Purpose

This guide is designed to help user quickly get acquainted with the features and functionality of **Oracle Banking Accounts Retail Cloud Service**. It provides an overview to the product and the steps involved in the creation and the maintenance of Retail Accounts.

Audience

This user guide is intended for the following end Users / User Roles in a Bank:

Table User Roles

User Role	Functions
Back Office Clerk	Input functions for contracts
Back Office Managers/Officers	Authorization functions
Product Managers	Product definition and authorization
End of Day Operators	Processing during End of Day/ Beginning of Day
Financial Controller/Product Managers	Generation of reports

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning	
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.	
italic	Italic type indicates book titles, emphasis, or placeholder variables for whit you supply particular values.	
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.	

Related Documents

The related documents are as follows:

- Account Configurations User Guide
- Current Account Origination User Guide
- Getting Started User Guide
- Oracle Banking Common Core User Guide
- Savings Account Origination User Guide

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table Abbreviations

Abbreviation	Definition
ATM	Automated Teller Machine
BBAN	Basic Bank Account Number
BSA	Bank Secrecy Act
CASA	Current and Savings Account User Guide
CDD	Customer Due Diligence
ECA	External Credit Approval
EOD	End of Day
FIDM	Financial Institution Data Match (Child Support Payments)
IBAN	International Bank Account Number
LOV	List of Values
MMDA	Money Market Deposit Account
OFAC	Office of Foreign Assets Control

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Basic Actions

This topic describes about basic actions that can be performed on a screen.

Table Basic Actions

Action	Description
Approve	Used to approve the initiated report.
	This option is displayed when the user clicks Authorize .
Audit	Used to view the maker details, checker details and report status.
Authorize	Used to authorize the report created.
	A maker of the screen is not allowed to authorize the report. Only a checker can authorize a report, created by a maker.
Reject	Used to reject the report created.
	A maker of the screen is not allowed to authorize the report. Only a checker can reject a report, created by a maker.
Close	Used to close a record.
	This action is available only when a record is created.
Confirm	Used to confirm the performed action.
Cancel	Used to cancel the performed action.
Compare	Used to view the comparison through the field values of old record and the current record.
	This option is displayed in the widget when the user clicks Authorize .

Table (Cont.) Basic Actions

Action	Description
Collapse All	Used to hide the details in the sections.
	This option is displayed when the user clicks Compare .
Expand All	Used to expand and view all the details in the sections. This option is displayed when the user clicks Compare .
Menu Item Search	Used to search and navigate to the required screens. The user can click Menu Item Search to manually search the maintenance and select the required screen.
New	Used to add a new record. When the user clicks New , the system displays a new record enabling to specify the required data.
ок	Used to confirm the details in the screen.
Save	Used to save the details entered or selected in the screen.
View	Used to view the report details in a particular modification stage. This option is displayed in the widget when the user clicks Authorize . This option is also displayed in the Tile menu.
View Difference only	Used to view a comparison through the field element values of old record and the current record, which has undergone changes. This option is displayed when the user clicks Compare .
Unlock	Used to update the details of an existing record. System displays an existing record in editable mode.

The user must specify values for all the mandatory fields and they are marked as ${\bf Required}.$

Symbols and Icons

Configurations

This topic contains the following **Configurations** as subtopics:

Business Product

User can classify the customer accounts of the bank into different groups and assign each group an identifying code.

Joint Holder Type

The Customer can be the sole owner of the account or it can be held jointly. Joint accounts are accounts that are shared between two or more individuals. They can be operated either singly or jointly.

Garnishment Parameters

A Garnishment Order is a Court Order or Statutory/regulatory authority order instructing a garnishee (i.e, to a bank) to hold funds in acustomer accounts and should not be released until directed by the court. The order may instruct the bank to hold or block a particular amount or all the available funds in the customer accounts. A garnishment block fee will be charged to the account on placing a block for the garnishment amount.

Relationship Type

To maintain the relationship types.

Product Switch

The automatic business product transfer for accounts based on certain events (Reg D violation).

1.1 Business Product

User can classify the customer accounts of the bank into different groups and assign each group an identifying code.

For example, user may define a group called **SAVREG** for regular savings accounts, **WLTSAV** for wealth management saving accounts.

Each group is referred to as an **Business Product** and is maintained in the **Business Product** screen. For each class, user also define certain common fields applicable to the accounts in this class, such as, the General Ledger lines to which the accounts in this class report to facilities granted to the account holders (Check Book, ATM, Limits and so on).

The various features of a business product are captured across the following sub-screens covered as subtopics.

- Basic Details
- Preferences
- Features
- Statement Preferences
- Interest
- Charges

- Limits
- Overdraft Parameters
- RegD Parameter
- Status Rule Definition
- GL Reporting Details
- Courtesy pay
- MIS Details
- Minimum Balance

This topic contains the following subtopics:

Create Business Product

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

View Business Product

This topic explains the systematic instructions to view the list of configured business product parameters.

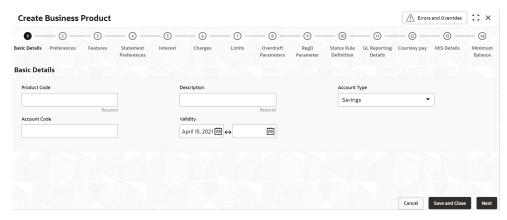

1.1.1 Create Business Product

This topic describes the systematic instructions to create business product. The maintenance screen allows the user to configure business product parameters.

- On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click Business Product.
- 2. Under Business Product, click Create Business Product.

The Create Business Product screen displays.

Figure 1-1 Create Business Product – Basic Details

3. Specify the fields on the Basic Details screen.

Table 1-1 Basic Details - Field Description

Field	Description
Product Code	Specify the product code for the creation of accounts.
Description	Specify the description for the business product.
Account Type	Select the type of the account from the drop-down list. The different types of accounts are: Savings Current The default value is Savings.
Account Code	As per your bank's requirement, you can choose to classify business products into different account codes. The bank can decide the way the business products are to be assigned to different account codes. The business product or an account code can be part of the customer account mask.
	If the customer account mask consists of an account code, the value in this field is replaced in the account number.
Validity	Specify the validity period of the business product by specifying the start date and the end date. End date is optional.

4. After specifying the fields in the **Basic Details** screen, click **Next**.

8. After specifying the fields in the **Features** screen, click **Next**.

The **Statement Preferences** screen displays.

Figure 1-4 Create Business Product - Statement Preferences

9. Specify the fields on the **Statement Preferences** screen.

Table 1-4 Statement Preferences - Field Description

Field	Description
Display IBAN on Advices	Switch this toggle ON , the IBAN details will be displayed in the statement. The default value is OFF .
Statement Type	Specify the type of account statement. The options are as follow: None Summary Detailed
Cycle	Specify the value for the cycle. The values are as follow: Daily Weekly Fortnightly Monthly Quarterly Semi Annual Annual This field is available only when the Statement Type is selected as Summary or Detailed.
Statement Format	Specify the format in which the account statement should be generated. Click Search icon to view and select the required statement format. This field is available only when the Statement Type is selected as Summary or Detailed .

Validations

When the **Cycle** is selected as follows:

- **Monthly** the list of value displays value from **1** to **31**. This shows the day of the month for statement generation.
- Weekly the list of value displays value from Sunday to Saturday.
- Fortnightly the list of value displays value from Sunday to Saturday.
- Quarterly the list of value displays value from January to December.
- Semi Annual the list of value displays value from January to December.
- Annual the list of value displays value from January to December.
- 10. After specifying the fields in the **Statement Preferences** screen, click **Next**.

The **Interest** screen displays.

To calculate interest for an account, you must apply an interest product code on the account. To recall, every interest product code that you create is linked to an interest rule. The logic to calculate interest is built into an interest rule. When you apply an interest product code on the account, interest for the account will be calculated according to the interest rule definition.

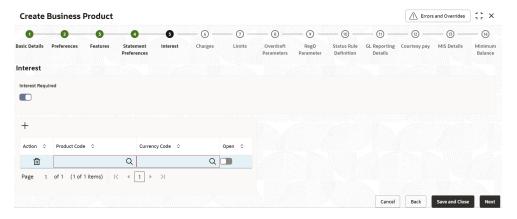

For the account for which you are defining special conditions choose the product(s) that you wish to apply. To recall, you can define a Special Condition for an account only if the business product of the account has a general condition defined for the product. Thus, the pick-list from where you select the product for which you want to define a special condition will contain products that satisfy one of the following conditions:

- a general condition has been defined for the product and business product combination.
- the product has been defined as a special conditions only product.

The interest rule that is linked to the product(s) will determine the interest that is applied on the account. You may want to apply more than one interest product code on an account. For example, you may want to pay credit interest on the credit balance maintained in a current account and levy a debit interest if the account lapses into a debit balance. In order to achieve this, you would have to apply two product codes (one defined for credit interest and another defined for debit interest). In this screen, you can choose the interest product codes that you want to apply on the account.

Figure 1-5 Create Business Product – Interest

11. Specify the fields on Interest screen.

For more information on fields, refer to the field description table below.

Table 1-5 Interest - Field Description

Field	Description
Interest Required	Switch this toggle ON to indicate that the interest is applicable for the accounts with this business product. The default value is ON .
	Click the Add icon, a new row is added to update the details for the interest.
Action	Click the Delete icon to delete the added row.
Product Code	Click Search icon to view and select the required product code.
Currency Code	Click Search icon to view and select the required currency code.
Open	Switch this toggle ON to change the status of the product code to open. The default value is OFF .

1.1.2 View Business Product

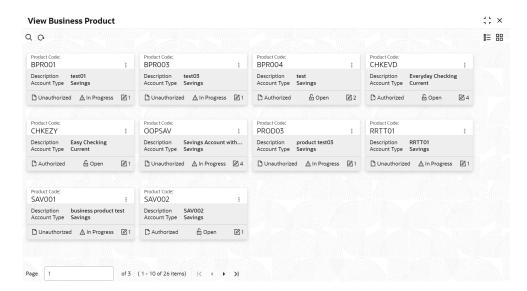

This topic explains the systematic instructions to view the list of configured business product parameters.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click Business Product.
- 2. Under Business Product, click View Business Product.

The View Business Product screen displays.

Figure 1-17 View Business Product

For more information on fields, refer to the field description table below.

Table 1-17 View Business Product - Field Description

Field	Description
Product Code	Displays the product code.
Description	Displays the description of the product code.
Account Type	Displays the type of account.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.2 Joint Holder Type

The Customer can be the sole owner of the account or it can be held jointly. Joint accounts are accounts that are shared between two or more individuals. They can be operated either singly or jointly.

This topic contains the following subtopics:

Create Joint Holder Type
 This topic explains the systematic instructions to create joint holder type.

View Joint Holder Type
 This topic describes the systematic instructions to view the list of configured joint holder type.

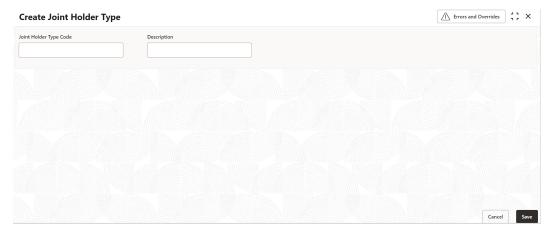

1.2.1 Create Joint Holder Type

This topic explains the systematic instructions to create joint holder type.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click Joint Holder Type.
- 2. Under Joint Holder Type, click Create Joint Holder Type.

The **Create Joint Holder Type** screen displays.

Figure 1-18 Create Joint Holder Type

3. Specify the fields on **Create Joint Holder Type** screen.

For more information on fields, refer to the field description table below.

Table 1-18 Create Joint Holder Type - Field Description

Field	Description
Joint Holder Type Code	Specify the joint holder type code which should be an unique alpha numeric code.
Description	Specify the description of the joint holder type. For Example: Guardian, Custodian, etc.

4. After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

1.2.2 View Joint Holder Type

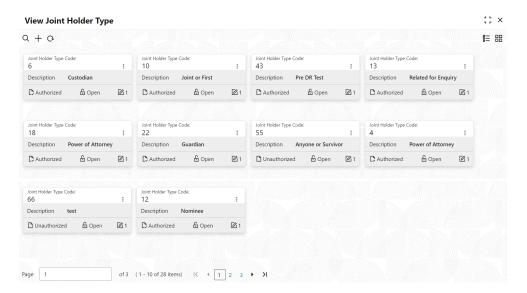

This topic describes the systematic instructions to view the list of configured joint holder type.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click Account Holder Role.
- 2. Under Joint Holder Type, click View Joint Holder Type.

The View Joint Holder Type screen displays.

Figure 1-19 View Joint Holder Type

For more information on fields, refer to the field description table below.

Table 1-19 View Joint Holder Type - Field Description

Field	Description
Joint Holder Type Code	Displays the account holder role code.
Description	Displays the description of the joint holder type code.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.3 Garnishment Parameters

A Garnishment Order is a Court Order or Statutory/regulatory authority order instructing a garnishee (i.e, to a bank) to hold funds in acustomer accounts and should not be released until directed by the court. The order may instruct the bank to hold or block a particular amount or all the available funds in the customer accounts. A garnishment block fee will be charged to the account on placing a block for the garnishment amount.

This topic contains the following subtopics:

- Create Garnishment Parameters
 This topic explains the systematic instructions to create garnishment parameters.
- View Garnishment Parameters
 This topic describes the systematic instructions to view the list of configured garnishment parameters.

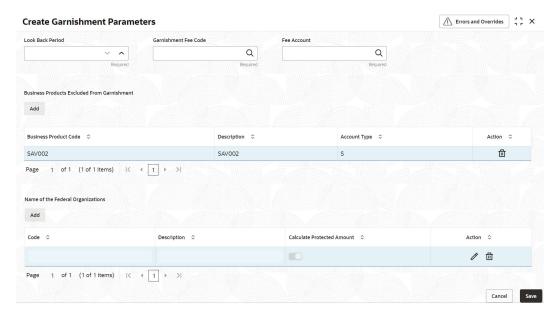

1.3.1 Create Garnishment Parameters

This topic explains the systematic instructions to create garnishment parameters.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click Garnishment Parameters.
- 2. Under Garnishment Parameters, click Create Garnishment Parameters.

The Create Garnishment Parameters screen displays.

Figure 1-20 Create Garnishment Parameters

3. Specify the fields on Create Garnishment Parameters screen.

Table 1-20 Create Garnishment Parameters - Field Description

Field	Description
Look Back Period	The number of days prior to the garnishment start date to be considered for protected amount calculation.
Garnishment Fee Code	Click the Search icon, the list is fetched from the charge code definition defined in the pricing and decision system. Select the respective charge code from the list.
Fee Account	This is the receivable account for garnishment fee. Click the Search icon, the list is fetched from the fee account. Select the respective fee account from the list.

Table 1-20 (Cont.) Create Garnishment Parameters - Field Description

Field	Description
Business Products Excluded From Garnishment	Click Add, the Add Garnishment list displays. The values in the list are excluded from the garnishment processing. Based on the selection from the list the Business Product Code, Description and the Account Type is defaulted.
	Click the Delete icon from the Action to delete the selected values.
Name of the Federal Organizations	Click Add to specify the federal organizations which is excluded from the protected amount calculation.
Code	Specify the federal organization code.
Description	Specify the federal organization description.
Calculate protect amount	If it is enabled, any credit amount from this specified federal organization is considered for protected amount calculation.
Action	Click the Edit icon to edit the values, click the Save icon to save the record and Click the Delete icon to delete the record.

The Garnishment fee will be applied to the account upon completion of placing a block or hold for the required amount. If there is no sufficient balance to fulfill the charge amount, subsequent actions of retrying the fee collection have to be operationally dealt with by the Bank.

4. After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

1.3.2 View Garnishment Parameters

This topic describes the systematic instructions to view the list of configured garnishment parameters.

- On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click Garnishment Parameters.
- 2. Under Garnishment Parameters, click View Garnishment Parameters.

The View Garnishment Parameters screen displays.

For more information on fields, refer to the field description table below.

Table 1-23 View Relationship Type - Field Description

Field	Description
Relationship Code	Displays the relationship code.
Description	Displays the description of the relationship type.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

1.5 Product Switch

The automatic business product transfer for accounts based on certain events (Reg D violation).

This topic contains the following subtopics:

- Create Product Switch Parameters
 This topic explains the systematic instructions to create business product transfer.
- View Product Switch Parameters
 This topic describes the systematic instructions to view the list of configured product Switch parameters.

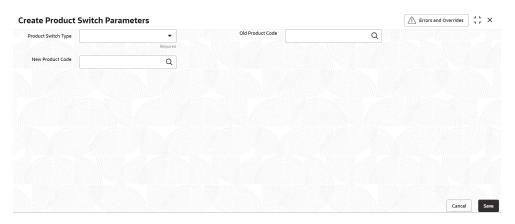

1.5.1 Create Product Switch Parameters

This topic explains the systematic instructions to create business product transfer.

- 1. On Home screen, under Menu, click Retail Account Configurations. Under Retail Account Configurations, click Product Switch.
- 2. Under Product Switch, click Create Product Switch Parameters.

The Create Product Switch Parameters screen displays.

Figure 1-24 Create Product Switch Parameters

3. Specify the fields on **Create Product Switch Parameters** screen.

For more information on fields, refer to the field description table below.

Table 1-24 Create Product Switch Parameters - Field Description

Field	Description
Product Switch Type	Select the Reg D violation from the drop-down list. This value supports if the current product has the Reg D violation.
Old Product Code	Click the Search icon to select the old product code from the list determines the existing business product from which the account needs to be switched in case of Reg D violation.
New Product Code	Click the Search icon to select the new product code from the list determines the new business product to which the account to be switched in case of Reg D violation.

4. After specifying all the details, click **Save** to complete the steps. Or, click **Cancel** to exit without saving.

1.5.2 View Product Switch Parameters

This topic describes the systematic instructions to view the list of configured product Switch parameters.

 On Home screen, under Menu, click Retail Accounts Configurations. Under Retail Accounts Configurations, click Product Switch.

2. Under Product Switch, click View Product Switch Parameters.

The View Product Switch Parameters screen displays.

Figure 1-25 View Product Switch Parameters

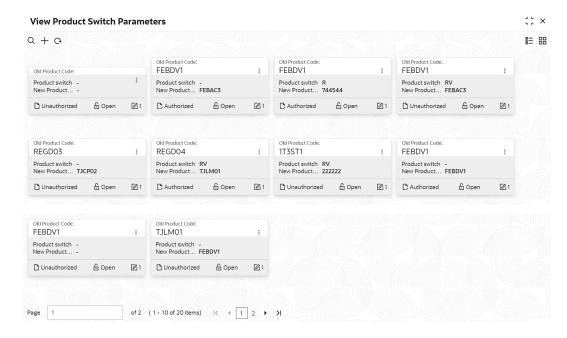

Table 1-25 View Product Switch Parameters - Field Description

Field	Description
Old Product Code	Displays the old product code.
Product Switch	Displays the business product switch.
New Product Code	Displays the new product code.
Authorization Status	Displays the authorization status of the record. The available options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: Open In Progress Closed
Modification Number	Displays the number of modifications performed on the record.

Operations

This topic contains the following **Operations** as subtopics:

Dashboard

This topic describes the systematic instructions about Dashboard and various widgets used. This Dashboard provides an overview of the goings-on at the bank to its users, which helps the user in managing the transaction life cycle of different activities in an efficient manner.

Account Creation

This topic provides the account creation details for the Retail Accounts.

Servicing Charge

You can configure online service charge configure account servicing screens. The system validates the charge amount against the account balance when you modify or waive the charge details. You can define multiples charges for the servicing transactions.

Customer Information

Based on the selection of the account number in a screen, the Customer Information is displayed in a widget, to the right of a screen.

Account View

Under the **Account View** menu, you can view and perform various vital transactions on a CASA account.

Maintenance

Under the Maintenance menu, you can maintain the details of a CASA account.

Statement

Under the **Statement** menu, you can perform the required actions related to statement of an account.

Status Update

Under the Status Update menu, you can update the status of an account.

Limits

Under the **Limits** menu, you can perform actions related to limits for an account.

Amount Block

Under the **Amount Block** menu, you can perform the amount block related actions for an account.

Check Book

Under the **Check Book** menu, you can perform the check book related actions for an account.

Inquiry

Under the **Inquiry** menu, you can perfrom inquire the details of a CASA account.

Death Claim Processing in Oracle Banking Retail Accounts This topic describes the processing of death claim in Oracle Banking Retail Accounts.

Escheatment Processing in Oracle Banking Retail Accounts
 This topic describes the processing of escheatment in Oracle Banking Retail Accounts.

 This topic describes the notes and memos in Oracle Banking Retail Accounts.
- FIDM Processing in Oracle Banking Retail Accounts
 This topic describes the processing of FIDM in Oracle Banking Retail Accounts.
- OFAC Processing in Oracle Banking Retail Accounts
 This topic describes the processing of OFAC in Oracle Banking Retail Accounts.
- Reg D Processing in Oracle Banking Retail Accounts
 This topic describes the processing of Reg D in Oracle Banking Retail Accounts.

2.1 Dashboard

This topic describes the systematic instructions about Dashboard and various widgets used. This Dashboard provides an overview of the goings-on at the bank to its users, which helps the user in managing the transaction life cycle of different activities in an efficient manner.

The Dashboard is used to visualize the data by graphically representing them using a doughnut wheel. In Dashboard the filters are used to narrow down the data to the transaction level.

The Dashboard displays widgets for which access is granted to the user. Following widgets are available in the Account Dashboard and described in the sub-sections:

Bulletin Board

This topic describes the systematic instruction about the Bulletin Board widget in Dashboard.

My Diary

This topic describes the systematic instruction about the My Diary widget in Dashboard.

My Pending Tasks

This topic describes the systematic instruction about My Pending Tasks widget in Dashboard.

2.1.1 Bulletin Board

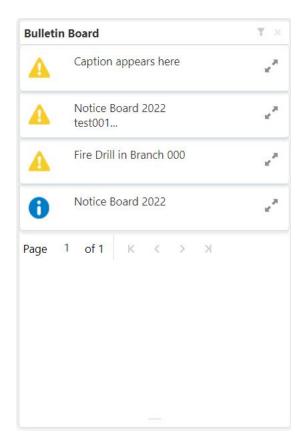

This topic describes the systematic instruction about the Bulletin Board widget in Dashboard.

The Bulletin Board widget posts all messages about the business in between the bank and its customers. If the bulletin message is Alert, the **Alert** icon is displayed and if the bulletin message is information, the **Information** icon is displayed. The messages are:

...o ...ocoagoo a.o.

- Public news and its messages
- Bank policies and notices
- System Messages like system downtime information, network failures, etc.

Figure 2-2 Bulletin Board

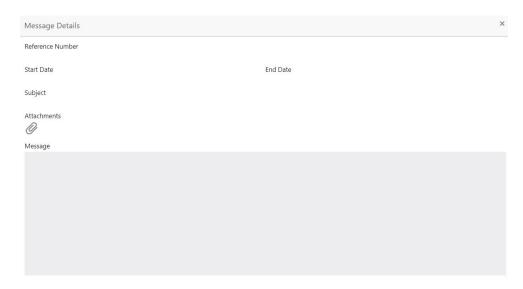

1. To view the details of the bulletin, click the **Expand** icon.

Message Details pop-up window is displayed.

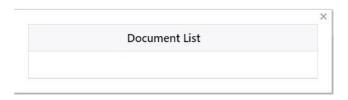

Figure 2-3 Message Details

2. Click the **Attachments** icon, to view the list of attachments.

Document List pop-up window is displayed.

Figure 2-4 Document List

- 3. Click the attachment to view the document.
- 4. Click the **Filter** icon to filter the bulletin board based on Reference Number, Start Date, End Date.

Table 2-1 Bulletin Board-Filter - Field Desription

Field	Description
Reference Number	Enter the Reference Number or click the search icon to view the Reference Number pop-up window. By default, this window lists all the Reference Numbers present in the system. You can search for a specific Reference Number by providing Reference Number , and click on the Fetch button.
Start Date	Click on the adjoining calendar icon and specify the Start Date .
End Date	Click on the adjoining calendar icon and specify the End Date .

5. Click the Filter button.

The applied Filters will appear in the band within the widget.

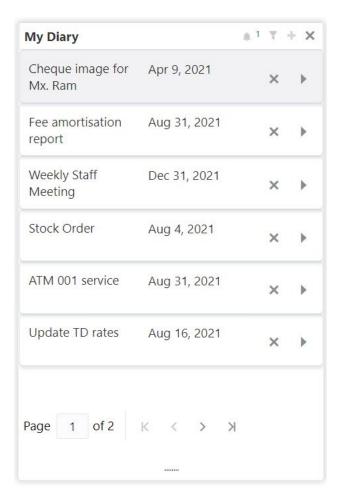

6. To remove the filters, click the **Filter** icon and click the clear button.

2.1.2 My Diary

This topic describes the systematic instruction about the My Diary widget in Dashboard.

My Diary widget helps users to keep a record of activities that they would perform in the near future or perform at regular intervals. This widget allows users to set reminders, define a frequency for reminders as well as define an end date to the event.

Figure 2-5 My Diary

1. Click the **Filter** icon to filter the events based on due date.

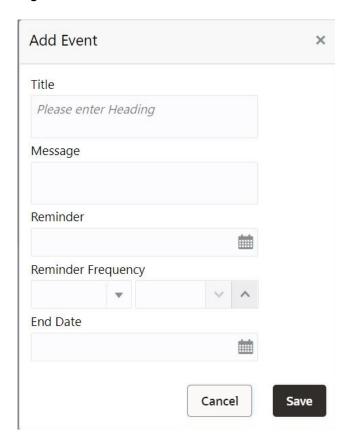

Table 2-2 My Diary-Filter

Field	Description
Filter By Due Date	Click on the adjoining calendar icon and specify the Due date.

- 2. The dairy event within the widget will show the Title and the End-Date. Click the **Expand** icon to view or edit the diary event.
- 3. When the user defines the reminder date for a dairy event, the bell icon with the number of reminder events will be displayed. Click the **Bell** icon to view the events that are due for the day.
- 4. Click the **Add** icon to create a new Diary event

Add Event pop up screen is displayed.

Figure 2-6 Add Event

5. On **Add Event** pop up screen, specify the fields.

Table 2-3 My Diary-Add Event

Field	Description
Title	Enter an appropriate title for the diary event. When event is saved, the title appears on the widget.
Message	Enter details about the diary event.

Table 2-3 (Cont.) My Diary-Add Event

Click on the adjoining calendar icon and specify the reminder date.	
Users can define a reminder frequency for the diary event in Days, Months, or Years. By using the increment and decrement button, the frequency can be increased or decreased.	
Click on the adjoining calendar icon and specify the End date.On this date, the event will be removed from the widget.	
Note: If the Due Date is not specified, the event remains in the widget indefinitely.	

6. Click the Filter button.

The applied Filters will appear in the band within the widget.

7. To remove the filters, click the **Filter** icon and click the **Clear** button.

2.1.3 My Pending Tasks

This topic describes the systematic instruction about My Pending Tasks widget in Dashboard.

My Pending Tasks widget provides the user list of transactions that are in different statuses such as rejected, failed, and incomplete. Users can click on each section of the widget to access the transactions and proceed to complete them.

My Pending Tasks doughnut is classified as follows:

- Failed
- Incomplete
- Rejected

Figure 2-7 My Pending Tasks

- 1. To view the Pending Tasks, hover the mouse on each section of the doughnut.
- Click the Filter icon to display the transactions based on process name.For more information on fields, refer to the field description table.

Table 2-4 My Pending Tasks-Filter

Field	Description
Process Name	Enter the Process Name or click on the search icon to select the processes available under a particular sub-domain.

3. Click the Filter button.

The applied Filters will appear in the band within the widget.

4. To remove the filters, click the **Filter** icon and click the clear button.

2.2 Account Creation

This topic provides the account creation details for the Retail Accounts.

For the detailed explanation on the savings account and current account creation, refer to the following user guides under the *Oracle Banking Origination* product.

- Current Account Origination User Guide
- Savings Account Origination User Guide

2.3 Servicing Charge

You can configure online service charge configure account servicing screens. The system validates the charge amount against the account balance when you modify or waive the charge details. You can define multiples charges for the servicing transactions.

Based on the charge maintenance, you can configure the charges in the following screens:

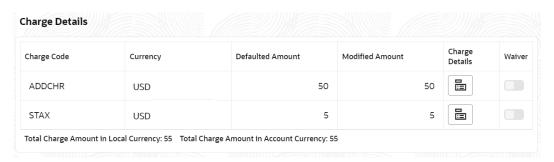

- Account Address Update
- Activate Inactive/Dormant Account
- Check Book Status
- Stop Check Request
- Account Statement Frequency
- Beneficiary Details Update
- Joint Holder Maintenance
- Account Preferences
- Account Status Change
- View and Modify Stop Check Payment

To configure charge details:

1. In the **Charge Details** section, view the required details.

Figure 2-8 Charge Details

For more information on fields, refer to the field description table.

Table 2-5 Charge Details - Field Description

Field	Description
Charge Code	Displays the charge code applied on the account.
Currency	Displays the currency of the charge amount.
Defaulted Amount	Displays the defaulted charge amount.
Modified Amount	Displays the modified charge amount.
Charge Details	Displays the Details icon to view more details on the charge.
	Note: For more information, refer View Charge Details.
Waiver	Swtich to toggle ON to waive the particular charge applied on the account. Swtich to toggle OFF to retain the charges applied on the account.
	Note: To enabled the field, you need to double click in the field.
Total Charge Amount in Local Currency	Displays the total charge amount in local currency.
Total Charge Amount in Account Currency	Displays the total charge amount in account currency.

View Charge Details

 If you click the **Details** icon from the **Charge Details** field, the following section is displayed:

Figure 2-9 Charge Details

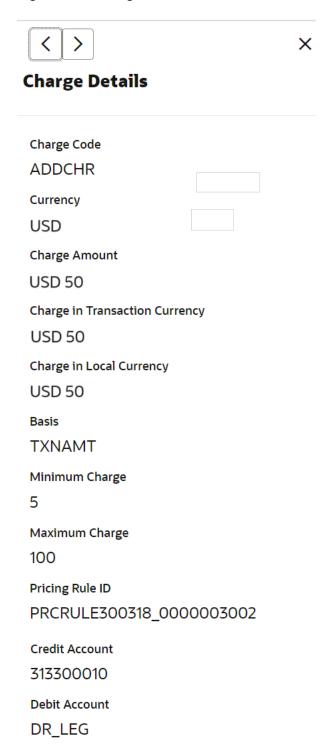

Table 2-6 View Charge Details - Field Description

Field	Description

This topic helps the user to know the statement frequency and the last statement details for the account.

Suggested Actions

This topic describes the systematic instruction about the Suggested Actions in Account 360 screen. The Suggested Actions widget in the Account 360 screen displays the account's upcoming events and pending actions. This helps the user to inform the account holder and take the required actions.

Alerts

This topic describes the systematic instruction about the Alerts in Account 360 screen. The Alerts widget helps the user view alerts on the account.

Recent Transactions

This topic describes the systematic instruction to view the Recent Transactions in the Account 360 screen.

Interest Details

This topic describes about Interest Details in the Account 360 screen.

Frequent Actions

This topic describes the about the Frequent Actions in the Account 360 screen. The Frequent Actions helps the user to perform account servicing related transactions from the account 360 view screen without navigating to the main menu.

2.5.1.1 Account Balance

This topic helps the user to know the account balance details while performing account servicing transactions.

On the **Account 360** screen, the system displays the following details for the account balance:

- Withdrawable Balance
- Available Balance

Figure 2-13 Account Balance

2.5.1.2 Account Information

This topic helps the user to know the account information details while performing account servicing transactions.

On the **Account 360** screen, the system displays the following account information details:

- Account Product Description
- Account Branch Description
- Account Status
- IBAN
- Account class Type (Savings/Current)
- Account Currency
- Account Opening Date
- Nomination Status
- Performance Status
- Account Type

Figure 2-14 Account Information

Regular Savings Account Active Branch Account 006 Branch Savings IBAN Since Mar 30, 2018 Performance Status Currency NORM Since Mar 30, 2018 USD Nomination Type Provided Single

Note:

Account status is displayed as Active, Inactive, Frozen, Dormant, or Closed based on account status.

Following status is displayed when there are combination of account status:

- If the account is frozen and Dormant, then the status is displayed as Frozen.
- If the account is Dormant and Closed, then the status is displayed as Closed.
- If the account is Inactive and Frozen, then the status is displayed as Frozen.

2.5.1.3 Account Holder Details

This topic helps the user to know the Account Holder details while performing account servicing transactions.

On the Account 360 screen, the system displays the following account holder details:

- Account holders photo
- Name
- Customer ID
- Account holder relation (Primary/Joint and first/Joint and other etc)
- Mobile Number with ISD code
- Email Id
- Mode of Operation

Figure 2-15 Account Holder

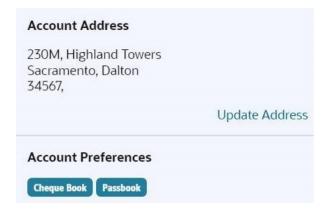

2.5.1.4 Account Details

This topic helps the user to know the Account Address details and facilities enabled to the account.

On the **Account 360** screen, the Account Details widget provides the Account Address.

Figure 2-16 Account Details

To update the account address, click **Update Address** hyperlink and the system displays the **Account Address Update** screen.

On the **Account Address Update** screen, user can modify the below details:

- Building
- Street
- City
- State
- Country
- Zip Code

2.5.1.5 Account Statement Details

This topic helps the user to know the statement frequency and the last statement details for the account.

The below account statement details are displayed:

- Account Statement Frequency and Cycle
- · Last Statement Date

Figure 2-17 Account Statement Details

Account Statement Details

Statement Frequency Last Statement Date

Request Statement

To generate the ad hoc account statement, click the **Request Statement** link.

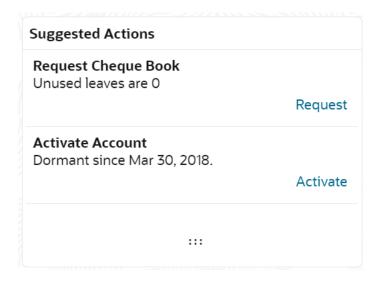

2.5.1.6 Suggested Actions

This topic describes the systematic instruction about the Suggested Actions in Account 360 screen. The Suggested Actions widget in the Account 360 screen displays the account's upcoming events and pending actions. This helps the user to inform the account holder and take the required actions.

On the Account 360 screen, the system displays the suggested actions for the account.

Figure 2-18 Suggested Actions

The suggested actions widget displays two suggested actions at a time. If more than 2 suggested actions are present for the account, the **View All** button is enabled to the user.

- 1. To view all the suggested actions, click on **View All** button.
- Click the Close icon on the Suggested Actions pop-up window.The view all display is closed.
- On the Suggested Actions widget, the below cases are displayed. If no suggested actions are displayed, the system displays the message as No Suggested Actions.

Table 2-9 Suggested Actions - Field Description

Field	Description
Deliver Check Book	Displayed, if any check book delivery is pending for the account at branch. To deliver the check book, click on Deliver button, and the Check Book Status screen is launched. The system displays the message with check book request date and status. For example, Requested on March 30, 2019, pending delivery.

Table 2-9 (Cont.) Suggested Actions - Field Description

Field	Description
Request Check Book	Displayed, if the number of pending check leaves are less than or equal to the specified limit at Account 360 parameter. By default the limit is 5 and can modify the value. To request new check book, click on Request button, and the Check Book Request screen is launched. For example, Unused leaves are 5.
	Note: The pending check leaves consider unused, stopped, and rejected checks. It excludes canceled and used checks.
Activate Dormant Account	Displayed, if the account status is dormant. To activate the dormant account, click on the Activate button, and the Activate Dormant Account screen is launched. The system displays the message with a dormant date. For example: Dormant since Jan 10, 2022.

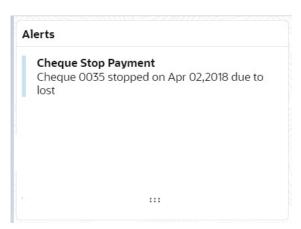

2.5.1.7 Alerts

This topic describes the systematic instruction about the Alerts in Account 360 screen. The Alerts widget helps the user view alerts on the account.

1. On the **Account 360** screen, the system displays the alerts of any exceptions, memo, and warnings on the account.

Account Alert details are displayed.

Figure 2-19 Alerts

- 2. The alerts widget displays two alerts at a time. If more than 2 alerts are present for the account, the **View All** button is enabled to the user.
- 3. To view all alerts, click on View All button.

Alerts pop-up window is displayed.

4. Click the Close icon on the Alerts pop-up window.

Alerts pop-up window is closed.

5. On the **Alerts** widget, the below details are displayed.

For more information on fields, refer to the field description table.

If no alerts are displayed, the system displays the message as ${f No}$ Alerts.

Table 2-10 Alerts - Field Description

Alerts	Description
Cheque Stop Payment	Displayed if any active stop payment is available on the account. The alert message displays the cheque number, Stop payment date, and stop payment reason. For example, Cheque 0002 stopped on Jan 10, 2022 due to an incorrect amount.
Cheque Rejected	Displayed if any cheque clearing is rejected on the account. The alert message displays the Cheque Number, Rejected date, and Reject reason. For example, Cheque CHQ00000003023063 Rejected on Jan 15, 2022, due to Insufficient Balance.
Amount Block	Displayed if any active amount is blocked on the account. The alert message displays the Blocked amount, Date, and Block reason details. For example, GBP 10,000.00 blocked on Dec 10, 2021, due to legal notice.
Memo	Displayed if any active memo is maintained for the account. The memo message is displayed in the alert.
Debit Restricted	Displayed if any debit restriction is there for the account.
Credit Restricted	Displayed if any credit restriction is there on the account.

2.5.1.8 Recent Transactions

This topic describes the systematic instruction to view the Recent Transactions in the Account 360 screen.

1. On the **Account 360** screen, the system displays the Recent Transactions performed for the account.

Recent Transactions details for the account are displayed.

Figure 2-20 Recent Transactions

Recent Transactions Test Transaction Description Credited GBP 10,000.00 on March 30, 2018 Reference: 123124 Test Transaction Description Credited GBP 1,000.00 on March 30, 2018 Reference: 123123 Test Transaction Description Credited GBP 1,000.00 on March 30, 2018 Reference: 123123

:::

- 2. The Recent Transactions widget displays latest 5 transaction details at a time. If more than 5 transaction details are present for the account, the **View more** button is enabled to the user.
- 3. To view more Recent Transactions, click on **View more** button.

Account Transaction screen is displayed.

In this view, 15 records are shown at a time and can be configured in Account 360 parameter.

2.5.1.9 Interest Details

This topic describes about Interest Details in the Account 360 screen.

Figure 2-21 Interest Details

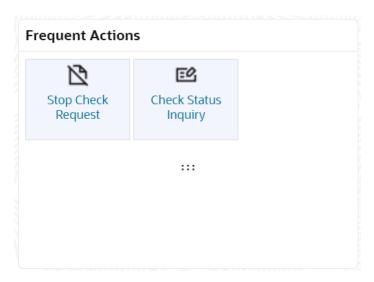

2.5.1.10 Frequent Actions

This topic describes the about the Frequent Actions in the Account 360 screen. The Frequent Actions helps the user to perform account servicing related transactions from the account 360 view screen without navigating to the main menu.

The Frequent Actions widget displays the frequently used account servicing transactions.

Figure 2-22 Frequent Actions

A maximum of 6 transactions are allowed for frequent actions.

Users can configure the frequently used account servicing transactions screens.

When users click on the configured account servicing transactions, the system launches the related transaction screen by defaulting the account number.

If any widgets fail to fetch the details, the system displays the related error message and the retry option is provided to fetch the details.

2.6 Maintenance

Under the **Maintenance** menu, you can maintain the details of a CASA account.

This topic contains the following subtopics:

Account Address Update

This topic describes the systematic instruction about Account Address Update. While entering the account number, the system displays the current address details of the account and the user can modify these details.

Joint Holder Maintenance

You can either add joint holders for the first time or modify the existing joint holder relationship using this screen.

Beneficiary Details Update

You can modify the existing beneficiary details, add a new beneficiary, and delete the existing beneficiary details added to an account using this screen.

Account Preferences

You can set or modify the preferences for the Current Account and Savings Account using this screen.

Customer Relationship Maintenance

The Customer Relationships can be maintained for accounts where the ownership remains with the Primary Customer of the account, but the account operations could be handled by relationships such as Guardians or Custodians.

Bulletin Board Maintenance

This topic helps you to create, view, modify or delete the bulletin messages.

2.6.1 Account Address Update

This topic describes the systematic instruction about Account Address Update. While entering the account number, the system displays the current address details of the account and the user can modify these details.

To update the account address:

 On the Home screen, from Retail Account Services, under Maintenance,, click Account Address Update, or specify the Account Address Update in the Search icon bar.

The Account Address Update screen is displayed.

Account Address Update Remarks Documents Account Number FM7000224480 Q Customer Information Building Sunlight Queens City State New South Wales Sydney Q 12345 AU Customer Id, Name 000182, John Smith KYC Status Not Verified Holy Q Signature Account Name John Smith Account Status Account Branch FM7 Mode Of Operation Active Account Balance £995,264.00 8892090908 ☑ Johnsmith@gmail.com Address Of Communication #101, Church Street, New York, New Jersy Cancel Save & Close Submit

When this option is selected, the Bulletin message is represented with Information icon on the widget.

Table 2-22 (Cont.) Create Bulletin - Field Description

Field	Description
Start Date	Select the date from which the bulletin message displays on the widget.
	Note: This date cannot be lesser than the current business date.
End Date	Users can specify the expiry date of the bulletin message. Once the bulletin message reaches the expiry date, the message gets removed from the bulletin board widget.
Subject	Enter a brief description of the bulletin message.
Message	Enter a detailed description of the message.
Attachments	You can attach relevant documents using this option. You can either drag and drop files into the space provided or select documents from your local drive. You can preview or delete an attachment before submitting the transaction for authorization.

3. To preview an attached document, click the document link.

The **Document Uploaded** pop up window is displayed.

The document preview is available only to those document types that support the preview feature by default. Where the preview feature is not supported, click on **Download** button to download the attached document before viewing.

- 4. Click the **Close** icon to close the **Document Uploaded** pop up window.
- You can target bulletin messages towards user groups or specific users. Using the User Role Mapping table, you can configure User Roles or Users to a particular bulletin.
- 6. Click the **Add** icon to specify User Role or User mapping to the bulletin message. For more information on fields, refer to the field description table.

Table 2-23 User Role Mapping - Field Description

Field	Description
User/Role	Select User/Role from the drop-down list.

Table 2-23 (Cont.) User Role Mapping - Field Description

Field	Description
ID	When User is selected, click the search icon to view the User Mapping pop-up window. By default, this window lists all the Users present in the system. You can search for a specific User by providing User, or Username and click Fetch . When Role is selected, click the search icon to view the Role Mapping pop-up window. By default, this window lists all the Roles present in the system. You can search for a specific Role by providing Role, or Role Name and click Fetch .
Name	User or Role name is displayed based on the user id or role id selected.
Actions	Displays the Delete icon, to remove the respective user or role.

After the message is created, the status of the message is updated as Active or Awaited.

System updates the status of the Bulletin message as **Active** if the start date is equal to the current business date.

If the Start Date is future dated, then the status of Bulletin message is updated as **Awaited** until the date is reached. The system automatically updates the status to **Active** once the start date is reached

2.6.6.2 View Bulletin

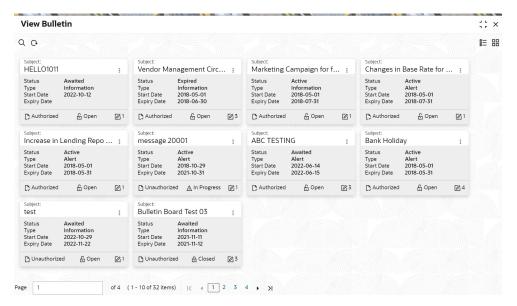

This topic describes the systematic instructions to View or Modify the Bulletin Message.

1. On the **Home** screen, from **Interaction Services**, under **Maintenance**, **Bulletin**, click **View Bulletin**, or specify the **View Bulletin** in the Search icon bar.

View Bulletinscreen is displayed.

Figure 2-44 View Bulletin

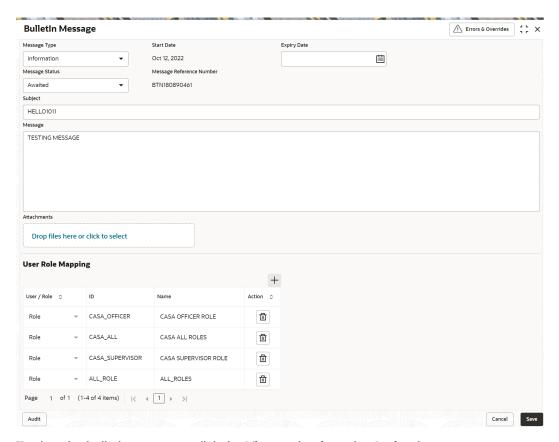

- On View Bulletin screen, the system displays all the bulletin messages with status:
 - a. Awaited
 - b. Active
 - c. Paused
 - d. Expired
- 3. On the View Bulletin screen, you can search for specific bulletin using the Search icon. You can use any of the following options to search:
 - a. Message Type
 - b. Message Status
 - c. Message Reference Number
 - d. Subject
 - e. Start Date
 - f. Expiry Date
 - g. Authorization Status
 - h. Record Status
- 4. After the input of any options mentioned above, click the **Search** button.
- 5. Click the **Action** icon to display the following options:
 - a. Unlock
 - b. Authorize
 - c. Delete
 - d. Close
 - e. Copy
 - f. View

To modify an existing bulletin message, click the Unlock option from the Action icon.The Bulletin Message screen is displayed.

Figure 2-45 BulletIn Message

To view the bulletin message, click the View option from the Action icon.
 Create Bulletin screen is displayed.

- 8. To replicate an existing bulletin, click the **Copy** option from the **Action** icon.
- 9. To permanently delete the existing bulletin, click the **Delete** option from the **Action** icon.
- **10.** On **View Bulletin** screen, the system displays all the bulletin messages with status: For more information on fields, refer to the field description table.

Table 2-24 Tax Deducted at Source Inquiry - Field Description

Field	Description
Customer ID	Enter the Customer ID or click the search icon to view the Customer ID pop-up window. By default, this window lists all the Customer ID's present in the system. You can search for a specific Customer ID by providing Customer Number or Customer Name and click on the Fetch button.
Customer Name	Customer Name is displayed based on the Customer ID selected.
Account Number	You can enter a specific account number of the customer and search Tax Deducted at Source details or click the drop-down list to select the available account numbers listed for the customer id to search the Tax Deducted at Source details. This is an optional field.
Financial Year	By default, the current financial year is displayed in this field. You can select the previous financial years from the dropdown. The system displays the Tax Deducted at Source details financial year-wise.
Branch	The system displays the Branch Code based on the account number.
Account Number	The system displays the Account Number.
Account Name	The system displays the Account Name.
Interest Amount	The system displays the Credit interest on the account.
Taxation Date	The system displays the date of the tax application on the account.
Tax Amount	The system displays the Tax amount calculated on the credit interest.

2.7 Statement

Under the **Statement** menu, you can perform the required actions related to statement of an account.

This topic contains the following subtopics:

Account Statement Frequency

This topic describes the systematic instruction about Account Statement Frequency Update. After specifying the account number, system displays existing account statement cycle details, and the user can modify the frequency.

Consolidated Adhoc Statement

This topic describes the systematic instruction to generate a consolidated adhoc statement that covers multiple accounts of a customer. The Adhoc statements are statements that do not fall within the periodic statement generation frequency.

Masking of Account Number in Statements

This topic describes the masking of account number in statements.

2.7.1 Account Statement Frequency

This topic describes the systematic instruction about Account Statement Frequency Update. After specifying the account number, system displays existing account statement cycle details, and the user can modify the frequency.

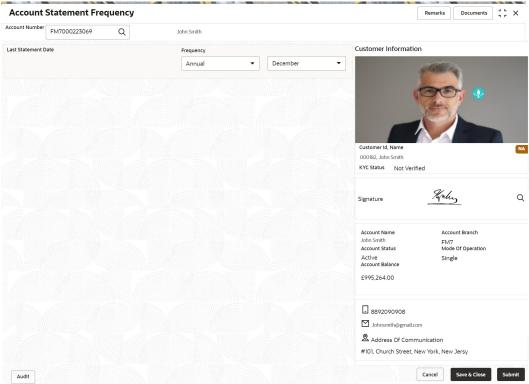

To modify the account statement frequency:

On the Home screen, from Retail Account Services, under Statement, click Account Statement Frequency, or specify the Account Statement Frequency in the Search icon bar.

Account Statement Frequencyscreen is displayed.

Figure 2-46 Account Statement Frequency

On **Account Statement Frequency** screen, specify the account number. For more information on fields, refer to the field description table.

Table 2-25 Account Statement Frequency - Field Description

Field	Description
Account Number	Enter the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and clicking on the Fetch button. When users enter the account number, the customer information is displayed.
Account Name	Account Name is displayed by default based on the account selected.
Last Statement Date	The last statement generation date will be displayed.
Frequency	Users can modify the frequency for generating the account statements. To specify the frequency of the statements, click on the adjoining drop-down list. The following list is displayed: Annual Semiannual Quarterly Monthly Fortnightly Weekly Daily For the Annual, Semiannual, Quarterly and Daily cycles, the account statement will be generated on the last day of that cycle. For a weekly and fortnightly statement, the user can specify the day of the week on which account statements must be generated. To specify weekly and fortnightly statements, click on the adjoining drop-down list. The following list of days will be displayed: Sunday Monday Tuesday Wednesday Thursday Friday Saturday For monthly statements the user can specify the dates of the month, between 1 and 31(corresponding to the system date). For example: If the user selected the statement date to 30, then account statements will be generated on the last working day for months with < 30 days. If the user sets the statement date to 31, then account statements will be generated on the last working day for months with < 31 days. If 30th or 31st is a holiday on the next working day the account statement gets generated.

3. Click Submit.

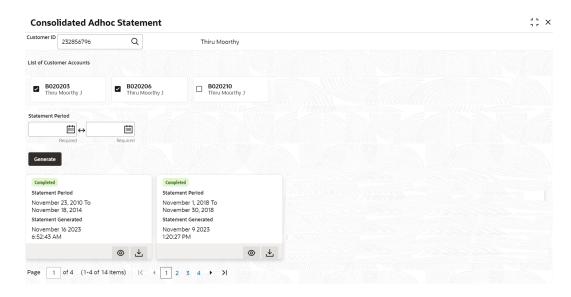

2.7.2 Consolidated Adhoc Statement

This topic describes the systematic instruction to generate a consolidated adhoc statement that covers multiple accounts of a customer. The Adhoc statements are statements that do not fall within the periodic statement generation frequency.

 On Home screen, from Retail Account Services, under Statement, click Consolidated Adhoc Statement, or specify the Consolidated Adhoc Statement in the Search icon bar.

The Consolidated Adhoc Statementscreen is displayed.

Figure 2-47 Consolidated Adhoc Statement

2. On **Consolidated Adhoc Statement** screen, specify the fields. For more information on fields, refer to the field description table below.

Table 2-26 Consolidated Adhoc Statement - Field Description

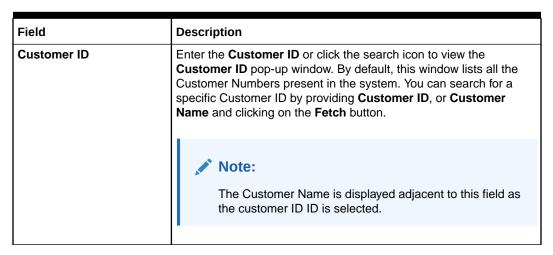

Table 2-26 (Cont.) Consolidated Adhoc Statement - Field Description

Field	Description
List of Customer Accounts	Select the account(s) from the list to generate the statement. The type of accounts that are displayed as follow: Accounts that are open and authorised. Accounts where customer is the primary account holder. Joint accounts where the customer is a joint holder. The Account Name is displayed under each account number.
Statement Period	Click the calendar and specify the from date and to date to generate the statements.
	Note: The start date cannot be future dated and the end date cannot be lesser than start date.

3. On **Consolidated Adhoc Statement** screen, click **Generate Statement** button to generate the account statement for the selected accounts and period.

The multiple ad hoc statements can be generated on the same day. All the generated statements are displayed as tiles with date and time stamps.

Once the date moves to the next working day, all statements generated the previous day is cleared.

 Click the View icon to view, or click Download icon to print the generated account statement.

2.7.3 Masking of Account Number in Statements

This topic describes the masking of account number in statements.

In the United States, the requirement is to mask (hide) a portion of the account number in the statements being generated.

A bank-level configuration in Oracle Banking Retail Accounts allows the user to define if masking of account numbers is required on the statement and if yes, then the system allows the user to mask a set of characters as required in the account number when the same is displayed on the generated statement. For Example: If the account number is 10 characters and the number of characters to mask is 6 - then the account number is displayed as xxxxxxx8376 in the statements.

The masking of the account number is always from left to right for United States market.

For more information about the configurations, refer to the section *Bank Parameters* in the *Account Configurations User Guide*.

2.8 Status Update

Under the Status Update menu, you can update the status of an account.

This topic contains the following subtopics:

- Activate Inactive/Dormant Account
 You can update the status of an account from Active to Inactive or Dormant, Inactive to
 Active, Dormant to Inactive using the **Activate Inactive/Dormant Account** screen.
- Inactive and Dormancy Processing in Oracle Banking Retail Accounts
 This topic describes the processing of inactive and dormancy in Oracle Banking Retail Accounts.
- Account Status Change
 This topic describes the systematic instructions about account status change. The bank can update the status of an account to No Debit, No Credit, and Frozen.

2.8.1 Activate Inactive/Dormant Account

You can update the status of an account from Active to Inactive or Dormant, Inactive to Active, Dormant to Inactive using the **Activate Inactive/Dormant Account** screen.

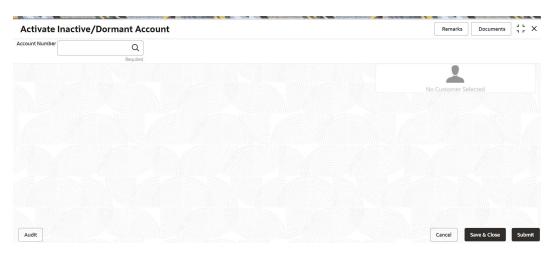

Based on the configurations in Oracle Banking Retail Accounts for the inactive days, an account will move from Active status to Inactive and Dormant status automatically.

To update an account status:

 On the Home screen, from Retail Account Services, under Status Update, click Activate Inactive/Dormant Account, or specify the Activate Inactive/Dormant Account in the Search icon bar.

The Activate Inactive/Dormant Account screen is displayed.

Figure 2-48 Activate Inactive/Dormant Account

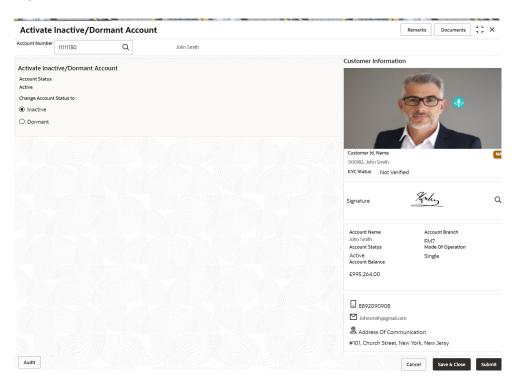

On the Activate Inactive/Dormant Account screen, click the Search icon or specify the account number in the Account Number field, and press Tab or Enter.

The account status details are displayed.

Figure 2-49 Activate Account

3. On the **Activate Inactive/Dormant Account** screen, update the account status. For more information on fields, refer to the field description table.

Table 2-27 Activate Inactive/Dormant Account - Field Description

Field	Description
Account Number	Enter the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and clicking on the Fetch button.
	 Note: The Account Name is displayed adjacent to this field as the account number is selected. The customer information is also displayed to the left of the screen.

Table 2-27 (Cont.) Activate Inactive/Dormant Account - Field Description

Field	Description
Activate Inactive/ Dormant Account	This section displays the account status details.
Account Status	Displays the current status of the account. The possible options are: • Active • Inactive • Dormant
Dormant Since	Displays the date on which the account became dormant. Note: This field is displayed if the account status is Dormant.
Inactive Since	Displays the date on which the account became inactive.
	Note: This field is displayed if the account status is Inactive.
Change Account Status to	Displays . The options are: Active: This option is displayed, when the account status is Inactive or Dormant. Inactive: This option is displayed, when the account status is Active. Dormant: This option is displayed, when the account status is Active.

4. Click Submit.

The screen is successfully submitted for authorization.

2.8.2 Inactive and Dormancy Processing in Oracle Banking Retail Accounts

This topic describes the processing of inactive and dormancy in Oracle Banking Retail Accounts.

In the United States, the inactive and dormancy parameters like Inactive/ dormancy days, and first and second notice prior days vary by State.

Inactive and Dormancy marking is automatic and is based on the inactive and dormancy days configured for the customer's residential address state.

State group parameter configuration by currency for Inactive, Dormancy, and Escheatment processing and mapping of the state group parameter code to the respective business product is done as part of Oracle Banking Retail Accounts configurations. The dormancy

batch in Oracle Banking Retail Accounts will determine the inactive, and dormancy processing based on this state-wise configuration.

For more information about the configurations, refer to the sections *State Group Parameters* and *State Code Mapping* in the *Account Configurations User Guide*.

2.8.3 Account Status Change

This topic describes the systematic instructions about account status change. The bank can update the status of an account to No Debit, No Credit, and Frozen.

To change account status:

 On the Home screen, from Retail Account Services, under Status Update, click Account Status Change, or specify the Account Status Change in the Search icon bar.

Account Status Changescreen is displayed.

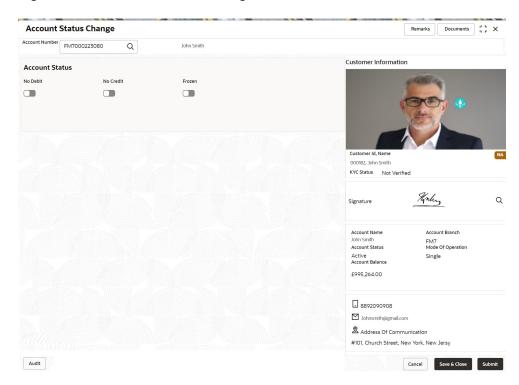

Figure 2-50 Account Status Change

2. On Account Status Change screen, specify the fields.

For more information on fields, refer to the field description table.

Table 2-28 Account Status Change - Field Description

E1.14	Book Brown
Field	Description
Account Number	Enter the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and clicking on the Fetch button.
	 Note: As you specify or select the account number: The account name is displayed adjacent to the Account Number field. The customer information is displayed in a widget, to the right of the screen.
Account Status	The existing account statuses will be displayed, and users can modify them (No Debit, No Credit, and Frozen) by enabling or disabling the toggle button.

2.9 Limits

Under the **Limits** menu, you can perform actions related to limits for an account.

This topic contains the following subtopics:

- Courtesy Pay Maintenance
 - You can activate or deactivate ATM/POS transaction and cheque processing transaction types to allow usage of courtesy pay feature on an eligible account using the **Courtesy Pay Maintenance** screen. Also, you capture an end date that signifies the end of courtesy pay privilege on the account.
- Courtesy Pay Processing in Oracle Banking Retail Accounts
 This topic describes the processing of courtesy pay in Oracle Banking Retail Accounts.

2.9.1 Courtesy Pay Maintenance

You can activate or deactivate ATM/POS transaction and cheque processing transaction types to allow usage of courtesy pay feature on an eligible account using the **Courtesy Pay Maintenance** screen. Also, you capture an end date that signifies the end of courtesy pay privilege on the account.

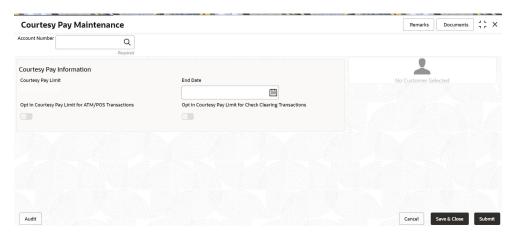

Courtesy Pay is a feature that the account holder can use while a debit transaction is being processed on the account, provided the functionality is enabled on the account.

To maintain the courtesy pay:

- 1. On the Home screen, from Retail Account Services, under Limits, click Courtesy Pay Maintenance, or specify the Courtesy Pay Maintenance in the Search icon bar.
 - The Courtesy Pay Maintenance screen is displayed.

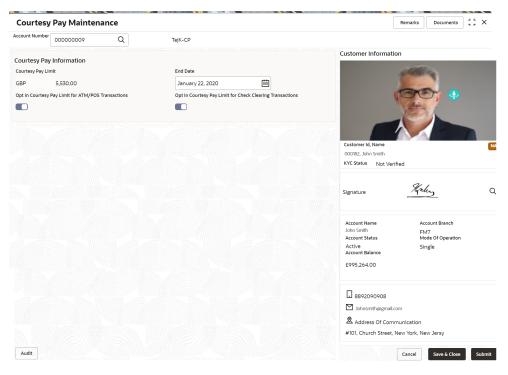

Figure 2-51 Courtesy Pay Maintenance

On the Courtesy Pay Maintenance screen, click the Search icon or specify the account number in the Account Number field, and press Tab or Enter.

The details are displayed in the **Courtesy Pay Information** section.

Figure 2-52 Courtesy Pay Information

3. In the **Courtesy Pay Information** section, maintain the details. For more information on fields, refer to the field description table.

Table 2-29 Courtesy Pay Maintenance - Field Description

Field	Description
Account Number	Enter the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and clicking on the Fetch button.
	 Note: The Account Name is displayed adjacent to this field as the account number is selected. The customer information is also displayed to the left of the screen.
Courtesy Pay Information	This section displays the fields to maintain the courtesy pay information.
Courtesy Pay Limit	Displays the courtesy pay limit amount along with currency.
End Date	Displays end date for the courtesy pay limit.
Opt in Courtesy Pay Limit for ATM/POS Transactions	Switch Toggle On to enable the ATM/POS transactions for courtesy pay limit. Switch to Toggle Off to stop the ATM/POS transactions for courtesy pay limit.
Opt in Courtesy Pay Limit for Check Clearing Transactions	Switch Toggle On to enable check clearing transactions for courtesy pay limit. Switch Toggle Off to stop check clearing transactions for courtesy pay limit.

4. Click Submit.

The screen is successfully submitted for authorization.

2.9.2 Courtesy Pay Processing in Oracle Banking Retail Accounts

This topic describes the processing of courtesy pay in Oracle Banking Retail Accounts.

Customers shall have the privilege of getting honored a transaction, even though there is no sufficient balance in the account when opting for Courtesy Pay and should repay the overdrawn amount within a given time window. No other limits will apply to the account if courtesy pay is enabled for the account. On utilizing Courtesy Pay, courtesy pay utilization fees will be charged to the account.

The system has been enhanced to configure the courtesy pay limit, charge code, and charge fee account at the business product definition level. Also, the courtesy pay opt-in/ opt-out for transactions with source as ATM, POS, or cheque clearing is supported as part of account servicing. Based on this opt-in/ opt-out definition, the Courtesy Pay limit utilization for the source transactions is determined.

Note:

- Courtesy Pay fees are charged as part of the End of the Day process.
- The Product processor code should be OBRACC for Courtesy Pay charge code creation.

Note:

For more information about the configurations, refer to the section *Business Product* in this User Guide.

2.10 Amount Block

Under the **Amount Block** menu, you can perform the amount block related actions for an account.

This topic contains the following subtopics:

Garnishment screen.

- Account Garnishment
 You can apply garnishment (amount block) order received against a customer or
 for a specified account, after calculating the protected amount using the **Account**
- Account Garnishment Processing in Oracle Banking Retail Accounts
 This topic describes the processing of account garnishment in Oracle Banking Retail Accounts.

2.10.1 Account Garnishment

You can apply garnishment (amount block) order received against a customer or for a specified account, after calculating the protected amount using the **Account Garnishment** screen.

A garnishment order is received from the Federal Government for a customer and at the discretion of the Operations Officer, garnishment related holds are placed on a specific account or multiple accounts of the customer. Post garnishment set up on the account, the customer can withdraw only the protected amount (eligible credits calculated in look back period) and the credits received after the garnishment start date plus the balance over and above the blocked balance.

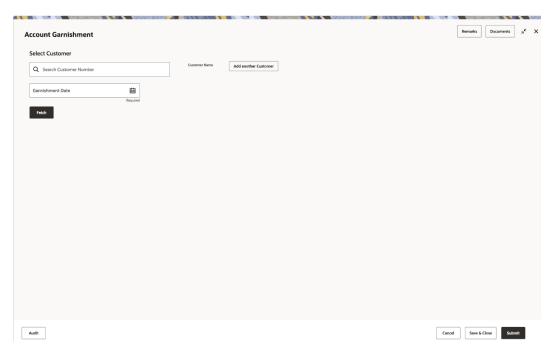

To apply garnishment:

 On the Home screen, from Retail Account Services, under Amount Block, click Account Garnishment, or specify the Account Garnishment in the Search icon bar.

The **Account Garnishment** screen is displayed.

Figure 2-53 Account Garnishment

- 2. On the **Account Garnishment** screen, click the **Search** icon or specify the account number in the **Customer ID** field, and press **Tab** or **Enter**.
- 3. Select the date from the Garnishment Date field.

You can add multiple customers to view the garnishment details by clicking ${\bf Add}$ another ${\bf Customer}.$

4. Click Fetch.

The existing customer's garnishment details are displayed.

c. Click Save.

Once the details are saved, a **New Garnishment** section is displayed above the **Existing Garnishment** section in the screen.

6. Click Submit.

The screen is successfully submitted for authorization.

2.10.2 Account Garnishment Processing in Oracle Banking Retail Accounts

This topic describes the processing of account garnishment in Oracle Banking Retail Accounts.

A Garnishment Order is a Court Order or Statutory/regulatory authority order instructing a garnishee (i.e., to a bank) to hold funds in a customer account and should not be released until directed by the court. The order may instruct the bank to hold/block aparticular amount or all the available funds in the customer account(s). A garnishment block fee will be charged to the account on placing a block for the garnishment amount.

Garnishment screen at account servicing level will allow for the branch user to select the customer accounts(s) on which garnishment block needs to be placed. System has been enhanced to do the protected amount calculation based on the look-back period configured in the garnishment parameters configuration screen.

Note:

- The Garnishment fee will be applied to the account upon completion of placing a block or hold for the required amount. If there is no sufficient balance to fulfill the charge amount, subsequent actions of retrying the fee collection have to be operationally dealt with by the bank.
- Removal of garnishment block to transfer the amount as per the court order is to be operationally handled.
- The Product processor code should be OBRACC for Garnishment charge code creation.

Note:

For more information about the configurations, refer to the section *Garnishment Parameters* in this User Guide.

2.11 Check Book

Under the **Check Book** menu, you can perform the check book related actions for an account.

This topic contains the following subtopics:

Check Book Order

You can capture check book request made by a customer using the **Check Book Order** screen.

Check Book Status

This topic describes the systematic instructions about the Check Book Status.

Stop Check Request

You can request the bank to stop payment on a check using the **Stop Check Request** screen. A stop check requests can either be for a single check, range of checks, or for a specific amount.

- Stop Check Request Processing in Oracle Banking Retail Accounts
 This topic describes the processing of stop check request in Oracle Banking Retail Accounts.
- View and Modify Stop Check Payment
 You can modify or delete an existing stopped payment check, based on the customer request.
- External Check Book Processing in Oracle Banking Retail Accounts
 This topic describes the processing of external check book in Oracle Banking Retail Accounts.

2.11.1 Check Book Order

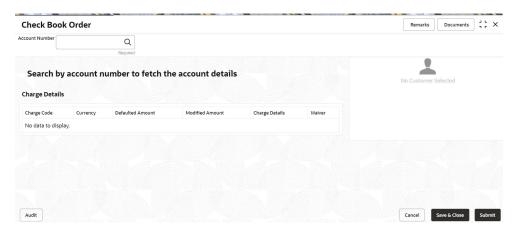

You can capture check book request made by a customer using the **Check Book Order** screen.

To order check book:

 On the Home screen, from Retail Account Services, under Check Book, click Check Book Order, or specify the Check Book Order in the Search icon bar.

The Check Book Order screen is displayed.

Figure 2-56 Check Book Order

2. On the **Check Book Order** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.

The account status details are displayed.

Account Name	Account Name is displayed based on the account selected.
First Check Number	By default, the system displays the most recent check book request that the customer has made.
Status	The system displays the following status of the check book request. Requested Delivered Destroyed Delivery Awaited or Destruction Awaited is updated as interim status when the transaction is pending approval for delivery or destruction. Note: When the check book is updated as Destroyed, the delivery date is updated to the current business date and highlighted in red.
Requested Date	The system displays the date on which the customer requested the check book.
Delivery Date	The system displays the date on which the check book is delivered to the customer. Automatically the current business date is updated when the status of the check book is changed to Delivered . The delivery date is blank for check books where the status is Requested .
Actions	Click the Actions icon to update the check book status from updated to: Deliver Destory

- **3.** On click of the **Deliver** option, the status is updated as **Delivery Pending**. Upon authorization the status is updated as **Delivered**.
- On click of the **Destory** option, the status is updated as **Destruction Pending**.
 Upon authorization the status is updated as **Destroyed**.
- 5. Click Submit.

The screen is successfully submitted for authorization.

2.11.3 Stop Check Request

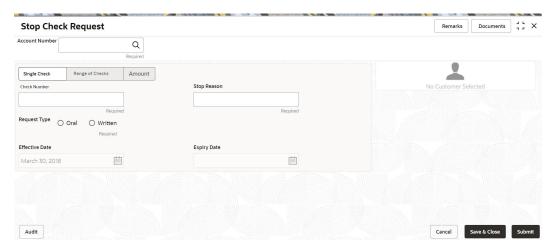

You can request the bank to stop payment on a check using the **Stop Check Request** screen. A stop check requests can either be for a single check, range of checks, or for a specific amount.

To stop check payment:

1. On the Home sreen, from Retail Account Services, under Check Book, click Stop Check Request, or specify the Stop Check Request in the Search icon bar.

The **Stop Check Request** screen is displayed.

Figure 2-59 Stop Check Request

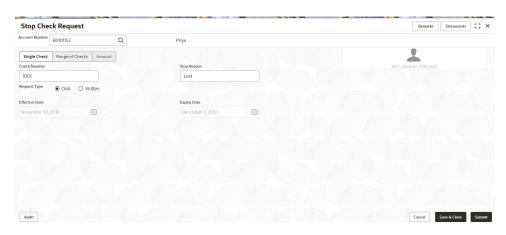

2. On the **Stop Check Request** screen, click the **Search** icon or specify the account number in the **Account Number** field, and press **Tab** or **Enter**.

The account name and customer information details are displayed.

- 3. You can stop the check request by selecting any of the following options:
 - Single Check
 - a. Select the Single Check option.

Figure 2-60 Stop Check Request - Single Check tab

b. Specify and select the required details to stop check request. For more information on fields, refer to the field description table.

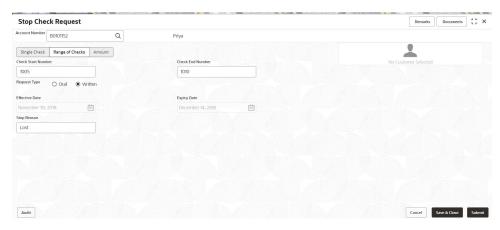

Table 2-34 Stop Check Request - Single Check - Field Description

Field	Description
Account Number	Specify the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID , Account Number , or Account Name and clicking on the Fetch button.
	 Note: The Account Name is displayed adjacent to this field as the account number is selected. The customer information is also displayed to the left of the screen.
Check Number	Specify the check number on which payment has to be stopped.
Stop Reason	Specify the reason for stop payment instruction.
Request Type	Select the type of request received from the customer. The options are: Oral Written
Effective Date	Displays the current business date for the stop check payment instruction based.
Expiry Date	Displays the end date for the stop check payment instruction.
	 Note: Expiry date is populated based on the option selected from the Request Type field. Number of days to expiry is calculated based on configuration maintained in Account Configurations, under Branch Parameters and Check Parameters.

Range of Checks

a. Select the Range of Checks option.

Figure 2-61 Stop Check Request - Range of Checks tab

b. Specify and select the required details to stop check request. For more information on fields, refer to the field description table.

Expiry Date	Displays the end date for the stop check payment instruction.
	 Note: Expiry date is populated based on the option selected from the Request Type field. Number of days to expiry is calculated based on configuration maintained in Account Configurations, under Branch Parameters and Check Parameters.

4. Click Submit.

The screen is successfully submitted for authorization.

2.11.4 Stop Check Request Processing in Oracle Banking Retail Accounts

This topic describes the processing of stop check request in Oracle Banking Retail Accounts.

In the United States, customers can request a stop payment of a check either orally or in written.

A branch-level configuration in Oracle Banking Retail Accounts allows users to define the stop-payment auto revoke days for both oral and written stop-payment requests. The branch service will return these values for the account servicing application to auto-calculate the stop-check expiry date based on the request type. This expiry date cannot be modified, and

the account servicing application will proceed to initiate the stop-payment request on the check. On the expiry date - the stop check process will automatically revoke the stop-payment request placed on the check.

For more information about the configurations, refer to the section *Branch Parameters* in the *Account Configurations User Guide*.

2.11.5 View and Modify Stop Check Payment

You can modify or delete an existing stopped payment check, based on the customer request.

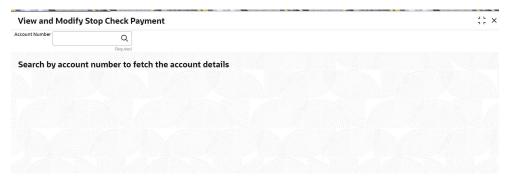

When a stop payment instruction on a check or a series of checks is deleted, it is available for use. In future, when a check based transaction is initiated by the customer using any of these check numbers, payments are honored by the bank.

To manage the stop check payment details:

 On the Home screen, from Account Services, under Check Book, click View and Modify Stop Check Payment, or specify the View and Modify Stop Check Payment in the Search icon bar.

The View and Modify Stop Check Payment screen is displayed.

Figure 2-63 View and Modify Stop Check Payment

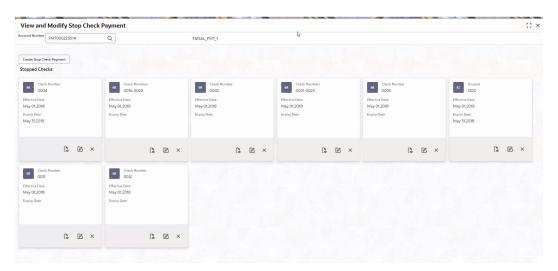

On the View and Modify Stop Check Payment screen, click the Search icon or specify the account number in the Account Number field, and press Tab or Enter.

The details are dislayed in the **Stopped Checks** section.

Figure 2-64 Stopped Checks

Note:

If there are no stop payment records available for a given account number, the system displays a message that there are no stopped payments for the account.

On the View and Modify Stop Check Payment screen, you can view a summary of the stopped checks for the account. For more information on fields, refer to the field description table.

Table 2-37 View and Modify Stop Check Payment - Field Description

Field	Description
Account Number	Sepcify the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and click on the Fetch button.
	Note: As you specify or select the account number: The account name is displayed adjacent to the Account Number field.
Stopped Checks	This section lists all the checks for which the payments are stopped.

Table 2-37 (Cont.) View and Modify Stop Check Payment - Field Description

Field Amount, Check Numbers, or Check Number	Description Displays the type of stop check payment created for the account.
	 While creating the stop check payment: If you select the Amount option, then Amount is displayed in the widget. If you select the Range of Checks option, then Check Numbers is displayed in the widget. If you select the Single Check option, then Check Number is displayed in the widget. For more informtion on creating stop check payment, refer Stop Check Payment screen.
Effective Date	Displays the effective date from when the stop check payment is active.
Expiry Date	Displays the end date till when the stop check payment should be active.

- 4. On the **View and Modify Stop Check Payment** screen, you can perform any of the following actions:
 - Create Stop Check Payment: The Stop Check Payment screen is displayed.
 You can perform the required action in this screen. For more information, refer the Stop Check Request screen.
 - View Stop Check Payment Details: The Stop Check Payment screen is displayed. For more information, refer View Stop Check Payment.
 - Modify Stop Check Payment: The Stop Check Payment screen is displayed.
 For more information, refer Modify Stop Check Payment.
 - Close Stop Check Payment: The Stop Check Payment screen is displayed.
 For more information, refer Close Stop Check Payment.

While performing a reversal of stop check payment, you are allowed to select only one action, that is View, Edit, or Close.

- View Stop Check Payment
 You can view the detailed information of the stop check payment in this screen.
- Modify Stop Check Payment
 You can modify the required information of the stop check payment in this screen.
- Close Stop Check Payment
 You can close or delete a stop payment request placed on a check, series of
 checks, or stop payments based on amounts before the expiry date of the
 instruction using this screen.

2.11.5.1 View Stop Check Payment

You can view the detailed information of the stop check payment in this screen.

To view the stop check payment details:

1. From the View and Modify Stop Check Payment screen, click the View icon from the required widget, in the Stopped Checks section.

The **Stop Check Payment** screen is displayed.

Figure 2-65 View Stop Check Payment

You can view the details in the View Stop Check Payment section. For more information on fields, refer to the field description table.

Table 2-38 View Stop Check Payment - Field Description

Field	Description

Stop Reason	Displays the reason for stop check payment was initiated.
	Note: This field is displayed if the stop cheuqe payment is of Amount, Check Number, and Check Numbers types.
A	Biodone the check consent for the check consent
Amount	Displays the check amount for stop check payment.
	Note: This field is displayed if the stop cheuqe payment is of Amount type.

3. Click Submit.

The View and Modify Stop Check Payment screen is displayed.

2.11.6 External Check Book Processing in Oracle Banking Retail Accounts

This topic describes the processing of external check book in Oracle Banking Retail Accounts.

In the United States, the checkbook request is done by the customers mostly from third-party service providers and there is no bank involvement in requesting a check book. Therefore, any validations with respect to check numbers will not be applicable for the United States (except stop check validation).

A bank level configuration allows the user to define **External Checkbook Request** option in case of United States, where the checkbook request is placed directly with the third party.

If the bank in United States, allows the customer to also place the order with the bank, then the bank will hold the check book request related data for the third-party service provider to access for processing the request.

In United States, there will be no validations with respect to check status based on check numbers when a check is presented for clearing. The only exception to this being validation of stop check - which will be based on check number irrespective of the above selections.

For more information about the configurations, refer to the section *Bank Parameters* in the *Account Configurations User Guide*.

2.12 Inquiry

Under the **Inquiry** menu, you can perfrom inquire the details of a CASA account.

This topic contains the following subtopics:

- Account Transactions
 - This topic provides the systematic instructions for the users to view, and download all the transactions posted to the current account and saving accounts for a particular date range or last n transactions.
- Regulation-D Transaction Inquiry
 This topic provides the systematic instructions for the users to view the Regulation D transactions on the account. By default, the screen displays transactions for the previous 12 months.

2.12.1 Account Transactions

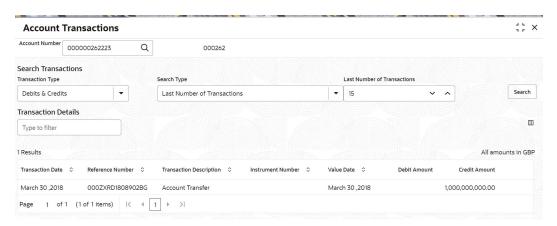

This topic provides the systematic instructions for the users to view, and download all the transactions posted to the current account and saving accounts for a particular date range or last n transactions.

To view account transaction details:

 On the Home screen, from Retail Account Services, under Inquiry, click Account Transactions, or specify the Account Transaction Inquiry in the Search icon bar.

Account Transactions screen is displayed.

2. On **Account Transactions** screen, specify the fields.

For more information on fields, refer to the field description table.

Table 2-41 Account Transactions - Field Description

Field	Description
Account Number	Enter the Account Number or click the search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and click Fetch.
	Note: The Account Name is displayed adjacent to this field as the account number is selected.
Search Transactions	This section displays the fields to perform the search.
Transaction Type	Select the type of transactions to be searched. The options are: Debits & Credits Debits Credits
	Note: Transaction type is always Debits & Credits if you select the Search Type as the Last Number of Transactions.
Search Type	Select the search type for the transaction. The options are: Data Range Current Month Current Month Plus Previous Month Current Month Plus Previous 3 Month Current Month Plus Previous 6 Month Last Number of Transactions
Date Range	Select or specify the from and to date for fetching the transaction details.
	Note: This field is displayed if you select Date Range from the Search Type field.

Table 2-41 (Cont.) Account Transactions - Field Description

Field	Description
Last Number of Transactions	Select or specify the last number of the transaction to be fetched.
	Note: This field is displayed if you select Last Number of Transactions from the Search Type field.
Transactional Details	This section displays the transaction details for the account
	Note: You can click the Column Filter icon to view only the selected transaction details.
Filter	Specify a value to filter the details as required.
Transaction Date	Displays the date of the transaction.
Reference Number	Displays the transaction's reference number.
Transaction Description	Displays the description for the transaction.
Instrument Number	Displays the instrument number used for the transaction.
Value Date	Displays the value date of the transaction.
Debit Amount	Displays the transaction's debit amount.
Credit Amount	Displays the transaction's credit amount.

2.12.2 Regulation-D Transaction Inquiry

This topic provides the systematic instructions for the users to view the Regulation D transactions on the account. By default, the screen displays transactions for the previous 12 months.

 On Home screen, from Retail Account Services, under Inquiry, click Regulation-D Transaction Inquiry, or specify the Regulation-D Transaction Inquiry in the Search icon bar.

The Regulation-D Transaction Inquiry screen is displayed.

Figure 2-69 Regulation-D Transaction Inquiry

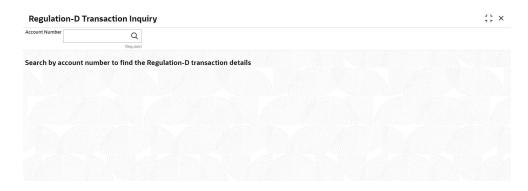

Figure 2-70 Regulation-D Transaction Inquiry with Last 12 Month Rolling Period Checked

Figure 2-71 Regulation-D Transaction Inquiry with Date Range

2. On **Regulation-D Transaction Inquiry** screen, specify the fields.

For more information on fields, refer to the field description table.

Table 2-42 Regulation-D Transaction Inquiry - Field Description

Field	Description
Account Number	Enter the Account Number or click the Search icon to view the Account Number pop-up window. By default, this window lists all the Account Numbers present in the system. You can search for a specific Account Number by providing Customer ID, Account Number, or Account Name and click Fetch.
	Note: The Account Name is displayed adjacent to this field as the account number is selected.
Last 12 Month Rolling Period	This check box is checked by default. When it is checked, the system displays the data for previous 12 months rolling period.
From Date	This is the date from which the Reg D transactions must be displayed. This field is mandatory only when the Last 12 Month Rolling Period is unchecked. This date cannot not be lesser than the account opened date.
To Date	This is the date up to which the Reg D transactions must be displayed. This field is mandatory only when the Last 12 Month Rolling Period is unchecked. This date cannot be greater than the current business date.
Month	The calendar months are displayed in this field depending on whether the Last 12 Month Rolling Period is checked or unchecked.
	If the Last 12 Month Rolling Period is checked, then the previous 12 rolling months are displayed.
	If the Last 12 Month Rolling Period is unchecked, then the months chosen in the From Date and To Date fields will be displayed as the starting month and the end month respectively.
Number of Reg D Transactions	This is a calculated value derived from the host system. The Number of Reg D Transaction that occured during a particular month is displayed in this field.
Number of Reg D Transactions Allowed	The value for this field is derived from the business product definition for the product that the account belongs. Number of Reg D Transactions allowed per month configured in the Reg D data segment is derived and displayed in this field.
Violation	This field displays either Yes or No . It is the difference between Number of Reg D Transactions Allowed and Number of Reg D Transactions . If the Number of Reg D Transactions are more than the allowed transactions in a month, then this column displays Yes , else it displays No .

2.13 Death Claim Processing in Oracle Banking Retail Accounts

This topic describes the processing of death claim in Oracle Banking Retail Accounts.

On expiry of a customer, the account proceeds/claims can be transferred to the descendants or beneficiaries of customers as per process.

When a customer expires, *Oracle Banking Party Services* will publish an event in on updating the customer status to **Deceased**. On this event, the associated accounts of the customer (both joint and single accounts) will be updated to status **Freezed**. Once the branch user receives the requisite documents (beneficiary details or Probate court order) the user will unfreeze the account - transfer the proceeds to the beneficiary and then proceed to close the account.

Note:

The unfreezing of account and transfer of proceeds if any to the beneficiary based on the probate court order/beneficiary details in account and subsequently closing the account of the deceased is an operational process.

If an account is designated as payable on death, then one or more beneficiary (nominee) details are to be captured for the account.

A payable on death account cannot be opened without beneficiary details.

On death of the customer, the bank needs to operationally ensure the transfer of account proceeds of the payable on death account to the registered beneficiary.

2.14 Escheatment Processing in Oracle Banking Retail Accounts

This topic describes the processing of escheatment in Oracle Banking Retail Accounts.

Similar to inactive and dormancy - The escheatment laws differ by state in United States. The account is closed post the escheatment processing. The unclaimed funds are transferred to the state and retained by bank based on a configured threshold and percentage.

The state-group parameter configuration screen for inactive and dormancy is applicable for configuring the escheatment parameters too. Escheatment threshold allows the user to define a value over which the balance in the account will be considered for transfer to State. The percentage config available in the config screen will determine the percentage of funds to be transferred to bank GL and state GL (For Example: 70% denotes - 70% of the balance will be transferred to State GL and rest 30% will be retained by the bank).

Note:

An account will be considered for escheatment based on the customer Last contact date with the bank - For Example: the customer has had no contact with the bank through any of the channels for 5 years (where 5 years is the escheatment period), in this case, once the account balance is proportioned between bank and state, the account will be closed automatically.

For more information about the configurations, refer to the sections *State Group Parameters* and *State Code Mapping* in the *Account Configurations User Guide*.

2.15 Effective Dates for Address Types in Oracle Banking Retail Accounts

This topic describes the effective dates for the address types in Oracle Banking Retail Accounts.

The user can maintain multiple address at account level with effective from and effective to dates apart from the default residential address for the account.

Any customer communication such as periodic statements will consider the effective dates to identify the communication address. If there are no effective addresses as on the date of communication, then the default residential address will be considered.

2.16 Multiple Guardians or Custodians in Oracle Banking Retail Accounts

This topic describes the multiple guardians or custodians in Oracle Banking Retail Accounts.

Bank user can capture during account origination or servicing, multiple guardians details like guardian type (Guardian, Custodian etc.), guardian customer ID and the relationship of the guardian with the account holder for an account.

In case of minor accounts, user can capture multiple custodians (Guardian type in this case will be custodian) and the minor account can be created. For minor accounts, capture of custodian details is mandatory.

The details captured can be modified during the account life-cycle from the servicing User Interface.

2.17 Account Profile Questionnaire Capture in Oracle Banking Retail Accounts

This topic describes the account profile questionnaire capture in Oracle Banking Retail Accounts.

Banking Security Act (BSA) regulations and the Customer Due Diligence (CDD) rule were enacted to combat money laundering and the financing of terrorism. The Customer Due Diligence (CDD) Rule clarifies and strengthens customer due diligence requirements for certain financial institutions and requires these institutions to identify and verify the identity of the natural persons (known as beneficial owners) of legal entity customers who own, control, and profit from companies when those companies open accounts. Customer Due Diligence (CDD) begins with verifying the customer's identity and assessing the risks associated with that customer. This process could include identifying the source of funds for an account and the business activity the account will conduct.

- A configurable questionnaire in Oracle Banking Origination to receive various details from the customer.
- The above details are stored as an account profile data against the customer account in Oracle Banking Accounts.

This is part of US regulation BSA-CDD. This static data needs to be stored as per regulation along with the account information. The below listed fields are included as follow:

- Source of funds
- ATM transactions in a month
- Domestic transactions in a month
- Expected Annual volume of transactions
- Expected foreign wire activity
- Purpose of account

2.18 Notes and Memos in Oracle Banking Retail Accounts

This topic describes the notes and memos in Oracle Banking Retail Accounts.

For each customer, Banker has the ability to maintain notes regarding the customer and their accounts.

User can add/modify/delete notes for customer accounts in the servicing application. System also notifies the bank user of the account level notes on the servicing User Interface when user tries to inquire/ modify the account details.

2.19 FIDM Processing in Oracle Banking Retail Accounts

This topic describes the processing of FIDM in Oracle Banking Retail Accounts.

If a customer has defaulted on child support payments - the FIDM data will report a match and the bank needs to block the amount for satisfying the pending child support payments to be made by the customer/Non-Custodial Parent to State.

When a FIDM data match is reported, *Oracle Banking Party Services* will publish an event with the details of the match including the FIDM amount. At this event,

- If the customer has one account then a legal block will be placed on the account for the reported FIDM amount.
- If the customer has multiple accounts then a legal block will be placed on the account with the max balance for the FIDM amount.

Removal of the legal block and transfer of funds to the child support organization will be operationally handled.

2.20 OFAC Processing in Oracle Banking Retail Accounts

This topic describes the processing of OFAC in Oracle Banking Retail Accounts.

If a customer is identified as OFAC sanction hit - the OFAC data will report a match and the bank needs to freeze all the customer accounts for both transactions and modifications.

When an OFAC data match is reported for a customer or when an existing OFAC customer is removed from the sanction list in party management. A real-time freeze will be placed on the customer and the account restricting the customer to perform transactions/non-financial modifications.

2.21 Reg D Processing in Oracle Banking Retail Accounts

This topic describes the processing of Reg D in Oracle Banking Retail Accounts.

Regulation D imposes reserve requirements on transaction accounts. As a result of the reserve requirements of United States Banks with the Fed, United States Banks in turn have to ensure some portions of their deposits are not volatile and hence restrictions are imposed on the number of debit transactions a Customer can make from savings accounts and MMDA accounts.

Reg D configurations are at the business product definition level in Oracle Banking Retail Accounts and allow users to configure the Reg D Transaction threshold, Reg D Warning threshold, Reg D monthly violation threshold, and Reg D 12-month rolling period violation threshold for automatic product switch to checking account. For Example: If a customer has done Reg D violations for 3 months on a 12-month rolling period - then the customer account will be automatically downgraded (auto-product switch) to a checking account.

For more information about the configurations, refer to the section *Business Product* in this User Guide.

Reg D Auto Product Switch

For Reg D - If a customer has done Reg D violations for 3 months on a 12-month rolling period - then the customer account will be automatically downgraded (auto-product switch) to checking account.

A product switch configuration screen in Oracle Banking Retail Accounts allows the user to define the current business product and the new business product to which the account product needs to be switched to incase of more than the allowed number of monthly violations in a 12-month rolling period.

Automatic product switch is applicable only for United States Regulation D violation.

For more information about the configurations, refer to the section *Product Switch* in this User Guide.

A

Functional Activity Codes

This topic contains the functional activity codes available in Oracle Banking Retail Accounts.

Screen Name/API Name	Fucntional Activity Code	Action	Description
Business Product Maintenance	OBRACC_FA_ACCOU NTCLASSAGGREGATE _AMEND	MODIFY	To amend an account class
Business Product Maintenance	OBRACC_FA_ACCOU NTCLASSAGGREGATE _AUTHORIZE	AUTHORIZE	To authorize an account class

Create Bulletin	OBBRN_FA_BULLETINDETAIL_C LOSE_RESOURCE	Close	Close the Bulletin Maintenance.
Create Bulletin	OBBRN_FA_BULLETINDETAIL_R EOPEN_RESOURCE	Reopen	Reopen the Bulletin Maintenance.
View Bulletin	OBBRN_FA_BULLETINDETAIL_G ET_BOARD	View	View the bulletin board details.
View Bulletin	OBBRN_FA_BULLETINDETAIL_G ET_RESOURCEAGGR	View	View the bulletin board details.
Account Statement Frequency	CSR_FA_ACCT_STATEMENT_FR EQ_SAVE	Initiation	Initiate the account statement frequency request.
Account Statement Frequency	CSR_FA_ACCT_STATEMENT_FR EQ_AUTH	Authorization	Approve or Reject the account statement frequency request.
Account Statement Frequency	CSR_FA_ACCT_STATEMENT_FR EQ_RETRY	Handoff Retry	Retry or Reject the account statement frequency from handoff retry stage.
Consolidated Adhoc Statement	CSR_FA_CONSOL_ADHOC_AC C_STMT_GET	Inquiry	To fetch the existing statement
Consolidated Adhoc Statement	CSR_FA_CONSOL_ADHOC_AC C_STMT_POST	Inquiry	This is to generate the consolidated account statements
Consolidated Adhoc Statement	CSR_FA_CONSOL_ADHOC_AC C_STMT_LOOP	Inquiry	This is to generate the consolidated account statements
Consolidated Adhoc Statement	CSR_FA_CONSOL_ADHOC_AC C_STMT_DL	Inquiry	This is to download the generated statement

Table A-1 (Cont.) Functional Activity Codes for Account Servicing Screens

	I	ı	
Screen Name/API Name	Functional Activity Code	Action	Description
Activate Dormant Account	CSR_FA_ACTIVATE_DORMANT_ ACCT_SAVE	Initiation	Initiate the activation of Inactive or Dormant account request.
Activate Dormant Account	CSR_FA_ACTIVATE_DORMANT_ ACCT_RETRY	Authorization	Approve or Reject the activation of Inactive or Dormant account request.
Activate Dormant Account	CSR_FA_ACTIVATE_DORMANT_ ACCT_AUTH	Handoff Retry	Retry or Reject the activation of Inactive or Dormant account from handoff retry stage.
Account Status Change	CSR_FA_ACCSTAT_CHANGE_S AVE	Initiation	Initiate the account status change request.
Account Status Change	CSR_FA_ACCSTAT_CHANGE_A UTH	Authorization	Approve or Reject the account status change request.
Account Status Change	CSR_FA_ACCSTAT_CHANGE_R ETRY	Handoff Retry	Retry or Reject the account status change request from handoff retry stage.
Overdraft Limit Summary	CSR_FA_LIMITS_SUMMARY	Inquiry	Fetch all Overdraft details for the account.
Courtesy Pay Maintenance	CSR_FA_COURTESY_PAY_SAV E	Initiation	Initiate the courtesy pay maintenance request.
Courtesy Pay Maintenance	CSR_FA_COURTESY_PAY_AUT H	Authorization	Approve or Reject the courtesy pay maintenance request.
Courtesy Pay Maintenance	CSR_FA_COURTESY_PAY_RET RY	Handoff Retry	Retry or Reject the courtesy pay maintenance from handoff retry stage.
Create Amount Block	CSR_FA_AMNT_SAVE	Initiation	Initiate the create amount block request.
Create Amount Block	CSR_FA_AMNT_AUTH	Authorization	Approve or Reject the create amount block request.
Create Amount Block	CSR_FA_AMNT_RETRY	Handoff Retry	Retry or Reject the create amount block from handoff retry stage.
View and Modify Amount Block	CSR_FA_AMNTM_SAVE	Initiation	Initiate the modify amount block request.
View and Modify Amount Block	CSR_FA_AMNTM_AUTH	Authorization	Approve or Reject the modify amount block request.
View and Modify Amount Block	CSR_FA_AMNTM_RETRY	Handoff Retry	Retry or Reject the modify amount block from handoff retry stage.
View and Modify Amount Block	CSR_FA_CLOSE_AMNTM_SAVE	Initiation	Initiate the close amount block request.
View and Modify Amount Block	CSR_FA_CLOSE_AMNTM_AUTH	Authorization	Approve or Reject the close amount block request.
View and Modify Amount Block	CSR_FA_CLOSE_AMNTM_RETR Y	Handoff Retry	Retry or Reject the close amount block from handoff retry stage.

Table A-1 (Cont.) Functional Activity Codes for Account Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Account Garnishment	CSR_FA_ACC_GARNSH_SAVE	Initiation	Initiate the garnishment request.
Account Garnishment	CSR_FA_ACC_GARNSH_AUTH	Authorization	Approve or Reject the garnishment request.
Account Garnishment	CSR_FA_ACC_GARNSH_RETRY	Handoff Retry	Retry or Reject the garnishment from handoff retry stage.
Check Book Request	CSR_FA_CHECKBOOKREQ_PO ST	Initiation	Initiate the check book request.
Check Book Request	CSR_FA_CHECKBOOKREQ_AU TH	Authorization	Approve or Reject the check book request.
Check Book Request	CSR_FA_CHECKBOOKREQ_RE TRY	Handoff Retry	Retry or Reject the check book request from handoff retry stage.
Stop Check Payment	CSR_FA_STOPCHECK_SAVE	Initiation	Initiate the stop check payment request.
Stop Check Payment	CSR_FA_STOPCHECK_AUTH	Authorization	Approve or Reject the stop check payment request.
Stop Check Payment	CSR_FA_STOPCHECK_RETRY	Handoff Retry	Retry or Reject the stop check payment request from handoff retry stage.
View and Modify Stop Check	CSR_FA_STOPCHECK_SAVE	Initiation	Initiate the Modify Stop Check request.
View and Modify Stop Check	CSR_FA_STOPCHECK_AUTH	Authorization	Approve or Reject the Modify Stop Check request.
View and Modify Stop Check	CSR_FA_STOPCHECK_RETRY	Handoff Retry	Retry or Reject the Modify Stop Check request from handoff retry stage.
View and Modify Stop Check	CSR_FA_STOP_CHECK_DELET E	Close	Close the stop Check request.
Check Book Status Change	CSR_FA_CHEQSTATCHANGE_S AVE	Initiation	Initiate the check book status change request.
Check Book Status Change	CSR_FA_CHEQSTATCHANGE_A UTH	Authorization	Approve or Reject the check book status change request.
Check Book Status Change	CSR_FA_CHEQSTATCHANGE_R ETRY	Handoff Retry	Retry or Reject the check book status change request from handoff retry stage.
Account Transactions	CSR_FA_ACC_TRN	Query Details	Get the account transactions.
Check Status Inquiry	CSR_FA_CHEQUE_STATUS_INQ UIRY	Query Details	Perform check status inquiry.
Account Product Transfer	CSR_FA_ACCTPRODTRANSFER _SAVE	Initiation	Initiate Account Product Transfer request.
Account Product Transfer	CSR_FA_ACCTPRODTRANSFER _AUTH	Authorization	Approve or Reject Account Product Transfer request.
Account Product Transfer	CSR_FA_ACCTPRODTRANSFER _RETRY	Handoff Retry	Retry or Reject Account Product Transfer request.

Table A-1 (Cont.) Functional Activity Codes for Account Servicing Screens

Screen Name/API Name	Functional Activity Code	Action	Description
Regulation D Transaction Inquiry	CSR_FA_REGD_QUERY	Query Details	Get the Reg D transaction details.

CAPM-STP-VAL-23	Expiry Date cannot overlap with existing Stop Payment date
CAPP-ACC-VAL-01	Account Class Parameter In One or More Account Mask is Not match with Entered Account Class Length
CAPP-ACC-VAL-02	Start date should be in yyyy-MM-dd format
CAPP-ACC-VAL-03	End date should be in yyyy-MM-dd format
CAPP-ACC-VAL-04	Start date should not be blank if end date is selected
CAPP-ACC-VAL-05	End date should not be before start date
CAPP-ACC-VAL-06	Daily Fixed Time is not a valid time
CAPP-ACC-VAL-07	Account type should be of S or U or C or D
CAPP-ACC-VAL-08	Account code should be should be 4 character alpha numeric
CAPP-ACC-VAL-09	Unauthorized account inactive close day should be between 0 and 999
CAPP-ACC-VAL-10	Authorized account inactive close day should be between 0 and 999
CAPP-ACC-VAL-11	Notice frequency should be O or D or W or M or Y or N
CAPP-ACC-VAL-12	Inactive account notice generation days should be between 0 and 999
CAPP-ACC-VAL-13	Limit for unprinted transactions can be entered only if compression required is selected.
CAPP-ACC-VAL-14	Transaction code for unprinted transactions can be entered only if compression required is selected.
CAPP-ACC-VAL-15	Limit for Unprinted Transaction is mandatory if Compression Required is selected.
CAPP-ACC-VAL-16	Transaction Code is mandatory if Compression Required is selected
CAPP-ACC-VAL-17	Iban account type is mandatory if Compression Required is selected
CAPP-ACC-VAL-18	Iban account type should be 4 character alpha numeric
CAPP-ACC-VAL-19	Daily Fixed Time value should be with respect to STDCAMPM
CAPP-ACC-VAL-20	Cheque Book Required can either be Y/N
CAPP-ACC-VAL-21	Lodgement book should be empty as Passbook Facility Req is Y
CAPP-ACC-VAL-22	Cheque Book related data is not applicable as Checkbook Required is N
CAPP-ACC-VAL-23	Reorder Level cannot be null or zero
CAPP-ACC-VAL-24	Reorder Number cannot be null or zero
CAPP-ACC-VAL-25	Max Check Reject cannot be null or < 1
CAPP-ACC-VAL-26	Channel Details is not applicable as Direct Banking Req is N
CAPP-ACC-VAL-27	Margin on Advance against Uncollected Funds should be between 0 or 100

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
CAPP-ACC-VAL-28	Sequence cannot have null value
CAPP-ACC-VAL-29	RateValue should be between 0 or 100
CAPP-ACC-VAL-30	Max Rate cannot be a negative value
CAPP-ACC-VAL-31	Max Rate should be between 0 or 100
CAPP-ACC-VAL-32	Max Rate cannot have null value
CAPP-ACC-VAL-33	Min Rate cannot be a negative value
CAPP-ACC-VAL-34	MaxRate should be between 0 or 100
CAPP-ACC-VAL-35	Maximum Rate should be greater than or equal to Minimum Rate
CAPP-ACC-VAL-36	Entered rate outside acceptable range for interest rate
CAPP-ACC-VAL-37	Input either rate code or interest rate for a limit category
CAPP-ACC-VAL-38	Atleast one of Rate Code or Rate Value should be available on Save. For Term Deposits both can be null if Default Deposit Rate is Yes.
CAPP-ACC-VAL-39	Statement cycles should be blank when Statement Type is None
CAPP-ACC-VAL-40	Statement Day cannot be blank
CAPP-ACC-VAL-41	Statement cycles have to be different
CAPP-ACC-VAL-42	If Hourly Cycle is selected only Hourly Frequency should have the value
CAPP-ACC-VAL-43	If Daily Cycle is selected only Daily Fixed Time should have the value
CAPP-ACC-VAL-44	Hourly Frequency or Daily Fixed Time cannot be selected when Cycle is NULL
CAPP-ACC-VAL-45	Statement Fee ON field not applicable for Daily Cycle
