Purpose

Welcome to the **Term Deposit Origination** user guide for Oracle Banking Origination. This document provides an overview of the Term Deposit Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Term Deposit Origination.

Audience

This user manual is intended for the Relationship Managers (RMs) and Sales Officers incharge of sourcing the Savings Account Products from prospect and customer of the bank. The user manual is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Savings Account Origination process based on the bank's internal operation and policies.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table 1 Acronyms table

Abbreviation	Description
DS	Data Segment
System	Oracle Banking Origination Module
OBA	Oracle Banking Accounts
ОВО	Oracle Banking Origination

Basic Actions

Table 3 Basic Actions

Actions	Functions
Request Clarification	Used to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.
Back	Used to navigate to the previous data segment within a stage.
Next	Used to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. Users will not be able to proceed to the next data segment, without capturing the mandatory data.

Table 3 (Cont.) Basic Actions

Actions	Functions
Save & Close	Used to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.
Cancel	Used to close the application without saving. This tasks appears in Free Task, once the transaction is canceled.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Overview

This topic desribes about the features of the entire module.

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan. It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank persons such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on; handling defined functions in the life cycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architectures by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Term Deposit Account is created in the Host. The new work-flow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Term Deposit Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Term Deposit Account request can be made for both new and existing customer types. Also, the system supports processing of the term deposit account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

This user guide explains the reference work-flow for the Term Deposit Account Origination process and further details the data that needs to be captured in the data segment linked to the specific stages.

This process initiates with the receipt of Term Deposit opening form and related documents from a customer for opening of a Term Deposit. The bank verifies the details and documents submitted for opening of Term Deposit to ensure completeness and initiates the Term Deposit Origination process by selecting the desired Term Deposit Product from the Product Catalogue.

Term Deposit Origination

This topic provides detailed information on the defined stages through which the Term Deposit application has to flow.

As detailed in the **Operations** user manual, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The **Cart Operation** in Product Catalogue allows to originate single or multiple Product initiation. Once the Term Deposit Account product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Term Deposit Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as **Task** from orchestrator perspective.

The Term Deposit Account Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

- Application Entry
- Account Funding Stage

This topic provides the detailed information about the account funding stage data segments.

- Account Approval Stage
 - This topic provides the detailed information about the account approval stage data segments.
- Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

2.1 Application Entry

Based on the access configuration, user can view the records in Free Task. In this stage user can capture the details that are required to open a current account. This stage is automatically submitted on below conditions:

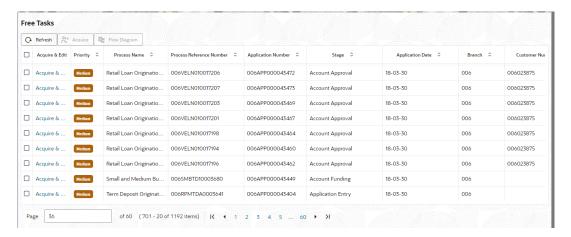

- If the bank level configuration for allowing the full application submission is set as **Yes**.
- If the user captures the required details in all the data segments of the Application Entry stage as part of the Application Initiation stage on clicking the Application button in the Product Details data segment.

To acquire and edit respective stage:

- On Home screen, click Tasks.
- Under Tasks, click Free Tasks.

Figure 2-1 Free Task

Applicants

This topic provides the systematic instruction to view the details captured for the customer in the **Application Initiation** stage.

Account Details

This topic provides the systematic instructions to capture the account related information for the application.

Stake Holder Details

This topic provides the systematic instructions to capture the stake holder details related information for the application.

Mandate Details

This topic provides the systematic instructions to capture the mandate details related information for the application.

Beneficiary Details

This topic provides the systematic instructions to capture the nominee details related information for the application.

Interest Details

This topic provides the systematic instruction to view the details captured for the Interest Details

Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

Contact Details	In this section you can provide digital contact details. Click add contact button to add new contact details.
<communication mode=""></communication>	Select the communication mode from the drop-down list. The available options are: Mobile Phone Email

Table 2-2 (Cont.) Small and Medium Business - Field Description

Field	Description
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of countrycode, country name and subscriber dialing code.
	This field appears only if you select the Mobile Phone option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the Email option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.

Advanced Search

You can perform an advanced search for the party by providing additional information.

You can perform search on below party types:

For Individual

- First Name
- Middle Name
- Last Name
- Date of Birth
- Unique ID or National ID or SSN ID
- Mobile Number
- Email

For Non- Individual

- Party ID
- Business or Organization Name
- Registration Number
- Registration Date
- Email
- Customer Category

To search for a party using the advanced search:

3. Click the Advanced Search.

The Search Party window appears based on the selected party type.

Search Party First Name Middle Name Last Name Date of Birth Unique ID/National ID Fetch Clear Date of Birth Party ID First Name Middle Name Last Name Unique ID 233331380 Martin 1990-05-24 20231129101121 Andrew Kim 9090909090 233331382 006006692 Andrew Kim Martin 9090909090 1990-05-24 20231129101158 233341452 Andrev Kim Martin 1990-05-24 20231130171169 1985-05-21 233341458 006011050 9090909090 20231130171131 233341460 006011051 20231130171148 of 41 (1 - 10 of 407 items) | < 1 2 3 4 5 41 > >| Page Close

Figure 2-5 Advanced Search - Individual

Click Fetch to search all the parties. All the parties in system appears in the table.

OR

Enter the specific search criteria in the respective field and click **Fetch**. The search result appears based on the search criteria.

5. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data. If the Customer Dedupe check is enabled, the application will perform the Dedupe check for the new customer details on clicking Next button. For more information, refer the Customer Dedupe Check section.

Customer Dedupe Check:

Based on the configuration set in the **Origination Preference** screen, the customer dedupe serivce is enabled.

If the **Customer Dedupe** service check is enabled, upon capturing the New Customer details, the system compares the same with the existing customers records. If there are any matching hits, the list of Duplicate records which matches to the New Customer Details will be displayed.

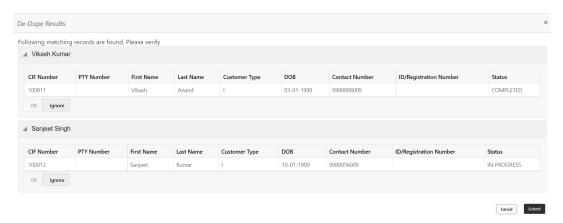

The customer details are compared based on a set of attributes configured. (Refer to Oracle Banking Party Documentation for Dedupe attributes configuration).

6. Click Next to perform the dedupe check and display the result.

The **De-Dupe Result** screen is displayed

Figure 2-6 De-dupe Results

For more information on fields, refer to the field description table below.

Table 2-3 De-Dupe Results – Field Description

Field	Description
CIF Number	Displays the CIF Number.
PTY Number	Displays the PTY Number.
First Name	Displays the First Name.
Last Name	Displays the Last Name.
Customer Type	Displays the Customer Type.
DOB	Displays the Date of Birth.
Contact Number	Displays the Contact Number.
ID/Registration Number	Displays the Registration number.
Status	Displays the Status of the De-Dupe check.

2.1.2 Account Details

This topic provides the systematic instructions to capture the account related information for the application.

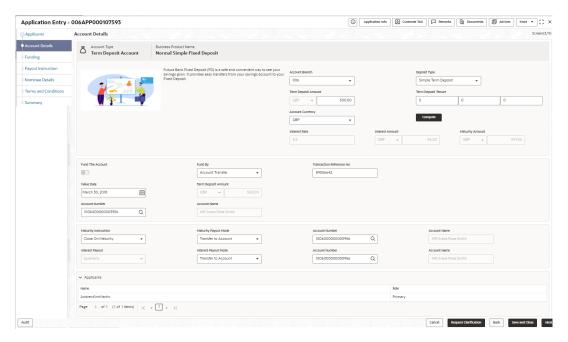

The **Account Details** data segment displays the account details.

 Click Next in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The Account Details screen displays.

Figure 2-7 Account Details

2. Specify the fields on Account Details screen.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-4 Account Details

Abbreviation	Description
Account Type	Displays the account type based on the product selected in the product catalogue.
Business Product Name	Displays the business product name based on the product selected in the product catalogue.
<product image=""></product>	Displays the business product image.
<product description=""></product>	Displays a short description of the business product.
Account Branch	By default, displays the logged-in user's home branch. System allows to select the branch from the branch list of values.
Deposit Type	Select the deposit type from the drop-down list. The available options are: Simple Term Deposit Reinvestment Term Deposit
Term Deposit Amount	Select the currency and the specify term amount. Select the currency from the drop-down list.

Table 2-4 (Cont.) Account Details

Abbreviation	Description
Term Deposit Tenure	Specify the term deposit tenure in year, months and days. Based on the Host Product mapped in the Business Product Configuration screen, the user is allowed to select to tenure configured in the respective host product.
	For example, If the mapped Host Product is Oracle Banking Accounts then the user can select the Term Deposit Tenure from the drop-down list.
Compute	Click Compute to compute the value based on the above entered details. Following fields are appears with the computed details:
	• Interest Rate
	Interest Amount Maturity Amount

User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.1.7 Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

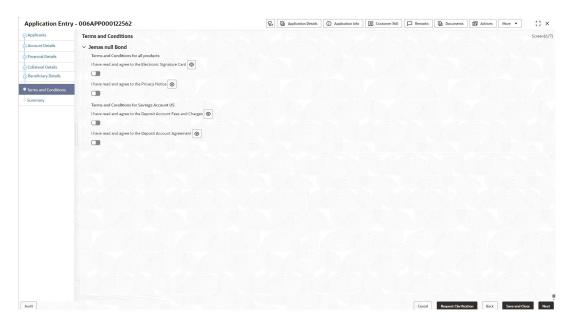

- **Term and Conditions for all products** In this section the term and conditions which are applicable for all the products appears in the questionnaire format.
- **Term and Conditions for <Selected Product>** In this section the term and conditions which are applicable for all the selected product appears in the questionnaire format.
- Consents and Preferences In this section the user capture the consents and preferences of customer as E-Sign, Marketing Communications, and Privacy Information.

To capture terms and conditions:

 Click Next from pervious data segment to proceed with the next data segment, after successfully capturing the data.

The Term and Conditions screen appears

Figure 2-14 Term and Conditions

- 2. Click to view the term and conditions.
- 3. Select the toggle button to accept the term and conditions.
- In the Consents to receive Marketing Promotional and Sales section, enter the channel and details.
- 5. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.1.8 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

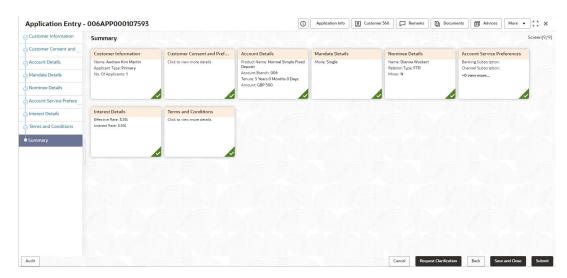

The **Summary** data segment displays the account service preferences details.

 Click Next from the data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-15 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-10 Summary - Field Description

Data Segment	Description
Account Details	Displays the account details.
Customer Information	Displays the customer information details.
Stake Holder Details	Displays the stake holder details. This data segment displays only if the Customer Type is selected as Small and Medium Business (SMB).
Nominee Details	Displays the nominee details.
Account Service Preference	Displays the account service preference details.
Mandate Details	Displays the mandate details.

- 2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified.
- 3. In the Override screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- In the Checklist screen the system displays the error message if document checklist is not verified. Click Proceed Next to proceed. The Outcome screen appears.
- 5. Select the checkbox to accept the checklist.
- 6. Click **Save & Proceed.**The **Outcome** screen is displayed.
- 7. In the Outcome screen, select appropriate option from the Select to Proceed field.
 - Select the Proceed to proceed with the application. By default this option is selected. It
 will logically complete the Application Entry stage for the saving application. The
 stage movement is driven by the business configuration for a given combination of
 Process Code, Life Cycle and Business Product Code.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 8. Enter the remarks in Remarks.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- 10. Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Term Deposit Account] to the other stages. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

Application De-Dupe:

Based on the configuration available at the Bank level / Properties Table, the Dedupe service call can be enabled or disabled for the product Origination.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

Note

- If an application is returned back to Application Entry stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting Application Entry stage. User has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.

2.2 Account Funding Stage

This topic provides the detailed information about the account funding stage data segments.

Users having functional access to the Account Funding Stage will be able to view the record in the Free Task process.

To add funding details:

- Scan the records that appears in the **Free Task** list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Funding stage is displayed.

The Account Funding stage has the following data segments in which the user can only view the data:

Account Details: - For detailed information, refer the Account Details data segment in the Application Entry stage.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Initial Funding Details

This topic provides the systematic instruction to view the details captured for the Initial Funding Details in the Account Funding stage.

Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account funding stage.

2.2.1 Initial Funding Details

This topic provides the systematic instruction to view the details captured for the Initial Funding Details in the Account Funding stage.

The Initial Funding Details data segment displays the Initial Funding details captured in the Application Entry stage. The Transaction Reference Number and the Transaction Status is either auto-populated or has to be manually captured based on the configuration. The Automatic option is supported only for the Initial Funding with Cash Mode. The Manual process is supported for Transfer by Account, Other Bank Cheque, and Cash Mode of initial funding.

(i) Note

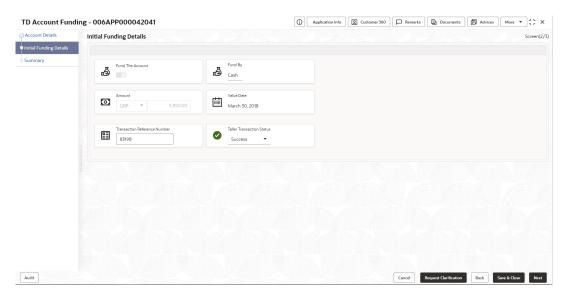

For more details on the Modes and the Manual/Automatic Process configuration, refer to the Configurations Guide.

Teller transaction reference number and its status for the initial funding transaction triggered off as part of the **Application Entry** stage.

On acquiring the Account Funding task, the Initial Funding Details stage is displayed.

Figure 2-16 Initial Funding Details

2. Specify the fields on Initial Funding Details screen.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-11 Initial Funding Details - Field Description

Field	Description
Fund the Account	Displays the Fund the Account selected in the Account Details data segment in Application Entry stage.
Fund By	Displays the Fund by option selected in the Account Details data segment in Application Entry stage.
Amount	Displays the amount of the initial funding updated in the Account Details data segment in Application Entry stage.
Value Date	Displays the value date of the initial funding updated in the Account Details data segment in Application Entry stage.
Account Number	Displays the account number. This field displays only if Account Transfer is selected as the funding by mode.
Account Name	Displays the account name. This field displays only if Account Transfer is selected as the funding by mode.
Cheque Number	Displays the cheque number. This field displays only if Account Transfer or Other Bank Cheque is selected as the funding by mode. For Account Transfer , the cheque number is displayed only if captured during the funding details capture in Account Details data segment.

Table 2-11 (Cont.) Initial Funding Details - Field Description

Description	
Displays the cheque date. This field displays only if Account Transfer or Other Bank Cheque is selected as the funding by mode. For Account Transfer , the cheque number is displayed only if captured during the funding details capture in Account Details data segment.	
Displays the bank name. This field displays for Other Bank Cheque funding mode.	
Displays the branch name. This field displays for Other Bank Cheque funding mode.	
Displays the GL account number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.	
Displays the GL account description for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.	
Specify the transaction reference number through which the transaction has been posted for initial funding in the Teller Application. For Automated processing of the Cash funding mode, system displays the transaction reference number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.

If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.2.2 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account funding stage.

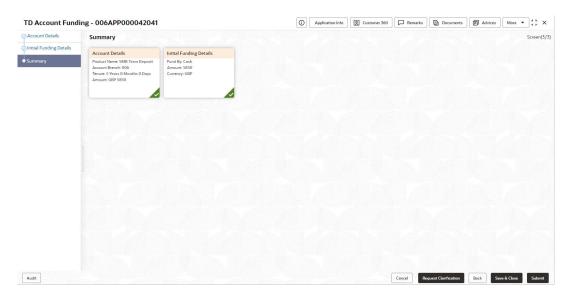

The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.

 Click Next from the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-17 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-12 Summary - Field Description

Data Segment	Description
Account Details	Displays the account details.
Initial Funding Details	Displays the initial funding details.

- Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified.
- 3. In the Override screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- 4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
- Select the checkbox to accept the checklist.
- Click Save & Proceed. The Outcome screen is displayed.
- 7. In the **Outcome** screen, select appropriate option from the Select to Proceed field.

- Select the Proceed to proceed with the application. By default this option is selected. It
 will logically complete the Account Funding Stage for the loan application. The
 Workflow Orchestrator will automatically move this application to the next processing
 stage, Underwriting. The stage movement is driven by the business configuration for
 a given combination of Process Code, Life Cycle and Business Product Code.
- Select the **Return to Application Entry** to return to application entry stage. The system generates the Application Entry task that appears in **Free Task** to acquire and edit.
- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 8. Enter the remarks in Remarks.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- 10. Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Term Deposit Account] to the other stages. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.3 Account Approval Stage

This topic provides the detailed information about the account approval stage data segments.

Users having functional access to the Account Approval stage will be able to view the record in the Free Task process.

The Account Approval stage comprises of the data segments of the previous stages. Since the data segment are in view only mode and have been completed in the previous stages, the Account Approval stages are launched with the Application Information segment.

To approve an account opening:

- 1. Scan the records that appears in the Free Task list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Approval stage is displayed.

The Account Approval stage has the following data segments in which the user can only view the data:

- **Customer Information** For detailed information, refer the Customer Information data segment in the Application Entry stage.
- Account Details For detailed information, refer the Account Details data segment in the Application Entry stage.
- Mandate Details For detailed information, refer the Mandate Details data segment in the Application Entry stage.
- **Nominee Details** For detailed information, refer the Nominee Details data segment in the Application Entry stage.
- Stake Holder Details For detailed information, refer the Stake Holder Details data segment in the Application Entry stage.

- Interest Details: For details information, refer the Interest Details data segment in the Application Entry stage.
- Terms and Conditions For detailed information, refer the Terms and Conditions data segment in the Application Entry stage.
- Initial Funding Details: For details information, refer the Initial Funding Details data segment in the Account Funding stage.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Account Approval Details

This topic provides the systematic instruction to view the details captured for the account approval details in the account approval stage.

Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account approval stage.

2.3.1 Account Approval Details

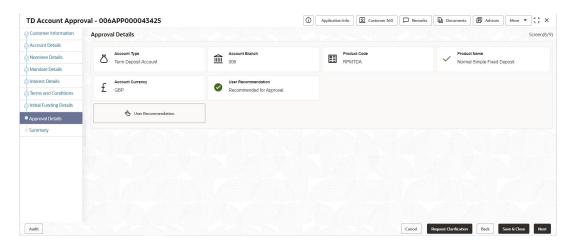

This topic provides the systematic instruction to view the details captured for the account approval details in the account approval stage.

The **Account Approval Details** data segment displays the application details.

 On acquiring the TD Account Approval stage, the Account Approval Details stage is displayed.

The Account Approval Details screen displays.

Figure 2-18 Approval Details

Specify the fields on Account Approval Details screen.

(i) Note
The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-13 Account Approval Details - Field Description

Field	Description
Account Type	Displays the account type.
Account Branch	Displays the account branch.
Product Code	Displays the product code.
Product Name	Displays the product name.
Account Currency	Displays the account currency.
User Recommendation	Select the user recommendation from the drop-down list. The available options are: Recommended for Approval Recommended for Reject

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.3.2 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account approval stage.

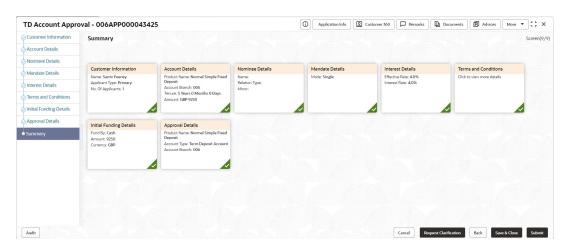

The Summary data segment displays the account service preferences details.

The tiles display the important details captured in the specified data segment. It further allows to click on the specific tile to view the data segment and the details captured. You can additionally click on the data segment from the train on the left hand side to view the details of the data segment.

 Click Next in Account Approval Details screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-19 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

(i) Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-14 Summary - Field Description

Data Segment	Description
Customer Information	Displays the customer information details.
Stake Holder Details	Displays the stake holder details.
	Note This field appears only if the Customer Type is selected as Small and Medium Business (SMB).
Account Service Preferences	Displays the account service preferences details.
Nominee Details	Displays the nominee details.
Mandate Details	Displays the mandate details.
Interest Details	Displays the interest details.
Account Approval Details	Displays the account approval details.
Initial Funding Details	Displays the initial funding details.

Supervisor can verify the KYC Verification status of the Customer from the Customer 360 in the Header. Only if the KYC Status is 'Success' will the application be allowed to proceed further. Click 'Submit' to submit the Account Approval stage and proceed to submit the Account Opening request to Host.

- Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified.
- In the **Override** screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

Click **Proceed**. The Checklist screen appears.

- In the Checklist screen the system displays the error message if document checklist is not verified. Click Proceed Next to proceed. The Outcome screen appears.
- Select the checkbox to accept the checklist.
- Click **Save & Proceed.** The **Outcome** screen is displayed.
- In the **Outcome** screen, select appropriate option from the Select to Proceed field.
 - Select the Proceed to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.

- Select the **Return to Initial Funding Details** to make account funding details stage available in free task.
- Select the Return to Application Entry Stage to make application entry stage available in free task for edit.
- Select the Reject by Bank to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 8. Enter the remarks in Remarks.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number. The welcome letter is generated.
- 10. Click Close to close the window.

OR

Click Go to Free Task.

After the Host creates the Term Deposit Account successfully, the response is sent back to the Oracle Banking Origination with the Term Deposit Account Number.

The details of all the applications which have logically completed all their stage movements, (Rejected / Account Created) will be made available in Completed tasks for query purpose only.

2.4 Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

This section appears are the top of the right pane and is applicable for all the account opening stage. You can add, edit, view or delete the information from the respective section.

Below are the list of global actions:

Icon

You view the application number along with its product name.

Customer 360

You can view the customer details such as Name, CIF number and indication whether it is an existing customer.

Application Information

You can view the application information in this section.

Remarks

You can view the remarks.

Documents

You can upload and view the documents that are uploaded.>

Advices

You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.

Condition and Convenants

You capture conditions and convenants details for the loan applications.

Solicitor Details

You can add the solicitor details using this section.

Clarification Details

You raise the clarifications using this section.

2.4.1 Icon

You view the application number along with its product name.

Click it to view the Application Number and the Business Product detail.

The **Icon** screen is displayed.

Figure 2-20 Icon

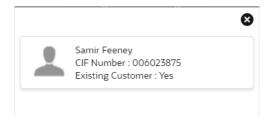

2.4.2 Customer 360

You can view the customer details such as Name, CIF number and indication whether it is an existing customer.

 Click it to select the Customer ID of existing customer, and then view the Mini Customer 360.

The **Customer 360** screen is displayed.

Figure 2-21 Customer 360

 The screen shows the list of Customer IDs in case of Joint Accounts. Select the specific Customer ID to view their Mini Customer 360. The CIF Numbers are populated in the Customer 360 screen only post the CIF number has been keyed in the Customer Information data segment.

2.4.3 Application Information

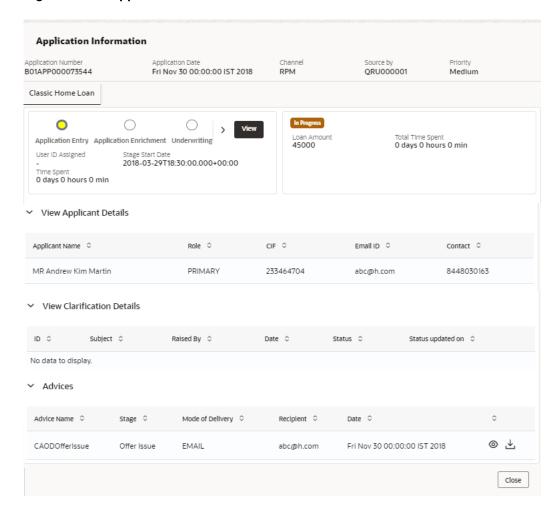

You can view the application information in this section.

1. Click **Application Info** to view the application information.

The **Application Information** screen is displayed.

Figure 2-22 Application Information

The **Application Information** screen displays separate cards for various products initiated as part of the application. For more information on fields, refer to the field description table below.

Table 2-15 Application Information – Field Description

Field	Description	
Application Number	Displays the application number.	
Application Date	Displays the application date.	
Source By	Displays the name of the user who has sourced the application.	
Channel	Displays the channel name.	
Priority	Displays the priority of the application.	
	High	
	Medium	
	• Low	
<product name=""></product>	Displays the product name.	
<account opening="" stages=""></account>	Displays the account opening stages in the train stop format along with the status of the respective stage.	

Table 2-15 (Cont.) Application Information – Field Description

Field	Description
User ID Assigned	Displays the User ID of the user currently working on the product process.
	NOTE: This is blank, in case the product process task is not acquired by any user.
Time spent	Displays the days spent in the current phase/stage.
Stage Start Date	Displays the start date of the current stage. It also display time in hours, mins and seconds.
View	Click the View button to view the data segment of the respective stage. The overview of the data segments appears in tile. Click on the tile to view futher details of that data segment.
<status application="" of="" the=""></status>	Display the status of the application.
Account Opening Date	Displays the date on which the account is opened. This field appears once the account opening process is completed.
Account Number	Displays the account number. This field appears once the account opening process is completed.
<relavant amount=""></relavant>	Displays the value based on the product. For example,
	For the loan account opening application, the label of this field appears as Loan Amount.
	 For the saving account optning application, the lable of this field appears as Initial Funding Amount.
View Applicant Details	In this section you can view the applicant details of all the applicants involved in the application. Below field appears with the respective applicant details: Applicant Name Role CIF Email ID Contact Number
View Clarification Details	In this section you can view the clarification history.
	Below fields appear with the details: ID Subject Raised By Date Status Status On the click of the respective record the user can view the clarifiation content.
Advices	In this section you view the advices generated in the process of account opening. Below fields appear with the details: Advice Name Stage Mode of Delivery Recipent Date You can View and Download on clicking the respective icons.

2. Click Close to close window.

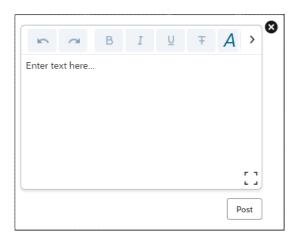

2.4.4 Remarks

You can view the remarks.

 Click Remarks to update any remarks that you want to post for the application that you are working on.

The Remarks screen is displayed.

Figure 2-23 Remarks

Remarks posted are updated with your User ID, Date, and are available to view in the next stages for the users working on that application.

2.4.5 Documents

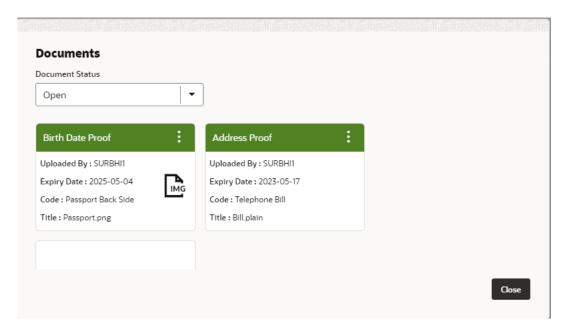

You can upload and view the documents that are uploaded.>

1. Click **Documents** to upload the documents linked for the stage.

The **Documents** screen is displayed.

Figure 2-24 Documents

- 2. Select the document status to filter the document based on the status. The available options are All, Open and Deleted.
- 3. Click

on the Document tile to view, download and delete the document.

4. Click View to view the document.

The View Document is displayed.

Figure 2-25 View Document

- 5. Click **Download** to download the document.
- Click **Delete** to delete the document.

Deleted Documents is displayed as Icon, but the user cannot view the document.

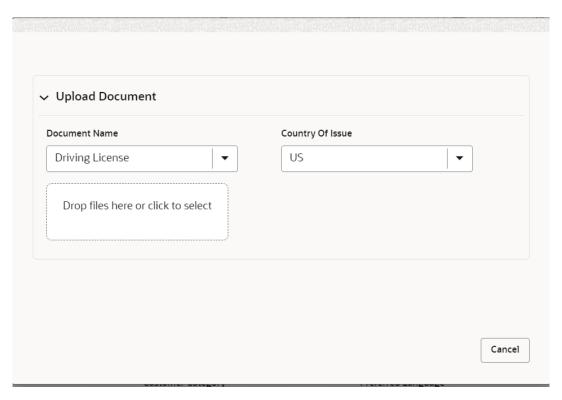

7. Click

to upload the new document to the application.

The **Upload Document** screen is displayed.

Figure 2-26 Upload Document

8. Specify the details in the relevant data fields. For more information on fields, refer to the **Upload Document – Field Description**.

Table 2-16 Upload Document – Field Description

Field	Description
Document Type	Select the document type.
Document Code	Select the document code.
Document Title	Specify the document title.
Document Description	Specify the description for the document.
Remarks	Specify the remarks for the document.
Document Expiry Date	Select the document expiry date.

Table 2-16 (Cont.) Upload Document – Field Description

Field	Description
Drop files here or Click to select	Drag and drop the document or Select the document from the machine.
Upload	Click Upload to upload the document.

(i) Note

Ensure that mandatory documents are uploaded, as the system will validate the same during the stage submission.

Mandatory documents can only be deleted in the same stage where it is uploaded. Non-mandatory documents can be deleted in any stage.

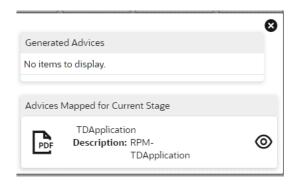

2.4.6 Advices

You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.

Click Advices to view the advice linked for the stage.

The Advices screen is displayed.

Figure 2-27 Advices

The system will generate the advice on submission of the stage. For Application Entry stage of Product, no advice is configured.

2.4.7 Condition and Convenants

You capture conditions and convenants details for the loan applications.

In this section you can add, edit and remove the condition and convenant details .

Conditions

The Conditions are stipulations and constraints recorded in a contract to restrict the usage of funds, in order to ensure proper utilization of funds for the specified purposes and to adhere to a stipulated schedule.

To add conditions:

 From the More option, click the Conditions & Covenants to add or remove the conditions details.

The Conditions & Covenants page appears.

Figure 2-28 Conditions

2. Click Add to add new conditions.

OR

Click **Remove** to remove already added conditions.

3. Enter the relevant details.

Table 2-17 Conditions – Field Description

Field	Description
Entity	Select the entity on which you want to set condition.
	The available options are
	• Party
	Collateral
Entity ID	Select the entity ID from the list. The options in the list appears based on the entity selected in the Entity field.
Condition	Specify the conditions for the selected entity.
Туре	Select the type when the conditions must be complied.
	The available options are
	Pre Disbursement: If you select this option then the selected conditions have to be complied prior with the account opening and loan disbursement.
	Post Disbursement: If you select this option then the selected conditions occur and are supposed to be complied post loan disbursement. This conditions are manually monitored.
Status	Select the status of the condition.
	The available options are
	Open
	Complied

4. Click **OK**. The conditions are saved.

All the fields appears with the selected options in tabular format. You can edit the details on clicking the added row.

Convenants

Often there are restrictions on borrowers while extending credit facilities. Sometimes, a borrower promises certain future acts to assure the lender that the conduct of business dealings is fair, healthy and in accordance with the best practices. The purpose of covenant is to assist the lender to ensure the health of loan facilities does not deteriorate suddenly or unexpectedly before maturity.

To add convenants:

From the More option, click Conditions & Covenants to add or remove the covenants details.

The Conditions & Covenants page appears.

Figure 2-29 Convenant

Click Add to add new convenants.

OR

Click **Remove** to remove already added convenants.

Enter the relevant details.

Table 2-18 Application Information – Field Description

Field	Description
Entity	Select the entity on which you want to set convenants.
	The available options are
	• Party
	Collateral
Entity ID	Select the entity ID from the list. The options in the list appears based on the entity selected in the Entity field.
Convenants	Specify the convenants for the selected entity.
Туре	Select the type when the convenants must be complied.
	The available options are
	Financial
	Reporting
	Undertaking
Status	Select the status of the convenants.
	The available options are
	Open
	Complied

8. Click **OK**. The covenants are saved.

(i) Note

All the fields appears with the selected options in tabular format. You can edit the details on clicking the added row.

2.4.8 Solicitor Details

You can add the solicitor details using this section.

A solicitor is a legal practitioner who traditionally deals with most of the legal matters in some jurisdictions. A person must have legally-defined qualifications, which vary from one jurisdiction to another, to be described as a solicitor and enabled to practice there as such.

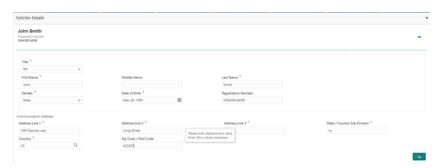

In this section you can add or remove the solicitor. You can also view the already added solicitor.

To add solicitor details:

From the More option, click the Solicitor to add or remove or edit the already added solicitor.

he **Solicitor Details** page appears.

Figure 2-30 Solicitor

Enter the relevant details.

Table 2-19 Solicitor – Field Description

Field	Description
Title	Select the title of the solicitor.
First Name	Specify the first name of the solicitor.
Middle Name	Specify the middle name of the solicitor.
Last Name	Specify the last name of the solicitor.
Gender	Select the gender of the solicitor from the list.
Date of Birth	Select or enter the birth date of the solicitor.
Registration Number	Specify the registration number of the solicitor.
Communication Address	Capture the communication address of the solicitor.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.

Table 2-19 (Cont.) Solicitor - Field Description

Field	Description
State / Country Sub Division	Specify the state or country sub division.
Country	Select and search the country code.
Zip Code / Post Code	Specify the zip or post code of the address.

3. Click **OK** to save the added solicitor.

2.4.9 Clarification Details

You raise the clarifications using this section.

To add the clarification details:

- 1. Click **Clarification Details** to raise a new customer clarification request or view the existing request.
- 2. Click **New Clarification** to request new clarification.

The **New Clarification** screen is displayed.

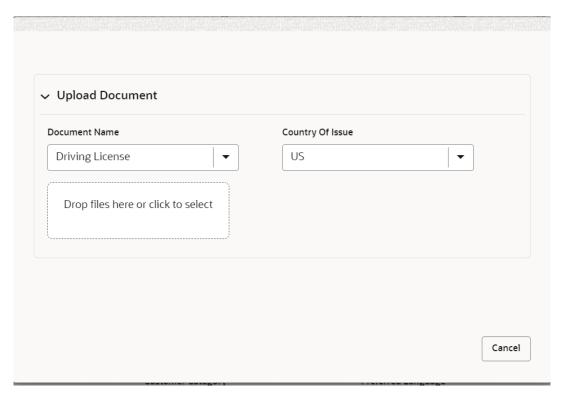

Figure 2-31 New Clarification

3. Enter the subject and the clarification detail in the New Clarification Pop-up screen. The system also allows you to upload the document for the Clarification being raised.

Figure 2-32 Upload Documents

4. Once the details are updated, click Save. Clarification Request once raised moves the application to 'Awaiting Customer Clarification' state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the Awaiting Customer Clarification sub-menu available under Task menu.

Select the Application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu. Click on the **Clarification Details** from the header.

5. Select the specific clarification to take action on it.

Allowed actions are as following:

- Adding New Conversation
- Withdraw Clarification
- Accept Clarification

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

Instant Term Deposit Account Origination **Process**

This topic provides the information about instant term deposit account origination process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Term Deposit Account is automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

(i) Note

Refer to the **Retail Onboarding User Guide** for more details.

Based on whether the Application is initiated by self-service channel or by a Branch personnel, the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

Prerequisite

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is taken as Account Transfer for which the mode configured has to be **H** which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications).

(i) Note

For more details, refer to the Initial Funding Configuration section in the Configurations User Guide.

In the Instant Term Deposit Account Origination Reference Business Process, the stages that are configured are mentioned below.

Application Entry Stage: On successful submission of the Term Deposit Account Application from self-service channel, the system starts the **Application Entry** stage without any manual intervention and completes the data segment level validation. On successful completion of the validation, the system automatically submits the **Application** Entry stage.

Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for **Application Entry** stage are updated in the **Application**

Initiate stage itself by clicking the **Application** button in the **Product Details** data segment.

- Account Funding Stage: On successful submission of the Application Entry stage, the system checks if Initial Funding mode updated for the Account Opening.
 - The Initial Funding mode allowed for self-service, initiated applications are External Bank Account Transfer and Account Transfer.
 - If Initial Funding is taken for the Account via the External Bank Account Transfer in the self-service channel, the system starts the Application Funding stage and validates the Initial Funding Details data segment and submits the Application Funding stage automatically.
 - For Application where the Initial Funding is updated as Account Transfer, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
 - For the Branch Initiated Applications wherein the Initial Funding is taken in Cash or Other Bank Cheque, this stage has to be manually done by the Branch user having access permission for this stage.
- Account Approval Stage: The system skips this stage for self-service initiated application and submits the application directly to the Product Processor for Account Creation. However, for Branch Initiated Application, considering the 4-eye principle, the system expects the application to be approved by a Supervisor. Hence this stage will has to be picked and done by the Supervisor user. Supervisor user can either approve or reject the Application. On submission of this stage by selecting Approve outcome, the system submits the Application to the Product Processor for Account Creation.
- Handoff Retry: Application moves to this stage and displays in the Free Task only if the
 Term Deposit Account creation is rejected by Product Processer. The user having the
 required access rights can pick such task and can retry submission to Host after taking
 required actions on the Failure reason.

Error Codes and Messages

This topic contains error codes and messages.
