented as long as the overriding "account locked" condition exists at the primary database.

Action: If this database is part of a Data Guard configuration, perform the account unlock action on the primary database. If this database is read-only, then set the database to read/write and perform the account unlock action.

DIA-28016: Privilege *string* cannot be granted to SYS.

Cause: An attempt was made to grant SYSBACKUP, SYSDG or SYSKM to the SYS user. These administrative privileges cannot be granted to SYS.

Action: Try granting the administrative privilege to other users.

DIA-28017: The password file is in the legacy format.

Cause: An attempt was made to perform one of the following operations, but none of these operations are allowed while the password file is in LEGACY format. - Attempting to grant SYSBACKUP, SYSDG or SYSKM privileges. - Attempting to grant an administrative privilege to a user who has large password verifiers, for example, SHA-512 hashed verifiers. - Attempting to grant a common administrative privilege to a common user in a multitenant container database (CDB).

Action: Create the password file in the new format ("12" or higher) or migrate the existing password file in LEGACY format to the new format ("12" or higher) using the INPUT_FILE option, then retry the operation.

DIA-28018: This operation requires connection as SYS or SYSBACKUP.

Cause: An attempt was made to execute a command even though the user was not connected as SYS or SYSBACKUP.

Action: Connect as SYS or SYSBACKUP and retry this command.

DIA-28019: audit cannot be configured on administrative privileges

Cause: An attempt was made to configure audit on an administrative privilege using either the AUDIT, NOAUDIT, CREATE AUDIT POLICY, or ALTER AUDIT POLICY command.

Action: For traditional audit, use `AUDIT_SYS_OPERATIONS` to audit administrative privileges. If this is a unified audit, use action-based auditing to audit administrative users.

DIA-28021: cannot grant global roles

Cause: The role granted was `IDENTIFIED GLOBALLY`. Global roles can only be granted via a central authority for the domain.

Action: Use `ALTER ROLE` to change the type of role (from `IDENTIFIED GLOBALLY` to other, such as `IDENTIFIED BY password`), or allocate it to a global user via the central authority.

DIA-28022: cannot grant external roles to global user or role

Cause: The role granted was `IDENTIFIED EXTERNALLY`. External roles cannot be granted to global users, to global roles or to any other roles.

Action: Use `ALTER ROLE` to change the type of the role being granted (from `IDENTIFIED EXTERNALLY` to other, such as `NOT IDENTIFIED`) or use `ALTER USER` to change the type of the user that is the grantee.

DIA-28023: must revoke grants of this role to other user(s) first

Cause: The role altered to `IDENTIFIED GLOBALLY` was granted to one or more other users and/or roles. Global roles cannot be granted to any user or role.

Action: Use `REVOKE` to revoke the role from other users or roles first.

DIA-28024: must revoke grants of external roles to this role/user

Cause: The user or role altered to `IDENTIFIED GLOBALLY` has external roles directly granted - these must be revoked, since external roles cannot be granted to global users or roles.

Action: Use `REVOKE` to revoke the external roles from the user or role to be `ALTERed`.

DIA-28025: missing or null external name

Cause: The `IDENTIFIED EXTERNALLY AS` or `IDENTIFIED GLOBALLY AS` clause was specified with a valid external name.

Action: Provide a valid external name.

DIA-28026: user with same external name already exists

Cause: The external name specified for the user being created or altered already exists for another user.

Action: External names must be unique among users. Specify another.

DIA-28027: privileged database links may be used by global users

Cause: Only users `IDENTIFIED GLOBALLY` may use a privileged database link.

Action: Either change the user to a global user or try to use a different database link.

DIA-28028: could not authenticate remote server

Cause: During the course of opening a privileged database link, the remote server was not securely identified using the network security service. Additional errors should follow.

Action: Consult the network security service documentation on how to properly configure the remote server.

DIA-28029: could not authorize remote server for user *string*

Cause: During the course of opening a privileged database link, the remote server was found to lack the necessary authorizations to connect as the current global user. This may be because the server was not authorized by the network security service. Or it may be because the local server is restricting access by the remote server using the DBMS_SECURITY_DOMAINS_ADMIN package.

Action: Grant the remote server the proper authorization to connect as the given global user, and check that the local server is not restricting access.

DIA-28030: Server encountered problems accessing LDAP directory service

Cause: Unable to access LDAP directory service

Action: Please contact your system administrator

DIA-28031: maximum of *string* enabled roles exceeded

Cause: The user attempted to enable too many roles.

Action: Enable fewer roles.

DIA-28032: Your password has expired and the database is set to read-only

Cause: Your password expired and needs to be changed before your login request can be processed. Because the database is currently open in read-only mode, the password change operation cannot be performed on this database.

Action: Log in to the primary database to change your password, then retry your login request at the standby database.

DIA-28034: cannot grant *string* to an Oracle supplied user

Cause: The KEEP DATE TIME, KEEP SYSGUID or KEEP SEQUENCE privilege could not be granted to an Oracle supplied user.

Action: Grant privilege directly to the application user.

DIA-28035: Cannot Get Session Key for Authentication

Cause: Client and server cannot negotiate shared secret during logon

Action: User should not see this error. Please contact your system administrator

DIA-28036: HTTP digest authentication cannot be configured for this user

Cause: An attempt was made to configure HTTP digest authentication for a global user, an external user, a no authentication type user, or a SYS user.

Action: Contact your system administrator.

DIA-28037: Cannot Get Session Key for RACF Authentication

Cause: Client and server cannot negotiate shared secret during logon

Action: User should not see this error. Please contact your system administrator

DIA-28038: disallow O2LOGON

Cause: turn off O2LOGON

Action: n/a

DIA-28039: cannot validate Kerberos service ticket

Cause: The Kerberos service ticket provided was invalid or expired

Action: Provide a valid, unexpired service ticket.

DIA-28040: The database does not accept your client's authentication protocol; login denied.

Cause: No common authentication protocol was found between the database client and server.

Action: Set the values of the SQLNET.ALLOWED_LOGON_VERSION_SERVER and SQLNET.ALLOWED_LOGON_VERSION_CLIENT parameters on both the client and on the server to values that match the minimum version software supported in the system. This error is also raised when the client is authenticating to a user account which was created without a verifier suitable for the client software version. In this situation, that account's password must be reset, in order for the required verifier to be generated and allow the authentication to proceed successfully.

DIA-28041: authentication protocol internal error

Cause: Authentication protocol failed with an internal error.

Action: Contact Oracle Support Services.

DIA-28042: Server authentication failed

Cause: Server failed to authenticate itself to the client

Action: Confirm that the server is a valid database server.

DIA-28043: invalid bind credentials for DB-OID connection

Cause: The Database password stored in the wallet did not match the one in OID .

Action: Use DBCA to reset the database password so that it is the same in database wallet and in OID.

DIA-28044: unsupported directory type

Cause: The database tried to work with a directory which is not OID.

Action: Enterprise User Security works only with Oracle Internet Directory. Update the ldap.ora file to reflect an appropriate OID.

DIA-28045: SSL authentication between database and OID failed

Cause: Server failed to authenticate itself to the Directory.

Action: Make sure the sqlnet.ora used is pointing to the wallet with the right certificate.

DIA-28046: Password change for SYS disallowed

Cause: REMOTE_LOGIN_PASSWORDFILE is set to SHARED, prohibiting SYS password changes.

Action: Change setting of REMOTE_LOGIN_PASSWORDFILE to EXCLUSIVE or NONE.

DIA-28047: database is not a member of any enterprise domain in OID

Cause: An enterprise user login was attempted on a database that is not a member of any enterprise domain in OID.

Action: An administrator should put the database into an enterprise domain in OID, and then the user should reconnect.

DIA-28048: database is a member of multiple enterprise domains in OID

Cause: An enterprise user login was attempted on a database that is a member of multiple enterprise domains in OID.

Action: An administrator should put the database into only one enterprise domain in OID, and then the user should reconnect.

DIA-28049: the password has expired

Cause: The enterprise user's password has expired and the password needs to be changed.

Action: change the password in the directory or contact the directory administrator.

DIA-28050: specified user or role cannot be dropped

Cause: The user or role specified in the DROP statement was a reserved Oracle object that could not be dropped.

Action: None

DIA-28051: the account is locked

Cause: The enterprise user has consecutively entered the wrong password for maximum number of times specified in the realm's password policy profile.

Action: Contact the directory administrator.

DIA-28052: the account is disabled

Cause: The enterprise user's account in the directory has been disabled.

Action: Contact the directory administrator.

DIA-28053: the account is inactive

Cause: The enterprise user's account in the directory is currently not active.

Action: Contact the directory administrator.

DIA-28054: the password has expired. *string* Grace logins are left

Cause: The enterprise user's password has expired. The user is able to login because he has *gracelogins* left.

Action: change the password in the directory or contact the directory administrator.

DIA-28055: the password will expire within *string* days

Cause: The enterprise user's password is about to expire.

Action: Change the password in the directory or contact the directory administrator.

DIA-28056: Writing audit records to Windows Event Log failed

Cause: Unable to write an audit entry to the Windows event log used as the audit trail.

Action: Check the error number for a possible operating system error. If there is no error, contact Oracle Support Services.

DIA-28057: name of the password file could not be constructed

Cause: Possibly environment variable ORACLE_SID was not set.

Action: Set value for the ORACLE_SID environment variable.

DIA-28058: login is allowed only through a proxy

Cause: This account is marked "proxy only connect".

Action: Connect through a proxy user.

DIA-28059: Cross-instance call failed

Cause: An attempt to inform other Oracle RAC instances of a security event failed.

Action: Log into each instance to perform the administrative action.

DIA-28060: A data redaction policy already exists on this column.

Cause: A data redaction policy was already in existence on this column.

Action: Specify a column which does not already have a redaction policy defined on it, or use DBMS_REDACT.ALTER_POLICY to alter the existing redaction policy for this column.

DIA-28061: This object cannot have a data redaction policy defined on it.

Cause: An attempt was made to define a data redaction policy on an object other than a table or view. Note that a data redaction policy cannot be defined on an editioned view, or on specialized tables created internally by the server in conjunction with various features such as materialized view.

Action: Specify the name of a table or view.

DIA-28062: The policy expression is too long.

Cause: The policy expression was longer than 4000 characters.

Action: Specify a policy expression of at most 4000 characters.

DIA-28063: The policy expression is empty.

Cause: The EXPRESSION parameter to DBMS_REDACT.ADD_POLICY was empty.

Action: A nonempty policy expression must be specified in the EXPRESSION parameter to DBMS_REDACT.ADD_POLICY.

DIA-28064: The redaction function is not valid.

Cause: The FUNCTION_TYPE parameter to DBMS_REDACT.ADD_POLICY was invalid.

Action: Specify the FUNCTION_TYPE parameter to DBMS_REDACT.ADD_POLICY as one of the following: DBMS_REDACT.NONE, DBMS_REDACT.FULL, DBMS_REDACT.RANDOM, DBMS_REDACT.PARTIAL, DBMS_REDACT.REGEXP, or DBMS_REDACT.NULLIFY. Note that only none redaction, full redaction, and NULL redaction may be applied to columns of type BLOB, and only none redaction, full redaction, NULL redaction, and regular expression-based redaction may be applied to columns of type CLOB or NCLOB.

DIA-28066: invalid column "*string*"

Cause: An invalid column was specified in the COLUMN_NAME parameter.

Action: Check the columns in the object and specify the right column name.

DIA-28067: missing or invalid column name

Cause: A valid column name was not specified in the COLUMN_NAME parameter when a column name was required. Note that when using DBMS_REDACT.ALTER_POLICY, the default action is DBMS_REDACT.ADD_COLUMN

Action: Specify the name of a column.

DIA-28068: The object "*string*" does not have a data redaction policy.

Cause: The specified object did not have a data redaction policy defined on it.

Action: Specify the name of an object which has a data redaction policy, or use DBMS_REDACT.ADD_POLICY to add a data redaction policy.

DIA-28069: A data redaction policy already exists on this object.

Cause: A data redaction policy was already in existence on this object.

Action: Specify a table or view which does not already have a redaction policy defined on it, or use DBMS_REDACT.ALTER_POLICY to alter the existing redaction policy for this object.

DIA-28070: The column "*string*" does not have a data redaction policy.

Cause: A data redaction policy was not defined on the specified column.

Action: Specify the name of a column for which a data redaction policy is defined.

DIA-28071: The action is not valid.

Cause: The ACTION parameter to DBMS_REDACT.ALTER_POLICY was invalid.

Action: Specify the ACTION parameter to DBMS_REDACT.ALTER_POLICY as one of the following values: DBMS_REDACT.MODIFY_EXPRESSION, DBMS_REDACT.MODIFY_COLUMN, DBMS_REDACT.ADD_COLUMN, or DBMS_REDACT.DROP_COLUMN.

DIA-28072: The specified policy name is incorrect.

Cause: The POLICY_NAME parameter was incorrect.

Action: Specify the POLICY_NAME parameter with the name of the redaction policy currently defined on the object.

DIA-28073: The column "*string*" has an unsupported data type or attribute.

Cause: The column had a data type or attribute which is not supported by data redaction. The supported data types are CHAR, NCHAR, VARCHAR2, NVARCHAR2, NUMBER types, BINARY_FLOAT, BINARY_DOUBLE, DATE, TIMESTAMP, CLOB, NCLOB, and BLOB, except as listed below for certain function types: For DBMS_REDACT.PARTIAL and DBMS_REDACT.RANDOM, the CLOB, NCLOB, and BLOB datatypes are not supported. For DBMS_REDACT.REGEXP, the NUMBER, BINARY_FLOAT, BINARY_DOUBLE, DATE, TIMESTAMP, and BLOB datatypes are not supported. Virtual columns and base columns of virtual columns are not supported by data redaction. Columns with the INVISIBLE attribute are not supported by data redaction (this applies to both user-specified hidden columns and system-generated hidden columns). Vector encoded columns are not supported by data redaction. Columns with the IS JSON constraint are not supported.

Action: Specify the name of a column which has a supported data type and supported attributes. For columns with the IS JSON constraint, create a view on the columns and add the redaction policy to the view.

DIA-28074: The "*string*" field of the redaction parameters is not valid.

Cause: The redaction parameters that were specified had one or more invalid fields.

Action: Specify the redaction parameters with valid fields. Refer to Oracle Database documentation for additional information.

DIA-28075: The data redaction policy expression has an error.

Cause: The data redaction policy expression had an error.

Action: Contact the data redaction policy administrator. To correct this error, when invoking the ADD_POLICY and ALTER_POLICY procedures of the data redaction DBMS_REDACT package, the policy administrator must specify a valid policy expression for the EXPRESSION parameter. Check the trace file for the name of the affected policy and the error, and correct the data redaction policy expression.

DIA-28076: An attribute was not specified for SYS_SESSION_ROLES.

Cause: An attribute was not specified for the SYS_SESSION_ROLES namespace in the policy expression.

Action: Specify an attribute for SYS_SESSION_ROLES in the policy expression.

DIA-28077: The attribute specified (*string*) exceeds the maximum length.

Cause: The attribute specified in the policy expression for the SYS_SESSION_ROLES namespace exceeded the maximum length.

Action: Change the policy expression to use a valid attribute for SYS_SESSION_ROLES namespace.

DIA-28078: A regular expression parameter is missing or invalid.

Cause: Even though the function_type was DBMS_REDACT.REGEXP, the possible causes for this error include: - One or more of the regular expression parameters were missing or invalid - The REGEXP_PATTERN failed to compile properly - The regular expression replacement operation failed

Action: Specify the regular expression parameters according to Oracle documentation. At a minimum, you must specify the REGEXP_PATTERN and REGEXP_REPLACE_STRING parameters. Ensure that the REGEXP_PATTERN can compile properly as a regular expression. For example, test it with REGEXP_REPLACE in a SQL query against a column containing some of the data to be redacted.

DIA-28079: The policy was already enabled.

Cause: The redaction policy specified has already been enabled.

Action: Only disabled redaction policies can be enabled.

DIA-28080: The policy was already disabled.

Cause: The redaction policy specified has already been disabled.

Action: Only enabled redaction policies can be disabled.

DIA-28081: Insufficient privileges - the command references a redacted object.

Cause: The command referenced a redacted column in an object protected by a data redaction policy.

Action: If possible, modify the command to avoid referencing any redacted columns. Otherwise, drop the data redaction policies that protect the referenced tables and views, or ensure that the user issuing the command has the EXEMPT REDACTION POLICY system privilege, then retry the operation. The EXEMPT REDACTION POLICY system privilege is required for creating or refreshing a materialized view when the materialized view is based on an object protected by a data redaction policy. The EXEMPT REDACTION POLICY system privilege is required for performing a data pump schema-level export including any object protected by a data redaction policy. All data redaction policies are listed in the REDACTION_COLUMNS catalog view.

DIA-28082: The parameter *string* is invalid.

Cause: The specified parameter was either empty or too long. If the DBMS_REDACT.ADD_POLICY or DBMS_REDACT.ALTER_POLICY was invoked and the function_parameters was not NULL, the operation was prevented because you can only specify a value for the function_parameters argument only when the function_type is DBMS_REDACT.PARTIAL.

Action: Specify a parameter of correct length. See the Oracle documentation for length requirements.

DIA-28083: A redacted column was referenced in a virtual column expression.

Cause: This redacted column was referenced in a virtual column expression.

Action: Ensure the column expression definition for any virtual column does not refer to any redacted columns. To check for columns with redaction policies, use the REDACTION_COLUMNS catalog view which lists all data redaction policies.

DIA-28085: The input and output lengths of the redaction do not match.

Cause: As specified, the redaction parameters produced an output with a length different to that of the input.

Action: Use regular expression redaction instead of partial redaction.

DIA-28086: The data redaction policy expression has an error.*lnstring*

Cause: The data redaction policy expression had an error.

Action: Specify a valid policy expression. The data redaction policy expression must be written in SQL, and must be a valid predicate to use in the following SQL query. SELECT 1 FROM DUAL WHERE policy_expression;

DIA-28087: The policy expression has an unsupported (use of) operator '*string*'.

Cause: The policy expression used an unsupported operator, or used an operator in an unsupported way.

Action: Modify the policy expression to use only the supported operators in a supported way. Supported operators include "=", "!=", ">", "<", ">=", "<=", the length operators, the substring operators, and the context operators (SYS_CONTEXT and XS_SYS_CONTEXT). For a complete list of the supported operators, and the supported ways the allowed operators can be used, refer to the section on data redaction policy expressions in the Oracle documentation.

DIA-28088: The policy expression has an unsupported PL/SQL function *string.string.string*.

Cause: The policy expression had an unsupported PL/SQL function.

Action: Modify the policy expression to use a supported PL/SQL function. The supported PL/SQL functions include the Oracle Label Security dominates functions, and the Oracle Apex session state functions, V and NV. Refer to Oracle database documentation for additional information.

DIA-28089: invalid SYS_CONTEXT namespace *string* in policy expression

Cause: The SYS_CONTEXT (or XS_SYS_CONTEXT) namespace used in the policy expression was not valid.

Action: Modify the policy expression to use a valid namespace. Supported namespaces include USERENV, SYS_SESSION_ROLES, XS\$SESSION and the namespaces listed in the DBA_CONTEXT catalog view.

DIA-28090: unsupported nesting of function *string.string.string* within function *string.string.string* in policy expression

Cause: The policy expression had an unsupported PL/SQL function nesting.

Action: Modify the policy expression to use only supported PL/SQL function nesting. The Oracle Label Security functions NUMERIC_LABEL, CHAR_TO_LABEL, and SA_SESSION can only be used from within the Label Security dominates functions. For a complete list of supported PL/SQL function nesting, refer to the section on writing policy expressions in the Oracle documentation for data redaction.

DIA-28091: unsupported use of PL/SQL function *string.string.string* in policy expression

Cause: The policy expression used a PL/SQL function in an unsupported way.

Action: Modify the policy expression to use the PL/SQL function properly. The parameters to the Oracle Label Security functions NUMERIC_LABEL, CHAR_TO_LABEL, and SA_SESSION must be constants. For a complete list of the supported ways that PL/SQL functions can be used in a policy expression, refer to the Oracle documentation.

DIA-28092: The parameter *string* with value '*string*' has an error.

Cause: The value of the parameter had an error. If DBMS_REDACT.CREATE_POLICY_EXPRESSION was invoked and the POLICY_EXPRESSION_NAME parameter had an error, the policy expression name either already existed, or was invalid. If DBMS_REDACT.DROP_POLICY_EXPRESSION was invoked and the POLICY_EXPRESSION_NAME parameter had an error, the policy expression either did not exist, was still in use (was applied to a column), or was invalid. If DBMS_REDACT.APPLY_POLICY_EXPR_TO_COL was invoked and the POLICY_EXPRESSION_NAME parameter had an error, a policy expression may already exist on this column. Only one policy expression may be associated with any given column. The name of any Oracle Data Redaction policy expression associated with a given column can be found in the REDACTION_EXPRESSIONS catalog view. If the DBMS_REDACT.ADD_POLICY was invoked and the OBJECT_SCHEMA parameter referenced the APEX, Sharding (GSMADMIN_INTERNAL) or Spatial installation schema, the operation was prevented. Data redaction policies are not supported on objects within the APEX, Sharding (GSMADMIN_INTERNAL) or Spatial installation schema. If the DBMS_REDACT.ADD_POLICY was invoked and the OBJECT_NAME references a metadata-linked view, the operation was prevented.

Data redaction policies are not supported on metadata-linked views. If the DBMS_REDACT.ADD_POLICY was invoked and the OBJECT_NAME references an OLAP analytic workspace table, the operation was prevented. Data redaction policies are not supported on OLAP analytic workspaces.

Action: Provide a valid value for the parameter. If DBMS_REDACT.CREATE_POLICY_EXPRESSION was invoked and the parameter was POLICY_EXPRESSION_NAME, provide a valid (new or existing) policy expression name. The names of all existing Oracle Data Redaction policy expressions can be found in the REDACTION_EXPRESSIONS catalog view. For the POLICY_EXPRESSION_NAME parameter of the DBMS_REDACT.DROP_POLICY_EXPRESSION procedure, provide a valid existing policy expression name which is not currently in use (applied to any column). The names of the columns to which a given policy expression is currently applied can be found in the REDACTION_EXPRESSIONS catalog view. For the POLICY_EXPRESSION_NAME parameter of the DBMS_REDACT.APPLY_POLICY_EXPR_TO_COL procedure, either provide NULL to remove the current policy expression association of the column, or provide a valid existing policy expression name. There is currently no API to alter an existing association. For now it must first be dropped followed by applying the new association. The names of all existing policy expressions can be found in the REDACTION_EXPRESSIONS catalog view. If DBMS_REDACT.ADD_POLICY was invoked, provide an OBJECT_SCHEMA which is not the APEX or Spatial installation schema. Data redaction policies are not supported on objects within the APEX or Spatial installation schema. If DBMS_REDACT.ADD_POLICY was invoked, provide an OBJECT_NAME that does not reference a metadata-linked view. If DBMS_REDACT.ADD_POLICY was invoked, provide an OBJECT_NAME that does not reference an OLAP analytic workspace table.

DIA-28093: operation on column *string* is not supported by data redaction

Cause: The operation was not supported by data redaction.

Action: Perform only supported operations on any object which has a data redaction policy or which depends on an object with a data redaction policy. To check for columns with redaction policies, use the REDACTION_COLUMNS catalog view which lists all of the data redaction policies.

DIA-28094: SQL construct not supported by data redaction

Cause: The query had a SQL construct that was not supported by data redaction.

Action: Rewrite the query to avoid using an unsupported construct. Consult the Oracle documentation for details.

DIA-28095: The parameter *string* is unexpected.

Cause: Parameter in PL/SQL function was not NULL or was not equal to the default value. If DBMS_REDACT.ALTER_POLICY was invoked, the parameters object_name and policy_name are required. If the action is DBMS_REDACT.ADD_COLUMN, it only accepts the following parameters: Required: column_name function_parameters (only when function_type is DBMS_REDACT.PARTIAL) regexp_pattern (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_replace_string (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_position (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_occurrence (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_match_parameter (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) Optional: action function_type policy_description column_description If the action is DBMS_REDACT.MODIFY_COLUMN, it only accepts the

following parameters: Required: action column_name function_parameters (only when function_type is DBMS_REDACT.PARTIAL) regexp_pattern (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_replace_string (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_position (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_occurrence (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) regexp_match_parameter (only when function_type is DBMS_REDACT.REGEXP or DBMS_REDACT.REGEXP_WIDTH) Optional: function_type policy_description column_description If the action is DBMS_REDACT.DROP_COLUMN, it only accepts the following parameters: Required: action column_name If the action is DBMS_REDACT.MODIFY_EXPRESSION, it only accepts the following parameters: Required: action expression Optional: policy_description If the action is DBMS_REDACT.SET_POLICY_DESCRIPTION, it only accepts the following parameters: Required: action Optional: policy_description If the action is DBMS_REDACT.SET_COLUMN_DESCRIPTION, it only accepts the following parameters: Required: action column_name Optional: column_description Other parameters are not supported.

Action: Do not use parameters that are not supported.

DIA-28100: policy function schema is invalid

Cause: The schema in which the policy function was defined did not exist.

Action: Drop the policy and re-create it with a policy function owned by a valid user.

DIA-28101: policy already exists

Cause: A policy with the same name for the same object already exists.

Action: Check if the policy has already been added or use a different policy name.

DIA-28102: policy does not exist

Cause: Try to drop/enable/refresh a non-existent policy.

Action: Correct the policy name argument.

DIA-28103: adding a policy to an object owned by SYS is not allowed

Cause: Try to add a policy to a table or a view owned by SYS.

Action: You can not perform this operation.

DIA-28104: input value for *string* is not valid

Cause: Input value for the argument was not valid.

Action: Specify a valid argument value.

DIA-28105: cannot create security relevant column policy in an object view

Cause: Security relevant column argument is not null in policy creation for an object view

Action: n/a

DIA-28106: input value for argument #*string* is not valid

Cause: Input values for the argument is missing or invalid.

Action: Correct the input values.

DIA-28107: policy was disabled

Cause: Try to flush a disabled policy.

Action: If the policy is supposed to be enforced, it must be enabled.

DIA-28108: circular security policies detected

Cause: Policies for the same object reference each other.

Action: Drop the policies

DIA-28109: the number of related policies has exceeded the limit of 16

Cause: Too many policies are involved in the same objects.

Action: Drop one or more policies. Or combine a few of them into one.

DIA-28110: policy function or package *string.string* has error

Cause: The policy function may have been dropped, or is no longer valid.

Action: Check the status of the function and correct the problem. Or re-create the policy with a valid function.

DIA-28111: insufficient privilege to evaluate policy predicate

Cause: Predicate has a subquery which contains objects that the owner of policy function does not have privilege to access.

Action: Grant appropriate privileges to the policy function owner.

DIA-28112: failed to execute policy function

Cause: The policy function has one or more error during execution.

Action: Check the trace file and correct the errors.

DIA-28113: policy predicate has error

Cause: Policy function generates invalid predicate.

Action: Review the trace file for detailed error information.

DIA-28115: policy with check option violation

Cause: Policy predicate was evaluated to FALSE with the updated values.

Action: Check the trace file and correct the errors.

DIA-28116: insufficient privileges to do direct path access

Cause: Users with insufficient privileges attempting to do direct path access of tables with fine grain access control policies.

Action: Ask the database administrator to do the operation. Note that users can work with security administrator to temporarily drop/disable the policies at time of export, import, or load, but this has security implication, and thus access of the database must be controlled carefully.

DIA-28117: integrity constraint violated - parent record not found

Cause: try to update/insert a child record with new foreign key values, but the corresponding parent row is not visible because of fine-grained security in the parent.

Action: make sure that the updated foreign key values must also be visible in the parent

DIA-28118: policy group already exists

Cause: try to create a policy group that already exists

Action: n/a

DIA-28119: policy group does not exist

Cause: try to drop a policy group that does not exist

Action: n/a

DIA-28120: driving context already exists

Cause: try to create a driving context that already exists

Action: n/a

DIA-28121: driving context does not exist

Cause: try to drop a driving context that does not exist

Action: n/a

DIA-28122: can not update SYS_DEFAULT policy group

Cause: An attempt was made to execute either DBMS_RLS.CREATE_POLICY_GROUP or DBMS_RLS.DELETE_POLICY_GROUP using SYS_DEFAULT as the policy group name.

Action: Do not attempt to CREATE or DELETE the SYS_DEFAULT policy group. This action is not permitted.

DIA-28123: Driving context '*string,string*' contains invalid group '*string*'

Cause: A previous call to DBMS_SESSION.SET_CONTEXT specified an invalid policy group.

Action: Ensure that a valid policy group is passed to DBMS_SESSION.SET_CONTEXT when initializing a policy driving context.

DIA-28124: Column *string* in sec_relevant_cols cannot be of an object data type

Cause: A column specified in sec_relevant_cols was of an object data type.

Action: Ensure that none of the columns specified in sec_relevant_cols is of an object data type or XMLType.

DIA-28125: A protected base column was referenced in an unprotected virtual column expression.

Cause: A protected base column was referenced in an unprotected virtual column expression.

Action: Check the policy definition and make sure that the virtual column is also protected.

DIA-28126: Attribute association failed for policy "*string*".

Cause: An attempt was made to associate a global application context attribute to either a context-sensitive or shared context-sensitive policy. Only local application context attribute association is supported.

Action: Specify a local application context attribute.

DIA-28132: The MERGE INTO syntax does not support the security policy.

Cause: The MERGE INTO syntax did not support a security policy on the destination table, because the policy's statement_types did not include each of INSERT, UPDATE and DELETE or the policy had security-relevant column.

Action: If you do not have the privilege to modify the security policy, then instead of MERGE INTO, use the INSERT, UPDATE and DELETE DML statements on the table that has a security policy defined on it. If you have the privilege to modify the security policy, then redefine it in such a way that statement_types includes all of the DML statement types (INSERT, UPDATE and DELETE) or ensure that the policy does not have a security-relevant column.

DIA-28134: object cannot have fine-grained access control policy

Cause: Only tables, views, or synonyms of tables or views may have VPD policies

Action: No action required.

DIA-28137: Invalid FGA audit Handler

Cause: An invalid audit handler was specified.

Action: Specify a valid audit handler.

DIA-28138: Error in Policy Predicate

Cause: An invalid policy predicate was specified.

Action: Please specify a valid policy Predicate for the FGA policy

DIA-28139: Maximum allowed Fine Grain Audit Policies Exceeded

Cause: A maximum of 256 policies can be enabled on an object

Action: Drop or disable an existing policy before creating more

DIA-28140: Invalid column specified

Cause: Column name specified during policy creation is invalid

Action: Please specify a valid column name. Object columns are not supported

DIA-28141: error in creating audit index file

Cause: ORACLE was not able to create the file being used to hold audit file names.

Action: Examine the directory pointed to by the initialization parameter "audit_file_dest." Make sure that all of the following is true: 1. The directory exists. 2. The name indeed points to a directory and not a file. 3. The directory is accessible and writable to the ORACLE user.

DIA-28142: error in accessing audit index file

Cause: ORACLE was not able to access the file being used to hold audit file names.

Action: Make sure the file exists in the directory pointed to by the initialization parameter "audit_file_dest" and is readable by the ORACLE user.

DIA-28143: Invalid argument passed to FGA ADD_POLICY procedure

Cause: Invalid input argument was specified for FGA ADD_POLICY procedure.

Action: Specify correct type and number of arguments to FGA ADD_POLICY procedure.

DIA-28144: Failed to execute fine-grained audit handler

Cause: An error was encountered while executing fine-grained audit handler.

Action: Refer to the trace file for details.

DIA-28145: XDS policy already exists for *string*

Cause: An XDS policy was enabled for an object that already has an associated XDS policy.

Action: Specify a different policy name or call `enable_xds` with the `overwrite` parameter set to `TRUE`.

DIA-28146: invalid operation for policy "*string*"

Cause: Attribute association (NAMESPACE, ATTRIBUTE) was specified for an invalid policy type. Attribute association can be specified only for context-sensitive and shared context-sensitive policy types.

Action: Do not perform any unsupported operation.

DIA-28147: The specified attribute association ("*string*", "*string*") is already attached to policy "*string*".

Cause: An attempt was made to create the attribute association using names that were already used by existing attribute association of the policy.

Action: Adjust the names and retry the operation.

DIA-28148: The specified attribute association ("*string*", "*string*") is not attached to policy "*string*".

Cause: An attempt was made to drop the attribute association that was not attached to the policy.

Action: Adjust the names and retry the operation.

DIA-28149: input value for argument "*string*" is missing

Cause: Only one input value was specified for the (NAMESPACE, ATTRIBUTE) arguments.

Action: Specify an input value for both (NAMESPACE, ATTRIBUTE) arguments.

DIA-28150: proxy not authorized to connect as client

Cause: A proxy user attempted to connect as a client, but the proxy was not authorized to act on behalf of the client.

Action: Grant the proxy user permission to perform actions on behalf of the client by using the `ALTER USER ... GRANT CONNECT` command.

DIA-28151: more than one user name specified for command

Cause: More than one user name was specified for an `ALTER USER` command.

Action: Try the command again with only one user name.

DIA-28152: proxy user '*string*' may not specify initial role '*string*' on behalf of client '*string*'

Cause: A proxy user attempted to specify an initial role for a client, but the client does not possess the role.

Action: Change the proxy user so that it does not specify the role or grant the role to the client.

DIA-28153: Invalid client initial role specified: 'string'

Cause: A role specified by a proxy user as an initial role to be activated upon connecting on behalf of a client is invalid.

Action: Connect again as the client specifying a valid role.

DIA-28154: Proxy user may not act as client 'string'

Cause: A proxy user may not assume the identity of a privileged user in order to limit the privileges that a proxy may possess.

Action: Execute the statement again specify a client other than a privileged user.

DIA-28155: user 'string' specified as a proxy is actually a role

Cause: A user specified in an `AUDIT operation BY proxy ON BEHALF OF client` is actually a role.

Action: Execute the statement again with a valid proxy user.

DIA-28156: Proxy user 'string' not authorized to set role 'string' for client 'string'

Cause: A proxy user has not been granted the right to use a role on behalf of a client.

Action: Execute the command `ALTER USER client GRANT CONNECT THROUGH PROXY proxy` to grant the needed role.

DIA-28157: Proxy user 'string' forbidden to set role 'string' for client 'string'

Cause: A proxy user was forbidden to use a role on behalf of a client through the command `ALTER USER client GRANT CONNECT THROUGH proxy WITH ALL ROLES EXCEPT role`

Action: Execute the command `ALTER USER client GRANT CONNECT THROUGH PROXY proxy` to grant the needed role.

DIA-28158: missing ALL keyword

Cause: Keyword missing.

Action: Provide missing keyword.

DIA-28159: missing BEHALF keyword

Cause: Keyword missing.

Action: Provide missing keyword.

DIA-28160: missing EXCEPT keyword

Cause: Keyword missing.

Action: Provide missing keyword.

DIA-28161: missing ROLES keyword

Cause: Keyword missing.

Action: Provide missing keyword.

DIA-28162: missing THROUGH keyword

Cause: Keyword missing.

Action: Provide missing keyword.

DIA-28163: GRANT already specified

Cause: The GRANT clause was specified twice.

Action: Use only one GRANT clause.

DIA-28164: REVOKE already specified

Cause: The REVOKE clause was specified twice.

Action: Use only one REVOKE clause.

DIA-28165: proxy 'string' may not specify password-protected role 'string' for client 'string'

Cause: A proxy user attempted to activate a role on behalf of a client which has a password associated with it. Since the proxy does not have a password, this activation cannot be allowed.

Action: Attempt to activate a different role or change the role administratively so that there is no password.

DIA-28166: duplicate rolename in list

Cause: The name of a role was specified more than once in a list.

Action: Repeat the command specifying the role once.

DIA-28169: unsupported certificate type

Cause: The type of certificate from which the server is to extract the credentials of the client is not supported.

Action: Specify a supported type.

DIA-28170: unsupported certificate version

Cause: The version of the certificate from which the server is to extract the credentials of the client is not supported.

Action: Specify a supported version.

DIA-28171: unsupported Kerberos version

Cause: the version the Kerberos ticket which the server is to use to validate the identity of the client is not supported.

Action: Specify a supported version.

DIA-28172: distinguished name not provided by proxy

Cause: A client user is to be identified using a distinguished name, but none was provided by the proxy user.

Action: Provide a distinguished name.

DIA-28173: certificate not provided by proxy

Cause: A client user is to be identified using a certificate but none was provided by the proxy user.

Action: Provide a certificate.

DIA-28174: Kerberos ticket not provided by proxy

Cause: A client user is to be authenticated using a Kerberos ticket but none was provided by the proxy user.

Action: Provide a Kerberos ticket.

DIA-28175: incorrect certificate type

Cause: the type of certificate provided by the proxy user to identify a client user does not match the type that is required.

Action: Provide a certificate of the correct type.

DIA-28176: incorrect certificate version

Cause: the version of certificate provided by the proxy user to identify a client user does not match the version that is required.

Action: Provide a certificate of the correct version.

DIA-28177: incorrect Kerberos ticket version

Cause: the version of Kerberos ticket provided by the proxy user to authenticate a client user does not match the version that is required.

Action: Provide a Kerberos ticket of the correct version.

DIA-28178: password not provided by proxy

Cause: A client user is to be authenticated using a database password but none was provided by the proxy user.

Action: Provide a password.

DIA-28179: client user name not provided by proxy

Cause: No user name was provided by the proxy user for the client user.

Action: Either specify a client database user name, a distinguished name or an X.509 certificate.

DIA-28180: multiple authentication methods provided by proxy

Cause: More than one authentication method was specified by the proxy user for the client user.

Action: Specify only one of the following: a client database user name, a distinguished name or an X.509 certificate.

DIA-28181: proxy '*string*' failed to enable one or more of the specified initial roles for client '*string*'

Cause: Attempt to enable specified initial roles after logon resulted in failure.

Action: Check that the initial roles are valid, granted to client, and not password protected.

DIA-28182: cannot acquire Kerberos service ticket for client

Cause: An attempt to use a Kerberos forwardable ticket granting ticket to obtain a Kerberos service ticket failed.

Action: Check that the Kerberos forwardable ticket granting ticket belongs to the client, is valid, and that the key distribution center is available.

DIA-28183: proper authentication not provided by proxy

Cause: A client user must be authenticated but no authentication credentials were provided by the proxy user.

Action: Provide some form of authentication credentials.

DIA-28184: global user cannot have proxy permissions managed in the directory

Cause: The client name specified was a global user.

Action: Use ALTER USER to change the type of user (from IDENTIFIED GLOBALLY to something else, such as IDENTIFIED BY password or IDENTIFIED EXTERNALLY).

DIA-28185: cannot alter user with administrative privilege to proxy-only connect user

Cause: An attempt was made to alter a user with administrative privilege to a proxy-only connect user.

Action: This user cannot be altered to proxy-only connect user.

DIA-28186: cannot grant *string* to a proxy-only connect user

Cause: An attempt was made to grant administrative privilege like SYSDBA, SYSOPER, SYSASM, SYSBACKUP, SYSDG, SYSKM, or SYSRAC to a proxy-only connect user. Since proxy authentication using an administrative privilege is not supported, such grants are not allowed.

Action: None

DIA-28187: cannot alter global user to proxy-only connect user

Cause: An attempt was made to alter global user to proxy-only connect.

Action: None

DIA-28188: cannot alter user SYS/SYSBACKUP/SYSDG/SYSKM/SYSRAC to be identified as globally

Cause: An attempt was made to alter SYS/SYSBACKUP/SYSDG/SYSKM/SYSRAC to be identified as globally.

Action: None

DIA-28190: SYSRAC administrative privilege cannot be granted to other users

Cause: An attempt was made to grant SYSRAC administrative privilege to a user. This administrative privilege can only be used in operating system authentication and cannot be granted to other users.

Action: Use connection string '/' as SYSRAC' from an operating system account in the OSRAC group to connect to the database with the SYSRAC privilege.

DIA-28191: cannot grant administrative privileges to a user with non-ASCII or non-EBCDIC characters in the user name

Cause: An attempt to grant privileges to a user failed. Administrative privileges like SYSDBA, SYSOPER, SYSASM, SYSBACKUP, SYSDG, SYSKM, and SYSRAC cannot be granted to a user with non-ASCII or non-EBCDIC characters in the user name.

Action: Grant administrative privileges to users that have user names with only ASCII or EBCDIC characters.

DIA-28200: IDENTIFIED USING already specified

Cause: The IDENTIFIED USING clause was specified twice.

Action: Use only one IDENTIFIED USING clause.

DIA-28201: invalid command to enable secure application role '*string*'

Cause: An attempt to enable the secure application role outside of the scope of the designated package failed.

Action: Enable the role using the designated package.

DIA-28206: password length less than *number* characters

Cause: The password entered by the user did not meet the minimum length criteria.

Action: Enter a password which meets the minimum length criteria.

DIA-28207: password contains the user name

Cause: The provided password contained the user name.

Action: Enter a password that does not contain the user name.

DIA-28208: password contains the user name in reverse

Cause: The provided password contained the reverse of the user name.

Action: Enter a password that does not contain the reverse of the user name.

DIA-28209: password contains the server name

Cause: The provided password contained the server name.

Action: Enter a password that does not contain the server name.

DIA-28210: password too simple

Cause: The password was simple enough to guess.

Action: Enter a complex password.

DIA-28211: new password should differ from the old password by *string* or more characters

Cause: The new and old passwords should differ by at least the minimum number of characters as defined by the administrator.

Action: Enter a password that differs from the previous password by at least the minimum required number of changed characters, as defined by the administrator.

DIA-28212: password must NOT contain a double-quotation

Cause: The double-quotation mark character is reserved as a password delimiter.

Action: Enter a password without any double-quotation marks.

DIA-28213: password must contain *number* or more letters

Cause: The password did not meet the minimum required number of alphabetic characters.

Action: Enter a password containing at least the minimum number of alphabetic characters.

DIA-28214: password must contain *number* or more uppercase characters

Cause: The password did not meet the minimum required number of uppercase alphabetic characters.

Action: Enter a password containing at least the minimum number of uppercase alphabetic characters.

DIA-28215: password must contain *number* or more lowercase characters

Cause: The password did not meet the minimum required number lowercase alphabetic characters.

Action: Enter a password containing at least the minimum number of lowercase alphabetic characters.

DIA-28216: password must contain *number* or more digits

Cause: The password did not contain the minimum number of digits.

Action: Enter a password containing at least the minimum number of digits.

DIA-28217: password must contain *number* or more special characters

Cause: The password did not contain the minimum number of special characters.

Action: Enter a password containing at least the minimum number of special characters.

DIA-28218: password length more than 30 bytes

Cause: The length of the password exceeds 30 bytes.

Action: Enter a password containing a maximum of 30 bytes.

DIA-28219: password verification failed for mandatory profile

Cause: The new password did not meet the necessary password complexity requirements of the mandatory profile.

Action: Contact the DBA for the rules about choosing the new password.

DIA-28220: invalid schema name *string* or password verification function *string*

Cause: A nonexistent or invalid schema name or password verification function was specified. This occurred when you attempted to create or alter a profile with PASSWORD_VERIFY_FUNCTION parameter value containing a non-SYS user owned schema qualified function and either of the following was true: - The ALLOWED_PVF_OWNERS system parameter was not configured to allow schema qualified password verification function. - The user schema was not allowed to own the password verification function. - The password verification function was created as an INVOKER rights PL/SQL function.

Action: Specify a valid schema name or password verification function for PASSWORD_VERIFY_FUNCTION parameter. Depending on the error, either one of the following should be done: - If the ALLOWED_PVF_OWNERS system parameter is set to NULL (default value), please contact your database administrator to have it set it to an appropriate value (comma separated list of database users) to allow schema qualified password verification function. - If the user schema is not allowed to own the password verification function, please contact your database administrator to add the user as part of ALLOWED_PVF_OWNERS system parameter value. Only users specified as ALLOWED_PVF_OWNERS system parameter value are allowed to own password verification function. - If the password verification function is created as an

INVOKER rights PL/SQL function, please create it as DEFINER rights PL/SQL function and retry {CREATE|ALTER} PROFILE operation. INVOKER rights PL/SQL functions are not allowed as password verification function due to security reasons.

DIA-28221: REPLACE not specified

Cause: User is changing password but password verification function is turned on and the original password is not specified and the user does not have the alter user system privilege.

Action: Supply the original password.

DIA-28222: may not modify reserved user

Cause: An attempt was made to change or grant to a reserved user account.

Action: None

DIA-28223: first login requires password change

Cause: This user was globally authenticated. Password policy settings in Oracle Internet Directory (OID) requires the password to be changed for the first connection. Further connections to the database will be denied if the password in OID is not changed.

Action: Connect to the OID to change the password.

DIA-28225: The EXPIRE PASSWORD ROLLOVER PERIOD clause is specified with a disallowed IDENTIFIED clause or a NO AUTHENTICATION clause

Cause: The ALTER USER statement incorrectly included a disallowed IDENTIFIED clause or a NO AUTHENTICATION clause with the EXPIRE PASSWORD ROLLOVER PERIOD clause.

Action: Use only one of the above clauses in the ALTER USER statement and resubmit the command.

DIA-28226: EXPIRE PASSWORD ROLLOVER PERIOD clause already specified

Cause: In ALTER USER statement the EXPIRE PASSWORD ROLLOVER PERIOD clause was specified more than once.

Action: Remove all but one of the EXPIRE PASSWORD ROLLOVER PERIOD clauses and resubmit the command.

DIA-28227: Gradual password rollover is not supported for administrative users.

Cause: An attempt was made to grant an administrative privilege to a user that is associated with a password profile having a non-zero value for the PASSWORD_ROLLOVER_TIME profile limit. The gradual password rollover feature is not supported for administrative users.

Action: Ensure that the user being granted the administrative privilege is not associated with a password profile having a non-zero PASSWORD_ROLLOVER_TIME limit, and resubmit the command.

DIA-28228: REPLACE clause not specified

Cause: Attempt was made to change the password, but user has been granted administrative privilege(s).

Action: Provide the original password on REPLACE clause.

DIA-28231: no data passed to obfuscation toolkit

Cause: A NULL value was passed to a function or procedure.

Action: Make sure that the data passed is not empty.

DIA-28232: invalid input length for obfuscation toolkit

Cause: Length of data submitted for encryption or decryption is not a multiple of 8 bytes.

Action: Make sure that the length of the data to be encrypted or decrypted is a multiple of 8 bytes.

DIA-28233: double encryption not supported

Cause: The obfuscation toolkit does not support the encryption of already-encrypted data.

Action: Do not attempt to encrypt already-encrypted data.

DIA-28234: key length too short

Cause: The key specified is too short for the algorithm. DES requires a key of at least 8 bytes. Triple DES requires a key of least 16 bytes in two-key mode and 24 bytes in three-key mode.

Action: Specify a longer key.

DIA-28235: algorithm not available

Cause: The encryption algorithm desired is not available.

Action: Run the installer to install the needed algorithm in Oracle Advanced Security.

DIA-28236: invalid Triple DES mode

Cause: An unknown value was specified for the mode in which triple DES encryption is to run.

Action: Specify a valid value. See the package declaration for a list of valid values.

DIA-28237: seed length too short

Cause: The seed specified for the key generation routine must be at least 80 characters.

Action: Specify a longer seed.

DIA-28238: no seed provided

Cause: A NULL value was passed in as the seed to be used in generating a key.

Action: Provide a non-NULL value for the seed.

DIA-28239: no key provided

Cause: A NULL value was passed in as an encryption or decryption key.

Action: Provide a non-NULL value for the key.

DIA-28261: CURRENT_USER can not be used in PLSQL Definer's Right procedure.

Cause: An attempt to retrieve CURRENT_USER using SYS_CONTEXT PLSQL interface.

Action: Use a SQL statement to query CURRENT_USER inside a DR procedure.

DIA-28262: Global application context cannot be used after failing over with Transparent Application Continuity.

Cause: An attempt was made to retrieve the global application context value in a failed over session.

Action: Determine if the application can use Application Continuity instead of Transparent Application Continuity, or use the Local Application Context instead of Global Application Context

DIA-28264: Client identifier is too long

Cause: The length of the client identifier is longer than 64

Action: Set a client identifier whose length is less than 64.

DIA-28265: Namespace beginning with 'SYS_' is not allowed.

Cause: Namespace beginning with 'SYS_' was not allowed.

Action: Use a namespace that does not begin with 'SYS_'.

DIA-28267: Invalid NameSpace Value

Cause: Context NameSpace conflicts with reserved key words or a secure Namespace is not allowed for this type of Application Context.

Action: Use a valid namespace.

DIA-28268: Exceeded the maximum allowed size for Context information in a session

Cause: The maximum size specified by the `_session_context_size` init.ora parameter was exceeded.

Action: Please change the value for `_session_context_size` in the init.ora file.

DIA-28270: Malformed user nickname for password authenticated global user.

Cause: An attempt to login as password-authenticated global user with a malformed user nickname.

Action: Make sure the nickname is valid and re-login.

DIA-28271: No permission to read user entry in LDAP directory service.

Cause: ORACLE server does not have read permission on user nickname's X.500 user entry.

Action: Make sure ORACLE server is using right SSL credentials to connect to LDAP directory services. Make sure permissions for LDAP user entries are right.

DIA-28272: Domain policy restricts password based GLOBAL user authentication.

Cause: Domain policy does not allow password-authenticated GLOBAL users.

Action: Make sure ORACLE server is using right SSL credentials to connect to LDAP directory services. Make sure `orclDBAuthTypes` attributes within Oracle enterprise domain object is either set to PWD or ALL.

DIA-28273: No mapping for user nickname to LDAP distinguished name exists.

Cause: ORACLE server cannot map the given user nickname to LDAP distinguished name.

Action: Make sure user entries in LDAP are correctly provisioned with correct user nickname attribute values.

DIA-28274: No ORACLE password attribute corresponding to user nickname exists.

Cause: LDAP user entry corresponding to user nickname does not have a ORACLE password attribute or the attribute is not initialized.

Action: Make sure user entries in LDAP are correctly provisioned with correct ORACLE password attribute values.

DIA-28275: Multiple mappings for user nickname to LDAP distinguished name exist.

Cause: The given user nickname maps to more than one LDAP distinguished name.

Action: Make sure user nickname is unique within the enterprise.

DIA-28276: Invalid ORACLE password attribute.

Cause: The ORACLE password attribute of a user entry has an invalid format.

Action: Make sure ORACLE password attribute value is RFC-2307 compliant.

DIA-28277: LDAP search, while authenticating global user with passwords, failed.

Cause: The LDAP search for finding the appropriate user entry and ORACLE password failed.

Action: Make sure LDAP directory service is up and running.

DIA-28278: No domain policy registered for password based GLOBAL users.

Cause: No policy about password authenticated GLOBAL users has been registered.

Action: Add attribute orclDBAuthTypes to the database server's Enterprise domain.

DIA-28279: Error reading ldap_directory_access init parameter.

Cause: ldap_directory_access parameter is not specified correctly.

Action: Make sure spfile.ora has ldap_directory_access set correctly. Possible correct values are PASSWORD, SSL and NONE.

DIA-28280: Multiple entries for ORACLE database password exist.

Cause: The ORACLE password attribute of a user entry has multiple entries of ORACLE database password.

Action: Make sure ORACLE password attribute has one entry for ORACLE Database password.

DIA-28281: Global application context is not updated on one or more Oracle RAC instances

Cause: While updating global application context across Oracle RAC instances, the background process errored out or the timeout expired due to some failure.

Action: Ensure every instance in Oracle RAC is operational and retry the operation.

DIA-28290: Multiple entries found for the same Kerberos Principal Name

Cause: Multiple user entries has been configured with the same krbPrincipalName

Action: Modify enterprise user's entry to assign its Kerberos principal name Make sure the user entries in LDAP are provisioned correctly.

DIA-28291: No Kerberos Principal Value found.

Cause: Oracle server fails to get value of krbPrincipalName attribute

Action: Make sure user entries are correctly provisioned with correct Kerberos principal value

DIA-28292: No Domain Policy registered for Kerberos based authentication

Cause: The enterprise domain entry is not configured for Kerberos based global authentication.

Action: Modify orclDBAuthType of the database server's enterprise domain entry and assign it "ALL" or "KRB5"

DIA-28293: No matched Kerberos Principal found in any user entry

Cause: Oracle server fails to find the principal in the user search base

Action: Make sure the user search base is correct. Use ESM to configure the enterprise user its Kerberos principal name

DIA-28300: No permission to read user entry in LDAP directory service.

Cause: ORACLE server does not have read permission on user entries.

Action: Make sure ORACLE server is using right credentials to connect to LDAP directory services. Make sure permissions for LDAP user entries are configured correctly.

DIA-28301: Domain Policy hasn't been registered for SSL authentication.

Cause: An attempt was made to authenticate with SSL, but the database enterprise domain was not configured for SSL authentication.

Action: Modify orclDBAuthType of the server's enterprise domain entry and assign it "ALL" or "SSL".

DIA-28302: User does not exist in the LDAP directory service.

Cause: An attempt was made to authenticate with SSL using the user's certificate, but there was no user entry in the LDAP server that matched the user's Distinguished Name.

Action: Add an user entry whose DN matches the user's PKI DN in the LDAP directory.

DIA-28303: Distinguished name for user exceeds maximum supported length

Cause: The user's distinguished name (DN) exceeded the maximum supported length.

Action: Shorten the user's distinguished name (DN) and retry.

DIA-28304: Oracle encrypted block is corrupt (file # *string*, block # *string*)

Cause: The indicated encrypted block was corrupt. This was an in-memory corruption. The exact cause is unknown. Possible causes could be: - the encryption wallet is incorrect or corrupted - the tablespace encryption key is incorrect or corrupted - decryption engine failure - actual logical error exists in decrypted block

Action: Review the encryption wallet and the keys stored in it to ensure they are valid and correct.

DIA-28305: unable to get valid WALLET_LOCATION

Cause: An invalid WALLET_LOCATION was specified in the sqlnet.ora file, or the ORACLE_BASE or ORACLE_HOME environment vairable was not set properly.

Action: Correct WALLETS_LOCATION in the sqlnet.ora file, or properly set the ORACLE_BASE or ORACLE_HOME environment variable.

DIA-28306: The directory user has *string* groups mapped to different database global users.

Cause: A directory user connected to the database while there were multiple directory user's groups mapped to different shared database global users.

Action: No action is required if by design the user's multiple groups need to be mapped to different database global users. Otherwise, create an exclusive database global user mapping for the directory user, or ensure that the directory user has only one mapped shared database global user.

DIA-28307: The directory current time *string* is unreasonable.

Cause: Either the directory service time was earlier than year 1900, or the format was incorrect.

Action: Ensure that the directory service clock is set properly.

DIA-28308: The directory server type *string* is not supported.

Cause: The database tried to work with a directory service which was not supported.

Action: Update the dsi.ora or ldap.ora file to reflect an appropriate directory server type.

DIA-28309: failed to get the service user's credential from the wallet.

Cause: An attempt was made to get the service user's credential from the wallet. However, either the wallet was not found or the service user's credential was missing in the wallet.

Action: Check the wallet path and update the wallet with the service user's credential.

DIA-28310: Role with same external name already exists.

Cause: The external name specified for the role being created or altered already exists for another role.

Action: External names must be unique among roles. Specify another.

DIA-28311: Oracle encrypted data block not encrypted (file # *string*, block # *string*)

Cause: The indicated data block was found unencrypted in a fully encrypted tablespace. The exact cause is unknown. Possible causes could be: - An encrypted data block is tampered and replaced with an unencrypted data block. - An Oracle internal issue.

Action: Collect block dump and redo dump for this block, and contact Oracle Support Services.

DIA-28312: Proxy user is not supported with DSI.

Cause: Proxy user authentication is currently not supported with Directory Service Integration (DSI).

Action: Do not use proxy user authentication with DSI.

DIA-28313: LDAP server connection is down.

Cause: The LDAP server is down or the connection to the LDAP server is closed.

Action: Retry the connect operation.

DIA-28314: The current user database link is not supported with DSI.

Cause: An attempt was made to use the current user database link with Directory Services Integration (DSI).

Action: Do not use the current user database link with DSI.

DIA-28315: encryption key mismatched for file # *string*

Cause: Oracle tablespace encryption could not verify the master key or the tablespace key for this data file. The exact cause is unknown. Possible cause could be: - The encryption wallet was incorrect. - The encryption wallet was incorrectly shared between databases. - The tablespace encryption key was incorrect or corrupted.

Action: Review the encryption wallet and the keys stored in it to ensure that they are valid, and contact Oracle Support Services.

DIA-28316: LDAP user, group or domain is not found.

Cause: The user, group or domain was not found on the LDAP server.

Action: Check the LDAP user name or domain name.

DIA-28330: encryption is not allowed for this data type or the data type is invalid

Cause: The data type was not supported for column encryption or the data type was invalid.

Action: n/a

DIA-28331: encrypted column size too long for its data type

Cause: The column was both encrypted and one of the following: -for VARCHAR2 when extended character data types were disabled, the length specified was > 3932; -for VARCHAR2 when extended character data types were enabled, the length specified was > 32699; -for CHAR, the length specified was > 1932; -for NVARCHAR2 when extended character data types were disabled, the length specified was > 1966; -for NVARCHAR2 when extended character data types were enabled, the length specified was > 16349; -for NCHAR, the length specified was > 966; -for RAW when extended character data types were disabled, the length specified was > 3932; -for RAW when extended character data types were enabled, the length specified was > 32699;

Action: Reduce the column size.

DIA-28332: cannot have more than one password for the encryption key

Cause: More than one password was specified in the user command.

Action: n/a

DIA-28333: column is not encrypted

Cause: An attempt was made to rekey or decrypt an unencrypted column.

Action: n/a

DIA-28334: column is already encrypted

Cause: An attempt was made to encrypt an encrypted column.

Action: n/a

DIA-28335: referenced or referencing FK constraint column cannot be encrypted

Cause: encrypted columns were involved in the referential constraint

Action: n/a

DIA-28336: cannot encrypt SYS owned objects

Cause: An attempt was made to encrypt columns in a table owned by SYS.

Action: n/a

DIA-28337: the specified index may not be defined on an encrypted column

Cause: Index column was either a functional, domain, or join index.

Action: n/a

DIA-28338: Column(s) cannot be both indexed and encrypted with salt

Cause: An attempt was made to encrypt index column with salt or an attempt was made to create an index on encrypted column with salt.

Action: Alter the table and specify column encrypting without salt.

DIA-28339: missing or invalid encryption algorithm

Cause: Encryption algorithm was missing or invalid in the user command.

Action: Must specify a valid algorithm.

DIA-28340: A different encryption algorithm has been chosen for the table or tablespace.

Cause: Existing encrypted columns or tablespace were associated with a different algorithm.

Action: Do not specify an algorithm, or specify the same one for the existing encrypted columns or tablespace.

DIA-28341: cannot encrypt constraint column(s) with salt

Cause: An attempt was made to encrypt constraint columns with salt.

Action: Encrypt the constraint columns without salt.

DIA-28342: integrity check fails on column key

Cause: Encryption metadata may have been improperly altered.

Action: n/a

DIA-28343: fails to encrypt data

Cause: data or encryption metadata may have been improperly altered or the security module may not have been properly setup

Action: n/a

DIA-28344: fails to decrypt data

Cause: data or encryption metadata may have been improperly altered or the security module may not have been properly setup

Action: n/a

DIA-28345: cannot downgrade because there exists encrypted column

Cause: An attempt was made to downgrade when there was an encrypted column in the system.

Action: Decrypt these columns before attempting to downgrade.

DIA-28346: an encrypted column cannot serve as a partitioning column

Cause: An attempt was made to encrypt a partitioning key column or create partitioning index with encrypted columns.

Action: The column must be decrypted.

DIA-28347: encryption properties mismatch

Cause: An attempt was made to issue an ALTER TABLE EXCHANGE PARTITION | SUBPARTITION command, but encryption properties were mismatched.

Action: Make sure encryption algorithms and columns keys are identical. The corresponding columns must be encrypted on both tables with the same salt and non-salt flavor.

DIA-28348: index defined on the specified column cannot be encrypted

Cause: An attempt was made to encrypt a column which is in a functional index, domain index, or join index.

Action: drop the index

DIA-28349: cannot encrypt the specified column recorded in the materialized view log

Cause: An attempt was made to encrypt a column which is already recorded in the materialized view log.

Action: drop the materialized view log

DIA-28350: cannot encrypt the specified column recorded in CDC synchronized change table

Cause: An attempt was made to encrypt a column which is already recorded in CDC synchronized change table.

Action: drop the synchronized change table

DIA-28351: cannot encrypt the column of a cluster key

Cause: An attempt was made to encrypt a column of the cluster key. A column of the cluster key in a clustered table cannot be encrypted.

Action: None

DIA-28353: failed to open wallet

Cause: The database was unable to open the security module wallet due to an incorrect wallet path or password. It is also possible that a wallet had not been created. Type mkwallet from command line for instructions. If the database is configured to use Oracle Key Vault as the TDE keystore, the database may be having difficulty finding the Oracle Key Vault configuration file. If Oracle Key Vault is used as the keystore, check if the Oracle Key Vault configuration file is in the right directory. When the instance initialization parameter WALLET_ROOT is configured, Oracle Key Vault configuration file should be located at the following paths \$WALLET_ROOT/okv/conf for CDB\$ROOT and \$WALLET_ROOT/PDB-GUID/okv/conf for a pluggable database (PDB) in isolated mode. The PDB GUID can be obtained by querying GUID from DBA_PDBS view. When WALLET_ROOT is not set, Oracle Key Vault configuration file should be under \$OKV_HOME/conf.

Action: Execute the command again using the correct wallet password or verifying that a wallet exists in the specified directory. If necessary, create a new wallet and initialize it. When Oracle Key Vault is used, refer to the documentation for information on endpoint enrollment and provisioning.

DIA-28354: Encryption wallet, auto login wallet, or HSM is already open.

Cause: Either the encryption wallet, auto login wallet, or hardware security module (HSM) keystore was already open.

Action: None

DIA-28356: invalid open wallet syntax

Cause: The command to open the wallet contained improper spelling or syntax.

Action: If attempting to open the wallet, verify the spelling and syntax and execute the command again.

DIA-28357: password required to open the wallet

Cause: A password was not provided when executing the open wallet command, the isolate keystore command, or the unite keystore command.

Action: Retry the command with a valid password.

DIA-28358: improper set key syntax

Cause: The command to set the master key contained improper spelling or syntax.

Action: If attempting to set the master key for Transparent Database Encryption, verify the spelling and syntax and execute the command again.

DIA-28359: invalid certificate identifier

Cause: The certificate specified did not exist in the wallet.

Action: Query the V\$WALLET fixed view to find the proper certificate identifier for certificate to be used.

DIA-28361: Master key not yet set.

Cause: The master key for the instance was not set.

Action: Execute the ADMINISTER KEY MANAGEMENT SET KEY command to set a master key for the database instance.

DIA-28362: master key not found

Cause: The required master key could not be located. This may be caused by the use of an invalid or incorrect wallet.

Action: Check the wallet location parameters to see if the correct wallet is specified. Also, verify that a single sign-on (SSO) wallet is not being used when an encrypted wallet is intended.

DIA-28363: buffer provided not large enough for output

Cause: A provided output buffer is too small to contain the output.

Action: Check the size of the output buffer to make sure it is initialized to the proper size.

DIA-28364: invalid wallet operation

Cause: The command to operate the wallet contained improper spelling or syntax.

Action: Verify the spelling and syntax and execute the command again.

DIA-28365: wallet is not open

Cause: The security module wallet was not opened.

Action: Open the wallet. In an Oracle RAC environment, open the wallet on all instances for the container.

DIA-28366: invalid database encryption operation

Cause: The command for database encryption contained improper spelling or syntax.

Action: Verify the spelling and syntax and execute the command again.

DIA-28367: wallet does not exist

Cause: The Oracle wallet has not been created or the wallet location parameters in `sqlnet.ora` specifies an invalid wallet path.

Action: Verify that the `WALLET_LOCATION` or the `ENCRYPTION_WALLET_LOCATION` parameter is correct and that a valid wallet exists in the path specified.

DIA-28368: cannot auto-create wallet

Cause: The database failed to auto create an Oracle wallet. The Oracle process may not have proper file permissions or a wallet may already exist.

Action: Confirm that proper directory permissions are granted to the Oracle user and that neither an encrypted or obfuscated wallet exists in the specified wallet location and try again.

DIA-28369: cannot add files to encryption-ready tablespace when offline

Cause: You attempted to add files to an encryption-ready tablespace when all the files in the tablespace were offline.

Action: Bring the tablespace online and try again

DIA-28370: ENCRYPT, DECRYPT or REKEY option not allowed

Cause: An attempt was made to specify the `ENCRYPT`, `DECRYPT` or `REKEY` option on an unsupported tablespace.

Action: Remove this option and retry the statement.

DIA-28371: ENCRYPTION clause or ENCRYPT option not allowed

Cause: An attempt was made to specify the `ENCRYPTION` clause or `ENCRYPT` option for system and undo tablespaces.

Action: Remove one or both of these options and retry the statement.

DIA-28372: missing ENCRYPT option for encrypted tablespace

Cause: An attempt was made to specify the `ENCRYPTION` property for the `CREATE TABLESPACE` statement without specifying the `ENCRYPT` option to encrypt the tablespace.

Action: Add the `ENCRYPT` option and retry the statement.

DIA-28373: missing or out of order ENCRYPTION clause

Cause: An attempt was made to specify the ENCRYPT or DECRYPT option in the CREATE TABLESPACE statement or to specify the ENCRYPT or REKEY option in the ALTER TABLESPACE statement without first specifying the ENCRYPTION property for the tablespace.

Action: Add the ENCRYPTION clause or correct the syntax, and retry the statement.

DIA-28374: typed master key not found in wallet

Cause: You attempted to access encrypted tablespace or redo logs with a typed master key not existing in the wallet.

Action: Copy the correct Oracle Wallet from the instance where the tablespace was created.

DIA-28375: cross-endian backup conversion of encrypted tablespace is not supported

Cause: You attempted to perform a cross-endian backup conversion for encrypted tablespaces.

Action: Do not attempt to perform a cross-endian backup conversion of encrypted tablespaces because it is not supported.

DIA-28376: cannot find PKCS11 library

Cause: The HSM vendor's library cannot be found.

Action: Place the HSM vendor's library in the following directory structure: For Unix like system: /opt/oracle/extapi/[32,64]/hsm/{VENDOR}/{VERSION}/libapiname.ext For Windows systems: %SYSTEM_DRIVE%\oracle\extapi\[32,64]\hsm\{VENDOR}\{VERSION}\libapin//ame.ext [32, 64] - refers to 32bit or 64bit binary. {VENDOR} - The name of the vendor supplying the library. {VERSION} - Version of the library, preferably in num#.num#.num# for// mat.

DIA-28377: No need to migrate from wallet to HSM

Cause: There are either no encrypted columns or all column keys are already encrypted with the HSM master key.

Action: No action required.

DIA-28378: Wallet not open after setting the Master Key

Cause: The Master Key has been set or reset. However, wallet could not be reopened successfully.

Action: Reopen the wallet.

DIA-28379: a different integrity algorithm has been chosen for the table

Cause: Encrypted columns were associated with a different algorithm.

Action: You do not need to specify an algorithm, or specify the same one for the existing encrypted columns.

DIA-28382: Global wallet operation in RAC failed

Cause: Wallet operation in RAC failed.

Action: Check V\$WALLET_ENCRYPTION table to verify if the wallet operation succeeded on any instance. Retry the operation.

DIA-28383: cannot do a PKI certificate-based Master Key migration

Cause: A PKI certificate-based Master Key migration was not allowed.

Action: Execute a symmetric Master Key migration.

DIA-28384: cannot perform Tablespace Encryption

Cause: Tablespace Encryption was attempted when PKI certificate-based Master Key was in use.

Action: Perform a symmetric Master Key Rekey.

DIA-28385: cannot perform a PKI certificate-based migration

Cause: A PKI certificate-based migration to HSM was attempted.

Action: Perform a symmetric Master Key migration.

DIA-28386: cannot perform a PKI certificate-based Master Key Rekey

Cause: A PKI certificate-based Master Key Rekey was attempted when Tablespace Encryption or HSM was in use.

Action: Perform a symmetric Master Key Rekey or disable Tablespace Encryption for all tablespaces.

DIA-28387: Could not acquire an enqueue for wallet operation in Oracle RAC

Cause: Enqueue to block TDE operations in Oracle RAC database could not be obtained.

Action: Retry the wallet operation.

DIA-28388: database is not open in read/write mode

Cause: Database was not open in read/write mode and could not perform these wallet operations.

Action: Open the database in read/write mode and retry this command.

DIA-28389: cannot close auto login wallet

Cause: Auto login wallet could not be closed because it was opened with another wallet or HSM requiring a password.

Action: Close the wallet or HSM with a password.

DIA-28390: auto login wallet not open but encryption wallet may be open

Cause: Auto login wallet was not open. But, the encryption wallet may still be open and subsequent TDE operations might succeed.

Action: If auto login wallet is closed but TDE operations succeed, check the status of the encryption wallet and close that if required.

DIA-28391: cannot close wallet or HSM, password mismatch

Cause: Password provided did not match the password of the open wallet or HSM.

Action: Provide the correct password for wallet or HSM to close the wallet or HSM.

DIA-28392: invalid close wallet syntax

Cause: The command to close the wallet contained improper spelling or syntax.

Action: If attempting to close the wallet, verify the spelling and syntax and execute the command again.

DIA-28393: password required to close the wallet

Cause: A password was not provided when executing the close wallet command.

Action: Retry the command with a valid password.

DIA-28394: decryption of data of length *string* failed

Cause: Decryption of data failed. Error may be due to plain text data in an external file being submitted for decryption, data encrypted with a different key or a utility being submitted for decryption, or TDE encrypted data in data files being corrupted.

Action: Verify that the correct external file is being specified or contact Oracle Support Services.

DIA-28395: could not write the new master key to the wallet

Cause: An attempt was made to write the new master key to the wallet. The wallet or the parent directory may not have the proper file permissions to write the master key in the wallet.

Action: Check the password-based wallet, auto login wallet, the parent directory permissions and disk space availability on the file system. Make sure that the Oracle processes have read/write permissions on the password-based and auto login wallets. Retry the command.

DIA-28396: rekey of enc\$ dictionary table failed

Cause: One or more master keys required for the rekey operation could not be found in the wallet. Either incorrect master key identifiers were inserted into the enc\$ dictionary table or the wallet containing the referenced master keys were improperly modified or deleted.

Action: Restore the most recent copy of the wallet and try again.

DIA-28397: cannot bring file *string* online since it has a passphrase-wrapped key

Cause: The encrypted tablespace file was rewrapped using passphrase through the DBMS_TTS.PASSPHRASE_REWRAP_KEY procedure. Therefore it cannot be part of the database until it is converted by RMAN.

Action: Do not attempt to bring files with passphrase-wrapped keys online.

DIA-28398: cannot rewrap encryption key for this file

Cause: Cannot rewrap encryption key for this file because it was not from an encrypted tablespace, or it had already been rewrapped.

Action: Verify that the file is a copy of a file from an encrypted tablespace.

DIA-28403: file *string* cannot be modified because it is an online data file

Cause: An attempt was made to modify an online data file when the file was not expected to be part of the database.

Action: Check the status of the file and its tablespace and make sure it is offline or is a copy of a data file

DIA-28404: role cannot be altered

Cause: An attempt was made to alter the role to become a global, external, password protected, or secure application role. The role could not be altered because it was already granted to one or more other roles or program units.

Action: Use REVOKE to revoke the role from other roles first.

DIA-28405: cannot grant secure role to a role

Cause: Role granted was a password protected or secure application role. This role can only be granted directly to a user.

Action: Grant the role directly to a user.

DIA-28407: Hardware Security Module failed with PKCS#11 error *string(string)*

Cause: The Hardware Security Module (HSM) connection may have been lost or another internal HSM error was reached.

Action: Check the error. For more information on the error, check the trace files and try the following: 1) Retry the command. If the error repeats, go to step 2. 2) Verify that the HSM is configured correctly and connected. Retry the command. If the error repeats, go to step 3. 3) Ask your Security Officer to close and open the security module. Retry the command. If the error repeats, go to step 4. 4) Bounce the database if possible. Retry the command. If the error repeats, contact Oracle Support Services or your HSM vendor's support.

DIA-28408: encryption using passphrase failed

Cause: Encryption with the passphrase failed which was likely due to an invalid or missing passphrase or due to an internal error.

Action: Verify that the passphrase is provided and try the operation again. If the problem persists contact Oracle Support Services.

DIA-28409: decryption using passphrase failed

Cause: Decryption with the passphrase failed which was likely due to an invalid or missing passphrase or due to an internal error.

Action: Verify that the passphrase is provided and try the operation again. If the problem persists contact Oracle Support Services.

DIA-28410: No need to migrate from HSM to wallet.

Cause: There were either no encrypted columns or all column keys were already encrypted with the wallet master key.

Action: No action required.

DIA-28411: auto login wallet cannot be open during migration

Cause: Auto login wallet could not be opened during migration.

Action: Close the auto login wallet and try the migration again.

DIA-28412: cannot determine the database migration status

Cause: The migration status of the database could not be determined.

Action: Verify if the migration status is correct in props\$ and, if not, correct it. Shutdown and startup the database.

DIA-28414: specified keys are in HSM

Cause: Master key rekey or activation failed because the keys were in Hardware Security Module(HSM) but the configuration indicated that the keys were in wallet.

Action: Correct the sqlnet.ora configuration to HSM or migrate to wallet.

DIA-28415: specified keys are in wallet

Cause: Master key rekey or activation failed because the keys were in wallet but the configuration indicated that the keys were in Hardware Security Module (HSM) or Oracle Key Vault (OKV).

Action: Correct the sqlnet.ora file configuration to wallet or migrate to HSM or Oracle Key Vault. If WALLET_ROOT is set, set the dynamic instance initialization parameter TDE_CONFIGURATION to have a value of FILE. If the keys were migrated back to wallet, set TDE_CONFIGURATION to FILE|HSM or FILE|OKV based on the keystore that was in use. In case of migration to HSM/OKV, set TDE_CONFIGURATION to HSM|FILE or OKV|FILE based on the new keystore type.

DIA-28416: specify the correct keystore in the sqlnet.ora file or in TDE_CONFIGURATION

Cause: Either the keystore specified in the sqlnet.ora file or TDE_CONFIGURATION was incorrect.

Action: When migrating to HSM or Oracle Key Vault, the keystore specified in sqlnet.ora file should be HSM or Oracle Key Vault and similarly when migrating to wallet, the keystore specified in sqlnet.ora should be wallet. Check if the sqlnet.ora file configuration is correct and, if not, correct it. If WALLET_ROOT is configured, during migration to HSM or Oracle Key Vault the KEYSTORE_CONFIGURATION value of the dynamic instance initialization parameter TDE_CONFIGURATION should be set to HSM|FILE or OKV|FILE based on the keystore that will be used after the migration has completed. Similarly when migrating to wallet, KEYSTORE_CONFIGURATION value of TDE_CONFIGURATION should be set to FILE|HSM or FILE|OKV.

DIA-28417: password-based keystore is not open

Cause: Password-based keystore was not opened.

Action: Close the auto login keystore, if required, and open a password-based keystore or use the FORCE KEYSTORE clause.

DIA-28418: password-based HSM is not open

Cause: Password-based Hardware Security Module (HSM) was not opened.

Action: Close the auto login keystore, if required, and open a password-based HSM or use the FORCE KEYSTORE clause.

DIA-28419: migration from wallet to Hardware Security Module (HSM) failed

Cause: The TDE_MASTER_KEY_ID entry did not exist in props\$ table. A subsequent attempt to add TDE_MASTER_KEY_ID entry into props\$ failed.

Action: Verify why the TDE_MASTER_KEY_ID entry was deleted from the props\$ table. Retry the command.

DIA-28420: cannot open resetlogs from a restore point prior to wallet creation

Cause: The open resetlogs, open read-only, or standby activation operation failed because the restore point is prior to the wallet creation, and the data file does not contain the database key information as stored in the control file.

Action: Restore to a restore point after the wallet creation, or rebuild the control file with existing data files.

DIA-28421: cannot FINISH a tablespace encrypt, decrypt or rekey command which has not started

Cause: The ALTER TABLESPACE FINISH [ENCRYPT | DECRYPT | REKEY] command did not find a failed attempt for tablespace encrypt, decrypt or rekey.

Action: Check if tablespace already has a desired key version and reissue the command without FINISH keyword if necessary.

DIA-28422: operation disallowed: concurrent master key rekey

Cause: Concurrent master key rekey was detected.

Action: Wait for the master key rekey operation to complete and retry the command.

DIA-28423: current operation disallowed: *string* tablespace is being encrypted, decrypted, or rekeyed

Cause: The specified tablespace was being concurrently encrypted, decrypted, or rekeyed.

Action: Wait for the concurrent operation to complete and retry the command.

DIA-28424: ENCRYPT, DECRYPT or REKEY option already specified

Cause: In the CREATE or ALTER TABLESPACE statement, the ENCRYPT, DECRYPT or REKEY option was specified more than once.

Action: Remove all but one of the ENCRYPT, DECRYPT or REKEY options.

DIA-28425: missing a valid FILE_NAME_CONVERT clause

Cause: A valid FILE_NAME_CONVERT clause was not specified with the ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] statement. The FILE_NAME_CONVERT clause is required unless Oracle Managed Files are being used.

Action: Specify a valid FILE_NAME_CONVERT clause and retry the command.

DIA-28426: must FINISH a tablespace encrypt, decrypt or rekey command first

Cause: The ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] command found a previously failed attempt for tablespace encrypt, decrypt or rekey.

Action: Issue the ALTER TABLESPACE FINISH [ENCRYPT | DECRYPT | REKEY] command to complete the attempt for tablespace encrypt, decrypt or rekey.

DIA-28427: cannot create, import or restore unencrypted tablespace: *string* in Oracle Cloud

Cause: The specified tablespaces were not encrypted, or were not allowed to be decrypted. Oracle Cloud mandates that all tablespaces must be encrypted.

Action: Create, import or restore an encrypted tablespace, or encrypt the specified tablespace, or do not decrypt the specified tablespace.

DIA-28428: cannot encrypt or decrypt a data file in mount mode when the database is open elsewhere

Cause: An attempt was made to encrypt or decrypt a data file in mount mode when the database was already opened by another Oracle RAC instance.

Action: Ensure that the database is not open anywhere and retry the command.

DIA-28429: cannot encrypt or decrypt a data file on standby when it is open read-only

Cause: An attempt was made to encrypt or decrypt a data file on a standby database when it was already opened in read-only mode.

Action: Restart the standby instance in mount mode and retry the command.

DIA-28430: cannot encrypt or decrypt a data file for online tablespace *string*

Cause: An attempt was made to encrypt or decrypt a data file for an online tablespace.

Action: Bring the tablespace offline and retry the command.

DIA-28431: cannot encrypt an already encrypted data file *string*

Cause: An attempt was made to encrypt a data file that was already encrypted in an encrypted tablespace.

Action: Check if the data file belongs to an encrypted tablespace.

DIA-28432: cannot encrypt data file *string* in seed pluggable database

Cause: An attempt was made to encrypt a data file that was part of a seed pluggable database, which is not allowed.

Action: Check if the data file belongs to a seed pluggable database.

DIA-28433: mismatched encryption property between data file *string* and tablespace *string*

Cause: Either an unencrypted data file in an encrypted tablespace or an encrypted data file in an unencrypted tablespace was found. When bringing a tablespace online or opening the database, all data files in an encrypted tablespace must be encrypted, and all data files in an unencrypted tablespace must be unencrypted.

Action: Encrypt all of the data files in the tablespace before resuming the operation.

DIA-28434: cannot decrypt an unencrypted data file *string*

Cause: An attempt was made to decrypt a data file that was unencrypted.

Action: Check if the data file belongs to an encrypted tablespace.

DIA-28435: cannot decrypt data file *string* which is not encrypted with the database key

Cause: An attempt was made to decrypt a data file that was not encrypted with the database key. Only data files encrypted with the ALTER DATABASE DATAFILE ENCRYPT or ALTER TABLESPACE ENCRYPTION OFFLINE ENCRYPT statement are encrypted with the database key.

Action: Check if the data file belongs to an encrypted tablespace with a different key from the database key in the V\$DATABASE_KEY_INFO view, or use the ALTER TABLESPACE ENCRYPTION ONLINE DECRYPT statement instead.

DIA-28436: cannot encrypt data file *string* in SYSTEM or SYSAUX tablespace

Cause: An attempt was made to encrypt a data file that was a part of the SYSTEM or SYSAUX tablespace, which is not allowed in compatibility lower than 12.2.

Action: Check if the data file belongs to SYSTEM or SYSAUX tablespace, or change the database compatibility to 12.2 or later.

DIA-28437: unexpected FILE_NAME_CONVERT clause with Oracle Managed Files

Cause: A FILE_NAME_CONVERT clause was specified with the ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] statement, which is not allowed when the database is using Oracle Managed Files.

Action: Remove the FILE_NAME_CONVERT clause and retry the command.

DIA-28438: ALTER TABLESPACE *string* ENCRYPTION *stringstring* operation not complete

Cause: The ALTER TABLESPACE [ENCRYPT | DECRYPT | REKEY] command started but could not complete for all the data files of this tablespace.

Action: Check if all the data files are online and if the specified FILE_NAME_CONVERT clause covers all the data files of this tablespace, and retry the command with FINISH keyword, if V\$ENCRYPTED_TABLESPACES shows that the tablespace is not in NORMAL status.

DIA-28439: cannot close wallet when SYSTEM, SYSAUX, UNDO, or TEMP tablespaces are encrypted

Cause: An attempt was made to close the wallet for a database with an encrypted SYSTEM, SYSAUX, UNDO, or TEMP tablespace.

Action: Decrypt the tablespace and retry the command.

DIA-28440: cannot offline encrypt or decrypt data file *string* - file is in use or recovery

Cause: An attempt was made to offline encrypt or decrypt a data file that was online in an open instance, being encrypted or decrypted by another session, or was being recovered.

Action: Ensure that the tablespace is offline and no other encrypt or decrypt operation is performed on this data file, and end all recovery sessions.

DIA-28441: RMAN clone instance cannot open wallet

Cause: The RMAN clone instance failed to open the auto login wallet in an operation such as a pluggable database (PDB) or tablespace point-in-time recovery because the auto login wallet was incorrectly configured, or did not exist.

Action: Check and correct the auto-login wallet configuration or create an auto-login wallet from the password wallet, and retry the operation.

DIA-28442: Rekey of the TDE master encryption key is not permitted when the database is in restricted mode.

Cause: An attempt was made to rekey the Transparent Data Encryption (TDE) master encryption key when the database was in restricted mode.

Action: Open the database in read-write mode and retry the command.

DIA-28443: cannot access the TDE wallet

Cause: An attempt was made to access the Transparent Data Encryption (TDE) master encryption key in the TDE wallet.

Action: Create a TDE wallet, provision a TDE master encryption key in the wallet and ensure that the wallet is open.

DIA-28444: cannot enforce encryption of dictionary data

Cause: Either encryption of the dictionary data was already enforced or an attempt was made to enforce encryption of the dictionary data with compatible parameter earlier than release 12.2.0.2.

Action: Ensure that the compatible parameter is later than release 12.2.0.2 because earlier versions cannot handle encrypted dictionary data.

DIA-28445: Execution of the command failed.

Cause: Command execution failed due to an internal error.

Action: Check the trace file to learn the exact cause.

DIA-28446: cannot execute dictionary data rekey/delete key

Cause: Could not find an existing data encryption key.

Action: Ensure that a data encryption key exists before regenerating or deleting it.

DIA-28447: insufficient privilege to execute ALTER DATABASE DICTIONARY statement

Cause: An attempt was made to execute the ALTER DATABASE DICTIONARY statement without the necessary SYSKM privilege. For CONTAINER = ALL clause, the user must have the commonly granted SYSKM privilege or the user must have the local SYSKM privilege.

Action: Ensure that the user has the necessary privilege before executing the DDL.

DIA-28448: The ALTER DATABASE DICTIONARY statement was used incorrectly.

Cause: ALTER DATABASE DICTIONARY statement was used incorrectly.

Action: Ensure that a valid ALTER DATABASE DICTIONARY statement is executed.

DIA-28449: cannot use an invalidated database link

Cause: An attempt was made to use an invalid database link.

Action: Reset the password of the invalidated database link.

DIA-28450: encryption specified with CREATE DATABASE or CREATE PLUGGABLE DATABASE

Cause: The encryption option was specified in a CREATE DATABASE or a CREATE PLUGGABLE DATABASE statement.

Action: Do not specify encryption in the CREATE DATABASE or CREATE PLUGGABLE DATABASE statement.

DIA-28451: incomplete ALTER DATABASE LINK statement

Cause: An attempt was made to reset the password for an invalid shared database link without providing either the CONNECT TO clause, the AUTHENTICATED BY schema_name clause or the IDENTIFIED BY password clause.

Action: In the ALTER SHARED DATABASE LINK statement, ensure to provide all these clauses - - CONNECT TO - AUTHENTICATED BY schema_name - IDENTIFIED BY password

DIA-28452: ALTER DATABASE DICTIONARY statement is not allowed during rolling upgrade if LOB signature is enabled.

Cause: An attempt was made to execute the ALTER DATABASE DICTIONARY statement during rolling upgrade when large object (LOB) signature was enabled.

Action: Disable the LOB signature.

DIA-28453: ENCRYPT option not allowed

Cause: An attempt was made to specify the ENCRYPT option on an already encrypted tablespace.

Action: Remove this option and retry the statement with another option.

DIA-28454: DECRYPT option not allowed

Cause: An attempt was made to specify the DECRYPT option on a tablespace that was not encrypted.

Action: Remove this option and retry the statement with another option.

DIA-28455: ENCRYPT option not allowed.

Cause: An attempt was made to specify the ENCRYPT option on a tablespace with an incompatible setting of TABLESPACE_ENCRYPTION.

Action: If TABLESPACE_ENCRYPTION=DECRYPT_ONLY, then do not specify the CREATE or ALTER TABLESPACE statement with an ENCRYPT clause.

DIA-28456: ENCRYPTED files found with TABLESPACE_ENCRYPTION is set to DECRYPT_ONLY.

Cause: An attempt was made to open a database with encrypted tablespace files and an incompatible setting of TABLESPACE_ENCRYPTION.

Action: If TABLESPACE_ENCRYPTION=DECRYPT_ONLY, then decrypt all the encrypted tablespaces.

DIA-28457: ENCRYPT_NEW_TABLESPACES can only be set to ALWAYS when TABLESPACE_ENCRYPTION is set to AUTO_ENABLE.

Cause: An attempt was made to modify ENCRYPT_NEW_TABLESPACES to a value other than ALWAYS when TABLESPACE_ENCRYPTION is set to AUTO_ENABLE.

Action: Modify TABLESPACE_ENCRYPTION either in the server parameter file (SPFILE) or parameter file (PFILE) before the instance startup to a value other than AUTO_ENABLE, if ENCRYPT_NEW_TABLESPACES need not to be ALWAYS.

DIA-28458: cannot create, import or restore unencrypted tablespace: string when TABLESPACE_ENCRYPTION is set to AUTO_ENABLE.

Cause: The specified tablespace was not allowed to be decrypted because TABLESPACE_ENCRYPTION was set to AUTO_ENABLE.

Action: Either do not decrypt the tablespace or change the TABLESPACE_ENCRYPTION setting.

DIA-28459: cannot encrypt the unencrypted tablespace: string when TABLESPACE_ENCRYPTION is set to DECRYPT_ONLY.

Cause: The specified tablespace was not allowed to be encrypted because TABLESPACE_ENCRYPTION was set to DECRYPT_ONLY.

Action: Either do not encrypt the tablespace or change the TABLESPACE_ENCRYPTION setting.

DIA-28460: ENCRYPT_NEW_TABLESPACES can only be set to DDL when TABLESPACE_ENCRYPTION is set to DECRYPT_ONLY.

Cause: An attempt was made to modify ENCRYPT_NEW_TABLESPACES to a value other than DDL when TABLESPACE_ENCRYPTION is set to DECRYPT_ONLY.

Action: Modify TABLESPACE_ENCRYPTION either in the server parameter file (SPFILE) or parameter file (PFILE) before the instance startup to a value other than DECRYPT_ONLY, if ENCRYPT_NEW_TABLESPACES need not to be DDL.

DIA-28461: The requested cryptographic operation (*string*) is not FIPS-compliant.

Cause: The attempt was not compliant with the Federal Information Processing Standards (FIPS).

Action: Review the Federal Information Processing Standards (FIPS) and retry with FIPS compliant operations, such as a different algorithm or longer key size.

DIA-28500: connection from ORACLE to a non-Oracle system returned this message:

Cause: The cause is explained in the forwarded message.

Action: See the non-Oracle system's documentation of the forwarded message.

DIA-28501: communication error on heterogeneous database link

Cause: An unexpected communication failure occurred on a heterogeneous database link to a non-Oracle system. The message above will be followed by a second message generated by the connected non-Oracle system.

Action: See the documentation for the non-Oracle system for an explanation of the second error message.

DIA-28502: internal communication error on heterogeneous database link

Cause: A communication error internal to ORACLE's heterogeneous services has occurred.

Action: Contact Oracle customer support.

DIA-28503: The bind value cannot be translated into SQL text for the non-Oracle system.

Cause: A SQL statement used bind variables on a Heterogeneous Services database link to a non-Oracle system, but the non-Oracle system did not support bind variables.

Action: Change the SQL statement so that it does not use bind variables.

DIA-28504: The ROWID was not found in the ROWID cache for the Heterogeneous Services database link.

Cause: The ROWID cache for Heterogeneous Services held no entry that corresponded to the specified ROWID. The ROWID entry may have been overwritten in the ROWID cache.

Action: Enlarge the Heterogeneous Services ROWID cache size by increasing the value of the Heterogeneous Services initialization parameter HS_ROWID_CACHE_SIZE.

DIA-28505: cannot get non-Oracle system capabilities from *string*

Cause: ORACLE was unable to retrieve capability information for the non-Oracle system connected through a heterogeneous database link. This capability information should be stored in data dictionary tables viewable with the HS_CLASS_CAPS or HS_INST_CAPS data dictionary views.

Action: Contact the DBA to check the server data dictionary table named in the error message. If table contents are incorrect, the DBA should restore all data dictionary content for this FDS_CLASS_NAME and/or FDS_INST_NAME. It usually is sufficient to delete all current data dictionary content for this class and/or instance and initiate a new connection to let the connected agent upload new data dictionary content to the server.

DIA-28506: A parsing error has occurred in data dictionary translation for *string* stored in *string*.

Cause: A reference to an Oracle data dictionary table or view name on a Heterogeneous Services database link to a non-Oracle system could not be translated. The Oracle data dictionary tables shown with view HS_CLASS_DD contained invalid SQL for the data dictionary translation.

Action: Contact Oracle Support.

DIA-28507: error in data dictionary view *string*

Cause: The initialization parameter table for the Heterogeneous Services was not available, or its structure (number of columns or column types) was incorrect.

Action: Verify correct installation of the following Heterogeneous Services' initialization parameter views: HS_CLASS_INIT and HS_INST_INIT. If these views are not available, make sure you ran the script CATHS.SQL in the \$ORACLE_HOME/rdbms/admin directory.

DIA-28508: invalid value *string* for Heterogeneous Services initialization parameter *string*

Cause: The specified Heterogeneous Services initialization parameter had an invalid value when attempting to connect to a non-Oracle system.

Action: Check the Heterogeneous Services and agent documentation to determine acceptable values

DIA-28509: unable to establish a connection to non-Oracle system

Cause: Initialization of a database link to a non-Oracle system failed to connect to the Heterogeneous Services agent process for this non-Oracle system.

Action: Check the Net8 service name definition in the following places: -- the USING clause of the CREATE DATABASE LINK statement -- the TNSNAMES.ORA file -- the Oracle Names Server The following are possible reasons for name mismatches: -- The USING clause in the CREATE DATABASE LINK statement has to match the service name defined in the TNSNAMES.ORA file or in the Oracle Names Server. -- The protocol-specific information in the service name definition must match the protocol-specific definition of the responding listener. -- The SID=*name* in the service name definition (in the TNSNAMES.ORA file or in Oracle Names Server) must match the value in the LISTENER.ORA file for the responding listener.

DIA-28510: heterogeneous database link initialization failed

Cause: Initialization of a heterogeneous database link to a non-Oracle system failed due to an error identified by the agent for this non-Oracle system.

Action: Make sure the non-Oracle system is up and running and that all of the environment and initialization values for the agent are set correctly.

DIA-28511: lost RPC connection to heterogeneous remote agent using SID=*string*

Cause: A fatal error occurred in one of the following places: -- the connection between the ORACLE server and the agent -- the heterogeneous services remote agent itself -- the connection to the non-Oracle system This error occurred after communication had been established successfully.

Action: Check for network problems and remote host crashes. The problem is probably in the agent software. If so, contact a customer support representative of the agent vendor.

DIA-28512: cannot get data dictionary translations from *string*

Cause: ORACLE was unable to retrieve data dictionary translation information for the non-Oracle system connected through a heterogeneous database link. This data dictionary translation information should be stored in data dictionary tables viewable with the HS_CLASS_DD or HS_INST_DD data dictionary views.

Action: Ask your DBA to check the server data dictionary table named in the error message. If table contents are incorrect, the DBA should restore all data dictionary content for this FDS_CLASS_NAME and/or FDS_INST_NAME. It usually is sufficient to delete all current data dictionary content for this class and/or instance and initiate a new connection to let the connected agent upload new data dictionary content to the server.

DIA-28513: internal error in heterogeneous remote agent

Cause: An internal error has occurred in the Oracle remote agent supporting a heterogeneous database link.

Action: Make a note of how the error was produced and contact the customer support representative of the agent vendor.

DIA-28514: heterogeneous database link initialization could not convert system date

Cause: The system date was not retrievable.

Action: Verify that the ORACLE server's host machine and operating system are operational. This error should not occur unless low level system functions are failing.

DIA-28515: cannot get external object definitions from *string*

Cause: ORACLE was unable to retrieve definitions of distributed external procedures or remote libraries registered for the non-Oracle system instance, probably because the underlying data dictionary table does not exist or is malformed.

Action: Verify that the ORACLE server's Heterogeneous Services data dictionary was installed correctly. If the Heterogeneous Services data dictionary is not installed, execute the CATHS.SQL script in the \$ORACLE_HOME/rdbms/admin directory.

DIA-28518: data dictionary translation has illegal translation type

Cause: A data dictionary translation definition, either in the ORACLE server data dictionary or in data dictionary content uploaded from a Heterogeneous Services agent, specified an illegal translation type code. Legal values are 'T' or 't' for 'translate', 'M' or 'm' for 'mimic'. Information on the exact data dictionary translation causing the error is written to a trace (*.TRC) file for the ORACLE instance and to the

ORACLE instance's alert log. This error occurs when a Heterogeneous Services agent uploads data dictionary content to an ORACLE server on the first connection from the server to the agent.

Action: Contact the customer support of the agent vendor.

DIA-28519: no heterogeneous data dictionary translations available

Cause: The ORACLE server's data dictionary did not define data dictionary translations for the connected non-Oracle system, and automatic self-registration (data dictionary upload) was disabled.

Action: Ask a DBA to resolve this problem. The easiest solution is to enable automatic self-registration by setting the ORACLE server's HS_AUTO_REGISTER initialization parameter to TRUE. An alternative is to load the Heterogeneous Services data dictionary with information specific for the non-Oracle system by executing a SQL script supplied by the agent vendor. If the script is run and the error persists, contact the customer support representative of the agent vendor.

DIA-28520: error initializing heterogeneous data dictionary translations

Cause: ORACLE was unable to retrieve data dictionary translations for the non-Oracle system instance, probably because the underlying data dictionary table does not exist or is formed incorrectly.

Action: Verify that the ORACLE server's Heterogeneous Services data dictionary was installed correctly. If the Heterogeneous Services data dictionary is not installed, execute the CATHS.SQL script in the \$ORACLE_HOME/rdbms/admin directory. If the connected agent, identified by FDS_CLASS_NAME, requires a custom installation script for the ORACLE server, verify that the script has been run. If both scripts were executed and the error persists, contact the customer support representative of the agent vendor.

DIA-28521: no heterogeneous capability information available

Cause: The ORACLE server's data dictionary did not contain capability definitions for the connected non-Oracle system, and automatic self-registration (data dictionary upload) was disabled.

Action: Ask a DBA to resolve this problem. The easiest resolution is to enable automatic self-registration by setting the ORACLE server's HS_AUTO_REGISTER initialization parameter to TRUE. An alternative is to load the Heterogeneous Services data dictionary with information specific for the non-Oracle system by executing a SQL script supplied by the agent vendor. If the script is run and the error persists, contact the customer support representative of the agent vendor.

DIA-28522: error initializing heterogeneous capabilities

Cause: ORACLE was unable to retrieve capability definitions for the non-Oracle system instance, probably because the underlying data dictionary table does not exist or is formed incorrectly.

Action: Verify that the ORACLE server's Heterogeneous Services data dictionary was installed correctly. If the Heterogeneous Services data dictionary is not installed, execute the CATHS.SQL script in the \$ORACLE_HOME/rdbms/admin directory. If the connected agent, identified by FDS_CLASS_NAME, requires a custom installation script for the ORACLE server, verify that the script has been run. If both scripts were executed and the error persists, contact the customer support representative of the agent vendor.

DIA-28523: ORACLE and heterogeneous agent are incompatible versions

Cause: An operation on a database link attempted to connect to a non-Oracle system, but the ORACLE instance and the agent process for the non-Oracle system are incompatible.

Action: Ask your DBA to confirm configuration of both the ORACLE instance and the agent. Additional information on the version incompatibility is logged in trace (*.TRC) files, the ORACLE instance and the agent, and in the ORACLE instance's alert log. Check the documentation for your agent to find out which releases of the Oracle Server are supported.

DIA-28525: unable to create Heterogeneous Services error message text

Cause: Incorrect arguments were passed into the error message creation routine.

Action: Contact Oracle customer support.

DIA-28526: invalid describe information returned to Heterogeneous Services

Cause: The Heterogeneous Services received invalid describe information for a select list, bind list, or stored procedure from the Heterogeneous Services agent. This indicates a problem with the Heterogeneous Services' non-Oracle system agent.

Action: Contact customer support of the agent vendor.

DIA-28527: Heterogeneous Services datatype mapping error

Cause: Either an Oracle datatype could not be mapped to a non-Oracle datatype, or a non-Oracle datatype could not be mapped to an Oracle datatype. These mappings are defined as capability definitions in the ORACLE server's data dictionary.

Action: Verify that the ORACLE server's data dictionary has been initialized with correct capability definitions for the connected FDS_CLASS_NAME and FDS_INST_NAME. If table contents are incorrect, a DBA should restore all data dictionary content for this FDS_CLASS_NAME and/or FDS_INST_NAME. It usually is sufficient to delete all current data dictionary content for this class and/or instance and initiate a new connection to let the connected agent upload new data dictionary content to the server. If the error persists contact the customer support representative of the agent vendor.

DIA-28528: Heterogeneous Services datatype conversion error

Cause: Either an Oracle datatype could not be converted to a non-Oracle datatype, or a non-Oracle datatype could not be converted to an Oracle datatype. The following are possible reasons for the conversion failure: -- overflow problems (in the case of numbers) -- length limitations (in the case of character strings) -- invalid values passed into the conversion routines

Action: Contact customer support of the agent vendor. If the problem is due to size discrepancies between Oracle and the non-Oracle system, it may not be possible to convert the value.

DIA-28529: invalid or missing parameter in Net8 service name definition

Cause: There was an invalid or missing Heterogeneous Services parameter in the Net8 service name definition stored in either the TNSNAMES.ORA file or in the Oracle Names Server.

Action: Ask your DBA to make sure the information in the Net8 service definition is correct and complete. The correct information that should be included in the Net8 service definition can be found in the agent's documentation.

DIA-28530: Heterogeneous Services initialization error in NLS language ID

Cause: Heterogeneous Services was unable to initialize an NLS language ID. Both the ORACLE server and the Heterogeneous Services agent for the connected non-Oracle system must have language IDs.

Action: Contact Oracle customer support.

DIA-28533: Heterogeneous Services coercion handling error

Cause: The Heterogeneous Services encountered an error in coercion handling. The HS can, if the agent vendor so chooses, perform extra processing on SQL statements that contain implicit coercions or that contain coercion functions such as TO_CHAR, TO_NUMBER or TO_DATE. This functionality is controlled by coercion-related capabilities. HS logic reports this error when it encounters an error in one of these capability definitions.

Action: The capability table settings are controlled by the agent vendor and can be modified by the DBA. Contact your DBA and agent vendor and get the correct set of capabilities installed.

DIA-28534: Heterogeneous Services preprocessing error

Cause: One of the things that the Heterogeneous Services can do is to preprocess parts of SQL statements that contain implicit coercions or calls to explicit coercion functions like TO_CHAR TO_NUMBER or TO_DATE. For example, it could convert a call to TO_DATE to a bind variable, pre-evaluate the TO_DATE function call and pass the resulting value to the non-Oracle system as the bind value. This behavior is controlled by some coercion related capabilities. If the capabilities are set incorrectly, the HS could encounter errors when it attempts to do the preprocessing. If it does then this error will be signaled.

Action: The capability table settings are controlled by the agent vendor and can be modified by the DBA. Contact your DBA and agent vendor and get the correct set of capabilities installed.

DIA-28535: invalid Heterogeneous Services context

Cause: A Heterogeneous Services agent's driver module called an HS service routine with an invalid HS context value. This probably is a logic error in the driver.

Action: Contact Oracle customer support or your agent vendor.

DIA-28536: error in processing Heterogeneous Services initialization parameters

Cause: An error described by a subsequent error message prevented successful processing of Heterogeneous Services initialization parameters from the ORACLE server data dictionary.

Action: Check server data dictionary views HS_CLASS_INIT, HS_INST_INIT, and HS_ALL_INITS. Look for conditions which could produce the error identified in the error message immediately following this one.

DIA-28537: no more result sets

Cause: This error code was used internally within Oracle Database Gateway and Heterogeneous Services code and should not be reported to a client program.

Action: Contact Oracle customer support.

DIA-28538: result set not found

Cause: The client program tried fetching from a result set that is not open anymore. Many gateways will, on execution of a stored procedure, automatically close all result sets that were returned by any previously executed stored procedure.

Action: Check the documentation for the gateway that you are using and see if it will automatically close currently open result sets each time a stored procedure is executed. Then check if your client program is doing anything that violates this rule. If it is, fix your program. If it is not then contact Oracle customer support.

DIA-28539: gateway does not support result sets

Cause: The client program tried executing a stored procedure that returns one or more result sets through a gateway that does not have result set support.

Action: Check the documentation for the gateway that you are using and see if it supports result sets returned from stored procedures. If it does not, then the only way of accessing such stored procedures is to upgrade to a version of the gateway that does support result sets (if such a version exists). If the gateway does have result set support and you are still seeing this error then contact Oracle customer support.

DIA-28540: internal result set error

Cause: A protocol error internal to Heterogeneous Services or Oracle Database Gateway code has occurred.

Action: Contact Oracle customer support.

DIA-28541: Error in HS init file on line *number*.ln

Cause: A syntax error occurred in the gateway initialization file.

Action: Check gateway init file to correct the syntax error. For further information, check the error message in the gateway trace file.

DIA-28542: Error in reading HS init file ln

Cause: Reading the gateway init file generated an error.

Action: Check the gateway initialization file name to see that the gateway initialization file actually exists. Check the ifile parameter to see that it points to the correct location.

DIA-28543: Error initializing apply connection to non-Oracle system

Cause: Attempt to initialize connection to non-Oracle for heterogeneous replication failed.

Action: Check if the listener used to connect to the gateway is up and is correctly configured. Make sure that the database link used has been configured correctly and, if a tnsnames alias has been used in the database link definition, make sure that the configuration of the entry in tnsnames.ora has been done correctly.

DIA-28544: connect to agent failed, probable Net8 administration error

Cause: Net8 reported a failure to make a RSLV connection or a protocol mode error when the Oracle server attempted to establish communication with a Heterogeneous Services agent or an external procedure agent. This usually is due to an administration error in setting up Net8 service definitions in TNSNAMES.ORA or LISTENER.ORA: A basic network connection is opened, but it connects to a program which does not use the appropriate protocol. This often is a sign that the connection goes to the wrong program.

Action: Check Net8 administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the connection from the ORACLE server uses the correct service name or SID. -- Check LISTENER.ORA on the agent's host machine to assure that the service name or SID refers to the correct agent executable in its (PROGRAM=...) clause. -- Confirm in TNSNAMES.ORA or the equivalent service definition that service 'extproc_connection_data' does NOT contain (HS=), or that the service definition used by a Heterogeneous Services database link DOES contain (HS=).

DIA-28545: error diagnosed by Net8 when connecting to an agent

Cause: An attempt to call an external procedure or to issue SQL to a non-Oracle system on a Heterogeneous Services database link failed at connection initialization. The error diagnosed by Net8 NCR software is reported separately.

Action: Refer to the Net8 NCRO error message. If this isn't clear, check connection administrative setup in tnsnames.ora and listener.ora for the service associated with the Heterogeneous Services database link being used, or with 'extproc_connection_data' for an external procedure call.

DIA-28546: connection initialization failed, probable Net8 admin error

Cause: A failure occurred during initialization of a network connection from the Oracle server to a second process: The connection was completed but a disconnect occurred while trying to perform protocol-specific initialization, usually due to use of different network protocols by opposite sides of the connection. This usually is caused by incorrect Net8 administrative setup for database links or external procedure calls. The most frequent specific causes are: -- Database link setup for an Oracle-to-Oracle connection instead connects to a Heterogeneous Services agent or an external procedure agent. -- Database link setup for a Heterogeneous Services connection instead connects directly to an Oracle server. -- The extproc_connection_data definition in tnsnames.ora connects to an Oracle instance instead of an external procedure agent. -- Connect data for a Heterogeneous Services database link, usually defined in tnsnames.ora, does not specify (HS=). -- Connect data for an Oracle-to-Oracle database link, usually defined in tnsnames.ora, specifies (HS=).

Action: Check Net8 administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the connection from the ORACLE server uses the correct service name or SID. -- Check LISTENER.ORA on the connection end point's host machine to assure that this service name or SID connects to the correct program. -- Confirm in TNSNAMES.ORA or the equivalent service definition that service 'extproc_connection_data' does NOT contain (HS=), or that the service definition used by a Heterogeneous Services database link DOES contain (HS=).

DIA-28547: connection to server failed, probable Oracle Net admin error

Cause: A failure occurred during initialization of a network connection from a client process to the Oracle server. The connection was completed but a disconnect occurred while trying to perform protocol-specific initialization, usually due to use of different network protocols by opposite sides of the connection. This usually is caused by incorrect Oracle Net administrative setup for database links or external procedure calls. The most frequent specific causes are: -- The connection uses a connect string which refers to a Heterogeneous Services agent instead of an Oracle server. -- The connection uses a connect string which includes an (HS=) specification. -- Hitting Ctrl+C before connection initialization is complete. -- Using DRCP on Windows with SQLNET.AUTHENTICATION_SERVICES set to NTS. -- Connection timeout due to SQLNET.INBOUND_CONNECT_TIMEOUT parameter when all shared servers are busy in shared server configuration. -- The character set of the database is not recognized by the client process, which may be caused by an incorrect or unnecessary setting of the

ORA_NLS10 client environment variable or by a new or user-defined character set installed in the Oracle server and used for the database.

Action: Check Oracle Net administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the client connection to the Oracle server uses the correct service name or SID. -- Check LISTENER.ORA on the connection end point's host machine to assure that this service name or SID refers to the correct server. -- Confirm in TNSNAMES.ORA or the equivalent service definition that the connect string does not contain (HS=). -- Set SQLNET.AUTHENTICATION_SERVICES to NONE when using DRCP on Windows. -- Verify the NLS configuration of the Oracle client process. Ensure that the database character set is supported by the Oracle client software. If necessary, upgrade the Oracle client software or install the missing user-defined character set.

DIA-28550: pass-through SQL: cursor not found

Cause: A value passed to a pass-through SQL function or procedure call as a cursor does not identify a currently open cursor.

Action: Use a cursor number returned by the pass-through SQL OPEN_CURSOR call.

DIA-28551: pass-through SQL: SQL parse error

Cause: A non-Oracle system rejected text supplied as a pass-through SQL statement.

Action: Ensure that the SQL supplied to the pass-through SQL PARSE call is legal for the non-Oracle system.

DIA-28552: pass-through SQL: call flow error

Cause: A pass-through SQL function was called in an invalid order.

Action: Correct program flow by changing the order of API calls to match the flow described in the manual.

DIA-28553: pass-through SQL: invalid bind-variable position

Cause: A pass-through SQL function referring to the position of a bind variable in the currently-parsed SQL statement supplied an invalid bind-variable position. Valid values are 1 through n, where n is the number of bind-variable place-holders in the SQL text.

Action: Verify that the bind-variable position parameter is in the correct range to represent a place-holder in the SQL text. Confirm that the SQL text uses the correct syntax for a bind-variable place-holder, as required by the non-Oracle system.

DIA-28554: pass-through SQL: out of cursors

Cause: The maximum number of open cursors has been exceeded.

Action: Close open cursors by using the pass-through SQL CLOSE_CURSOR function.

DIA-28555: pass-through SQL: required parameter missing or NULL

Cause: An attempt was made to pass a NULL value to a non-NULL parameter.

Action: Use a non-NULL value for the parameter.

DIA-28556: authorization insufficient to access table

Cause: A query attempted to access a table in the non-Oracle system that is either privileged or has privileged columns.

Action: Contact the DBA for the non-Oracle system. The DBA can grant permission to access the privileged table or columns.

DIA-28557: unknown *string* for database link to non-Oracle system

Cause: When attempting to connect to a non-Oracle system through a Heterogeneous Services database link, the agent supporting this non-Oracle system failed to return FDS_CLASS_NAME and/or FDS_INST_NAME. ORACLE requires these names to configure the heterogeneous database link.

Action: Contact the DBA to check setup of the connection and the Heterogeneous Services agent.

DIA-28558: HS_FDS_CONNECT_STRING undefined for non-Oracle system

Cause: A database link to a non-Oracle system had no HS_FDS_CONNECT_STRING initialization parameter in the ORACLE server's data dictionary for Heterogeneous Services. Without this parameter, the connection could not be completed.

Action: Contact your DBA to verify correct setup of an HS_FDS_CONNECT_STRING entry in the ORACLE Heterogeneous Services data dictionary.

DIA-28559: FDS_CLASS_NAME is *string*, FDS_INST_NAME is *string*

Cause: An associated error was reported in another message, and this message supplies supplementary information to assist diagnosis of that error. FDS_CLASS_NAME and FDS_INST_NAME are used to access information in tables and views of the ORACLE data dictionary that direct operation of Heterogeneous Services on a database link to a non-Oracle data store.

Action: Use the FDS_CLASS_NAME and FDS_INST_NAME values to check ORACLE data dictionary contents when necessary to diagnose the cause of the associated error.

DIA-28560: error in configuration of agent process

Cause: An ORACLE server invoked a function not supported by the connected agent (Heterogeneous Services or external procedures). The most probable cause is incorrect Net8 setup, resulting in use of the wrong agent executable.

Action: Check Net8 administration in the following ways: -- When using TNSNAMES.ORA or an Oracle Names server, make sure that the connection from the ORACLE server uses the correct SID. -- Check LISTENER.ORA on the agent's host machine to assure that this SID refers to the correct agent executable in its (PROGRAM=...) clause.

DIA-28561: unable to set date format on non-Oracle system

Cause: Initialization of a Heterogeneous Services connection to set the date format to be used on the connected non-Oracle system.

Action: If the Oracle data dictionary supplies a value for the HS_NLS_DATE_FORMAT parameter, confirm that this value is formatted correctly by the rules of the non-Oracle system. Also check for additional information in log and trace files generated by the Heterogeneous Services agent.

DIA-28562: Heterogeneous Services data truncation error

Cause: A select operation was attempted with an insufficient data buffer to satisfy the request.

Action: Contact your DBA to verify whether your gateway initialization parameter HS_KEEP_REMOTE_COLUMN_SIZE is set appropriately based on your requirement. If it is, make sure the sizes of bind parameters are sufficient. If the problem persists, contact Oracle Support Services.

DIA-28575: unable to open RPC connection to external procedure agent

Cause: Initialization of a network connection to the extproc agent did not succeed. This problem can be caused by network problems, incorrect listener configuration, or incorrect transfer code.

Action: Check listener configuration in LISTENER.ORA and TNSNAMES.ORA, or check Oracle Names Server.

DIA-28576: lost RPC connection to external procedure agent

Cause: A fatal error occurred in either an RPC network connection, the extproc agent, or the invoked 3GL after communication had been established successfully.

Action: First check the 3GL code you are invoking; the most likely cause of this error is abnormal termination of the invoked "C" routine. If this is not the case, check for network problems. Correct the problem if you find it. If all components appear to be normal but the problem persists, the problem could be an internal logic error in the RPC transfer code. Contact your customer support representative.

DIA-28577: argument *string* of external procedure *string* has unsupported datatype *string*

Cause: While transferring external procedure arguments to the agent, an unsupported datatype was detected.

Action: Check your documentation for the supported datatypes of external procedure arguments.

DIA-28578: A protocol error occurred during a callback from an external procedure.

Cause: An internal protocol error occurred while trying to process a callback to the Oracle server from an external procedure or function.

Action: Contact Oracle Support.

DIA-28579: network error during callback from external procedure agent

Cause: An internal network error occurred while trying to execute a callback to the Oracle server from the user's 3GL routine.

Action: Contact Oracle customer support.

DIA-28580: recursive external procedures are not supported

Cause: A callback from within a user's 3GL routine resulted in the invocation of another external procedure.

Action: Make sure that the SQL code executed in a callback does not directly call another external procedure, or indirectly results in another external procedure, such as triggers calling external procedures, PL/SQL procedures calling external procedures, etc.

DIA-28581: protocol error while executing recursive external procedure

Cause: An internal protocol error occurred while trying to execute an external procedure resulting from a callback in another external procedure.

Action: Contact Oracle customer support.

DIA-28582: a direct connection to this agent is not allowed

Cause: A user or a tool tried to establish a direct connection to either an external procedure agent or a Heterogeneous Services agent, for example: "SVRMGR> CONNECT SCOTT/TIGER@NETWORK_ALIAS". This type of connection is not allowed.

Action: When executing the CONNECT statement, make sure your database link or network alias is not pointing to a Heterogeneous Option agent or an external procedure agent.

DIA-28583: remote references are not permitted during agent callbacks

Cause: A Heterogeneous Services agent issued a callback to the Oracle server which attempted to access a remote system. This is not supported.

Action: Make sure that SQL code issued by Heterogeneous Services agents does not reference a database link.

DIA-28584: heterogeneous apply internal error

Cause: The apply slave process encountered an error while trying to apply changes through a gateway to a non-Oracle system.

Action: Make sure that the apply database link is correctly configured and that the gateway listener and the non-Oracle system are correctly set up and are up and running. If everything is configured correctly and the problem still occurs, contact Oracle customer support. errors 28590 - 28599 are reserved for the HS agent control utility

DIA-28590: agent control utility: illegal or badly formed command

Cause: The user has issued an unrecognized or syntactically incorrect command.

Action: Refer to documentation and correct the syntax of the command.

DIA-28591: agent control utility: unable to access parameter file

Cause: The agent control utility was unable to access its parameter file. This could be because it could not find its admin directory or because permissions on directory were not correctly set.

Action: The agent control utility puts its parameter file in either the directory pointed to by the environment variable AGTCTL_ADMIN or in the directory pointed to by the environment variable TNS_ADMIN. Make sure that at least one of these environment variables is set and that it points to a directory that the agent has access to.

DIA-28592: agent control utility: agent SID not set

Cause: The agent needs to know the value of the AGENT_SID parameter before it can process any commands. If it does not have a value for AGENT_SID then all commands will fail.

Action: Issue the command SET AGENT_SID *value* and then retry the command that failed.

DIA-28593: agent control utility: command terminated with error

Cause: An error occurred during the processing of the command. There could be several causes. A SET or an UNSET command could have been issued after the agent was started. This is illegal. The user may have attempted to start two agents with the same SID value or the user could have attempted to shutdown an agent that is no longer running.

Action: If the user wishes to issue a SET or an UNSET command, he should make sure the agent is shutdown first by issuing the SHUTDOWN command.

DIA-28594: agent control utility: invalid parameter name

Cause: The user tried to set or unset an invalid agent parameter.

Action: Refer to documentation and correct the parameter name.

DIA-28595: Extproc agent: Invalid DLL Path

Cause: The path of DLL supplied for the extproc execution was invalid.

Action: Ensure that the DLL path is set properly using the EXTPROC_DLLS environment variable.

DIA-28596: Extproc agent: Invalid or disabled credential *string*

Cause: The credential of the PL/SQL library supplied for the extproc execution was invalid.

Action: Ensure that the credential of the PL/SQL library is valid and enabled. errors 28600 - 28620 are reserved for bitmap indexes

DIA-28601: invalid [no]MINIMIZE option

Cause: user didn't type this alter table <table_name> MINIMIZE RECORDS_PER_BLOCK or alter table <table_name> NOMINIMIZE RECORDS_PER_BLOCK

Action: reenter correct sql command

DIA-28602: statement not permitted on tables containing bitmap indexes

Cause: table has bitmap indexes and user is minimizing or nominimizing records_per_block

Action: drop all bitmap indexes before changing records_per_block

DIA-28603: statement not permitted on empty tables

Cause: table is empty and statement does not work on empty tables

Action: try statement after loading your data

DIA-28604: table too fragmented to build bitmap index (*string,string,string*)

Cause: The table has one or more blocks that exceed the maximum number of rows expected when creating a bitmap index. This is probably due to deleted rows. The values in the message are: (data block address, slot number found, maximum slot allowed)

Action: Defragment the table or block(s). Use the values in the message to determine the FIRST block affected. (There may be others).

DIA-28605: bitmap indexes cannot be reversed

Cause: user tried to create reverse bitmap index

Action: don't do this; it is not supported

DIA-28606: block too fragmented to build bitmap index (*string,string*)

Cause: The block(s) exceed the maximum number of rows expected when creating a bitmap index. This is probably due to maximum slot allowed set too low. The values in the message are: (slot number found, maximum slot allowed)

Action: alter system flush shared_pool; update tab\$ set spare1 = 8192 where obj# = (select obj# from obj\$ where NAME=<table_name> AND owner# = <table_owner>; commit;

DIA-28611: bitmap index is corrupted - see trace file for diagnostics

Cause: Validate Index detected bitmap corruption in its argument index

Action: Drop this bitmap index and create a new one.

DIA-28650: Primary index on an IOT cannot be rebuilt

Cause: An attempt is made to issue alter index rebuild on IOT-TOP

Action: Use Alter table MOVE to reorganize the table(IOT)

DIA-28651: Primary index on IOTs can not be marked unusable

Cause: An attempt is made to mark IOT-TOP unusable thru ALTER INDEX

Action: Remove the option UNUSABLE

DIA-28652: overflow segment attributes cannot be specified

Cause: During ALTER MOVE ONLINE of a index-organized table, the user attempted to enter one or more of the following options: OVERFLOW, PCTTHRESHOLD,INCLUDING.

Action: Remove the illegal option(s).

DIA-28653: tables must both be index-organized

Cause: Attempt to exchange a non IOT table/partition with a partition/table respectively

Action: Ensure that non-partitioned and partitioned tables are both index-organized.

DIA-28654: table and partition not overflow compatible

Cause: If one of the tables (partitioned/non-partitioned) has overflow data segment and the other one doesn't.

Action: Ensure that non-partitioned and partitioned tables both have overflow data segment or neither one does.

DIA-28655: Alter table add overflow syntax error

Cause: Syntax error

Action: Check the syntax.

DIA-28656: incomplete attribute specification

Cause: The attribute specification is not done for all partitions"

Action: Specify the storage attributes either for ALL partitions or NONE

DIA-28657: Allow IOT w/o overflow though overflow is required

Cause: N/A

Action: THIS IS NOT A USER ERROR NUMBER/MESSAGE. THIS DOES NOT NEED TO BE TRANSLATED OR DOCUMENTED. IT IS USED ONLY BY IMPORT CODE.

DIA-28658: This operation is supported only for Index-Organized tables

Cause: Attempt to perform some IOT specific operation on a non-IOT

Action: don't do this. This is not supported

DIA-28659: COMPRESS must be specified at object level first

Cause: Attempt to specify COMPRESS at partition level without first specifying at the table level

Action: Specify COMPRESS at table level. Use ALTER TABLE xxx MODIFY DEFAULT ATTRIBUTES COMPRESS ...

DIA-28660: Partitioned Index-Organized table may not be MOVEd as a whole

Cause: Attempt to MOVE partitioned IOT as a whole

Action: don't do this. This is not supported

DIA-28661: Object already has COMPRESS clause specified

Cause: Attempt to specify compress for iot/index which already has a compression clause.

Action: This is a 'create time only' attribute

DIA-28662: IOT index and overflow segments must share the same LOGGING attribute

Cause: Attempt to specify LOGGING for one segment and NOLOGGING for the other segment.

Action: don't do that

DIA-28663: Logging/Nologging attribute can not be specified in the statement ALTER TABLE ADD OVERFLOW

Cause: Attempt to specify LOGGING for a Alter Table Add Overflow.

Action: don't do that

DIA-28664: a partitioned table may not be coalesced as a whole

Cause: User attempted to coalesce a partitioned IOT using ALTER TABLE COALESCE statement, which is illegal

Action: Coalesce the table a partition at a time (using ALTER TABLE MODIFY PARTITION COALESCE)

DIA-28665: table and partition must have same compression attribute

Cause: User attempted to EXCHANGE a compression enabled partition with a compression disabled table or vice versa OR the # of columns compressed is different for table and partition

Action: Make sure the compression attributes match If they don't, fix it using ALTER TABLE MOVE [PARTITION] COMPRESS

DIA-28666: option not allowed for an index on UROWID column(s)

Cause: User attempted to build a REVERSE or COMPRESSED or GLOBAL partitioned index on UROWID column(s)

Action: Build the index without these options

DIA-28667: USING INDEX option not allowed for the primary key of an IOT

Cause: User attempted to define storage attributes for the primary key index of an Index-Organized table with USING INDEX clause. All the storage attribute defined for

the (IOT)table applies to the primary key index and a separate USING INDEX clause is not required.

Action: Remove the USING INDEX clause and specify all attributes directly for the table

DIA-28668: cannot reference mapping table of an index-organized table

Cause: An attempt to directly access the mapping table of an index-organized table

Action: Issue the statement against the parent index-organized table containing the specified mapping table.

DIA-28669: bitmap index can not be created on an IOT with no mapping table

Cause: User attempted to create a bitmap index on an index-organized table without a mapping table.

Action: Enable bitmap indexes on the Index-organized table by creating a mapping table using 'ALTER TABLE .. MOVE MAPPING TABLE'.

DIA-28670: mapping table cannot be dropped due to an existing bitmap index

Cause: User attempted to drop the mapping table with NOMAPPING option when the IOT has one or more bitmap indexed.

Action: Drop the bitmap index(es) before dropping the mapping table.

DIA-28671: UPDATE BLOCK REFERENCES may not be used on a partitioned index as a whole

Cause: User attempted to UPDATE BLOCK REFERENCES on a partitioned index using ALTER INDEX UPDATE BLOCK REFERENCES statement, which is illegal.

Action: Issue a partition level operation with ALTER INDEX .. PARTITION .. UPDATE BLOCK REFERENCES

DIA-28672: UPDATE BLOCK REFERENCES may not be used on a global index

Cause: User attempted to UPDATE BLOCK REFERENCES on a global partitioned or non-partitioned index. This feature is not supported for non-partitioned or global partitioned index on a partitioned IOT and a global partitioned index on a non-partitioned IOT.

Action: Use online index [partition] rebuild to fix the block references

DIA-28673: Merge operation not allowed on an index-organized table

Cause: User attempted merge operation on an index-organized table. Merge is not supported on a IOT .

Action: Use updates and inserts on index-organized table .

DIA-28674: cannot reference transient index-organized table

Cause: An attempt was made to directly access a transient table created created on behalf of a index-organized table partition maintenance operation.

Action: Issue the statement against the associated permanent index-organized table.

DIA-28700: Only roles can be attached to or detached from program units.

Cause: An attempt was made to grant object privileges or system privileges to program units.

Action: Grant the privileges to a role first, and then grant the role to the program units.

DIA-28701: Keyword PROCEDURE, FUNCTION, or PACKAGE is either missing or not correct.

Cause: The keyword PROCEDURE, FUNCTION, or PACKAGE was either missing before the program unit, or it was not consistent with the type of the program unit.

Action: Include the correct keyword PROCEDURE, FUNCTION or PACKAGE right before each program unit according to its type.

DIA-28702: Program unit *string* is not owned by the grantor.

Cause: An attempt was made to attach roles to or detach roles from one or more program units by someone other than the owner or SYS. Only a program unit owner or SYS can attach roles to or detach roles from a program unit.

Action: Specify only the program units owned by the grantor in the command.

DIA-28703: Only regular database roles can be attached to or detached from program units.

Cause: An attempt was made to attach non-supported types of roles to or detach them from program units. Application roles, secure application roles, external roles, global roles, and light-weight roles cannot be attached to or detached from program units.

Action: Remove any application role, secure application role, external role, global role, and light-weight role from the command.

DIA-28704: Role *string* is not directly granted to the owner of the program units.

Cause: An attempt was made to attach roles that were not directly granted to the owner of the program units. The roles must be granted to the owner directly in order to attach them to the owner's program units.

Action: Grant the role to the owner of the program unit first.

DIA-28705: The grantor does not have privileges to grant the role *string* to the program units.

Cause: Privileges to grant a role to a program unit were insufficient. The grantor must have the GRANT ANY ROLE privilege or the ADMIN option or the DELEGATE option for the role to do the operation.

Action: Obtain the required privilege and retry.

DIA-28706: duplicate program unit *string* found in list

Cause: A duplicate program unit was found in the GRANTEE clause.

Action: Specify each program unit only once.

DIA-28707: Reserved word ALL was used with roles in the REVOKE command to detach roles from program units.

Cause: An attempt was made to use reserved word ALL jointly with roles in a REVOKE command to detach roles from program units.

Action: Do not specify roles in the privilege clause except for the reserved word ALL.

DIA-28708: More than *string* roles were attached to the program unit.

Cause: Too many roles were currently attached to the program unit.

Action: Detach some roles from the program unit.

DIA-28709: Roles with DELEGATE option can only be granted to users.

Cause: One of the grantees was not a user when trying to grant roles with the DELEGATE option.

Action: Verify that the grantees are users and try the operation again.

DIA-28714: OCI_BATCH_ERRORS or OCI_RETURN_ROW_COUNT_ARRAY mode can only be specified for INSERT, UPDATE, DELETE or MERGE statement.

Cause: OCI_BATCH_ERRORS or OCI_RETURN_ROW_COUNT_ARRAY mode was specified in a statement which is not INSERT, UPDATE, DELETE or MERGE.

Action: Specify OCI_BATCH_ERRORS or OCI_RETURN_ROW_COUNT_ARRAY only for INSERT, UPDATE, DELETE or MERGE statements.

DIA-28715: OCI_STMT_SCROLLABLE_READONLY can only be specified for SELECT statements.

Cause: OCI_STMT_SCROLLABLE_READONLY mode was specified for a non-SELECT statement.

Action: Specify OCI_STMT_SCROLLABLE_READONLY only for SELECT statements.

DIA-28716: Invalid buffer or buffer size for OCIServerRelease2() ln

Cause: A zero length or null buffer was specified for the OCIServerRelease2().

Action: Specify a valid buffer and length.

DIA-28721: invalid argument (string)

Cause: Argument (%s) was not valid.

Action: Ensure that the correct parameter is provided.

DIA-28722: invalid file handle

Cause: The file parameter handle was not valid.

Action: Ensure that the correct parameter handle is provided.

DIA-28724: OCI encountered OraCoroutine Error(number) from (string)

Cause: OCI encountered an internal error

Action: Contact Oracle Support Services

DIA-28725: invalid CMAN in Traffic Director mode configuration\n

Cause: An attempt was made to connect to Connection Manager (CMAN) in Traffic Director mode with an invalid configuration.

Action: Correct the configuration of CMAN in Traffic Director mode before starting it. Check and correct the wallet credentials and proxy authorization. Check with CMAN in Traffic Director mode administrator to get more information from traces and sqlnet.log.

DIA-28726: set current schema operation failed because the given schema name is either invalid or does not exist

Cause: An attempt was made to set the schema to a non-existent value.

Action: Specify an existing schema name or ask the database administrator to create a new schema.

DIA-28727: trace event set or reset operation failed

Cause: An attempt was made to set or reset a trace event dynamically.

Action: Use the correct event number and trace level.

DIA-48001: internal error code, arguments: [string], [string], [string], [string], [string], [string], [string], [string]

Cause: This is the generic internal error number for program exceptions. This indicated that a process encountered an exceptional condition.

Action: Report as a bug - the first argument is the internal error number.

DIA-48002: thread terminated by fatal error

Cause: The thread was in an unrecoverable state.

Action: Examine the thread trace file for more information.

DIA-48003: out of process memory when trying to allocate string bytes (string,string)

Cause: Operating system process private memory was exhausted.

Action: n/a

DIA-48004: unable to allocate string bytes of shared memory ("string","string","string","string")

Cause: More shared memory is needed than was allocated in the shared pool.

Action: Reduce your use of shared memory or increase the amount of available shared memory.

DIA-48007: name is already used by an existing product type

Cause: An attempt was made to define a product type with the same name as an already defined product type.

Action: Use the already existing product type with the specified name, or use a different name for the product type.

DIA-48008: id is already used by an existing product type

Cause: An attempt was made to define a product type with the same id as an already defined product type.

Action: Choose a different name for the product type.

DIA-48100: error encountered when attempting to open a file

Cause: There was an error encountered when attempting to open a file with the ADR file interface.

Action: Check that the specified directory name, file name, and open options are valid.

DIA-48101: error encountered when attempting to read a file [string] [string] [string]

Cause: There was an error encountered when attempting to read a file with the ADR file interface.

Action: Check the specified arguments to the read interface.

DIA-48102: encountered the end-of-file when reading the file

Cause: The ADR file interface encountered the end-of-file when reading the file.

Action: Handle the end of file condition.

DIA-48103: error encountered when attempting to write a file [string] [string] [string]

Cause: There was an error encountered when attempting to write a file with the ADR file interface.

Action: Check the specified arguments to the write interface.

DIA-48104: read mismatch on blocks requested and returned, [string], [string]

Cause: There was a mismatch between the number of blocks requested for reading and the number of blocks actually returned.

Action: Check the file to make sure there are no partial blocks.

DIA-48105: write mismatch on blocks requested and returned, [string], [string]

Cause: There was a mismatch between the number of blocks requested for writing and the number of blocks actually written.

Action: Check that there is enough space left on the device to write the requested number of blocks.

DIA-48106: error initializing the ADR string object

Cause: There was an error encountered during the initialization of one of the ADR file objects.

Action: Check the validity of the specified directory name and file name.

DIA-48107: invalid Bfile input, [string]

Cause: An invalid Bfile was passed into the routine to convert the bfile into a file handle.

Action: Verify the contents of the specified Bfile.

DIA-48108: invalid value given for the diagnostic_dest init.ora parameter

Cause: The value given for the diagnostic_dest directory is not a valid directory. Either the directory does not exist or the process does not have read/write privileges on the directory.

Action: Use a value for diagnostic_dest that is a valid directory with the proper read and write privileges.

DIA-48109: invalid lock mode for file descriptor, [string]

Cause: The lock mode associated with the file descriptor was invalid in the context of the routine.

Action: Verify that a file is not trying to obtain multiple locks and that the file is holding a lock when attempting to release the lock.

DIA-48110: error encountered while attempting to get a file lock [string] [string]

Cause: There was an error encountered while trying to get a file lock.

Action: Check the state of the file and operating system.

DIA-48111: error encountered while attempting to release a file lock [string]

Cause: There was an error encountered while trying to release a file lock.

Action: Check the state of the file and operating system.

DIA-48112: invalid flags for open file, *string*

Cause: Invalid flags were passed in to the open file routine.

Action: Check to see if the flags are a valid combination.

DIA-48113: unable to write to stream file because of out of space condition

Cause: The system is unable to write the requested number of bytes to a stream file. This is due to an out of space condition. The additional information shows how many bytes were not written.

Action: Check that there is enough space left on the device to write the requested number of bytes.

DIA-48114: error encountered when attempting to close a file

Cause: There was an error encountered when attempting to close a file with the ADR file interface.

Action: Check the validity of the file descriptor.

DIA-48115: error encountered while seeking a file position

Cause: There was an error encountered while seeking a position in a file.

Action: Check that the requested file position falls within the file boundaries.

DIA-48116: error encountered when attempting to create a directory [*string*]

Cause: There was an error encountered when attempting to create a directory.

Action: Check the directory name.

DIA-48117: error encountered when attempting to remove a directory [*string*]

Cause: There was an error encountered when attempting to remove a directory.

Action: Check the directory name.

DIA-48118: error encountered with list directory [*string*]

Cause: There was an error with listing the elements of a directory.

Action: Check the state of the operating system.

DIA-48119: error encountered when attempting to remove a file [*string*] [*string*]

Cause: There was an error encountered when attempting to remove a file with the ADR file interface.

Action: Check the directory name and file name.

DIA-48120: error encountered when attempting to retrieve the file size [*string*] [*string*]

Cause: There was an error encountered when attempting to retrieve the file size with the ADR file interface.

Action: Check the directory name and file name.

DIA-48121: error with opening the ADR stream file [*string*] [*string*]

Cause: An error was encountered when attempting to open an ADR stream file.

Action: Check the rest of the error stack for details of the actual error that was encountered.

DIA-48122: error with opening the ADR block file [string] [string]

Cause: An error was encountered when attempting to open an ADR block file.

Action: Check the rest of the error stack for details of the actual error that was encountered.

DIA-48123: error encountered when attempting to flush a file

Cause: There was an error encountered when attempting to flush a file with the ADR file interface.

Action: Check the state of the file.

DIA-48124: device full encountered during write to a file

Cause: The device full error was encountered during the write to a file.

Action: Check the amount of free space on the device.

DIA-48125: illegal identifier length, argn:string, len:string, lim:string

Cause: An input identifier was passed in that has a length that is greater than the max length.

Action: Make sure the input identifier has a length that is less than the max length.

DIA-48126: attempting to create a file that already exists

Cause: The client attempted to create a file that already exists.

Action: Either remove the file or check if it is okay if the file already exists.

DIA-48127: attempting to open a file that does not exist

Cause: An attempt was made to open a file that does not exist.

Action: Either create the file or check why the file does not exist.

DIA-48128: opening of a symbolic link is disallowed

Cause: An error was encountered when attempting to open a file that is a symbolic link. Users are not allowed to open symbolic links.

Action: Check the specified file name.

DIA-48129: invalid input for the full path specification

Cause: Input was incorrectly specified for the full path specification, or the default extension may have been incorrectly specified. Or an empty string was passed in for the full path.

Action: Check that the full path string is non-NULL. If you want to specify a relative path from ADR Home for the full path specification, then use '<ADR_HOME>' instead of the actual path to ADR Home. For ADR Base, use '<ADR_BASE>'.

DIA-48130: invalid lock parameters for get file lock [string]

Cause: Invalid lock parameters passed in for the get file lock routine. The user must pass in file as the lock type. Or, there is a lock mode mismatch. Exclusive locks are not allowed in read-only mode, and shared locks are not allowed in write-only mode.

Action: Check that correct lock type is specified and that the correct lock mode is requested for the file given its open flags.

DIA-48131: error encountered when attempting to tell the file position

Cause: An error was encountered when attempting to tell the file position using the ADR file interface.

Action: Check the directory and file name of the file along with the open state.

DIA-48132: requested file lock is busy, [string] [string]

Cause: The requested file lock is busy because another process is holding the file lock.

Action: Try to get the file lock again at a later time.

DIA-48133: file descriptor has already been opened [string] [string]

Cause: The specified file descriptor has already been opened.

Action: Do not open a file that has previously been opened, or check your code to make sure you are cleaning up a file descriptor that is being reused correctly.

DIA-48134: invalid file descriptor state for operation, string, string, string

Cause: The state of the file descriptor was invalid for the requested operation. An example is that a file was opened for read, but a write operation to the file was requested.

Action: Check the state of the file descriptor and make sure it matches the operation.

DIA-48135: uninitialized file descriptor

Cause: The specified file descriptor is uninitialized.

Action: Make sure the file descriptor is initialized before passing it into the routine.

DIA-48136: directory already exists [string]

Cause: Operation failed because the specified directory already exists.

Action: Remove the directory or ignore this error.

DIA-48137: uninitialized file handle

Cause: The specified file handle is uninitialized.

Action: Make sure the file handle is initialized before passing it into the routine.

DIA-48138: invalid directory name input for client address

Cause: An invalid directory name was specified as part of the address path specification.

Action: Check that the directory name is non-NULL and that the directory name length does not exceed the maximum length.

DIA-48139: invalid input to ADR initialization routine

Cause: There was an invalid input to the ADR initialization routine.

Action: Check the length of the ADR base, product ID, and instance ID input arguments.

DIA-48140: the specified ADR Base directory does not exist [string]

Cause: The specified ADR Base Directory does not exist.

Action: Check that the specified ADR Base Directory is a valid path name and that the directory exists.

DIA-48141: error creating directory during ADR initialization [string]

Cause: Error encountered when creating a directory during the initialization of the ADR subsystem.

Action: Check the input arguments to the ADR initialization routine and the state of the operating system.

DIA-48142: invalid permissions input for change permissions

Cause: Invalid permissions passed into change permissions routine.

Action: Check the value of the permissions input.

DIA-48143: error changing permissions for a file

Cause: Error encountered while changing the permissions for a file

Action: Check the specified directory and file and the state of the operating system.

DIA-48144: error encountered while performing standard file I/O

Cause: Error encountered while performing standard file I/O

Action: Check the validity of standard in, out, and error.

DIA-48145: invalid seek location, [string], [string]

Cause: Invalid seek location specified for routine.

Action: Check the validity of specified seek location.

DIA-48146: missing read, write, or exec permission on directory during ADR initialization [string] [string]

Cause: Error encountered when checking if the process has read, write, and exec privileges on directories needed by the ADR subsystem. This error occurs during the initialization of the ADR subsystem.

Action: Check the input arguments to the ADR initialization routine and the state of the operating system. Ensure that the user has the proper permissions on the ADR directories.

DIA-48147: invalid home location specification for ADR, [string], [string], [string]

Cause: Invalid read or write home location specification for ADR.

Action: An invalid home was specified for the ADR Read or Write Home location.

DIA-48148: error encountered when attempting to move a file

Cause: There was an error encountered when attempting to move a file with the ADR file interface.

Action: Check the directory name and file name.

DIA-48149: error encountered when attempting to copy a file

Cause: There was an error encountered when attempting to copy a file with the ADR file interface.

Action: Check the directory name and file name.

DIA-48150: error encountered with set current working directory

Cause: There was an error with setting the current working directory.

Action: Check the path used, or the state of the operating system.

DIA-48151: error getting operating system time for a file

Cause: Error encountered while getting the operating system time for a file.

Action: Check the specified directory and file and the state of the operating system.

DIA-48152: lock table is full

Cause: Lock table is full - too many locks granted

Action: Try again later

DIA-48153: error encountered when getting ADR base directory default

Cause: There was an error encountered when attempting to get the ADR base directory default value.

Action: Check your environment to see if the \$ORACLE_BASE and \$ORACLE_HOME environment variables are set.

DIA-48154: reached end of file for alert log

Cause: The end of file was reached for reading the Alert Log. There are no more messages to read in the Alert Log.

Action: Do not read from the Alert Log

DIA-48155: error encountered when read alert log [*string*]

Cause: There was an error encountered when attempting to read a message from the Alert Log.

Action: Check the error message and the contents of the alert message.

DIA-48156: Alert log purge has occurred - retry operation

Cause: The purge of the alert log has occurred.

Action: Retry the operation.

DIA-48157: null input to ADR initialization

Cause: There was a null input to the ADR initialization routine.

Action: Check the ADR base, product ID, and instance ID input arguments.

DIA-48158: invalid input for ADR base directory

Cause: An invalid input was passed in for the ADR base directory name. The ADR base directory name is either NULL or too long of a string.

Action: Check the ADR base directory input argument.

DIA-48159: invalid input for ADR product type

Cause: An invalid input was passed in for the ADR product type. The ADR product type is out of bounds.

Action: Check the ADR product type input argument.

DIA-48160: invalid input for ADR product id

Cause: An invalid input was passed in for the ADR product id. The ADR product id is either NULL or too long of a string.

Action: Check the ADR product id input argument.

DIA-48161: invalid input for ADR instance id

Cause: An invalid input was passed in for the ADR instance id. The ADR instance id is either NULL or too long of a string.

Action: Check the ADR instance id input argument.

DIA-48162: string buffer too small to hold input, [string], [string], [string]

Cause: The string buffer is too small to copy an input string into.

Action: Check the size of the string buffer and the input string. Look in the argument for the location in the code where the error occurs.

DIA-48163: error concatenating directory onto path, [string], [string], [string]

Cause: Error encountered while concatenating a directory onto a path name.

Action: Check the error returned by the OS and the size of the input and output buffers.

DIA-48164: error concatenating file onto path, [string], [string], [string]

Cause: Error encountered while concatenating a directory onto a path name.

Action: Check the error returned by the OS and the size of the input and output buffers.

DIA-48165: user missing read, write, or exec permission on specified ADR Base directory [string]

Cause: The specified ADR Base Directory does not have the correct permissions.

Action: Check the read, write, and exec permissions on the specified ADR Base Directory

DIA-48166: error with opening ADR block file because file does not exist [string] [string]

Cause: An error was encountered with opening an ADR block file because the file does not exist.

Action: Check the existence of the ADR Block File.

DIA-48167: invalid argument for checking ADR initialization

Cause: Invalid arguments were specified for the routine to check ADR initialization.

Action: Check the inputs to the ADR initialization routine.

DIA-48168: the ADR sub-system is not initialized

Cause: The ADR subsystem has not been initialized. The requested operation cannot be performed.

Action: Check the usage of the call to the ADR services. The ADR sub-system must be initialized for the call to work.

DIA-48169: incorrect arguments to ADR deferred initialization

Cause: There are incorrect arguments to the ADR deferred initialization.

Action: Check the input arguments. It could be possible that the product is not set up for deferred initialization.

DIA-48170: unable to lock file - already in use

Cause: the file is locked by another process, indicating that it is currently in use by another process

Action: determine which process legitimately owns this file.

DIA-48171: unable to get share lock - file not readable

Cause: share lock request was made on a file not open for read access.

Action: file must be open read-only or read-write to get a share lock.

DIA-48172: unable to find a valid ADR base

Cause: Unable to find a valid ADR base. We tried the ORACLE_BASE, ORACLE_HOME, home, and tmp directories, but none of the directories exist for read/write access.

Action: Check the validity of the ORACLE_BASE, ORACLE_HOME, home, and tmp directories.

DIA-48173: error checking directory existence during ADR initialization [string]

Cause: Error encountered when checking directory existence during the initialization of the ADR subsystem. Either the diag or product type directory does not exist underneath the ADR base.

Action: The directory in the error message must exist in order for ADR initialization to succeed. Make sure the directories exist.

DIA-48174: error encountered with get current working directory

Cause: There was an error with getting the current working directory.

Action: Check the state of the operating system or the size of the path buffer.

DIA-48175: the path name must not contain the string '..'

Cause: The specified path name contains '..'.

Action: Correct the path name and retry the operation.

DIA-48176: error translating a path name into its full path name

Cause: An error was encountered when translating a path name into its full path name.

Action: Check the inputted path name to make sure it is a valid relative path.

DIA-48177: file name with full path information [string] not allowed

Cause: Input was incorrectly specified for the file name. The inputted file name is greater than the maximum length, or the file name has path information. In this case, the file name should not have any path information. The path information should be specified in a separate argument.

Action: Check that the string for the file name is not too long and does not have path information.

DIA-48178: error encountered while reading an ADR block file during ADR initialization [*string*]

Cause: An error was encountered while reading an ADR block file during the initialization of the ADR subsystem.

Action: Check the state of the file system.

DIA-48179: OS file synchronization failure

Cause: OS command to synchronize the changes to a file with the operating system failed.

Action: Check the state of the file system and the amount of free space left on your device.

DIA-48180: OS open system call failure

Cause: OS open system call failed. The system failed to open or create a file in the requested mode.

Action: Check the OS error code

DIA-48181: OS write system call failure

Cause: OS write system call failed. The system failed to write to a file.

Action: Check the OS error code

DIA-48182: OS read system call failure

Cause: OS read system call failed. The system failed to read to a file.

Action: Check the OS error code

DIA-48183: OS close system call failure

Cause: OS close system call failed. The system failed to close a file.

Action: Check the OS error code

DIA-48184: OS seek system call failure

Cause: OS seek system call failed. The system failed to seek to a position in a file.

Action: Check the OS error code

DIA-48185: OS file size system call failure

Cause: OS file size call failed. The system failed to retrieve the file size for a file.

Action: Check the OS error code

DIA-48186: OS check file exists system call failure

Cause: OS check file exists system call failed. The system failed to perform the check file exists command for a file.

Action: Check the OS error code

DIA-48187: specified directory does not exist

Cause: The specified directory does not exist.

Action: Check the directory name.

DIA-48188: user missing read, write, or exec permission on specified directory

Cause: The user does not have valid permissions on the specified directory. The user is missing either the read, write, or execute permission.

Action: Check the permissions of the specified directory.

DIA-48189: OS command to create directory failed

Cause: The OS command to create a directory failed.

Action: Check the error number associated with the create directory failure.

DIA-48190: OS unlink system call failure

Cause: OS unlink system call failed. The system failed to perform unlink on the specified file.

Action: Check the OS error code

DIA-48191: user missing read or write permission on specified file

Cause: The user does not have valid permissions on the specified file. The user is missing either the read or write permission.

Action: Check the permissions of the specified file.

DIA-48192: OS command to move a file failed

Cause: The OS command to move a file failed.

Action: Check the error number associated with the move file.

DIA-48193: OS command to open a directory failed

Cause: The OS command to open a directory failed.

Action: Check the OS error associated with the open directory failure.

DIA-48194: OS command to close a directory failed

Cause: The OS command to close a directory failed.

Action: Check the OS error associated with the close directory failure.

DIA-48195: OS command to remove a directory failed

Cause: The OS command to remove a directory failed.

Action: Check the OS error associated with the remove directory failure.

DIA-48196: OS command to release advisory lock failed

Cause: The OS command to release the advisory lock failed

Action: Check the OS error associated with the release advisory lock failure.

DIA-48197: OS command to get the file status failed

Cause: The OS command to get the file status failed. This could be because the file is not open or file descriptor is invalid.

Action: Check the OS error associated with the get file status failure.

DIA-48198: OS command to change the file permissions failed

Cause: The OS command to change the file permissions failed.

Action: Check the OS error associated with the failure.

DIA-48199: OS command to copy a file failed

Cause: The OS command to copy a file failed.

Action: Check the error number associated with the copy file.

DIA-48200: Illegal Input Argument [string]

Cause: An illegal argument was passed in.

Action: Fix the call.

DIA-48201: Field Length Exceeds Maximum [string] [string] [string]

Cause: An illegal field length was used.

Action: Fix the call.

DIA-48202: Illegal Identifier [string] [string]

Cause: Illegal identifier specified.

Action: Use a valid identifier.

DIA-48203: Illegal Data Type [string]

Cause: Illegal data type specified.

Action: Use a valid data type.

DIA-48204: Illegal Identifier Length [string] [string] [string]

Cause: The input identifier is too long.

Action: Specify a shorter identifier.

DIA-48205: Record Length too Big [string] [string] [string]

Cause: The sum of the maximum lengths of all fields exceeds the maximum record length that is supported.

Action: Remove or shorten some of the fields.

DIA-48206: Illegal Number of Fields [string] [string] [string]

Cause: The number of fields specified exceeds the supported maximum.

Action: Remove some of the fields in the relation.

DIA-48207: Illegal Field Name [string]

Cause: The field name is invalid.

Action: Specify a valid field name.

DIA-48208: Duplicate Field Names [string]

Cause: The list of fields specified contains a duplicate field.

Action: Remove the duplicate field.

DIA-48209: Relation Already Exists

Cause: The relation already exists.

Action: Remove the relation.

DIA-48210: Relation Not Found

Cause: The relation was not found.

Action: Either specify a valid relation name or create one with that name.

DIA-48211: Illegal Access Mode [string] [string]

Cause: The supplied access mode is not recognized.

Action: Supply a valid mode.

DIA-48212: Open Record Access Not Done

Cause: The open record access call was not performed.

Action: The open record access call is required before attempting this call.

DIA-48213: Incorrect Access Mode for Operation [string] [string]

Cause: The relation was opened in a mode not compatible with the attempted operation being done.

Action: Reopen the relation in the correct mode.

DIA-48214: Sequence Overflow [string] [string] [string]

Cause: The sequence number will exceed the system maximum.

Action: Reset the sequence number.

DIA-48215: Sequence Invalid Operation [string] [string]

Cause: The specified sequence operation is not valid.

Action: Specify a valid operation.

DIA-48216: Field Len Exceeds Max Field Length [string] [string] [string] [string]

Cause: The field length specified exceeds the defined maximum for the field.

Action: Supply a smaller field length.

DIA-48217: Out of Space on Device

Cause: The storage subsystem is out of space.

Action: Add more space to the storage subsystem.

DIA-48218: Duplicate Key Name [string] [string]

Cause: The key name already exists.

Action: Specify a different key name.

DIA-48219: Key Name Doesn't Match Any Existing Key

Cause: The key name provided doesn't match an existing key.

Action: Specify a key name that exists.

DIA-48220: Too Many Keys Defined [string] [string]

Cause: A key is trying to be created that exceeds the maximum number of keys supported.

Action: Drop another key.

DIA-48221: Key Exceeds Maximum Allowed Length [string] [string] [string]

Cause: The sum of the lengths of the fields in the key exceeds the maximum length supported.

Action: Remove one or more fields from the key.

DIA-48222: Predicates/Order By Not Allowed

Cause: A predicate or order by can not be added after fetch has started.

Action: Put the predicate or order by call before the first fetch.

DIA-48223: Interrupt Requested - Fetch Aborted - Return Code [string] [string]

Cause: User interrupt has occurred.

Action: None

DIA-48224: DDL has occurred since parse - reparse [string] [string] [string]

Cause: Another session has performed a DDL (i.e. add field, create key, drop key) that prevents this session from being to continue.

Action: Call open record access again.

DIA-48225: No More Space in Order By Buffer

Cause: The order by buffer size is not sufficient for the number of rows.

Action: Increase the order by buffer size specified.

DIA-48226: No Fetch in Progress

Cause: An attempt to perform update or delete has occurred without a fetch.

Action: You must first perform a fetch.

DIA-48227: Invalid Relation File - [string] [string] [string] [string]

Cause: The AMS file is invalid or corrupt.

Action: Do a repair relation

DIA-48228: Missing Define Call [string]

Cause: A call to define was not performed before doing a fetch.

Action: Call the define service before fetch.

DIA-48229: Invalid Relation Handle Provided [string] [string]

Cause: An invalid or corrupt relation handle was used.

Action: Possible memory corruption.

DIA-48230: Expression arguments must match types

Cause: Incorrect type semantics for fields in the predicate.

Action: Correct the predicate.

DIA-48231: Predicate syntax error

Cause: A syntax error exists in the predicate string.

Action: Correct the predicate.

DIA-48232: Debug command syntax error [string]

Cause: An invalid debug command has been specified.

Action: Correct the debug command.

DIA-48233: Invalid Field Handle [string] [string] [string]

Cause: The field handle is invalid.

Action: Possible memory corruption.

DIA-48238: Invalid Surrogate Length Specified [string] [string]

Cause: An invalid length during create field was specified

Action: Specify a correct length

DIA-48239: Invalid Predicate Handle Provided [string] [string]

Cause: An invalid or corrupt relation handle was used.

Action: Possible memory corruption.

DIA-48240: Field is NOT NULL but NULL value supplied

Cause: A field [%s] declared to not allow nulls contains a null value.

Action: Specify a correct value

DIA-48242: Fields that are NOT NULL can not use surrogates

Cause: NOT NULL fields can not have surrogates specified.

Action: Either remove the constraint or the surrogate.

DIA-48243: Additional Fields must be declared nulls allowed

Cause: A field can not be added to a relation that is defined NOT NULL

Action: Do not specify NOT NULL

DIA-48244: Purge for Retention can't be called while in an Query

Cause: A query is already running - purge for retention can't be invoked

Action: Fix call sequence

DIA-48245: Attempt to Update/Delete when at EOF

Cause: The fetch operation is positioned at EOF - can not update/delete

Action: Do not call update/delete after fetch has returned EOF

DIA-48246: Illegal Operation on External Relation

Cause: An illegal call was made using an external relation

Action: Do not perform the API Call

DIA-48247: Predicate Conversion Error string

Cause: A time conversion failed

Action: Fix the input

DIA-48248: Function string type check error; ityp = string typ = string arg = string

Cause: Invalid inputs to the specified function

Action: Change the inputs

DIA-48251: Failed to open relation due to following error

Cause: See error below in the error stack

Action: See error below in the error stack

DIA-48252: Relation does not require migration

Cause: Relation on disk is compatible with the current code

Action: Don't run the migration services

DIA-48258: AMS Corrupt Page Found - Rebuild Relation

Cause: A corrupted page has been found.

Action: Do a rebuild of the relation

DIA-48259: AMS Relation not Created Correctly

Cause: Create relation failed

Action: Recreate the relation

DIA-48260: Function *string* not found

Cause: A reference to a function that is not valid was found

Action: Fix the function name

DIA-48262: Sequence references not allowed in predicates

Cause: References to curval or nextval not allowed

Action: Remove these references

DIA-48263: Curval not set yet - use nextval

Cause: References to curval can't occur until a nextval is done

Action: Remove the reference

DIA-48265: Incorrect number of arguments (*string*) provided - expected (*string*)

Cause: Number of arguments to function is incorrect

Action: Specify the correct number of arguments

DIA-48291: Field name *string* can't be unique resolved

Cause: Field name appears in more than one relation

Action: Prefix the field name with the relation name

DIA-48292: Can't use outer join syntax mixed with inner join syntax

Cause: The join condition was specified using both inner and outer join elements"

Action: Specify the join condition correctly

DIA-48293: Outer join syntax not allowed without a join

Cause: Using outer join syntax in the predicate without doing a join

Action: Fix the predicate

DIA-48300: Incident Record Already Exists

Cause: trying to create an incident that already exists

Action: retry operation with new incident ID

DIA-48301: An Invalid Incident ID was specified

Cause: the specified incident ID was invalid

Action: retry operation with correct incident ID

DIA-48302: Incident Directory does not exist

Cause: the incident directory was not found

Action: retry operation with a different incident ID

DIA-48303: Exceeded max Incident Sequence Value

Cause: the maximum supported incident sequence value was exceeded

Action: reset incident sequence and retry operation

DIA-48304: incident staging file not found

Cause: the incident staging file is missing

Action: retry with a different incident ID

DIA-48305: incident ID range is too large

Cause: the maximum incident sequence value was exceeded

Action: retry operation with a smaller range

DIA-48309: illegal incident state transition, [*string*] to [*string*]

Cause: the incident cannot be moved to the new state

Action: retry operation with a valid incident status

DIA-48310: Incident *string* staging file not found

Cause: the incident staging file does not exist

Action: retry operation with a valid incident ID

DIA-48311: Invalid field name [*string*]

Cause: the specified field name is invalid

Action: retry operation with a valid field name

DIA-48312: Sweep incident *string* staging file failed

Cause: the sweep action of incident staging file failed

Action: check the incident ID and retry

DIA-48313: Updates not allowed on ADR relation [*string*] of Version=*string*

Cause: Update operations not supported on this version of ADR relation

Action: check ADR version and retry

DIA-48314: Invalid ADR Control parameter [*string*]

Cause: the specified control parameter is invalid

Action: check parameter and reissue command

DIA-48315: ADR unavailable

Cause: the ADR directory is not available

Action: enable ADR and retry operation

DIA-48316: relation [*string*] unavailable or cannot be created

Cause: the ADR relation is not available

Action: check ADR directory and retry operation

DIA-48317: ADR Relation [*string*] of version=*string* is obsolete

Cause: the version of ADR relation is too old and not supported

Action: check the ADR version and retry

DIA-48318: ADR Relation [*string*] of version=*string* cannot be supported

Cause: the version of ADR relation is too new and cannot be supported

Action: need to use a newer release to access the ADR

DIA-48319: Update operation on ADR relation [*string*] not allowed

Cause: updates to foreign ADR relation cannot be supported

Action: verify ADR location and reissue command

DIA-48320: Too many incidents to report

Cause: the result set of incidents is too large to handle

Action: use a predicate to reduce the number of incidents and retry

DIA-48321: ADR Relation [*string*] not found

Cause: the required ADR relation is missing, ADR may be corrupted

Action: check ADR directory and retry

DIA-48322: Relation [*string*] of ADR V[*string*] incompatible with V[*string*] tool

Cause: the tool version is incompatible with the ADR version

Action: use another version of tool and retry

DIA-48323: Specified pathname [*string*] must be inside current ADR home

Cause: A file outside of ADR home was not allowed for this type of file.

Action: Check the file name and retry.

DIA-48324: Incompatible staging file encountered

Cause: sweep incident failed because staging file is incompatible

Action: check the incident ID and version of ADR and retry

DIA-48339: view [*string*] does not exist

Cause: view has not been created

Action: verify view name and reissue command

DIA-48340: operation not supported on view [*string*]

Cause: unsupported (dml) operation on views

Action: verify relation name and reissue command

DIA-48341: Field [*string*] not a grouping field

Cause: the field name specified is not a grouping field

Action: verify field names and groupby clause and reissue command

DIA-48342: Field [*string*] cannot be mixed with *string* fields

Cause: the specified field is incompatible with other grouping fields

Action: verify this and other field names and reissue command

DIA-48343: invalid field [*string*] reference in *string* clause

Cause: the specified field in the specified clause is invalid

Action: verify this field name and reissue command

DIA-48344: Invalid Name [*string*] specified

Cause: Either the name refers to an existing object or violates the reserved namespace rules.

Action: Pick another name

DIA-48345: Timeout encountered during operation

Cause: The attempted operation conflicted with another operation that was already being executed.

Action: Retry operation at a later time.

DIA-48400: ADRCI initialization failed

Cause: The ADR Base directory does not exist

Action: Either create an ADR Base directory or point to an existing one

DIA-48401: SET command requires arguments

Cause: No arguments are input for the SET command

Action: Input the arguments

DIA-48402: Variable is not defined

Cause: No substitution value is input.

Action: Input the substitution value following after the variable name.

DIA-48403: DEFINE or UNDEFINE command has no arguments

Cause: DEFINE and UNDEFINE command need users to input the substitution variable name.

Action: Input the variable name after the keyword DEFINE or UNDEFINE

DIA-48404: RUN or @ command has no arguments

Cause: RUN and @ commands need users to input script filename

Action: Input script filename after RUN and @ commands

DIA-48405: The option in the command is invalid

Cause: The option is not allowed in the command

Action: Check the command syntax

DIA-48406: ECHO or TERMOUT status must be set to ON or OFF

Cause: the status of ECHO and TERMOUT commands must be ON or OFF

Action: input ON or OFF

DIA-48407: DESCRIBE and QUERY commands need at least relation name argument

Cause: This is no relation name is input as argument

Action: Need users to input at least the relation name

DIA-48408: The incident number exceeds the maximum number [string]

Cause: The input incident number exceeds the maximum number

Action: Input fewer incidents

DIA-48409: The ADR homes exceed the maximum number [string]

Cause: The input ADR homes number exceeds the maximum number

Action: Input shorter ADR home string

DIA-48410: The trace path exceeds the maximum number [string]

Cause: The input trace path exceeds the maximum number

Action: Input less trace path

DIA-48411: The trace files exceed the maximum number [string]

Cause: The input trace file path number exceeds the maximum number

Action: Input less trace file path

DIA-48412: The parameters exceed the maximum number [string]

Cause: The input parameter number exceeds the maximum number

Action: Input fewer parameters

DIA-48413: The number of orderby fields exceeds maximum number [string]

Cause: The orderby field number exceeds the maximum number

Action: Input fewer fields

DIA-48414: The string in the execution option exceeds maximum length [string]

Cause: The string length is too long

Action: Divide the commands into two sets or use adrci scripts.

DIA-48415: Syntax error found in string [string] at column [string]

Cause: Parsing error found in the user input string

Action: Validate the input string

DIA-48419: Illegal arguments

Cause: The input argument is illegal

Action: Check the input arguments and make sure it is not null

DIA-48421: Predicate string in the command must be single or double quoted

Cause: The predicate string is not single or double quoted

Action: Put single or double quotes around the predicate string

DIA-48423: IMPORT command must have a filename

Cause: File name is missing from the command

Action: Input the import file name after the IMPORT keyword

DIA-48424: SHOW TRACE command needs argument

Cause: SHOW TRACE command needs arguments

Action: Input arguments

DIA-48426: The initialization filename is too long

Cause: The initialization filename length exceeds the maximum length

Action: This is really an internal setting parameter of the ADRCI, report it as a bug. Alternatively move the initialization file to the current working directory

DIA-48428: Input command string exceeds max length [*string*]

Cause: The current command string is too long and exceeds the limit

Action: Input less characters

DIA-48429: Variable name [*string*] is an invalid identifier

Cause: The substitution variable name is not a valid identifier

Action: Input the valid identifier defined by ADRCI

DIA-48431: Must specify at least one ADR home path

Cause: The command syntax requires at least one ADR home path to be input

Action: Check the command syntax and input the home path

DIA-48432: The ADR home path [*string*] is not valid

Cause: The adr home user inputs is not valid, which may due to the path does not exist.

Action: Check if the input home path exists

DIA-48433: Unknown help topic

Cause: The input topic is unknown

Action: Check if the topic is valid

DIA-48434: No DDE commands are input

Cause: No DDE commands are input

Action: Input a DDE command

DIA-48435: Input a trace file

Cause: Show trace expects a trace file

Action: Input a trace file

DIA-48436: File [string] does not exist

Cause: the file does not exist

Action: Validate the trace file name

DIA-48437: No IPS commands are input

Cause: No IPS commands are input

Action: Input a IPS command

DIA-48438: [string] is not a valid number

Cause: The input number is not valid

Action: Check the input number

DIA-48439: The input path name exceeds the maximum length [string]

Cause: The input path name is too long

Action: Report as a bug to change the limit

DIA-48440: Variable [string] is already defined

Cause: The variable name is defined previously

Action: Use another variable name

DIA-48441: The function parameter number exceeds the maximum number [string]

Cause: The function parameter number exceeds the maximum number

Action: Report it as bug to change the maximum number

DIA-48442: The number of control parameters exceeds the maximum allowed [string].

Cause: The control parameters exceeded the maximum number allowed.

Action: Check the parameters. If the parameters are correct, contact Oracle Support Services.

DIA-48443: Trace Record type appears in the middle of the path

Cause: The trace record cannot be in the middle of the path

Action: Validate the input

DIA-48444: The single "." and "*" cannot appear in the middle of the path

Cause: The single "." and "*" appears in the middle of the path

Action: Validate the input

DIA-48445: Path expression only supports one bucket dump type

Cause: The path expression only supports one bucket dump"

Action: Change the path expression syntax

DIA-48446: The command needs path input

Cause: No path is input as a parameter

Action: Input the path

DIA-48447: The input path [*string*] does not contain any ADR homes

Cause: The input path does not contain ADR homes

Action: Validate the path

DIA-48448: This command does not support multiple ADR homes

Cause: There are multiple homes in the current adr setting.

Action: Use command SET HOMEPATH to set a single home

DIA-48449: Tail alert can only apply to single ADR home

Cause: There are multiple homes in the current setting

Action: Use command SET HOMEPATH to set a single home

DIA-48457: ADRCI core dumped

Cause: It is adrci internal error.

Action: Report to Oracle

DIA-48458: "show incident" failed due to the following errors

Cause: There could be a bug or users do not have the access permission

Action: Report to Oracle if the errors are not due to ADR permission settings

DIA-48459: "describe" command only supports one ADR home path

Cause: Multiple ADR home paths in the command

Action: put one ADR home path

DIA-48460: The home path [*string*] is not valid

Cause: The input home path is not valid home path

Action: Verify the homedir

DIA-48461: "describe" failed due to the following errors

Cause: Underlying code failed

Action: If it is not due to permission issue, report to Oracle

DIA-48462: Fatal error encountered in [*string*]

Cause: Fatal error encountered

Action: Report to Oracle

DIA-48463: The value buffer reached the maximum length [*string*]

Cause: The value buffer is full

Action: Report to Oracle

DIA-48464: The predicate buffer reached the maximum length [*string*]

Cause: The predicate buffer is too small

Action: Report to Oracle

DIA-48465: The specified type [*string*] is undefined

Cause: The purge type specified is undefined

Action: Check the type name

DIA-48466: Internal failure, the report context is not initialized

Cause: Internal problem failure.

Action: Report to Oracle

DIA-48467: "*string*" for the keyword "*string*" is not a valid number

Cause: The keyword value is not a valid number

Action: Check the value

DIA-48468: "*string*" is not a valid keyword

Cause: The keyword is not defined for the command

Action: Check the available keywords

DIA-48469: Keyword "*string*" cannot be duplicated

Cause: The command can only allow one key with the name

Action: Remove one keyword name from the command

DIA-48470: Unknown "*string*" command

Cause: The command is not valid

Action: Use help manual to check the command syntax

DIA-48472: Invalid product name

Cause: The product name provided does not exist

Action: Specify a product name, see HELP SHOW BASE

DIA-48473: Internal failure, unknown return code [*string*]

Cause: Internal program failure

Action: Report to Oracle

DIA-48474: Syntax error specifying product, must not be NULL

Cause: The product clause is being used, but no product name is provided

Action: Supply the product name

DIA-48475: [*string*] is not a valid timestamp

Cause: The input timestamp string is not in valid format

Action: None

DIA-48476: Cannot write the results out to a file, please check if \nthe environment variable TMPDIR is set or the current directory is \nnot writable

Cause: The current path may not be writable

Action: If the current path is writable, report to Oracle

DIA-48477: The input path does not contain any valid ADR homes

Cause: The input path does not contain any valid ADR homes

Action: Check the path if it is valid

DIA-48478: No alert messages are created

Cause: No alert messages are created

Action: No action

DIA-48479: No HM runs are created

Cause: There is no hm runs

Action: No action

DIA-48480: No incidents are created

Cause: There is no incident

Action: No action

DIA-48481: Report is not available

Cause: The requested report does not exist"

Action: Check the report ID

DIA-48482: Report is not generated

Cause: The requested report is not ready to be generated

Action: Check the report ID

DIA-48483: Spooling failed, it may be because the spool file cannot be created due to a permission issue

Cause: The spooling filename may not be valid or the file cannot be created

Action: Check the permissions of the target directory and verify the filename

DIA-48484: Run script failed, it may be because the script file does not exist

Cause: The script file may not exist

Action: Check if the script file exist

DIA-48485: The file exceeds the maximum length [*string*]

Cause: The filename is too long

Action: Report to Oracle

DIA-48486: The file [*string*] exceeds the maximum length [*string*]

Cause: The filename is too long

Action: Report to Oracle

DIA-48487: The internal predicate string exceeds the maximum length [*string*]

Cause: The predicate string exceeds the maximum length

Action: Report to Oracle

DIA-48488: The predicate string exceeds the maximum length [*string*]

Cause: The input predicate string exceeds the maximum length

Action: Report to Oracle

DIA-48489: The input exceeds the maximum length [string]

Cause: The input exceeds the maximum length

Action: Report to Oracle

DIA-48490: The field number exceeds the maximum number [string]

Cause: The input field number exceeds the maximum number

Action: Input less field names

DIA-48491: The program name is too long, exceeds the maximum length [string]

Cause: the program name length exceeds the maximum length setting

Action: Report to Oracle

DIA-48492: The report component name is not defined

Cause: the report component name does not exist

Action: Check the component name to ensure it is registered

DIA-48493: Sweep command needs parameters

Cause: sweep command needs parameter

Action: Check the syntax of the command

DIA-48494: ADR home is not set, the corresponding operation cannot be done

Cause: The adr home is not set in the current adrci session

Action: Set the adr home using the adrci command "set base" and "set homopath"

DIA-48495: Interrupt requested

Cause: User requested to interrupt the current action

Action: No action is needed

DIA-48496: "string" is a mandatory keyword for the command

Cause: The keyword is not specified for the command

Action: Input the keyword

DIA-48497: "string" is an invalid product type

Cause: The product type is not registered

Action: Check the product type

DIA-48499: The value of the keyword "string" exceeds the maximum length string

Cause: The keyword value is too long

Action: Check the limit and input again

DIA-48500: File Write Error [string] [string]

Cause: Number of bytes written differs from number requested. Possibly due to out of disk space.

Action: Ensure sufficient disk space.

DIA-48501: File Read Error [string] [string]

Cause: Number of bytes read differs from number requested. Possibly due due to corrupted file.

Action: Recreate the file.

DIA-48502: Invalid Command Line - Missing Required Elements

Cause: Missing required command line arguments.

Action: Review the help message and supply the required arguments.

DIA-48503: Invalid Parameter Specified

Cause: Invalid input parameter supplied.

Action: Review the help message and correct the invalid input parameter.

DIA-48504: Relation Parameter Must be Specified

Cause: Relation parameter must be specified during ADR export.

Action: Supply the relation parameter.

DIA-48505: File Parameter Must be Specified

Cause: File parameter must be specified during ADR import.

Action: Supply the file parameter.

DIA-48506: Existing Relation at different version than export [string] [string]

Cause: Attempting to import into an existing relation and the schema version of that relation differs from the schema of the relation that was exported.

Action: Drop the existing relation if you still wish to import the relation.

DIA-48507: Predicate Not Allowed during Import

Cause: The predicate option is not allowed during ADR import.

Action: Remove the predicate argument.

DIA-48508: Export File Version [string] Can Not be Used by Import [string]

Cause: The version of the export file is not able to be read by this version of ADR import.

Action: Rerun the export using the current version of ADR export.

DIA-48509: Error occurred during operation. See the following errors

Cause: An underlying error has occurred.

Action: Review and correct the underlying error.

DIA-48510: Can not export an in memory relation

Cause: In memory relations can not be exported.

Action: Pick a different relation.

DIA-48600: HM run with name [string] already exists

Cause: The specified run name already existed.

Action: Specify different run name and re-run the check

DIA-48615: Parameter [*string*] value not specified

Cause: Run was invoked without specifying the parameter and its value

Action: Specify the needed parameter and its value

DIA-48618: Invalid HM run name specified

Cause: An invalid Health Monitor (HM) run name was specified.

Action: Specify a HM run name using only alphanumeric and underscore characters.

DIA-48800: "*string*" for the keyword "*string*" is not in the right format of timestamp

Cause: The value format is not right

Action: Check the format ADRCI supports

DIA-48801: The option "*string*" is duplicated

Cause: The option has been specified more than once

Action: Check the input

DIA-48802: The options "%0!*s*" and "%1!*s*" are mutually exclusive.

Cause: An attempt was made to specify the two options together.

Action: Specify only one of the options.

DIA-48803: The keyword "*string*" is not defined for this command

Cause: The keyword is invalid

Action: Check the valid keywords for the command

DIA-48804: The command needs at least one file input

Cause: No files are specified to view

Action: Input the files

DIA-48805: BEGIN BACKUP issued already - must do an END BACKUP first

Cause: A begin backup was already issued.

Action: Issue END BACKUP

DIA-48806: Unknown Function Reference (*string*)

Cause: The function reference is not a valid function

Action: Change the reference

DIA-48807: The SET subcommand requires at least one additional parameter

Cause: An argument was not specified for the SET subcommand.

Action: Specify additional arguments or precede the command with help.

DIA-48808: malformed SET CONTROL command - see "HELP SET CONTROL"

Cause: Improper syntax was specified for the SET CONTROL command.

Action: Specify additional arguments or use the HELP SET CONTROL command for more information.

DIA-48809: The number of estimate parameters exceeds the maximum allowed [string].

Cause: The estimate parameters exceeded the maximum number allowed.

Action: Check the parameters. If the parameters are correct, contact Oracle Support Services.

DIA-48810: malformed ESTIMATE command - see "HELP ESTIMATE"

Cause: Improper syntax was specified for the ESTIMATE command.

Action: Specify additional arguments or use the HELP ESTIMATE command for more information.

DIA-48900: Illegal Input Argument [string]

Cause: The input argument is invalid

Action: Check the input parameter

DIA-48906: Parser context is not valid

Cause: The parser context is not initialized

Action: Call the initialization routine first before using the context

DIA-48907: The end of file is reached

Cause: The end of file is reached

Action: Handle the end of file

DIA-48908: No trace files are found

Cause: This is no file in the navigator context, either it is done with parsing, or no file is pushed

Action: Check if the file is added to the context

DIA-48909: Scan context is not initialized

Cause: The scan context is not initialized

Action: call the initialization routine of the scan context

DIA-48912: The specified trace filename is too long

Cause: The resulting trace filename length exceeds the maximum length

Action: Use a smaller trace filename suffix or move ADR higher in the directory hierarchy

DIA-48913: Writing into trace file failed, file size limit [string] reached

Cause: An attempt was made to write into a trace file that exceeds the trace's file size limit

Action: increase the trace's file size limit.

DIA-48914: File position is not in right format

Cause: The file position format is not right

Action: Check if the file format string is the right one

DIA-48928: The predicate exceeds the max limit *string*

Cause: The predicate is too long, exceeds the max limit

Action: Use a shorter predicate

DIA-48929: The trace record size exceeded the max size that can be read [*string*]

Cause: A trace record is too large to be read by the ADR viewer

Action: Report to Oracle

DIA-48930: Cannot allocate memory for processing traces

Cause: A memory allocation request failed

Action: Report to Oracle

DIA-48934: invalid input for the file name identifier

Cause: An invalid input was given for the file name identifier. The file name is not allowed to have slashes (" /") and is not allowed to refer to the parent directory using the '..' characters.

Action: Check the file name and provide a valid input.

DIA-48936: The number of relations exceeds maximum number [*string*]

Cause: Too many relations listed

Action: Reduce the number

DIA-48937: Feature (*string*) currently not allowed for SELECT

Cause: Feature is not allowed

Action: Remove feature

DIA-48938: View select column count differs from select alias list

Cause: The view alias list has a different number of fields than the select list"

Action: Change the alias list or view select statement

DIA-48939: Select * not allowed in a CREATE VIEW

Cause: * is currently not allowed for a create view select list

Action: List the fields explicitly

DIA-49000: A vertex variable has the same name as an edge variable.

Cause: A vertex variable was specified with the same name as an edge variable.

Action: Use a different name for the vertex and edge variables.

DIA-49001: A singleton variable has the same name as a group variable.

Cause: A singleton variable was specified with the same name as a group variable.

Action: Use a different name for the singleton and group variables.

DIA-49002: Grouped variables contained in different quantified path patterns have the same name.

Cause: Two group variables contained in different quantified path patterns had the same name.

Action: Use a different name for group variables in different quantified path patterns.

DIA-49003: Using a question mark in path pattern is not supported.

Cause: A question mark was specified in the path pattern expression in the MATCH clause of a GRAPH_TABLE operator.

Action: Modify the path pattern specification and retry the operation.

DIA-49004: Two consecutive vertex patterns are specified in the path pattern.

Cause: Two consecutive vertex patterns were specified in the path pattern expression in the MATCH clause of a GRAPH_TABLE operator.

Action: Modify the path pattern specification and retry the operation.

DIA-49315: Invalid incident type specified [string]

Cause: The specified incident type is not defined in this ADR.

Action: Specify an available incident type.

DIA-49316: required environment variable not set [string]

Cause: The required environment variable was not set.

Action: Set the required environment variable.

DIA-49317: Action cannot be run in read-only database instance.

Cause: The database was not opened in read/write mode.

Action: Open the database in read/write mode.

DIA-49318: action cannot be run, database not available

Cause: The action could not connect to the database.

Action: Open the database.

DIA-49320: database error when executing action [string]

Cause: A database error occurred while executing the action.

Action: Review the database error.

DIA-49404: No such package [string]

Cause: The specified package does not exist.

Action: Specify an existing package.

DIA-49405: Cannot change package name [string] [string]

Cause: Attempted to change package name after package generation.

Action: Use current name, or create a new package with the desired name.

DIA-49406: Undefined configuration parameter specified [string]

Cause: The specified configuration parameter was not found in ADR.

Action: Specify an existing parameter. Re-populate parameters if necessary.

DIA-49407: No unpacking history in this home

Cause: No packages were unpacked into this home.

Action: Verify the current home. Unpack a package if necessary.

DIA-49408: Invalid home specified [string]

Cause: An invalid ADR_HOME was specified.

Action: Verify that the directory exists, and has the correct structure.

DIA-49409: Incremental package provided when complete expected

Cause: No packages were unpacked into this home.

Action: Provide a complete package, or use FORCE option.

DIA-49410: Not an IPS package

Cause: The specified file was not an IPS package.

Action: Verify that the file is a valid zip file with expected contents.

DIA-49412: Package ID does not match existing ID [string] [string]

Cause: The package ID in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49413: Package name does not match existing name [string] [string]

Cause: The package name in package file did not match previously unpacked packages.

Action: Use the correct location for unpacking the package.

DIA-49414: Package sequence later than expected [string] [string]

Cause: The package sequence in package file was later than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49415: Package sequence earlier than expected [string] [string]

Cause: The package sequence in package file was earlier than expected.

Action: Apply packages in correct order, or use FORCE option.

DIA-49416: Earlier package sequence applied with FORCE option [string] [string]

Cause: An earlier package sequence was applied using the FORCE option.

Action: Apply a complete sequence which is later than any already applied, or use FORCE option to apply an incremental package.

DIA-49417: Cannot modify already generated package

Cause: Attempted to change package attributes after package generation.

Action: Create a new package with the desired name.

DIA-49418: Invalid package name specified

Cause: An invalid Incident Packaging Service (IPS) package name was specified.

Action: Specify a package name using only alphanumeric and underscore characters.

DIA-49420: Package too large [string] [string]

Cause: The package is too large.

Action: Remove some files or incidents from the package, or try using incremental mode.

DIA-49421: Maximum number of package files generated [string]

Cause: The command generated the maximum number of package files.

Action: Remove some files or incidents from the package, or use incremental mode to generate additional files.

DIA-49423: File outside ADR not allowed

Cause: The specified file is not within the ADR directory structure.

Action: Specify a file inside ADR.

DIA-49424: Directory outside ADR not allowed

Cause: The specified directory is not within the ADR directory structure.

Action: Specify a directory inside ADR.

DIA-49425: File inside ADR not allowed

Cause: The specified file is within the ADR directory structure.

Action: Specify a file outside ADR.

DIA-49426: Directory inside ADR not allowed

Cause: The specified directory is within the ADR directory structure.

Action: Specify a directory outside ADR.

DIA-49427: No such file or file not accessible [string]

Cause: The specified file does not exist or cannot be accessed.

Action: Create the file or verify file permissions.

DIA-49428: No such directory or directory not accessible [string]

Cause: The specified directory does not exist or cannot be accessed.

Action: Create the directory or verify directory permissions.

DIA-49429: File already exists and OVERWRITE option not specified [string]

Cause: The client attempted to create a file that already exists.

Action: Either remove the file or use the OVERWRITE option.

DIA-49430: No such problem [string]

Cause: The specified problem does not exist.

Action: Specify a problem that exists in this repository.

DIA-49431: No such incident [string]

Cause: The specified incident does not exist.

Action: Specify an incident that exists in this repository.

DIA-49432: Problem not part of package [string]

Cause: The specified problem is not included in the package.

Action: Specify a problem that is included in the package.

DIA-49433: Incident not part of package [string]

Cause: The specified incident is not included in the package.

Action: Specify an incident that is included in the package.

DIA-49434: Invalid date format

Cause: An invalid format was used to specify a date

Action: Specify the date in a supported format.

DIA-49435: Flood-controlled incident not allowed here [string]

Cause: A flood-controlled incident cannot be included in a package

Action: Specify an incident that is not flood-controlled

DIA-49436: Date conversion error [string]

Cause: An invalid format was used to specify a date

Action: Specify the date in a supported format.

DIA-49440: Warnings while unpacking package, details in file string

Cause: There were some non-fatal errors when unpacking a package

Action: Review the specified unpacking log file

DIA-49441: Warnings while finalizing package, details in file string

Cause: There were some non-fatal errors when finalizing a package

Action: Review the specified finalize log file

DIA-49450: Non-zero return code from archiving utility [string] [string]

Cause: The archiving utility (zip/unzip) returned a warning or error.

Action: Verify that the file and directory exist and are readable, and that the file is a valid zip file.

DIA-49451: Archive file structure error [string] [string]

Cause: The archiving utility (zip/unzip) returned an error indicating that the archive file structure is incorrect.

Action: Verify that the file was transferred correctly and that the file is a valid zip file.

DIA-49452: Archiving utility out of memory [string] [string]

Cause: The archiving utility (zip/unzip) returned an error indicating that it was unable to allocate enough memory.

Action: Check for operating system limitations on process memory usage.

DIA-49453: Invalid command invoking archiving utility [string] [string]

Cause: The archiving utility (zip/unzip) was invoked with an invalid command line, or with invalid options.

Action: Verify that there are no operating system settings affecting the behavior of the archiving utility..

DIA-49454: Archive is missing or empty [string] [string]

Cause: The specified archive does not exist, or is empty.

Action: Check if the specified archive exists.

DIA-49455: Archive I/O failed [string] [string]

Cause: An attempt to create, write to or read from an archive failed.

Action: Verify that operating system I/O operations are working correctly.

DIA-49456: Operation failed due to insufficient disk space [string] [string]

Cause: An operation on an archive failed due to insufficient disk space.

Action: Verify that there is sufficient disk space. Check for operating system quotas or other restrictions.

DIA-49601: syntax error: found "string": expecting one of: "string" etc..

Cause: Syntax error discovered when processing event specification

Action: Enter correct event specification

DIA-49701: Parameter string is NULL.

Cause: NULL was passed to a function that requires a non-NULL parameter.

Action: Pass a valid non-NULL parameter.

DIA-49702: unable to allocate 'string' bytes of external procedure call memory

Cause: An attempt to allocate memory in a C external procedure failed due to insufficient memory.

Action: Try the operation again.

DIA-49703: invalid ADR service name

Cause: A NULL or undefined Automatic Diagnostic Repository (ADR) service name was specified.

Action: Specify a valid ADR service name.

DIA-49704: invalid incident ID

Cause: A NULL or nonpositive incident ID was specified.

Action: Specify a valid ADR incident ID.

DIA-49800: ADR block file [string] could not be opened using direct I/O

Cause: An error was encountered when attempting to open an Automatic Diagnostic Repository (ADR) block file using O_DIRECT. The system automatically retries the open without using O_DIRECT.

Action: No action is required.

DIA-49802: missing read, write, or execute permission on specified ADR home directory [string]

Cause: The specified Automatic Diagnostic Repository (ADR) home directory did not have the correct permissions.

Action: Check the read, write, and execute permissions on the specified ADR home directory.

DIA-49803: Purge not possible due to incompatible schema version.

Cause: The Automatic Diagnostic Repository (ADR) found on disk was different from the version in the library.

Action: Start the product to migrate automatically or use the ADRCI utility command MIGRATE SCHEMA.

DIA-49804: cannot modify ADR PDB parameter *string*

Cause: An attempt was made to alter the Automatic Diagnostic Repository (ADR) pluggable database (PDB) - only parameters from a non-consolidated database or root container of a consolidated database.

Action: ADR PDB parameters cannot be altered from non-consolidated database or root container of a consolidated database. Switch to a PDB to perform the operation.

DIA-49900: cannot modify parameter *string*

Cause: An attempt was made to alter the parameter from a non-consolidated database or pluggable database.

Action: The parameter can only be altered in the root container of a consolidated database.

DIA-51001: check [*string*] not found in HM catalog

Cause: checker name might have been misspelled

Action: retry running check with proper checker name

DIA-51003: run parameters not formatted correctly

Cause: Run parameters were given in a wrong format

Action: Correct the run params text and try again

DIA-51004: Check doesn't take any input params

Cause: run params were passed to the check, which doesn't take any inputs

Action: don't pass any run params and try again

DIA-51006: unexpected delimiter ';' in the run params text

Cause: run params were not properly formatted.

Action: correct the run params format and try again

DIA-51007: parameter [*string*] not registered with this check

Cause: Wrong inputs were given to this check.

Action: correct the run params and try the check again

DIA-51008: parameter [*string*] value is not a proper number

Cause: the given parameter value is a not a proper number

Action: correct the run params and try again

DIA-51025: check name should be non NULL value

Cause: NULL value was passed for check name

Action: give a proper check name and retry again

DIA-51035: invalid timeout value

Cause: User specified an invalid timeout value

Action: n/a

DIA-51036: check [string] can only be executed in database instance

Cause: An attempt was made to run database-specific check in ASM environment

Action: Don't run the check in ASM environment

DIA-51037: check [string] can only be executed in ASM instance

Cause: An attempt was made to run ASM-specific check in a database environment

Action: Don't run the check in database environment

DIA-51102: cannot change priority of a critical failure string

Cause: An attempt was made to change priority of a failure with CRITICAL priority.

Action: No action is required.

DIA-51103: cannot change priority of a closed failure string

Cause: An attempt was made to change priority of a closed failure.

Action: No action is required.

DIA-51105: cannot change priority of a failure to CRITICAL

Cause: An attempt was made to change priority of a failure to CRITICAL.

Action: No action is required.

DIA-51106: check failed to complete due to an error. See error below

Cause: While executing the check, an unexpected error occurred.

Action: Check the errors below and try rerunning the check.

DIA-51107: failures are changing too rapidly - retry command

Cause: Failures were added or closed during a Data Recovery Advisor command.

Action: Retry the command.

DIA-51108: unable to access diagnostic repository - retry command

Cause: A lock or timeout error occurred when trying to read failure or repair data from the Automatic Diagnostic Repository.

Action: Retry the command.

DIA-51109: repair script file is too large

Cause: Data Recovery Advisor generated a repair script file that was too large.

Action: Retry the command with fewer failures selected.

DIA-51110: buffer size [string] is too small - [string] is needed

Cause: An internal buffer was too small.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51111: failure revalidation timed out

Cause: Data Recovery Manager was unable to revalidate all failures before timing out.

Action: Increase timeout and retry the command.

DIA-51190: Internal error [*string*], [*string*] from DBMS_IR

Cause: An unexpected error occurred while executing a routine in the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51191: Too many files opened

Cause: Data Recovery Advisor attempted to open too many files using the DBMS_IR package.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51192: File not open

Cause: Data Recovery Advisor attempted to read or write from a file that was not open.

Action: This is an internal error. Contact Oracle Support Services.

DIA-51193: invalid parameter value

Cause: An invalid parameter value was supplied in a call to the DBMS_IR package.

Action: Fix the parameter value and retry the call.

DIA-51303: illegal check mask value specified

Cause: An illegal check mask value was specified.

Action: Specify one of the following legal values: COLUMN_CHECKS, ROW_CHECKS, REFERENTIAL_CHECKS, or ALL.

DIA-51316: No check meta-data found on specified table *string*

Cause: No check meta-data was found for the object

Action: Table may not exist or no checks currently defined for the table

DIA-51700: Invalid file URL

Cause: A URL with invalid syntax was provided, either directly to the function or through an XML IMPORT or INCLUDE.

Action: Check the URL.

DIA-51701: Invalid file URL or path prefix

Cause: Either a URL or path prefix with invalid syntax was provided.

Action: Check the URL.

DIA-51702: Could not find file at URL provided

Cause: The file requested could not be found in the given location.

Action: Check the URL provided.

DIA-51703: Missing *body* tag from HTML

Cause: An HTML document was passed to the function missing its *body* tag.

Action: Check the HTML source.

DIA-51704: Error *string* received from XPath engine

Cause: An error was received from the XPath library during an XPath operation.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

DIA-51705: XML *string* error: *string "string"*

Cause: An error was received from an underlying XDK API and is being resigalled.

Action: Check xmlerr.h to understand the cause of the error and correct the relevant client code.

DRG-10000 to DRG-52404

DRG-10000: failed to read column *string.string*

Cause: Error during read of specified text column

Action: check existence and privs of column

DRG-10001: can not access result table *string*

Cause: specified table does not exist or server does not have write privileges

Action: check result table

DRG-10002: can not insert into result table

Cause: text server is not privileged to insert, tablespace exhausted

Action: check privileges and tablespace

DRG-10011: invalid object name *string*

Cause: a table, column or procedure name specified had an invalid format. It is either too long or contains illegal characters. Probably you are passing in incorrect parameters.

Action: check parameter values

DRG-10015: id exceeds limit(2147483642) of a number

Cause: the limit of an id is 2147483642

Action: use an id with value 214748364 or under

DRG-10016: you must be the owner to modify this object

Cause: you tried to modify an object which you do not own

Action: have the owner modify the object

DRG-10017: you must be *string* to do this: *string*

Cause: you tried to modify an object which you have no privilege

Action: have the owner modify the object

DRG-10018: Insufficient Privilege(s)

Cause: you tried to perform an action which you have no privilege(s)

Action: get the required privilege(s)

DRG-10019: Alter Session Set Current_Schema is not honoured by this API

Cause: Alter Session Set Current_Schema is not honoured by this API

Action: Explicitly specify the Current_Schema as part of the object name

DRG-10020: invalid access to internal API

Cause: you tried to access to an internal API, which is not open to public

Action: avoid access to the internal API

DRG-10100: invalid argument found: *string*

Cause: invalid command argument was specified

Action: check the documentation for the legal arguments and re-execute the command

DRG-10101: no value for argument: *string*

Cause: this argument requires value(s)

Action: re-execute the command with the correct argument value(s)

DRG-10102: mandatory argument missing: *string*

Cause: this argument is mandatory

Action: re-execute the command and specify the argument

DRG-10103: illegal value for argument: *string*

Cause: an illegal value was passed to this argument

Action: check the documentation for the legal values for this argument

DRG-10200: invalid server personality mask: *string*

Cause: the specification for the server personality mask is invalid

Action: check the documentation and specify the correct mask

DRG-10202: server failed to register

Cause: the server failed to register itself with the data dictionary

Action: look at the next error on the stack

DRG-10203: server named *string* does not exist

Cause: update was called with the name of a server that does not exist

Action: correct the name of the server

DRG-10204: server update failed

Cause: the attempt to update the server failed

Action: look at the next error on the stack

DRG-10205: server deregister failed

Cause: the attempt to deregister the server from the data dictionary failed

Action: look at the next error on the stack

DRG-10206: failed to perform recovery for a server or client

Cause: Contact oracle support

Action: Contact oracle support

DRG-10301: timed out waiting for responses from servers

Cause: Not enough servers are running to handle the current system load, and a large backlog of commands has accumulated; perhaps no servers are running. This

message could also indicate an internal error where one of the servers has crashed trying to process a given request

Action: Check that enough servers are running, and that they are processing commands of the correct type. For instance, a DDL command might timeout if all the servers are setup to exclusively process query commands. Also, check the server log files.

DRG-10302: interrupted waiting for responses from servers

Cause: User interrupted the request before it was completed

Action: Restart the request

DRG-10303: could not queue given commands to be processed

Cause: The given command or commands could not (all) be queued. This could indicate an extremely high system load, but it is more likely an internal error.

Action: Check if any servers are running to process the command.

DRG-10304: unexpected error sending command(s) to Oracle Text server

Cause: There was an unexpected error sending command(s) to server

Action: Call customer support.

DRG-10305: pipe *string* is full

Cause: Could not send command to pipe, because the pipe was full

Action: Check if any servers are running to process the commands on that pipe

DRG-10306: server terminated unexpectedly while processing command

Cause: The server shutdown during execution of your command. This could be caused by a shutdown abort, or by an internal error in the server.

Action: If the server terminated had an internal error, contact customer support.

DRG-10307: no servers running

Cause: Could not process command because no servers are running with the correct personality mask.

Action: Start some servers with correct personality mask.

DRG-10308: no server with the required *string* personality mask is running

Cause: Could not process command because no servers are running with the correct personality mask.

Action: Start some servers with correct personality mask.

DRG-10309: not enough job queue processes

Cause: Could not process command because no servers with the correct personality mask are running.

Action: increase the JOB_QUEUE_PROCESSES initialization parameter or reduce the parallel degree for this statement.

DRG-10310: servers were shutdown before processing request

Cause: The command could not be completed because the servers were shut down or terminated before processing the request.

Action: Start another server with the correct personality mask.

DRG-10311: remote send not supported

Cause: You tried to specify a database link in an index specification

Action: Specify only local index names

DRG-10312: logfile name must be specified

Cause: You tried to start logging without specifying a logfile name

Action: Specify a logfile name

DRG-10313: logging has already been started

Cause: You tried to start logging even though logging has already been started

Action: Stop logging first, or ignore

DRG-10314: logging has not been started

Cause: You tried to stop logging even though logging has not been started

Action: Start logging first, or ignore

DRG-10315: logging is not supported on MTS

Cause: You tried to start logging on MTS

Action: n/a

DRG-10500: CREATE_INDEX failed: column spec *string*

Cause: failed to create text index on the specified column

Action: See the next errors on stack and take appropriate action

DRG-10501: invalid stopword: *string*

Cause: The stopword specified could be lexed into multiple tokens with current lexer preference

Action: Check lexer preference and Respecifies the stopword

DRG-10502: index *string* does not exist

Cause: the specified index does not exist or you do not have access to it.

Action: Specify an existing index

DRG-10503: table *string* cannot be indexed because it has no primary key

Cause: a textkey needs to be a single column unique key whose length does not exceed 64 bytes. no such key was defined as an unique index or declared as a primary or unique key constraint

Action: create a suitable textkey for the table or specify it explicitly in this procedure call

DRG-10504: primary key is required when using the DETAIL_DATASTORE

Cause: you tried to use the detail datastore to index a table with no primary key constraint

Action: add a primary key constraint on the table

DRG-10505: TRANSACTIONAL parameter not supported for NDATA

Cause: NDATA sections do not support the TRANSACTIONAL parameter

Action: Remove the TRANSACTIONAL parameter when creating the index

DRG-10506: table does not exist: *string*

Cause: The table, view, or synonym specified does not exist. There may also be a permissions problem reading the table.

Action: Reinvoke the operation with the correct table name

DRG-10507: duplicate index name: *string*

Cause: the specified index already exists in the dictionary

Action: this index can be updated or deleted, however this is only allowed if there is no text index available on the text column

DRG-10508: TRANSACTIONAL parameter not supported for JSON INDEX

Cause: JSON search index does not support TRANSACTIONAL parameter

Action: remove the parameter transactional for creating the index

DRG-10509: invalid text column: *string*

Cause: the column specified is not valid

Action: check that the followings are valid: a) text column is of supported datatype b) valid table name, column name in the specification.

DRG-10510: stopword is missing

Cause: The stopword to be added was not specified.

Action: Specify the stopword

DRG-10511: index *string* does not exist or is incomplete

Cause: index creation is not complete

Action: create index before performing this operation

DRG-10512: TRANSACTIONAL parameter not supported for CONTEXT SEARCH INDEX

Cause: CONTEXT search index does not support TRANSACTIONAL parameter

Action: remove the parameter transactional for creating the index

DRG-10513: index *string* metadata is corrupt

Cause: dictionary contains bad preferences for this index

Action: contact you DBA

DRG-10514: cannot create index with RIO\$ prefix

Cause: user attempted to create an index whose name is prefixed with RIO\$

Action: create index using a different index name

DRG-10515: Combination of parameters '*string*' and '*string*' is not supported

Cause: Parameters are incompatible.

Action: Remove either one of the parameters to allow index creation.

DRG-10516: failed to perform DDL operation due to an Oracle error

Cause: the ddl operation requested has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10517: index *string* is already valid

Cause: The index was in a valid state and did not need the requested operation.

Action: Check the requested operation

DRG-10518: an operation is in progress which conflicts with *string* request

Cause: another session is operating on this index. it could be: a) DML is requested and DDL is in progress or b) DDL is requested and DML is in progress operation on the index

Action: try again later

DRG-10519: Shadow Index is not supported for 'search index'

Cause: attempt to create a shadow index on 'search index'

Action: use ctxsys.context instead

DRG-10520: failed to drop index: *string*

Cause: Failed to drop index on the specified index

Action: see the Oracle error on the stack and take the appropriate action

DRG-10521: Operation not supported with *string* on a *string* Index

Cause: The operation uses a feature not supported for index type

Action: Do not specify this feature for this index type

DRG-10525: missing REBUILD keyword

Cause: all Oracle Text alter index options require the REBUILD keyword

Action: specify alter index with the REBUILD keyword

DRG-10528: primary keys of type *string* are not allowed

Cause: you tried to create an index on a table with an illegal primary key datatype

Action: change the textkey to one of the followings: VARCHAR2, NUMBER, VARCHAR, DATE, CHAR, MLSLABEL

DRG-10531: parallel parameter must be > 0

Cause: you called create index with parallel = 0

Action: specify with value > 0

DRG-10532: table is not partitioned

Cause: you called parallel create index on non-partitioned table

Action: recreate the table with partitions or remove the PARALLEL clause

DRG-10533: invalid user name: *string*

Cause: you specified a user name that is invalid

Action: specify the correct user name

DRG-10535: failed to optimize text index *string*

Cause: the optimize operation requested has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10536: Storage cannot be altered at index-level for partitioned indexes.

Cause: Alter-index operation was used to modify storage at index-level.

Action: For partitioned indexes alter storage at partition-level.

DRG-10549: length of the object name *string* exceeded the limit

Cause: object name has exceeded the maximum length of 30 bytes

Action: Reduce the length of the object name if you want to re-create it

DRG-10550: illegal syntax for index, preference, source or section name

Cause: name may have additional periods(.)

Action: check the syntax of the name

DRG-10553: illegal syntax for column specification *string*

Cause: column specification may have additional periods(.)

Action: check the syntax of column specification if you want to re-create it

DRG-10561: index *string* is not valid for requested operation

Cause: The index was not in a valid state due to some prior error.

Action: Drop index and create index again.

DRG-10562: missing alter index parameter

Cause: The parameter string was missing

Action: Provide correct parameter string with regard to the requested alter index operation.

DRG-10569: table or column does not exist: *string*

Cause: The table, view, synonym or column specified does not exist. There may also be a permissions problem reading the table.

Action: Reinvoke the operation with the correct table name or column name

DRG-10573: index *string* is obsolete

Cause: you specified an obsolete index

Action: perform `upgrade_index` on the index

DRG-10574: failed to upgrade text index *string*

Cause: the upgrade operation has failed because of an Oracle error

Action: see the Oracle error on the stack and take the appropriate action

DRG-10579: must provide text query criteria

Cause: text query criteria is mandatory

Action: provide text query criteria

DRG-10581: indirect datastores cannot be used with long or lob text columns

Cause: You tried to create an index on a long or lob column using an indirect datastore such as the file or url datastores

Action: Use direct datastore or a varchar column

DRG-10582: column *string* does not exist in table *string*

Cause: you specified an invalid column

Action: specify valid column

DRG-10583: TRUNCATE INDEX failed: *string*

Cause: Failed to truncate index

Action: See the next errors on stack and take appropriate action

DRG-10584: failed to *string string string* due to an Oracle error

Cause: a DDL operation on an index object failed due to SQL error

Action: see following error

DRG-10594: *string* feature not supported for *string* Index

Cause: feature not supported for index type

Action: Do not specify this feature for this index type

DRG-10595: ALTER INDEX *string* failed

Cause: failed to alter index

Action: See the next errors on stack and take appropriate action

DRG-10596: *string* feature not supported for *string* Search Index

Cause: Specified feature not supported for the index being created

Action: Do not specify this feature

DRG-10597: invalid rebuild online operation

Cause: REBUILD ONLINE is not supported for requested operation.

Action: Alter index without the online option.

DRG-10598: invalid parallel operation

Cause: PARALLEL is not supported for requested operation.

Action: Alter index without the parallel option

DRG-10599: column is not indexed

Cause: The column specified is not indexed.

Action: Create index on the column before performing this operation

DRG-10600: Optimization encountered ORA-01555 error

Cause: Optimization ran into the snapshot too old error.

Action: Increase undo tablespace

DRG-10601: failed to remove pending DML for this index

Cause: The system could not remove triggers setup to monitor updates to the requested table

Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10602: failed to queue DML change to column *string* for primary key *string*

Cause: The system could not record that a change had been made to the given column

Action: See next error on stack to determine course of action. Call Oracle support if necessary. Until this error is fixed, updates to all text columns in the given table may not be indexed.

DRG-10606: server failed to access the DML Queue

Cause: The server had an error accessing the DML Queue

Action: See next error on stack.

DRG-10607: index meta data is not ready yet for queuing DML

Cause: the meta data for the index has not been created yet

Action: retry the DML operation

DRG-10608: rowid to primary key mapping not available in base table

Cause: Procedural replication is on and no rowid to primary key mapping available in base table

Action: Modify base table to include a primary key

DRG-10609: cannot encode composite key with more than 16 columns

Cause: Cannot encode composite key with more than 16 columns

Action: Modify base table to have composite key with less than 16 columns

DRG-10610: Procedure not supported with Procedural replication on: *string*

Cause: This procedure is not supported when Procedural replication is on

Action: Turn off procedural replication to execute this procedure

DRG-10611: Unexpected DML operation for rowid: *string*

Cause: Sync on commit has encountered an unexpected sequence of DML operations

Action: Re-try DML operations.

DRG-10612: error occurred during sync-on-commit

Cause: An indexing error occurred during sync on-commit indexing

Action: Identify the reasons for the errors reported in the stack

DRG-10613: sync on-commit internal error

Cause: Sync on-commit encountered an unexpected error

Action: Attempt to solve the underlying errors or contact customer support

DRG-10700: preference does not exist: *string*

Cause: the preference name specified does not exist

Action: retry with the correct preference name

DRG-10701: preference *string.string* already exists

Cause: the specified preference already exists

Action: must drop the preference if you want to re-create it.

DRG-10702: cannot create or modify preference in another user's schema

Cause: you tried to create a preference for another user

Action: owner or CTXSYS or a user who has CTXADMIN role should create preference

DRG-10703: invalid framework object *string*

Cause: you specified an invalid object type

Action: use a valid framework object

DRG-10704: preference *string* does not have an attribute named *string*

Cause: you tried to set value for a invalid attribute (not supported by the object).

Action: specify the correct attribute name

DRG-10705: invalid value *string* for attribute *string*

Cause: you tried to set an illegal value for an attribute

Action: specify the correct attribute value for the datatype of the attribute

DRG-10706: length of *string* exceeds maximum size of *string*

Cause: Parameter is too many bytes

Action: Correct preference setting and resubmit

DRG-10707: a value is required for attribute *string* of preference *string*

Cause: A required attribute was not provided

Action: Correct preference setting and resubmit

DRG-10708: invalid class id *string* for preference *string*

Cause: the specified class id is not correct for the specified preference

Action: specify the correct class id

DRG-10709: this preference is referenced by *string* and cannot be dropped

Cause: the specified preference is used as part of another preference and cannot be dropped until the referring preference is modified

Action: modify the referring preference

DRG-10710: Invalid value *string* for *string* attribute

Cause: Invalid value provided for save_copy attribute It should be one of these: (PLAINTEXT, FILTERED, NONE)

Action: Provide correct SAVE_COPY attribute value

DRG-10711: Invalid value for SAVE_COPY attribute: *string*

Cause: Invalid value provided for SAVE_COPY attribute. It should be a boolean value

Action: Provide boolean value for SAVE_COPY attribute

DRG-10712: preference *string* already has value for an attribute named *string*

Cause: Cannot call set_sec_grp_attr for an attribute whose value is already set in a preference

Action: Call add_sec_grp_attr_val to add an additional value for attribute

DRG-10713: preference *string* does not have any value for attribute named *string*

Cause: Cannot call add_sec_grp_attr_val for an attribute without calling set_sec_grp_attr for the same attribute

Action: Call set_sec_grp_attr to set value for attribute and then call add_sec_grp_attr_val to add an additional value for attribute

DRG-10714: cannot add or remove value for attribute named *string*

Cause: Cannot call add_sec_grp_attr_val or rem_sec_grp_attr_val for a boolean attribute

Action: Do not call add_set_grp_attr_val or rem_sec_grp_attr_val for a boolean attribute. Use set_sec_grp_attr and unset_sec_grp_attr instead.

DRG-10715: preference *string* has incompatible values for *string* and *string*

Cause: Cannot set related attributes to incompatible values

Action: Set or add a compatible value for related attributes

DRG-10716: invalid prefix_ns_mapping attribute value *string*

Cause: Value of prefix_ns_mapping is neither of the form xmlns:pxf="ns" nor of the form xmlns="ns"

Action: Call rem_sec_grp_attr_val to remove this prefix_ns_mapping attribute value.

DRG-10717: incompatible index settings

Cause: Invalid combination of PATH_SECTION_GROUP, DATAGUIDE attribute and NEVER_POPULATE

Action: Use a valid combination of PATH_SECTION_GROUP, DATAGUIDE attribute and NEVER_POPULATE

DRG-10718: operation not supported with NEVER_POPULATE

Cause: Operation is not supported with NEVER_POPULATE index option

Action: Operation is not supported with NEVER_POPULATE index option

DRG-10719: Value of stage_itab_max_rows can only be either 0 or >=1000

Cause: Invalid value for stage_itab_max_rows

Action: Provide correct value for stage_itab_max_rows

DRG-10720: Syntax only supported with JSON data type or constraint: *string*

Cause: The syntax was invalid.

Action: Simplified syntax is only supported with constraints.

DRG-10721: ALTER INDEX does not support this operation

Cause: ALTER INDEX supported only with JSON_ENABLE and IS JSON constraint. Any degradation of the index state is not supported either.

Action: Ensure constraints are met. To degrade index state, drop and recreate the index

DRG-10722: *string* is a desupported preference

Cause: creating a preference which was desupported

Action: refer to documentation for valid preferences

DRG-10723: *string* option cannot be enabled

Cause: An ALTER INDEX statement attempted to modify an option that is exclusive to JSON or XML Search Indexes.

Action: Remove the option from the PARAMETERS clause.

DRG-10724: invalid transition to SEARCH_ON *string*

Cause: An attempt was made to rebuild an index with a SEARCH_ON option that degrades the index state.

Action: ALTER INDEX REBUILD with the SEARCH_ON option can only upgrade the index state. To degrade the index, drop and recreate the index.

DRG-10750: unknown parameter *string*

Cause: Unrecognized parameter

Action: Specify correct parameter

DRG-10751: invalid value for parameter

Cause: Wrong data type or out of range

Action: Specify correct parameter value

DRG-10752: DEFAULT_INDEX_MEMORY cannot be greater than MAX_INDEX_MEMORY

Cause: You tried to set DEFAULT_INDEX_MEMORY to a value higher than the maximum set in MAX_INDEX_MEMORY

Action: Specify a lower value

DRG-10753: invalid size (in bytes) *string string*

Cause: You specified an incorrectly formatted size string

Action: Specify a correctly formatted size string

DRG-10754: Size (in bytes) must be between *string* and *string*

Cause: You specified size (in bytes) which is outside the allowed range

Action: Specify size (in bytes) within the allowed range

DRG-10755: *string* and *string* have characters in common

Cause: the join character sets cannot have characters in common

Action: Correct the attribute values and resubmit

DRG-10756: neither text indexing nor theme indexing has been selected

Cause: INDEX_TEXT and INDEX_THEMES preferences both cannot be FALSE.

Action: Set either of INDEX_TEXT or INDEX_THEMES or both to TRUE.

DRG-10757: stoplist cannot have more than 4096 stopwords

Cause: a stoplist cannot have more than 4096 stopwords. This includes stopthemes.

Action: none required

DRG-10758: index owner does not have the privilege to use file or URL datastore

Cause: index owner does not have the Text Datastore Access Privilege

Action: grant index owner the Text Datastore Access Privilege

DRG-10759: invalid role

Cause: the role does not exist in the database

Action: check the role name or create the role

DRG-10760: illegal format for procedure name

Cause: the procedure name specified is invalid. For instance, it may have a semicolon

Action: check the procedure name

DRG-10761: procedure *string* does not exist

Cause: the specified procedure could not be found

Action: check input. Try a fully-specified format such as OWNER.OBJECT

DRG-10762: index owner does not have access to procedure *string*

Cause: the index owner does not have execute privilege on the specified procedure

Action: grant index owner execute permission on the procedure

DRG-10763: value *string* is not a valid character set

Cause: the value specified for the filename_charset attribute of the file datastore is not a valid character set name

Action: specify a valid Oracle character set name

DRG-10765: stoplist cannot have more than 250 stopclasses with stoppatterns

Cause: a stoplist cannot have more than 250 stopclasses with stoppatterns. This does not include NUMBERS stopclass.

Action: none required

DRG-10766: Wildcard Index is not supported for *string* Index

Cause: Wildcard Index is not Supported for CTXCAT/CTXRULE index

Action: Do not use Wildcard Index with CTXCAT/CTXRULE index

DRG-10767: Specified datastore is not supported on the policy

Cause: Using a datastore not supported on the policy for inmemory text

Action: Use a valid datastore: Direct, Directory or Network

DRG-10768: num_themes must be greater than zero

Cause: Providing a number less than zero for num_themes parameter

Action: Provide a valid positive integer for num_themes

DRG-10769: token_type is not supported for this operation

Cause: chosen token_type is not supported for this operation

Action: chosen token_type is not supported for this operation

DRG-10800: query failed: *string string string*

Cause: Failed to process the query

Action: Check the errors on stack and take appropriate action

DRG-10801: cannot create an SQE for another user

Cause: You tried to create an SQE for another user

Action: Remove owner from SQE name specification

DRG-10816: display/highlight call failed

Cause: See the next error on the stack.

Action: See the next error on the stack.

DRG-10817: CONTAINS term consists of stopword or phrase of stopwords: *string*

Cause: One or more terms within a CONTAINS query consist of just a stopword or a phrase of just stopwords

Action: Replace the stopword or use stopwords within phrases containing non-stopwords.

DRG-10819: could not open contains cursor

Cause: An error occurred while trying to open a contains cursor

Action: See accompanying error messages in the stack

DRG-10820: invalid contains cursor id

Cause: You tried to fetch or close a contains cursor with an id which does not exist.

Action: Review fetch or close invocation

DRG-10821: contains cursor is not open

Cause: You tried to fetch from a contains cursor which was not open.

Action: Open cursor first

DRG-10822: duplicate query name

Cause: You tried to create a stored query with a name already used.

Action: Use different name

DRG-10823: invalid query name

Cause: The query name specified is not valid

Action: Check the query name

DRG-10825: stored query does not exist: *string*

Cause: The specified stored query does not exist.

Action: Check the query name

DRG-10826: no document with the specified textkey is found

Cause: There is no document with the specified textkey.

Action: Check the textkey

DRG-10827: open_con must be performed before count_last

Cause: last_count returns hit from in-memory query,so an in-memory query must be run before you can use count_last

Action: execute open_con before run count_last

DRG-10828: token *string* is longer than maximum length for column *string*

Cause: A token to be inserted in the feedback table is longer than the maximum allowed column size.

Action: Modify the query, or the column size for feedback table, or feedback procedure arguments accordingly.

DRG-10829: feedback id *string* is longer than the maximum length of *string* bytes

Cause: Feedback id is longer than the maximum allowed length for the feedback_id column.

Action: Use a smaller feedback_id.

DRG-10830: SHARELEVEL is not 0 or 1

Cause: You specified a sharelevel which is not 0 or 1

Action: Use sharelevel equal to 0 or 1 only.

DRG-10831: can not insert into feedback table *string*

Cause: Not privileged to insert.

Action: Check privileges.

DRG-10832: can not delete from feedback table *string*

Cause: Not privileged to delete.

Action: Check privileges.

DRG-10833: feedback failed

Cause: Failed to process feedback request

Action: Check the errors on stack and take appropriate action

DRG-10834: upper-case form of section name *string* too long

Cause: upper-case form of the section name is longer then supported length

Action: reduce length of section name when adding section

DRG-10835: WITHIN operator not supported for theme index

Cause: WITHIN operator used in theme index query

Action: Rewrite query without WITHIN operator

DRG-10836: field section and attribute section can not be nested

Cause: A field section or a attribute section is specified in a nested section search

Action: Rewrite query without nested field sections

DRG-10837: section *string* does not exist

Cause: The given section name does not exist in USER_SECTIONS

Action: Rewrite query with valid section name

DRG-10838: invalid SPAN argument supplied to NEAR

Cause: An invalid value was supplied for SPAN argument to NEAR

Action: Provide a valid SPAN. Valid values are integers from 0 to 100.

DRG-10839: invalid ORDER argument supplied to NEAR

Cause: An invalid value was supplied for ORDER argument to NEAR

Action: Provide a valid ORDER. Valid values are T, TRUE, F, FALSE (case insensitive).

DRG-10840: CONTAINS predicate including 0 is not supported by FIRST_ROWS hint

Cause: User attempts to issue a query with CONTAINS predicate including 0 while giving FIRST_ROWS hint.

Action: remove FIRST_ROWS hint.

DRG-10841: invalid SCORE argument supplied to FUZZY

Cause: An invalid value was supplied for SCORE argument to FUZZY

Action: Provide a valid SCORE. Valid values are integers from 1 to 80.

DRG-10842: invalid NUMRESULTS argument supplied to FUZZY

Cause: An invalid value was supplied for NUMRESULTS argument to FUZZY

Action: Provide a valid NUMRESULTS. Valid values are integers from 0 to 5000.

DRG-10843: invalid WEIGHT argument supplied to FUZZY

Cause: An invalid value was supplied for WEIGHT argument to FUZZY

Action: Set WEIGHT to WEIGHT or NOWEIGHT.

DRG-10844: index cannot execute this structured predicate efficiently

Cause: You specified a combination of condition and order by columns in a catsearch query which cannot be executed by the index's index set efficiently

Action: n/a

DRG-10845: column *string* is not indexed

Cause: You specified a column in a condition or order by which is not part of the ctxcat index

Action: n/a

DRG-10846: order by columns must be all ascending or all descending

Cause: You specified an order by clause which has some columns ascending and some descending. This is not currently supported by catsearch

Action: n/a

DRG-10847: catsearch requires prefix index for this type of query

Cause: For efficient execution of this Vgram query, we require presence of a prefix index.

Action: create a prefix index

DRG-10848: invalid structured clause

Cause: you have specified an invalid structured clause

Action: n/a

DRG-10849: catsearch does not support functional invocation

Cause: the query plan for your query is invoking a catsearch operator functionally rather than as an index rowsource. The catsearch operator does not support functional invocation

Action: add optimizer hints so that all catsearch operators are performed through index scans

DRG-10850: CTXRULE indextype does not support the operator

Cause: Used an operator not supported by CTXRULE. Currently it only supports AND, NEAR, phrase, NOT, WITHIN, OR, ABOUT, EQUIVALENCE, STEM and THESAURUS operators

Action: Rewrite query without this operator

DRG-10851: Invalid grammar *string* specified for query template

Cause: incorrect grammar specification

Action: Rewrite query specifying valid grammar name

DRG-10852: Invalid scoring type *string* specified for query template

Cause: incorrect scoring type specification

Action: Rewrite query specifying valid scoring type (integer/float)

DRG-10853: Catsearch does not support this operator

Cause: unsupported operator specified

Action: Rewrite query using valid operators

DRG-10854: Invalid scoring algorithm *string* specified for query template

Cause: incorrect scoring algorithm specification

Action: Rewrite query specifying valid scoring algorithm (default/count)

DRG-10855: CTXRULE indextype does not support the token type

Cause: Unsupported VGRAM token type 1.

Action: n/a

DRG-10856: SDATA section *string* does not exist

Cause: The given SDATA section name does not exist in USER_SECTIONS

Action: Rewrite query with valid SDATA section name

DRG-10857: literal is not compatible with the data type of the SDATA section

Cause: The given literal is not compatible with the data type of the specified SDATA section.

Action: Rewrite query with a compatible literal

DRG-10858: SDATA operator is not allowed in WITHIN

Cause: A field section or a attribute section is specified in a nested section search

Action: Rewrite query without nested field sections

DRG-10859: Only one predefined scoring component can be used in DEFINESCORE

Cause: More than one predefined scoring component (i.e. RELEVANCE, OCCURRENCE, etc.) is used in the scoring expression of the DEFINESCORE operator

Action: Rewrite query using only one predefined component

DRG-10860: All expressions under the same WITHIN must use the same predefined scoring component

Cause: The query side of the same within mixes different types of scoring components(i.e. RELEVANCE, OCCURRENCE, etc.)

Action: Rewrite query using only one type of predefined component

DRG-10861: COMPLETION score must be used with WITHIN operator

Cause: The completion score is used without using the WITHIN operator

Action: Rewrite query to include a within operator

DRG-10862: *string* attribute cannot be used with CTXRULE indexes

Cause: Used an attribute not supported by CTXRULE. This restriction is due to lack of wildcard support for CTXRULE indexes.

Action: Rewrite query without this attribute

DRG-10863: invalid ORDER argument supplied to NDATA

Cause: An invalid value was supplied for ORDER argument to NDATA

Action: Set ORDER to ORDER or NOORDER.

DRG-10864: invalid PROXIMITY argument supplied to NDATA

Cause: An invalid value was supplied for PROXIMITY argument to NDATA

Action: Set PROXIMITY to PROXIMITY or NOPROXIMITY.

DRG-10865: invalid datatype in user scoring expression

Cause: The scoring expression specified in DEFINESCORE or NORMALIZATION_EXPR in the query template either contains components with unsupported datatypes or does not return numerical values.

Action: Rewrite the scoring expression.

DRG-10866: The right hand operand of MINUS cannot use IGNORE score

Cause: The IGNORE score is used as the right hand operand of MINUS

Action: Rewrite the scoring expression.

DRG-10867: OCCURRENCE and COMPLETION score cannot be used with ABOUT in DEFINESCORE

Cause: The OCCURRENCE and COMPLETION score cannot be used with ABOUT queries

Action: Rewrite the scoring expression.

DRG-10868: matches does not support functional invocation

Cause: the query plan for your query is invoking a matches operator functionally rather than as an index rowsource. The matches operator does not support functional invocation

Action: add optimizer hints so that all matches operators are performed through index scans

DRG-10869: Invalid span supplied to NEAR2 operator

Cause: Near2 span must be between 0 and 100

Action: Use acceptable span

DRG-10870: Invalid weight supplied to NEAR2 operator

Cause: Near2 weights must be between 0 and 10

Action: Use acceptable weight

DRG-10871: NDATA operator not supported with *string*

Cause: NDATA operator is not supported in the specified operation

Action: Rewrite the query without NDATA operator

DRG-10872: Characters cannot be outside *string* in an XML query

Cause: Characters outside *query* element are not valid

Action: Write the characters inside *querytextquery*

DRG-10873: Invalid characters location in the XML query

Cause: Characters between certain elements are not allowed

Action: Write the characters in designed places

DRG-10874: Syntax error in XML Query Template

Cause: XML template is wrong. Possible causes include missing closing tag or receiving invalid attributes or characters.

Action: Check that the query is valid XML

DRG-10875: Missing closing tag in XML Query

Cause: Some tag has been opened and not closed properly.

Action: Close all tags properly

DRG-10876: Invalid ordering of elements in XML Query

Cause: Occurrence of some element that should be only between another element that was not found

Action: Check the proper ordering of elements

DRG-10877: *query* should always start an XML Query

Cause: Either *query* is missing or is wrongly positioned

Action: Insert *query* properly

DRG-10878: Invalid ordering in XML Query: *string* should be *string of string*

Cause: Invalid ordering of tags as of specs

Action: Rewrite query properly

DRG-10879: Invalid *string* element repetition in XML Query

Cause: Invalid repetition of XML element

Action: Rewrite query, merging both repeated elements

DRG-10880: Invalid nesting of *string* in XML Query

Cause: Invalid nesting of same element has been encountered

Action: Either close element properly or avoid nesting

DRG-10881: Invalid setting of *savescore* in *ctxfiltercache*

Cause: *savescore* argument must be true or false

Action: set *savescore* to true or false

DRG-10882: Invalid setting of *topn* in *ctxfiltercache*

Cause: *topn* argument must be true or false

Action: set *topn* to true or false

DRG-10883: *savescore* must be true to use *topn* in *ctxfiltercache*

Cause: *savescore* must be true to use *topn* in *ctxfiltercache*

Action: set *savescore* to true to use *topn* processing

DRG-10884: invalid use of *ctxfiltercache* with *topn*

Cause: *ctxfiltercache* with *topn* must be child of AND, THRESHOLD, or WEIGHT operators

Action: invalid query

DRG-10885: *ctxfiltercache* operator requires non-zero *query_filter_cache_size*

Cause: used *ctxfiltercache* operator with zero *query_filter_cache_size*

Action: Set a non-zero *query_filter_cache_size*

DRG-10886: *topn* must be used with *order by score desc* in *ctxfiltercache*

Cause: must order query results by score desc when *topn* argument is true

Action: Add *order by score desc* and use oracle hint DOMAIN_INDEX_SORT

DRG-10891: invalid MINREQD argument supplied to NEAR

Cause: An invalid value was supplied for MINREQD argument to NEAR

Action: Provide a valid MINREQD. Valid values are integers from 0 to 63.

DRG-10892: invalid THRESHOLD argument supplied to NDATA

Cause: An invalid value was supplied for the THRESHOLD argument to NDATA.

Action: Set the THRESHOLD to a value between 1-100 inclusive.

DRG-10894: Missing regular expression in PATTERN

Cause: The syntax is PATTERN(regex). regex is missing.

Action: Supply the regular expression

DRG-10895: Invalid regular expression in PATTERN

Cause: The syntax of the regular expression is incorrect

Action: Correct the regular expression

DRG-10896: Regular expression specifies empty string in PATTERN

Cause: The expression ^\$ has no match.

Action: Correct the regular expression

DRG-10897: Regular expression matches too many words

Cause: The regular expression matches too many words.

Action: Correct the regular expression

DRG-10898: ctxfiltercache is not supported with optimized for *string* SDATA

Cause: Used ctxfiltercache operator with unsupported SDATA.

Action: Do not use ctxfiltercache operator with this kind of SDATA.

DRG-10900: out of memory

Cause: can not allocate more memory

Action: Contact your system administrator

DRG-10901: memory deallocation failed

Cause: could not deallocate memory

Action: Contact your system administrator

DRG-11000: invalid keyword *string*

Cause: A keyword was invalid.

Action: Respecify the parameter string with correct keyword

DRG-11001: missing keyword when expecting one of *string*

Cause: A keyword was missing.

Action: Respecify the parameter string with keyword

DRG-11002: missing value for *string*

Cause: A value for the argument was missing.

Action: Respecify the parameter string with value

DRG-11003: invalid value *string* for *string*

Cause: An invalid value was given for the argument

Action: Specify a valid value

DRG-11004: duplicate or conflicting value for *string*

Cause: More than one value has been specified for the argument

Action: Check parameter string and correct the problem parameter

DRG-11005: invalid create index parameter string

Cause: the supplied parameter string is not correct

Action: drop index and recreate index with correct parameters

DRG-11006: invalid alter index parameter string

Cause: The parameter string was invalid.

Action: Reissue the statement with the correct parameter string.

DRG-11007: multiple stopwords specified

Cause: Tried to add more than one stopword

Action: Specify one stopword at a time

DRG-11008: invalid create index partition parameter string

Cause: The parameter string was invalid

Action: drop index and recreate index with correct parameters

DRG-11009: parameter *string* is not supported at the partition level

Cause: The parameter is not supported at the partition level during index creation and index alteration

Action: try specifying the parameter at index level

DRG-11010: operator *string* is not supported for JSON

Cause: The operator is not supported for JSON

Action: do not use the operator in your query

DRG-11100: unable to connect to the database

Cause: failed to connect to Oracle database

Action: check the Oracle error and connect string

DRG-11101: failed to open file *string*

Cause: failed to open a file

Action: check whether the file exist or access permission available

DRG-11102: assigned lexer can not operate on *string* language setting

Cause: Single byte lexer selected in multibyte language setting

Action: check RDBMS language setting or text columns lexer setting

DRG-11104: Oracle Text error:

Cause: See the next error on stack

Action: See the next error on stack

DRG-11106: user database session has terminated during this operation

Cause: this database session does not exist or has terminated

Action: determine why the user database session terminated while the operation was still being carried out.

DRG-11107: invalid path specification: *string*

Cause: the path specified is not valid

Action: check the path specification

DRG-11108: invalid filename specified: *string*

Cause: the filename specified is not valid

Action: check the filename for beginning or trailing spaces, invalid characters, or other such problems.

DRG-11109: assigned lexer does not support *string* query operator

Cause: This lexer does not support this query operator

Action: do not use the operator in your query

DRG-11111: value of *string* must be between *string* and *string*

Cause: You specified a value for the parameter which is out of range

Action: Specify a value which is in the allowed range

DRG-11112: length of *string* exceeds maximum of *string*

Cause: You specified a value for the parameter which is too long

Action: Specify a value which is less than or equal to the maximum length

DRG-11113: value of *string* must be one of *string*

Cause: You specified a value for the parameter which is invalid

Action: Specify a valid value for the parameter

DRG-11114: result table format is not correct for this operation

Cause: You specified a result table which has the wrong number, type, or names of columns for this operation.

Action: Check result table. Refer to the documentation for the correct format for each operation

DRG-11115: a value for *string* must be specified

Cause: You did not specify a value for the parameter

Action: Specify a value for the parameter

DRG-11116: value of *string* must be less than or equal to value of *string*

Cause: You specified values for the two parameters which are invalid

Action: Specify valid values for the parameters

DRG-11117: name is already used by an existing object

Cause: You tried to create an object whose name conflicts with an object of that type which already exists

Action: Specify a new name

DRG-11118: object *string* does not exist

Cause: You tried to modify or drop an object which does not exist

Action: Specify correct object name

DRG-11119: operation is not supported by this index type

Cause: You tried to invoke an operation on an index which is not supported by the index type

Action: n/a

DRG-11120: failed to write to file *string*

Cause: failed to write to a file

Action: check whether the file exist or access permission available

DRG-11121: failed to read from file *string*

Cause: failed to read from a file

Action: check whether the file exist or access permission available

DRG-11122: unsupported section group

Cause: unsupported section group is specified for functional contains

Action: change the section group to NULL_SECTION_GROUP

DRG-11123: theme indexing is not supported

Cause: theme indexing is on in the lexer preference for functional contains

Action: turn off theme indexing

DRG-11124: invalid value *string*

Cause: you specified an invalid value

Action: specify a valid value

DRG-11125: invalid format of existing log file *string*

Cause: the file specified by START_LOG already exists, and is not a previously written log file

Action: specify a new file, or remove the existing file

DRG-11126: context index is empty

Cause: the training table is empty or the context index of training table is not populated

Action: populate the training table or context index

DRG-11127: inconsistent index policy with trained rule

Cause: the ctxrule index policy is inconsistent with the policy in which the rule was trained

Action: change the ctxrule index policy

DRG-11128: invalid format of rule

Cause: the rule format is not valid for this operation

Action: check the rule type and operation type

DRG-11129: the rule table is empty

Cause: the rule table is empty

Action: populate the rule table by training

DRG-11130: no data found in the collection

Cause: feature preparation program can not find any feature in the specified collection

Action: check the setting for extracting features.

DRG-11131: Error from Oracle XML parser: *string*

Cause: The Oracle XML parser reported an error

Action: Check the document for the error, and fix if necessary

DRG-11132: Invalid character in logfile name

Cause: The logfile parameter to CTX_OUTPUT.START_LOG or CTX_OUTPUT.START_QUERY_LOG contains an invalid character (such as a forward slash)

Action: Remove the invalid character

DRG-11133: failed to convert a datetime value [*ora-number*]

Cause: Failed to convert the datetime value.

Action: Check the error code

DRG-11134: The file *string* is currently being used for logging by another process

Cause: The file is currently being used by another process.

Action: Give a different file name.

DRG-11135: feature not generally available

Cause: You tried to use a feature not generally available.

Action: Contact customer support

DRG-11136: assigned lexer does not support entity extraction

Cause: This lexer does not support entity extraction

Action: Do not use this lexer for entity extraction

DRG-11137: tracing is not supported on MTS

Cause: you tried to use ctx_output tracing in an MTS session

Action: connect using a dedicated session and retry the operation

DRG-11138: trace *string* is already enabled

Cause: you tried to enable a trace that is already enabled

Action: disable the trace first

DRG-11139: trace *string* is not enabled

Cause: you tried to disable a trace that is not enabled

Action: enable the trace first

DRG-11140: Section *string* is not MDATA

Cause: you tried to perform MDATA operation on non-mdata section

Action: provide correct mdata section name

DRG-11141: CTX_DDL.REMOVE_MDATA() and CTX_DDL.ADD_MDATA() not allowed for MDATA Section *string*

Cause: you tried to call CTX_DDL.REMOVE_MDATA() or CTX_DDL.ADD_MDATA() on a MDATA section which is created with ALLOW_ADD_REM parameter set to FALSE.

Action: do not call CTX_DDL.REMOVE_MDATA() or CTX_DDL.ADD_MDATA() on a MDATA section that is created with ALLOW_ADD_REM parameter set to FALSE.

DRG-11142: *string* cannot be *string*

Cause: The value for the specified parameter cannot be as specified

Action: Specify the correct value

DRG-11143: Only 64 errors can be traced

Cause: You tried to trace more than 64 errors with ctx_output

Action: Trace fewer errors, or use DRG_DUMP_ALL_ERRORS

DRG-11144: Invalid value for radius parameter: *string*

Cause: You specified invalid value for radius parameter

Action: Provide non-negative/non-decimal value for radius parameter

DRG-11145: Invalid value for max_length parameter: *string*

Cause: You specified invalid value for max_length parameter

Action: Provide non-negative/non-decimal value for max_length parameter

DRG-11146: Invalid value for use_saved_copy: *string*

Cause: You specified invalid value for use_saved_copy parameter

Action: Use one of these: SAVE_COPY_FALLBACK / SAVE_COPY_ERROR / SAVE_COPY_IGNORE

DRG-11147: Invalid lexer for ctx_doc.policy_stems

Cause: You specified/used a lexer which does not support ctx_doc.policy_stems

Action: Use auto lexer for ctx_doc.policy_stems

DRG-11148: Invalid lexer for ctx_doc.policy_noun_phrases

Cause: You specified/used a lexer which does not support ctx_doc.policy_noun_phrases

Action: Use auto lexer for ctx_doc.policy_noun_phrases

DRG-11149: Invalid lexer for ctx_doc.policy_part_of_speech

Cause: You specified/used a lexer which does not support ctx_doc.policy_part_of_speech

Action: Use auto lexer for ctx_doc.policy_part_of_speech

DRG-11150: Reverse Index feature not enabled

Cause: Feature not enabled

Action: Enable Reverse Index feature

DRG-11151: Invalid value for max_inst in sentiment procedure

Cause: Sentiment procedure called with an invalid max_inst value.

Action: Specify a max_inst value in the range of 1 to 10.

DRG-11152: Invalid value for type attribute in sentiment procedure

Cause: An invalid type attribute value was specified.

Action: Specify the type as either EXACT or ABOUT.

DRG-11153: classifier string does not exist

Cause: The specified classifier did not exist.

Action: Provide the name of an existing classifier.

DRG-11154: topic cannot be null

Cause: The specified topic was null for a non-aggregate sentiment request.

Action: Specify a non-null topic or use an aggregate request.

DRG-11155: Invalid Lexer for Default Sentiment Classifier

Cause: The specified lexer is not supported for the Default Sentiment Classifier.

Action: Use auto lexer for Default Sentiment Classifier.

DRG-11156: user buffer too small

Cause: The user buffer is too small for the output data.

Action: Specify a bigger buffer.

DRG-11157: dataguide is not supported on MTS

Cause: you tried to create a dataguide enabled index in an MTS session

Action: connect using a dedicated session and retry the operation

DRG-11158: Only Path or NULL Section Group are allowed for inmemory text

Cause: you tried to use an invalid section group for inmemory text

Action: use a valid section group

DRG-11159: JSON_ENABLE must be TRUE for inmemory text

Cause: Path Section Group must have json_enable true for inmemory text

Action: set json_enable to true

DRG-11160: Basic Lexer with index_themes is not allowed for inmemory text

Cause: Using a Basic Lexer with index_themes

Action: Remove index_themes from the Basic Lexer

DRG-11161: Filter is not supported for inmemory text

Cause: Using an invalid Filter for inmemory text

Action: Only NULL Filter is supported

DRG-11162: Wordlist is not supported for inmemory text

Cause: Using an invalid Wordlist for inmemory text

Action: Only NULL Wordlist is supported

DRG-11163: JSON Dataguide flush failed

Cause: An internal error prevented JSON Dataguide information from being flushed to disk

Action: Review the other errors and contact Oracle Support

DRG-11164: Operator *string* is not supported with in-memory text index.

Cause: Using an operator that is not supported for in-memory text index.

Action: Don't use the operator on in-memory text index.

DRG-11165: Invalid Section Group with *string* Datastore for In-Memory Text.

Cause: When using Directory or Network Datastore, only NULL_SECTION_GROUP is allowed

Action: Change the policy's section group to NULL_SECTION_GROUP

DRG-11166: Using JSON_ENABLE preference on an invalid column type.

Cause: An attempt was made to use Section Group's JSON_ENABLE preference on a non-JSON column.

Action: Do not use JSON_ENABLE preference on a non-JSON column.

DRG-11203: INSO filter not supported on this platform

Cause: You tried to use the INSO filter on a platform which does not support it

Action: Do not use the INSO filter

DRG-11204: user filter command is too long

Cause: The user filter command must be 32 characters or less

Action: Specify a shorted user filter command

DRG-11205: user filter command contains illegal characters

Cause: The user filter command cannot contain special characters such as slashes, parentheses, semicolons, etc.

Action: Correct command specification

DRG-11206: user filter command *string* could not be executed

Cause: The user filter command could not be executed.

Action: Check that the command exists in \$ORACLE_HOME/ctx/bin, and that it is executable.

DRG-11207: user filter command exited with status *string*

Cause: The user filter command exited with the given error status.

Action: See any DRG-11220, DRG-11221, DRG-11222, DRG-11223, DRG-11224, DRG-11225, or DRG-11227 error message on the error stack otherwise see error status.

DRG-11208: ORACLE_HOME is not set

Cause: ORACLE_HOME is not set

Action: make sure ORACLE_HOME is set when running ctxsrv

DRG-11209: filename for *string* exceeds maximum length of *string*

Cause: Value of the file name is too long

Action: Specify a shorter filename

DRG-11210: format column must be a char, varchar, or varchar2 type

Cause: you specified a format column which is not a char, varchar, or varchar2 type.

Action: specify a format column of correct type

DRG-11211: charset column must be a char, varchar, or varchar2 type

Cause: you specified a charset column which is not a char, varchar, or varchar2 type.

Action: specify a charset column of correct type

DRG-11212: procedure filter procedure name contains a semicolon

Cause: the procedure name specified had a semicolon

Action: remove semicolon or rename procedure name. The correct format is
PACKAGE_NAME.PROCEDURE_NAME

DRG-11213: CTXSYS does not own procedure filter stored procedure: *string*

Cause: CTXSYS does not have execute privilege to the procedure filter stored procedure

Action: make sure the package is owned by CTXSYS and the procedure exist

DRG-11214: execution of procedure filter stored procedure has failed

Cause: an error occur while executing the proedure filter stored procedure

Action: check or debug the stored procedure

DRG-11215: index owner does not have access to filter stored procedure: *string*

Cause: the index owner does not have execute privilege of the procedure

Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-11216: length of datastore data exceeds limit

Cause: the length of the datastore data passed to the filter stored procedure is longer than the maximum length (32767 bytes)

Action: check primary key parameter

DRG-11217: INSO safe callout failed

Cause: The INSO safe callout cannot be executed

Action: check the Oracle errpr

DRG-11218: malformed mail line, line *string*

Cause: The mail message has an error at the indicated line

Action: manually edit mail message, if possible

DRG-11219: malformed mail configuration file, line *string*

Cause: mail filter configuration file has an error at the indicated line

Action: manually edit mail filter configuration file, if possible

DRG-11220: Third-party filter is out of memory.

Cause: Third-party filter could not filter this document because it was unable to allocate sufficient virtual memory.

Action: Increase virtual memory provided by the Operating System and reindex this document.

DRG-11221: Third-party filter indicates this document is corrupted.

Cause: Third-party filter could not filter this document because this document is corrupted.

Action: Fix the corruption and reindex this document.

DRG-11222: Third-party filter does not support this known document format.

Cause: Third-party filter was able to recognize the format of this document but could not filter it because this format is not supported.

Action: Remove this document or specify it to be ignored.

DRG-11223: Third-party filter indicates this document is password protected or encrypted.

Cause: Third-party filter encountered a password protected or encrypted document and could not filter it because this level of password protection or encryption is not supported.

Action: Remove this document or specify it to be ignored.

DRG-11224: Third-party filter is unable to create or write to temporary file.

Cause: Third-party filter could not filter this document because it was unable to create a temporary file or unable to write to a temporary file.

Action: Make sure that the Operating System specified temporary directory has enough space and that the Operating System Oracle user has the privileges to create files in this temporary directory.

DRG-11225: Third-party filter timed out.

Cause: Third-party filter could not filter this document because the filter timed out.

Action: Increase the value of the TIMEOUT attribute of INSO_FILTER filter type and reindex this document. When TIMEOUT attribute is set to 0 and the session hangs then contact Oracle Support.

DRG-11226: Error initializing third-party filter: *string*

Cause: There was an error initializing the third-party filter.

Action: Check the following messages for details

DRG-11227: Third-party filter does not support this document format.

Cause: Third-party filter does not support the format of this document.

Action: Remove this document or specify it to be ignored.

DRG-11228: Charset filter does not support binary documents.

Cause: The format column specifies a binary document

Action: Do not attempt to filter binary documents using the charset filter

DRG-11229: configuration column must be a char, varchar, or varchar2 type

Cause: you specified a configuration column which is not a char, varchar, or varchar2 type.

Action: specify a configuration column of correct type

DRG-11301: error while indexing document

Cause: An error was encountered while indexing the document. The error may have occurred during lexing, parsing for sections, or other action during document tokenization

Action: review document and update with valid data. Note that the document contents may have been partially indexed, so it may be returned by some queries.

DRG-11303: secondary indexes are not supported by this indextype

Cause: You attempted to create an index on an index-organized table, but the indextype does not support this action.

Action: n/a

DRG-11304: function-based indexes are not supported by this indextype

Cause: You attempted to create a function-based index but the indextype does not support this action.

Action: n/a

DRG-11305: create/alter index *string* is in progress in another session

Cause: you attempted to mark the index from INPROGRESS to FAILURE but create/alter on the same index is in progress in another session

Action: n/a

DRG-11306: operation cannot be performed on a policy

Cause: you attempted to perform an operation on a policy, but the operation is only valid for an index.

Action: n/a

DRG-11307: operation cannot be performed on an index

Cause: you attempted to perform an operation on an index, but the operation is only valid for a policy.

Action: n/a

DRG-11308: unsupported column expression *string*

Cause: You attempted to create an index with an unsupported column expression.

Action: n/a

DRG-11309: invalid filter by column: *string* of datatype *string* and size *string*

Cause: the column specified is not valid

Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification. c) column size is at most 249 bytes long

DRG-11310: invalid order by column: *string* of datatype *string* and size *string*

Cause: the column specified is not valid

Action: check that the followings are valid: a) column is of supported datatype b) valid table name, column name in the specification. c) column size is at most 249 bytes long

DRG-11311: *string* cannot be specified for this optimization mode

Cause: the specified option is not valid for this optimization mode

Action: remove the specified option

DRG-11312: source and new policy must have same owner

Cause: the new policy has a different owner than the source policy

Action: Ensure that both policies are owned by the same user

DRG-11313: populate index error on index partition *string*

Cause: failed to populate the text index on the specified partition

Action: See the next errors on stack and take appropriate action

DRG-11314: changing TRANSACTIONAL property on index with rows on pending queue not allowed

Cause: the index has pending unsynced rows

Action: sync the index before changing the TRANSACTIONAL property

DRG-11316: \$S table cannot be created with *string*

Cause: the \$S table cannot be created with the specified storage option

Action: remove the specified option from the index preference and retry the index creation

DRG-11317: rowid *string* is not in the index

Cause: you specified an invalid rowid in ctx_ddl.add_mdata

Action: correct the rowid and retry

DRG-11318: error processing dr\$data_update

Cause: there was an error

Action: check the error stack for more details

DRG-11319: more than 1 index found on \$. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11320: no index found on \$. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11321: triggers detected on \$. OPTIMIZE REBUILD not supported

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11322: fast optimize not supported for big_io option

Cause: OPTIMIZE FAST is not supported with big_io option

Action: run optimize full or rebuild instead

DRG-11323: merge optimize requires near_realtime option

Cause: OPTIMIZE MERGE requires near_realtime option

Action: run another optimize mode

DRG-11324: fast optimize not supported for separate_offsets option

Cause: OPTIMIZE FAST is not supported with separate_offsets option

Action: run optimize full or rebuild instead

DRG-11325: stageitab only supported for context index

Cause: STAGEITAB requires context index

Action: don't use stageitab on non context indexes

DRG-11326: separate offsets only supported for context index

Cause: SEPARATE_OFFSETS requires context index

Action: don't use separate_offsets on non context indexes

DRG-11327: big_io only supported for context index

Cause: BIG_IO requires context index

Action: don't use big_io on non context indexes

DRG-11328: optimize validation failed

Cause: optimize validation failed

Action: file a bug

DRG-11332: Index already has STAGE_ITAB set

Cause: Index already has stage_itab set

Action: Do not add stage_itab to this index

DRG-11333: Index does not have STAGE_ITAB set

Cause: Index does not have stage_itab set

Action: Do not remove stage_itab from this index

DRG-11334: Index already has BIG_IO set

Cause: Index already has big_io set

Action: Do not add big_io to this index

DRG-11335: Index does not have BIG_IO set

Cause: Index does not have big_io set

Action: Do not remove big_io from this index

DRG-11336: Index already has SEPARATE_OFFSETS set

Cause: Index already has separate_offsets set

Action: Do not add separate_offsets to this index

DRG-11337: Index does not have SEPARATE_OFFSETS set

Cause: Index does not have separate_offsets set

Action: Do not remove separate_offsets from this index

DRG-11338: policy *string* does not exist

Cause: the specified policy does not exist or you do not have access to it.

Action: Specify an existing policy

DRG-11339: duplicate policy name: *string*

Cause: the specified policy already exists in the dictionary

Action: this policy can be updated or deleted, however this is only allowed if there is no text policy available on the text column

DRG-11341: Index optimization failed for one or more tokens

Cause: Index optimization generated an error for one or more tokens, possibly due to corruption of the token_info blob.

Action: Check the index optimization log for the detailed error, or retry the optimize call with logging enabled

DRG-11342: OPTIMIZE REBUILD not supported for partitioned \$I and global \$X

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11343: OPTIMIZE REBUILD not supported for current \$I partitioning scheme

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11346: FORWARD INDEX only supported for context index

Cause: FORWARD INDEX needs context index

Action: Don't use FORWARD INDEX on non context indexes

DRG-11347: FORWARD INDEX does not exist for this index

Cause: FORWARD INDEX does not exist

Action: Enable forward index for the index

DRG-11348: OPTIMIZE REBUILD not supported for \$I with character length semantics columns

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: resolve the issue, and retry the operation

DRG-11349: FILTER CACHE only supported for context index

Cause: FILTER CACHE only for context index

Action: Don't use FILTER_CACHE on non context indexes

DRG-11350: SAVE COPY only supported for context index

Cause: SAVE COPY needs context index

Action: Don't use SAVE COPY on non context indexes

DRG-11351: Unable to fetch partition Id for given rowid: *string*

Cause: Not able to fetch partition id for given rowid

Action: Make sure index tables are partitioned correctly.

DRG-11352: Not able to fetch partition name for given partition position: *number*

Cause: Not able to fetch partition name for given partition position

Action: Make sure valid partition position has been provided

DRG-11353: xml_enable is not allowed for a local index

Cause: Section group attribute xml_enable set to TRUE for a local index

Action: Set xml_enable to FALSE for a local index.

DRG-11354: stage_itab_max_rows not allowed without stage_itab storage preference

Cause: Storage option stage_itab_max_rows needs to be accompanied by stage_itab

Action: Add stage_itab to storage preference

DRG-11355: Not able to fetch partition position from rowid: *string*

Cause: Not able to fetch partition position for given rowid

Action: Make sure valid rowid has been provided

DRG-11356: Optimize operations are not permitted on partition *string*

Cause: READ mode for this partition is set to FALSE. No optimize operations are permitted in this mode.

Action: Set READ mode for this partition to be TRUE.

DRG-11357: FORWARD INDEX must be specified at index, not partition level *string*

Cause: forward index was specified at partition level and not at index level

Action: Specify forward index option at index level. All partitions inherit.

DRG-11358: Save Copy must be specified at index, not partition level *string*

Cause: save copy was specified at partition level and not at index level

Action: Specify save copy option at index level. All partitions inherit.

DRG-11359: xml_save_copy can only be specified for xml enabled text index

Cause: xml_save_copy was specified for non-xml enabled text index

Action: Use xml_save_copy only for xml enabled text index.

DRG-11360: xml_forward_enable can only be specified for xml enabled text index

Cause: xml_forward_enable was specified for non-xml enabled text index

Action: Use xml_forward_enable only for xml enabled text index.

DRG-11361: xml_forward_enable can not be enabled without xml_save_copy set to true

Cause: attempt to enable xml_forward_enable without xml_save_copy set to true

Action: Set xml_forward_enable to true only when xml_save_copy set to true

DRG-11362: xml_enable is not allowed for non-XMLType columns

Cause: 'xml_enable' was set to TRUE for non-XMLType columns.

Action: Set 'xml_enable' to TRUE only for XMLType columns.

DRG-11363: xml_enable is not allowed for XMLType OR storage

Cause: 'xml_enable' was set to TRUE for XMLType with object-relational storage.

Action: Set 'xml_enable' to TRUE only for XMLType binary or CLOB storage.

DRG-11364: index string is invisible

Cause: the index is marked as invisible. Only DML operations on the base table are allowed

Action: mark the index as visible with alter index

DRG-11365: FORWARD_INDEX cannot be specified for XML enabled text index.

Cause: The FORWARD_INDEX attribute was specified for an XML enabled text index.

Action: Use the FORWARD_INDEX attribute for a non-XML enabled text index only.

DRG-11366: SAVE_COPY cannot be specified for XML enabled text index.

Cause: The SAVE_COPY attribute was specified for an XML enabled text index.

Action: Use the SAVE_COPY attribute for a non-XML enabled text index only.

DRG-11367: Index is too fragmented to run optimize for all fragmented tokens.

Cause: More than 50% of tokens in \$I are fragmented.

Action: Please run FULL/REBUILD optimize or specify value for maxtokens

DRG-11368: Invalid value for maxtokens attribute.

Cause: Maxtokens value was either less than zero or too high.

Action: Specify maxtokens values between 0 and 50% of token count of \$I.

DRG-11369: Stage itab row exceeds max allowable size.

Cause: Ctxagg optimize merge limits the size of rows to under 4K.

Action: Use traditional optimize merge.

DRG-11370: Error in optimize merge (ctxagg).

Cause: Internal error in optimize merge.

Action: Use traditional optimize merge.

DRG-11371: stage_itab_parallel not allowed without stage_itab storage preference

Cause: Storage option stage_itab_parallel needs to be accompanied by stage_itab

Action: Add stage_itab to storage preference

DRG-11372: forward index storage preference cannot be specified with asynchronous update

Cause: Storage option Forward index specified along with asynchronous update

Action: Remove forward index storage preference when using asynchronous update

DRG-11373: Invalid section type

Cause: Invalid section type parameter in optimize index

Action: Use a valid section type

DRG-11374: string not allowed when stage_itab_max_rows is set to 0.

Cause: Storage option specified is not allowed when stage_itab_max_rows is set to 0

Action: Set stage_itab_max_rows to a value ≥ 1000

DRG-11375: string not allowed without stage_itab storage preference

Cause: Storage option specified needs to be accompanied by stage_itab

Action: Add stage_itab to storage preference

DRG-11376: SIMPLIFIED_XML is not allowed with non xml enabled text index

Cause: Section group attribute XML_ENABLE not set to true when creating simplified XML Search Index

Action: Use a section group with attribute XML_ENABLE set to true

DRG-11377: ADD_MDATA/REMOVE_MDATA API is not supported with stage_itab

Cause: Combination of features is not supported in this code version.

Action: Please see feature documentation notes for usage and options.

DRG-11378: OPTIMIZE REBUILD not supported for Context Search index

Cause: OPTIMIZE REBUILD is not supported due to the specified reason

Action: use optimize FULL instead

DRG-11379: invalid tablespace

Cause: Invalid tablespace specified in parameter list.

Action: Use a valid tablespace.

DRG-11380: operation is not allowed on unsynced index

Cause: the index has pending unsynced rows

Action: sync the index before repeating the operation

DRG-11381: optimize fast mode is not supported in partitioned search index

Cause: The fast mode of opt is not supported for a partitioned search index

Action: use full/rebuild mode

DRG-11382: Cannot *string* a policy that is being used for an IMC Text column *string*

Cause: Attempt to drop or update a policy that is used on an IMC column.

Action: Purge tables using this policy for IMC Text from the Oracle recycle bin or alter the tables to 'no inmemory text'.

DRG-11383: *string* is not supported on a Sharded Database

Cause: Attempt to use an unsupported feature on a Sharded Database

Action: Do not use the feature

DRG-11384: cannot modify *string* option using partition granularity

Cause: An attempt was made to modify an option that can only be modified using global granularity or cannot be modified on a local index.

Action: Modify the option using index granularity by using the ALTER INDEX PARAMETERS statement or drop and re-create the index.

DRG-11400: failed to parse document with key *string*

Cause: the document specified for linguistic extraction could not be parsed. This could indicate that the document is not well-formed English

Action: check the document contents

DRG-11403: primary key value too long

Cause: the primary key value parameter passed to the service request is longer than the maximum primary key length (64 bytes)

Action: check primary key parameter

DRG-11404: no primary key value specified

Cause: the primary key value parameter passed to the service request is null

Action: check primary key parameter

DRG-11410: could not insert into *string* result table

Cause: an ORACLE error occurred while linguistic output was being inserted into the result table

Action: take action appropriate to the ORACLE error code.

DRG-11418: insufficient document content for linguistic parser

Cause: the document specified for linguistic extraction was parsed but the document content was insufficient for linguistic extraction by the specified parser.

Action: check the document contents or try modifying linguistic settings

DRG-11422: linguistic initialization failed

Cause: linguistic services initialization failed

Action: Check to see if knowledge base files present for the language

DRG-11425: gist level *string* is invalid

Cause: invalid gist level

Action: Specify a valid gist level

DRG-11427: valid gist level values are *string*

Cause: Invalid gist level

Action: Specify a valid gist level

DRG-11428: document contains invalid characters

Cause: The document contains invalid characters

Action: Remove invalid characters

DRG-11432: file error while accessing knowledge base

Cause: An oracle error was encountered during knowledge base access

Action: Check to see if knowledge base files present for the language

DRG-11435: primary key value is invalid

Cause: the primary key value parameter passed to the service request is not valid

Action: check primary key parameter

DRG-11439: index name length exceeds maximum of *string* bytes

Cause: the length of the index name is longer than the maximum index name size

Action: drop the index and recreate the index with a shorter index name

DRG-11440: operation not supported for the *string* language

Cause: the requested operation is not supported for the current language

Action: Do not request this operation

DRG-11441: gist numParagraphs *string* is invalid

Cause: invalid gist numparagraphs

Action: Specify valid gist numparagraphs

DRG-11442: valid gist numParagraphs values are *string*

Cause: invalid gist numparagraphs

Action: Specify valid gist numparagraphs

DRG-11443: gist maxPercent *string* is invalid

Cause: invalid gist max percent

Action: Specify valid gist max percent

DRG-11444: valid gist maxPercent values are *string*

Cause: invalid gist max percent

Action: Specify valid gist max percent

DRG-11445: rowid value is invalid: *string*

Cause: the rowid value parameter passed to the service request is not valid

Action: check rowid parameter

DRG-11446: supplied knowledge base file *string* not installed

Cause: Either using Oracle Express edition or supplied Knowledge Base was required but was not installed.

Action: If using Oracle Express edition then upgrade to Oracle Enterprise or Oracle Standard edition. Otherwise see post-installation tasks section of the Database Installation Guide for instructions to install supplied Knowledge Base.

DRG-11480: ctxkbt memory allocation error: %(1)

Cause: Unable to allocate memory

Action: Contact your system administrator

DRG-11481: linguistic feature not enabled

Cause: linguistic feature not enabled

Action: enable linguistic feature

DRG-11500: column name expected, found *string* on line *string*

Cause: possibly miss-spelt column name or keyword

Action: check spellings and punctuation around specified line

DRG-11501: identifier *string* found in place of column name on line *string*

Cause: possibly miss-spelt column name

Action: check spellings around specified line

DRG-11502: read of file failed at line *string* for file *string*

Cause: bad file name, wrong file_type or file system error

Action: check file name, type and/or file integrity

DRG-11503: insert statement overflows maximum statement size

Cause: total length of statement exceeds database maximum

Action: reduce length of column names or number of columns

DRG-11504: invalid longsize parameter of *string* specified

Cause: invalid option argument

Action: specify long buffer size in kbytes above 0

DRG-11505: long data on line *string* not found or invalid

Cause: either bad data or bad data file

Action: check file exists and is accessible, if separate

DRG-11506: record ignored on line *string* because of error(s)

Cause: an error occurred parsing this row's data

Action: move and amend line in error to alternate load file

DRG-11507: file error trying to read file *string*

Cause: file not found or could not be read

Action: check name and location of file

DRG-11508: bad or missing *string* token on line *string*

Cause: token expected was not found

Action: move and amend record affected to error load file

DRG-11509: value expected on line *string*

Cause: could not make sense of text where value expected

Action: move and amend record affected to error load file

DRG-11510: encountered unrecoverable error on line *string*

Cause: see previous messages

Action: see previous errors

DRG-11511: specified table does not contain a LONG RAW column

Cause: text must be inserted into a LONG RAW type column

Action: check table and type of data

DRG-11512: bad syntax for thesaurus load file at line *string*

Cause: load file must have specific format for loading thesaurus

Action: check documentation for description of correct format

DRG-11513: unable to open or write to file *string*

Cause: an attempt to open or to write to the given file failed

Action: check with system administrator

DRG-11514: user *string* does not have UPDATE or SELECT privilege on *string*

Cause: user has not been granted UPDATE or SELECT privilege

Action: check privilege on the user

DRG-11515: not enough text key values

Cause: number of values provided does not match the number of text keys

Action: provide same number of values as the number of text keys

DRG-11516: user must be at least in role CTXUSER to perform this operation

Cause: user does not have CTXUSER, CXAPP or CTXADMIN role

Action: grant user the proper role

DRG-11517: error when validating text objects

Cause: see accompanying Oracle error

Action: see accompanying Oracle error

DRG-11518: text table *string* does not have a LONG or LONG RAW column

Cause: table specified does not have a LONG or LONG RAW column

Action: check the table

DRG-11519: encounter error when exporting a LONG or LONG RAW column

Cause: see accompanying error message

Action: see accompanying error message

DRG-11520: error writing to file

Cause: file does not exist

Action: make sure file exists

DRG-11521: encounter error when updating a LONG or LONG RAW column

Cause: see accompanying error message

Action: see accompanying error message

DRG-11522: no row exists for the text key(s) specified

Cause: no row in the table has the text key(s) specified

Action: use a valid text key(s)

DRG-11523: unable to lock the specified row for update

Cause: some other process has a lock on the row

Action: release the lock or wait until the lock is released

DRG-11524: primary key value is missing

Cause: primary key value is not provided

Action: provide the primary key value(s)

DRG-11525: invalid commitafter parameter of *string* specified

Cause: invalid option argument

Action: specify commitafter above 0

DRG-11526: filename exceeds maximum length

Cause: value of the file name is too long

Action: Specify a shorter file name

DRG-11527: end token not found on line *string*

Cause: *TEXTEND* not found at end of record

Action: processing discontinued - amend record

DRG-11528: LONG or LONG RAW column definition found in structure data

Cause: could be misplaced

Action: remove reference to LONG or LONG RAW column from structure data

DRG-11529: token exceeds maximum length

Cause: value of the column name or value is too long

Action: processing discontinued - amend record

DRG-11530: token exceeds maximum length

Cause: value of the phrase or relation word is too long

Action: processing discontinued - amend record

DRG-11531: start token not found on line *string*

Cause: <TEXTSTART: not found at start of record

Action: processing discontinued - amend record

DRG-11532: error reading through end of line *string* for file *string*

Cause: characters encountered while reading through end of line

Action: remove extraneous characters

DRG-11533: improper value of column *string*

Cause: value of the column is too long or mismatched quote

Action: processing discontinued - amend record

DRG-11534: invalid column *string*

Cause: column does not exist or it's misspelled

Action: processing discontinued - amend record

DRG-11535: error writing phrase or qualifier: *string* on line *string* to memory

Cause: not enough memory

Action: allocate more memory, contact WorldWide Support if problem persists

DRG-11600: URL store: *string* has permanently moved

Cause: the document referred to by the URL has permanently moved

Action: find the new address, if any, of the document

DRG-11601: URL store: bad syntax on request for *string*

Cause: client did not make correct request

Action: contact support

DRG-11602: URL store: access to *string* requires authentication

Cause: user has to provide password or other authentication

Action: get required access, or check URL

DRG-11603: URL store: payment required to access *string*

Cause: payment is required before the URL can be accessed

Action: check URL, or pay if required if access necessary

DRG-11604: URL store: access to *string* is denied

Cause: access to the URL is denied

Action: check URL; if correct, do not try to access URL again

DRG-11605: URL store: document specified by *string* not found

Cause: the document can not be found on the host specified

Action: check URL

DRG-11606: URL store: access to *string* timed out waiting for client request

Cause: client did not make response within timeout period

Action: check URL

DRG-11607: URL store: access to *string* was denied due to garbled response

Cause: Web server identified in URL doesn't obey HTTP protocol

Action: contact the Web administrator of the remote host

DRG-11608: URL store: host portion of *string* specified incorrectly

Cause: host portion of the URL could not be parsed

Action: check URL

DRG-11609: URL store: unable to open local file specified by *string*

Cause: attempt to open local file failed

Action: check URL

DRG-11610: URL store: unable to read local file specified by *string*

Cause: attempt to read local file failed

Action: contact system administrator

DRG-11611: URL store: unknown protocol specified in *string*

Cause: the protocol parsed is neither http or file

Action: check URL

DRG-11612: URL store: unknown host specified in *string*

Cause: the address of the host specified could not be resolved

Action: check URL

DRG-11613: URL store: connection refused to host specified by *string*

Cause: attempt to connect to host was forcibly refused

Action: check URL

DRG-11614: URL store: communication with host specified in *string* timed out

Cause: a network operation timed out

Action: try again later; network connection may be down to Web server

DRG-11615: URL store: write failed sending to *string* over network

Cause: unknown error writing request to Web server

Action: check network connection

DRG-11616: URL store: too many redirections trying to access *string*

Cause: too long a chain of HTTP redirections given the URL

Action: contact the Web administrator of the remote host

DRG-11617: URL store: URL *string* is too long

Cause: The length of the URL string is longer than URLSIZE

Action: set URLSIZE attribute to a larger value

DRG-11618: URL store: document identified by *string* is too large

Cause: document larger than user-set maximum size

Action: do not access URL, or increase document size limit

DRG-11619: URL store: row in table is empty

Cause: row deleted or otherwise missing

Action: check table if necessary

DRG-11620: URL store: thread operation error

Cause: thread operation failed

Action: contact system administrator

DRG-11621: URL store: socket open error for *string*

Cause: socket open failed; probably too many open file descriptors

Action: reduce the maximum number of threads started

DRG-11622: URL store: getting *string* , unknown HTTP error *string*

Cause: an unexpected HTTP error has occurred

Action: consult HTTP error codes; if valid, contact support

DRG-11623: URL store: unknown error getting *string*

Cause: unexpected error

Action: contact support

DRG-11624: invalid attribute *string* for *string*: proper range *string* to *string*

Cause: unexpected error

Action: change attribute value

DRG-11625: MAXURLS * URLSIZE must be less than *string*

Cause: MAXURLS * URLSIZE cannot be larger than the limit

Action: Lower either MAXURLS or URLSIZE

DRG-11626: URL store: unknown protocol specified during redirect from *string*

Cause: the URL redirected to a site with neither http nor file protocol

Action: check URL

DRG-11627: URL store: not implemented error getting *string*

Cause: The remote host returned a 501 not implemented error

Action: Check URL

DRG-11628: URL store: bad gateway error getting *string*

Cause: The remote host returned a 502 bad gateway error

Action: Check URL

DRG-11629: URL store: service unavailable error getting *string*

Cause: The remote host returned a 503 service temporarily unavailable error

Action: Check URL

DRG-11630: URL store: gateway timeout error getting *string*

Cause: The remote host returned a 504 gateway timeout error

Action: Check URL

DRG-11700: thesaurus *string* already exists

Cause: thesaurus with same name exists

Action: use another name

DRG-11701: thesaurus *string* does not exist

Cause: thesaurus does not exist

Action: use another thesaurus or create it

DRG-11702: *string*

Cause: error while parsing thesaurus operator in query term. see error message for details.

Action: see error message

DRG-11703: user *string* must have at least CTXAPP role to execute this function

Cause: privilege is not sufficient

Action: grant user CTXAPP role

DRG-11704: phrase '*string*' does not exist

Cause: phrase does not exist

Action: use another phrase or create it

DRG-11705: multilevel jump from *string* to *string*

Cause: the thesaurus load file has a multilevel jump which could not be parsed.

Action: correct thesaurus file

DRG-11706: invalid relation *string*

Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes

Action: Specify a valid relation

DRG-11707: valid relations: *string*

Cause: You specified an invalid relation. The set of valid relations will be displayed. Additionally, you may be able to specify a translation, which has the syntax languagename: where languagename can be any string up to 10 bytes

Action: Specify a valid relation

DRG-11708: too many thesauri

Cause: ctxkbtc cannot compile more than 16 thesauri

Action: Specify fewer thesauri

DRG-11709: too many terms in thesaurus

Cause: number of thesaurus terms exceeds maximum

Action: Use a thesaurus with fewer terms

DRG-11710: thesaurus term *string* too long

Cause: knowledge base does not permit terms longer than 80 characters

Action: Correct thesaurus

DRG-11711: too much data for term *string*

Cause: internal limit on size of data per term

Action: redesign thesaurus

DRG-11712: multiple Broader Terms for term *string*

Cause: There is a term in the thesaurus with multiple broader terms

Action: make sure each term has only one broader term

DRG-11713: multiple Preferred Terms per synonym ring

Cause: There is a synonym ring in the thesaurus with multiple preferred terms

Action: make sure each synonym ring has only one preferred term

DRG-11714: synonyms have different Broader Terms

Cause: Some synonyms in a synonym ring have different broader terms

Action: make sure all synonyms have the same broader term

DRG-11715: attempt to add a BT relation between 2 KB categories *string* and *string*

Cause: BT relation cannot be between two existing knowledge base categories

Action: redesign the BT hierarchy

DRG-11716: attempt to add Narrower Term *string* for non-Preferred Term *string*

Cause: only a PT can have NTs

Action: attach the NT to the preferred term

DRG-11717: attempt to add Related Term *string* to non-Preferred Term *string*

Cause: only a PT can have RTs

Action: attach the RT

DRG-11718: multiple Preferred Terms for term *string*

Cause: There are multiple preferred terms for this term

Action: Correct thesaurus

DRG-11719: Broader Term hierarchy too deep

Cause: The broader term hierarchy in this thesaurus is too deep

Action: flatten the hierarchy for best results

DRG-11720: too many synonyms per synonym ring

Cause: too many synonyms for a single preferred term

Action: introduce further distinctions to deepen the hierarchy

DRG-11721: thesaurus *string* is empty

Cause: no entries in thesaurus

Action: add some entries or drop the thesaurus

DRG-11722: invalid language specification

Cause: language specification cannot be more than 10 characters

Action: reduce language specification to less or equal to 10 char

DRG-11723: phrase cannot be NULL

Cause: you tried to add a NULL phrase to the thesaurus

Action: specify a valid phrase

DRG-11724: phrase *string* already exists

Cause: phrase with same name exists

Action: use another name

DRG-11725: phrase does not have any synonyms

Cause: you tried to nominate a phrase with no synonyms to be the preferred term, or you tried to drop SYN from a phrase with no synonyms

Action: None

DRG-11726: phrase is not a preferred term

Cause: you tried to remove the preferred term relation from a phrase which is not a preferred term.

Action: None

DRG-11727: phrase does not have any related terms

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11728: phrase does not have any broader terms of this type

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11729: phrase does not have any narrower terms of this type

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11730: relation does not exist

Cause: you tried to drop a relation which does not exist

Action: None

DRG-11731: translation does not exist

Cause: you tried to drop a translation which does not exist

Action: None

DRG-11732: phrase does not have any translations

Cause: you tried to drop translations which does not exist

Action: None

DRG-11733: more than one translation for the term in the specified language

Cause: the term has more than one translation in the specified language

Action: specified a translation

DRG-11734: missing homograph

Cause: A term of the form 'homograph(disambiguation)' is missing the the homograph.

Action: None

DRG-11735: missing disambiguation

Cause: A term of the form 'homograph(disambiguation)' is missing the the disambiguation (i.e., homograph()).

Action: None

DRG-11736: illegal text after disambiguated homograph

Cause: A term of the form 'homograph(disambiguation)' has text after the disambiguation (e.g, homograph(disambiguation) extra text".

Action: None

DRG-11737: Unsupported attribute value for thes_toktype

Cause: An invalid value was specified for thes_toktype attribute.

Action: Please specify a valid token type as thes_toktype.

DRG-11801: Continue

Cause: Enquire user to decide if continue is necessary HTTP_ERROR = 100

Action: Upon positive response, continue the original operation

DRG-11802: Switching Protocols

Cause: Telling client a protocol switching just happened HTTP_ERROR = 101

Action: The user agent takes proper actions

DRG-11803: OK

Cause: Telling client things are ok HTTP_ERROR = 200

Action: The user agent takes proper actions

DRG-11804: Created

Cause: Telling client things are created HTTP_ERROR = 201

Action: The user agent takes proper actions

DRG-11805: Accepted

Cause: Telling client things are accepted but not committed HTTP_ERROR = 202

Action: The user agent takes proper actions

DRG-11806: Non-authoritative Information

Cause: The returned metainformation is not the definitive set HTTP_ERROR = 203

Action: The user agent knows the information is Non-authoritative

DRG-11807: No Content

Cause: request has been fulfilled but no new information found HTTP_ERROR = 204

Action: The user agent takes proper actions

DRG-11808: Reset Content

Cause: Telling client to reset the document view HTTP_ERROR = 205

Action: The user agent takes proper actions

DRG-11809: Partial Content

Cause: Telling client document content is a partial content HTTP_ERROR = 206

Action: The user agent takes proper actions

DRG-11810: Partial Update OK

Cause: Telling client document is partially updated HTTP_ERROR = 207

Action: The user agent takes proper actions

DRG-11811: Multiple Choices

Cause: Telling client multiple choices of resources is possible HTTP_ERROR = 300

Action: The user agent takes proper actions

DRG-11812: Moved Permanently

Cause: The URI has been assigned a new permanent URI HTTP_ERROR = 301

Action: The user agent takes proper actions

DRG-11813: Moved Temporarily

Cause: The URI resides temporarily under a different URI. HTTP_ERROR = 302

Action: The user agent takes proper actions

DRG-11814: See Other

Cause: The URI can be found using GET METHOD under a different URI
HTTP_ERROR = 303

Action: The user agent takes proper actions

DRG-11815: Not Modified

Cause: Response to conditional GET, indicating document not modified.
HTTP_ERROR = 304

Action: The user agent takes proper actions

DRG-11816: Use Proxy

Cause: The client should use specified proxy to repeat the request HTTP_ERROR = 305

Action: The user agent takes proper actions

DRG-11817: Proxy Redirect

Cause: Proxy redirection. Not used HTTP_ERROR = 306

Action: Outdated due to HTTP evolution

DRG-11818: Temporary Redirect

Cause: The resource is temporarily under a different URI. HTTP_ERROR = 307

Action: The takes proper actions

DRG-11819: Bad Request

Cause: The URL syntax is incorrect. Request rejected by server. HTTP_ERROR = 400

Action: The user agent takes proper actions

DRG-11820: Unauthorized

Cause: The request requires further authentication. HTTP_ERROR = 401

Action: The user agent takes proper actions

DRG-11821: Payment Required

Cause: Reserved for future use. HTTP_ERROR = 402

Action: The user agent takes proper actions

DRG-11822: Forbidden

Cause: The server refuses to fulfil the request from client HTTP_ERROR = 403

Action: The user agent takes proper actions

DRG-11823: Not Found

Cause: The server can not find the requested URI HTTP_ERROR = 404

Action: The user agent takes proper actions

DRG-11824: Method Not Allowed

Cause: The user agent specified method not allowed HTTP_ERROR = 405

Action: The user agent reads allow header to decide alternatives.

DRG-11825: Not Acceptable

Cause: Requested resource is not acceptable according to request header HTTP_ERROR = 406

Action: The user agent should query the user for the next action.

DRG-11826: Proxy Authentication Required

Cause: The client must authenticate itself with the proxy. HTTP_ERROR = 407

Action: The user agent takes proper actions

DRG-11827: Request Timeout

Cause: The server is tired of waiting for the request HTTP_ERROR = 408

Action: The user agent repeat the request

DRG-11828: Conflict

Cause: The request conflicts with the current state of the URI HTTP_ERROR = 409

Action: The user agent takes proper actions

DRG-11829: Gone

Cause: The resource is no longer available and no forwarding address.

HTTP_ERROR = 410

Action: The user agent takes proper actions

DRG-11830: Length Required

Cause: The server must receive a content-length header. HTTP_ERROR = 411

Action: The user agent takes proper actions

DRG-11831: Precondition Failed

Cause: Telling the user agent that the resource failed preconditions HTTP_ERROR = 412

Action: The user agent takes proper actions

DRG-11832: Request Entity Too Large

Cause: Request rejected because request entity is too large. HTTP_ERROR = 413

Action: If Retry-After header found, the user agent should retry.

DRG-11833: Request-URI Too Big

Cause: The server is refusing to accept the URI which is too big. HTTP_ERROR = 414

Action: The user agent takes proper actions

DRG-11834: Unsupported Media Type

Cause: The server is refusing the request because of media type HTTP_ERROR = 415

Action: The user agent takes proper actions

DRG-11835: Requested Range Not Satisfiable

Cause: The byte range request can not be satisfied by the resource extent.
HTTP_ERROR = 416

Action: The user agent reads content-range header in the response.

DRG-11836: Expectation Failed

Cause: Server can not meet the user agent's expectation. HTTP_ERROR = 417

Action: The user agent takes pro

DRG-11837: Reauthorization Required

Cause: Reserved HTTP_ERROR = 418

Action: Reserved

DRG-11838: Proxy Reauthentication Required

Cause: Reserved HTTP_ERROR = 419

Action: Reserved

DRG-11839: Internal Server Error

Cause: The server encountered internal error in fulfilling the request. HTTP_ERROR = 500

Action: The user agent takes proper actions

DRG-11840: Not Implemented

Cause: The server can't support a request feature which has yet to be implemented.
HTTP_ERROR = 501

Action: The user agent takes proper actions

DRG-11841: Bad Gateway

Cause: In serving the request, the server received invalid response from gateway.
HTTP_ERROR = 502

Action: The user agent takes proper actions

DRG-11842: Service Unavailable

Cause: Server overloaded or in maintenance mode. HTTP_ERROR = 503

Action: If retry-after header is in the response, retry the request.

DRG-11843: Gateway Timeout

Cause: Upstream server did not timely respond to the gateway server. HTTP_ERROR = 504

Action: The user agent takes proper actions

DRG-11844: HTTP Version Not Supported

Cause: The HTTP version in the request header is rejected by the server. HTTP_ERROR = 505

Action: The user agent takes proper actions

DRG-11845: No Partial Update

Cause: Reserved HTTP_ERROR = 506

Action: Reserved

DRG-11846: Response Is Stale

Cause: The the user agent knows the returned reponse is stale. HTTP_CACHE_ERROR = 10

Action: The user agent client takes proper actions.

DRG-11847: Revalidation Failed

Cause: User agent's attempt to revalidate a stale response failed. HTTP_CACHE_ERROR = 11

Action: The user agent client takes proper actions

DRG-11848: Disconnected Operation

Cause: The cache is intentionally disconnected for a time period.

HTTP_CACHE_ERROR = 12

Action: The user agent client takes proper actions

DRG-11849: Heuristic Expiration

Cause: Cache freshness lifetime and response age both greater than 24 hours.

HTTP_CACHE_ERROR = 13

Action: The user agent client takes proper actions

DRG-11850: Transformation Applied

Cause: Telling cache manager, content encoding/media type has been changed in cache.

HTTP_CACHE_ERROR = 14

Action: The user agent takes proper actions

DRG-11851: Cache Related Warning

Cause: Arbitrary information about cache to be presented to logger.

HTTP_CACHE_ERROR = 99

Action: The user agent client must not take any automated action.

DRG-11852: Can't Locate Remote Host

Cause: connection to remote host failed USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11853: No Host Name Found

Cause: The host name is not specified in URI. USER_AGENT_ERROR

Action: The user agent client takes proper action.

DRG-11854: No File Name Found Or File Not Accessible

Cause: Unable to open the file specified USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11855: FTP Server Replies

Cause: FTP server responds to the agent request USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11856: FTP Server Doesn't Reply

Cause: No response from FTP server during operation. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11857: Server Timed Out

Cause: Server operation timed out USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11858: Gopher Server Replies

Cause: Gopher server responds to the agent request. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11859: Data Transfer Interrupted

Cause: Processing of URL request was interrupted USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11860: Connection Establishment Interrupted

Cause: Connection operation was interrupted USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11861: CSO-server Replies

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11862: This Is Probaly A HTTP Server 0.9 Or Less

Cause: A very old web server USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11863: Bad, Incomplete, Or Unknown Response

Cause: The server is numbering something not understandable USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11864: Unknown Access Authentication Scheme

Cause: The server is using an unkown access authentication scheme
USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11865: News Server Replies

Cause: News Server is responding USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11866: Please Try `ftp://` Instead Of `file://`

Cause: wrong access scheme is used. USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-11867: Method Not Suited For Automatic Redirection

Cause: Telling client things are ok USER_AGENT_ERROR

Action: The user agent takes proper actions

DRG-11868: Too Many Redirections

Cause: The web server setup configured too many redirections USER_AGENT_ERROR

Action: The user agent client should take proper actions

DRG-11869: Premature End Of File Detected

Cause: Detected end of file is unexpected USER_AGENT_ERROR

Action: The user agent client takes proper actions

DRG-12201: section group *string* already exists

Cause: Section group with the same name already exists

Action: Use another name or delete the existing one first

DRG-12202: error while creating section group

Cause: detect an Oracle error while creating section group

Action: see the accompanying Oracle error and take appropriate action

DRG-12203: section group *string* does not exist

Cause: section group provided does not exist

Action: provide an existing section group

DRG-12204: error while dropping section group *string*

Cause: detect an Oracle error while dropping a section group

Action: see the accompanying Oracle error and take appropriate action

DRG-12205: error with sdata columns

Cause: detect an Oracle error while creating sdata columns

Action: add 'order by' or 'filter by' clause for the sdata column(s)

DRG-12206: tag *string* already exists in section group *string*

Cause: the start tag provided already exists in the same Section

Action: provide another start tag

DRG-12210: error while adding section *string*

Cause: detect an Oracle error while adding a section

Action: see the accompanying Oracle error and take appropriate action

DRG-12211: section or section id *string* does not exist

Cause: Section name or Section id to be dropped does not exist

Action: provide an existing Section name or Section id

DRG-12212: error while dropping section *string*

Cause: detect an Oracle error while dropping a Section

Action: see the accompanying Oracle error and take appropriate action

DRG-12213: cannot create/drop section group or sections for other user

Cause: You can only create/drop section group objects of your own

Action: have the other user create/drop his/her own objects

DRG-12217: tags cannot be more than 64 bytes

Cause: max limit of start and end tag is 64 bytes

Action: provide a shorter start and end tag

DRG-12218: section group name missing

Cause: must provide section group name

Action: provide a section group name when creating Section or section group

DRG-12219: section name missing

Cause: must provide Section name when creating a Section

Action: provide a Section name

DRG-12220: a valid tag must be provided

Cause: must provide tag when adding a section to a section group

Action: provide a tag

DRG-12223: section name *string* is a reserved name

Cause: you tried to name a section a reserved name

Action: Specify a different name for the section

DRG-12224: use `ctx_ddl.create_section_group` to create section groups

Cause: you tried to use `ctx_ddl.create_preference` to create a section group

Action: use `ctx_ddl.create_section_group`

DRG-12225: this type of section cannot be added to this section group

Cause: You tried to add sections to the null section group, add a stop section to a non-auto section group, or add a zone or field section to the auto section group

Action: Do not add this type of section to this section group

DRG-12226: a field section named *string* already exists in this section group

Cause: you tried to name an attribute or zone section the same name as an existing field section

Action: use another name

DRG-12227: a zone section named *string* already exists in this section group

Cause: you tried to name an attribute or field section the same name as an existing zone section

Action: use another name

DRG-12228: maximum number of field sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique field sections

Action: no action required

DRG-12229: special section *string* already exists in this section group

Cause: you tried to add a special section which already exists

Action: no action required

DRG-12230: special section name must be one of *string*

Cause: you tried to add an invalid special section

Action: specify a valid special section

DRG-12231: an attr section named *string* already exists in this section group

Cause: you tried to name a field or zone section the same name as an existing attribute section

Action: use another name

DRG-12232: invalid attribute tag format

Cause: you specified a tag for use as an attribute tag which did not have the correct format. An attribute tag must have the form TAG@ATTR

Action: use correct format

DRG-12233: xml sections cannot co-exist with other section types

Cause: you tried to add an xml section to a section group or index which already has zone, field, attr, or special sections, or you tried to add a zone, field, attr, or special section to a section group or index which already has xml sections

Action: n/a

DRG-12234: column *string* already mapped in section group *string*

Cause: you tried to add a column section which already exists

Action: use correct format

DRG-12235: an sdata section named *string* already exists in this section group

Cause: you tried to name a non-sdata section the same name as an existing sdata section

Action: use another name

DRG-12236: an mdata section named *string* already exists in this section group

Cause: you tried to name a non-mdata section the same name as an existing mdata section

Action: use another name

DRG-12237: a section named *string* already exists in this section group

Cause: you tried to map a column but the section name is already being used by another section

Action: use another name

DRG-12238: maximum number of mdata sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique mdata sections

Action: no action required

DRG-12239: maximum number of sdata sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique sdata sections

Action: no action required

DRG-12240: ORDER BY column *string* must be indexed as an SDATA section

Cause: an order by column has been mapped to an MDATA section

Action: adjust section group

DRG-12241: column name *string* is not a valid section name

Cause: an order by or filter by column cannot be implicitly mapped to an SDATA section because the name is not valid as a section name

Action: adjust section group to map column name to a valid section name

DRG-12242: value of *string* is too large for section *string*

Cause: the value of a filter by or order by column is too large to be indexed

Action: update the row

DRG-12243: invalid datatype

Cause: the datatype specified for a sdata or mdata section is invalid

Action: specify a supported datatype

DRG-12244: data conversion error for sdata section *string*

Cause: failed to convert data

Action: check the format of the data

DRG-12245: SDATA operator not compatible with the sdata section *string*

Cause: failed to convert data

Action: check the format of the data

DRG-12246: SDATA operand not compatible with the sdata section *string*

Cause: failed to convert data

Action: check the format of the data

DRG-12247: maximum number of NDATA sections (*string*) exceeded

Cause: a section group has more than the maximum number of unique NDATA sections

Action: no action required

DRG-12248: a NDATA section named *string* already exists in this section group

Cause: you tried to name a non-NDATA section the same name as an existing NDATA section

Action: use another name

DRG-12253: optimized for *string* SDATA sections do not support *string* operation

Cause: An attempt was made to use an operation that is not supported for these SDATA sections.

Action: Use another substitute operation if possible.

DRG-12254: order by for SDATA optimized for search only is not allowed

Cause: An attempt was made to use a query ordering by SDATA section that is optimized for search only.

Action: Use SDATA section that is optimized for sort or sort_and_search.

DRG-12255: invalid data type for SDATA section *string*

Cause: The data type of the SDATA section in the XML enabled context index was invalid.

Action: Specify a supported data type.

DRG-12256: SDATA section *string* is not optimized for search

Cause: Section attribute 'optimized_for' was not set to 'search' for the SDATA section in the XML enabled context index.

Action: Set 'optimized_for' to 'search' for the SDATA section.

DRG-12257: RANGE_SEARCH_ENABLE cannot co-exist with other section types.

Cause: An attempt was made to create an index with a section group having both RANGE_SEARCH_ENABLE on and other sections such as Attribute, Field, MDATA, NDATA, SDATA, Special, or Zone section.

Action: Remove other sections from the section group or do not use RANGE_SEARCH_ENABLE for the section group.

DRG-12258: sdata section *string* is too long

Cause: data too long for sdata section

Action: ensure data length is at most 249 bytes

DRG-12300: an index with this column list already exists in the index set

Cause: You tried to add an index to an index set, but an index with the specified column list already exists

Action: n/a

DRG-12301: index does not exist in index set

Cause: You tried to remove an index from an index set, but the specified index was not found

Action: n/a

DRG-12302: invalid column list

Cause: You specified an invalid column list -- it may have a syntax error, duplicate columns, or invalid column names

Action: n/a

DRG-12303: cannot add more than 99 indexes to an index set

Cause: You tried to add too many indexes to the index set

Action: n/a

DRG-12304: index set *string* does not exist

Cause: You specified an invalid index set name

Action: n/a

DRG-12305: column *string* data type is not supported for index set columns

Cause: You specified a column in the column list of an index of an index set which does not have a valid datatype

Action: use only DATE, NUMBER, CHAR, or VARCHAR2 columns in index column lists

DRG-12306: column *string* is too long for index set columns

Cause: You specified a column in the column list of an index of an index set which is too long

Action: CHAR and VARCHAR2 columns must be 30 bytes or less max length

DRG-12307: column *string* is NULL and cannot be indexed

Cause: You tried to index a row where at least one of the meta columns was NULL.

Action: provide a value for the meta column and reindex the row

DRG-12308: use `ctx_ddl.create_index_set` to create index sets

Cause: you tried to use `ctx_ddl.create_preferance` to create an index set

Action: use `ctx_ddl.create_index_set`

DRG-12309: not to use compression on attributes lob column

Cause: you tried to use compression on attributes lob column for xml full text index

Action: not to use compression on attributes lob column for xml full text index

DRG-12310: index set name exceeds maximum size of *string*

Cause: Index set name is too many bytes

Action: Correct name and resubmit

DRG-12400: template *string* is empty

Cause: The template is empty.

Action: Check the template was installed successfully.

DRG-12401: invalid template: query within a loop

Cause: A CTX EXEC tag cannot occur within a CTX REPEAT tag.

Action: Remove the CTX EXEC tag.

DRG-12402: error processing template *string*, line *string*

Cause: An error occurred when processing a template.

Action: See other errors on the stack and take the appropriate action.

DRG-12403: template *string* was not found

Cause: The template does not exist.

Action: Check the name of the template and check that it is installed.

DRG-12404: more than one template *string* found

Cause: More than one template with the same name was found.

Action: Remove templates as appropriate.

DRG-12405: error occurred processing CTX REDIRECT or CTX LABEL tag

Cause: Error in syntax of a tag.

Action: Correct the syntax of the tag.

DRG-12406: invalid CTX EXEC tag attribute (*string*)

Cause: The specified attribute is incorrectly specified.

Action: Check the syntax of the specified attribute.

DRG-12407: invalid CTX REPEAT tag attribute (*string*)

Cause: The specified attribute is incorrectly specified.

Action: Check the syntax of the specified attribute.

DRG-12408: invalid variable reference: *string.string*

Cause: The variable referenced does not exist.

Action: Check the label and column name.

DRG-12409: syntax error for label in *string*

Cause: The SQL in a CTX EXEC tag has incorrect syntax for a label or label type.

Action: Check the SQL attribute of the CTX EXEC tag.

DRG-12410: could not process CTX EXEC tag

Cause: An error occurred when processing the SQL attribute of a CTX EXEC tag.

Action: See other errors on the stack and take the appropriate action.

DRG-12411: SQL processing error: *string*

Cause: Error executing SQL from SQL attribute of CTX EXEC tag.

Action: Check the SQL in the SQL attribute.

DRG-12412: missing or invalid Template Processor attribute (*string*)

Cause: The specified attribute was missing or invalid in a HTML input field.

Action: Check the Template Processor-specific attributes in the INPUT, SELECT, RADIO and CHECKBOX tags of the template.

DRG-12422: write to client failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12430: mandatory argument missing: *string*

Cause: This argument is mandatory.

Action: Re-submit the URL with this argument supplied.

DRG-12431: configuration section *string* not found

Cause: Specified conf argument is invalid.

Action: Re-submit the URL with this argument corrected.

DRG-12432: configuration file *string* not found or unreadable

Cause: An error occurred when processing the configuration file.

Action: Contact the administrator.

DRG-12433: load of *string* JDBC driver class failed

Cause: Driver class is invalid.

Action: Contact the administrator to modify configuration.

DRG-12434: connection failed using configuration *string* information

Cause: Configuration information is not correct.

Action: Contact the administrator to modify configuration.

DRG-12435: highlight table allocation failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12436: document table allocation failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12437: highlight table release failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12438: document table release failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12439: highlight table read failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12440: document table read failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12441: counting the number of highlights failed

Cause: See the following messages.

Action: Contact the administrator.

DRG-12500: stoplist *string* already exists

Cause: the specified stop list already exists

Action: must remove the duplicate stop list if you want to re-create it.

DRG-12501: null stoplist is not allowed

Cause: the specified stop list is null

Action: mustspecify a valid stop list

DRG-12502: cannot modify stoplists owned by other users

Cause: You can only create/drop Stop List or Stop Word objects of your own

Action: have the other user create/drop his/her own objects

DRG-12503: error while creating or dropping stoplist

Cause: detect an Oracle error while creating Stop List

Action: see the accompanying Oracle error and take appropriate action

DRG-12504: stoplist *string* does not exist

Cause: the specified stop list does not exist

Action: check that the Stop List is valid

DRG-12505: error while adding or removing a stop word

Cause: detect an Oracle error while adding or removing Stop Word

Action: see the accompanying Oracle error and take appropriate action

DRG-12506: stop word *string* does not exist in stoplist *string*

Cause: the specified Stop Sord does not exist

Action: check that the Stop Word is valid

DRG-12507: stop word *string* already exists in this stoplist

Cause: the specified stop word already exists

Action: must remove the duplicate word if you want to re-create it.

DRG-12508: null stop words are not allowed

Cause: the specified stop word is null

Action: must remove the null stop word if you want to re-create it.

DRG-12509: length of the stop word *string* exceeded the limit of *string* bytes

Cause: A stop list entry has exceeded the maximun length

Action: Reduce the length of the stop list entry

DRG-12511: use `ctx_ddl.create_stoplist` to create stoplists

Cause: you tried to use `ctx_ddl.create_preferance` to create a stoplist

Action: use `ctx_ddl.create_stoplist`

DRG-12512: invalid stop class *string*

Cause: you specified an invalid stop class

Action: specify a valid stop class

DRG-12513: valid stop classes are: *string*

Cause: You specified an invalid stop class

Action: Specify a valid stop class

DRG-12514: languages must be specified for stopwords in a `MULTI_STOPLIST`

Cause: You tried to add a stopword to a `multi_stoplist` without specifying the language of the stopword

Action: Specify the language of the stopword

DRG-12515: cannot specify language for stopwords in a `BASIC_STOPLIST`

Cause: You tried to add a language-specific stopword to a basic stoplist.

Action: Do not specify language for the stopword

DRG-12516: language column must be specified when using the multi stoplist

Cause: you tried to create an index using a multi stoplist but you did not specify a language column

Action: specify a language column

DRG-12517: cannot add stopthemes to a `MULTI_STOPLIST`

Cause: you tried to add a stoptheme to a `MULTI_STOPLIST`. This is not supported in this version.

Action: n/a

DRG-12518: cannot use this option with `MULTI_STOPLIST`

Cause: index already has `multi_stoplist`

Action: can only be used to migrate from basic to multi stoplist

DRG-12519: `LANGUAGE COLUMN` missing

Cause: index does not have a language column

Action: specify language column value

DRG-12520: `LANGUAGE COLUMN` mismatch

Cause: `LANGUAGE COLUMN` does not match language column of the Index

Action: index language column should match specified one

DRG-12521: cannot add `STOP PATTERN` to `NUMBERS` stopclass

Cause: `NUMBERS` is a predefined stopclass to specify numeric values

Action: use any other alphanumeric word

DRG-12522: stop class name cannot have a reserved symbol

Cause: character AMPERSAND is not supported for stop class name

Action: use any other alphanumeric word

DRG-12600: user datastore procedure name contains a semicolon

Cause: the procedure name specified had a semicolon

Action: remove semicolon or rename procedure name. The correct format is
 PACKAGENAME.PROCEDURE_NAME

DRG-12601: invalid user datastore procedure name: *string*

Cause: the format of the procedure name is invalid. It should be in the form
 PACKAGENAME.PROCEDURENAME or PROCEDURENAME

Action: make sure PROCEDURE attr has the format
 PACKAGENAME.PROCEDURENAME or PROCEDURENAME

DRG-12602: index owner does not have access to user datastore procedure: *string*

Cause: the index owner does not have execute privilege of the procedure

Action: CTXSYS to grant execute privilege of the procedure to index owner

DRG-12603: CTXSYS does not own user datastore procedure: *string*

Cause: CTXSYS does not have execute privilege to the user datastore procedure

Action: make sure the package is owned by CTXSYS and the procedure exist

DRG-12604: execution of user datastore procedure has failed

Cause: an error occur while executing the user datastore procedure

Action: check or debug the datastore procedure

DRG-12605: datatype of column *number* in COLUMNS list is not supported

Cause: one or more of the columns in the column list of the multi datastore are of a
 type which the multi datastore is unable to process

Action: change the column list of the multi datastore to contain only supported types.
 PL/SQL functions can be used in the comlumn list to convert unsupported types to
 supported types.

DRG-12606: error encountered while parsing COLUMNS list

Cause: An oracle error was encountered while parsing the columns list of the multi
 datastore.

Action: See next error on stack and take appropriate action

DRG-12607: only ctxsys can create MULTI_COLUMN preferences

Cause: In order to create a multi column datastore preference, the effective user must
 be ctxsys.

Action: contact your DBA to create the preference as ctxsys

DRG-12700: seed word must be a single word

Cause: seed word is not a single word

Action: use a single-word seed word

DRG-12800: Attribute NESTED_TYPE must have owner name as prefix

Cause: the attribute NESTED_TYPE does not have an owner name prefix

Action: reset the attribute NESTED_TYPE to include owner name prefix

DRG-12801: invalid type: *string*

Cause: invalid nested_type or

Action: check the owner and the type attribute names

DRG-12802: invalid type column: *string*

Cause: column specified does not exist in the type table

Action: check the type table

DRG-12803: invalid text datatype

Cause: LONG and LONG RAW are not supported in nested table

Action: change text column to a supported data type

DRG-12900: Operation:*string* for index: *string* has already been started

Cause: the specified operation has been started

Action: n/a

DRG-13000: error while adding or removing a sub lexer

Cause: see next error

Action: n/a

DRG-13001: sub lexer and multi lexer must have the same owner

Cause: you specified a sub lexer which is not owned by the owner of the enclosing multi-lingual lexer preference

Action: specify a sub lexer owned by the owner of the multi-lexer preference

DRG-13002: preference *string* is not a MULTI_LEXER

Cause: you tried to add a sub lexer to a lexer preference which cannot accept sub lexers. Only multi-lingual lexers can accept sub lexers.

Action: specify a multi lingual lexer

DRG-13003: preference *string* cannot be used as a sub lexer

Cause: you specified a preference for sub lexer which is not a lexer, or is a multi-lingual lexer or is an auto lexer

Action: specify a sub lexer which is not a multi-lingual lexer or an auto lexer

DRG-13004: language is invalid

Cause: you specified an invalid language for the sub lexer or stopword

Action: specify a valid language -- see NLS Support Guide for a list of valid languages

DRG-13005: alt_value cannot be an NLS language name

Cause: you specified an NLS language name as the alt value

Action: specify a non-NLS value

DRG-13006: sub lexer for this language is not defined

Cause: you tried to remove a sub lexer for a language, but no sub lexer was defined for that language

Action: None

DRG-13007: cannot define an alternate value for the DEFAULT sub lexer

Cause: you tried to define an alternate value for the DEFAULT sub lexer

Action: None

DRG-13008: cannot remove the DEFAULT sub lexer

Cause: you tried to remove the DEFAULT sub lexer

Action: None

DRG-13009: multi lexer preference does not have a DEFAULT sub lexer

Cause: you tried to use a multi lexer preference which does not have a DEFAULT sub lexer defined

Action: add a DEFAULT sub lexer to the multi lexer preference and retry

DRG-13010: alt_value is already used by another sub lexer

Cause: you tried to specify an alt value which is already in use by another sub lexer in the lexer preference

Action: specify a different alt value

DRG-13011: language column must be specified when using the multi lexer

Cause: you tried to create an index using a multi lexer preference, but you did not specify a language column

Action: specify a language column

DRG-13012: language column must be a char, varchar, or varchar2 type

Cause: you specified a language column which is not a char, varchar, or varchar2 type.

Action: specify a language column of correct type

DRG-13013: cannot have language independent DEFAULT sub lexer

Cause: you tried to define a language independent DEFAULT sub lexer

Action: DEFAULT sub lexer can only be language dependent

DRG-13014: base table has rows with language column value *string*

Cause: there are documents in the base table with language column value set to symbol for sublexer or stopword being removed

Action: base table should not have such rows

DRG-13015: sublexer *string* already exists in the index

Cause: cannot add a sub_lexer more than once

Action: if you want to update sub_lexer preferences, use update sub_lexer parameter or remove currently used sub_lexer

DRG-13100: index is not partitioned

Cause: you attempted to invoke a partition-level operation on an index which is not partitioned

Action: invoke appropriate index-level operation

DRG-13101: partition *string* does not exist in this index

Cause: you specified a partition name which does not exist

Action: specify correct partition name

DRG-13102: index partition name must be specified

Cause: you attempted to invoke a partition-level operation on a partitioned index but did not specify the partition name

Action: n/a

DRG-13103: index table *string* is partitioned

Cause: you attempted to perform an exchange partition including indexes, but one or more of the internal index tables are partitioned.

Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13104: indexes do not have equivalent settings for *string*

Cause: you attempted to perform an exchange partition including indexes, but the specified metadata setting is not equivalent across the two indexes, so the data cannot be exchanged

Action: specify EXCLUDING INDEXES on the exchange partition, then manually rebuild the indexes.

DRG-13200: failed to load dictionary file *string*

Cause: failed to load a dictionary file

Action: check whether the dictionary file exists in \$ORACLE_HOME/ctx/data/kolx or access permission is available

DRG-13201: KOREAN_LEXER is desupported

Cause: Using lexer type KOREAN_LEXER which is desupported.

Action: Use lexer type KOREAN_MORPH_LEXER instead.

DRG-13300: document size bigger than *string* bytes

Cause: size of the document being indexed is larger than the maximum supported size for the VARCHAR2 interface of stored procedure

Action: use the CLOB interface for the stored procedure

DRG-13301: syntax error in token data when expecting *string*, at line *string*

Cause: token data returned by the user-defined lexer procedure is incorrect

Action: modify user-defined lexer procedure to return expected data

DRG-13302: number of wildcard offsets must be in the range *string..string*, at line *string*

Cause: number of wildcard offsets specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid number of wildcard offsets

DRG-13303: value of wildcard offset must be in the range *string..string*, at line *string*

Cause: value of pre-normalized wildcard offset or post-normalized wildcard offset specified as value for the wildcard attribute does not meet the supported range

Action: modify user-defined lexer query procedure to return valid value for wildcard offset

DRG-13304: character referenced by wildcard attribute is not a wildcard character, at line *string*

Cause: The wildcard attribute value specified the offset of a wildcard character. The character at the specified offset is neither the '%' character nor the '_' character.

Action: Modify user-defined lexer query procedure.

DRG-13305: 'off' attribute value must be in the range *string..string*, at line *string*

Cause: value of 'off' attribute does not meet the supported range

Action: modify user-defined lexer index procedure to return valid value for 'off' attribute

DRG-13306: 'len' attribute value must be in the range *string..string*, at line *string*

Cause: value of 'len' attribute does not meet the supported range

Action: modify user-defined lexer index procedure to return valid value for 'len' attribute

DRG-13307: 'off'=string and 'len'=string references character past end-of-file of string character document, at line *string*

Cause: value of 'off' attribute plus value of 'len' attribute is greater than the number of characters in the document

Action: modify user-defined lexer index procedure to return valid values for 'off' and 'len' attributes

DRG-13308: query operator ABOUT not supported by USER_LEXER

Cause: the query contains an ABOUT operator while using USER_LEXER lexer type

Action: remove ABOUT operator from query or use lexer type other than USER_LEXER

DRG-13309: operation not supported by USER_LEXER

Cause: USER_LEXER does not support this operation

Action: stop the operation or use alternate lexer type

DRG-13310: index owner does not have EXECUTE privilege on USER_LEXER stored procedure *string*

Cause: user CTXSYS did not grant EXECUTE privilege on USER_LEXER stored procedure to the index owner

Action: user CTXSYS grant EXECUTE privilege on USER_LEXER stored procedure to index owner

DRG-13311: USER_LEXER stored procedure name contains a semicolon

Cause: the procedure name contains a semicolon character

Action: remove semicolon from procedure name or rename stored procedure

DRG-13312: user CTXSYS does not own USER_LEXER stored procedure *string*

Cause: CTXSYS does not have EXECUTE privilege on the USER_LEXER stored procedure

Action: make sure the stored procedure exists and is owned by CTXSYS

DRG-13400: Oracle Data Mining was not installed

Cause: The function you used depends on Oracle Data Mining, which has not been installed yet.

Action: make sure the Oracle Data Mining is installed

DRG-13401: the preference *string* type is not supported in this API

Cause: the type you have specified is not supported

Action: use a different type

DRG-13500: Parameter *string* must start with *string*

Cause: Wrong syntax for parameter_string.

Action: Make sure the parameter_string has the correct syntax

DRG-13501: Shadow Index Already Exists

Cause: A shadow index was previously created already

Action: Drop the shadow index and try again

DRG-13502: NOPOPULATE is not allowed in recreate_index_online

Cause: Specify NOPOPULATE in parameter_string in recreate_index_online

Action: Don't specify NOPOPULATE.

DRG-13503: POPULATE is not allowed for a local index in create_shadow_index

Cause: Specify POPULATE for a local index during create_shadow_index

Action: Don't specify POPULATE.

DRG-13504: *string* has no shadow index

Cause: Tried to perform exchange shadow without creating shadow index first

Action: create a shadow index before doing exchanges_shadow_index

DRG-13505: Keyword *string* is not allowed here in parameter_string

Cause: Wrong syntax for parameter_string

Action: Make sure the parameter_string has the correct syntax

DRG-13506: *string* has no shadow part

Cause: Tried to perform exchange shadow part without creating shadow part first

Action: create a shadow part before doing exchanges_shadow_index on the partition.

DRG-13507: SWAP and NOPOPULATE is incompatible

Cause: Specified SWAP and NOPOUPLATE in parameter string

Action: Correct the parameter string setting

DRG-13508: Not all partitions for index *string* are swapped

Cause: try to swap an local partitioned index when not all partitions are swapped

Action: Swap all partitions first, then swap the (local) index.

DRG-13509: error while swapping shadow index

Cause: an error occurred during the shadow index swap

Action: check error message stack for the actual error

DRG-13510: shadow index does not exist

Cause: Tried to perform exchange shadow without creating shadow index first

Action: create a shadow index before doing exchanges_shadow_index

DRG-13511: Cannot sync until all partitions for index *string* are swapped

Cause: Tried to swap with sync a local partitioned index when not all partitions are swapped

Action: Swap all partitions first, then swap the (local) index with sync_idx true.

DRG-13600: Syntax error in the result set descriptor at *string*

Cause: The result set descriptor has a syntax error

Action: check the syntax of the result set descriptor

DRG-13601: Syntax error in the order attribute

Cause: The order attribute has a syntax error

Action: check the syntax of the order attribute

DRG-13602: Number parsing error in *string*

Cause: The number string is malformed

Action: check the syntax of the number string

DRG-13603: Too many sort keys

Cause: Too many sort keys are specified

Action: reduce the number of sort keys

DRG-13604: Too many items to select

Cause: Too many select items are specified

Action: reduce the number of select items

DRG-13606: start_hit_num is not specified or out of valid range *number..number*

Cause: start_hit_num is not specified or out of valid range

Action: set a correct start_hit_num value

DRG-13607: end_hit_num is not specified or out of valid range *number..number*

Cause: end_hit_num is not specified or out of valid range

Action: set a correct end_hit_num value

DRG-13608: Temporary lob not created for ctx_query.result_set_document

Cause: Temporary lob is not allocated for ctx_query.result_set_document

Action: Create a temporary lob for ctx_query.result_set_document

DRG-13609: empty query is not allowed

Cause: No query is specified and result set descriptor has invalid elements

Action: Either specify query or change result set descriptor

DRG-13613: Missing index name

Cause: index name not specified in the API

Action: specify an index name

DRG-13614: result_set_inteface not supported with security policy

Cause: result set interface not supported with security policies

Action: cannot use result set interface on table with security policy

DRG-13615: Only one snippet element allowed in result set interface

Cause: More than one snippet element specified with result set interface

Action: Specify only one snippet element with result set interface

DRG-13617: invalid value for topn in result set interface

Cause: Cannot use topn less than or equal to zero

Action: Use topn greater than zero

DRG-13621: Duplicate group count element in result set interface

Cause: Group Count element specified more than once for group

Action: Specify one count element for a group

DRG-13622: Unsupported SDATA 'bucketby' value specified in the result set interface

Cause: An unsupported attribute value was specified for the 'bucketby' attribute.

Action: Specify a valid attribute value (range or single).

DRG-13624: invalid attribute value for 'collocates' in the result set interface

Cause: An unsupported attribute value was specified for a 'collocates' attribute.

Action: Valid attribute values are larger than zero.

DRG-13625: more than one sentiment element in query

Cause: There was more than one sentiment element in the query.

Action: Ensure there is only one sentiment element.

DRG-13626: too many Item elements in sentiment query

Cause: There were too many item elements in the sentiment query.

Action: Ensure there are less than 10 items in the sentiment element.

DRG-13627: Invalid item attribute value for *string* in result set interface

Cause: There was an unsupported attribute value specified for the item attribute.

Action: Provide a non-zero valid value for the attribute.

DRG-13628: Invalid value for 'sortby' SDATA group count in the result set interface

Cause: An unsupported attribute value was specified for the 'sortby' attribute.

Action: Valid attribute values are 'count' (default) and 'value'.

DRG-13629: Invalid value for 'order' SDATA group count in the result set interface

Cause: An unsupported attribute value was specified for the 'order' attribute.

Action: Valid attribute values are 'des' (default) and 'asc'.

DRG-13630: The 'bucketby' attribute is only supported for 'searchable' SDATA

Cause: The 'bucketby' attribute applies to 'searchable' SDATA sections only.

Action: Enable 'searchable' for this SDATA section.

DRG-13631: Empty queries are not supported with 'bucketby' single

Cause: Empty queries are supported with 'bucketby' range.

Action: Use 'bucketby' range or use a different query.

DRG-13632: Auto lexer is not supported with 'collocates' in the result set interface

Cause: An unsupported lexer was specified for 'collocates'.

Action: Use the basic lexer for 'collocates'.

DRG-13633: Error processing 'collocates' in the result set interface

Cause: Internal error processing the 'collocates' element.

Action: check syntax and re-try

DRG-13700: Syntax error in the Extraction Rule Descriptor

Cause: The Extraction Rule descriptor has a syntax error

Action: check the syntax of the Extraction rule descriptor

DRG-13701: Invalid rule_id

Cause: rule_id is NULL or rule_id <= 0

Action: rule_id must be number > 0

DRG-13702: Rule not found

Cause: No rule for given rule_id

Action: Specify a valid rule_id

DRG-13703: Invalid Type Specified: *string*

Cause: An invalid entity type was specified

Action: Specify a valid entity type

DRG-13704: Invalid Entity Type List

Cause: An invalid entity type list was specified

Action: Check format and types on entity type list

DRG-13705: Must use an Extract Policy

Cause: Using a non-extraction policy

Action: Use a policy created with `ctx_entity.create_extract_policy`

DRG-13706: Cannot use Entity Extraction Policy here

Cause: Using an entity extraction policy

Action: Use a policy created with `ctx_ddl.create_policy`

DRG-13707: Rule Engine Loading Failed

Cause: A user rule has an error

Action: Fix the user rule with the error

DRG-13708: Dictionary Loading Failed

Cause: The user dictionary has an error

Action: Fix the user dictionary

DRG-13709: Unsupported Language Specified: *string*

Cause: Unsupported Language Specified

Action: Specify a supported language

DRG-13710: Syntax Error in Dictionary

Cause: Syntax error in dictionary

Action: Correct syntax error in dictionary

DRG-13711: Stop Entity Not Found

Cause: Tried to remove a non-existent stop entity

Action: Cannot remove non-existent stop entity

DRG-13712: User Dictionary already loaded

Cause: Tried to load a 2nd user dictionary to a policy

Action: Drop the dictionary, and then load

DRG-13713: No User Dictionary loaded

Cause: No user dictionary loaded for this policy

Action: Cannot drop non-existent dictionary

DRG-13714: Duplicate Stop Entity

Cause: Trying to load a duplicate uncompiled stop entity

Action: Stop entity is already present

DRG-13715: Null name and type for Stop entity

Cause: Trying to load a stop entity with null name and type

Action: Stop entity must have at least one parameter non-null

DRG-13716: Entity Extraction not enabled

Cause: Haven't loaded correct event

Action: Must load correct event and level

DRG-13717: Null entry or alternate form in user dict

Cause: A entry or alternate form has null value

Action: Entries or alternate forms must be non-null

DRG-13718: No entity type given in user dict

Cause: An entry was not given an entity type

Action: All entries must have an entity type

DRG-13719: File and Drop are mutually exclusive

Cause: Tried to run ctxload with file and drop

Action: file and drop are mutually exclusive

DRG-13720: Stop entity already marked for deletion

Cause: Tried to re-drop a stop entity

Action: Only drop this stop entity once

DRG-13721: Duplicate Type on Typelist

Cause: Duplicate type on typelist

Action: Typelist must be unique

DRG-13722: Invalid Backreference

Cause: Backreference not between 1 and 10

Action: Backreferences must be between 1 and 10

DRG-13723: Invalid Attribute: *string*

Cause: Unsupported Attribute

Action: Follow correct syntax for rule or dictionary

DRG-13724: Invalid Attribute Value: *string*

Cause: Unsupported attribute value

Action: Follow correct syntax for rule or dictionary

DRG-13725: Type Name Too Long

Cause: Type name more than 30 bytes

Action: Type must be less than 30 bytes

DRG-13726: Invalid Tag: *string*

Cause: Unsupported Tag

Action: Follow correct syntax for rule or dictionary

DRG-13727: Missing Tag: *string*

Cause: Missing Necessary Tag

Action: Add tag for rule or dictionary

DRG-13728: Missing Attribute: *string*

Cause: Missing Necessary Attribute

Action: Add attribute for rule or dictionary

DRG-13729: Cyclic definition of rules, with type: *string*

Cause: Cyclic nested rules

Action: Remove the rule with the cycle

DRG-13730: Rules not found for the type: *string*

Cause: Rules doesn't exists for the type

Action: Remove the rule with the issue

DRG-13731: Level of nesting exceeded

Cause: More than 5000 levels of nesting

Action: Remove the rule with the issue

DRG-13732: Multiple types and backreferences are not supported

Cause: Using multiple types and backreferences is not supported

Action: Remove the rule with the issue

DRG-13733: dictionary for *string* is empty

Cause: Dictionary to import is empty

Action: The parameter cannot be null or empty

DRG-13734: Oracle supplied dictionary type "*string*" with backreference is not supported

Cause: Use of supplied dictionary types with backreference is not supported

Action: Remove or modify the rule with the issue

DRG-13735: Syntax error in the extraction rule: "*number*"

Cause: The extraction rule descriptor has a syntax error

Action: Check the syntax of the Extraction rule descriptor

DRG-13900: Auto_Optimize Process is already started

Cause: Auto_Optimize Process is already started

Action: Can't start auto_optimize when it's already running

DRG-13901: Index must have stage_itab

Cause: Auto_Optimize works on indexes with stage_itab

Action: Use an index with stage_itab for auto_optimize

DRG-13902: Index/Partition already added to auto_optimize list

Cause: Index/Partition already added to auto_optimize list

Action: Can't add index/partition to list twice

DRG-13903: Index/Partition not on the auto_optimize list

Cause: Index/Partition not on the auto_optimize list

Action: Can't remove index/partition from list

DRG-13904: Index/Partition has max_rows set to non-zero value

Cause: Index/Partition is using max_rows to merge

Action: Can't set both Auto_optimize and max_rows

DRG-13905: Index/Partition has auto optimization on

Cause: Index/Partition is using auto optimization

Action: Can't set both Auto_optimize and max_rows

DRG-50000: requested size larger than pagesize

Cause: The requested memory size is larger than page size,

Action: Contact support

DRG-50100: CORE LSF error: *string*

Cause: detect a CORE LSF error

Action: look up the core error and take appropriate action

DRG-50101: CORE LEM error: *string*

Cause: detect a CORE LEM error while reading the error stack

Action: Contact support

DRG-50102: error getting database compatibility

Cause: could not obtain database compatibility setting

Action: Contact support

DRG-50200: Third-party filter internal error

Cause: Third-party filter could not filter this document because of an internal error.

Action: Contact Oracle Support.

DRG-50300: error sending message from server to client

Cause: internal database error or internal Text error

Action: Call customer support

DRG-50301: server error reading request queue

Cause: database error or internal Text error

Action: Call customer support

DRG-50302: server error reading OOB break queue; cannot detect interrupts

Cause: database error or internal Text error

Action: Call customer support

DRG-50303: error in bufout

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50304: error in execute()

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50305: getcmd() called when one of the queue names is NULL

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50400: maximum number of fuzzy match candidates exceeded: *string*

Cause: Internal error, probably result of large number of indexed words

Action: Contact Oracle support

DRG-50401: failed to retrieve fuzzy match candidates from db: *string*

Cause: Internal error

Action: Contact Oracle support

DRG-50402: Index validation failed for one or more tokens

Cause: Index validation generated an error for one or more tokens

Action: Check the ctx log for the detailed errors

DRG-50500: only RULE_CLASSIFIER is accepted in this API

Cause: you specified an illegal classifier

Action: use RULE_CLASSIFIER

DRG-50501: classifier preference not specified

Cause: the classifier preference is not specified

Action: specify a classifier preference

DRG-50502: cannot use RULE_CLASSIFIER in this API

Cause: you specified RULE_CLASSIFIER

Action: use a different classifier

DRG-50503: unsupported classification method

Cause: you specified an unsupported classification method

Action: use a different classifier

DRG-50504: invalid column datatype for *string* table

Cause: the column datatype is invalid

Action: specify a different datatype

DRG-50505: invalid sentiment label

Cause: A sentiment label other than 0, 1 or 2 was present in the training table.

Action: Use 0, 1 or 2 as a training label.

DRG-50600: assertion failed

Cause: An internal check-condition has been violated

Action: Contact Oracle support for assistance

DRG-50601: fatal error

Cause: A fatal error has occurred

Action: Contact Oracle support for assistance

DRG-50603: unrecognized operation code *string*

Cause: Bad operation code was encountered (reached switch default:)

Action: check .h files versions

DRG-50607: failed to obtain column info for cid *string*

Cause: internal error, probably a bug

Action: call customer support

DRG-50608: unexpected end of data

Cause: internal error, probably a bug

Action: call customer support

DRG-50609: pipe internal error

Cause: internal error, probably a bug

Action: call customer support

DRG-50610: internal error: *string*

Cause: internal error, probably a bug

Action: call customer support

DRG-50611: Third party lexer internal error: *string*

Cause: internal error from inxight lexer

Action: call customer support

DRG-50612: internal error: you need to call bind first for this insertion mode

Cause: internal error

Action: call customer support

DRG-50613: internal error: model type is not supported in drctrwpf

Cause: internal error

Action: call customer support

DRG-50614: library loading error in *string*

Cause: internal error

Action: call customer support

DRG-50615: Third party lexer timed out

Cause: Third-party auto lexer could not complete tokenization because the lexer timed out.

Action: Increase the value of the TIMEOUT attribute of the auto_lexer and reindex the document. If TIMEOUT is set to 0 and the lexer still hangs context Oracle Support.

DRG-50617: Query string too long: *string*

Cause: internal error

Action: Invalid query string provided

DRG-50618: Failed to create XML context

Cause: internal error

Action: Failed to create XML context for XTI conversion from XML text

DRG-50700: unknown command (args=queue, command)

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50701: error in listener.get_cmd()

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50702: error in drtlsleep()

Cause: this is an internal error in a testing function

Action: Contact Oracle Support

DRG-50703: listener startup error

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-50704: Net8 listener is not running or cannot start external procedures

Cause: Oracle Text needs to call external code to complete your request, and could not start the extproc agent process.

Action: Start listener if it is configured for external procedures and is not running. If your listener is running, configure it for starting external procedures and restart it. Consult Oracle documentation for details.

DRG-50800: failed to open cursor

Cause: Too many cursors open for internal queries

Action: implement cursor cleanup routine

DRG-50801: failed to parse cursor

Cause: parse error on an internal query

Action: check versions of code

DRG-50802: failed to bind input

Cause: bind error on an internal query

Action: check versions of code

DRG-50803: failed to define output

Cause: define error on an internal query

Action: check versions of code

DRG-50804: failed to exec cursor

Cause: exec error on an internal query

Action: debug code

DRG-50805: failed to close cursor

Cause: cursor close error on an internal query

Action: check versions of code

DRG-50806: failed to rollback

Cause: transaction rollback error

Action: contact support

DRG-50807: failed to commit

Cause: internal error

Action: contact support

DRG-50850: *string*

Cause: This is an oracle error

Action: See RDBMS documentation

DRG-50851: SQL execute failed

Cause: failed to execute a sql statement

Action: please report this as a bug

DRG-50852: failed to turn SQL trace on

Cause: internal error,

Action: Please contact Oracle support

DRG-50853: fetch error

Cause: fetch error on an internal query

Action: check versions of code

DRG-50855: logoff fail

Cause: Fail to logoff from the database

Action: check versions of code

DRG-50857: oracle error in *string*

Cause: this is an informational message

Action: See error

DRG-50858: OCI error: *string*

Cause: a generic OCI error occurred

Action: Please contact Oracle support

DRG-50859: failed to allocate statement handle

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50860: failed to prepare statement

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50861: failed to obtain type descriptor

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50862: failed to create new Oracle object

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50863: string assignment failed

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50864: number assignment failed

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50865: failed to append to collection

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50866: failed to resize string

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50867: failed to free Oracle object

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50868: failed to free statement handle

Cause: This is an internal error

Action: Contact Oracle Support

DRG-50900: text query parser error on line *string*, column *string*

Cause: bad query

Action: fix query

DRG-50901: text query parser syntax error on line *string*, column *string*

Cause: bad query

Action: fix query

DRG-50902: unexpected character *string*

Cause: bad query

Action: fix query

DRG-50903: invalid weight *string*

Cause: invalid weight

Action: fix query

DRG-50904: weight *string* outside valid range 0.1 to 10.0

Cause: invalid weight

Action: fix query

DRG-50905: invalid score threshold *string*

Cause: invalid score threshold

Action: fix query

DRG-50906: score threshold *string* is not an integer

Cause: invalid score threshold

Action: fix query

DRG-50907: score threshold *string* outside valid range 1 to 100

Cause: invalid score threshold

Action: fix query

DRG-50908: invalid maximum number of documents *string*

Cause: invalid maximum number of documents

Action: fix query

DRG-50909: maximum number of documents *string* is not an integer

Cause: invalid maximum number of documents

Action: fix query

DRG-50910: max documents requested *string* outside valid range 1 to 65535

Cause: invalid maximum number of documents

Action: fix query

DRG-50911: invalid first document number *string*

Cause: invalid first document number

Action: fix query

DRG-50912: first document number *string* is not an integer

Cause: invalid first document number

Action: fix query

DRG-50913: first document requested *string* is not a positive number

Cause: invalid first document number

Action: fix query

DRG-50914: invalid last document number *string*

Cause: invalid last document number

Action: fix query

DRG-50915: last document number *string* is not an integer

Cause: invalid last document number

Action: fix query

DRG-50916: last document *string* is less than first document

Cause: invalid last document number

Action: fix query

DRG-50917: escape on at end of text query string

Cause: unbalanced escape characters

Action: turn escape off

DRG-50918: mismatched close escape character

Cause: no matching open escape character for close escape

Action: match open and close escapes

DRG-50919: NEAR operand not a phrase, equivalence or another NEAR expression

Cause: invalid operand type for NEAR operator

Action: correct operand type

DRG-50920: part of phrase not itself a phrase or equivalence

Cause: invalid type of expression which is part of phrase

Action: fix query

DRG-50921: EQUIV operand not a word or another EQUIV expression

Cause: invalid operand type for EQUIV operator

Action: correct operand type

DRG-50922: PL/SQL execution failed for *string*

Cause: PL/SQL function may not exist or is returning bad value

Action: PL/SQL may not exist or is returning bad value

DRG-50923: could not rewrite PL/SQL for execution

Cause: parser internal

Action: call support

DRG-50924: PL/SQL inside PL/SQL not supported

Cause: PL/SQL function call returned another PL/SQL call

Action: remove recursive PL/SQL

DRG-50925: could not parse return value of PL/SQL

Cause: string returned by PL/SQL function could not be parsed

Action: fix PL/SQL function being called

DRG-50926: invalid text query string

Cause: query string empty or made up of invalid characters

Action: fix query

DRG-50927: parser failed on line *string* on column *string*

Cause: bug

Action: call support

DRG-50928: reserved failure on line *string* on column *string*

Cause: bug

Action: call support

DRG-50929: parser internal on line *string* on column *string*

Cause: bug

Action: call support

DRG-50930: parser memory failure on line *string* on column *string*

Cause: memory allocation or freeing error

Action: call support

DRG-50931: parser not opened

Cause: bug

Action: call support

DRG-50932: parser preference initialization failed

Cause: bug

Action: call support

DRG-50933: parser hash insert failure

Cause: bug

Action: call support

DRG-50934: parser hash create failure

Cause: bug

Action: call support

DRG-50935: parser component failure

Cause: bug

Action: look for other errors

DRG-50936: query word *string* is too complex for index

Cause: bug

Action: look for other errors

DRG-50937: query too complex

Cause: query is too complex for our query evaluator

Action: make query smaller

DRG-50938: parser already bound

Cause: internal coding mistake

Action: call support

DRG-50939: parser not set

Cause: bug

Action: call support

DRG-50940: parser not parsed

Cause: bug

Action: call support

DRG-50941: PL/SQL function *string* cannot be executed

Cause: PL/SQL function may not exist or cannot be executed by user

Action: rewrite PL/SQL function specified in query

DRG-50942: errors: *stringstring*

Cause: PL/SQL function encountered error -- this is the error message

Action: See error message

DRG-50943: query token too long on line *string* on column *string*

Cause: A query token is longer than 256 bytes

Action: Rewrite query

DRG-50944: NEAR operator not supported for theme index

Cause: NEAR operator used in theme index query

Action: Rewrite query without NEAR operator

DRG-50945: Illegal phrase in query for theme index

Cause: Phrase incorrectly defined in theme index query

Action: Rewrite query

DRG-50946: Invalid unary operator for theme index

Cause: Stemming, fuzzy match and soundex not allowed for theme index

Action: Rewrite query

DRG-50947: ABOUT clause not allowed without a theme index

Cause: The query contains an ABOUT clause, but there is no theme index to support it

Action: Rewrite query

DRG-50948: ABOUT clause required in the absence of a text index

Cause: There is no text index, but the query does not contain any about clause. With only a theme index present, each query term must belong to an ABOUT clause

Action: Rewrite query

DRG-50949: too many SQEs

Cause: Too many SQEs to expand

Action: Rewrite query or SQE

DRG-50950: circular SQE found

Cause: Circular SQE reference is found.

Action: Rewrite query or SQE

DRG-50951: Unable to resolve element name for attribute *string*

Cause: XPATH expression such as *A*/@B* or *A//@B* is not supported.

Action: Rewrite query

DRG-50952: Section is not PATH section group

Cause: XPATH expression has section which is not created using PATH section group.

Action: Rewrite query not to use XPATH expression or create the index with PATH section group

DRG-50953: Unable to determine section name

Cause: XPATH expression should not end with *.* or ***

Action: Rewrite the path expression not to use *.* or *** at the end

DRG-50954: Theme index is required for CTXCAT about queries

Cause: There is no theme index, but the catsearch query contains about clause. You must create a theme index before using ABOUT query against CTXCAT index

Action: create theme index

DRG-50955: Missing comma in transform clause *string*

Cause: A transform clause in a query template is missing a comma

Action: Add the comma in the appropriate position

DRG-50956: Theme index is required for THEMES transform queries

Cause: There is no theme index, but the operator TRANSFORM is used with THEMES as its parameter. You must create a theme index before using THEMES in TRANSFORM operator.

Action: create theme index

DRG-50957: Missing *textquery* element in query template *string*

Cause: The *textquery* tag is missing or misspelled in a query template

Action: Correct the missing tag

DRG-50958: Missing quote in transform clause *string*

Cause: A transform clause in a query template is missing a quote

Action: Add the quote in the appropriate position

DRG-50959: Query length exceeds *string* bytes

Cause: the query length exceeds the maximum allowed length

Action: reduce the length of the query

DRG-50960: Mild not operand not a term or phrase

Cause: invalid operand type for MNOT operator

Action: correct operand type

DRG-50961: Missing *string* for *string* clause

Cause: the specified tag is missing from the specified complex query clause

Action: Add missing clause

DRG-50962: Query operators are not allowed in transform input *string*

Cause: You specified an operator (such as wildcard) in the input string for the transform operator

Action: Remove or escape the query operator

DRG-51002: unexpected component failure

Cause: Internal error

Action: Contact Oracle support

DRG-51017: unable to open storage buffer for fuzzy match candidates

Cause: Internal error, probably insufficient memory

Action: Contact Oracle support

DRG-51019: unable to open or illegal format for fuzzy match data file: *string*

Cause: Unable to open OS file containing fuzzy matching information or the file was not of the correct format

Action: Consult the documentation for correct location of the fuzzy match information files and check for file damage

DRG-51020: out of memory in fuzzy matcher

Cause: Cannot allocate more memory

Action: Contact your system administrator

DRG-51021: undefined error in fuzzy matcher

Cause: Internal error

Action: Contact Oracle support

DRG-51022: undefined error in stemmer

Cause: Internal error

Action: Contact Oracle support

DRG-51023: stemmer file cannot be opened

Cause: Unable to open OS file containing stemmer lexicon, or the file contents were not correct

Action: Consult documentation for for correct location of the stemmer lexicons and check for file damage

DRG-51024: out of memory in stemmer

Cause: Cannot allocate more memory

Action: Contact your system administrator

DRG-51025: an invalid character was passed to the stemmer

Cause: Invalid character in word input to the stemmer

Action: Remove invalid character from word to be stemmed

DRG-51028: unexpected error in fuzzy match expansion: *string*

Cause: Internal error

Action: Contact Oracle support

DRG-51029: unexpected error in stemmer expansion: *string*

Cause: Internal error

Action: Contact Oracle support

DRG-51030: wildcard query expansion resulted in too many terms

Cause: User error

Action: Make wildcard query narrower

DRG-51100: invalid program argument index

Cause: This is an internal error

Action: Contact Oracle Support to report a bug

DRG-51101: argument processing callback failed

Cause: this is an internal error

Action: Contact Oracle support to report a bug

DRG-51200: open keymap failed for index id = *string*

Cause: Failed to initialize the keymap for the column id specified.

Action: Check index ID. Contact support if caused by internal errors

DRG-51201: failed to perform DDL operation: database object *string*

Cause: Textkey mapping service failed on DDL operation

Action: Check Oracle error and take corrective action

DRG-51202: invalid key mapping operation mode : *string*

Cause: invalid keymap mode value found. This is an internal error

Action: Contact Oracle support

DRG-51203: found doc ids without mappings during get maps

Cause: found doc ids without mappings during get mapping by doc ids, the index data and keymap service are out of synch.

Action: Contact Oracle support

DRG-51300: error getting dml Queue lock

Cause: a server must have hung while processing the dml Queue, leaving it locked

Action: Contact Oracle support

DRG-51301: error releasing dml Queue lock

Cause: internal database error, or perhaps someone dropped the lock while we were using it

Action: Contact Oracle support

DRG-51311: DML lock handle previously allocated

Cause: internal error

Action: Contact Oracle support

DRG-51312: DML lock internal error *string*

Cause: internal error

Action: Contact Oracle support

DRG-51313: timeout while waiting for lock

Cause: most likely an internal error

Action: Contact Oracle support

DRG-51314: index is not empty

Cause: you attempted to invoke populate_pending against an index which already has or has had indexed documents.

Action: populate pending manually, or recreate the index NOPOPULATE

DRG-51315: AGGMERGE lock internal error *string*

Cause: internal error

Action: Contact Oracle support

DRG-51400: incomplete SEARCH_ON VALUE or SEARCH_ON TEXT_VALUE clause

Cause: An attempt was made to create or alter an XML Search Index with a SEARCH_ON VALUE or SEARCH_ON TEXT_VALUE clause that did not list a data type specification.

Action: Specify the data type specification for the SEARCH_ON VALUE or SEARCH_ON TEXT_VALUE clause as part of the parameters to the CREATE SEARCH INDEX or ALTER INDEX statements. The data type specification must include at least one of NUMBER, BINARY_DOUBLE, TIMESTAMP, or VARCHAR2.

DRG-51401: duplicate SEARCH_ON specification for *string* component

Cause: The specified parameter string for an XML or JSON Search Index had a duplicate SEARCH_ON clause for one the following: TEXT, NUMBER, BINARY_DOUBLE, TIMESTAMP or VARCHAR2.

Action: Specify the duplicate component only once.

DRG-51402: cannot use SEARCH_ON feature with this index

Cause: An attempt was made to specify a SEARCH_ON clause as part of the index parameter string for an index that was not an XML Search Index or a JSON Search Index.

Action: Remove the SEARCH_ON clause from the parameter string.

DRG-51403: cannot index JSON type column *string* with this indextype

Cause: An attempt was made to create a CONTEXT or SEARCH INDEX with no FOR JSON clause on a JavaScript Object Notation (JSON) type column.

Action: Use the FOR JSON clause to index JSON type columns.

DRG-51404: invalid token '*string*' found for ALTER of *string* Search Index

Cause: An invalid token was found when parsing a parameter string that modified options specified to JSON or XML Search Index.

Action: Verify the token follows the syntax for the ALTER INDEX parameter string. Remove any options that do not relate to JSON or XML Search Index from the parameter string and retry the operation. Issue a separate ALTER INDEX statement to modify the removed options using the REPLACE command in the parameter string.

DRG-51801: failed to seek in file: *string*

Cause: this is an internal error

Action: Contact Oracle support

DRG-51802: failed to read from file: *string*

Cause: this is an internal error

Action: Contact Oracle support

DRG-51803: failed to open file: *string*

Cause: this is an internal error

Action: Contact Oracle support

DRG-51804: failed to write to file: *string*

Cause: this is an internal error

Action: Contact Oracle support

DRG-52100: *string* returned internal error code *string*

Cause: this is an internal error

Action: Contact Oracle support

DRG-52101: an invalid session handle was passed to Oracle Text

Cause: this is an internal error

Action: Contact Oracle support

DRG-52102: an invalid transaction handle was passed to Oracle Text

Cause: this is an internal error

Action: Contact Oracle support

DRG-52103: the Oracle Text environment could not reset

Cause: this is an internal error

Action: Contact Oracle support

DRG-52104: the Oracle Text environment could not initialize

Cause: this is an internal error

Action: Contact Oracle support

DRG-52105: no delete function found

Cause: this is an internal error

Action: Contact Oracle support

DRG-52106: Oracle Text service results could not be committed

Cause: this is an internal error

Action: Contact Oracle support

DRG-52107: ctxkbt internal error

Cause: this is an internal error

Action: Contact Oracle support

DRG-52108: failed to delete knowledge base user extension

Cause: this is an internal error

Action: check file permissions or contact Oracle support

DRG-52109: error in reading thesaurus

Cause: this is an internal error

Action: Contact Oracle support

DRG-52110: error in writing extended knowledge base

Cause: this is an internal error

Action: Contact Oracle support

DRG-52111: error in knowledge base cache

Cause: this is an internal error

Action: Contact Oracle support

DRG-52112: improper Chinese string *string of length number*

Cause: this is an internal error

Action: n/a

DRG-52113: improper Japanese string *string of length number*

Cause: this is an internal error

Action: n/a

DRG-52200: invalid state during export

Cause: this is an internal error

Action: Contact Oracle support

DRG-52201: incompatible Oracle Text versions

Cause: attempting to import an incompatible version of Oracle Text data

Action: make sure source and target Oracle Text versions are compatible

DRG-52202: invalid class name: *string*

Cause: the specified class name is not valid

Action: Contact Oracle Support

DRG-52203: invalid object name: *string*

Cause: the specified object name is not valid

Action: Contact Oracle Support

DRG-52204: error while registering index

Cause: this is an internal error

Action: Contact Oracle support

DRG-52205: class *string* and object *string* already exists for this index

Cause: duplicate entry of class and object

Action: Contact Oracle support

DRG-52206: error while registering index object

Cause: this is an internal error

Action: Contact Oracle support

DRG-52207: the specified attribute does not exist: *string*

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52208: the specified attribute already exist: *string*

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52210: error while registering value for attribute: *string*

Cause: This is an internal error

Action: Contact Oracle Support

DRG-52211: error while registering partition

Cause: this is an internal error

Action: Contact Oracle support

DRG-52212: error while registering cdi columns

Cause: this is an internal error

Action: Contact Oracle support

DRG-52213: Insufficient privileges

Cause: this is an internal error

Action: Contact Oracle support

DRG-52300: Index *string.string* does not exist

Cause: The given index does not exist for the current user

Action: Give a valid index name

DRG-52301: Query Stats is already enabled for this index

Cause: attempting to enable the query stats for an index for which it is already enabled

Action: None. No need to enable again

DRG-52302: Query Stats is not enabled for this index

Cause: attempting to disable the query stats for an index for which it is not enabled

Action: None. No need to disable if it is not already enabled

DRG-52303: Option String is full

Cause: Index option string is full

Action: None

DRG-52304: This operation requires Query Stats to be enabled for the index

Cause: attempting to do an operation which required query stats option for the index to be enabled

Action: Enable query stats option for the index using `ctx_output.enable_query_stats()`

DRG-52305: Unknown value, *string*, passed in to *stat_type*

Cause: An invalid value is passed in to the parameter `stat_type`

Action: Give a valid value

DRG-52400: Dictionary *string* already exists

Cause: The specified dictionary already exists

Action: Must drop the dictionary if you want to re-create it.

DRG-52401: Invalid language *string* specified

Cause: Language specified is invalid

Action: Must specify a valid language

DRG-52402: Dictionary name is invalid

Cause: The specified dictionary name is invalid

Action: Must provide valid dictionary name

DRG-52403: Dictionary *string* does not exist

Cause: The specified dictionary does not exist

Action: Retry with the correct dictionary name

DRG-52404: `policy_languages` requires `auto_lexer`

Cause: `policy_languages` requires the `auto_lexer` to retrieve language information. The `auto_lexer` was not specified, however.

Action: Specify `auto_lexer` for the policy.

EVM-00001 to EVM-00901

EVM-00001: Cannot write raw events to a terminal

Cause: Attempted to redirect binary events to a terminal.

Action: Use evmshow to format events for display.

EVM-00002: Use evmshow to format events for display

Cause: Attempted to redirect binary events to a terminal.

Action: Use evmshow instead.

EVM-00003: Failed to open file "*string*": *string*

Cause: Filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00004: Failed to open channel config file "*string*"

Cause: Configuration file name, the path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00006: Failed to create temporary file

Cause: The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00007: Failed to write to temporary file

Cause: The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00008: Failed to read from temporary file

Cause: The file being used as a temporary file for evmsort had one of the following issues; filename, path or the permissions were not valid.

Action: Use a valid path and filename, check permissions. Otherwise contact Oracle Customer Support.

EVM-00009: Failed to create EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00010: Failed to read from EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00011: Failed to write to EVM posting connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00012: Failed to create EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00013: Failed to read from EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00014: Failed to write to EVM listening connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00015: Failed to create EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00016: Failed to read from EVM service connection

Cause: Error occurred while communicating with the EVM daemon.

Action: Check log and status of the EVM daemon.

EVM-00017: Failed to start EVM service "*string*"

Cause: EVM daemon failed to start.

Action: Check log for the EVM daemon.

EVM-00018: Failed to write to output stream

Cause: Failed to write to standard output.

Action: Contact Oracle Customer Support.

EVM-00019: Failed to read event from input stream

Cause: Bad input file for evmshow/evmsort EOF missing.

Action: Check the input file.

EVM-00020: Failed to create event subscription

Cause: Bad network connection between subscriber and EVM daemon.

Action: Check the network connection and filter string.

EVM-00021: Failed to create filter

Cause: Used a null filter string or memory allocation failed.

Action: Use a non null filter string.

EVM-00022: Invalid filter string

Cause: Used a null or invalid filter string.

Action: Contact Oracle Customer Support.

EVM-00023: Filter test operation failed

Cause: Used a null or invalid filter string.

Action: Use a non null filter string. Otherwise contact Oracle Customer Support.

EVM-00024: Lost connection to EVM daemon

Cause: Evmlogger lost connection to evmdaemon.

Action: Check status of evmlogger, evmd daemons and logs.

EVM-00025: Authorization database error

Cause: Not authorized to post/listen for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post/listen for specific events.

EVM-00026: Failed to post event "*string*"

Cause: Evmpost failed to post an event.

Action: Check the status and log for EVM daemon.

EVM-00027: Memory allocation failure

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00029: Event contains invalid values

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00030: Event name is missing

Cause: Name of the event was missing.

Action: Use a valid syntax for an event.

EVM-00031: Event name has too few components

Cause: Invalid syntax for an event was used.

Action: Use a valid syntax for an event.

EVM-00032: Failed to write event

Cause: Failed to write event to output file.

Action: Check the permissions of the file. Otherwise contact Oracle Customer Support.

EVM-00033: Error in input file "*string*", line *number*

Cause: Failed to parse input file.

Action: Check input file and the line for possible errors. Otherwise contact Oracle Customer Support.

EVM-00034: Error: *string*

Cause: Error Occured.

Action: Look at the error message for details.

EVM-00035: EVM service "*string*" terminated with exit code *number*

Cause: EVM daemon died.

Action: Check the EVM daemon log.

EVM-00036: Host "*string*" is unknown

Cause: Invalid hostname discovered while trying to create a connection to the EVM daemon.

Action: Check the hostname, on which EVM daemon is running. Otherwise contact Oracle Customer Support.

EVM-00037: Failed to connect to EVM daemon on "*string*"

Cause: EVM daemon is dead or is not responding.

Action: Check the status of EVM daemon and logs.

EVM-00038: Failed to create an EVM event

Cause: Failed to create an EVM event.

Action: Check the EVM daemon log.

EVM-00039: Invalid port number in host name "*string*"

Cause: Used an invalid port number.

Action: Use a valid or a different port number.

EVM-00040: Error occurred while reading from "*string*"

Cause: Error occurred when evmshow was reading from an input file.

Action: Check the input file.

EVM-00042: Use "*string* -A" to format events, or pipe output to evmshow

Cause: Invalid use of evmshow command.

Action: Use evmshow command as instructed.

EVM-00043: Attempting to reconnect to the EVM daemon...

Cause: Evmwatch trying to reconnect to the evm daemon.

Action: Not an error message.

EVM-00044: Attempting to reconnect to the EVM daemon on "*string*"...

Cause: Evmwatch trying to reconnect to the evm daemon on this host.

Action: Not an error message.

EVM-00045: EVM connection re-established

Cause: Evmwatch was able to reconnect to the evm daemon.

Action: Not an error message.

EVM-00104: End of file reached unexpectedly

Cause: End of event template file reached unexpectedly.

Action: Check the event template file in evm/admin.

EVM-00105: Missing end-of-group character

Cause: end-of-group character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00106: Missing end-of-string character

Cause: end-of-string character missing in event template file.

Action: Check the event template file in evm/admin.

EVM-00107: Value "*string*" is not valid

Cause: Invalid value found in the event template file.

Action: Check the event template file in evm/admin.

EVM-00108: Keyword "*string*" is not valid

Cause: Invalid keyword found in the event template file.

Action: Check the event template file in evm/admin.

EVM-00201: Failed to allocate space for application object

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00202: Failed to allocate space for local lock pathname

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00301: Failed to open logger config file "*string*"

Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00302: Configuration error - using default configuration

Cause: Configuration file had invalid configuration details

Action: Check the configuration file.

EVM-00303: Keyword "*string*" is invalid in this position

Cause: Valid Keyword was used in an invalid position in configuration file.

Action: Use the correct syntax.

EVM-00304: Configuration error in file *string*, line *number*

Cause: Configuration error in configuration file.

Action: Check the configuration file.

EVM-00305: Memory allocation failure for "string"

Cause: The system is running low on memory.

Action: Check the availability of memory in the system.

EVM-00306: Failed to create filter for "string"

Cause: Failed to create a filter for events for evmlgger.

Action: Check the availability of memory.

EVM-00307: Filter string invalid for "string"

Cause: Used a null filter string or memory allocation failed.

Action: Use a non null filter string.

EVM-00308: Failed to open eventlog "string": string

Cause: Eventlog file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00309: Failed to write to eventlog "string"

Cause: Eventlog had one of the following problems; size or permissions were not valid.

Action: Check the permissions and the size of the eventlog file. Otherwise contact Oracle Customer Support.

EVM-00310: Invalid suppression filter for eventlog "string"

Cause: Invalid filter was used.

Action: Use a non null filter. Otherwise contact Oracle Customer Support.

EVM-00311: Invalid entry in eventlog "string" (number events OK)

Cause: Evmlgger found an invalid entry in eventlog.

Action: Check the eventlog file.

EVM-00312: Eventlog "string" disabled

Cause: Events could not be written to the eventlog file.

Action: Check the permissions,max size of the logfile.

EVM-00313: Eventlog "string" re-enabled

Cause: Events logging is reenabled.

Action: Not an error message.

EVM-00314: Forwarder "string" disabled

Cause: Forwarding is disabled by the evmlgger.

Action: Not an error message.

EVM-00315: Forwarder "*string*" re-enabled

Cause: Forwarding is disabled by the evmlogger.

Action: Not an error message.

EVM-00316: Suppression disabled for "*string*"

Cause: Error message filtering suppression disabled for this string.

Action: Not an error message.

EVM-00317: Suppression re-enabled for "*string*"

Cause: Error message filtering suppression reenabled for this string.

Action: Not an error message.

EVM-00318: Failed to open config info file "*string*"

Cause: Configuration file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00319: Keyword "*string*" is not allowed in a secondary config file

Cause: Invalid Keyword was used.

Action: Use a valid Keyword.

EVM-00323: Config file "*string*" has insecure write permission

Cause: The configuration file had write permissions for the group 'other'.

Action: Change the write permissions for the configuration file

EVM-00324: Config file "*string*" has incorrect ownership

Cause: Configuration file should be owned by root or bin.

Action: Change the owner of configuration file to root or bin.

EVM-00325: Config file "*string*" is not a regular file

Cause: Configuration file is not a regular file.

Action: Check the configuration file.

EVM-00401: Failed to open binary event library file

Cause: Binary event file had one of the following problems; filename, path or permissions were not valid.

Action: Check whether path and permissions are valid. Otherwise contact Oracle Customer Support.

EVM-00601: Data read from the input stream is not a valid EVM event

Cause: evmshow tried to read an invalid EVM event.

Action: Check the logs for the evm daemon.

EVM-00701: Check that the event is registered and you are authorized to post it

Cause: Not authorized to post for certain events.

Action: Check evm.auth file to ensure the current user is authorized to post the specific event.

EVM-00702: Priority must be an integer in the range 0-*number*

Cause: Used an integer out of the range for priority.

Action: Use a valid integer.

EVM-00801: Missed *number* subscribed-to event(s)

Cause: Missed some events during the connection setup phase.

Action: Not an error message.

EVM-00802: Failed to reconnect within *number* seconds - terminating

Cause: Failed to establish a connection with EVM daemon.

Action: Check the logs for EVM daemon.

EVM-00901: Invalid sort specification "*string*"

Cause: Invalid sort specification used for evmsort.

Action: Use a valid sort specification. Look at documentation for evmsort using evmsort -h.

EXP-00000 to EXP-00114

EXP-00000: Export terminated unsuccessfully

Cause: Export encountered an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual, and take appropriate action.

EXP-00001: data field truncation - column length=*number*, buffer size=*number* actual size=*number*

Cause: Export could not fit a column in the data buffer.

Action: Record the given size parameters and the accompanying messages and report this as an Export internal error to customer support. (Part of the table has been exported. Export will continue with the next table.)

EXP-00002: error in writing to export file

Cause: Export could not write to the export file, probably because of a device error. This message is usually followed by a device message from the operating system.

Action: Take appropriate action to restore the device.

EXP-00003: no storage definition found for segment(*number*, *number*)

Cause: Export could not find the storage definitions for a cluster, index, or table.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00004: invalid username or password

Cause: An invalid username or password was specified.

Action: Retry with a valid username and password.

EXP-00005: all allowable logon attempts failed

Cause: Attempts were repeatedly made to log on with an invalid username or password.

Action: Shut down the utility, then restart and retry with a valid username and password.

EXP-00006: internal inconsistency error

Cause: Export's data structure was corrupted.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00007: dictionary shows no columns for *string.string*

Cause: Export failed to gather column information from the data dictionary. The table may have been dropped.

Action: Retry the export and, if this error recurs, report it as an Export internal error to customer support.

EXP-00008: ORACLE error *number* encountered

Cause: Export encountered the referenced Oracle error.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00009: no privilege to export *string*'s table *string*

Cause: An attempt was made to export another user's table. Only a database administrator can export another user's tables.

Action: Ask your database administrator to do the export.

EXP-00010: *string* is not a valid username

Cause: An invalid username was specified.

Action: Shut down the utility, then restart and retry with a valid username.

EXP-00011: *string.string* does not exist

Cause: Export could not find the specified table.

Action: Retry with the correct table name.

EXP-00012: *string* is not a valid export mode

Cause: An invalid export mode was specified.

Action: Retry with a valid export mode.

EXP-00013: respond with either 'Y', 'N', RETURN or '.' to quit

Cause: An invalid response was entered.

Action: Enter any of the responses shown in the message.

EXP-00014: error on row *number* of table *string*\n

Cause: Export encountered an Oracle error while fetching rows.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00015: error on row *number* of table *string*, column *string*, datatype *number*

Cause: Export encountered an error while fetching or writing the column. An accompanying message gives more information.

Action: Correct the error and try again.

EXP-00016: ORACLE error encountered while reading default auditing options

Cause: Export encountered an Oracle error while reading the default auditing options (those for updates, deletes, and so on).

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00017: feature "*string*" is needed, but not present in database

Cause: The command entered requires the specified feature. Either that feature is not installed, or the row describing the feature is missing from table V\$OPTION

Action: Reinstall Oracle with the feature specified in the message.

EXP-00018: datatype (*number*) for column *string*, table *string.string* is not supported

Cause: Export does not support the referenced datatype.

Action: Retry with an acceptable datatype (CHAR, NUMBER, DATE, LONG, or RAW).

EXP-00019: failed to process parameters, type 'EXP HELP=Y' for help

Cause: Invalid command-line parameters were specified.

Action: Check the online help screen for the set of valid parameters, then retry.

EXP-00020: failed to allocate memory of size *number*

Cause: Export failed to allocate the necessary memory.

Action: Decrease the export buffer size so that less memory is required, or increase the runtime memory size for Export.

EXP-00021: can only perform incremental export in Full Database mode

Cause: USER or TABLE mode was specified when doing an incremental export.

Action: Specify FULL database mode (FULL=Y) and retry.

EXP-00022: must be SYS or SYSTEM to do incremental export

Cause: The privileges needed to do an incremental export do not exist. Only a database administrator can do incremental exports.

Action: Ask the database administrator to do the incremental export.

EXP-00023: must be a DBA to do Full Database or Tablespace export

Cause: The privileges needed to do a FULL database export do not exist. Only a database administrator can do a FULL database export.

Action: Ask the database administrator to do the FULL database export.

EXP-00024: Export views not installed, please notify your DBA

Cause: The necessary Export views were not installed.

Action: Ask the database administrator to install the required Export views.

EXP-00025: dictionary shows no column for constraint *string.number*

Cause: Export failed to gather column information about the referenced constraint from the data dictionary. The constraint may have been altered.

Action: Retry the export and, if this error recurs, report it as an Export internal error to customer support.

EXP-00026: conflicting modes specified

Cause: Conflicting export modes were specified.

Action: Specify only one parameter and retry.

EXP-00027: failed to calculate ORACLE block size

Cause: Export failed to calculate the Oracle block size.

Action: Report this as an Export internal error to customer support.

EXP-00028: failed to open *string* for write

Cause: Export failed to open the export file for writing. This message is usually followed by device messages from the operating system.

Action: Take appropriate action to restore the device.

EXP-00029: Incremental export mode and consistent mode are not compatible

Cause: Both consistent and incremental exports were specified.

Action: None. Consistent mode is turned off.

EXP-00030: Unexpected End-Of-File encountered while reading input

Cause: Encountered an End-Of-File while reading the user input.

Action: If input to export is being redirected, check the file for errors.

EXP-00031: Arraysize not in valid range. Using arraysize=*number*

Cause: The arraysize value specified is not in the valid range.

Action: None

EXP-00032: Non-DBAs may not export other users

Cause: Only database administrators can export to other users. A non- database administrator attempted to specify owner=*user* where exporter is not the user.

Action: Request that this operation be performed by the database administrator.

EXP-00033: Could not find environment character set

Cause: The environment character set is missing or incorrectly specified.

Action: Ensure that the environment character set is correctly specified and is present.

EXP-00034: error on rowid: file# *number* block# *number* slot# *number*

Cause: Identifies the rowid on which an error occurred.

Action: This is an information message. No action is required.

EXP-00035: QUERY parameter valid only for table mode exports

Cause: You specified the QUERY parameter in an export command, but you are not performing a table mode export. The QUERY parameter cannot be used for a user mode export, a full export, nor a point in time recovery export.

Action: If you want to select a subset of rows for a table, you must export the table independently with a table mode export. Issue a table mode export command that specifies the table name and the query you want to execute during export.

EXP-00036: Object *number* non-existent in dictionary

Cause: The specified object could not be found in the dictionary. The object might have been dropped during the export

Action: The object no longer exists; no action is needed.

EXP-00037: Export views not compatible with database version

Cause: The Export utility is at a higher version than the database version and is thereby incompatible.

Action: Use the same version of Export utility as the database.

EXP-00038: Bad Hash cluster id in clu\$

Cause: The function id in clu\$ is not a legal number. Clu\$ has become corrupted.

Action: Contact Worldwide Support

EXP-00039: export file *string* must be on a disk

Cause: On some platforms, export can read files from tape. This message is displayed if the first file in an export file set was on disk and you specified a tape device for a second or subsequent file.

Action: Verify that you have specified the correct file name for the export file. Remember that all export files can be either on disk or all files can be on tape, but not mixed both tape and disk.

EXP-00040: Dump file and log file must be different

Cause: The dump file and log file cannot be the same file.

Action: Specify different file names for the dump file and the log file, then retry the operation.

EXP-00041: INCTYPE parameter is obsolete

Cause: Export encountered the INCTYPE parameter when parsing Export options. Incremental Exports are no longer supported.

Action: Consult the Oracle Backup and Recovery guide. Export will attempt to continue.

EXP-00042: Missing NLS_CHARACTERSET/NLS_NCHAR_CHARACTERSET in props\$

Cause: A value for NLS_CHARACTERSET/NLS_NCHAR_CHARACTERSET was not entered in the props\$ table"

Action: internal error.

EXP-00043: Invalid data dictionary information in the row where column "*string*" is "*string*" in table *string*

Cause: The export utility retrieved invalid data from the data dictionary.

Action: Contact Oracle Worldwide Support.

EXP-00044: must be connected 'AS SYSDBA' to do Point-in-time Recovery or Transportable Tablespace import

Cause: The user must log in 'as SYSDBA' to perform transportable tablespace imports or Point-In-Time Recovery imports.

Action: Ask your database administrator to perform the Transportable Tablespace import or the Tablespace Point-in-time Recovery import.

EXP-00045: Cannot export SYSTEM Tablespace for Point-in-time Recovery or Transportable Tablespace

Cause: SYSTEM tablespace cannot be part of recovery set or transportable tablespace set.

Action: Contact Oracle Worldwide Support.

EXP-00046: Tablespace named *string* does not exist

Cause: The specified tablespace does not exist in dictionary.

Action: Contact Oracle Worldwide Support.

EXP-00047: Missing tablespace name(s)

Cause: Tablespace name(s) were not supplied

Action: Provide tablespace name(s)

EXP-00048: Cannot export SYSAUX Tablespace for Point-in-time Recovery or Transportable Tablespace

Cause: SYSAUX tablespace cannot be part of recovery set or transportable tablespace set.

Action: Contact Oracle Worldwide Support.

EXP-00049: *string* option is not compatible with Point-in-time Recovery or Transportable Tablespace Export

Cause: An option was specified incompatible with Point-in-time Recovery or Transportable Tablespace Export.

Action: Retry the Export without the displayed option.

EXP-00050: Cannot perform Partition Export "*string*" on non-partitioned table "*string*"

Cause: The table specified in this Partition Export is not a partitioned table.

Action: Use Table mode, or specify a non-partitioned table.

EXP-00051: "*string*" - given partition or subpartition name is not part of "*string*" table

Cause: The specified partition or subpartition name is not in the specified table.

Action: Check if the correct table, partition or subpartition name was specified.

EXP-00052: error on row *number* of partition *string*

Cause: Export encountered the referenced Oracle error while fetching rows.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00053: unable to execute QUERY on table *string* because the table has inner nested tables

Cause: You specified the QUERY parameter on a table that has one or more inner nested tables. The QUERY parameter cannot be specified on tables that have inner nested tables.

Action: Export the entire table by omitting the QUERY parameter.

EXP-00054: error on row *number* of subpartition *string*

Cause: Export encountered the referenced Oracle error while fetching rows.

Action: Look up the Oracle message in the ORA message chapters of this manual and take appropriate action.

EXP-00055: *string.string* is marked not exportable

Cause: An object was marked as non-exportable in the NOEXP\$ table.

Action: Consult your database administrator.

EXP-00057: Failure to initialize parameter manager

Cause: The parameter manager failed in initialization.

Action: Record the messages that follow and report this to Oracle Worldwide Support as an Export internal bug.

EXP-00058: Password Verify Function for *string* profile does not exist

Cause: Cannot find the function for the profile.

Action: Check if the profile was created properly.

EXP-00059: error converting an object type's identifier to characters

Cause: An invalid length of an object type identifier prevented its conversion.

Action: Contact Oracle Worldwide Support

EXP-00060: an object type had multiple TYPE BODYs

Cause: More than one TYPE BODY was found for an object type.

Action: Try dropping the TYPE BODY, if that is not successful, contact Oracle Worldwide Support

EXP-00061: unable to find the outer table name of a nested table

Cause: While exporting a bitmap index or posttable action on an inner nested table, the name of the outer table could not be located, using the NTAB\$ table.

Action: Verify the table is properly defined.

EXP-00062: invalid source statements for an object type

Cause: TYPE was not found in the statements in SOURCE\$ for an Object Type

Action: Contact Oracle Worldwide Support.

EXP-00063: error in changing language handle

Cause: Unable to change language handle.

Action: Contact Oracle Worldwide Support.

EXP-00064: *string* is an inner nested table and cannot be exported.

Cause: An attempt was made to export an inner nested table without its parent table.

Action: Export the parent of the inner nested table.

EXP-00065: Error writing lob to the dump file.

Cause: The current LOB could not be written to the dump file.

Action: Identify the cause of the write failure and fix it.

EXP-00066: Object table *string* is missing its object identifier index

Cause: All object tables must have an object identifier index, but the specified table was missing an index on its object identifier column.

Action: Recreate the type table and retry the operation.

EXP-00068: tablespace *string* is offline

Cause: Export failed to export tablespace (tablespace being offline).

Action: Make tablespace online and re export.

EXP-00070: attempt to free unallocated memory

Cause: An attempt was made to free memory that was not allocated.

Action: Contact Oracle Worldwide Support

EXP-00071: QUERY parameter not compatible with Direct Path export

Cause: You specified a value for the QUERY parameter for a direct path export. The QUERY parameter cannot be used with a direct path export.

Action: Re-issue the export command with DIRECT=N or omit the DIRECT parameter from the command line.

EXP-00072: error closing export file *string*

Cause: An error occurred while trying to close the export file.

Action: Contact Oracle Worldwide Support.

EXP-00073: dump file size too small

Cause: You specified either the FILESIZE parameter or the VOLSIZE parameter (if your platform supports it), and the value of the parameter is too small to hold the header information for the export file, plus any data.

Action: Increase the value of the FILESIZE or VOLSIZE parameter.

EXP-00074: rounding VOLSIZE down, new value is *string*

Cause: The VOLSIZE parameter must be a multiple of the RECORDLENGTH, but the value you specified for VOLSIZE does not meet this requirement. The value of VOLSIZE has been rounded down to be a multiple of the RECORDLENGTH used for the dump file.

Action: No action is required. You can adjust the VOLSIZE or RECORDLENGTH parameter to avoid this message. When importing this file, you must specify the VOLSIZE value reported by this message.

EXP-00075: rounding FILESIZE down, new value is *string*

Cause: The FILESIZE parameter must be a multiple of the RECORDLENGTH, but the value you specified for FILESIZE does not meet this requirement. The value of FILESIZE has been rounded down to be a multiple of the RECORDLENGTH used for the dump file.

Action: No action is required. You can adjust the FILESIZE or RECORDLENGTH parameter to avoid this message. When importing this file, you must specify the FILESIZE value reported by this message.

EXP-00076: multiple devices specified for tape output

Cause: You specified multiple file names when doing an export to a tape device. EXPORT uses the same device for writing all files, of the number of tape volumes required. For this reason, export will accept only one value for the FILE parameter when writing to tape.

Action: Reenter the EXPORT command, but specify only one tape device in the FILE parameter.

EXP-00077: multiple output files specified for unbounded export file

Cause: You specified multiple file names when doing an export and you also specified a value of 0 for the FILESIZE parameter. Note that 0 is the value used if FILESIZE is not specified on the command line. Since a value of 0 for FILESIZE means that only one file will be written and there is no size limit for that file, the other files you specified in the FILE parameter can never be used.

Action: If you intended to write multiple files, respecify the command but use the FILESIZE to specify the maximum number of bytes that EXPORT should write to each file. If you intended to write only one file with no limits on its size, reissue the EXPORT command but specify only one file name for the FILE parameter.

EXP-00078: Error exporting metadata for index *string*. Index creation will be skipped

Cause: Domain indexes export private metadata via anonymous PL/SQL blocks prior to the CREATE INDEX statement. Export does this by calling the ODCIIndexGetMetadata method on the implementation type associated with the index. A problem occurred inside this routine. Because the metadata is considered an integral part of the index, the CREATE INDEX statement was not written to the dump file.

Action: Contact the developer of the index's implementation type. If this is an Oracle-supplied index (perhaps via a data cartridge), contact Oracle Worldwide Support.

EXP-00079: Data in table "*string*" is protected. Conventional path may only be exporting partial table.

Cause: User without the execute privilege on DBMS_RLS, the access control package, tries to export a table that has access control. Since table owner is also subjected to access control, the owner may not be able to export all rows in the table, but only the ones he can see. Also, to preserve integrity of the table, user exporting the table should have enough privilege to recreate the table with the security policies at import time. Therefore, it is strongly recommended the database administrator should be handling exporting of this table. Granting the table owner execute privilege would also satisfy this security check, though it might have other security implications. If the table does not have objects, can use direct mode.

Action: Ask the database administrator to export/import this table/view.

EXP-00080: Data in table "*string*" is protected. Using conventional mode.

Cause: User without the execute privilege on DBMS_RLS, the access control package, tries to direct export a table that has access control enabled. Using conventional export mode instead. Note that because of access control, only a partial table may be exported.

Action: Ask the database administrator to export/import this table/view.

EXP-00081: Exporting access control for table/view "*string*" as non-DBA.

Cause: A non-DBA user tries to export table/view and the associated fine grain access control policies. The user may not have enough privilege to recreate the access control policies when importing the table/view. And such an event may cause inconsistency in the security model of the table/view.

Action: Ask the database administrator to export/import this table/view.

EXP-00082: Invalid function name passed to procedural object support: *string*

Cause: Internal inconsistency error: The listed function is not a method on export's procedural object interface specification.

Action: Contact Oracle Worldwide Support

EXP-00083: The previous problem occurred when calling *string.string.string*

Cause: The listed package provides export/import support for procedural actions. The previously listed error occurred while calling the specified function.

Action: Contact Oracle Worldwide Support. Most packages are supplied by Oracle internal cartridge or server development groups. The package name will help Support determine the correct owner of the problem.

EXP-00084: Unexpected DbmsJava error *number* at step *number*

Cause: The error was returned from a call to a DbmsJava procedure.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00085: The previous problem occurred when calling *string.string.string* for object *number*

Cause: The listed package provides export/import support for procedural objects, i.e., those whose DDL is supplied by stored procedures. The previously listed error occurred while calling the specified function.

Action: Contact Oracle Worldwide Support. Most packages are supplied by Oracle internal cartridge or server development groups. The package name will help Support determine the correct owner of the problem.

EXP-00086: Primary key REFs in table "*string*" may not be valid on import

Cause: The specified table contains primary key REFs which may not be valid in the import database.

Action: Do not use Export/Import to move Primary key REFs between databases having differing character sets.

EXP-00087: Problem with internal hash table of schema/table names

Cause: Most likely a problem with allocating memory for the hash table entries.

Action: Contact Oracle Worldwide Support

EXP-00089: invalid FILE_FORMAT specification

Cause: The FILE_FORMAT specification did not contain an instance of "%s". This wildcard string must be present.

Action: Correct the error and reenter the EXPORT command.

EXP-00090: cannot pin type "*string*". "*string*"

Cause: Export was unable to pin the specified type in the object cache. This is typically caused because a type could not be made valid (for example because of authorization violations in accessing subtypes).

Action: Fix the problem with the offending type until the type can be successfully compiled.

EXP-00091: Exporting questionable statistics.

Cause: Export was able export statistics, but the statistics may not be usable. The statistics are questionable because one or more of the following happened during export: a row error occurred, client character set or NCHARSET does not match with the server, a query clause was specified on export, only certain partitions or subpartitions were exported, or a fatal error occurred while processing a table.

Action: To export non-questionable statistics, change the client character set or NCHARSET to match the server, export with no query clause, export complete tables. If desired, import parameters can be supplied so that only non-questionable statistics will be imported, and all questionable statistics will be recalculated.

EXP-00092: Unable to set NLS_NUMERIC_CHARACTERS to required defaults.

Cause: Export was unable to set NLS_NUMERIC_CHARACTERS to ','.

Action: Record the accompanying messages and report this as an Export internal error to customer support.

EXP-00093: Could not convert to server character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

EXP-00094: Could not convert to server national character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

EXP-00095: Flashback_time and Flashback_scn are not compatible

Cause: Both flashback_time and flashback_scn parameters were specified.

Action: Reissue command with only one flashback parameter.

EXP-00097: Object type "*string*".*string*" is not in a valid state, type will not be exported

Cause: The object type's status is invalid which may be caused by a dependant type's modification (or removal) without cascading the change.

Action: The type must be recompiled using ALTER TYPE COMPILE.

EXP-00098: Data in table has not been upgraded, table will not be exported

Cause: Export is attempting to process a table containing references to a type which has evolved. In order for Export to process the table successfully, all data within each table must be upgraded to the latest revision of each referenced type.

Action: The table must be updated using ALTER TABLE UPGRADE DATA.

EXP-00099: Table "*string*".*string*" is not in a valid state, table will not be exported

Cause: A table or one of its dependant types has modified without cascading the change. This left the table in an INVALID state.

Action: The table must be updated using ALTER TABLE UPDATE.

EXP-00100: error converting an object type's hashcode to characters

Cause: An invalid length of an object type identifier prevented its conversion.

Action: Contact Oracle Worldwide Support

EXP-00101: Version 1 extensible index "*string*".*string*" can not be included in Transportable Tablespace Export

Cause: Transportable Tablespace extensible indexes must be at least version 2.

Action: Upgrade extensible index implementation to version 2 specifications.

EXP-00102: Resumable parameters ignored -- current session not resumable

Cause: Current session is not resumable.

Action: Must specify RESUMABLE=Y to enable resumable session in order for the RESUMABLE_NAME and RESUMABLE_TIMEOUT parameters to take effect.

EXP-00103: The FLASHBACK_TIME parameter was invalid

Cause: FLASHBACK_TIME did not contain a valid timestamp or an expression that yields a valid timestamp.

Action: Specify a timestamp value in the format of YYYY-MM-DD HH24:MI:SS or an expression that evaluates to a valid timestamp.

EXP-00104: datatype (*string*) of column *string* in table *string.string* is not supported, table will not be exported

Cause: The column is of a datatype which does not contain the required support. The table will not be exported.

Action: Use the Data Pump version of Export to export this table.

EXP-00105: parameter *string* is not supported for this user

Cause: The user attempted to specify either CONSISTENT or OBJECT_CONSISTENT when connected as sysdba.

Action: If a consistent export is needed, then connect as another user.

EXP-00106: Invalid Database Link Passwords

Cause: Invalid Encoded Password for Database Link

Action: Please drop the Database Link and recreate it after import.

EXP-00107: Feature (*string*) of column *string* in table *string.string* is not supported. The table will not be exported.

Cause: Export does not contain the required support for this feature. The table will not be exported.

Action: Use the Data Pump version of Export to export this table.

EXP-00108: NULL lob fetched

Cause: Internal error

Action: Contact Oracle Worldwide Support.

EXP-00109: XSL delimiter not found

Cause: Internal error

Action: Contact Oracle Worldwide Support.

EXP-00110: Tablespace *string* is encrypted and will not be exported

Cause: Encrypted Tablespace feature is not supported by classic export

Action: Use DATAPUMP Utility to export this tablespace.

EXP-00111: Table *string* resides in an Encrypted Tablespace *string* and will not be exported

Cause: Encrypted Tablespace feature is not supported by classic export

Action: Use DATAPUMP Utility to export this table.

EXP-00112: Index *string* is of XMLType and could not be exported

Cause: Export does not contain the required support for this feature. The index could not be exported.

Action: Use Oracle Data Pump Utility to export this index.

EXP-00113: Feature *string* is unsupported. *string string.string* could not be exported

Cause: Export does not contain the required support for this feature.

Action: Use Oracle Data Pump Utility

EXP-00114: Length of *string string* is exceeding the maximum limit

Cause: Provided length was more than the maximum limit allowed.

Action: Check the input value and provide the correct value.

GIMR-01001 to GIMR-01007

GIMR-01001: The GIMR schema is incompatible with the application. Call Oracle Support Services.

Cause: A Grid Infrastructure Management Repository (GIMR) operation failed because a schema was incompatible with the operation.

Action: Contact Oracle Support Services.

GIMR-01002: GIMR data is corrupt. Contact Oracle Support Services.

Cause: An attempt to access Grid Infrastructure Management Repository (GIMR) data failed because the data store was corrupt.

Action: Contact Oracle Support Services.

GIMR-01003: The application has experienced an error during a GIMR operation. The accompanying error messages provide detailed failure information.

Cause: A Grid Infrastructure Management Repository (GIMR) operation failed. The accompanying error messages provide detailed failure information.

Action: Examine the accompanying error messages, address the issues raised, and retry.

GIMR-01004: The application cannot log in to the GIMR. Use the 'mgmtca' command to reset the user credentials.

Cause: An attempt to log in to the Grid Infrastructure Management Repository (GIMR) failed because user credentials were invalid.

Action: Use the 'mgmtca' command to reset the user credentials.

GIMR-01005: An attempt to connect to the GIMR failed because a connection timed out. Retry the operation.

Cause: An attempt to connect to the Grid Infrastructure Management Repository (GIMR) failed because a connection timed out.

Action: Retry the operation.

GIMR-01006: The application has exhausted the allotted space in the GIMR. Make space available to the application and retry the operation.

Cause: An attempt to write to the Grid Infrastructure Management Repository (GIMR) failed because the data store had no available space.

Action: Make space available to the application and retry the operation.

GIMR-01007: The application is unable to connect to the GIMR because the GIMR network listener is down. Restart the GIMR network listener using the 'srvctl' command.

Cause: The Grid Infrastructure Management Repository (GIMR) network listener was not running when the application attempted to connect to it.

Action: Restart the GIMR network listener using the 'srvctl' command.

GIPC-00000 to GIPC-00020

GIPC-00000: general success.

Cause: The operation succeeded.

Action: No action is required.

GIPC-00001: general failure.

Cause: A GIPC operation failed.

Action: Examine the trace and log files for the specific cause.

GIPC-00002: GIPC needs to be initialized.

Cause: The application failed to initialize GIPC prior to performing an operation.

Action: Initialize GIPC.

GIPC-00014: buffer not large enough to hold data.

Cause: The buffer provided by the application was not big enough to hold the data received.

Action: Use a larger buffer.

GIPC-00016: timeout waiting on request.

Cause: A wait call returned because the time expired.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00017: waiting call has been posted.

Cause: A wait was interrupted by another thread posting it.

Action: This error happens normally in most cases. If this error was not expected, examine the trace and log files for the reason.

GIPC-00020: bind address already in use.

Cause: The application attempt to bind an endpoint to an address which has already been bound.

Action: Specify another address.

IMP-00000 to IMP-00403

IMP-00000: Import terminated unsuccessfully

Cause: Import encountered an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual, and take appropriate action.

IMP-00001: respond with either *string*, *string*, RETURN or '.' to quit

Cause: An invalid response was entered.

Action: Enter any of the responses shown in the message.

IMP-00002: failed to open *string* for read

Cause: Import failed to open the export file for reading. This message is usually followed by a device message from the operating system.

Action: Take appropriate action to restore the device.

IMP-00003: ORACLE error *number* encountered

Cause: Import encountered the referenced Oracle error.

Action: Look up the Oracle message in the ORA message chapters of this manual, and take appropriate action.

IMP-00004: invalid username or password

Cause: An invalid username or password was specified.

Action: Retry with a valid username and password.

IMP-00005: all allowable logon attempts failed

Cause: An attempt was repeatedly made to log on with an invalid username or password.

Action: Retry with valid username and password.

IMP-00006: failed to allocate memory of size *number*

Cause: Import failed to allocate the necessary memory.

Action: Decrease the import buffer size so that less memory is required, or increase the runtime memory size for Import.

IMP-00007: must be a DBA to import objects to another user's account

Cause: The privileges needed to import into another user's account do not exist. Only a database administrator can import into another user's account.

Action: Ask the database administrator to do the import.

IMP-00008: unrecognized statement in the export file: *ln string*

Cause: Import did not recognize a statement in the export file. Either the export file was corrupted, or an Import internal error has occurred.

Action: If the export file was corrupted, retry with a new export file. Otherwise, report this as an Import internal error and submit the export file to customer support.

IMP-00009: abnormal end of export file

Cause: The export file is probably from an aborted Export session.

Action: If so, retry the export and import. Otherwise, report this as an Import bug and submit the export file that caused this error to customer support.

IMP-00010: not a valid export file, header failed verification

Cause: Either the file was not generated by Export or it was corrupted.

Action: If the file was indeed generated by Export, report this an Import bug and submit the export file to customer support.

IMP-00011: formatted table data not currently supported

Cause: You tried to import an export file that contains formatted table data. Import only supports export files containing binary table data. wher

Action: Retry using an export file that contains only binary table data.

IMP-00012: invalid export mode (*character*) in header

Cause: The Export mode specified in the export file header is invalid.

Action: Check the export file to see if it was corrupted. If it was not, report this as an Import bug and submit the export file to customer support.

IMP-00013: only a DBA can import a file exported by another DBA

Cause: The privileges needed to Import an export file generated by a database administrator do not exist. Only a database administrator can import such files.

Action: Ask the database administrator to do the import.

IMP-00014: option "*string*" is needed, but not present in database

Cause: The command entered requires the specified option. Either that option is not installed, or the row describing the option is missing from table V\$OPTION

Action: Reinstall Oracle with the option specified by the message.

IMP-00015: following statement failed because the object already exists:

Cause: Import failed to create an object because it already exists.

Action: Specify IGNORE=Y to ignore such errors and import rows even when tables are not created because they already exist.

IMP-00016: required character set conversion (type *number* to *number*) not supported

Cause: Import could not convert the character format of the export file into the native character format.

Action: Change the user character set by setting the NLS_LANG environment variable to match the character set of the export file.

IMP-00017: following statement failed with ORACLE error *number*:

Cause: Import failed to execute the statement from the export file because of an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00018: partial import of previous table completed: *number* rows imported

Cause: A table was only partially imported because of an Oracle error.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00019: row rejected due to ORACLE error *number*

Cause: Import encountered the referenced Oracle error while trying to import a row.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action.

IMP-00020: long column too large for column buffer size (*number*)

Cause: The column buffer is too small. This usually occurs when importing LONG data.

Action: Increase the insert buffer size 10,000 bytes at a time (for example). Use this step-by-step approach because a buffer size that is too large may cause a similar problem.

IMP-00021: INCTYPE parameter is obsolete

Cause: Import encountered the INCTYPE parameter when parsing Import options. Incremental Imports are no longer supported.

Action: Consult the Oracle Backup and Recovery guide. Import will attempt to continue.

IMP-00022: failed to process parameters, type 'IMP HELP=Y' for help

Cause: Invalid command-line parameters were specified.

Action: Check the online help screen for the set of valid parameters, then retry.

IMP-00023: Import views not installed, please notify your DBA

Cause: The necessary Import views were not installed.

Action: Ask your database administrator to install the required Import views.

IMP-00024: Only one mode (TABLES, FROMUSER, or FULL) can be specified

Cause: Parameters were specified that conflict with the import specification FULL=Y.

Action: Retry, making sure not to specify FULL=Y.

IMP-00025: for DBA export files, FROMUSER must be specified with TOUSER option

Cause: When importing a database administrator export file, you specified the TOUSER parameter but not the FROMUSER parameter.

Action: Specify the FROMUSER parameter so that Import knows which user's objects to import.

IMP-00027: failed to rollback partial import of previous table

Cause: Import encountered an Oracle error while trying to roll back a partial import.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action. Then, log on to Oracle and check that the partial import was not committed.

IMP-00028: partial import of previous table rolled back: *number* rows rolled back

Cause: Import encountered an Oracle error while trying to import a table.

Action: Look up the accompanying Oracle message in the ORA message chapters of this manual and take appropriate action. Then, if necessary, re-import the table.

IMP-00029: cannot qualify table name by owner (*string*), use FROMUSER parameter

Cause: A table name was qualified with the name of its owner, as shown in the following example. This is not allowed. IMP SYSTEM/MANAGER TABLES=(SCOTT.EMP)

Action: Use the FROMUSER parameter to specify the table's owner, as shown in the following example: IMP SYSTEM/MANAGER FROMUSER=SCOTT TABLES=(EMP, DEPT)

IMP-00030: failed to create file *string* for write

Cause: Import was unable to create the specified file with write enabled.

Action: Check the file name and file system for the source of the error.

IMP-00031: Must specify FULL=Y or provide FROMUSER/TOUSER or TABLES arguments

Cause: The database administrator did not specify full or partial import.

Action: The database administrator must specify FROMUSER/TOUSER or table arguments if not a full import.

IMP-00032: SQL statement exceeded buffer length

Cause: The buffer was too small for the SQL statement being read.

Action: Rerun with a larger buffer. This can also be an indication of a corruption in the import datafile.

IMP-00033: Warning: Table "*string*" not found in export file

Cause: A table name was specified that does not exist in export file.

Action: Correct the table specification.

IMP-00034: Warning: FromUser "*string*" not found in export file

Cause: The user specified a FROMUSER name that does not exist in export file.

Action: Correct the FROMUSER specification.

IMP-00035: input file *string* must be on a disk

Cause: On some platforms, import can read files from tape. This message is displayed if the first file in an export file set was on disk and you specified a tape device for a second or subsequent file.

Action: Verify that you have specified the correct file name for the import file. Remember that all input files can be either on disk or all files can be on tape, but not mixed both tape and disk.

IMP-00036: Could not find environment character set

Cause: An environment character set was specified that was not recognized by the Import utility.

Action: Ensure that the spelling of the character set specified in the command line parameter CHARSET (for Release 6 only) or the environment variable NLS_LANG is correct.

IMP-00037: Character set marker unknown

Cause: The export file is corrupted.

Action: Try to obtain an uncorrupted version of the export file. If the export file is not corrupted, report this as an Import internal error and submit the export file to customer support.

IMP-00038: Could not convert to environment character set's handle

Cause: Internal error.

Action: Contact Worldwide Support.

IMP-00039: VOLSIZ does not match the value used for export: *string*

Cause: The value specified for VOLSIZ does not match the value specified during the creation of the export file.

Action: If you believe that the specified VOLSIZ value is correct, verify that you specified the correct file for import. If you specified the correct file but are unsure about the correct value, re-execute the import command but specify VOLSIZ=0.

IMP-00040: FILESIZE does not match the value used for export: *string*

Cause: The value specified for FILESIZE does not match the value specified during the creation of the export file.

Action: If you believe the specified FILESIZE value is correct, verify that you specified the correct file for import. If you specified the correct file but are unsure about the correct value, re-execute the import command but specify FILESIZE=0.

IMP-00041: Warning: object created with compilation warnings

Cause: The object in the SQL statement following this error was created with compilation errors. If this error occurred for a view, it is possible that the base table of the view was missing.

Action: This is a warning. The object may have to be recompiled before being used.

IMP-00042: CHARSET used, but the export file has specific character set

Cause: The user requested that a specific character set be used to process an export file that has a specific embedded character set ID. The ID in the export file is accurate and should be used.

Action: Remove the CHARSET keyword from the command line.

IMP-00043: export file character set inconsistent

Cause: The character set of the export file and the environment character set (or the character set specified with the CHARSET keyword) are inconsistent. One character set is ASCII-based while the other is EBCDIC based.

Action: Specify the correct character set with the CHARSET keyword.

IMP-00044: unable to allocate enough memory for statement

Cause: Import was unable to allocate sufficient memory to read in the specified statement and execute it.

Action: Increase the allocation for database buffers, restart the instance, and reexecute the Import command.

IMP-00045: using VOLSIZ value from export file of *string*

Cause: Either you did not specify the VOLSIZ parameter in your IMPORT command, or you specified VOLSIZ=0 and the export was created with a non-zero value for VOLSIZ. Import will use the value specified in the export file.

Action: None required.

IMP-00046: using FILESIZE value from export file of *string*

Cause: Either you did not specify the FILESIZE parameter in your IMPORT command, or you specified FILESIZE=0 and the export file was created with a non-zero value for FILESIZE. Import will use the value specified in the export file.

Action: None required.

IMP-00047: unexpected file sequence number; expected *number* but found *number*

Cause: The header in the export file contains a sequence number that is used to track the order in which multiple export files are written. The first export file is assigned sequence number one, the second file is assigned sequence number two and so on. This message is displayed when a number other than the expected sequence number is found in the file header

Action: Execute the import command again, but specify the files in the order in which Export wrote them.

IMP-00048: mismatched file header

Cause: During verification of the 2nd or subsequent file in a multi-file export, Import found header fields in the file that did not match values in the first file.

Action: Check the names of the files created by Export and verify that you specified them correctly for the import operation.

IMP-00049: Unknown language specified in CHARSET

Cause: An unknown language was listed in the CHARSET option.

Action: Use a known character set.

IMP-00050: Dump file and log file cannot be identical

Cause: Identical names were given to the dump file and log file.

Action: Specify different names for the dump file and log file and retry the operation.

IMP-00051: Direct path exported dump file contains illegal column length

Cause: An invalid column length was encountered while processing column pieces."

Action: Check to make sure the export file is not corrupted, or else report this to Oracle Worldwide Support as an Import/Export internal bug and submit the export file.

IMP-00052: Warning: Unable to set event for freelist communication with server

Cause: An event could not be set for current the session.

Action: If Import fails, give the Import user ALTER SESSION PRIV and retry the operation.

IMP-00053: Import mode incompatible with Export dump file

Cause: The specified import option is incompatible with point-in-time- recovery dump file.

Action: Generate a proper dump file or use point-in-time-recovery import mode.

IMP-00054: must be connected 'AS SYSDBA' to do Point-in-time Recovery or Transportable Tablespace import

Cause: The user must log in 'as SYSDBA' to perform transportable tablespace imports or Point-In-Time Recovery imports.

Action: Ask your database administrator to perform the Transportable Tablespace import or the Tablespace Point-in-time Recovery import.

IMP-00055: Warning: partition or subpartition "*string*":"*string*" not found in export file

Cause: A partition or subpartition name was specified that does not exist in export file.

Action: Check to make sure the partition or subpartition name belongs to the table.

IMP-00056: multiple devices specified for tape input

Cause: You specified multiple file names when doing an import from a tape device. Import uses the same device for reading all tapes, regardless of the number of tape volumes required. For this reason, export will accept only one value for the FILE parameter when writing to tape.

Action: Reenter the IMPORT command, but specify only one tape device in the FILE parameter.

IMP-00057: Warning: Dump file may not contain data of all partitions of this table

Cause: The dump file used for this Table Import might not contain all of the data belonging to the exported table.

Action: Check to see if the export was done as intended, or try performing a Partition Import.

IMP-00059: Failure to initialize parameter manager

Cause: Parameter manager failed in initialization.

Action: Report this to Oracle Worldwide Support as an Import internal bug.

IMP-00060: Warning: Skipping table "*string*"."*string*" because object type "*string*"."*string*" does not exist or has different identifier

Cause: An object type needed by the table, either does not exist on the * target system or, if it does exist, it has a different object identifier.

Action: Create the object type on the target system with a valid * identifier.

IMP-00061: Warning: Object type "*string*"."*string*" already exists with a different identifier

Cause: An object type cannot be created because it already exists on the * target system, but with a different identifier

Action: Drop the object type from the target system and retry the operation.

IMP-00062: Warning: The identifier on the dump file for object type "*string*"."*string*" is invalid

Cause: The character string representing the object type's identifier * could not be converted to an object identifier.

Action: Internal error.

IMP-00063: Warning: Skipping table "string"."string" because object type "string"."string" cannot be created or has different identifier

Cause: An error occurred creating an object type that is used by the * table.

Action: Examine the import log to determine why the object type could not * be created. If the object type already existed, with a * different object identifier, then drop the object type and * retry the import.

IMP-00064: Definition of LOB was truncated by export

Cause: While producing the dump file, Export was unable to write the * entire contents of a LOB. Import is therefore unable to * reconstruct the contents of the LOB. The remainder of the * import of the current table will be skipped.

Action: Delete the offending row in the exported database and retry the * export.

IMP-00065: Import is unable to recreate lobes within objects.

Cause: An error occurred recreating a LOB within an imported object.

Action: Report this to Oracle Worldwide Support as an Import internal error.

IMP-00066: Missing NLS_CHARACTERSET in props\$

Cause: No value for NLS_CHARACTERSET in props\$.

Action: Contact Worldwide support.

IMP-00067: Could not convert to server character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

IMP-00068: Could not find environment national character set

Cause: An environment national character set was specified that was not recognized by the Import utility.

Action: Ensure that the spelling of the national character set specified in the environment variable NLS_NCHAR is correct.

IMP-00069: Could not convert to environment national character set's handle

Cause: Internal error..

Action: Contact Worldwide support.

IMP-00070: Lob definitions in dump file are inconsistent with database.

Cause: The number of LOBS per row in the dump file is different than the * number of LOBS per row in the table being populated.

Action: Modify the table being imported so that it matches the column * attribute layout of the table that was exported.

IMP-00071: Object identifier of imported table mismatches object identifier of existing table

Cause: An attempt was made to import data into a table that was recreated under a different object identifier than the object identifier used for the exported object table. Under this situation, REF's to this table that are contained within the dump file will also be invalid.

Action: Drop the offending object table prior to import.

IMP-00072: Warning: The object table's object identifier is invalid.

Cause: The character string representing the table's object identifier could not be converted to an internal object identifier.

Action: Internal error.

IMP-00073: FILE locator "string" "string" is truncated to "string" "string" in server character set

Cause: The conversion of the specified directory and name strings for a file attribute or column from the export server's character set into the import server's character set exceeded the maximum string lengths allowed within FILE descriptors. The strings will be truncated to the maximum supported lengths.

Action: Rename the directory aliases and external filenames to match the truncated names in the specified FILE column or attribute.

IMP-00074: The constraints flagged by ALL_CONSTRAINTS.BAD will break in 2000 A.D.

Cause: Constraints exist in the data base that specify date values without fully specifying the year. These constraints could break in the year 2000 A.D.

Action: Query ALL_CONSTRAINTS and correct those constraints marked as bad.

IMP-00075: Warning: The nested table may contain partial rows or duplicate rows

Cause: An error occurred inserting data into an outer or inner nested table. If the error occurred in the outer table, rows are still inserted into the inner tables. If the error occurred in an inner table, data is still inserted into the outer table and other inner tables. This can result in duplicate inner table rows or partial logical rows.

Action: Examine the data in the tables. Delete the incorrect rows or drop the entire table and perform the import again.

IMP-00076: Missing NLS_NCHAR_CHARACTERSET in props\$

Cause: No value for NLS_NCHAR_CHARACTERSET in props\$.

Action: Contact Worldwide support.

IMP-00077: Could not convert to server national character set's handle

Cause: Internal error.

Action: Contact Worldwide support.

IMP-00078: Cannot translate FILE locator to "string" "string" in server character set

Cause: (1) The current export dump file was generated using Beta-2 of Oracle8.0 AND (2) there was a File that appeared as an attribute of an ADT within a table's column AND (3) the character set of the export server's database was different than the character set of the import server's database AND (4) when the filename or the aliasname of the File increased in size when it was translated to the character set of the import server. When all of these conditions are true, translation of the strings could yield corruption of the data in the column. Rather than proceeding with the translation, import will leave the character strings in the File in the old character set.

Action: After import completes, rename the directory aliases and external filenames to match the real names used for the target database.

IMP-00079: Warning: National character set data in this table may be incorrect

Cause: Due to a problem in 8.0.2 Export, national character data in NCHAR and NVARCHAR2 columns was incorrectly assumed to be in the export server's data base character set and was converted to the export client's data base character set. This conversion would only be correct if the export server's data base character set was the same as the export server's national character set and the export client's data base character set was the same as the export client's national character set. All other combinations would likely be incorrect. This export dump file was generated by 8.0.2 Export and the export client and server character sets did not fit that criteria.

Action: Examine the national character data. If incorrect, update the data with correct data.

IMP-00080: Error during character conversion of long column or long command

Cause: During piecewise character conversion of the data in a long column or of a long command, a fatal conversion error occurred. Either character truncation occurred or an invalid character set handle was used.

Action: Retry the import with a different character set.

IMP-00081: attempt to free unallocated memory

Cause: An attempt was made to free memory that was not allocated.

Action: Contact Oracle Worldwide Support

IMP-00082: Error during conversion ROWID from string format to internal

Cause: An error occurred while attempting to convert a ROWID from an export dump file into an internal format.

Action: Report this to Oracle Worldwide Support as an Import internal error.

IMP-00083: dump file does not contain an incremental export

Cause: An incremental import was requested and the dump file specified for the import command is either a user or table export.

Action: Reissue the command import command but specify the name of a dump file containing an incremental export.

IMP-00084: attempt to mix incremental import with user or table import

Cause: An incremental import was requested along with the FROMUSER, TOUSER, or TABLE qualifier. An incremental import cannot be done if any of these other qualifiers are also specified.

Action: Determine whether you want to do an incremental import, full import, user import or table import and reissue the import command with the appropriate qualifiers.

IMP-00085: multiple input files specified for unbounded export file

Cause: You specified multiple file names for the FILE parameter when doing an import, but the header in the export file indicates that that the export operation could create only one file. Specifying multiple file names is valid for an import operation only if the export files were created by an export operation in which the user specified a non-zero value for the FILESIZE parameter.

Action: If you believe the export contains multiple files, verify that you have specified the correct files. If you believe the export should be in only one file then try the import operation again, but specify only one value for the FILE parameter.

IMP-00086: TOID "*string*" not found in export file

Cause: Import did not find the type identification specified in the TOID_NOVALIDATE parameter. The specified type identification does not exist in export file.

Action: Correct or omit the TOID_NOVALIDATE parameter.

IMP-00087: Problem with internal hash table of schema/table names

Cause: Most likely a problem with allocating memory for the hash table entries.

Action: Contact Oracle Worldwide Support

IMP-00088: Problem importing metadata for index *string*. Index creation will be skipped

Cause: Domain indexes import private metadata via anonymous PL/SQL blocks prior to the CREATE INDEX statement. The execution of one of these PL/SQL blocks failed. Because the metadata is considered an integral part of the index, the subsequent CREATE INDEX statement was skipped.

Action: Contact the developer of the index's implementation type. If this is an Oracle-supplied index (perhaps via a data cartridge), contact Oracle Worldwide Support.

IMP-00089: Fine grain policy "*string*" not recreated on table/view "*string*"

Cause: Import user fails to recreate fine grained policies of the table/view being imported. To recreate the policy, the user doing the import needs execute privilege on the package DBMS_RLS for access policies or DBMS_FGA for audit policies.

Action: Ask the database administrator to perform the export/import of this table/view.

IMP-00090: Unexpected DbmsJava error *number* at step *number* while creating *string*

Cause: The error was returned from a call to a DbmsJava procedure.

Action: Record the accompanying messages and report this as an Import internal error to customer support.

IMP-00091: Above error occurred on the following function and object: *string*. Remaining PL/SQL blocks for this object will be skipped.

Cause: An error occurred while executing a PL/SQL block that implements the DDL for the named function and procedural object. A procedural object is one whose DDL is implemented as stored procedures rather than as standard SQL statements.

Action: Contact Oracle Worldwide Support so they may determine the development group responsible for the package that failed.

IMP-00092: Java object "*string*"."*string*" already exists, cannot be created

Cause: Import failed to create the Java source, class or resource object because it already exists.

Action: Drop the object type from the target system and retry the operation.

IMP-00093: Inconsistency between dumpfile constraint definition for table *string* with columns (*string*)

Cause: Import failed to locate a base table for a constraint that was defined in the dump file and statistics were not imported.

Action: Check to see if the table and constraint exist. If the table and constraint exist, then report this to Oracle Support Services as an Import internal error.

IMP-00094: Warning: The identifier on the dump file for object type "*string*"."*string*" is invalid

Cause: The character string representing the object type's identifier * could not be converted.

Action: Contact Oracle Worldwide Support.

IMP-00095: Resumable parameters ignored -- current session not resumable

Cause: Current session is not resumable.

Action: Must specify RESUMABLE=Y to enable resumable session in order for the RESUMABLE_NAME and RESUMABLE_TIMEOUT parameters to take effect.

IMP-00096: Warning: Skipping table "*string*"."*string*" because type synonym "*string*"."*string*" cannot be created

Cause: An error occurred creating a synonym for a type that is used by the * table.

Action: Examine the import log to determine why the type synonym could * not be created. If the synonym already existed, but is not * needed, then drop the synonym and retry the import. If the * synonym is PUBLIC but the importer does not have the * CREATE PUBLIC SYNONYM system privilege, then the import must * be done by someone possessing that privilege, or the importer * must be granted the privilege.

IMP-00097: \nSTREAMS_CONFIGURATION=Y ignored, only valid with FULL=Y

Cause: STREAMS_CONFIGURATION=Y can only be used * when FULL=Y is present on the command line

Action: Remove conflicting command arguments

IMP-00098: INTERNAL ERROR: *string*

Cause: An INTERNAL error occurred.

Action: Contact Oracle Worldwide Support.

IMP-00099: Warning: The typeid in the dump file for object type "*string*"."*string*" is invalid

Cause: The character string representing the object type's identifier * could not be converted.

Action: Contact Oracle Worldwide Support.

IMP-00400: Warning: Object type "*string*"."*string*" already exists with a different typeid

Cause: An object type could not be created because it already existed on the * target system, but with a different typeid

Action: Drop the object type from the target system and retry the operation.

IMP-00401: dump file "*string*" may be an Data Pump export dump file

Cause: A dump file was specified for an import operation which appears to have been created using the Data Pump export utility. These dump files cannot be processed by the original import utility.

Action: Try using the Data Pump import utility to process this dump file.

IMP-00402: Invalid parameter "*string*" with data_only mode

Cause: Parameter provided along data_only is invalid.

Action: Remove the invalid parameter from command line.

IMP-00403: \n\nWarning: This import generated a separate SQL file "*string*" which contains DDL that failed due to a privilege issue.\n

Cause: The import failed because the DDL had insufficient privileges.

Action: Connect as SYSDBA and run the SQL file.

INS-00001 to INS-30000

INS-00001: Unknown irrecoverable error

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-00002: Unhandled exception

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-00003: Application startup failed

Cause: An unexpected error occurred while loading the application configuration or other startup resources.

Action: Refer to the logs or contact Oracle Support Services

INS-00004: Unable to load help

Cause: One or more help configuration files were not readable or not in the correct format.

Action: Contact Oracle Support Services or refer to the software manual.

INS-00005: Invalid application configuration

Cause: The given application configuration is not compliant to the expected schema.

Action: Contact Oracle Support Services

INS-00006: No resource bundle is associated to the Resource instance

Cause: Specified resource bundle *string* is not found in the classpath.

Action: Ensure that the required libraries are in the classpath.

INS-00007: Help not available for this application

Cause: No additional information available.

Action: Contact Oracle Support Services support or refer software manual.

INS-00008: Help topic not found

Cause: The current user interface do not have help content associated with it.

Action: Contact Oracle Support Services or refer to the software manual.

INS-01001: Failed to create parent directories while copying *string* to *string*

Cause: Unexpected error occurred while creating the nonexistent parent directories of the destination file *string*

Action: Manually verify whether the destination directory is possible to be created.

INS-01002: Copy failed as the source file *string* do not exist

Cause: No additional information available.

Action: Ensure that the source file exist.

INS-01003: Copy failed as the source path *string* do not correspond to a file.

Cause: Copy routine expects a source path, which represents a file.

Action: Ensure that the source is a file and destination is a file or a directory. Note: if the destination is a directory, then the source file will be copied in the same name, under the destination directory.

INS-01004: *string* is not directory.

Cause: The archive extraction routine expects the destination to be a directory.

Action: Ensure that destination is a directory

INS-01005: Failed to copy file from *string* to *string*

Cause: Unexpected error occurred while copying the file.

Action: Refer to the logs for more details.

INS-01006: The file *string* cannot be copied onto itself.

Cause: The source file and destination file are same.

Action: Ensure that the destination file is different from the source file.

INS-01007: The directory *string* cannot be copied onto itself

Cause: The source directory and destination directory are same.

Action: Ensure that the destination directory is different from the source directory.

INS-01008: Copy failed as the destination file *string* already exists.

Cause: No additional information available.

Action: Ensure that the destination file do not exist or use overwrite option to overwrite the destination file.

INS-01009: *string* is not valid archive.

Cause: The given archive path, either do not correspond to a file or do not exist.

Action: Ensure that the given source path correspond to a valid archive location.

INS-01010: Unable to save file to the specified location.

Cause: The specified location may not be writable.

Action: Specify a location that is writable.

INS-04001: Invalid command line arguments xml file (*string*). Either application could not detect command line arguments xml file or contains syntactically incorrect information.

Cause: n/a

Action: n/a

INS-04002: Application could not parse command line arguments xml file (*string*). Either XPathExpressionException or IOException occurred while parsing command line arguments xml file.

Cause: n/a

Action: n/a

INS-04003: Invalid argument passed from command line. Specified argument (*string*) is not a supported argument for this application.

Cause: n/a

Action: n/a

INS-04004: Value is not specified for comamnd line argument: *string*. Specify valid value for the mentioned argument. Refer application help for more details.

Cause: n/a

Action: n/a

INS-04005: Invalid argument passed from command line: *string*. Specified argument is not a supported for the current operating system.

Cause: n/a

Action: n/a

INS-04006: Invalid combination of arguments passed from command line. Arguments [*string,string*] cannot be passed together in the same application session.

Cause: n/a

Action: n/a

INS-04007: Invalid argument passed from command line: *string*

Cause: n/a

Action: n/a

INS-04008: Invalid combination of arguments passed from command line. One or more mandatory dependent arguments are not passed for the arugment: *string*

Cause: n/a

Action: n/a

INS-04009: The argument [*string*] passed is not supported for the current context *string*

Cause: n/a

Action: n/a

INS-06001: Failed to perform operation due to internal driver error.

Cause: No additional information available.

Action: Refer to the logs or contact Oracle Support Services

INS-06002: Authentication failed.

Cause: Failed to login into the selected nodes.

Action: Check shared unix password. Locked accounts or accounts with no password are not supported. Contact Administrator or refer logs for more details.

INS-06003: Failed to setup passwordless SSH connectivity with the following node(s): *string*

Cause: It is possible that the failed nodes are running different Operating System or not reachable. If they are reachable and running the same Operating System as the local machine, it is possible that the SSH daemon is not configured on the selected nodes.

Action: Ensure that the failed nodes are reachable, running the same Operating System and have support for SSH connectivity.

INS-06004: File operation on user's .ssh directory is not permitted.

Cause: Write permission not set for either user's home directory or .ssh directory under user's home directory.

Action: Ensure that .ssh directory is either allowed to be created under user's home directory or .ssh directory allows files to be written into it.

INS-06005: Unable to get SSH connectivity details.

Cause: An unexpected error occurred while getting SSH connectivity details across the selected nodes.
