Brief Description

Business Process:	4.2.1.7 C2M.Apply Miscellaneous Charges
Process Type:	Sub-process
Parent Process:	4.2.1 C2M.Collect and Process Measurements
Sibling Processes:	4.2.1.6 C2M.Receive External Charges, 4.2.2.4. C2M.Manage External Charges and Miscellaneous Charges, 3.3.2.2 C2M.Start Non-Premise Based Service

The Apply Miscellaneous Charges process takes place whenever a Utility Company provides the service that occurs outside of the main course of business.

The process starts when a customer requests additional miscellaneous service or the miscellaneous service is provided by the Company based on current needs (e.g. tree trimming). An Authorized User creates a billable charge whenever a customer should be levied an ad hoc charge. This charge will be included into the next (one or more) Customer’s bill(s) (see sibling process 4.2.2.4 C2M.Manage External Charges and Miscellaneous Charges for details).

Business Process Model

Detail Business Process Model Description

1.0 Report Service Order Details

Actor/Role: Field Operations

Description:

After providing additional service to the Customer Field Operations report details of provided Service to CSR in order to charge customer for the service.

1.1 Search for Billable Charge Service Agreement for Customer's Account

Actor/Role: CSR or Authorized User

Description:

. There are a few business events that can cause this task to be performed. One of them is described in 1.0 Report Service Order Details

The most typical reasons are:

- Customer contacts Utility Company and requests additional miscellaneous services
- Company identifies the need to provide additional services and, as a result, to apply billable charges

When the CSR or Authorized User decides to apply Billable Charges to Customer's Service Agreement after analyzing nature of services, CSR or Authorized User attempts to find available Customer's Billable Charge SA

1.2 Refer to 3.3.2.2 C2M Start Non-Premise Based Service

Actor/Role: CSR or Authorized User

Description:

If the Customer doesn't have a Billable Charge Service Agreement, the CSR or Authorized User creates it. Refer to 3.3.2.2 Start Non-Premise Based Service

Note: Some Companies prefer to create Billable Charge automatically when Billable Charge Service Agreement is activated (e.g. One off charges) it could be done by configuring the appropriate SA Type Start Option and providing Billable Charge Template

Configuration required Y Entities to Configure:

SA Type
Billable Charge Template
SA Type Start Option

1.3 Initiate new Billable Charge and Request Default Data

Actor/Role: CSR or Authorized User

Description:

If the Customer has a Billable Charge Service Agreement and the Billable Charge for the service hasn't been applied yet, CSR or Authorized User initiates Billable charge creation process.

1.4 Retrieve Standard BC Details

Actor/Role: C2M(CCB)

Description:

C2M(CCB) retrieves and populates default Billable Charge details if available.

Configuration required Y Entities to Configure:

SA Type
Billable Charge Template

1.5 Review Standard Pre-populated BC Details

Actor/Role: CSR or Authorized User

Description:

CSR or Authorized User reviews and evaluates pre-populated default Billable Charge details using [Billable Charge page](#)

1.6 Populate Billable Charge Details

Actor/Role: CSR or Authorized User

Description:

If default data is not available or pre-populated/existing data doesn't satisfy current requirements for Billable Charge, CSR or Authorized User populates correct Billable Charge details using [Billable Charge page](#)

1.7 Request to Add Billable Charge

Actor/Role: CSR or Authorized User

Description:

CSR or Authorized User requests to add a new Billable Charge

1.8 Add Billable Charge

Actor/Role: C2M(CCB)

Description

C2M(CCB) adds a new Billable Charge and link it to Customer's Billable Charge Service Agreement

Configuration required N Entities to Configure:

Characteristic Type
Unit of Measure
Time of Use
Service Quantity Identifier
Distribution Code

1.9 Request to Update Billable Charge

Actor/Role: CSR or Authorized User

Description:

If the CSR or Authorized User identifies the need to update existing Billable Charge, CSR or Authorized User populates the changes (see step [1.6 Populate Billable Charge Details](#) for details) and requests update the data

2.0 Update Billable Charge

Actor/Role: C2M(CCB)

Description:

C2M(CCB) updates Billable charge data

2.1 Request to Cancel Billable Charge

Actor/Role: CSR or Authorized User

Description:

If the CSR or Authorized User decides to cancel existing Billable Charge, CSR or Authorized User changes specific Billable Charge status to Canceled.

Note: Cancelled Billable charges will not be used in billing

2.2 Update Billable Charge Status to Canceled

Actor/Role: C2M(CCB)

Description:

C2M(CCB) updates Billable Charge status to Canceled.
