

Oracle® Banking Electronic Data Exchange for Corporates Troubleshooting Guide

Release 14.8.0.0.0

G28180-02

April 2025

The Oracle logo, consisting of a solid red square with the word "ORACLE" in white, uppercase, sans-serif font centered within it.

ORACLE®

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

- [Purpose](#)
- [Audience](#)
- [Acronyms and Abbreviations](#)
- [Documentation Accessibility](#)
- [Screenshot Disclaimer](#)
- [List of Topics](#)
- [Prerequisites](#)
- [General Prevention](#)
- [Related Documents](#)

Purpose

This guide provides guidance to users for the issues within the application. It describes various methods to figure out the error and then troubleshoot it.

Audience

This guide is intended for the software developers and software testers.

Acronyms and Abbreviations

The list of the acronyms and abbreviations used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Abbreviation	Description
SMS	Security Management System
CMC	Common Core
MOC	Mid office Common Core
ELK	Elasticsearch Logstash Kibana
OBEDX	Oracle Banking Electronic Data Exchange for Corporates

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Screenshot Disclaimer

Personal information used in the interface or documents are dummy and does not exist in the real world. It is only for reference purposes.

List of Topics

This guide is organized as follows:

Table 2 List of Topics

Topics	Description
Troubleshooting Technical Flows	This topic provides the information about the platform-wide troubleshooting of technical flows. It includes UI side checking, Service side logs, tracing using Zipkin, debugging using ELK stack, and some environmental issues of Weblogic.
Troubleshooting Kafka	This topic provides the information on the troubleshooting kafka.
Health Checks	This topic provides the information about the health check measures and observability required.
Troubleshooting Functional Workflows	This topic provides the information about the Oracle Banking Electronic Exchange for Corporates specific troubleshooting flows and specific data stores that can be checked for issues. It includes Oracle Banking Electronic Exchange for Corporates sub-domain (wars) and high-level flow of Cash Deposit transaction and key Process Log table to be checked to troubleshoot transaction flow.
Troubleshooting OutOfMemory issues	This topic provides the information on troubleshooting OutOfMemory issues.
Troubleshooting Deployment Errors/ Exceptions	This topic provides the troubleshooting information for Errors/Exceptions that can occur due to flyway while deployment.

Prerequisites

Prerequisites

The prerequisites are as follows:

- Basic understanding of Eventing platform
- Basic understanding application log analysis using tools
- Basic understanding DB changes

Pre-installed Softwares

The following softwares should be pre-installed:

- Zipkin

- Kafka
- ELK
- Any SQL Database like SQLDEVELOPER
- WinSCP

General Prevention

Do not make any changes to Flyway scripts manually.

Related Documents

The related documents are as follows:

- *Oracle Banking Common Core User Guide*
- *Oracle Banking Getting Started User Guide*
- *Oracle Banking Security Management System User Guide*
- *Overview User Guide*
- *Charges User Guide*
- *Configuration User Guide*
- *Customer and Accounts User Guide*
- *Identifier User Guide*
- *Transactions User Guide*

A

Troubleshooting Technical Flows

This topic describes about various programming issues, possible causes, and solutions to resolve the issues.

- Where is the problem
- Preliminary checks from UI
- Troubleshooting Environmental Issues
- [Where is the Problem](#)
This topic describes about troubleshooting the problem in the distributed system.
- [Preliminary Checks from UI](#)
This topic provides systematic instructions to launch the application and check for the basic errors.

A.1 Where is the Problem

This topic describes about troubleshooting the problem in the distributed system.

Troubleshooting the problem in the distributed system can be challenging, if not understood fully. Each product has UI application components and service side application components. Each side requires different troubleshooting techniques and various logs that can be used to corroborate the problem.

It is important to establish the area of the problem on the service side. It can be achieved by a complete understanding of UI and service side flows along with the data architecture of an application.

Figure A-1 Distributed Flow Across Micro Services

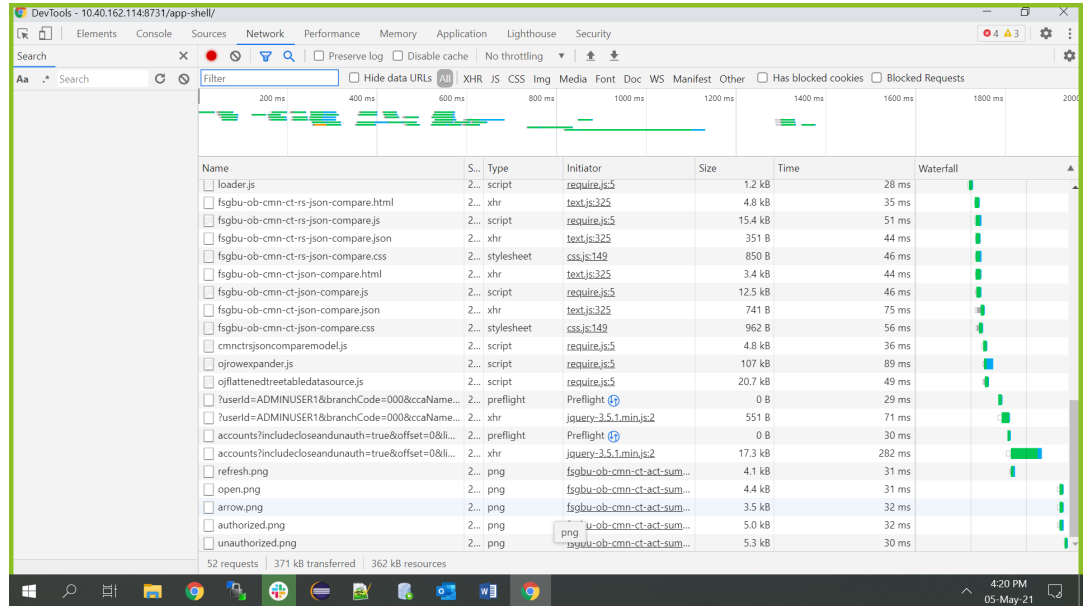

A.2 Preliminary Checks from UI

This topic provides systematic instructions to launch the application and check for the basic errors.

1. Launch the application with delegated URL.
2. Press **F12** key and select **Inspect and See network**.
3. Verify that all the call responses are successful.

Figure A-2 Call Responses

Note

Usually Red color indicates non 2xx HTTP response.

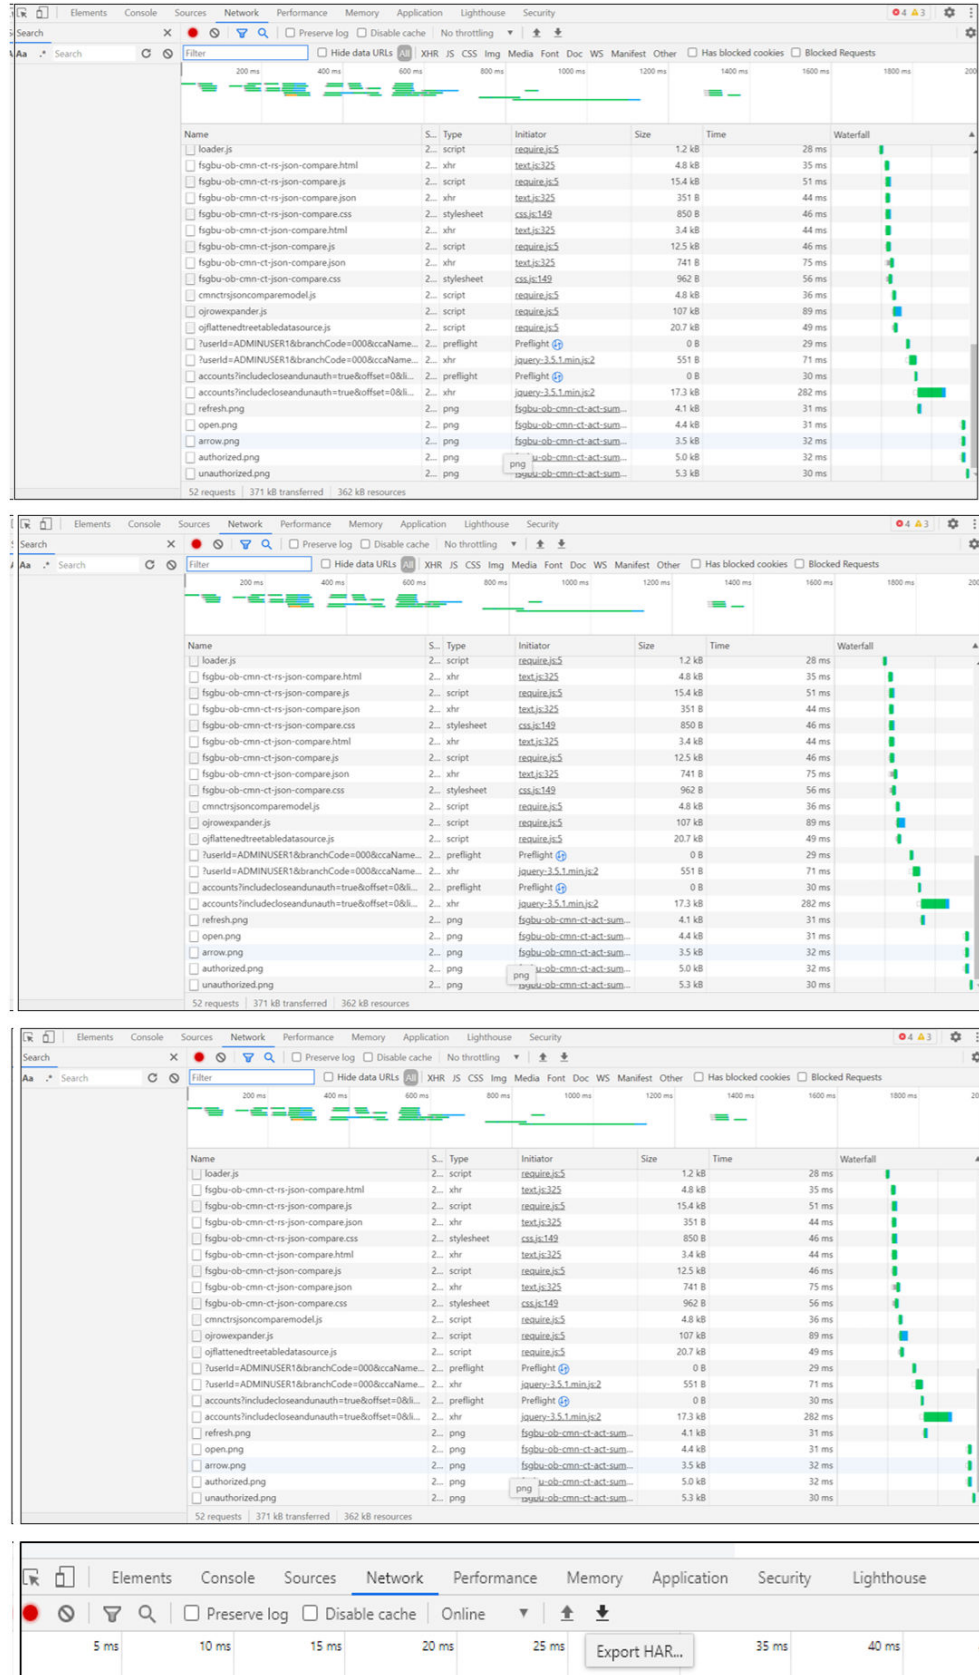

Figure A-3 Non 2xx Response

4. Export the trace using the **Export** in browsers.

Example: The user can see the export option as shown below in Chrome.

Figure A-4 Export Option

Note

The tools such as **Fiddler** and **Wireshark** can be used to get the browser to API gateway web traffic. This helps to investigate the exact request and response payloads exchanged between UI and API Gateway.

B

Troubleshooting Kafka

This topic describes about the troubleshooting Kafka.

This topic contains the following subtopics:

- [Consumer Services](#)
This topic describes about the Consumer Services provided in Oracle Banking Electronic Data Exchange for Corporates.
- [Producer Services](#)
This topic describes about the Producer Services on Oracle Banking Electronic Data Exchange for Corporates.
- [Debugging Consumer/Producer health and troubleshooting](#)
This topic describes about the Debugging Consumer/Producer health and troubleshooting.
- [Configurations](#)
This topic describes about the various configurations for the kafka and integration services.

B.1 Consumer Services

This topic describes about the Consumer Services provided in Oracle Banking Electronic Data Exchange for Corporates.

Oracle Banking Electronic Data Exchange for Corporates consumer service can be referred **API documentation** at https://docs.oracle.com/cd/F92984_01/PDF/API/SwaggerUI.zip.

B.2 Producer Services

This topic describes about the Producer Services on Oracle Banking Electronic Data Exchange for Corporates.

Oracle Banking Electronic Data Exchange for Corporates Producer service can be referred **API documentation** at https://docs.oracle.com/cd/F92984_01/PDF/API/SwaggerUI.zip.

B.3 Debugging Consumer/Producer health and troubleshooting

This topic describes about the Debugging Consumer/Producer health and troubleshooting.

Logs to analyze

- Under the domain folder of Weblogic - Logs related to any issue in Kafka connection and authentication can be found here.
- On a user defined log path - if we are facing issues in produce/consume operation of event.

Tables to analyze

The below table provides the values to be verified to confirm accurate functioning of the consumer/producer service.

Table B-1 Tables to analyze

Table Name	Column Name	Possible Values
plato_eventhub_in_log	-	-
plato_eventhub_out_log	status	SENT -> Published successfully

B.4 Configurations

This topic describes about the various configurations for the kafka and integration services.

Refer to *Oracle Banking Microservices Platform Foundation Installation Guide* for kafka setup and all the properties are declared in the yaml file of integration services for the application-level setup.

C

Health Checks

This topic describes about Health Checks.

This topic contains the following subtopics:

- [Eureka Dashboard](#)
This topic describes about Eureka Dashboard.
- [Application Services](#)
This topic describes about application services.
- [Database](#)
This topic describes about the data source configuration in Weblogic and Day0 scripts on Database.

C.1 Eureka Dashboard

This topic describes about Eureka Dashboard.

Until the health check API's implemented, the health must be monitored using WebLogic JVM managed server status and Eureka instance.

Figure C-1 Eureka Dashboard

OBEDX-CORE-SERVICE	n/a (1) (1)	UP (1) - ofss-mum-119.snbomprshared1.gbucdsint02bom.oraclevcn.com.obedx-core-service:16062

C.2 Application Services

This topic describes about application services.

Catalog of services required for Oracle Banking Electronic Data Exchange for Corporates are as follows:

Table C-1 Services List

Group	Service List	Usage
OBEDX	obedx-workflow-service	Workflow Service
OBEDX	obedx-notification-service	For email alerts and output generation
OBEDX	obedx-inquiry-service	Inquiry
OBEDX	obedx-component-server	UI
PLATO	plato-config-service	Required for PLATO framework
PLATO	plato-alerts-management-services	Required for PLATO framework
PLATO	plato-api-gateway	Required for PLATO framework

Table C-1 (Cont.) Services List

Group	Service List	Usage
PLATO	plato-batch-server	
PLATO	plato-discovery-service	Required for PLATO framework
PLATO	plato-feed-services	
PLATO	plato-orch-service	Required for PLATO framework
PLATO	plato-o	Required for PLATO framework
PLATO	plato-ui-config-services	Required for PLATO framework
SMS	sms-core-services-{version}.war	SMS services
SMS	sms-component-server-{version}.war	UI
CMC	cmc-account-services	Common Core Services
CMC	cmc-base-services	Common Core Services
CMC	cmc-branch-services	Common Core Services
CMC	cmc-businessoverrides-services	
CMC	cmc-currency-services	Common Core Services
CMC	cmc-customer-services	Common Core Services
CMC	cmc-datasegment-services	Common Core Services
CMC	cmc-obrh-service	Used for routing via OBRH
CMC	cmc-obrh-kafka-consumer	Used for routing via OBRH
CMC	cmc-resource-segment-orchestrator-service	Used in screens using gcs like maintenace screens
CMC	cmc-resourceclass-services	Common Core Services
CMC	cmc-screenclass-services	Common Core Services
CMC	cmc-transactioncontroller-services	Used in screens using gcs like maintenace screens
CMC	cmc-component-server-{version}.war	UI
PLATO	app-shell-{version}.war	UI
OBEDX	obedx-core-service	Maintenance Service

C.3 Database

This topic describes about the data source configuration in Weblogic and Day0 scripts on Database.

This topic contains the following subtopics:

- [Configure Data Sources](#)
This topic provides the systematic instructions to configure the data sources in WebLogic.
- [Day0 Scripts](#)
This topic describes about the Day0 Scripts.

C.3.1 Configure Data Sources

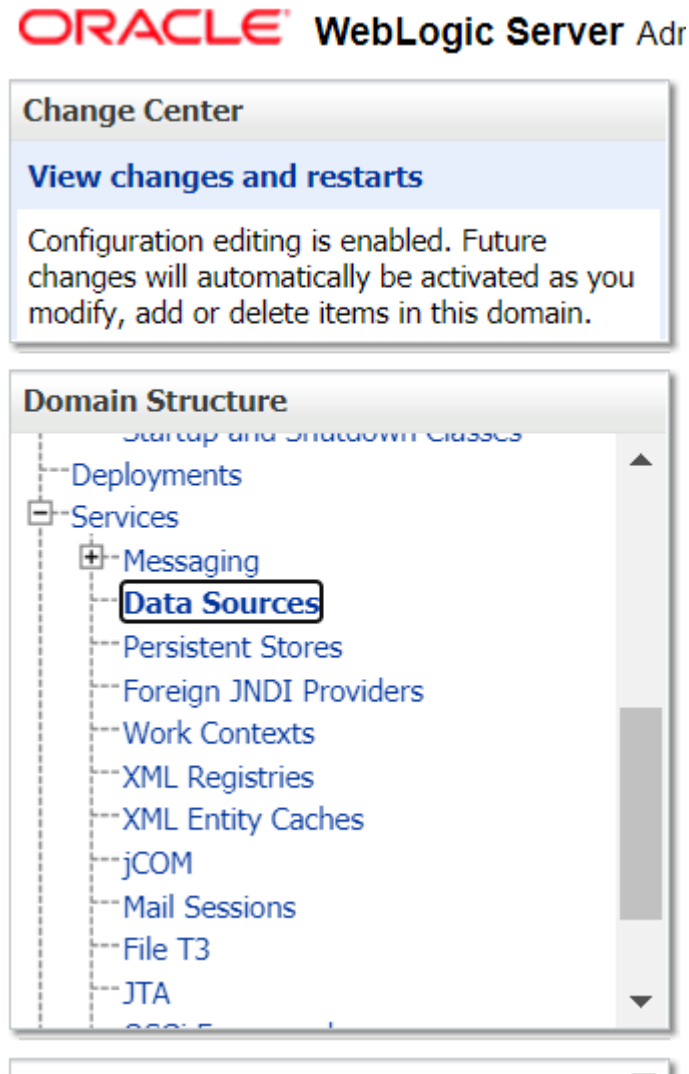

This topic provides the systematic instructions to configure the data sources in WebLogic.

To add the Data Sources, follow the below steps:

Specify **User ID** and **Password**, and login to **Oracle WebLogic Administration Console**.

1. On **Domain Structure**, click **Services**.
The **Domain Structure** screen displays.

Figure C-2 Domain Structure

2. Under **Services**, click **Data Sources**.
The **Summary of JDBC Data Sources** screen displays.

Figure C-3 Summary of JDBC Data Sources

Home Log Out Preferences Record Help

Home > Summary of Servers > Summary of JDBC Data Sources > PLATO > Summary of JDBC Data Sources

Summary of JDBC Data Sources

Configuration Monitoring

A JDBC data source is an object bound to the JNDI tree that provides database connectivity through a pool of JDBC connections. Applications can look up a data source on the JNDI tree and then borrow a database connection from the pool.

This page summarizes the JDBC data source objects that have been created in this domain.

Customize this table

Data Sources (Filtered - More Columns Exist)

	Type	JNDI Name	Targets
<input type="checkbox"/> GridLink Data Source	Generic	jdbc/ICL	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5, managed_server6
<input type="checkbox"/> Multi Data Source	Generic	jdbc/LMB	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5
<input type="checkbox"/> Proxy Data Source	Generic	jdbc/LMC	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5
<input type="checkbox"/> UCP Data Source	Generic	jdbc/LMD	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5
<input type="checkbox"/> LMR	Generic	jdbc/LMR	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5, managed_server6
<input type="checkbox"/> LMX	Generic	jdbc/LMX	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5
<input type="checkbox"/> LRT	Generic	jdbc/LRT	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5
<input type="checkbox"/> PLATO	Generic	jdbc/PLATO	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5, managed_server6
<input type="checkbox"/> PLATOBATCH	Generic	jdbc/PLATOBATCH	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5, managed_server6
<input type="checkbox"/> PLATO_UI_CONFIG	Generic	jdbc/PLATO_UI_CONFIG	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5, managed_server6
<input type="checkbox"/> SMS	Generic	jdbc/sms	managed_server1, managed_server2, managed_server3, managed_server4, managed_server5, managed_server6

3. Click **New** and add the data source providing the required details.
The **Create New JDBC Data Source - Properties** screen displays.

C.3.2 Day0 Scripts

This topic describes about the Day0 Scripts.

Make sure that all the Day0 scripts available in the product package are run successfully.

D

Troubleshooting Application Workflows

This topic describes the troubleshooting functional workflows applicable to Oracle Banking Electronic Data Exchange for Corporates.

This topic describes the troubleshooting functional workflows applicable to Oracle Banking Electronic Data Exchange for Corporates. It contains the following sections:

- [Oracle Banking Electronic Data Exchange for Corporates - Subdomains List](#)
- [Troubleshooting SMS Errors](#)
- [Oracle Banking Routing Hub Configuration](#)
- [Oracle Banking Electronic Data Exchange for Corporates – Subdomains List](#)
This topic describes about the Oracle Banking Electronic Data Exchange for Corporates Subdomains List.
- [Troubleshooting SMS Errors](#)
This topic describes about Troubleshooting SMS Errors.
- [Oracle Banking Routing Hub Configuration](#)
This topic describes about Oracle Banking Routing Hub configuration.

D.1 Oracle Banking Electronic Data Exchange for Corporates – Subdomains List

This topic describes about the Oracle Banking Electronic Data Exchange for Corporates Subdomains List.

Figure D-1 Composition of Oracle Banking Electronic Data Exchange for Corporates

On successful login, the Oracle Banking Electronic Data Exchange for Corporates dashboard screen appears depending on the user privileges.

User Role Issues

Role Profile includes access rights to the functional activities that are common to a group of users. A user can be linked to a Role Profile by which you give the user access rights to all the functional activities in the Role Profile.

1. On **Home screen**, click **Security Management**. Under **Security Management**, click **Role**. The **Role Maintenance** Screen displays.

Figure D-2 Role Maintenance

The screenshot shows the 'Role Maintenance' interface. At the top, the 'Role Code' is 'VAM_ALL_ROLE' and the 'Description' is 'Role contains all functional activity for VAM'. Below this is a table titled 'Role Activity' with columns for 'Functional Activity Code' and 'Functional Activity Description'. The table contains five rows of data, each with a checkbox in the first column. A pagination bar at the bottom indicates 'Page 1 (1-5 of at least 1707 Items)'.

<input type="checkbox"/>	Functional Activity Code	Functional Activity Description
<input type="checkbox"/>	IC_FA_ISLAMIC_UDE_MAINTENANCE_AUTHORIZE	
<input type="checkbox"/>	CMC_FA_COUNTRY_CODE_SERVICE_MODIFY	
<input type="checkbox"/>	IC_FA_BRANCH_DATES_DELETE	
<input type="checkbox"/>	VAB_FA_ECA_BLOCK_RELEASE	External Credit Approval Block Release
<input type="checkbox"/>	CMC_FA_RH_CONFIG_DELETE	Delete configuration in routing hub maintenance

Only authorized users can access the system with the help of a unique User Login ID and password. The user profile of a user contains the details of the user in four sections - User details, Status, Other details and User role branches.

1. From **Home screen**, click **Security Management**. Under **Security Management**, click **User**. The **User Maintenance** Screen displays.

Figure D-3 User Maintenance

Users Maintenance

UserDetails

Username *	Login ID *	Home Branch *

Audit

Note

Make sure that the required Role and User Applications are mapped to the user.

This topic contains the following subtopics:

- [First level issues](#)
This topic describes the possible issues that may occur during the basic investigation.
- [Call is Failing in OBRH](#)
This topic provides the troubleshooting information about the call is Failing in Oracle Banking Routing Hub (OBRH).

D.1.1 First level issues

This topic describes the possible issues that may occur during the basic investigation.

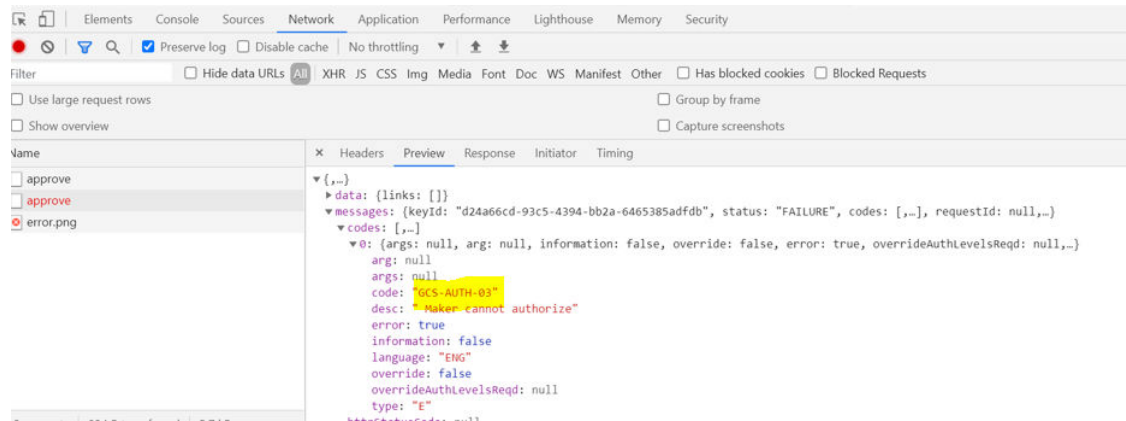

Error Message not shown

If there are any improper calls, check the ERTB_MSGS table of the respective schema to understand the cause of the error.

1. Press **F12** to open the **Networks**.
2. Check the error code in the response.

Query: SELECT * FROM ERTB_MSGS WHERE ERR_CODE='GCS_AUTH-03'

Figure D-4 Error Code

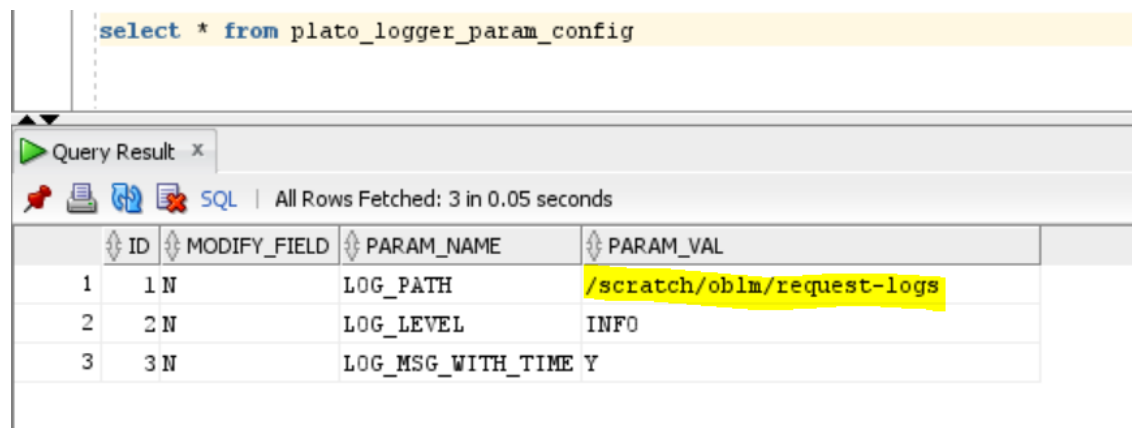

Setting Log file path

Log generation path needs to be defined in **PLATO_LOGGER_PARAM_CONFIG** table of PLATO schema.

Query: Select * from PLATO_LOGGER_PARAM_CONFIG;

Figure D-5 PLATO_LOGGER_PARAM_CONFIG

Dynamic log generation issues

For generating dynamic service logs, insert the data to **PLATO_DEBUG_USERS** table.

Query: Select * from PLATO_DEBUG_USERS;

10     }
11   ]
12 }

```

Note

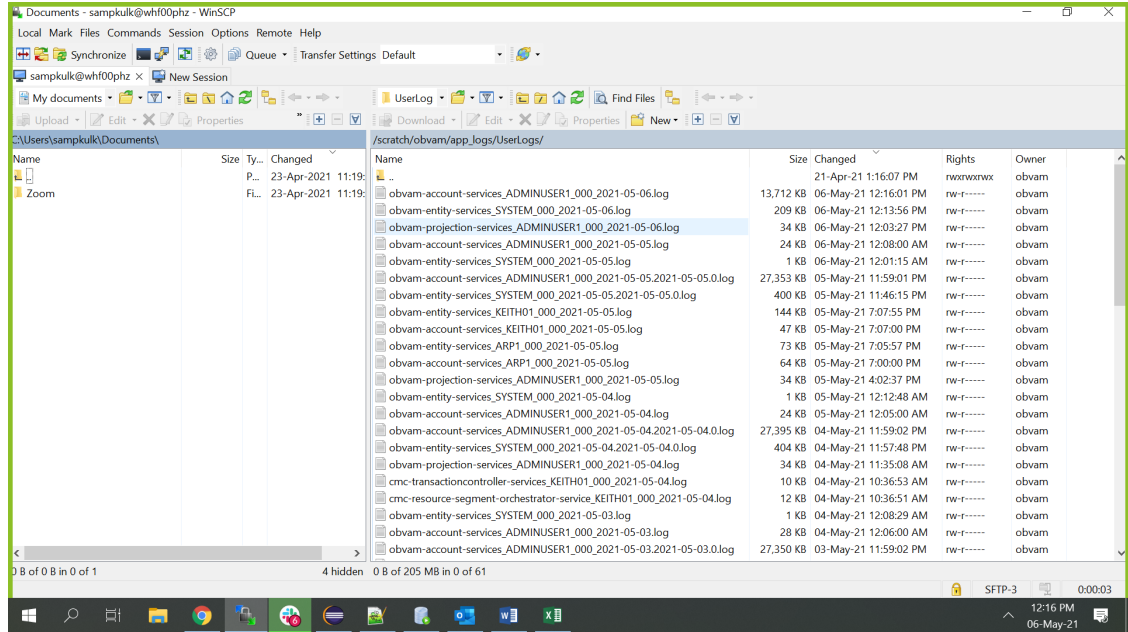

Restart the specific services if required.

Exact error through exception log

If there is an exact error through the exception log, log in to WINSXP and check the server logs with NIS credentials.

The path is /scratch/obvam/app_logs/UserLogs.

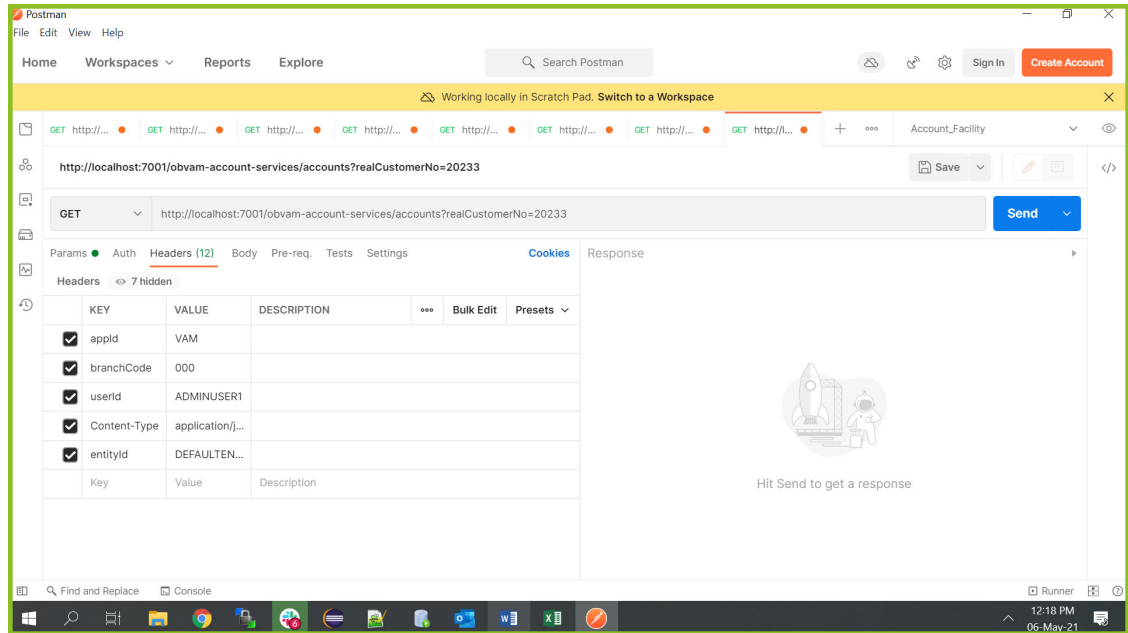

Figure D-9 Exception Error Log

Logs are not generated

If you are not getting logs, put the loggers across API, hit through postman, and test again.

Figure D-10 Postman

D.1.2 Call is Failing in OBRH

This topic provides the troubleshooting information about the call is Failing in Oracle Banking Routing Hub (OBRH).

If any call is failing in Oracle Banking Routing Hub, open the CMC_RH_AUDIT_EVENT_LOG for getting Gateway response (**SUCCESS** or **FAILED**).

Select the following query to verify results.

Query: select * from CMC_RH_AUDIT_EVENT_LOG

Figure D-11 CMC_RH_AUDIT_EVENT_LOG

Code Error in GCS Side

If there is any error in GCS side codes, use java de-compiler to debug the error.

404 Error

The possible causes for 404 error are as follows:

- Check service is not running on Eureka.
- Check service is not deployed in WebLogic.

500 Internal Error

The possible causes for 500 Internal error are as follows:

- Issue with Plato entries

- Issue with Eureka
- Issue with any piece of code

The server-side debugging is needed for the above-mentioned issues, if it is not captured in logs.

D.2 Troubleshooting SMS Errors

This topic describes about Troubleshooting SMS Errors.

The possible issues occur in Security Management System are mentioned below.

- Unable to login after launching the application.
- Menus are not displayed after logging in.

D.3 Oracle Banking Routing Hub Configuration

This topic describes about Oracle Banking Routing Hub configuration.

Refer to ***Routing Hub Configuration User Guide*** for the detailed explanation.

E

Troubleshooting OutOfMemory issues

This topic describes about Troubleshooting OutOfMemory issues

This topic contains the following subtopics:

F

Troubleshooting Deployment Errors/Exceptions

This topic describes the troubleshooting information for Errors/Exceptions that can occur due to flyway while deployment.

Solutions for Errors/Exceptions that can occur due to flyway while deployment

The error description is given below:

```
org.springframework.beans.factory.UnsatisfiedDependencyException:  
Error creating bean with name 'application': Unsatisfied dependency  
expressed through field 'flywayApplicationConfig'; nested exception is  
org.springframework.beans.factory.BeanCreationException: Error creating  
bean with name 'executeDomain' defined in class path resource  
[oracle/fsgbu/plato/flyway/FlywayConfig.class]: Bean instantiation via  
factory method failed; nested exception...SQL State : 42000
```

In the error, the bean-name can be any of the following:

- **executeDomain**
- **executePlato**
- **executePlatoSec**
- **executePlatoUI**
- **executeSms**
- **executeCmc**
- **executeMidofcmc**
- **executePlatofeed**
- **executePlatobatch**
- **executePlatoorch**

Solution

- At first for each case,, the service through Plato-configuration-service should be checked to see if it is suggesting the correct scheme via the **plato-config-service**.
- After checking that it is to be ensured for that particular APPLICATION, the following entries are present in the PROPERTIES table in the plato Schema.

Table F-1 Properties Table

BEAN	PROPERTY_SET NEED TO BE PRESENT
executeDomain	flyway.domain.db.*
executePlato	flyway.plato.db.*
executePlatoSec	flyway.platosec.db.*

Table F-1 (Cont.) Properties Table

BEAN	PROPERTY_SET NEED TO BE PRESENT
executePlatoUI	flyway.platoui.db.*
executeSms	flyway.sms.db.*
executeCmc	flyway.cmc.db.*
executeMidofcmc	flyway.domain.db.*
executePlatofeed	flyway.platofeed.db.*
executePlatobatch	flyway.platobatch.db.*
executePlatoorch	flyway.platoorch.db.*

Depending on whether for the flyway db connection, JNDI name is being used or the JDBC URL and other details are used, each property set will look as follows:

CASE 1: USING JDBC

```
flyway.domain.db.username
flyway.domain.db.password
flyway.domain.db.jdbcUrl
flyway.domain.db.driver-class-name
flyway.domain.schemas
flyway.domain.locations
flyway.domain.placeholderReplacement
flyway.domain.ignoreMissingMigrations
flyway.domain.outOfOrder
```

CASE 2: USING JNDI

```
flyway.domain.db.jndi
flyway.domain.schemas
flyway.domain.locations
flyway.domain.placeholderReplacement
flyway.domain.ignoreMissingMigrations
flyway.domain.outOfOrder
flyway.jndi.datasource.enabled
```

In each case, make sure that all the relevant placeholders are available in the scripts in the respective locations.

Error Description:

No value provided for placeholder: `${eureka.host}`. Check your configuration!

In the example above, an error occurred due to the absence of passing the following parameter in the properties table:

```
flyway.domain.placeholders.eureka.host
```

Solution:

Similarly, any placeholder where the error occurred must pass to the environment through the properties table or the command line arguments (as `-D` parameters).

G

Business Error Codes

This topic describes about the error codes and messages.

Table G-1 List of Error Codes

Error Code	Description
GC-CLS-02	Record Successfully Closed
GC-REOP-03	Successfully Reopened
GCS-AUTH-01	Record Successfully Authorized
GCS-AUTH-02	Valid modifications for approval were not sent. Failed to match
GCS-AUTH-03	Maker cannot authorize
GCS-AUTH-04	No Valid unauthroized modifications found for approval.
GCS-CLOS-002	Record Successfully Closed
GCS-CLOS-01	Record Already Closed
GCS-CLOS-02	Record Successfully Closed
GCS-CLOS-03	Unauthorized record cannot be closed, it can be deleted before first authorization
GCS-COM-001	Record does not exist
GCS-COM-002	Invalid version sent, operation can be performed only on latest version
GCS-COM-003	Please Send Proper ModNo
GCS-COM-004	Please send makerId in the request
GCS-COM-005	Request is Null. Please Resend with Proper Values
GCS-COM-006	Unable to parse JSON
GCS-COM-007	Request Successfully Processed
GCS-COM-008	Modifications should be consecutive.
GCS-COM-009	Resource ID cannot be blank or "null".
GCS-COM-010	Successfully cancelled \$1.
GCS-COM-011	\$1 failed to update.
GCS-DEL-001	Record deleted successfully
GCS-DEL-002	Record(s) deleted successfully
GCS-DEL-003	Modifications didnt match valid unauthorized modifications that can be deleted for this record
GCS-DEL-004	Send all unauthorized modifications to be deleted for record that is not authorized even once.
GCS-DEL-005	Only Maker of first version of record can delete modifications of record that is not once authorized.
GCS-DEL-006	No valid unauthroized modifications found for deleting
GCS-DEL-007	Failed to delete. Only maker of the modification(s) can delete.
GCS-MOD-001	Closed Record cannot be modified
GCS-MOD-002	Record Successfully Modified
GCS-MOD-003	Record marked for close, cannot modify.
GCS-MOD-004	Only maker of the record can modify before once auth
GCS-MOD-005	Not amendable field, cannot modify

Table G-1 (Cont.) List of Error Codes

Error Code	Description
GCS-MOD-006	Natural Key cannot be modified
GCS-MOD-007	Only the maker can modify the pending records.
GCS-REOP-003	Successfully Reopened
GCS-REOP-01	Unauthorized Record cannot be Reopened
GCS-REOP-02	Failed to Reopen the Record, cannot reopen Open records
GCS-REOP-03	Successfully Reopened
GCS-REOP-04	Unauthorized record cannot be reopened, record should be closed and authorized
GCS-SAV-001	Record already exists
GCS-SAV-002	Record Saved Successfully.
GCS-SAV-003	The record is saved and validated successfully.
GCS-VAL-001	The record is successfully validated.
EDX-PAR-023	Failure in sending file to Parsing Service during try-\$1
EDX-FPS-000	Success
EDX-FPS-001	Failure
EDX-FPS-002	Channel Not Found
EDX-FPS-003	Configured Path is not accessible
EDX-FPS-004	File not found / Unable to read file size
EDX-FPS-005	Given file name, in request, is not found in filesystem
EDX-FPS-006	Unable to rename file
EDX-FPS-007	File size exceeds against configured size
EDX-FPS-008	Unable to put message in Kafka
EDX-FPS-009	File is under process via earlier request
EDX-FPS-010	File content type is not allowed
EDX-FPS-011	Unable to move file to backup area
EDX-FPS-012	Due to channel is closed, unable to process file
EDX-DBM-000	Success
EDX-DBM-001	Failure
EDX-DBM-002	Success
EDX-DBM-003	Update Success
EDX-DBM-004	No records found.
EDX-FLW-000	Success
EDX-FLW-001	Failure
