## Purpose

This user guide provides you detailed information about the Loan Service module of Oracle Banking Branch.

## Audience

This guide is intended for the Loan Servicing Officers, Branch Tellers, and Branch Supervisors to provide quick and efficient services to the customers of the bank.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### **Access to Oracle Support**

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins [Critical Patches](#), [Security Alerts and Bulletins](#). All critical patches should be applied in

a timely manner to ensure effective security, as strongly recommended by Oracle Software Security Assurance [Oracle Software Security Assurance](#).

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

The list of the acronyms and abbreviations used in this guide are as follows:

**Table 1 List of Acronyms and Abbreviations**

Abbreviation	Description
CASA	Current Account Savings Account
GL	General Ledger
LCY	Local Currency
FCY	Foreign Currency

## Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Basic Actions

Most of the screens contain buttons to perform all or few of the basic actions.

**Table 2 Basic Actions**

Action	Applicable Stages	Description
<b>Next</b>	Initiation, Approval and Hand off Retry	On completion of input of all parameters for a particular stage, you can click <b>Next</b> to navigate to the next tab.
<b>Back</b>	Initiation, Approval and Hand off Retry	In case you missed to specify or need to modify the details in the previous tab, click to navigate to the previous tab.
<b>Save &amp; Close</b>	Initiation	On click of <b>Save &amp; Close</b> , the input details are saved, and the transaction screen is closed. In case a transaction must be closed midway due to a lack of sufficient information, the maker of the transaction can choose this option. The saved transaction details will be available in <b>My Task</b> . You can select the transaction from <b>My Task</b> and proceed with the transaction or delete it.
<b>Cancel</b>	Initiation, Approval and Hand off Retry	On click of <b>Cancel</b> , the transaction input is cancelled midway without saving any data. You are alerted that the input data would be lost before confirming the cancellation.
<b>Submit</b>	Initiation	After submitting the initiation stage, the system validates the transaction with the host and displays the errors or overrides if any. In case of an error, you can modify and resubmit or cancel the transaction. In case of an override, you can modify and resubmit or proceed with the transaction by accepting the overrides.
<b>Approve</b>	Approval	The system displays a section where approval remarks if any can be input. Click <b>OK</b> to submit. The transaction is sent to the Host system through OBRH. The Host system validates the transaction again and the transaction is created if all the validations are successful. If the transaction fails, the system displays an error message, and the transaction is moved to Hand-off retry stage. In this stage, the authorizer can retry or reject the transaction. On reject, the transaction is sent back to the maker to modify or delete it.
<b>Reject</b>	Approval and Hand off Retry	On click of <b>Reject</b> , a transaction is rejected is by the authorizer. The system displays a pop-up screen to capture the Rejection remarks if any. Click <b>OK</b> for the transaction to be routed back to the initiation stage. Subsequently, the maker can modify or delete the transaction details.
<b>Minimize</b>	Initiation, Approval and Hand-off Retry	On click of <b>Minimize</b> , the transaction input screen is minimized. When the screen is minimized, it appears as to a separate tab within the same web page.
<b>Maximize</b>	Initiation, Approval and Hand off Retry	On click of <b>Maximize</b> , the transaction input screen is maximized. You can proceed with the required action on the screen.
<b>Reset</b>	Hand off Retry	The <b>Reset</b> button clears all the details previously modified by you and populates the fields with default values.

Table 2 (Cont.) Basic Actions

Action	Applicable Stages	Description
<b>Remarks</b>	Initiation, Approval and Hand-off Retry	<b>Remarks</b> can be used either by the maker or the authorizer of the transaction to optionally capture useful information about the transaction.
<b>Host Error</b>	Hand Off Retry	<b>Hand off Retry</b> comes into use whenever a transaction input from the mid-office system fails authorization due to Host System rejection. The authorizer of the transaction can view the reason for Host rejection and take appropriate action.
<b>Overrides</b>	Initiation, Approval and Hand-off Retry	<p>If override messages had appeared during initiation stage and they were accepted by the maker during submission, the <b>Overrides</b> button appears in the Initiation screen if the transaction is subsequently rejected by the authorizer. On the <b>Override Details</b> section, click <b>Decline</b> to go back to the transaction screen to modify or cancel it, or click <b>Accept</b> to complete the initiation stage and move the transaction to the approval stage.</p> <p>The <b>Overrides</b> button is displayed in the Approval and Hand-off retry stage if there were any override messages generated during initiation and accepted by the maker. When the <b>Overrides</b> button is clicked, the system displays the overrides accepted by the maker. After verifying the transaction and override details, the authorizer can either approve or reject the transaction.</p> <p>The existing Approve Transaction section is modified to display the overrides, if any overrides are raised during the initiation submits.</p>
<b>Document</b>	Initiation, Approval and Hand-off Retry	The maker of the transaction can click <b>Document</b> to upload documents that are relevant to the transaction. Once uploaded, the documents are available for viewing during authorization or by the maker.
<b>Change Log</b>	Approval	When the authorizer clicks <b>Change Log</b> button, the system displays the changes made to the transaction in a pop-up window. By default, the change log is set to display only modified values. The Change Log button has two options, they are, All and Updated. The All button displays both modified and non-modified fields and the Updated button displays only the modified fields. The old and new values are displayed so that the authorizer can compare or verify the values and decide on further action. Also, the new values appear in red for easy recognition.
<b>Delete</b>	Initiation	The <b>Delete</b> button is applicable only for the Maker screen and that too when the screen is opened from the Task list. In other words, only saved tasks opened in editable mode have delete functionality.
<b>Advices</b>	Initiation	The <b>Advices</b> button helps the Maker to generate a pre-advice or acknowledgement to get a confirmation from his customer.

**Table 2 (Cont.) Basic Actions**

Action	Applicable Stages	Description
<b>Auto Authorization</b>	Initiation	<p>The auto authorization can be configured for the branch servicing screens by creating a Rule based on life cycle code. ## Dashboard

The Dashboard offers users a comprehensive view of the bank's activities, assisting them in effectively managing the transaction life cycle for various tasks.

**Figure 1-1 Dashboard**

- [Servicing Tasks](#)  
This topic describes the process of viewing, acquiring, releasing, and tracking the transactions that was performed during the day.

### 1.1 Servicing Tasks

This topic describes the process of viewing, acquiring, releasing, and tracking the transactions that was performed during the day.

The Servicing Tasks widget offers a comprehensive overview of the day's servicing transaction status and the tasks that need to be completed, eliminating the need to check multiple pages for information.

You can check the number of transactions based on your user rights. This includes free tasks, acquired or pending tasks, tasks waiting for approval, rejected or failed tasks, and completed tasks. You also have the option to search for or filter specific transactions and examine them in detail within each category.

1. On the **Dashboard** screen, the **Servicing Tasks** widget is displayed:  
For more information on fields, refer to the field description table.

Table 1-1 Servicing Tasks - Field Description

Field	Description
<b>Free Task</b>	Displays the number of free tasks available either for editing or claiming based on the rights. When a user clicks on a number, the system executes the action for the task. If the user does not have the necessary authorization, then the system displays a zero instead.
<b>Acquired/Draft Tasks</b>	Displays the tasks that are pending authorization and those where a servicing screen was opened, actions were taken, and then saved and closed for later continuation. Based on the user's authorization rights, if the user has Maker rights, they can take tasks from Free Tasks for further processing. In this case, the Draft numbers should be filled in. The counts for <b>Acquired</b> and <b>Draft Tasks</b> are also shown on the <b>My Pending Tasks</b> page. You can recognize them as tasks that are either in Approval or Incomplete status. Also, if a transaction is rejected or when it fails, the number is also populated in this field.
<b>Pending Apporval Tasks</b>	Displays the number of approvals pending for the transactions. The values in this field are displayed in following two scenarios: <ul style="list-style-type: none"> <li>• Pending approval tasks refer to those that the creator has submitted after finishing the initiation task. Once the initiation is done, the user can locate the task on the free task page for approval. Therefore, this field indicates tasks that the creator has completed but still need to be approved or acted upon.</li> <li>• The maker and the first authorizer will display this field after a transaction has been approved in a multi-auth set up. So, there is a track of the transaction count that each role has performed during the day.</li> </ul>
<b>Failed/Rejected Tasks</b>	Displays the number of transactions that are failed or rejected. The following are the scenarios, where the transactions that are failed and rejected are displayed, based on the rights: <ul style="list-style-type: none"> <li>• If a maker's transaction is rejected by the authoriser, it is returned to the maker. The rejected transaction will now appear as such on the <b>My Pending Tasks</b> page.</li> <li>• If a transaction does not pass host validation during authorization, the authorizer changes its status to Failed and shows it on the <b>My Pending Tasks</b> page.</li> </ul>
<b>Completed Tasks</b>	Displays the transactions that are completed from maker as well as checker perspective.

2. Click the **Refresh** icon to load the latest value.

## Overview of Retail Lending Services

The **Retail Lending Services** module of **Oracle Banking Branch** facilitates various operations of a loan account.

This topic contains the following subtopics:

- [Prerequisites](#)  
Before you begin performing the transaction, you need to log in to **Oracle Banking Branch** homepage.
- [Main Menu](#)  
The main menu of the **Loan Service** module is a mega menu that displays all the menu items visible at once.
- [Common Action](#)  
The common actions for **Loan Service** screens are covered in this topic.
- [Oracle Digital Assistance](#)  
You can reduce the time taken to access the transaction screens through automatic text or voice processing using the Oracle Digital Assistant (ODA).

### 2.1 Prerequisites

Before you begin performing the transaction, you need to log in to **Oracle Banking Branch** homepage.

For information on how to log in, refer to the *Getting Started User Guide*.

### 2.2 Main Menu

The main menu of the **Loan Service** module is a mega menu that displays all the menu items visible at once.

It is a large panel divided into groups of menu items, which simplifies the navigation. The menu items are grouped based on the type of operation to be performed. In addition, the **Menu Item Search** helps to search and select a specific screen to navigate to any screen from the main menu items. The main menus are listed below:

- **Accounts**
- **Balances**
- **Instruction Preferences**
- **Repayment**
- **Schedule**

The main menus are further categorized into specific functions that are represented by menu items in the Mega Menu.

<b>Search by</b>	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div style="border: 1px solid #0070C0; padding: 10px; margin-top: 10px;"> <p> <b>Note:</b></p> <p>The label of the field adjacent to the Search by field changes dynamically. For example, if the Account number is chosen as the search criteria, the label of the adjacent field is displayed as the Account Number. If SSN is chosen as the search criteria, then the adjacent field would display the label as SSN.</p> </div>

## Balances

Under the **Balance** menu, you can view the balance details of a loan account.

This topic contains the following subtopics:

- [Account Statement](#)  
You can generate loan statement as per the customer's request with the help of available features like date range or preset range definitions using the **Account Statement** screen.
- [Outstanding Balance Inquiry](#)  
You can inquire about the outstanding balance of an account using the **Outstanding Balance Inquiry** screen.

### 4.1 Account Statement

You can generate loan statement as per the customer's request with the help of available features like date range or preset range definitions using the **Account Statement** screen.

**To view the account statement:**

#### Note:

The fields marked as **Required** are mandatory.

1. On the **Homepage**, from **Retail Lending Services** mega menu, under **Balances**, click **Account Statement**. You can also open the screen by specifying **Account Statement** in the search icon bar and selecting the screen.

The **Account Statement** screen is displayed.

**Figure 4-1 Account Statement**

The screenshot shows the 'Account Statement' interface. At the top, there is a title bar with 'Account Statement' and window control icons. Below the title bar, there are two main sections: 'Search by' and 'Date Range'. The 'Search by' section has a dropdown menu with 'Account number' selected. The 'Date Range' section has a dropdown menu with 'Date Range' selected. To the right of the 'Date Range' dropdown, there are two date input fields with calendar icons, separated by 'To'. Both date input fields are marked as 'Required'. Below the date input fields, there is a 'Generate' button. The background of the screen has a subtle pattern of overlapping circles.

2. Select the appropriate option from the **Search by** field.

3. Perform the required action, based on the option selected from the **Search by** field.
4. Click **Generate**.

The **Account Statement** section is displayed.

The statements are displayed if they are generated for the account number on the given system date.

**Figure 4-2 Account Statement for Required Period**

The screenshot shows the 'Account Statement' application window. At the top, there are three search criteria: 'Search by' with a dropdown menu set to 'Account number', 'Account Number' with the value '001CONM180890004' and a search icon, and 'Account Description' with the value 'RONY THOMAS'. Below these, there is a 'Period' section with a 'Date Range' dropdown set to 'Date Range' and a 'Date Range' input field showing 'January 7, 2018' to 'March 30, 2018' with calendar icons. A 'Generate' button is located to the right of the date range. Below the search fields, the 'Account Statement' section is displayed, showing a document icon, the text 'Statement from January 7, 2018 to March 30, 2018', and 'Document Reference 001M5OG180890242'. To the right of this text are 'View' and 'Print' links.

5. On the **Account Statement** screen, select the required date to generate statement. For more information on fields, refer to field description table below:

## Instruction Preferences

Under **Instructions Preferences** menu, you can view or set instructions and preferences of loan account.

This topic contains the following subtopics:

- [Payment Preferences](#)  
You can view and modify payment preferences to the loan account using the **Payment Preferences** screen.
- [Loan Preferences](#)  
You can view or modify the loan account preferences that were set during the account opening process using the **Preferences** screen.

### 5.1 Payment Preferences

You can view and modify payment preferences to the loan account using the **Payment Preferences** screen.

You cannot modify the preferences for the account if instructions are already executed.  
**To view or modify the payment preferences:**

#### Note:

The fields marked as **Required** are mandatory.

1. On the **Homepage**, from **Retail Lending Services** mega menu, under **Instructions Preferences**, click **Payment Preferences**. You can also open the screen by specifying **Payment Preferences** in the search icon bar and selecting the screen.

The **Payment Preferences** screen is displayed.

**Figure 5-1 Payment Preferences**

The screenshot shows the 'Payment Preferences' interface. At the top, there's a title bar with 'Payment Preferences' and a 'Remarks' button. Below that, a search section includes a dropdown menu for 'Search by' (currently set to 'Account number') and a search input field for 'Account Number' with a search icon and a 'Required' label. A message below the search fields says 'Please enter account number to perform the operation'. At the bottom right, there are 'Cancel' and 'Submit' buttons.

2. Select the appropriate option from the **Search by** field.
3. Perform the required action, based on the option selected from the **Search by** field.

The details are displayed in the **Default Debit Account** and **Default Credit Account** sections.

**Figure 5-2 View or Modify Payment Preferences**

The screenshot shows the 'Payment Preferences' interface. At the top, there is a title bar with a 'Remarks' button and window controls. Below the title bar, there are three search filters: 'Search by' with a dropdown menu set to 'Account number', 'Account Number' with a text input containing '001CONM180890004' and a search icon, and 'Account Description' with a text input containing 'RONY THOMAS'. The main content area is divided into two sections: 'Default Debit Account' and 'Default Credit Account'. The 'Default Debit Account' section contains a table with columns: Components, Type, Account/Ledger, Branch, Currency, Verify Funds, and Action. It lists two entries: 'MAIN\_INT' and 'PRINCIPAL', both of type 'Ledger' with account number '261100005', branch '000', and currency 'GBP'. The 'Verify Funds' column is set to 'Yes' for both, and each has an edit icon in the 'Action' column. The 'Default Credit Account' section contains a table with columns: Components, Account, Branch, Currency, and Action. It lists one entry: 'PRINCIPAL' with account number '261100005', branch '000', and currency 'GBP', with an edit icon in the 'Action' column. At the bottom right of the form, there are 'Cancel' and 'Submit' buttons.

## 7.2.2 Modifying Loan Details

The **Modify Loan** tab displays the values as maintained in the host. Here, you can update the values based on the minimum and maximum range based on the parameter maintained in the host.

You can update the values by moving the slider or specifying the value. If you update by moving the slider, then the system updates the **Loan Amount**, **Term**, and **Current Installment** values. If you specify the value, then the system adjusts the slider of the **Loan Amount**, **Term**, and **Current Installment** fields accordingly.

Based on your actions, the values are updated and displayed in the right widget. For more information, refer [Viewing Stimulation Details](#).

**To modify the loan details:**

1. Navigate to the screen and fetch the account. For more information, refer [Navigating and Fetching Account](#).

<p><b>Search by</b></p>	<p>Users can search for an account number by using any of the available search criteria.</p> <p>The account number is set as the default search option. Users can specify the account number directly in the adjacent field or search for an account number by clicking the Search icon. Users can also search for the specific account number by providing customer ID, account number, or account name.</p> <p>Other search options available in the Search by field are Customer ID, SSN, Mobile Number, and Email.</p> <p>A specific customer ID can be searched by providing the customer name or customer ID. If SSN, mobile, or email IDs are chosen to find an account number, the respective IDs have to be input entirely in the adjacent field for the system to display the account number. For a given search criteria, multiple account numbers may be linked.</p> <p>For example, two or more account numbers can be linked to a single mobile number. In such cases, the system displays all the account number matches and the user can select the relevant account number on which to perform a servicing operation.</p> <div data-bbox="737 852 1466 1136" style="border: 1px solid #0070C0; padding: 10px; margin-top: 20px;"> <p> <b>Note:</b></p> <p>The label of the field adjacent to the Search by field changes dynamically. ## 7.2.7 Viewing Simulation Details

Based on your actions performed on **Value Date**, **Sanctioned**, **Term**, and **Current Installment** fields from the **Modify Loan** tab, the system updates and displays the value on the right widget.

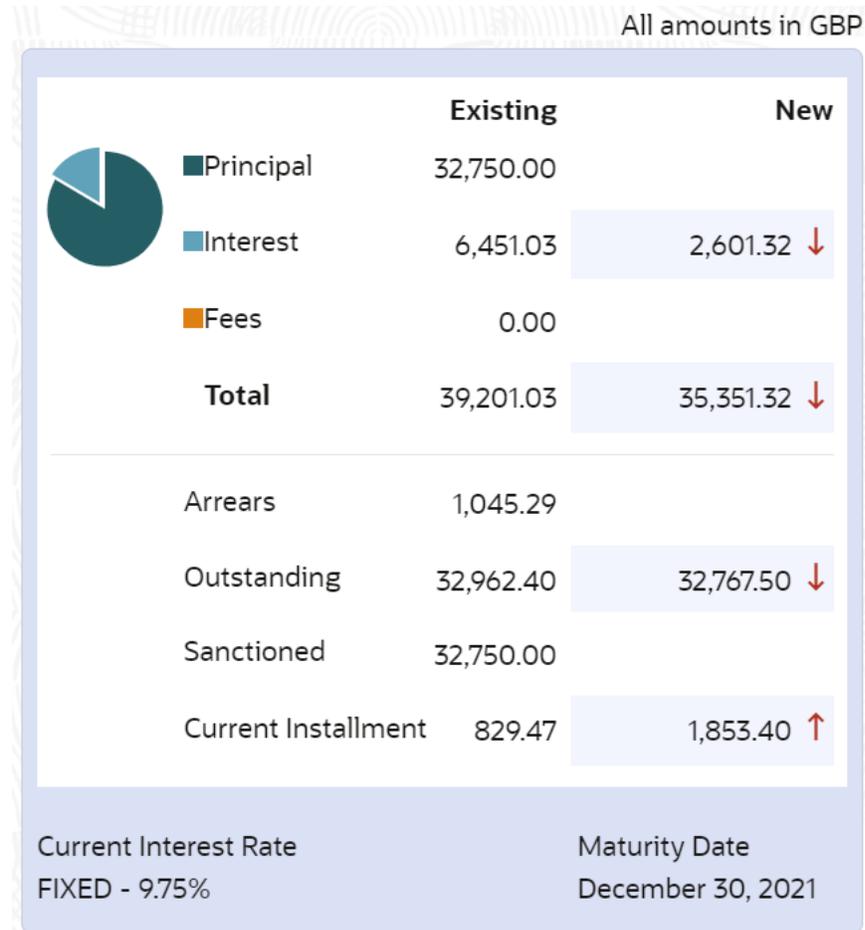

If there is an increase in the value compared to earlier value, then the  icon is displayed next to the field. If there is a decrease in the value compared to earlier value, then the  icon is displayed. Also for quick reference, the fields having a new or updated value is highlighted with a different color compared to the values that are not changed. A Pie Chart representing the Principal, Interest, and Fees values also appears for a graphical representation. Each time you move the slider or specify the value, the amount and terms are recomputed and displayed. Here, accordingly you can decide whether the new amounts and term can meet your requirements and take appropriate actions. In addition, to understand the widget better, a legend is displayed at the bottom of the widget.

**To view the stimulation details:**

1. Navigate to the screen and fetch the account. For more information, refer [Navigating and Fetching Account](#).
2. From the **Modify Loan** tab, update the values as required. For more information, refer [Modifying Loan Details](#).

The values are updated and displayed with an upward or downward indicator in the right widget.
