- [Prerequisite](#)

Purpose

This guide is designed to help you get acquainted with the **Interest and Charges** maintenance's that are available in Oracle Banking Corporate Accounts, Oracle Banking Retail Accounts, Oracle Banking Retail Deposits. It provides an overview of the product and also step-by-step instructions to create and maintain the various parameters required to maintain and calculate the interest and charges in the system. It also provides the answers to specific features and procedures that allows the module to function successfully.

Interest is computed and applied on accounts having balances. Using the Interest component, the system then calculates and applies interest on such accounts.

Setting-up an Interest component is a one-time activity. Once the setup is complete, the system auto-computes interest which is applied to all the balance type accounts. Interest is calculated using the interest rules defined by the user to suit the requirements of the bank.

Audience

This guide is intended for the following User/User Roles.

Table Audience

Role	Function
Back Office Data Entry Clerks	Input functions for maintenance related to the interface
Back Office Managers / Officers	Authorization functions

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which user supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that user enter.

Related Documents

The related documents are as follows:

- *Getting Started User Guide*
- *Oracle Banking Common Core User Guide*
- *Security Management System User Guide*

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows.

Table Abbreviations

Abbreviation	Definition
IACR	Interest Accrual
IC	Interest and Charges
ILIQ	Interest Liquidation
LOV	List of Values
SDE	System Data Elements
UDE	User Data Elements

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Basic Actions

This topic describes about basic actions that can be performed on a screen.

Table Basic Actions

Action	Description
Approve	Used to approve the initiated report. This option is displayed when the user clicks Authorize .
Audit	Used to view the maker details, checker details and report status.
Authorize	Used to authorize the report created. A maker of the screen is not allowed to authorize the report. Only a checker can authorize a report, created by a maker.
Reject	Used to reject the report created. A maker of the screen is not allowed to authorize the report. Only a checker can reject a report, created by a maker.
Close	Used to close a record. This action is available only when a record is created.
Confirm	Used to confirm the performed action.
Cancel	Used to cancel the performed action.
Compare	Used to view the comparison through the field values of old record and the current record. This option is displayed in the widget when the user clicks Authorize .
Collapse All	Used to hide the details in the sections. This option is displayed when the user clicks Compare .
Expand All	Used to expand and view all the details in the sections. This option is displayed when the user clicks Compare .
Menu Item Search	Used to search and navigate to the required screens. The user can click Menu Item Search to manually search the maintenance and select the required screen.
New	Used to add a new record. When the user clicks New , the system displays a new record enabling to specify the required data.
OK	Used to confirm the details in the screen.
Save	Used to save the details entered or selected in the screen.
View	Used to view the report details in a particular modification stage. This option is displayed in the widget when the user clicks Authorize . This option is also displayed in the Tile menu.
View Difference only	Used to view a comparison through the field element values of old record and the current record, which has undergone changes. This option is displayed when the user clicks Compare .
Unlock	Used to update the details of an existing record. System displays an existing record in editable mode.

Symbols and Icons

The following buttons are used in the screens:

Table Symbols and Icons - Common

Symbol/Icon	Function
	Minimize
	Maximize
	Close
	Perform Search
	Open a list
	Add a new record
	Navigate to the first record
	Navigate to the last record

Prerequisite

Specify **User Name** and **Password**, and login to **Home** screen.

1

Branch Parameters

This topic provides the information to configure and maintain the branch parameters.

It is related to Interest and Charges processing such as processing interest/charges for System Date or Next Working Day-1, and accrual processing for each branch of the bank.

This topic contains the following subtopics:

- [Create Branch Parameters](#)
This topic describes the systematic instructions to configure the interest and charges at branch level parameters.
- [View Branch Parameters](#)
This topic describes the systematic instructions to view the list of configured branch parameters.

1.1 Create Branch Parameters

This topic describes the systematic instructions to configure the interest and charges at branch level parameters.

Note

The fields marked as **Required** are mandatory.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **Branch Parameters**. Under **Branch Parameters**, click **Create**.

The **Create** screen displays.

Figure 1-1 Create Branch Parameters

- Specify the fields on **Create** screen.
For more information on fields, refer to the field description table.

Table 1-1 Create Branch Parameters - Field Description

Field	Description
Branch Code	Click Search icon and select the branch code, if needed. The Branch code of the current branch is defaulted.
Accrual on Holidays	If enabled the system posts a consolidated accrual entry for the holiday period.
Process Till	Select the date till when the user need to process interest. The available options are: <ul style="list-style-type: none"> System Date – Select if the user need to process till system date. Next Working Day - 1 – Select if the user need to process till next working day.
Intraday Required	Switch On/Off the toggle to enable/disable intraday processing of accounts.

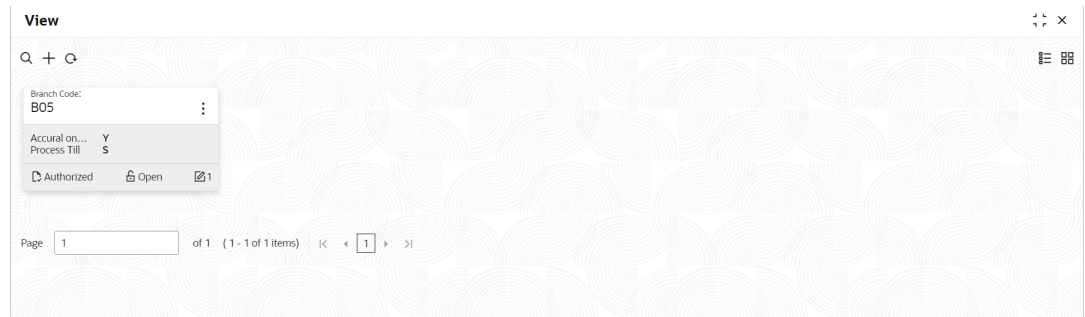

- Click **Save** to save the details.

1.2 View Branch Parameters

This topic describes the systematic instructions to view the list of configured branch parameters.

- On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
- On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
- On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
- Under **Interest and Charges**, click **Branch Parameters**. Under **Branch Parameters**, click **View**.

The **View** screen displays.

Figure 1-2 View Branch Parameters

For more information on fields, refer to the field description table.

Table 1-2 View Branch Parameters - Field Description

Field	Description
Branch Code	Displays the branch code.
Accrual on Holidays	Displays the accrual on holidays is yes or no.
Process Till	Displays the selected type to process interest.
Authorization Status	Displays the authorization status of the record. The available options are: <ul style="list-style-type: none"> • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: <ul style="list-style-type: none"> • Open • Closed
Modification Number	Displays the number of modification performed on the record.

2

Rule Maintenance

This topic provides the information to configure and maintain interest rules.

Interest rule is the method in which interest has to be calculated for the accounts attached to this rule via the interest product.

This topic contains the following subtopics:

- [Create Rule Details](#)
This topic describes the systematic instructions to configure the rule details.
- [View Rule Maintenance](#)
This topic describes the systematic instructions to view the list of configured interest rule details.

2.1 Create Rule Details

This topic describes the systematic instructions to configure the rule details.

Note

The fields marked as **Required** are mandatory.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **Rule Maintenance**. Under **Rule Maintenance**, click **Create**.

The **Create** screen displays.

Figure 2-1 Create Rule Details

5. Specify the fields on **Create** screen.

For more information on fields, refer to the field description table.

Table 2-1 Create Rule Details- Field Description

Field	Description
Rule ID	Specify the unique code for each Rule ID to represent the type of interest. When the user wants to link a product to a rule, it is possible to identify the rule with the assigned code only.
Rule Description	Specify the short description of the rule to indicate the type of interest. This is used by the system for display and printing purposes. Enter a minimum of three characters for the Rule description.

System Elements:

In the same way, the user picks up the SDEs applicable for the defined rule. The user should identify the UDEs which the user would be using in the rule. The types of UDEs are as follows:

- Rate
- Amount
- Number

The interest that you charge on a debit balance is an example of a debit rate. The interest that you pay on a credit balance is an example of a credit rate. A **User Data Element(UDE)** will be an amount under the following circumstances:

- In the case of a tier structure, the upper and lower limit of a tier or a tier amount.
- In the case of a charge, when it is indicated as a flat amount.
- Any amount that can be used in the definition of formula.

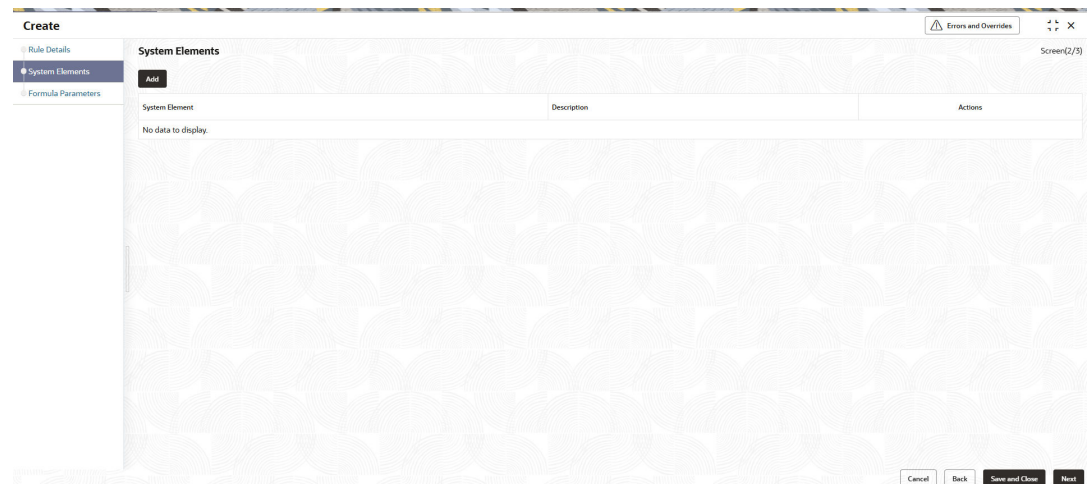

A **UDE** as a number is typically used for a Rule where interest is defined based on the number of transactions. A UDE under this category can also be used to store a numerical value that may be used in a formula. For example, in the formula you would like to multiply an intermediate result with a certain number before arriving at the final result. The 'certain number' in the formula can be a UDE.

The user can enter the actual values of the UDEs (like the interest rate, the upper limit for the tier, etc.) in the IC User Data Element Maintenance screen. This is because you can specify 3-6 different values for each data element. A rule can, therefore, be applied on different accounts since it just represents a method of interest calculation. The following example illustrates this.

6. Click **System Elements** to update the system element details.

The **System Elements** screen displays.

Figure 2-2 Create - System Elements

For more information on fields, refer to the field description table.

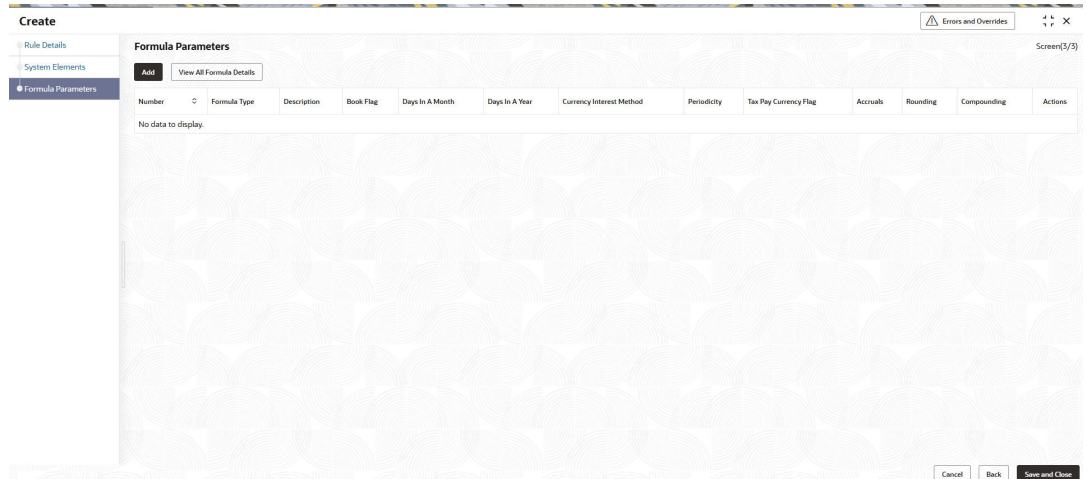

Table 2-2 Create - System Elements - Field Description

Field	Description
System Element Name	Click Search icon and select the system element name from the drop-down list. The user must specify the method for calculating interest in the form of formulae.

7. Click **Formula Parameters** button to invoke the formula section.

The **Formula Parameters** screen displays.

Figure 2-3 Create - Formula Parameters

8. Click **Add** button.

The **Create - Add Formula - Formula Preferences** screen displays.

Figure 2-4 Create - Add Formula - Formula Preferences

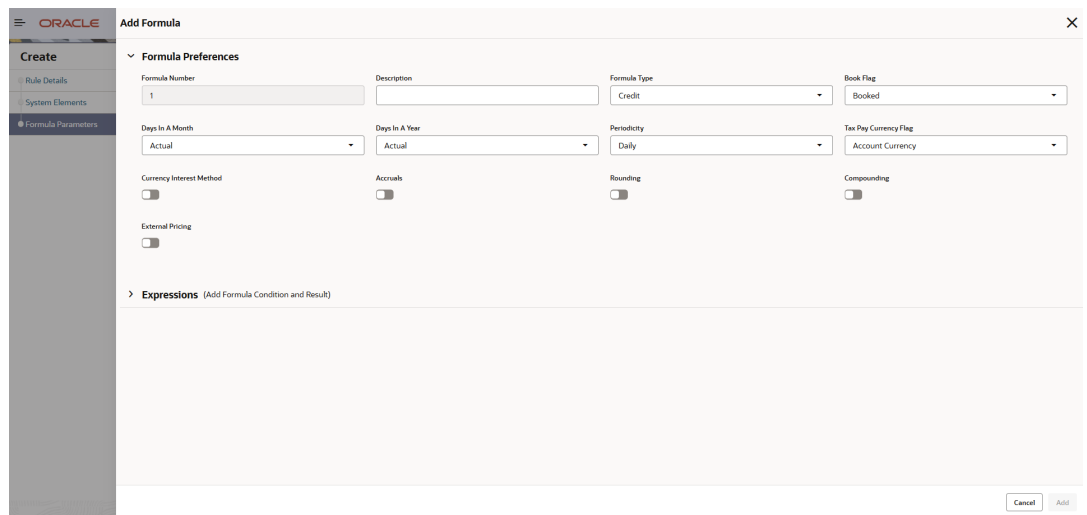

Table 2-3 Create Interest Rule Maintenance - Add Formula - Formula Preferences - Field Description

Field	Description
Formula Number	Displays the formula number.
Description	Specify the description of the formula.

Table 2-3 (Cont.) Create Interest Rule Maintenance - Add Formula - Formula Preferences - Field Description

Field	Description
Formula Type	<p>Select the formula type from the drop-down list. You have to specify the method for calculating interest in the form of formulae.</p> <p>The result of a formula will be an amount that has to be either debited from the customer account or credited to it. For example, the debit interest that the user charge on an overdraft would be debited from the customer account; while the credit interest that the user pay would be credited to the customer account. In this screen, you indicate this. Often, when calculating interest for an account, the user would want to debit interest under certain conditions and, under certain other conditions, credit interest. In such a case, the user can build formulae to suit both conditions. The formula that is used to calculate interest for the account would depend on the condition that is fulfilled.</p>
Book Flag	<p>The Booking Flag of a formula denotes whether the result of a formula should be:</p> <ul style="list-style-type: none"> • Booked (that is, if the resulting amount should be posted to the customer account). • Non-booked (that is, the result of the formula is to be used in another formula and not to be posted to the customer account). • Tax (that is, the formula is used to calculate tax. The tax can be borne either by the customer or the bank).
Days In A Month	<p>The method in which the N of the formula for interest calculation, PNR/100, has to be picked up is specified for a formula. This is done through two fields:</p> <ul style="list-style-type: none"> • Days in a month • Days in a year <p>The number of interest days for an account can be arrived at in three ways.</p> <p>One, by considering:</p> <ul style="list-style-type: none"> • one by considering the actual number of days in a month • two, the US method of considering 360 days in a year 3-8 • three, the Euro method of considering 360 days in a year
Days In A Year	<p>The interest rate is always taken to be quoted per annum. You must therefore indicate the denominator value (the total number of days in the year) based on which interest has to be applied. You can specify the days in a year as</p> <ul style="list-style-type: none"> • Actual number of days (leap year will be 366, non-leap year will be 365) • 360 days • 365 days (leap and non-leap will be 365)
Periodicity	<p>The Periodicity of a rule application denotes whether the formula you are defining has to be:</p> <ul style="list-style-type: none"> • applied for each change during the interest period (or daily). • only for the last day of interest period (periodic).
Tax Pay Currency Flag	<p>Select the currency in which tax is paid. It can be Account currency or Local currency.</p>
Currency Interest Method	<p>Currency method is defaulted from currency definition screen.</p>
Accruals	<p>Select the toggle to enable the interest accruals.</p>
Rounding	<p>Select the toggle to enable the interest rounding.</p>
Compounding	<p>Select the toggle to enable the compounding.</p>

Table 2-3 (Cont.) Create Interest Rule Maintenance - Add Formula - Formula Preferences - Field Description

Field	Description
External Pricing	Select the toggle to enable the External Pricing.

Formula Parameters:

Using the SDEs and the UDEs specified for a Rule, the user can calculate interest. The user must specify the method for calculating interest in the form of formulae. Using the SDEs and the UDEs, the user can create any number of formulae for a rule.

- Click **Expressions** button to invoke **Add Expressions** table grid.

The **Expressions** fields displays.

Figure 2-5 Create - Expression Window

For more information on fields, refer to the field description table.

Table 2-4 Expressions - Field Description

Field	Description
Expression	Specify the expression.
Condition	Specify the condition.
Result	Specify the result.
SDE Elements	This column displays SDE elements give in the system elements.
UDE Elements	This column displays UDE elements give in the user elements.

- Click **Save** to save the details.

- [Supported System Defined Elements \(SDE\)](#)

As part of the **Interest and Charges** module maintenance, the user must maintain details that will enable the system to pick up different elements that are used in the calculation of interest.

2.1.1 Supported System Defined Elements (SDE)

As part of the **Interest and Charges** module maintenance, the user must maintain details that will enable the system to pick up different elements that are used in the calculation of interest.

Accordingly, the following **System Defined Elements (SDEs)** are available as inbuilt parameters in Oracle Banking Accounts, which you can use to set-up an Interest and Charges rule:

Table 2-5 SDEs Supported

SDE Name	Description
DLY_NET_VD_BAL	Daily Net Value Dated Balance
VD_DLY_CR_BAL_M	Value Dated Daily Credit Balance
VD_DLY_DR_BAL_M	Value Dated Daily Debit Balance
DAYS	Days Period
YEAR	Days in the Year
COMPOUND_AMT	Compounding Amount
TAX_APPLICABLE	Returns if tax applicable for Account
VOLUNTARY_TAX_RATE	Returns voluntary tax rate

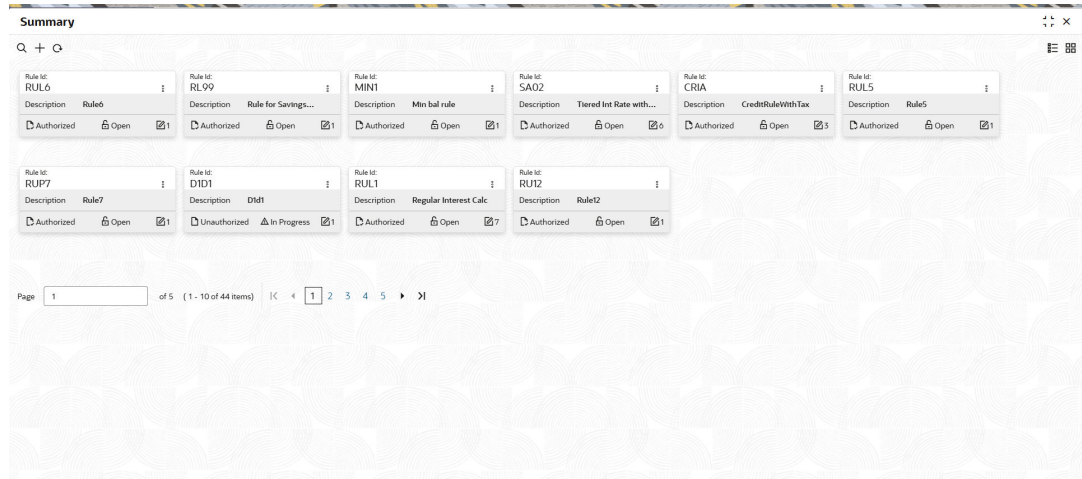

2.2 View Rule Maintenance

This topic describes the systematic instructions to view the list of configured interest rule details.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **Rule Maintenance**. Under **Rule Maintenance**, click **Summary**.

The **Summary** screen displays.

Figure 2-6 Rule Maintenance - Summary

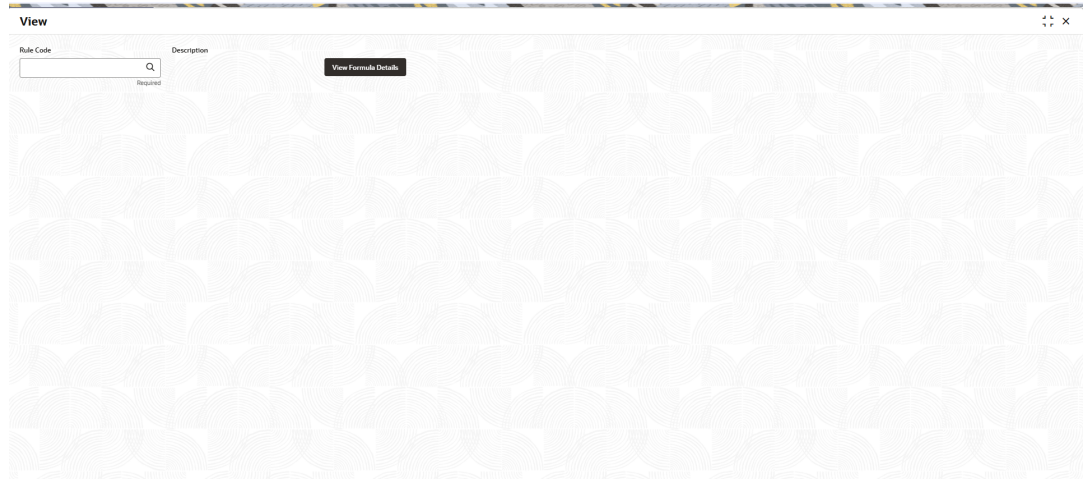

For more information on fields, refer to the field description table.

Table 2-6 View Interest Rule - Field Description

Field	Description
Rule ID	Displays the rule ID.
Rule Description	Displays the rule description.
Authorization Status	Displays the authorization status of the record. The available options are: <ul style="list-style-type: none"> • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The available options are: <ul style="list-style-type: none"> • Open • Closed
Modification Number	Displays the number of modifications performed on the record.

5. Click **View**.
The **View** screen displays.

Figure 2-7 View - Rule Maintenance

For more information on fields, refer to the field description table.

Field	Description
Rule code	Click Search icon and select the rule created in the Interest Rule screen.

- Click **View Formula Details**.

The **View Rule Maintenance - View Formula Details** screen displays.

Figure 2-8 View - Rule Maintenance

For more information on fields, refer to the field description table.

Table 2-8 View Interest Rule - View Formula Details - Field Description

Field	Description
Rule code	Click Search icon and select the rule created in the Interest Rule screen.
Description	Displays the description of the rule.
Formula Type	Displays the formula type.
Book Flag	Displays the Booking Flag of a formula denotes whether the result of a formula should be: <ul style="list-style-type: none"> • Booked • Non-booked • Tax
Days In A Month	Displays the method in which the N of the formula for interest calculation, PNR/100, has to be picked up is specified for a formula.
Days In A Year	Displays the interest rate is always taken to be quoted per annum. You must therefore indicate the denominator value (the total number of days in the year) based on which interest has to be applied.
Periodicity	Displays the Periodicity of a rule application denotes whether the formula you are defining has to be: <ul style="list-style-type: none"> • applied for each change during the interest period (or daily). • only for the last day of interest period (periodic).
Tax Pay Currency Flag	Displays the currency in which tax is paid. It can be Account currency or Local currency.
Currency Interest Method	Currency method is defaulted from currency definition screen.
Accruals	Displays whether the interest accruals are enabled or not.
Rounding	Displays whether the interest rounding are enabled or not.
Compounding	Displays whether compounding are enabled.
Expression	Displays the expression.
Condition	Displays the condition.
Result	Displays the result.

3

Interest Product

This topic provides the information to configure and maintain interest product.

Interest product preferences such as liquidation, accrual, back value dated calculation preferences, etc., that will reflect on an account attached to the product can be maintained here.

This topic contains the following subtopics:

- [Create Interest Product](#)
This topic describes the systematic instructions to configure the interest in **Interest Product** maintenance.
- [View Interest Product](#)
This topic describes the systematic instructions to view the list of configured Interest Product details.

3.1 Create Interest Product

This topic describes the systematic instructions to configure the interest in **Interest Product** maintenance.

Note

The fields marked as **Required** are mandatory.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. Under **Interest and Charges**, click **Interest Product**. Under **Interest Product**, click **Create**.

The **Create** screen displays.

Figure 3-1 Create Interest Product

- Specify the fields on **Create** screen.
For more information on fields, refer to the field description table.

Table 3-1 Create Interest Product - Field Description

Field	Description
Product Code	Displays the code of the product to define the preferences.
Product Description	Specify the appropriate description for the defined Product Code.
Rule Code	Click Search icon and select the rule created in the IC Rule Maintenance screen.
Main Interest UDE	Click Search icon to choose the UDE mapped to the IC Rule Code that is to be used as the main interest rate UDE.
Product Start - End Date	Specify the date range when the product can be used. The start and end dates should be kept handy while defining a product for a scheme which is open for a specific period. The user cannot use a product beyond the specified expiry date. If the user have attached the expired product at the account level, on save, the system displays the override message as, The product has expired .
Accrual	While building a formula (for the rule to link the product), the interest amount will be accrued for all the accounts linked to the product if the interest is indicated as the result of the formula. While defining the preferences for this product, the user can choose to pass the accrual entries in the following manner: <ul style="list-style-type: none"> Pass an accrual entry for each account Consolidate the interest to be accrued (for individual accounts) and track it against the product. If the user choose the latter option, the cumulative value of all the accruals (for accounts linked to the product) will be passed as a single accounting entry.

Table 3-1 (Cont.) Create Interest Product - Field Description

Field	Description
Product Level	Select this toggle to accrue interest at the 'Product Level', the accrued interest for all the accounts linked to the product will be consolidated and a single entry posted for the product. If the user choose to accrue the interest for each account linked to the product, an accrual entry will be posted for each account individually. The account for which the accrual entry is passed will be shown when the user retrieve information about an entry. The details of accruals for each account will be available in the Accrual Control Journal, a report generated whenever accruals are performed as part of end-of-cycle processing.
Accrual day	Specify the day of the month on which the accruals have to be carried out for a non-daily accrual frequency. For example, If the Accrual Day is specified as 25, the automatic accrual will be on the 25th day of the months, as per the frequency.
Frequency	Select the frequency with which the interest accrued for the defined account classes. The available options are: <ul style="list-style-type: none"> • Daily • Monthly • Quarterly • Semi Annual • Annual • On liquidation (accrues only when the interest liquidates) <p>Let us recall the operations relating to accruals that the user have performed so far. When the user build an interest rule, the user defines whether the result of a formula is to be accrued. While defining the product (to which the rule linked), the user would:</p> <ul style="list-style-type: none"> • Identify the GL/SL to which the interest accrued is posted (Product Accounting Role Definition screen), and • Specify the event 'accrual' occurs to post the entry to the identified GL/SL (Events Definition screen).
Cycle	Specify the accrual cycle in the months. If the frequency is selected as <ul style="list-style-type: none"> • Quarterly • Semi Annual • Annual <p>For example, a quarterly cycle may be March, June, September and December, indicating that the accrual should take place in these months. For a half-yearly cycle, the user would specify June and December.</p>
Receivable GL	Before applying debit interest on personal current accounts you can choose to notify your customers through Debit Interest notification messages. In the interim period interest is debited from a Receivable before actually debiting the customer account. While specifying preferences for Interest products, you can identify the Receivable GL which is to be used for storing debit interests on a temporary basis.

Table 3-1 (Cont.) Create Interest Product - Field Description

Field	Description
Start from Account Opening	Select the toggle to liquidate the interest periodically for accounts according to a frequency determined in the Account Opening Date. Instead of giving a First Liquidation Date and bringing all the accounts linked to the product to the same liquidation cycle. The periodic liquidations can also be fixed to begin on a particular date (First Liquidation Date) and happen at a definite frequency.
Liquidation at Month End	Select the toggle to liquidate the interest at the last working day of the month. For a liquidation frequency in months or multiples of a month (for example: quarterly, half yearly, every two months, etc.), the user can select that liquidation has to be carried out as of the last working day of the month. In this case, the user should specify the Liquidation Start Date as the last date of the month from which you would begin liquidation.
Liquidation before Month End	Select the toggle to liquidate the interest before the month end for all the accounts linked to the product. If the user set the interest liquidation frequency as Monthly, Yearly and Quarterly cycle in the IC Product Preferences, the user can choose to liquidate interest a specified number of days before the month end for all accounts linked to the product. The user have to specify the number of days before which interest should be liquidated. The system arrives at the interest liquidation date based on the specified number of days.
Defer Liquidation	Select the toggle to defer the calculation and liquidation of periodic interest on an account for a few days beyond the end date of each interest period. This deferment will allow the inclusion of interest adjustments due to back-valued entries posted into the account after the period end date. In order to avail of this facility, the user need to enable the Defer Liquidation toggle and specify the defer liquidation days.
Days, Months and Year	Specify the liquidation frequency for the Interest product. The user can specify the liquidation frequency in <ul style="list-style-type: none"> • Days - Example: If the user wants to liquidate interest every 15 days, enter '15'. • Months - Example: If the user wants to liquidate interest every quarter, enter '03'. • Years - Example: If the user wants to liquidate interest every year, enter '01'
Defer Liquidation Days	Specify the number of calendar days by which the interest liquidation has to be deferred.

Table 3-1 (Cont.) Create Interest Product - Field Description

Field	Description
Back Value Recalculation	<p>Select the interest recalculation required for all the accounts associated with this product. The available options are:</p> <ul style="list-style-type: none"> • Not Required • Non-capitalized • Capitalized <p>If a back dated accounting entry is passed within the current liquidation cycle, the next accrual will consider the revised principal effective the back date. If a back dated entry is passed for a date in the previous liquidation cycle, then the difference in interest adjusted during the next liquidation as an interest adjustment entry. If this box is not selected, then neither interest adjustment nor accrual adjustment will be triggered for any back dated transaction. Thus, the revised principal will be considered effective the booking date of the transaction.</p>
First Liquidation On	<p>Select the First Liquidation Date once the liquidation frequency has been defined. The frequency and the date will be used to arrive at the first and subsequent dates of liquidation for the accounts linked to the product. For example, the quarterly liquidation cycle may be March, June, September and December, and the liquidation is on the month-end. For such a cycle, the user should indicate 31 March as the date of first liquidation during the year. The subsequent dates will be automatically fixed by the system based on the frequency and the first liquidation date.</p>
Defer Before Month End Days	<p>When liquidate interest before the month end is chosen for all accounts linked to the product, you have to specify the number of days before which interest should be liquidated. The system arrives at the interest liquidation date based on the number of days that you specify.</p>
First Accrual Date	<p>The date from which accruals should start for the accounts linked to the product can be maintained here. By default it will be the product start date.</p>
Account Level Liquidation Preferences	<p>Switch this toggle ON, to set the liquidation preference at an account level, where the interest liquidation frequency is adjusted at an account level rather than the usual product level.</p>
Compounding Applicable	<p>This feature deals with compounding interest method for interest calculation.</p> <p>If the Compounding Applicable is set as Y, then Compounding will be enabled for account. If it is set as N then Compounding will not be enabled for account. Compounding interest will be applicable for Balance based SDEs alone.</p> <p>Compounding interest will not be applicable if formula contains multiple calculations.</p>
Compounding Frequency	<p>Compounding frequency can be none, Daily, Monthly, Quarterly and Half Yearly. None is given when Compounding applicable flag is N.</p>

Record Status	Displays the status of the record. The available options are: <ul style="list-style-type: none"> • Open • Closed
Modification Number	Displays the number of modification performed on the record.

4

Charge Product Preferences

This topic provides the information to configure and maintain the charge product preferences.

The charge product preferences such as the charge basis, periodicity for charge application, application currency, etc. that will reflect on an account attached to the product can be maintained here.

To calculate the charges you would like to levy on an account, you have to specify the basis on which you would like to apply charges. For example, you may want to apply charges based on the debit turnover in an account. When you apply the charge product on an account or an account class, charges for the account will be calculated on this basis. The accounting entries would automatically be posted to the GLs that you specify for the charge product.

You can calculate charges for an account on the following basis:

Charge Basis	Description	Application
Item Count	Number of transactions	If the number of transactions during a liquidation cycle exceeds a certain number, you can levy a charge.
Adhoc Statement	Number of adhoc account statements	An account statements are normally generated at a specific frequency. If you generate a statement out of this frequency, you can levy a charge.
Account Statement	Number of account statements	You can fix the number of regular periodic (free) account statements for a liquidation cycle. For every extra account statement that you issue, you can levy a charge.
Turnover	Total turnover	You can charge on the basis of the turnover in an account. You can opt to levy charges on turnovers exceeding a certain amount. An SDE based on turnovers will be applied on an account only if the transaction code of the transaction is defined with 'Include for Account Turnover.'
Cheque Issued	Number of cheque's issued	You can fix the number of free cheques that can be issued for a liquidation cycle. For every extra cheque leaf issued, you can levy a charge.
Stop Payment	Number of stop payments	You can levy a charge for every stop payment instruction.
Account Opening	Account Opening	You can levy a charge on the opening of an account.

4.1 Create Charge Product Preferences

This topic describes the systematic instructions to create charge product preferences.

Note

The fields marked as **Required** are mandatory.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **Charge Product Preferences**. Under **Charge Product Preferences**, click **Create**.

The **Create** screen displays.

Figure 4-1 Create Charge Product Preferences

The screenshot shows the 'Create' screen for Charge Product Preferences. The form contains the following fields:

- Product Code**: Required text input field.
- Description**: Required text input field.
- Charge Basis**: Required dropdown menu.
- Start - End Date**: Required date range selector, currently showing November 30, 2023 to October 31, 2024.
- Currency**: Dropdown menu.
- Slab/Tier**: Dropdown menu.
- Periodicity**: Dropdown menu.
- Liquidation Month**: Dropdown menu.

At the bottom right, there are 'Cancel' and 'Save' buttons.

5. Specify the fields on the screen.

For more information on fields, refer to the field description table.

Table 4-1 Create Charge Product Preferences - Field Description

Field	Description
Product Code	Specify a unique code to identify the charge product.
Product Description	Specify the appropriate description for the Product Code. This description is associated with the product for information retrieval purposes.

Table 4-1 (Cont.) Create Charge Product Preferences - Field Description

Field	Description
Charge Basis	Choose the basis for charge calculation from the drop-down. The options are as follow: <ul style="list-style-type: none"> • Item Count - Count based charges • Adhoc Statement - Non periodic statement charges • Statement - Charges on regular/ periodic statements • Turnover - Turnover based charges • Cheques Issued - Number of cheque leaves issued • Stop Payment - Number of stop payments executed • Account Opening - On opening of account.
Start - End Date	Specify the date range when the product will be applicable. The charges will be applicable only during this period.
Currency	Specify if the charges should be applied in local currency or the account currency.
Slab/Tier	Specify whether the charge has to be applied on a slab basis or tier basis.
Periodicity	Choose the intervals between each charge liquidation from drop-down. The options are as follow: <ul style="list-style-type: none"> • Adhoc • Daily • Monthly • Quarterly • Semi Annual • Annual
Liquidation Month	Choose the month in which liquidation is to take place when the periodicity is maintained as Quarterly, Semi Annual or Annual. For Example: If periodicity is Quarterly and month is chosen as March, then the liquidation of charge for first quarter will be in March and the second quarter will be set as June automatically. If Preiodicity is Adhoc, Daily, or Monthly, the liquidation month should be chosen as None.

6. Click **Save** to save the details.

4.2

The image shows the View Charge Product Preferences screen. A Minimize, Close, Search, Refresh, Add icons and View toggle switches are available at the top of the screen. Pagination links are provided at the bottom of the screen. The Tile View is displayed showing several widgets with Charge Product Preferences details. For more information on fields, refer to the field description table.

5

Charge Rates

This topic provides the information to configure and maintain the charge rates.

In the Charge Rate screen, you have to specify the following details:

- The account class-currency combination on which you would apply the Charge Product.
- The minimum and the maximum charge for the product.
- The numeric values of the slab/tier and the charge amount or the charge rate for each slab/tier.
- The number of free transactions upto which no charges will be levied.

When you apply a product on an account class-currency combination, you define a general condition. The attributes that you have defined for the product will apply on all accounts belonging to this account class-currency combination.

This topic contains the following sub-topics:

- [Create Charge Rates](#)
This topic describes the systematic instructions to create charge Rates.

Modification Number	Displays the number of modification performed on the record.

6

Accounting Entries

This topic provides the information to configure and maintain accounting entries.

The types of GLs (expense, income, etc.), and the GLs to which accounting entries are posted are defined for an event (when interest or charge is liquidated or accrued) by specifying the accounting role and account head.

Note

Accounting head is to be kept blank for Book Leg, it's taken from interest book account.

This topic contains the following subtopics:

- [Create Accounting Entries](#)
This topic describes the systematic instructions to configure the accounting entries details.
- [View Accounting Entries](#)
This topic describes the systematic instructions to view the list of configured accounting entries.

6.1 Create Accounting Entries

This topic describes the systematic instructions to configure the accounting entries details.

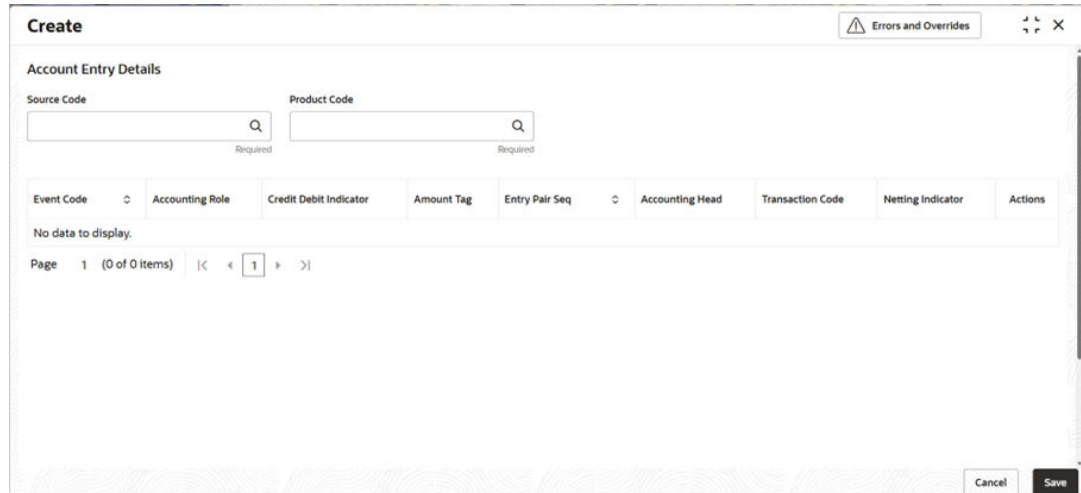

Note

The fields marked as **Required** are mandatory.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **Accounting Entries**. Under **Accounting Entries**, click **Create**.

The **Create** screen displays.

Figure 6-1 Create Accounting Entries

5. Specify the fields on the screen.

For more information on fields, refer to the field description table.

Table 6-1 Create Accounting Entries - Field Description

Field	Description
Source Code	Click Search icon to view and select the source code of the source system. The Source System maintained in the ECA System screen is available in the LOV list.
Product Code	Click Search icon to view and select the code of the product for which user are maintaining the accounting entries. The Interest Product maintained in the Interest Product screen is available in the LOV list.
Event Code	The Event Code applicable to the Interest product will be listed. The following is a list of events that can take place during Interest calculation. <ul style="list-style-type: none"> • IACR - Interest Accrual • ILIQ - Interest Liquidation The following is the event that can take place during Charge calculation. <ul style="list-style-type: none"> • CLIQ - Charge Liquidation
Accounting Role	The Accounting Role applicable to the Interest product based on the mapped rule will be listed. Accounting Roles are tags that identify the type of accounting entry that is posted to an accounting head. The following list contains the accounting roles which are applicable to IC. <ul style="list-style-type: none"> • <FORMULA NAME>-BOOK-<FORMULA No> • <FORMULA NAME>-ACCR-<FORMULA No> • <FORMULA NAME>-PNL-<FORMULA No> • <FORMULA NAME>-TPBL-<FORMULA No> • CHG_INCOME • CHG_BOOK

2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. Under **Interest and Charges**, click **UDE Value Input**. Under **UDE Value Input**, click **Create**.

The **Create** screen displays.

Figure 10-1 Create UDE Value Input

4. Specify the fields on **Create UDE Value Input** screen.

For more information on fields, refer to the field description table.

Table 10-1 Create UDE Value Input - Field Description

Field	Description
Product code	<p>Click Search icon and select the product code.</p> <p>Every product is linked to a rule. When the rule is built, the user identifies the UDEs needed to calculate interest or charges. The user must not give the UDE value. Because the rule can be linked to many products and apply a product to many account classes (for which interest or charge is calculated using the same method but which have different UDE values).</p> <p>For each condition defined for a product, specify the values of the UDEs (which is identified for the rule that is linked to the product) in the User Data Elements screen. The UDE values maintained for a condition, the same will be picked up when the interest is calculated for the account class.</p>
Branch Code	<p>Click Search icon and select the branch code for which the UDE Values being maintained are applicable as a general condition.</p> <p>Values being maintained are applicable as a general condition. Branch Codes are displayed including the 'ALL' option. If the user try to maintain a UDE value for a specific branch, the system will check if the UDE value has been first maintained with Branch Code 'ALL'. If it has not been maintained, an error message will be displayed forcing the user to maintain the UDE value for the Branch Code 'ALL'.</p>
Effective Date	<p>Select the date from when a record takes effect.</p> <p>The user can maintain the different values for a UDE and the different effective dates for a condition. When the interest is calculated on a particular day for the account class, the value of the UDE corresponding to the date will be picked up.</p> <p>The UDE values of a condition can be different for different dates. Typically, the user would want to open records with different Effective Dates, if the values of UDEs vary within the same liquidation period.</p>
Business Product	Click Search icon and select the business product.
Currency Code	Click Search icon and select the currency code.
Rate Group	Click Search icon and select the Rate group created in UDE Group Code screen.
Customer Group	Click Search icon and select the Customer group created in UDE Group Code screen.
User Element	Click Search icon and select the User element. Displays UDE maintained in Interest Rule screen.
User Element Value	Specify the user element value.
Rate Code	Specify the rate code.

Note

Rate Group and Customer Group will be defaulted to ALL when no value is selected from LOV.

User Defined Elements:

For each account class, the user must specify the values of all the UDEs to identify while building the rule. The specified UDE value will be picked up while calculating interest for the account class. All the UDEs that the user has identified for the rule (to which the product is linked) will be displayed here. The various types of UDE values are as follows:

- Credit Rate
- Debit Rate
- Amount
- Number

The interest on a debit balance is an example of a debit rate. The interest on a credit balance is an example of a credit rate.

A User Data Element will be an amount under the following circumstances:

- In the case of a tier structure, the upper and lower limit of a tier or a tier amount;
- In the case of a charge, when it is indicated as a flat amount
- Any amount that can be used in the definition of formula

While building a rule, the user will indicate the UDE to be a number if the interest is defined based on the number of transactions or the number of account statements. A UDE under this category can also be used to store a numerical value that may be used in a formula.

For each UDEs, the user must specify the values. If the UDE type for the rule is a **Rate** element, the user can either specify a Rate Code or enter a value for the Rate element. If the user specifies a Rate Code for the UDE, the value maintained for the rate code is picked up while calculating interest. However, if the user selects to enter a spread for the Rate Code, the appropriate value is computed. (A Spread is a positive or negative value that the user adds or deducts to the value specified for the Rate Code). If you do not specify a spread, the rate maintained for the Rate Code will be picked up.

If the type of UDE is an amount, the value that you enter will be in the currency that you specified in the UDE amounts currency field (in the Interest Preferences screen). If you specify the UDE amounts currency as the local currency and the account class in a foreign currency, all UDE values will be converted to the local currency. Currency conversions will be on the basis of the exchange rates maintained for the day.

5. Click **Save** to save the details.

10.2

The image shows the View UDE Value Input screen. A Minimize, Close, Search, Refresh, Add icons and View toggle switches are available at the top of the screen. Pagination links are provided at the bottom of the screen. The Tile View is displayed showing several widgets with UDE Value Input details. For more information on fields, refer to the field description table.

11

UDE Limits

This topic provides the information to configure and maintain the UDE limits.

The minimum and maximum levels as well as variances allowed for all User Defined Elements (UDE) attached to an interest rule are maintained here.

This topic contains the following subtopics:

- [Create UDE Limits](#)
This topic describes the systematic instructions to configure the UDE limits.
- [page 2](#)

11.1 Create UDE Limits

This topic describes the systematic instructions to configure the UDE limits.

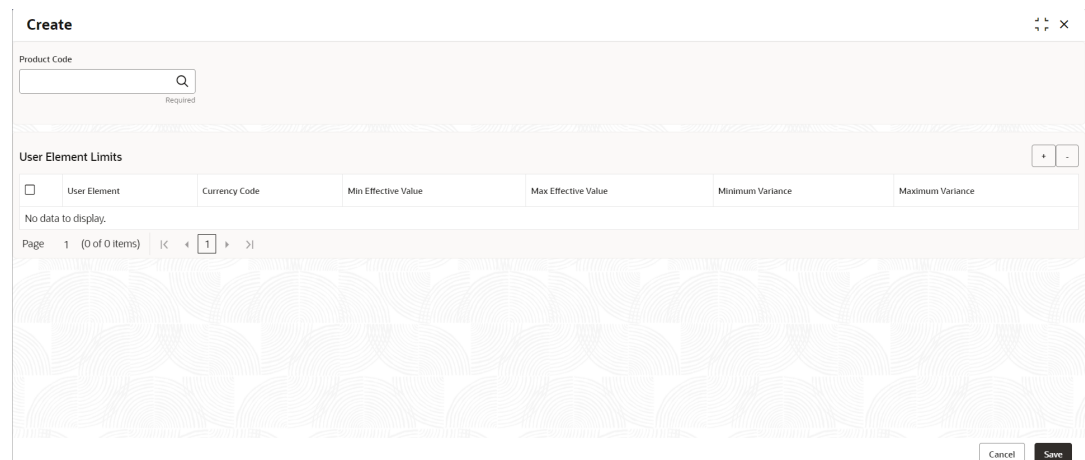

Note

The fields marked as **Required** are mandatory.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **UDE Limits**. Under **UDE Limits**, click **Create**.

The **Create** screen displays.

Figure 11-1 Create UDE Limits

<input type="checkbox"/>	User Element	Currency Code	Min Effective Value	Max Effective Value	Minimum Variance	Maximum Variance
No data to display.						

- Specify the fields on **Create UDE Limits** screen.

For more information on fields, refer to the field description table.

Table 11-1 Create UDE Limits - Field Description

Field	Description
Product Code	Click Search icon to view and select the product code. Every product is linked to a rule. When the rule is built, the user identifies the UDEs needed to calculate interest or charges. The user does not have to give the UDE value. Because the rule can be linked to many products; and a product to many account classes (for which interest or charge is calculated using the same method but having different UDE values).
User Element	Click Search icon to view and select the user element for which the user wants to maintain upper and lower limits.
Currency Code	Click Search icon to view and select the currency code. If the user selects ALL as the currency code, then the limits are applicable for all currencies.
Min Effective Value	Specify the minimum value for the user element and currency combination.
Max Effective Value	Specify the maximum value for the user element and currency combination.
Minimum Variance	Specify the minimum value of interest variance that can be maintained at account level for the given UDE and currency combination.
Maximum Variance	Specify the maximum value of interest variance that can be maintained at account level for the given UDE and currency combination. The value of Maximum Variance cannot be less than Minimum Variance . While creating an account, if the variance is specified at special condition level in the Variance field against a UDE, then that variance value is compared with the Minimum and Maximum variance maintained at the product level for the account currency. If the variance is below minimum variance and above maximum variance, the system displays an error message. The validation of minimum and maximum variance are performed during creation, modification and reopening of the account.

- Click **Save** to save the details.

11.2

The image shows the View UDE Limits screen. A Minimize, Close, Search, Refresh, Add icons and View toggle switches are available at the top of the screen. Pagination links are provided at the bottom of the screen. The Tile View is displayed showing several widgets with UDE Limit details. For more information on fields, refer to the field description table.

12

Interest History

This topic provides the information about the interest history for an account of the branch.

Interest History is a query screen that shows all the interest details (accruals and liquidation) of a particular account of the branch for the period mentioned.

This topic contains the following sub-topics:

- [Interest History](#)
This topic describes the systematic instructions to display the interest history details.

12.1 Interest History

This topic describes the systematic instructions to display the interest history details.

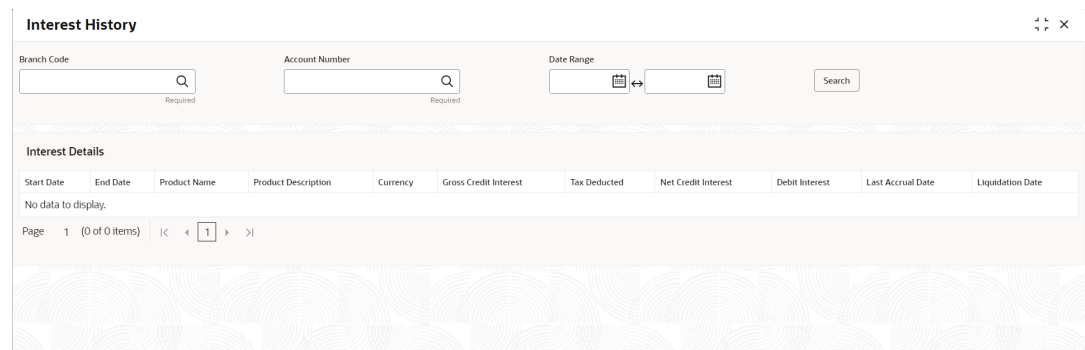

Note

The fields marked as **Required** are mandatory.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **Interest History**. Under **Interest History**, click **Interest History**.

The **Interest History** screen displays.

Figure 12-1 Interest History

5. Specify the fields on **Interest History - Query** screen.

For more information on fields, refer to the field description table.

Table 12-1 Interest History - Query - Field Description

Field	Description
Branch Code	Specify the branch code.
Account Number	Specify the account number.
Date Range	Specify the date range for which interest history details are required.

- Click the **Search** button.

The **Interest Details** screen displays the interest history details.
For more information on fields, refer to the field description table.

Table 12-2 Interest Details - Field Description

Field	Description
Start Date	Displays the start date.
End Date	Displays the end date.
Product Name	Displays the product name.
Product Description	Displays the product description.
Currency	Displays the currency.
Gross Credit Interest	Displays the gross credit interest.
Tax Deducted	Displays the tax deducted.
Net Credit Interest	Displays the net credit interest.
Debit Interest	Displays the debit interest.
Last Accrual Date	Displays the last accrual date.
Liquidation Date	Displays the liquidation date.

- Click **Clear** button to clear the data for a fresh search if required.

13

Accounting Handoff

This topic provides the information to search, view, re-process and maintain the accounting handoff.

Accounting Handoff Browser shows the status of the accounting handoff with an option to re-process failed entries.

- Records are viewed based on Branch Code, Account Number, Start date, End date, Status (PROCESSED, UNPROCESSED, FAILURE) and Entry Group Reference Number .
- Screen shows the failed records by default based on the above parameters sent.
- There is an option to view Unprocessed and Processed records also in the screen.
- Response and Request of the queried record can be viewed.
- The new screen will have an option to RETRY handoff if the status is failed or unprocessed.
- [Accounting Handoff Browser](#)
This topic describes the systematic instructions to view the status of the accounting Handoff entries.

13.1 Accounting Handoff Browser

This topic describes the systematic instructions to view the status of the accounting Handoff entries.

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. On **Home** screen, click **Retail Account Configurations**. Under **Retail Account Configurations**, click **Interest and Charges**.
3. On **Home** screen, click **Retail Deposits**. Under **Retail Deposits**, click **Configurations**. Under **Configurations**, click **Interest and Charges**.
4. Under **Interest and Charges**, click **Accounting Handoff** , and then click **Accounting Handoff Browser**.

The **Accounting Handoff Browser** screen displays.

Figure 13-1 Accounting Handoff Browser

- Specify the fields on **Accounting Handoff Browser** screen.
For more information on fields, refer to the field description table.

Table 13-1 Accounting Handoff Browser - Field Description

Field	Description
Branch Code	Branch code is defaulted to home branch.
Branch Name	Displays the name of the branch based on the branch code.
Account Number	Click Search icon to search and select the account number. Selecting account number will show entries corresponding to the account.
Account Name	Displays the account holder name based on the account number.
Entry Group Reference Number	Click Search icon to search and select the reference number of each entry.
Start and End Date	Select the start and end date of accounting entry.
Event	Select the event for the accounting Handoff. The available options are: <ul style="list-style-type: none"> • IACR • ILIQ • CLIQ By default the Event is set to ILIQ .
Status	Select the status of the record. The available options are: <ul style="list-style-type: none"> • Failure • Processed • Unprocessed By default the Status is set to Failure .

- Click **Refresh**.
Refresh is used post retry handoff, and shows records still available in failure or unprocessed status after handoff retry.

14

Generic Maintenance

This topic provides the information to view and configure parameters related to IC general processing.

This Generic Maintenance displays the parameters related to IC general processing, EOD batch and intraday batch processing and can be used as a one-time set up in implementation.

IC Generic Maintenances screen has four sub-screens as below:

1. Generic Parameters - for parameters related to source system, GL source, IC data consistency check etc.
2. Interest Batch Parameters - for parameters of IC specific key values of interest batch service.
3. EOD Processing Parameters - for processing parameters of EOD related IC services.
4. Intraday Processing Parameters - for IC intraday related processing parameters.

This topic contains the following subtopic:

- [View Generic Maintenance](#)
This topic describes the systematic instructions to view the list of configured generic maintenances.

14.1 View Generic Maintenance

This topic describes the systematic instructions to view the list of configured generic maintenances.

(Optional) <Describe the context.>

1. On **Home** screen, click **Corporate Account Configurations**. Under **Corporate Account Configurations**, click **Interest and Charges**.
2. Under **Interest and Charges**, click **Generic Maintenance**. Under **Generic Maintenance**, click **View**.

The **View** screen displays.

Figure 14-1 View Generic Maintenance

For more information on fields, refer to the field description table.

Table 14-1 View Generic Maintenance - Field Description

Field	Description
Source System	Displays the system to which Generic Maintenance belongs. For Example: FCUBS etc.
Authorization Status	Displays the authorization status of the Generic Maintenance.. The available options are: <ul style="list-style-type: none"> • Authorized • Rejected • Unauthorized
Record Status	Displays the record status of the Generic Maintenance. . The available options are: <ul style="list-style-type: none"> • Open • Closed • In Progress
Modification Number	Displays the number of modification performed on the record.

3. To **Unlock** and update **Generic Maintenance** follow the steps below:

a. Click

and select **Unlock**.

The **Generic Parameter** screen in the **Generic Maintenance** page displays.

Figure 14-2 Generic Parameter

For more information on fields, refer to the field description table.

Table 14-2 Generic Parameters - Field Description

Field Name	Description
Source System	Displays the Source system of the product processor.
General Ledger Source	Displays the General Ledger source of the product processor.
External EOD Response Required	Enable this field to parameterize to call any other endpoint, if EOD status is not completed/aborted.
External EOD Response URL	The URL to be used to call to check the EOD response.
Tax Applicable Default Value	The value in this field determines the default Federal Tax applicability value if the TAX_APPLICABLE value is not passed during account creation/modification. During account creation or on account modification if TAX_APPLICABLE is not passed, the value from ictb_param for the param name TAX_APPLICABLE_DEFAULT_VALUE is considered. The toggle can be used to enable or disable this default value. If its enabled, Federal Tax will be applicable.
Accrual Consolidated GL Handoff	Enable this for accrual entries to be consolidated for GL handoff.
VAM Accounting Required	Enable this for VAM accounting to be done after EOD is completed.
IC Data Consistency Check	Enable this to perform data consistency check done for all the IC maintenances and verify the incorrect maintenances. The inconsistent maintenances can be identified, and the processing of related accounts can be halted. The details of such maintenances will be available in the log CONSDATACHK
Inconsistent Accounts Handling- Mark as Has Problems	When 'IC Data Consistency Check' is enabled, if this field is enabled, it will mark all the associated accounts as problematic accounts (has_problems = Y). During subsequent EOD, processing of these accounts will be retried and will be processed if the maintenances are corrected.

Table 14-2 (Cont.) Generic Parameters - Field Description

Field Name	Description
Inconsistent Accounts Handling- Mark as Stop IC	When 'IC Data Consistency Check' is enabled, if this field is enabled, it will stop the IC processing of all the associated accounts (stop_ic = Y) i.e. IC processing will be disabled henceforth

- b. Click **Next** to move to the next data entry screen.

The **Interest Batch Parameters** screen displays.

Displays all the Interest batch processing parameters related to Intraday batch and EOD batch.

Figure 14-3 Interest Batch Parameters

For more information on fields, refer to the field description table.

Table 14-3 Interest Batch Parameters

Field Name	Description
Intraday Batch Scheduler Required	Enable the toggle to turn the scheduler on for intraday batch i.e to automatically schedule the running of the intraday IC batch.
Intraday Batch Delay	Displays the Intraday Batch Delay. This field denotes the delay between each invoking of the intraday IC batch by the scheduler.
EOD Batch Scheduler Required	Enable the toggle to turn the scheduler on for EOD batch i.e to automatically schedule the running of the EOD IC batch
EOD Batch Delay	Displays the EOD Batch Delay. This field denotes the delay between each invoking of the EOD IC batch by the scheduler
Job Repository Map Clear Required	Enabling this will enable the scheduler that will clear the heap getting increased during EOD
Job Repository Map Clear Delay	This field denotes the time by which the scheduler delays the clearing of heap
EOD Loop Check Required	Enable this for EOD loop check

Table 14-3 (Cont.) Interest Batch Parameters

Field Name	Description
EOD Max Reprocess Count	Displays the EOD Max Reprocess Count. Indicates how many times reallocation is done when EOD is stuck and eodLoopCode is activated. After it breaches this count, STOP_PROCESS is marked and accounts still processing are marked hasProb Y
EOD Clear Variance	Displays the EOD Clear Variance. Indicates the Buffer time for the service to be processed in addition to the average timetaken for a service
EOD Max Check Count	Displays the EOD Max Check Count. Indicates the maximum number of times upto which it can be processed by comparing the current pending count and past pending, when the variance is breached

- c. Click **Next** to move to the next data entry screen.

The **EOD Processing Parameters** screen displays. Displays all the fetch count, maximum process and commit frequency maintained for each of the services related to End Of Day processing.

Figure 14-4 EOD Processing Parameters

For more information on fields, refer to the field description table.

Table 14-4 EOD Processing Parameters - Field Description

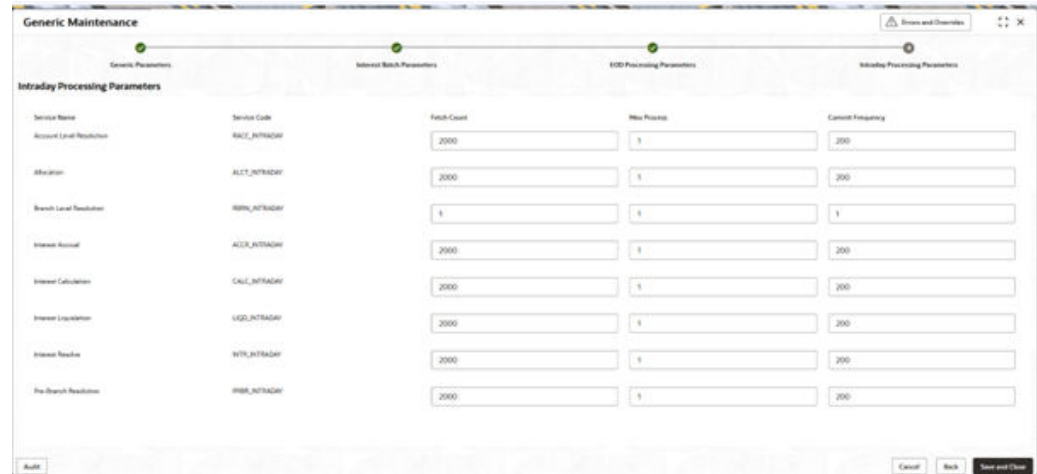

Field Name	Description
Service Name	Displays the Service Name.
Service Code	Displays the Service Code.
Fetch Count	Displays the Fetch Count.
Maximum Process	Displays the Maximum Process.
Commit Frequency	Displays the Commit Frequency.

- d. Click **Next** to move to the next data entry screen.

The **Intraday Processing Parameters** screen displays.

Displays all the fetch count, maximum process and commit frequency maintained for each of the services related to Intraday processing

Figure 14-5 Intraday Processing Parameters

For more information on fields, refer to the field description table.

Table 14-5 Intraday Processing Parameters

Field Name	Description
Service Name	Displays the Service Name.
Service Code	Displays the Service Code.
Fetch Count	Displays the Fetch Count.
Maximum Process	Displays the Maximum Process.
Commit Frequency	Displays the Commit Frequency.

4. **View** the details of Generic Maintenance.
5. Click

and select **View**.

The **Generic Maintenance - View** screen displays.

The screenshot displays the 'Generic Maintenance' configuration page. It features four main panels, each with a 'View Details' button and a small icon in the top right corner:

- Generic Parameters:** Source System (OBVAM), General Ledger Source (OBVAM), External EOD Response Required (false).
- Interest Batch Parameters:** Intraday Batch Scheduler Required (true), Intraday Batch Delay (10), EOD Batch Scheduler Required (true).
- EOD Processing Parameters:** (Empty panel with a 'View Details' button).
- Intraday Processing Parameters:** (Empty panel with a 'View Details' button').

An 'Audit' button is located at the bottom left of the interface. In the top right corner, there is an 'Errors and Overrides' button with a warning icon and a close button (X).

For more information on fields, refer to the field description table.

Table 14-6 Generic Maintenance - View

Field Name	Description
Generic Parameters	Displays the Generic Parameters.
Interest Batch Parameters	Displays the Interest Batch Parameters
EOD Processing Parameters	Displays the EOD Processing Parameters
Intraday Processing Parameter	Displays the Intraday Processing Parameter.

A

Functional Activity Codes

This topic provides the functional activity codes used in the Oracle Banking Accounts Cloud Service.

Table A-1 Functional Activity Codes

Screen Name/API Name	Functional Activity Code	Action	Description
Branch Parameters	IC_FA_BRANC_PARAM_AMEND_DDA	UNLOCK	Modification of the Branch Parameters
Branch Parameters	IC_FA_BRANC_PARAM_AUTHORIZE_DDA	AUTHORIZE	Authorizing the Branch Parameters
Branch Parameters	IC_FA_BRANC_PARAM_CLOSE_DDA	CLOSE	Closing the Branch Parameters
Branch Parameters	IC_FA_BRANC_PARAM_DELETE_DDA	DELETE	Deleting the Branch Parameter
Branch Parameters	IC_FA_BRANC_PARAM_NEW_DDA	NEW	Creating the new Branch Parameters
Branch Parameters	IC_FA_BRANC_PARAM_REOPEN_DDA	REOPEN	Reopening the closed Branch Parameters
Branch Parameters	IC_FA_BRANC_PARAM_VIEW_DDA	VIEW	Viewing the Branch Parameters
Interest Rule	IC_FA_RULE_AMEND_DDA	UNLOCK	Modification of the Maintained Rule for Product
Interest Rule	IC_FA_RULE_AUTHORIZE_DDA	AUTHORIZE	Authorizing the Maintained Rule for Product
Interest Rule	IC_FA_RULE_CLOSE_DDA	CLOSE	Closing the Maintained Rule for Product
Interest Rule	IC_FA_RULE_DELETE_DDA	DELETE	Deleting the Maintained Rule for Product
Interest Rule	IC_FA_RULE_NEW_DDA	NEW	Creating the new Rule for Product
Interest Rule	IC_FA_RULE_REOPEN_DDA	REOPEN	Reopening the closed Rule for Product
Interest Rule	IC_FA_RULE_SUBMIT_DDA	SUBMIT	Submit Interest Rule for Product
Interest Rule	IC_FA_RULE_VIEW_DDA	VIEW	Viewing the Maintained Rule for Product
Interest Rule	IC_FA_RULE_ACTIONS_DDA	ACTIONS	Action Interest Rule for Product
Product Maintenance	IC_FA_PRODU_MAINT_AMEND_DDA	UNLOCK	Modification of the Product Maintenance
Product Maintenance	IC_FA_PRODU_MAINT_AUTHORIZE_DDA	AUUTHORIZE	Authorizing the Product Maintenance

Table A-1 (Cont.) Functional Activity Codes

Generic Maintenance	IC_FA_GENERIC_MAINT_DELETE_DDA	DELETE	Delete Generic Maintenance
Generic Maintenance	IC_FA_GENERIC_MAINT_REOPEN_DDA	REOPEN	Reopen Generic Maintenance
Generic Maintenance	IC_FA_GENERIC_MAINT_SUBMIT_DDA	SUBMIT	Submit and Save Generic Maintenance
Generic Maintenance	IC_FA_GENERIC_MAINT_VALIDATE_DDA	VALIDATE	Validate Generic Maintenance

Table A-2 Functional Activity Codes - APIs

Method	URL	Functional Activity Code	Description
GET	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icProducts	IC_FA_INPT_SVC_ICPRODS _FETCH_DDA	Fetches the accrual, calculation, liquidation and other preferences maintained for the specified Interest Product.
GET	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icProductsDetails	IC_FA_INPT_SVC_ICPRODU CTDETAILS_FETCH_DDA	Fetches the list of Interest Products and their description, maintained in the system.
GET	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icbrnavs	IC_FA_INPT_SVC_ICDBRNA V_FETCH_DDA	Fetches the list of all rate codes with their corresponding rate descriptions as maintained in the system.
POST	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icbrnavs	IC_FA_INPT_SVC_ICDBRNA V_SAVE_DDA	Creates new Interest Rate Code that can be used to reference effective date-wise interest rates.
PUT	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icbrnavs	IC_FA_INPT_SVC_ICDBRNA V_UPDATE_DDA	Allows for modifying the branches allowed or disallowed to use the defined Interest Rate Code.
GET	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icbrnavs/rateCodeDetail	IC_FA_INPT_SVC_ICRATEC ODEDETAILS_FETCH_DDA	Fetches the corresponding details including list of branches allowed/ not allowed if any for the rate code specified.
GET	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icRates	IC_FA_INPT_SVC_ICRATES _FETCH_DDA	Fetches the effective date wise interest rates maintained for each of the Rate Codes in the system or for the specified Rate Code.
POST	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icRates	IC_FA_INPT_SVC_ICRATES _SAVE_DDA	Creates new effective date wise interest rates input for a rate code.
PUT	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ icRates	IC_FA_INPT_SVC_ICRATES _UPDATE_DDA	Allows for modifying the interest rates maintained for a specific effective date.
GET	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ udeVals/genCondn	IC_FA_INPT_SVC_UDEVALS _GENCONDN_FETCH_DDA	Fetches the list of UDE values maintained for all the interest and business product combinations in the system.
POST	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ udeVals/genCondn	IC_FA_INPT_SVC_UDEVALS _GENCONDN_SAVE_DDA	Creates the UDE value maintenance for a specified effective date, branch, currency, interest product and business product combination.

Table A-2 (Cont.) Functional Activity Codes - APIs

Method	URL	Functional Activity Code	Description
PUT	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ udeVals/genCondn	IC_FA_INPT_SVC_UDEVALS _GENCONDN_UPDATE_DD A	Allows for modifying the UDE value maintenance for a specified effective date, branch, currency, interest product and business product combination.
GET	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ prodUdeList	IC_FA_INPT_SVC_PRODUD ELIST_FETCH_DDA	Fetches the Interest Product wise UDEs maintained for all products OR for a specified interest product OR for a specified business product.
POST	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ ictbEntriesHistories/.search	IC_FA_INPT_ICENTRIES_HI STORY_NEW_FETCH_DDA	Fetches the details of the liquidation for a particular account in the given branch.
POST	dda-ic-interest-input-services/ service/v14.8.1.0.0/icInput/ rate/icRates/.search	IC_FA_INPT_GCSC_ICRATE _NEW_FETCH_DDA	Fetches UDE effective date, values, floating rate, rate code and rate effective date maintained for a particular branch, account and currency combination.

B

Error Codes and Messages

This topic provides the error code and messages found while using Oracle Banking Accounts Cloud Service.

Table B-1 List of Error Codes and Messages

Error Code	Error Message
IC-ACC-01	Branch Dates could not be resolved
IC-ACC-02	Failed while fetching user globals
IC-ACC-03	Could not get account
IC-ACC-04	Failed during Lookup
IC-ACC-05	Unhandled exception occurred during Lookup
IC-ACC-06	Bombed while converting the amount
IC-ACC-07	Unhandled Exception occurred
IC-ACC-08	Required Parameters for Account Class transfer not maintained
IC-ACC-09	Unhandled Exception occurred during Account Class transfer check
IC-ACC-50	Exception Occurred while querying Intraday Table for Product Accrual
IC-ACC-51	Exception Occurred while posting Liquidation Netting
IC-ACC-52	Failed while populating Product Accrual Entries
IC-ACC-53	Failed while updating final status
IC-ACC-54	Failed while querying branch parameters
IC-ACC-55	Lookup failed for product code \$1
IC-ACC-57	Failed During Currency Conversion for product \$1
IC-ACC-58	Failed while marking entry passed for product \$1
IC-ACC-59	Exception Occurred while preparing Accounting Entries for Product Accrual for product \$1
IC-BAT-133	Error Occurred during Service Call to Interest Accrual
IC-BAT-121	Failed in verifying pending process for the branch
IC-BAT-131	Error Occurred during Service Call to Allocation
IC-BAT-132	Error Occurred during Service Call to Interest Calc
IC-BAT-134	Error Occurred during Service Call to Interest Liquidation
IC-BAT-135	Error Occurred during Service Call to Charge
IC-BAT-136	Error Occurred during Service Call to Accounting
IC-BAT-137	Error Occurred during Service Call to Product Accounting
IC-BAT-138	Error Occurred during Service Call to Resolve Branch
IC-BAT-139	Error Occurred during Service Call to Resolve Account
IC-BAT-140	Error Occurred during Service Call to Mark Cutoff
IC-BAT-141	Error Occurred during Service Call to Release Cutoff
IC-BAT-155	IC EOD Batch Failed
IC-BRNC-01	Invalid Branch Parameter
IC-CHGERR02	Branch Dates could not be resolved
IC-CHGERR03	Could not get account

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
IC-CHGERR04	Could not get account
IC-CHGERR05	Error Occurred during Initialization
IC-CHGERR06	Bombed while converting the amount
IC-CHGERR07	Failed while deriving charge amount
IC-CHGERR08	Failed while deriving min/max amount
IC-CHGERR09	Failed during LCY Conversion
IC-CHGERR10	Failed While Caching Details for Charge Slab
IC-CHGERR11	Problem as both discount amt and discount percentage maintained
IC-CHGERR12	Failed while fetching Slab Details
IC-CHGERR13	Failed while fetching Tier Details
IC-CHGERR14	Failed during amount round
IC-CHGERR17	Failed while fetching product details
IC-CHGERR19	Failed during currency conversion
IC-CHGERR23	Failed while fetching Charge Entries
IC-CHGERR24	Failed while Processing Charge
IC-CHGERR25	Failed while updating liqd dates
IC-CHGERR28	Could not get the book type
IC-GETSP-01	No details present for the given Branch and Account
IC-BAT-142	Error Occurred during Service Call to Pre Branch Resolution
IC-BAT-160	Failed while getting pending count for Intraday Batch
IC-BAT-161	Failed during service call for Intraday Batch
IC-GRC001	Effective Date cannot be Back Dated.
IC-GRC002	Current IC Group and New IC Group cannot be same.
IC-GRC003	Account Branch and currency cannot be *.* for given Account.
IC-GRC004	Pending request is active for an Account, therefore new change request is not allowed to be saved
IC-GRC005	Booking GL details and accounting details are mandatory if Liquidation mode is Liquidate to GL or Liquidate to Different Account respectively
IC-INPER-01	Account is Mandatory
IC-INPER-02	Account Group Code is Mandatory
IC-INPER-03	Account Open Date is Mandatory
IC-INPER-04	Branch is Mandatory
IC-INPER-05	Currency is Mandatory
IC-INPER-06	Customer Number is Mandatory
IC-INPER-07	Source System is Mandatory
IC-INPER-09	No Records to process
IC-INPER-11	Maint Queue Population Failed
IC-INPER-20	Branch Parameter Not maintained
IC-INPT-001	No records present for given branch and account
IC-INPT-002	Exceeded accGrp max size 6
IC-INPT-003	accGrp not sent
IC-INPT-004	Exceeded accGrpDesc max size 2000
IC-INPT-005	accGrpDesc not sent

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
IC-INPT-006	Exceeded extAccGrp max size 64
IC-INPT-007	extAccGrp not sent
IC-INPT-008	Exceeded extAccGrpDesc max size 2000
IC-INPT-009	extAccGrpDesc not sent
IC-INPT-010	Exceeded extAccGrpType max size 1
IC-INPT-011	extAccGrpType not sent
IC-INPT-012	Exceeded productCode max size 4
IC-INPT-013	productCode not sent
IC-INPT-014	Exceeded ccy max size 3
IC-INPT-015	ccy not sent
IC-INPT-016	Exceeded open max size 1
IC-INPT-017	open not sent
IC-IPTAC-01	Record Already Exists, Failed to save.
IC-IPTVD-01	Ref No in the request must be unique
IC-MNRUL-01	System elements not mapped to the Rule
IC-MNTBR-01	Error while validation of branch code using common core branch services
IC-MNTBR-02	Branch code not found in core branches
IC-MNTBR-03	IC Period Code Maintenance is not present
IC-MNTBR-04	Error while fetching system date values from CMC Branch Services
IC-MNTBR-05	Branch code not found in system dates
IC-PRCBT002	To Period Code should be greater than From Period Code
IC-PRCBT003	Profit calculation exclusion batch not executed for the given period
IC-PRD054	Value of Accrual Day should be less than or equal to 31
IC-PRD061	Frequency is blank in product preferences
IC-PRD062	Branch Parameter not maintained
IC-PRD123	Both start from account opening and defer liquidation days flags cannot be selected at the same time
IC-PRD120	Defer liquidation days should not be entered when defer liquidation flag is not selected
IC-PRD121	Defer before month end days should not be entered when defer liquidation flag is not selected
IC-PRD122	Defer liquidation days or defer before month end days should be entered when defer liquidation flag is selected
IC-PRD124	Days before month end should not be entered for frequency days
IC-PRD125	Both defer liquidation days and defer before month end day cannot be entered at the same time
IC-PRD126	Accrual cycle should be None when accrual frequency is Daily
IC-PRD201	Interest liquidation frequency has to be monthly and Liquidation at Month End flag has to be checked if the Split Interest Adj for Prev Year is required
IC-RL0007	Rule Id has invalid characters
IC-RL0008	Blank characters are not allowed in Rule Id
IC-RL0009	Rule Id - First character should be an alphabet or underscore
IC-RL0048	Requires atleast one formula with a valid expression for a rule
IC-RL0056	Required atleast one booked formula to save the rule

Table B-1 (Cont.) List of Error Codes and Messages

Error Code	Error Message
IC-RLM060	Rounding Required should be checked when Book FFlag is "Booked" and periodicity is "Daily/Periodic"
IC-RLM061	Accruals Required should be Unchecked when Book FFlag is "Non-Booked" and periodicity is "Daily/Periodic"
IC-RLM069	Length of Rule Id should be equal to 4 characters
IC-RULE-01	SDE Id and UDE Id should be different
IC-RULE-02	Result cannot have logical operator
IC-SPRM-001	Service Parameters cannot be empty
IC-PRD132	Minimum Variance cannot be greater than Maximum Variance
IC-PRD131	Min Effective Value cannot be greater than Max Effective Value
