Oracle Banking Origination Initial Setup Guide, Release 14.7.4.0.0

F97659-01

Contents

Preface

1   Mini Core to Common Core Replication

2   Multi-Entity Admin User Creation

Index

Preface

Introduction

This guide helps the user to perform the initial setup for Oracle Banking Origination application.

The procedures given in this document must be completed to run the application successfully.

Audience

This guide is intended for WebLogic admin or ops-web team who are responsible for installation of OFSS banking products.

List of Topics

This guide is organized as follows.

Table 1   List of Topics

Topics	Description
Mini Core to Common Core Replication	This topic provides the information about the approach to replicate Oracle FLEXCUBE Universal Banking Core data to Oracle Banking Origination Application Common Core.
Multi-Entity Admin User Creation	This topic provides the information about the Multi-entity Admin User Creation through the scripts provided.

Related Documents

The related documents are as follows:

- Oracle Banking Origination Installation Guide

- Common Core Services Installation Guide

- Purpose

- Audience

- Documentation Accessibility

- Diversity and Inclusion

- Conventions

Purpose

This guide helps the user to perform the initial setup for Oracle Banking Origination application. The procedures given in this document must be completed to run the application successfully.

Audience

This document is intended for WebLogic admin or ops-web team who are responsible for installing the OFSS banking products.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
`monospace`	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1

Mini Core to Common Core Replication

The topic provides the information on detailed approach to replicate Oracle FLEXCUBE Universal Banking Core data to Oracle Banking Origination Application Common Core.

The purpose of this section is to detail approach to replicate Oracle FLEXCUBE Universal Banking Core data to Oracle Banking Origination Application Common Core.

The list of files required for the replication is available in the OSDC are:

Table 1-1   List of Replication Files

Service Name	Domain Name
ubs_minicore_dblink.sql	{unzip the file}Part2\OFLO_INITIAL_SETUP\INSTALL
ubs_minicore_replication.spc	{unzip the file}Part2\OFLO_INITIAL_SETUP\INSTALL
ubs_minicore_replication.sql	{unzip the file}Part2\OFLO_INITIAL_SETUP\INSTALL

Database link Creation

A database link is required to be created from the Common Core Schema to the Oracle FLEXCUBE Universal Banking Schema.

Refer to **Common Core Services Installation Guide** for more details on the Common Core schema of the Oracle Banking Origination Application.

`ubs_minicore_dblink.sql` is a sample script. The sample DB Link name used is UBS144_MINICORE.

Once the database link is created, execute a simple query: `SQL > Select sysdate from dual@dblinkname;`

Compiling the DB objects

Compile `ubs_minicore_replication.spc` and `ubs_minicore_replication.sql` in the common core schema of Oracle Banking Origination application.

Execute the Replication scripts

Make sure that the Common Core services are installed first. This will ensure the required common core entities are created in the Oracle Banking Origination Application.

Refer to **Common Core Services Installation Guide** for more details.

Execute the following commands in SQLPLUS or any other sql client connecting to the common core schema. The script populates the common core tables from the host FCUBS. In case if the data already exists in the common core tables, it updates.

```
SQL> exec ubs_minicore_replication.replicate_minicoreaccount;

SQL> exec ubs_minicore_replication.replicate_minicorebank;

SQL> exec ubs_minicore_replication.replicate_minicorebranch;

SQL> exec ubs_minicore_replication.replicate_minicoreccydefn;

SQL> exec ubs_minicore_replication.replicate_minicoreccyholidays;

SQL> exec ubs_minicore_replication.replicate_minicorecountry;

SQL> exec ubs_minicore_replication.replicate_minicorecustomer;

SQL> exec ubs_minicore_replication.replicate_minihostcodes;
```

> **✎ Note:**
>
> Automation for the execution of these scripts and running periodically is out of scope for this guide.

2

Multi-Entity Admin User Creation

The topic provides the information on the Multi-entity Admin User Creation through the scripts provided.

The purpose of this section is to detail the Multi-entity Admin User Creation through the scripts provided.

The scripts required to be compiled are available in the OSDC as follows:

Table 2-1   Multi-Entity Admin User Creation Scripts

Service Name	Domain Name	Install Type
INS_PLATO_SEC_ME_ADMIN_USER_CREATION_{release number}.sql	{unzip the file}Part2\OFLO_INITIAL_SETUP\INSTALL\PLATO	Install
INS_PLATO_SEC_ME_ADMIN_USER_CREATION_{release number}.sql	{unzip the file}Part2\OFLO_INITIAL_SETUP\UPGRADE\PLATO	Upgrade

> **Note:**
>
> Refer to OSDC zip for the exact *release number*.
