Purpose

This guide helps you to familiarize yourself with the Oracle Banking Branch application. It gives an overview of the module and explains all the maintenances required for its smooth functioning. It also takes you through the different types of transactions that can be handled through this module.

Audience

This guide is intended for the Branch Tellers, Vault Operators, and Branch Supervisors to provide quick and efficient service to customers and prospects of your bank.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.

Overview of Oracle Banking Branch

Oracle Banking Branch is a retail banking application that gives a 360-degree view of the customer and financial transactions to the Teller of the bank.

As a teller in Oracle Banking Branch you provide customer-focused services while also cross-selling and up-selling the bank's products and services. A typical transaction in a branch is classified into the following stages:

Table 1-1 Transaction Stages

Stage	Description
Teller Request	In this stage, the Teller captures the transaction request and transaction enrichment.
Authorization	In this stage, the Supervisor authorizes the request.
Teller Resubmission	The Resubmission stage is applicable only for certain transactions.

This topic contains the following subtopics:

- [Prerequisites](#)
Before you begin performing transactions, you need to log in to the Oracle Banking Accounts Cloud Service **Home** screen.
- [About Main Menu](#)
The Teller Main Menu is a Mega Menu that makes all the menu items visible at once. It is a large panel divided into groups of menu items, which simplifies the navigation.
- [Application Layout](#)
The general layout of the Oracle Banking Branch application consists of the main menu, customer search, transaction area including customer summary, and additional widgets available to display the `Current Till Position` and frequently used transaction icons.
- [Salient Features](#)
Learn about the salient features of the Oracle Banking Branch application.
- [Keyboard Navigation for Transaction Screens](#)
The keyboard navigation can be used as an alternative method to navigate through interactive elements on a screen – fields, buttons, data segments, tables, etc. It can be used to navigate through the application, input the necessary values, and perform the transactions.

1.1 Prerequisites

Before you begin performing transactions, you need to log in to the Oracle Banking Accounts Cloud Service **Home** screen.

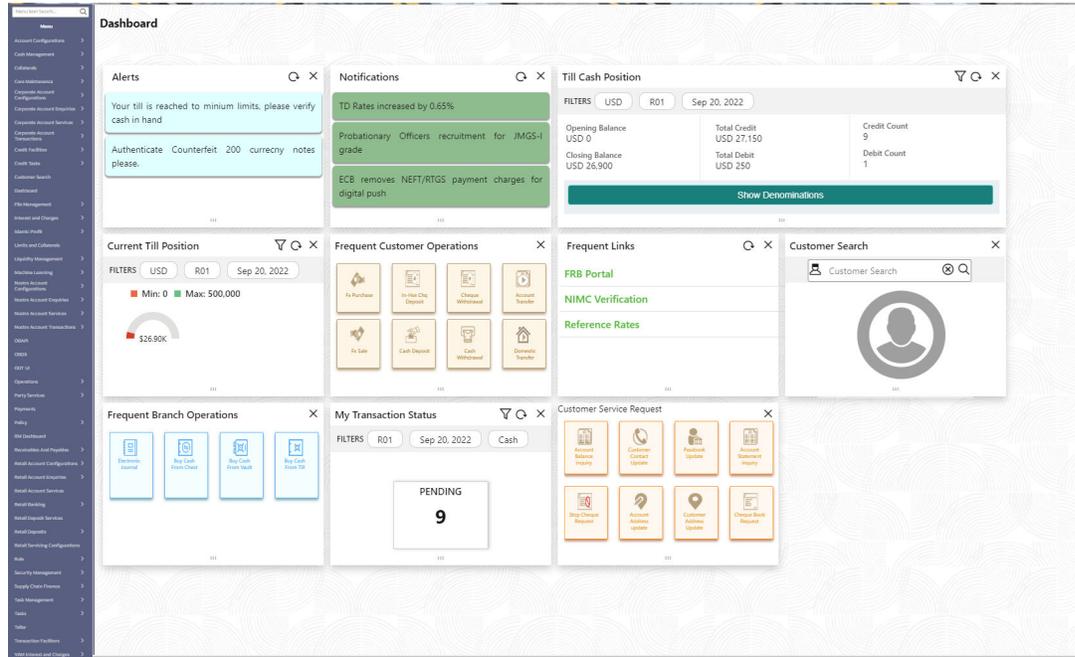

For information on how to log in, refer to the *Oracle Banking Getting Started User Guide*.

To launch Oracle Banking Branch through Oracle Banking Accounts Cloud Service:

1. Log in to the Oracle Banking Accounts Cloud Service **Home** screen. For information on how to log in, refer to the *Oracle Banking Getting Started User Guide*.

2. On the **Home** screen, click **Teller**.
The Oracle Banking Branch **Home** screen is displayed.

1.2 About Main Menu

The Teller Main Menu is a Mega Menu that makes all the menu items visible at once. It is a large panel divided into groups of menu items, which simplifies the navigation.

The menu items are grouped based on the type of operation performed. In addition, the **Menu Item Search** can be used to search and select a specific screen from any of the main menu items. Menu Item Search also supports fast path for Branch Screens, which allows user to key in function code and launch the screen. For more information on menus, refer to [Figure 1-2](#) and [Table 1-2](#).

Figure 1-2 Megamenu

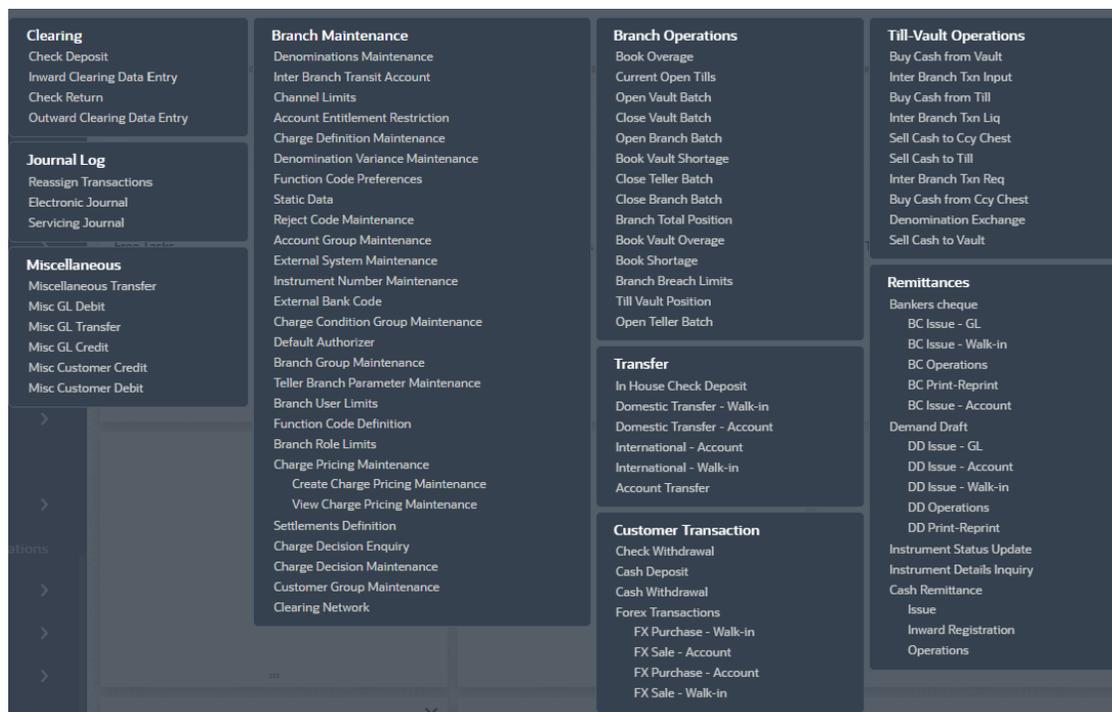

Table 1-2 Menu Items – Description

Menu	Description
Branch Operations	Branch Manager, Vault Teller, or Teller can use Branch Operations to cover the internal activities done at the branch where the Customer is not involved. This facilitates branch, vault, Till opening, or closing for the day and monitoring the transactions done during the day, and Cash Balancing.
Till-Vault Operations	Vault Teller or Teller can use Till-Vault Operations to monitor the cash and currency boxes for the day and to perform cash transfers from or to the Vault or Till as and when required.
Customer Transactions	Teller can use Customer Transactions to perform financial transactions for customer accounts, which includes, cash deposits, cash withdrawals, and check withdrawals.
Miscellaneous Transactions	Teller can use Miscellaneous Transactions to perform General Ledger transactions such as miscellaneous debit and credit transactions against a Customer's CASA account and GL account.
Transfers	Teller can use Transfers to perform account transfer and in-house check deposit transactions.
Clearing	Teller can use Clearing to capture the Inward Clearing Data Entry, Outward Clearing Data Entry, Cheque Return, and Cheque Deposit transactions.
Remittances	Teller can use Remittances to issue remittances such as demand drafts and banker's cheques, perform payment or cancellation of the issued remittances, and perform further operations on the issued remittances.

Table 1-2 (Cont.) Menu Items – Description

Menu	Description
Journal Log	Teller or Supervisor can use Journal Log to view the status of transactions performed by them. Also, it allows to resubmit or reject an incomplete transaction, or to reverse a completed transaction.
Branch Maintenance	Branch Maintenance covers a set of definitions maintained to perform the branch-based operations, transactions, and services.

You can select an operation using any of the following methods:

- From the **Home** screen, navigate to the left menu and then click the necessary operation.
- Click the **Frequent Operations** widget placed at the right side of the transaction area.

1.3 Application Layout

The general layout of the Oracle Banking Branch application consists of the main menu, customer search, transaction area including customer summary, and additional widgets available to display the `Current Till Position` and frequently used transaction icons.

This topic contains the following subtopics:

- [Customer Search](#)
The **Customer Search** is located in the **Branch Dashboard** and **Teller Transaction** screens. It is used to query and find a specific customer account.
- [About Transaction Area](#)
The transaction area consists of a transaction panel, a **Customer Information** widget, and additional widgets within the **Teller Transaction** screens.

1.3.1 Customer Search

3. Click **Submit**.

The branch batch is opened for the specified posting date.

 **Note:**

- Opening branch batch indicates to the head office that the branch is open for business operations on the specified posting date. You can open a Teller batch for the posting date only after the branch batch is opened.
- On submit, system will compare the Branch Date with the Common Core Date, and a warning will be shown if the current date is beyond the Next working date of Common Core.

2.2 Open Vault Batch

The Vault Teller can use **Open Vault Batch** screen to open a vault batch on a specified date.

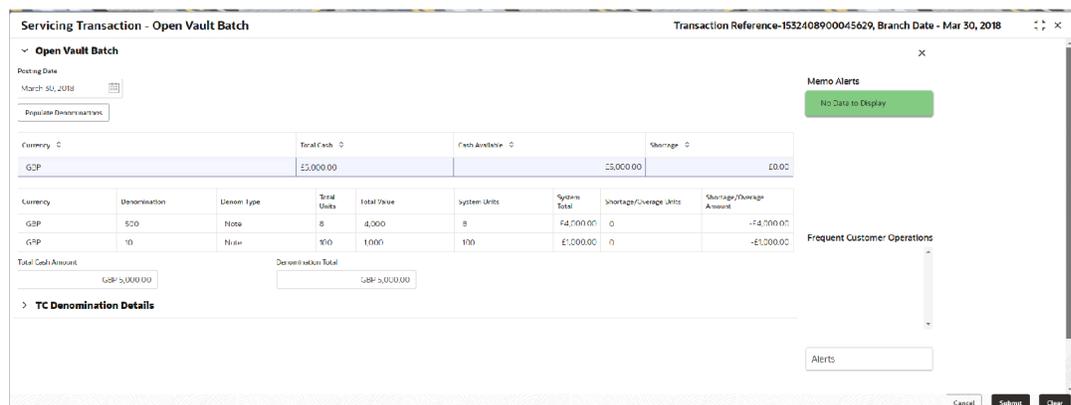

On the specified posting date, the Vault Teller can open only one vault batch. To open another vault batch, the vault batch which is opened previously needs to be closed. All the tellers buy additional cash and sell their excess cash to the Vault Teller. When this screen is launched, the system will default the cash balances.

To open a vault batch:

1. On the **Home** screen, from **Teller** mega menu, under **Branch Operations**, click **Open Vault Batch** or specify **Open Vault Batch** in the search icon bar and select the screen.

The **Open Vault Batch** screen is displayed.

2.8 Close Teller Batch

The **Close Teller Batch** screen is used to close the teller batch for the given posting date.

The system allows closing the teller batch only when the below conditions are met:

- Verify that all the transactions are successfully processed to a logical end. If there are any pending transactions, the system prompts to either complete or reject the transaction.
- Verify that there is a difference between the physical cash and the cash calculated by the system. You need to book the overage or shortage accordingly, and then each Teller can close the teller batch for that day.
- Verify that the teller cash position retains the minimum limit for every currency as maintained in the User limits. If you breach the minimum limit, the system prompts the error to maintain the required minimum balance.

Note:

The teller batch can be opened and closed only once for the posting date.

To close the teller batch:

1. On the **Home** screen, from **Teller** mega menu, under **Branch Operations**, click **Close Teller Batch** or specify **Close Teller Batch** in the search icon bar and select the screen.

The **Close Teller Batch** screen is displayed.

- On the **Close Vault Batch** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-9 Close Vault Batch - Field Description

Field	Description
Posting Date	Indicates the date on which the vault batch needs to be closed.  Note: By default, the system displays the current date.
Currency	Displays the currency code in which the Vault Teller deals.
Total Cash	Specify the total cash for a particular currency, physically present in the bank Vault Teller, at the end of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the Vault Teller at the end of the current posting date.  Note: The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.
Shortage/Overage Amount	Displays the difference between the total cash and the cash available in the Vault, at the end of the current posting date.
Currency	Displays the currency code.
Denomination	Displays the denomination code.
Demon Type	Displays the demon type. Values: Note or Coin
Total Units	Specify the total units available while closing the batch.
Total Value	Displays the total value based on the total units.
System Units	Displays the units available in the system.
System Total	Displays the total value available in the system.
Shortage/Overage Units	Displays the shortage/overage units.
Shortage/Overage Amount	Displays the shortage/overage amount.
Total Cash Amount	Displays the total cash amount.
Denomination Total	Displays the total denomination value with the currency.

- Click **Submit**.

The cash balance is updated and the vault batch is closed for the posting date.

 **Note:**

During vault batch closure, the system will internally transfer the closing balance from the current open Vault ID to the Primary vault of the branch. If there is any overage or shortage, the system displays an error message stating that the cash is not balanced for the Teller ID. Also, if any of the conditions mentioned above fail, the system displays an appropriate error on submit.

2.10 Close Branch Batch

The **Close Branch Batch** screen is used to close the branch batch after confirming that all the branch transactions have been accounted for in the account books.

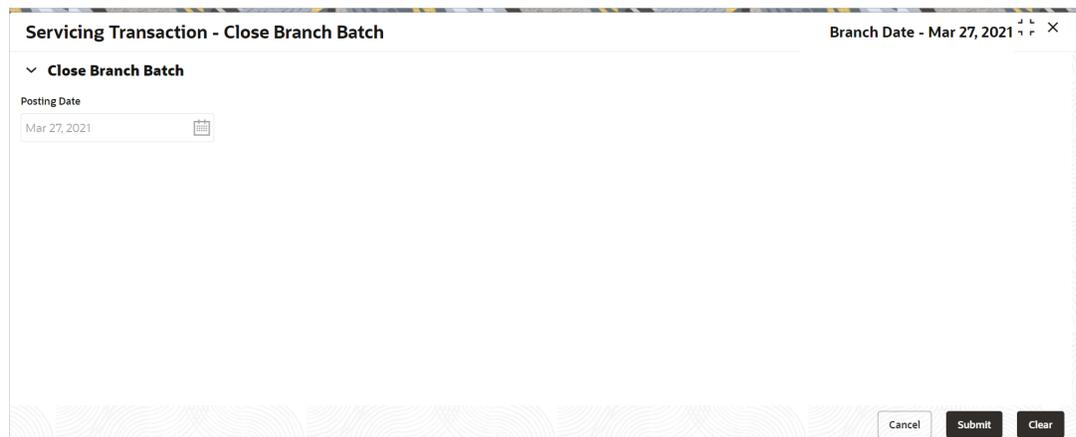

The posting date for closing a branch batch must be the same date on which the respective branch batch was opened. You need to close all the teller batches and the vault batch of the branch before closing the branch batch for that posting date. Archiving is done as a part of **Close Branch Batch** as per the archival days set up for the branch.

To close the branch batch:

1. On the **Home** screen, from **Teller** mega menu, under **Branch Operations**, click **Close Branch Batch** or specify **Close Branch Batch** in the search icon bar and select the screen.

The **Close Branch Batch** screen is displayed.

3. Click **Submit**.

The branch batch is closed for the specified posting date.

2.11 Book Shortage

The Teller can use the **Book Shortage** screen to book the shortage if the actual or physical cash present is less than the system cash.

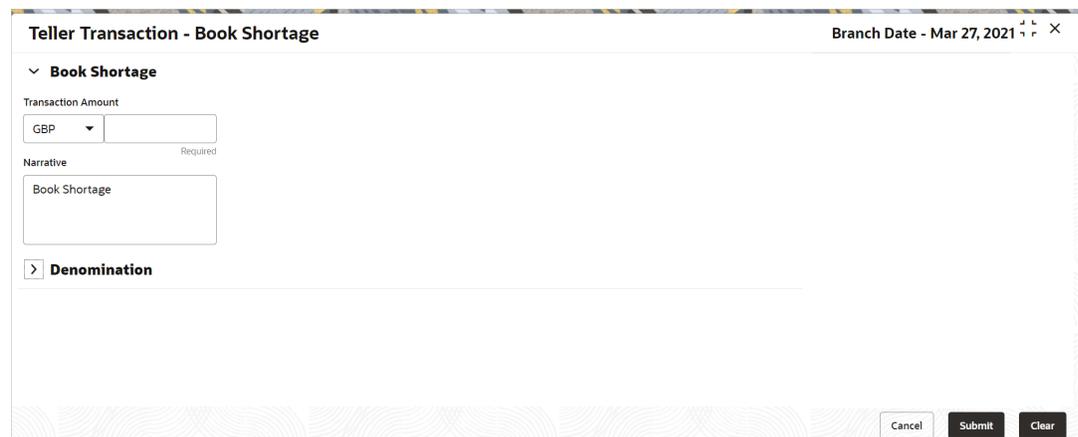

While booking the shortage, the system lowers the cash balance to bring it in sync with the physical cash balance of the Teller by sending the difference to a cash shortage GL. Once the system cash and the physical cash are synchronized, the Teller can perform the cash balancing and close the Teller batch for the posting date.

To book the shortage:

1. On the **Home** screen, from **Teller** mega menu, under **Till-Vault Operations**, click **Book Shortage** or specify **Book Shortage** in the search icon bar and select the screen.

The **Book Shortage** screen is displayed.

Narrative	Displays the default narrative <code>Book Shortage</code> and it can be modified.

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the system reduces the cash balance by this transaction amount to synchronize with physical cash held with Teller.

- [Add Denomination Details](#)
The **Denomination** segment is used to view the denominations maintained for the transaction currency and enter the denomination units.

2.11.1 Add Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and enter the denomination units.

Make sure that the main transaction details are added to the transaction screen.

The denomination details for the withdrawal transactions (when cash is disbursed to the customer) will be populated automatically based on the cash availability in the Teller's Till.

2.12 Book Coverage

The Teller can use this screen to book the physical cash held in a particular currency, which exceeds the cash in that currency shown in the system.

While booking a cash overage, the system passes the difference to a cash overage liability GL and increases the cash balance, and brings it to synchronize with the physical balance with the Teller. Once the system cash and the physical cash are synchronized, the Teller can perform cash balancing and close the Teller batch for the posting date.

To book the overage:

1. On the **Home** screen, from **Teller** mega menu, under **Till-Vault Operations**, click **Book Overage** or specify **Book Overage** in the search icon bar and select the screen.

The **Book Overage** screen is displayed.

The Teller can use the **DD Operations** screen to issue the instrument if the customer or banker lost the instrument or if the instrument is damaged.

In case of a request raised by the customer, additional charges will be deducted while issuing again. The system will allow for duplicate issues only if:

- The duplicate issue is allowed at the instrument type level
- The instrument is not liquidated, canceled, or refunded
- The instrument is issued or revalidated but not liquidated/refunded/canceled

- Rule based authorization is not supported for duplicate issue

To issue a duplicate DD:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Operations** or specify **DD Operations** in the search icon bar and select the screen.

The **DD Operations** screen is displayed.

7.1 Cash Deposit

The **Cash Deposit** screen is used to deposit the cash in a CASA. Cash can be deposited in either account currency or any foreign currency that is allowed.

Whenever any transaction in foreign currency is posted to the account, it is converted to the account currency based on the maintained exchange rate for the transaction.

To deposit cash:

1. On the **Home** screen, click **Teller**. On the Teller Mega Menu, under **Customer Transaction**, click **Cash Deposit** or specify the **Cash Deposit** in the search icon bar.

The **Cash Deposit** screen is displayed.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Charge Details](#).
4. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
5. Click **Submit**.

Once you submit the transaction, the system validates the following:

- Mandatory fields
- Allowed minimum/maximum limit amount for the user ID

- Allowed currency for Teller user ID
- Till balance and branch breaching limit
- Function code preferences

If any of the validation fails, the system will prompt appropriate information, warning, or error message. For more information, refer to the following steps:

- If an information message is prompted, click **OK** to confirm and complete the transaction.
- If a warning message is prompted, the system will move the transaction for authorization. Once approved, the transaction is moved to Teller **Electronic Journal** for completion. Refer to authorization procedures to know more about authorization processing.
- If any validation error is prompted, you need to update the details to fix the error and re-submit the transaction.
- If any other error message is prompted, the transaction is discarded and does not get saved.
- If you click **Close** or **Cancel** after specifying the transaction details, then the data will not persist.

When the Teller completes the transaction, the corresponding Teller's cash position is updated.

The `Transaction Completed Successfully` information message is displayed.

4. Click **Save**.

The summary view is displayed with the configured function code definitions.

9.8 Function Code Preferences

The **Function Code Preferences** screen is used to define the workflow preferences (validation preferences and authorization preferences) for a function code.

For the list of function codes and the respective screen names, refer to [List of Function Codes](#). The rule-based authorization option in this screen is used to configure multi-level authorization with AND or OR condition. The multi-level authorization feature is described with the following example.

The sample user roles are considered as follows:

- JUNIOR TELLER (Supervisor enabled)
- SENIOR TELLER1
- SENIOR TELLER2
- OFFICER LEVEL1
- OFFICER LEVEL2
- BRANCH MANAGER

The sample values for limits and roles maintained are as below:

Table 9-11 Sample Values for Multi-level Authorization

Transaction Limit	Primary Authorization	Alternate Authorization
50,000 to 9,99,999	SENIOR TELLER2, OFFICER LEVEL1, and OFFICER LEVEL2	OFFICER LEVEL2 and BRANCH MANAGER
10,00,000 to 99,99,99,99,999	SENIOR TELLER1 and OFFICER LEVEL1	OFFICER LEVEL2 or BRANCH MANAGER

The approval needs to be provided by the roles configured with AND or OR condition defined either in the primary authorization path or in the alternate authorization path. Based on the sample values provided, the following are some possible scenarios for multi-level authorization:

Table 9-12 Examples for Multi-Level Authorization

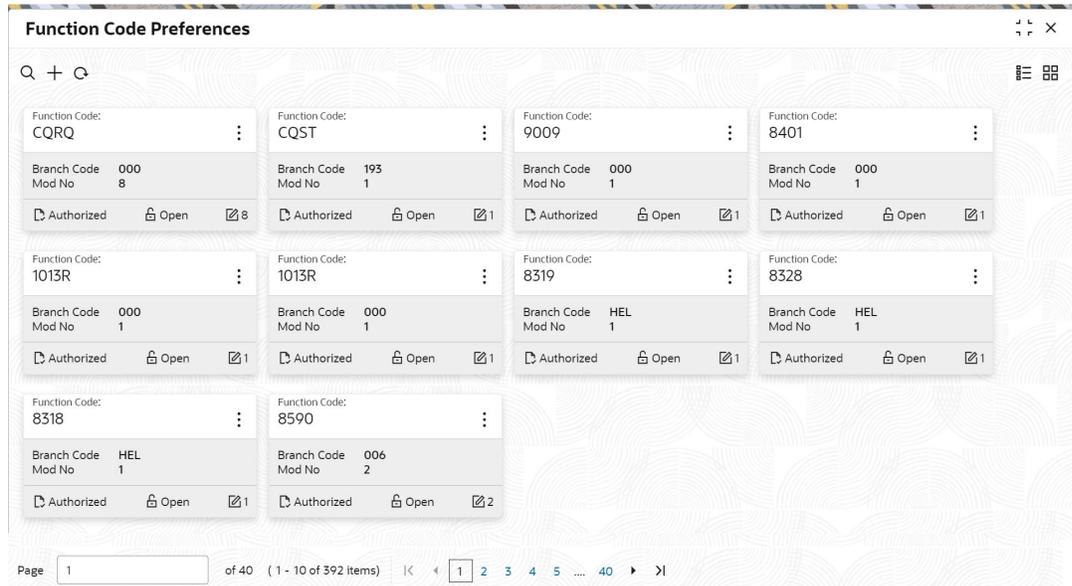

Condition	Authorization Process
Teller with <i>JUNIOR TELLER</i> role inputs a cash deposit transaction of amount 10,000	The transaction gets completed automatically without authorization.
Teller with <i>JUNIOR TELLER</i> role input a cash deposit of 60,000	The transaction gets assigned to all the roles mentioned in Primary and Alternate Authorization paths. For example, when a user with the <i>OFFICER LEVEL2</i> role picks the transaction and authorizes it, the transaction gets assigned to the other three roles in the Primary and Alternate paths. Further, based on the user who picks for approval, the corresponding path will be chosen by the system. If a user with <i>BRANCH MANAGER</i> Role picks the transaction for approval, the system identifies the Alternate Path for approval and ends the authorization process. If a user with <i>SENIOR TELLER2</i> role picks the transaction and authorizes, then the corresponding Primary Path will be chosen by the system for <i>OFFICER LEVEL1</i> to authorize the transaction.
Teller inputs an account transfer of 20,00,000	The transaction gets assigned to all the roles mentioned in Primary and Alternate Authorization paths. When a user with <i>BRANCH MANAGER</i> role or <i>OFFICER LEVEL2</i> role picks the transaction and authorizes it, the system identifies the path as Alternate and ends the authorization process. Else if a user with <i>OFFICER LEVEL1</i> picks the transaction and authorizes it, the system identifies the path as Primary for <i>SENIOR TELLER1</i> to authorize the transaction.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers is updated successfully.

10.8 Inter Branch Transactions

The interbranch transactions are used to send a request from a bank branch to the central cash depository, for pickup or delivery of cash.

A branch can request delivery of cash when it is having a shortage of cash and request for pickup of cash when it has excess cash. The process steps to request cash delivery and pickup are explained below.

The process steps for cash delivery are as follows:

1. The requesting branch sends a request for delivery of cash using the 1409 screen.
2. The remitting branch queries for the requests and accepts the request using the 1409 screen.
3. On the delivery date, the remitting branch books a transaction using the 1410 screen with the denominations being sent and generated.
4. On the delivery date, the remitting branch books a transaction input using the 1410 screen, generates advice, and sends money to the requesting branch.
5. On receiving money and advice, the requesting branch uses the 1411 screen to verify the denominations and save the liquidation.

The process steps for cash pickup are as follows:

1. The requesting branch sends a request for the pickup of cash using the 1409 screen.
2. The receiving branch queries for the requests and accepts the request using the 1409 screen.
3. On the date of cash pickup, the receiving branch generates advice and sends it to requesting branch.
4. The requesting branch receives the advice and books the transaction using the 1410 screen.
5. The requesting branch generates the advice and sends money and advice to the receiving branch.
6. The receiving branch receives the money and advice and verifies and liquidates the request using the 1411 screen.

 **Note:**

Accounting entries are not passed for the 1409 screen.

Inter branch Transaction

The process for completion of Inter branch Transaction in two steps is as follows:

1. The requesting branch initiates transfer using the 1410 screen by clicking on **New**.

2. The requesting branch generates the advice and sends money and advice to the receiving branch.
3. The receiving branch receives the money and advice and verifies and liquidates the request using the 1411 screen.

Inter Branch Transaction Input

Branch can also initiate Inter branch transfer directly from this screen for two step completion of Transfer.

This topic contains the following subtopics:

- [Inter Branch Transaction Request](#)
The **Inter Branch Transaction Request** screen is used to create the inter-branch cash pickup or cash delivery requests. When a branch needs cash, the branch can request a cash delivery and when the branch has excess cash, the branch can request cash pickup.

2. On the **Inter Branch Transaction Liquidation** screen, specify the fields. For more information on fields, refer to the field description table.

Table 10-10 Inter Branch Transaction Liquidation - Field Description

Field	Description
Inter Branch Request Reference	Select the request reference from the list of values.
Query	Click Query to fetch and populate the request details.
From Branch	Displays the branch code of From Branch .
From Branch Description	Displays the description of the From Branch .
To Branch	Displays the branch code of To Branch .
To Branch Description	Displays the description of specified To Branch.
Transaction Amount	Displays the transaction currency and transaction amount based on the request reference.
Requested Date	Displays the date on which the transaction is requested.
Narrative	Specify the remarks, if any.

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

The system updates the request reference as **Liquidated** in the **Inter Branch Transaction Request** screen for the related request reference.

- The request status in the **Inter Branch Transaction Request** screen will be internally updated to *Initiated* for the related request reference number. In addition, the system will post the accounting entries (for example, Dr Sending Branch Inter Branch Transit GL & Cr Sending Branch Vault GL) for the Inter Branch Input transaction as per the settlement definition maintained for the function code, and advice will be generated on transaction completion.

- When saving a transaction without raising an approval warning, it is moved to authorization.

Functional Activity Codes

This topic provides the functional activity codes available in Oracle Banking Teller.

Below tables provide the list of Functional Activity codes that should be Mapped to the user role.

- Table A-1 lists all the Functional Activity codes needed for the login of the application.
- Table A-2 lists the list of maintenance screens required for Branch teller.
- Table A-3 lists the actions for each of the screens of Table A-2. If you need granular access for the maintenance screens table A-3 can be used.
- Table A-4 lists the Functional Activity codes For Transaction screens.
- Table A-5 provides the list of Functional Activity codes for the widgets.
- Table A-6 provides the list of Functional Activity codes for the API.
