If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Contents

## 1 High-Level Components

# Preface

This guide helps you familiarize yourself with the replication from the FLEXCUBE Universal Banking to the Oracle Banking Microservices Architecture products.

This topic contains the following subtopics:

- [Audience](#)
- [Related Resources](#)
- [Conventions](#)
- [List of Topics](#)

## Audience

This document is intended for the Implementation Team or ops-web team who are responsible for installing the banking products of Oracle Financial Services Software Limited.

## Related Resources

The related documents in the FLEXCUBE Universal Banking Documentation Library are as follows:

- *Common Core - Scheduler User Guide*
- *Oracle FLEXCUBE UBS - Common Core Integration*
- *Oracle FLEXCUBE UBS - Common Core - OBMA Core Integration*

The related documents in the Oracle Banking Branch Documentation Library are as follows:

- *Routing Hub Configuration User Guide*

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## List of Topics

This guide is organized into the following topics:

**Table List of Topics**

<b>Topic</b>	<b>Description</b>
<a href="#">High-Level Components</a>	This topic describes the high-level components of the replication process.

# 1

## High-Level Components

FLEXCUBE Universal Banking is a host system that replicates the data to the common core of Oracle Banking Microservices Architecture.

The entities maintained in the core of the Oracle Open Development Tools are replicated to the common core of Oracle Banking Microservices Architecture. Following core entities are replicated from the FLEXCUBE Universal Banking to the common core of Oracle Banking Microservices Architecture:

- Customer
- Account
- External Chart of Accounts
- Transaction Code

Following core entities are replicated from the common core of FLEXCUBE Universal Banking to the common core of Oracle Banking Microservices Architecture:

- Exchange Rates
- Currency Holiday Maintenance
- Local Holidays
- Currency Pair
- Currency Rate Type
- Currency Definition
- Core Branch Parameter Maintenance

The components of the replication process are as follows:

**Table 1-1 Components of Replication Process**

Component	Description
FLEXCUBE Universal Banking Scheduler	The scheduler is used to integrate with other software systems to execute or notify other software components when a pre-determined, scheduled time arrives.  It is used to replicate the data from the host system to the common core of Oracle Banking Microservices Architecture. For information on the scheduler, refer to the <i>Common Core - Scheduler User Guide</i> and <i>Oracle FLEXCUBE UBS - Common Core - OBMA Core Integration</i> guide in the FLEXCUBE Universal Banking Documentation Library.
Oracle Banking Routing Hub	Oracle Banking Routing Hub enables seamless and standardized integrations between Oracle Banking Microservices Architecture products using configurations provided as part of the product infrastructure. For information on the Oracle Banking Routing Hub, refer to the <i>Routing Hub Configuration User Guide</i> .

**Table 1-1 (Cont.) Components of Replication Process**

<b>Component</b>	<b>Description</b>
Oracle Banking Microservices Architecture	For information on the integration of FLEXCUBE Universal Banking with the Oracle Banking Microservices Architecture, refer to the <i>Oracle FLEXCUBE UBS - Common Core Integration</i> and <i>Oracle FLEXCUBE UBS - Common Core - OBMA Core Integration</i> guide.
