Purpose

This guide is designed to help you to quickly get acquainted with the **Individual Retirement Account Savings Origination** in the Oracle Banking Origination. This guide provides an overview of the Savings Account Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a **Individual Retirement Account Savings Origination**.

Before you begin

Kindly refer to the **Getting Started User Guide** for common elements, including Symbols and Icons, Conventions Definitions, and so forth.

Module Prerequisite

Specify the **User Name** and **Password**, and login to **Home** screen.

Audience

This guide provides instructions and information about the Individual Retirement Account Savings product to help various bank users to deliver quick and efficient service to both customer and prospects.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which user supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that user enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Acronyms and Abbreviations	Description

1

Overview

This topic describes the information on the various features of Individual Retirement Account Savings Origination module.

Oracle Banking Origination is a middle office banking solution that offers extensive support for Retail Banking Origination processes. It encompasses a range of products, including Savings Accounts, Current Accounts, Term Deposits, Credit Cards, and various types of loans such as Home Loans, Personal Loans, Education Loans, and Vehicle Loans for individual customers, as well as Term Loans and Business Loans tailored for Small and Medium Business clients.

- Saving Account
- Current Account
- Credit Card Account
- Retail Loans Account
- Individual Retirement Account Certificate of Deposit Account
- Individual Retirement Account Savings
- Certificate of Deposit Account

It is a Host-Agnostic solution.

It allows banks to enhance the user experience for different banking roles, including Sales Officers, Relationship Managers, Account Opening Officers, Branch Supervisors/Managers, Loan Officers, and Credit Officers, as they manage specific tasks throughout the product origination lifecycle.

Our new platform solution facilitates the easy configuration of relevant stages and their corresponding data segments, which can be tailored to meet business needs. Facilitating random access navigation among data segments at a specific stage, along with necessary validations, empowers business users to gather relevant information at any point during the account opening process, prior to the creation of the Savings Account in the Host system. The updated workflow facilitates the systematic capture of pertinent documents at each stage, along with the dynamic generation of advice and notifications.

The request to open a Savings Account can be initiated by authorized branch personnel, relationship managers, or approved bank agents. This can be done either through the conventional branch channel or via specialized protocol services accessible on digital devices such as tablets or mobile phones. The request to open a Savings Account can be initiated by both new and existing customers. Additionally, the system is capable of processing savings account requests submitted directly by customers via the Self-Service Banking Channel (Oracle Banking Digital Experience) through RESTful service APIs.

Note

Refer to the detailed setup and operation workflows for both asset and liability products initiation made available in the **Operations User Guide**.

2

Individual Retirement Account Savings Origination

This topic describes the specific stages that the IRA Savings Account Application must undergo before it can be submitted to the Host for Account Creation.

As detailed in the Operations User Guide, the Application Initiation stage is where all Product Originations begin, utilizing the Product Catalogue. The Cart Operation within the Product Catalogue enables the initiation of one or more products. When the Savings Account Product origination process begins, whether as an individual product or as part of a selection of multiple products, the Process Orchestrator creates a Savings Account Process Reference Number upon the submission of the Application Initiation stage. Additionally, the Process Orchestrator updates the record in the Free Task process for the Application Entry stage, which is also known as the Task from the orchestrator's viewpoint.

The Individual Retirement Account Savings Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

- [Application Entry](#)
This topic describes the information on the various data segments to capture the required data in the Application Entry stage.
- [Account Details](#)
This topic provides the systematic instructions to view and modify the account details.
- [Beneficiary Details](#)
This topic provides the systematic instructions to capture the details of the beneficiary for the account.
- [Interest and Charges](#)
This topic provides the systematic instructions to view the interest applicable for the account.
- [Terms and Conditions](#)
This topic describes the terms and conditions that are mandatory to accept for to proceed with account opening process.
- [Review](#)
This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

2.1 Application Entry

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

The Process Orchestrator modifies the record within the **Free Task** process during the **Application Entry** stage, which is also known as the Task from the orchestrator's viewpoint. Users have the option to **Acquire and Edit** the task from the Action column or simply Acquire it from the header, depending on their needs.

The **Application Entry** stage will be submitted automatically if the Bank's configuration permits full Application submission and the user has completed all data segments of the **Application**

Entry stage during the **Application Initiation** stage by selecting the **Application** button found in the **Product Details** data segment.

Upon the successful completion of the **Application Entry** stage, a request for the initial funding transaction is forwarded to the **Teller Module**, provided that the Cash option is chosen for funding. The status of the Teller Transaction is subsequently verified within the Initial Funding Details section of the **Account Funding** stage.

The **Application Entry** stage has the following reference data segments:

- [Applicant](#)
This topic provides the systematic instructions to capture the customer-related information for the application.

2.1.1 Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

The information recorded by the customer during the Application Initiate stage is displayed in this data segment. The user has the option to update additional fields to enhance the customer-related information.

- [For Individual Customer Type](#)
The topic describes the process to capture or edit customer information of Individual type of customer.

2.1.1.1 For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

To capture applicants details:

1. In the **Saving Application Entry** stage, update the customer details in the Applicants data segment based on the respective customer type.

The **Applicant - Individual** screen displays.

 **Note**
The fields which are marked as Required are mandatory.

Table 2-2 Service Member Details

Fields	Description
Service Member Details	In this section user can capture the service member details, if the customer is service member.

Table 2-2 (Cont.) Service Member Details

Fields	Description
Service Branch	Specify the service branch of the customer. The available options are: <ul style="list-style-type: none"> • Army • Marine Corps • Navy • Air Force
Employee ID	Specify the employee identification code.
Service Obligation End date	Specify the end date of service obligation.
Rank	Select the rank from the drop-down list.
Pay Rate	Specify the pay rate from the drop-down list.
Service Status	Specify the service status from the drop-down list.
Remarks	Specify the remarks.
Unit Name	Specify the unit name of the customer.
Order Number	Specify the order number of the service in which the customer is enrolled.
Active Duty Start Date	Specify the date on which service is active.
Active Duty End Date	Specify the date on which the service is ending.
Notification Date	Specify the date on which the customer notified bank about the enrollment in service. This date cannot be future dated.
Actions	Select the action to preform on the added record. The available actions are: <ul style="list-style-type: none"> • Click  to save the added record. • Click  to edit the added record. • Click  to delete the added record.

Advanced Search

User can perform an advanced search for the party by providing additional information.
User can perform search on below party types:

- For Individual
 - **First Name**
 - **Middle Name**
 - **Last Name**
 - **Date of Birth**
 - **Preferred Unique ID**
 - **Tax Identification Number**
 - **Mobile Number**
 - **Email**
- For Non- Individual
 - **Party ID**

- **Business or Organization Name**
- **Registration Number**
- **Registration Date**
- **Email**
- **Customer Category**

To search for a party using the advanced search:

- a. Click the **Advanced Search**. The Search Party window appears based on the selected party type.
Below screenshot refers the

Figure 2-3 Advanced Search - Individual

- b. On the **Search Party** screen, perform one of the following actions:
 - Click **Fetch** to search all the parties.
All the parties in the system appears in the table.
 - Enter the specific search criteria in the respective field and click **Fetch**.
The search result appears based on the search criteria.
3. Click **Save**. The applicant details tile appears with the captured data.
The tile comprises of below fields:
 - <Applicant Role>
 - <KYC Status>
 - <Applicant Photo>
 - <First Name, Middle Name, Last Name>
 - <Title>
 - **CIF Number**
 - **Date of Birth**
 - **Initiate**: This button appears if the **Early KYC** is selected while configuring the product in the **Business Product Configuration** screen.
4. Click **Initiate** to initiate the Know Your Customer (KYC) process of the added applicant. It is mandatory to complete the KYC process successfully to proceed.

To upload Identification document for fetching customer information:

- Click **Upload ID** to fetch the customer information from the uploaded documents.
The **Applicants - Upload ID** screen displays.

Figure 2-4 Application Entry - Upload ID

- Specify the relevant details. For more information on fields, refer to the field description table below.

Table 2-3 Applicants - Upload Document – Field Description

Field	Description
Document Name	Select the document name from the drop-down list. The available options are: <ul style="list-style-type: none"> Driving License Passport
Country of Issue	This field is defaulted for the document name is selected. Note: This field is editable.
Upload Document	Click on Select a file or drop one here to browse and upload the document from the local system. Note: PNG and JPEG file formats are supported.

- On uploading the document, the details are fetched and appears in the **Upload ID Document** screen.

The **Upload ID Document** screen displays.

Figure 2-5 Upload ID Document

- On the **Upload ID Document** screen, the fields are pre-populated with extracted data. For more information on fields, refer to the field description table below.

Table 2-4 Verify Information – Field Description

Field	Description
Document Image	Displays the uploaded document image.
First Name	The information in this field is automatically populated with the extracted data. User can modify the first name of the applicant if required.
Middle Name	The information in this field is automatically populated with the extracted data. User can modify the middle name of the applicant if required.
Last Name	The information in this field is automatically populated with the extracted data. User can modify the last name of the applicant if required.
Date of Birth	The information in this field is automatically populated with the extracted data. User can modify the date of birth of the applicant if required.
Gender	The information in this field is automatically populated with the extracted data. User can modify the gender of the applicant if required.
Unique ID Type	Displays the unique ID type of the applicant based on the document uploaded.
Unique ID Number	The information in this field is automatically populated with the extracted data. User can modify the Unique ID number of the applicant if required.
ID Status	The information in this field is automatically populated with the extracted data. User can modify the ID status of the applicant if required.

Table 2-4 (Cont.) Verify Information – Field Description

Field	Description
Preferred ID	The information in this field is automatically populated with the extracted data. User can modify the preferred ID by clicking Yes or No .
Issue Date	The information in this field is automatically populated with the extracted data. User can modify the issue date of the driving license, if required. This field appears only if the Document Name is selected as Driving License .
Unique Id Expiry Date	The information in this field is automatically populated with the extracted data. User can modify the unique ID expiry date of the applicant if required.
Place Of Issue	The information in this field is automatically populated with the extracted data. User can modify the place of issue of the applicant if required.
Address Type	The information in this field is automatically populated with the extracted data. User can modify the address type from the drop-down list if required. When the user uploads a document, the system retrieves the address type from Common Core maintenance. By default, the address type is set to Communication Address , and the address details are displayed in an unstructured format.
Effective Date	The information in this field is automatically populated with the extracted data. User can modify the date when the applicant start residing at the specified address.
End Date	The information in this field is automatically populated with the extracted data. User can modify the date when the applicant last lived at the specified address.
Make this as preferred address	The information in this field is automatically populated with the extracted data. User can modify the address preference by switch <input checked="" type="checkbox"/> for communication.
Search Address	Specify the address to search for the already captured address if required. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.
Unstructured Address	The information in this field is automatically populated with the extracted data. System displays the address in unstructured format by default. <ul style="list-style-type: none"> Switch <input checked="" type="checkbox"/> to display the fields for capturing the unstructured address. Switch <input type="checkbox"/> to hide the unstructured address fields.
Address Line 1	The information in this field is automatically populated with the extracted data. User can modify the building name if required.
Address Line 2	The information in this field is automatically populated with the extracted data. User can modify the street name if required.
Address Line 3	The information in this field is automatically populated with the extracted data. User can modify the city or town name if required.
Address Line 4/Landmark	The information in this field is automatically populated with the extracted data. User can modify the landmark if required.
Country	The information in this field is automatically populated with the extracted data. User can modify the country from the drop-down list if required.

Table 2-4 (Cont.) Verify Information – Field Description

Field	Description
State/Country Sub Division	The information in this field is automatically populated with the extracted data. User can modify the state or country sub-division from the drop-down list if required.
Zip Code/ Pin Code	The information in this field is automatically populated with the extracted data. User can modify the zip or post code of the address if required. Note: The maximum length is 16 characters and allows alphanumeric characters, including spaces.
Zip +4	The information in this field is automatically populated with the extracted data. User can modify the zip extension code of the address if required.
Structured Address	User can add the structured address if required. <ul style="list-style-type: none"> Switch <input type="checkbox"/> to display the fields for capturing the structured address. Switch <input type="checkbox"/> to hide the structured address fields.
Department	Specify the name of department.
Sub Department	Specify the name of sub department.
Street Name	Specify the street name.
Building Number	Specify the building number.
Building Name	Specify the name of the building.
Floor	Specify the floor number.
Post Box	Specify the post box number.
Room	Specify the room number.
Zip Code / Post Code	Specify the zip or post code of the address. It allows the alphanumeric characters including space.
Town Name	Specify the name of the city or town where the customer is located.
Town Location Name	Specify the name of sub-location or area within the city or town.
District Name	Select the district from the drop-down list.
Country	Select the country from the drop-down list.
Country Sub Division	Select the country sub-division from the drop-down list.
Address Line 1	Specify the address in line 1.
Address Line 2	Specify the address in line 2.

9. Perform one of the following actions on the screen:
 - Click **Save** to save pre-populated the data and return to the **Applicants** screen.
 - Click **OK** to override the data fields with the extracted data.
 - Click **Cancel** to cancel the override action and return to the **Applicants** screen.
10. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

Note

If the **Allow existing customer only** option is enabled based on the host parameter at the business product level, the system allows only eligible accounts that exist in the host to open an IRA Money Market Savings Account.

2.2 Account Details

This topic provides the systematic instructions to view and modify the account details.

The Account Details section presents the account information. This information is automatically filled in if the user provided it during the application process. Users have the option to modify these details within this section.

To add account details:

1. Click **Next** from the previous data segment to proceed with next data segment, after successfully capturing the data.

The **Account Details** screen displays.

Figure 2-6 Account Details

The screenshot displays the 'Account Details' screen for application entry 006APP000017778. The interface includes a top navigation bar with tabs for Application Details, Application Info, Customer 500, Documents, Remarks, and More. A left sidebar lists navigation options: Applicants, Account Details (selected), Beneficiary Details, Interest and Charges, Terms and Conditions, and Review. 3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message prompting the user to take corrective action. The user cannot advance to the next data segment until all mandatory data has been entered.

2.4 Interest and Charges

This topic provides the systematic instructions to view the interest applicable for the account.

The **Interest and Charge** data segment displays the interest applicable for the account.

1. Click **Next** in from the previous data segment to proceed with the next data segment, after successfully capturing the data

The **Interest and Charge Details** screen displays.

Figure 2-8 Interest and Charges

2. Specify the details in the relevant data fields.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Table 2-7 Interest Details - Field Description

Field	Description
Interest and Charges	This section displays the interest and charges details.
Interest Details	Displays the interest details.
Interest Rate%	Displays the interest rate in percentage.
Margin (%)	Select the margin in percentage.
Final Rate	Displays the final rate calculated based on the Interest Rate and the Margin specified.
APY (in %)	Displays the annual percentage yield value in percentage. Below is the formula to calculate the APY, Annual Percentage Yield = (1 + Interest Rate ÷ The number of Compounding in a year) ^ (Number of compounding in a year) – 1 This is applicable for the Credit Interest
Charge Description	Displays the charge description.
Amount/Rate	Displays the charge amount.
Waive	Select the toggle to enable the waiving charges.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message prompting the user to take corrective action. The user cannot advance to the next data segment until all mandatory data has been entered.

2.5 Terms and Conditions

This topic describes the terms and conditions that are mandatory to accept for to proceed with account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appear in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

- Term and Conditions for all products** - In this section the term and conditions which are applicable for all the products appear in the questionnaire format.
- Term and Conditions for <Selected Product>** - In this section the term and conditions which are applicable for all the selected product appear in the questionnaire format.
- Consents and Preferences** - In this section the user capture the consents and preferences of customer as E-Sign, Marketing Communications, and Privacy Information.

To capture terms and conditions:

- Click **Next** from previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Term and Conditions** screen appears

Figure 2-9 Terms and Conditions

2. Click  to view the term and conditions.
3. Select the toggle button to accept the term and conditions.
4. Proceed by clicking Next to move to the subsequent data segment once the data has been successfully captured. The system will verify all required data segments and fields. If any essential information is missing, an error message will be shown to prompt the user to address the issue. Users must complete the mandatory data before they can advance to the next segment.

2.6 Review

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

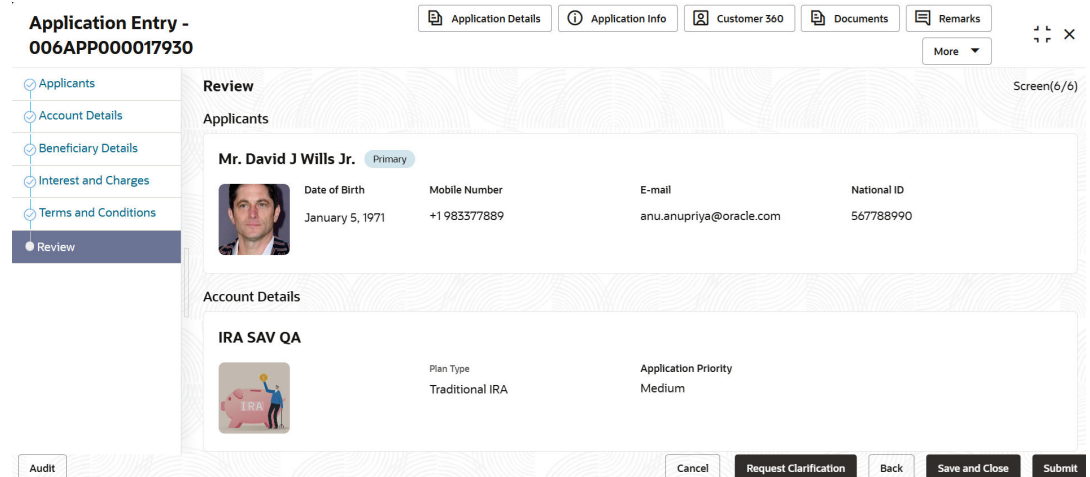

The review displays the sections of all the data segments in the Application Entry stage. The section display the important details captured in the specified data segment.

To view the summary of all data segment

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

Figure 2-10 Review

For more information on summary tiles, refer to the field description table below.

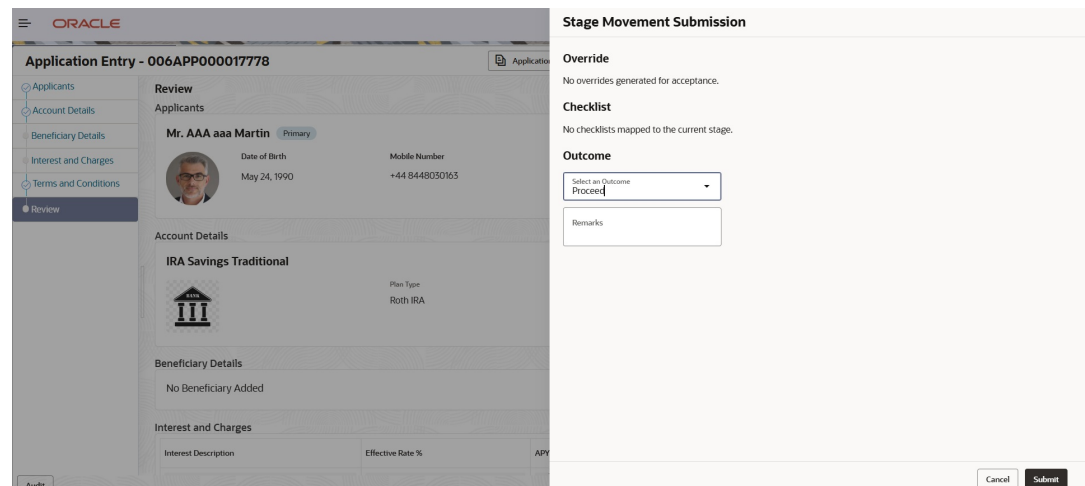

Table 2-8 Review - Application Entry – Field Description

Data Segment	Description
Applicants	Displays the applicants details
Account Details	Displays the account details.
Beneficiary Details	Displays the Beneficiary details
Interest and Charges Details	Displays the interest and charges details.
Term and Conditions	Displays the term and conditions.

- Click **Submit** to reach the **Stage Movement Submission** screen, where the overrides, checklist and documents for this stage are verified.

The **Stage Movement Submission** screen displays.

Figure 2-11 Stage Movement Submission

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **LoanApplication Enrichment**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the Application Entry stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers [Saving Account] to the Application Enrichment stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

3

Application Documents

This topic describes the process of the documents that are uploaded related to application.

The Application Documents stage provides the view of the outbound documents that are generated and dispatched to the applicants involved in the application.

To generate and dispatch the outbound documents:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Application Documents stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Document Generation](#)
In this data segment you can generate and dispatch the documents that are configured.
- [Document Acceptance](#)
In this data segment you can capture the acceptance of the documents that are already generated and dispatched.
- [Summary](#)
This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

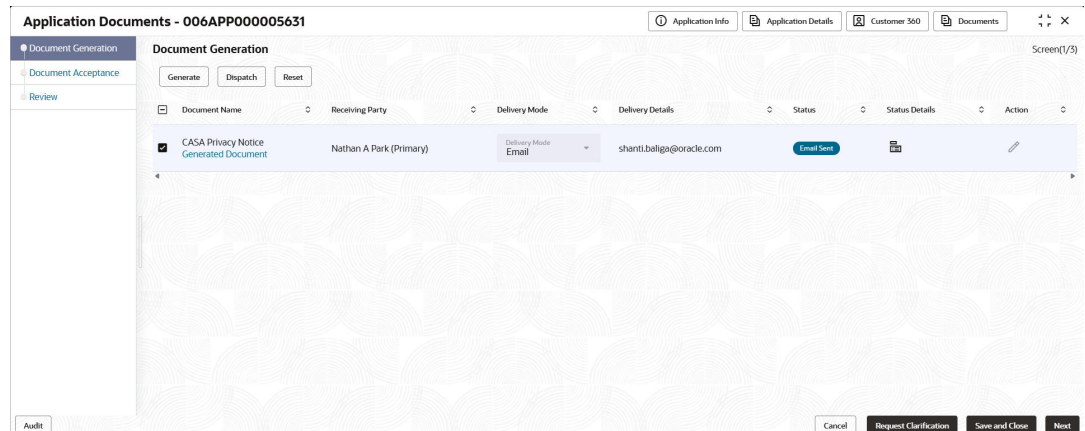

3.1 Document Generation

In this data segment you can generate and dispatch the documents that are configured.

In the Document Generation data section, a table displays a pre-populated list of documents that are retained within the document generation event and meet the specified rule criteria. The document generation events are established in the **Advice Maintenance** screen.

To generate and dispatch the document:

1. On acquiring the **Application Document** task, the **Document Generation** stage is displayed.

Figure 3-1 Document Generation

2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select atleast one document

You can perform below actions on the selected document:

- **Generate:** Click this button to generate the selected document. On clicking this button the system invokes a call to the report generation service which generates a PDF output for the advice configured in the Advice Maintenance screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the Generate Document link in the Document column.
- **Dispatch:** Click this button to dispatch the selected generated documents. You can only dispatch those documents which are not already dispatched. On clicking this button the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the Advice Maintenance screen.
- **Reset:** Click this button to reset the action performed on the document.

For more information on fields, refer to the field description table.

Table 3-1 Document Generation – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen. The available options are: <ul style="list-style-type: none"> • Email • Post • Print • e-Sign Remote • e-Sign In-Person

Table 3-1 (Cont.) Document Generation – Field Description

Field	Description
Delivery Details	<p>Displays the delivery details of the generated documents based on the default delivery mode.</p> <ul style="list-style-type: none"> If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. If the delivery mode is Post then the preferred address of every recipient is displayed. If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. If the delivery mode is Print then the Not Applicable text appears.
Status	<p>Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button.</p> <p>Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery.</p> <ul style="list-style-type: none"> If the mode of delivery is Email then on the successful trigger the status appears as Email Sent. If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as E-Signing Initiated. If the mode of delivery is Post then on the successful trigger the status appears as Dispatched. If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print. In case the dispatch process fails due to technical error then the status appears as Failed.

Status	Displays the status of the documents based on the actions performed on the document.
Status Details	Displays the status details of the document. Click the icon to view the generation, dispatched and acceptance details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. <ul style="list-style-type: none"> • View: You can view the documents only if the Delivery Mode is defined as E-Sign Remote or E-Sign In-Person. • Upload Document: You can upload documents only if the Delivery Mode is defined as Email, Print or Post. • Delete: You can upload documents only if the Delivery Mode is defined as Email, Print or Post.
Customer Response	Select the customer response for the documents. The available options are: <ul style="list-style-type: none"> • Accept: Select to accept the application documents. You can select this option only if the acceptance status of all the document is Accepted. • Reject: Select to reject the application documents. If the acceptance status of any one of the document is declined then this option appears auto-selected. • Amend: Select to amend the application document status.
Date of Response	Select the date on which the customer response is captured. This date should be greater or equal to current date.
Reason	Select the reject reason from the drop-down list.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

3.3 Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system displays the summary of each data segments in tiles.

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary - Application Document** screen displays.

Figure 3-3 Summary-Application Documents

The screenshot shows a web application interface for 'Application Documents - 006APP000005365'. The 'Review' section is active, displaying two summary tables. The first table, 'Document Generation', shows a total count of 2 documents, with 0 dispatched, 2 email sent, 0 ready for print, 0 pending for dispatch, 0 failed, and 0 not generated. The second table, 'Document Acceptance', shows a total count of 1 document, with 0 accepted, 1 pending for acceptance, a customer response of 'Accept', and a date of response of 'March 30, 2018'. The interface includes navigation buttons like 'Cancel', 'Request Clarification', 'Back', 'Save and Close', and 'Submit'.

Document Generation							
Total Count Of Documents	Dispatched	Email Sent	Ready For Print	Pending For Dispatch	Failed	Not Generated	
2	0	2	0	0	0	0	

Document Acceptance				
Total Count Of Documents	Accepted	Pending For Acceptance	Customer Response	Date of Response
1	0	1	Accept	March 30, 2018

The user will have the option to review all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 3-3 Summary - Application Documents – Field Description

Data Segment	Description
Document Generation	Displays the document generation.
Documents Acceptance	Displays the document acceptance.

2. Click **Submit** to reach the **OUTCOME**, where the Overrides, Checklist and the Documents for this stage can be validated or verified. The **Overrides** screen is displayed.
3. In the Override screen, click **Accept Overrides & Proceed**. The **Checklist** screen is displayed.
4. In the Checklist screen, click **Save & Proceed**. The **Outcome** screen is displayed.
5. In the Outcome screen, select appropriate option from the **Select to Outcome** field.
6. Click **Submit** to submit the Account Approval stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

4

Debit Assessment

The topic describes the debit assessment process.

In the process of account opening of saving product this stage appears if the Know Your Customer (KYC) is not completed for the applicants involved in the applications.

This stage appears in following conditions:

- The applicant is new.
- Existing customer but the KYC stage is not completed.
- Existing customer but the KYC stage is Referred.

To open Debit Assessment task:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Debit Assessment** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Bureau Information](#)
This topic describes the bureau information details.
- [Summary](#)
This topic describes summary of all the data segment.

4.1 Bureau Information

This topic describes the bureau information details.

In this data segment user can view the bureau information of application and status of all the applicants that are involved in the application.

1. On acquiring the Manual Debit Assessment task, the Bureau Information data segment appears and call to bureau service is initiated for display the bureau information related to application and applicants.

The **Bureau Information** screen appears.

Figure 4-1 Bureau Information

Table 4-1 Bureau Information

Field Name	Description
Application Decision	Displays the application decision status. The debit assessment status appears as Referred .
Account Type	Displays the account type.
Product Name	Displays the product name of the account.
Applicants tile	In this section below fields appear with the captured information in the Application Entry stage: <ul style="list-style-type: none"> • <Name of applicant> • <Role> • Date of Birth <yyyy/mm/dd> • Mobile Number, Email ID and Phone Number as Contact details • Bureau Name • Decision as Approved, Referred or Declined • Reason for the decision
View More	Click this button to view more details. View More window appears. Below fields appears in the View More window: <ul style="list-style-type: none"> • Report ID • Report Date • Model Name • Score • Result • Reasons

2. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

4.2 Summary

This topic describes summary of all the data segment.

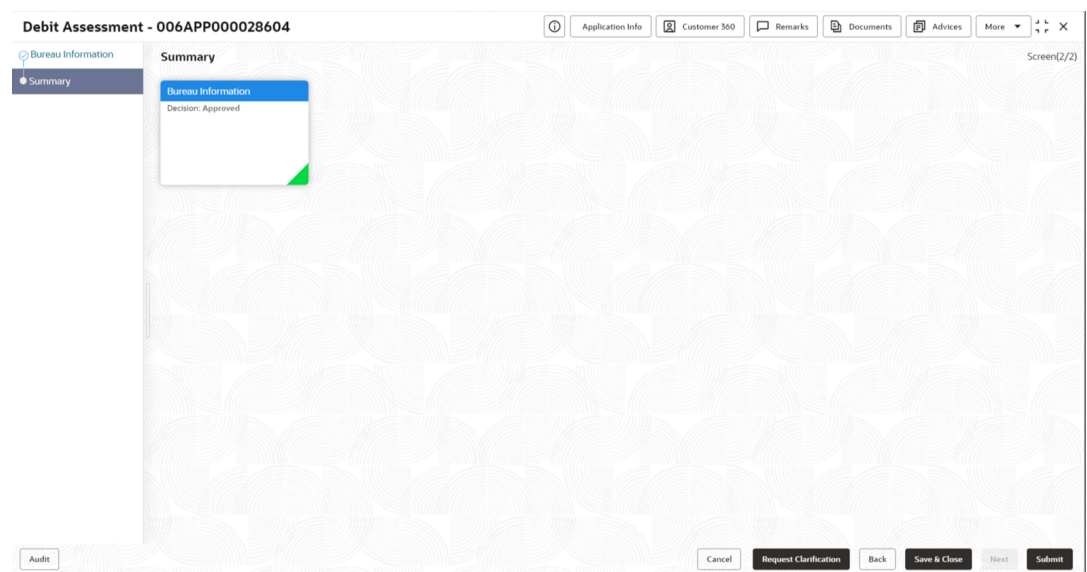

The Summary displays the tiles for all the data segments in the Debit Assessment stage. The tiles display the important details captured in the specified data segment.

To view the summary and submit the task:

1. Click **Next** in previous screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen is displayed

Figure 4-2 Summary

2. Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on summary tiles, refer to the field description table below.

Status	<p>Displays the fund transfer status of the transaction.</p> <p>To view more information on the transaction status, click .</p>

4. Proceed by clicking **Next** to move to the subsequent data segment once the data has been successfully captured. The system will verify all required data segments and fields. If any essential information is missing, an error message will be shown to prompt the user to address the issue. Users must complete the mandatory data before they can advance to the next segment.

6.2 Review

This topic provides the systematic instruction to view all the data segments in the Account Funding stage.

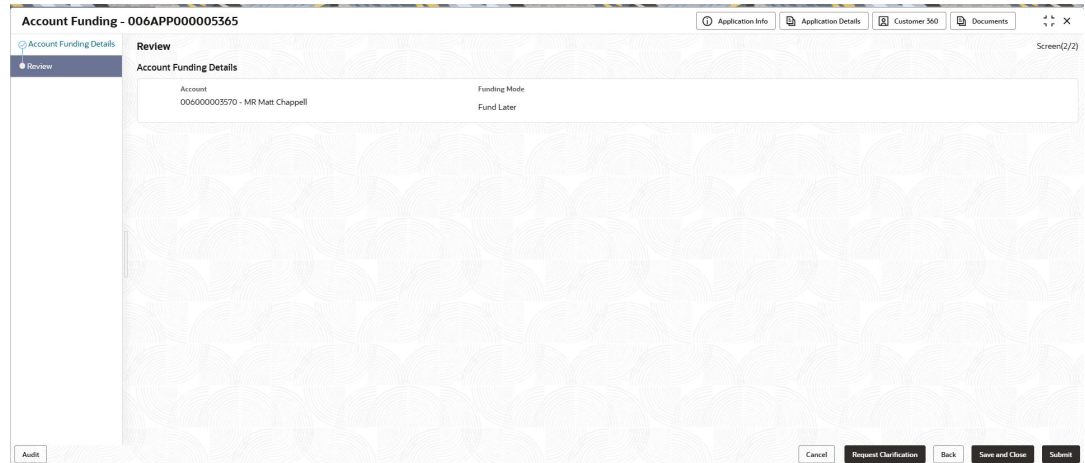

The system displays the summary of each of the data segments in the given stage.

To view the summary of all the data segments:

1. Click **Next** in **Account Funding Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

Figure 6-3 Review

The user can view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 6-2 Review - Field Description

Data Segment	Description
Account Details	Displays the account details.

2. Click **Submit** to reach the **Stage Movement Submission** screen, where the overrides, checklist and documents for this stage are verified.

The **Stage Movement Submission** screen displays.

Figure 6-4 Stage Movement Submission

Stage Movement Submission

Override
No overrides generated for acceptance.

Checklist
No checklists mapped to the current stage.

Outcome

Select an Outcome
Proceed

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
 - Select the **Return to Application Entry** Stage to make application entry stage available in free task for edit.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Account Funding** stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 7. Click **Close** to close the window.
OR
Click **Go to Free Task**.
The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Account Funding on Host stage.

Note

This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application. The following notification will be sent to the user, if application is initiated from assisted channel, and to the Oracle Banking Digital Experience customer, if application is initiated from self-service.

6.3 Global Actions

This topic provides details on the actions that can be performed in all stages.

This section appears at the top of the screen and is applicable for all the account opening stage. User can add, edit, view or delete the information from the respective section.

Below is the list of global actions:

- [Application Details](#)
This topic provide systematic instructions to view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.
- [Application Info](#)
In this section you can view the application number along with its product name.
- [Customer 360](#)
This topic provide systematic instructions to view the list of customers involved in the application.
- [Documents](#)
This topic provide systematic instructions to view, upload, or modify documents related to the applicant and product required for the application process.
- [Remarks](#)
This topic provide systematic instructions to view or post the remarks.
- [Advices](#)
This topic provide systematic instructions to view the generated advices using Advices action.
- [Clarification Details](#)
This topic describes the detailed information to request for clarifications.

6.3.1 Application Details

This topic provide systematic instructions to view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.

User can also track and launch the respective stage of the application.

To view the application details:

1. Click **Application Details** to view the application details.

The **Application Details** screen displays.
