Oracle Utilities Work and Asset Cloud Service Integration to Oracle Fusion Procurement Cloud Release Notes, Release 22C

Contents

Preface

Welcome to the Oracle Utilities Work and Asset Cloud Service Integration to Oracle Fusion Procurement Cloud Release Notes.

The preface includes the following:

- Audience
- Documentation and Resources
- Documentation Accessibility
- Conventions
- Abbreviations

Audience

This document is intended for anyone implementing the integration of the following products with Oracle Fusion Procurement Cloud.

- Oracle Utilities Work and Asset Cloud Service

Documentation and Resources

For more information regarding this integration, foundation technology and the edge applications, refer to the following documents:

Product Documentation

Resource	Location
Oracle Utilities Work and Asset Cloud Service Integration to Oracle Fusion Procurement Cloud documentation	https://docs.oracle.com/en/industries/energy-water/integrations-index.html
Oracle Utilities Work and Asset Cloud Service documentation	https://docs.oracle.com/en/industries/energy-water/work-asset-cloud-service/index.html
Oracle Fusion Procurement Cloud documentation	https://docs.oracle.com/en/cloud/saas/procurement/22d/index.html

Additional Documentation

Resource	Location
Oracle Integration Cloud Service documentation	Refer to the OIC documentation at: https://docs.oracle.com/en/cloud/paas/integration-cloud/index.html
Oracle Support	Visit My Oracle Support at https://support.oracle.com regularly to stay informed about updates and patches. Refer to the *Certification Matrix for Oracle Utilities Products (Doc ID 1454143.1)* on My Oracle Support to determine if support for newer versions of the listed products is included. For more information, refer to the Oracle Utilities Integrations page at http://my.oracle.com/site/tugbu/productsindustry/productinfo/utilities/integration/index.htm
Oracle Technology Network (OTN) latest versions of documents	http://www.oracle.com/technetwork/index.html
Oracle University for training opportunities	http://education.oracle.com/

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers have access to electronic support for the hearing impaired. Visit: http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
`monospace`	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Abbreviations

This document includes the following abbreviations:

Term	Expanded Form
FPRC	Oracle Fusion Procurement Cloud
OIC	Oracle Integration Cloud
UCM	Universal Content Management
WACS	Oracle Utilities Work and Asset Cloud Service

Chapter 1

Release Notes

Welcome to the Oracle Utilities Work and Asset Cloud Service Integration to Oracle Fusion Procurement Cloud Release Notes.

This release notes outlines the information about new and improved functionality in integrating Oracle Utilities Work and Asset Cloud Service with Oracle Fusion Procurement Cloud. Each section includes a brief description of the feature, the steps to enable or start using the feature, and any tips or considerations to consider.

The release notes focuses on the following:

- Overview
- Software Requirements
- Features Summary
- Known Issues

Overview

This integration is applicable to Oracle Utilities Work and Asset Cloud Service (WACS).

Oracle Utilities Work and Asset Cloud Service Integration to Oracle Fusion Procurement Cloud helps to manage vendor and end-to-end hybrid procurement originated in Oracle Utilities Work and Asset Cloud Service using Oracle Fusion Procurement Cloud. This pre-built integration represents significant business value for utilities that need to manage their purchases to fulfill demand to complete work orders and activity. Vendor and Vendor Location are master in Oracle Fusion Procurement Cloud and synced to Oracle Utilities Work and Asset Cloud Service. Purchase request for goods and service made in Oracle Utilities Work and Asset Cloud Service are sent to Oracle Fusion Procurement Cloud.

Oracle Fusion Procurement Cloud handles all purchases for Oracle Utilities Work and Asset Cloud Service - creating purchase order within cloud and sending back the purchase order to Oracle Utilities Work and Asset Cloud Service. Receipts, in turn, created in Oracle Utilities Work and Asset Cloud Service are sent to Oracle Fusion Procurement Cloud to close the purchase order.

After the purchase order is completed in Oracle Fusion Procurement Cloud, supplier invoice and payment are recorded in Oracle ERP Cloud. Information for invoice and payments is integrated to Oracle Utilities Work and Asset Cloud Service.

The corresponding modules in Oracle Fusion Procurement Cloud for this integration are Supplier, Purchase requisition, Purchase order and Receipts. All four integration flows have filter criteria that is selected based on the business requirement.
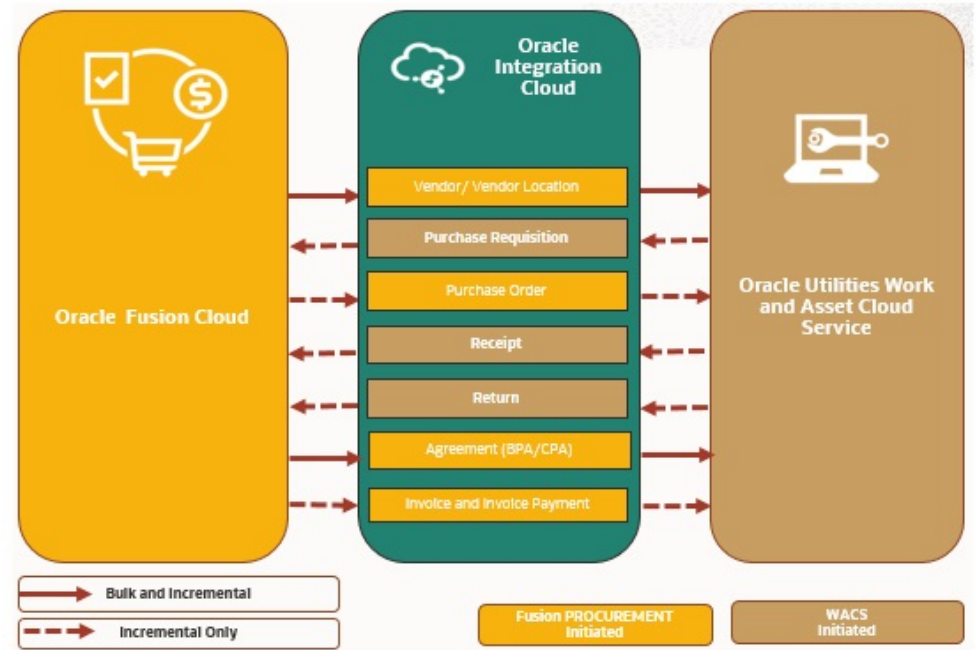

For more information about the functionality, refer to the Oracle Utilities Work and Asset Cloud Service Integration to Oracle Fusion Procurement Cloud documentation at:

https://docs.oracle.com/en/industries/energy-water/integrations-index.html

This integration supports the following flows:

- Vendor and Vendor Location Synchronization Process (Oracle Fusion Procurement Cloud Initiated)

- Blanket Contract Agreement Synchronization Process (Oracle Fusion Procurement Cloud Initiated)

- Purchase Requisition Synchronization Process (Oracle Utilities Work and Asset Cloud Service Initiated)

- Purchase Requisition Approval Process (Oracle Utilities Work and Asset Cloud Service)

- Purchase Order Synchronization Process (Oracle Fusion Procurement Cloud Initiated)

- Receipts Synchronization Process (Oracle Utilities Work and Asset Cloud Service initiated)

- Returns Synchronization Process (Oracle Utilities Work and Asset Cloud Service initiated)

- Invoice and Invoice Payment (Oracle Utilities Work and Asset Cloud Service initiated)

The following diagrams illustrate the business processes supported in this integration.

Software Requirements

The following table lists the supported applications and the respective versions:

Source Application	Version
Oracle Utilities Work and Asset Cloud Service	21C or higher
Oracle Integration Cloud	V22.4.1 or higher
Oracle Fusion Procurement Cloud	21C or higher
Oracle Financial Cloud	21C or higher

Features Summary

The following enhancements are included in this integration release:

- Vendor and Vendor Location Integration
- Blanket Contract Agreement Integration
- Purchase Requisition and Purchase Order Integration
- Receipt Integration
- Return Integration
- Invoice and Invoice Payment Integration

Vendor and Vendor Location Integration

The Vendor and Vendor Location interface integrates the Oracle Fusion Procurement Cloud Suppliers records with the Oracle Utilities Work and Asset Cloud Service Vendor records. Vendor records are stored to arrange goods and service to perform the assigned activities. Oracle Fusion Procurement Cloud will master vendor and vendor location.

Blanket Contract Agreement Integration

The Blanket Contract Process synchronizes Blanket Purchasing Agreements and Contract Purchase Agreements that are approved, revised, suspended or finally closed in Oracle Fusion Procurement Cloud to Oracle Utilities Work and Asset Cloud Service. These agreements are synchronized as Blanket Contracts in Oracle Utilities Work and Asset Cloud Service.

Purchase Requisition and Purchase Order Integration

The Purchase Requisition interface integrates the purchase request originating from Oracle Utilities Work and Asset Cloud Service with Oracle Fusion Procurement Cloud.

Oracle Fusion Procurement Cloud is the master for procurement. Users in Oracle Utilities Work and Asset Cloud Service create request for material that is synchronized with Oracle Fusion Procurement Cloud. After integrating the purchase requests within cloud, the purchase orders (by a buyer for these requests) are sent to Oracle Utilities Work and Asset Cloud Service using business events.

Receipt Integration

Receipt Integration is a synchronization of the receipts recorded for the material received towards a purchase order in Oracle Utilities Work and Asset Cloud Service to Oracle Fusion Procurement Cloud. As Oracle Fusion Procurement Cloud is the master in this integration, receipts are sent back to cloud to complete the procurement cycle by recording a receipt on the open purchase order.

Return Integration

The Return Integration synchronizes all returns created for a supplier towards a purchase order from Oracle Utilities Work and Asset Cloud Service to Oracle Fusion Procurement Cloud. As supply chain is the master in Oracle Fusion Procurement Cloud, all transaction history for a purchase order needs to be interfaced for the purchase order to progress the lifecycle.

Invoice and Invoice Payment Integration

All purchase orders created within Oracle Fusion Procurement Cloud for Oracle Utilities Work and Asset Cloud Service should be invoiced and paid from cloud, as Oracle ERP Cloud is the master for accounts payables. Invoice and their payments recorded in Oracle Financial Cloud are integrated to Oracle Utilities Work and Asset Cloud Service towards purchase order information with invoice and their payment details.

Known Issues

There are no known issues at the time of this integration release.
