Purpose

This guide provides an overview to configure the Business Process and related workflows for origination such as Savings Account, Current Account, Term Deposit, Credit Card, and Loans comprising of Home loans, Vehicle Loans, Personal Loans, and Education Loan; Business Product Configuration and Dashboard related configurations.

Audience

This user manual is intended for the Relationship Managers (RMs) and Sales Officers in-charge of sourcing the Savings Account Products from prospect and customer of the bank. The user manual is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Savings Account Origination process based on the bank's internal operation and policies.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table Acronyms table

Abbreviation	Description
DS	Data Segment
System	Oracle Banking Origination Module
OBA	Oracle Banking Accounts
ОВО	Oracle Banking Origination

Basic Actions

Table Basic Actions

Actions	Functions
Save	Click to save the details entered or selected in the screen.
Unlock	Click to update the details of an existing record. System displays an existing record in editable mode.
	This button is displayed only for the records that are already created.

Table (Cont.) Basic Actions

Actions	Functions
Authorize	Click to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record.
	This button is displayed only for the already created records. For more information on the process, see Authorization Process.
Approve	Click to approve the initiated record.
	This button is displayed, once you click Authorize.
Audit	Click to view the maker details, checker details of the particular record.
	This button is displayed only for the records that are already created.
Close	Click to close a record. This action is available only when a record is created.
Confirm	Click to confirm the action you performed.
Cancel	Click to cancel the action you performed.
Compare	Click to view the comparison through the field values of old record and the current record.
	This button is displayed in the widget, once you click Authorize .
View	Click to view the details in a particular modification stage.
	This button is displayed in the widget, once you click Authorize .
View Difference only	Click to view a comparison through the field element values of old record and the current record, which has undergone changes.
	This button is displayed, once you click Compare.
Expand All	Click to expand and view all the details in the sections.
	This button is displayed, once you click Compare.
Collapse All	Click to hide the details in the sections.
	This button is displayed, once you click Compare.
ок	Click to confirm the details in the screen.
New	Click to add a new record. When you click New, system displays a new record enabling you to specify the required data. It is mandatory to specify details for the fields marked with '*' symbol.
	This button is displayed only for the records that are already created.

1

Configurations

This topic describes information about the configurations of Oracle Banking Origination.

The Oracle Banking Origination includes comprehensive coverage of origination processes for Savings Account, Current Account, Term Deposit, Credit Cards and Loans comprising of Home Loan, Personal Loan, Education Loan, and Vehicle Loans. This document provides an overview of the configuration required for the various Oracle Banking Origination processes.

The Oracle Banking Origination is factory shipped with referenced workflows for the mentioned product origination. It can configure the workflows based on the bank's internal policy and requirements. A configuration such as Business Product, Business Process, Qualitative Scorecard, Quantitative Scorecard allows the bank to define their workflows and provides access to various dashboard widgets based on the user roles. A summary of the configurations described below:

The origination processes in Oracle Banking Origination are driven based on the below configurations:

- Bussiness Product
- Business Process

For assessment of the Loan Applications and the Unsecured Overdraft Limit creation in Current Accounts, the below mentioned two configurations are required:

- Credit Decision Configuration
- Facts and Rules
- Qualitative Scorecard

The Qualitative Scorecard ID is linked to the Business Products to aid in the assessment purpose of the specific Business Product Origination.

This module also supports comprehensive dashboard widgets for bank persons such as Relationship Manager, Branch Manager, Loan Officer, and Credit Head. The configuration for the same is supported by providing access to the Function ID of the dashboard widgets.

- Business Product Configuration
 This topic provides the information about the business product configuration.
- Business Process Configuration
 This topic provides the information about the business process configuration.
- Rule Configuration
 This topic provides the information for the user to rule the configuration.
- Credit Decision Configuration
 This topic provides the information about the credit decision configuration.
- Origination Preferences
 This topic describes the preferences which are set at origination level.
- Reason Codes
 This topic describes the overview of the reason codes.

Dashboard Configuration

This topic describes the systematic instructions for dashboard configuration.

Initial Funding Configuration

This topic provides the information about the initial funding configuration.

Application Submission Configuration

This topic provides the information about the application submission configuration.

Machine Learning Configuration for Predicting Account Opening Date
 This topic provides the information about the machine learning configuration for predicting account opening date.

Batch Process Configuration

This topic provides the information about batch process configuration.

Service Level Agreement (SLA) Maintenance

This topic provides the information about the service level agreement maintenance.

Customer Dedupe Check

This topic provides the information about customer dedupe check.

Application Dedupe Check

This topic provides the information about application dedupe check.

Document Extraction Required Check

This topic provides the information about the Document Extraction Required Check.

Task Allocation

This topic provides the information about the Task Allocation.

1.1 Business Product Configuration

This topic provides the information about the business product configuration.

The **Business Product Configuration** allows to configure the various products for **Retail Bank** offers. The details captured in the Business Products configuration displays the Product Suite that the bank is offering in the Product Catalogue and Product Details view. The parameters configured are also relevant for the Origination Processes of the respective product origination.

The **Business Product Configuration** created in Oracle Banking Origination is linked with the **Host** product. It is important to note that there is only one Golden Source for Product creation or configuration, which is the **HOST**. The Business Product created in Oracle Banking Origination allows configuring parameters that are customer facing and how the products are sold in Banks. Unlike, the Host Product definition that looks at Product Configuration from processing and transaction aspects. This helps in the product comparison and gauges benefits of what the customer wants to derive from the product. In addition to this, the Business Product configuration in Oracle Banking Origination, allows the flexibility to inherit other pertinent product features, which allows building a stronger and firm origination process flow with the added validations that are done during the defined stages in the origination workflow. Example: Allow Offer Amendment, Offer Acceptance Method, and Assessment Methods etc., are defined in the Business product and further are validated in the origination process of the specific Business Product.

The **Business Product** is linked to the **Business Process**, so that the origination process related to the selected **Business Product** flows as per the **Business**

Process Definition. This allows the capability to configure two different **Business Products** within the same Product Type to have different origination workflows. **Example:** Current Account with or without Overdraft Limit Facility.

The Business Product process allows to create **Business Product** and view the existing **Business Products**. The details of that are explained in the further sections.

This topic contains the following subtopics:

Create Business Product

This topic describes the systematic instructions to create business product.

View Business Product

This topic describes the systematic instructions to View Business Product.

1.1.1 Create Business Product

This topic describes the systematic instructions to create business product.

The Create Business Product configuration process comprises of the below-mentioned data segments that allow defining the various elements for the products:

Business Product Details

This topic describes the systematic instructions to create business product details.

Business Product Attributes

This topic describes the systematic instructions to display the business product attributes.

Business Product Host Mapping

This topic describes the systematic instructions to map the host product and parameters for Interest and Charges that are linked to the host product.

Business Product Preferences

This topic describes the systematic instructions business product preferences.

1.1.1.1 Business Product Details

This topic describes the systematic instructions to create business product details.

The **Business Product Details** is the first data segment to create a Business Product application.

Specify **User ID** and **Password**, and login to **Home** screen.

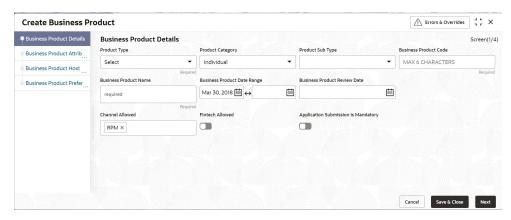

To configure business product details:

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Business Product.
- 3. Under Business Product, click Create Business Product.

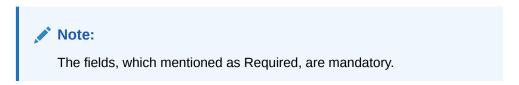

The **Business Product Details** screen displays.

Figure 1-1 Business Product Details

4. Specify the fields on Business Product Details screen.

For more information on fields, refer to the field description table.

Table 1-1 Business Product Details – Field Description

Field	Description
Product Type	Select the product from the drop-down list.
	Available options are:
	Savings Account
	Current Account
	Loan Account
	Term Deposit Account
	Credit Card
Product Category	Select the product category.
	Available options are
	Individual
	Small and Medium Business
	If Product Type is selected as Credit Card , the system defaults as Individual in read-only mode.

Table 1-1 (Cont.) Business Product Details – Field Description

Field	Description
Product Sub Type	Select the product sub-type from the drop-down list. This field appears and is supported for the below listed Product types and the respective product categories only.
	a. Loan Account
	b. Term Deposit
	Retail Credit Card This field is not applicable for Saving Account and Current Account.
Business Product Code	Specify the business product code. NOTE: Maximum length of business product code should not be more than 6 characters. Alphanumeric and alphabets should be in capital.
Business Product Name	Specify the business product name.
Business Product Date Range	Select the date range as per the business requirement. System displays the logged in application date in Start Date by default. The End date has to be ahead of the Start Date and the Business Product Review Date.
Business Product Review Date	Select the review date as per the business requirement. Review date has to be ahead of the Business Product Start Date and earlier than the Business Product End Date.
First Home Buyer Applicable	Select to indicate whether first home buyer feature is applicable for the specified product. This field appears if the Loan Account option and Home Loan option is selected from the Product Type list and Product Sub Type list respectively.
Channel Allowed	Select the channels which are allowed for the business product from the drop-down list. Available options are: • RPM • OBDX
Fintech Allowed	Select the toggle if the business product is supported for Origination from 'Fintech' Companies.
Fintech Name	Select the Fintech Company name from the drop-down list. System allows selection of multiple companies. This field is displayed only if Fintech Allowed toggle is selected.

Table 1-1 (Cont.) Business Product Details – Field Description

Field	Description
IPA Applicable	Select the toggle to indicate whether the In-Principal Approval (IPA) is applicable for loan. By default, this will be disabled.
	This field is displayed if Product Type is selected as Loan and Product Category is selected as Individuals .
Application Submission is Mandatory	Select the toggle to make the Application Entry stage as mandatory in Product Details data segment for the business product.
	This configuration will be possible only if the Application submission configuration is set as 'Y'. Please refer section 2.8Application Submission Configuration for more details.

1.1.1.2 Business Product Attributes

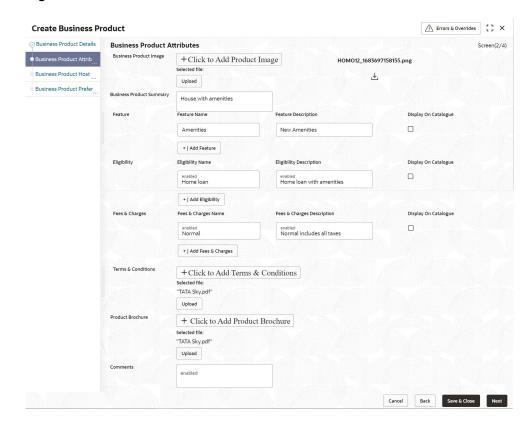

This topic describes the systematic instructions to display the business product attributes.

In the data segment, the details such as business product summary, business product image, feature, eligibility are captured and ultimately used for displaying in the product catalog process and the product details.

1. Click **Next** in the **Business Product Details** screen to proceed the next data segment, after successfully capturing the data.

The Business Product Attributes screen displays.

Figure 1-2 Business Product Attributes

2. Specify the fields on **Business Product Attributes** screen.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 1-2 Business Product Attributes – Field Description

Field	Description
Business Product Image	Select the image that user want to display for the business product in the Product Catalogue. Click Upload to upload it.
Business Product Summary	Specify the content for the business product summary.
Feature	Specify the feature details.
Feature Name	Specify the feature name.
Feature Description	Specify the feature description of the business product.
Display On Catalogue	Select this checkbox, if the same information should be displayed in the Product Catalogue.
Add Feature/Remove Feature	Click Add Feature or Remove Feature to add or remove the rows respectively.
Eligibility	Specify the eligibility details.
Eligibility Name	Specify the eligibility name.
Eligibility Description	Specify the eligibility description of the business product.
Display On Catalogue	Select this checkbox, if the same information should be displayed in the product catalogue.
Add Eligibility/Remove Eligibility	Click Add Eligibility or Remove Eligibility to add or remove the rows respectively.
Fees and Charges	Specify the fees and charges details.
Fees and Charges Name	Specify the fees and charges name.
Fees and Charges Description	Specify the fees and charges description of the business product.
Display On Catalogue	Select this checkbox, if the same information should be displayed in the product catalogue.
Add Fees and Charges/ Remove Fees and Charges	Click Add Fees and Charges or Remove Fees and Charges to add or remove the rows respectively.
Terms and Conditions	Select the Terms and Condition PDF file and click Upload to upload it.
Product Brochures	Select the Business Product Brochure PDF file and click Upload to upload it.
Comments	Specify the comments, if required.

1.1.1.3 Business Product Host Mapping

This topic describes the systematic instructions to map the host product and parameters for Interest and Charges that are linked to the host product.

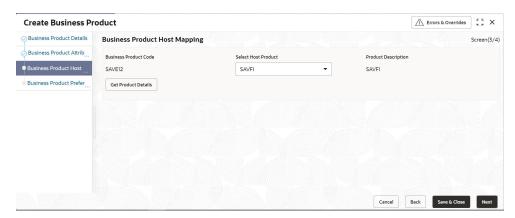

In the data segment, the business product is mapped to the host product and parameters for Interest and Charges that are linked to the host product are defined.

To map business product host:

 Click Next in Business Product Attributes screen to proceed with next data segment, after successfully capturing the data.

The Business Product Host Mapping screen displays.

Figure 1-3 Business Product Host Mapping

Specify the fields on Business Product Host Mapping – Field Description screen.

For more information on fields, refer to the field description table.

Table 1-3 Business Product Host Mapping – Field Description

Field	Description
Business Product Code	Displays the business product code defaulted from Business Product Code entered in the Business Product Details data segment.

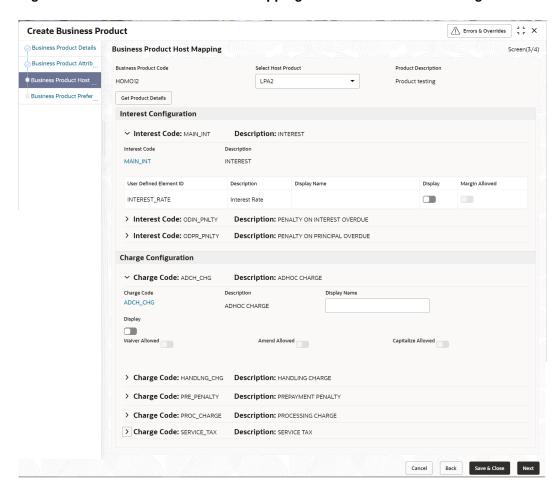

Table 1-3 (Cont.) Business Product Host Mapping – Field Description

Field	Description
Select Host Product	Select the host product from the drop-down list.
	You can configure the host product based on the mapping.
	Note: Without Oracle Banking Routing Hub Configuration, Host products will not be displayed. Refer to Oracle FLEXCUBE Universal Banking Integration Guide.
	Without Card Management System Integration, the Credit card product cannot be configured.
	Refer to Card Management System Integration Guide.
Product Description	Displays the product description once the host product is selected in Select Host Product .
Get Products Details	Click Get Products Details , and the system will display various interest codes and the charge codes linked to the host product in the Interest Details and Charge Details panel.

3. Click Get Product Details.

The Business Product Host Mapping – Interest Details and Charge Details screen displays.

Figure 1-4 Business Product Host Mapping – Interest Details and Charge Details

4. Specify the fields on **Business Product Host Mapping with Interest Details and Charge Details** screen.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 1-4 Business Product Host Mapping with Interest Details and Charge Details – Field Description

Field	Description
Interest Configuration	Specify the required interest details.
Interest Code	Displays the interest code linked to the host product.
Description	Displays the description of the interest code linked to the host product.
User Defined Element ID	Displays the user defined element ID linked to the Interest Code .
Description	Displays the description of the user defined element ID linked to the Interest Code .
Display Name	Specify the display name of the interest user defined element. This is the interest name that would be displayed in the Oracle Banking Origination screens such as Interest details data segment for Current and Savings account origination process and Loan Interest Details data segment for loan origination process.
Display	Select to display the specified interest user defined element in the Interest Details data segment.
Margin Allowed	Select if margin can be provided to the Business Product in the Interest Details data segment of product origination process. Note: Currently, margin is not supported for Savings and Current Account, hence this switch should be off for Savings Account and Current Account.
Charge Configuration	Specify the required charge details.
Charge Code	Displays the charge code linked to the Host Product.
Description	Displays the description of the charge code linked to the Host Product.
User Defined Element ID	Displays the user defined element ID linked to the charge code.
Description	Displays the description of the user defined element ID linked to the charge code.

Table 1-4 (Cont.) Business Product Host Mapping with Interest Details and Charge Details – Field Description

Field	Description
Display Name	Enter the display name of the interest user defined element This is the interest name that would be displayed in the Oracle Banking Origination screens such as Interest Data Segment.
Display	Select to display the specified charge code or charge user defined element in the Charge Details data segment.
Waiver Allowed	Select if specified charges can be waived during Product Origination.
Amend Allowed	Select if specified charges can be amended during Product Origination.
Capitalize Allowed	Select if the charges can be capitalized for this product. This option allows you to capitalize the fee charges while submitting an application.
	This is applicable for all the charges of the product. Currently applicable only for loan products.

The number of panels for interest details and charges details will depend on the number of interest codes and charge codes linked to the Host Product.

1.1.1.4 Business Product Preferences

This topic describes the systematic instructions business product preferences.

The Business Product Preference data segment allows to define preferences based on selected product and Product category.

- Loan Product Preferences
 This topic describes the loan product preferences details.
- Saving or Current Product Preferences
 This topic describes the saving product preferences details.
- Term Deposit Product Preferences
 This topic describes the term deposit product preferences details.
- Credit Card Product Preferences
 This topics describes the credit card product preferences details.

1.1.1.4.1 Loan Product Preferences

This topic describes the loan product preferences details.

If the **Product Category** is selected as **Individual** to configure loan preferences:

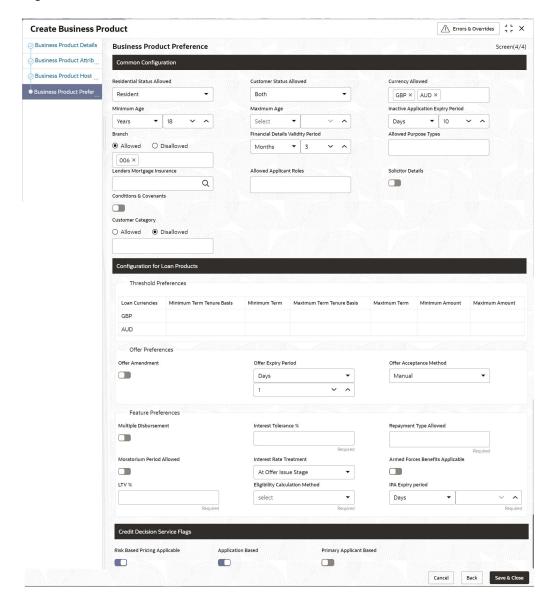

Figure 1-5 Business Product Preference – Loan Product

Table 1-5 Business Product Preference - Loan Product- Individual

Field Name	Description
Common Configuration	Specify the common configurations for the business product.
Residential Status Allowed	Select the option for which the business product is applicable for. Available options are:
	ResidentNon-ResidentBoth

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Customer Status Allowed	Select the option for which the business product is applicable for. Available options are:
	Major Minor
	• Both
	Not Applicable
Currency Allowed	Select the currency that are allowed for the business product. System allows to select multiple currencies, if applicable.
	The list of currencies appears based on the host configuration.
Minimum Age	Specify the minimum age of the applicant who are eligible to open the account for the business product being created. Select the period from the drop-down box. Available options are:
	• Days
	Month Year
Maximum Age	Specify the maximum age of the applicant who are eligible to open the account for the business product being created. Select the period from the drop-down box. Available options are:
	DaysMonthYear
Inactive Application Expiry Period	Specify the period after which the application must be marked as Expired .
	Select the period from the drop-down box. Available options are:
	• Days
	Month Year
	Once the application has expired, no further lifecycle activity can happen for that application.
Branch	Select one of the following options:
	Allowed – Select it to indicate and specify the branches where the account under the specified Business Product are allowed to be opened.
	Disallowed – Select it to indicate and specify the branches where the account under the specified Business Product are not allowed to be opened.
	System allows to select Disallowed and keep it blank so that the Business Product is allowed for all the branches.
Financial Details Validity Period	Specify the validity period for financial details of the applicant. Select the period from the first drop-down box. Available options are:
	DaysMonthYear
	Select the numeric period from the second drop-down box.

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Et J. I. N.	B
Field Name	Description
Allow Purpose Types	Select the purpose types that are allowed for business product. System allows to select multiple purpose types, if applicable. The available options are: Buy a New Home Construction Remortgage with US Home Improvement / Renovation Motor Vehicle – New Motor Vehicle – Used Personal Education Other This field appears if the Loan Account option and Home Loan option is selected from the Product Type list and Product Sub Type list respectively.
	If you configure purpose types for loan product then purpose type list appears while updating Product Details throughout the account opening process.
Lender Mortgage Insurance	Search and select the lender mortgage insurance rule that are defined. This field appears if the Loan Account option and Home Loan option is selected from the Product Type list and Product Sub Type list respectively.
Allowed Applicant Roles	Specify the applicant roles that are allowed to apply this product.
Solicitor Details	Specify whether the solicitor details are allowed to capture while submitting this products account opening application.
Condition &Covenants	Specify whether the conditions and covenants are allowed to capture while submitting this products account opening application.
Customer Category	Select one of the following options: Allowed – Select it to indicate and specify the customer category where the account under the specified Business Product are allowed to be opened. Disallowed – Select it to indicate and specify the customer category where the account under the specified Business Product are not allowed to be opened. The system allows to select Disallowed and keep it blank so that the Business Product is allowed for all the branches.
Configurations for Loan Products	Specify the configurations for the loan products.
Threshold Preference	In this section you can capture the threshold preference of loan product.
Loan Currencies	Displays the currency based on the Currency Allowed configured in the Common Configuration tab above.

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Minimum Term	Specify the minimum tenure of the loan for the selected currency.
Maximum Term Tenure Basis	Select the maximum term tenure. Available options are: Days Month Year
Maximum Term	Displays the maximum tenure of the loan for the selected currency.
Minimum Amount	Displays the minimum amount of the loan for the selected currency.
Maximum Amount	Displays the maximum amount of the Loan for the selected Currency.
Offer Preferences	In this section you can set the offer related preference for loan product.
Offer Amendment	Select to indicate whether the offer is allowed to amend.
Offer Expiry Period	Select the expiry period of an offer in days, months and years. Enter the count. OR Select the up and down arrow to increase or decrease the count.
Offer Acceptance Method	Select the method to accept the offer.
	The available options are:
	Manual
	• Auto
Feature Preference	In this section you can capture the features preference for loan product.
Multiple Disbursement	Select the toggle if multiple disbursement is allowed for the loan accounts.
Interest Tolerance %	Specify the maximum interest margin, the user can provide for the loan account. You can specify the maximum value as 100.00%. Tolerance Percentage = Interest Rate Interest Tolerance Percentage.
Repayment Type Allowed	Displays the repayment type allowed for the loan product based on the host product mapped with the business product. Available options are: • EMI • IOPM • POIM • FPI • BULLET
Moratorium Period Allowed	Select the toggle if moratorium period is allowed for the loan accounts.

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Interest Rate Treatment	Select the interest rate treatment from the drop-down list. Available options are: • At Offer Issue Stage
	At the Time of Loan Account Creation
	• Pegged Period If Pegged Period is selected, you need to additionally select the period from Month or Year and enter the numeric value for the Pegged Period definition.
Armed Forces Benefits Applicable	Select to indicate the armed forces benefits are applicable to the loan product.
LTV%	Specify the percentage for Loan to Value (LTV).
	LTV = Loan Amount / Collateral Value
	This field is displayed, if Product Sub Type is selected as Home Loan in Business Product Details segment.
Eligibility Calculation Method	Select the required option for the eligibility calculation method from the drop-down list. Available options are:
	 Net Income Method Eligibility Amount = (Net Savings / EMI per Lakh) 100000 FOIR Method
	Eligibility Amount = (Gross Income FOIR% - Financial Liability) / EMI per Lakh 100000
	Note : Banks will compare the eligible amount as per FOIR and LTV, and the lowest eligible amount will be considered.
	This field is displayed, if IPA Applicable is selected in Business Product Details segment.
FOIR%	Specify the FOIR percentage.
	This field is displayed if Eligibility Calculation Method is selected as FOIR Method.
IPA Expiry Period	Select the IPA expiry period. Available options are:
	• Days
	Months Years
	This field is displayed if IPA Applicable is selected in Business
	Product Details segment.
Credit Decision Service Flags	Select the Credit Decision Service Flags.
Risk Based Pricing Applicable	Select the toggle if Risk based pricing is allowed for the loan accounts.
Application Based	Select the toggle if the scorecard calculation should be considered based on the application.
Primary Applicant Based	Select the toggle if the scorecard calculation should be considered based on the Primary applicant.

If the Product Category is selected as Small and Medium Business:

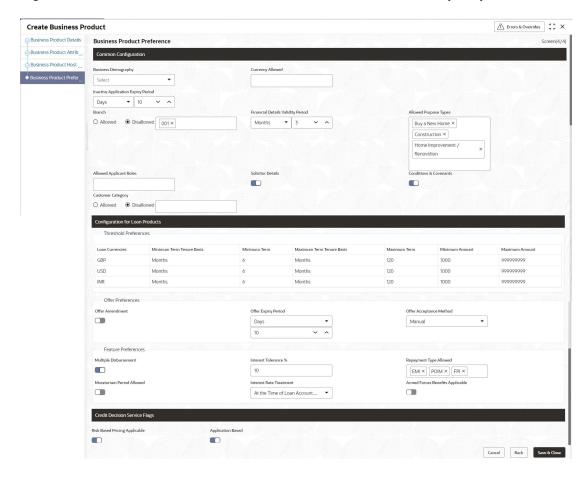

Figure 1-6 Business Product Preference - Loan Account Product (SMB)

Table 1-6 Business Product Details - Field Description

Field	Description
Common Configuration	Specify the common configurations for the business product.
Business Demography	Select the option for which the business product is applicable for. Available options are:
	Domestic
	Overseas
Currency Allowed	Select the currency or currencies that are allowed for the business product. System allows to select multiple currencies, if applicable.
Inactive Application Expiry Period	Specify the period after which the application must be marked as Expired .
	Select the period from the drop-down box. Available options are:
	• Days
	Month
	Year
	Once the application has expired, no further lifecycle activity can happen for that application.

Table 1-6 (Cont.) Business Product Details – Field Description

Field	Description
Branch	Select one of the following options:
	 Allowed – Select it to indicate and specify the branches where the account under the specified Business Product is allowed to be opened. Disallowed – Select it to indicate and specify the branches where the account under the specified Business Product is not allowed to be opened.
Financial Details Validity Period	Specify the validity period for financial details of the applicant. Select the period from the first drop-down box. Available options are:
	Days
	Month
	• Year
	Select the numeric period from the second drop-down box.
Allow Purpose Types	Select the purpose types that are allowed for business product. System allows to select multiple purpose types, if applicable.
	The available options are:
	Buy a New Home
	Construction
	Remortgage with US
	Home Improvement / Renovation Motor Vehicle – New
	Motor Vehicle – New Motor Vehicle – Used
	Personal
	• Education
	• Other
	If you configure purpose types for loan product then purpose type list appears while updating Product Details throughout the account opening process.
Allowed Applicant Roles	Specify the applicant roles that are allowed to apply this product.
	The available options are:
	Primary
	Joint
	Guarantor
Solicitor Details	Specify whether the solicitor details are allowed to capture while submitting this products account opening application.
Condition & Covenants	Specify whether the conditions and covenants are allowed to capture while submitting this products account opening application.
Customer Category	Select one of the following options:
	Allowed – Select to indicate whether the specified categories are
	allowed to open an account for selected product.
	Disallowed – Select to indicate whether the specified categories are not allowed to open an account for selected product.
	The system allows to select Disallowed and keep it blank so that the
	Business Product is allowed for all the branches.
Configuration for Loan Products	Specify the configurations for Loan products.
Threshold Preferences	In this sections you capture threshold preferences for loan product.

Table 1-6 (Cont.) Business Product Details – Field Description

Field	Description

	Once the application has expired, no further lifecycle activity can happen for that application.	
Branch	Select one of the following options:	
	 Allowed – Select it to indicate and specify the branches where the account under the specified Business Product is allowed to be opened. 	
	Disallowed – Select it to indicate and specify the branches where the account under the specified Business Product is not allowed to be opened.	
Allowed Applicant Roles	Specify the applicant roles that are allowed to apply this product.	
Customer Category	Select one of the following options:	
	Allowed – Select to indicate whether the specified categories are allowed to open an account for selected product.	
	Disallowed – Select to indicate whether the specified categories are not allowed to open an account for selected product.	
	The system allows to select Disallowed and keep it blank so that the Business Product is allowed for all the branches.	
Configuration for Term Deposit Products	Specify the configurations for the term deposit.	
Funding Threshold Preferences	Specify the funding threshold preferences for term deposit product.	
Term Deposit Currencies	Displays the currency based on the Currency Allowed configured in the Common Configuration tab above.	
Minimum Term Tenure	Select the minimum term tenure. Available options are:	
Basis	• Days	
	Month	
	• Year	
Minimum Term	Specify the minimum tenure of the term deposit for the selected currency.	
Maximum Term Tenure	Select the maximum term tenure. Available options are:	
Basis	• Days	
	Month	
	Year	

Table 1-12	(Cont.) Business Product Details – Field Description
-------------------	--

Field	Description	
Maximum Term	Displays the maximum tenure of the term deposit for the selected currency.	
Minimum Amount	Displays the minimum amount of the term deposit for selected currency.	
Maximum Amount	Displays the maximum amount of the term deposit for the selected currency.	
Banking Channels	Select to indicate if multiple banking channels are allowed for the account.	
Channels Allowed	Select the channels that are allowed to the account. The available options are: KISOK Banking Direct Banking Phone Banking This field appears if the Banking Channel toggle is selected.	
Auto Rollover	Select to indicate if auto rollover is allowed for the account.	
Common Configuration	Specify the common configurations for the business product.	

- Click Next in Business Product Host Mapping screen to proceed with next data segment, after successfully capturing the data.
- 2. Specify the details in the relevant data fields. The fields which are marked with Required are mandatory. For more information on fields, refer to the field description table.
- 3. Click **Submit** to create business product.

At this point, the status of business product is unauthorized. User with supervisor access has to approve the business product. Once approved, status of the business product changes from unauthorized to authorized and is available for linking in the business process.

1.1.2 View Business Product

This topic describes the systematic instructions to View Business Product.

Oracle Banking Origination supports to view the business product created. The View Business Product allows the user to view all of the authorized, un-authorized and closed business product. Authorize option is available for supervisor users for approving unauthorized business product.

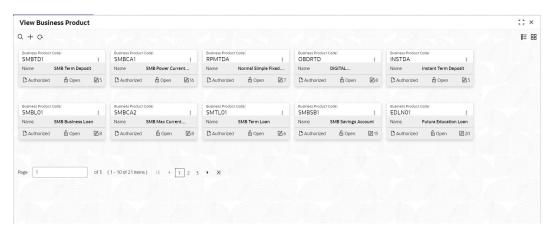

Specify **User ID** and **Password**, and login to **Home** screen.

- From Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Business Product.
- 3. Under Business Product, click View Business Product.

The View Business Product screen displays.

Figure 1-13 View Business Product

4. Click

icon on the top right-hand side of the business product tile to perform actions on the add record.

For more information on fields, refer to the field description table below.

Table 1-13 View Business Product – Option Description

Field	Description
Unlock	Click Unlock to edit the business product information in Create Business Product data segment.
	System will not allow to edit the following fields:
	Product Type
	Product Sub-Type
	Business Product Code.
	Make the required changes in the other relevant data segment and submit the business product.
Close	Click Close to close the business products that are no more relevant for banking product offering. User can close only authorized business products.
Сору	Click Copy to copy the authorized or unauthorized business products to quickly create new business product.
View	Click View to view the authorized or unauthorized business products.
Authorize	User with supervisor access will be able to authorize the unauthorized business product. Once approved, the business product status changes to 'Authorized' and is available for linking in the Business Process.

Table 1-13 (Cont.) View Business Product – Option Description

Field	Description
	Click Delete to delete the business products that are unauthorized and no more required.

1.2 Business Process Configuration

This topic provides the information about the business process configuration.

The Oracle Banking Origination is equipped with Business Process configuration helping banks to build desired workflow for origination by defining the stages for the product origination and defining the respective data segments, checklists, documents required and advice generation for the stages.

A business process can be defined as a set of activities and tasks that are once completed, will accomplish the distinct origination processes. The business process must involve clearly defined inputs and a single output.

The business process definition determine the different stages which are required for a given combination of the process code, life cycle and business product code. The workflow management of these stages and the relevant stage movements are defined in workflow Orchestrator to help us orchestrate the micro-services based process-flow and ensure seamless transition of the Account Origination process across various stages in that given order. The Workflow Orchestrator process will drive the workflow from one stage to another based on the process outcomes at the respective stages and subject to fulfilling of the mandatory data capture, confirmation on the mandatory checklist items and submission of mandatory documents at the respective stages. The stages defined in the business process can be dynamically assigned to different user profiles or roles.

During product origination, the system picks the business process run-time and initiates the workflow based on the configuration.

The Prerequisites for configuring the Business Process are enumerated below:

Lifecycle

Lifecycle represents the lifecycle of the process for which the Business Process is created. These are factory shipped codes and currently support 'Origination' lifecycle for products types such as Savings Account, Current Account, Loans and Credit Card..

The list of lifecycle codes is available in Lifecycle Codes.

Process Code

Process Code defines the various stages relevant for the origination workflow. Process Code configuration allows you to define the business process flow that needs to be mapped for the business product and lifecycle code combination in the Business Process configuration.

A set of default process codes are factory-shipped for the reference workflow. User can also create process codes in "CMC_TM_PROCESS_CODE" and "CMC_TM_PROCESS_STAGE" tables. The list of shipped process codes is available in Process Codes.

Business Product

Business Product maintenance allows configuring the various business products in accordance with the product offerings that the bank deals in. Each business

product has a unique business process defined for a specific lifecycle code selected.

This topic contains the following subtopics:

- Create Business Process
 This topic describes the systematic instructions to create business process.
- View Business Process
 This topic describes the systematic instructions to View Business Process.

1.2.1 Create Business Process

This topic describes the systematic instructions to create business process.

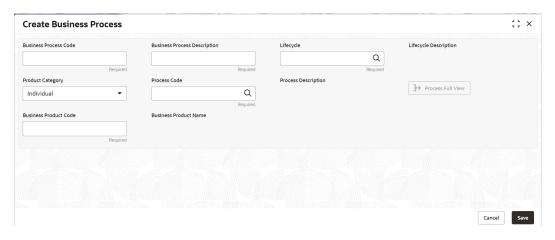

The Create Business Process aids in configuring the workflow for product origination. As mentioned earlier, this process will allow to define the data segments, checklists, documents and advices for the stages defined in the process code selected for the lifecycle code and business product combination.

Specify User ID and Password, and login to Home screen.

- 1. From Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Business Process.
- 3. Under Business Process, click Create Business Process.

The **Create Business Process** screen displays.

Figure 1-14 Create Business Process

4. Specify the fields on **Create Business Process** screen.

This topic contains the following subtopics:

Table 1-14 Create Business Process - Field Description

Field	Description
Business Process Code	Specify an alphanumeric business process code.
	Maximum Length allowed is 16.
Business Process	Specify the description of the business process code.
Description	Maximum Length allowed is 60.
Lifecycle	Search and select the lifecycle code.
Lifecycle Description	Displays the description of the lifecycle selected.
Product Category	Select the product category.
	Available options are
	Individual
	Small and Medium Business
	If Product Type is selected as Loan Account or Credit Card , the system defaults as Individual in read-only mode.
Process Code	Search and select the process code of the business process flow that needs to be mapped for the lifecycle code and business process code combination.
Process Description	Displays the description of the selected process code.
Business Product Code	Specify the business product code for which the business process is being created. Alternatively, system allows to select 'All', in which case the business process will be applicable to all the business products that are associated with the Lifecycle and Process Code.
Business Product Name	Displays the business product name based on the product code selected.

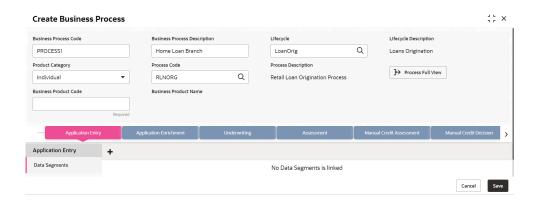

System will allow you to configure only one business process for a combination of **Lifecycle** and **Business Product Code**.

5. Search and select the **Process Code**.

The Create Business Process screen with stages displays.

Figure 1-15 Create Business Process screen with stages

- 6. Click **Save** to save the data captured.
- 7. Click **Cancel** to close the business process screen.

The Create Business Process configuration allows to configure the below elements for each of the stages of the Product Origination workflow:

Data Segment

This topic describes the systematic instructions of data segment.

Document

This topic describes the systematic instructions of documents submitted by customer for the product origination process.

Checklist

This topic describes about the list of mandatory checkpoints by the bank to its users to adhere to during the Product Origination processes.

Advices

This topic describes the systematic instructions of advices action taken by the bank.

1.2.1.1 Data Segment

This topic describes the systematic instructions of data segment.

A data segment, as the name suggests is an individual block of data. Bringing in data segments allows to break down a huge process into smaller units, which makes easier to update, maintain and process. Business Process will consist of such several data segments that makes up the stage.

Business Process Definition enables the user to perform the following:

To configure the Business Process Definition enables the user to perform the following:

- 1. Select the stage in which to add the data segments.
- 2. Click

to data segments in the respective stage.

The **Data Segments** screen displays.

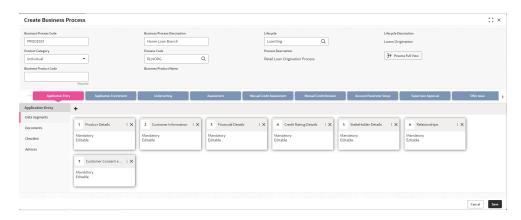

Figure 1-16 Data Segments

3. Click **Add** to add the selected data segments.

The **Create Business Process with Date Segments** screen is displayed with data segment added.

Figure 1-17 Create Business Process with added Data Segments

The System allows to re-sequence the data segment by dragging and dropping over the specific data segment.

4. Click

Ė

from the added data segment tile to edit the properties.

The edit properties screen is displayed.

Figure 1-18 Edit Data Segment Properties

- From the Preview section, you can preview the appearance of the selected data segment.
- **6.** From the Settings section, select whether the data segment is mandatory.
- 7. Select whether the data segment is editable.
- 8. Click Save.
- **9.** Drag and Drop the data segment tile to control the sequence order. Based on set position it will appears in the respective stages.
- 10. Click Save to save the changes.

1.2.1.2 Document

This topic describes the systematic instructions of documents submitted by customer for the product origination process.

This section describes about the documents that are to be submitted by the customer for the Product Origination process.

To add documents:

- Select the stage and click **Document** tab to define the specific documentation requirement for different stage.
- 2. Click add to documents in the respective stage.

The Create Business Process - Documents screen is displayed.

	,
Field	Description
Document Type	Search and select the document type.
Document Description	Displays the corresponding description of the document.
Mandatory	Select if the document submission for the stage is mandatory.
Business Products	Select the required option for the document submission requirement. Available options are: Single Product List of Products All
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.

1.2.1.3 Checklist

This topic describes about the list of mandatory checkpoints by the bank to its users to adhere to during the Product Origination processes.

Checklist are the distinct and this section describes list of mandatory checkpoints by the bank to its users to adhere to during the Product Origination processes.

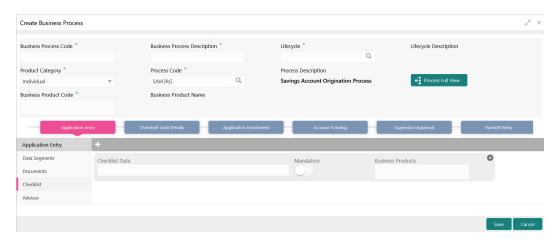

To add checklist:

1. Select the stage and click **Checklist** tab.

The Create Business Process - Checklist screen displays.

Figure 1-20 Create Business Process – Checklist

2. Specify the fields on Create Business Process - Checklist screen.

For more information on fields, refer to the field description table.

Table 1-16 Create Business Process - Checklist

Field	Description	
Checklist Data	It is a free-text field that allows to user to enter the checklists that must be validated as part of selected stage.	
Mandatory	Select if the document submission for the stage is mandatory.	
Business Products	Select the required option for the document submission requirement. Available options are: Single Product List of Products All	
Save	To save the captured details, click Save .	
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.	

1.2.1.4 Advices

This topic describes the systematic instructions of advices action taken by the bank.

Advices are official letter of notices detailing an action taken or to be taken on a stated date by the bank. This is the final configuration for the Business Process creation.

1. Select the stage and click Advices tab.

The Create Business Process - Advices screen displays.

	Product Sub-Type	
	Business Product Code.	
	Make the required changes in the other relevant data segment and submit the business product.	
Close	Click Close to close the business products that are no more relevant for banking product offering. User can close only authorized business products.	
Authorize	User with supervisor access will be able to authorize the unauthorized business product. Once approved, the business product status changes to 'Authorized' and is available for linking in the Business Process.	
Close	Click Close to close the business products that are unauthorized and no more required.	

1.3 Rule Configuration

This topic provides the information for the user to rule the configuration.

Rule Configuration enables the user to create, view, and modify the facts and rules.

This topic includes following subtopics:

Fact

This topic provides the information to fact carrying entity used for creating the rules or features.

Rule

This topic provides the information for the user to enable the rule.

1.3.1 Fact

This topic provides the information to fact carrying entity used for creating the rules or features.

Fact is the information carrying entity used for creating the rules or features. The following list of facts are factory shipped product.

Table 1-19 List of Facts – Factory shipped

1.3.2 Rule

This topic provides the information for the user to enable the rule.

Rule enables the user to build the expression to perform the calculation with the facts created.

Steps to build the expression is explained with the below example.

The Rule Expression for Loan to Value (LTV) is Loan to Value (LTV) = (LOANAMOUNT /COLLATERAL_VALUE) *100

For now, the above expression is not supported directly, and LTV calculation is achieved by the below steps.

Step 1: Create a Rule1 - LOAN_TO_COLLATERAL

Expression - LOANAMOUNT/COLLATERAL VALUE

Create a rule2 - Loan to Value (LTV)

Expression - LOAN TO COLLATERAL *100

This topic contains the following subtopics:

Create Rule

This topic describes the systematic instructions to configure rule.

View Rule

This topic describes the systematic instructions to view the list of rule.

Create Rule Group

This topic describes the systematic instructions to configure rule group.

View Rule Group

This topic describes the systematic instructions to view the list of rule group.

View Audit Rule

This topic describes the View Audit Rule.

1.3.2.1 Create Rule

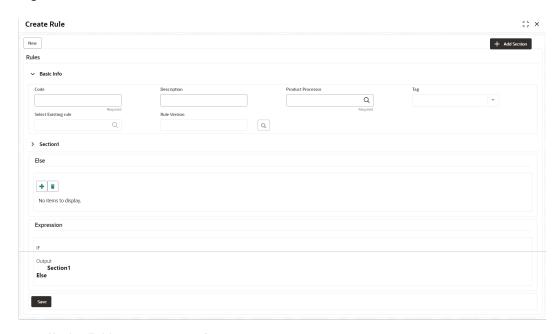

This topic describes the systematic instructions to configure rule.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Rule.
- 3. Under Rule, click Rule. Under Rule, click Create Rule.

The Create Rule screen displays.

Figure 1-29 Create Rule

4. Specify the fields on **Create Rule** screen.

Note:

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 1-23 Create Rule - Field Description

_	
Field	Description
Code	Specify the alphanumeric code without space for the rule.
Description	Specify the description of the rule.
Product Processor	Click Search and select the product processor.
Tag	Select the tag from the drop-down list.
Select Existing Rule	Click Search and select the existing rule.
Add Section	Click Add Section to create the multiple rule condition.
Expression Builder	Select the expressions to build the rule.
Add Expression	Click Add Expression to create the expression for the rule.
+ Icon	Click + icon to add new expression.
Fact / Rules	Select the fact or rule from the drop-down list.
Operator	Select the comparison operator from the drop-down list.
Data Type	Select the data type for the fact or rule. Once the user select the data type, one more field opens adjacent to the output, update the same based on the selected output option. The available options are: Text Number Boolean Date Fact The below option appears if the Data Type is selected as Boolean. True False
Output	Select the output from the drop-down list. Once the user select the data type, one more field opens adjacent to the output, update the same based on the selected output option. The available options are: Text Number Boolean Date Fact
Expression	Displays the expression and output updated in the expression builder.

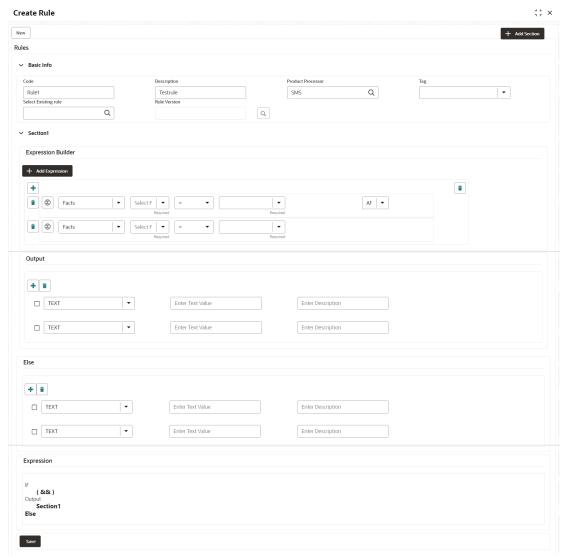

5. Click **Save** to save the details of rule.

Create Rule with multiple Output Steps to build a Rule with multiple output is explained with the below example.

The Rule Expression for Multiple output rule is: IF (TotalIncome > 20000) && (TotalExpense < 8000)

Figure 1-30 Create Rule with Multiple Output

6. Click **Save** to save the details the Rule.

1.3.2.2 View Rule

This topic describes the systematic instructions to view the list of rule.

The View Rule screen allows the user to view and modify the existing rules.

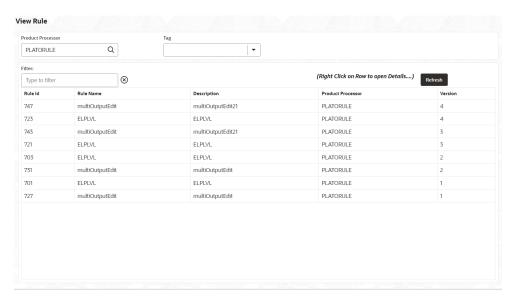

Specify **User ID** and **Password**, and login to **Home** screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.

Request ID	Specify the request ID available from the output of evaluate API.

- 6. Click **Submit** to view to details.
- 7. Click **Show Rule log**, to view the log rule for selected request ID.

1.4 Credit Decision Configuration

This topic provides the information about the credit decision configuration.

A credit score is a number that describes a consumers creditworthiness. The higher the score, the better a borrower looks to potential lenders. A credit score is based on the various features linked to the score model. Lenders such as banks and credit card companies use credit scores to evaluate the risk of lending money to the customer.

This topic includes following subtopics:

Questionnaire

This topic describes the information about the questionnaire used for credit analysis.

Validation Model

This topic describes the information about the Validation model.

Borrowing Capacity

This topic describes the information about the total amount the applicant is eligible to borrow.

Scoring Feature

This topic describes the information about the scoring feature in Decision service.

Quantitative Scoring Model

This topic describes the information about the Quantitative scoring model for the Decision service.

Qualitative Scoring Model

This topic describes the information about the Qualitative scoring model for the Decision service.

Decision Grade Matrix

This topic describes the information about the decision grade matrix feature.

Pricing

This topic describes the information about the pricing feature in Decision service.

Strategy Configuration

This topic describes the information about the strategy configuration.

1.4.1 Questionnaire

This topic describes the information about the questionnaire used for credit analysis.

Questionnaire allows you to create the set of questions and answers to evaluate the qualitative score for each applicant. This questionnaire is used in the qualitative scoring model and the response to the questions are sent from the Oracle Banking Origination to Decision Service.

This topic contains the following subtopics:

Create Questionnaire

This topic describes the systematic instructions to configure the qualitative questionnaire based on the various parameters.

View Questionnaire

This topic describes the systematic instructions to view the list of configured questionnaire.

1.4.1.1 Create Questionnaire

This topic describes the systematic instructions to configure the qualitative questionnaire based on the various parameters.

This questionnaire can be further linked to define qualitative scoring model.

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Questionnaire.
- 4. Under Questionnaire, click Create Questionnaire.

The Create Questionnaire screen displays.

Figure 1-36 Create Questionnaire

5. On Create Questionnaire screen, specify the fields.

Table 1-29 Create Questionnaire - Field Description

Field	Description
Basic Details	This section has the basic details of questionnaire code.
Questionnaire Code	Specify the questionnaire code.
Questionnaire Description	Specify a short description for the questionnaire.
Product Processor	Specify the product processor for which the questionnaire is being created.
Category	Specify the category of the questionnaire.
Create	Click Create to configure the questions.
Question Code	Specify the unique question code.
Question Description	Specify the description for the question.
Select-Type	Select the type of response option from the drop-down list. The available options is Select-Single-Choice .
Short Name	Specify the short name of the question. This will be displayed in the Execution Summary.
Answer Code	Displays the answer code.
Answer Option	Specify all the expected response for the question configured.
Add	Click Add to add the expected response to the question.
Update	Click Update to edit the response.
Remove	Click remove to remove the response.
Required	By default, this option is enabled. Indicates whether the question is mandatory or optional.
Done	Click Done to save the data.
Preview	Click Preview to view the questions configured for the questionnaire along with the response choice.

Table 1-29 (Cont.) Create Questionnaire - Field Description

Field	Description
4	Click this icon to view the responses configured for the questionnaire.
	Click this icon to move the position of the questions.
	Click this icon to expand, copy or remove question.
Сору	Click this icon to copy the question.
िंदू Remove	Question Click this icon to remove the question.
Add Question	By Clicking Add Question , the user can add another question.

6. Click **Save** to save the details.

The **Questionnaire** is successfully created and can be viewed using **View Questionnaire** screen.

1.4.1.2 View Questionnaire

This topic describes the systematic instructions to view the list of configured questionnaire.

The user can create the questionnaire using the **Create Questionnaire** screen. The status of the created questionnaire is displayed as **Unauthorized** and **Open**. Once the checker authorizes the questionnaire, the status is updated to **Authorized** and **Open**.

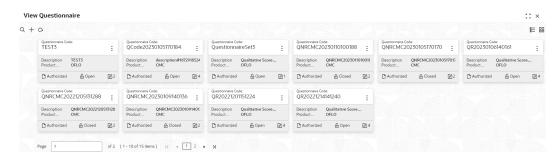

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Questionnaire.
- 4. Under Questionnaire, click View Questionnaire.

The View Questionnaire screen displays.

1.4.2 Validation Model

This topic describes the information about the Validation model.

Validation Model allows you to define Validation model to evaluate the application even before the Credit Assessment, only those application where Validation Model is Pass will be proceeded further. If the Validation Model is Failed, then the application cannot be proceeded further.

This topic contains the following subtopics:

- Create Validation Model
 - This topic describes the systematic instructions to create Validation model based on the various input.
- View Validation Model

This topic describes the systematic instructions to view the list of configured validation model.

1.4.2.1 Create Validation Model

This topic describes the systematic instructions to create Validation model based on the various input.

The **Create Validation Model** screen allows user to create validation model based on the various input. User can configure the strategy as per the requirement.

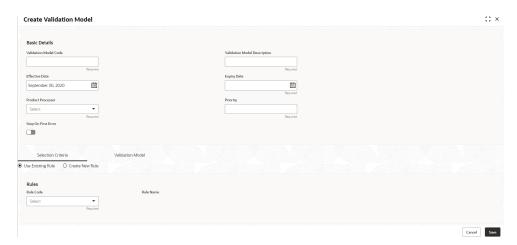

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Validation Model.
- 4. Under Validation Model, click Create Validation Model.

The Create Validation Model screen displays.

Comments	Displays the comments of the created validation model.

1.4.3 Borrowing Capacity

This topic describes the information about the total amount the applicant is eligible to borrow.

Maximum loan amount are used for loans, credit cards, and line of credit accounts. The maximum credit amount depends on a number of factors including the borrower's credit worthiness, that is, financial profile and debt to income, loan term, loan purpose, whether the loan is supported by a collateral etc.

Using this screen, the user can link a rule for calculating borrowing capacity. The user can calculate the maximum lendable amount based on the various criteria of the lender such as debt to income ratio, credit score, credit history, etc.

A sample rule to calculate borrowing capacity is given below:

Scenario: Based on Income and FICO score

Rule 1:

IF MIN(FICO_SCORE) >= 500 AND MIN(EMPLOYMENT_PERIOD)< 1 YEAR THEN MULTIPLIER = 5

ELSEIF MIN(FICO_SCORE) < 500 AND MIN(EMPLOYMENT_PERIOD) > 1 YEAR

THEN MULTIPLIER = 4

Rule2: Max Lendable Amount

MIN(Income) * Rule1

This topic contains the following subtopics:

- Create Borrowing Capacity
 This topic describes the systematic instructions to define the borrowing capacity based on the various input.
- View Borrowing Capacity
 This topic describes the systematic instructions to view the borrowing capacity.

1.4.3.1 Create Borrowing Capacity

1.4.4 Scoring Feature

This topic describes the information about the scoring feature in Decision service.

Scoring Feature allows you to define scoring feature for determining the credit score. This score applies to applications during the origination process and based on the information send from the Oracle Banking Origination to Decision Service.

This topic contains the following subtopics:

- Create Scoring Feature
 This topic describes the systematic instructions to configure the scoring feature for determining the credit score.
- View Scoring Feature
 This topic describes the systematic instructions to view the list of scoring feature.

1.4.4.1 Create Scoring Feature

This topic describes the systematic instructions to configure the scoring feature for determining the credit score.

The **Create Scoring Feature** screen allows user to define scoring feature for determining the credit score. This score applies to applications during origination and based on the information received from the product processor.

Specify **User ID** and **Password**, and login to **Home** screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Scoring Feature.

The Create Scoring Feature screen displays.

Figure 1-55 Create Scoring Feature

5. On **Create Scoring Feature** screen, specify the fields.

Table 1-48 Create Scoring Feature - Field Description

Field	Description
Feature Code	Specify the unique feature code.
Feature Description	Specify a short description for the feature.
Product Processor	Specify the product processor for which the feature is being created.
Rule	Select the rule, if it is required to define the feature. This option is used to decide whether the feature is rule based or fact based. The available options are:
	Yes No
Fact Code	Select the fact code to be mapped to the feature from the drop-down list. This field is enabled if the Rule is selected as No .
Fact Name	Specify the fact name of the feature. This field is enabled if the Rule is selected as No .
Rule Code	Select the rule code to be mapped to the feature from the drop-down list. This field is enabled if the Rule is selected as Yes .
0	Click this icon to get the information about the rule.
Rule Name	Specify the rule name for the selected rule. This field is enabled if the Rule is selected as Yes .

6. Click **Save** to save the details.

1.4.4.2 View Scoring Feature

This topic describes the systematic instructions to view the list of scoring feature.

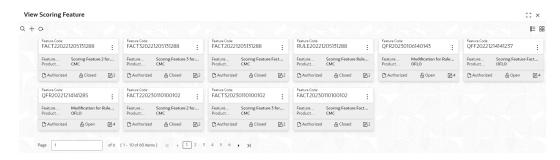

The **View Scoring Feature** screen allows the user to view the Scoring Feature created. The status of the uploaded feature is displayed as **Unauthorized** and **Open**. Once the checker authorizes the model, the status is updated to **Authorized** and **Open**.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Scoring Feature.
- 4. Under Scoring Feature, click View Scoring Feature.

The View Scoring Feature screen displays.

Click Save to update the modified fields.

1.4.5 Quantitative Scoring Model

This topic describes the information about the Quantitative scoring model for the Decision service.

Quantitative Scoring Model allows the user to define quantitative scoring model based on the various features.

This topic contains the following subtopics:

- Create Quantitative Scoring Model
 This topic describes the systematic instructions to configure the quantitative scoring model based on the various scoring parameters.
- View Quantitative Scoring Model
 This topic describes the systematic instructions to view the list of configured quantitative scoring model.

1.4.5.1 Create Quantitative Scoring Model

This topic describes the systematic instructions to configure the quantitative scoring model based on the various scoring parameters.

The **Create Quantitative Scoring Model** screen allows the user to create the quantitative scoring model by linking the various features. The user needs to create quantitative scoring models for both the application and applicant level.

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Quantitative Scoring Model.
- Under Quantitative Scoring Model, click Create Quantitative Scoring Model.
 The Create Quantitative Scoring Model screen displays.

Figure 1-59 Create Quantitative Scoring Model

5. Specify the fields on Create Quantitative Scoring Model screen.

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 1-52 Create Quantitative Scoring Model - Field Description

Field	Description
Scoring Model	Select the scoring model from the drop-sown list. The available options are: • Application Scoring Model • Applicant Scoring Model • Multi-Applicant Scoring Model
Scoring Model Code	Specify the unique scoring model code.
Scoring Model Description	Specify a short description for the scoring model.
Effective Date	Specify the effective date.
Expiry Date	Specify the expiry date.
Product Processor	Specify the product processor for which the model is being created.
Priority	Specify the priority of the model.

6. Click the **Selection Criteria** to define quantitative scoring model.

1.4.6 Qualitative Scoring Model

This topic describes the information about the Qualitative scoring model for the Decision service.

Qualitative Scoring Model allows the user to define qualitative scoring model based on the various scoring parameters.

This topic contains the following subtopics:

- Create Qualitative Scoring Model
 This topic describes the systematic instructions to configure the qualitative scoring model based on the various scoring parameters.
- View Qualitative Scoring Model
 This topic describes the systematic instructions to view the list of configured qualitative scoring model.

1.4.6.1 Create Qualitative Scoring Model

This topic describes the systematic instructions to configure the qualitative scoring model based on the various scoring parameters.

The **Create Qualitative Scoring Model** screen allows the user to create the qualitative scoring model based on the various scoring parameters.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- Under Credit Decision, click Qualitative Scoring .
- 4. Under Qualitative Scoring, click Create Qualitative Scoring Model.

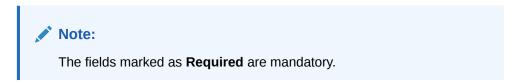

The Create Qualitative Scoring Model screen displays.

1.4.7 Decision Grade Matrix

This topic describes the information about the decision grade matrix feature.

Decision Grade Matrix allows the user to define the decision and grade based on the weighted score calculated by the scoring model.

This topic contains the following subtopics:

- Create Decision Grade Matrix
 This topic describes the systematic instructions to create decision and grade matrix by updating various details.
- View Decision Grade Matrix
 This topic describes the systematic instructions to view the decision grade matrix.

1.4.7.1 Create Decision Grade Matrix

This topic describes the systematic instructions to create decision and grade matrix by updating various details.

Specify User ID and Password, and login to Home screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Decision Grade Matrix.
- 4. Under Decision Grade Matrix, click Create Decision Grade Matrix.

The Create Decision Grade Matrix screen displays.

Figure 1-78 Create Decision Grade Matrix

5. On Create Decision Grade Matrix screen, specify the fields.

For more information on fields, refer to the field description table.

Table 1-71 Create Decision Grade Matrix - Field Description

Field	Description
Model Code	Specify the unique model code.
Model Description	Specify a short description for the model.
Effective Date	Specify the effective date.
Expiry Date	Specify the expiry date.
Product Processor	Specify the product processor for which the decision and grade matrix is being created.
Priority	Specify the priority of the model.

6. Click the **Selection Criteria** to configure the parameters based on which decision model is to be resolved.

The Create Decision Grade Matrix - Selection Criteria screen displays.

Figure 1-79 Create Decision Grade Matrix - Selection Criteria

Table 1-72 Create Decision Grade Matrix - Selection Criteria - Field Description

Field	Description
Use Existing Rule	By default, this option is enabled. Indicates if the existing rule is linked.
Rule Code	Select the rule code from the drop down list.
0	Click this icon to get the information about the rule.
Rule Name	Displays the rule name of the rule code.
Create New Rule	Select this option to create new rule.

Table 1-72 (Cont.) Create Decision Grade Matrix - Selection Criteria - Field Description

Field	Description
+ icon	Click this icon to add new expression.
Fact / Rules	Select the fact or rule from the drop-down list. Once the user selects the fact/rules, one more field opens adjacent to the output, update the same based on the selected output option.
Operator	Select the comparison operator from the drop-down list. The available options are:
Data Type	Select the data type for the fact or rule. Once the user select the data type, one more field opens adjacent to the output, update the same based on the selected output option. The available options are: Text Number Boolean Date Fact Rules The below option appears if the Data Type is selected as Boolean. True False

Table 1-72 (Cont.) Create Decision Grade Matrix - Selection Criteria - Field Description

Field	Description
Output	Select the output from the drop-down list. Once the user select the data type, one more field opens adjacent to the output, update the same based on the selected output option.
	The available options are: Text Number Boolean Date
 Fact Rules The below option appears if the Data Type is selected as True False 	 Rules The below option appears if the Data Type is selected as Boolean. True
Expression	Displays the expression updated in the expression builder.

7. Click the **Decision Matrix** to define decision on the application. The user can select the feature for which the decision needs to be maintained like Quantitative/Qualitative.

The Create Decision Grade Matrix - Decision Matrix screen displays.

Figure 1-80 Create Decision Grade Matrix - Decision Matrix

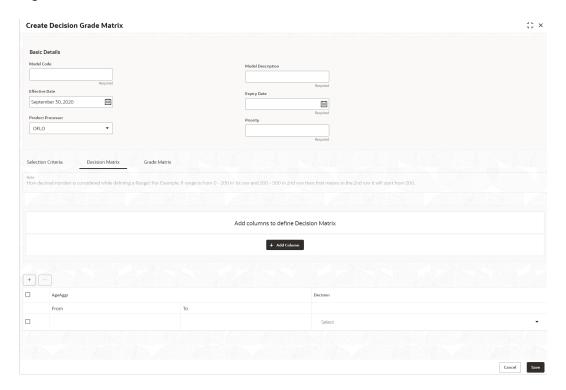

Table 1-73 Create Decision Grade Matrix - Decision Matrix - Field Description

Field	Description
Add Column	Click this button to add features for which decision has to be maintained. On click of Add Column , all the features are shown in the drop down list. Select the feature to be added. Click save to add the feature.
	If the feature is numeric type, two columns gets added in the table From and To. If the feature is character/alphanumeric type one column Value gets added.
	System should not save, if no feature have been added. User can click Cancel to close the window.
Link a Rule?	Select the appropriate radio button to link a rule to the features. The options are: Yes - If this option is selected, the system displays the list of rules. Based on the rule mapped, the decision is provided. No - If this option is selected, the system displays the list of decision lookup values.
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a row, which is already added.
Score From	Specify the minimum range of score for the decision.
Score To	Specify the maximum range of score for the decision.
Decision	Specify the decision of an application from the drop-down list. The values are configurable based on the look up values maintained The available options are: • Approved • Manual • Rejected
Rule	Displays the rules based on which decision is to be made. This field is enabled if Link a Rule? option is updated as Yes .

8. Click the **Grade Matrix** to assign the grade to the application that is used during the pricing of the application. You can select the feature for which the grade needs to be maintained like Quantitative/Qualitative.

The Create Decision Grade Matrix - Grade Matrix screen displays.

Figure 1-81 Create Decision Grade Matrix - Grade Matrix

Table 1-74 Create Decision Grade Matrix - Grade Matrix - Field Description

Field	Description
Add Column	Click Add Column , for addition of features for which decision has to be maintained.
Link a Rule?	Select the appropriate radio button to link a rule to the features. The options are: Yes - If this option is selected, the system displays the list of rules. Based on the rule mapped, the decision is provided.
	 No - If this option is selected, the system displays the list of decision lookup values.
×	Click this icon to delete a column, which is already added.
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a row, which is already added.
Score From	Specify the minimum range of score for the grade.
Score To	Specify the maximum range of score for the grade.

Table 1-74 (Cont.) Create Decision Grade Matrix - Grade Matrix - Field Description

Field	Description
Grade	Specify the grade of the application based on the score scored. The values are configurable based on the look up values maintained. The available options are: • A • B • C
Value	Specify the value for which the grade has to be maintained. This field appears only if the data type of feature is Numeric such as Age, FICO score.
Rule	Displays the rules based on which decision is to be made. This field is enabled if Link a Rule? option is updated as Yes .

9. Click **Save** to save the details.

1.4.7.2 View Decision Grade Matrix

This topic describes the systematic instructions to view the decision grade matrix.

The **View Decision Grade Matrix** screen allows the user to view the decision grade matrix created. The status of the uploaded model is displayed as **Unauthorized** and **Open**. Once the checker authorizes the matrix, the status is updated to **Authorized** and **Open**.

.

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Decision Grade Matrix.
- 4. Under Decision Grade Matrix, click View Decision Grade Matrix.

The View Decision Grade Matrix screen displays.

Score To	Displays the maximum range of score for the grade.
Grade	Displays the grade of an application based on the score scored. The values configurable based on the look up values maintained.
	The available options are: • A • B
	• c
Rule	Displays the rules based on which grade is to be made. This field is enabled if Link a Rule? option is updated as Yes .

1.4.8 Pricing

This topic describes the information about the pricing feature in Decision service.

Risk-based pricing refers to the offering of different interest rates to different customers depending on their credit worthiness. Thus, not all borrowers for the same product receives the same interest rate and credit terms. This means that high-risk borrowers who are less likely to repay their loans in full and on time will be charged higher rate of interest. While the low risk borrowers, having greater capacity to make payments will be charged lower rate of interest.

This topic contains the following subtopics:

- Create Pricing Model
 - This topic describes the systematic instructions to create pricing model based on various pricing parameter by updating various details.
- View Pricing Model
 - This topic describes the systematic instructions to view the list of pricing model.

1.4.8.1 Create Pricing Model

This topic describes the systematic instructions to create pricing model based on various pricing parameter by updating various details.

Specify **User ID** and **Password**, and login to **Home** screen.

- 1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Pricing Model.
- 4. Under Pricing Model, click Create Pricing Model.

The Create Pricing Model screen displays.

Figure 1-86 Create Pricing Model

5. On Create Pricing Model screen, specify the fields.

For more information on fields, refer to the field description table.

Table 1-87 Create Pricing Model - Field Description

Field	Description
Pricing Code	Specify the unique pricing code.
Pricing Description	Specify a short description for the pricing.
Effective Date	Specify the effective date.
Expiry Date	Specify the expiry date.
Product Processor	Specify the product processor for which the pricing is being created.
Priority	Specify the priority of the pricing.

6. Click the **Selection Criteria** to define pricing model.

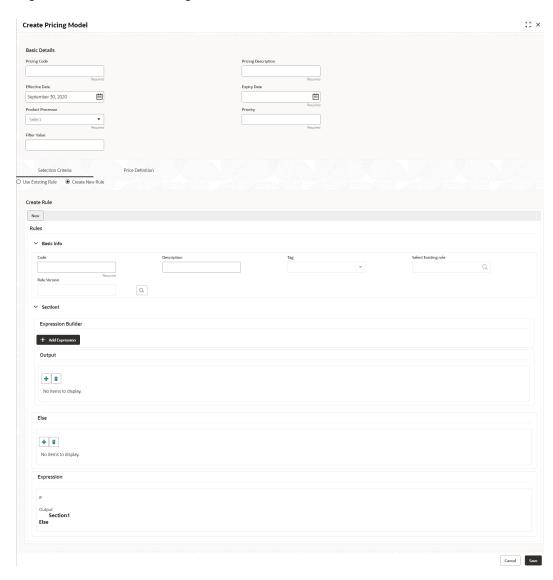

Figure 1-87 Create Pricing Model – Selection Criteria

Table 1-88 Create Pricing Model – Selection Criteria - Field Description

Field	Description	
Use Existing Rule	By default, this option is enabled. Indicates if the existing rule is linked.	
Rule Code	Select the rule code from the drop-down list.	
0	Click this icon to get the information about the rule.	
Rule Name	Displays the rule name of the rule code.	

Table 1-88 (Cont.) Create Pricing Model – Selection Criteria - Field Description

Field	Description	
Create New Rule	Select this option to create new rule.	
Code	Specify the rule code.	
Description	Specify the rule description.	
+ icon	Click this icon to add new expression.	
Fact / Rules	Select the fact or rule from the drop-down list. Once the user selects the fact/rules, one more field opens adjacent to the output, update the same based on the selected output option.	
Operator	Select the comparison operator from the drop-down list. The available options are:	
Data Type	Select the data type for the fact or rule. Once the user select the data type, one more field opens adjacent to the output, update the same based on the selected output option. The available options are: Text Number Boolean Date Fact Rules The below option appears if the Data Type is selected as Boolean. True False	

Table 1-88 (Cont.) Create Pricing Model – Selection Criteria - Field Description

- **6.** Click **three-dots** icon to unlock, delete, authorize or view the created pricing model.
- 7. Click **Unlock** icon to modify the fields.

The **Pricing Model Maintenance - Unlock** screen displays.

Figure 1-93 Pricing Model Maintenance - Unlock

The fields marked as **Required** are mandatory.

Table 1-93 Pricing Model Maintenance - Unlock - Field Description

Field	Description
Pricing Code	Displays the pricing code for the created quantitative pricing model.
Pricing Description	Specify the pricing description for the created pricing model.
Effective Date	Specify the effective date for the created pricing model.
Expiry Date	Specify the expiry date for the created pricing model.
Product Processor	Displays the product processor for the created pricing model.
Priority	Specify the priority of the created pricing model.
Use Existing Rule	Specify the existing rule if linked.
Rule Code	Specify the rule code for the created pricing model.
0	Click this icon to get the information about the rule.
Rule Name	Displays the rule name.
Create New Rule	Specify the new rule linked to the pricing model.
Code	Specify the new rule code for the created pricing model.
Description	Specify the rule description for the created pricing model.
+ icon	Click this icon can add new expression.
Fact / Rules	Displays the fact or rule of the created pricing model.
Operator	Displays the comparison operator of the created pricing model.
Data Type	Displays the data type for the fact or rule for the created pricing model.
Output	Displays the output for the created pricing model.
Expression	Displays the expression updated in the expression builder for the created pricing model.
Pricing Definition	The below listed fields appear in Pricing Definition tab.
Minimum Rate	Specify the minimum rate applicable for the defined pricing model.
Maximum Rate	Specify the maximum rate applicable for the defined pricing model.
Rate Type	Select the range type for the created pricing model from the drop-down list.
	The available options are: • Flat
	Tiered

Table 1-93 (Cont.) Pricing Model Maintenance - Unlock - Field Description

Field	Description
Rate%	Specify the interest rate application for the defined pricing.
	Note: This field appears once the user select the Rate Type option as Flat and Link a Rule? option as Yes.
Rule	Select the rule for the defined pricing.
	Note: This field appears once the user select the Rate Type option as Flat and Link a Rule? option as Yes.
<numeric feature=""> From</numeric>	Specify the minimum numeric value of feature to which the interest rate is applicable.
	Note: This field displays if the Rate Type is selected as Tiered.
<numeric feature=""> To</numeric>	Specify the maximum numeric value of feature to which the interest rate is applicable.
	Note: This field displays if the Rate Type is selected as Tiered.
<character feature=""> Value</character>	Specify the alphabetic value for which the interest rate is applicable.
	Note: This field displays if the Rate Type is selected as Tiered.

Rate%

Specify the interest rate applicable for the defined tier.

Note:

This field appears once you select the Rate Type option as Tiered and Link a Rule? option as No.

Rule

Select the rule for the defined tier.

Note:

This field appears once the user select the Rate Type option as Tiered and Link a Rule? option as Yes.

1.4.9 Strategy Configuration

This topic describes the information about the strategy configuration.

Decision service is used for multiple purposes such as borrowing capacity, borrowing capacity plus pricing, only pricing, only decision, logical plus decision etc. System should have an ability to configure the strategy like when the decision service is being called for borrowing capacity, should the request pass through the logical check. In addition, the product processor can configure different strategies for different product types or customer types. Strategy configuration allows the product processor to configure the strategy as per its requirements for all the modes for which decision service can be called. Separate strategy can be defined for origination, servicing or collection. In addition, multiple strategy can be defined for the same module like for origination i.e. multiple strategy can be defined. This maintenance allows the product processor to configure the strategy according to its need for all the modes for which the decision service can be called for.

This topic contains the following subtopics:

- Create Strategy Configuration
 This topic describes the systematic instructions to create strategy configuration as per the requirement.
- View Strategy Configuration
 This topic describes the systematic instructions to view the list of strategy configuration.

1.4.9.1 Create Strategy Configuration

This topic describes the systematic instructions to create strategy configuration as per the requirement.

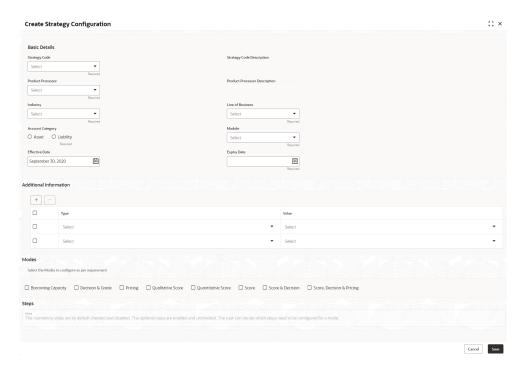

Specify **User ID** and **Password**, and login to **Home** screen.

1. On Home screen, click Retail Banking. Under Retail Banking, click Configuration.

- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Strategy Configuration.
- 4. Under Strategy Configuration, click Create Strategy Configuration.

The Create Strategy Configuration screen displays.

Figure 1-94 Create Strategy Configuration

5. On **Create Strategy Configuration** screen, specify the fields.

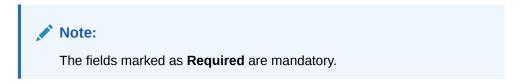

Table 1-94 Create Strategy Configuration - Field Description

Field	Description
Strategy Code	Specify the unique strategy code.
Strategy Code Description	Specify the short description for the strategy code.
Product Processor	Specify the product processor for which the strategy is being configured.
Product Processor Description	Displays the product processor description.

Table 1-94 (Cont.) Create Strategy Configuration - Field Description

Field	Description
Industry	Select the industry type from the drop-down list . The values are configurable based on the lookup values maintained. The available options are: Banking Industry Insurance Trade Finance
Line Of Business	Select the line of business type from the drop-down list . The values are configurable based on the lookup values maintained. The available options are:
Account Category	Indicates whether the strategy created is for asset or Liabilities.
Module	Select the module from the drop-down list . The values are configurable based on the lookup values maintained. The available options are:
Effective Date	Specify the effective date.
Expiry Date	Specify the expiry date.
+ button	Click to add a new facts.
- button	Click to delete a row that is already added.
Туре	Select the fact type from the drop-down list.
Value	Select the value configured for the fact type from the drop-down list. The values are configurable based on the lookup values maintained.
Modes	Select the modes from the drop-down list. The available options are: Borrowing Capacity decision & Grade Pricing Qualitative Score Quantitative Score Score Score Core, Decision & Pricing If the Module is selected as Collection, then below options are available. Decision & Grade Qualitative Score Quantitative Score Quantitative Score Score Score Score

Table 1-94 (Cont.) Create Strategy Configuration - Field Description

Field	Description
Steps	Steps are defined based on the modes selected. Example:
	If Borrowing Capacity mode is selected, the check box for borrowing capacity is by default selected and disabled. You can select the other steps.

Click Save to save the details.

The strategy configuration is successfully created and can be viewed using the **View Strategy Configuration** screen.

1.4.9.2 View Strategy Configuration

This topic describes the systematic instructions to view the list of strategy configuration.

The user can create the strategy configuration using the **Create Strategy Configuration** screen. The status of the created strategy configuration is displayed as **Unauthorized** and **Open**. Once the checker authorizes the strategy configuration, the status is updated to **Authorized** and **Open**.

Specify User ID and Password, and login to Home screen.

- On Home screen, click Retail Banking. Under Retail Banking, click Configuration.
- 2. Under Configuration, click Credit Decision.
- 3. Under Credit Decision, click Strategy Configuration.
- 4. Under Strategy Configuration , click View Strategy Configuration.

The View Strategy Configuration screen displays.

Product Processor	Displays the product processor for the created strategy configuration.
Product Processor Description	Displays the product processor description for the created strategy configuration.
Account Category	Displays the account category for the created strategy configuration.
Module	Displays the module for the created strategy configuration.
Effective Date	Displays the effective date for the created strategy configuration.
Expiry Date	Select the expiry date for the created strategy configuration.
Туре	Displays the fact type for the created strategy configuration.
Value	Displays the fact value for the created strategy configuration.
Steps	Specify the steps defined for the created strategy configuration.

11. Click **Save** to update the modified fields.

1.5 Origination Preferences

This topic describes the preferences which are set at origination level.

Using this screen, you can maintain pre-defined origination parameters which enables the bank to define generic parameters which governs the behavior of the application during the process of account opening.

This screen comprises of the following section:

- Generic Parameters: In this section user can define parameters for dashboard widgets, age limit and nominees for minor, funding, incomplete application expiry, dedupe, resident stability.
- Credit and Compliance Parameters: In this section user can define the parameters for credit decision threshold limit of insider level and executive officer level and also annual percentage rate parameters.
- Offer: In this section user can define downsell offer expiry parameters.
- **Integration**: In this section user can defined host integration parameter.

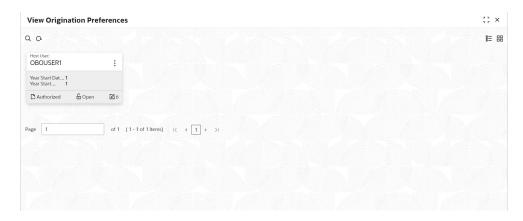

To edit origination preferences:

- 1. From the Menu List, navigate from Retail Banking >> Configurations to Origination Preference screen.
- 2. Click View Origination Preference screen to view already defined preferences.

The View Origination Preference screen is displayed.

Figure 1-98 View Origination Preference

For more information on fields, refer to the field description table below:

Table 1-98 View Origination Preference - Field Describes

Field Name	Description
Host User	Displays the user ID of logged in user who set this preferences.
Year Start Date	Displays the year start date.
Year Start Month	Displays the year start month.
<footer of="" title=""></footer>	This section displays the status of the record as, Whether the record is Authorized or Unauthorized Whether the record is Open or Closed Number of times the record is edited

3. Click

Ė

icon on the top right-hand side of the questionnaire tile and click **Unlock**.

The **Origination Preferences** screen is displayed in edit mode.

Figure 1-99 Origination Preference - Edit

4. Specify the details in the relevant data fields. The fields which are marked with Required are mandatory. For more information on fields, refer to the field description table below.

Table 1-99 Origination Preference - Edit - Field Description

Field	Description
Generic Parameters	In this section user can capture generic parameters.
Widget Parameters	In this section user can define dashboard widget preferences.
Start Day for filter	Specify the day of the month from which the application should be displayed in the dashboard widget.
Start Month for filter	Specify the start month count of the year to get the current financial year applications in the dashboard widget.
Loan Offer nearing Expiry- bucket one in	Specify number of days to highlight the loan offers that are nearing to the expiry.
days	Based on this number of days the system calculates and displays the count of applications under the loan offer in the first bucket of the Loan Offers Near Expiry widget on dashboard.

Table 1-99 (Cont.) Origination Preference - Edit – Field Description

Field	Description
Loan Offer nearing	Specify number of days to highlight the loan offers that are nearing
Expiry- bucket two in	to the expiry.
days	Based on this number of days the system calculates and displays the count of applications under the loan offer in the second bucket of the Loan Offers Near Expiry widget on dashboard.
Loan Offer nearing Expiry - bucket three in days	Specify number of days to highlight the loan offers that are nearing to the expiry.
	Based on this number of days the system calculates and displays the count of applications under the loan offer in the third bucket of the Loan Offers Near Expiry widget on dashboard.
Application nearing Expiry - bucket one in	Specify number of days to highlight the applications that are nearing to the expiry.
days	Based on this number of days the system calculates and displays the count of applications in the first bucket of the Product Application Near Expiry widget on dashboard.
Application nearing Expiry - bucket two in	Specify number of days to highlight the applications that are nearing to the expiry.
days	Based on this number of days the system calculates and displays the count of applications in the second bucket of the Product Application Near Expiry widget on dashboard.
Application nearing Expiry - bucket three in	Specify number of days to highlight the applications that are nearing to the expiry.
days	Based on this number of days the system calculates and displays the count of applications in the third bucket of the Product Application Near Expiry widget on dashboard.
Minor Age For Nominees	In this section user can define the age limit of minor in years for opening and account.
Savings Minor Age	Specify the age of the minor to open saving account.
Term Deposit Minor Age	Specify the age of minor to open term deposit account.
Funding Parameters	In this section user can define the funding parameters.
Current and Savings Account Initial Funding by Cheque	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by cheques.
	The available option is Manual process.
Current and Savings Account Initial Funding by Cash	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by cash.
	The available options are: Automatic
	Automatic Manual
Current and Savings Account Initial Funding by Account	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by account.
	The available options are:
	Host Manual

Table 1-99 (Cont.) Origination Preference - Edit – Field Description

Field	Description
TD Account Funding by Cheque	Specify the preferences of initial funding for term deposit and saving accounts. This preferences are specific to funding that are initiate by cheques.
TD Account Funding by Cash	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by cash. The available options are: Automatic Manual
TD Account Funding by Account	Specify the preferences of initial funding for term deposit accounts. This preferences are specific to funding that are initiate by account. The available options are: Host Manual
TD Account Funding by GL	Specify the preferences of initial funding for term deposit accounts. This preferences are specific to funding that are initiate by GL. You can select the Host option from the list for initial funding.
Incomplete Application Expiry	In this section user can define the expiry preferences for incomplete applications.
Incomplete Application Expiry Period (in Days)	Specify number of days to highlight the incomplete applications that are nearing to the expiry.
Lead Days for Incomplete Application Expiry Period Alert	Indicates the number of days prior to the application expiry, when an alert is triggered to the banker intimating about the application expiry.
Lag Days for Incomplete Application Expiry Period Alert	Indicates the number of days after the application is expired, an alert is triggered to the banker intimating about the application expiry.
Dedupe Parameters	In this section user can define preferences for dedupe parameters.
Application dedupe	Select to trigger the application dedupe process.
Customer dedupe	Select to trigger the customer dedupe process.
Resident Stability	In this section user can set preferences for resident stability.
Resident Stability Applicable Products	Select the products for which the resident stability is validated.
Resident Stability (Years)	Specify the number of years for which the resident stability is valid.
Insider Credit Threshold	In this section user can define the threshold limits for insider credit.
Insider Credit Threshold CCY	Specify the credit threshold currency for insider.
Insider Credit Threshold	Specify the credit threshold value for insider.
Executive Officer Credit Threshold CCY	Specify the credit threshold currency for executive officer.
Executive Officer Credit Threshold	Specify the credit threshold value for executive officer.
Annual Percentage Rate Parameters	In this section user can define the annual percentage rate parameters.
Armed Forces Maximum APR %	Specify the maximum annual percentage rate value for armed forces.
Service Members Maximum APR %	Specify the maximum annual percentage rate value for service members.

Table 1-99 (Cont.) Origination Preference - Edit - Field Description

Field	Description
Offers	In this section user can define offers related preferences.
Downsell Offer Expiry Period (in Days)	Specify number of days to highlight the downsell offers that are nearing to the expiry.
Lead Days for Downsell Offer Expiry Alert	Indicates the number of days prior to the downsell offer expiry, when an alert is triggered to the banker intimating about the offer expiry.
Lag Days for Downsell Offer Expiry Alert	Indicates the number of days after the downsell offer expiry, when an alert is triggered to the banker intimating about the offer expiry.
Integration	In this section user can define integration preferences.
Host User	Specify the host user for integration.
Direct Banking URL	Specify the direct banking URL.
Finicity Mode	Select the finicity mode for fund transfer. The avaliable options are: Branch Visit: If this option is selected then it is mandatory for a customer to visit branch for fund transfer. Customer Email: If this option is selected then finicity URL is sent to the preferred Email ID of cutomer for completing the fund transfer.
Enable Address Search	In this section user can define the preferences of enabling address search.
Customer Information DS	Select to enable the address search in the Customer Information data segment of account opening application.
Credit Card Addon Card Holder DS	Select to enable the address search in the Credit Card Addon Card Holder data segment of the credit card account opening application.
Collateral DS	Select to enable the address search in the Collateral data segment of account opening application.
Solicitor Details	Select to enable the address search while capturing solicitor details.
Nominee / Guardian for Current and Saving	Select to enable the address search while capturing nominee or guardian details in the current and saving application.
Nominee / Guardian for Term Deposit	Select to enable the address search while capturing nominee or guardian details in the term deposit application.

1.6 Reason Codes

This topic describes the overview of the reason codes.

Reason codes are used to specify reasons for the actions taken while performing certain tasks. For example, when a transaction on an account is rejected, a reason is provided. Using this screen you can create reason code and assign them to the various tasks where they can be used. Currently they are used for rejecting credit application or incomplete application or counter offer in origination.

This section includes following subsections:

- Create Reason
 - This topic describes the systematic instructions to create fact.
- View Reason

This topic describes the systematic instructions to view the list of fact.

1.6.1 Create Reason

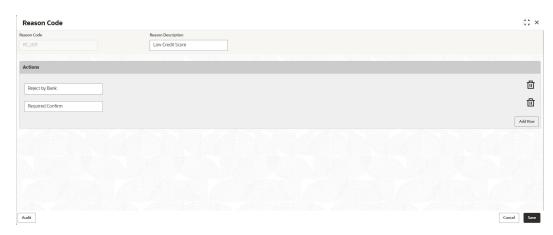

This topic describes the systematic instructions to create fact.

Using this screen you can create reason codes based on the various parameters.

- 1. From the Menu List, navigate from Retail Banking >> Configurations >> Reason Codes.
- 2. Under Configuration, click Rule. Under Rule, click Fact.
- 3. Click **Reason Code** to create new reason code.

The Create Reason Code screen displays.

Figure 1-100 Create Reason Code

4. Specify the fields on **Create Reason** screen.

Note:

The fields, which mentioned as Required, are mandatory.

Table 1-100 Create Reason Code - Field Describes

Field Name	Description
Reason Code	Specify the reason code.
Reason Description	Specify the reason code description.
Actions	In this section user can capture the actions.
	Click Add Row to add list of actions that are applicable for the reason code.
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Create Reason Code screen.

1.6.2 View Reason

This topic describes the systematic instructions to view the list of fact.

Using this screen you can view the reason codes are already created.

- From the Menu List, navigate from Retail Banking >> Configurations to Reason Code screen.
- 2. Click View Reason Codes screen to view already defined reason codes.

The View Reason Codes screen displays.

Figure 1-101 View Reason Code

For more information on fields, refer to the field description table.

Table 1-101 View Reason Codes - Field Description

Field	Description
Reason Code	Displays the reason code.
Reason Description	Displays the reason code description.

3. Click

to search the reason code based on the following search criteria.

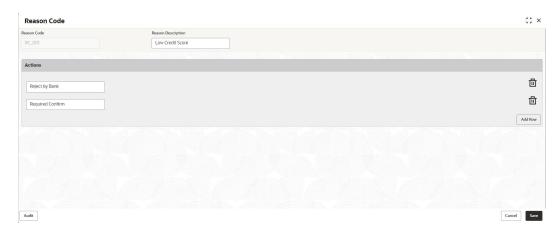

- Reason Code
- Reason Description
- Authorization Status
- Record Status
- 4. Click

:

icon on the top right-hand side of the questionnaire tile and click Unlock.

The **Reason Code** screen displays.

Figure 1-102 Reason Codes

Specify the details in the relevant data fields. The fields which are marked with Required are mandatory. For more information on fields, refer to Create Reason Code - Field Description.

The **Reason Code** fields is non-editable in **Maintenance** screen.

1.7 Dashboard Configuration

This topic describes the systematic instructions for dashboard configuration.

Information from multiple sub-domain viz., Savings Account, Current Account and Loan is integrated and displayed as dashboard on the home page of the Oracle Banking Origination application.

The pre-configured dashboards available in the system are as follows:

- My Applications
- Application Search
- Conversion Analysis
- Account Opening Trends
- New Savings Account
- New Current Account
- New Loan Account
- New Term Deposits
- New Credit Cards
- Loan Pipeline
- Loan Offer Status
- Loan Exposure to Collateral
- Product Application Near Expiry
- Loan Offers Near Expiry

1.8 Initial Funding Configuration

This topic provides the information about the initial funding configuration.

The different configuration scenarios for initial funding are as follows:

- 1. Fund By Cash If Fund By is specified as Cash, user can proceed with configurations, either automatic or manually.
 - Automatic In automatic process, during submit of the application Entry stage
 of the Savings Account, Current Account and Term Deposit Account, an
 automatic request for teller transaction is triggered. The Initial funding data
 segment makes a call to the external teller module to check the Transaction
 Reference Number and Teller Transaction Status auto-populates the
 screen. The details are not allowed to be modified. more details on the
 integration can be referred in the oracle banking branch integration guide.
 - Manual In manual process, it is expected that the teller transactions are being handled separately, and the details of the Transaction Reference Number and Teller Transaction Status are thereby manually updated in the Initial Funding data segment.
- Fund By Account Transfer If Fund By is specified as Account Transfer, user can proceed with configurations, either manually or via Host.
 - Manual In Manual Process, it is expected that the Teller Transactions are being handled separately, and the details of the Transaction Reference Number and Teller Transaction Status are thereby manually updated in the initial funding data segment manual.
 - Host In 'Host' configuration, it is expected that the transaction for debit of the
 customer account will be handled on the host side. Since the transaction are
 done as part of the Account Creation in Host, Initial Funding stage will be
 skipped, and required transaction details will be passed to the Host for
 funding.
- 3. Fund by Other Bank Cheque If Fund By is specified as Other Bank Cheque, user can proceed with Manual configurations.
 - Manual In Manual Process, it is expected that the teller transaction are being handled separately, and the details of the Transaction Reference Number and Teller Transaction Status are thereby manually updated in the Initial Funding data segment.

The list of configurations to be done in the property table for the three flags are as follows:

- casa.fundByCash Specify A for Automatic and M for Manual
- casa.fundByAcc Specify M for Manual and H for Host
- casa.fundByCheque Specify M for Manual

1.9 Application Submission Configuration

This topic provides the information about the application submission configuration.

Bank-level configuration is to specify whether application entry completion is allowed or not as part of the Application Initiation Stage. This configuration is to be done in the Property Table by updating the flag 'applicationEntryInitiationRequired' as **true**.

1.10 Machine Learning Configuration for Predicting Account Opening Date

This topic provides the information about the machine learning configuration for predicting account opening date.

Bank-level configuration is required to define the use case and train the Machine Learning model for predicting the account opening date for all the applications. Refer to the **Machine Learning Framework** section in *Oracle Banking Common Core User Guide* for a detailed explanation.

Model Definition

This topic describes the systematic instructions for the model definition.

Model Training and Scoring

This topic describes the systematic instructions for model training and scoring.

1.10.1 Model Definition

This topic describes the systematic instructions for the model definition.

Specify **User ID** and **Password**, and login to **Home** screen.

 On Home screen, click Machine Learning. Under Machine Learning, click Model Definition.

The Model Definition Summary screen displays.

2. On Model Definition Summary screen, click button to create new use-case definition.

The Use Case Definition screen displays.

Figure 1-103 Use Case Definition

3. Specify the below listed parameters and create the use-case definition.

Table 1-102 Use Case Definition Parameters - Field Description

Field	Description
Use Case Name	PREDPRCTIME
Description	Predicting Process Completion Time
Use Case Type	REGRESSION
Product Processor	RPM
Training Data Source	RPM_VW_ML_PREDPRCTIME
Prediction Column	PRED_TIME
Target Column	TIME_2_COMPLETE
Unique Case Identifier	PROCESS_ID
Table space	This field should be left Blank.
Partition Column Names	This field should be left Blank.
Selected Algorithm	This field should be left Blank.

Table 1-102 (Cont.) Use Case Definition Parameters - Field Description

Field	Description
Model Error Statistics	RMSE

1.10.2 Model Training and Scoring

This topic describes the systematic instructions for model training and scoring.

1. From Home screen, click Machine Learning. Under Machine Learning, click Model Training and Scoring.

The Model Training and Scoring screen displays.

2. Specify the use case name as "PREDPRCTIME" and click **Train Model**.

The user will not be able to train the model if the ML table does not meet the minimum required number of rows.

Number of rows >= 20 x Number of columns

1.11 Batch Process Configuration

This topic provides the information about batch process configuration.

The batch Process enables the bank users to identify and close the applications which have reached the expiry date. Currently, Oracle Banking Origination supports the following batch process.

Application Expiry

The application will automatically expire when it stays inactive for the specified period as configured in the business product.

Loan Offer Expiry

The Loan Application will automatically expire if the customer has not accepted the Loan Offer for the specified period as configured in the business product.

IPA Expiry

IPA Application will automatically expire if the IPA is not converted into a Loan application for the specified period as configured in the business product.

Batch Process Configuration

The Branch Code and Frequency schedule need to configure, to enable the Batch processes.

The bank user needs to create a user name **SYSTEM** to run the batch process.

Configure the Branch Code

The user needs to update the proper branch code value in the below table.

Schema - PLATO

Table - PROPERTIES

application - obremo-rpm-batch-services

key - rpmBatch.branchCode

Value – Update the proper branch code.

Configure the Frequency Schedule

The user needs to update the required frequency value in the below table.

Schema - PLATOBATCH

Table -PLATO_BATCH_TASK_TRIGGER_DEFINITIONS

Column - DEFINITION

cron Expression - Update the cron Expression to the required frequency.

1.12 Service Level Agreement (SLA) Maintenance

This topic provides the information about the service level agreement maintenance.

Banks requires to have a Service Level Agreement (SLA) with its customers or as an internal policy of the Bank. This User Guide lists the SLA maintenance requirements in Oracle Banking Origination and other Mid-office Applications.

SLA Maintenance is available based on the Business Process-Stage- Priority combination. It has two screens, one screen for Definition of SLA and another for Authorization/Edit/ Delete.

SLA Maintenance screens are used to calculate Service Level Agreement. The user can Create SLA, and View SLA (for Edit, Copy, Delete).

This topic contains the following subtopics:

Create SLA

This topic describes the systematic instructions to create create SLA.

View SLA

This topic describes the systemetic instructions to view the SLA.

1.12.1 Create SLA

This topic describes the systematic instructions to create create SLA.

The Create SLA screen enables the bank user to create the SLA Checklist at the Process-Stage-Priority Level.

Specify **User ID** and **Password**, and login to **Home** screen.

- From Home screen, click Core Maintenance. Under Core Maintenance, click SLA Maintenance.
- Under SLA Maintenance, click Create SLA.

The Create SLA screen displays.

Figure 1-104 Create SLA Maintenance

3. Specify the fields on Create SLA screen.

For more information on fields, refer to the field description table below.

Table 1-103 Create SLA – Field Description

Field	Description			
Product/Application Code	Click Search icon and select the Product or Application Code.			
Product/Application Name	Displays the name of the Product/Application.			
Business Process Code	Click Search icon and select the Business Process Code for which the SLA maintenance has to be made.			
Business Process Name	Displays the Business Process name based on the Business Process code selected.			
Branch	Select the branch code for which SLA maintenance has to be done.			
Branch Working Hours	Click the icon to view the branch working hours.			
Include for SLA Calculation	Select the checkbox to consider the below options for the SLA calculation. The available options are: Branch Holidays Currency Holidays Hold Time Customer Clarification Off Branch Time Transactions			

- 4. Click **Calculate** to view data will appear for the selected Business process code
- 5. Click **Save** to save the details.
- **6.** Click **Cancel** to discard the changes and close the screen.

1.12.2 View SLA

This topic describes the systemetic instructions to view the SLA.

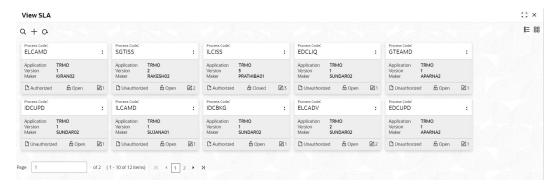

The user can view the summary of SLA's maintained in the form of tiles. The user can view the maintained SLA, if the SLA is already created in the system. The user can also create a new SLA using View SLA screen, by clicking the '+' icon.

Specify **User ID** and **Password**, and login to **Home** screen.

- On Home screen, click Core Maintenance. Under Core Maintenance, click SLA Maintenance.
- 2. Under SLA Maintenance, click View SLA.

The View SLA screen displays.

Figure 1-105 View SLA Maintenance

3. For more information on fields, refer to the field description table below:

Table 1-104 View SLA – Field Description

Field	Description
l icia	Description
Process Code	Displays the process code of the SLA Maintenance configured.
Application	Displays the name of the application
Authorization Status	Displays the authorization status of the record. The options are:
Record Status	Displays the status of the record. The options are: Open Closed
Modification Number	Displays the number of modification performed on the record.

1.13 Customer Dedupe Check

This topic provides the information about customer dedupe check.

Bank level configuration is possible to specify whether the system should support Customer Dedupe check for any customers. This configuration is to be done in the Property Table by updating the flag "dedupeCheckRequired" as **true**. If the value is **true**, then the customer dedupe check will be done for all the new configurations.

1.14 Application Dedupe Check

This topic provides the information about application dedupe check.

Bank level configuration is possible to specify whether the system should support Application Dedupe check for any applications. This configuration is to be done in the Property Table by updating the flag "applicationDedupeCheckRequired" as **true**. If the value is **true**, then the application dedupe check will be done for all the new applications during each stage submit.

1.15 Document Extraction Required Check

This topic provides the information about the Document Extraction Required Check.

Bank level configuration is possible to specify whether the system should support Document Extraction Required check during document uploads. This configuration is to be done in the Property Table by updating the flag "documentExtractRequired" as **true**. If the value is **true**, then during customer document uploads, the document data will be extracted automatically via image processing.

1.16 Task Allocation

This topic provides the information about the Task Allocation.

The Dynamic Task Allocation intends to allocate the tasks/stages dynamically to a user based on pre-configured rule and rule groups. This feature will enable allocation of tasks to different users based on attributes like Branch, Currency, Loan Amount etc. for more details refer to **FACT list for Dynamic Task Allocation**.

Also, a parameter needs to be maintained in server start parameters for enabling dynamic allocation functionality: -Dplato.orchestrator.enableDynamicAllocation=true

Task Allocation will use the existing Rules and Rule Group framework. These RULES can be configured using a set of factory-shipped **FACTS**. Additional facts can also be created as required. Rules are defined first with relevant conditions.

In the Rule Group definition, rules are added with priority assigned for each rule. Rule group will be linked to a business process/stage in the backend.

Once the task is created for a business process, if there is any task allocation linked to that stage, system will run the rule and assign the task accordingly. If all the rules are run without meeting any condition, task will remain as unassigned in free task.

For more details on rule and rule group creation refer to Rule

Error Codes and Messages

This topic contains error codes and messages.

Table 2-1 Error Codes and Messages

Error Code	Messages
GCS-AUTH-02	Valid modifications for approval were not sent. Failed to match
GCS-AUTH-03	Maker cannot authorize
GCS-AUTH-04	No Valid unauthroized modifications found for approval.
GCS-CLOS-01	Record Already Closed
GCS-CLOS-03	Unauthorized record cannot be closed, it can be deleted before first authorization
GCS-COM-001	Record does not exist
GCS-COM-002	Invalid version sent, operation can be performed only on latest version
GCS-COM-003	Please Send Proper Modification Number
GCS-COM-004	Please send Maker Id in the request
GCS-COM-005	Request is Null. Please Resend with Proper Values
GCS-COM-006	Unable to parse JSON
GCS-COM-008	Modifications should be consecutive.
GCS-COM-009	Resource ID cannot be blank or "null".
GCS-COM-011	Argghhh, \$1 failed to update.
GCS-DEL-003	Modifications didnt match valid unauthorized modifications that can be deleted for this record
GCS-DEL-004	Send all unauthorized modifications to be deleted for record that is not authorized even once.
GCS-DEL-005	Only Maker of first version of record can delete modifications of record that is not once authorized.
GCS-DEL-006	No valid unauthroized modifications found for deleting
GCS-DEL-007	Failed to delete. Only maker of the modification(s) can delete.
GCS-MOD-001	Closed Record cannot be modified
GCS-MOD-003	Record marked for close, cannot modify.
GCS-MOD-004	Only maker of the record can modify before once auth
GCS-MOD-005	Not amendable field, cannot modify
GCS-MOD-006	Scorecard Id cannot be modified (Natural Key)
GCS-MOD-007	Psssttt, only the maker can modify the pending records.

Table 2-1 (Cont.) Error Codes and Messages

Error Code	Messages
GCS-REOP-01	Unauthorized Record cannot be Reopened
GCS-REOP-02	Failed to Reopen the Record, cannot reopen Open records
GCS-REOP-04	Unauthorized record cannot be reopened, record should be closed and authorized
GCS-SAV-001	Record already exists

FACT list for Dynamic Task Allocation

This topic lists all the FACTs for dynamic task.

The facts required to configure the dynamic task allocation are listed below:

- oDLimitAmount
- currencyCode
- branchCode
- businessProductCode
- priority
- applicationDate
- applicationNumber
- processRefNumber
- amount
- branch
- currentBranch
- user
- customerNumber
- processName
- processCode
- stage
- lifecycleCode

Functional Activity Codes

This topic contains functional activity codes of Oracle Banking Origination.

Below mentioned are the fucntional activity codes of Oracle Banking origination

- Maintenance
 This topic contains functional activity codes of maintenance.
- Workflow Processing
 This topic contains the functional activity codes of work flow processing.
- Workflow Stage
 This topic contains the functional activity codes of work flow stage.

7.1 Maintenance

This topic contains functional activity codes of maintenance.
