Preface

This topic contains the following sub-topics:

- Purpose
- Before you begin
- Module Prerequisite
- Audience
- Documentation Accessibility
- Critical Patches
- Diversity and Inclusion
- Conventions
- Screenshot Disclaimer
- Acronyms and Abbreviations
- Symbols and Icons
- Module Post requisite

Purpose

This manual is designed to help acquaint you with Oracle Banking Origination. This guide provides an overview of the Savings Account Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Savings Account Origination.

Before you begin

Kindly refer to the **Getting Started User Guide** for common elements, including Symbols and Icons, Conventions Definitions, and so forth.

Module Prerequisite

Specify the **User Name** and **Password**, and login to **Home** screen.

Audience

This guide provides instructions and information about the Saving Account product to help various bank users to deliver quick and efficient service to both customer and prospects.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at Critical Patches, Security Alerts and Bulletins. All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by Oracle Software Security Assurance.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
`monospace`	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

1

Overview

This topic describes the information on the various features of the Savings Account Origination module.

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, Credit Cards, and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan for Individual customers, and Term Loan and Business Loan for Small and Medium Business customers.

- Saving Account
- Current Account
- Credit Card Account
- Retail Loans Account
- IRA Certificate of Deposit Account
- IRA Savings Account
- Certificate of Deposit Account

It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank personas such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architectured by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Savings Account is created in the Host. The new workflow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Savings Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Savings Account request can be made for both new and existing customer types. Also, the system supports processing of the savings account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

> **Note**
>
> Refer to the detailed setup and operation workflows for both asset and liability products initiation made available in the **Operations User Guide**.

2

Savings Account Origination

This topic describes the information on the defined stages through which the Individual Retirement Accounts Savings Application has to flow before it is ready to be sent to the Host for Account Creation.

As detailed in the **Operations User Guide**, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The Cart Operation in Product Catalogue allows to originate single or multiple Product initiation. Once the Savings Account Product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Individual Retirement Savings Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective.

The Individual Retirement Account Savings Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

- Application Entry Stage
  This topic describes the information on the various data segments to capture the required data in the Application Entry stage.
- Application Documents
  This topic describes the process of the documents that are uploaded related to application.
- Debit Assessment
  The topic describes the debit assessment process.
- Manual Debit Assessment
  The topic describes the manual debit assessment process.
- Account Funding Stage
  This topic describes the process of initial funding of an account. In this stage user can provide initial funding details before opening an account.
- Account Funding
  This topic describes the process of initial funding of an account. This stage appears once the account is opened.
- Global Actions
  This topic provides the detailed on the actions that can be performed in all stages.

2.1 Application Entry Stage

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

Process Orchestrator updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective. The user can **Acquire and Edit** or **Acquire** the task from the **Action** column and the header respectively as per requirement.

The **Application Entry** stage will be automatically submitted, in case the Bank level configuration for allowing full Application submission is set as **Yes** and the user has updated all

Copyright © 2023, 2025, Oracle and/or its affiliates.

the data segment of **Application Entry** stage as part of the **Application Initiation** stage itself by clicking on the **Application** button available in the **Product Details** data segment.

After successful submission of **Application Entry** stage, a request for the initial funding transaction is sent to **Teller Module**, if **Fund By** option is selected as **Cash**. The status of the **Teller Transaction** is then validated in the **Initial Funding Details** data segment of **Account Funding** stage.

The **Application Entry** stage has the following reference data segments:

- Applicant
  This topic provides the systematic instructions to capture the customer-related information for the application.
- Account Details
  This topic provides the systematic instructions to view and modify the account details.
- Stake Holder Details
  This topic provides the systematic instructions to capture the stake holder details related information for the business.
- Beneficiary Details
  This topic provides the systematic instructions to capture the details of the Beneficiary for the account.
- Terms and Conditions
  This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.
- Review
  This topic provides systematic instruction to view all the data segments in the Application Entry Process.

2.1.1 Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

The details captured of the customer in the Application Initiate stage appears in this data segment. The user can update further fields for supplementing the customer related information.

- For Individual Customer Type
  The topic describes the process to capture or edit customer information of Individual type of customer.
- For Small and Medium Business (SMB) Customer Type
  The topic describes the process to capture or edit customer information of Small and Medium Business type of customers.

2.1.1.1 For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

To capture applicants details:

1. In the Saving Application Entry stage, update the customer details in the Applicants data segment based on the respective customer type.

   The **Applicant - Individual** screen displays.

Table 2-9 (Cont.) Details - Field Description

Field	Description
Action	You can edit or delete the added email details.
Add Beneficiary	Click to add additional beneficiary for the account.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

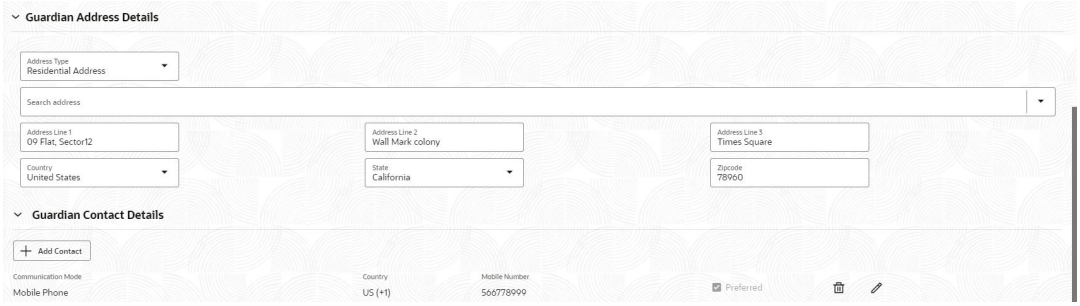
Guardian Details
This screen allows to capture details of the guardian of the minor beneficiary.

To add guardian details:

4. Click **Add Guardian Details** on Beneficiary Details screen.

   The **Guardian Details** screen is displayed

Figure 2-13 Guardian Details



5. Specify the details in the relevant data fields.

   Refer the **Beneficiary Details** field description table for detailed information on each field.

6. Click **Save** to save the guardian details

2.1.5 Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

- **Term and Conditions for all products** - In this section the term and conditions which are applicable for all the products appears in the questionnaire format.
- **Term and Conditions for <Selected Product>** - In this section the term and conditions which are applicable for all the selected product appears in the questionnaire format.
- **Consents and Preferences** - In this section the user capture the consents and preferences of customer as E-Sign, Marketing Communications, and Privacy Information.

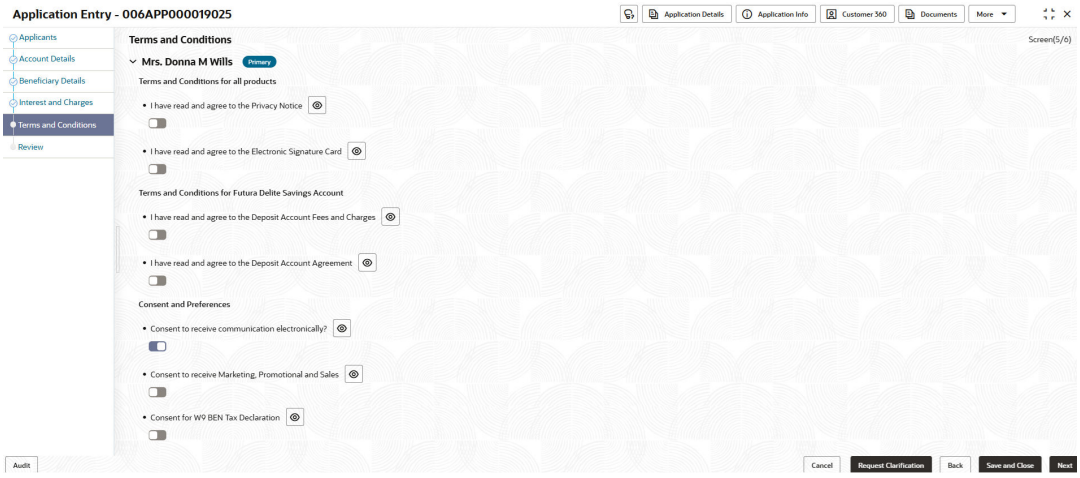
Copyright © 2023, 2025, Oracle and/or its affiliates.

To capture terms and conditions:

1. Click **Next** from previous data segment to proceed with the next data segment, after successfully capturing the data.

   The **Term and Conditions** screen appears

Figure 2-14 Terms and Conditions



2. Click to view the term and conditions.
3. Select the toggle button to accept the term and conditions.
4. In the **Consents to receive Marketing Promotional and Sales** section, enter the channel and details.
5. Click **Add Channel** to add the relevant details.

   The below fields contain channel data:

   - Channel
   - Contact Value
   - Preferred Time
   - Time Zone
   - Actions
6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.1.6 Review

This topic provides systematic instruction to view all the data segments in the Application Entry Process.

The system will display the summary of each of the data segments in as many sections as the number of data segments in the given stage.

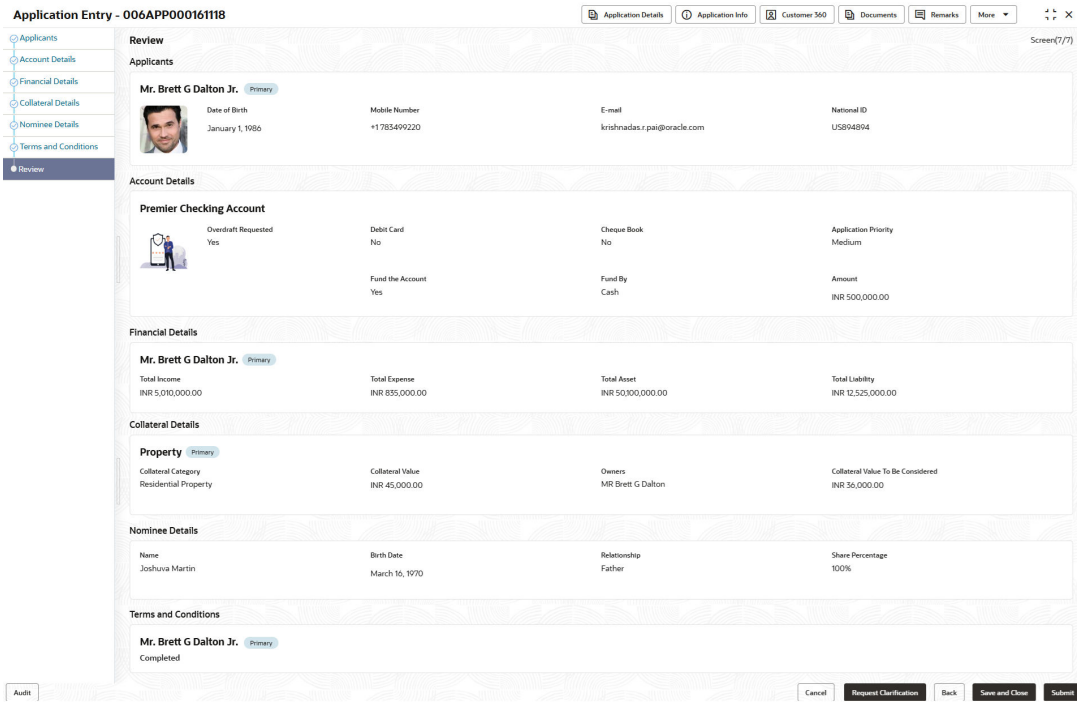
To view the summary of all the data segments:

Copyright © 2023, 2025, Oracle and/or its affiliates.

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

   The **Review** screen displays.

Figure 2-15 Review



For more information on fields, refer to the field description table.

Table 2-10 Review - Application Entry – Field Description

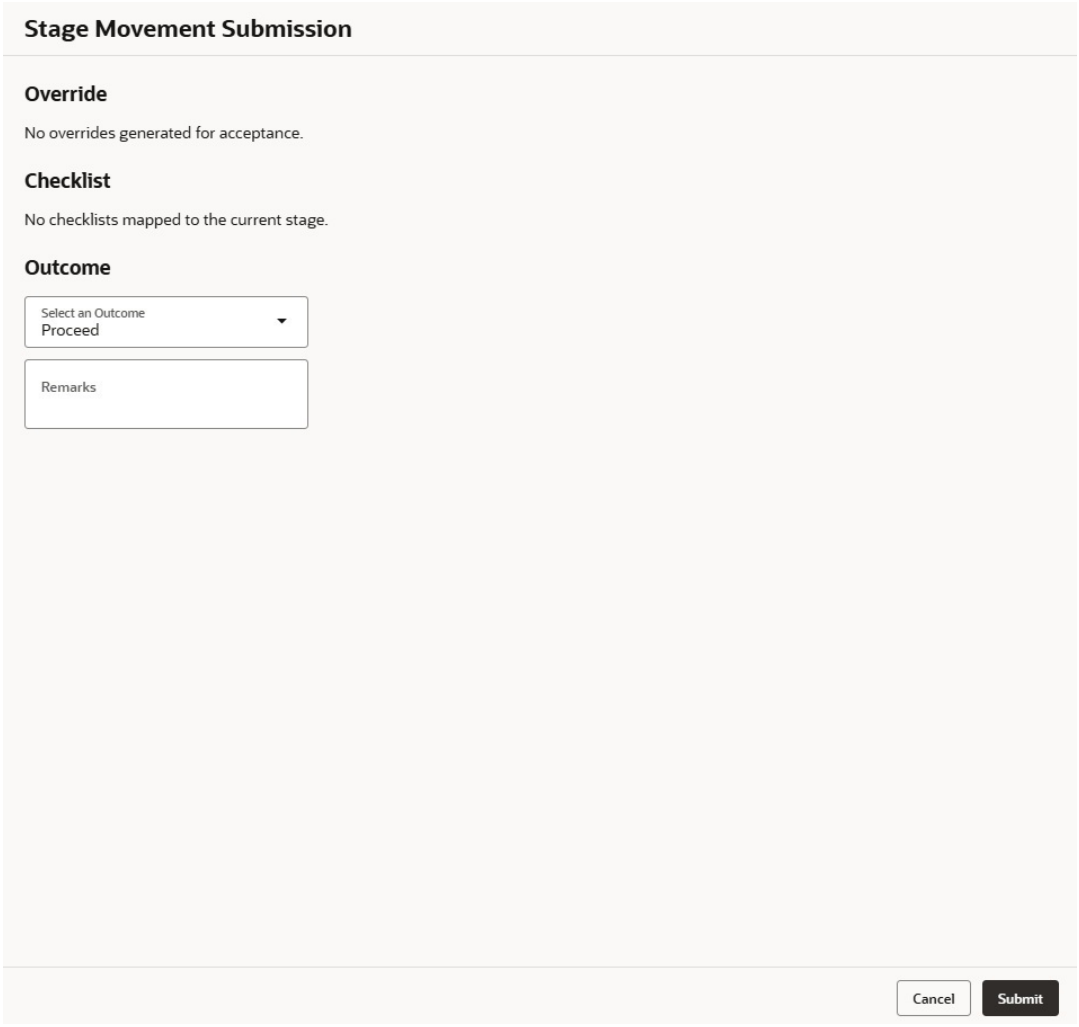
Data Segment	Description
Applicants	Displays the applicants details
Account Details	Displays the account details.
Stake Holder Details	Displays the Stake Holder details This data segment appears only if the **Customer Type** is selected as **Small and Medium Business (SMB)**.
Financial Details	Displays the financial details.
Collateral Details	Displays the collateral details.
Beneficiary Details	Displays the beneficiary details.
Term and Conditions	Displays the term and conditions.

2. Click **Submit** to reach the **Stage Movement Submission** screen, where the overrides, checklist and documents for this stage are verified.

   The **Stage Movement Submission** screen displays.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Figure 2-16 Stage Movement Submission



In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.

   The **Checklist** screen appears.

4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.

5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.

   - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **SavingApplication Enrichment**.
     - If the **Collateral Type** is selected as **Term Deposit** in **Collateral Details** data segment and the **Fund the account** toggle is OFF in the **Product Details** data

Copyright © 2023, 2025, Oracle and/or its affiliates.

segment, the submit of the Application Entry stage will move the application into the **Account Parameter Setup** stage.

- If the selected **Collateral Type** is other than Term Deposit in **Collateral Details** data segment, and the **Fund the account** toggle is OFF in the **Product Details** data segment, the submit of the Application Entry stage will move the application into the **Underwriting** stage.
- If the **Fund the Account** toggle is ON in the **Account Details** data segment, the submit of the Application Entry stage, will move the application to **Account Funding** stage.
- If the **Overdraft Requested** toggle is ON in the **Account Details** data segment, the submit of the Application Entry stage, will move the application to **Overdraft Limit Details** stage.

The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.

6. Click **Submit** to submit the Application Entry stage.

   The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.

7. Click **Close** to close the window.

   OR

   Click **Go to Free Task**.
   The system successfully moves the application reference number along with the process reference numbers [Saving Account] to the Application Entry stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

   Application De-Dupe:

   Based on the configuration set in the Origination Preference screen, the application dedupe serivce is enabled.

   If application dedupe service is enabled, the system will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

Copyright © 2023, 2025, Oracle and/or its affiliates.

> **Note**
>
> - If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
> - In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.
> - Unique process reference numbers will be generated and made available in the Free Task grid for the respective Customer Onboarding, Collateral Onboarding requests, which need to picked up by the concerned users in the Oracle Banking Party/Oracle Banking Credit Facilities Process Management modules.

2.2 Application Documents

This topic describes the process of the documents that are uploaded related to application.

The Application Documents stage provides the view of the outbound documents that are generated and dispatched to the applicants invloved in the application.

To generate and disptach the outbond documents:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Application Documents stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- Document Generation
  This topic provides the systematic instructions to generate and dispatch the documents that are configured.
- Document Acceptance
  This topic provides the systematic instructions to capture the acceptance of the documents that are already generated and dispatched.
- Review
  This topic provides the systematic instructions to view the summary of each data segment in the Application Documents stage.

2.2.1 Document Generation

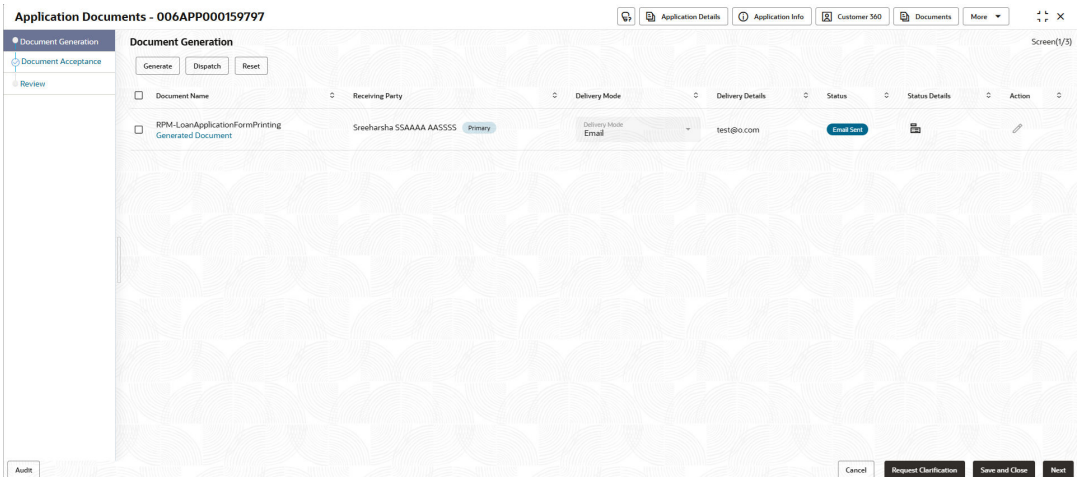
This topic provides the systematic instructions to generate and dispatch the documents that are configured.

In the Document Generation data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the **Advice Maintenance** screen. Each documents appears separately to generate and dispatch.
To generate and dispatch the document:

Copyright © 2023, 2025, Oracle and/or its affiliates.

1. On acquiring the **Application Document** task, the **Document Generation** stage is displayed.

Figure 2-17 Document Generation



2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select atleast one document

   You can perform below actions on the seletced document:

   - **Generate**: You can click this button to generate the selected document. On clicking this button the system invokes a call to the report generation service which generates a PDF output for the advice onfigured in the Advice Maintenance screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the Generate Docoument link in the Documen column.
   - **Dispatch**: You can click this button to dispatch the selected generated documents. You can only dispatch those documents which are not already disptached. On clicking this button the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the Advice Maintenance screen.
   - **Reset**: You can click this button to reset the action performed on the document.

   For more information on fields, refer to the field description table.

Table 2-11 Document Generation – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Table 2-11 (Cont.) Document Generation – Field Description

Field	Description
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is **Email** or **e-Sign Remote** then the preferred email address of every recipient is displayed. • If the delivery mode is **Post** then the preferred address of every recipient is displayed. • If the delivery mode is **e-Sign In-Person** then the link is shared with every recipients and in this case the status appears as **Pending For Link Generation**. Once the dispatch event is executed successfully, the status appears as **Link Generated**. • If the delivery mode is **Print** then the **Not Applicable** text appears.
Status	Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button. Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery. • If the mode of delivery is **Email** then on the successful trigger the status appears as **Email Sent**. • If the mode of delivery is **E-Sign Remote** or **E-Sign In-Person** then on the successful trigger the status appears as **E-Signing Initiated**. • If the mode of delivery is **Post** then on the successful trigger the status appears as **Dispatched**. • If the mode of delivery is **Print** then on the successful trigger the status appears as **Ready for Print**. • In case the dispatch process fails due to technical error then the status appears as **Failed**.
Status Details	Displays the status details of the document. Click the icon to view the generation and dispatched details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. • Click to edit the delivery mode. • Click to save the edited delivery mode. This icon appears once you are edit mode.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.2.2 Document Acceptance

This topic provides the systematic instructions to capture the acceptance of the documents that are already generated and dispatched.

The Document Acceptance data segment populates the list of documents that appeared in the **Document Generation** data segment and are mark as **Yes** in the **Acceptance** field in the **Advice Maintenance** screen.

Copyright © 2023, 2025, Oracle and/or its affiliates.

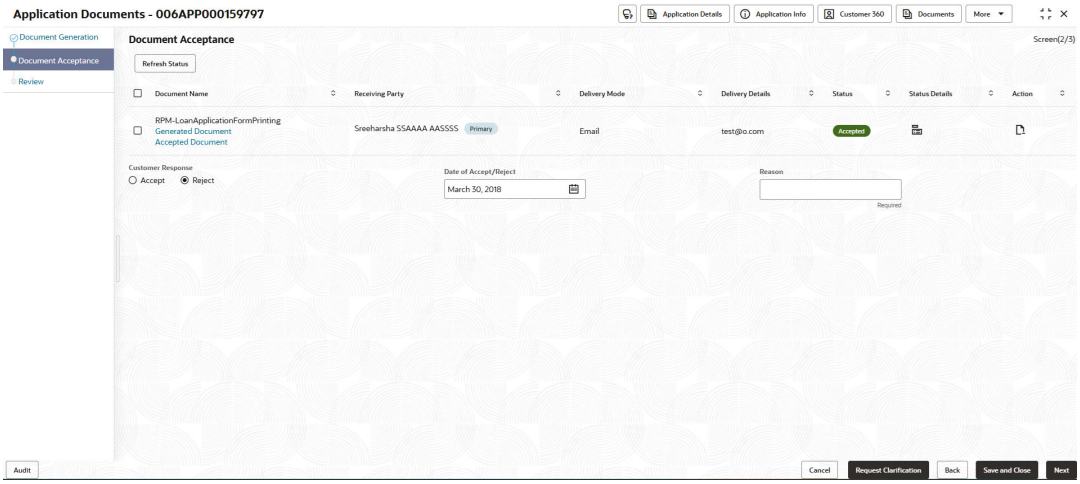
If the document is marked as **No** in the **Acceptance** field in the **Advice Maintenance** screen then the e-sign acceptance process in not required for that document and hence it will not appear in this data segment.

To accept the document:

1. Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

   The **Document Acceptance** screen appears.

Figure 2-18 Document Acceptance



2. In the **Document Acceptance** section, select the check box to select the document from the list and perform appropriate actions.

   For more information on fields, refer to the field description table.

Table 2-12 Document Acceptance – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. • **Generated Document**: This link appears only if the document is generated atleast onces. • **Accepted Document**: This link appears only if the E-Signed document is uploaded.
Refresh Status	Click to refresh the status.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.

6. Click **Submit** to submit the **Application Documents** stage.

   The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.

7. Click **Close** to close the window.

   OR

   Click **Go to Free Task**.

   The system successfully moves the Application Reference Number along with the process reference numbers [Savings Account] to the Debit Assessment stage.

> **Note**
>
> This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.3 Debit Assessment

The topic describes the debit assessment process.

In the process of account opening of saving product this stage appears if the Know Your Customer (KYC) is not completed for the applicants involved in the applications.

This stage appears in following conditions:

- The applicant is new.
- Existing customer but the KYC stage is not completed.
- Existing customer but the KYC stage is Referred.

To open Debit Assessment task:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Debit Assessment** stage is displayed.

   The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- Bureau Information
  This topic describes the bureau information details.
- Summary
  This topic describes summary of all the data segment.

2.3.1 Bureau Information

This topic describes the bureau information details.

In this data segment user can view the bureau information of application and status of all the applicants that are involved in the application.

Copyright © 2023, 2025, Oracle and/or its affiliates.

1. On acquiring the Manual Debit Assessment task, the Bureau Information data segment appears and call to bureau service is initiated for display the bureau information related to application and applicants.

   The **Bureau Information** screen appears.

Figure 2-21 Bureau Information

The status of the teller transaction should be **Success** for the submission of the Account Funding stage.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are

Copyright © 2023, 2025, Oracle and/or its affiliates.

not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.5.2 Review

This topic provides the systematic instructions to view all the data segments in the Initial Funding stage.

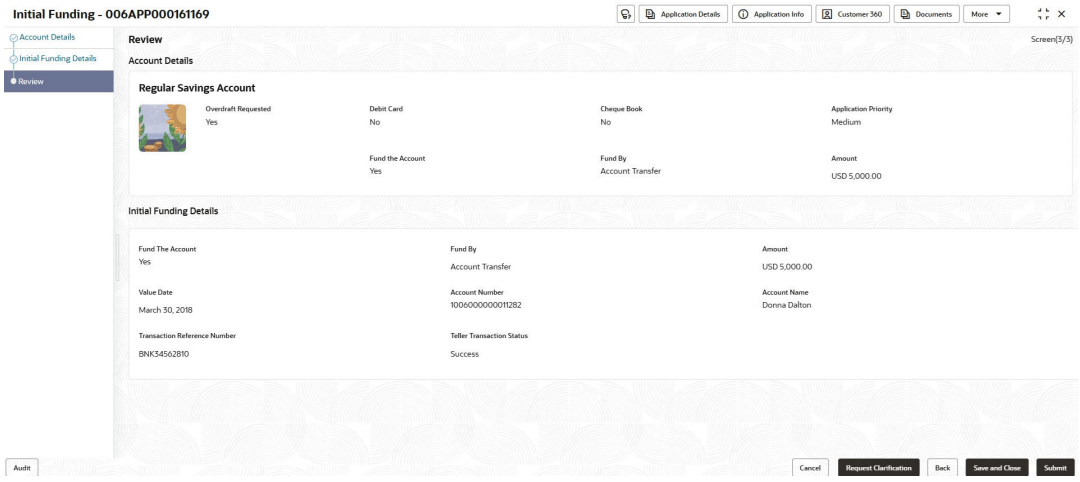
The system displays the summary of each of the data segments in the given stage.

To view the summary of all the data segments:

1. Click **Next** in the previous data segment screen to proceed with next data segment, after successfully capturing the data.

   The **Review** screen displays.

Figure 2-28 Review - Initial Funding



For more information on fields, refer to the field description table.

Table 2-20 Review - Initial Funding – Field Description

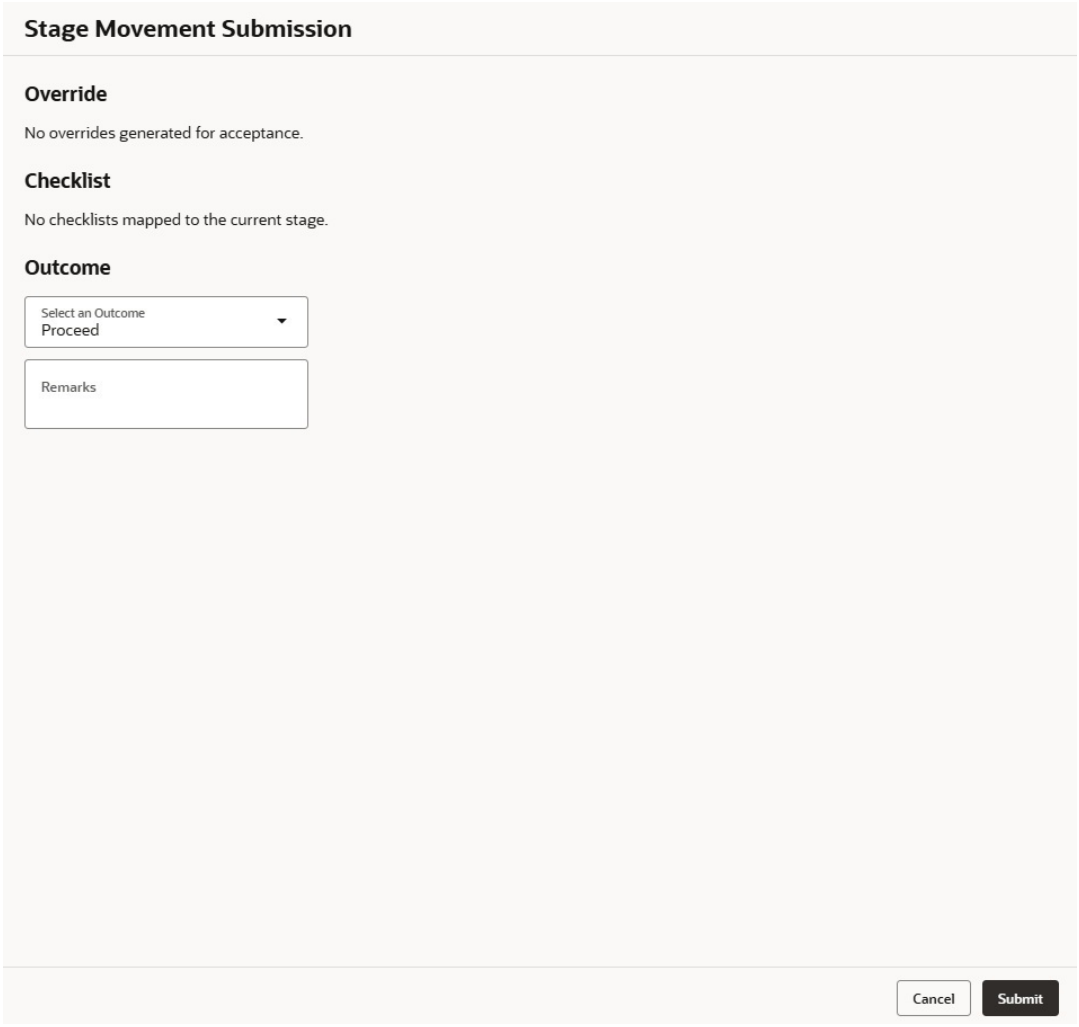
Data Segment	Description
Account Details	Displays the account details.
Initial Funding Details	Displays the initial funding details.

2. Click **Submit** to reach the **Stage Movement Submission** screen, where the overrides, checklist and documents for this stage are verified.

   The **Stage Movement Submission** screen displays.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Figure 2-29 Stage Movement Submission



In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. Click **Proceed Next**. The **Checklist** screen is displayed.

   Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.

5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.

   - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Account Funding Stage** for the Overdraft application.
   - Select the **Return to Application Entry** to return to application entry stage. The system generates the Application Entry task that appears in **Free Task** to acquire and edit.

Copyright © 2023, 2025, Oracle and/or its affiliates.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.

6. Enter the remarks in **Remarks**.
7. Click **Submit** to submit the Initial Funding stage.

   The confirmation screen appears with the successful submission status and displays the next stage in which the application has moved along with Application Reference Number and the Process Application Reference Number.
8. Click **Close** to close the window.

   OR

   Click **Go to Free Task**.

   The system successfully moves the Application Reference Number along with the process reference numbers to the Underwriting stage.

> **Note**
>
> This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.6 Account Funding

This topic describes the process of initial funding of an account. This stage appears once the account is opened.

In this stage you can initiate fund for an account post account opening. This stage appears if the **Fund Post Account Opening** toggle is selected in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

To add funding details:

If the call is successful then the fields with the external account appears in the **External Account Details** section. This button appears based on the below conditions: • If the **External Internal (Finicity)** option is selected from the **Funding Mode** list. • If the **Customer Email** option is select from the **Finicity Mode** drop-down list in the **Origination Preferences** screen.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Table 2-21 (Cont.) Account Funding Details – Field Description

Field	Description
Initiate Finicity	Click this button to initiate finicity request. If the call is successful, then the finicity URL is generated appears in the field and the user can click the Globe icon **Launch Finicity** button to initiate the fund transfer Finicity process. The fields with the external account appears in the **External Account Details** section. This field appears based on the below conditions: • If the **External Internal (Finicity)** option is selected from the **Funding Mode** list. • If the **Branch Visit** option is select from the **Finicity Mode** drop-down list in the **Origination Preferences** screen.
External Account Details	In this section user can view the status response from the Finicity call. If the initiate call Finicity process is successful then below mentioned fields of external account detail appears: • **Account Holder** • **Account Type** • **Bank Name** • **Routing Number** • **Account Number** • **Account Balance** This section and fields appears if the **External Internal (Finicity)** option is selected from the **Funding Mode** list.
Status	Displays the fund transfer status of the transaction. To view more information on the transaction status, click .

4. Proceed by clicking **Next** to move to the subsequent data segment once the data has been successfully captured. The system will verify all required data segments and fields. If any essential information is missing, an error message will be shown to prompt the user to address the issue. Users must complete the mandatory data before they can advance to the next segment.

2.6.2 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage

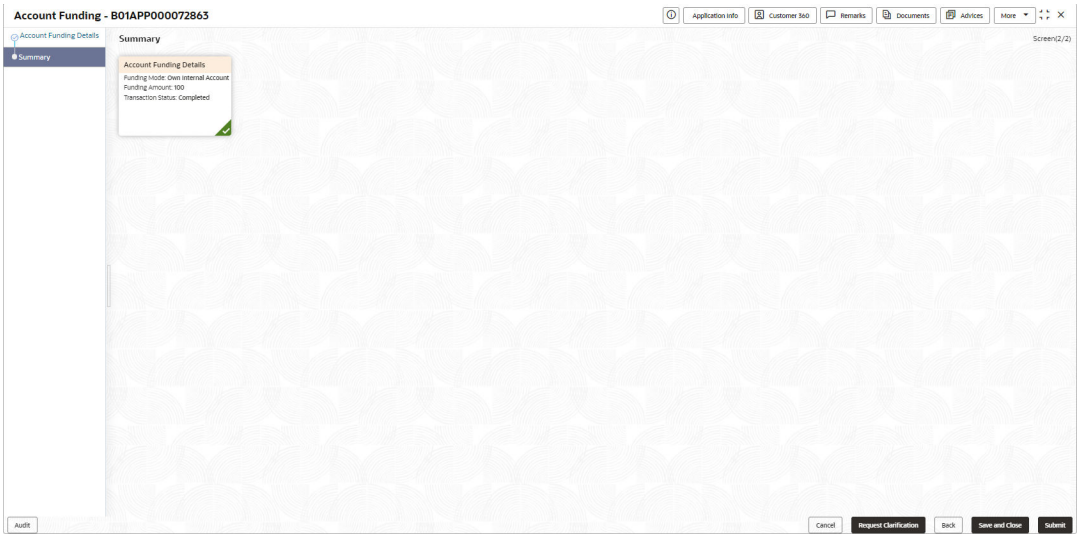
The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.
To view the summary of each stage and submit:

1. Click **Next** in **Account Funding Details** screen to proceed with the next data segment, after successfully capturing the data.

   The **Summary** screen displays.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Figure 2-32 Summary



Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-22 Summary

Data Segment	Description
Account Funding Details	Displays the account funding details.

2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified. The **Overrides** screen is displayed.

   Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to make ensure overrides do not arise.

3. Click **Proceed Next**. The **Checklist** screen is displayed.

   Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

4. Click **Proceed**. The **Outcome** screen is displayed.

5. Click **Submit** to submit the application.

   On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed.

2.7 Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

This section appears are the top of the right pane and is applicable for all the account opening stage. You can add, edit, view or delete the information from the respective section.

Below are the list of global actions:

Copyright © 2023, 2025, Oracle and/or its affiliates.

- Smart Assist
  This topic provide the systematic instructions to access the smart assist for application insights.
- Application Details
  In this section, user can view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.
- Application Info
  In this section you can view the application number along with its product name.
- Customer 360
  In this section you can view the list of customers involved in the application.
- Remarks
  In this section you can view or the post the remarks.
- Documents
  In this section you can upload the document and also view the already uploaded documents.
- Advices
  You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.
- Conditions and Covenants
  This topic provides the systematic instructions to add or edit conditions and covenants details for the loan applications.
- Clarification Details
  This topic describes the detailed information to request for clarifications.
- Solicitor Details
  You can add the solicitor details using this section.

2.7.1 Smart Assist

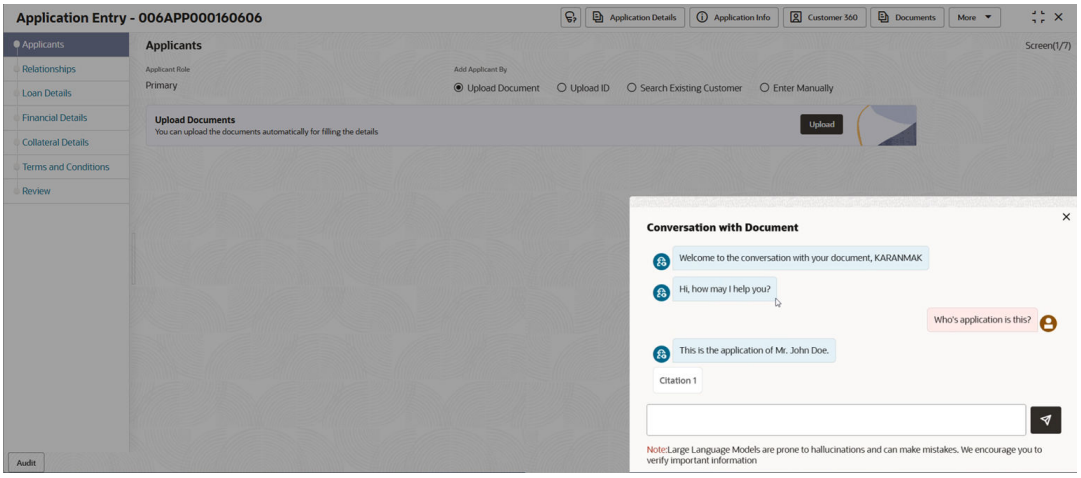
This topic provide the systematic instructions to access the smart assist for application insights.

1. Click the **Smart Assist**.

   The **Conversation with Document** pop-up screen displays with chatbot.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Figure 2-33 Smart Assist



2. Specify a question in the chatbot related to the application.

   The chatbot responds with an answer by referring the application details.

3. Click **Citation 1**.

   The system displays the source of information in the context of response from Large Language Model.
   The **Citation 1** button displays when the **AI Help for Adhoc Queries** feature is enabled in the **Origination Preferences** screen.

4. Click ✕ to close the screen.

2.7.2 Application Details

In this section, user can view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.

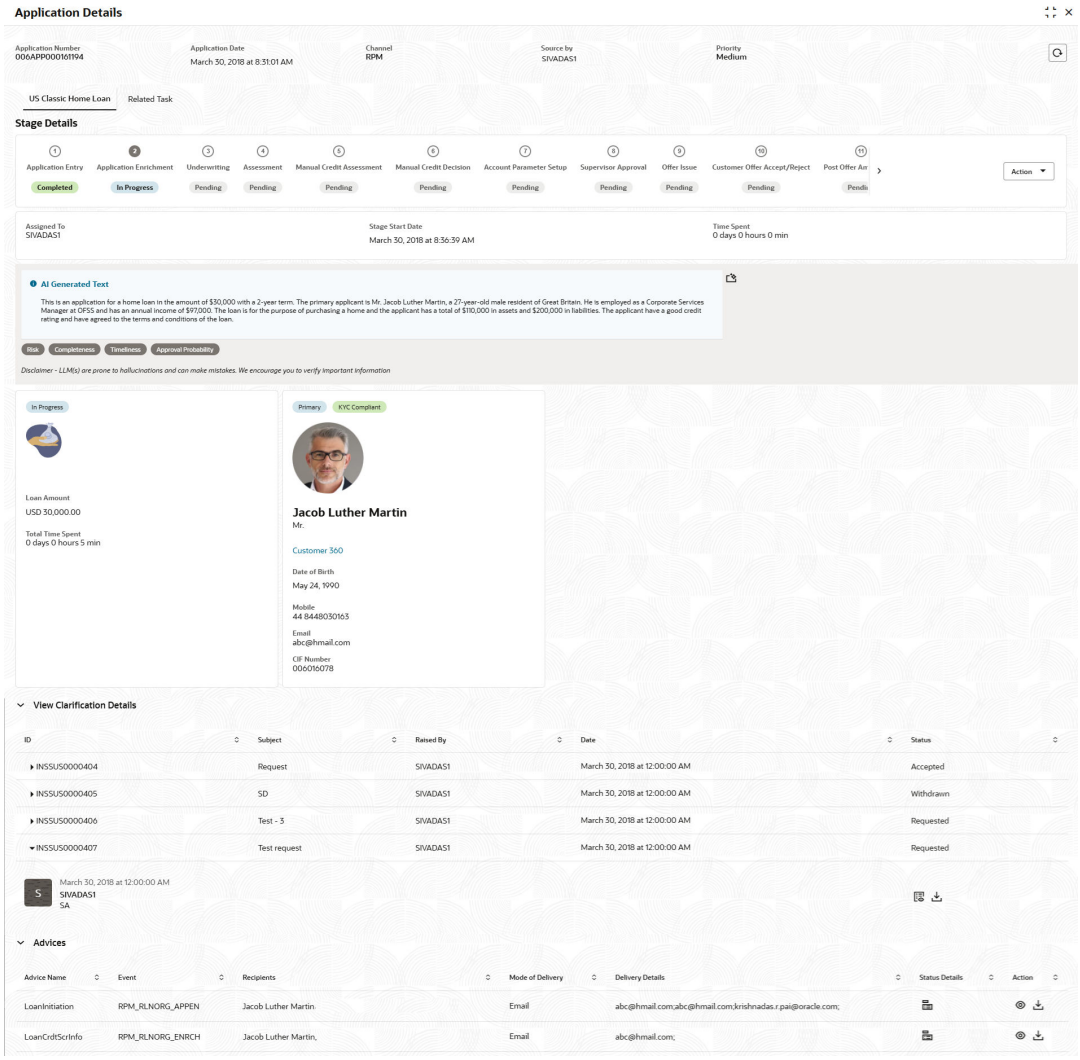
User can also track and launch the respective stage of the application.
To view the application details:

1. Click **Application Details** to view the application details.

   The **Application Details** screen displays.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Figure 2-34 Application Details



The **Application Details** screen displays separate cards for various products initiated as part of the single application. For more information on fields, refer to the field description table below.

> **Note**
>
> The fields marked as **Required** are mandatory.

Table 2-23 Application Details – Field Description

Field	Description
Application Number	Displays the application number.
Application Date	Displays the date and time on which the application was initiated.
Channel	Displays the channel name.
Source By	Displays the name of the user who has sourced the application.

Copyright © 2023, 2025, Oracle and/or its affiliates.

Table 2-23 (Cont.) Application Details – Field Description

Field	Description
Priority	Displays the priority of the application. • **High** • **Medium** • **Low**
Refresh	Click to retrieve recent changes or updates made to the application.
<Product Name>	Displays the product name. In case on multiple product, different tabs appears with the respective product name. User can click the product names to view the respective application details.
Stage Details	In this section, all account opening stages appears with the status name and it's chronological order of the stage in the process.
Action	To perform below actions on the appeared stages, click the number of specific stage and select an option from the **Action** drop-down list: • **Acquire & Edit Task** : Select this option to acquire and edit the selected stage. • **Acquire Task**: Select this option to acquire the selected stage and it can be edited later. • **View Stage Details**: Select this option to view the stage details.
User ID Assigned	Displays the **User ID** of the user currently working on the product process. The label of this field changes dynamically based on whether the selected stage is **In Progress** or **Completed**. • When user selects a **In Progress** stage, the label will display as **Assigned To**. • When user selects a **Completed** stage, the label will display as **Submitted By**. If the task was auto submitted, then the value for such Completed stages will be displayed as **Auto Submitted**. • For Pending and skipped stages, this field will be hidden. **Note**: This field appears blank if the product process task is not acquired by any user.
Stage Start Date	Displays the start date of the current stage. It also display time in hours, minutes and seconds.
Time spent	Displays the days, hours and minutes spent on the current selected stage.
AI Generated Text	Displays the AI generated description of the product. This section appears if the **Enable AI** toggle is selected in the **Origination Preferences** screen. This section also describes the product insights such as **Risk**, **Completeness**, **Timelines**, and **Approval Probability**. This data is generated analyzed based on captured application details. This content is populated as configured in Large Language Model.
	Click this icon to view the source of information in the context of the response given by Large Language Model. This icon displays when the **AI for Application Tracker** feature is enabled in the **Origination Preferences** screen.

> **Note**
>
> Ensure that mandatory documents are uploaded, as the system will validate the same during the stage submission.
>
> Mandatory documents can only be deleted in the same stage where it is uploaded.
>
> Non-mandatory documents can be deleted in any stage.

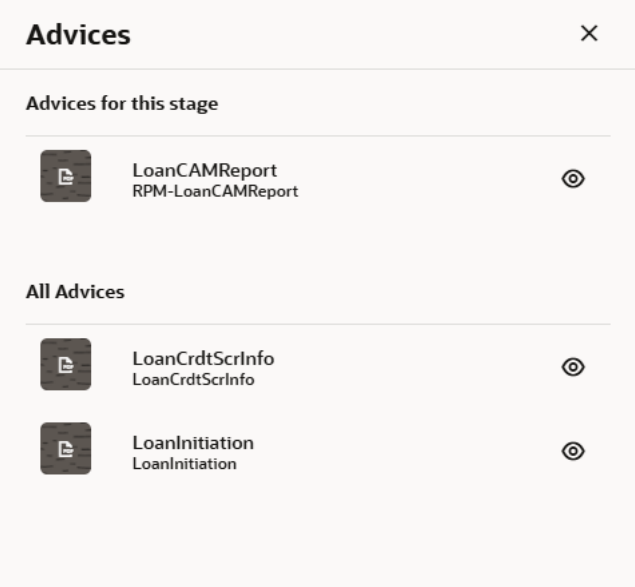
2.7.7 Advices

You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.

- Click **Advices** to view the advice linked for the stage.

  The **Advices** screen is displayed.

Figure 2-39 Advices



The system will generate the advice on submission of the stage. For Application Entry stage of Product, no advice is configured.

2.7.8 Conditions and Covenants

This topic provides the systematic instructions to add or edit conditions and covenants details for the loan applications.

Conditions
The Conditions are stipulations and constraints recorded in a contract to restrict the usage of funds, in order to ensure proper utilization of funds for the specified purposes and to adhere to a stipulated schedule.

Covenants

Copyright © 2023, 2025, Oracle and/or its affiliates.

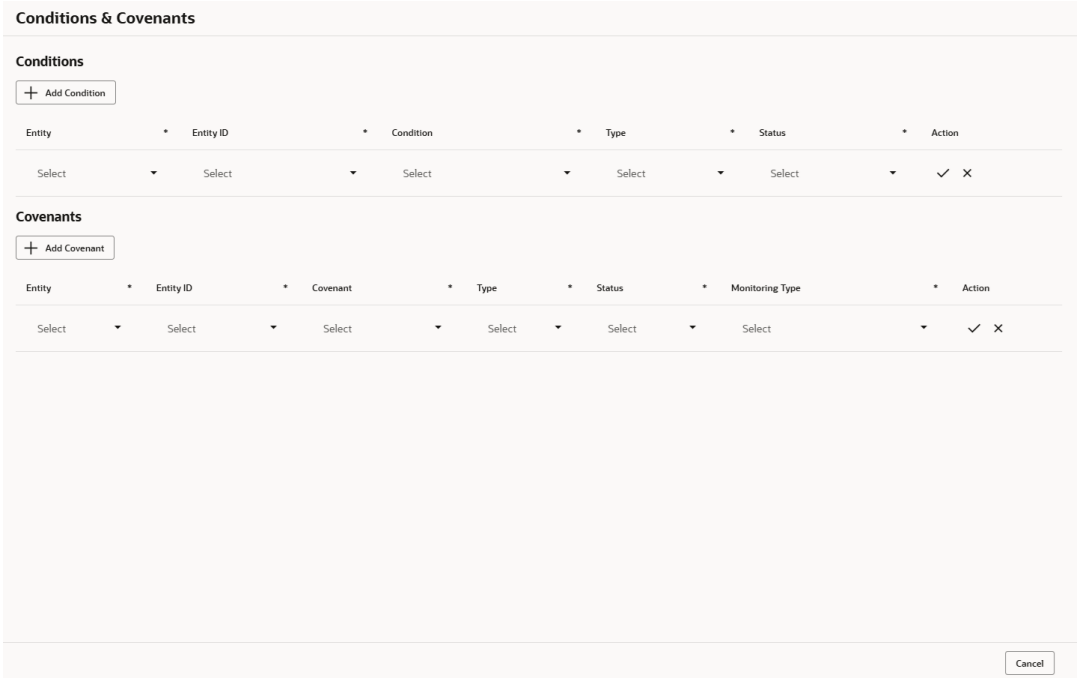
Often there are restrictions on borrowers while extending credit facilities. Sometimes, a borrower promises certain future acts to assure the lender that the conduct of business dealings is fair, healthy and in accordance with the best practices. The purpose of covenant is to assist the lender to ensure the health of loan facilities does not deteriorate suddenly or unexpectedly before maturity.

To add conditions:

1. From the **More** option, click the **Conditions & Covenants** to add or remove the conditions details.

   The **Conditions & Covenants** page appears.

Figure 2-40 Conditions



2. Perform the following actions:
   - Click **Add Condition** to add new conditions.
   - Click **Remove** to remove already added conditions.
3. Enter the relevant details.

Table 2-25 Conditions – Field Description

Field	Description
Entity	Select the entity on which user wants to set condition. The available options are • **Party** • **Collateral** • **Account**
Entity ID	Select the entity ID from the list. The options in the list appears based on the entity selected in the **Entity** field.

6. Once the details are updated, click **Save**.

   Clarification Request once raised moves the application to **Awaiting Customer Clarification** state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the **Awaiting Customer Clarification** sub-menu available under **Task** menu.

7. Select the application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu.
8. Click the **Clarification Details** from the header.
9. Select the specific clarification to take action on it.

   Allowed actions are as following:

   - **Respond**
   - **Accept Clarification**
   - **Withdraw Clarification**

   Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

2.7.10 Solicitor Details

You can add the solicitor details using this section.

A solicitor is a legal practitioner who traditionally deals with most of the legal matters in some jurisdictions. A person must have legally-defined qualifications, which vary from one jurisdiction to another, to be described as a solicitor and enabled to practice there as such.

In this section, user can add or remove the solicitor and also view the already added solicitor.

To add solicitor details:

1. From the **More** option, click the **Solicitor** to add or remove or edit the already added solicitor.

   The **Solicitor Details** page displays.

3
Simplified Application

This topic describes the concept and process of single stage application.

What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segmenst in a single view.

How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

To open an account using simplified application process:

1. From the **Menu**, select the **Retail Origination**. The Retail Origination menu appears.
2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
3. Select the appropriate product and click **Apply**.
   The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
   - **Applicant**: In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Multiple applicants are allowed with different roles. Refer to the **Applicant** data segment from the **Application Entry** stage of this guide.
   - **Account Details**: In this data segment user can capture the product details to configure the account. Refer to the **Account Details** data segment from the **Application Entry** stage of this guide.
   - **Beneficiary Details**: In this data segment user can capture the beneficiary details. Refer the **Beneficiary Details** data segment from the **Application Entry** stage of this guide.
   - **Interest and Charges**: In this data segment user can view the interest and charges that are applicable. Refer the **Interest and Charges** data segment from the **Application Entry** stage of this guide.

Copyright © 2023, 2025, Oracle and/or its affiliates.

- **Term and Conditions**: In this data segment user can capture the term, conditions and consents of the customer. Refer the **Term and Conditions** data segment from the **Application Entry** stage of this guide.
- **Review**: In this data segment user can review all the details that are captured on clicking on each data segment tile.

4. On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
   Below are the stages are autogenerated if the Know Your Customer (KYC) process is not successfully completed:
   - **Debit Assessment**: If the applicants involved in a simplified application have not completed the Know Your Customer (KYC) process, then the **Debit Assessment** stage appears in the application process. The user having the required access rights can pick this task and can retry submission after taking required actions on the KYC non-compliance. Refer the **Debit Assessment** stage of this guide.
   - **Manual Debit Assessment**: If the bureau status of any applicant is marked as **Referred** then this stage appears in an account opening process. Refer the **Manual Debit Assessment** stage of this guide.
5. After completing the Know Your Customer (KYC) process, the account number is generated and application proceed to approval stage. The Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the **Approval Details** data segment of th**e Account Approval** stage in this guide.
   - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
   - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
6. An account is created on approving the application in the **Account Approval** stage.
7. Below tasks are also generated in this process:
   - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.
   - If the business process is configured to include Account Funding, then the **Account Funding** stage is generated after account creation.

4

Instant Savings Account Origination Process

This topic describes the information about Instant Savings Account Origination Process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Savings Account have been automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

> **Note**
>
> Refer to the **Retail Onboarding User Guide** for more details.

Based on whether the Application is initiated by self-service channel or by a Branch personnel the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

Prerequisite:

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is either not taken for the Account or taken as Account Transfer for which the mode configured has to be **H** which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications).

  > **Note**
  >
  > For more details, refer to **Initial Funding Configuration** topic in the **Configurations User Guide**.

In the Instant Savings Account Origination Reference Business Process, the stages that are configured are mentioned below.

- **Application Entry Stage**: On successful submission of the Savings Account Application from self-service channel, the system starts the **Application Entry** stage without any manual intervention and completes the data segment level validation. On successful completion of the validation, the system automatically submits the **Application Entry** stage.
  Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for Application Entry stage are updated in the **Application**

Copyright © 2023, 2025, Oracle and/or its affiliates.

Initiate stage itself by clicking the **Application** button in the **Product Details** data segment.

On submitting the **Application Entry** stage, the next stage is triggered based on the business process configuration. Below are the stages are auto generated if the Know Your Customer (KYC) process is not successfully completed:

- **Debit Assessment**: If the applicants involved in a simplified application have not completed the Know Your Customer (KYC) process, then the Debit Assessment stage appears in the application process. The user having the required access rights can pick this task and can retry submission after taking required actions on the KYC non-compliance. Refer to the **Debit Assessment stage** of this guide.
- **Manual Debit Assessment**: If the bureau status of any applicant is marked as Referred then this stage appears in an account opening process. Refer to the **Manual Debit Assessment stage** of this guide.
  After completing the Debit Assessment process, the account number is generated and application process to **Account Funding Stage**.
- **Handoff Retry**: Application moves to this stage and appears in the Free Task only if the Savings Account creation has been rejected by Product Processor. The user having the required access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.
- **Account Funding Stage**: In this stage, the user will initiate the Account Funding. For more information, refer to the Account Funding topic.
