This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Preface

- [Purpose](#)
- [Audience](#)
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)

## Purpose

This guide is to help with Integration of Oracle Banking Origination Product with Card Management System acting as the backend Product Processor.

## Audience

This guide is intended for the Implementation and IT Staff to implement and maintain the software.

## Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

### Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

## Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to ensure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

## Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners,

we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Conventions

The following text conventions are used in this document:

| Convention      | Meaning  |
|-----------------|--|
| <b>boldface</b> | Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.         |
| <i>italic</i>   | Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.                          |
| monospace       | Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter. |

# 1

## Integration Guide

You can integrate Oracle Banking Origination with Card Management System acting as the backend Product Processor through Oracle Banking Routing Hub. This document briefs you about the specific steps needed for integration of these two products and specific maintenances.

Card Management System should be available with support to the list of consumer services. Refer to the [API for Oracle Banking Origination](#)

This topic contains the following subtopics:

- [Maintenance for Oracle Banking Origination](#)  
This topic describes systematic instructions to maintain Oracle Banking Routing Hub configuration for Oracle Banking Origination.
- [API for Oracle Banking Origination](#)  
This topic provides information about the list of API's for Oracle Banking Origination

### 1.1 Maintenance for Oracle Banking Origination

This topic describes systematic instructions to maintain Oracle Banking Routing Hub configuration for Oracle Banking Origination.

To maintain Oracle Banking Routing Hub configuration in common core for **CC\_HOST**.

1. From **Home** screen, click **Core Maintenance**. Under **Core Maintenance**, click **Routing Hub**.
2. Under **Routing Hub**, click **Service Consumers**.

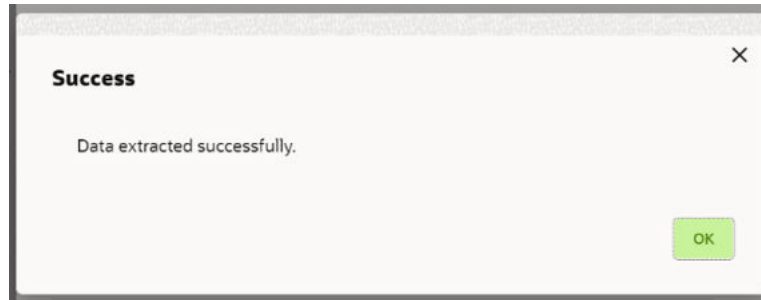

The **Service Consumers** screen displays.

**Figure 1-1 Service Consumer**

3. Click **Import** and upload the RPM\_ORIGINATION\_Consumer.json file provided in the release and click **Extract**.

The **Success** screen displays.

**Figure 1-2 Success**

4. Select **CC\_HOST** and click **Import**.  
The **Confirmation** screen displays.

**Figure 1-3 Confirmation**

5. Click **Confirm**.  
The **RPM\_ORIGINATION** is successfully imported.

**Figure 1-4 Service Consumer**

6. Click **RPM\_ORIGINATION**
7. Under **RPM\_ORIGINATION**, click **CC\_HOST**.

**Figure 1-5 RPM Origination CC\_HOST**

The screenshot shows the 'RPM\_ORIGINATION' interface. At the top, there are tabs for 'Service Providers' and 'Consumer Services'. Below the tabs, there are buttons for 'Add' and 'Import', and a search bar. A list of service providers is displayed, with 'FCUBS' selected. The details for 'FCUBS' are shown: Version 14.4, Type INTERNAL, and Status ACTIVE. At the bottom, there is a pagination bar showing 'Page 1 of 1 (1 - 1 of 1 Items)' with navigation arrows.

8. On **Implementation** screen, click **Operation menu** (3 dots button) and click **Edit**.  
The **Edit Implementation** screen displays.

**Figure 1-6 Edit Implementation**

The screenshot shows the 'Edit Implementation' screen. It has a title bar with a close button. The form contains the following fields and controls:

- Name \***: Text input field containing 'CC\_HOST\_Default'.
- Description \***: Text input field containing 'Default Implementation'.
- Type \***: A dropdown menu showing 'DEFAULT' and a toggle switch labeled 'Default' which is turned on. There is also a toggle switch labeled 'Eureka Instance' which is turned off.
- Scheme \***: A dropdown menu showing 'https'.
- Host \***: Text input field containing 'whf00cdl.in.oracle.com'.
- Port**: Text input field containing '7017'.
- Authentication**: A button with a right-pointing arrow.
- Headers**: A button with a right-pointing arrow.
- Service**: A button with a right-pointing arrow.
- Save**: A button at the bottom right of the form.

9. Change the **Host** and **Port** as per the Oracle FLEXCUBE Universal Banking installation and click **Save**.  
The below consumer services will be imported.

**Figure 1-7 Consumer Services**

| Service Consumers                   |                                  |                                  |
|-------------------------------------|----------------------------------|----------------------------------|
| RPM_ORIGINATION                     |                                  |                                  |
| Service Providers Consumer Services |                                  |                                  |
| Actions                             | Name                             | Description                      |
| ⋮                                   | Get_Credit_Card_Number           | Get_Credit_Card_Number           |
| ⋮                                   | Get_Host_Product_Details_By_Code | Get_Host_Product_Details_By_Code |
| ⋮                                   | Get_Host_Product_Details_List    | Get_Host_Product_Details_List    |
| ⋮                                   | Save_Credit_Card_DS_Details      | Save_Credit_Card_DS_Details      |
| ⋮                                   | Update_Credit_Card_Number        | Put_Credit_Card_Number           |

**Note**

Refer to Rounting Hub Configuration User Guide for more details.

## 1.2 API for Oracle Banking Origination

This topic provides information about the list of API's for Oracle Banking Origination

1. Get\_Host\_Product\_Details\_By\_Code  
Parent Node: HostProductList

**Table 1-1 List of Names**

| Field Name         | Field Description        | Type   | Length |
|--------------------|--------------------------|--------|--------|
| productCode        | Host Product Code        | String | 4      |
| productDescription | Host Product Description | String | 50     |
| productType        | -                        | String | 1      |

2. Get\_Host\_Product\_Details\_By\_Code  
Parent Node: data

**Table 1-2 List of Names**

| Field Name         | Field Description        | Type   | Length |
|--------------------|--------------------------|--------|--------|
| productCode        | Host Product Code        | String | 4      |
| productDescription | Host Product Description | String | 50     |
| productType        | -                        | String | 1      |

Child Node: components

Parent Node: data

**Table 1-3 List of Names**

| Field Name    | Field Description | Type   | Length |
|---------------|-------------------|--------|--------|
| componentName | Host Product Code | String | 4      |

**Table 1-3 (Cont.) List of Names**

| Field Name             | Field Description               | Type   | Length |
|------------------------|---------------------------------|--------|--------|
| componentDescription   | Host Product Description        | String | 50     |
| componentType          | Component Type                  | String | 1      |
| hostComponentType      | Host Component Type             | String | 1      |
| mainComponent          | Main Component                  | String | 1      |
| componentReportingType | Reporting type Interest /Charge | String | 50     |
| ratetoUse              | Rate to Use                     | String | 50     |

Child Node: productUdes

Parent Node: components

**Table 1-4 List of Names**

| Field Name         | Field Description        | Type   | Length |
|--------------------|--------------------------|--------|--------|
| productCode        | Host Product Code        | String | 4      |
| productDescription | Host Product Description | String | 50     |
| productType        | -                        | String | 1      |

3. Save\_Credit\_Card\_DS\_Details  
Parent Node: HostProductList

**Table 1-5 List of Names**

| Field Name    | Field Description        | Type   | Length |
|---------------|--------------------------|--------|--------|
| processRefNo  | Process Reference Number | String | 35     |
| applicationNo | Application Number       | String | 16     |

Kindly refer to swagger documentation for allIDSDetails for credit card application.
