Contents

1 Overview of Oracle Banking Branch

1.1	Prerequisites	1-2
1.2	About Main Menu	1-4
1.3	Application Layout	1-6
1.3.1	Customer Search	1-6
1.3.2	About Transaction Area	1-7
1.4	Salient Features	1-9
1.4.1	About Machine Learning	1-14
1.4.2	About Oracle Digital Assistant	1-16
1.4.3	About Virtual Identifier	1-18
1.4.4	About Amount-Based Signature Verification	1-19
1.5	Keyboard Navigation for Transaction Screens	1-22
1.6	About Business Process Codes	1-23

2 Branch Operations

2.1	TC Denomination Enquiry	2-2
2.2	Open Branch Batch	2-3
2.3	Open Vault Batch	2-4
2.4	Open Teller Batch	2-6
2.5	Current Open Tills	2-8
2.6	Branch Breach Limits	2-10
2.7	Till Vault Position	2-11
2.8	Branch Total Position	2-12
2.9	Close Teller Batch	2-14
2.9.1	Add TC Denomination Details	2-16
2.10	Close Vault Batch	2-18
2.11	Close Branch Batch	2-20
2.12	Book Shortage	2-21
2.12.1	Add Denomination Details	2-23
2.13	Book Overage	2-24
2.14	Teller Session	2-26
2.14.1	Start Teller Session	2-26

3 Till-Vault Operations

3.1	Buy TC from Agent	3-2
3.1.1	Add TC Denominations to Buy TC	3-3
3.2	Buy TC from Head Office	3-4
3.3	Buy TC from Vault	3-5
3.4	Return TC to Vault	3-8
3.4.1	Add TC Denominations to Return TC	3-9
3.5	Return TC to HO	3-10
3.6	Buy Cash from Currency Chest	3-11
3.7	Sell Cash to Currency Chest	3-13
3.8	Buy Cash from Vault	3-14
3.9	Sell Cash to Vault	3-15
3.10	Buy Cash from Till	3-17
3.11	Sell Cash to Till	3-18
3.12	Denomination Exchange	3-20
3.13	Inter Branch Transactions	3-21
3.13.1	Inter Branch Transaction Request	3-22
3.13.2	Inter Branch Transaction Input	3-24
3.13.3	Inter Branch Transaction Liquidation	3-26

4 Customer Transactions

4.1	Cash Deposit	4-2
4.1.1	Add Charge Details	4-6
4.2	Cash Withdrawal	4-7
4.3	Cheque Withdrawal	4-11
4.4	FX Sale Against Account	4-14
4.5	FX Sale Against Walk-in	4-18
4.6	FX Purchase Against Account	4-21
4.7	FX Purchase Against Walk-in	4-25
4.8	Close Out Withdrawal	4-28
4.9	Close Out Withdrawal by Multi-Mode	4-35
4.10	Safe Deposit Rental By Cash	4-38
4.11	Recurring Deposit Payment by Cash	4-41
4.12	F23C Tax Payment by Cash	4-43
4.13	F24C Tax Payment By Cash	4-47
4.13.1	Add Standard Details	4-50
4.13.1.1	Add Tax Details	4-51

4.13.1.2	Add INPS Details	4-52
4.13.1.3	Add Region Details	4-53
4.13.1.4	Add IMU and Other Local Taxes	4-54
4.13.1.5	Add Insurance Details	4-55
4.13.1.6	Add Other Bodies	4-56
4.13.1.7	Add Excise Details	4-57
4.13.2	Add Simplified Details	4-58
4.13.3	Add Element Identification Details	4-60
4.13.4	Add Predefined Details	4-62
4.14	F23 Tax Payment by Account	4-64
4.15	F24 Tax Payment By Account	4-69
4.15.1	Add Standard Details	4-72
4.15.2	Add Simplified Details	4-75
4.15.3	Add Element Identification Details	4-77
4.15.4	Add Predefined Details	4-78

5 Miscellaneous Transactions

5.1	Miscellaneous Customer Debit	5-1
5.2	Miscellaneous Customer Credit	5-4
5.3	Miscellaneous GL Debit	5-8
5.4	Miscellaneous GL Credit	5-10
5.5	Miscellaneous GL Transfer	5-13
5.6	Miscellaneous Transfer	5-16

6 Transfers

6.1	Account to Account Transfer	6-1
6.2	In-House Cheque Deposit	6-5
6.3	Domestic Transfer Against Account	6-8
6.3.1	Add Payment Details for Domestic Transfer	6-10
6.4	Domestic Transfer Against Walk-in	6-12
6.5	International Transfer Against Account	6-14
6.5.1	Add Payment Details for International Transfer	6-18
6.6	International Transfer Against Walk-in	6-21

7 Clearing Transactions

7.1	Cheque Deposit	7-1
7.1.1	Cheque Deposit Against Account	7-1
7.1.2	Cheque Deposit Against GL	7-5
7.2	Cheque Return	7-8

7.3	Inward Clearing Data Entry	7-10
7.4	Outward Clearing Data Entry	7-13

8 Remittances

8.1	Banker's Cheque	8-1
8.1.1	BC Issue Against Account	8-2
8.1.2	BC Issue Against Walk-in	8-6
8.1.3	BC Issue Against GL	8-10
8.1.4	BC Print and Reprint	8-14
8.1.5	BC Operations	8-15
8.1.5.1	BC Inquiry	8-16
8.1.5.2	BC Revalidation	8-19
8.1.5.3	BC Duplicate Issue	8-21
8.1.5.4	BC Payment Reversal	8-23
8.1.5.5	BC Payment by Account	8-25
8.1.5.6	BC Payment by Cash	8-27
8.1.5.7	BC Payment by GL	8-30
8.1.5.8	BC Refund by Account	8-32
8.1.5.9	BC Refund by Cash	8-35
8.1.5.10	BC Refund by GL	8-37
8.1.5.11	Cancel BC by Account	8-39
8.1.5.12	Cancel BC by Cash	8-42
8.1.5.13	Cancel BC by GL	8-44
8.1.6	Multi BC Issuance	8-46
8.1.6.1	Multi BC Issuance Against Account	8-47
8.1.6.2	Multi BC Issuance Against Cash	8-50
8.2	Demand Drafts	8-53
8.2.1	DD Issue Against Account	8-54
8.2.2	DD Issue Against Walk-in	8-58
8.2.3	DD Issue Against GL	8-61
8.2.4	DD Print and Reprint	8-65
8.2.5	DD Operations	8-66
8.2.5.1	DD Inquiry	8-67
8.2.5.2	DD Revalidation	8-70
8.2.5.3	DD Duplicate Issue	8-72
8.2.5.4	DD Payment Reversal	8-74
8.2.5.5	DD Payment by Account	8-76
8.2.5.6	DD Payment by Cash	8-79
8.2.5.7	DD Payment by GL	8-81
8.2.5.8	DD Refund by Account	8-84

8.2.5.9	DD Refund by Cash	8-86
8.2.5.10	DD Refund by GL	8-89
8.2.5.11	Cancel DD by Account	8-91
8.2.5.12	Cancel DD by Cash	8-94
8.2.5.13	Cancel DD by GL	8-96
8.3	Cash Remittance	8-98
8.3.1	Cash Remittance Issue	8-99
8.3.1.1	Cash Remittance Issue Against Account	8-99
8.3.1.2	Cash Remittance Issue Against Cash	8-103
8.3.1.3	Cash Remittance Issue Against GL	8-106
8.3.2	Cash Remittance Operations	8-109
8.3.2.1	Cash Remittance Inquiry	8-110
8.3.2.2	Cash Remittance Payment by Account	8-113
8.3.2.3	Cash Remittance Payment by Cash	8-116
8.3.2.4	Cash Remittance Payment by GL	8-118
8.3.2.5	Cash Remittance Refund by Account	8-122
8.3.2.6	Cash Remittance Refund by Cash	8-124
8.3.2.7	Cash Remittance Refund by GL	8-127
8.3.2.8	Cancel Cash Remittance by Account	8-130
8.3.2.9	Cancel Cash Remittance by Cash	8-133
8.3.2.10	Cancel Cash Remittance by GL	8-136
8.3.3	Inward Remittance Registration	8-139
8.4	Travellers Cheque	8-142
8.4.1	TC Sale by Other Modes	8-142
8.4.1.1	Add TC Denominations to Sell TC	8-146
8.4.2	TC Sale Against Walk-in	8-147
8.4.3	TC Purchase Against Account	8-150
8.4.3.1	Add TC Denominations to Purchase TC	8-153
8.4.4	TC Purchase Against Walk-in	8-155
8.5	Instrument Status Update	8-158

9 Term Deposit Transactions

9.1	TD Account Opening	9-1
9.1.1	Add Funding Details	9-4
9.1.2	Add Joint Holders Details	9-6
9.1.3	Add Payout Details	9-7
9.1.4	Add Interest Details	9-8
9.1.5	Add Rollover Details	9-10
9.2	TD Redemption Against Cash	9-11
9.3	TD Redemption Against Account	9-14

9.4	TD Top-Up Against Account	9-17
9.5	TD Top-Up Against Cash	9-19

10 Credit Card Transactions

10.1	Credit Card Advance by Cash	10-1
10.2	Credit Card Advance by Transfer	10-4
10.3	Credit Card Payment by Cash	10-7
10.4	Credit Card Payment by Non-Cash Modes	10-10
10.4.1	Credit Card Payment by Account	10-10
10.4.2	Credit Card Payment by Clearing Cheque	10-13
10.5	Stop Card Request	10-16

11 Loan Transactions

11.1	Loan Disbursement by Cash	11-1
11.2	Loan Repayment by Cash	11-3

12 Islamic Transactions

12.1	Murabaha Payment by Cash	12-1
12.2	Islamic Down Payment by Cash	12-4
12.3	Islamic TD Account Opening	12-6
12.3.1	Add Funding Details for Islamic TD	12-9
12.3.2	Add Joint Holders for Islamic TD	12-11
12.3.3	Add Payout Details for Islamic TD	12-12
12.3.4	Add Rollover Details for Islamic TD	12-14

13 Bill Payments

13.1	Bill Payment by Cash	13-1
13.2	Bill Payments by Other Modes	13-3
13.2.1	Bill Payment by Account	13-3
13.2.2	Bill Payment by Clearing Cheque	13-6

14 Session Teller Transactions

14.1	Cash Deposit	14-1
14.2	Cash Withdrawal	14-2
14.3	FX Sale Against Walk-in	14-4
14.4	FX Purchase Against Walk-in	14-5

14.5	Loan Repayment by Cash	14-7
------	------------------------	------

15 Journal Log

15.1	About Electronic and Servicing Journals	15-1
15.2	Electronic Journal	15-3
15.3	Servicing Journal	15-7
15.4	Reassign Transactions	15-11

16 Prediction

16.1	Teller Service Counters Prediction	16-1
------	------------------------------------	------

17 Cache

17.1	Clear Cache	17-1
------	-------------	------

18 Customer Service

18.1	Cheque Status Inquiry	18-2
18.2	Stop Cheque Request	18-3
18.3	Cheque Book Request	18-4
18.4	Passbook Issue	18-6
18.5	Passbook Update	18-8
18.6	Passbook Status Change	18-10
18.7	Passbook Reprint	18-11
18.8	Account Balance Inquiry	18-13
18.9	Account Statement Request	18-16
18.10	Customer Address Update	18-18
18.11	Account Address Update	18-19
18.12	Customer Contact Update	18-21
18.13	Cheque Book Status Change	18-22

19 Branch Dashboard

20 Branch Maintenance

20.1	Common Actions for Branch Maintenance	20-3
20.2	Maintain Teller Branch Parameters	20-3
20.3	Maintain Branch Role Limits	20-5

20.4	Maintain Branch User Preferences	20-7
20.5	Maintain Denominations	20-9
20.6	Maintain Function Code Definitions	20-11
20.7	Maintain Function Code Preferences	20-15

Index

Preface

This guide helps you to familiarize yourself with the Oracle Banking Branch application. It gives an overview of the module and explains all the maintenances required for its smooth functioning. It also takes you through the different types of transactions that can be handled through this module.

This topic contains the following subtopics:

- [Audience](#)
- [Related Resources](#)
- [Conventions](#)
- [Symbols, Definitions, and Shortcut Keys](#)
- [List of Topics](#)
- [Screenshot Disclaimer](#)

Audience

This guide is intended for the Branch Tellers, Vault Operators, and Branch Supervisors to provide quick and efficient service to customers and prospects of your bank.

Related Resources

The related documents are as follows:

- *Getting Started User Guide*
- *Current Account and Savings Account User Guide*
- *Servicing Configurations User Guide*

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Symbols, Definitions, and Shortcut Keys

The following are the symbols you are likely to find in this guide:

Table Symbols

Symbol	Function
	Add icon
	Add a row
	Edit icon
	Delete icon
	Calendar icon
	Close icon
	Delete a row
	Grid view
	Increase/Decrease value
	List view
	Maximize
	Minimize
	Navigate to the first page
	Navigate to the last page
	Navigate to the next page
	Navigate to the previous page
	Open a list
	Perform search
	Refresh

Most of the screens contain icons to perform all or a few of the basic actions. The actions which are called here are generic, and it varies based on the usage and the applicability. The table below gives a snapshot of them:

Table Common Icons and its Definitions

Icon	Description
Submit	Click Submit to complete the transaction after you specify all the input parameters for a particular transaction.
Cancel	Click Cancel to cancel the transaction input midway without saving any data.
Clear	Click Clear to clear the transaction input data. The system displays a pop-up screen with confirmation to clear data. You can click OK to confirm or click  icon to retain the data.
Query	On completion of input of necessary parameters, click Query to fetch and display the details.
Save	Click Save to save the details specified on the screen.
Exit	Click Exit to close the screen and go to the Homepage.
OK	Click OK to confirm the details on the pop-up screen.

The following shortcut keys can be used only for the screens which have the icons specified in the Function column:

Table Shortcut Keys

Shortcut Key	Function
Tab	Used to shift focus from one input field to the other. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 20px;"> <p> Note: The last field of the last accordion will shift focus to Submit/Cancel button.</p> </div>
Alt + S	Used to select Submit button.
Alt + C	Used to select Clear button.
Alt + X	Used to select Cancel button.
Alt + A	Used to select Charge Details data segment.
Alt + Y	Used to select Denominations data segment.

The following acronyms and abbreviations are used in this guide:

Table Acronyms and Abbreviations

Acronym/ Abbreviation	Description
ARC	Account, Rate, and Charge
BC	Bankers Cheque

Table (Cont.) Acronyms and Abbreviations

Acronym/ Abbreviation	Description
CASA	Current Account and Saving Account
CCY	Currency
CIF	Customer Information File
DD	Demand Draft
EJ	Electronic Journal
FCY	Foreign Currency
FX	Foreign Exchange
GL	General Ledger
HO	Head Office
LCY	Local Currency
LOV	List of Values
MIS	Management Information System
ML	Machine Learning
RD	Recurring Deposit
SD	Safe Deposits
System	Unless specified, it shall always refer to Oracle Banking Branch.
TC	Travellers Cheque
TD	Term Deposit
UDF	User Defined Fields
VAT	Value Added Tax

List of Topics

This guide is organized into the following topics:

Table List of Topics

Topic	Description
Overview of Oracle Banking Branch	This topic provides a snapshot of the features of the application.
Branch Operations	This topic describes the internal activities done at the branch where the Customer is not involved.
Till-Vault Operations	This topic describes the various screens used to perform the Till Vault operations.
Customer Transactions	This topic describes the various screens used to perform financial transactions for Customer accounts.
Miscellaneous Transactions	This topic describes the various screens used to perform General Ledger (GL) transactions.

Table (Cont.) List of Topics

Topic	Description
Transfers	This topic describes the various screens used to perform inter-bank transfer, intra-bank transfer, and cross-border transactions.
Clearing Transactions	This topic describes the various screens used to capture the Inward Clearing Data Entry, Outward Clearing Data Entry, Cheque Return, and Cheque Deposit transactions.
Remittances	This topic describes the various screens used to perform various types of remittances.
Term Deposit Transactions	This topic describes the various screens used to open, redeem, and top-up a term deposit.
Credit Card Transactions	This topic describes the various screens used to perform credit card advance and payment transactions.
Loan Transactions	This topic describes the various screens used to perform loan disbursement and loan repayment transactions.
Islamic Transactions	This topic describes the various screens used to perform various Islamic transactions.
Bill Payments	This topic describes the various screens used to perform various bill payment transactions.
Session Teller Transactions	This topic describes the various screens used to perform financial transactions for Customer accounts in the Teller Session.
Journal Log	This topic describes the various screens used to view the status of transactions performed, resubmit or reject an incomplete transaction, and reverse a completed transaction.
Prediction	This topic describes the screen that is used to predict the number of service counters required for a specific period.
Cache	This topic describes the Clear Cache screen, which is used to get the maintenance reflected while performing the transactions.
Customer Service	This topic describes the various screens used to maintain customer accounts and ancillary services and to enquire about customer account balance.
Branch Dashboard	This topic describes the dashboard used to view the cash position, transaction status, alerts, to access the frequently used transaction screens, and to view the alerts and notifications.
Branch Maintenance	This topic describes the various screens used to perform branch maintenance.

1

Overview of Oracle Banking Branch

Oracle Banking Branch is a retail banking application that gives a 360-degree view of the customer and financial transactions to the Teller of the bank.

Oracle Banking Branch you as the Teller, to provide better customer-focused services as well as cross-sell and up-sell the other products and services of the bank. A typical transaction under a branch is classified into the following stages:

Table 1-1 Transaction Stages

Stage	Description
Teller Request	In this stage, the Teller captures the transaction request and transaction enrichment.
Authorization	In this stage, the Supervisor authorizes the request.
Teller Resubmission	The Resubmission stage is applicable only for certain transactions.

This topic contains the following subtopics:

- [Prerequisites](#)
Before you begin performing transactions, you need to log in to the Oracle Banking Branch Homepage.
- [About Main Menu](#)
The Teller Main Menu is a Mega Menu that makes all the menu items visible at once. It is a large panel divided into groups of menu items, which simplifies the navigation.
- [Application Layout](#)
The general layout of the Oracle Banking Branch application consists of the main menu, customer search, transaction area including customer summary, and additional widgets available to display the `Current Till Position` and frequently used transaction icons.
- [Salient Features](#)
Learn about the salient features of the Oracle Banking Branch application.
- [Keyboard Navigation for Transaction Screens](#)
The keyboard navigation can be used as an alternative method to navigate through interactive elements on a screen – fields, buttons, data segments, tables, etc. It can be used to navigate through the application, input the necessary values, and perform the transactions.
- [About Business Process Codes](#)
Business Process Code defines the various stages for servicing transactions.

1.1 Prerequisites

Before you begin performing transactions, you need to log in to the Oracle Banking Branch Homepage.

For information on how to log in, refer to the *Getting Started User Guide*. You can also launch the Oracle Banking Branch application through the FLEXCUBE Universal Banking.

To launch Oracle Banking Branch through FLEXCUBE Universal Banking:

1. Log in to the FLEXCUBE Universal Banking Homepage. For information on how to log in, refer to the *Procedures User Guide* in the FLEXCUBE Universal Banking Documentation Library.

The FLEXCUBE Universal Banking Homepage is displayed.

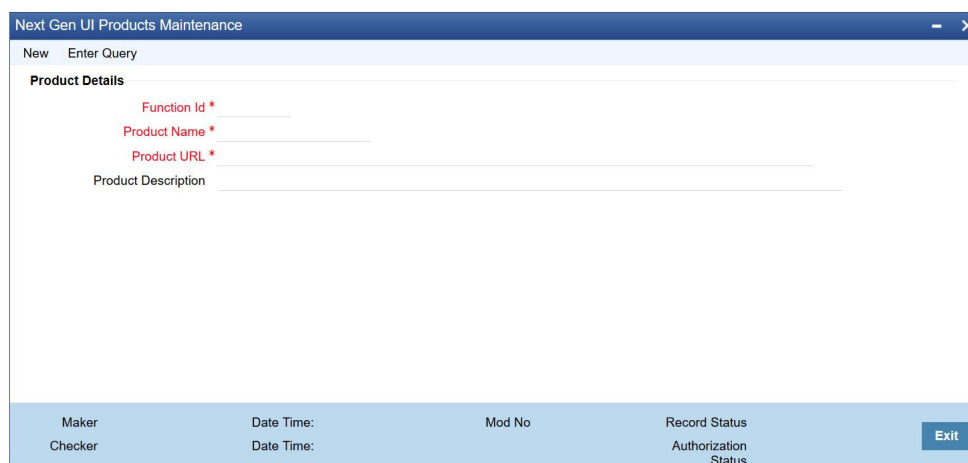

2. Specify CSDNGUIM in the top right corner text box, and click **Next**.

The **Next Gen UI Products Maintenance** screen is displayed.

 **Note:**

Make sure that the user has roles for the screen.

Figure 1-1 Next Gen UI Products Maintenance

Maker	Checker	Date Time:	Date Time:	Mod No	Record Status	Authorization Status

3. On the **Next Gen UI Products Maintenance** screen, update the Next Generation UI **Product URL**.

 **Note:**

For example, NEW TELLER can be used as the Function id, with the description as Teller Next Generation Product. It is released as Static Data and ensures the user roles are maintained for the same in FLEXCUBE Universal Banking.

- Once the roles are maintained in FLEXCUBE Universal Banking, click **Next Generation UI** on the toolbar.

The **Next Gen UI Dashboard** is displayed with the list of products.

Figure 1-2 Next Gen UI Dashboard

Product Name	Product Description
NEW TELLER	Teller Next Generation Product

- Click **NEW TELLER**.

The **Next Generation – Homepage** is displayed.

 **Note:**

Make sure that the same user id is maintained in FLEXCUBE Universal Banking. In addition, make sure that the **Next Generation UI** is maintained and has the necessary roles. For example, if the user ID is Jones, the same needs to be present in the SMS systems of FLEXCUBE Universal Banking and **Next Generation UI**.

- Do the **Next Generation UI** changes. The *SECURITY_CONFIG* table in *PLATO_SECURITY* schema must have the following entries:

Table 1-2 Next Generation UI Changes

Configuration	Value
INTEGRATION_ENABLED {id}	true
INTEGRATION_CALLBACK_URL {id}	https://10.00.00.00:1010/FCJNeoWeb/ValidationService/FCNonceValidation/validate

 **Note:**

The IP and port number of the FLEXCUBE Universal Banking server must be updated.

The Oracle Banking Branch Homepage is displayed.

Figure 1-3 Homepage

1.2 About Main Menu

The Teller Main Menu is a Mega Menu that makes all the menu items visible at once. It is a large panel divided into groups of menu items, which simplifies the navigation.

The menu items are grouped based on the type of operation performed. In addition, the **Menu Item Search** can be used to search and select a specific screen from any of the main menu items. For more information on menus, refer to [Figure 1-4](#) and [Table 1-3](#).

Table 1-3 Menu Items – Description

Menu	Description
Branch Operations	Branch Manager, Vault Teller, or Teller can use Branch Operations to cover the internal activities done at the branch where the Customer is not involved. This facilitates branch, vault, Till opening, or closing for the day and monitoring the transactions done during the day, and Cash Balancing.
Till-Vault Operations	Vault Teller or Teller can use Till-Vault Operations to monitor the cash and currency boxes for the day and to perform cash transfers from or to the Vault or Till as and when required.
Customer Transactions	Teller can use Customer Transactions to perform financial transactions for Customer accounts, which includes, Cash Deposits, Cash Withdrawals, Cheque Withdrawals, Forex Transactions, and Account Closure.
Miscellaneous Transactions	Teller can use Miscellaneous Transactions to perform General Ledger transactions such as miscellaneous debit and credit transactions against a Customer's CASA account and GL account.
Transfers	Teller can use Transfers to perform inter-bank transfers, intra-bank transfers, and cross-border transactions.
Clearing	Teller can use Clearing to capture the Inward Clearing Data Entry, Outward Clearing Data Entry, Cheque Return, and Cheque Deposit transactions.
Remittances	Teller can use Remittances to issue remittances such as demand drafts and banker's cheques, perform payment or cancellation of the issued remittances, and perform further operations on the issued remittances.
Term Deposits	Teller can use Term Deposits to initiate Term Deposit account opening and perform a redemption, top-up on the existing term deposit accounts.
Credit Card Transactions	Tellers can use Credit Card Transactions to perform credit card advance and payment transactions.
Loan Transactions	Teller can use Loan Transactions to perform loan disbursement and loan repayment transactions.
Islamic Transactions	Teller can use to Islamic Transactions perform various Islamic transactions.
Bill Payments	Teller can use Bill Payments to perform various bill payment transactions.
Session Teller Transactions	Teller can use Session Teller Transactions to perform financial transactions for Customer accounts in the Teller Session.
Journal Log	Teller or Supervisor can use Journal Log to view the status of transactions performed by them. Also, it allows to resubmit or reject an incomplete transaction, or to reverse a completed transaction.
Prediction	The Supervisor can use Prediction to predict the number of service counters required for a specific period.
Cache	The Clear Cache screen is used to get the maintenance reflected while performing the transactions.
Customer Service	Teller or Operations Executive can use Customer Service to maintain customer accounts and ancillary services and to enquire about customer account balance.

Table 1-3 (Cont.) Menu Items – Description

Menu	Description
Branch Dashboard	Teller can use the Branch Dashboard to view the cash position, transaction status, alerts, to access the frequently used transaction screens, and to view the alerts and notifications.
Branch Maintenance	Branch Maintenance covers a set of definitions maintained to perform the branch-based operations, transactions, and services.
Customer/Account Search	Used to query for a specific Customer ID or Customer Account Number.

You can select an operation using any of the following methods:

- From the Homepage, navigate to the left menu and then click the necessary operation.
- Click the **Frequent Operations** widget placed at the right side of the transaction area.

1.3 Application Layout

The general layout of the Oracle Banking Branch application consists of the main menu, customer search, transaction area including customer summary, and additional widgets available to display the `Current Till Position` and frequently used transaction icons.

This topic contains the following subtopics:

- [Customer Search](#)
The **Customer Search** is located in the **Branch Dashboard** and **Teller Transaction** screens. It is used to query and find a specific customer account.
- [About Transaction Area](#)
The transaction area consists of a transaction panel, a **Customer Information** widget, and additional widgets within the **Teller Transaction** screens.

1.3.1 Customer Search

The **Customer Search** is located in the **Branch Dashboard** and **Teller Transaction** screens. It is used to query and find a specific customer account.

You can use **Customer Search** to query and find a specific customer account with one of the following information:

- Customer ID
- Customer Name
- Account Number

To find a specific customer account:

1. On the Homepage or the transaction screen, in the Customer Search widget, click the  icon.

The **Customer Search** screen is displayed.

Figure 1-5 Customer Search

2. On the **Customer Search** screen, query the details. For more information on fields, refer to the field description table.

Table 1-4 Customer Search - Field Description

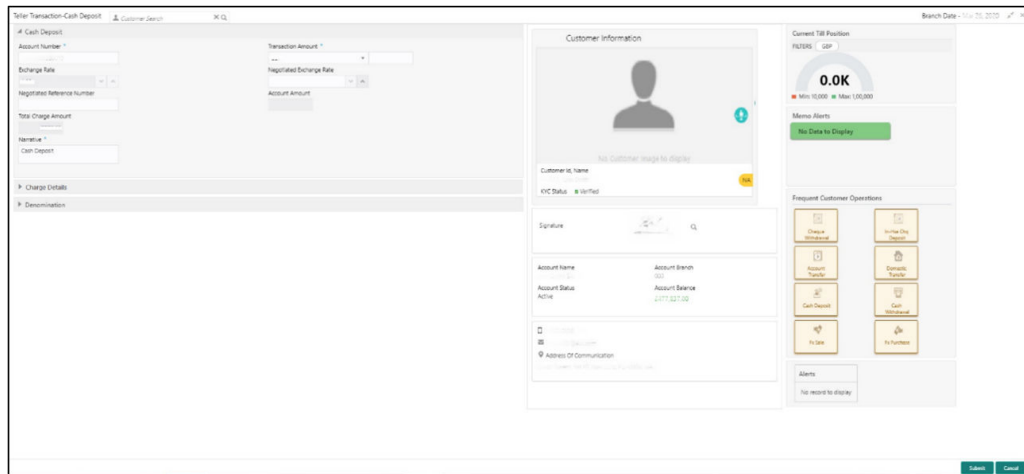

Field	Description
Customer ID	Specify the customer ID which the details need to be queried.
Customer Name	Specify the name of the customer for which the details need to be queried.
Account Number	Specify the account number for which the details need to be queried.
Search	Click Search to get the results for the specified Customer ID , Customer Name , or Account Number .
Reset	Click Reset to clear the search results.
Customer Results	Displays the customer search results.
Customer ID	Displays the customer ID.
Customer Name	Displays the customer's name.
Account Details	Displays the account search results.
Account Number	Display the account number.
Account Name	Display the description of the account.
Account Currency	Display the currency of the account.

1.3.2 About Transaction Area

The transaction area consists of a transaction panel, a **Customer Information** widget, and additional widgets within the **Teller Transaction** screens.

A sample of the transaction area is shown below:

Figure 1-6 Transaction Area

Transaction Header

The transaction header is specific to each transaction screen. The following details are provided in the transaction header:

Table 1-5 Transaction Header

Item	Description
Transaction Screen Name	Displays the name of the selected transaction screen.
Customer Search	For information on the Customer Search , refer to Customer Search .
Branch Date	Displays the current branch date.

Transaction Panel

The transaction panel consists of the data segments with the necessary input fields and action buttons. Users need to specify the details in the fields to perform the transactions.

Customer Information

The **Customer Information** widget provides the details about the customer that are validated during transaction submission. For information on the amount-based signature verification, refer to [About Amount-Based Signature Verification](#).

Table 1-6 Customer Information

Field	Description
Display Option	The Customer Information widget is displayed only if this option is selected.
Customer's Image	Displays the image of the customer.
Customer's Name	Displays the name of the customer.
KYC Status	Displays the KYC status of the customer's details.

Table 1-6 (Cont.) Customer Information

Field	Description
Signature	Displays the signature of the customer.
Account Details	Displays the details of the customer account.
Address Details	Displays the address details of the customer.
Contact Details	Displays the contact details of the customer.

Additional Widgets

The additional widgets are located at the right side of the transaction area in the **Teller Transaction** screens. The additional widgets include the following:

Table 1-7 Additional Widgets

Widget	Description
Current Till Position	Displays the cash position in the branch currency for the logged-in Teller Id.
Memo Alerts	<p>Displays the instructions maintained in FLEXCUBE Universal Banking for the specified account number.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>To enable memo alerts, in transaction schema the memo_enabled flag should be set to 'Y' in SRV_TM_BC_PARAM_DTLS and UBS Entries should be maintained.</p> </div>
Alerts	Displays the alerts/notifications specific to the Customer.
Frequent Customer Operations	<p>Displays some frequently used transaction icons. Users can open the frequently used transaction screens through this widget.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>The system displays an error message stating that the User does not have rights to access this screen if the user is trying to access the restricted screen in the widget.</p> </div>

1.4 Salient Features

Learn about the salient features of the Oracle Banking Branch application.

The salient features are as follows:

Table 1-8 Salient Features

Feature	Description
Generation of Teller Sequence Number	<p>The system generates a unique Teller Sequence Number and displays an information message <code>Teller Sequence Number nnn</code> indicating the generated number after submission of each teller transaction. The generated sequence number is also displayed at the following levels:</p> <ul style="list-style-type: none"> • Completion • Authorization Submission • Re-submission • Reversal • Rejection
Advice Generation for Teller Transactions	<p>The system generates the transaction advice if it is enabled in the definition of function code. The advice includes the currency and amount values involved in the transaction.</p>
Transaction Approval	<p>When you perform a transaction for an amount greater than the allowed limit, it needs approval from the Supervisor. Based on the Assignment Mode in Function Code Preferences screen, the following conditions apply:</p> <ul style="list-style-type: none"> • Manual – The system will show a list of approval if the request status is Approval. • Auto – The transaction is automatically assigned to the default authorizer if the request status is Approval. <p>The transaction approval flow consists of the following steps:</p> <ul style="list-style-type: none"> • Initiation • Pending Approval • Pending • Completed <p>For more information on transaction approval flow, refer to Table 1-9.</p>
Transaction Reversal with Approval	<p>A transaction can be reversed with auto-approval or approval from the Supervisor. Based on the Assignment Mode in Function Code Preferences screen, the following conditions apply:</p> <ul style="list-style-type: none"> • Manual – The system will show a list of approval if the request status is Approval. • Auto – The transaction is automatically assigned to the default authorizer if the request status is Approval. <p>The transaction approval flow consists of the following steps:</p> <ul style="list-style-type: none"> • Completed • Pending Approval • Pending • Reversed <p>For more information on transaction flow for reversal with approval, refer to Table 1-10.</p>

Table 1-8 (Cont.) Salient Features

Feature	Description
Transaction Reversal	<p>A transaction can be manually reversed only when it is authorized and completed from the Journal Log.</p> <p>When you reverse a transaction, the data remains in the system with the status Reversed and the accounting entries are reversed (negative amounts are posted into the accounts). Also, this will update the Till Balance for the currencies (for cash transactions), wherever applicable.</p> <p>You can select the transaction to be reversed from the transaction screen. If the reversal is applicable for the function code, the Reversal icon will be enabled. When you click this icon, the reversal request will be initiated.</p> <p>If cash transactions are reversed, the system validates the following:</p> <ul style="list-style-type: none"> • the Till used for the reversal is the same as that used in the original transaction • the denominations are input (If the transaction is reversed the same day of its input, the denominations of the transaction are altered.) • a batch is open
Transaction Rejection	<p>You can manually reject the authorized customer transactions from the Teller Journal Log.</p> <div style="border: 1px solid #0070C0; background-color: #E6F2FF; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>When you reject a transaction, the data remains in the system with the contract status Discarded and no further action is allowed on the transaction.</p> </div>
UDF and MIS	<p>UDF and MIS are supported during accounting via common core Additional Fields. MIS Codes can be sent from the Oracle Banking Branch, which will be validated and processed as part of accounting.</p>

Table 1-8 (Cont.) Salient Features

Feature	Description
External API	<p>External APIs will be processed only if called by an external system, which is maintained in Oracle Banking Branch. The external system can be maintained using the External System Maintenance screen. For more information on the External System Maintenance screen, refer to <i>External System Maintenance</i>. External APIs are supported for the following transactions:</p> <ul style="list-style-type: none"> • Cash Deposit • Cash Withdrawal • Account Balance Inquiry • Account Transfer <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>These transactions will work only if OAuth is enabled.</p> </div>
Machine Learning	For information on machine learning, refer to About Machine Learning .
Oracle Digital Assistant (ODA)	For information on ODA, refer to About Oracle Digital Assistant .
Virtual Identifier	For information on the virtual identifier, refer to About Virtual Identifier .
Amount-Based Signature Verification	For information on amount-based signature verification, refer to About Amount-Based Signature Verification .

Table 1-9 Transaction Approval Flow

Stage	Description
Initiation to Pending Approval	<p>If the transaction amount exceeds the limit defined in Branch User Limits and on click of Submit, the system shows a popup message <i>Amount exceeds limit for this transaction</i>, and request status is shown as Approval.</p> <p>If assignment mode is manual and on click of Confirm, the system shows a list of approval based on branch code, transaction amount, currency, and function code. The user can give a narrative and click Submit for Approval button.</p>
Pending Approval to Pending	The Approver/Supervisor needs to log in and fetch the transaction from Journal Log with transaction status as Pending Approval . The Supervisor can approve the pending transaction by clicking Approve/Reject with the supervisor comment.
Pending to Completed	The user needs to fetch the transaction from Journal Log with transaction status as Sent Back and click Submit .

Table 1-9 (Cont.) Transaction Approval Flow

Stage	Description
Override Flow (Initiation to Completed)	Based on the branch maintenance setup at certain levels like Function Code, Function Code Preferences, Branch User Limits, and Branch role limits, if the transaction is validated with any warning override, the system shows a popup message with request status as Warning . Once the user confirms, the transaction status will be shown as Completed .

Table 1-10 Transaction Reversal with Approval Flow

Stage	Description
Completed to Pending Approval	The completed transaction can be selected from the Electronic Journal screen. Once you click Reverse , the system shows a popup message Amount required for Reversal and requests changes to Approval . If assignment mode is manual and on click of Confirm , the system shows a list of approval based on branch code, transaction amount, currency, and function code. The user can give a narrative and click Submit for Approval button.
Pending Approval to Pending	The Approver/Supervisor needs to log in and fetch the transaction from Journal Log with transaction status as Pending Approval . The Supervisor can approve the pending transaction by clicking Approve/Reject with the supervisor comment.
Pending to Reversed	The user needs to fetch the transaction from Journal Log with transaction status as Sent Back and click Submit .
Override Flow (Completed to Approval)	The user needs to select the completed transaction in the Electronic Journal screen and click Reverse . If the Reversal Requires Authorization is enabled in the Function Code Definition screen, the system displays an information message to select the Approver based on Manual or Auto assignment mode. After selecting the approver internally, reversal override will be called and request status will be updated as Approval .

This topic contains the following subtopics:

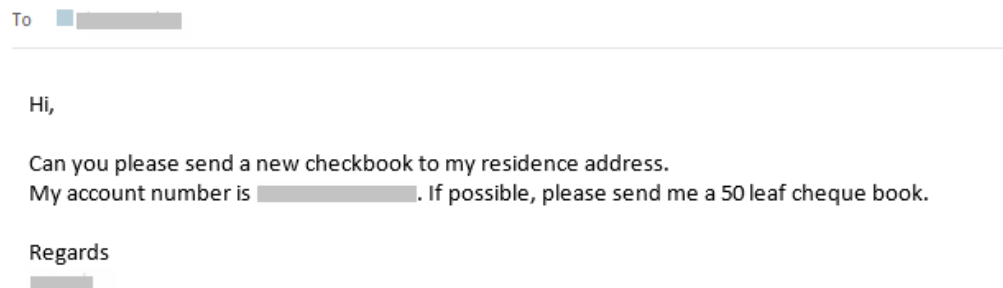

- [About Machine Learning](#)
Oracle Banking Branch uses machine learning to process an email request from a customer automatically.
- [About Oracle Digital Assistant](#)
The Oracle Digital Assistant (ODA) helps the Teller to reduce the time taken to access the transaction screens through automatic text/voice processing.
- [About Virtual Identifier](#)
The virtual identifier is used to validate the specified account number of the customer.
- [About Amount-Based Signature Verification](#)
The Teller can use the "Amount-Based Signature Verification" feature to verify the signature displayed in the Customer Information widget while performing the transactions.

1.4.1 About Machine Learning

Oracle Banking Branch uses machine learning to process an email request from a customer automatically.

When a customer sends an email request, the requirement is understood using machine learning, and the transaction is processed. A sample email request is shown in [Figure 1-7](#). Based on pre-defined machine learning in **External System Maintenance**, the transaction is processed automatically.

Figure 1-7 Sample Email Request

The following conditions apply to the machine learning use case for cheque book requests:

- If sufficient details are provided in the email request, the transaction will be processed until completion.
- If details are insufficient in the email request to process a transaction, it will be assigned in the **Servicing Journal** for user correction. After the assigned user does the correction, the transaction will be processed.

Figure 1-8 ML Correction Assistance – Extracted Information

Figure 1-9 ML Correction Assistance – Enriched Data

View Request

In the **Electronic Journal**, you can view the details of the **Cheque Book Request** initiated through the email request. The **View Request** button will be enabled for the transactions that are submitted or completed. You can view the details of the email request by clicking the **View Request**.

Figure 1-10 View Request (Completed Transaction)

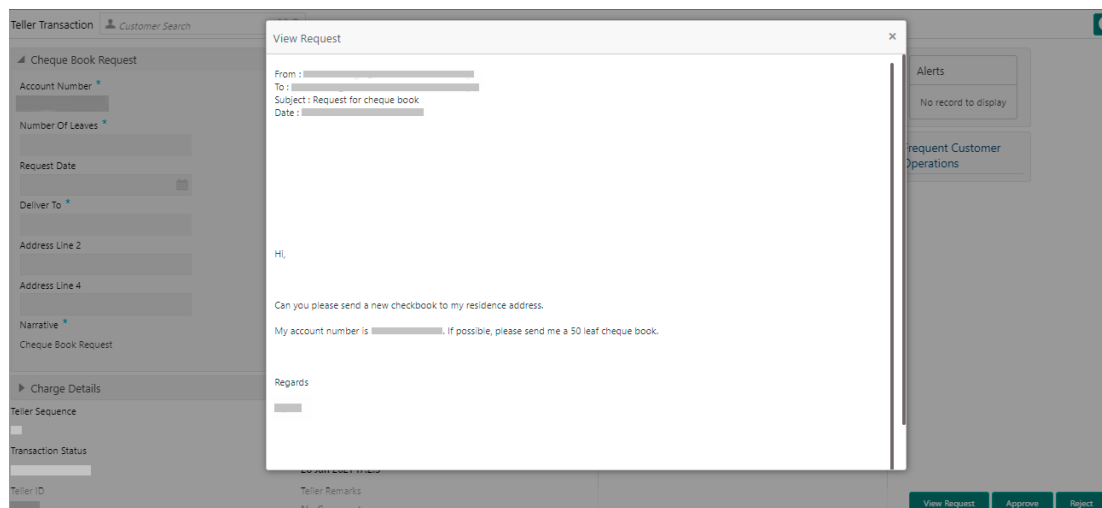

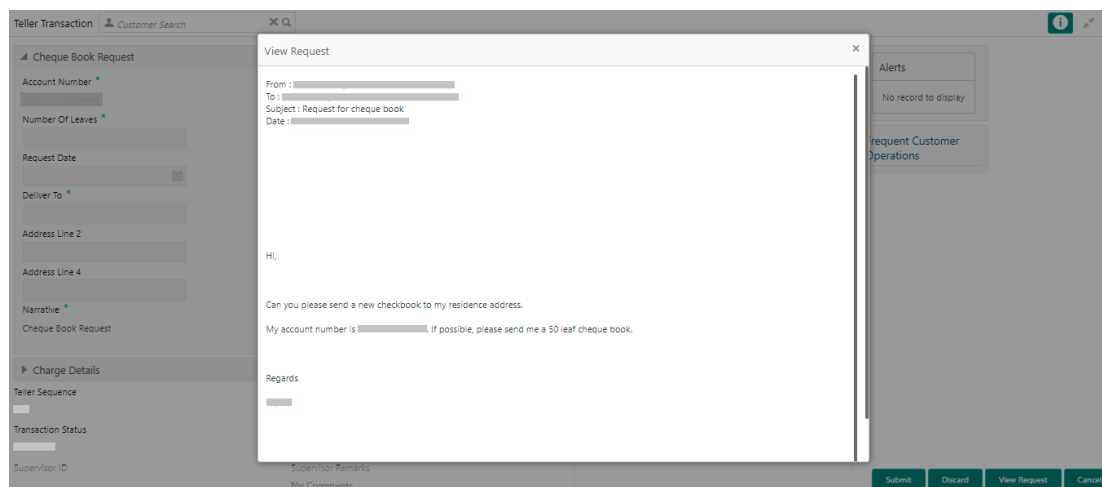

Figure 1-11 View Request (Submitted Transaction)

If sufficient details are provided in the email request for card block, the transaction will be processed until completion.

1.4.2 About Oracle Digital Assistant

The Oracle Digital Assistant (ODA) helps the Teller to reduce the time taken to access the transaction screens through automatic text/voice processing.

The ODA can be enabled by navigating to the user menu and selecting **Virtual Assistant** option.

Figure 1-12 Virtual Assistant

The virtual assistant supports the following use cases:

Table 1-11 ODA Use Cases

Use Case	Description
Teller can either type/say, Cash Withdrawal Account Number, Do Cash Withdrawal Account Number in ODA Chatbot.	<p>Based on the input provided, the Cash Withdrawal screen will be opened automatically with the specified account number. For example, refer to Figure 1-13.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p>Note:</p> <p>Teller needs to type/say the specific account number while giving the input text/voice.</p> </div>

Table 1-11 (Cont.) ODA Use Cases

Use Case	Description
Teller can either type/say, Cash Deposit Account Number, Do Cash Deposit Account Number in ODA Chatbot.	Based on the input provided, the Cash Deposit screen will be opened with the specified account number. For example, refer to Figure 1-13 .
Teller can type/say the name of the operation like Open Teller Batch or Open My Batch .	If the Teller batch is closed, the ODA will check the current Till balance and prompt for confirmation from Teller. Once the Teller confirms, then it will open the teller batch. In case the Teller batch is already open, a response message (Teller batch already open) will be displayed. For example, refer to Figure 1-14 .
Teller can type/say the name of the operation like Check Batch Status, What is my Batch Status, or Check Batch .	Based on the input, the following conditions apply: <ul style="list-style-type: none"> • If the Teller batch is open, the ODA will show the message Your Teller Batch is Open. • If the Teller batch is closed, the ODA will show the message Your Teller Batch is Closed and prompts Do you want to open your Batch with the options (Yes – select to open the Teller batch or No – select if it is not required to open the Teller batch).

Figure 1-13 Use Case with Account Number

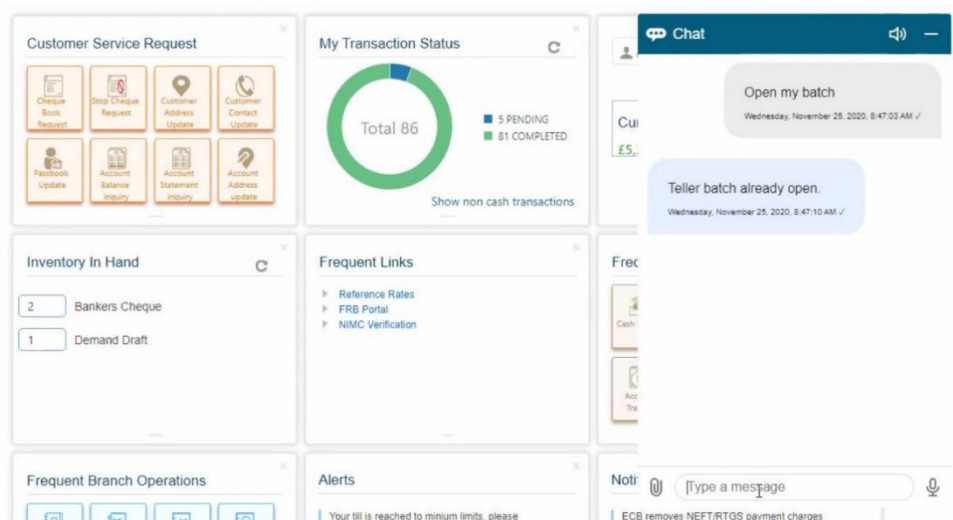

Figure 1-14 Use Case without Account Number

1.4.3 About Virtual Identifier

The virtual identifier is used to validate the specified account number of the customer.

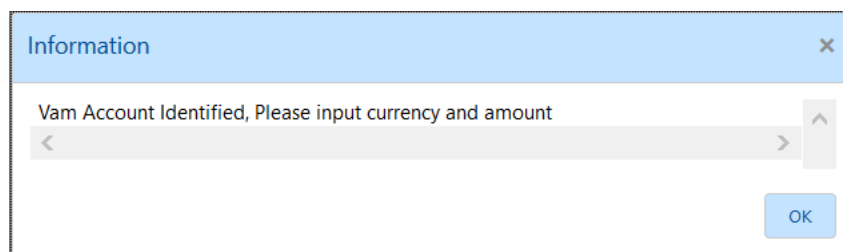

The virtual identifier is supported for the following screens:

- Cash Deposit
- Miscellaneous Customer Credit
- Account Transfer
- In-House Cheque Deposit

Validations

If Virtual Identifier is enabled, the validation is performed as follows:

- After you specify the account number, and on tab out, the system will validate the specified account number.
- If the account number is invalid, the system prompts an information message to input the currency and amount.
- Once the currency and amount are entered, the virtual identifier service will be invoked to validate if it is a valid virtual account or not.

Figure 1-15 Virtual Identifier – Information Message

1.4.4 About Amount-Based Signature Verification

The Teller can use the "Amount-Based Signature Verification" feature to verify the signature displayed in the Customer Information widget while performing the transactions.

To enable/disable this feature, configure the value as Y or N in the `AMOUNT_BASED_SV` flag. This flag is present in the `srv_tm_bc_param_dtls` table in the transaction domain.

The following use cases are applicable to this feature:

Table 1-12 Amount-Based Signature Verification

Use Case	Description
Amount-based signature verification is disabled	When the user specifies the Account Number in a transaction screen and presses the Tab key, the system displays the signature in the Customer Information widget.
Amount-based signature verification is enabled	When the user specifies the Account Number and Amount in a transaction screen and presses the Tab key, the system displays the following details of signature in the Customer Information widget: <ul style="list-style-type: none">• Signature• Signature Type• Group ID• Number of Signatories

1.5 Keyboard Navigation for Transaction Screens

The keyboard navigation can be used as an alternative method to navigate through interactive elements on a screen – fields, buttons, data segments, tables, etc. It can be used to navigate through the application, input the necessary values, and perform the transactions.

The keyboard navigation for various operations and their descriptions are as follows:

Table 1-13 Keyboard Navigation

Operation	Description of Navigation
Input Values in Fields	After you launch the transaction screen, press the Tab key to navigate to the desired field, and specify the value.
Select Date	To select the appropriate date, perform the following steps: <ol style="list-style-type: none"> 1. Press Tab/Shift + Tab keys to navigate to the desired calendar icon. 2. Use Arrow keys to navigate to the desired date. 3. Press Enter key or Spacebar to select the date.
Select from Drop-down Lists	To select a value from the drop-down list, perform the following steps: <ol style="list-style-type: none"> 1. Press Tab/Shift + Tab keys to navigate to the desired drop-down list. 2. Use Arrow keys to navigate to the desired value. 3. Press Enter key to select the value.
Select from List of Values	To select a value from the list of values, perform the following steps: <ol style="list-style-type: none"> 1. Press Tab/Shift + Tab keys to navigate to the desired list of values. 2. Press Enter key or Spacebar to enter into the list of values. 3. If the exact value is known, specify the value in the search field, and press the Tab key to navigate to the Fetch button. Press Enter key to select the Fetch button. The results will be fetched based on the input value. 4. Press the Tab key to navigate to the results. 5. Use Arrow keys to navigate to the desired value. 6. Press Spacebar to select the value.

Table 1-13 (Cont.) Keyboard Navigation

Operation	Description of Navigation
Navigating through Tables	To specify/select value in the fields/cells of a table, perform the following steps: <ol style="list-style-type: none"> 1. Press Tab/Shift + Tab keys to navigate to the desired data segment, and navigate to the desired table row. 2. Press Enter key to enter into the data fields/cells. 3. Specify the necessary value in the fields. 4. If there are more cells in the row, use the Tab key to navigate to the other cells and specify the values. 5. After you specify the values in the cells, press the Esc key to change the selection from cell to row. 6. Press the Tab key to navigate to the other tables/data segments/fields/buttons.
Select Option Buttons/Icons	To select option buttons, perform the following steps: <ol style="list-style-type: none"> 1. Press Tab/Shift + Tab keys to navigate to the desired option button. 2. Press Enter key or Spacebar to select the desired option button.
Perform Transaction	To specify/select the necessary values and submit a transaction using keyboard navigation, perform the following steps: <ol style="list-style-type: none"> 1. Use the appropriate shortcut keys to navigate to the fields, buttons, data segments, tables, etc., and specify/select the necessary values. 2. After you specify the necessary values, use appropriate shortcut keys to select Submit button to complete a transaction.

1.6 About Business Process Codes

Business Process Code defines the various stages for servicing transactions.

The screens available in the Oracle Banking Branch application use the conductor flow. As a part of Oracle Banking Branch releases, a set of default process codes are factory-shipped for the following customer servicing transactions:

- **Customer Address Update**
- **Account Address Update**
- **Customer Contact Details Update**

 **Note:**

For more information on the business process, refer to the *Servicing Configurations User Guide*.

2

Branch Operations

The Branch Manager, Vault Teller, or Teller can use branch operations to perform the internal activities done at the branch where the customer is not involved.

This topic contains the following subtopics:

- [TC Denomination Enquiry](#)
The **TC Denomination Enquiry** screen is used to enquire the currency-wise details of the TCs in the branch vault.
- [Open Branch Batch](#)
The **Open Branch Batch** screen is used to initiate the branch operations for the posting date. The Supervisor or Branch Manager with necessary access can open this screen.
- [Open Vault Batch](#)
The Vault Teller can use **Open Vault Batch** screen to open a vault batch on a specified date.
- [Open Teller Batch](#)
The **Open Teller Batch** screen is used to open a teller batch on a specified date.
- [Current Open Tills](#)
The **Current Open Tills** screen is used to view the open tills or vault for the branch during the day or before performing the end-of-day activity.
- [Branch Breach Limits](#)
The **Branch Breach Limits** screen helps to view the details of Till or Vault, which is breaching the currency limits along with the current balance position.
- [Till Vault Position](#)
The **Till Vault Position** screen is used to view the cash position of all the currencies at any time for the *Teller ID* or *Vault ID*, which is logged in for the current posting date. It also shows the denomination details.
- [Branch Total Position](#)
The supervisor can use this screen to view the currency-wise cash position of all the Tellers and Vault Teller on the posting date for the logged-in branch.
- [Close Teller Batch](#)
The **Close Teller Batch** screen is used to close the teller batch for the given posting date.
- [Close Vault Batch](#)
The **Close Vault Batch** screen is used to close the vault batch for a specific date.
- [Close Branch Batch](#)
The **Close Branch Batch** screen is used to close the branch batch after confirming that all the branch transactions have been accounted for in the account books.
- [Book Shortage](#)
The Teller or Vault Teller can use the **Book Shortage** screen to book the shortage if the actual or physical cash present is less than the system cash.

- **Book Overage**
The Teller or Vault Teller can use this screen to book the physical cash held in a particular currency, which exceeds the cash in that currency shown in the system.
- **Teller Session**
The teller can perform several transactions for a customer in a single session. All the transactions done by the customer are grouped under a single session. At the end of the session, the teller accepts the cumulative amount (of all the transactions done in the session) from the customer.

2.1 TC Denomination Enquiry

The **TC Denomination Enquiry** screen is used to enquire the currency-wise details of the TCs in the branch vault.

The currency-wise details include:

- Denomination
- Count
- Series
- Serial Number
- Amount

To enquire the TC denomination:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **TC Denomination Enquiry** or specify **TC Denomination Enquiry** in the search icon bar and select the screen.

The **TC Denomination Enquiry** screen is displayed.

Figure 2-1 TC Denomination Enquiry

Denomination Code	Description	System Count	Series	Start Number	End Number	Amount
No data to display.						

2. On the **TC Denomination Enquiry** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 2-1 TC Denomination Enquiry - Field Description

Field	Description
Branch Code	Displays the logged-in branch code.
Posting Date	Displays the current posting date of the branch.
Till Vault Indicator	Select the Till Vault Indicator from the drop-down values (Till or Vault).
Till ID	Displays the Till ID.
TC Currency	Click the search icon, and select the TC currency from the list of values.
Issuer Code	Click the search icon, and select the issuer code from the list of values.
Refresh	After you specify the TC Currency and Issuer Code fields, click Refresh to fetch and display the details of the TC.
Denomination Code	Displays the denomination code of the TC.
Description	Displays the description of the denomination code.
System Count	Displays the system count.
Series	Displays the series.
Start Number	Displays the start number.
End Number	Displays the end number.
Amount	Displays the amount.

2.2 Open Branch Batch

The **Open Branch Batch** screen is used to initiate the branch operations for the posting date. The Supervisor or Branch Manager with necessary access can open this screen.

The Teller or Vault Teller can perform the branch operations only after the branch batch is submitted for the posting date. When a branch batch is closed for the day, the system derives the next working day automatically, based on the branch calendar.

To open a branch batch:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Open Branch Batch** or specify **Open Branch Batch** in the search icon bar and select the screen.

The **Open Branch Batch** screen is displayed.

Figure 2-2 Open Branch Batch

The screenshot shows the 'Open Branch Batch' screen. At the top, there is a header 'Open Branch Batch'. Below it, there is a 'Posting Date' field with a calendar icon. At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

- On the **Open Branch Batch** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-2 Open Branch Batch - Field Description

Field	Description
Posting Date	<p>Indicates the date on which the branch batch needs to be opened.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the system displays the current date.</p> </div>

- Click **Submit**.

The branch batch is opened for the specified posting date.

 **Note:**

Opening branch batch indicates to the head office that the branch is open for business operations on the specified posting date. You can open a Teller batch for the posting date only after the branch batch is opened.

2.3 Open Vault Batch

The Vault Teller can use **Open Vault Batch** screen to open a vault batch on a specified date.

On the specified posting date, the Vault Teller can open only one vault batch. To open another vault batch, the vault batch which is opened previously needs to be closed. All the tellers buy additional cash and sell their excess cash to the Vault Teller. When this screen is launched, the system will default the cash balances.

To open a vault batch:

- On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Open Vault Batch** or specify **Open Vault Batch** in the search icon bar and select the screen.

The **Open Vault Batch** screen is displayed.

Figure 2-3 Open Vault Batch

The screenshot shows the 'Open Vault Batch' interface. At the top, there is a 'Posting Date' field with a calendar icon. Below it is a table with four columns: 'Currency', 'Total Cash', 'Cash Available', and 'Shortage/Overage Amount'. The 'Cash Available' column contains values like 1000000, 2000000, and 3000000. Below this is a larger table with eight columns: 'Currency', 'Denomination', 'Total Units', 'Total Value', 'System Units', 'System Total', 'Shortage/Overage Units', and 'Shortage/Overage Amount'. At the bottom, there are two summary fields: 'Total Cash Amount' and 'Denomination Total'. To the right of these are buttons for 'Submit', 'Clear', and 'Cancel'. A 'Validate Denominations' button is located at the bottom right of the main table area.

2. On the **Open Vault Batch** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-3 Open Vault Batch - Field Description

Field	Description
Posting Date	Indicates the date on which the vault batch needs to be opened.  Note: By default, the system displays the current date.
Currency	Displays the currency code.
Total Cash	Specify the total cash for a particular currency, physically present in the bank vault, at the beginning of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the vault at the beginning of the current posting date.  Note: The amount shown in this column depends on the cash transactions that were carried out by the vault until the last posting date.

Table 2-3 (Cont.) Open Vault Batch - Field Description

Field	Description
Shortage/Overage Amount	Displays the difference between the total cash and the cash available in the Vault, at the end of the current posting date.
Currency	Displays the currency code.
Denomination	Displays the denomination code.
Total Units	Specify the total units available while closing the batch.
Total Value	Displays the total value based on the total units.
System Units	Displays the units available in the system.
System Total	Displays the total value available in the system.
Shortage/Overage Units	Displays the shortage/overage units.
Shortage/Overage Amount	Displays the shortage/overage amount.
Total Cash Amount	Displays the total cash amount.
Denomination Total	Displays the total denomination value with the currency.
Validate Denominations	Click this button to calculate and display the Total Cash and Shortage/Overage Amount fields based on the currency selected.

3. Click **Submit**.

The vault batch is opened for the specified posting date.

 **Note:**

During the vault batch opening, the system will internally transfer the available balance from the Primary vault of the branch to the current open Vault ID. The Vault Teller can perform the relevant vault operations for the posting date. The system does not allow to open the vault batch if the physical cash entered is not the same as the system cash.

2.4 Open Teller Batch

The **Open Teller Batch** screen is used to open a teller batch on a specified date.

A Teller can initiate the teller batch with the current cash position that has been retained from the previous day or start with zero cash and subsequently buy cash from the vault. The system will default the cash balances on opening a teller batch.

To open a teller batch:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Open Teller Batch** or specify **Open Teller Batch** in the search icon bar and select the screen.

The **Open Teller Batch** screen is displayed.

Figure 2-4 Open Teller Batch

The screenshot shows the 'Open Teller Batch' interface. At the top, there is a 'Posting Date' field with a calendar icon. Below it is a table with columns: Currency, Total Cash, Cash Available, and Shortage/Overage Amount. The table has three rows with values: USD (1000000, 1000000, 0), EUR (1000000, 1000000, 0), and GBP (1000000, 1000000, 0). Below this is a larger table with columns: Currency, Denomination, Total Units, Total Value, System Units, System Total, Shortage/Overage Units, and Shortage/Overage Amount. The table has five rows, with the third row highlighted in blue. At the bottom, there are two summary fields: 'Total Cash Amount' (1000000) and 'Denomination Total' (1000000). A 'Validate Denominations' button is located at the bottom right, along with 'Submit', 'Clear', and 'Cancel' buttons.

2. On the **Open Teller Batch** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-4 Open Teller Batch - Field Description

Field	Description
Posting Date	Indicates the date on which the vault batch needs to be opened.  Note: By default, the system displays the current date.
Currency	Displays the currency code.
Total Cash	Specify the total cash for a particular currency, physically present in the bank teller, at the beginning of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the vault at the beginning of the current posting date.  Note: The amount shown in this column depends on the cash transactions that were carried out by the vault until the last posting date.

Table 2-4 (Cont.) Open Teller Batch - Field Description

Field	Description
Shortage/ Overage Amount	Displays the difference between the total cash and the cash available with the Teller, at the end of the current posting date. Based on this difference, the overage or the shortage amount is displayed. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>An overage indicates that the physical cash with the Teller is more than the available cash as calculated by the system. A shortage indicates that the available cash calculated by the system is more than the physical cash present with the Teller.</p> </div>
Currency	Displays the currency code.
Denomination	Displays the denomination code.
Total Units	Specify the total units available while closing the batch.
Total Value	Displays the total value based on the total units.
System Units	Displays the units available in the system.
System Total	Displays the total value available in the system.
Shortage/Overage Units	Displays the shortage/overage units.
Shortage/Overage Amount	Displays the shortage/overage amount.
Total Cash Amount	Displays the total cash amount.
Denomination Total	Displays the total denomination value with the currency.
Validate Denominations	Click this button to calculate and display the Total Cash and Shortage/Overage Amount fields based on the currency selected.

3. Click **Submit**.

The teller batch is opened for the specified posting date.

 **Note:**

The Teller can perform the relevant teller operations for the posting date. The system does not allow to open the vault batch if the physical cash entered is not the same as the system cash. The system also allows to re-open the Teller batch for the current system date.

2.5 Current Open Tills

The **Current Open Tills** screen is used to view the open tills or vault for the branch during the day or before performing the end-of-day activity.

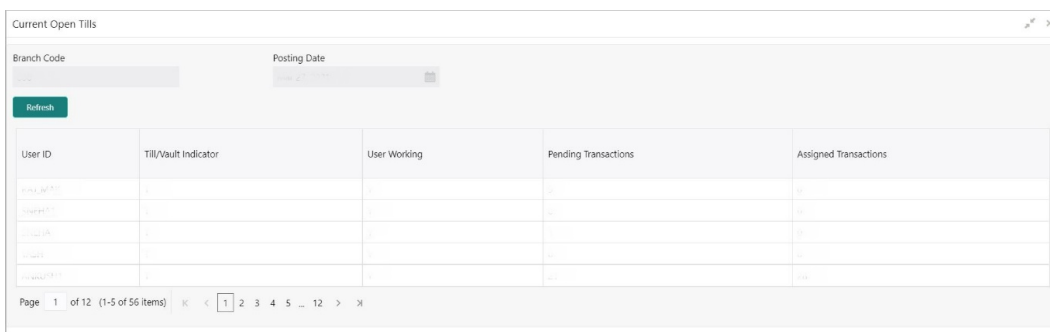

The branch user can use this screen to view the list of logged-in Tellers and to view the following transactions under each Teller or Vault Teller's ID:

- Pending
- Unassigned
- Assigned
- Tanked

To view the open tills or vault:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Current Open Tills** or specify **Current Open Tills** in the search icon bar and select the screen. The **Current Open Tills** screen is displayed.

Figure 2-5 Current Open Tills

2. On the **Current Open Tills** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-5 Current Open Tills - Field Description

Field	Description
Branch Code	Displays the logged-in branch.
Posting Date	Indicates the date on which the current open tills need to be enquired. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the system displays the current date.</p> </div>
Refresh	Click Refresh to refresh the details.
User ID	Displays the list of Tellers or Vault Tellers of the branch.
Till/Vault Indicator	Displays the checkbox if the User ID is a Vault Teller.
User Working	Displays the user working as Y or N.
Pending Transactions	Displays the number of pending transactions for the Teller or Vault Teller.
Assigned Transactions	Displays the number of assigned transactions for the Teller or Vault Teller.

2.6 Branch Breach Limits

The **Branch Breach Limits** screen helps to view the details of Till or Vault, which is breaching the currency limits along with the current balance position.

In addition, the branch supervisor can view the branch's total cash position and its breaching limits for the posting date.

To view the branch breaching limits:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Branch Breach Limits** or specify **Branch Breach Limits** in the search icon bar and select the screen.

The **Branch Breach Limits** screen is displayed.

Figure 2-6 Branch Breach Limits

2. On the **Branch Breach Limits** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-6 Branch Breach Limits - Field Description

Field	Description
Branch Code	Displays the logged-in branch.
Posting Date	Indicates the date on which the branch breaching limits needs to be enquired. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: By default, the system displays the current date.</p> </div>
Refresh	Click this icon to refresh the details.
Tills Breaching Limit	Specify the fields under this section.
User ID	Displays the list of Tellers/Vault Tellers of the branch.

Table 2-6 (Cont.) Branch Breach Limits - Field Description

Field	Description
Vault User	Displays the checkbox if the User ID is a Vault Teller.
Currency	Displays the list of currencies in which the User ID has performed the transactions.
Minimum Limit	Displays the minimum till balance that needs to be maintained for the User ID and currency combination.
Maximum Limit	Displays the maximum till balance that needs to be maintained for the User ID and currency combination.
Current Till Balance	Displays the current till balance based on the till cash position for the specified currency.
Branch Breaching Limit	Displays the values under this section.
Branch Code	Displays the code of the logged-in branch.
Currency	Displays the currency code.
Minimum Limit	Displays the minimum limit that needs to be maintained for the branch.
Maximum Limit	Displays the maximum limit that needs to be maintained for the branch.
Current Total Balance	Displays the branch total cash position, currency-wise.

2.7 Till Vault Position

The **Till Vault Position** screen is used to view the cash position of all the currencies at any time for the *Teller ID* or *Vault ID*, which is logged in for the current posting date. It also shows the denomination details.

To view the cash position of all the currencies:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Till Vault Position** or specify **Till Vault Position** in the search icon bar and select the screen.

The **Till Vault Position** screen is displayed.

Figure 2-7 Till Vault Position

The screenshot shows the 'Till Vault Position' interface. At the top, there are search filters for 'Branch Code', 'Branch Posting Date', and 'Teller/Vault ID'. Below these is a 'Refresh' button. The main content is divided into two sections: 'Currency Details' and 'Denomination Details'. Both sections currently display 'No data to display.' and include pagination controls showing 'Page 1 (0 of 0 items)'.

Currency	Opening Balance	Incoming Cash Amount	Outgoing Cash Amount	Total Cash	Till/Vault Indicator
No data to display.					

Denomination Code	Denomination Value	Opening Balance	Incoming Cash Amount	Outgoing Cash Amount	Total Cash	Units
No data to display.						

- On the **Till Vault Position** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-7 Till Vault Position - Field Description

Field	Description
Branch Code	Displays the logged-in branch.
Branch Posting Date	Displays the date on which the Till/Vault batch is opened.
Teller/Vault ID	Displays the logged-in Teller ID or Vault Teller ID.
Currency Details	Specify the fields under this section.
Currency	Displays the currency code.
Opening Balance	Displays the opening balance of the till or vault.
Incoming Cash Amount	Displays the incoming cash in the till or vault for the current posting date.
Outgoing Cash Amount	Displays the outgoing cash in the till or vault for the current posting date.
Total Cash	Displays the total cash available in the till or vault.
Till Vault Indicator	Displays whether the currency details apply to Till or Vault. (T or V)
Denomination Details	Displays the denomination details under this section.
Denomination Code	Displays the denomination code maintained for the currency.
Denomination Value	Displays the denominations maintained for the currency.
Opening Balance	Displays the opening balance in the Till or vault in terms of denominations.
Incoming Cash Amount	Displays the incoming cash in the Till or vault in terms of denominations.
Outgoing Cash Amount	Displays the outgoing cash in the Till or vault in terms of denominations.
Total Cash	Displays the total cash currently available in the Till or vault for the day in terms of denominations.
Units	Displays the total units available for the specific denomination code.

2.8 Branch Total Position

The supervisor can use this screen to view the currency-wise cash position of all the Tellers and Vault Teller on the posting date for the logged-in branch.

To view the currency wise cash position:

- On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Branch Total Position** or specify **Branch Total Position** in the search icon bar and select the screen.

The **Branch Total Position** screen is displayed.

Figure 2-8 Branch Total Position

2. On the **Branch Total Position** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-8 Branch Total Position - Field Description

Field	Description
Branch Code	Displays the logged-in branch.
Posting Date	Indicates the date on which the teller totals position need to be enquired. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: By default, the system displays the current date.</p> </div>
Currency	Displays the currency code for which the teller totals details needs to be displayed.
Teller ID	Displays the logged-in teller ID from the LOV.
All Till	Select this radio button to display all the open Teller Till details of the day.
All Vault	Select this radio button to display all the open Vault details of the day.
All Till and Vault	Select this radio button to display all the open Till and open Vault details of the day.
Query	Displays the details if you click this icon.
Currency	Displays the currency code for which the cash position is shown.
Teller ID	Displays the Teller ID for which the cash position is shown.
Opening Balance	Displays the opening balance of the Teller ID for the specific currency.
Incoming Cash	Displays the total incoming cash received in the Till.
Outgoing Cash	Displays the outgoing cash moved out of the Till.
Closing Balance	Displays the total amount pending in the Till.

2.9 Close Teller Batch

The **Close Teller Batch** screen is used to close the teller batch for the given posting date.

The system allows closing the teller batch only when the below conditions are met:

- Verify that all the transactions are successfully processed to a logical end. If there are any pending transactions, the system prompts to either complete or reject the transaction.
- Verify that there is a difference between the physical cash and the cash calculated by the system. You need to book the overage or shortage accordingly, and then each Teller can close the teller batch for that day.
- Verify that the teller cash position retains the minimum limit for every currency as maintained in the User limits. If you breach the minimum limit, the system prompts the error to maintain the required minimum balance.

Note:

The teller batch can be opened and closed only once for the posting date.

To close the teller batch:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Close Teller Batch** or specify **Close Teller Batch** in the search icon bar and select the screen.

The **Close Teller Batch** screen is displayed.

Figure 2-9 Close Teller Batch

The screenshot shows the 'Close Teller Batch' interface. At the top, there is a 'Posting Date' field with a calendar icon. Below it is a table with columns: Currency, Total Cash, Cash Available, and Shortage/Overage Amount. The table contains the text 'No data to display.' Below this is another table with columns: Currency, Denomination, Total Units, Total Value, System Units, System Total, Shortage/Overage Units, and Shortage/Overage Amount. This table also contains 'No data to display.' Below the second table are two summary rows: 'Total Cash Amount' and 'Denomination Total'. At the bottom of the screen is a section titled 'TC Denomination Details' with a right-pointing arrow. In the bottom right corner, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

2. On the **Close Teller Batch** screen, specify the details. For more information on fields, refer to the field description table.

Table 2-9 Close Teller Batch - Field Description

Field	Description
Posting Date	Indicates the date on which the teller batch needs to be closed.  Note: By default, the system displays the current date.
Currency	Displays the currency code in which the Teller deals.
Total Cash	Specify the total cash for a particular currency, physically present in the bank Teller, at the end of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the teller at the end of the current posting date.  Note: The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.
Shortage/ Overage Amount	Displays the difference between the Total Cash and the Cash Available . Based on this difference, the overage or the shortage amount is displayed.  Note: An overage indicates that the physical cash with the Teller is more than the available cash as calculated by the system. A shortage indicates that the available cash calculated by the system is more than the physical cash present with the Teller.
Currency	Displays the currency code.
Denomination	Displays the denomination code.
Total Units	Specify the total units available while closing the batch.
Total Value	Displays the total value based on the total units.
System Units	Displays the units available in the system.
System Total	Displays the total value available in the system.
Shortage/Overage Units	Displays the shortage/overage units.
Shortage/Overage Amount	Displays the shortage/overage amount.
Total Cash Amount	Displays the total cash amount.
Denomination Total	Displays the total denomination value with the currency.

3. Specify the TC denomination details. For information on the fields in the **TC Denomination Details** segment, refer to [Add TC Denomination Details](#).
4. Click **Submit**.

The cash balance is updated, and the teller batch is closed for the posting date.

 **Note:**

If there is any overage or shortage, the system displays an error message stating that the cash/TC is not balanced for the Teller ID. Also, if any of the conditions mentioned above fail, the system displays an appropriate error message on submit.

- [Add TC Denomination Details](#)
The TC Denomination Details data segment provides the denomination details for the Traveller's Cheque. It is also used to validate the denominations.

2.9.1 Add TC Denomination Details

The TC Denomination Details data segment provides the denomination details for the Traveller's Cheque. It is also used to validate the denominations.

Figure 2-10 TC Denomination Details

Validate the TC denomination details. For more information on fields, refer to the field description table.

Table 2-10 TC Denomination Details - Field Description

Field	Description
TC Currency	Displays the TC currency code in which the Teller deals.
Total TC Amount	Displays the total TC amount for a particular currency, physically present in the bank Teller, at the end of the current posting date.

Table 2-10 (Cont.) TC Denomination Details - Field Description

Field	Description
TC Available	<p>Displays the TC for a particular currency, which is available in the teller at the end of the current posting date.</p> <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.</p> </div>
Shortage/ Overage Amount	<p>Displays the difference between the total cash and the cash available with the Teller, at the end of the current posting date. Based on this difference, the overage or the shortage amount is displayed.</p> <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>An overage indicates that the physical cash with the Teller is more than the available cash as calculated by the system. A shortage indicates that the available cash calculated by the system is more than the physical cash present with the Teller.</p> </div>
Issuer Code	Displays the issuer code.
TC Currency	Displays the currency code of the TC.
TC Denomination	Displays the denomination code of the TC.
TC Count	Specify the TC count available with the Teller at the end of the current posting date.
Series	Displays the TC series.
Start Number	Displays the start number.
End Number	Displays the end number.
TC Amount	Displays the total TC amount.
TC Denomination Value	Displays the total denomination value with the TC currency.
System Count	Displays the system count.
Shortage/Overage Units	Displays the shortage/overage units.
Shortage/Overage Amount	Displays the shortage/overage amount.
Total TC Amount	Displays the total TC amount.
TC Denominations	Displays the TC denomination code.

Table 2-10 (Cont.) TC Denomination Details - Field Description

Field	Description
Validate TC Denominations	Click this button to calculate and display the Total Cash and Shortage/Overage Amount fields based on the currency selected.

2.10 Close Vault Batch

The **Close Vault Batch** screen is used to close the vault batch for a specific date.

The Vault Teller can log in and close the vault batch only if the below conditions are met:

- Verify if there is a difference in the physical cash and that calculated by the system, the overage or shortage has to be booked accordingly. After the overage or shortage is booked, the Vault Teller can close the vault batch for that day.
- Verify that the cash position of the Vault Teller retains the minimum limit for every currency as maintained in the User limits. If the minimum limit is breached, the system prompts the error to maintain the required minimum balance.

 **Note:**

The Vault Teller can close the vault batch even if the Tills are open. When the Vault Batch is closed, the user will not be able to post transactions like **Buy Cash from Vault** that involve Vault.

To close the vault batch:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Close Vault Batch** or specify **Close Vault Batch** in the search icon bar and select the screen.

The **Close Vault Batch** screen is displayed.

Figure 2-11 Close Vault Batch

2. On the **Close Vault Batch** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-11 Close Vault Batch - Field Description

Field	Description
Posting Date	Indicates the date on which the vault batch needs to be closed. Note: By default, the system displays the current date.
Currency	Displays the currency code in which the Vault Teller deals.
Total Cash	Specify the total cash for a particular currency, physically present in the bank Vault Teller, at the end of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the Vault Teller at the end of the current posting date. Note: The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.
Shortage/Overage Amount	Displays the difference between the total cash and the cash available in the Vault, at the end of the current posting date.
Currency	Displays the currency code.
Denomination	Displays the denomination code.

Table 2-11 (Cont.) Close Vault Batch - Field Description

Field	Description
Total Units	Specify the total units available while closing the batch.
Total Value	Displays the total value based on the total units.
System Units	Displays the units available in the system.
System Total	Displays the total value available in the system.
Shortage/Overage Units	Displays the shortage/overage units.
Shortage/Overage Amount	Displays the shortage/overage amount.
Total Cash Amount	Displays the total cash amount.
Denomination Total	Displays the total denomination value with the currency.

- Specify the denomination details for the Traveller's Cheque. For information on the fields in the TC Denomination Details segment, refer to [Add TC Denomination Details](#).
- Click **Submit**.

The cash balance is updated and the vault batch is closed for the posting date.

 **Note:**

During vault batch closure, the system will internally transfer the closing balance from the current open Vault ID to the Primary vault of the branch. If there is any overage or shortage, the system displays an error message stating that the cash is not balanced for the Teller ID. Also, if any of the conditions mentioned above fail, the system displays an appropriate error on submit.

2.11 Close Branch Batch

The **Close Branch Batch** screen is used to close the branch batch after confirming that all the branch transactions have been accounted for in the account books.

The posting date for closing a branch batch must be the same date on which the respective branch batch was opened. You need to close all the teller batches and the vault batches of the branch before closing the branch batch for that posting date. Archiving is done as a part of **Close Branch Batch** as per the archival days set up for the branch.

To close the branch batch:

- On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Close Branch Batch** or specify **Close Branch Batch** in the search icon bar and select the screen.

The **Close Branch Batch** screen is displayed.

Figure 2-12 Close Branch Batch

2. On the **Close Branch Batch** screen, specify the fields. For more information on fields, refer to the field description table.

Table 2-12 Close Branch Batch - Field Description

Field	Description
Posting Date	Indicates the date on which the branch batch needs to be closed. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: By default, the system displays the current date.</p> </div>

3. Click **Submit**.
The branch batch is closed for the specified posting date.

2.12 Book Shortage

The Teller or Vault Teller can use the **Book Shortage** screen to book the shortage if the actual or physical cash present is less than the system cash.

While booking the shortage, the system lowers the cash balance to bring it in sync with the physical cash balance of the Teller by sending the difference to a cash shortage GL. Once the system cash and the physical cash are synchronized, the Teller can perform the cash balancing and close the Teller/Vault Teller batch for the posting date.

To book the shortage:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Book Shortage** or specify **Book Shortage** in the search icon bar and select the screen.

The **Book Shortage** screen is displayed.

Figure 2-13 Book Shortage

2. On the **Book Shortage** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 2-13 Book Shortage - Field Description

Field	Description
Transaction Amount	<p>Displays the local currency of the branch. Specify the amount that needs to be booked for the shortage.</p> <p> Note:</p> <p>The user can select another currency from the drop-down values in which the shortage amount is to be booked.</p>
Narrative	<p>Displays the default narrative <code>Book Shortage</code> and it can be modified.</p>

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the system reduces the cash balance by this transaction amount to synchronize with physical cash held with Teller.

- [Add Denomination Details](#)
The **Denomination** segment is used to view the denominations maintained for the transaction currency and enter the denomination units.

2.12.1 Add Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and enter the denomination units.

Make sure that the main transaction details are added to the transaction screen.

The denomination details for the withdrawal transactions (when cash is disbursed to the Customer) will be populated automatically based on the cash availability in the Teller's Till.

Figure 2-14 Denomination Details

The screenshot shows a 'Denomination' screen with two main sections: 'Bills' and 'Coins'. Each section contains a table with columns for 'Denom Code', 'Units', and 'Value'. Both tables are currently empty, displaying 'No data to display.' Below these sections are two input fields: 'Total Cash Amount' and 'Denomination Amount'. The 'Denomination Amount' field is populated with the value 'GBP0.00'.

Validate the denomination details. For more information on fields, refer to the field description table.

Table 2-14 Denomination Details - Field Description

Field	Description
Denom Code	Displays the unique denomination codes for each currency.
Units	Indicates the number of units for the specified denomination. <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the till contents are incremented for inflow transactions such as cash deposits and decremented for outflow transactions such as cash withdrawal. To reverse the transaction, you can specify units in negative.</p> </div>

Table 2-14 (Cont.) Denomination Details - Field Description

Field	Description
Value	<p>Displays the system-computed face value of the denomination based on the number of units.</p> <p> Note:</p> <p>For example, if the denomination code represents USD 100 and the unit is specified as 3, the value will be displayed as 300.</p>
Denomination Amount	<p>Displays the system-computed value of the denomination by multiplying the denomination value with the number of units.</p> <p> Note:</p> <p>For example, if the denomination code represents USD 100 and the number of units is 10, the denomination amount will be 1000.</p>
Total Cash Amount	<p>Displays the total cash amount.</p> <p> Note:</p> <p>The system computes the Denomination Amount and validates the amount if it is equal to the Total Cash Amount. It also prompts an error during saving if there is any difference.</p>

2.13 Book Overage

The Teller or Vault Teller can use this screen to book the physical cash held in a particular currency, which exceeds the cash in that currency shown in the system.

While booking a cash overage, the system passes the difference to a cash overage liability GL and increases the cash balance, and brings it to synchronize with the physical balance with the Teller. Once the system cash and the physical cash are synchronized, the Teller can perform cash balancing and close the Teller/Vault Teller batch for the posting date.

To book the overage:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Book Overage** or specify **Book Overage** in the search icon bar and select the screen.
The **Book Overage** screen is displayed.

Figure 2-15 Book Overage

2. On the **Book Overage** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 2-15 Book Overage - Field Description

Field	Description
Transaction Amount	<p>Displays the local currency of the branch. Specify the amount that needs to be booked for the overage.</p> <p> Note: The user can select another currency from the drop-down values in which the shortage amount is to be booked.</p>
Narrative	<p>Displays the default narrative Book Overage and it can be modified.</p>

3. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the system increases the cash balance by this transaction amount to synchronize with physical cash held with Teller.

2.14 Teller Session

The teller can perform several transactions for a customer in a single session. All the transactions done by the customer are grouped under a single session. At the end of the session, the teller accepts the cumulative amount (of all the transactions done in the session) from the customer.

This topic contains the following subtopics:

- [Start Teller Session](#)
The Teller can use the **Start Teller Session** screen to start the teller session for a customer.
- [Stop Teller Session](#)
The Teller can use the **Stop Teller Session** screen to stop the teller session for a customer.

2.14.1 Start Teller Session

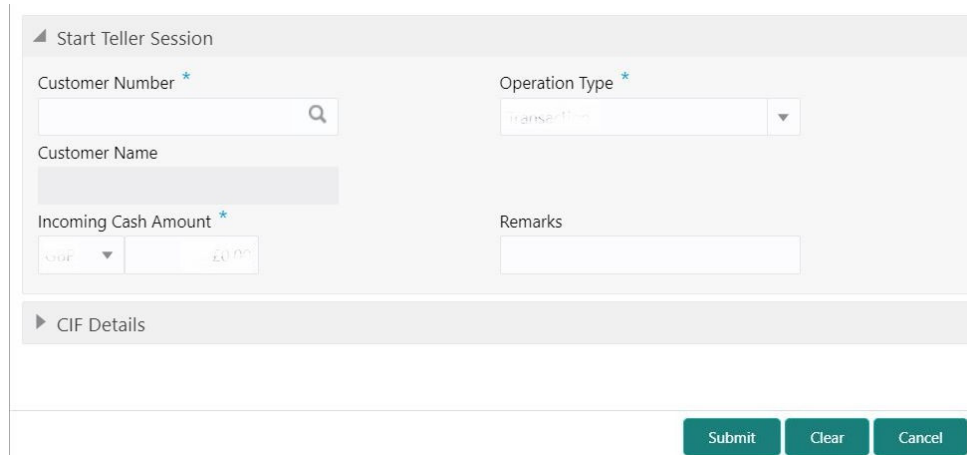

The Teller can use the **Start Teller Session** screen to start the teller session for a customer.

To start a teller session:

1. On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Start Teller Session** or specify **Start Teller Session** in the search icon bar and select the screen.

The **Start Teller Session** screen is displayed.

Figure 2-16 Start Teller Session

The screenshot shows the 'Start Teller Session' form. It includes the following fields and controls:

- Customer Number ***: A text input field with a search icon.
- Operation Type ***: A dropdown menu with 'transa:11' selected.
- Customer Name**: A text input field.
- Incoming Cash Amount ***: A text input field with a currency dropdown set to 'GBP' and a value of '£0.00'.
- Remarks**: A text input field.
- CIF Details**: A section header with a right-pointing arrow.
- Buttons**: 'Submit', 'Clear', and 'Cancel' buttons at the bottom right.

- On the **Start Teller Session** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 2-16 Start Teller Session - Field Description

Field	Description
Customer Number	Specify the customer number.  Note: You can also select from the list of values, which displays all the open and authorized CIF IDs maintained in the system.
Operation Type	Select the operation types of the customer from the drop-down list. The drop-down list shows the following values: <ul style="list-style-type: none"> • Transaction • Account/Contract • Both  Note: By default, the Transaction value is selected.
Incoming Cash Amount	Specify the cash amount at the start of the teller session.
Remarks	Enter remarks for the transaction.

- On the **Start Teller Session** screen, click on the **CIF Details** data segment. The **CIF Details** data segment is displayed with the fields.

Figure 2-17 CIF Details

The screenshot shows a web interface titled 'CIF Details'. It contains two data tables. The first table has columns for 'Select', 'Executor CIF Number', and 'Executor CIF Name'. Below it, a message states 'No data to display.' and a pagination control shows 'Page 1 (0 of 0 items)' with navigation arrows. The second table has columns for 'Select', 'Beneficial Owner CIF Number', and 'Beneficial Owner CIF Name'. It also shows 'No data to display.' and the same pagination control. There are '+' and '-' buttons in the top right of each table area.

- Specify the CIF details. For more information on fields, refer to the field description table.

Table 2-17 CIF Details - Field Description

Field	Description
Executor CIF Number	When you press the Tab key, the system defaults the value which can be modified.
Executor CIF Name	Displays the executor CIF.
Beneficial Owner CIF Number	Select the desired value from the option list, which displays all the open and authorized CIF IDs maintained in the system.
Beneficial Owner CIF Number	Displays the beneficial owner's CIF number.

- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

2.14.2 Stop Teller Session

The Teller can use the **Stop Teller Session** screen to stop the teller session for a customer.

To stop a teller session:

- On the Homepage, from **Teller** mega menu, under **Branch Operations**, click **Stop Teller Session** or specify **Stop Teller Session** in the search icon bar and select the screen.

The **Stop Teller Session** screen is displayed.

Figure 2-18 Stop Teller Session

2. On the **Stop Teller Session** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 2-18 Stop Teller Session - Field Description

Field	Description
Customer Number	Displays the customer number associated with the selected session ID.  Note: When you launch the Stop Teller Session , its corresponding customer number will be populated in this field.
Session ID	The system defaults the session ID started.
Incoming Cash Amount	Displays the incoming cash amount that was entered at the start of the teller session.
Difference Amount	Displays the difference amount by which the total transaction amount in the session exceeds the incoming cash amount or is less than the incoming cash amount.
Cash In/ Out	Displays in/out based on the difference amount value as IN or OUT .

- On the **Stop Teller Session** screen, click on the **Teller Transaction Details** data segment.

The **Teller Transaction Details** data segment is displayed.

Figure 2-19 Teller Transaction Details

Transaction Reference No	Function Id	Teller Sequence Number	Transaction Amount	Total Charge Amount
No data to display.				

Page 1 (0 of 0 items) < 1 >

- On the **Teller Transaction Details** segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-19 Teller Transaction Details - Field Description

Field	Description
Transaction Reference No	Displays the reference number of the transactions completed within the teller session.
Function Id	Displays the Function ID of the transactions that occurred within the teller session.
Teller Sequence Number	Displays the unique sequence number generated for the teller to check the transaction in EJ Log.
Transaction Amount	Displays the Total Transaction Amount for the particular Transaction Reference No.
Total Charge Amount	Displays the Total Charge Amount for the specified Transaction Reference No . Click on the eye button to view the individual charges maintained for the transaction.

- On the **Stop Teller Session** screen, click on the **Teller Session Denomination Details** data segment.

The **Teller Session Denomination Details** data segment is displayed.

Figure 2-20 Teller Session Denomination Details

Transaction Currency	Total Transaction Amount	IN/OUT Flow	Add Denomination
No data to display.			

Page 1 (0 of 0 items) < 1 >

- On the **Teller Session Denomination Details** segment, specify the fields. For more information on fields, refer to the field description table.

Table 2-20 Teller Session Denomination Details - Field Description

Field	Description
Transaction Currency	Displays the currency for the Total Transaction Amount .
Total Transaction Amount	Displays the total transaction amount for a particular currency within the teller session.
Cash In/Out	Displays the cash in/out value for the Total Transaction Amount .
Add Denomination	Click Add to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to Add Denomination Details .

7. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

3

Till-Vault Operations

The Vault Teller or Teller can use Till-Vault operations to monitor the cash and currency boxes for the day. It is also used to perform cash transfers from or to the Vault/Till.

This topic contains the following subtopics:

- [Buy TC from Agent](#)
The **Buy TC from Agent** screen is used to buy TC from agents into the branch's vault. Only a Vault user can access this screen.
- [Buy TC from Head Office](#)
The **Buy TC from HO** screen is used to buy TC from head office into branch's vault. Only a Vault user can access this screen.
- [Buy TC from Vault](#)
The **Buy TC from Vault** screen is used to buy TC from the vault to transfer TCs into logged-in Teller's Till. Only a Teller can access this screen.
- [Return TC to Vault](#)
The Teller can use the **Return TC to Vault** screen to return TC to the branch's vault.
- [Return TC to HO](#)
The **Return TC to HO** screen is used to sell TC to the HO, and only a Vault Teller can access this screen.
- [Buy Cash from Currency Chest](#)
The Vault Teller can use this screen to get cash from the currency chest after opening the vault batch and deposit it into the vault. Once the cash is transferred from the currency chest, the system updates the cash position.
- [Sell Cash to Currency Chest](#)
The Vault Teller can use this screen to sell cash to the Central Bank from the vault after all the Tellers have sold the additional cash to the Vault Teller.
- [Buy Cash from Vault](#)
The Teller can use the **Buy Cash from Vault** screen to get cash from the vault.
- [Sell Cash to Vault](#)
The Teller can use the **Sell Cash to Vault** screen to sell cash to the vault. It is used only when the *cash held* exceeds the limit set at the template level for any currency.
- [Buy Cash from Till](#)
The Teller can use this screen to transfer cash from another Teller in case of insufficient funds available in the till to perform the customer cash transactions.
- [Sell Cash to Till](#)
The Teller can use the **Sell Cash to Till** screen to transfer cash to another Teller's Till in case of excess funds available in the Till.
- [Denomination Exchange](#)
The Teller can use the **Denomination Exchange** screen to exchange the currency denominations.

- [Inter Branch Transactions](#)
The interbranch transactions are used to send a request from a bank branch to the central cash depository, for pickup or delivery of cash.

3.1 Buy TC from Agent

The **Buy TC from Agent** screen is used to buy TC from agents into the branch's vault. Only a Vault user can access this screen.

To buy TC from agents:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Buy TC from Agent** or specify **Buy TC from Agent** in the search icon bar and select the screen.

The **Buy TC from Agent** screen is displayed.

Figure 3-1 Buy TC from Agent

2. On the **Buy TC from Agent** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 3-1 Buy TC from Agent - Field Description

Field	Description
TC Amount	Select the currency from the drop-down values, and specify the TC Amount.
Issuer Code	Click the search icon, and select the issuer code from the list of values. Note: The list of values provides the issuer codes maintained in the Issuer Code Maintenance screen.
Issuer Code Description	Displays the description of the specified issuer code.

Table 3-1 (Cont.) Buy TC from Agent - Field Description

Field	Description
Narrative	Displays the narrative as Buy TC From Agent , and it can be modified.

- Specify the TC denomination details. For information on the fields in the **TC Denominations** segment, refer to [Add TC Denominations to Buy TC](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC Inflow) is updated to the branch vault (vault ID that is opened) for the combination of Issuer code, TC Currency, TC Denom Code, and Series.

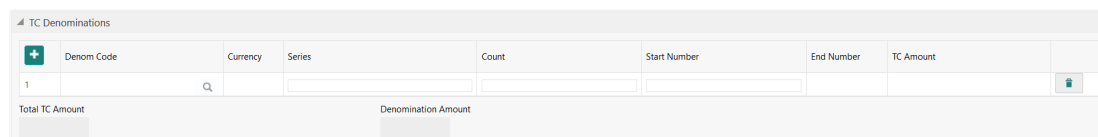

In addition, during transaction completion, the system creates individual TC records for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number with TC status as Null.

- [Add TC Denominations to Buy TC](#)
You can add the denomination details for the TC in the **TC Denominations** data segment.

3.1.1 Add TC Denominations to Buy TC

You can add the denomination details for the TC in the **TC Denominations** data segment. Make sure that the transaction details are added to the transaction screen.

Figure 3-2 TC Denominations

Denom Code	Currency	Series	Count	Start Number	End Number	TC Amount
1						

Total TC Amount Denomination Amount

To add the denomination details:

On the **TC Denominations** data segment, specify the fields. For more information on fields, refer to the field description table.

Table 3-2 TC Denominations - Field Description

Field	Description
Denom Code	Specify the TC denomination code from the list of values.
Currency	Displays the default TC Currency.
Series	Specify the series of TC denomination code that needs to be purchased from the agent. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: This field accepts alphanumeric values.</p> </div>
Count	Specify the units.
Start Number	Specify the start number of the series.
End Number	Displays the end number, which is the sum of the start number and the count.
TC Amount	Displays the TC Amount, which is the product of the denomination and the count.
Total TC Amount	Displays the total TC amount along with the currency.
Denomination Amount	Displays the denomination amount along with the currency.

3.2 Buy TC from Head Office

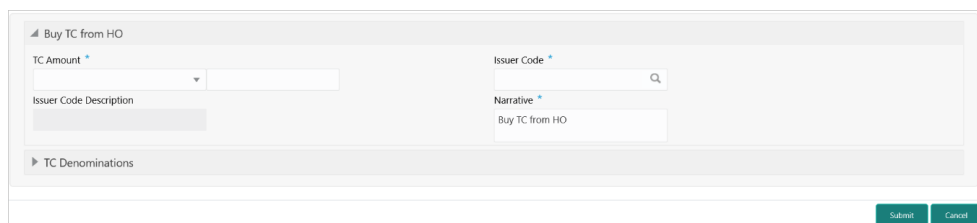

The **Buy TC from HO** screen is used to buy TC from head office into branch's vault. Only a Vault user can access this screen.

To buy TC from head office:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Buy TC from HO** or specify **Buy TC from HO** in the search icon bar and select the screen.

The **Buy TC from HO** screen is displayed.

Figure 3-3 Buy TC from HO

2. On the **Buy TC from HO** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-3 Buy TC from HO - Field Description

Field	Description
TC Amount	Select the currency from the drop-down values, and specify the TC Amount.
Issuer Code	Click the search icon and select the issuer code from the list of values.  Note: The list of values provides the issuer codes maintained in the Issuer Code Maintenance screen.
Issuer Code Description	Displays the description of the specified issuer code.
Narrative	Displays the narrative as Buy TC From HO , and it can be modified.

- Specify the TC denomination details. For information on the fields in the **TC Denominations** segment, refer to [Add TC Denominations to Buy TC](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC Inflow) is updated to the branch vault (vault ID that is opened) for the combination of Issuer code, TC Currency, TC Denom Code, and Series.

In addition, during transaction completion, the system creates individual TC records for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number with TC status as Null.

3.3 Buy TC from Vault

The **Buy TC from Vault** screen is used to buy TC from the vault to transfer TCs into logged-in Teller's Till. Only a Teller can access this screen.

To buy TC from the vault:

- On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Buy TC from Vault** or specify **Buy TC from Vault** in the search icon bar and select the screen.
The **Buy TC from Vault** screen is displayed.

Figure 3-4 Buy TC from Vault

2. On the **Buy TC from Vault** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 3-4 Buy TC from Vault - Field Description

Field	Description
TC Amount	Select the currency from the drop-down values, and specify the TC Amount.
Issuer Code	Click the search icon and select the issuer code from the list of values. <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>The list of values provides the issuer codes maintained in the Issuer Code Maintenance screen.</p> </div>
Issuer Code Description	Displays the description of the specified issuer code.
Narrative	Displays the narrative as Buy TC From Vault , and it can be modified.

3. Click on the **TC Denominations** segment.
The **TC Denominations** segment is displayed.

Figure 3-5 TC Denominations

4. In the **TC Denominations** segment, specify the fields. For more information on fields, refer to the field description table.

Table 3-5 TC Denominations - Field Description

Field	Description
Denom Code	Specify the TC denomination code from the list of values.
Currency	Displays the default TC Currency.
Series	Specify the series of the TC denomination code that needs to be purchased from the Vault.  Note: The list of values contains the valid TC series that are available with Vault. On click of LOV, the search criterion field will have Series , and the result criterion will display the Series and Start Number .
Count	Specify the count of the TC.
Start Number	Displays the starting number of the series.  Note: Based on the series selected, the system will populate the start number available for the combination of Currency , TC Denom Code , and Series .
End Number	Displays the end number, which is the sum of the start number and the count.
TC Amount	Displays the TC Amount, which is the product of the denomination and the count.
Total TC Amount	Displays the total TC amount along with the currency.
Denomination Amount	Displays the denomination amount along with the currency.

5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC Outflow) is updated to the branch vault, and TC Inflow is updated to the logged-in Teller for the combination of Issuer Code, TC Currency, TC denom Code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, the system updates the TC status as **Unused** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number.

3.4 Return TC to Vault

The Teller can use the **Return TC to Vault** screen to return TC to the branch's vault.

To sell TC to the branch's vault:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Return TC to Vault** or specify **Return TC to Vault** in the search icon bar and select the screen.

The **Return TC to Vault** screen is displayed.

Figure 3-6 Return TC to Vault

2. On the **Return TC to Vault** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-6 Return TC to Vault - Field Description

Field	Description
TC Amount	Select the TC currency from the drop-down values, and specify the TC Amount.
Issuer Code	Click the search icon and select the issuer code from the list of values.  Note: The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the Issuer Code Maintenance screen.
Issuer Code Description	Displays the description of the specified Issuer Code .
Narrative	Displays the narrative as Sell TC to Vault , and it can be modified.

3. Specify the TC denomination details. For information on the fields in the **TC Denominations** segment, refer to [Add TC Denominations to Return TC](#).

4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves.

On transaction submission, the TC position (TC outflow) is decreased for logged-in Teller ID, and the TC Position (TC Inflow) is incremented for Vault ID of the branch. It is performed for the combination of Issuer Code, TC Currency, TC Denom code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, the system updates the TC Status as **Null** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number.

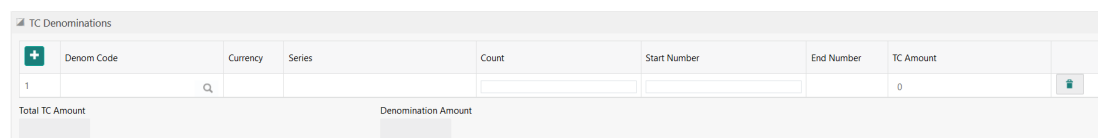

- [Add TC Denominations to Return TC](#)
You can add the denomination details for the TC in the **TC Denominations** data segment.

3.4.1 Add TC Denominations to Return TC

You can add the denomination details for the TC in the **TC Denominations** data segment.

Make sure that the transaction details are added to the transaction screen.

Figure 3-7 TC Denominations

To add the denomination details:

On the **TC Denominations** data segment, specify the fields. For more information on fields, refer to the field description table.

Table 3-7 TC Denominations - Field Description

Field	Description
Denom Code	Specify the TC denomination code from the list of values.
Currency	Displays the default TC currency.
Series	Specify the series of the TC Denom Code that is being purchased from the agent.
Count	Specify the count of the TC that needs to be sold.

Table 3-7 (Cont.) TC Denominations - Field Description

Field	Description
Start Number	Display the starting number of the series. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;">  Note: Based on the series selected, the system will populate the Start Number available for the combination of Currency, TC Denom Code, and Series. </div>
End Number	Displays the end number, which is the sum of start number and the count.
TC Amount	Displays the TC Amount, which is the product of the denomination and the count.
Total TC Amount	Displays the total TC amount along with the currency.
Denomination Amount	Displays the denomination amount along with the currency.

3.5 Return TC to HO

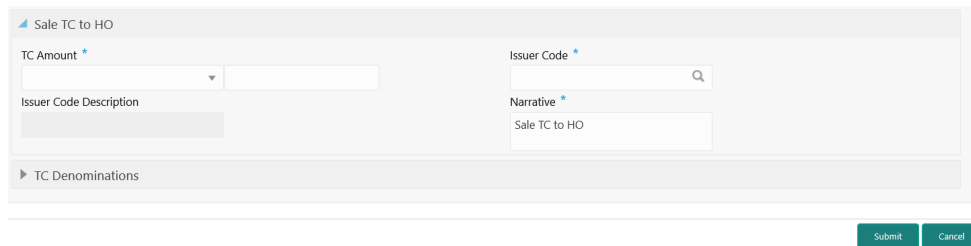

The **Return TC to HO** screen is used to sell TC to the HO, and only a Vault Teller can access this screen.

To sell TC to the HO:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Return TC to HO** or specify **Return TC to HO** in the search icon bar and select the screen.

The **Sale TC to HO** screen is displayed.

Figure 3-8 Sale TC to HO

2. On the **Sale TC to HO** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-8 Sale TC to HO - Field Description

Field	Description
TC Amount	Select the TC currency from the drop-down values, and specify the TC Amount.
Issuer Code	Click the search icon and select the issuer code from the list of values. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the Issuer Code Maintenance screen.</p> </div>
Issuer Code Description	Displays the description of the specified Issuer Code .
Narrative	Displays the narrative as Return TC to HO , and it can be modified.

3. Specify the TC denomination details. For information on the fields in the **TC Denominations** segment, refer to [Add TC Denominations to Return TC](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC outflow) is decreased for the Vault ID for the combination of Issuer Code, TC Currency, TC Denom code, and Series to the extent of TC denomination units being purchased.

3.6 Buy Cash from Currency Chest

The Vault Teller can use this screen to get cash from the currency chest after opening the vault batch and deposit it into the vault. Once the cash is transferred from the currency chest, the system updates the cash position.

To buy cash from the currency chest:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Buy Cash from Ccy Chest**.

The **Buy Cash from Currency Chest** screen is displayed.

Figure 3-9 Buy Cash from Currency Chest

2. On the **Buy Cash from Currency Chest** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 3-9 Buy Cash from Currency Chest - Field Description

Field	Description
Total Required Cash	Specify the total cash that you need to buy from Currency Chest. Note: By default, the system displays the local currency of the branch. You can select another currency from the drop-down values in which cash needs to be bought from the currency chest.
Narrative	Displays the default narrative Buy Cash from Currency Chest, and it can be modified.

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

Note:

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Vault Teller is updated successfully.

3.7 Sell Cash to Currency Chest

The Vault Teller can use this screen to sell cash to the Central Bank from the vault after all the Tellers have sold the additional cash to the Vault Teller.

The Vault Teller can close the batch only if the excess cash is not available at the end of the day.

To sell cash to currency chest:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Sell Cash to Ccy Chest** or specify **Sell Cash to Ccy Chest** in the search icon bar and select the screen.

The **Sell Cash to Currency Chest** screen is displayed.

Figure 3-10 Sell Cash to Currency Chest

2. On the **Sell Cash to Currency Chest** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-10 Sell Cash to Currency Chest - Field Description

Field	Description
Total Required Cash	Specify the total cash that you need to sell to the Currency Chest.  Note: By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be sold to the currency chest.

Table 3-10 (Cont.) Sell Cash to Currency Chest - Field Description

Field	Description
Narrative	Displays the default narrative Sell Cash to Currency Chest, and it can be modified.

- Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
- Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Vault Teller is updated successfully.

3.8 Buy Cash from Vault

The Teller can use the **Buy Cash from Vault** screen to get cash from the vault.

To get cash from the vault:

- On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Buy Cash from Vault** or specify **Buy Cash from Vault** in the search icon bar and select the screen.

The **Buy Cash from Vault** screen is displayed.

Figure 3-11 Buy Cash from Vault

- On the **Buy Cash from Vault** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-11 Buy Cash from Vault - Field Description

Field	Description
Total Required Cash	Specify the total cash that you need to transfer from the vault to the till of the logged-in Teller. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be transferred from the vault.</p> </div>
Narrative	Displays the default narrative as Transfer Cash from Vault , and it can be modified.

- Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the accounting entries (for example, Dr Teller Cash GL & Cr Vault Cash GL) for the transaction will be handed off to FCUBS based on the settlement definition maintained for the function code. Also, the cash positions of the Teller are increased and the Vault Teller is decreased successfully.

If the cash position of the Vault Teller is less than the total cash requested by the Teller:

- The system displays an error message
- The Teller needs to perform this transaction after the vault is replenished sufficiently

3.9 Sell Cash to Vault

The Teller can use the **Sell Cash to Vault** screen to sell cash to the vault. It is used only when the *cash held* exceeds the limit set at the template level for any currency.

For transferring cash to the vault, the Teller batch and the Vault batch need to be opened for the posting date.

To sell cash to the vault:

- On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Sell Cash to Vault** or specify **Sell Cash to Vault** in the search icon bar and select the screen.

The **Sell Cash to Vault** screen is displayed.

Figure 3-12 Sell Cash to Vault

2. On the **Sell Cash to Vault** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 3-12 Sell Cash to Vault - Field Description

Field	Description
Total Required Cash	Specify the total cash that you need to transfer to the vault from the till of the logged-in Teller.  Note: By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be transferred to the vault.
Narrative	Displays the default narrative as Transfer Cash to Vault , and it can be modified.

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the accounting entries (for example, Dr Vault Cash GL & Cr Teller Cash GL) for the transaction will be handed off to FCUBS based on the settlement definition maintained for the function code. Also, the cash balance of the Teller is decreased and the Vault Teller is increased successfully.

3.10 Buy Cash from Till

The Teller can use this screen to transfer cash from another Teller in case of insufficient funds available in the till to perform the customer cash transactions.

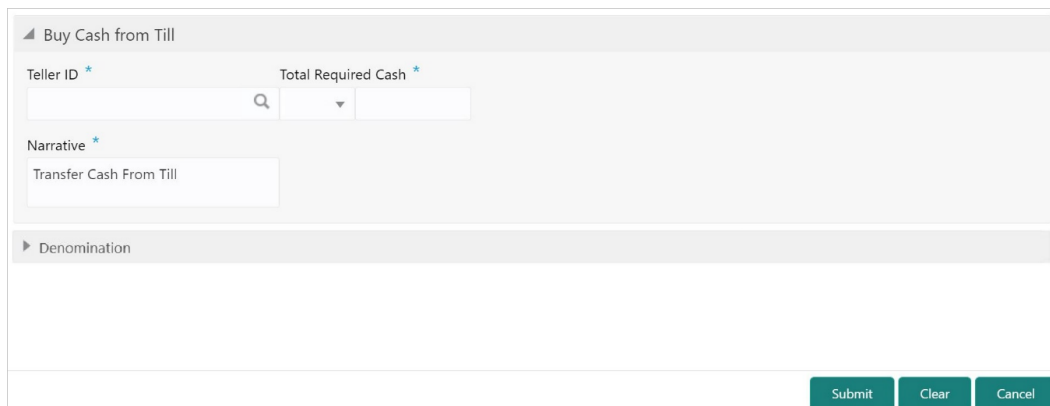

Teller can request the required cash in a specific currency, and on completing this transaction, the system updates the cash position of both the Tellers to the extent of the transaction amount.

To transfer cash from another Teller's till:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Buy Cash from Till** or specify **Buy Cash from Till** in the search icon bar and select the screen.

The **Buy Cash from Till** screen is displayed.

Figure 3-13 Buy Cash from Till

2. On the **Buy Cash from Till** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-13 Buy Cash from Till - Field Description

Field	Description
Teller ID	Displays the Teller ID from where the cash needs to be transferred.
Total Required Cash	Specify the total cash that you need to transfer from the specified Teller ID to the till of logged-in Teller.  Note: By default, the system displays the local currency of the branch. You can select another currency from the drop-down values in which cash needs to be transferred.
Narrative	Displays the default narrative as Transfer Cash from Till , and it can be modified.

- Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers is updated successfully.

3.11 Sell Cash to Till

The Teller can use the **Sell Cash to Till** screen to transfer cash to another Teller's Till in case of excess funds available in the Till.

In addition, the Teller can request to transfer from the Till in a specific currency. Once the transaction is completed, the system updates the cash position of both the Tellers to the extent of the transaction amount.

To sell cash to the Till:

- On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Sell Cash to Till** or specify **Sell Cash to Till** in the search icon bar and select the screen.

The **Sell Cash to Till** screen is displayed.

Figure 3-14 Sell Cash to Till

2. On the **Sell Cash to Till** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-14 Sell Cash to Till - Field Description

Field	Description
Teller ID	Displays the Teller ID from which the cash needs to be transferred.
Total Required Cash	Specify the total cash that you need to transfer to the specified Teller ID from the till of the logged-in Teller. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which the cash needs to be transferred.</p> </div>
Narrative	Displays the default narrative as Transfer Cash to Till , and it can be modified.

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers is updated successfully.

3.12 Denomination Exchange

The Teller can use the **Denomination Exchange** screen to exchange the currency denominations.

The exchange can be performed for the internal purpose of the bank or based on the customer's request. This transaction involves only denomination exchange from the Till. The total value in the Till remains the same, and accounting entries are not posted for this exchange. However, the denomination count in the Till changes, and hence it needs to be updated.

To exchange the currency denominations:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Denomination Exchange** or specify **Denomination Exchange** in the search icon bar and select the screen.

The **Denomination Exchange** screen is displayed.

Figure 3-15 Denomination Exchange

2. On the **Denomination Exchange** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-15 Denomination Exchange - Field Description

Field	Description
Branch Code	Displays the logged-in branch code.
Transaction Currency	Specify the currency for which the denominations are to be exchanged.

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers is updated successfully.

3.13 Inter Branch Transactions

The interbranch transactions are used to send a request from a bank branch to the central cash depository, for pickup or delivery of cash.

A branch can request delivery of cash when it is having a shortage of cash and request for pickup of cash when it has excess cash. The process steps to request cash delivery and pickup are explained below.

The process steps for cash delivery are as follows:

1. The requesting branch sends a request for delivery of cash using the 1409 screen.
2. The remitting branch queries for the requests and accepts the request using the 1409 screen.
3. On the delivery date, the remitting branch books a transaction using the 1410 screen with the denominations being sent and generated.
4. On the delivery date, the remitting branch books a transaction input using the 1410 screen, generates advice, and sends money to the requesting branch.
5. On receiving money and advice, the requesting branch uses the 1411 screen to verify the denominations and save the liquidation.

The process steps for cash pickup are as follows:

1. The requesting branch sends a request for the pickup of cash using the 1409 screen.
2. The receiving branch queries for the requests and accepts the request using the 1409 screen.
3. On the date of cash pickup, the receiving branch generates advice and sends it to requesting branch.
4. The requesting branch receives the advice and books the transaction using the 1410 screen.
5. The requesting branch generates the advice and sends money and advice to the receiving branch.
6. The receiving branch receives the money and advice and verifies and liquidates the request using the 1411 screen.

This topic contains the following subtopics:

- [Inter Branch Transaction Request](#)
The **Inter Branch Transaction Request** screen is used to create the inter-branch cash pickup or cash delivery requests.
- [Inter Branch Transaction Input](#)
The **Inter Branch Transaction Input** screen is used for a branch to act as a remitting branch to book an input transaction for cash delivery.

- [Inter Branch Transaction Liquidation](#)
The receiving branch can use the **Inter Branch Transaction Liquidation** screen to receive the cash, verify the advice with denomination units, and liquidate the request.

3.13.1 Inter Branch Transaction Request

The **Inter Branch Transaction Request** screen is used to create the inter-branch cash pickup or cash delivery requests.

To create the inter-branch transaction request:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Inter Branch Txn Req** or specify **Inter Branch Txn Req** in the search icon bar and select the screen.

The **Inter Branch Transaction Request** screen is displayed.

Figure 3-16 Inter Branch Transaction Request

The screenshot shows the 'Interbranch Transaction Request' form. It has a header with 'New' and 'Query' buttons. The form is divided into two columns. The left column contains: 'Inter Branch Request Reference *' (text input), 'Requesting Branch' (text input with search icon), 'To Branch *' (text input with search icon), 'Request Type *' (dropdown menu), 'Cash Delivery/Pickup Date *' (calendar icon), and 'Narrative *' (text area with 'Inter Branch Txn Request'). The right column contains: 'Transaction Amount *' (text input), 'Requesting Branch Description' (text input), 'To Branch Description' (text input), 'Request Date *' (calendar icon), and 'Request Status *' (dropdown menu). At the bottom right, there are 'Submit', 'Clear', and 'Cancel' buttons. A 'Denomination' section is partially visible at the bottom left.

2. On the **Inter Branch Transaction Request** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 3-16 Inter Branch Transaction Request - Field Description

Field	Description
New	Click this button to create a new inter branch transaction and generate the inter branch request reference number.
Query	Click Query to enable the field Inter Branch Request Reference .

Table 3-16 (Cont.) Inter Branch Transaction Request - Field Description

Field	Description
Inter Branch Request Reference	The following conditions apply to this field: <ul style="list-style-type: none"> If you click New, the request reference number for the inter branch transaction is displayed. If you click Query, select the inter branch request reference from the list of values. The list of values fetches only the reference numbers that are saved and not submitted.
Transaction Amount	Select the transaction currency from the option list. Specify the amount that needs to be transferred.
Requesting Branch	Displays the branch code of requesting branch.
Requesting Branch Description	Displays the name of the branch code specified.
To Branch	Select the branch code to which the request is being made.
To Branch Description	Displays the name of the specified To Branch .
Request Type	Select from the following request types: <ul style="list-style-type: none"> Cash Delivery - when the branch is in short of cash. Cash Pickup - when the branch has excess cash.
Request Date	Displays the current date as the request date.
Cash Delivery/Pickup Date	Specify the date of cash delivery/pickup. <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the current system date is displayed, and it can be modified.</p> </div>
Request Status	Select the status of the request. The drop-down list shows the following options: <ul style="list-style-type: none"> Request - to create a new request. Accept - to accept a request received. Pending - system-defined status indicating that the request has been sent but not accepted. Initiated - system-defined status indicating that the request has been accepted and initiated. Liquidated - system-defined status indicating that the request has been processed and liquidated.
Narrative	Specify the remarks, if any.

- Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
- Click **Submit**.
The request is sent to the receiving/remitting branch for further processing.

 **Note:**

The destination branch can access the same screen to accept or reject the request.

3.13.2 Inter Branch Transaction Input

The **Inter Branch Transaction Input** screen is used for a branch to act as a remitting branch to book an input transaction for cash delivery.

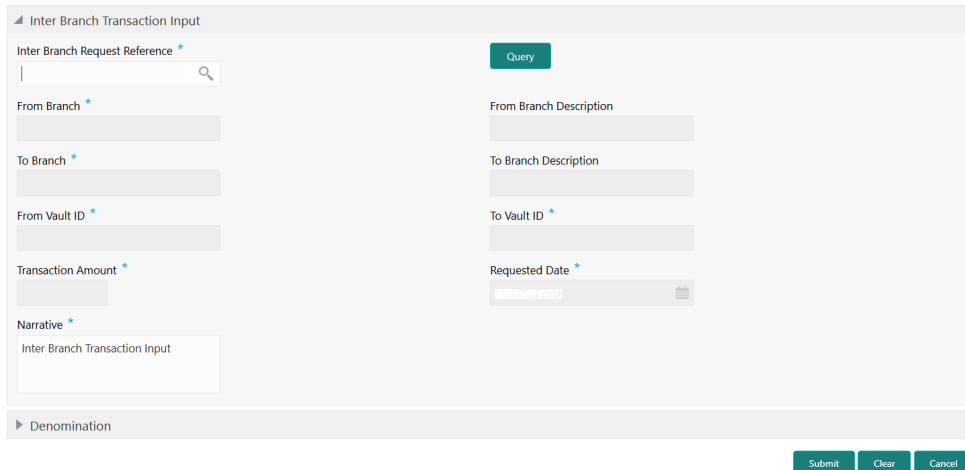

It is also used for the branch to act as a receiving branch to generate the advice and send it to the requesting branch. This option is allowed only after the destination branch has accepted the inter-branch transaction request.

To book an inter-branch transaction input:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Inter Branch Txn Input** or specify **Inter Branch Txn Input** in the search icon bar and select the screen.

The **Inter Branch Transaction Input** screen is displayed.

2. On the **Inter Branch Transaction Input** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 3-17 Inter Branch Transaction Input - Field Description

Field	Description
Inter Branch Request Reference	Select the request reference from the list of values.
Query	Click Query to fetch and populate the request details.
From Branch	Displays the branch code of From Branch . The following values are applied based on the request type in the Inter Branch Transaction Request screen: <ul style="list-style-type: none"> For Cash Delivery, the To Branch in the Inter Branch Transaction Request screen is populated in this field. For Cash Pickup, the Requesting Branch in the Inter Branch Transaction Request screen is populated in this field.
From Branch Description	Displays the description of the From Branch .
From Vault ID	Displays the Vault user of the specified From Branch .
To Branch	Displays the branch code of To Branch . The following values are applied based on the request type in the Inter Branch Transaction Request screen: <ul style="list-style-type: none"> For Cash Delivery, the Requesting Branch in the Inter Branch Transaction Request screen is populated in this field. For Cash Pickup, the To Branch in Inter Branch Transaction Request screen is populated in this field.
To Branch Description	Displays the description of specified To Branch .
To Vault ID	Displays the Vault user of To Branch .
Transaction Amount	Displays the transaction currency and transaction amount based on the request reference.
Requested Date	Displays the date on which the transaction is requested.
Narrative	Specify the remarks, if any.

- Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
- Click **Submit**.

The request is sent to the requesting branch for further processing.

 **Note:**

The request status in the **Inter Branch Transaction Request** screen will be internally updated to *Initiated* for the related request reference number. In addition, the system will post the accounting entries (for example, Dr Sending Branch Inter Branch Transit GL & Cr Sending Branch Vault GL) for the Inter Branch Input transaction as per the settlement definition maintained for the function code, and advice will be generated on transaction completion.

3.13.3 Inter Branch Transaction Liquidation

The receiving branch can use the **Inter Branch Transaction Liquidation** screen to receive the cash, verify the advice with denomination units, and liquidate the request.

This screen can be accessed by:

- The requesting branch for cash delivery
- The receiving branch for cash pickup

To perform the inter-branch transaction liquidation:

1. On the Homepage, from **Teller** mega menu, under **Till-Vault Operations**, click **Inter Branch Txn Liq** or specify **Inter Branch Txn Liq** in the search icon bar and select the screen.

The **Inter Branch Transaction Liquidation** screen is displayed.

Figure 3-18 Inter Branch Transaction Liquidation

2. On the **Inter Branch Transaction Liquidation** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 3-18 Inter Branch Transaction Liquidation - Field Description

Field	Description
Inter Branch Request Reference	Select the request reference from the list of values.
Query	Click Query to fetch and populate the request details.
From Branch	Displays the branch code of From Branch .

Table 3-18 (Cont.) Inter Branch Transaction Liquidation - Field Description

Field	Description
From Branch Description	Displays the description of the From Branch .
From Vault ID	Displays the Vault user of the specified From Branch .
To Branch	Displays the branch code of To Branch .
To Branch Description	Displays the description of specified To Branch.
To Vault ID	Displays the Vault user of To Branch.
Transaction Amount	Displays the transaction currency and transaction amount based on the request reference.
Requested Date	Displays the date on which the transaction is requested.
Narrative	Specify the remarks, if any.

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

The system updates the request reference as **Liquidated** in the **Inter Branch Transaction Request** screen for the related request reference.

 **Note:**

The system will post the accounting entries (for example, Dr Receiving Branch Vault Transit GL & Cr Sending Branch Inter Branch Transit GL) for the Inter Branch Input transaction as per the settlement definition maintained for the function code.

As the liquidation transaction accounting involves two different branches, the corresponding IB position entries will be processed by FCUBS accordingly.

4

Customer Transactions

The Teller can use Customer Transactions to perform financial transactions for customer accounts.

This topic contains the following subtopics:

- [Cash Deposit](#)
The **Cash Deposit** screen is used to deposit the cash in a CASA. Cash can be deposited in either account currency or any foreign currency that is allowed.
- [Cash Withdrawal](#)
The **Cash Withdrawal** screen is used to withdraw funds from the CASA account of the customer.
- [Cheque Withdrawal](#)
The **Cheque Withdrawal** screen is used to withdraw cash from the CASA account of the customer against the in-house cheque.
- [FX Sale Against Account](#)
The Foreign Exchange (**FX**) **Sale Against Account** screen is used to sell the foreign currency from the branch through the CASA account.
- [FX Sale Against Walk-in](#)
The **FX Sale Against Walk-in** screen is used to sell a foreign currency to a walk-in customer in return for the equivalent amount received in the local currency.
- [FX Purchase Against Account](#)
The **FX Purchase Against Account** screen is used to purchase foreign currency from the branch through the CASA account.
- [FX Purchase Against Walk-in](#)
The **FX Purchase Against Walk-in** screen is used to buy a foreign currency from a walk-in customer in return for the equivalent amount in the local currency.
- [Close Out Withdrawal](#)
The **Close Out Withdrawal** screen to initiate an account closure and close the CASA account by either dispersing the cash to the customer or by account transfer or by issuing Bankers Cheque.
- [Close Out Withdrawal by Multi-Mode](#)
The **Close Out Withdrawal by Multi Mode** screen is used to close the CASA account by multi-mode payout options, which include cash, account transfer, and BC. This screen can be used only when the closeout withdrawal needs to be done in multiple payout modes.
- [Safe Deposit Rental By Cash](#)
The Teller can use the **Safe Deposit Rental By Cash** screen to make payment by cash for the safe deposit locker of the customer.
- [Recurring Deposit Payment by Cash](#)
The **Recurring Deposit Payment by Cash** screen is used to make payment for the Recurring Deposit (RD) account of the customer by cash.

- [F23C Tax Payment by Cash](#)
The **F23C Tax Payment By Cash** screen is used to capture data related to the F23C tax document for a customer and collect the corresponding tax by cash from the customer.
- [F24C Tax Payment By Cash](#)
The **F24C Payment Details** screen is used to capture data related to the F24C tax document for a customer and collect the corresponding tax by cash from the customer.
- [F23 Tax Payment by Account](#)
The **F23 Tax Payment by Account** screen is used to capture data related to the F23 tax document for a customer and collect the corresponding tax by cash from the customer.
- [F24 Tax Payment By Account](#)
The **F24 Tax Payment By Account** screen is used to capture data related to the F24 tax document for a customer and collect the corresponding tax by account from the customer.

4.1 Cash Deposit

The **Cash Deposit** screen is used to deposit the cash in a CASA. Cash can be deposited in either account currency or any foreign currency that is allowed.

Whenever any transaction in foreign currency is posted to the account, it is converted to the account currency based on the maintained exchange rate for the transaction.

To deposit cash:

1. On the Homepage, click **Teller**. On the Teller Mega Menu, under **Customer Transaction**, click **Cash Deposit** or specify the **Cash Deposit** in the search icon bar.

The **Cash Deposit** screen is displayed.

Figure 4-1 Cash Deposit

2. On the **Cash Deposit** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-1 Cash Deposit - Field Description

Field	Description
Account Number	<p>Specify a valid account number for the customer. When you press the Tab key, the corresponding account information will be displayed in the Customer Information widget.</p> <p> Note:</p> <p>In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account. The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p>

Table 4-1 (Cont.) Cash Deposit - Field Description

Field	Description
Transaction Amount	<p>Displays the local currency of the branch. You can also select other transaction currencies from the drop-down values.</p> <p>Specify the transaction amount that needs to be credited to the customer account.</p>
Negotiated Exchange Rate	<p>Specify the negotiated exchange rate, if it is needed to perform the transaction using negotiated value.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>This field is applicable only if the transaction involves cross currency. If this option is selected, the Negotiated Reference Number field will become mandatory.</p> </div>
Negotiated Reference Number	<p>Specify the reference number for the negotiated cost rate.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>This field is applicable only if the transaction involves cross currency.</p> </div>
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration</code> at Function Code Indicator level is set as Y.</p> </div>
Account Amount	<p>Displays the transaction amount converted in terms of account amount based on the exchange rate.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if <code>Multi-Currency Configuration</code> at Function Code Indicator level is set as Y.</p> </div>

Table 4-1 (Cont.) Cash Deposit - Field Description

Field	Description
Total Charge Amount	<p>Displays the total charge amount, which is computed by the system in the local currency of the branch.</p> <div style="border: 1px solid #0070c0; background-color: #e6f2ff; padding: 10px;"> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration</code> at <code>Function Code Indicator</code> level is set as <code>Y</code>.</p> </div>
Narrative	Displays the default narrative as Cash Deposit , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
5. Click **Submit**.

Once you submit the transaction, the system validates the following:

- Mandatory fields
- Allowed minimum/maximum limit amount for the user ID
- Allowed currency for Teller user ID
- Till balance and branch breaching limit
- Function code preferences
- Duplicate transactions

If any of the validation fails, the system will prompt appropriate information, warning, or error message. For more information, refer to the following steps:

- If an information message is prompted, click **OK** to confirm and complete the transaction.
- If a warning message is prompted, the system will move the transaction for authorization. Once approved, the transaction is moved to Teller **Electronic Journal** for completion. Refer to authorization procedures to know more about authorization processing.
- If any validation error is prompted, you need to update the details to fix the error and re-submit the transaction.
- If any other error message is prompted, the transaction is discarded and does not get saved.
- If you click **Close** or **Cancel** after specifying the transaction details, then the data will not persist.

When the Teller completes the transaction, the corresponding Teller's cash position is updated.

The `Transaction Completed Successfully` information message is displayed.

- [Add Charge Details](#)
The **Charge Details** segment is used to view the computed charge details based on the charge maintenance defined for the function code.

4.1.1 Add Charge Details

The **Charge Details** segment is used to view the computed charge details based on the charge maintenance defined for the function code.

Make sure that the main transaction details are added to the transaction screen.

This segment is applicable for all Financial Customer transactions. If no charge is maintained for the combination, then the transaction is saved without any charges.

Figure 4-2 Charge Details

You can view or waive the computed charges. For more information on fields, refer to the field description table.

Table 4-2 Charge Details - Field Description

Field	Description
Total Charges	Displays the total charges in transaction currency (TCY) and branch local currency (LCY).
Detailed View	Displays the following charge details of each charge code: <ul style="list-style-type: none"> • Charge Code • Currency • Charge Amount • Waiver • Charge By Cash • Charge TCY • Charge LCY • Basis • Min Charge • Max Charge • Price Rule Id • Credit Account • Debit Account
Charge Code	The system defaults the charge components applicable to the transaction.
Currency	Displays the currency in which the charge has to be deducted.

Table 4-2 (Cont.) Charge Details - Field Description

Field	Description
Charge Amount	<p>Displays the charge amount that needs to be deducted for the corresponding charge component.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>The charge amount can be modified only if the field is enabled in the Function Code Preferences screen. The modified charge amount will be validated against the minimum and maximum charge amount that can be configured at the Charge Maintenance screen. When an individual charge amount is modified, the system will recalculate all the dependent charges.</p> </div>
Waiver	<p>If necessary, check this box against the charge component to waive a certain charge for the customer.</p> <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>When the Waiver is enabled, the value under Charge Amount will be waived and no charge accounting entries will be passed. The charge waiver can be enabled at individual charge level without impacting other linked charges. The minimum charge amount configured at the charge maintenance level, will not be validated when the charge is waived.</p> </div>
Charge By Cash	Indicates whether the charges are to be collected by cash.

4.2 Cash Withdrawal

The **Cash Withdrawal** screen is used to withdraw funds from the CASA account of the customer.

The withdrawal is subject to the availability of a sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To withdraw cash:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **Cash Withdrawal** or specify **Cash Withdrawal** in the search icon bar and select the screen.

The **Cash Withdrawal** screen is displayed.

Figure 4-3 Cash Withdrawal

The screenshot shows the 'Cash Withdrawal' screen with the following fields and controls:

- Account Number ***: Text input field.
- Transaction Amount ***: Currency dropdown (GBP) and text input field.
- Exchange Rate**: Input field with up/down arrows.
- Negotiated Exchange Rate**: Input field with up/down arrows.
- Negotiated Reference Number**: Text input field.
- Account Amount**: Text input field.
- Total Charge Amount**: Input field with up/down arrows.
- Narrative ***: Text area containing 'Cash Withdrawal'.
- Charge Details**: Collapsible section.
- Denomination**: Collapsible section.
- Buttons**: Submit, Clear, and Cancel.

2. On the **Cash Withdrawal** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-3 Cash Withdrawal - Field Description

Field	Description
Account Number	<p>Specify a valid customer account number.</p> <p> Note:</p> <p>When you press the Tab key, the corresponding account information will be displayed in the Customer Information widget. The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p>
Transaction Amount	<p>Displays the local currency of the branch. You can also select another currency from the drop-down values. Specify the transaction amount that needs to be debited from the customer account.</p>
Negotiated Exchange Rate	<p>Specify the negotiated exchange rate if it is needed to perform the transaction using negotiated value.</p> <p> Note:</p> <p>This field is applicable only if the transaction involves cross currency. If this option is selected, the Negotiated Reference Number field will become mandatory.</p>
Negotiated Reference Number	<p>Specify the reference number for the negotiated cost rate.</p> <p> Note:</p> <p>This field is applicable only if the transaction involves cross currency.</p>
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency, and it can be modified.</p> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.</p>

Table 4-3 (Cont.) Cash Withdrawal - Field Description

Field	Description
Account Amount	<p>Displays the transaction amount converted in terms of account amount based on the exchange rate.</p> <p> Note:</p> <p>This field is displayed only if <code>Multi-Currency Configuration</code> at <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>
Total Charge Amount	<p>Displays the total charge amount, which is computed by the system in the local currency of the branch.</p> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration</code> at <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>
Narrative	<p>Displays the default narrative as Cash Withdrawal, and it can be modified.</p>

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to [Step 5 in Cash Deposit](#).

4.3 Cheque Withdrawal

The **Cheque Withdrawal** screen is used to withdraw cash from the CASA account of the customer against the in-house cheque.

The withdrawal is subject to the availability of a sufficient balance or available credit limit. To verify the signature for the transactions, you can click **Verify** button in the **Customer Information Widget**. The signature verification is applicable for the transactions, which have the *Signature Verification Required* option selected as *Y* at the *Function Code Preference* level.

To withdraw cash through the in-house cheque:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **Cheque Withdrawal** or specify **Cheque Withdrawal** in the search icon bar and select the screen. The **Cheque Withdrawal** screen is displayed.

Figure 4-4 Cheque Withdrawal

The screenshot displays the 'Cheque Withdrawal' screen with the following fields and controls:

- Account Number ***: Text input field.
- Cheque Number ***: Text input field.
- Exchange Rate**: Input field with up/down arrows.
- Negotiated Reference Number**: Text input field.
- Reject Code**: Text input field with a search icon.
- Narrative ***: Text input field containing 'Cheque Withdrawal'.
- Transaction Amount ***: Input field with a currency dropdown set to 'USD'.
- Cheque Date ***: Date picker showing 'Mar 27, 2021'.
- Negotiated Exchange Rate**: Input field with up/down arrows.
- Account Amount**: Input field.
- Reject Code Description**: Input field.

Below the main form, there are two expandable sections: 'Charge Details' and 'Denomination'. At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

2. On the **Cheque Withdrawal** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 4-4 Cheque Withdrawal - Field Description

Field	Description
Account Number	<p>Specify a valid account number for the customer.</p> <p> Note:</p> <p>When you press the Tab key, the corresponding account information will be displayed in the Customer Information widget. The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p>
Transaction Amount	<p>Displays the local currency of the branch. You can also select another currency from the drop-down list. Specify the transaction amount that needs to be debited from the customer account.</p>
Cheque Number	<p>Specify the cheque number of the customer account as provided by the Customer.</p> <p> Note:</p> <p>The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.</p>
Cheque Date	<p>Select the date on which the cheque has been issued from the calendar option.</p>
Negotiated Exchange Rate	<p>Specify the negotiated exchange rate if it is needed to perform the transaction using negotiated value.</p> <p> Note:</p> <p>This field is applicable only if the transaction involves cross currency. If this option is selected, the Negotiated Reference Number field will become mandatory.</p>

Table 4-4 (Cont.) Cheque Withdrawal - Field Description

Field	Description
Negotiated Reference Number	Specify the reference number for the negotiated cost rate.  Note: This field is applicable only if the transaction involves cross currency.
Reject Code	Select the reject code from the list of values, which are maintained in the Reject Code Maintenance screen.  Note: If the cheque withdrawal transaction needs to be rejected, you can reject it by specifying the appropriate reject code in this field. The transaction can be rejected for one of the following reasons: <ul style="list-style-type: none"> • Insufficient funds • Signature mismatch • Stale cheque
Reject Code Description	Displays the description of the specified reject code.
Exchange Rate	Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.  Note: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y .
Account Amount	Displays the transaction amount converted in terms of account amount based on the exchange rate.  Note: This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y .
Narrative	Displays the default narrative as Cheque Withdrawal , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully against the customer cheque. For more information on transaction submission and validations, refer to *Step 5* in [Cash Deposit](#).

4.4 FX Sale Against Account

The Foreign Exchange (**FX**) **Sale Against Account** screen is used to sell the foreign currency from the branch through the CASA account.

This transaction is performed by debiting the corresponding account currency from the CASA account.

To sell the foreign currency against CASA account:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **FX Sale - Account** or specify **FX Sale - Account** in the search icon bar and select the screen.

The **FX Sale Against Account** screen is displayed.

Narrative	Displays the default narrative as FX Purchase (Walk-in) , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Specify the FX In Denomination details. For information on the fields in the **FX In Denomination Details** segment, refer to [Add Denomination Details](#).
5. Specify the FX Out Denomination details. For information on the fields in the **FX Out Denomination Details** segment, refer to [Add Denomination Details](#).
6. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the teller cash position is updated based on the currency of the **Amount Bought** and the **Amount Paid** fields. For more information on transaction submission and validations, refer to [Step 5 in Cash Deposit](#).

4.8 Close Out Withdrawal

The **Close Out Withdrawal** screen to initiate an account closure and close the CASA account by either dispersing the cash to the customer or by account transfer or by issuing Bankers Cheque.

The balance amount displayed is only the available balance from FLEXCUBE Universal Banking and Oracle Banking Branch does not consider the closeout withdrawal charges configured in FLEXCUBE Universal Banking. In case charges are required to be displayed in Oracle Banking Branch, Oracle Banking Branch also supports charges which can be configured.

To close the CASA account by either dispersing the cash to the customer or by account transfer or by issuing Bankers Cheque:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **Close Out Withdrawal** or specify **Close Out Withdrawal** in the search icon bar and select the screen.

The **Close Out Withdrawal** screen is displayed.

Figure 4-9 Close Out Withdrawal - New

2. On the **Close Out Withdrawal** screen, specify fields. For more information on fields, refer to the field description table.

Table 4-9 Close Out Withdrawal - New

Field	Description
Customer Account	Specify the account number for which the account closure to be requested. <div style="border-left: 2px solid #0070C0; padding-left: 10px; background-color: #E6F2FF;"> <p> Note: The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p> </div>
Account Name	Displays the name of the specified account number.
IC Liquidate	Click this button to fetch the details of account amount.
Account Amount	Displays the account balance in account currency.
Narrative	Displays the default narrative Close Out Withdrawal and it can be modified.

3. Click **Submit**.

A teller sequence number is generated, and the **Transaction Completed Successfully** information message is displayed.

 **Note:**

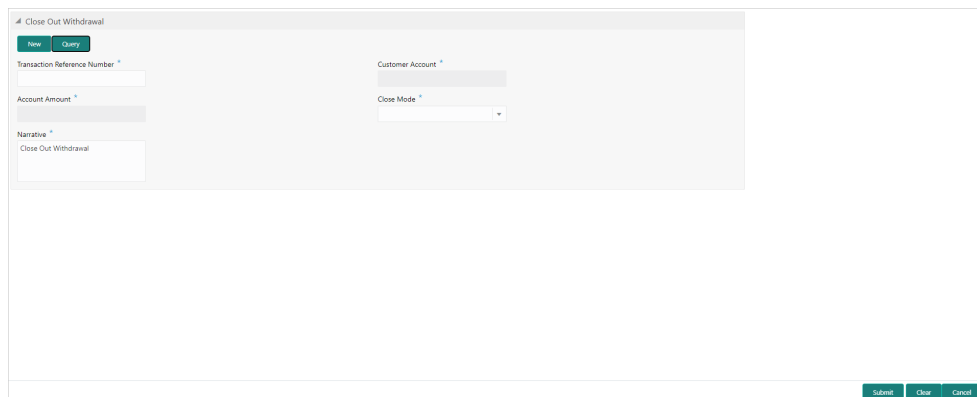

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, it will verify if IC liquidation is completed for the account. Once the IC liquidation is done, the transaction details are handed off to the CASA module in the FLEXCUBE Universal Banking for the account closure process. During account closure process, the closure amount will be parked in the intermediary suspense GL specified during transaction request handoff.

Maintain Close mode as CASH and linked product as ZRCD in Account Closing Maintenance (STDCLSMD) in FCUBS. This maintenance will ensure the funds are parked to the respective suspense GL during the account closure process at FCUBS.

4. Click **Query**.

The **Close Out Withdrawal - Query** screen is displayed.

Figure 4-10 Close Out Withdrawal - Query Transaction

The screenshot shows a web-based form titled "Close Out Withdrawal". At the top left, there are two buttons: "New" and "Query". Below these are several input fields: "Transaction Reference Number", "Account Amount", and "Narrative" (with "Close Out Withdrawal" entered). To the right, there are two more fields: "Customer Account" and "Close Mode" (a dropdown menu). At the bottom right, there are three buttons: "Submit", "Clear", and "Cancel".

5. On the **Close Out Withdrawal** screen, specify fields. For more information on fields, refer to the field description table.

- Account Amount**: A text input field.
- Transaction Amount**: A dropdown menu currently set to 'GBP'.
- Narrative**: A text input field containing the text 'Close Out Withdrawal'.
- Customer Account**: A text input field.
- Close Mode**: A dropdown menu currently set to 'By Cash'.
- Exchange Rate**: A dropdown menu with up and down arrow icons.

 At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

On the **Close Out Withdrawal by Cash** screen, specify the fields. For more information on fields, refer to the field description table.

Table 4-12 Close Out Withdrawal by Cash - Field Description

Field	Description
Transaction Reference Number	Displays the transaction reference number for which the closure is initiated.

Table 4-12 (Cont.) Close Out Withdrawal by Cash - Field Description

Field	Description
Customer Account	<p>Displays the account number for which the account closure is to be requested.</p> <p> Note:</p> <p>The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p>
Account Amount	Displays the account balance in account currency.
Close Mode	Displays the close mode as By Cash .
Transaction Amount	<p>Specify the currency in which the customer requested the cash. The system displays the derived transaction amount based on the exchange rate fetched using account currency and transaction currency. The transaction amount is the account amount deducted with total charges.</p> <p> Note:</p> <p>This field is displayed only if <i>Multi-Currency Configuration</i> at <i>Function Code Indicator</i> level is set as <i>Y</i>.</p>
Exchange Rate	<p>Displays the exchange rate based on the account currency and offset account currency.</p> <p> Note:</p> <p>This field is displayed only if <i>Multi-Currency Configuration</i> at <i>Function Code Indicator</i> level is set as <i>Y</i>.</p>
Narrative	Displays the default narrative as Close Out Withdrawal , and it can be modified.

Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).

Figure 4-13 Close Out Withdrawal - Bankers Cheque

On the **Close Out Withdrawal by Bankers Cheque** screen, specify the fields. For more information on fields, refer to the field description table.

Table 4-13 Close Out Withdrawal by Bankers Cheque - Field Description

Field	Description
Transaction Reference Number	Displays the transaction reference number for which the closure is initiated. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p> </div>
Account Number	Displays the account number for which the account closure is to be requested.
Account Amount	Displays the account balance in account currency.
Close Mode	Displays the close mode as By Bankers Cheque .
Issue Branch	Displays the issuing branch of the banker's cheque.
BC Amount	Displays the account currency and account balance. You can also modify the account currency.
Instrument Number	Specify the instrument number.
MICR Number	Specify the MICR number.
Payee Name	Specify the payee name.
Address Line 1 to Address Line 4	Specify the address of the payee.

Table 4-13 (Cont.) Close Out Withdrawal by Bankers Cheque - Field Description

Field	Description
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency, and it can be modified.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.</p> </div>
Narrative	Displays the default narrative as Close Out Withdrawal , and it can be modified.

Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).

4.9 Close Out Withdrawal by Multi-Mode

The **Close Out Withdrawal by Multi Mode** screen is used to close the CASA account by multi-mode payout options, which include cash, account transfer, and BC. This screen can be used only when the closeout withdrawal needs to be done in multiple payout modes.

The balance amount displayed is only the available balance from FLEXCUBE Universal Banking and Oracle Banking Branch does not consider the closeout withdrawal charges configured in FLEXCUBE Universal Banking. In case charges are required to be displayed in Oracle Banking Branch, Oracle Banking Branch also supports charges which can be configured.

To close the CASA account by multi-mode payout options:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **Close Out Withdrawal by Multi Mode** or specify **Close Out Withdrawal by Multi Mode** in the search icon bar and select the screen.

The **Close Out Withdrawal by Multi Mode** screen is displayed.

Figure 4-14 Close Out Withdrawal by Multi Mode

2. On the **Close Out Withdrawal by Multi Mode** screen, specify the fields. For more information on fields, refer to the field description table.

Table 4-14 Close Out Withdrawal by Multi Mode - Field Description

Field	Description
Close Account	Specify the account number, which needs to be closed. <div style="border: 1px solid #0070c0; padding: 5px; background-color: #e6f2ff;"> <p> Note:</p> <p>The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p> </div>
Fetch Balance	Click Fetch Balance to fetch and display the account amount.
Account Amount	Displays the account amount.
Payout Type	Select the payout type from the following drop-down values: <ul style="list-style-type: none"> • Account – If this option is selected, the user needs to specify the Offset Account, to which the transfer is to be made. Based on the specified offset account number, the system will default the Offset Branch and Offset Currency fields. • Cash – If this option is selected, the user needs to disburse the cash in the account currency. • Bankers Cheque - If this option is selected, either the field Instrument Number is populated or the teller can input the value. On submission, the system will validate the instrument number if inputted or derive the instrument number in case of a null value. In addition, the user needs to capture the BC-related details in the Bankers Cheque Details data segment. This data segment is mandatory only if the Payout Type is selected as Bankers Cheque.

Table 4-14 (Cont.) Close Out Withdrawal by Multi Mode - Field Description

Field	Description
Percentage	Specify the amount of redemption for the payout type selected.  Note: Based on the percentage input, the system will derive the amount to be paid out.
Amount	Specify the amount that needs to be withdrawn in the payout type selected.
Instrument Number	Specify the BC number.  Note: This field is applicable only if the Payout Type is selected as <i>Bankers Cheque</i> .
Issuing Branch	Displays the branch code of the specified account number.
Offset Account	Specify the account number to which the payout amount needs to be transferred.  Note: This field is applicable only if the Payout Type is selected as <i>Account</i> .
Offset Branch	Displays the branch of the specified offset account number.  Note: This field is applicable only if the Payout Type is selected as <i>Account</i> .
Offset Currency	Displays the currency of the specified offset account number.  Note: This field is applicable only if the Payout Type is selected as <i>Account</i> .
Narrative	Displays the default narrative as Close Out Withdrawal by Multimode , and it can be modified.

3. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
4. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the transaction details are handed off to the CASA module in the FLEXCUBE Universal Banking for the account closure process.

If the account balance is credited to an intermediary bridge GL, the transaction status will be changed from `Pending` to `Completed`.

Based on the payout options, the corresponding transaction will be completed successfully.

4.10 Safe Deposit Rental By Cash

The Teller can use the **Safe Deposit Rental By Cash** screen to make payment by cash for the safe deposit locker of the customer.

To make payment for the safe deposit locker:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **Safe Deposit Rental By Cash** or specify **Safe Deposit Rental By Cash** in the search icon bar and select the screen.

The **Safe Deposit Rental By Cash** screen is displayed.

Figure 4-15 Safe Deposit Rental By Cash

2. On the **Safe Deposit Rental By Cash** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 4-15 Safe Deposit Rental By Cash - Field Description

Field	Description
Deposit Locker	Specify the deposit locker number. When you press the Tab key, the customer details and deposit locker details will be displayed in the Customer Information widget.
Rental Amount	Select the rental amount currency and specify the amount. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>By default, the rental currency is displayed as locker currency. If the Multi-Currency Configuration at Function Code indicator level is set as Y, it can be modified, and if it is N, then the default value cannot be modified.</p> </div>

Table 4-15 (Cont.) Safe Deposit Rental By Cash - Field Description

Field	Description
Exchange Rate	<p>Displays the exchange rate.</p> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration</code> at the <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>
Total Charge Amount	<p>Displays the total charges in the branch local currency.</p> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration</code> at <code>Function Code indicator</code> level is set as <code>Y</code>.</p>
Account Amount	<p>Displays the rental amount in locker account currency. This amount will be derived based on the Rental Amount and Exchange Rate.</p> <p> Note:</p> <p>This field is displayed only if <code>Multi-Currency Configuration</code> at the <code>Function Code indicator</code> level is set as <code>Y</code>.</p>
Narrative	<p>Displays the narrative as Safe Deposit Rental By Cash, and it can be modified.</p>

3. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the system will hand off the details to the FLEXCUBE Universal Banking system to create a 'Payment' transaction in the SD module. After the handoff status is successful in the Oracle Banking Branch, the system will update the transaction status as **Completed** and update the Till cash position (by increasing the till balance).

4.11 Recurring Deposit Payment by Cash

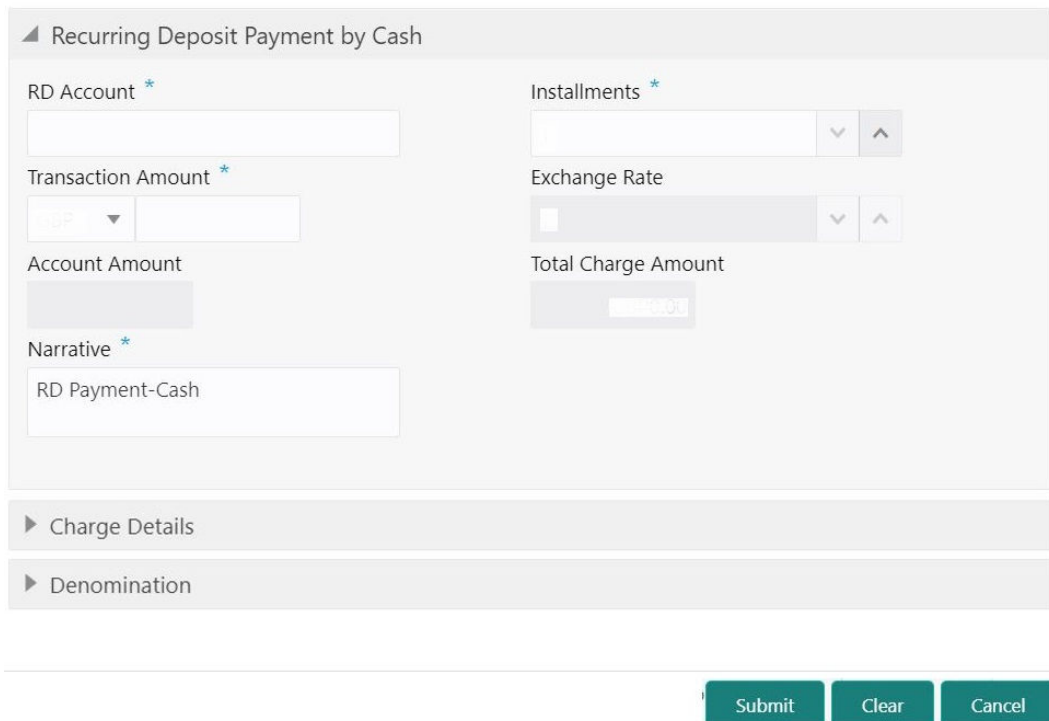

The **Recurring Deposit Payment by Cash** screen is used to make payment for the Recurring Deposit (RD) account of the customer by cash.

To make payment against the RD account:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **RD Payment – Cash** or specify **RD Payment – Cash** in the search icon bar and select the screen.

The **Recurring Deposit Payment by Cash** screen is displayed.

Figure 4-16 Recurring Deposit Payment by Cash

▶ Denomination

2. On the **Recurring Deposit Payment by Cash** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 4-16 Recurring Deposit Payment by Cash - Field Description

Field	Description
RD Account	<p>Specify a valid RD account number. When you press the Tab key, the corresponding account information will be displayed in the Customer Information widget.</p> <p> Note:</p> <p>The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p>
Installments	Specify the number of installments.
Transaction Amount	<p>Displays the local currency of the branch. Specify the payment amount.</p> <p> Note:</p> <p>The user can select another currency from the drop-down values.</p>
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency, and it can be modified.</p> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.</p>

Table 4-16 (Cont.) Recurring Deposit Payment by Cash - Field Description

Field	Description
Account Amount	<p>Displays the transaction amount converted in terms of account amount based on the exchange rate.</p> <p> Note:</p> <p>This field is displayed only if <i>Multi-Currency Configuration</i> at <i>Function Code Indicator</i> level is set as <i>Y</i>.</p>
Total Charge Amount	<p>Displays the total charge amount, which is computed by the system in the local currency of the branch.</p> <p> Note:</p> <p>This field is displayed only if <i>Total Charges Configuration</i> at <i>Function Code Indicator</i> level is set as <i>Y</i>.</p>
Narrative	<p>Displays the default narrative as RD Payment by Cash, and it can be modified.</p>

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
- Click **Submit**.

A teller sequence number is generated, and the *Transaction Completed Successfully* information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to *Step 5* in [Cash Deposit](#).

4.12 F23C Tax Payment by Cash

The **F23C Tax Payment By Cash** screen is used to capture data related to the F23C tax document for a customer and collect the corresponding tax by cash from the customer.

To perform F23C tax payment by cash:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **F23C Tax Payment - Cash** or specify **F23C Tax Payment - Cash** in the search icon bar and select the screen.

The **F23C Tax Payment By Cash** screen is displayed.

Figure 4-17 F23C Tax Payment By Cash

The screenshot shows the 'F23C Tax Payment By Cash' form. It includes the following fields and sections:

- Reference Number Type ***: A dropdown menu.
- Reference Number Available**: A section header.
- Reference Number**: A text input field.
- Office or Institute Sub Code**: A text input field.
- Office or Institute Code**: A text input field.
- Litigation**: A text input field.
- Additional Details**: A section header.
- Total Tax Amount ***: A text input field.
- Total Charge**: A text input field.
- Narrative ***: A text input field containing 'F23 Tax by Cash'.
- Exchange Rate**: A dropdown menu with up/down arrows.
- Payment Amount ***: A text input field.
- Payment Data Details**: An expandable section.
- Charge Details**: An expandable section.
- Denomination**: An expandable section.
- Buttons**: Submit, Clear, and Cancel.

2. On the **F23C Tax Payment By Cash** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-17 F23C Tax Payment By Cash Screen - Field Description

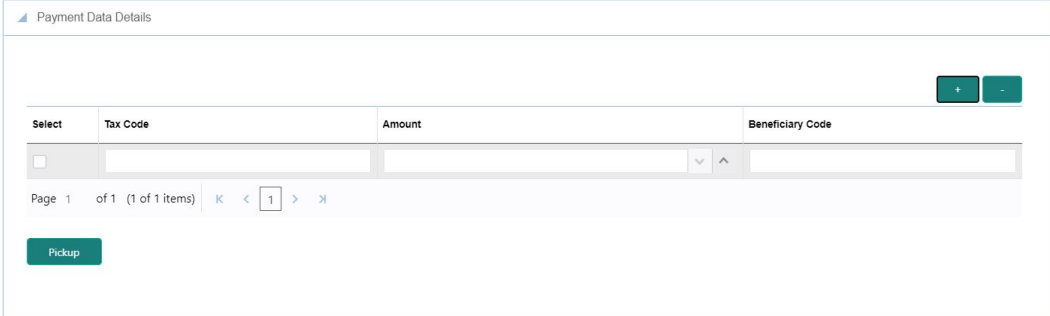

Field	Description
Reference Number Type	Select the reference number types from the drop-down list. The drop-down list shows the following values: <ul style="list-style-type: none"> • Reference Number Available • Reference Number Not Available
Reference Number	Specify the reference number of the payment provided by the Public Authority.
Office or Institute Code	Specify the office or institute code that receives the payment.
Office or Institute Sub code	Specify the office or institute subcode that receives the payment.
Litigation	Specify the kind of litigation.
For a Total Amount	Displays the total tax amount.
Total Charge	Displays the total charge amount, which is computed by the system in the local currency of the branch.

Table 4-17 (Cont.) F23C Tax Payment By Cash Screen - Field Description

Field	Description
Exchange Rate	Displays the exchange rate based on the Account Currency and Offset Account Currency .
Payment Amount	Displays the amount paid by the customer. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The currency of the amount paid defaults from the received currency.</p> </div>
Narrative	Displays the default narrative as F23 Tax by Cash , and it can be modified.

- Click on the **Payment Data Details** data segment.
The **Payment Data Details** data segment is displayed.

Figure 4-18 Payment Data Details

- On the **Payment Data Details** data segment, specify the fields. For more information on fields, refer to the field description table.

Table 4-18 Payment Data Details - Field Description

Field	Description
Tax Code	Specify the Tax Code.
Amount	Specify the tax amount.
Beneficiary Code	Specify the beneficiary institute code.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
- After you specify the **Reference Number**, click **Pickup**.

The system defaults the **Elaboration Date** in the section **Reference Number Available** with the current system date. In case you do not specify the **Reference Number**, then the **Principal Fiscal Code** needs to be specified. After which the system defaults the

Elaboration Date in the section **Reference Number Not Available** with the current system date. It then adds up the Amounts in the **Payment Data Details** block and defaults the sum in the **For a total Amount** field.

The system posts the following accounting entries on save and authorization of the record:

Table 4-19 Accounting Entries Posted for Payment Amount

Dr/Cr	Description	Amount
Dr	Cash Account	For a Total Amount
Cr	Account maintained in ARC of the associated product	For a Total Amount

Table 4-20 Accounting Entries Posted for Charge Amount

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Account maintained in ARC of the associated product	Charges amount computed as per ARC maintenance

The following validations are performed by the system:

- The system allows you to maintain a minimum of one row and a maximum of eight rows in the **Payment Data Details** multi-entry block. If you do not maintain the minimum row or exceed the maximum row, then the system displays an appropriate error message.
 - If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 characters that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for Fiscal Code. If the validation fails, then the system displays an appropriate error message. In the case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 characters, the system validates the last character in the value as per the checksum algorithm for a VAT number. If the validation fails, then the system displays an appropriate error message.
 - The system validates only the data format of the fields specified.
 - If the computed value for **Payment Amount** field value is less than or equal to 0, on pickup, the system displays an appropriate error message.
8. Once Pickup is completed, click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

4.13 F24C Tax Payment By Cash

The **F24C Payment Details** screen is used to capture data related to the F24C tax document for a customer and collect the corresponding tax by cash from the customer.

To perform F24C tax payment by cash:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **F24C Tax Payment - Cash** or specify **F24C Tax Payment - Cash** in the search icon bar and select the screen.

The **F24C Payment Details** screen is displayed.

Figure 4-19 F24C Payment Details

2. On the **F24C Payment Details** screen, specify the fields. For more information on fields, refer to the field description table.

Table 4-21 F24C Payment Details - Field Description

Field	Description
Total Tax Amount	Displays the total tax amount.
Payment Amount	Displays the amount to pay.
Narrative	Displays the default narrative as F24 Tax by Cash , and it can be modified.
Total Charge	Displays the total charge.

3. Specify the details in the **F24 Tax – By Cash** segment. For information on the fields based on the value selected for the **Form Type**, refer to the table.

Table 4-22 F24 Tax by Cash - Form Types and their References

Form Type	Reference Topic
Standard	Add Standard Details
Simplified	Add Simplified Details
Elements Identification	Add Element Identification Details

Table 4-22 (Cont.) F24 Tax by Cash - Form Types and their References

Form Type	Reference Topic
Predefined	Add Predefined Details

On selection of an appropriate value from the **Form Type**, only the corresponding tab will be enabled for input. For example, if you select **F24 Standard** as the **Form Type** then only the tab **F24 Standard** will be enabled and all other tabs will be disabled. The **Principal Fiscal Code** needs to be specified.

4. After entering all the form details, click **Refresh** in the **F24 Payment Details**.

The system adds up the Amounts and defaults the sum in the **Payment Amount** field. The system posts the following accounting entries on save and authorization of the record.

Table 4-23 Accounting Entries Posted for Payment Amount

Dr/Cr	Description	Amount
Dr	Cash Account	Final Section Amount of the corresponding tab which has been entered.
Cr	Account maintained in ARC of the associated product	Final Section Amount of the corresponding tab which has been entered.

Table 4-24 Accounting Entries Posted for Charge Amount

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Income Account	Charges amount computed as per ARC maintenance

The system validates only the data format of the fields specified. If any such validations fail, the system displays an appropriate error message. If you maintain more than the specified number of rows in any of the below blocks, then the system displays an appropriate error message. The following list shows the number of rows, which can be maintained for each **Form Type**:

Table 4-25 Maintenance for Form Type

Form Type	Maintenance
Standard	In the F24 Standard tab, the system allows you to maintain only the following number of records: <ul style="list-style-type: none"> • up to a maximum of 6 rows in the Tax multi-record block. • up to a maximum of 4 rows in the INPS multi-record block. • up to a maximum of 4 rows in the Region multi-record block. • up to a maximum of 4 rows in the IMU and Other Local Taxes multi-record block. • up to a maximum of 4 rows in the Insurance multi-record block. • up to a maximum of 3 rows in the Other Bodies multi-record block. • up to a maximum of 7 rows in the Excise multi-record block.
Simplified	In the F24 Simplified tab, up to a maximum of 10 rows in the Tax Details multi-record block.
Elements Identification	In the F24 Elements Identification tab, up to a maximum of 28 rows in the Tax Details multi-record block.
Predefined	In the F24 Predefined tab, up to a maximum of 1 row in the Tax Details multi-record block.

If the computed value for **Payment Amount** field value is less than or equal to 0, the system displays an appropriate error message. If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 characters that is for non-individual customers, the system validates the last character in the value as per the checksum algorithm for **Fiscal Code**. If the validation fails, then the system displays an appropriate error message. In the case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 characters, the system validates the last character in the value as per the checksum algorithm for a VAT number. If the validation fails, then the system displays an appropriate error message.

5. Once Pickup is completed, click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

Total Credit Amount (F)	Displays the total compensation amount.
Final Section Amount (E-F)	Displays the final section amount.

4.13.1.4 Add IMU and Other Local Taxes

You can add the details of IMU and other local taxes in the **IMU and Other Local Taxes** segment.

Make sure that the transaction details are added, and the **Form Type** is selected as **Standard**.

Figure 4-24 IMU and Other Local Taxes

To add the details of IMU and other local taxes:

On the **IMU and Other Local Taxes** segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-30 IMU and Other Local Taxes - Field Description

Field	Description
Institution Code/Town Code	Specify the institution/town code.
Late Payment	Specify if the payment is late.
Bounding Var.	Specify the Bounding Var.
Down Payment	Specify the down payment.
Final Payment	Specify the final payment.
Building Nr	Specify the building number.
Tax Code	Specify the tax code.
Installment	Specify the installment amount.
Deduction	Specify the deduction amount.
Total Debit Amount (G)	Displays the Total Debit Amount.
Building Reference Number	Specify the building reference number.
Total Credit Amount (H)	Displays the Total Compensation Amount.
Final Section Amount (G-H)	Displays the Final Section Amount.

4.13.1.5 Add Insurance Details

You can add the details of the insurance in the **Insurance Details** segment.

Make sure that the transaction details are added, and the **Form Type** is selected as **Standard**.

Figure 4-25 Insurance Details

To add the insurance details:

On the **Insurance Details** segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-31 Insurance Details - Field Description

Field	Description
Office Code	Specify the office code.
Insurance Number	Specify the insurance number.
Insurance Account Code	Specify the insurance account code.
Reference Number	Specify the reference number.
Reason	Specify the reason.
Debit Amount	Specify the amount to be paid.
Credit Amount	Specify the compensation amount.
Total Debit Amount (I)	Displays the total debit amount.
Total Credit Amount (L)	Displays the total compensation amount.
Final Section Amount (I-L)	Displays the final section amount.

4.13.1.6 Add Other Bodies

You can add the details of the other bodies in the **Other Bodies** segment.

Make sure that the transaction details are added, and the **Form Type** is selected as **Standard**.

Figure 4-26 Other Bodies

To add the details of the other bodies:

On the **Other Bodies** segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-32 Other Bodies - Field Description

Field	Description
Institution Code	Specify the institution code.
Office Code	Specify the office code.
Reason	Specify the reason.
Insurance Reference Number	Specify the insurance reference number.
Period (From)	Specify the date from when the amount is paid.
Period (To)	Specify the date till when the amount is paid.
Debit Amount	Specify the amount to be paid.
Credit Amount	Specify the compensation amount.
Total Debit Amount (M)	Displays the total debit amount.
Total Credit Amount (N)	Displays the total compensation amount.
Final Section Amount (M-N)	Displays the final section amount.

4.13.1.7 Add Excise Details

You can add the details of the excise in the **Excise** segment.

Make sure that the transaction details are added, and the **Form Type** is selected as **Standard**.

Figure 4-27 Excise Details

To add the details of the excise:

On the **Tax Details** segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-33 Excise - Field Description

Field	Description
Institution	Specify the institution.
Province	Specify the province.
Tax Code	Specify the tax code.
Company Identification	Specify the company identification number.
Installment	Specify the installment amount.
Period/Month	Specify the month of tax payment.
Period/Year	Specify the year of tax payment.
Debit Amount	Specify the amount to be paid.
Office Code	Specify the office code.
Total Debit Amount (O)	Displays the total debit amount.
Document Code	Specify the document code.
Final Section Amount	Displays the final section amount.

4.13.2 Add Simplified Details

You can add the F24 simplified details in the **F24 Tax – By Cash** data segment.

Make sure that the transaction details are added to the transaction screen.

Figure 4-28 F24 Tax By Cash - F24 Simplified

The screenshot shows the 'F24 Tax - By Cash' form. At the top, 'Form Type' is set to 'Simplified'. Under 'F24 Simplified', there are fields for 'Elaboration Date', 'Secondary Fiscal Code', 'Principal Fiscal Code *', and 'Identity code secondary fiscal code'. A 'Tax Details' table is present with columns: Section, Tax Code, Institution Code, Late Payment, Bounding Var, Down Payment, Final Payment, Building Nr, Installment, Year, Deduction, Debit Amount, and Credit Amount. The table is currently empty, showing 'No data to display.' Below the table are fields for 'Office Code', 'Document Code', 'Total Credit Amount (H)', 'Building Reference Number', 'Total Debit Amount (G)', and 'Final Section Amount (G-H)'. A 'C' button is at the bottom right. A footer note says 'Please click on the Refresh button next to Tax amount before Submit'.

To add the F24 simplified details:

On the **F24 Tax – By Cash** data segment, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 4-34 F24 Simplified - Field Description

Field	Description
Form Type	Select the Simplified tax category from the drop-down list.
F24 Simplified	Specify the fields.
Elaboration Date	Displays the elaboration date.
Principal Fiscal Code	Specify the debtor fiscal code. <div data-bbox="906 1577 1458 1808" style="border: 1px solid #ccc; padding: 10px; margin-top: 10px;"> <p> Note: For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.</p> </div>

Table 4-34 (Cont.) F24 Simplified - Field Description

Field	Description
Secondary Fiscal Code	Specify the secondary fiscal code. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 150px;"> <p> Note:</p> <p>For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.</p> </div>
Identity Code Secondary Fiscal Code	Specify the identity code secondary fiscal code.
Section	Specify the section.
Tax Code	Specify the tax code.
Institution Code	Specify the institution code.
Late Payment	Specify if the payment is late.
Bounding Var.	Specify the Bounding Var.
Down Payment	Specify the down payment.
Final Payment	Specify the final payment.
Building Nr	Specify the building number.
Installment	Specify the installment amount.
Year	Specify the year.
Deduction	Specify the deduction amount.
Debit Amount	Specify the amount to be paid.
Credit Amount	Specify the compensation amount.
Office Code	Specify the office code.
Document Code	Specify the document code.
Building Reference Number	Specify the building reference number.
Total Debit Amount (G)	Displays the total debit amount.
Total Credit Amount (H)	Specify the total compensation amount.
Final Section Amount (G-H)	Displays the final section amount.

4.13.3 Add Element Identification Details

You can add the details of the element identification in the **F24 Tax – By Cash** data segment.

Make sure that the transaction details are added to the transaction screen.

Figure 4-29 F24 Tax By Cash - Elements Identification

To add the details of the element identification:

On the **F24 Tax – By Cash** data segment, specify the fields. For more information on fields, refer to the field description table.

Table 4-35 F24 Tax By Cash with Elements Identification - Field Description

Field	Description
Form Type	Select the Elements Identification tax category from the drop-down list.
F24 Elide	Specify the fields.
Elaboration Date	Displays the elaboration date.
Principal Fiscal Code	Specify the debtor fiscal code.

Note:

For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.

Table 4-35 (Cont.) F24 Tax By Cash with Elements Identification - Field Description

Field	Description
Secondary Fiscal Code	Specify the secondary fiscal code. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 150px;"> <p> Note:</p> <p>For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.</p> </div>
Identity Code Secondary Fiscal Code	Specify the identity code secondary fiscal code.
Type of Vehicle/ Element	Specify the vehicle type.
Vehicle/ Element ID	Specify the vehicle ID.
Tax Code	Specify the tax code.
Year	Specify the year.
Debit Amount	Specify the amount to be paid.
Office Code	Specify the office code.
Document Code	Specify the document code.
Total Debit Amount	Displays the total amount to pay.
Final Section Amount	Displays the final section amount.

4.13.4 Add Predefined Details

You can add the F24 predefined details in the **F24 Tax – By Cash** data segment.

Make sure that the transaction details are added to the transaction screen.

Figure 4-30 F24 Tax By Cash - F24 Predefined

The screenshot shows the 'F24 Tax - By Cash' form. At the top, there is a 'Form Type' dropdown menu set to 'Predefined'. Below this is the 'F24 Predefined' section with fields for 'Elaboration Date', 'Secondary Fiscal Code', and 'Total Final Payment'. To the right, there are fields for 'Principal Fiscal Code *' and 'Identity code secondary fiscal code'. The 'Final Payment Fields' section includes a 'Tax Institution' field. The 'Tax Details' section has '+' and '-' buttons and a table with columns for 'Payment ID' and 'Amount to Pay'. The table is currently empty, showing 'No data to display.' and 'Page 1 (0 of 0 items)'. At the bottom, there are fields for 'Total Debit Amount' and 'Final Section Amount', with a 'C' button below the latter. A note at the bottom states: 'Please click on the Refresh button next to Tax amount before Submit'.

To add the F24 predefined details:

On the **F24 Tax – By Cash** data segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-36 F24 Predefined - Field Description

Field	Description
Form Type	Select the Predefined tax category from the drop-down list.
F24 Predefined	Specify the fields.
Elaboration Date	Displays the elaboration date.
Principal Fiscal Code	Specify the debtor fiscal code.

 **Note:**

For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.

Table 4-36 (Cont.) F24 Predefined - Field Description

Field	Description
Secondary Fiscal Code	Specify the secondary fiscal code. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 150px;"> <p> Note:</p> <p>For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.</p> </div>
Identity Code Secondary Fiscal Code	Specify the identity code secondary fiscal code.
Tax Institution	Displays the tax Institution.
Payment ID	Specify the payment ID.
Amount to Pay	Specify the amount to be paid.
Total Debit Amount	Displays the total debit amount.
Final Section Amount	Displays the final section amount.

4.14 F23 Tax Payment by Account

The **F23 Tax Payment by Account** screen is used to capture data related to the F23 tax document for a customer and collect the corresponding tax by cash from the customer.

To perform F23 tax payment by account:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **F23 Tax Payment by Account** or specify **F23 Tax Payment by Account** in the search icon bar and select the screen.

The **F23 Tax Payment by Account** screen is displayed.

Figure 4-31 F23 Tax Payment by Account

2. On the **F23 Tax Payment by Account** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-37 F23 Tax Payment By Account - Field Description

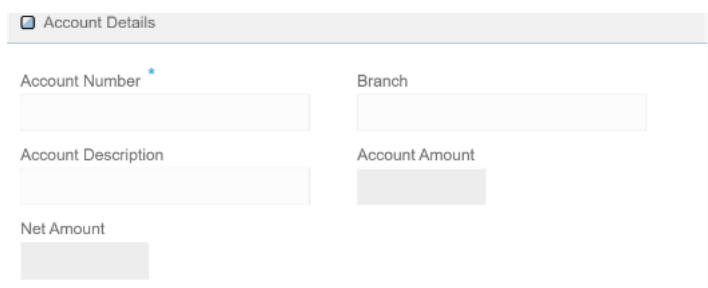

Field	Description
Reference Number Type	Select the reference number types from the drop-down list. The drop-down list shows the following values: <ul style="list-style-type: none"> • Reference Number Available • Reference Number Not Available
Reference Number	Specify the reference number of the payment provided by the public authority.
Office or Institute Code	Specify the office or institute code that receives the payment.
Office or Institute Sub code	Specify the office or institute subcode that receives the payment.
Litigation	Specify the kind of litigation.
For a Total Amount	Displays the total tax amount.
Total Charge	Displays the total charge amount, which is computed by the system in the local currency of the branch.
Exchange Rate	Displays the exchange rate based on the Account Currency and Offset Account Currency .

Table 4-37 (Cont.) F23 Tax Payment By Account - Field Description

Field	Description
Payment Amount	<p>Displays the amount paid by the customer.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The currency of the amount paid defaults from the received currency.</p> </div>
Narrative	Displays the default narrative as F23 Tax by Account , and it can be modified.

- Click on the **Account Details** data segment.
The **Account Details** data segment is displayed.

Figure 4-32 Account Details

The screenshot shows a form titled "Account Details" with the following fields:

- Account Number * (mandatory)
- Branch
- Account Description
- Account Amount
- Net Amount

- On the **Account Details** data segment, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 4-38 Account Details - Field Description

Field	Description
Account Number	<p>Specify the customer account number from which the tax is being paid.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.</p> </div>

Table 4-38 (Cont.) Account Details - Field Description

Field	Description
Branch	Displays the branch code.
Account Description	Displays the description of the account number specified.
Account Amount	Displays the amount available in the account.
Net Amount	Displays the amount, which is the net total amount levied to the customer.

- Click on the **Payment Data Details** data segment.
The **Payment Data Details** data segment is displayed.

Figure 4-33 Payment Data Details

- On the **Payment Data Details** data segment, specify the fields. For more information on fields, refer to the field description table.

Table 4-39 Payment Data Details - Field Description

Field	Description
Tax Code	Specify the tax code.
Amount	Specify the tax amount.
Beneficiary Code	Specify the beneficiary institute code.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- After you specify the **Reference Number**, corresponding fields are displayed for the user to input the details. Once you specify the **Payment Details** and click **Refresh**.

The system computes the total amount, which can be with or without charges.

If the **Reference Number** is not specified, the relevant fields are displayed for input in the section **Reference Number Not Available**. Once you specify the **Payment Details** and click **Refresh**, the system posts the following accounting entries on saving and authorization of the record:

Table 4-40 Accounting Entries Posted for Payment Amount

Dr/Cr	Description	Amount
Dr	Cash Account	For a Total Amount
Cr	Account maintained in ARC of the associated product	For a Total Amount

Table 4-41 Accounting Entries Posted for Charge Amount

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Account maintained in ARC of the associated product	Charges amount computed as per ARC maintenance

The following validations are performed by the system:

- The system allows you to maintain a minimum of one row and a maximum of eight rows in the **Payment Data Details** multi-entry block. If you do not maintain the minimum row or exceed the maximum row, then the system displays an appropriate error message.
 - If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 characters that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for Fiscal Code. If the validation fails, then the system displays an appropriate error message. In the case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 characters, the system validates the last character in the value as per the checksum algorithm for a VAT number. If the validation fails, then the system displays an appropriate error message.
 - The system validates only the data format of the fields specified.
 - If the computed value for **Payment Amount** field value is less than or equal to 0, on pickup, the system displays an appropriate error message.
9. Once the pickup is completed, click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

4.15 F24 Tax Payment By Account

The **F24 Tax Payment By Account** screen is used to capture data related to the F24 tax document for a customer and collect the corresponding tax by account from the customer.

To perform F24 tax payment by account:

1. On the Homepage, from **Teller** mega menu, under **Customer Transaction**, click **F24 Tax Payment By Account** or specify **F24 Tax Payment By Account** in the search icon bar and select the screen.

The **F24 Tax Payment By Account** screen is displayed.

Figure 4-34 F24 Tax Payment By Account

2. On the **F24 Tax Payment By Account** screen, specify the fields. For more information on fields, refer to the field description table.

Table 4-42 F24 Tax Payment By Account - Field Description

Field	Description
Total Tax Amount	Displays the total tax amount.
Narrative	Displays the default narrative as F24 Tax by Account , and it can be modified.
Total Charge	Displays the total charge.
Payment Amount	Displays the amount to pay.

3. Click on the **Account Details** data segment.
The **Account Details** data segment is displayed.

Figure 4-35 Account Details

The screenshot shows a form titled 'Account Details' with the following fields:

- Account Number**: A text input field with a small blue asterisk to its right, indicating it is mandatory.
- Branch**: A text input field.
- Account Description**: A text input field.
- Account Amount**: A shaded rectangular area, likely representing a display field.
- Net Amount**: A shaded rectangular area, likely representing a display field.

4. On the **Account Details** data segment, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 4-43 Account Details - Field Description

Field	Description
Account Number	Specify the customer account number from which the tax is being paid.  Note: The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.
Branch	Displays the branch code.
Account Description	Displays the description of the account number specified.
Account Amount	Displays the amount available in the account.
Net Amount	Displays the amount, which is the net total amount levied to the customer.

5. Specify the details in the **F24 Tax By Account** segment. For information on the fields based on the value selected for the **Form Type**, refer to the table.

Table 4-44 F24 Tax By Account - Form Types and their References

Form Type	Reference Topic
Standard	Add Standard Details
Simplified	Add Simplified Details
Elements Identification	Add Element Identification Details
Predefined	Add Predefined Details

On selection of an appropriate value from the **Form Type**, only corresponding fields of the form will be displayed for input. For example, if you select **F24 Standard** as the Form Type, then only the fields of **F24 Standard** will be available. The **Principal Fiscal Code** needs to be specified.

6. After entering all the form details, click **Refresh** in the **F24 Payment Details**.

The system adds up the Amounts and defaults the sum in the **Payment Amount** field. The system posts the following accounting entries on save and authorization of the record.

Table 4-45 Accounting Entries Posted for Payment Amount

Dr/Cr	Description	Amount
Dr	Cash Account	Final Section Amount of the corresponding tab, which has been entered.
Cr	Account maintained in ARC of the associated product	Final Section Amount of the corresponding tab which has been entered.

Accounting entries posted for the charge amount:

Table 4-46 Accounting Entries Posted for Charge Amount

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Income Account	Charges amount computed as per ARC maintenance

The system validates only the data format of the fields specified. If any of such validations fail, the system displays an appropriate error message. If you maintain more than the specified number of rows in any of the below blocks, then the system displays an appropriate error message. The following list shows the number of rows, which can be maintained for each Form Type:

Table 4-47 Maintenance for Form Type

Form Type	Maintenance
Standard	In the F24 Standard tab, the system allows you to maintain only the following number of records: <ul style="list-style-type: none"> • up to a maximum of 6 rows in the Tax multi-record block. • up to a maximum of 4 rows in the INPS multi-record block. • up to a maximum of 4 rows in the Region multi-record block. • up to a maximum of 4 rows in the IMU and Other Local Taxes multi-record block. • up to a maximum of 4 rows in the Insurance multi-record block. • up to a maximum of 3 rows in the Other Bodies multi-record block. • up to a maximum of 7 rows in the Excise multi-record block.
Simplified	In the F24 Simplified tab, up to a maximum of 10 rows in the Tax Details multi-record block.

Table 4-47 (Cont.) Maintenance for Form Type

Form Type	Maintenance
Elements Identification	In the F24 Elements Identification tab, up to a maximum of 28 rows in the Tax Details multi-record block.
Predefined	In the F24 Predefined tab, up to a maximum of 1 row in the Tax Details multi-record block.

If the computed value for the **Payment Amount** field value is less than or equal to 0, the system displays an appropriate error message. If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 characters that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for **Fiscal Code**.

If the validation fails, then the system displays an appropriate error message. In the case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 characters, the system validates the last character in the value as per the checksum algorithm for a VAT number. If the validation fails, then the system displays an appropriate error message.

- Once Pickup is completed, click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

- [Add Standard Details](#)
You can add the F24 standard details in the **F24 Tax By Account** data segment.
- [Add Simplified Details](#)
You can add the F24 simplified details in the **F24 Tax By Account** data segment.

Table 4-50 (Cont.) F24 Tax By Cash with Elements Identification - Field Description

Field	Description
Principal Fiscal Code	Specify the debtor fiscal code. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 150px;"> <p> Note:</p> <p>For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.</p> </div>
Secondary Fiscal Code	Specify the secondary fiscal code. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 150px;"> <p> Note:</p> <p>For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.</p> </div>
Identity Code Secondary Fiscal Code	Specify the identity code secondary fiscal code.
Total Final Payment	Specify the total final payment.
Type of Vehicle/ Element	Specify the vehicle type.
Vehicle/ Element ID	Specify the vehicle ID.
Tax Code	Specify the tax code.
Year	Specify the year.
Debit Amount	Specify the amount to be paid.
Office Code	Specify the office code.
Document Code	Specify the document code.
Total Debit Amount	Displays the total amount to pay.
Final Section Amount	Displays the final section amount.

4.15.4 Add Predefined Details

You can add the F24 predefined details in the **F24 Tax By Account** data segment.

Make sure that the transaction details are added to the screen.

Figure 4-39 F24 Tax by Account - F24 Predefined

The screenshot shows a web form titled "F24 Tax By Account" with a sub-section "F24 Predefined".

- Form Type:** A dropdown menu set to "Predefined".
- F24 Predefined Section:**
 - Elaboration Date:** A text input field with a calendar icon.
 - Secondary Fiscal Code:** A text input field.
 - Total Final Payment:** A text input field.
 - Final Payment Fields:**
 - Erario Institution:** A text input field.
- Tax Details:** A table with columns "Payment ID" and "Amount to Pay". The table is currently empty, showing "No data to display." and a pagination control with "1" selected.
- Summary Fields:**
 - Total Debit Amount:** A text input field.
 - Final Section Amount:** A text input field.

At the bottom, there is a note: "Please click on the Refresh button next to Tax amount before Submit".

To add the F24 predefined details:

On the **F24 Tax – By Cash** data segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 4-51 F24 Predefined - Field Description

Field	Description
Form Type	Select the Predefined tax category from the drop-down list.
F24 Predefined	Specify the fields.
Elaboration Date	Displays the elaboration date.
Principal Fiscal Code	Specify the debtor fiscal code.

Note:

For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.

Table 4-51 (Cont.) F24 Predefined - Field Description

Field	Description
Secondary Fiscal Code	Specify the secondary fiscal code. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 150px;"> <p> Note:</p> <p>For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be an 11-character VAT number.</p> </div>
Identity Code Secondary Fiscal Code	Specify the identity code secondary fiscal code.
Erario Institution	Displays the Erario Institution.
Payment ID	Specify the payment ID.
Amount to Pay	Specify the amount to be paid.
Total Debit Amount	Displays the total amount to pay.
Final Section Amount	Displays the final section amount.

5

Miscellaneous Transactions

The Teller can use Miscellaneous Transactions to perform GL transactions against a customer's CASA account and GL account.

This topic contains the following subtopics:

- [Miscellaneous Customer Debit](#)
The **Miscellaneous Customer Debit** screen is used to transfer funds from the customer account to GL.
- [Miscellaneous Customer Credit](#)
The **Miscellaneous Customer Credit** screen is used to transfer funds from GL to the customer account.
- [Miscellaneous GL Debit](#)
The **Miscellaneous GL Debit** screen is used to debit an amount from a GL account of the transaction branch and pay out the equivalent amount in cash.
- [Miscellaneous GL Credit](#)
The **Miscellaneous GL Credit** screen is used to credit an amount to a GL account of the transaction branch by pay-in of equivalent amount in cash.
- [Miscellaneous GL Transfer](#)
The **Miscellaneous GL Transfer** screen is used to transfer the amount from a GL account to another GL account.
- [Miscellaneous Transfer](#)
The **Miscellaneous Transfer** screen is used to facilitate transfer between the two different GLs or customer accounts.

5.1 Miscellaneous Customer Debit

The **Miscellaneous Customer Debit** screen is used to transfer funds from the customer account to GL.

The customer account can be debited for various reasons, with a corresponding credit to a GL belonging to the transaction branch.

To transfer funds from the customer account to GL:

1. On the Homepage, from **Teller** mega menu, under **Miscellaneous**, click **Misc Customer Debit** or specify **Misc Customer Debit** in the search icon bar and select the screen.

The **Miscellaneous Customer Debit** screen is displayed.

Figure 5-1 Miscellaneous Customer Debit

2. On the **Miscellaneous Customer Debit** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 5-1 Miscellaneous Customer Debit - Field Description

Field	Description
Account Number	Specify the account number from which the funds need to be debited. Note: The system displays an override or error message on the tab out of Account Number based on the account dormancy parameters.
Account Amount	Displays the account currency based on the account number specified. Specify the amount that needs to be debited from the account currency.

Table 5-1 (Cont.) Miscellaneous Customer Debit - Field Description

Field	Description
GL Account	Specify the GL account to which the funds need to be credited. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;">  Note: You can also select the appropriate GL account from the list of values that displays all the valid GL accounts. </div>
GL Branch	Displays the branch code of the transaction branch, and it can be modified.
GL Description	Displays the description of the selected GL account number.
GL Currency	By default, the account currency is displayed, and it can be modified.
GL Amount	Displays the amount in terms of GL currency. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;">  Note: This field is displayed only if <i>Multi-Currency Configuration at Function Code Indicator level</i> is set as <i>Y</i>. </div>
Negotiated Exchange Rate	Specify the negotiated exchange rate if it is required to perform the transaction using negotiated value. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;">  Note: This field is applicable only if the transaction involves cross currency. If this option is selected, the Negotiated Reference Number field will become mandatory. </div>
Negotiated Reference Number	Specify the reference number for the negotiated cost rate. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;">  Note: This field is applicable only if the transaction involves cross currency. </div>
Narrative	Displays the narrative as Miscellaneous Customer Debit , and it can be modified.
Reference Number	Specify the reference number for the transaction, which is the original transaction reference or any invoice number.

Table 5-1 (Cont.) Miscellaneous Customer Debit - Field Description

Field	Description
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into GL currency, and it can be modified.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.</p> </div>

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the **Transaction Completed Successfully** information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves.

5.2 Miscellaneous Customer Credit

The **Miscellaneous Customer Credit** screen is used to transfer funds from GL to the customer account.

The customer account can be credited for various reasons, with the corresponding debit to a GL belonging to the transaction branch.

To perform the miscellaneous customer credit:

1. On the Homepage, from **Teller** mega menu, under **Miscellaneous**, click **Misc Customer Credit** or specify **Misc Customer Credit** in the search icon bar and select the screen.

The **Miscellaneous Customer Credit** screen is displayed.

GL Description	<p>Displays the description of the selected GL account number.</p>

Table 5-2 (Cont.) Miscellaneous Customer Credit - Field Description

Field	Description
Negotiated Exchange Rate	Specify the negotiated exchange rate if it is needed to perform the transaction using negotiated value.  Note: This field is applicable only if the transaction involves cross currency. If this option is selected, the Negotiated Reference Number field will become mandatory.
Negotiated Reference Number	Specify the reference number for the negotiated cost rate.  Note: This field is applicable only if the transaction involves cross currency.
Narrative	Displays the narrative as Miscellaneous Customer Credit , and it can be modified.
Reference Number	Specify the reference number for the transaction, which is the original transaction reference or any invoice number.
Exchange Rate	Displays the exchange rate used to convert the transaction currency into GL currency, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the GL account is debited, and the customer account is credited to the extent of the **Account Amount**.

5.3 Miscellaneous GL Debit

The **Miscellaneous GL Debit** screen is used to debit an amount from a GL account of the transaction branch and pay out the equivalent amount in cash.

To perform miscellaneous GL debit:

1. On the Homepage, from **Teller** mega menu, under **Miscellaneous**, click **Misc GL Debit** or specify **Misc GL Debit** in the search icon bar and select the screen.

The **Miscellaneous GL Debit** screen is displayed.

Field	Description
To GL Account	Specify the GL account to which the funds need to be credited.  Note: You can also select the appropriate GL account from the list of values that displays all the valid GL accounts.
To GL Amount	Displays the branch account currency and allows to modify if required. It also displays the amount, which is credited to the GL account.
To GL Description	Displays the description of the selected GL account number.
GL Currency	Displays the branch currency and allows to modify if required.
To GL Branch	Click the search icon, and select the To GL Branch from the list of values.
Narrative	Displays the default narrative as Miscellaneous GL Transfer , and it can be modified.
Reference Number	Specify the reference number for the transaction.
Exchange Rate	Displays the exchange rate used to convert the transaction currency into GL currency, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

5.6 Miscellaneous Transfer

The **Miscellaneous Transfer** screen is used to facilitate transfer between the two different GLs or customer accounts.

This transaction can be carried out between:

- GL to GL
- Customer Account to Customer Account
- GL to Customer Account
- Customer Account to GL

To perform miscellaneous transfer:

1. On the Homepage, from **Teller** mega menu, under **Miscellaneous**, click **Miscellaneous Transfer** or specify **Miscellaneous Transfer** in the search icon bar and select the screen.

The **Miscellaneous Transfer** screen is displayed.

Figure 5-6 Miscellaneous Transfer

The screenshot displays the 'Miscellaneous Transfer' form. It includes the following sections and fields:

- Function Code ***: A search-enabled text field.
- Currency ***: A search-enabled text field.
- Debit Account Details**:
 - Debit Account ***: A search-enabled text field.
 - Debit Account Branch**: A search-enabled text field.
 - Debit Account Name**: A disabled text field.
 - Debit Amount ***: A text field.
 - Debit Currency ***: A search-enabled text field.
- Credit Account Details**:
 - Credit Account ***: A search-enabled text field.
 - Credit Account Branch**: A search-enabled text field.
 - Credit Account Name**: A disabled text field.
 - Credit Amount ***: A text field.
 - Credit Currency ***: A search-enabled text field.
- Additional Details**:
 - Reference Number**: A text field.
 - Exchange Rate**: A numeric field with up/down arrows.
 - Narrative ***: A text area containing the text 'Miscellaneous Transfer'.
- Charge Details**: A collapsed section at the bottom.
- Buttons**: 'Submit', 'Clear', and 'Cancel' buttons at the bottom right.

2. On the **Miscellaneous Transfer** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 5-6 Miscellaneous Transfer

Field	Description
Function Code	Click the search icon, and select the function code from the list of values, which contains only non-cash transactions.
Currency	Click the search icon, and select the currency from the list of values.  Note: By default, the currency field will default to the local branch currency, and it can be modified.
Query	Click Query to fetch the details.  Note: Based on the specified values of Function Code and Currency , the system populates Debit Account and Credit Account details. You can also modify the values.
Debit Account Details	Specify the fields under this section.
Debit Account	Click the search icon, and select the debit account number from the list of values.
Debit Account Name	Displays the name of the specified debit account.
Debit Account Branch	Click the search icon, and select the debit account branch from the list of values.
Debit Currency	Click the search icon, and select the debit currency from the list of values.
Debit Amount	Specify the amount that needs to be debited.
Credit Account Details	Specify the fields under this section.
Credit Account	Click the search icon, and select the credit account number from the list of values.
Credit Account Name	Displays the name of the specified credit account.
Credit Account Branch	Click the search icon, and select the credit account branch from the list of values.
Credit Currency	Click the search icon, and select the credit currency from the list of values.
Credit Amount	Displays the credit amount based on the exchange rate pickup.  Note: This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.

Table 5-6 (Cont.) Miscellaneous Transfer

Field	Description
Exchange Rate	<p>Displays the exchange rate used to convert the transfer currency into transaction currency and it can be modified.</p> <p> Note:</p> <p>If the transfer currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p>
Total Charges	<p>Displays the total charge amount, which is computed by the system.</p> <p> Note:</p> <p>This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p>
Additional Details	Specify the fields under this section.
Reference Number	Specify the reference number of the transaction.
Narrative	Displays the default narrative as Miscellaneous Transfer , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the **Transaction Completed Successfully** information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

6

Transfers

The Teller can use Transfers to perform inter-bank transfers, intra-bank transfers, and cross-border transactions.

This topic contains the following subtopics:

- [Account to Account Transfer](#)
The **Account to Account Transfer** screen is used to transfer funds from one account to another account within the bank.
- [In-House Cheque Deposit](#)
The **In House Cheque Deposit** screen is used to capture in-house cheque deposit transactions for the customers.
- [Domestic Transfer Against Account](#)
The **Domestic Transfer Against Account** screen is used to transfer funds from an account held with the bank to an account held with another bank, within the same country.
- [Domestic Transfer Against Walk-in](#)
The **Domestic Transfer Against Walk-in** screen is used to accept cash from the walk-in customer and transfer funds to the account held with another bank within the same country.
- [International Transfer Against Account](#)
The **International Transfer Against Account** screen is used to facilitate international transfer by debiting the account holder of the bank.
- [International Transfer Against Walk-in](#)
The **International Transfer Against Walk-in** screen is used to facilitate international transfer by accepting cash from the walk-in customer.

6.1 Account to Account Transfer

The **Account to Account Transfer** screen is used to transfer funds from one account to another account within the bank.

The funding account and beneficiary account can be in different currencies and belong to different branches.

To perform account transfer:

1. On the Homepage, from **Teller** mega menu, under **Transfers**, click **Account to Account Transfer** or specify **Account to Account Transfer** in the search icon bar and select the screen.

The **Account Transfer** screen is displayed.

Figure 6-1 Account Transfer

2. On the **Account Transfer** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 6-1 Account Transfer - Field Description

Field	Description
Debit Account	Specify the customer account from which the funds need to be debited.
Debit Amount	Displays the transaction account currency. Specify the transaction amount that needs to be debited from the customer account.

Table 6-1 (Cont.) Account Transfer - Field Description

Field	Description
Cheque Number	<p>Specify the cheque number of the customer account as provided by the Customer.</p> <p> Note:</p> <p>If the cheque number of the customer account is specified, the cheque status update will be done as part of the handoff to FLEXCUBE Universal Banking.</p> <p>The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.</p>
Cheque Date	Click the calendar icon and select the date on which the cheque has been issued.
Credit Account	<p>Specify the account to which the funds need to be credited.</p> <p> Note:</p> <p>In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account.</p>
Credit Account Name	Displays the description of the account number specified.
Credit Account Branch	Displays the branch code of the account number specified.
Credit Amount	<p>Displays the amount in terms of the credit account currency.</p> <p> Note:</p> <p>This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p>

Table 6-1 (Cont.) Account Transfer - Field Description

Field	Description
Negotiated Exchange Rate	<p>Specify the negotiated exchange rate if it is needed to perform the transaction using negotiated value.</p> <p> Note:</p> <p>This field is applicable only if the transaction involves cross currency. If this option is selected, the Negotiated Reference Number field will become mandatory.</p>
Negotiated Reference Number	<p>Specify the reference number for the negotiated cost rate.</p> <p> Note:</p> <p>This field is applicable only if the transaction involves cross currency.</p>
Exchange Rate	<p>Displays the exchange rate used to convert the transaction account currency into credit account currency and it can be modified.</p> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration at the Function Code Indicator</code> level is set as Y.</p>
Total Charge (LCY)	<p>Displays the total charge amount, which is computed by the system.</p> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration at the Function Code Indicator</code> level is set as Y.</p>
Narrative	<p>Displays the default narrative as Account Transfer, and it can be modified.</p>

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the UBS for accounting.

6.2 In-House Cheque Deposit

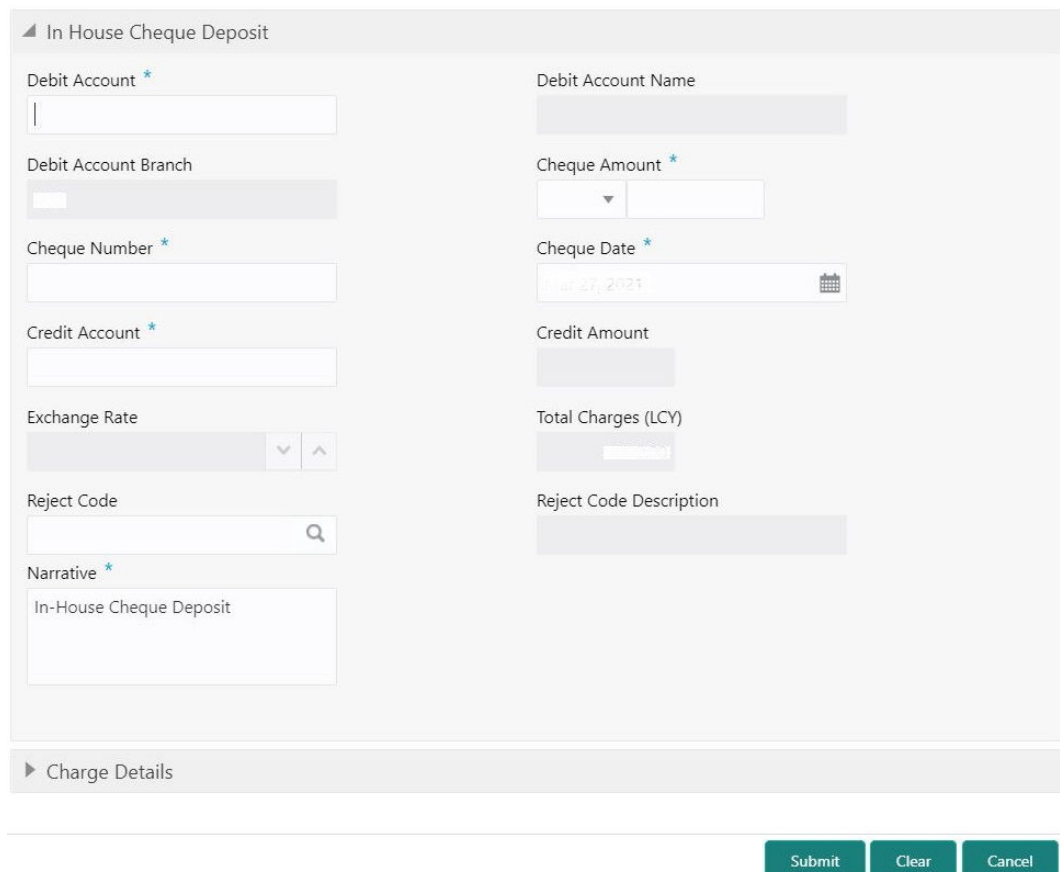

The **In House Cheque Deposit** screen is used to capture in-house cheque deposit transactions for the customers.

To capture in-house cheque deposit transactions:

1. On the Homepage, from **Teller** mega menu, under **Transfers**, click **In House Cheque Deposit** or specify **In House Cheque Deposit** in the search icon bar and select the screen.

The **In House Cheque Deposit** screen is displayed.

Figure 6-2 In House Cheque Deposit

The screenshot displays the 'In House Cheque Deposit' form with the following fields and controls:

- Debit Account ***: Text input field.
- Debit Account Branch**: Dropdown menu.
- Cheque Number ***: Text input field.
- Credit Account ***: Text input field.
- Exchange Rate**: Input field with up/down arrows.
- Reject Code**: Searchable text input field.
- Narrative ***: Text area containing 'In-House Cheque Deposit'.
- Debit Account Name**: Read-only text field.
- Cheque Amount ***: Input field with a dropdown arrow.
- Cheque Date ***: Date picker showing 'Mar 27, 2021'.
- Credit Amount**: Read-only text field.
- Total Charges (LCY)**: Read-only text field.
- Reject Code Description**: Read-only text field.

At the bottom right, there are three buttons: **Submit**, **Clear**, and **Cancel**. A 'Charge Details' section is partially visible at the bottom left.

- On the **In House Cheque Deposit** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 6-2 In House Cheque Deposit - Field Description

Field	Description
Debit Account	Specify the account number of the drawer.
Debit Account Name	Displays the name of the account.
Debit Account Branch	Displays the branch code of the account number specified.
Cheque Amount	Specify the currency and amount as mentioned in the cheque.
Cheque Number	Specify the cheque number.  Note: The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.
Cheque Date	Specify the date of issue as mentioned in the cheque.
Credit Account	Specify the account number that needs to be credited with the cheque amount.
Credit Amount	Displays the transaction amount based on the exchange rate.  Note: This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y .
Exchange Rate	Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.  Note: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y .

Table 6-2 (Cont.) In House Cheque Deposit - Field Description

Field	Description
Total Charges (LCY)	<p>Displays the total charge amount, which is computed by the system.</p> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration at Function Code Indicator</code> level is set as <code>Y</code>.</p>
Reject Code	<p>Select the reject code from the list of values, which are maintained in the Reject Code Maintenance screen.</p> <p> Note:</p> <p>If the cheque withdrawal transaction needs to be rejected, you can reject it by specifying the appropriate reject code in this field. The transaction can be rejected for any of the following reasons:</p> <ul style="list-style-type: none"> • Insufficient funds • Signature mismatch • Stale cheque
Reject Code Description	Displays the description of the specified reject code.
Narrative	Displays the default narrative as In-House Cheque Deposit , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to UBS for accounting.

6.3 Domestic Transfer Against Account

The **Domestic Transfer Against Account** screen is used to transfer funds from an account held with the bank to an account held with another bank, within the same country.

Based on the payment type selected, the transaction is routed to the corresponding transaction network.

To perform domestic transfer against account:

1. On the Homepage, from **Teller** mega menu, under **Transfers**, click **Domestic Trf - Account** or specify **Domestic Trf - Account** in the search icon bar and select the screen.

The **Domestic Transfer Against Account** screen is displayed.

Figure 6-3 Domestic Transfer Against Account

The screenshot shows the 'Domestic Transfer Against Account' form. It contains the following fields and controls:

- Remitter Account ***: A text input field.
- Transaction Amount ***: A field with a currency dropdown (set to USD) and a numeric input.
- Cheque Number**: A text input field.
- Cheque Date**: A date picker showing 'Nov 27, 2021'.
- Exchange Rate**: A numeric input field with up and down arrows.
- Account Amount**: A greyed-out numeric input field.
- Total Charges**: A greyed-out numeric input field.
- Narrative ***: A text input field containing 'Domestic Transfer Against Account'.

Below the form are two expandable sections: 'Charge Details' and 'Payment Details'. At the bottom right are three buttons: 'Submit', 'Clear', and 'Cancel'.

2. On the **Domestic Transfer Against Account** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 6-3 Domestic Transfer Against Account - Field Description

Field	Description
Remitter Account	Specify the customer account from which the funds need to be debited.
Transaction Amount	Displays the transaction account currency and it allows to select from drop-down values. Specify the transaction amount that needs to be debited from the customer account.
Cheque Number	Specify the cheque number of the customer account as provided by the customer. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.</p> </div>
Cheque Date	Click the calendar icon and select the date on which the cheque has been issued.
Account Amount	Displays the amount in terms of the remitter account currency. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p> </div>
Exchange Rate	Displays the exchange rate used to convert the transaction account currency into credit account currency, and it can be modified. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p> </div>
Total Charges	Displays the total charge amount, which is computed by the system. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if Total Charges Configuration at the Function Code Indicator level is set as Y.</p> </div>

Table 6-3 (Cont.) Domestic Transfer Against Account - Field Description

Field	Description
Narrative	Displays the default narrative as Domestic Transfer Against Account , and it can be modified.

3. Specify the payment details. For information on the fields in the **Payment Details** segment, refer to [Add Payment Details for Domestic Transfer](#).
4. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
5. Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from the Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

 **Note:**

System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV_TM_BC_PARAM_DTLS. (When Auto Processing is 'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

- [Add Payment Details for Domestic Transfer](#)
You can add the payment details for the domestic transfer in the **Payment Details** data segment.

6.3.1 Add Payment Details for Domestic Transfer

You can add the payment details for the domestic transfer in the **Payment Details** data segment.

Make sure that the transaction details are added to the screen.

Figure 6-4 Payment Details

The screenshot shows a 'Payment Details' form with the following sections:

- Remitter Details:**
 - Remitter Name *
 - Address Line 1, Address Line 2, Address Line 3, Address Line 4

Field	Description
Remitter Details	Specify the fields.
Remitter Name	Displays the remitter description based on the remitter account number specified.
Address Line 1 to Address Line 4	Displays the remitter address details.
Communication Mode	Specify the mode of communication for the transaction. The drop-down values are E-Mail and Phone .

Table 6-4 (Cont.) Payment Details - Field Description

Field	Description
Mobile No	Specify the mobile number if the mode of communication is selected as Phone .
Email ID	Specify the email address if the mode of communication is selected as E-Mail .
Beneficiary Details	Specify the fields.
Payment Type	Select the payment type from the drop-down values.
Beneficiary Bank Code	Select the beneficiary bank code from the list of values. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF; margin-top: 10px;">  Note: The LOV display all valid clearing bank codes maintained in the system. </div>
Beneficiary Bank Name	Specify the name of the beneficiary bank. If the beneficiary bank code is selected, the system displays the description.
Beneficiary Account	Specify the account number of the beneficiary.
Account Type	Select the account type of the beneficiary from the drop-down list.
Account Name	Specify the account name of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Remittance Information	Specify the fields.
Remittance Information Line 1 to Remittance Information Line 4	Specify the remittance information in free text format.

6.4 Domestic Transfer Against Walk-in

The **Domestic Transfer Against Walk-in** screen is used to accept cash from the walk-in customer and transfer funds to the account held with another bank within the same country.

Based on the payment type selected, the transaction is routed to the corresponding transaction network.

To perform domestic transfer against walk-in:

1. On the Homepage, from **Teller** mega menu, under **Transfers**, click **Domestic Trf - Walkin** or specify **Domestic Trf - Walkin** in the search icon bar and select the screen.

The **Domestic Transfer Against Walk-in** screen is displayed.

Figure 6-5 Domestic Transfer Against Walk-in

2. On the **Domestic Transfer Against Walk-in** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 6-5 Domestic Transfer Against Walkin - Field Description

Field	Description
Transaction Amount	Select the transaction currency from the drop-down list. Specify the transaction amount that needs to be transferred.
Total Charges	Displays the total charge amount, which is computed by the system. Note: This field is displayed only if Total Charges Configuration at the Function Code Indicator level is set as Y .
Narrative	Displays the default narrative as Domestic Transfer Against Walkin , and it can be modified.

3. Specify the payment details. For information on the fields in the **Payment Details** segment, refer to [Add Payment Details for Domestic Transfer](#).
4. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
5. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
6. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from the Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

 **Note:**

System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV_TM_BC_PARAM_DTLS. (When Auto Processing is 'N', then Maker-Checker-Maker-Maker and when Auto Processing is Y then Maker-Checker-Maker).

6.5 International Transfer Against Account

The **International Transfer Against Account** screen is used to facilitate international transfer by debiting the account holder of the bank.

You can remit in the currency of the customer account and transfer in another currency based on the request from the customer. If the transaction currency differs from the transfer currency, the exchange rate is populated to calculate the equivalent amount.

To perform international transfer against account:

1. On the Homepage, from **Teller** mega menu, under **Transfers**, click **International - Account** or specify **International - Account** in the search icon bar and select the screen.

The **International Transfer Against Account** screen is displayed.

Exchange Rate	Displays the exchange rate used to convert the cheque currency into transaction currency, and it can be modified.  Note: If the transfer currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <i>Multi-Currency Configuration</i> at <i>Function Code Indicator</i> level is set as <i>Y</i> .
Total Charges (LCY)	Displays the total charge amount, which is computed by the system.  Note: This field is displayed only if <i>Multi-Currency Configuration</i> at <i>Function Code Indicator</i> level is set as <i>Y</i> .
Narrative	Displays the default narrative as Cheque Deposit , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

A teller sequence number is generated, and the *Transaction Completed Successfully* information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for Outward Clearing transaction processing with external system status as **Pending**.

After the transaction is processed and responded from the Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

OBBRN will only do data capture and populate the request to OBPM for main leg accounting. Charge accounting will be posted to UBS from OBBRN.

 **Note:**

System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag Auto Processing as Y in TRANSACTION.SRV_TM_BC_PARAM_DTLS.

7.1.2 Cheque Deposit Against GL

The Teller can use the **Cheque Deposit** screen to carry out the cheque deposit transaction for credit of a GL account.

To capture the cheque deposit request:

1. On the Homepage, from **Teller** mega menu, under **Clearing**, click **Cheque Deposit** or specify **Cheque Deposit** in the search icon bar and select the screen.

The **Cheque Deposit** screen is displayed.

Figure 7-2 Cheque Deposit

The screenshot shows a 'Cheque Deposit' form with the following fields and controls:

- Cheque Amount ***: Input field with a currency dropdown (USD).
- Cheque Date ***: Date picker showing 'Mar 27, 2021'.
- Deposit Mode ***: Dropdown menu with 'GL' selected.
- Payee GL ***: Searchable input field.
- GL Description**: Text area.
- GL Currency ***: Searchable input field.
- Cheque Number ***: Input field.
- Drawer Account ***: Input field.
- Drawer Name**: Input field.
- Network Code ***: Searchable input field.
- Routing Number ***: Input field.
- Cheque Deposit Date ***: Date picker.
- Account Amount ***: Input field.
- Exchange Rate**: Input field with up/down arrows.
- Negotiated Exchange Rate**: Input field with up/down arrows.
- Negotiated Reference Number**: Input field.
- Total Charges(LCY)**: Input field.
- Narrative ***: Text area containing 'Cheque Deposit by GL'.

At the bottom right, there are three buttons: **Submit**, **Clear**, and **Cancel**.

2. On the **Cheque Deposit** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 7-2 Cheque Deposit (GL Mode) - Field Description

Field	Description
Cheque Amount	Specify the currency and amount mentioned in the cheque that needs to be deposited in the account.
Cheque Date	Specify the cheque issued date.
Deposit Mode	Select the deposit mode as GL from the drop-down values.
Payee GL	Specify the customer GL number in which the cheque needs to be deposited.
GL Description	Displays the description of the specified Payee GL.
GL Currency	Select the GL currency from the list of values.
Cheque Number	Specify the MICR number displayed on the cheque.

Table 7-2 (Cont.) Cheque Deposit (GL Mode) - Field Description

Field	Description
Drawer Account	Specify the account number on which the cheque is drawn.
Drawer Name	Specify the name of the drawer account.
Network Code	Specify the network code.  Note: You can also select from the list of maintained clearing codes.
Routing Number	Specify the routing number for cheque clearance. The list of values will call the Oracle Banking Payments service to fetch the list of routing numbers based on the Network Code selected.
Cheque Deposit Date	Displays the current posting date as the cheque deposit date.
Negotiated Exchange Rate	Specify the negotiated exchange rate if it is needed to perform the transaction using negotiated value.  Note: This field is applicable only if the transaction involves cross currency. If this option is selected, the Negotiated Reference Number field will become mandatory.
Negotiated Reference Number	Specify the reference number for the negotiated cost rate.  Note: This field is applicable only if the transaction involves cross currency.
Exchange Rate	Displays the exchange rate used to convert the cheque currency into transaction currency, and it can be modified.  Note: If the transfer currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.

Table 7-2 (Cont.) Cheque Deposit (GL Mode) - Field Description

Field	Description
Total Charges (LCY)	Displays the total charge amount, which is computed by the system. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;">  Note: This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y. </div>
Narrative	Displays the default narrative as Cheque Deposit , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for Outward Clearing transaction processing with external system status as **Pending**.

After the transaction is processed and responded from the Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

7.2 Cheque Return

The Teller can use the **Cheque Return** screen to initiate manual return of inward or outward clearing cheques.

An inward cheque transaction may not be processed successfully for funds needed in the drawer account or due to stop payment of the cheque. In addition, an outward cheque transaction may get returned if the same is returned from the clearing house.

To perform cheque return:

1. On the Homepage, from **Teller** mega menu, under **Clearing**, click **Cheque Return** or specify **Cheque Return** in the search icon bar and select the screen.

The **Cheque Return** screen is displayed.

Figure 7-3 Cheque Return

2. On the **Cheque Return** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 7-3 Cheque Return - Field Description

Field	Description
Drawer Account	Specify the drawer account number.
Cheque Number	Specify the cheque number.
Query	Click Query to fetch cheque details.
Clear	Click Clear to clear the cheque details.
Drawer Account	Displays the drawer account number.
Drawer Routing No	Displays the routing number of the specified drawer account.
Cheque Number	Displays the cheque number.
Cheque Amount	Displays the cheque amount.
Cheque Date	Displays the cheque date.

Table 7-3 (Cont.) Cheque Return - Field Description

Field	Description
Payee Account	Displays the payee account number.
Payee Name	Displays the payee name.
Payee Routing No.	Displays the payee routing number.
Return Type	Displays the return type (Inward and Outward).
Reject Code	Select the reject code from the list of values.
Reject Reason	Displays the reason to reject.
Total Charges	Displays the total charge amount, which is computed by the system.
Narrative	Displays the default narrative as Cheque Return , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

7.3 Inward Clearing Data Entry

The Teller can use the **Inward Clearing Data Entry** screen to initiate the inward processing of bulk instruments.

This screen supports to capture of bulk input of inward clearing transactions for multiple instrument types – Cheque, Bankers Cheque, and Demand Draft. It also supports bulk data entry of inward clearing transactions for single and multiple customer accounts.

To initiate the inward processing of bulk instruments:

- On the Homepage, from **Teller** mega menu, under **Clearing**, click **Inward Clearing Data Entry** or specify **Inward Clearing Data Entry** in the search icon bar and select the screen.

The **Inward Clearing Data Entry** screen is displayed.

 **Note:**

Charges are not supported for this screen.

Figure 7-4 Inward Clearing Data Entry

2. On the **Inward Clearing Data Entry** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 7-4 Inward Clearing Data Entry - Field Description

Field	Description
New	Click New to create a new clearing transaction and generate the batch reference number.
Fetch	Click Fetch to enable the field Batch Reference Number and input or select from the list of values. The list of values fetches only the batches that are saved and not submitted.
Hold	Click Hold to save the data entry made as part of the specified batch number.
Batch Reference Number	Displays the unique batch number, which is system generated.
Instrument Currency	Displays the current logged branch currency. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>You can also select the instrument currency from the drop-down values.</p> </div>

Table 7-4 (Cont.) Inward Clearing Data Entry - Field Description

Field	Description
Total Amount	Displays the total batch amount in instrument currency.
Entry Details	Specify the fields.
Instrument Type	Select the instrument type from the drop-down values.
Drawer Account	Specify the drawer account number.
Account Name	Displays the name of the account number specified.
Account Branch	Displays the branch code of the account number specified.
Account Currency	Displays the currency of the account number specified.
Payee Account	Specify the payee account number. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;">  Note: You can also select from the list of values. </div>
Instrument No	Specify the instrument number.
Instrument Date	Specify the date of the instrument.
Instrument Amount	Specify the amount of the instrument.
Clearing Type	Specify the clearing type. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;">  Note: You can also select from the list of values. </div>
Drawer Routing No	Specify the routing number. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;">  Note: You can also select from the list of values. </div>
Payee Routing Number	Specify the routing number of the cheque. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;">  Note: You can also select from the list of values. </div>
Narrative	Displays the default narrative as Inward Clearing Data Entry , and it can be modified.
Add Entry	Click Add Entry to add multiple records in the table and allow modifying or deleting if required.

Table 7-4 (Cont.) Inward Clearing Data Entry - Field Description

Field	Description
Reset	Click Reset to clear the inputted entry details before you add the entries.

3. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On submission of data entry, the individual instrument details will be handed off to Oracle Banking Payments using Inward Clearing Service.

In case of reject notification of any transaction from Oracle Banking Payments, the teller can either modify the data and resubmit the transaction or discard the data entry.

7.4 Outward Clearing Data Entry

The Teller can use the **Outward Clearing Data Entry** screen to initiate the bulk deposit of instruments.

This screen supports to capture of bulk input of outward clearing transactions for multiple instrument types – Cheque, Bankers Cheque, and Demand Draft. It also supports bulk data entry of outward clearing transactions for single and multiple customer accounts.

To initiate the bulk deposit of instruments:

1. On the Homepage, from **Teller** mega menu, under **Clearing**, click **Outward Clearing Data Entry** or specify **Outward Clearing Data Entry** in the search icon bar and select the screen.

The **Outward Clearing Data Entry** screen is displayed.

 **Note:**

Charges are not supported for this screen.

Figure 7-5 Outward Clearing Data Entry

2. On the **Outward Clearing Data Entry** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 7-5 Outward Clearing Data Entry - Field Description

Field	Description
New	Click New to create a new clearing transaction and generate the batch reference number.
Fetch	Click Fetch to enable the field Batch Reference Number and input or select from the list of values. The list of values fetches only the batches that are saved and not submitted.
Hold	Click Hold to save the data entry made as part of the specified batch number.
Batch Reference Number	Displays the unique batch number, which is system generated.
Instrument Currency	Displays the current logged branch currency.  Note: You can also select the instrument currency from the drop-down values.
Total Amount	Displays the total batch amount in instrument currency.

Table 7-5 (Cont.) Outward Clearing Data Entry - Field Description

Field	Description
Entry Details	Specify the fields.
Payee Account	Specify the payee account number.
Account Name	Displays the name of the payee account number specified.
Account Currency	Displays the currency of the payee account number specified.
Account Branch	Displays the branch code of the payee account number specified.
Instrument Type	Select the instrument type from the drop-down values.
Drawer Account	Specify the drawer account number.
Drawer Name	Specify the name of the drawer account.
Instrument No	Specify the instrument number.
Instrument Date	Specify the date of the instrument.
Instrument Amount	Specify the amount of the instrument.
Clearing Type	Select the clearing type for the deposited instrument.
Drawer Routing No	Specify the routing number of the cheque. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;">  Note: You can also select from the list of values. </div>
Narrative	Displays the default narrative as Outward Clearing Data Entry , and it can be modified.
Add Entry	Click Add Entry to add multiple records in the table, and it allows modifying or deleting if required.
Reset	Click Reset to clear the inputted entry details before you add the entries.

3. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On submission of data entry, the individual instrument details will be handed off to the Oracle Banking Payments using Outward Clearing Service.

In case of reject acknowledgment of any transaction from the Oracle Banking Payments, the teller can retry the individual record from the EJ screen until the batch is in Pending status.

8

Remittances

The Teller can use Remittances to issue demand drafts and banker's cheques, perform payment or cancellation of the issued remittances and perform further operations on the issued remittances.

This topic contains the following subtopics:

- [Banker's Cheque](#)
The screens related to the Banker's Cheque (BC) can be used to issue BC, perform payment or cancellation of the issued BC, and perform further operations on the issued BC.
- [Demand Drafts](#)
The screens related to the Demand Drafts (DD) can be used to issue DD, perform payment or cancellation of the issued DD, and perform further operations on the issued DD.
- [Cash Remittance](#)
The screens related to the Cash Remittance can be used to issue remittance, perform payment or cancellation of the issued remittance, and perform further operations on the issued remittance.
- [Travellers Cheque](#)
This sub-section describes the various screens used to perform the remittances related to Travellers Cheque. The screens are described in the following topics:
- [Instrument Status Update](#)
The **Instrument Status Update** screen is used to change the status of used instrument numbers from 'Used' to 'Unused'. This screen is used only when an unused instrument is marked as 'Used' by the application.

8.1 Banker's Cheque

The screens related to the Banker's Cheque (BC) can be used to issue BC, perform payment or cancellation of the issued BC, and perform further operations on the issued BC.

This topic contains the following subtopics:

- [BC Issue Against Account](#)
The Teller can use the **BC Issue Against Account** screen to issue a BC against the CASA of a customer.
- [BC Issue Against Walk-in](#)
The Teller can use the **BC Issue Against Walk-in** screen to issue a BC by cash to the walk-in customers.
- [BC Issue Against GL](#)
The Teller can use the **BC Issue Against GL** screen to issue a BC against a GL account.
- [BC Print and Reprint](#)
The Teller can use the **BC Print-Reprint** screen to print a BC. It is also used to re-print the BC if it is not properly printed or to issue duplicate instruments.

- **BC Operations**
The Teller can use the **BC Operations** screen to handle the life cycle processing of Banker's Cheque (BC) that is already issued.
- **Multi BC Issuance**
The Teller can use the **Multi BC Issuance** screen to issue banker's cheques against multiple beneficiaries.

8.1.1 BC Issue Against Account

The Teller can use the **BC Issue Against Account** screen to issue a BC against the CASA of a customer.

To issue a BC against the savings account:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Issue - Account** or specify **BC Issue - Account** in the search icon bar and select the screen.

The **BC Issue Against Account** screen is displayed.

Figure 8-1 BC Issue Against Account

The screenshot displays the 'BC Issue Against Account' form. It is organized into several sections:

- Issuing Branch Code:** A text input field.
- Branch Name:** A text input field.
- Payable Bank Code:** A text input field with a search icon.
- Payable Bank Name:** A text input field.
- Payable Branch Code:** A text input field with a search icon.
- Payable Branch Name:** A text input field.
- BC Amount:** A text input field with a dropdown arrow.
- BC Date:** A date picker field showing '10/27, 2021'.
- MICR No:** A text input field.
- BC No:** A text input field.
- Payee Details:**
 - Payee Name:** A text input field.
 - Address Line 1:** A text input field.
 - Address Line 2:** A text input field.
 - Address Line 3:** A text input field.
 - Address Line 4:** A text input field.
 - Identification Type:** A dropdown menu.
 - Payee Identification Number:** A text input field.
- Narrative:** A text area containing 'BC Issuance Against Account'.
- Funding Details:** A collapsed section.
- Charge Details:** A collapsed section.

At the bottom right, there are three buttons: **Submit**, **Clear**, and **Cancel**.

2. On the **BC Issue Against Account** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-1 BC Issue Against Account - Field Description

Field	Description
Issuing Branch Code	Displays the code of the logged-in branch.
Branch Name	Displays the description of issuing branch.
Payable Bank Code	<p>Select the payable bank code. The list of values contains the bank codes maintained using the External Bank Code Maintenance screen.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The Payable Branch Code and Payable Branch Name fields will be enabled after you specify the Payable Bank Code.</p> </div>
Payable Bank Name	Displays the name of the selected bank code.
Payable Branch Code	Select the branch code of the payable bank. The list of values contains the corresponding branch codes maintained using the Bank Code Maintenance screen.
Payable Branch Name	Displays the branch name of the selected branch code.
BC Amount	Select the BC currency from the drop-down list and specify the BC amount.
BC Date	<p>Select the date that needs to be mentioned in the BC.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the current posting date is displayed.</p> </div>
MICR No	Specify the MICR number and validate. If not specified, the system generates the MICR number based on the maintenance setup.
BC No	Displays the BC number.
Mode of Charge	Select the mode of charge from the drop-down values (Account or Other Account).

Table 8-1 (Cont.) BC Issue Against Account - Field Description

Field	Description
Charge Account	<p>Specify the charge account number. The following conditions apply based on the value selected for Mode of Charge:</p> <ul style="list-style-type: none"> If the Mode of Charge is selected as Account, the user needs to capture the account from which the charges are to be deducted. <div style="border: 1px solid #0070C0; padding: 5px; margin: 10px 0;"> <p> Note:</p> <p>If the Mode of Charge is selected as Account, the system displays the Drawer Account by default. Else, this field is kept blank and the user can input the valid account number.</p> </div> <ul style="list-style-type: none"> If Mode of Charge is selected as Other Account, the user needs to capture another account number.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the BC is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Payee Identification Number	Specify the identification number of the payee.
Narrative	Displays the default narrative as BC Issuance Account , and it can be modified.

- Click on the **Funding Details** data segment.
The **Funding Details** data segment is displayed.

Figure 8-2 Funding Details

The screenshot shows a 'Funding Details' form with the following fields and values:

- Drawer Account**: [Text input field]
- Drawer Name**: [Text input field]
- Cheque Number**: [Text input field]
- Cheque Date**: Mar 26, 2020 (with calendar icon)
- Exchange Rate**: [Text input field with up/down arrows]
- Account Amount**: [Text input field]
- Mode of Charge**: Account (dropdown menu)
- Charge Account**: [Text input field]
- Total Charges**: [Text input field]

- In the **Funding Details** data segment, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-2 Funding Details - Field Description

Field	Description
Drawer Account	Specify the account number of the customer who has requested the BC.
Drawer Name	Displays the name of the specified drawer account number.
Cheque Number	Specify the cheque number of the drawer account.  Note: The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.
Cheque Date	Specify the date as mentioned in the cheque.
Exchange Rate	Displays the exchange rate used to convert the BC currency into account currency, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.
Account Amount	Displays the transaction amount converted in terms of account amount based on the exchange rate.  Note: This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.
Mode of Charge	Select the mode of charge from the following drop-down values (Account or Other Account).
Charge Account	This field is populated based on the following criteria: <ul style="list-style-type: none"> • If Account is selected as Mode of Charge, the drawer account number will be selected as charge account. • If Other Account is selected as Mode of Charge, specify the other account number in this field.

Table 8-2 (Cont.) Funding Details - Field Description

Field	Description
Total Charges	<p>Displays the total charges applicable for the BC issuance.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration</code> at the <code>Function Code Indicator</code> level is set as <code>Y</code>.</p> </div>

5. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
6. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for instruments processing with external system status as **Pending**.

After the transaction is processed and responded from the Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

 **Note:**

System shall automate the completion of payment transactions from Journal log, once the 'Success' notification is received from Oracle Banking Payments based on the flag `Auto Processing` as `Y` in `TRANSACTION.SRV_TM_BC_PARAM_DTLS`. (When `Auto Processing` is 'N', then `Maker-Checker-Maker-Maker` and when `Auto Processing` is `Y` then `Maker-Checker-Maker`).

8.1.2 BC Issue Against Walk-in

The Teller can use the **BC Issue Against Walk-in** screen to issue a BC by cash to the walk-in customers.

To issue a BC to the walk-in customers:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Issue - Walk-in** or specify **BC Issue - Walk-in** in the search icon bar and select the screen.
The **BC Issue Against Walk-in** screen is displayed.

Figure 8-3 BC Issue Against Walk-in

2. On the **BC Issue Against Walk-in** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-3 BC Issue Against Walk-in - Field Description

Field	Description
Issuing Branch Code	Displays the code of the logged-in branch.
Branch Name	Displays the description of issuing branch.

Table 8-3 (Cont.) BC Issue Against Walk-in - Field Description

Field	Description
Payable Bank Code	<p>Select the payable bank code. The list of values contains the bank codes maintained using the External Bank Code Maintenance screen.</p> <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note:</p> <p>To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields Payable Branch Code and Payable Branch Name will be enabled after you specify the Payable Bank Code.</p> </div>
Payable Bank Name	Displays the name of the selected bank code.
Payable Branch Code	Select the branch code of the payable bank. The list of values contains the corresponding branch codes maintained using the Bank Code Maintenance screen.
Payable Branch Name	Displays the branch name of the selected branch code.
BC Amount	Select the BC currency from the drop-down list and specify the BC amount.
BC Date	<p>Select the date that needs to be mentioned in the BC.</p> <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note:</p> <p>By default, the current posting date is displayed.</p> </div>
BC No	Specify the instrument number and validate. If not specified, the system generates the BC number based on the maintenance setup.
MICR Number	Displays the MICR number.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the BC is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Payee Identification Number	Specify the identification number of the payee.
Narrative	Displays the default narrative as BC Issuance Against Walk-in , and it can be modified.

- Click on the **Funding Details** data segment.

The **Funding Details** data segment is displayed.

Figure 8-4 Funding Details

The screenshot shows a form titled "Funding Details" with the following fields:

- Transaction Amount ***: A dropdown menu and a text input field.
- Drawer Name ***: A text input field.
- Address Line 1**, **Address Line 2**, **Address Line 3**, and **Address Line 4**: Four text input fields for the payee's address.
- Identification Type**: A dropdown menu with "Select" as the current value.
- Identification Number**: A text input field.
- Exchange Rate**: A text input field with up and down arrow buttons.
- Total Charges**: A text input field.

4. In the **Funding Details** data segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 8-4 Funding Details - Field Description

Field	Description
Transaction Amount	Specify the transaction currency in which the walk-in customer deposits the cash.
Drawer Name	Specify the name of the drawer.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Identification Number	Specify the identification number of the payee.
Exchange Rate	Displays the exchange rate. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p> </div>

Table 8-4 (Cont.) Funding Details - Field Description

Field	Description
Total Charges	<p>Displays the total charges applicable for the BC issuance.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p> </div>

5. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
6. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
7. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for instruments processing with external system status as **Pending**.

After the transaction is processed and responded from the Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

8.1.3 BC Issue Against GL

The Teller can use the **BC Issue Against GL** screen to issue a BC against a GL account.

To issue a BC against a GL account:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Issue - GL** or specify **BC Issue - GL** in the search icon bar and select the screen.

The **BC Issue Against GL** screen is displayed.

Figure 8-5 BC Issue Against GL

2. On the **BC Issue Against GL** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 8-5 BC Issue Against GL - Field Description

Field	Description
Issuing Branch Code	Displays the logged-in branch code.
Branch Name	Displays the description of issuing branch.

Table 8-5 (Cont.) BC Issue Against GL - Field Description

Field	Description
Payable Bank Code	<p>Select the payable bank code. The list of values contains the bank codes maintained using the External Bank Code Maintenance screen.</p> <div style="border: 1px solid #0070c0; padding: 5px; background-color: #e6f2ff;"> <p> Note:</p> <p>To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields Payable Branch Code and Payable Branch Name will be enabled after you specify the Payable Bank Code.</p> </div>
Payable Bank Name	Displays the name of the selected bank code.
Payable Branch Code	Select the branch code of the payable bank. The list of values contains the corresponding branch codes maintained using the Bank Code Maintenance screen.
Payable Branch Name	Displays the branch name of the selected branch code.
BC Amount	Select the BC currency from the drop-down list and the BC amount.
BC Date	<p>Select the date that needs to be mentioned in the BC.</p> <div style="border: 1px solid #0070c0; padding: 5px; background-color: #e6f2ff;"> <p> Note:</p> <p>By default, the current posting date is displayed.</p> </div>
BC No	<p>Specify the instrument number and validate.</p> <div style="border: 1px solid #0070c0; padding: 5px; background-color: #e6f2ff;"> <p> Note:</p> <p>If not specified, the system generates the BC number based on the maintenance setup.</p> </div>
MICR Number	Displays the MICR number.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the BC is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Payee Identification Number	Specify the identification number of the payee.
Narrative	Displays the default narrative as BC Issuance Against GL , and it can be modified.

- Click on the **Funding Details** data segment.
The **Funding Details** data segment is displayed.

Figure 8-6 Funding Details

- In the **Funding Details** data segment, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-6 Funding Details - Field Description

Field	Description
GL Account	Select the account number of the GL against which the BC is issued from the LOV.
GL Description	Displays a brief description of the general ledger.
Drawer Name	Specify the name of the drawer.
Identification Type	Select the identification type of the payee from the drop-down list.
Identification Number	Specify the identification number of the payee.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for instruments processing with external system status as **Pending**.

After the transaction is processed and responded from the Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

8.1.4 BC Print and Reprint

The Teller can use the **BC Print-Reprint** screen to print a BC. It is also used to re-print the BC if it is not properly printed or to issue duplicate instruments.

The system keeps a track of such reprints so that the bank officials or auditors can determine the reasons and validity of multiple instrument printing.

To print or reprint a BC:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Print-Reprint** or specify **BC Print-Reprint** in the search icon bar and select the screen.

The **BC Print-Reprint** screen is displayed.

Figure 8-7 BC Print-Reprint

The screenshot shows the 'BC Print-Reprint' interface with the following fields:

- Bankers Cheque No ***: Text input field.
- Print Type ***: Drop-down menu.
- Issuing Branch Code**: Text input field.
- BC Date**: Date picker.
- Drawer Name**: Text input field.
- Beneficiary Details:-**
 - Beneficiary Name**: Text input field.
 - Address Line 1**: Text input field.
 - Address Line 3**: Text input field.
- Reprint Count**: Text input field.
- Narrative ***: Text input field.
- Issue Branch Code ***: Searchable text input field with 'Query' and 'Clear' buttons.
- BC Amount**: Text input field.
- BC Status**: Text input field.
- Identification Details**
 - Address Line 2**: Text input field.
 - Address Line 4**: Text input field.

Buttons at the bottom right: **Submit**, **Clear**, **Cancel**.

2. On the **BC Print-Reprint** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 8-7 BC Print-Reprint - Field Description

Field	Description
Bankers Cheque No	Specify the BC number of the instrument that you need to print or re-print.
Issue Branch Code	Select the branch code where the instrument is issued from the LOV.
Print Type	Select the type Print or Reprint from the drop-down list.

Table 8-7 (Cont.) BC Print-Reprint - Field Description

Field	Description
Query	Click Query to fetch details of the BC transaction.
Issuing Branch Code	Displays the logged-in branch code.
BC Date	Displays the date mentioned in the BC.
BC Amount	Displays the BC currency and the BC amount.
Drawer Name	Displays the name of the drawer.
BC Status	Displays the status of the BC.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary's name.
Identification Details	Displays the identification details of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Reprint Count	Specify the count of the current reprint operation. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note: This is applicable only for the reprint option.</p> </div>
Narrative	Displays the default narrative as Print/Reprint , and it can be modified.

3. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

8.1.5 BC Operations

The Teller can use the **BC Operations** screen to handle the life cycle processing of Banker's Cheque (BC) that is already issued.

This topic contains the following subtopics:

- [BC Inquiry](#)
The Teller can use the **BC Operations** screen to inquire about the details of BC.
- [BC Revalidation](#)
The Teller can use the **BC Operations** screen to revalidate an instrument that is in expired status.

- [BC Duplicate Issue](#)
The Teller can use the **BC Operations** screen to issue the instrument if the customer or banker lost the instrument or if the instrument is damaged.
- [BC Payment Reversal](#)
The Teller can use the **BC Operations** screen to make the reversal of payment for BC. Reversal of BC Payment is not supported through Electronic Journal/Service Journal.
- [BC Payment by Account](#)
The Teller can use the **BC Operations** screen to make payment against a BC.
- [BC Payment by Cash](#)
The Teller can use the **BC Operations** screen to make payment against a BC.
- [BC Payment by GL](#)
The Teller can use the **BC Operations** screen to make payment against a BC.
- [BC Refund by Account](#)
The Teller can use the **BC Operations** screen to refund the amount against a BC.
- [BC Refund by Cash](#)
The Teller can use the **BC Operations** screen to refund the amount against a BC.
- [BC Refund by GL](#)
The Teller can use the **BC Operations** screen to refund the amount against a BC.
- [Cancel BC by Account](#)
The Teller can use the **BC Operations** screen to cancel a BC.
- [Cancel BC by Cash](#)
The Teller can use the **BC Operations** screen to cancel a BC.
- [Cancel BC by GL](#)
The Teller can use the **BC Operations** screen to cancel a BC.

8.1.5.1 BC Inquiry

The Teller can use the **BC Operations** screen to inquire about the details of BC.

To inquire the details of BC:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-8 BC Operations - Inquiry

- On the **BC Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-8 BC Operations (Inquiry) - Field Description

Field	Description
Operation Type	Select the type Inquiry from the drop-down list.
BC No	Specify the BC number of the instrument.
Issue Branch Code	Select the branch code where the instrument is issued from the LOV. After you specify the Issue Branch Code and Bankers Cheque No , press the Tab key. The system will make a service call to the Oracle Banking Payments and fetch the banker's cheque details.
BC Currency	Specify BC Currency to query instrument details.
Query	Click this icon to fetch instrument details.
BC Details	Displays the details of BC under this segment.
Issue Branch	Displays the logged-in branch code.
Payable Bank Code	Displays the payable bank code.
Payable Branch	Displays the payable branch for the BC.
BC Amount	Displays the BC currency and the BC amount.
MICR No	Displays the MICR number.
Issue Date	Displays the issue date mentioned in the BC.
Issue Mode	Displays the issue mode of the BC.
Bankers Cheque Status	Displays the status of the BC.
Narrative	Displays the default narrative as BC Inquiry , and it can be modified.

Table 8-8 (Cont.) BC Operations (Inquiry) - Field Description

Field	Description
Revalidation Date	Displays the date of BC revalidation.
Duplicate Issue Date	Displays the duplicate issue date of BC.
Liquidation Date	Displays the liquidation date of BC.
Liquidation Mode	Displays the liquidation mode of BC.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary's name.
Beneficiary Account	Displays the beneficiary account number.
Customer ID	Displays the Customer ID.
Exchange Rate	<p>Displays the exchange rate, and it can be modified.</p> <div style="border: 1px solid #0070c0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system will display the exchange rate as 1.</p> </div>
Credit Amount	Displays the credit amount.
Beneficiary Address 1 and Beneficiary Address 2	Displays the address of the beneficiary.
Identification Type	Displays the identification type of the beneficiary.
Identification Number	Displays the identification number of the beneficiary.
Funding Details	Funding details are displayed under this segment.
Drawer Name	Displays the drawer name.
Drawer Account	Displays the account number of the drawer.
Customer ID	Displays the customer ID of the drawer.
Exchange Rate	Displays the exchange rate.
Debit Amount	Displays the amount that needs to be debited from the drawer account.
Cheque Number	Displays the cheque number.
Cheque Date	Displays the date mentioned in the cheque.
Drawer Address 1 and Drawer Address 2	Displays the address of the drawer.
Identification Type	Displays the identification type of the drawer.
Identification Number	Displays the identification number of the drawer.

8.1.5.2 BC Revalidation

The Teller can use the **BC Operations** screen to revalidate an instrument that is in expired status.

When a customer requests for revalidation of an instrument that is in expired status, Teller can validate the instrument details and initiate revalidation of BC. The system will allow for revalidation only if:

- Revalidation is allowed at the Instrument type level
- The instrument is not liquidated, canceled, or refunded
- The instrument is issued, revalidated, or duplicate issued but not liquidated/refunded/canceled
- Rule based authorization is not supported for revalidation

To revalidate an instrument:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-9 BC Operations - Revalidate

The screenshot shows the 'BC Operations' screen with the following fields and controls:

- BC No ***: Text input field.
- Issue Branch ***: Searchable dropdown menu.
- Operation Type ***: Dropdown menu with 'Revalidate' selected.
- Revalidation Date ***: Date picker.
- New Expiry Date**: Date picker.
- Mode of Charge**: Dropdown menu.
- Charge Account**: Text input field.
- Narrative ***: Text input field containing 'BC Revalidation'.
- Charge Details**: Expandable section.
- View BC Details**: Expandable section.
- Submit**, **Clear**, and **Cancel**: Action buttons at the bottom right.

2. On the **BC Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-9 BC Operations (Revalidate) - Field Description

Field	Description
Operation Type	Select the type Revalidate from the drop-down list.
BC No	Specify the BC number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Revalidation Details	Specify the details under this segment.
Beneficiary Account	Displays the beneficiary account number.
Revalidation Date	Select the revalidation date. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the system date is displayed as the revalidation date.</p> </div>
New Expiry Date	Displays the new expiry date based on the specified revalidation date.
Mode of Charge	Select the mode of charge from the drop-down values (Account or Cash).
Charge Account	Specify the charge account number. The following conditions apply based on the value selected for Mode of Charge : <ul style="list-style-type: none"> If the Mode of Charge is selected as Account, the user needs to capture the account from which the charges are to be deducted. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>If the Mode of Charge is selected as Account, the system displays the Drawer Account by default. Else, this field is kept blank and the user can input the valid account number.</p> </div> <ul style="list-style-type: none"> If Mode of Charge is selected as Cash, the user needs to capture Charge Currency, and denomination details to be picked up based on the charge currency specified.
Narrative	Displays the default narrative as BC Revalidation , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

5. Click Submit.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from the Oracle Banking Payments, the system will discard the transaction.

8.1.5.3 BC Duplicate Issue

The Teller can use the **BC Operations** screen to issue the instrument if the customer or banker lost the instrument or if the instrument is damaged.

In case of a request raised by the customer, additional charges will be deducted while issuing again. The system will allow for duplicate issue only if:

- The duplicate issue is allowed at the instrument type level
- The instrument is not liquidated, canceled, or refunded
- The instrument is issued or revalidated but not liquidated/refunded/canceled
- Rule based authorization is not supported for duplicate issue

To issue a duplicate instrument:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-10 BC Operations - Duplicate Issue

2. On the **BC Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-10 BC Operations (Duplicate Issue) - Field Description

Field	Description
Operation Type	Select the type Duplicate Issue from the drop-down list.
BC No	Specify the BC number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Duplicate Issue Details	Specify the details under this segment.
Duplicate Issue Date	By default, the current system date is displayed as a duplicate issue date, and it can be modified.
Duplicate BC No	Specify the duplicate banker's cheque number.
Duplicate MICR No	Specify the duplicate MICR number.
Requested By	Select from the drop-down values (Customer or Bank).
Mode of Charge	Select the mode of charge from the drop-down values (Account or Cash).

Table 8-10 (Cont.) BC Operations (Duplicate Issue) - Field Description

Field	Description
Charge Account	<p>Specify the charge account number. The following conditions apply based on the value selected for Mode of Charge:</p> <ul style="list-style-type: none"> If the Mode of Charge is selected as Account, the user needs to capture the account from which the charges are to be deducted. <div style="border: 1px solid #0070C0; padding: 5px; margin: 10px 0;"> <p> Note:</p> <p>If the Mode of Charge is selected as Account, the system displays the Drawer Account by default. Else, this field is kept blank and the user can input the valid account number.</p> </div> <ul style="list-style-type: none"> If Mode of Charge is selected as Cash, the user needs to capture Charge Currency, and denomination details to be picked up based on the charge currency specified.
Narrative	Displays the default narrative as BC Duplication , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

8.1.5.4 BC Payment Reversal

The Teller can use the **BC Operations** screen to make the reversal of payment for BC. Reversal of BC Payment is not supported through Electronic Journal/Service Journal.

To make the reversal of payment for BC:

- On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-11 BC Operations - Payment Reversal

2. On the **BC Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-11 BC Operations (Payment Reversal) - Field Description

Field	Description
Operation Type	Select the type Payment Reversal from the drop-down list.
BC No	Specify the BC number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Reversal Details	Specify the details under this segment.
Liquidation Mode	Select the liquidation mode from the drop-down values.
Liquidation Date	Select the liquidation date.
Narrative	Displays the default narrative as BC Payment Reversal , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from the Oracle Banking Payments, the system will discard the transaction.

8.1.5.5 BC Payment by Account

The Teller can use the **BC Operations** screen to make payment against a BC.

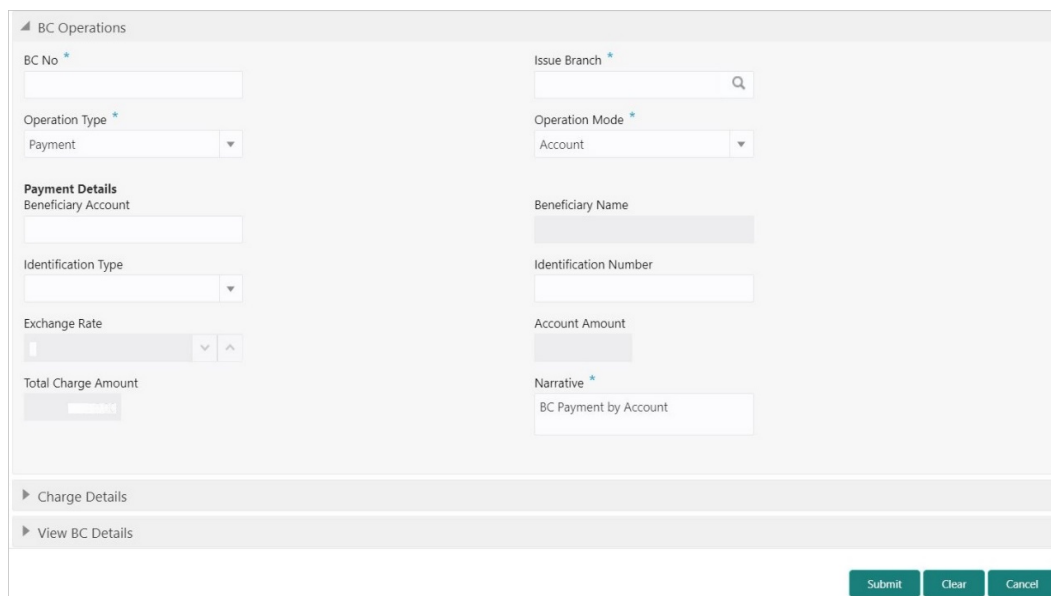

The BC payment is credited to the beneficiary customer account when the operation mode is **Account**.

To make payment against a BC:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-12 BC Operations - Payment by Account

The screenshot shows the 'BC Operations' form with the following fields and sections:

- BC No ***: Text input field.
- Issue Branch ***: Text input field with a search icon.
- Operation Type ***: Dropdown menu with 'Payment' selected.
- Operation Mode ***: Dropdown menu with 'Account' selected.
- Payment Details**:
 - Beneficiary Account**: Text input field.
 - Beneficiary Name**: Text input field.
 - Identification Type**: Dropdown menu.
 - Identification Number**: Text input field.
 - Exchange Rate**: Text input field with up/down arrows.
 - Account Amount**: Text input field.
 - Total Charge Amount**: Text input field.
 - Narrative ***: Text input field containing 'BC Payment by Account'.
- Charge Details**: Expandable section.
- View BC Details**: Expandable section.
- Buttons**: Submit, Clear, and Cancel.

2. On the **BC Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-12 BC Operations (Payment by Account) - Field Description

Field	Description
Operation Type	Select the type Payment from the drop-down list.
BC No	Specify the BC number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Operation Mode	Select the operation mode as Account from the drop-down values.
Payment Details	Specify the details under this segment.
Beneficiary Account	Displays the beneficiary account number.
Beneficiary Name	Displays the beneficiary's name.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.

This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p> </div>
Account Amount	<p>Displays the account amount.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p> </div>

Table 8-12 (Cont.) BC Operations (Payment by Account) - Field Description

Field	Description
Total Charge Amount	Displays the total charge amount.  Note: This field is displayed only if Total Charges Configuration at the Function Code Indicator level is set as Y.
Narrative	Displays the default narrative as BC Payment by Account , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from the Oracle Banking Payments, the system will discard the transaction.

8.1.5.6 BC Payment by Cash

The Teller can use the **BC Operations** screen to make payment against a BC.

The BC payment is made by cash to the beneficiary when the operation mode is **Cash**.

To make payment against a BC:

- On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-13 BC Operations - Payment by Cash

The screenshot shows the 'BC Operations' form with the following fields and sections:

- BC No ***: Text input field.
- Issue Branch ***: Searchable dropdown menu.
- Operation Type ***: Dropdown menu with 'Payment' selected.
- Operation Mode ***: Dropdown menu with 'Cash' selected.
- Payment Details**: Section containing:
 - Transaction Amount**: Dropdown menu.
 - Identification Type**: Dropdown menu.
 - Exchange Rate**: Input field with up/down arrows.

Issue Branch	Select the branch code where the instrument is issued from the LOV.
Operation Mode	Select the operation mode as Cash from the drop-down values.
Payment Details	Specify the details under this segment.
Transaction Amount	Specify the transaction currency and transaction amount.
Beneficiary Name	Specify the beneficiary name.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.

Table 8-13 (Cont.) BC Operations (Payment by Cash) - Field Description

Field	Description
Exchange Rate	Displays the exchange rate, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration</code> at the Function Code Indicator level is set as Y.
Total Charge Amount	Displays the total charge amount.  Note: This field is displayed only if <code>Total Charges Configuration</code> at the Function Code Indicator level is set as Y.
Narrative	Displays the default narrative as BC Payment by Cash , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
- Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status

as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from the Oracle Banking Payments, the system will discard the transaction.

8.1.5.7 BC Payment by GL

The Teller can use the **BC Operations** screen to make payment against a BC.

The BC payment is credited to the GL account when the operation mode is **GL**.

To make payment against a BC:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Payment Details	Specify the details under this segment.
GL Account	Specify the GL account number.
GL Currency	Displays the currency of the specified GL account.
GL Branch	Displays the branch code of the specified GL account.
Exchange Rate	Displays the exchange rate, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.
Account Amount	Displays the account amount.  Note: This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.
Total Charge Amount	Displays the total charge amount.  Note: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.
Narrative	Displays the default narrative as BC Payment by GL , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from the Oracle Banking Payments, the system will discard the transaction.

8.1.5.8 BC Refund by Account

The Teller can use the **BC Operations** screen to refund the amount against a BC.

The BC refund amount is credited to the beneficiary customer account when the operation mode is **Account**.

To refund the amount:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-15 BC Operations - Refund by Account

The screenshot shows a web form for 'BC Operations'. The form is divided into several sections:

- BC No ***: A text input field.
- Issue Branch ***: A search input field with a magnifying glass icon.
- Operation Type ***: A dropdown menu with 'Refund' selected.
- Operation Mode ***: A dropdown menu with 'Account' selected.
- Refund Details**: A section containing:
 - Beneficiary Account**: A text input field.
 - Identification Type**: A dropdown menu.
 - Exchange Rate**: A numeric input field with up/down arrows.
 - Total Charge Amount**: A text input field.
- Beneficiary Name**: A text input field.
- Identification Number**: A text input field.
- Account Amount**: A text input field.
- Narrative ***: A text input field containing 'BC Refund by Account'.

At the bottom of the form, there are three buttons: 'Submit', 'Clear', and 'Cancel'. There are also expandable sections for 'Charge Details' and 'View BC Details'.

2. On the **BC Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-15 BC Operations (Refund by Account) - Field Description

Field	Description
Operation Type	Select the type Refund from the drop-down list.
BC No	Specify the BC number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Operation Mode	Select the operation mode as Account from the drop-down values.
Refund Details	Specify the details under this segment.
Beneficiary Account	Displays the beneficiary account number.
Beneficiary Name	Displays the beneficiary's name.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.

Table 8-15 (Cont.) BC Operations (Refund by Account) - Field Description

Field	Description
Exchange Rate	<p>Displays the exchange rate, and it can be modified.</p> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration</code> at <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>
Account Amount	<p>Displays the account amount.</p>
Total Charge Amount	<p>Displays the total charge amount.</p> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration</code> at <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>
Narrative	<p>Displays the default narrative as <code>BC Refund by Account</code>, and it can be modified.</p>

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the

transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from the Oracle Banking Payments, the system will discard the transaction.

8.1.5.9 BC Refund by Cash

The Teller can use the **BC Operations** screen to refund the amount against a BC.

The BC refund is made by cash to the beneficiary when the operation mode is **Cash**.

To refund the amount:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-16 BC Operations - Refund by Cash

2. On the **BC Operations** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 8-16 BC Operations (Refund by Cash) - Field Description

Field	Description

This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.</p> </div>
Total Charge Amount	Displays the account amount. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p> </div>
Narrative	Displays the default narrative as BC Refund by Cash , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
5. Click on the **View BC Details** data segment to view the additional details of the BC.

 **Note:**

This data segment is non-editable.

6. Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from the Oracle Banking Payments, the system will discard the transaction.

8.1.5.10 BC Refund by GL

The Teller can use the **BC Operations** screen to refund the amount against a BC.

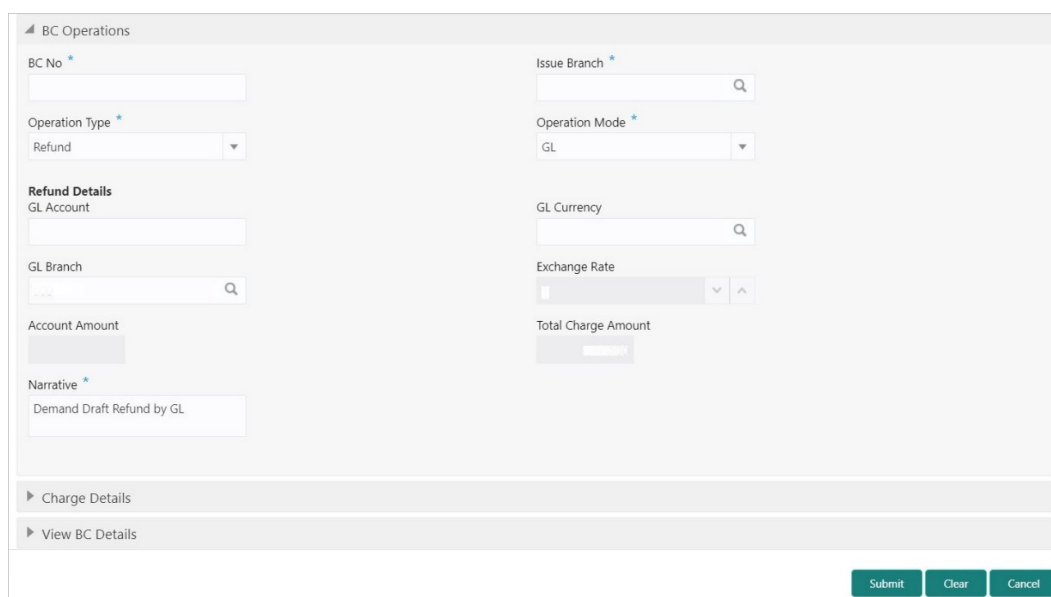

The BC payment is credited to the GL account when the operation mode is **GL**.

To refund the amount:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **BC Operations** or specify **BC Operations** in the search icon bar and select the screen.

The **BC Operations** screen is displayed.

Figure 8-17 BC Operations - Refund by GL

The screenshot shows the 'BC Operations' screen with the following fields and controls:

- BC No ***: Text input field.
- Issue Branch ***: Text input field with a search icon.
- Operation Type ***: Dropdown menu with 'Refund' selected.
- Operation Mode ***: Dropdown menu with 'GL' selected.
- Refund Details** section:
 - GL Account**: Text input field.
 - GL Branch**: Text input field with a search icon.
 - Account Amount**: Text input field.
 - Narrative ***: Text area with 'Demand Draft Refund by GL' entered.
- GL Currency**: Text input field with a search icon.

 - Address Line 1
 - Address Line 4
- Table:**

SI No	Drawer Account	Drawer Name	Payee Name	BC Number	MICR Number	BC Amount	Payable Bank Code	Payabl
No data to display.								

- On the **Multi BC Issuance Account** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-21 Multi BC Issuance Account - Field Description

Field	Description
New	Click New to generate a batch reference number.
Batch Reference	Displays the auto-generated batch reference number.
BC Currency	Select the BC currency from the LOV.
Issue Mode	Select the issue mode as Account from the drop-down values.
Drawer Account	Specify the remitter account number. When you press the Tab key, the Account Description , Remitter Name , and Address of the remitter account will be populated.
Drawer Name	Displays the name of the specified remitter account number.
Address Line 1 to Address Line 4	Displays the address of the specified remitter account number.
Cheque Number	Specify the cheque number.  Note: The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.
Cheque Date	Specify the issue date of the cheque.
Total BC Amount	Displays the total sum of the multiple BC amount inputs, which is computed by the system.
Exchange Rate	Displays the exchange rate, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration at the Function Code Indicator level</code> is set as <code>Y</code> .

Table 8-21 (Cont.) Multi BC Issuance Account - Field Description

Field	Description
Total Charges	Displays the total charge amount.  Note: This field is displayed only if Total Charges Configuration at the Function Code Indicator level is set as Y.
Charge Account	Specify the charge account number.  Note: By default, the drawer account number will be displayed as a charge account, and it can be modified.
Total (Account Amount)	Displays the total amount available in the specified charge account.
Entry Details	Specify the fields.
Payee Name	Specify the name of the payee.
Payable Bank Code	Select the payable bank code from the list of values.
Payable Bank Name	Displays the bank name of the specified payable bank code.
Payable Branch Code	Select the payable branch code from the list of values.
Payable Branch Name	Displays the bank name of the specified payable branch code.
BC Amount	Specify the BC amount.
MICR Number	Specify the MICR number.
BC Number	Specify the BC number.
Address Line 1 to Address Line 4	Specify the address of the payee.
Narrative	Displays the default narrative as Multi BC Issuance , and it can be modified.
Add Entry	After filling the necessary fields, click Add Entry to add a new entry.
Reset	Click Reset to reset the added entries.

3. Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system creates an individual BC transaction and hand-off individual BC issue requests to Oracle Banking Payments system. Once the individual BC transaction is created in Oracle Banking Payments, the system will hand off the consolidated accounting to FLEXCUBE Universal Banking by debiting Customer Account/Cash GL for the total consolidated amount and crediting the intermediary bridge GL. In case of any rejection from Oracle Banking Payments, the system will not consider the transaction for accounting to FLEXCUBE Universal Banking during console entry.

8.1.6.2 Multi BC Issuance Against Cash

The Teller can use the **Multi BC Issuance** screen to issue BC against Cash GL for walk-in customers.

To issue BC against cash:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **Multi BC Issuance** or specify **Multi BC Issuance** in the search icon bar and select the screen.

The **Multi BC Issuance Cash** screen is displayed.

Add Entry	After filling the necessary fields, click Add Entry to add a new entry.

Table 8-22 (Cont.) Multi BC Issuance Cash - Field Description

Field	Description
Reset	Click Reset to reset the added entries.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system creates an individual BC transaction and hand-off individual BC issue requests to Oracle Banking Payments system. Once the individual BC transaction is created in Oracle Banking Payments, the system will hand off the consolidated accounting to FLEXCUBE Universal Banking by debiting Customer Account/Cash GL for the total consolidated amount and crediting the intermediary bridge GL. In case of any rejection from Oracle Banking Payments, the system will not consider the transaction for accounting to FLEXCUBE Universal Banking during console entry.

8.2 Demand Drafts

The screens related to the Demand Drafts (DD) can be used to issue DD, perform payment or cancellation of the issued DD, and perform further operations on the issued DD.

This topic contains the following subtopics:

- [DD Issue Against Account](#)
The Teller can use the **DD Issue Against Account** screen to issue a DD against the CASA of a customer.
- [DD Issue Against Walk-in](#)
The Teller can use the **DD Issue Against Walk-in** screen to issue a DD by cash to the walk-in customers.
- [DD Issue Against GL](#)
The Teller can use the **DD Issue Against GL** screen to issue a DD against a GL account.
- [DD Print and Reprint](#)
The Teller can use the **DD Print-Reprint** screen to print a DD. It is also used to reprint the DD if it is not properly printed or to issue duplicate instruments.
- [DD Operations](#)
The Teller can use the **DD Operations** screen to handle the life cycle processing of DD that is already issued.

8.2.1 DD Issue Against Account

The Teller can use the **DD Issue Against Account** screen to issue a DD against the CASA of a customer.

To issue a DD against the savings account:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Issue - Account** or specify **DD Issue - Account** in the search icon bar and select the screen.

The **DD Issue Against Account** screen is displayed.

Figure 8-23 DD Issue Against Account

2. On the **DD Issue Against Account** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-23 DD Issue Against Account - Field Description

Field	Description
Issuing Branch Code	Displays the logged-in branch code.

Table 8-23 (Cont.) DD Issue Against Account - Field Description

Field	Description
Branch Name	Displays the branch description of issuing branch.
Payable Bank Code	Select the payable bank code. The list of values contains the bank codes maintained using the External Bank Code Maintenance screen. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note:</p> <p>To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code. The fields Payable Branch Code and Payable Branch Name will be enabled after you specify the Payable Bank Code.</p> </div>
Payable Bank Name	Displays the name of the selected bank code.
Payable Branch Code	Select the branch code of the payable bank. The list of values contains the corresponding branch codes maintained using the Bank Code Maintenance screen.
Payable Branch Name	Displays the branch name of the selected branch code.
DD Amount	Specify the DD currency and DD amount.
DD Date	Specify the date that needs to be mentioned in the DD.
MICR No	Displays the MICR number.
DD No	Specify the instrument number and validate. If not specified, the system generates the DD number based on the maintenance setup.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the DD is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Narrative	Displays the narrative as DD Issuance Account and it can be modified.

- Click on the **Funding Details** data segment.

The **Funding Details** data segment is displayed.

Figure 8-24 Funding Details

4. On the **Funding Details** data segment, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-24 Funding Details - Field Description

Field	Description
Drawer Account	Specify the account number of the customer who has requested the DD.
Drawer Name	Displays the name of the specified drawer account number.
Cheque Number	Specify the cheque number of the drawer account. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 5px;"> <p> Note:</p> <p>The system validates the status of the cheque and prompts an error message if incase of a Used or Stopped or Invalid cheque.</p> </div>
Cheque Date	Specify the date as mentioned in the cheque.

Table 8-24 (Cont.) Funding Details - Field Description

Field	Description
Exchange Rate	<p>Displays the exchange rate.</p> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration</code> at the <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>
Account Amount	<p>Displays the account amount in account currency.</p> <p> Note:</p> <p>This field is displayed only if <code>Multi-Currency Configuration</code> at the <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>
Mode of Charge	Select the mode of charge from the following drop-down values (Account or Other Account).
Charge Account	<p>This field is populated based on the following criteria:</p> <ul style="list-style-type: none"> • If Account is selected as Mode of Charge, the drawer account number will be selected as charge account. • If Other Account is selected as Mode of Charge, specify the other account number in this field.
Total Charges	<p>Displays the total charges applicable for the DD issuance.</p> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration</code> at the <code>Function Code Indicator</code> level is set as <code>Y</code>.</p>

5. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
6. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for instruments processing with external system status as **Pending**.

After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

8.2.2 DD Issue Against Walk-in

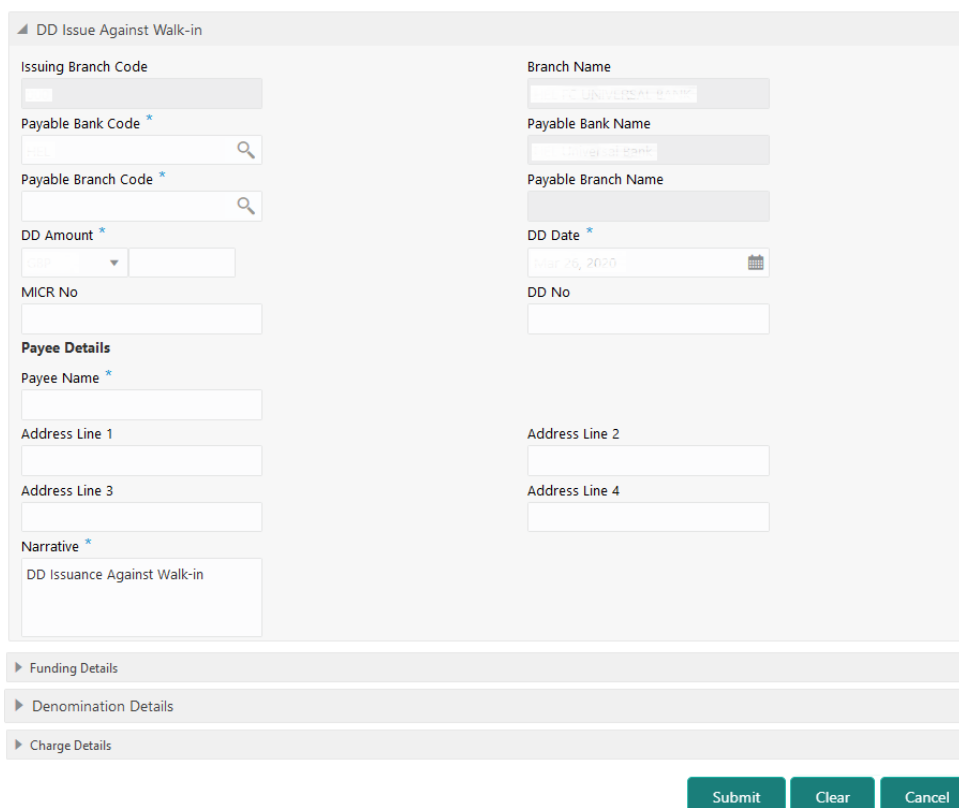

The Teller can use the **DD Issue Against Walk-in** screen to issue a DD by cash to the walk-in customers.

To issue a DD to a walk-in customer:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Issue - Walk-in** or specify **DD Issue - Walk-in** in the search icon bar and select the screen.

The **DD Issue Against Walk-in** screen is displayed.

Figure 8-25 DD Issue Against Walk-in

The screenshot displays the 'DD Issue Against Walk-in' form. The form is organized into several sections:

- Issuing Branch Code:** A text input field.
- Branch Name:** A dropdown menu.
- Payable Bank Code *:** A text input field with a search icon.
- Payable Bank Name:** A dropdown menu.
- Payable Branch Code *:** A text input field with a search icon.
- Payable Branch Name:** A dropdown menu.
- DD Amount *:** A text input field with a dropdown menu.
- DD Date *:** A date picker showing '04/05/2020'.
- MICR No:** A text input field.
- DD No:** A text input field.
- Payee Details:**
 - Payee Name *:** A text input field.
 - Address Line 1:** A text input field.
 - Address Line 2:** A text input field.
 - Address Line 3:** A text input field.
 - Address Line 4:** A text input field.
- Narrative *:** A text area containing 'DD Issuance Against Walk-in'.

At the bottom of the form, there are three expandable sections: 'Funding Details', 'Denomination Details', and 'Charge Details'. At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

2. On the **DD Issue Against Walk-in** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-25 DD Issue Against Walk-in - Field Description

Field	Description
Issuing Branch Code	Displays the logged-in branch code.
Branch Name	Displays the branch description of issuing branch.
Payable Bank Code	Select the payable bank code. Payable Branch Code	Select the branch code of the payable bank. The list of values contains the corresponding branch codes maintained using the Bank Code Maintenance screen.
Payable Branch Name	Displays the branch name of the selected branch code.
DD Amount	Specify the DD currency and DD amount.
DD Date	Specify the date that needs to be mentioned in the DD.
MICR No	Displays the serial number.
DD No	Specify the instrument number and validate.  Note: If not specified, the system generates the DD number based on the maintenance setup.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the DD is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Narrative	Displays the narrative as DD Issuance Against GL , and it can be modified.

- Click on the **Funding Details** data segment.
The **Funding Details** data segment is displayed.

Figure 8-28 Funding Details

4. On the **Funding Details** data segment, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-28 Funding Details - Field Description

Field	Description
GL Account	Select the account number of the GL against which the BC is issued from the LOV.
GL Description	Displays a brief description of the general ledger.
Drawer Name	Specify the name of the drawer.
Identification Type	Select the identification type of the payee from the drop-down list.
Identification Number	Specify the identification number of the payee.

5. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
6. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

When you submit, the transaction details are handed off to the Oracle Banking Payments system for instruments processing with external system status as **Pending**.

After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

8.2.4 DD Print and Reprint

The Teller can use the **DD Print-Reprint** screen to print a DD. It is also used to reprint the DD if it is not properly printed or to issue duplicate instruments.

The system maintains track of reprints so that the bank officials or auditors can determine the reasons and validity of multiple instrument printing.

To print or reprint a DD:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Print-Reprint** or specify **DD Print-Reprint** in the search icon bar and select the screen.

The **DD Print-Reprint** screen is displayed.

Figure 8-29 DD Print-Reprint

2. On the **DD Print-Reprint** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-29 DD Print-Reprint - Field Description

Field	Description
Demand Draft No	Specify the DD number of the instrument that you need to print or reprint.
Issue Branch Code	Select the branch code where the instrument is issued from the LOV.

Table 8-29 (Cont.) DD Print-Reprint - Field Description

Field	Description
Print Type	Select the type Print or Reprint from the drop-down list.
Query	Click Query to fetch details of DD print or reprint.
Issuing Branch Code	Displays the logged-in branch code.
DD Date	Displays the date mentioned in the DD.
DD Amount	Displays the DD currency and the DD amount.
Drawer Name	Displays the name of the drawer.
DD Status	Displays the status of the DD.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary's name.
Identification Details	Displays the identification details of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Reprint Count	Specify the count of the current reprint operation. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-left: 20px;"> <p> Note: This field is applicable only for the reprint option.</p> </div>
Narrative	Displays the default narrative as Print/Reprint , and it can be modified.

3. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

8.2.5 DD Operations

The Teller can use the **DD Operations** screen to handle the life cycle processing of DD that is already issued.

This topic contains the following subtopics:

- [DD Inquiry](#)
The Teller can use the **DD Operations** screen to inquire about the details of DD.
- [DD Revalidation](#)
The Teller can use the **DD Operations** screen to revalidate an instrument that is in expired status.

- [DD Duplicate Issue](#)
The Teller can use the **DD Operations** screen to issue the instrument if the customer or banker lost the instrument or if the instrument is damaged.
- [DD Payment Reversal](#)
The Teller can use the **DD Operations** screen to make the reversal of payment for DD. Reversal of DD Payment through EJ/SJ is not supported through Electronic Journal/ Service Journal.
- [DD Payment by Account](#)
The Teller can use the **DD Operations** screen to make payment against a DD.
- [DD Payment by Cash](#)
The Teller can use the **DD Operations** screen to make payment against a DD.
- [DD Payment by GL](#)
The Teller can use the **DD Operations** screen to make payment against a DD.
- [DD Refund by Account](#)
The Teller can use the **DD Operations** screen to refund the amount against a DD.
- [DD Refund by Cash](#)
The Teller can use the **DD Operations** screen to refund the amount against a DD.
- [DD Refund by GL](#)
The Teller can use the **DD Operations** screen to refund the amount against a DD.
- [Cancel DD by Account](#)
The Teller can use the **DD Operations** screen to cancel a DD.
- [Cancel DD by Cash](#)
The Teller can use the **DD Operations** screen to cancel a DD.
- [Cancel DD by GL](#)
The Teller can use the **DD Operations** screen to cancel a DD.

8.2.5.1 DD Inquiry

The Teller can use the **DD Operations** screen to inquire about the details of DD.

To inquire the details of DD:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Operations** or specify **DD Operations** in the search icon bar and select the screen.
The **DD Operations** screen is displayed.

Figure 8-30 DD Operations - Inquiry

2. On the **DD Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 8-30 DD Operations (Inquiry) - Field Description

Field	Description
Operation Type	Select the type Inquiry from the drop-down list.
Demand Draft No	Specify the DD number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV. After you specify the Issue Branch Code and Demand Draft No , press the Tab key. The system will make a service call to Oracle Banking Payments and fetch the demand draft details.
BC Currency	Specify BC Currency to query instrument details.
Query	Click this icon to fetch instrument details.
Demand Draft Details	Displays the details of DD under this segment.
Issue Branch	Displays the logged-in branch code.
Payable Bank Code	Displays the payable bank code.
Payable Branch	Displays the payable branch for the DD.
Demand Draft Amount	Displays the DD currency and the DD amount.
MICR No	Displays the MICR number.
Issue Date	Displays the issue date mentioned in the DD.
Issue Mode	Displays the issue mode of the DD.
Demand Draft Status	Displays the status of the DD.
Narrative	Displays the default narrative as Demand Draft Inquiry , and it can be modified.

Table 8-30 (Cont.) DD Operations (Inquiry) - Field Description

Field	Description
Revalidation Date	Displays the date of DD revalidation.
Duplicate Issue Date	Displays the duplicate issue date of DD.
Liquidation Date	Displays the liquidation date of DD.
Liquidation Mode	Displays the liquidation mode of DD.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary's name.
Beneficiary Account	Displays the beneficiary account number.
Customer ID	Displays the Customer ID.
Exchange Rate	<p>Displays the exchange rate, and it can be modified.</p> <div style="border: 1px solid #0070C0; padding: 10px; background-color: #E6F2FF;"> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system will display the exchange rate as 1.</p> </div>
Credit Amount	Displays the credit amount.
Beneficiary Address 1 and Beneficiary Address 2	Displays the address of the beneficiary.
Identification Type	Displays the identification type of the beneficiary.
Identification Number	Displays the identification number of the beneficiary.
Funding Details	Funding details are displayed under this segment.
Drawer Name	Displays the drawer name.
Drawer Account	Displays the account number of the drawer.
Customer ID	Displays the customer ID of the drawer.
Exchange Rate	Displays the exchange rate.
Debit Amount	Displays the amount that needs to be debited from the drawer account.
Cheque Number	Displays the cheque number.
Cheque Date	Displays the date mentioned in the cheque.
Drawer Address 1 and Drawer Address 2	Displays the address of the drawer.
Identification Type	Displays the identification type of the drawer.
Identification Number	Displays the identification number of the drawer.

8.2.5.2 DD Revalidation

The Teller can use the **DD Operations** screen to revalidate an instrument that is in expired status.

When a customer requests for revalidation of an instrument that is in expired status, Teller can validate the instrument details and initiate revalidation of DD. The system will allow for revalidation only if:

- Revalidation is allowed at the Instrument type level
- The instrument is not liquidated, canceled, or refunded
- The instrument is issued, revalidated, or duplicate issued but not liquidated/ refunded/canceled
- Rule based authorization is not supported for revalidation

To revalidate a DD:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Operations** or specify **DD Operations** in the search icon bar and select the screen.

The **DD Operations** screen is displayed.

Figure 8-31 DD Operations - Revalidate

The screenshot shows the 'DD Operations' screen with the following fields and controls:

- Demand Draft No ***: Text input field.
- Issue Branch ***: Text input field with a search icon.
- Operation Type ***: Dropdown menu set to 'Revalidate'.
- Revalidation Date ***: Date picker field.
- New Expiry Date**: Date picker field.
- Mode of Charge**: Dropdown menu.
- Charge Account**: Text input field.
- Narrative ***: Text area containing 'Demand Draft Revalidation'.
- Charge Details**: Expandable section.
- View Demand Draft Details**: Expandable section.
- Submit**, **Clear**, and **Cancel**: Action buttons at the bottom right.

2. On the **DD Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-31 DD Operations (Revalidate) - Field Description

Field	Description
Operation Type	Select the type Revalidate from the drop-down list.
Demand Draft No	Specify the DD number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Revalidation Details	Specify the details under this segment.
Beneficiary Account	Displays the beneficiary account number.
Revalidation Date	Select the revalidation date. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>By default, the system date is displayed as a revalidation date.</p> </div>
New Expiry Date	Displays the new expiry date based on the specified revalidation date.
Mode of Charge	Select the mode of charge from the drop-down values (Account or Cash).
Charge Account	Specify the charge account number. The following conditions apply based on the value selected for Mode of Charge : <ul style="list-style-type: none"> If the Mode of Charge is selected as Account, the user needs to capture the account from which the charges are to be deducted. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>If the Mode of Charge is selected as Account, the system displays the Drawer Account by default. Else, this field is kept blank and the user can input the valid account number.</p> </div> <ul style="list-style-type: none"> If Mode of Charge is selected as Cash, the user needs to capture Charge Currency, and denomination details to be picked up based on the charge currency specified.
Narrative	Displays the default narrative as Demand Draft Revalidation , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click on the **View Demand Draft Details** data segment to view the additional details of the DD.

 **Note:**

This data segment is non-editable.

5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from Oracle Banking Payments, the system will discard the transaction.

8.2.5.3 DD Duplicate Issue

The Teller can use the **DD Operations** screen to issue the instrument if the customer or banker lost the instrument or if the instrument is damaged.

In case of a request raised by the customer, additional charges will be deducted while issuing again. The system will allow for duplicate issues only if:

- The duplicate issue is allowed at the instrument type level
- The instrument is not liquidated, canceled, or refunded
- The instrument is issued or revalidated but not liquidated/refunded/canceled
- Rule based authorization is not supported for duplicate issue

To issue a duplicate DD:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Operations** or specify **DD Operations** in the search icon bar and select the screen.

The **DD Operations** screen is displayed.

Narrative	Displays the default narrative as Demand Draft Payment Reversal , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click on the **View DD Details** data segment to view the additional details of the DD.

 **Note:**

This data segment is non-editable.

5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from Oracle Banking Payments, the system will discard the transaction.

8.2.5.5 DD Payment by Account

The Teller can use the **DD Operations** screen to make payment against a DD.

The DD payment is credited to the beneficiary customer account when the operation mode is **Account**.

To make payment against a DD:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Operations** or specify **DD Operations** in the search icon bar and select the screen.

The **DD Operations** screen is displayed.

Figure 8-34 DD Operations - Payment by Account

2. On the **DD Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-34 DD Operations (Payment by Account) - Field Description

Field	Description
Operation Type	Select the type Payment from the drop-down list.
Demand Draft No	Specify the DD number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Operation Mode	Select the operation mode as Account from the drop-down values.
Payment Details	Specify the details under this segment.
Beneficiary Account	Specify the beneficiary account number.
Beneficiary Name	Specify the beneficiary name.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.

Table 8-34 (Cont.) DD Operations (Payment by Account) - Field Description

Field	Description
Exchange Rate	Displays the exchange rate, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration</code> at the Function Code Indicator level is set as <code>Y</code> .
Account Amount	Displays the account amount.  Note: This field is displayed only if <code>Multi-Currency Configuration</code> at the Function Code Indicator level is set as <code>Y</code> .
Total Charge Amount	Displays the total charge amount.  Note: This field is displayed only if <code>Total Charges Configuration</code> at the Function Code Indicator level is set as <code>Y</code> .
Narrative	Displays the default narrative as DD Operations , and it can be modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click on the **View DD Details** data segment to view the additional details of the DD.

 **Note:**

This data segment is non-editable.

- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the details to the payments product processor (Oracle Banking Payments) for processing. When you get a success notification from Oracle Banking Payments, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from Oracle Banking Payments, the system will discard the transaction.

8.2.5.6 DD Payment by Cash

The Teller can use the **DD Operations** screen to make payment against a DD.

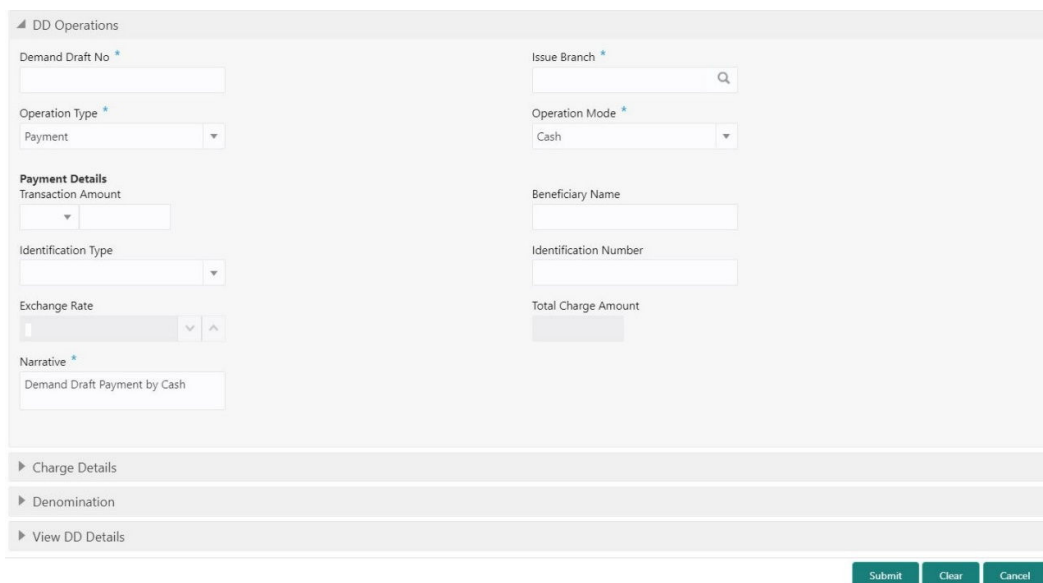

The DD payment is made by cash to the beneficiary when the operation mode is **Cash**.

To make payment against a DD:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **DD Operations** or specify **DD Operations** in the search icon bar and select the screen.

The **DD Operations** screen is displayed.

8.3.1.1 Cash Remittance Issue Against Account

The **Cash Remittance Issue Against Account** screen is used to remit funds across branches of the same bank and across banks.

The cash remittance is performed against the remitter's account when the issuing mode is **Account**.

To perform cash remittance issue against account:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **Cash Remittance Issue** or specify **Cash Remittance Issue** in the search icon bar and select the screen.

The **Cash Remittance Issue Against Account** screen is displayed.

Figure 8-43 Cash Remittance Issue Against Account

The screenshot shows a web form titled "Cash Remittance Issue Against Account". The form is organized into several sections:

- Issuing Branch Code:** A search field with a magnifying glass icon.
- Payable Bank Code:** A search field with a magnifying glass icon.
- Payable Branch Code:** A search field with a magnifying glass icon.
- Remittance Amount:** A dropdown menu followed by a text input field.
- Remittance No:** A text input field.
- Issuing Mode:** A dropdown menu.
- Issuing Branch Name:** A text input field.
- Payable Bank Name:** A text input field.
- Payable Branch Name:** A text input field.
- Remittance Date:** A date picker field.
- Test Key No:** A text input field.
- Beneficiary Details:** A section containing:
 - Beneficiary Name:** A text input field.
 - Address Line 1, 2, 3, 4:** Four text input fields.
 - Identification Type:** A dropdown menu.
 - Identification No:** A text input field.
 - Narrative:** A text input field with the value "Cash Remittance Issuance".
- Funding Details:** A section with a right-pointing arrow.
- Charge Details:** A section with a right-pointing arrow.

At the bottom right of the form, there are three buttons: "Submit", "Clear", and "Cancel".

2. On the **Cash Remittance Issue Against Account** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 8-43 Cash Remittance Issue Against Account - Field Description

Field	Description
Issuing Branch Code	Displays the code of the home branch.
Issuing Branch Name	Displays the name of the issuing branch code.
Payable Bank Code	Select the payable bank code from the list of values.  Note: To remit funds within the same bank, select the logged-in bank code as payable bank code. To remit funds across banks, select the necessary bank code as payable bank code.
Payable Bank Name	Displays the name of the selected bank code.

Table 8-43 (Cont.) Cash Remittance Issue Against Account - Field Description

Field	Description
Payable Branch Code	Select the branch code of the payable bank. The list of values contains the corresponding branches maintained for the payable bank code.
Payable Branch Name	Displays the branch name of the selected branch code.
Remittance Amount	Specify the cash remittance currency and amount, which needs to be transferred.
Remittance Date	Select the date of cash remittance.
Remittance No	Specify the cash remittance number.
Test Key No	Specify the test key number.
Issue Mode	Select the issue mode from the drop-down values (Account , Cash , or GL).
Beneficiary Details	Specify the fields.
Beneficiary Name	Specify the name of the beneficiary.
Beneficiary Account	Specify the account number of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Identification Type	Select the identification type.
Identification No	Specify the identification number.
Narrative	Displays the default narrative as Cash Remittance Issuance , and it can be modified.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

8.3.2 Cash Remittance Operations

The Teller can use the **Cash Remittance Operations** screen to handle the life cycle processing of cash remittance that is already completed.

This topic contains the following subtopics:

- [Cash Remittance Inquiry](#)
The Teller can use the **Cash Remittance Operations** screen to inquire about the details of the issued cash remittance.
- [Cash Remittance Payment by Account](#)
The Teller can use the **Cash Remittance Operations** screen to make payment against a cash remittance.
- [Cash Remittance Payment by Cash](#)
The Teller can use the **Cash Remittance Operations** screen to make payment against a cash remittance.
- [Cash Remittance Payment by GL](#)
The Teller can use the **Cash Remittance Operations** screen to make payment against a cash remittance.
- [Cash Remittance Refund by Account](#)
The Teller can use the **Cash Remittance Operations** screen to refund the amount against a cash remittance.
- [Cash Remittance Refund by Cash](#)
The Teller can use the **Cash Remittance Operations** screen to refund the amount against a cash remittance.
- [Cash Remittance Refund by GL](#)
The Teller can use the **Cash Remittance Operations** screen to refund the amount against a cash remittance.
- [Cancel Cash Remittance by Account](#)
The Teller can use the **Cash Remittance Operations** screen to cancel a cash remittance.

- [Cancel Cash Remittance by Cash](#)
The Teller can use the **Cash Remittance Operations** screen to cancel a cash remittance.
- [Cancel Cash Remittance by GL](#)
The Teller can use the **Cash Remittance Operations** screen to cancel a cash remittance.

8.3.2.1 Cash Remittance Inquiry

The Teller can use the **Cash Remittance Operations** screen to inquire about the details of the issued cash remittance.

When you select the operation mode as **Inquiry**, the fields related to cash remittance inquiry will be displayed.

To inquire about the details of cash remittance:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **Cash Remittance Operations** or specify **Cash Remittance Operations** in the search icon bar and select the screen.

The **Cash Remittance Operations** screen is displayed.

Figure 8-49 Cash Remittance Operations (Inquiry)

The screenshot shows the 'Cash Remittance Operations' interface. It features a search bar at the top left with a magnifying glass icon. Below it are input fields for 'Issue Branch Code *', 'Test Key No', and a 'Query' button. The main area is organized into three columns of fields:

- Remittance Details:** Issuing Branch, Payable Branch Code, Issue Date (with calendar icon), Remittance No, Narrative, Liquidation Date (with calendar icon).
- Beneficiary Details:** Beneficiary Name, Address Line 1, Address Line 3, Identification Type (dropdown).
- Funding Details:** Remitter Account, Address Line 1, Address Line 3, Cheque Number, Exchange Rate (dropdown with up/down arrows), Identification Type (dropdown).

On the right side, there are additional fields: Remittance No, Operation Mode * (dropdown with 'Inquiry' selected), Payable Bank Code, Remittance Amount, Remittance Status (dropdown), Test Key No, Issue Mode (dropdown), Liquidation Mode (dropdown), Beneficiary Account, Address Line 2, Address Line 4, Identification Number, Remitter Name, Address Line 2, Address Line 4, Cheque Date (with calendar icon), Account Amount, and Identification Number. At the bottom right, there are 'Submit', 'Clear', and 'Cancel' buttons.

2. On the **Cash Remittance Operations** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-47 Cash Remittance Operations (Inquiry) - Field Description

Field	Description
Issue Branch Code	Select the branch code where the cash remittance is issued from the LOV.
Operation Mode	Select the type Inquiry from the drop-down list.
Remittance No	Specify the cash remittance number.

Table 8-47 (Cont.) Cash Remittance Operations (Inquiry) - Field Description

Field	Description
Test Key No	Specify the test key number.

Field	Description
Issue Branch Code	Select the branch code where the remittance is issued.
Remittance No	Specify the remittance number.
Test Key No	Specify the test key number.

Table 8-51 (Cont.) Cash Remittance Operations (Refund by Account) - Field Description

Field	Description
Operation Type	Select the type Refund from the drop-down list.
Operation Mode	Select the operation mode as Account from the drop-down values.
Query	Click this icon to fetch the remittance details.  Note: When you click this icon, after you specify the Issue Branch Code and Remittance No , the system will make a service call to the Oracle Banking Payments and fetch the remittance details.
Beneficiary Details	Specify the details under this segment.
Beneficiary Account	Displays the beneficiary account number.
Beneficiary Name	Displays the beneficiary's name.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.
Exchange Rate	Displays the exchange rate, and it can be modified.  Note: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.
Account Amount	Displays the account amount.  Note: This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.

Table 8-51 (Cont.) Cash Remittance Operations (Refund by Account) - Field Description

Field	Description
Total Charge Amount	<p>Displays the total charge amount.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if <code>Total Charges Configuration</code> at <code>Function Code Indicator</code> level is set as <code>Y</code>.</p> </div>
Narrative	<p>Displays the default narrative as Cash Remittance Operation by Refund, and it can be modified.</p>

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click on the **Remittance Details** data segment to view the additional details of the remittance.

 **Note:**

This data segment is non-editable.

5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the request to Oracle Banking Payments using Instrument Pay Service. If the remittance is issued by another bank, the Oracle Banking Branch has to provide the test key number during handoff for validation. On transaction completion, the Oracle Banking Branch will hand off accounting to FLEXCUBE Universal Banking for the main leg.

8.3.2.6 Cash Remittance Refund by Cash

The Teller can use the **Cash Remittance Operations** screen to refund the amount against a cash remittance.

The cash remittance refund is made by cash to the beneficiary when the operation mode is **Refund**.

To refund the amount:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **Cash Remittance Operations** or specify **Cash Remittance Operations** in the search icon bar and select the screen.

The **Cash Remittance Operations** screen is displayed.

Figure 8-54 Cash Remittance Operations (Refund by Cash)

2. On the **Cash Remittance Operations** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click on the **Remittance Details** data segment to view the additional details of the remittance.

 **Note:**

This data segment is non-editable.

5. Click **Submit.**

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

On transaction submission, the system will hand off the request to Oracle Banking Payments using Instrument Pay Service. If the remittance is issued by another bank, the Oracle Banking Branch has to provide the test key number during handoff for validation. On transaction completion, the Oracle Banking Branch will hand off accounting to FLEXCUBE Universal Banking for the main leg.

8.3.3 Inward Remittance Registration

The **Inward Remittance Registration** screen is used to register an inward remittance and create a remittance instrument.

During inward registration, the specified test key will be validated internally to proceed with registration.

To register an inward remittance:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **Inward Remittance Registration** or specify **Inward Remittance Registration** in the search icon bar and select the screen.

The **Inward Remittance Registration** screen is displayed.

Figure 8-59 Inward Remittance Registration

2. On the **Inward Remittance Registration** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 8-57 Inward Remittance Registration - Field Description

Field	Description
Inward Remittance Reference	Specify the inward remittance reference issued by the external bank during registration of the remittance.
Remittance Amount	Specify the remittance currency and amount.  Note: By default, the logged-in branch local currency is displayed as remittance currency, and it can be modified.

Table 8-57 (Cont.) Inward Remittance Registration - Field Description

Field	Description
Issuing Bank Code	Specify the code of the external issuing bank.
Issuing Bank Name	Displays the name of the specified external issuing bank.
Issue Branch Code	Specify the branch code of the external issuing bank.
Issue Branch Name	Displays the name of the specified external issuing branch.
Payable Bank Code	Specify the payable bank code.
Payable Bank Name	Displays the payable bank name.
Payable Branch Code	Specify the payable branch code.
Payable Branch Name	Displays the payable branch name.
Remittance Date	Select the issue date of the TT.
Remittance No	Specify the remittance number of the TT.
Test Key No	Specify the test key number.
Narrative	Displays the default narrative as Inward Remittance Registration , and it can be modified.
Beneficiary Details	Specify the details under this segment.
Beneficiary Account	Displays the beneficiary account number.
Beneficiary Name	Displays the beneficiary's name.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification No	Specify the identification number of the beneficiary.
Beneficiary Phone No	Specify the phone number of the beneficiary.
Funding Details	Specify the fields.
Remitter Account	Specify the account number of the remitter.
Remitter Name	Displays the name of the specified remitter account.
Address Line 1 to Address Line 4	Displays the address of the specified remitter account.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.
Identification Type	Select the identification type.
Identification Number	Specify the identification number.
Remitter Phone No	Specify the phone number of the remitter.

3. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves.

8.4 Travellers Cheque

This sub-section describes the various screens used to perform the remittances related to Travellers Cheque. The screens are described in the following topics:

This topic contains the following subtopics:

- [TC Sale by Other Modes](#)
The Teller can use the **TC Sale by Other Modes** screen to issue TC against the customer's CASA or a GL account.
- [TC Sale Against Walk-in](#)
The Teller can use the **TC Sale Against Walk-in** screen to sell TC to a walk-in customer by cash.
- [TC Purchase Against Account](#)
The Teller can use the **TC Purchase Against Account** screen to purchase TC from a customer and the credit the equivalent amount to the customer account.
- [TC Purchase Against Walk-in](#)
The Teller can use the **TC Purchase Against Walk-in** screen to purchase TC from a walk-in customer and pay out the equivalent amount in cash.

8.4.1 TC Sale by Other Modes

The Teller can use the **TC Sale by Other Modes** screen to issue TC against the customer's CASA or a GL account.

To issue TC against various modes:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **TC Sale by Other Modes** or specify **TC Sale by Other Modes** in the search icon bar and select the screen.

The **TC Sale by Other Modes** screen is displayed.

Figure 8-60 TC Sale by Other Modes

2. On the **TC Sale by Other Modes** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-58 TC Sale by Other Modes - Field Description

Field	Description
Issuing Bank Code	Displays the code of the issuing bank.
Issuing Bank Name	Displays the name of the issuing bank.
Issuing Branch Code	Displays the code of the issuing branch.
Branch Name	Displays the name of the issuing branch.
Issuer Code	Click the search icon and select the issuer code from the list of values.  Note: The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the Issuer Code Maintenance screen.
Issuer Code Description	Displays the description of the specified Issuer Code .
Issue Mode	Select the mode of issue from the drop-down values (<i>By Account</i> or <i>By GI</i>).
TC Amount	Select the TC currency from the drop-down values, and specify the TC Amount.

Table 8-58 (Cont.) TC Sale by Other Modes - Field Description

Field	Description
TC Date	<p>Select the date of the TC.</p> <p> Note: By default, the current posting date is displayed.</p>
Account Number	<p>Specify the account number of the customer. When you press the Tab key, the system defaults the Account Name.</p> <p> Note: This field is applicable only if the Issue Mode is selected as By Account.</p>
Account Name	<p>Displays the name of the account.</p> <p> Note: This field is applicable only if the Issue Mode is selected as By Account.</p>
Account Amount	<p>Displays the account amount based on the Exchange Rate, TC Amount, and Account Number selected.</p> <p> Note: This field is applicable only if the Issue Mode is selected as By Account.</p>
GL Number	<p>Click the search icon, and select the GL number from the list of values.</p> <p> Note: This field is applicable only if the Issue Mode is selected as By GL.</p>

Table 8-58 (Cont.) TC Sale by Other Modes - Field Description

Field	Description
GL Description	<p>Displays the description of the specified GL account.</p> <p> Note:</p> <p>This field is applicable only if the Issue Mode is selected as By GL.</p>
GL Amount	<p>Displays the account amount based on the Exchange Rate, TC Amount, and Account Number selected.</p> <p> Note:</p> <p>This field is applicable only if the Issue Mode is selected as By GL.</p>
Cheque Number	Specify the cheque number.
Cheque Date	Specify the date of the cheque.
Exchange Rate	<p>Displays the exchange rate.</p> <p> Note:</p> <p>If the TC currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code indicator level is set as Y.</p>
Total Charge Amount	<p>Displays the total charges in the branch local currency.</p> <p> Note:</p> <p>This field is displayed only if Multi-Currency Configuration at the Function Code indicator level is set as Y.</p>
Narrative	Displays the narrative as TC Sale Against Account and it can be modified.
Beneficiary Details	Specify the fields under this section.
Beneficiary Name	Specify the name of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.

3. Specify the TC denomination details. For information on the fields in the **TC Denominations** segment, refer to [Add TC Denominations to Sell TC](#).
4. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
5. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC outflow) is updated to the teller position for the combination of Issuer Code, TC Currency, TC Denom code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, the system updates the TC Status as **Used** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number. Following main transaction accounting entries is triggered for Account mode at Oracle Banking Branch:

- Dr Customer Account for TC Amount
- Cr Int. Susp GL for TC Amount

Following main transaction accounting entries is triggered for Account mode at Oracle Banking Branch:

- Dr Cash GL for TC Amount
- Cr Int. Susp GL for TC Amount

Oracle Banking Payments will pass the credit leg accounting (Debit - Int. Susp GL and Credit - TC GL) for TC Issuance. During handoff, Oracle Banking Branch needs to pass the intermediary bridge GL as a Debit account in the request.

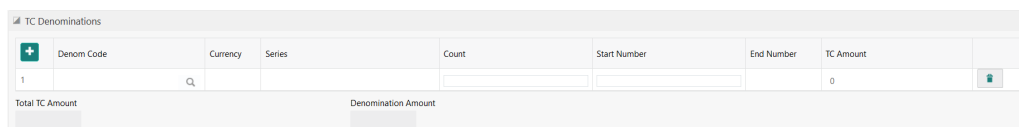

- [Add TC Denominations to Sell TC](#)
You can add the denomination details for the TC in the **TC Denominations** data segment.

8.4.1.1 Add TC Denominations to Sell TC

You can add the denomination details for the TC in the **TC Denominations** data segment.

Make sure that the transaction details are added to the transaction screen.

Figure 8-61 TC Denominations

1		Q					0

Total TC Amount:

Denomination Amount:

To add the denomination details:

On the **TC Denominations** data segment, specify the fields. For more information on fields, refer to the field description table.

Table 8-59 TC Denominations - Field Description

Field	Description
Denom Code	Specify the TC denomination code from the list of values.
Currency	Displays the default TC Currency.
Series	Specify the series of the TC Denom Code that needs to be sold from Teller's Till. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>The list of values contains the valid TC series that are available with the Teller TC position. On click of LOV, the search criterion field will have Series, and the result criterion will display the Series and Start Number.</p> </div>
Count	Specify the count of the TC.
Start Number	Display the starting number of the series. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>Based on the series selected, the system will populate the Start Number available for the combination of Currency, TC Denom Code, and Series.</p> </div>
End Number	Displays the end number, which is the sum of the start number and the count.
TC Amount	Displays the TC Amount, which is the product of the denomination and the count.
Total TC Amount	Displays the total TC amount along with the currency.
Denomination Amount	Displays the denomination amount along with the currency.

8.4.2 TC Sale Against Walk-in

The Teller can use the **TC Sale Against Walk-in** screen to sell TC to a walk-in customer by cash.

To sell TC to a walk-in customer:

1. On the Homepage, from **Teller** mega menu, under **Remittances**, click **TC Sale Against Walk-in** or specify **TC Sale Against Walk-in** in the search icon bar and select the screen.

The **TC Sale Against Walk-in** screen is displayed.

Figure 8-62 TC Sale Against Walk-in

2. On the **TC Sale Against Walk-in** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 8-60 TC Sale Against Walk-in - Field Description

Field	Description
Issuing Bank Code	Displays the code of the issuing bank.
Issuing Bank Name	Displays the name of the issuing bank.
Issuing Branch Code	Displays the code of the issuing branch.
Issuing Branch Name	Displays the name of the issuing branch.

Table 8-60 (Cont.) TC Sale Against Walk-in - Field Description

Field	Description
Issuer Code	<p>Click the search icon, and select the issuer code from the list of values.</p> <p> Note:</p> <p>The list of values provides the HO code of the logged-in branch and the issuer codes maintained in the Issuer Code Maintenance screen.</p>
Issuer Code Description	Displays the description of the specified Issuer Code .
TC Amount	Select the TC currency from the drop-down values, and specify the TC Amount.
TC Date	<p>Select the date of the TC.</p> <p> Note:</p> <p>By default, the current posting date is displayed.</p>
Transaction Amount	Select the transaction currency from the drop-down values. When you press the Tab key, the system displays the transaction amount based on the Exchange Rate , TC Amount , and Account Number selected.
Exchange Rate	<p>Displays the exchange rate.</p> <p> Note:</p> <p>If the TC currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code indicator level is set as Y.</p>
Total Charge Amount	<p>Displays the total charges in the branch local currency.</p> <p> Note:</p> <p>This field is displayed only if Multi-Currency Configuration at the Function Code indicator level is set as Y.</p>
Narrative	Displays the narrative as TC Sale Against Walk-in , and it can be modified.
Beneficiary Details	Specify the fields.

Table 8-60 (Cont.) TC Sale Against Walk-in - Field Description

Field	Description
Beneficiary Name	Specify the name of the beneficiary.
Identification Type	Select the identification type from the drop-down values.
Identification Number	Specify the identification number.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.

- Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
- Specify the TC denomination details. For information on the fields in the **TC Denominations** segment, refer to [Add TC Denominations to Sell TC](#).
- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the TC position (TC outflow) is updated to the teller position for the combination of Issuer Code, TC Currency, TC denom Code, and Series to the extent of TC denomination units being purchased.

In addition, during transaction completion, the system updates the TC status as **Used** for the combination of TC Currency, Issuer Code, TC Denom Code, Series, and TC Number. Following main transaction accounting entries are triggered for this transaction at Oracle Banking Branch.

- Dr Cash GL for TC Amount
- Cr Int. Susp GL for TC Amount

Oracle Banking Payments will pass the credit leg accounting (Debit - Int. Susp GL and Credit - TC GL) for TC Issuance. During handoff, Oracle Banking Branch needs to pass the intermediary bridge GL as a Debit account in the request.

Term Deposit Transactions

A deposit with a fixed tenure is called a time deposit or Term Deposits (TD). You can open, redeem, and top-up a term deposit using the TD transactions.

This topic contains the following subtopics:

- [TD Account Opening](#)
The Teller can use the **TD Account Opening** screen to open a term deposit account.
- [TD Redemption Against Cash](#)
The Teller can use the **TD Redemption Against Cash** screen to initiate manual redemption of the cash from a term deposit account.
- [TD Redemption Against Account](#)
The Teller can use the **TD Redemption Against Account** screen to initiate manual redemption of the cash from a term deposit account.
- [TD Top-Up Against Account](#)
The Teller can use the **TD Top-Up Against Account** screen to initiate the top-up for a term deposit account.
- [TD Top-Up Against Cash](#)
The Teller can use the **TD Top-Up Against Cash** screen to initiate the top-up for a term deposit account.

9.1 TD Account Opening

The Teller can use the **TD Account Opening** screen to open a term deposit account.

The following details are necessary to open a term deposit account:

- Deposit details
- Funding details
- Joint Holder details
- Payout details
- Rollover details

To open a term deposit account:

1. On the Homepage, from **Teller** mega menu, under **Term Deposit**, click **TD Account Opening** or specify **TD Account Opening** in the search icon bar and select the screen.
The **TD Account Opening** screen is displayed.

Figure 9-1 TD Account Opening

2. On the **TD Account Opening** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 9-1 TD Account Opening - Field Description

Field	Description
Customer ID	Select the Customer ID from the list of values.
Customer Name	Displays the name of the specified Customer ID.
Mode of Operation	Select the mode of operations from the drop-down list. The drop-down list shows the following values: <ul style="list-style-type: none"> • Single • Jointly • Either Anyone or Survivor • Former or Survivor • Mandate Holder
Account Type	Select the account type (Single or Joint).
Deposit Product	Specify the deposit product (FCUBS Account Class) from the list of values fetched from FLEXCUBE Universal Banking System.
Deposit Product Description	Displays the description of the specified deposit product.
Deposit Account Description	Specify the description of the deposit account.
Deposit Account Opening Date	Specify the account opening date of the deposit account.
Deposit Amount	Specify the currency and amount for the term deposit.
Deposit Tenor	Specify the tenor of deposit in days/months/years.
Maturity Amount	Displays the maturity amount along with the currency.

Table 9-1 (Cont.) TD Account Opening - Field Description

Field	Description
Simulate	Click Simulate to fetch the interest data for the given account class.
Auto-Renewal	Select if auto-renewal is required for the deposit account after maturity.

3. Specify the funding details. For information on the fields in the **Funding Details** segment, refer to [Add Funding Details](#).
4. Specify the joint holder details. For information on the fields in the **Joint Holders** segment, refer to [Add Joint Holders Details](#).
5. Specify the payout details. For information on the fields in the **Payout Details** segment, refer to [Add Payout Details](#).
6. Specify the interest details. For information on the fields in the **Interest Details** segment, refer to [Add Interest Details](#).
7. Specify the rollover details. For information on the fields in the **Rollover Details** segment, refer to [Add Rollover Details](#).
8. Specify the denomination details. For information on the fields in the **Denomination Details** segment, refer to [Add Denomination Details](#).
9. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to the Term Deposit module in FLEXCUBE Universal Banking for the TD account opening process.

Both TD account opening by cash and TD account opening by account can be viewed from the electronic journal log after submission.

- [Add Funding Details](#)
The **Funding Details** data segment is used to add the details of the pay-by option for the TD.
- [Add Joint Holders Details](#)
The **Joint Holders** data segment is used to add the details of the joint holders for the TD.
- [Add Payout Details](#)
The **Payout Details** data segment is used to add the details of the maturity payment for the TD.

Deposit Rate Code	Displays the deposit rate code. You can edit the value based on the requirements.
Variance	Displays the variance. You can edit the value based on the requirements.

9.1.5 Add Rollover Details

The **Rollover Details** data segment is used to add the parameters for auto-renewal of the TD account.

The prerequisites are as follows:

1. Make sure that the deposit details are added to the **TD Account Opening** screen. For more information, refer to [TD Account Opening](#).
2. Specify the funding details. For more information, refer to [Add Funding Details](#).
3. Specify the details of the joint holders. For more information, refer to [Add Joint Holders Details](#).
4. Specify the payout details. For more information, refer to [Add Payout Details](#).
5. Specify the interest details. For more information, refer to [Add Interest Details](#).
6. After you specify the interest details, click on the **Rollover Details** data segment.

Figure 9-7 Rollover Details

The screenshot shows the 'Rollover Details' form with the following fields:

- Renewal Option ***: A dropdown menu.
- Renewal Type ***: A dropdown menu.
- Renewal Amount**: A dropdown menu followed by a text input field.
- Renewal Tenor ***: A section with three sub-sections: 'Days', 'Months', and 'Years'. Each sub-section contains a text input field and a small up/down arrow icon.

To add the rollover details:

On the **Rollover Details** data segment, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 9-6 Rollover Detail - Field Description

Field	Description
Renewal Option	<p>Specify the renewal option from the following drop-down values:</p> <ul style="list-style-type: none"> • Account Class Tenor • Account Tenor • Independent <p> Note: This field is mandatory to input if auto-renewal is selected.</p>
Renewal Type	<p>Specify the renewal type from the following drop-down values:</p> <ul style="list-style-type: none"> • Principal • Interest • Principal + Interest • Special Amount <p> Note: This field is mandatory to input if auto-renewal is selected.</p>
Renewal Amount	<p>Specify the renewal amount and renewal currency.</p> <p> Note: The renewal currency is displayed as a deposit currency.</p>
Renewal Tenor	Specify the renewal tenor in days/months/year.

9.2 TD Redemption Against Cash

The Teller can use the **TD Redemption Against Cash** screen to initiate manual redemption of the cash from a term deposit account.

It is accomplished by the pre-mature redemption either in full or part, ahead of the maturity date or after the maturity date when TD is in grace days without maturing.

To perform TD redemption against cash:

1. On the Homepage, from **Teller** mega menu, under **Term Deposit**, click **TD Redemption - Cash** or specify **TD Redemption - Cash** in the search icon bar and select the screen.

The **TD Redemption Against Cash** screen is displayed.

Figure 9-8 TD Redemption Against Cash

2. On the **TD Redemption Against Cash** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 9-7 TD Redemption Against Cash - Field Description

Field	Description
Deposit Account	Specify the deposit account number.
Query	Click Query to fetch the deposit details.
Deposit Details	Specify the fields.
Customer ID	Displays the Customer ID of the deposit account number.
Account Name	Displays the account description of the deposit account.
Principal Amount	Click Compute to get the amount paid at the time of term deposit booking.
Interest Amount	Displays the default rate of interest at which the interest amount is calculated.
Tax Amount	Displays the amount to be deducted towards tax.
Interest Rate	Click Compute to get the current interest rate applicable after partial or full redemption.
Maturity Amount	Displays the current maturity amount after partial or full redemption.
Total Payout Amount	Displays the total payout amount.

Table 9-7 (Cont.) TD Redemption Against Cash - Field Description

Field	Description
Redemption Details	Specify the fields.
Redemption Mode	Select the redemption mode from the drop-down list (Partial Redemption or Full Redemption).
Redemption Amount	Specify as mentioned below: <ul style="list-style-type: none"> • If the Redemption Mode is selected as Partial Redemption, specify the redemption amount. • If the Redemption Mode is selected as Full Redemption, it displays the principal amount as redemption amount.
Waive Penalty	Check this box to waive the penalty for redeeming the term deposit. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This is applicable only if the Redemption Mode is selected as Full Redemption.</p> </div>
Waive Interest	Check this box to waive the interest for redeeming the term deposit. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This is applicable only if the Redemption Mode is selected as Full Redemption.</p> </div>
Transaction Currency	Specify the currency in which the cash is handed over to the customer during redemption.
Transaction Amount	Displays the transaction amount based on the Redemption Amount and Transaction Currency . <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>If the deposit currency is different from the transaction currency, the system calculates the transaction amount based on the exchange rate. This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.</p> </div>

3. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to the Term Deposit module in FLEXCUBE Universal Banking for the TD top-up processing.

10

Credit Card Transactions

The Teller can use the screens related to credit card transactions to perform credit card advances and payments.

This topic contains the following subtopics:

- [Credit Card Advance by Cash](#)
The Teller can use the **Advance by Cash** screen to disburse the credit card advance in cash to a walk-in customer against the credit card.
- [Credit Card Advance by Transfer](#)
The Teller can use the **Advance by Transfer** screen to transfer the credit card advance amount to a customer's account.
- [Credit Card Payment by Cash](#)
The Teller can use the **Credit Card Payment by Cash** screen to accept cash from a walk-in customer and make a credit card payment.
- [Credit Card Payment by Non-Cash Modes](#)
The Teller can use the **Credit Card Payment** screen to make credit card payments by debiting a walk-in customer's account or clearing a cheque.
- [Stop Card Request](#)
The Teller can use the **Stop Card Request** screen to block the credit card of a customer.

10.1 Credit Card Advance by Cash

The Teller can use the **Advance by Cash** screen to disburse the credit card advance in cash to a walk-in customer against the credit card.

To perform credit card advance by cash:

1. On the Homepage, from **Teller** mega menu, under **Credit Card**, click **Advance by Cash** or specify **Advance by Cash** in the search icon bar and select the screen.

The **Advance by Cash** screen is displayed.

Figure 10-1 Advance by Cash

2. On the **Advance by Cash** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 10-1 Advance by Cash - Field Description

Field	Description
Credit Card	Specify the credit card number against which the cash advance is to be made. When you press the Tab key, the customer details and card details will be displayed in the Customer Information widget.
Advance Amount	Select the transaction currency from the drop-down values and specify the advance amount.
Advance Tenor	Specify the tenor in Days/Months/Years.

Table 10-1 (Cont.) Advance by Cash - Field Description

Field	Description
Document Type	Select from the drop-down list. The values in the drop-down list are mentioned below: <ul style="list-style-type: none"> • Address Document • Identity Document • Financial Document • General Document
Document Number	Specify the document number. <p> Note:</p> <p>This field is mandatory only if the document type is selected.</p>
Approval Reference Number	Specify the approval reference if already approved.
Exchange Rate	Displays the exchange rate. <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi-Currency Configuration at the Function Code indicator level is set as Y.</p>

Cheque Date	Specify the date of the cheque.
Routing Number	Specify the routing number of the cheque.
Drawer Name	Specify the drawer name.
Drawer Account	Specify the drawer account number.
Exchange Rate	<p>Displays the exchange rate.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if <code>Multi-Currency Configuration at the Function Code indicator level</code> is set as <code>Y</code>.</p> </div>
Credit Amount	<p>Display the credit amount along with the currency.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if <code>Multi-Currency Configuration at the Function Code indicator level</code> is set as <code>Y</code>.</p> </div>

Table 10-5 (Cont.) Credit Card Payment by Clearing Cheque - Field Description

Field	Description
Total Charge Amount	<p>Displays the total charges applicable for the credit card payment.</p> <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>This field is displayed only if Total Charges Configuration at the Function Code indicator level is set as Y.</p> </div>
Narrative	Displays the narrative as Credit Card Payment by Clearing Cheque , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the credit card payment is done successfully.

10.5 Stop Card Request

The Teller can use the **Stop Card Request** screen to block the credit card of a customer.

To block a credit card:

1. On the Homepage, from **Teller** mega menu, under **Credit Card**, click **Stop Card** or specify **Stop Card** in the search icon bar and select the screen.

The **Stop Card Request** screen is displayed.

Figure 10-6 Stop Card Request

2. On the **Stop Card Request** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 10-6 Stop Card Request - Field Description

Field	Description
Card Number	Specify the credit card number, which needs to be blocked. When you press the Tab key, the system will fetch and display the following details: <ul style="list-style-type: none"> • Customer ID • Account Number • Branch • Reference Number
Customer ID	Displays the Customer ID for the credit card number specified.
Account Number	Displays the account number for the credit card number specified.
Branch	Displays the branch for the credit card number specified.
Reference Number	Displays the reference number for the credit card number specified.
Card Status	Select the card status (Active or Inactive) from the drop-down list.

3. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the credit card will be blocked successfully.

11

Loan Transactions

The loan transactions are used to perform loan disbursement and loan repayment transactions.

This topic contains the following subtopics:

- [Loan Disbursement by Cash](#)
The Teller can use the **Loan Disbursement by Cash** screen to disburse the loan by cash.
- [Loan Repayment by Cash](#)
The Teller can use the **Loan Repayment by Cash** screen to accept repayment of a loan by cash.

11.1 Loan Disbursement by Cash

The Teller can use the **Loan Disbursement by Cash** screen to disburse the loan by cash.

To perform loan disbursement by cash:

1. On the Homepage, from **Teller** mega menu, under **Loan Transactions**, click **Loan Disbursement by Cash** or specify **Loan Disbursement by Cash** in the search icon bar and select the screen.

The **Loan Disbursement by Cash** screen is displayed.

Bill Payments

The bill payment transactions are used to make payments for various utility bills.

This topic contains the following subtopics:

- [Bill Payment by Cash](#)
The Teller can use the **Bill Payment by Cash** screen to make utility bill payments by cash.
- [Bill Payments by Other Modes](#)
The bill payment transactions are used to make payments for various utility bills. Utility bill payments can be performed for the Institutions, which are already maintained in product processors. The bill payment can be made by account and clearing cheque.

13.1 Bill Payment by Cash

The Teller can use the **Bill Payment by Cash** screen to make utility bill payments by cash.

Utility bill payment can be performed for the institutions, which are already maintained in product processors.

To make bill payment by cash:

1. On the Homepage, from **Teller** mega menu, under **Bill Payments**, click **Bill Payment by Cash** or specify **Bill Payment by Cash** in the search icon bar and select the screen.
The **Bill Payment by Cash** screen is displayed.

Figure 13-1 Bill Payment by Cash

The screenshot displays the 'Bill Payment by Cash' interface. It features a grid of input fields for transaction details. On the left side, there are fields for 'Utility Provider ID' (with a search icon), 'Settlement Account', 'Account Description', 'Bill Number', 'Bill Amount', and 'Exchange Rate'. On the right side, there are fields for 'Utility Provider Name', 'Account Currency', 'Consumer Number', 'Bill Date' (with a calendar icon), 'Transaction Amount', and 'Narrative'. The 'Narrative' field is pre-filled with 'Bill Payment by Cash'. Below the main grid, there are expandable sections for 'Charge Details' and 'Denomination'. At the bottom right, there are three buttons: 'Submit', 'Clear', and 'Cancel'.

2. On the **Bill Payment by Cash** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 13-1 Bill Payment by Cash - Field Description

Field	Description
Utility Provider ID	Click the search icon, and select the utility provider ID from the list of values.
Settlement Account	Displays the account number of the specified utility provider ID.
Account Currency	Displays the account currency of the settlement account.
Account Description	Displays the account description of the settlement account.
Utility Provider Name	Displays the name of the specified utility provider ID.
Consumer Number	Specify the consumer number.
Bill Number	Specify the bill number.
Bill Date	Specify the bill date.
Bill Amount	Select the currency from the drop-down values, and specify the bill amount that needs to be paid.
Transaction Amount	Select the transaction currency from the drop-down values. The transaction amount is displayed based on the exchange rate.
Exchange Rate	Displays the exchange rate.  Note: If the bill currency is the same as the Transaction currency, the system displays the exchange rate as 1. This field is displayed only if <i>Multi-Currency Configuration</i> at the Function Code indicator level is set as <i>Y</i> .
Narrative	Displays the narrative as Bill Payment By Cash , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Specify the denomination details. For information on the fields in the **Denomination** segment, refer to [Add Denomination Details](#).
5. Click **Submit**.

A teller sequence number is generated, and the *Transaction Completed Successfully* information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the main leg accounting (Dr Cash GL and Cr Institution ID account GL) and charge accounting details are handed off to the Accounting System.

13.2 Bill Payments by Other Modes

The bill payment transactions are used to make payments for various utility bills. Utility bill payments can be performed for the Institutions, which are already maintained in product processors. The bill payment can be made by account and clearing cheque.

This topic contains the following subtopics:

- [Bill Payment by Account](#)
The Teller can use the **Bill Payment by Account** screen to make utility bill payments against an account.
- [Bill Payment by Clearing Cheque](#)
The Teller can use the **Bill Payment** screen to make utility bill payment by clearing cheque.

13.2.1 Bill Payment by Account

The Teller can use the **Bill Payment by Account** screen to make utility bill payments against an account.

Utility bill payment can be performed for the institutions, which are already maintained in product processors.

To make utility bill payment by account:

1. On the Homepage, from **Teller** mega menu, under **Bill Payments**, click **Bill Payment by Other Modes** or specify **Bill Payment by Account** in the search icon bar and select the screen.

The **Bill Payment by Account** screen is displayed.

 **Note:**

By default, the system displays the **Bill Payment by Account** screen.

Figure 13-2 Bill Payment by Account

2. On the **Bill Payment by Account** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 13-2 Bill Payment by Account - Field Description

Field	Description
Payment Mode	Select the payment mode type from the drop-down list. The values are: <ul style="list-style-type: none"> • Account • Clearing Cheque
Utility Provider ID	Click the search icon, and select the utility provider ID from the list of values.
Utility Provider Name	Displays the name of the specified utility provider ID.
Settlement Account	Displays the account number of the specified utility provider ID.
Account Currency	Displays the account currency of the settlement account.
Account Description	Displays the account description of the settlement account.
Consumer Number	Specify the consumer number.
Bill Number	Specify the bill number.
Bill Date	Specify the bill date.
Bill Amount	Select the currency from the drop-down values, and specify the bill amount that needs to be paid.
Account Number	Specify the account number against which the bill payment needs to be done.
Account Name	Displays the name of the specified account number.

Table 13-2 (Cont.) Bill Payment by Account - Field Description

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the Transaction Completed Successfully information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the main leg accounting (Dr Cash GL and Cr Institution ID account GL) and charge accounting details are handed off to the Accounting System.

14

Session Teller Transactions

The Teller can use the screens under the **Teller Session** menu to perform financial transactions for customer accounts in a teller session.

The cash transactions can be performed only when the teller session is started, refer to [Start Teller Session](#) to start a teller session. The Teller can enter the denomination details for a teller session in the [Stop Teller Session](#) screen. Denomination tracking must be enabled for this functionality.

This topic contains the following subtopics:

- [Cash Deposit](#)
The **Cash Deposit** screen is used to deposit the cash in a CASA through a Teller Session.
- [Cash Withdrawal](#)
The **Cash Withdrawal** screen is used to withdraw funds from the CASA account of the customer.
- [FX Sale Against Walk-in](#)
The **FX Sale Against Walk-in** screen is used to sell a foreign currency to a walk-in customer in return for the equivalent amount received in another currency.
- [FX Purchase Against Walk-in](#)
The **FX Purchase Against Walk-in** screen is used to buy foreign currency from walk-in customers.
- [Loan Repayment by Cash](#)
The Teller can use the **Loan Repayment by Cash** screen to accept cash from a walk-in customer to repay the loan amount.

14.1 Cash Deposit

The **Cash Deposit** screen is used to deposit the cash in a CASA through a Teller Session.

Cash can be deposited in either account currency or any foreign currency that is allowed. Whenever any transaction in foreign currency is posted to the account, it is converted to the account currency based on the maintained exchange rate for the transaction.

To deposit the cash through a Teller Session:

1. On the Homepage, click **Teller**. On the Teller Mega Menu, under **Session Teller Transactions**, click **Cash Deposit** or specify the **Cash Deposit** in the search icon bar and select the screen.

The **Cash Deposit** screen is displayed.

Figure 14-1 Cash Deposit

The screenshot shows a 'Cash Deposit' form with the following fields and controls:

- Account Number ***: A text input field.
- Transaction Amount ***: A dropdown menu followed by a text input field.
- Exchange Rate**: A text input field with up and down arrow buttons.
- Account Amount**: A text input field.
- Total Charge Amount**: A text input field.
- Narrative ***: A text area containing the text 'Cash Deposit'.
- Charge Details**: A section header with a right-pointing triangle icon.
- Buttons**: 'Submit', 'Clear', and 'Cancel' buttons at the bottom right.

2. On the **Cash Deposit** screen, specify the fields. For more information on fields, refer to [Table 4-1](#).

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**. For more information on transaction submission and validations, refer to [Step 5 in Cash Deposit](#).

The `Transaction Completed Successfully` information message is displayed.

14.2 Cash Withdrawal

The **Cash Withdrawal** screen is used to withdraw funds from the CASA account of the customer.

The withdrawal is subject to the availability of a sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To withdraw the cash through a Teller Session:

1. On the Homepage, click **Teller**. On the Teller Mega Menu, under **Session Teller Transactions**, click **Cash Withdrawal** or specify the **Cash Withdrawal** in the search icon bar and select the screen.

The **Cash Withdrawal** screen is displayed.

Figure 14-2 Cash Withdrawal

The screenshot shows the 'Cash Withdrawal' screen with the following fields and controls:

- Account Number ***: A text input field.
- Transaction Amount ***: A dropdown menu and a text input field.
- Exchange Rate**: A dropdown menu with up and down arrows.
- Account Amount**: A text input field.
- Total Charge Amount**: A text input field.
- Narrative ***: A text area containing the text 'Cash Withdrawal'.
- Charge Details**: A section header with a right-pointing arrow.
- Submit**, **Clear**, and **Cancel**: Three buttons at the bottom right.

2. On the **Cash Withdrawal** screen, specify the fields. For more information on fields, refer to [Table 4-3](#).

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves.

On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to [Step 5](#) in [Cash Deposit](#).

14.3 FX Sale Against Walk-in

The **FX Sale Against Walk-in** screen is used to sell a foreign currency to a walk-in customer in return for the equivalent amount received in another currency.

To sell a foreign currency to a walk-in customer:

1. On the Homepage, click **Teller**. On the Teller Mega Menu, under **Session Teller Transactions**, click **FX Sale - Walk-in** or specify the **FX Sale - Walk-in** in the search icon bar and select the screen.

The **FX Sale Against Walk-in** screen is displayed.

Figure 14-3 FX Sale Against Walk-in

The screenshot displays the 'FX Sale Against Walk-in' form with the following fields and controls:

- Amount Sold ***: A dropdown menu and a text input field.
- Beneficiary Name ***: A text input field.
- Beneficiary Address2**: A text input field.
- Beneficiary Address4**: A text input field.
- Identification Number**: A text input field.
- Amount Received**: A text input field.
- Narrative ***: A text area containing the text 'FX Sale Against Walk-in'.
- Currency Received ***: A search-enabled dropdown menu.
- Beneficiary Address1**: A text input field.
- Beneficiary Address3**: A text input field.
- Identification Type**: A dropdown menu.
- Exchange Rate**: A numeric input field with up and down arrow controls.
- Total Charge Amount**: A text input field.

At the bottom of the form, there is a 'Charge Details' section with a right-pointing arrow. Below the form are three buttons: 'Submit', 'Clear', and 'Cancel'.

2. On the **FX Sale Against Walk-in** screen, specify the fields. For more information on fields, refer to [Table 4-6](#).

Note:

The fields, which are marked with an asterisk, are mandatory.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).

4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves.

On transaction completion, the teller cash position to the equivalent of Sold currency is deducted, and Received currency is incremented. For more information on transaction submission and validations, refer to *Step 5* in [Cash Deposit](#).

14.4 FX Purchase Against Walk-in

The **FX Purchase Against Walk-in** screen is used to buy foreign currency from walk-in customers.

To buy foreign currency from a walk-in customer:

1. On the Homepage, click **Teller**. On the Teller Mega Menu, under **Session Teller Transactions**, click **FX Purchase Against Walk-in** or specify the **FX Purchase Against Walk-in** in the search icon bar and select the screen.

The **FX Purchase Against Walk-in** screen is displayed.

Figure 14-4 FX Purchase Against Walk-in

2. On the **FX Purchase Against Walk-in** screen, specify the fields. For more information on fields, refer to [Table 4-8](#).

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves.

On transaction completion, the teller cash position is updated based on the currency of the **Amount Bought** and the **Amount Paid** fields. For more information on transaction submission and validations, refer to [Step 5 in Cash Deposit](#).

14.5 Loan Repayment by Cash

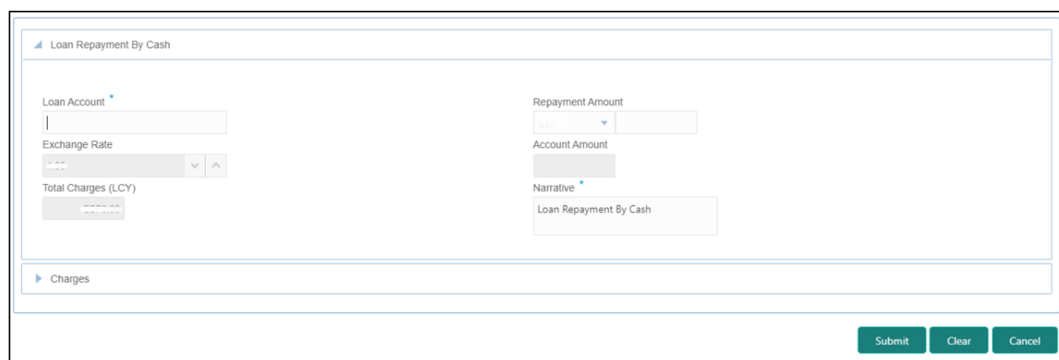

The Teller can use the **Loan Repayment by Cash** screen to accept cash from a walk-in customer to repay the loan amount.

To make loan repayment by cash:

1. On the Homepage, click **Teller**. On the Teller Mega Menu, under **Session Teller Transactions**, click **Loan Repayment by Cash** or specify the **Loan Repayment by Cash** in the search icon bar and select the screen.

The **Loan Repayment by Cash** screen is displayed.

Figure 14-5 Loan Repayment by Cash

2. On the **Loan Repayment by Cash** screen, specify the fields. For more information on fields, refer to [Table 11-2](#).

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

A teller sequence number is generated, and the `Transaction Completed Successfully` information message is displayed.

 **Note:**

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the loan amount is repaid successfully.

15

Journal Log

The Teller or Supervisor can use screens under the **Journal Log** menu to view the status of transactions performed by them. It is also used to resubmit or reject an incomplete transaction or reverse a completed transaction.

This topic contains the following subtopics:

- [About Electronic and Servicing Journals](#)
In the **Electronic Journal** and **Servicing Journal** screens, Tellers can view the status of the transactions performed only by them and Supervisors can view the status of the transactions performed by them and other Tellers.
- [Electronic Journal](#)
Tellers and Supervisors can use the **Electronic Journal** screen to view the status of the cash transactions performed by them on the posting date.
- [Servicing Journal](#)
Tellers and Supervisors can use this screen to view the status of the non-cash transactions performed by them on the posting date.
- [Reassign Transactions](#)
Tellers and Supervisors can use the **Reassign Transactions** screen to re-assign the transactions that are pending approval to the other Supervisor or to unlock a locked transaction.

15.1 About Electronic and Servicing Journals

In the **Electronic Journal** and **Servicing Journal** screens, Tellers can view the status of the transactions performed only by them and Supervisors can view the status of the transactions performed by them and other Tellers.

Common Operations

These screens are used to perform the following operations:

Table 15-1 Operations in Journal Log

Operation	Description
View Status	View the status of all transactions performed by the logged-in Teller ID.
Reverse Completed Transactions	Reverse the completed transaction posted by Teller during the day.
Re-submit Incomplete Transactions	Re-submit the incomplete transactions performed by the logged-in Teller ID, that are either: <ul style="list-style-type: none">• Approved by the supervisor and moved to Teller EJ log for re-submission.• Processed by an external system (for example, Oracle Banking Payments) and responded to Teller with the status as Success.

Table 15-1 (Cont.) Operations in Journal Log

Operation	Description
Reject Incomplete Transactions	Reject the incomplete transactions that are either: <ul style="list-style-type: none"> Rejected by an external system (for example, Oracle Banking Payments) with the status as Reject. Prompted with error due to processing validations.
View Approval History	View the approval history to see the list of all transactions that are either approved or rejected by the logged-in approver ID.
Approve or Reject Transactions	Approve or Reject the transactions that are assigned to the logged-in Approver ID during the day.
Discard of Reversal Transactions	When the approver rejects the reversal request, the transaction is marked as rejected and the teller discards the rejected status, the transaction is moved to the discarded transaction.

In the tile and grid views, the transactions are displayed for all statuses by default. The status can be changed using the filters option. If the user closes the screen with a status other than All, the selected status will default until the browser tab is closed. The following conditions apply for the default status:

Table 15-2 Conditions for Default Status

Condition	Description
The browser tab is not closed	The transactions will be displayed for the previously selected status if the screen is launched again.
The browser tab is closed and the user logs in to the application in a new tab or window	The transactions will be displayed for all statuses if the screen is launched.

Common Icons, Actions, and Shortcut Keys

Users can perform one of the following actions on the **Electronic Journal** and **Servicing Journal** screens:

Table 15-3 Symbols

Icon	Description
	Click on this icon to display the details in the tile view.
	Click on this icon to display the details in the grid view.

After filling the necessary fields in the **Electronic Journal** and **Servicing Journal** screens, you can do one of the following steps:

Table 15-4 Basic Actions

Action	Description
Fetch	Click Fetch to get the list of transactions based on the query criteria specified. When you click Fetch , the following details are displayed for each transaction: <ul style="list-style-type: none"> • Function Code and Screen Name • Transaction Reference Number • Teller Sequence Number • Transaction Amount • Account Number • Teller ID • Teller Remarks
Clear	Click Clear to clear the specified values.

Users can also navigate to necessary the transaction; perform the operations using the shortcut keys as follows:

1. Press the **Tab** key, and navigate to the list of transactions in grid view.
2. Use **Up/Down** arrow keys to select the necessary transaction.
3. Use **Left/Right** arrow keys to select the icon.
4. Press **Spacebar** to view the operations applicable to the selected transaction.
5. Use **Up/Down** arrow keys to select the necessary operation.

15.2 Electronic Journal

Tellers and Supervisors can use the **Electronic Journal** screen to view the status of the cash transactions performed by them on the posting date.

For information on the common operations and icons on this screen, refer to [About Electronic and Servicing Journals](#).

To view the status of the cash transactions:

1. On the Homepage, from **Teller** mega menu, under **Journal Log**, click **Electronic Journal** or specify **Electronic Journal** in the search icon bar and select the screen.

The **Electronic Journal** screen is displayed.

Figure 15-1 Electronic Journal (List View)

You can perform any of the following actions in this screen:

- Click  icon to view the transaction information. This screen provides the details of the transactions handed off to the external system.

The **Transaction Info** pop-up screen is displayed.

Account Number	<p>Specify the account number.</p> <p> Note: You can also click the search icon and select the Teller ID from the list of maintained account numbers.</p>
Teller Sequence Prefix	<p>Click the search icon and select from the list of values.</p>
Transaction Status	<p>Select the transaction status from the drop-down values.</p> <p> Note: By default, All status is selected.</p>
Transaction Reference	<p>Specify the transaction reference number.</p>
From Sequence Number	<p>Specify the start number of the sequence range.</p>
To Sequence Number	<p>Specify the end number of the sequence range.</p>
From Transaction Time	<p>Specify the transaction start time.</p>
To Transaction Time	<p>Specify the transaction end time.</p>
From Amount Range	<p>Specify the “from” amount of the amount range.</p>
To Amount Range	<p>Specify the “to” amount of the amount range.</p>
Transaction Currency	<p>Click the search icon and select the transaction currency from the list of values.</p>

15.4 Reassign Transactions

Tellers and Supervisors can use the **Reassign Transactions** screen to re-assign the transactions that are pending approval to the other Supervisor or to unlock a locked transaction.

To reassign the Supervisor ID:

1. On the Homepage, from **Teller** mega menu, under **Journal Log**, click **Reassign Transactions** or specify **Reassign Transactions** in the search icon bar and select the screen.

The **Reassign Transactions** screen is displayed.

Figure 15-9 Reassign Transactions

2. On the **Reassign Transactions** screen, specify the details fetch the records. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 15-7 Reassign Transactions - Field Description

Field	Description
Branch Posting Date	Specify the branch posting date for which the inquiry is to be made.  Note: By default, the current posting date is displayed.
Teller ID	Select the Teller ID from the list of values.

Table 15-7 (Cont.) Reassign Transactions - Field Description

Field	Description
Function Code	Specify the function code for which the inquiry is to be made.  Note: You can also click the search icon and select from the list of the maintained function codes.
Account Number	Specify the account number.  Note: The LOV fetches a list of the maintained account numbers.
Teller Sequence Prefix	Select from the list of values.
From Sequence Number	Specify the start number of the sequence range.
To Sequence Number	Specify the end number of the sequence range.
From Transaction Time	Specify the transaction start time.
To Transaction Time	Specify the transaction end time.
From Amount Range	Specify the “from” amount of the amount range.
To Amount Range	Specify the “to” amount of the amount range.
Journal Log Type	Select the type from the drop-down values (Electronic Journal or Servicing Journal).

- After you specify the necessary fields, you can perform one of the following actions:

Table 15-8 Basic Actions

Action	Description
Fetch	Click Fetch to get the list of transactions based on the query criteria specified. When you click Fetch , the following details are displayed for each transaction: <ul style="list-style-type: none"> Function Code and Screen Name Transaction Reference Number Teller Sequence Number Transaction Amount Account Number Teller ID Supervisor ID Teller Remarks Supervisor Remarks
Clear	Click Clear to clear the transaction list.

The transactions fetched based on the search criteria are displayed in Tile View. In the Tile View, you can click the necessary icons to perform the operations.

17

Cache

The screen under the **Cache** menu is used to get the maintenance reflected while performing the transactions.

This topic contains the following subtopics:

- [Clear Cache](#)
The **Clear Cache** screen is used to clear the cache to get the maintenance reflected while performing the transactions.

17.1 Clear Cache

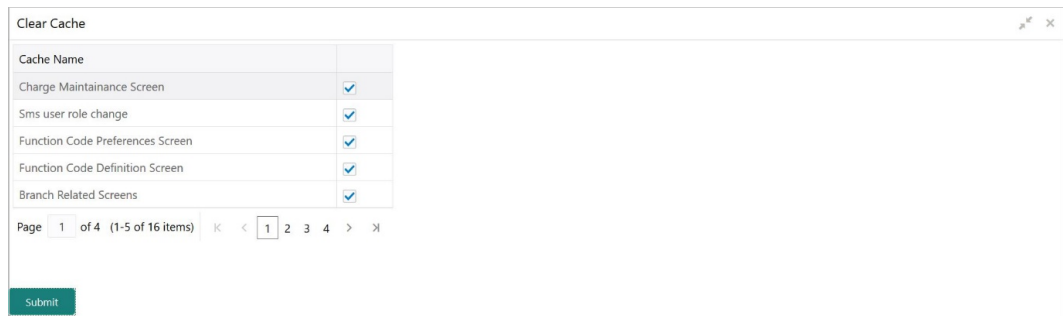

The **Clear Cache** screen is used to clear the cache to get the maintenance reflected while performing the transactions.

To clear the cache:

1. On the Homepage, from **Teller** mega menu, under **Cache**, click **Clear Cache** or specify **Clear Cache** in the search icon bar and select the screen.

The **Clear Cache** screen is displayed.

Figure 17-1 Clear Cache

The screenshot shows a web application window titled "Clear Cache". It contains a table with the following data:

Cache Name	
Charge Maintenance Screen	<input checked="" type="checkbox"/>
Sms user role change	<input checked="" type="checkbox"/>
Function Code Preferences Screen	<input checked="" type="checkbox"/>
Function Code Definition Screen	<input checked="" type="checkbox"/>
Branch Related Screens	<input checked="" type="checkbox"/>

Below the table is a pagination control: "Page 1 of 4 (1-5 of 16 items)" with navigation arrows and page numbers 1, 2, 3, 4. At the bottom left is a green "Submit" button.

2. Click the checkboxes to select the desired **Cache Name**.
3. Click **Submit** to clear the selected cache.
4. Click **OK** to close the screen.

18

Customer Service

The screens under the **Customer Service** menu are used for customer services and inquiries.

This topic contains the following subtopics:

- [Cheque Status Inquiry](#)
The Teller can use the **Cheque Status Inquiry** screen to query the details of a cheque by specifying the account number and cheque number of the customer.
- [Stop Cheque Request](#)
The Teller can use the **Stop Cheque Request** screen to initiate stop payment of cheque as requested by the customer.
- [Cheque Book Request](#)
The **Cheque Book Request** screen is used to initiate the cheque book request for a customer account.
- [Passbook Issue](#)
The Teller can use the **Passbook Issue** screen to issue a new passbook for a customer account.
- [Passbook Update](#)
The Teller can use the **Passbook Update** screen to update the passbook of a customer account.
- [Passbook Status Change](#)
The Teller can use the **Passbook Status Change** screen to initiate the status change for a passbook of a customer account.
- [Passbook Reprint](#)
The Teller can use the **Passbook Reprint** screen to reprint the passbook of a customer account.
- [Account Balance Inquiry](#)
The Teller can use the **Account Balance Inquiry** screen to inquire about the account balance details of a customer account.
- [Account Statement Request](#)
The Teller can use the **Account Statement Request** screen to initiate an account statement request for a customer account.
- [Customer Address Update](#)
The Teller can use the **Customer Address Update** screen to initiate a service request to update the customer address details.
- [Account Address Update](#)
The Teller can use the **Account Address Update** screen to initiate a service request to update the address details of the customer account.
- [Customer Contact Update](#)
The **Customer Contact Update** screen is used to initiate a service request to update the customer contact details.

- [Cheque Book Status Change](#)
The **Cheque Book Status Change** screen is used to change the status of a cheque book.

18.1 Cheque Status Inquiry

The Teller can use the **Cheque Status Inquiry** screen to query the details of a cheque by specifying the account number and cheque number of the customer.

To query the details of a cheque:

1. On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Cheque Status Inquiry** or specify **Cheque Status Inquiry** in the search icon bar and select the screen.

The **Cheque Status Inquiry** screen is displayed.

Figure 18-1 Cheque Status Inquiry

2. On the **Cheque Status Inquiry** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 18-1 Cheque Status Inquiry - Field Description

Field	Description
Account Number	Specify the account number for which the cheque status needs to be enquired.
Cheque Number	Specify the cheque number.

Table 18-1 (Cont.) Cheque Status Inquiry - Field Description

Field	Description
Query	Click Query to fetch the details of the cheque.
Clear	Click Clear to clear the details.
Account Name	Displays the name of the account holder.
Account Branch	Displays the account branch code.
Customer ID	Displays the customer ID of the account.
Cheque Status	Displays the status of the cheque (Used, Unused, or Stopped).
Value Date	Displays the date specified on the cheque.
Cheque Amount	Displays the cheque amount.
Beneficiary	Displays the name of the beneficiary.

18.2 Stop Cheque Request

The Teller can use the **Stop Cheque Request** screen to initiate stop payment of cheque as requested by the customer.

A stop payment request is an instruction given by a customer to the bank directing it to stop payment against a Cheque. This instruction can be based on a single cheque or a range of cheque numbers.

To initiate stop payment of cheque:

1. On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Stop Cheque Request** or specify **Stop Cheque Request** in the search icon bar and select the screen.

The **Stop Cheque Request** screen is displayed.

Figure 18-2 Stop Cheque Request

- On the **Stop Cheque Request** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 18-2 Stop Cheque Request - Field Description

Field	Description
Account Number	Specify the account number for which you need to enforce a stop payment.
Cheque Number	Specify the cheque number on which the stop payment is to be enforced.
Select Multiple Cheques	Select this option to enforce stop payment on multiple cheques of the customer account.
Cheque Amount	Specify the cheque amount for which the cheque is drawn. The cheque currency is defaulted to account currency.
Effective Date	Specify the date on which the cheque is drawn.
Expiry Date	Specify the expiry date of the cheque.
Reason Type	Specify the type of stop payment (Stop or Lost).
Total Charge Amount	Displays the total charge amount, which is computed by the system in the local currency of the branch. <div data-bbox="743 1129 873 1169" data-label="Section-Header"> <p> Note:</p> </div> <div data-bbox="789 1188 1305 1281" data-label="Text"> <p>This field is displayed only if Multi-Currency Configuration at the Function Code Indicator level is set as Y.</p> </div>
Narrative	The system displays the default narrative as Stop Cheque Request , and it can be modified. You can specify the reason/purpose for which the stop payment is issued.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
- Click **Submit**.

The request is handed off to the core FLEXCUBE Universal Banking system to update the stop payment status in Customer Accounts Maintenance to indicate the presence of a stop payment instruction for the customer account.

18.3 Cheque Book Request

The **Cheque Book Request** screen is used to initiate the cheque book request for a customer account.

To initiate the cheque book request:

1. On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Cheque Book Request** or specify **Cheque Book Request** in the search icon bar and select the screen.

The **Cheque Book Request** screen is displayed.

Figure 18-3 Cheque Book Request

2. On the **Cheque Book Request** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 18-3 Cheque Book Request - Field Description

Field	Description
Account Number	Specify the account number for which the cheque book request is to be initiated.
Cheque Book Type	Click the search icon, and select the checkbook type from the list of values.
Number of Leaves	Select the number of leaves from the following drop-down values: <ul style="list-style-type: none"> • 10 • 25 • 50 • 100
First Cheque Number	Specify the number of the first cheque.
Request Date	By default, the current posting date is displayed as the request date.

Table 18-3 (Cont.) Cheque Book Request - Field Description

Field	Description
Request Status	Select the request status from the drop-down values (Requested or Delivered).
Deliver To	Specify the mode of delivery (Branch or Post).
Address Line 1 to Address Line 4	Specify the address of the Customer if the delivery mode is selected as Post . <div style="border: 1px solid #0070C0; background-color: #E6F2FF; padding: 10px; margin-top: 10px;"> <p> Note: By default, the address of the customer account is displayed, and it can be modified.</p> </div>
Narrative	Displays the default narrative as Cheque Book Request , and it can be modified.

3. Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).
4. Click **Submit**.

The request is handed off to the core FLEXCUBE Universal Banking system for the cheque book issuance of the customer account.

18.4 Passbook Issue

The Teller can use the **Passbook Issue** screen to issue a new passbook for a customer account.

To issue a new passbook:

1. On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Passbook Issue** or specify **Passbook Issue** in the search icon bar and select the screen.

The **Passbook Issue** screen is displayed.

Figure 18-4 Passbook Issue

2. On the **Passbook Issue** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 18-4 Passbook Issue - Field Description

Field	Description
Account Number	Specify the account number for which the passbook needs to be issued.
Account Currency	Displays the currency of the specified account number.
Account Name	Displays the name of the specified account number.
Account Branch	Displays the branch code of the specified account number.
Account Open Date	Displays the account opening date.
Customer ID	Displays the customer ID.
Address Line 1 to Address Line 4	Specify the address of the customer.

Table 18-4 (Cont.) Passbook Issue - Field Description

Field	Description
Passbook Number	Displays the passbook number that needs to be issued.  Note: The passbook number is generated based on the instrument number maintenance.
Passbook Status	By default, the passbook status is displayed as Issued .
Total Charge Amount	Displays the total charge amount, which is computed by the system in the local currency of the branch.  Note: This field is displayed only if Multi-Currency Configuration at Function Code Indicator level is set as Y.
Passbook Category	Click the search icon, and select the passbook category from the list of values.
Narrative	Displays the default narrative as Passbook Issue , and it can be modified.
Old Passbook Details	Specify the fields.
Passbook Number	Displays the old passbook number that is issued to the customer account.
Issue Date	Displays the issue date of the old passbook.
Status Movement	Displays the current status of the passbook.
Status Change Date	Displays the date on which the current status got modified.

- Specify the charge details. For information on the fields in the **Charge Details** segment, refer to [Add Charge Details](#).

- Click **Submit**.

The passbook issue request is handed off to the FLEXCUBE Universal Banking system to update the passbook issue request for the customer account.

18.5 Passbook Update

The Teller can use the **Passbook Update** screen to update the passbook of a customer account.

To update the passbook:

- On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Passbook Update** or specify **Passbook Update** in the search icon bar and select the screen.

The **Passbook Update** screen is displayed.

Figure 18-5 Passbook Update

- On the **Passbook Update** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 18-5 Passbook Update - Field Description

Field	Description
Account Number	Specify the account number for which the passbook needs to be updated.
Account Branch	Displays the branch code of the specified account number.
Account Name	Displays the name of the specified account number.
Passbook Number	Displays the passbook number that needs to be updated.
Start Line	Specify the start line of the passbook to enter the transaction details.
Previous Balance	Displays the previous balance in the passbook.
Compression Required	Check this box to modify the defaulted values related to transaction compression.
Compression Start Date	Displays the compression start date.
Compression End Date	Displays the compression end date.

- Click **Submit**.

The request is handed off to the core FLEXCUBE Universal Banking system to fetch and update the passbook statement of the customer account.

18.6 Passbook Status Change

The Teller can use the **Passbook Status Change** screen to initiate the status change for a passbook of a customer account.

To initiate the status change of a passbook:

1. On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Passbook Status Change** or specify **Passbook Status Change** in the search icon bar and select the screen.

The **Passbook Status Change** screen is displayed.

Figure 18-6 Passbook Status Change

2. On the **Passbook Status Change** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Narrative	Displays the default narrative as Account Address Update , and it can be modified.
Review and Submit	Click Review and Submit to review the request details and submit.

3. Click **Submit**.

The request details are handed off to the FLEXCUBE Universal Banking system for the account address update.

18.12 Customer Contact Update

The **Customer Contact Update** screen is used to initiate a service request to update the customer contact details.

To update the customer contact details:

1. On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Cust Contact No Update** or specify **Cust Contact No Update** in the search icon bar and select the screen.

The **Customer Contact Update** screen is displayed.

Figure 18-14 Customer Contact Update

2. On the **Customer Contact Update** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 18-14 Customer Contact Update - Field Description

Field	Description
Customer Number	Specify the customer number for which the contact details need to be updated.
Customer Name	Displays the customer name for the customer number specified.
Customer Details	Specify the fields.
Mobile Phone	Displays the mobile number, and it can be modified.
Work Phone	Displays the work phone number, and it can be modified.
Residential Phone	Displays the residential phone number, and it can be modified.
Fax Phone	Displays the fax phone number, and it can be modified.

Table 18-14 (Cont.) Customer Contact Update - Field Description

Field	Description
Preferred Contact Time	Displays the preferred contact time, and it can be modified.
Preferred Communication Mode	Displays the communication mode, and it can be modified.
Email Address	Displays the email id of the customer, and it can be modified.
Alternate Email Address	Displays the alternate email id of the customer, and it can be modified.
Narrative	Displays the default narrative as Contact Details Update , and it can be modified.
Review and Submit	Click Review and Submit to review the request details and submit.

3. Click **Submit**.

The request details are handed off to the FLEXCUBE Universal Banking system for updating customer contact details.

18.13 Cheque Book Status Change

The **Cheque Book Status Change** screen is used to change the status of a cheque book.

To change the cheque book status:

1. On the Homepage, from **Teller** mega menu, under **Customer Service**, click **Cheque Book Status Change** or specify **Cheque Book Status Change** in the search icon bar and select the screen.

The **Cheque Book Status Change** screen is displayed.

Figure 18-15 Cheque Book Status Change

2. On the **Cheque Book Status Change** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 18-15 Cheque Book Status Change - Field Description

Field	Description
Account Number	Specify the account number for which the cheque book status needs to be changed.
First Cheque Number	Specify the number of the first cheque.
Request Status	Select the status that needs to be updated for the cheque book. The drop-down values are as follows: <ul style="list-style-type: none">• Delivered• Requested• Destroyed
Narrative	Displays the default narrative as Cheque Book Status Change , and it can be modified.

3. Click **Submit**.

The request is handed off to the core FLEXCUBE Universal Banking system to change the status of the cheque book.

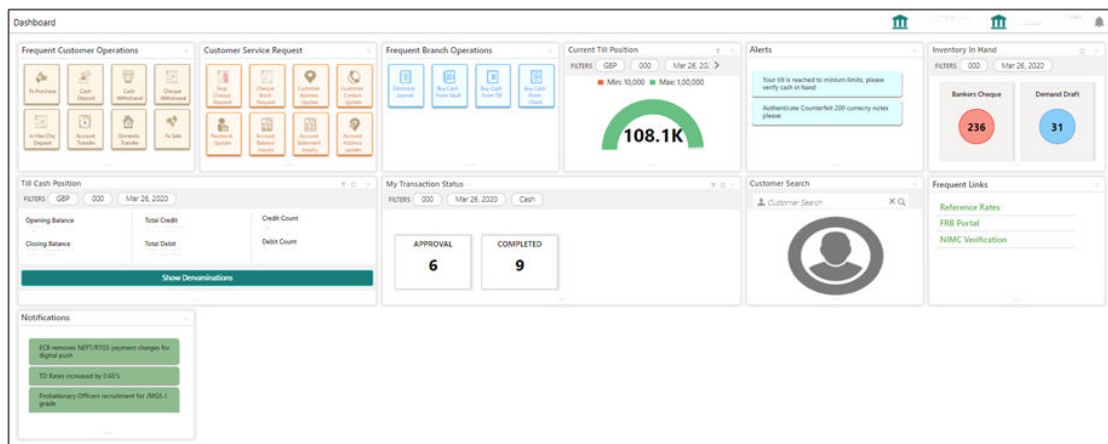

19

Branch Dashboard

The Branch Dashboard facilitates the integration of data from multiple screens and displays it as a dashboard on the application landing page.

It provides a comprehensive and consolidated snapshot in tiny windows to access information quickly. Thus, helping the bank staff to analyze, monitor, and make better decisions, which in turn helps to save time and cost. To access the Branch Dashboard, select **Dashboard** from the main menu.

Figure 19-1 Dashboard

The Branch Dashboard is designed to display the widgets distributed in rows without the vertical scroll bar. The widgets are as follows:

- [Till Cash Position](#)
- [Inventory in Hand](#)
- [My Transaction Status](#)
- [Customer Search](#)
- [Current Till Position](#)
- [Frequent Customer Operations](#)
- [Frequent Branch Operations](#)
- [Customer Service Request](#)
- [Notifications](#)
- [Alerts](#)
- [Frequent Links](#)

Till Cash Position

This widget displays the currency-wise cash position of the Teller Id, which includes **Opening Balance**, **Total Debit**, and **Total Credit**, which happened for the day, and the Closing Balance. In addition, the system displays the denomination-wise count for the closing balance amount. The **FILTERS** option can be used to display Till cash position based on the currency, branch code, and date.

Figure 19-2 Till Cash Position

Inventory in Hand

This widget displays the list of inventory counts available with the branch for the logged-in Teller Id.

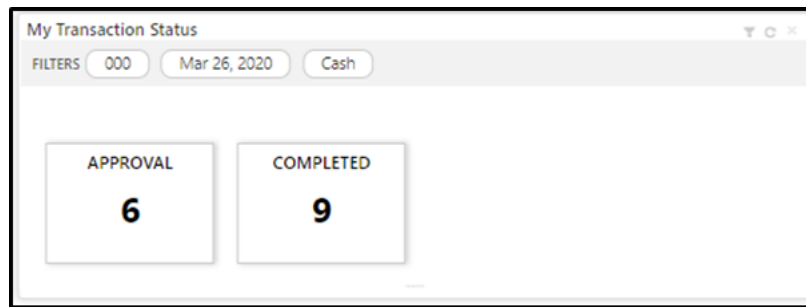

Figure 19-3 Inventory in Hand

My Transaction Status

This widget displays the total transaction count performed by the logged-in Teller. Each slice represents the status-wise count of the transactions performed by the Teller.

The **FILTERS** option can be used to display transaction status based on the branch code, branch date, and transaction type (Cash/Non-Cash).

Figure 19-4 My Transaction Status**Customer Search**

The Teller can use this widget to query and find a specific customer account. For more information on this segment, refer to [Customer Search](#).

Figure 19-5 Customer Search**Current Till Position**

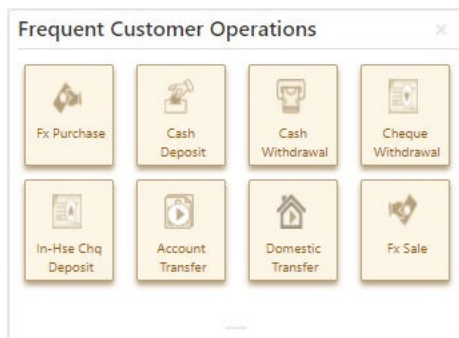

This widget displays the Till amount available for the logged-in Teller ID. The **FILTERS** option can be used to display the current Till amount based on the currency, branch code, and date. The minimum and maximum values are fetched from the user preferences.

Figure 19-6 Current Till Position

Frequent Customer Operations

The Teller can use this widget to launch one of the frequently used **Customer Transactions** screens from the landing page. This option is easy to access instead of using **Menu Item Search** or navigating through the menu to process transactions.

Figure 19-7 Frequent Customer Operations

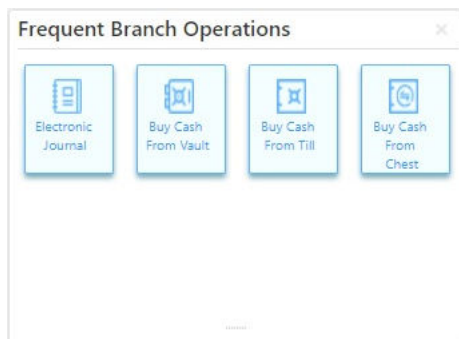

Note:

The system displays an error message stating that the User does not have rights to access this screen if the user is trying to access the restricted screen in the widget.

Frequent Branch Operations

The Teller can use this widget to launch one of the frequently used **Branch Operations** screens from the landing page. This option is easy to access instead of using **Menu Item Search** or navigating through Menu to process transactions.

Figure 19-8 Frequent Branch Operations

 **Note:**

The system displays an error message stating that the User does not have rights to access this screen if the user is trying to access the restricted screen in the widget.

Customer Service Request

The Teller can use this widget to launch one of the frequently used **Customer Service** screens from the landing page. This option is easy to access instead of using **Menu Item Search** or navigating through Menu to process transactions.

Figure 19-9 Customer Service Request

 **Note:**

The system displays an error message stating that the User does not have rights to access this screen if the user is trying to access the restricted screen in the widget.

Notifications

The Teller can use this widget to view the bank-specific notifications or instructions provided for the bank staff. Generation of the notifications to be configured at the back-end.

Figure 19-10 Notifications

Alerts

The Teller is alerted through this widget on the user-specific information based on which the Teller has to act accordingly. Generation of the alerts to be configured at the back-end.

Figure 19-11 Alerts

Frequent Links

The Teller can use this widget to access the frequently used links to refer for transaction submission and other operational activities during the day.

Figure 19-12 Frequent Links

Branch Maintenance

The branch maintenance screens are used to perform the maintenance for processing the branch transactions.

This topic contains the following subtopics:

- [Common Actions for Branch Maintenance](#)
The screens under the **Branch Maintenance** menu contain common icons to perform all or a few of the basic actions.
- [Maintain Teller Branch Parameters](#)
The **Teller Branch Parameters Maintenance** screen is used to set the teller preferences for a branch.
- [Maintain Branch Role Limits](#)
The **Branch Role Limits** screen is used to set the input and authorization limits for a specific role.
- [Maintain Branch User Preferences](#)
The **Branch User Limits** screen is used to set preferences like Till/Vault Indicator, currency holding preferences, and currency limit preferences for the branch user.
- [Maintain Denominations](#)
The **Denominations Maintenance** screen is used to maintain the standard currency denominations for each currency that the bank deals with.
- [Maintain Function Code Definitions](#)
The **Function Code Definition** screen is used to specify the preferences for the function code.
- [Maintain Function Code Preferences](#)
The **Function Code Preferences** screen is used to define the workflow preferences (validation preferences and authorization preferences) for a function code.
- [Maintain Default Authorizer](#)
The **Default Authorizer** screen is used to define the default authorizer who can authorize a specific function code for a branch user.
- [Maintain Accounting and Settlements](#)
The **Settlements Definition** screen is used to define the settlement and accounting parameters that are applicable for processing the branch transactions involving a function code.
- [Maintain Instrument Numbers](#)
The **Instrument Number Maintenance** screen is used to maintain the instrument type for each branch.
- [Maintain Inter Branch Transit Account](#)
The **Inter Branch Transit Account** screen is used to maintain inter-branch transit account for each branch using the receiving branch, vault, and currency combination.
- [Maintain External System](#)
The **External System Maintenance** screen is used to define the parameters for the external system.

- [Maintain Channel Limits](#)
The **Channel Limits** screen is used to maintain the channel limits for a particular customer group.
- [Maintain Account Group](#)
The **Account Group Maintenance** screen is used to create groups of the account codes, and these groups can be used for charge calculation.
- [Maintain Branch Group](#)
The **Branch Group Maintenance** screen is used to create groups of the branch codes, and these groups can be used for charge calculation.
- [Maintain Customer Group](#)
The **Customer Group Maintenance** screen is used to create groups of the customer codes, and these groups can be used for charge calculation.
- [Maintain Charge Definitions](#)
The **Charge Definition Maintenance** screen is used to maintain the charge definitions.
- [Create Charge Pricing Maintenance](#)
The **Create Charge Pricing Maintenance** screen is used to maintain the charge pricing.
- [View Charge Pricing Maintenance](#)
The **View Charge Pricing Maintenance** screen is used to view the summary and details of charge pricing IDs.
- [Maintain Charge Condition Group](#)
The **Charge Condition Group Maintenance** screen is used to create groups of the charge condition codes.
- [Maintain Charge Decisions](#)
The **Charge Decision Maintenance** screen is used to maintain the charge decisions.
- [Charge Decision Enquiry](#)
The **Charge Decision Enquiry** screen is used to inquire about the details of charge definition and charge pricing for the specified search criteria.
- [Maintain Reject Codes](#)
The **Reject Code Maintenance** screen is used to maintain the reject codes.
- [Maintain Clearing Network Codes](#)
The **Clearing Network** screen is used to maintain the clearing network codes.
- [Maintain Denomination Variations](#)
The **Denomination Variation Maintenance** screen is used to maintain the denomination-wise variations.
- [Maintain External Bank Codes](#)
The **External Bank Code** screen is used to maintain the bank codes and branch codes.
- [Maintain Issuer Codes](#)
The **Issuer Code Maintenance** screen is used to maintain the issuer codes for TC transactions.
- [Maintain Utility Providers](#)
The **Utility Provider Maintenance** screen is used to link the utility provider with a settlement account.

- **Maintain Account Entitlement Restriction**
This screen is used to maintain the Account Entitlement Group by grouping the set of Customer accounts. To process this screen, type **Account Entitlement Restriction** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

20.1 Common Actions for Branch Maintenance

The screens under the **Branch Maintenance** menu contain common icons to perform all or a few of the basic actions.

The following are the symbols/icons you are likely to find in the branch maintenance screens:

Table 20-1 Symbols

Icon	Description
	Click this icon to search the configured records based on the specified search criteria. The input fields to search the records are displayed based on the maintenance screen.
	Click this icon to reset the search results to the default summary view.

Table 20-2 Common Actions for Maintenance Screens

Icon	Description
Save	Click Save to view the configured details in the summary view.
Cancel	Click Cancel to terminate the operation.

On the records displayed in the summary view, you can perform one of the following actions:

Table 20-3 Common Actions for Records

Action	Description
New	Create a new record.
Unlock	Modify the details and save.
Delete	Delete an unauthorized record.
Authorize	Authorize the record.
Close	Close the record.
Reopen	Re-open a closed record.
Audit	Audit the record.

20.2 Maintain Teller Branch Parameters

The **Teller Branch Parameters Maintenance** screen is used to set the teller preferences for a branch.

To maintain teller branch parameters:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Teller Branch Parameters Maintenance** or specify **Teller Branch Parameters Maintenance** in the search icon bar and select the screen.

The **Teller Branch Parameters Maintenance** summary screen is displayed.

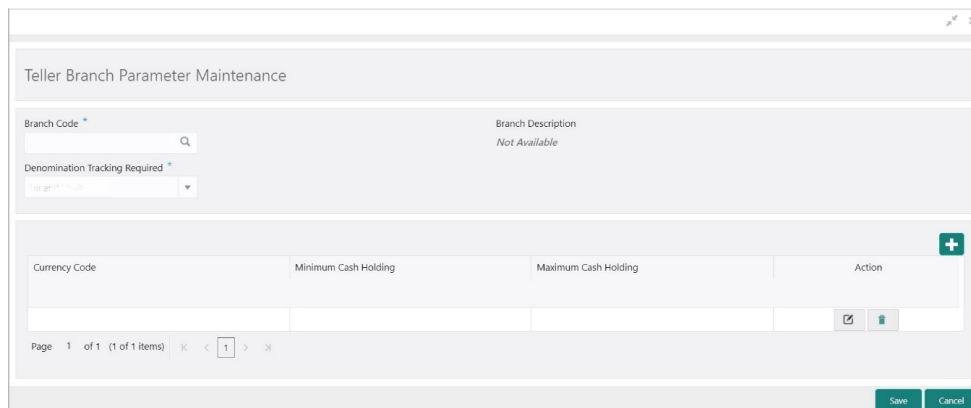

Figure 20-1 Teller Branch Parameters Maintenance (Summary)

2. Click the  icon.

The **Teller Branch Parameters Maintenance (New)** screen is displayed.

Figure 20-2 Teller Branch Parameters Maintenance (New)

3. On the **Teller Branch Parameters Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 20-4 Teller Branch Parameter Maintenance - Field Description

Field	Description
Branch Code	Select the branch code from the list of the available options.
Description	Displays the description of the branch.

Table 20-4 (Cont.) Teller Branch Parameter Maintenance - Field Description

Field	Description
Denomination Tracking Required	Specify the denomination that needs to be tracked for the Vault, Till and Vault, or None . The descriptions of the drop-down values are given below: <ul style="list-style-type: none"> • Till and Vault - To track denomination for Tills and Vault. By default, this option is selected. • Vault - To track denomination only for Vault, if a Vault is involved in the transaction. • None - To indicate that denomination tracking is not required for any transaction.
Currency Code	Displays the currency for which the Minimum Cash Holding Limit or Maximum Cash Holding Limit is to be maintained for the branch.
Minimum Cash Holding Limit	Displays the minimum cash holding limit for the branch.
Maximum Cash Holding Limit	Displays the maximum cash holding limit for the branch. <div style="border: 1px solid #0070C0; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>The maximum cash holding amount must not be less than the minimum cash holding amount.</p> </div>
Action	Click the necessary icon to edit, save, or delete a row.

4. Click **Save**.

The summary view is displayed with the configured teller branch parameters.

20.3 Maintain Branch Role Limits

The **Branch Role Limits** screen is used to set the input and authorization limits for a specific role.

Four static roles are factory-shipped and mapped with the functional activity codes. The functional activity codes maintained for each service/menu item are mapped to the respective roles. The details of each static role are provided in the table below:

Table 20-5 Static Roles

Static Role	Description
OBBRN_BASE	This role is mapped with all functional activity codes related to the service side. A user ID has to be mapped to <i>OBBRN_BASE</i> and one or more of the following roles based on the requirement: <ul style="list-style-type: none"> • <i>OBBRN_MANAGER</i> • <i>OBBRN_TELLER</i> • <i>OBBRN_VAULT</i>
OBBRN_MANAGER	This role is mapped with all menu-related functional activity codes, and the user can access all screens.

Table 20-5 (Cont.) Static Roles

Static Role	Description
OBBRN_TELLER	<p>This role is mapped with functional activity codes related to the menu that can be accessed by a Teller user. The user can access the screens except the following:</p> <ul style="list-style-type: none"> • All screens under Branch Maintenance • Open Branch Batch • Close Branch Batch • Open Vault Batch • Close Vault Batch • Buy Cash from Currency Chest • Sell Cash to Currency Chest • Interbranch Transaction Request • Interbranch Transaction Input • Interbranch Transaction Liquidation
OBBRN_VAULT	<p>This role is mapped with functional activity codes related to the menu that can be accessed by a Vault user. The user can access only the following screens:</p> <ul style="list-style-type: none"> • Open Vault Batch • Close Vault Batch • Buy Cash from Currency Chest • Sell Cash to Currency Chest • Interbranch Transaction Request • Interbranch Transaction Input • Interbranch Transaction Liquidation

To maintain branch role limits:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Branch Role Limits** or specify **Branch Role Limits** in the search icon bar and select the screen.

The **Branch Role Limits** summary screen is displayed.

Figure 20-3 Branch Role Limits (Summary)

2. Click the  icon.

The **Branch Role Limits Maintenance** screen is displayed.

Figure 20-4 Branch Role Limits Maintenance

3. On the **Branch Role Limits Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 20-6 Branch Role Limits Maintenance - Field Description

Field	Description
Role ID	Select the role ID for which the limit preferences are to be set.
Role Description	Displays the role description for the selected Role ID .
Supervisor Role	Select if the defined role is a designated supervisor of the branch who has the authorization rights.
Limit Currency	Select the currency code in which the limits are to be specified.
Input Limit	Specify the transaction input limit for a single transaction.
Authorization Limit	Specify the maximum amount that the role is allowed to process while authorizing a transaction.
Action	Click the necessary icon to edit, save, or delete a row.

4. Click **Save**.

The summary view is displayed with the configured branch role limits.

20.4 Maintain Branch User Preferences

The **Branch User Limits** screen is used to set preferences like Till/Vault Indicator, currency holding preferences, and currency limit preferences for the branch user.

To maintain branch user preferences:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Branch User Limits** or specify **Branch User Limits** in the search icon bar and select the screen. The **Branch User Limits** summary screen is displayed.

Figure 20-5 Branch User Limits (Summary)

- Click the  icon.
The **User Preferences** screen is displayed.

Figure 20-6 User Preferences

- On the **User Preferences** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 20-7 User Preferences - Field Description

Field	Description
Branch Code	Click the search icon, and select the branch code from the list of values.
User ID	Click the search icon, and select the user ID for which the branch preferences are to be maintained.
Till/Vault Indicator	Select from the following drop-down values: <ul style="list-style-type: none"> Till Vault Both None

Table 20-7 (Cont.) User Preferences - Field Description

Field	Description
Shortage/Overage GL	 Note: Currently not used, meant for future use.
Carry Forward Allowed	Select if the funds are allowed to carry forward for the next day.
Inter Branch Transactions Allowed	Select if the transfer between the branches is allowed.
Receive Email	Select if the Teller needs to receive emails for approval of transactions.
Receive Notification	Select if the Teller needs to receive notifications in Dashboard.
Currency Holding Preferences	Specify the fields.
Currency Code	Click the search icon, and select the currency code to specify the cash holding preferences.
Minimum Balance	Specify the minimum balance to be maintained for the Till or Vault.
Maximum Balance	Specify the maximum balance to be maintained for the Till or Vault.
Currency Limit Preferences	Specify the fields.
Currency Code	Click the search icon, and select the currency in which the limits (transactions amounts) will be expressed.
Max Transaction Amount	Specify the maximum transaction amount allowed that the user can enter in a single transaction.
Authorization Limit	Specify the maximum amount that the user (to which the limit role is associated) is allowed to process while authorizing a transaction.

- Click **Save**.

The summary view is displayed with the configured user preferences.

20.5 Maintain Denominations

The **Denominations Maintenance** screen is used to maintain the standard currency denominations for each currency that the bank deals with.

For example, the denominations for the currency USD can be maintained as follows:

Table 20-8 Denominations Maintenance for USD Currency

CCY CODE	DENM CODE	DESCRIPTION	VALUE	NOTE / COIN
USD	D100	100 dollars	100	NOTE
USD	D50	50 dollars	50	NOTE

Table 20-8 (Cont.) Denominations Maintenance for USD Currency

CCY CODE	DENM CODE	DESCRIPTION	VALUE	NOTE / COIN
USD	D20	20 dollars	20	NOTE
USD	D10	10 dollars	10	NOTE
USD	D5	5 dollars	5	NOTE
USD	D1N	1 dollar	1	NOTE
USD	D1C	1 dollar	1	COIN
USD	C25	25 cents	0.25	COIN
USD	C10	10 cents	0.1	COIN
USD	C5	5 cents	0.05	COIN
USD	C1	1 cent	0.01	COIN

To maintain denominations:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Denominations Maintenance** or specify **Denominations Maintenance** in the search icon bar and select the screen.

The **Denominations Maintenance** summary screen is displayed.

Figure 20-7 Denominations Maintenance (Summary)

2. Click the  icon.

The **Denomination Maintenance (New)** screen is displayed.

Figure 20-8 Denomination Maintenance

- On the **Denomination Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-9 Denomination Maintenance - Field Description

Field	Description
Currency Code	Specify the currency for which the currency denomination is to be maintained.
Currency Description	Specify the description of the currency code.
Denomination Type	Select the denomination type.
Denomination Details	Specify the fields.
Denomination ID	Specify the denomination code.
Description	Specify the description of the denomination code.
Value	Specify the numeric value of the denomination code.
Sequence Number	Specify the number such that the denomination codes will be displayed in the same sequence maintained.
Type	Specify the type as Coin or Note .
Large Denomination	Select if a particular denomination is to be maintained as a large denomination.
Add	Click Add to add the specified denomination details as an entry to the table.

- Click **Save**.
The summary view is displayed with the configured denominations.

20.6 Maintain Function Code Definitions

The **Function Code Definition** screen is used to specify the preferences for the function code.

For the list of function codes and the respective screen names, refer to [List of Function Codes](#).

To maintain function code definitions:

- On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Function Code Definition** or specify **Function Code Definition** in the search icon bar and select the screen.

The **Function Code Definition** summary screen is displayed.

Figure 20-9 Function Code Definition

2. Click the  icon.

The **Function Code Definition (New)** screen is displayed.

Figure 20-10 Function Code Definition

 **Note:**

In **Function Code Definition** screen, reversal allowed flag will not be enabled for BC Payment Reversal, DD Payment Reversal, and Cash Remittance Reversal. The system displays an error message stating that the Reversal is not supported, making reversal allowed as N.

3. On the **Function Code Definition** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-10 Function Code Definition - Field Description

Field	Description
Function Code	Select from the list function codes that are factory shipped. For the list of function codes and the respective screen names, refer to List of Function Codes .
Function Code Description	Displays the description of the function code.
Transaction Limit	Specify the maximum transaction amount allowed for this function code in branch currency.
Support Child Function Code	Select if the specified function code needs to act as the parent function code.
Parent Function Code	Specify the applicable parent function code. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 5px; margin-top: 10px;">  Note: This field is enabled only if the Support Child Function Code is not selected. </div>
Next Date Transaction Allowed	Select if the next day transaction posting needs to be allowed for the specified function code.
Charge Details	Specify the fields.
Apply Charges	Specify if charges are applicable for this transaction.
Exchange Rate Details	Specify the fields.
Rate Type	Select the rate type for the transaction code.
Rate Code	Select the rate code for the transaction code.
Override Limit	Specify the override limit. The system displays the default override limit currency as GBP.
Stop Limit	Specify the stop limit. The system displays the default stop-limit currency as GBP.
Additional Preferences	Specify the fields.
Reversal Allowed	Specify if the reversal is allowed for the transaction. <div style="border-left: 2px solid #0070C0; border-right: 2px solid #0070C0; border-bottom: 2px solid #0070C0; padding: 5px; margin-top: 10px;">  Note: Reversal allowed will be disabled for remittances and clearing transactions. Hence, reversal will not be enabled in the journal log. </div>
Reversal Requires Authorization	Specify if the authorization is required for a reversal transaction.
Reversal includes charges	Specify if the charges are to be reversed along with transaction reversal.
Reversal Advice Name	Select the reversal advice name from the list of values.
Input Slip Name	Specify the input slip name.

Table 20-10 (Cont.) Function Code Definition - Field Description

Field	Description
Input Slip Confirmation	<p>Select if the input slip confirmation is required for the transaction. If this option is selected for a transaction screen, the Input-Slip button will be displayed on the screen.</p> <p>On the specified transaction screens, you can click Input-Slip to view the input slip before transaction submission. Once you click Input-Slip, the system validates mandatory fields. In addition, you can perform any of the following actions:</p> <ul style="list-style-type: none"> • Confirm and Print – This icon is enabled only if Input Slip Confirmation is selected in the Function Code Definition screen. In addition, the transaction can be submitted only if the receipt is confirmed. Click this button to confirm and print the receipt. • Print – Click Print to print the generated slip and provide it to the customer. • Close – Click Close to close the generated receipt. <div style="background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>If the mandatory fields are not filled, the system shows an error message Value is required, wherever applicable.</p> </div>
Transaction Alert Preference	<p>Select the alert notification preference from the drop-down list. The values are mentioned below:</p> <ul style="list-style-type: none"> • SMS – the system sends an SMS notification of the transactions to the registered mobile number of the customer. • Email – the system sends an email notification of the transactions to the registered email ID of the customer. • Both – the system sends SMS and email notifications of the transactions to the registered mobile number and email ID of the customer. • None – the system will not send any notifications to the customer. <div style="background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The setup for Plato alerts needs to be completed and Kafka topics need to be created to enable e-mail alerts. For information on setup, refer to <i>Oracle Banking Branch Installation Guide</i>.</p> </div>
Advices	This section allows selecting advice for multiple Function Codes.
Advice Name	Displays the advice name.

4. Click **Save**.

The summary view is displayed with the configured function code definitions.

20.7 Maintain Function Code Preferences

The **Function Code Preferences** screen is used to define the workflow preferences (validation preferences and authorization preferences) for a function code.

For the list of function codes and the respective screen names, refer to [List of Function Codes](#). The rule-based authorization option in this screen is used to configure multi-level authorization with AND or OR condition. The multi-level authorization feature is described with the following example.

The sample user roles are considered as follows:

- *JUNIOR TELLER* (Supervisor enabled)
- *SENIOR TELLER1*
- *SENIOR TELLER2*
- *OFFICER LEVEL1*
- *OFFICER LEVEL2*
- *BRANCH MANAGER*

The sample values for limits and roles maintained are as below:

Table 20-11 Sample Values for Multi-level Authorization

Transaction Limit	Primary Authorization	Alternate Authorization
50,000 to 9,99,999	<i>SENIOR TELLER2</i> , <i>OFFICER LEVEL1</i> , and <i>OFFICER LEVEL2</i>	<i>OFFICER LEVEL2</i> and <i>BRANCH MANAGER</i>
10,00,000 to 99,99,99,99,999	<i>SENIOR TELLER1</i> and <i>OFFICER LEVEL1</i>	<i>OFFICER LEVEL2</i> or <i>BRANCH MANAGER</i>

The approval needs to be provided by the roles configured with AND or OR condition defined either in the primary authorization path or in the alternate authorization path. Based on the sample values provided, the following are some possible scenarios for multi-level authorization:

Table 20-12 Examples for Multi-Level Authorization

Condition	Authorization Process
Teller with <i>JUNIOR TELLER</i> role inputs a cash deposit transaction of amount 10,000	The transaction gets completed automatically without authorization.

Table 20-12 (Cont.) Examples for Multi-Level Authorization

Condition	Authorization Process
Teller with <i>JUNIOR TELLER</i> role input a cash deposit of 60,000	The transaction gets assigned to all the roles mentioned in Primary and Alternate Authorization paths. For example, when a user with the <i>OFFICER LEVEL2</i> role picks the transaction and authorizes it, the transaction gets assigned to the other three roles in the Primary and Alternate paths. Further, based on the user who picks for approval, the corresponding path will be chosen by the system. If a user with <i>BRANCH MANAGER</i> Role picks the transaction for approval, the system identifies the Alternate Path for approval and ends the authorization process. If a user with <i>SENIOR TELLER2</i> role picks the transaction and authorizes, then the corresponding Primary Path will be chosen by the system for <i>OFFICER LEVEL1</i> to authorize the transaction.
Teller inputs an account transfer of 20,00,000	The transaction gets assigned to all the roles mentioned in Primary and Alternate Authorization paths. When a user with <i>BRANCH MANAGER</i> role or <i>OFFICER LEVEL2</i> role picks the transaction and authorizes it, the system identifies the path as Alternate and ends the authorization process. Else if a user with <i>OFFICER LEVEL1</i> picks the transaction and authorizes it, the system identifies the path as Primary for <i>SENIOR TELLER1</i> to authorize the transaction.

To maintain function code preferences:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Function Code Preferences** or specify **Function Code Preferences** in the search icon bar and select the screen.

The **Function Code Preferences** summary screen is displayed.

Figure 20-11 Function Code Preferences (Summary)

2. Click the  icon.

The **Function Code Preferences** screen is displayed.

Figure 20-12 Function Code Preferences

The screenshot shows the 'Function Code Preferences' interface. At the top, there are search fields for 'Branch Code', 'Branch Description', 'Function Code', and 'Function Code Description'. Below this, the interface is divided into three main sections: 'General Preferences', 'Rule Based Authorization', and 'Transaction Limit Check'. Under 'General Preferences', there are radio buttons for 'Teller Sequence Request' and 'Teller Sequence Prefix'. Under 'Validation Preferences', there are radio buttons for 'Charges Amendable', 'Exchange Rate Amendable', 'Email Approval Required', 'Rule Based Authorization', and 'Signature Verification Required'. Under 'Authorization Preferences', there are radio buttons for 'Authorization required for Interbranch Transaction', 'Authorization required for Charge Amendment', 'Authorization required for Exchange Rate Amendment', and 'Authorization required by Default'. There are also dropdown menus for 'Assignment Mode' and 'Authorizer Role'. At the bottom right, there are 'Save' and 'Cancel' buttons.

Figure 20-13 Rule-Based Authorization

The screenshot shows the 'Rule Based Authorization' section. It features a table with the following columns: Currency, From Amount, To Amount, Amend Charge, Amend Rate, Interbranch Transaction, Supervisor Role ID, Supervisor Role Logical Operator, Alternate Supervisor RoleID, and Alternate Supervisor Role Logical Operator. The first row shows 'GBP' for Currency, '0' for From Amount, '25,000' for To Amount, and 'OBBA_TELLER X' for Supervisor Role ID. A dropdown menu is open for the 'Supervisor Role Logical Operator' column, showing options: 'Select One', 'AND', and 'OR'. At the bottom left, there is a pagination indicator: 'Page 1 of 1 (1 of 1 items)'. At the top right, there are '+', 'i', and 'x' icons.

Figure 20-14 Transaction Limit Check

The screenshot shows the 'Transaction Limit Check' section. It features a table with the following columns: Transaction Currency, Transaction Amount, and Action. The table is currently empty. At the bottom left, there is a pagination indicator: 'Page 1 (1 of 1 items)'. At the top right, there is a '+' icon. At the bottom right of the table, there are edit and delete icons.

- On the **Function Code Preferences** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 20-13 Function Code Preferences - Field Description

Field	Description
Branch Code	<p>Select the branch code from the list of values.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>The list of values should have the *.* for the "All" option.</p> </div>
Branch Description	Displays the description of the branch code.
Function Code	Specify the function code. The list of values displays the valid function codes.
Function Code Description	Displays the description of the function code.
General Preferences	Specify the fields. This segment can be used to configure single-level authorization of the preferences with the use of the Authorizer Role field.
Teller Sequence Request	Select this option to generate the Teller sequence number.
Teller Sequence Prefix	<p>Specify the prefix for the generation of the Teller sequence number.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This is mandatory only if the Teller Sequence Request is selected.</p> </div>
Validation Preferences	Specify the fields.
Charges Amendable	Select if the charges are allowed to modify for the transaction.
Exchange Rate Amendable	Select if the exchange rate is allowed to modify for the transaction.
Rule-Based Authorization	<p>Select if the rule-based authorization is required for the transaction.</p> <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>Assignment mode to be defined as 'Auto' if Rule based auth flag is selected.</p> </div>

Table 20-13 (Cont.) Function Code Preferences - Field Description

Field	Description
Email Approval Required	<p>Select if authorization through email is required for a transaction.</p> <div style="border: 1px solid #0070c0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>If this option is selected in override confirmation, then an email will be sent as per the assignment mode maintained. This email will be sent to the selected approver or a list of approvers associated with the role maintained. The approvers will get an email for authorization only if receive email flag is selected in the User Preferences screen. Once the email is received, Approver can either approve or reject the transaction. When you click the Approve or Reject, an email will be automatically opened in the system where the approver can type their comments. The setup for Plato alerts needs to be completed and Kafka topics need to be created to enable e-mail alerts. For information on setup, refer to <i>Oracle Banking Branch Installation Guide</i>.</p> </div>
Signature Verification Required	Select if the Teller needs to verify the customer's signature while submitting the transaction.
Authorization Preferences	Specify the fields.
Authorization required for Interbranch Transaction	Select if the authorization is required for the inter-branch transaction.
Authorization required for Charge Amendment	Select if the authorization is required in case you have amended the charge defaulted by the system.
Authorization required for Exchange Rate Amendment	Select if the authorization is required in case you have amended the exchange rate defaulted by the system.
Authorization required by Default	Select if the authorization is required by default for the transaction.
Assignment Mode	Select to indicate whether remote authorization assignment is the automatic or manual operation for the transaction.
Authorizer Role	<p>Select the role of the authorizers. The users belonging to this role are the valid authorizers for this workflow.</p> <div style="border: 1px solid #0070c0; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is applicable, if assignment mode is Manual or if assignment mode is Auto and no default authorizer is maintained for the user.</p> </div>

Table 20-13 (Cont.) Function Code Preferences - Field Description

Field	Description
Rule-Based Authorization	Specify the fields. This segment can be used to configure multi-level authorization of the preferences with the use of Supervisor Role ID and Alternate Supervisor Role ID fields. <div style="border: 1px solid #0070c0; padding: 5px; background-color: #e6f2ff;">  Note: Rule Based Authorization cannot be applied for customer servicing transactions. </div>
Currency	Select the currency of the transaction from the LOV.
From Amount	Specify the "From" cap amount.
To Amount	Specify the "To" cap amount.
Amend Charge	Select from the drop-down values (Yes or No).
Amend Rate	Select from the drop-down values (Yes or No).
Interbranch Transaction	Select from the drop-down values (Yes or No).
Supervisor Role ID	Select the supervisor role ID from the list of values. The following conditions apply to this field: <ul style="list-style-type: none"> • More than one role can be added for authorization. • If multiple roles are added, it is not mandatory to authorize in sequential order of the roles added. • The roles added in this field are considered for the primary level of authorization.
Supervisor Role Logical Operator	Select the logical operator AND or OR. If AND is chosen, all the Supervisor role specified in primary path has to authorize the transaction. If OR is chosen, either of the Supervisor role has to authorize the transaction.
Alternate Supervisor Role ID	Select the alternate role ID from the list of values. The following conditions apply to this field: <ul style="list-style-type: none"> • More than one role can be added for authorization. • If multiple roles are added, it is not mandatory to authorize in sequential order of the roles added. • The roles added in this field are considered for the secondary level of authorization.
Alternate Supervisor Role Logical Operator	Select the logical operator AND or OR. If AND is chosen, all the Supervisor role specified in primary path has to authorize the transaction. If OR is chosen, either of the Supervisor role has to authorize the transaction.
Transaction Limit Check	Specify the details under this section. Double-click on a row to enable the fields.
Transaction Currency	Click the search icon, and select the transaction currency from the list of values.
Transaction Amount	Specify the transaction amount.
Action	Click the necessary icon to save, edit, or delete the values of a row.

4. Click **Save**.

The summary view is displayed with the configured function code preferences.

20.8 Maintain Default Authorizer

The **Default Authorizer** screen is used to define the default authorizer who can authorize a specific function code for a branch user.

Once it is defined, the system automatically routes the transactions of this function code to the default authorizer defined for the branch user.

To maintain default authorizer:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Default Authorizer** or specify **Default Authorizer** in the search icon bar and select the screen.

The **Default Authorizer** summary screen is displayed.

Figure 20-15 Default Authorizer (Summary)

2. Click the  icon.

The **Default Authorizer (New)** screen is displayed.

Figure 20-16 Default Authorizer

3. On the **Default Authorizer** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 20-14 Default Authorizer - Field Description

Field	Description
User ID	Select the user ID from the list of values. The list consists of user IDs for which a default authorizer needs to be maintained.
User Name	Displays the name of the user, when you select the user ID.
Branch Code	Select the branch code from the list of values. This field is enabled if the All option is selected in the User ID field. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note:</p> <p>If a specific authorizer is selected, then the system will default the home branch as branch code.</p> </div>
Branch Name	Displays the branch name, when you select the Branch Code .
Default Authorizer	Select the default authorizer from the list of values, if it is already set while assigning the transaction. If the mode assigned is Manual , it allows changing the default authorizer. Select the authorizer ID from the adjoining option list. The options list consists of authorizers who are mapped to a role with Savings Authorizer flag value as Y or All option.
Description	Displays the description.

4. Click **Save**.

The summary view is displayed with the configured default authorizer.

20.9 Maintain Accounting and Settlements

The **Settlements Definition** screen is used to define the settlement and accounting parameters that are applicable for processing the branch transactions involving a function code.

To maintain accounting and settlements:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Settlements Definition** or specify **Settlements Definition** in the search icon bar and select the screen.

The **Settlements Definition** summary screen is displayed.

Figure 20-17 Settlements Definition (Summary)

- Click the  icon.
The **Accounting Settlement** screen is displayed.

Figure 20-18 Accounting Settlement

- On the **Accounting Settlement** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-15 Accounting Settlement - Field Description

Field	Description
Branch	Select the branch for which the accounting details need to be defined from the list of values.  Note: The value *.* indicates the "All" option.
Currency	Select the currency for which the accounting details need to be defined from the list of values.  Note: The value *.* indicates the "All" option.
Function Code	Select the function code for which the accounting details need to be defined from the list of values.

Table 20-15 (Cont.) Accounting Settlement - Field Description

Field	Description
Function Code Description	Displays the description of the selected function code.
Transaction Account	<p>Select the transaction account or GL from the list of values. The list of values displays all valid GLs maintained. This field is kept blank if the transaction account needs to be selected from the transaction screen.</p> <p> Note:</p> <p>LOV query will fetch the Nostro type of accounts for 9009 and 9010 function codes. For other function codes, only GL accounts will be fetched from LOV.</p>
Offset Account/GL No	<p>Select the offset account or GL from the list of values. The list of values displays all valid GLs maintained.</p> <p> Note:</p> <p>LOV query will fetch the Nostro type of accounts for 9009 and 9010 function codes. For other function codes, only GL accounts will be fetched from LOV.</p>
Transaction Code for Debit	Select the transaction code used for debit accounting from the list of values.
Transaction Code for Credit	Select the transaction code used for credit accounting from the list of values.
Main Leg Accounting Required	Select to pass the main accounting entries along with the charges defined in the transaction code.
Netting Charge Required	<p> Note:</p> <p>This field is meant for future use.</p>
Profit Reval GL	<p>Specify the profit revaluation GL details.</p> <p> Note:</p> <p>This field is used during accounting only when the transaction involves negotiated exchange rate.</p>

Table 20-15 (Cont.) Accounting Settlement - Field Description

Field	Description
Loss Reval GL	Specify the loss revaluation GL details. <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note: This field is used during accounting only when the transaction involves negotiated exchange rate.</p> </div>

4. Click **Save**.

The summary view is displayed with the configured accounting details.

20.10 Maintain Instrument Numbers

The **Instrument Number Maintenance** screen is used to maintain the instrument type for each branch.

To maintain instrument numbers:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Instrument Number Maintenance** or specify **Instrument Number Maintenance** in the search icon bar and select the screen.

The **Instrument Number Maintenance** summary screen is displayed.

Figure 20-19 Instrument Number Maintenance (Summary)

2. Click the  icon.
The **Instrument Number Maintenance (New)** screen is displayed.
3. On the **Instrument Number Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Figure 20-20 Instrument Number Maintenance (New)

Table 20-16 Instrument Number Maintenance - Field Description

Field	Description
Instrument Type	Specify the instrument type for which the instrument maintenance needs to be done.
Branch	Select the branch code from the list of values.
Generate Instrument Number	Specify Generate Instrument Number as Yes/No by selecting the radio-button. <ul style="list-style-type: none"> • If Yes, then Instrument number will be generated by OBBRN. • If No, then Instrument number will be generated by OBPM.
Cheque Number	Specify the cheque number for which the instrument maintenance needs to be done.
Number of Leaves	Specify the number of leaves.

4. Click **Save**.

The summary view is displayed with the configured instrument number.

20.11 Maintain Inter Branch Transit Account

The **Inter Branch Transit Account** screen is used to maintain inter-branch transit account for each branch using the receiving branch, vault, and currency combination.

To maintain inter-branch transit account:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Inter Branch Transit Account** or specify **Inter Branch Transit Account** in the search icon bar and select the screen.

The **Inter Branch Transit Account** summary screen is displayed.

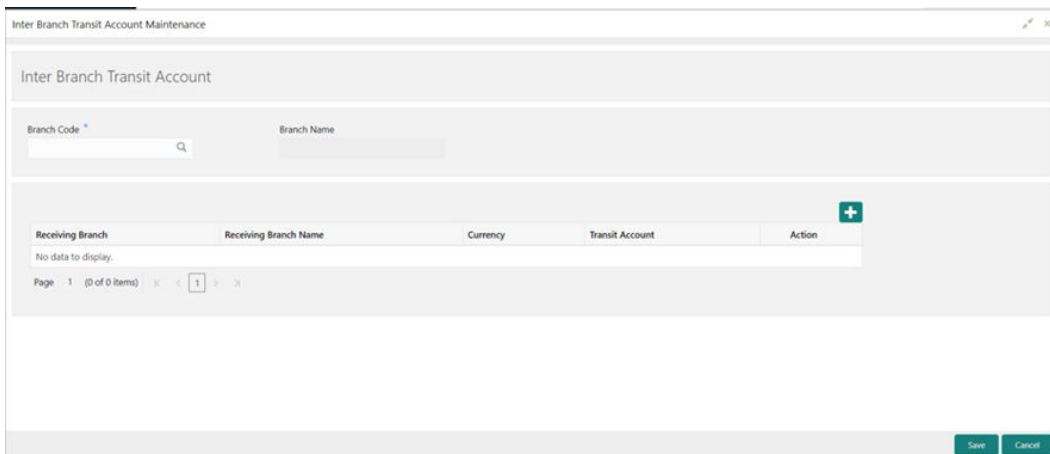

Figure 20-21 Inter Branch Transit Account (Summary)

2. Click the  icon.

The **Inter Branch Transit Account Maintenance** screen is displayed.

Figure 20-22 Inter Branch Transit Account Maintenance

3. On the **Inter Branch Transit Account Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 20-17 Inter Branch Transit Account Maintenance - Field Description

Field	Description
Branch Code	Select the branch code from the list of values, which provides all the branch codes maintained in the system.
Branch Name	Display the description of the selected branch code.
Receiving Branch	Specify the destination branch to which the cash is transferred.
Branch Name	Display the description of the selected Receiving Branch code.
Currency	Specify the currency of the cash.

Table 20-17 (Cont.) Inter Branch Transit Account Maintenance - Field Description

Field	Description
Transit Account	Specify the transit account that is used to track the movement of cash.
Action	Click the necessary icon to edit, save, or delete a row.

4. Click **Save**.

The summary view is displayed with the configured inter-branch transit account.

20.12 Maintain External System

The **External System Maintenance** screen is used to define the parameters for the external system.

The parameters are defined whenever there is an external system call to the Oracle Banking Branch external API. Only the registered users can make the external system call to process the transaction.

To maintain external system:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **External System Maintenance** or specify **External System Maintenance** in the search icon bar and select the screen.

The **External System Maintenance** summary screen is displayed.

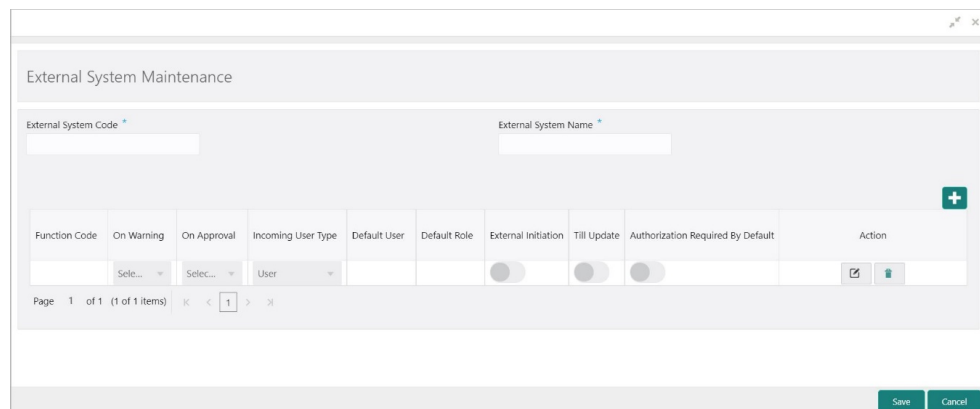

Figure 20-23 External System Maintenance (Summary)

2. Click the  icon.

The **External System Maintenance (New)** screen is displayed.

Figure 20-24 External System Maintenance (New)

3. On the **External System Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-18 External System Maintenance - Field Description

Field	Description
External System Code	Specify the system code of the registered external system.
External System Name	Specify the name of the registered external system.
Function Code	Specify the function code of the transaction, which needs to be performed through the external system. You can also select from the list of values.
On Warning	Select from the drop-down list. The values in the drop-down list are mentioned below: <ul style="list-style-type: none"> • Ignore – Select if you need to ignore the override raised and process the transaction until completion. • Error – Select if you need to show the error message and stop the transaction.
On Approval	Select from the drop-down list. The values in the drop-down list are mentioned below: <ul style="list-style-type: none"> • Ignore – Select if you need to ignore the override raised and process the transaction until completion. • Error – Select if you need to show the error message and stop the transaction.
Incoming User Type	Select the incoming user type from the drop-down values. The values in the drop-down list are mentioned below: <ul style="list-style-type: none"> • User – User appearing in the payload to process the transaction. • Default User – Default user that is maintained to process the transaction. • Role – Role appearing in the payload to process the transaction. • Default Role – Default role that is maintained to process the transaction.
Default User	Specify the default user maintained. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>This field is applicable only if the Incoming User Type is selected as Default User.</p> </div>

Table 20-18 (Cont.) External System Maintenance - Field Description

Field	Description
Default Role	Specify the default role maintained. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note: This field is applicable only if the Incoming User Type is selected as Default Role.</p> </div>
External Initiation	Select if you need to log the transaction into Journal Log with the status Initiated .
Till Update	Select if you need to update the Till.
Authorization required by Default	Select if you need to raise an override even if it is N in function preference.
Action	Click the necessary icon to edit, save, or delete a row.

- Click **Save**.

The summary view is displayed with the configured details of external system maintenance.

20.13 Maintain Channel Limits

The **Channel Limits** screen is used to maintain the channel limits for a particular customer group.

To maintain channel limits:

- On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Channel Limits** or specify **Channel Limits** in the search icon bar and select the screen.

The **Channel Limits** summary screen is displayed.

Figure 20-25 Channel Limits (Summary)

- Click the  icon.

The **Channel Limits Maintenance** screen is displayed.

Figure 20-26 Channel Limits Maintenance

3. On the **Channel Limits Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 20-19 Function Code Definition - Field Description

Field	Description
Account Group	Click the search icon and select account group from the list of values. Note: The list of values provides the account groups that are maintained in the Account Group Maintenance screen.
Channel	Select value from the drop-down list. Note: By default, the value is selected as Branch .
Currency	Select the currency from the list of values.
Max Withdrawal Limit Per Day	Specify the maximum amount for the cash withdrawal transactions per day.
No. of Transactions Per Day	Specify the maximum limit for the number of cash withdrawal transactions per day.

4. Click **Save**.

The summary view is displayed with the configured details of channel limits maintenance.

20.14 Maintain Account Group

The **Account Group Maintenance** screen is used to create groups of the account codes, and these groups can be used for charge calculation.

To maintain account group:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Account Group Maintenance** or specify **Account Group Maintenance** in the search icon bar and select the screen.

The **Account Group Maintenance** summary screen is displayed.

Figure 20-27 Account Group Maintenance (Summary)

2. Click the  icon.

The **Account Group Maintenance (New)** screen is displayed.

Figure 20-28 Account Group Maintenance (New)

3. On the **Account Group Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-20 Account Group Maintenance - Field Description

Field	Description
Account Group Code	Specify the account group code.
Account Group Code Description	Specify the description of the account group code.
Add Accounts	Specify the fields.
Account Number	Specify the account number. You can also select from the list of values.
Account Name	Displays the description for the specified account number.
Reset	Click Reset to reset the accounts added.
Add Accounts	Click Add Accounts to add the account specified.
Accounts Added	Displays the details of accounts added to the table. Once you add an account to the table, you can click the necessary icon to edit or delete the added entry.

4. Click **Save**.

The summary view is displayed with the configured details of account groups.

20.15 Maintain Branch Group

The **Branch Group Maintenance** screen is used to create groups of the branch codes, and these groups can be used for charge calculation.

To maintain branch group:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Branch Group Maintenance** or specify **Branch Group Maintenance** in the search icon bar and select the screen.

The **Branch Group Maintenance** summary screen is displayed.

Figure 20-29 Branch Group Maintenance (Summary)

2. Click the  icon.

The **Branch Group Maintenance (New)** screen is displayed.

Figure 20-30 Branch Group Maintenance (New)

3. On the **Branch Group Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-21 Branch Group Maintenance - Field Description

Field	Description
Branch Group Code	Specify the branch group code.
Branch Group Code Description	Specify the description of the branch group code.
Add Accounts	Specify the fields.
Branch Number	Specify the branch number. You can also select from the list of values.
Branch Name	Displays the description for the specified branch number.
Reset	Click Reset to reset the branches added.
Add Branch	Click Add Branch to add the branch specified.
Branches Added	Displays the details of branches added in the table. Once you add a branch in the table, you can click the necessary icon to edit or delete the added entry.

4. Click **Save**.

The summary view is displayed with the configured details of branch groups.

20.16 Maintain Customer Group

The **Customer Group Maintenance** screen is used to create groups of the customer codes, and these groups can be used for charge calculation.

To maintain customer group:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Customer Group Maintenance** or specify **Customer Group Maintenance** in the search icon bar and select the screen.

The **Customer Group Maintenance** summary screen is displayed.

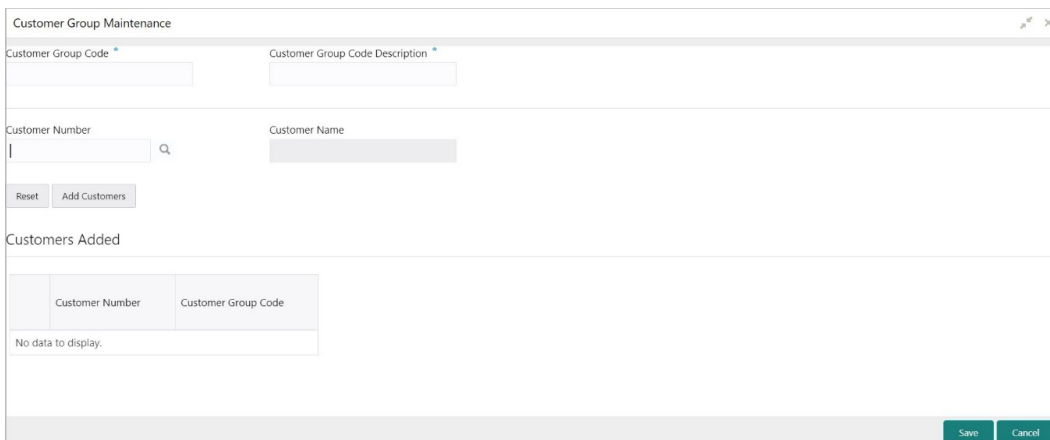

Figure 20-31 Customer Group Maintenance (Summary)

2. Click the  icon.

The **Customer Group Maintenance (New)** screen is displayed.

Figure 20-32 Customer Group Maintenance (New)

3. On the **Customer Group Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-22 Customer Group Maintenance - Field Description

Field	Description
Customer Group Code	Specify the customer group code.
Customer Group Code Description	Specify the description of the customer group code.

Table 20-22 (Cont.) Customer Group Maintenance - Field Description

Field	Description
Customer Number	Specify the customer number. You can also select from the list of values. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note: You cannot add the same customer number in two different groups.</p> </div>
Customer Name	Displays the description for the specified customer number.
Reset	Click Reset to reset the customer numbers added.
Add Customer	Click Add Customer to add the customer numbers specified.
Customers Added	Displays the details of customer numbers added to the table. Once you add a customer number to the table, you can click the necessary icon to edit or delete the added entry.

4. Click **Save**.

The summary view is displayed with the configured details of customer groups.

20.17 Maintain Charge Definitions

The **Charge Definition Maintenance** screen is used to maintain the charge definitions.

To maintain charge definitions:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Charge Definition Maintenance** or specify **Charge Definition Maintenance** in the search icon bar and select the screen.

The **Charge Definition Maintenance** summary screen is displayed.

Figure 20-33 Charge Definition Maintenance (Summary)

2. Click the  icon.

The **Charge Definition Maintenance (New)** screen is displayed.

Figure 20-34 Charge Definition Maintenance (New)

3. On the **Charge Definition Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

Note:

The fields, which are marked with an asterisk, are mandatory.

Table 20-23 Charge Definition Maintenance - Field Description

Field	Description
Charge Code	Specify the charge code.
Charge Description	Specify the description of the charge code.
Charge Category	Select the charge category (Standard or Tax).
Charge Credit Account	Specify the charge credit account for the transaction. You can also select the GL from the list of values or the <i>DR_LEG/CR_LEG</i> . <div style="border: 1px solid blue; padding: 5px; margin-top: 10px;"> <p> Note:</p> <p>If <i>DR_LEG/CR_LEG</i> is selected, the corresponding debit/credit account of the transaction will be considered for the charge processing. For example, if the charge code is defined with Charge Debit Account as <i>DR_LEG</i> for a cash deposit function code, the charge will be collected from cash GL. Hence, the customer is expected to deposit cash including the charge amount. For such a charge code, the Charge by Cash field will be displayed as Yes in the charges data segment of the transaction screen.</p> </div>

Table 20-23 (Cont.) Charge Definition Maintenance - Field Description

Field	Description
Charge Debit Account	Specify the charge debit account for the transaction. You can also select the GL from the list of values or the <i>DR_LEG/CR_LEG</i> . <div style="border: 1px solid #0070C0; padding: 5px; background-color: #E6F2FF;"> <p> Note:</p> <p>If <i>DR_LEG/CR_LEG</i> is selected, the corresponding debit/credit account of the transaction will be considered for the charge processing. For example, if the charge code is defined with Charge Debit Account as <i>DR_LEG</i> for a cash deposit function code, the charge will be collected from cash GL. Hence, the customer is expected to deposit cash including the charge amount. For such a charge code, the Charge by Cash field will be displayed as Yes in the charges data segment of the transaction screen.</p> </div>
Credit Txn Code	Click the search icon and select the credit transaction code from the list of values.
Debit Txn Code	Click the search icon and select the debit transaction code from the list of values.
Pricing Source System	Specify the pricing source system. You can also select from the list of values.
Pricing Source Description	Displays the description of the pricing source.
EDE Code	Displays the details of charge codes added to the table. Once you add a customer number to the table, you can click the necessary icon to edit or delete the added entry.

4. Click **Save**.

The summary view is displayed with the configured details of charge definitions.

20.18 Create Charge Pricing Maintenance

The **Create Charge Pricing Maintenance** screen is used to maintain the charge pricing.

To maintain charge pricing:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Create Charge Pricing Maintenance** or specify **Create Charge Pricing Maintenance** in the search icon bar and select the screen.

The **Create Charge Pricing Maintenance** summary screen is displayed.

Figure 20-35 Create Charge Pricing Maintenance

2. On the **Create Charge Pricing Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-24 Create Charge Pricing Maintenance - Field Description

Field	Description
Application Code	Specify the application code.
Charge Pricing Description	Specify the description of the charge pricing.
Pricing Category	Select the pricing category. The drop-down list has the following values: <ul style="list-style-type: none"> • Fixed Amount • Fixed Percent • Tier Based Amount • Tier Based Percent
Pricing Method	Select the pricing method. The drop-down values will vary based on the Pricing Category .
Pricing Currency	Select the pricing currency.
Rate Code	Click the search icon and select the rate code from the list of values.
Rate Type	Select the rate type from the drop-down values.
Charge in Transaction Currency	Select if the charges are needed in the transaction currency.
Min/Max Validation Criteria	Select the criteria (Amount or Percentage) for minimum or maximum validation.

Table 20-24 (Cont.) Create Charge Pricing Maintenance - Field Description

Field	Description
Min Charge Amount/Percent	Specify the minimum charge amount or percent. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>Based on the value selected in the Min/Max Validation Criteria, this field gets enabled.</p> </div>
Max Charge Amount/Percent	Specify the minimum charge amount or percent. <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>Based on the value selected in the Min/Max Validation Criteria, this field gets enabled.</p> </div>
Fixed Amount/Percent	Specify the fixed amount or percent. This field is enabled only if Pricing Category is selected as Fixed Amount or Fixed Percent .

3. Click **Save**.

The summary view is displayed with the configured details of charge pricing.

20.19 View Charge Pricing Maintenance

The **View Charge Pricing Maintenance** screen is used to view the summary and details of charge pricing IDs.

To view charge pricing maintenance:

On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **View Charge Pricing Maintenance** or specify **View Charge Pricing Maintenance** in the search icon bar and select the screen.

The **View Charge Pricing Maintenance** is displayed.

Figure 20-36 View Charge Pricing Maintenance

You can view a summary of the configured records for the charge pricing details on this screen.

20.20 Maintain Charge Condition Group

The **Charge Condition Group Maintenance** screen is used to create groups of the charge condition codes.

To maintain charge condition group:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Charge Condition Group Maintenance** or specify **Charge Condition Group Maintenance** in the search icon bar and select the screen.

The **Charge Condition Group Maintenance** summary screen is displayed.

Figure 20-37 Charge Condition Group Maintenance (Summary)

2. Click the  icon.

The **Charge Condition Group Maintenance** screen is displayed.

Figure 20-38 Charge Condition Group Maintenance (New)

3. On the **Charge Condition Group Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-25 Charge Condition Group Maintenance - Field Description

Field	Description
Charge Condition Group Code	Specify the charge group code.
Charge Condition Group Code Description	Specify the description of the charge group code.
Parameter 1 to Parameter 5	Select the parameters 1 to 5. For more information on Parameters, refer to Additional Information on Parameters .
Charge Details	Specify the fields.
Value 1 to Value 5	Specify the values 1 to 5. You can also select from the list of values.
Charge Pricing Rule ID	Specify the charge pricing rule ID. You can also select from the list of values.
Charge Pricing Rule Description	Displays the description for specified charge pricing rule ID.
Reset	Click Reset to reset the charge group details added.
Add Charge Group	Click Add Charge Group to add the charge group details specified.
Charge Groups Added	Displays the details of charge groups added to the table. Once you add a customer number to the table, you can click the necessary icon to edit or delete the added entry.

4. Click **Save**.

The summary view is displayed with the configured groups of the charge condition codes.

- [Additional Information on Parameters](#)

The **Parameters** field on the **Charge Condition Group Maintenance** screen needs to be selected based on the specified conditions.

20.20.1 Additional Information on Parameters

The **Parameters** field on the **Charge Condition Group Maintenance** screen needs to be selected based on the specified conditions.

There will be a few parameters like Customer Group, Account Group, or Branch group will be pre-shipped. Customers need to choose the parameters, group them, and name them with the group codes. A rule will be attached to the group code so that based on the group used corresponding rule will be applied for calculation.

If the Charge Condition Group Maintenance is made with a specific parameter, the CHG_PARAM_TAGS column in the SRV_TB_TX_STATIC_TAGS table of transaction

schema needs to be updated. For example, if Parameter 1 is selected as a utility provider, it needs to be updated as below:

```
{
  "UtilityProvider": "$.institutionID",
  "P2": "",
  "P3": "",
  "P4": "",
  "P5": ""
}
```

For the other options in **Parameter** field, the JSON needs to be updated as follows:

Table 20-26 Options for Parameter Fields

Option	Value
Account Group	"AccountGroup": ""
Customer Group	"CustomerGroup": ""
Transaction Branch Group	"TransactionBranchGroup": ""
To Account Branch Group	"ToAccountBranchGroup": ""
To Account Branch	"ToAccountBranch": "\$.toAccountBranch" <\$.toAccountBranch has to be replaced with the field id as per the FID that captures To Account Branch>
Account Currency	"AccCcy": "\$.AccCcy" <\$.AccCcy has to be replaced with the field id as per the FID that captures Account Currency>
Utility Provider	"UtilityProvider": "\$.institutionID" <\$.institutionID has to be replaced with the field id as per the FID that captures Utility Provider>

20.21 Maintain Charge Decisions

The **Charge Decision Maintenance** screen is used to maintain the charge decisions.

To maintain charge decisions:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Charge Decision Maintenance** or specify **Charge Decision Maintenance** in the search icon bar and select the screen.

The **Charge Decision Maintenance** summary screen is displayed.

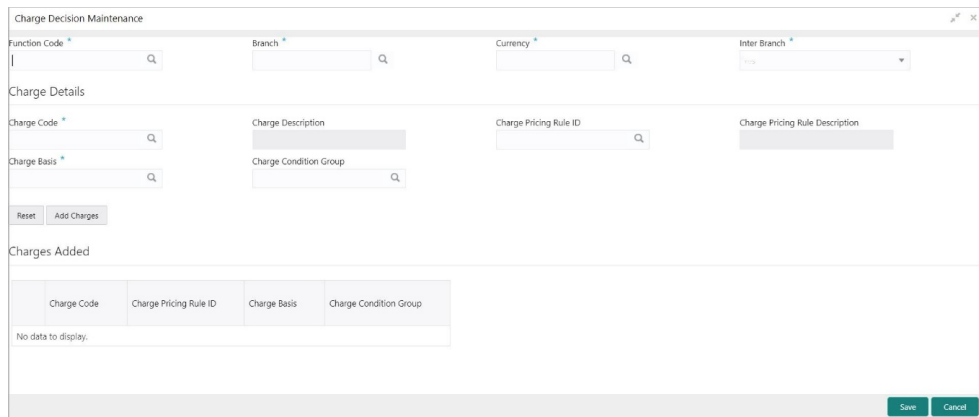

Figure 20-39 Charge Decision Maintenance (Summary)

2. Click the  icon.

The **Charge Decision Maintenance** screen is displayed.

Figure 20-40 Charge Decision Maintenance (New)

3. On the **Charge Decision Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 20-27 Charge Decision Maintenance - Field Description

Field	Description
Function Code	Specify the function code. You can also select from the list of values.
Branch	Specify the branch code. You can also select from the list of values.
Currency	Specify the currency code. You can also select from the list of values.

Table 20-27 (Cont.) Charge Decision Maintenance - Field Description

Field	Description
Inter Branch	Select the inter-branch requirement from the following drop-down values: <ul style="list-style-type: none"> • Yes • No • Both
Charge Details	Specify the fields.
Charge Code	Specify the charge code. You can also select from the list of values.
Charge Description	Displays the description of the charge code specified.
Charge Pricing Rule ID	Specify the charge-pricing rule ID. You can also select from the list of values. <div style="border: 1px solid #ccc; background-color: #e6f2ff; padding: 10px; margin-top: 10px;"> <p> Note:</p> <p>You can choose the pricing rule ID to apply charge or choose a group code from which the pricing rule will be picked for calculation. You can only define the rule or group. Either the rule can be used, or a group can be used.</p> </div>
Charge Pricing Rule Description	Displays the description of the charge-pricing rule ID specified.
Charge Basis	Specify the charge basis. You can also select from the list of values.
Charge Condition Group	Specify the charge condition group.
Reset	Click Reset to reset the charges added.
Add Charges	Click Add Charges to add the charge decisions specified.
Charges Added	Displays the details of charge decisions added to the table. Once you add an account to the table, you can click the necessary icon to edit or delete the added entry.

4. Click **Save**.

The summary view is displayed with the configured details of charge decisions.

20.22 Charge Decision Enquiry

The **Charge Decision Enquiry** screen is used to inquire about the details of charge definition and charge pricing for the specified search criteria.

To inquire about the charge decision details:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Charge Decision Enquiry** or specify **Charge Decision Enquiry** in the search icon bar and select the screen.

The **Charge Decision Enquiry** summary screen is displayed.

Figure 20-41 Charge Decision Enquiry

Figure 20-42 Charge Definition

Figure 20-43 Charge Pricing

2. On the **Charge Decision Enquiry** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-28 Charge Decision Enquiry - Field Description

Field	Description
Function Code	Click the search icon and select function code from the list of values.
Branch	Click the search icon and select branch code from the list of values.

Table 20-28 (Cont.) Charge Decision Enquiry - Field Description

Field	Description
Currency	Click the search icon and select currency code from the list of values.
Inter Branch	Select the value for inter-branch from the drop-down list.
Fetch	Click Fetch to fetch the details based on the specified search criteria.
Charge Code	Displays the charge code.
Charge Pricing Rule ID	Displays the charge pricing rule ID.
Charge Basis	Displays the charge basis.
Charge Condition Group	Displays the charge condition group.
Charge Definition	Displays the charge definition details. For information on fields refer to Maintain Charge Definitions .
Charge Pricing	Displays the charge pricing details. For information on fields refer to Create Charge Pricing Maintenance .

20.23 Maintain Reject Codes

The **Reject Code Maintenance** screen is used to maintain the reject codes.

The reject codes maintained in this screen are used to reject the cheque withdrawal transactions with the appropriate reject code.

To maintain reject codes:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Reject Code Maintenance** or specify **Reject Code Maintenance** in the search icon bar and select the screen.

The **Reject Code Maintenance** summary screen is displayed.

Figure 20-44 Reject Code Maintenance (Summary)

2. Click the  icon.

The **Reject Code Maintenance** screen is displayed.

Figure 20-45 Reject Code Maintenance (New)

3. On the **Reject Code Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-29 Reject Code Maintenance - Field Description

Field	Description
Reject Code	Specify the reject code. This code indicates the reason for rejecting a clearing transaction.
Reject Code Description	Specify the description of the reject code.
Applicable For	Select from the radio list from the following drop-down values: <ul style="list-style-type: none"> • Inward Return • Outward Return • Both Inward and Outward Return • Inhouse Cheques

4. Click **Save**.

The summary view is displayed with the configured details of reject codes.

20.24 Maintain Clearing Network Codes

The **Clearing Network** screen is used to maintain the clearing network codes.

To maintain clearing network codes:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Clearing Network** or specify **Clearing Network** in the search icon bar and select the screen.

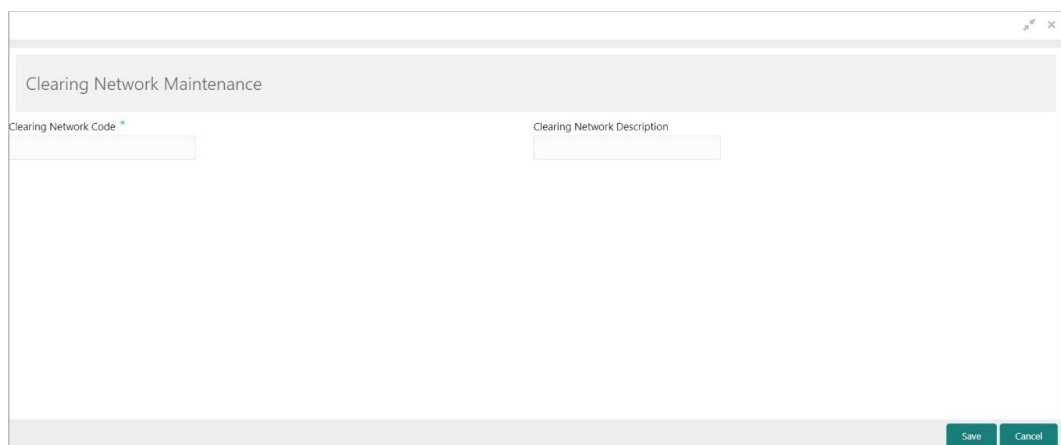

The **Clearing Network** summary screen is displayed.

Figure 20-46 Clearing Network (Summary)

- Click the  icon.
The **Clearing Network Maintenance** screen is displayed.

Figure 20-47 Clearing Network Maintenance

- On the **Clearing Network Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 20-30 Clearing Network Maintenance - Field Description

Field	Description
Clearing Network Code	Specify the clearing network code.
Clearing Network Description	Specify the description of the clearing network code.

- Click **Save**.
The summary view is displayed with the configured details of network codes.

20.25 Maintain Denomination Variations

The **Denomination Variation Maintenance** screen is used to maintain the denomination-wise variations.

In some countries, the local banking practice is to buy various FX currency denominations with different rates and lower denominations, which becomes a lower rate. This screen helps to apply rates for different denominations.

To maintain denomination variations:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Denomination Variation Maintenance** or specify **Denomination Variation Maintenance** in the search icon bar and select the screen.

The **Denomination Variation Maintenance** summary screen is displayed.

Figure 20-48 Denomination Variation Maintenance (Summary)

2. Click the  icon.

The **Denomination Variation Maintenance** screen is displayed.

Figure 20-49 Denomination Variation Maintenance (New)

3. On the **Denomination Variation Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-31 Denomination Variation Maintenance - Field Description

Field	Description
Currency 1	Select the currency from the list of values.
Currency 2	Displays the currency 2.
Maintenance Country	Displays the maintenance country.
Rate Type	Select the rate type from the list of values.
Denomination ID	Select the denomination ID from the list of values.
Buy Variance	Specify the buy variance.
Sell Variance	Specify the sell variance.

4. Click **Save**.

The summary view is displayed with the configured details of denomination-wise variations.

20.26 Maintain External Bank Codes

The **External Bank Code** screen is used to maintain the bank codes and branch codes.

To maintain external bank codes:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **External Bank Code** or specify **External Bank Code** in the search icon bar and select the screen.

The **External Bank Code** summary screen is displayed.

Figure 20-50 External Bank Code (Summary)

2. Click the  icon.

The **External Bank Code** screen is displayed.

Figure 20-51 External Bank Code (New)

3. On the **External Bank Code** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**
The fields, which are marked with an asterisk, are mandatory.

Table 20-32 External Bank Code - Field Description

Field	Description
Bank Code	Specify the bank code.
Bank Name	Specify the name of the bank.
Branch Code	Specify the branch code.
Branch Name	Specify the branch name.
Branch Address 1 to Branch Address 4	Specify the address of the branch.

4. Click **Save**.
The summary view is displayed with the configured details of external bank and branch codes.

20.27 Maintain Issuer Codes

The **Issuer Code Maintenance** screen is used to maintain the issuer codes for TC transactions.

To maintain issuer codes:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Issuer Code Maintenance** or specify **Issuer Code Maintenance** in the search icon bar and select the screen.

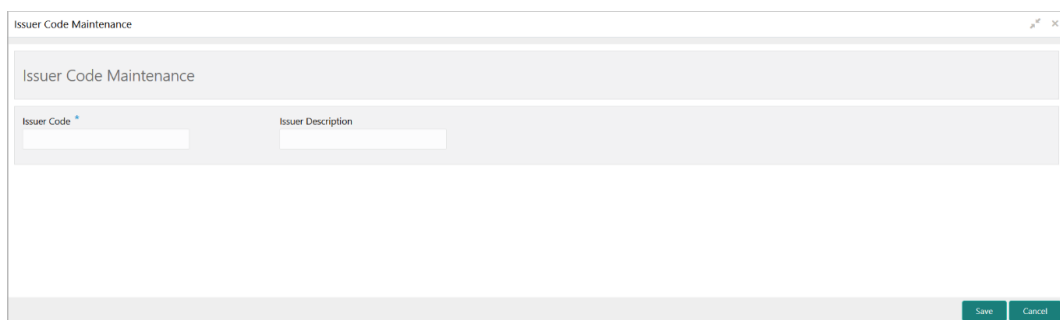

The **Issuer Code Maintenance** summary screen is displayed.

Figure 20-52 Issuer Code Maintenance (Summary)

- Click the  icon.
The **Issuer Code Maintenance** screen is displayed.

Figure 20-53 Issuer Code Maintenance (New)

- On the **Issuer Code Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Field	Description
Issuer Code	Specify the issuer code.
Issuer Code Description	Specify the description of the issuer code.

- Click **Save**.
The summary view is displayed with the configured details of issuer codes.

20.28 Maintain Utility Providers

The **Utility Provider Maintenance** screen is used to link the utility provider with a settlement account.

The examples of utility providers are as follows:

- Electricity
- Gas

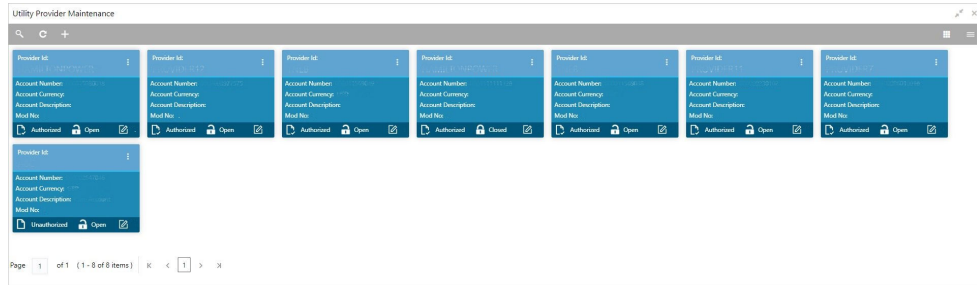

- Water

To maintain utility providers:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Utility Provider Maintenance** or specify **Utility Provider Maintenance** in the search icon bar and select the screen.

The **Utility Provider Maintenance** summary screen is displayed.

Figure 20-54 Utility Provider Maintenance (Summary)

2. Click the  icon.

The **Utility Provider Maintenance** screen is displayed.

Figure 20-55 Utility Provider Maintenance (New)

3. On the **Utility Provider Maintenance** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-34 Utility Provider Maintenance - Field Description

Field	Description
Provider ID	Click the search icon, and select the provider ID from the list of values.
Provider Description	Specify the description of the utility provider.
Provider Settlement Account	Click the search icon, and select the provider settlement account from the list of values.

4. Click **Save**.

The summary view is displayed with the configured details of utility providers.

20.29 Maintain Account Entitlement Restriction

This screen is used to maintain the Account Entitlement Group by grouping the set of Customer accounts. To process this screen, type **Account Entitlement Restriction** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. On the Homepage, from **Teller** mega menu, under **Branch Maintenance**, click **Account Entitlement Restriction** or specify **Account Entitlement Restriction** in the search icon bar and select the screen.

The **Account Entitlement Restriction** summary screen is displayed.

Figure 20-56 Account Entitlement Restriction (Summary)

2. Click the  icon.

The **Account Entitlement Restriction** screen is displayed.

Figure 20-57 Account Entitlement Restriction (New)

3. On the **Account Entitlement Restriction** screen, specify the fields. For more information on fields, refer to the field description table.

 **Note:**

The fields, which are marked with an asterisk, are mandatory.

Table 20-35 Account Entitlement Restriction - Field Description

Field	Description
Account Entitlement Code	Click search icon, and select the account entitlement code from the list of values.
Restriction Type	Select restriction type from the radio list from the following drop-down values: <ul style="list-style-type: none"> • Allowed • Disallowed
Function Code Details	Specify the fields.
Function Code	Click search icon, and select the function code from the list of values.
Function Code Description	Displays the description of the function code.

4. Click **Save**.

The summary view is displayed with the configured details of utility providers.

A

Error Codes and Messages

The error codes and messages that are available for the Oracle Banking Branch application are provided in this appendix. The error codes with the prefix GCS apply only to the maintenance screens, and the remaining error codes apply to all the transaction screens.

Table A-1 Error Codes and Messages

Error Code	Message
CLMO-AC-003	Source stage value should be either Y/N not valid
CLMO-AC-017	DatasegmentCode not valid

C

Advices

The formats of various advices that are available for the Oracle Banking Branch application are provided in this appendix.

Topics

- [Account Transfer](#)
- [Cash Deposit](#)
- [Cash Withdrawal](#)
- [Cheque Deposit](#)
- [Cheque Withdrawal](#)
- [DD Issue Against Account](#)
- [Domestic Transfer Against Account](#)

Account Transfer

The advice format for Account Transfer transactions is given below:

TRANSACTION RECEIPT

txnDate txnBranchCode, Clinton Branch
Receipt # txnRefNumber

Transaction : functionCodeDesc
Sequence Number : tellerSeqNumber
From Account Number : fromAccountNumber
To Account Number : toAccountNumber
Amount : toAccountAmt toAccountCcy
Commission Charges : totalCharges toAccountCcy
Narrative : narrative
Teller ID : userId

(This slip do not require signature)

Cash Deposit

The advice format for Cash Deposit transactions is given below:

TRANSACTION RECEIPT

txnDate txnBranchCode, Clinton Branch
Receipt # txnRefNumber

Transaction : functionCodeDesc
Sequence Number : tellerSeqNumber
Account Number : toAccountNumber

Amount : toAccountAmt toAccountCcy
 Narrative : narrative
 Teller ID : userId
 Total Charges : totalCharges toAccountCcy

chargeCode	chargeCcy	chargeAmt
F chargeCode	chargeCcy	chargeAmt E

 Teller Officer/Manager

Cash Withdrawal

The advice format for Cash Withdrawal transactions is given below:

TRANSACTION RECEIPT

txnDate txnBranchCode, Clinton Branch
 Receipt # txnRefNumber

 Transaction : functionCodeDesc
 Sequence Number : tellerSeqNumber
 Account Number : fromAccountNumber
 Amount : fromAccountAmt fromAccountCcy
 Commission Charges : totalCharges fromAccountCcy
 Narrative : narrative
 Teller ID : userId

chargeAmt	chargeCcy	chargeCode
F chargeAmt	chargeCcy	chargeCode E

Teller Officer/Manager

Cheque Deposit

The advice format for Cheque Deposit transactions is given below:

TRANSACTION RECEIPT

Receipt #txnRefNumber

 txnDate txnBranchCode, Clinton Branch

Transaction : functionCodeDesc
 Sequence Number : tellerSeqNumber
 Account Number : toAccountNumber
 Cheque Number : chequeNumber

```

Routing Number      : routingNo
Amount              : toAccountAmt toAccountCcy
Commission Charges  : totalCharge toAccountCcy
Narrative           : narrative
Teller ID           : userId

```

```
-----
Teller                                     Officer/Manager

```

Cheque Withdrawal

The advice format for Cheque Withdrawal transactions is given below:

TRANSACTION RECEIPT

```

txnDate          txnBranchCode, Clinton Branch
Receipt # txnRefNumber

```

```
-----
Transaction      : functionCodeDesc
Sequence Number  : tellerSeqNumber
Account Number   : fromAccountNumber
Amount           : fromAccountAmt fromAccountCcy
Commission Charges : totalCharges fromAccountCcy
Narrative        : narrative
Teller ID        : tellerId

```

```
-----
Teller                                     Officer/Manager

```

DD Issue Against Account

The advice format for DD Issue Against Account transactions is given below:

TRANSACTION RECEIPT

```

txnDate          txnBrnCode, Clinton Branch
Receipt # txnRefNo

```

```
-----
Transaction      : functionCodeDesc
Sequence Number  : tellerSeqNumber
Account Number   : fromAccNo
In favour of     : payeeName
Amount           : fromAccAmt fromAccCcy
Commission Charges : totalCharges fromAccountCcy
Narrative        : narrative
Teller ID        : userId

```

```
-----
(This slip do not require signature)

```

Domestic Transfer Against Account

The advice format for Domestic Transfer Against Account transactions is given below:

TRANSACTION RECEIPT

```

txnDate          txnBranchCode, Clinton Branch

```

Receipt # txnRefNumber

Transaction : functionCodeDesc
Sequence Number : txnSeqNumber
Account Number : fromAccountNumber
Beneficiary Bank : bankDesc
Beneficiary Name : txnCustomer
Clearing Type : FEDWIRE
Transfer Amount : fromAccountAmt fromAccountCcy
Commission Charges : totalCharges fromAccountCcy
Narrative : narrative
Teller ID : userId

(This slip do not require signature)

D

Order of Replacing Parameters with Wild Card Entries

The order of replacing parameters with wild card entries is required for the Accounting and Settlements Definition and Charge Decision Maintenance.

Table D-1 Order for Accounting and Settlements Definition

Function Code	Branch	Currency
Function Code	Txn Branch	Txn Currency
Function Code	*.*	Txn Currency
Function Code	Txn Branch	*.*
Function Code	*.*	*.*

E

Static Maintenance Parameters

The descriptions for the column names of the significant parameters in the static maintenance tables are provided in this appendix. If required, the user needs to modify these parameters in the respective static maintenance tables.

Table E-1 Columns in SRV_TM_BC_FUNCTION_INDICATOR Table

Column Name	Description
<i>CROSS_CCY_ENABLED</i>	<p>This column indicates whether the cross-currency is allowed for a transaction or not. The user can modify this flag to enable/disable the cross-currency configuration. Possible values are as follows:</p> <ul style="list-style-type: none"> • Y – Yes • N – No <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>When the value is set to N, the Exchange Rate fields will be hidden.</p> </div>
<i>DENOM_VARIANCE</i>	<p>This column indicates the applicability of denomination variance. The user can modify this flag to enable/disable the denomination variance. Possible values are as follows:</p> <ul style="list-style-type: none"> • Y – Yes • N – No <div style="border-left: 2px solid #0070C0; padding-left: 10px; margin-top: 10px;"> <p> Note:</p> <p>This flag applies only to the function codes – 8004, 8203, 8206, and 8207.</p> </div>
<i>IS_NEGOTIATED_RATE_ENABLED</i>	<p>This column indicates whether the Negotiated Exchange Rate field is required on the screen or not. The user can modify this flag to enable/disable the Negotiated Exchange Rate for a specified screen. Possible values are as follows:</p> <ul style="list-style-type: none"> • Y – Yes • N – No
<i>IS_REVERSAL_SUPP</i>	<p>This column indicates whether the transaction reversal is supported or not. The user can modify this flag to enable/disable the reversal for a particular transaction. Possible values are as follows:</p> <ul style="list-style-type: none"> • Y – Yes • N – No

Table E-1 (Cont.) Columns in SRV_TM_BC_FUNCTION_INDICATOR Table

Column Name	Description
<i>IS_TELLER_SEQ_REQ</i>	This column indicates whether the Teller Sequence Number generation is required or not. The user can modify this flag to enable/disable the Teller Sequence Number generation for a particular transaction. Possible values are as follows: <ul style="list-style-type: none"> • Y – Yes • N – No
<i>IS_TOT_CHARGES_REQ</i>	This column indicates whether the Total Charges field is required on the screen or not. The user can modify this flag to enable/disable the Total Charges for a particular transaction. Possible values are as follows: <ul style="list-style-type: none"> • Y – Yes • N – No

Table E-2 Columns in SRV_TB_BC_ARCHIVAL Table

Column Name	Description
<i>ARCHIVAL_DAYS</i>	This column indicates the number of days required for the archival. The user can modify this flag to update the number of days.
<i>BRANCH_CODE</i>	This column indicates the Branch Code, based on which the lookup of Archival details will happen. It refers to the branch in which the archival will happen. The user can modify this flag to update the Branch Code.
