This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Purpose

This guide is designed to help acquaint you with the Oracle Banking application. This guide provides answers to specific features and procedures that the user need to be aware of the module to function successfully.

Before you Begin

Kindly refer to our **Getting Started User Guide** for common elements, including Symbols and Icons, Conventions Definitions, and so forth.

Pre-requisites

Specify **User ID** and **Password**, and login to **Home** screen.

Audience

This document is intended for the following audience:

- Customers
- Partners

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

For more information on any related features, refer to the following documents:

- Oracle Banking Digital Experience Installation Manuals
- Oracle Banking Digital Experience Licensing Manuals

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.

Convention	Meaning
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.

Acronyms and Abbreviations

The list of the acronyms and abbreviations used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
OBDX	Oracle Banking Digital Experience

Post-requisites

After finishing all the requirements, please log out from the **Home** screen.

1

Introduction

This document contains information on caching and related configurations to be done for OBDX.

2

Coherence Cache

This topic provides information on **Coherence Cache**.

Coherence cache is provided out the box in OBDX. Coherence uses TCMP protocol to discover cluster members, manage the cluster, provision services, and transmit data. It works on both multicast and unicast routings.

- [Multicast](#)
This topic provides information on **Multicast**.
- [Unicast](#)
This topic provides information on **Unicast**.

2.1 Multicast

This topic provides information on **Multicast**.

In systems with ephemeral containers, multicast is the preferred option. In cases where multicast routing is undesirable or not supported, unicast routing can be used.

For enabling unicast routing for Coherence on OBDX, following changes needs to be done -

Replace **extend-client-config.xml** with below code in **digx-shared-libs.war/WEB-INF/classes**

```
<?xml version="1.0"?> <cache-config
    xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
    xmlns="http://xmlns.oracle.com/coherence/coherence-cache-
config"
    xsi:schemaLocation="http://xmlns.oracle.com/coherence/coherence-cache-
config
    coherence-cache-config.xsd">
    <caching-scheme-mapping>
    <cache-mapping>
    <cache-name>cacheBankConfigurations</cache-name>
<scheme-name>obdx</scheme-name>
    </cache-mapping>
    <cache-mapping>
    <cache-name>cacheSessionObject</cache-name>
<scheme-name>obdx</scheme-name>
    </cache-mapping>
    <cache-mapping>
    <cache-name>cacheUserInfo</cache-
name>
<scheme-name>obdx</scheme-name>
    </cache-mapping>
    <cache-mapping>
    <cache-name>cacheAccessPoint</cache-name>
    <scheme-name>obdx</
scheme-name>
    </cache-mapping>
    <cache-mapping>
    <cache-name>cacheTask</cache-name>
    <scheme-name>obdx</scheme-
name>
    </cache-mapping>
```

```

        <cache-mapping>
        <cache-name>cachePartyPreference</cache-name>          <scheme-
name>obdx</scheme-name>
        </cache-mapping>                                     <cache-mapping>
        <cache-name>cacheBankNames</cache-name>
        <scheme-name>obdx</scheme-name>
        </cache-mapping>
        <cache-mapping>
        <cache-name>cachePasswordPolicy</cache-name>          <scheme-
name>obdx</scheme-name>
        </cache-mapping>                                     <cache-mapping>
        <cache-name>cacheUserPreferences</cache-name>          <scheme-
name>obdx</scheme-name>
        </cache-mapping>
        <cache-mapping>
        <cache-name>cacheBusinessUnit</cache-name>          <scheme-
name>obdx</scheme-name>
        </cache-mapping>
        </caching-scheme-mapping>
        <caching-schemes>
        <remote-cache-scheme>          <scheme-name>obdx</scheme-
name>
        <service-name>ExtendTcpCacheService</service-name>
<initiator-config>
    <outgoing-message-handler>
        <request-timeout>5s</request-timeout>          </outgoing-
message-handler>
        <connect-timeout>5s</connect-timeout>          </initiator-
config>
        </remote-cache-scheme>
        <remote-invocation-scheme>
        <scheme-name>extend-invocation</scheme-name>
        <service-name>ExtendTcpInvocationService</service-name>
        <proxy-service-name>ExtendTcpCacheService</proxy-service-
name>
        <initiator-config>
<outgoing-message-handler>
        <request-timeout>5s</request-timeout>          </outgoing-
message-handler>
</initiator-config>
        </remote-invocation-scheme>
        </caching-schemes>
</cache-config>

```

Replace **tangosol-coherence-override.xml** with below code in **digx-coherence.war/WEB-INF/classes**

```

<?xml version='1.0'?><coherence
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-
instance"
  xmlns="http://xmlns.oracle.com/coherence/coherence-operational-
config"
  xsi:schemaLocation="http://xmlns.oracle.com/coherence/coherence-
operational-config
  coherence-operational-config.xsd">
  <cluster-config>

```

```

        <member-identity>
        <cluster-name>OBDXCluster</cluster-name>
    </member-identity>
    </cluster-config>
    <logging-config>
    <destination>coherence.log</destination>
    <severity-level>9</severity-level>
    </logging-config>
    <configurable-cache-factory-config>                                <init-
params>
    <init-param>
    <param-type>java.lang.String</param-
type>
    <param-value
    system-property="coherence.cacheconfig">OBDX-cache-configuration.xml</
param-value>
    </init-param>                                </init-params>
    </configurable-cache-factory-config>
</coherence>

```

2.2 Unicast

This topic provides information on **Unicast**.

Unicast is the default routing used in OBDX for communication when using Coherence. For enabling unicast routing for Coherence on OBDX, following changes need to be done.

- Add comma separated master servers' IP and ports in system properties (server start params in managed server in case of WebLogic)
-Dwka.list=<IP1:PORT1>,<IP2:PORT2>
- Run below query in database

```
Insert into digx_fw_config_all_b
```

```

(PROP_ID, CATEGORY_ID, PROP_VALUE, FACTORY_SHIPPED_FLAG, PROP_COMMENTS, SUMMARY_
TEXT, CREATED_BY, CREATION_DATE, LAST_UPDATED_BY, LAST_UPDATED_DATE, OBJECT_STAT
US, OBJECT_VERSION_NUMBER, EDITABLE, CATEGORY_DESCRIPTION)
values
('COHERENCE_CACHE_ADDRS', 'dayoneconfig', <IP1:PORT1>, <IP2:PORT2>, 'Y', 'Cohe
rence servers
addresses', 'Coherence servers
addresses', 'ofssuser', sysdate, 'ofssuser', sysdate, 'Y', 1, 'N', null);

```

Please replace IP and PORT with respective values. Please note that all PORT values by default will be 9099. Default port value can be changed using system property - Dcoherence.localport . Example : -Dcoherence.localport=9098

Also note that master members should be about 10% of the cluster.

3

Caches other than Coherence

This topic provides information on **Caches other than Coherence**.

OBDX can be customized to use other caches as well. This can be achieved by writing a custom java class implementing **com.ofss.digx.infra.cache.IDistributedCache** interface

type method should return **CacheType.DISTRIBUTED** and override priority method by providing the priority greater than 1.

4

Using Database

This topic provides information on **Using Database**.

In situations where cache is undesirable, database can be used in place of a dedicated cache mechanism.

For turning off distributed caching and switching to database, run the below script and take a restart

```
update digx_fw_config_all_b set PROP_VALUE='false' where  
PROP_ID='DISTRIBUTED_CACHE_ENABLED';
```

5

Configuring TTL (Time-To-Live)

This topic provides information on **Configuring TTL (Time-To-Live)**.

TTL configuration is maintained in the database. Default TTL is set to -1 for the product. If bank wants to override the value, they can achieve it by running below query. TTL value should be in milliseconds.

```
update digx_fw_config_all_b set prop_value = '3000000' where prop_id =  
'{CachName}_ttl';
```

{CachName} is name of the Cache for which TTL is to be updated.

For Example:

```
update digx_fw_config_all_b set prop_value = '3000000' where prop_id =  
'cacheUsername_ttl';
```
