Purpose

This guide is designed to help user quickly get acquainted with the features and functionality of **Oracle Banking Retail Deposits Cloud Service**. It provides an overview to the product and the steps involved in the creation and the maintenance of Retail Deposits.

Audience

This user guide is intended for the following end Users / User Roles in a Bank:

Table User Roles

User Role	Functions
Back Office Clerk	Input functions for contracts
Back Office Managers/Officers	Authorization functions
Product Managers	Product definition and authorization
End of Day Operators	Processing during End of Day/ Beginning of Day
Financial Controller/Product Managers	Generation of reports

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Basic Actions

This topic describes about basic actions that can be performed on a screen.

Table Basic Actions

Action	Applicable Stages	Description
Approve	Approval	<p>The system displays a section where approval remarks if any can be input. Click OK to submit. The transaction is sent to the Host system through OBRH. The Host system validates the transaction again and the transaction is created if all the validations are successful. If the transaction fails, the transaction is moved to Handoff retry stage, and user can view the error message. In this stage, the authorizer can retry or reject the transaction. On reject, the transaction is sent back to the maker to modify or delete it.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>The maker checker validation will be provided if the same maker tries to approve the transaction.</p> </div>
Audit	Initiation, Approval and Hand off Retry	Audit details provide the logs of users who have acted on the transaction, the transaction date, and the time for all stages that the transaction has passed through.
Back	Initiation, Approval, and Hand off Retry	In case the user missed to specify or need to modify the details in the previous segment, click to navigate to the previous segment.
Cancel	Initiation, Approval and Hand off Retry	Cancel operation cancels the transaction input midway without saving any data. The user is alerted that the input data would be lost before confirming the cancellation.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Change Log	Approval	When the authorizer clicks on the Change Log button, the system displays the changes made to the transaction in a pop-up window. By default, the change log is set to display only modified values. The Change Log button has two options, they are, All and Updated . The All button displays both modified and non-modified fields and the Updated button displays only the modified fields. The old and new values are displayed so that the authorizer can compare or verify the values and decide on further action. Also, the new values appear in red for easy recognition.
Close	Initiation, Approval and Hand off Retry	Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to 'save and close' the transaction.
Delete	Initiation	Delete operation deletes the transaction without saving any data. The user is alerted that the input data would be lost before confirming the deletion.
Document	Initiation, Approval and Hand-off Retry	The maker of the transaction can click on 'Document' to upload documents that are relevant to the transaction. Once uploaded, the documents are available for viewing during authorization or by the maker.
Host Error	Hand Off Retry	'Hand off Retry' comes into use whenever a transaction input from the mid-office system fails authorization due to Host System rejection. The authorizer of the transaction can view the reason for Host rejection and take appropriate action.
i icon	Initiation, Approval and Hand-off Retry	To view the Customer details such as the photograph, signature, customer ID, Account Branch, and balance, the 'i' icon is used. The 'i' icon becomes active once the maker of the transaction inputs the account number and tabs out of the field. The 'i' icon is useful to inquire customer information about both the debit and the credit account numbers.
Maximize	Initiation, Approval and Hand off Retry	User can maximize the transaction input screen.
Minimize	Initiation, Approval and Hand-off Retry	Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page.

Table (Cont.) Basic Actions

Action	Applicable Stages	Description
Overrides	Initiation, Approval and Hand-off Retry	<p>If override messages had appeared during initiation stage and they were accepted by the maker during submission, the Overrides button appears in the Initiation screen if the transaction is subsequently rejected by the authorizer.</p> <p>On the Override Details section, click Decline to go back to the transaction screen to modify or cancel it, or click Accept to complete the initiation stage and move the transaction to the approval stage. The Overrides button is displayed in the Approval and Hand-off retry stage if there were any override messages generated during initiation and accepted by the maker. When the Overrides button is clicked, the system displays the overrides accepted by the maker.</p> <p>After verifying the transaction and override details, the authorizer can either approve or reject the transaction. Existing Approve Transaction section is modified to display the overrides if any overrides are raised during the initiation submits.</p>
Reject	Approval and Hand off Retry	When an authorizer chooses to reject a transaction, the 'Reject' icon is used. The system displays a pop-up screen to capture the Rejection remarks if any. Click OK for the transaction to be routed back to the initiation stage. Subsequently, the maker can modify or delete the transaction details.
Remarks	Initiation, Approval and Hand-off Retry	'Remarks' can be used either by the maker or the authorizer of the transaction to optionally capture useful information about the transaction.
Reset	Hand off Retry	The reset button clears all the details displayed on the screen and allows input or selection of a different customer number.
Retry	Hand off Retry	The possibility of retrying a transaction arises when transaction input from the mid-office system fails authorization due to Host System rejection. Such host-rejected transactions will be present in the Hand off Retry queue in the Task Wizard. The Retry option is available only to the authorizer. Upon 'Retry', the transaction is sent to the host once again through Oracle Banking Routing Hub. Optionally, the authorizer can also 'Reject' the transaction in which case it is routed back to the maker.
Save and Close	Initiation	<p>In case a transaction has to be closed midway due to a lack of sufficient information, the maker of the transaction can choose this option.</p> <p>On 'Save and Close', the input details are saved and the transaction screen is closed. Saved transaction details will be available in 'My task'. Users can select the transaction from 'My Task' and proceed with the transaction or delete it.</p>
Submit	Initiation	After submitting the initiation stage, the system validates the transaction with the host and displays the errors or overrides if any. In case of an error, you can modify and resubmit or cancel the transaction. In case of an override, you can modify and resubmit or proceed with the transaction by accepting the overrides.

For more information on fields, refer to the field description table below.

Table 1-3 Tenor Parameters - Field Description

Field	Description
Tenor Parameters	This section determines the list of applicable tenors for a business product and also the minimum, maximum and default tenor for a business product.

Table 1-3 (Cont.) Tenor Parameters - Field Description

Field	Description
Applicable Tenor Configuration	Click on Add to specify multiple tenors that are applicable for the business product. If Applicable Tenors are defined for a business product then the deposit can be created only with one of the tenors mentioned in the configured list. The deposit creation will fail in case the deposit is booked with any other tenor not part of the maintained list.
Years	Specify the tenor value in Years .
Months	Specify the tenor value in Months .
Days	Specify the tenor value in Days .
Minimum Tenor	Specify the minimum tenor for which deposits should be created under this business product. If the deposit is booked for a tenor that is less than the minimum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the minimum tenor is less than the least value of the configured applicable tenors.
Days	Specify the minimum tenor in terms of days.
Months	Specify the minimum tenor in terms of months.
Years	Specify the minimum tenor in terms of years.
Default Tenor	User can define a tenor for the deposits that are opened under the business product. Deposits opened under the business product will automatically acquire this tenor. However, user can change the tenor to suit the requirements of a specific deposit. The default tenor should be within the minimum and maximum range specified. The default tenor is mandatory for a business product. If applicable tenors are also configured, then one of the applicable tenors needs to be captured as a default tenor.
Days	Specify the default tenor in terms of days.
Months	Specify the default tenor in terms of months.
Years	Specify the default tenor in terms of years.
Maximum Tenor	Specify the maximum tenor for which deposits can be created under this business product. If the deposit is booked beyond the maximum tenor then the deposit creation fails with an appropriate error message. If applicable tenor is configured, then it needs to be made sure that the maximum tenor is more than the max value of the configured applicable tenors.
Days	Specify the maximum tenor in terms of days.
Months	Specify the maximum tenor in terms of months.
Years	Specify the maximum tenor in terms of years.

- After specify the details in the **Add Tenor applicability** screen. Click **Add** or **Add Another** button to include the tenor applicability details in the **Tenor Parameters** section in the **Deposits** screen.
8. Specify the fields on **Rate Chart Parameters** in **Deposits** screen.

For more information on fields, refer to the field description table below.

Table 1-4 Rate Chart Parameters - Field Description

Field	Description
Rate Chart Parameters	This determines if rate chart is applicable for the business product and the premature redemption details for the deposits if rate chart is allowed.
Rate Chart Allowed	Switch this toggle ON to indicate that the system should calculate deposit interest based on the floating rate maintained. If user select this toggle, the system will pick interest rates based on different tenors, amount slab, currency and effective date for a deposit. The default value is OFF .
Rate Chart Tenor	Specify the value by which the tenor maintained should be considered. User can select one of the following values: <ul style="list-style-type: none"> • Days - If user select this, the rate chart tenor will be considered as days for all deposit under this business product. • Months - If user select this, the rate chart tenor will be considered as months for all deposit under this business product. The default value is Days .
Interest Rate Based On Cumulative Amount	Switch this toggle ON to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same business product, customer, and currency. The default value is OFF .
Interest Rate for Redemption Amount	Select the interest rate to be applied for the redemption amount, from the drop-down list. The list of values are as follow: <ul style="list-style-type: none"> • Continue Existing • As on Opening Date • As on Redemption Date • Special Rate Code • As on Rate Revision Events The default value is Continue Existing .
Special Rate Code	Specify the special rate code for the redemption amount.
Interest Rate After Redemption	Select the interest rate to be applied after redemption of deposit, from the drop-down list. The list of values are as follows: <ul style="list-style-type: none"> • Continue Existing • As on Opening Date • As on Redemption Date • As on Rate Revision Events The default value is Continue Existing .

- Specify the fields on **Maturity Instructions** in **Deposits** screen.

For more information on fields, refer to the field description table below.

Table 1-5 Maturity Instructions - Field Description

Field	Description
Maturity Instructions	This determines the default maturity instructions for accounts opened under the business product.
Auto Rollover	Switch this toggle ON to automatically rollover the deposits on maturity date. The default value is OFF .
Month-End Maturity Deposit	Switch this toggle ON to indicate that the deposit is a month-end maturing deposit (i.e., the deposit matures on the last working day of the month). The default value is OFF .
Re-pick up Account Class Tenor on Rollover	Switch this toggle ON to enable re-pick up of the business product tenor on rollover. During rollover, the system will pick up the default tenor of the business product. The default value is OFF .
Maturity Notice Period	Specify the number of days before which the customer notification is to be sent for deposit maturity.
Close on Maturity	Switch this toggle ON to close the deposit account on maturity date and transfer the amount as per the pay-out details maintained for the deposit. The default value is OFF .
Cascade Month-End Maturity Date	Switch this toggle ON to cascade the month end maturity date of the deposit. If not selected then, the maturity date will fall in line with the account open date. The default value is OFF .
Grace Period For Renewal	Specify the grace period for renewing a deposit. This option is applicable only for deposits whose interest and principal is moved to unclaimed GLs upon maturity. In other words, grace period will not be applicable on the maturity date in case of auto rollover or closure of the deposit.

10. Specify the fields on **Maturity Holiday Treatment** in **Deposits** screen.

For more information on fields, refer to the field description table below.

Table 1-6 Maturity Holiday Treatment - Field Description

Field	Description
Holiday Treatment	This determines the holiday treatment if the maturity of the deposit falls on a holiday.
