## Purpose

Welcome to the **Term Deposit Origination** user guide for Oracle Banking Origination. This document provides an overview of the Term Deposit Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Term Deposit Origination.

## **Audience**

This user manual is intended for the Relationship Managers (RMs) and Sales Officers incharge of sourcing the Savings Account Products from prospect and customer of the bank. The user manual is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Savings Account Origination process based on the bank's internal operation and policies.

## **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <a href="http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc">http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc</a>.

#### **Access to Oracle Support**

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <a href="http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info">http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info</a> or visit <a href="http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs">http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs</a> if you are hearing impaired.

## **Diversity and Inclusion**

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

## Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

## Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table 1 Acronyms table

Abbreviation	Description
DS	Data Segment
System	Oracle Banking Origination Module
OBA	Oracle Banking Accounts
ОВО	Oracle Banking Origination

## Symbol and Icons

## **Basic Actions**

**Table 3 Basic Actions** 

Actions	Functions
Request Clarification	Used to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.
Back	Used to navigate to the previous data segment within a stage.
Next	Used to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. Users will not be able to proceed to the next data segment, without capturing the mandatory data.

Table 3 (Cont.) Basic Actions

Actions	Functions
Save & Close	Used to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.
Cancel	Used to close the application without saving. This tasks appears in Free Task, once the transaction is canceled.

## **Screenshot Disclaimer**

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

## Overview

This topic desribes about the features of the entire module.

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan. It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank persons such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on; handling defined functions in the life cycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architectures by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Term Deposit Account is created in the Host. The new work-flow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Term Deposit Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Term Deposit Account request can be made for both new and existing customer types. Also, the system supports processing of the term deposit account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

This user guide explains the reference work-flow for the Term Deposit Account Origination process and further details the data that needs to be captured in the data segment linked to the specific stages.

This process initiates with the receipt of Term Deposit opening form and related documents from a customer for opening of a Term Deposit. The bank verifies the details and documents submitted for opening of Term Deposit to ensure completeness and initiates the Term Deposit Origination process by selecting the desired Term Deposit Product from the Product Catalogue.

## **Term Deposit Origination**

This topic provides detailed information on the defined stages through which the Term Deposit application has to flow.

As detailed in the **Operations** user manual, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The **Cart Operation** in Product Catalogue allows to originate single or multiple Product initiation. Once the Term Deposit Account product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Term Deposit Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as **Task** from orchestrator perspective.

The Term Deposit Account Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

- Application Entry
- Debit Assessment

The topic describes the debit assessment process.

- Account Funding Stage
  - This topic provides the detailed information about the account funding stage data segments.
- Account Approval Stage

This topic provides the detailed information about the account approval stage data segments.

Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

## 2.1 Application Entry

Based on the access configuration, user can view the records in Free Task. In this stage user can capture the details that are required to open a current account. This stage is automatically submitted on below conditions:

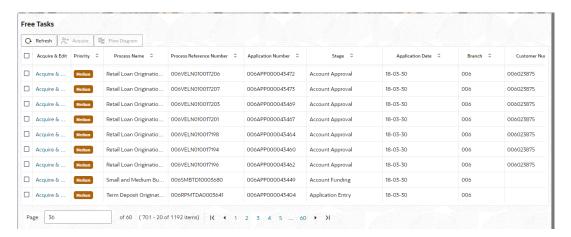

- If the bank level configuration for allowing the full application submission is set as Yes.
- If the user captures the required details in all the data segments of the Application Entry stage as part of the Application Initiation stage on clicking the Application button in the Product Details data segment.

#### To acquire and edit respective stage:

- 1. On **Home** screen, click **Tasks**.
- 2. Under Tasks, click Free Tasks.

Figure 2-1 Free Task

#### Customer Information

This topic provides the systematic instruction to view the details captured for the customer in the **Application Initiation** stage.

#### Customer Consent and Preference

This topic describes the consent and preferences of customers that are captured in account opening process.

#### Account Details

This topic provides the systematic instructions to capture the account related information for the application.

#### Stake Holder Details

This topic provides the systematic instructions to capture the stake holder details related information for the application.

#### Financial Details

This topic provides the systematic instructions to capture the financial details of a single customer or multiple customers in case of joint applicants.

#### Mandate Details

This topic provides the systematic instructions to capture the mandate details related information for the application.

#### Account Service Preferences

his topic provides the systematic instructions to capture the account service preferences related information for the application.

#### Nominee Details

This topic provides the systematic instructions to capture the nominee details related information for the application.

#### Interest Details

This topic provides the systematic instruction to view the details captured for the Interest Details

#### Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

#### Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

#### 2.1.1 Customer Information

This topic provides the systematic instruction to view the details captured for the customer in the Application Initiation stage.

The Customer Information data segment displays the details captured for the customer in the Application Initiate stage and allows updating further fields for supplementing the customer related information.

For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

For Small and Medium Business (SMB) Customer Type The topic describes the process to capture or edit customer information of Small and Medium Business type of customers.

### 2.1.1.1 For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

#### To capture customer information details:

In the Term Deposit Application Entry stage, update the customer details in the Customer Information data segment based on the respective customer type.

#### Note

The fields in the screen appears based on the region specific configuration. Refer Regional Configuration section below to understand regionalization impact on this data segment.

The **Customer Information - Individual** screen displays.

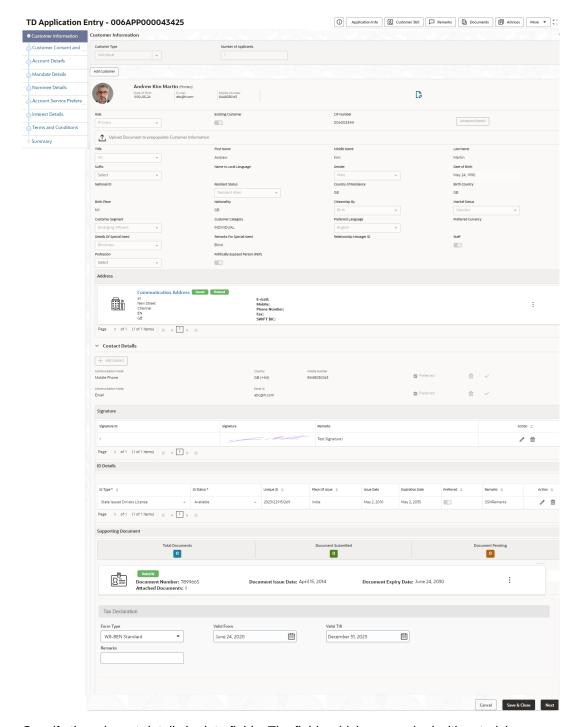

Figure 2-2 Customer Information - individual

2. Specify the relevant details in data fields. The fields which are marked with asterisk are mandatory. For more information on fields, refer to the field description table below:

For more information on the fields, refer to the field description table below:

Table 2-1 Customer Information - Individual - Field Description

Field	Description
Customer Type	Displays the customer type based on the product selected.

Table 2-1 (Cont.) Customer Information - Individual - Field Description

Field	Description
Number of Applicants	Displays the number of applicants added for the account. It gets auto calculated based on the number of applicants that are added by <b>Add applicant</b> .
Applicant Name <role></role>	Displays the name of the applicant. The applicant role is displayed adjacent to this field.
Date of Birth	Displays the date of birth of the applicant.
E-mail	Displays the e-mail ID of the applicant.
Mobile Number	Displays the mobile number of the applicant.
Edit	Click <b>Edit</b> to modify the existing customer details and address details.
	Click <b>Save</b> to save the modified details and click <b>Cancel</b> to cancel the modifications.
Add Customer	Click <b>Add Customer</b> to add another customer other than primary applicant.
Existing Customer	Select to indicate if customer is existing customer.
Role	Displays the applicant role.
	The first customer which is added while initiating an application is considered as primary applicant.
	By default the <b>Primary Applicant</b> option appears in this field.
	This field is enabled if you add customer other than the primary customer.
	The options that are selected in the Allowed Applicants Roles field of the Business Product Preferences data segment in the Business Product screen appear for selection.
	The avaliable options are:
	Joint Applicant
	Guarantor     Guardian
	• Custodian
CIF Number	Search and select the CIF number.
On Humber	This field appears for only existing customers.
Advanced Search	Click this button to perform party using advance parameters.
Advanced Course	For more information on advance search, refer the <b>Advanced</b> Search section below.
Title	Select the title of the applicant from the drop-down list.
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
Suffix	Specify the suffix for the applicant. This options in this list appears based on the configured entity code in the Oracle Banking Party product.
Gender	Specify the Gender of the applicant from the drop-down list.
Date of Birth	Select the date of birth of the applicant.
Resident Status	Select the residential status of the applicant from the drop-down list. Available options are:
	Non-Resident Alien
	Resident Alien
	Citizen

They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

### To capture terms and conditions:

 Click Next from pervious data segment to proceed with the next data segment, after successfully capturing the data.

The **Term and Conditions** screen appears

Figure 2-17 Term and Conditions

2. Click

to view the term and conditions.

- In the Customer Consent across Products section, select to capture the customer consents.
- 4. In the **Term and Conditions for Lending Application** section, select to accept the product level term and conditions.

## 2.1.11 Summary

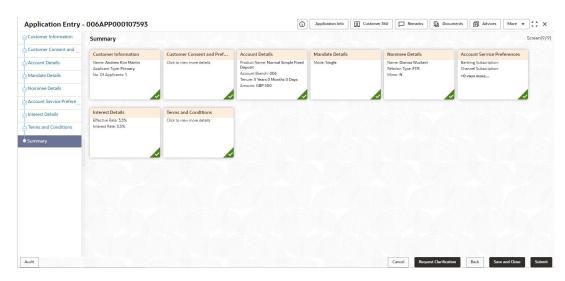

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

The **Summary** data segment displays the account service preferences details.

 Click Next from the data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-18 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-13 Summary - Field Description

Data Segment	Description
Account Details	Displays the account details.
Customer Information	Displays the customer information details.

<b>Table 2-13</b>	(Cont.)	) Summary	y - Field Description
-------------------	---------	-----------	-----------------------

Data Segment	Description
Stake Holder Details	Displays the stake holder details. This data segment displays only if the Customer Type is selected as Small and Medium Business (SMB).
Nominee Details	Displays the nominee details.
Account Service Preference	Displays the account service preference details.
Mandate Details	Displays the mandate details.

- Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified.
- 3. In the Override screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- 4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
- 5. Select the checkbox to accept the checklist.
- 6. Click Save & Proceed. The Outcome screen is displayed.
- 7. In the Outcome screen, select appropriate option from the Select to Proceed field.
  - Select the Proceed to proceed with the application. By default this option is selected. It
    will logically complete the Application Entry stage for the saving application. The
    stage movement is driven by the business configuration for a given combination of
    Process Code, Life Cycle and Business Product Code.
  - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 8. Enter the remarks in Remarks.

Status	Select the status of the condition.
	The available options are
	Open
	Complied

4. Click OK. The conditions are saved.

All the fields appears with the selected options in tabular format. You can edit the details on clicking the added row.

### **Convenants**

Often there are restrictions on borrowers while extending credit facilities. Sometimes, a borrower promises certain future acts to assure the lender that the conduct of business dealings is fair, healthy and in accordance with the best practices. The purpose of covenant is to assist the lender to ensure the health of loan facilities does not deteriorate suddenly or unexpectedly before maturity.

#### To add convenants:

From the More option, click Conditions & Covenants to add or remove the covenants details.

The Conditions & Covenants page appears.

Figure 2-34 Convenant

Click Add to add new convenants.

#### OR

Click **Remove** to remove already added convenants.

Enter the relevant details.

Table 2-23 Application Information – Field Description

Field	Description
Entity	Select the entity on which you want to set convenants.
	The available options are
	• Party
	Collateral
Entity ID	Select the entity ID from the list. The options in the list appears based on the entity selected in the <b>Entity</b> field.
Convenants	Specify the convenants for the selected entity.
Туре	Select the type when the convenants must be complied.
	The available options are
	Financial
	Reporting
	Undertaking
Status	Select the status of the convenants.
	The available options are
	Open
	Complied

8. Click **OK**. The covenants are saved.

#### (i) Note

All the fields appears with the selected options in tabular format. You can edit the details on clicking the added row.

### 2.5.8 Solicitor Details

You can add the solicitor details using this section.

A solicitor is a legal practitioner who traditionally deals with most of the legal matters in some jurisdictions. A person must have legally-defined qualifications, which vary from one jurisdiction to another, to be described as a solicitor and enabled to practice there as such.

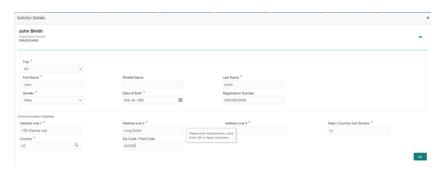

In this section you can add or remove the solicitor. You can also view the already added solicitor.

#### To add solicitor details:

From the More option, click the Solicitor to add or remove or edit the already added solicitor.

he **Solicitor Details** page appears.

Figure 2-35 Solicitor

Enter the relevant details.

**Table 2-24 Solicitor – Field Description** 

Field	Description
Title	Select the title of the solicitor.
First Name	Specify the first name of the solicitor.
Middle Name	Specify the middle name of the solicitor.
Last Name	Specify the last name of the solicitor.
Gender	Select the gender of the solicitor from the list.
Date of Birth	Select or enter the birth date of the solicitor.
Registration Number	Specify the registration number of the solicitor.
Communication Address	Capture the communication address of the solicitor.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.

Table 2-24 (Cont.) Solicitor - Field Description

Field	Description
State / Country Sub Division	Specify the state or country sub division.
Country	Select and search the country code.
Zip Code / Post Code	Specify the zip or post code of the address.

3. Click **OK** to save the added solicitor.

### 2.5.9 Clarification Details

You raise the clarifications using this section.

#### To add the clarification details:

- Click Clarification Details to raise a new customer clarification request or view the existing request.
- 2. Click **New Clarification** to request new clarification.

The **New Clarification** screen is displayed.

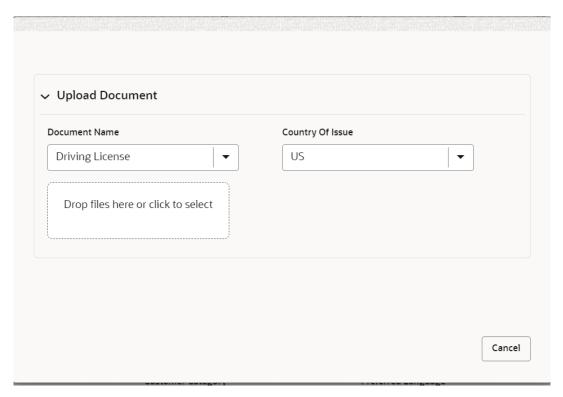

Figure 2-36 New Clarification

3. Enter the subject and the clarification detail in the New Clarification Pop-up screen. The system also allows you to upload the document for the Clarification being raised.

Figure 2-37 Upload Documents

4. Once the details are updated, click Save. Clarification Request once raised moves the application to 'Awaiting Customer Clarification' state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the Awaiting Customer Clarification sub-menu available under Task menu.

Select the Application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu. Click on the **Clarification Details** from the header.

5. Select the specific clarification to take action on it.

Allowed actions are as following:

- Adding New Conversation
- Withdraw Clarification
- Accept Clarification

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

## **Instant Term Deposit Account Origination Process**

This topic provides the information about instant term deposit account origination process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Term Deposit Account is automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

#### (i) Note

Refer to the **Retail Onboarding User Guide** for more details.

Based on whether the Application is initiated by self-service channel or by a Branch personnel, the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

#### **Prerequisite**

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is taken as Account Transfer for which the mode configured has to be **H** which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications).

#### (i) Note

For more details, refer to the Initial Funding Configuration section in the Configurations User Guide.

In the Instant Term Deposit Account Origination Reference Business Process, the stages that are configured are mentioned below.

Application Entry Stage: On successful submission of the Term Deposit Account Application from self-service channel, the system starts the **Application Entry** stage without any manual intervention and completes the data segment level validation. On successful completion of the validation, the system automatically submits the **Application** Entry stage.

Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for **Application Entry** stage are updated in the **Application** 

**Initiate** stage itself by clicking the **Application** button in the **Product Details** data segment.

- Account Funding Stage: On successful submission of the Application Entry stage, the system checks if Initial Funding mode updated for the Account Opening.
  - The Initial Funding mode allowed for self-service, initiated applications are External Bank Account Transfer and Account Transfer.
  - If Initial Funding is taken for the Account via the External Bank Account Transfer in the self-service channel, the system starts the Application Funding stage and validates the Initial Funding Details data segment and submits the Application Funding stage automatically.
  - For Application where the Initial Funding is updated as Account Transfer, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
  - For the Branch Initiated Applications wherein the Initial Funding is taken in Cash or Other Bank Cheque, this stage has to be manually done by the Branch user having access permission for this stage.
- Account Approval Stage: The system skips this stage for self-service initiated application and submits the application directly to the Product Processor for Account Creation. However, for Branch Initiated Application, considering the 4-eye principle, the system expects the application to be approved by a Supervisor. Hence this stage will has to be picked and done by the Supervisor user. Supervisor user can either approve or reject the Application. On submission of this stage by selecting Approve outcome, the system submits the Application to the Product Processor for Account Creation.
- Handoff Retry: Application moves to this stage and displays in the Free Task only if the
  Term Deposit Account creation is rejected by Product Processer. The user having the
  required access rights can pick such task and can retry submission to Host after taking
  required actions on the Failure reason.

## **Regional Configuration**

This library describes the regional configuration.

Oracle Banking Origination (OBO) has an ability to configure different geography requirements across varied implementation. Using the regional configurator feature, users are configured and enabled for a given Entity ID such as Default and Region Code.

The region specific configurations helps to ensure the workflows adhere to the geography practices, in terms of data capture and visualizations of the application screens. This model supports a framework which is used across OBMA domains to achieve specific end user experience.

Following region specific configuration are implemented:

- · Ability to set non-mandatory field to mandatory
- Ability to set a field mandatory based on another field
- Hiding a field
- Capability to maintain LOV by geography
- Capability to maintain default value in LOV for a given geography

This chapter describes US region specific configuration which are implemented in OBO.

The fields in below table are defaulted to the respective value from backend. These fields hidden on UI.

Table 4-1 Defaulted Values and Hidden on UI

Field	Description
Preferred Currency	Defaulted to USD.
	Appears in the Customer Information data segment of the Application Entry stage.
Account Currency	Defaulted to USD.
	Appears in the Account Details data segment of the Application Entry stage.
Customer Category	Defaulted to Individual customer type.
	Appears in the Customer Information data segment of the Application Entry stage.
Country of Residence	Defaulted to US.
	Appears in the Customer Information data segment of the Application Entry stage.
Phone Banking	Defaulted to No.
	From the Account Service Preferences data segment.
Direct Banking	Defaulted to No.
	From the Account Service Preferences data segment.
Kisok Banking	Defaulted to No.
	From the Account Service Preferences data segment.

Table 4-1 (Cont.) Defaulted Values and Hidden on UI

Field	Description
Passbook	Defaulted to No.
	From the Account Service Preferences data segment.

The fields in below table are not applicable for US region.

Table 4-2 Not Applicable

Field	Description
Name in Local Language	From in the Customer Information data segment of the Application Entry stage.
Citizenship By	From the Customer Information data segment of the Application Entry stage.
Birth Country	From the Customer Information data segment of the Application Entry stage.
Nationality	From the Customer Information data segment of the Application Entry stage.
Preferred Languauge	From the Customer Information data segment of the Application Entry stage.
Details Of Special Need	From the Customer Information data segment of the Application Entry stage.
Remark for Special Need	From the Customer Information data segment of the Application Entry stage.
Relationship Manager ID	From the Customer Information data segment of the Application Entry stage.
Additional Info	From all the Address section where applicable.
APY (in %)	From the Interest Details data segment.

The fields in below table are used with US nomenclature in the respective screen.

Table 4-3 Nomenclature

Field	Description
State/ Country Sub Division	The label is changed to State.
	Appears in the below stages:
	<ul> <li>In the Address Details sections of the Customer Information data segment in the Application Entry stage.</li> </ul>
	<ul> <li>In the Address Details sections of the Beneficiary Details data segment in the Application Entry stage.</li> </ul>
Cheque	The label appears as Check.
	Appears in the Account Details data segment of the Application Entry stage.
	Appears in the Account Service Preferences data segment.

Table 4-3 (Cont.) Nomenclature

Field	Description
Checking Account	Current Account product name appears as Checking Account.  Appears as mentioned below:  In maintenance process  Core Maintenance - Process Code screen  Retail Maintenance - Business Process Configuration and Business Product Configuration  In onboarding process  Product Catalogue - while initiating and selecting product for an account opening application  Value of Account Type field - Impacted data segment is Account Details or Product Details. This data segment appears in the respective stage as per configured. In Account Details or Product Details tile of the Summary data segment of the respective stage.  Notification Messages  Tror Messages  Process Name in the Free Task screen.  Global Actions - Application Info and Application Tracker  Dashboard widget of the respective product  Email Communication  All the Advices
National ID	The label appears as SSN. Appears in the Customer Information data segment of the Application Entry stage. Appears in the Customer Information data segment.
Resident Status	The lable appears as Citizenship Status. The Citizen option also appears for selection in the drop-down list. Appears in the Customer Information data segment of the Application Entry stage. Appears in the Customer Information data segment.
Nominee Details	The lable appears as Beneficiary Details. This data segment appears in the Application Entry stage.

The fields in the below table are applicable for US region only.

Table 4-4 Region Specific

Field	Description
Payable on Death / Transferable on Death	Specify whether the amount is payable or transferable on the death of the applicant to the added nominee.
Tax Declaration	In this section you can update the tax declaration details. This section appears at below location  Customer Information data segment  While onboarding customer

Table 4-4 (Cont.) Region Specific

Field	Description
Form Type	Specify the form type for tax declaration.  If the <b>Non Resident Alien</b> option is selected from the <b>Citizenship Status</b> drop-down list then the <b>Form Type</b> is defaulted to <b>W8-BEN</b> and disable.
	If the Citizen or Resident Alien option is selected from the Citizenship Status drop-down list then the Form Type is defaulted to W9 and disable.
Valid From	Specify the date from which the form is valid.
Valid Till	Specify the date on which the document is expired.
Remarks	Specify the remarks.

# **Error Codes and Messages**
