- [Screenshot Disclaimer](#)

### 1.1 Purpose

This guide helps to assist the user in quickly understanding the process of maintaining Customer Standard Instructions.

### 1.2 Audience

Intended audience of the Enterprise Limits Management User Guide.

**Table 1-1 Intended Audience**

Role	Function
Back office data entry clerk	Input functions for funds.
Back office managers/officers	Authorization functions.
Product Managers	Product definition and authorization.
End of day operators	Processing during end of day / beginning of day.

### 1.3 Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

### 1.4 Conventions

The following text conventions are used in this document:

Convention	Meaning
<b>boldface</b>	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## 1.5 Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## 1.6 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## 1.7 Related Documents

For more information refer to the Oracle Banking Enterprise Limits and Collaterals User Manuals on:

- User Defined Fields User Guide

## Overview

This topic describes about the overview to install the services.

This installation guide allows users to install the below mentioned Oracle Banking Enterprise Limits and Collateral Management services and UI in the same order. Also Oracle Banking Enterprise Limits and Collateral Management services require the list of Common Core services below.

### **Common Core Services:**

1. [cmc-account-services](#)
2. [cmc-additional-attributes-services](#)
3. [cmc-advice-services](#)
4. [cmc-base-services](#)
5. [cmc-batch-services](#)
6. [cmc-branch-services](#)

**User Interface:** UI war is split into individual component server war files. All the component server war files should be deployed in the same managed server.

For Common Core war files, deploy the war files mentioned below:

- 1. app-shell
- 2. cmc-component-server
- 3. moc-component-server
- 4. sms-component-server

For Domain Specific war files, deploy the individual component server war files mentioned below:

- 1. obelcm-component-server
- 2. obcc-component-server

## Setup Database

This topic provides detailed information about database related configuration for Oracle Banking Enterprise Limits and Collateral Management Installation.

It is recommended to create different schema for each application.

The prerequisites for setting up the database are as follows:

1. Complete the pre-installation setup. The pre-installation setup includes configuring the database and setting up the setUserOverrides.sh file.
2. After creating the schema for each of the required micro services, we compile DDLs and INCs of each micro-service in the respective schemas. The DDLs and INCs ensure that the creation of tables and availability of static data required for the execution of services. Flyway compiles these automatically.

To set up a database for the creation of Oracle Banking Enterprise Limits and Collateral M/ kjanagement schema:

**Table 3-1 Database Setup**

## Configure Oracle Banking Enterprise Limits and Collateral Management Domain

This topic provides information of the domain configuration setup for Oracle Banking Enterprise Limits and Collateral Management application

The prerequisites are as follows:

1. User should install Java JDK on the machine.
2. Install Oracle Fusion Middleware on the machine.

### Note

Before proceeding with the following steps, complete the Oracle Banking Microservices Architecture installation as guided.

3. Steps for creating all Oracle Banking Enterprise Limits and Collateral Management domains, properties like port numbers, names are changes based on the domain. Screenshots are provided for such deviations. Domain creation process remains the same. It is recommended to have separate domain for Oracle Banking Enterprise Limits and Collateral Management application.

### Note

For the exact version to be installed, refer to **Software Prerequisites** section in License Guide.

4. Set up and configure these services for the Oracle Banking Enterprise Limits and Collateral Management domain.

**Note**

For more information on creating and configuring the domain, refer the **Domain Creation and Cluster Configuration** topic in the Configuration and Deployment Guide.

## Data Source Creation

This topic provides systematic instruction to create the data source for Oracle Banking Enterprise Limits and Collateral Management installation.

### Prerequisite

- Make sure that database setup for Oracle Banking Enterprise Limits and Collateral Management is completed before deployment setup.
- The data sources for each micro service need to be set up before deploying the application. Each data source connects to its specific server where the application will be deployed.

The following diagram represents the process of creating data sources.:

**Figure 5-1 Data Source Creation**

1. Create the data sources on each domain.

**Note**

For more information on data source creation, refer to the Datasource Creation topic in the Configuration and Deployment Guide.

The table below are the list of the data sources to be created on each domain prior to deployment of applications onto managed servers.

**Table 5-1 Data Source List**

## Deployments

This topic provides the systematic instructions to deploy services for Oracle Banking Enterprise Limits and Collateral Management Installation.

**The prerequisites are as follows:**

- Make sure that database setup and data sources creation are completed before the application deployment stage.
- Each service is linked to a specific war file that must be deployed on the server.

The following diagram represents the process of deploying the war files.

Deploy the war files sequentially in the given order. For additional details on deployments, see the Deploy Application section in the Configuration and Deployment Guide.

The table below outlines the deployment details needed for each domain to operate the Oracle Banking Enterprise Limits and Collateral Management application. The archive names listed are for reference only.

**Figure 6-1 Deployments**

**Note**

For the exact version of the archive names and version, refer to the OSDC zip provided as a part of release.

## Setup Oracle Banking Enterprise Limits and Collateral Management KAFKA

This topic provides systematic instructions to setup the Oracle Banking Enterprise Limits and Collateral Management kafka topics.

The Prerequisites as follows:

- Make sure that the Kafka installation is completed.
- To install Kafka, see the Oracle Banking Microservices Architecture Software Deployment section in the Oracle Banking Microservices Platform Foundation Installation Guide.

The Kafka topics listed below are utilized in Oracle Banking Enterprise Limits and Collateral Management. All of these topics need to be created and confirmed on the Kafka Server using the command.

```
<Kafka Bin Folder>/kafka-topics.sh --create --bootstrap-server <Broker ip/hostname>:<Broker Port> --replication-factor 1 --partitions 1 --topic <topic name>
```

**Table 7-1 Kafka Topics**

Serial Number	Topic Name	Description	Usage
1	rpmDashboard	This event is used for populating projection data for rendering the dashboard.	Updating all the attributes related to a process
2	ELCMFacilityCommonCoreReplicationEOD	This is Plato Alerts's kafka topic to which the notification is sent	Updates the facility in common core during batch processing
3	AlertMessage	This is Plato Alerts's kafka topic to which the notification is sent	Used for notifications
4	ELCM_NOTIF_EVENT	This is the ELCM's kafka topic to which Plato Alerts will resend the notification in case the mode is Event	Used for notifications

## Restart and Refresh

This topic describes the procedure to restart and refresh the servers.

Once everything is deployed, restart all the managed servers. For each application, call path / `refresh` to refresh the configuration properties.

### **Note**

To restart the server, refer to **Restart Server** section in **Configuration and Deployment Guide**.

# 9

## Logging Area

This topic describes about the logging area after deployment of Oracle Banking Enterprise Limits and Collateral Management applications in WebLogic server.

Oracle Banking Enterprise Limits and Collateral Management Application writes logs in the logging area of the server:

```
<WEBLOGIC_DOMAIN_CONFIG_AREA/servers/APP/logs
```

APP.out A sample of logging area is as follows:

**Table 9-1 Sample Logging Area**

Sample	Value
Domain Name	obelcm_domain
Managed_server Name	OBELCMAPP
Domain Area	For example, a domain is created with the above domain and managed server names in the following area of the server: ~/middleware/user_projects/domains/ <b>obelcm_domain</b>
Logging area for Oracle Banking Enterprise Limits and Collateral Management applications	~/middleware/user_projects/domains/obelcm_domain/servers/OBELCMAPP/logs/OBELCMAPP.out
