Preface

This topic contains the following sub-topics:

- [Introduction](#)
- [Audience](#)
- [Abbreviations](#)
- [Conventions](#)
- [List Of Topics](#)
- [Related Documents](#)
- [Symbols, Definitions and Abbreviations](#)

Introduction

This document helps you acquaint with the information on inter-connecting Oracle Banking Corporate Lending (OBCL) with Oracle Financial Services Analytical Application (OFSAA).

Besides this user manual, while maintaining the interface related details, you can invoke the context sensitive help available for each field in OBCL. This help describes the purpose of each field within a screen. You can obtain this information by placing the cursor on the relevant field and striking the <F1> key on the keyboard.

Audience

This manual is intended for the following User/User Roles

Table 1 Audience

Role	Function
Back office clerk	Input functions for contracts
Back office managers/officers	Authorization functions
Product Managers	Product definition and authorization
End of day operators	Processing during end of day/ beginning of day
Financial Controller / Product Managers	Generation of reports

Abbreviations

The following are some of abbreviations you are likely to find in the manual.

Table 2 Abbreviation

Abbreviation	Description
System	Unless and otherwise specified, it always refers to Oracle FLEXCUBE Universal Banking system
FCUBS	Oracle FLEXCUBE Universal Banking System
OFSAA	Oracle Financial Services Analytical Applications
DIH	Data Integration Hub
Source System	Oracle Banking Corporate Lending (OBCL)
EOD	End of Day
EOFI	End of Financial Input
OBCL	Oracle Banking Corporate Lending
OL	Oracle Lending
OD	Overdraft

Conventions

The following text conventions are used in this document:

Table 3 Conventions and Meaning

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

List Of Topics

This manual is organized into the following topics.

Table 4 List Of Topics

Topics	Description and Cross References
Preface	This topic provides the general information about the manual on the intended audience. It also lists the various topics covered in the User Manual.

Table 4 (Cont.) List Of Topics

Topics	Description and Cross References
OBCL - OFSAA Integration	This topic explains the integration between OBCL and Oracle Financial Services Analytical Applications. The topics which are part of OBCL - OFSAA Integration are: <ol style="list-style-type: none"> 1. Scope 2. Prerequisites 3. Integration Architecture 4. Integration Process 5. OBCL - OFSAA Integration 6. Assumptions
Annexure	Annexure provides the details of data exchange.

Related Documents

Along with this user manual you may also refer the following related resources:

OBCL - OFSAA Integration

The integration between the Oracle Banking Corporate Lending (OBCL) and the Oracle Financial Services Analytical Applications (OFSAA) enables the financial institutions to:

- get insights to customer patterns based on the data captured in core banking
- achieve end-to-end improvement in business delivery
- achieve effective performance and risk free management using the available customer data

The integration between OBCL and OFSAA enables you transfer data from OBCL to OFSAA. The transfer of data from OBCL to OFSAA is performed through staging table using DIH connector.

This topic contains the following sub-topics:

- [Scope](#)
- [Prerequisites](#)
- [Integration Architecture](#)
- [Integration Process](#)
- [OBCL - OFSAA Integration](#)
- [Assumptions](#)

1.1 Scope

This topic describes the scope of the integration with respect to each system, that is OBCL and OFSAA.

Integration Scope in Oracle Banking Corporate Lending

During the integration following data are provided to OFSAA in the OBCL staging table.

Table 1-1 OBCL Staging

Module	Hand Off Details
Bilateral Loans	<ul style="list-style-type: none">• Loan contracts transaction details• Corporate loan contracts details• Repayment schedule of contracts such as corporate loans• Loan Write Off details• Loan recovery details
Loan Syndication	<ul style="list-style-type: none">• Corporate loan contracts transaction details• Corporate loan contracts details

Integration Scope in Oracle Financial Services Analytical Applications

For further information on integration scope in OFSAA, refer to the following user manuals:

- *FCUBS Connectors User Guide*
- *Data Integration Hub User Guide*

1.2 Prerequisites

This topic contains the following sub-topics:

- [Prerequisites in Oracle Banking Corporate Lending](#)
- [Prerequisites in Oracle Financial Services Analytical Applications](#)

1.2.1 Prerequisites in Oracle Banking Corporate Lending

Set up Oracle Banking Corporate Lending Application. OFSAA user has read-only access to this application. The access is provided only to particular extraction tables.

This topic contains the following sub-topic:

- [Maintenances](#)

1.2.1.1 Maintenances

Complete the maintenances discussed below.

Maintaining Batch Programs

You need to maintain the batch program **OLXTRACT** using **Mandatory Batch Program Maintenance (EIDMANPE)** screen. This batch extracts the data from Oracle FLEXCUBE during **End of Financial Input (EOFI)** stage. It is recommended that the extraction of data from OBCL is done from the reporting environment and not the production environment. You also need to maintain the extraction routine.

Maintaining Extraction Routines

You can maintain the data extraction routines in the maintenance table called **OLTMS_DEST_ES_TABLES**. This table is used to maintain extraction routines and should be maintained manually with the following values along with other details.

- **ORD_OF_EXT** - Order of extraction in which routine will be executed. This should be a unique value.
- **TABLE_NAME** - Name of the staging table to be populated with data.
- **ROUTINE** - Routine to be executed. The format should be **Package.procedure**.
- **INTEGRATION_NAME** - **OFSAA**

All the parameters such as extraction date, previous extraction date, log required and so on are maintained in maintenance table **OLTB_EIS_CS_PARAM**. In this table the **KEYID** is the primary key.

1.2.2 Prerequisites in Oracle Financial Services Analytical Applications

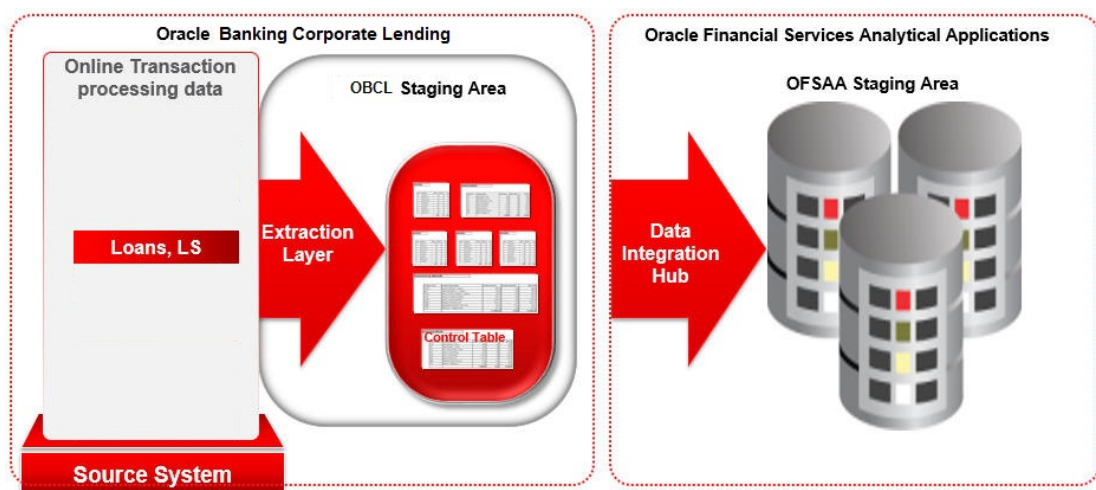

For further information on prerequisites in OFSAA, refer to the following user manuals:

- *FCUBS Connectors User Guide*
- *Data Integration Hub User Guide*

1.3 Integration Architecture

The following diagram provides information on the integration architecture followed in OBCL-OFSAA integration.

Figure 1-1 Integration Architecture

1.4 Integration Process

OBCL has pre-defined staging tables required for OFSAA extracts. During EOFI batch, the module wise data is extracted to staging tables in OBCL. OBCL provides a control table to indicate successful data extraction. OFSAA pulls the data from the tables in OBCL using the DIH connector.

The transfer or extraction of data from OBCL to OFSAA differs based on the staging tables as follows:

- Master table - Incremental data between two extraction dates are transferred.
- Maintenances and contract tables - Entire transaction data are transferred in each extraction.
- Transaction table - Data related to the transactions created on the extraction date are transferred.

During data extraction you can check the status of the extraction routines in the table **OLTB_JOB_ES_CONTROL**. The column STATUS shows whether the routine is in progress (W) or has failed (F) or has completed successfully (S). At the time of extraction all the routines from maintenance table **OLTM_DEST_ES_TABLES** are inserted to **OLTB_JOB_ES_CONTROL** for the current extraction date with initial status as **W**. This

status is updated accordingly when the routine is completed successfully (S) or unsuccessfully (F).

Extraction Log

You can have the logs generated as part of EOD for each table. EOD log captures the complete extraction process. The table level extraction log contains the details of each data transfer. The error logs are maintained in OLTBS_LOG_ES table.

Errors in the data extraction process and the failure reasons are logged in an error data store. These errors are rectified manually and the batch is run again for the failed data.

1.5 OBCL - OFSAA Integration

The integration between OL module and OFSAA enables you transfer data from OL module to OFSAA.

The following data is transferred in OBCL staging table.

OL - OFSAA Integration

The integration between OL module and OFSAA enables you transfer data from OL module to OFSAA.

The following data is transferred in OBCL staging table.

- **AATB_STG_OL_LOAN_CONTRACT_TXNS** - Corporate Loan contracts transaction details
- **AATB_STG_OL_LOAN_CONTRACTS** - Corporate loan contracts details
- **AATB_STG_OL_PAYMENT_SCHEDULE** - Repayment schedule of contracts such as loans, mortgages, over-drafts, credit cards, and so on.
- **AATB_STG_OL_LOAN_WRITEOFF** - Loan Write Off details
- **AATB_STG_OL_LOAN_RECOVERY** - Loan recovery details

LB (Loan Syndication) - OFSAA Integration

The integration between LB (Loan Syndication) module and OFSAA enables you transfer data from LB module to OFSAA.

The following data is transferred in OBCL staging table:

- **AATB_STG_LB_LOAN_CONTRACT_TXNS** - Corporate loan contracts transaction details
- **AATB_STG_LB_LOAN_CONTRACTS** - Corporate loan contracts details

1.6 Assumptions

Unique Names for Loan Products and Loan Account Classes

Ensure that the loan products and loan account classes maintained in OBCL have unique names. Name of any loan product should not be identical to the name of an account class.

2

Annexure

Data Transfer from OBCL to OFSAA

For details on data transfer from OBCL to OFSAA, refer the below table.

- Source System - OBCL
- Target System - OFSAA

Table 2-1 OBCL OFSAA Data Transfer Details

Data Transferred	Source System Module	OBCL Staging Table Name	Extraction Package Name	Target System Table Name	Extraction Routine	Data Included in the Extraction
Transactions on loan contracts	OL	AATB_STG_OL_LOAN_CONTRACT_TXNS	AAPKS_EXTRACT_OL_CONTRACT_TXNS	Stg_Loan_Contract_Txns	Daily	New Data
Loan contract details	OL	AATB_STG_OL_LOAN_CONTRACTS	AAPKS_EXTRACT_OL_LN_CONTRACTS	Stg_Loan_Contracts	Daily	Complete Data
Repayment schedule of loan contracts	OL	AATB_STG_OL_PAYMENT_SCHEDULE	AAPKS_EXTRACT_OL_PYMNT_SCHEDULE	Stg_Payment_Schedule	Daily	Complete Data
Loan Write-off details	OL	AATB_STG_OL_LOAN_WRITEOFF	AAPKS_EXTRACT_OL_LN_WRITEOFF	Stg_Acct_Write_of_Details	Daily	Complete Data
Loan Recovery details	OL	AATB_STG_OL_LOAN_RECOVERY	AAPKS_EXTRACT_OL_LN_RECOVERY	Stg_Acct_Recovery_Details	Daily	Complete Data
Transactions on loan contracts	LB	AATB_STG_LB_LOAN_CONTRACT_TXNS	AAPKS_EXTRACT_LB_CONTRACT_TXNS	Stg_Loan_Contract_Txns	Daily	New Data
Loan contract details	LB	AATB_STG_LB_LOAN_CONTRACTS	AAPKS_EXTRACT_LB_LN_CONTRACTS	Stg_Loan_Contracts	Daily	Complete Data
