Oracle® Communications Offline Mediation Controller

Compatibility Matrix

Release 16.26.0

G54841-01

October 2026

Offline Mediation Controller Software Compatibility

This document lists the software that is compatible with Oracle Communications Offline Mediation Controller 16.26.0.

Supported Upgrades

This section lists the commonly supported upgrade paths for Offline Mediation Controller.

For software compatibility information, see "Offline Mediation Controller Software Compatibility".

Table 1-1 lists the supported upgrade paths for Offline Mediation Controller.

Table 1-1 Offline Mediation Controller Upgrade Path

Source Release	On-Prem to 16.26	CNE to 16.26
12 PS 8	Supported	Supported.
15.0.0	Supported	Supported.
15.0.1	Supported	Supported.
15.1	Supported	Supported
15.2	Supported	Supported

Common Software Compatibility

Table 1-2 describes the software required to support the Offline Mediation Controller cloud native and on-premises deployment.

Table 1-2 Supported Common Software for Offline Mediation Controller Cloud Native and On-Premises Deployment

Software	Version	Notes
Grafana	13.0.2	None
Oracle Database Server Enterprise Edition (for single or Oracle Real Application Clusters (RAC) installation)	26ai (version 23.*x*, where *x* is 23.26 or later)	Oracle Database is required only if you use JDBC Distribution Cartridge (DC) to persist data.
Oracle Java Platform, Standard Edition (Java SE)	21.0.12	None
Oracle Linux, x86-64 (64-bit)	9.x 10.x	Oracle Applications are developed and tested on Oracle Linux, which is optimized for performance, stability and security.
Oracle Unified Directory	14.1.2.1.0	None
Prometheus	3.12.0	None
Prometheus Alertmanager	0.33.0	None
Red Hat Enterprise Linux, x86-64 (64-bit)	9.x 10.x	None
Web Browsers	Mozilla Firefox: 140.0 and higher Microsoft Edge: Default version with operating system Google Chrome: 137.0 and higher. Apple Safari 18.0 and higher.	None
Operating System (64-bit)	Windows 11	Windows is supported for GUI only.

Offline Mediation Controller Cloud Native Deployment Software Compatibility

> ⚠ **Caution**
>
> It is the responsibility of the system administrator to ensure that all installed software dependencies are kept up to date wherever possible. Oracle supports software versions that maintain backward compatibility with the version certified for Offline Mediation Controller. Support is provided for upgrades involving minor version increments (that is, A.B.C to A.B.D).
>
> It is especially important for system administrators to follow this policy for software dependencies where upgrades primarily address security rather than adding new functionality.

Copyright © 2023, 2026, Oracle and/or its affiliates.

This section lists the software that is compatible with the Offline Mediation Controller cloud native deployment package. This package uses Docker, Kubernetes, Helm, and Linux for containerization and orchestration.

The Offline Mediation Controller cloud native images were validated with the software listed in Table 1-3.

Table 1-3 Supported Software for Offline Mediation Controller Cloud Native Deployment Package

Software	Version
Kubernetes	1.35.2
Fluentd	1.19.0
Helm	4.2.2
Helidon	4.5.2
Prometheus JMX Exporter Java Agent	1.6.0
Prometheus Operator	0.92.0

Third-Party Platforms

Offline Mediation Controller cloud native is designed to be agnostic of the underlying cloud infrastructure. It relies on standard APIs, objects and configuration functions from the software products listed in this document. As such, Offline Mediation Controller cloud native is certified on any container platform based on a CNCF-certified Kubernetes, provided the version requirements listed in this document are satisfied.

Operating System for Kubernetes Nodes

Offline Mediation Controller supports any Linux version that is supported by your chosen Kubernetes platform.

About Critical Patch Updates

You should install all critical patch updates as soon as possible. To download critical patch updates, find out about security alerts, and enable email notifications about critical patch updates, see "Critical Patch Updates, Security Alerts and Bulletins" on the Oracle website.

Additional Offline Mediation Controller Software Requirements

Table 1-4 lists Oracle software required for running Offline Mediation Controller.

Copyright © 2023, 2026, Oracle and/or its affiliates.

Table 1-4 Additional Software Compatibility for Offline Mediation Controller

Software	Version	Notes
Micrometer Registry Prometheus	1.16.6	Optional

The Offline Mediation Controller Installer checks for all required software and displays errors if it detects any missing or unavailable components, or if there are any connectivity-related issues.

For BRM Suite compatibility, see "BRM Software Compatibility" in *BRM Compatibility Matrix*.

Third-Party Platforms

You may use Offline Mediation Controller in Amazon Web Services (AWS). You are solely responsible for obtaining a license from Amazon to use any software or materials made available by Amazon.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.
