Purpose

This guide provides an overview to configure the Business Process and related workflows for origination such as Savings Account, Current Account, Term Deposit and Loans comprising of Home loans, Vehicle Loans, Personal Loans, and Education Loan; Business Product Configuration and Dashboard related configurations.

Audience

This user manual is intended for the Relationship Managers (RMs) and Sales Officers in-charge of sourcing the Savings Account Products from prospect and customer of the bank. The user manual is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Savings Account Origination process based on the bank's internal operation and policies.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also

mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table Acronyms table

Abbreviation	Description
DS	Data Segment
System	Oracle Banking Origination Module
OBA	Oracle Banking Accounts
OBO	Oracle Banking Origination

Basic Actions

Table Basic Actions

Actions	Functions
Save	Click to save the details entered or selected in the screen.
Unlock	Click to update the details of an existing record. System displays an existing record in editable mode. This button is displayed only for the records that are already created.
Authorize	Click to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record. This button is displayed only for the already created records. For more information on the process, see Authorization Process.
Approve	Click to approve the initiated record. This button is displayed, once you click Authorize .
Audit	Click to view the maker details, checker details of the particular record. This button is displayed only for the records that are already created.
Close	Click to close a record. This action is available only when a record is created.
Confirm	Click to confirm the action you performed.

Table (Cont.) Basic Actions

Actions	Functions
Cancel	Click to cancel the action you performed.
Compare	Click to view the comparison through the field values of old record and the current record. This button is displayed in the widget, once you click Authorize .
View	Click to view the details in a particular modification stage. This button is displayed in the widget, once you click Authorize .
View Difference only	Click to view a comparison through the field element values of old record and the current record, which has undergone changes. This button is displayed, once you click Compare .
Expand All	Click to expand and view all the details in the sections. This button is displayed, once you click Compare .
Collapse All	Click to hide the details in the sections. This button is displayed, once you click Compare .
OK	Click to confirm the details in the screen.
New	Click to add a new record. When you click New, system displays a new record enabling you to specify the required data. It is mandatory to specify details for the fields marked with '*' symbol. This button is displayed only for the records that are already created.

1

Configurations

This topic describes information about the configurations of Oracle Banking Origination.

The Oracle Banking Origination includes comprehensive coverage of origination processes for Savings Account, Current Account, Term Deposit, and Loans comprising of Home Loan, Personal Loan, Education Loan, and Vehicle Loans. This document provides an overview of the configuration required for the various Oracle Banking Origination processes.

The Oracle Banking Origination is factory shipped with referenced workflows for the mentioned product origination. It can configure the workflows based on the bank's internal policy and requirements. A configuration such as Business Product, Business Process, Qualitative Scorecard, Quantitative Scorecard allows the bank to define their workflows and provides access to various dashboard widgets based on the user roles. A summary of the configurations described below:

The origination processes in Oracle Banking Origination are driven based on the below configurations:

- **Business Product**
- **Business Process**

For assessment of the Loan Applications and the Unsecured Overdraft Limit creation in Current Accounts, the below mentioned two configurations are required:

- **Credit Decision Configuration**
- **Facts and Rules**
- **Qualitative Scorecard**

The Qualitative Scorecard ID is linked to the Business Products to aid in the assessment purpose of the specific Business Product Origination.

This module also supports comprehensive dashboard widgets for bank persons such as Relationship Manager, Branch Manager, Loan Officer, and Credit Head. The configuration for the same is supported by providing access to the Function ID of the dashboard widgets.

- [Business Product Configuration](#)
This topic provides the information about the business product configuration.
- [Business Process Configuration](#)
This topic provides the information about the business process configuration.
- [Rule Configuration](#)
This topic provides the information for the user to rule the configuration.
- [Credit Decision Configuration](#)
This topic provides the information about the credit decision configuration.
- [Origination Preferences](#)
This topic describes the preferences which are set at origination level.
- [Advice Maintenance](#)
This topic describes the information about advice maintenance.

- [Reason Codes](#)
This topic describes the overview of the reason codes.
- [Dashboard Configuration](#)
This topic describes the systematic instructions for dashboard configuration.

This topic provides the information about the initial funding configuration.
- [Application Submission Configuration](#)
This topic provides the information about the application submission configuration.
- [Machine Learning Configuration for Predicting Account Opening Date](#)
This topic provides the information about the machine learning configuration for predicting account opening date.
- [Batch Process Configuration](#)
This topic provides the information about batch process configuration.
- [FOP for Advices](#)
This topic describes about FOP for advices.
- [Service Level Agreement \(SLA\) Maintenance](#)
This topic provides the information about the service level agreement maintenance.
- [Customer Dedupe Check](#)
This topic provides the information about customer dedupe check.
- [Application Dedupe Check](#)
This topic provides the information about application dedupe check.
- [Task Allocation](#)
This topic provides the information about the Task Allocation.

1.1 Business Product Configuration

This topic provides the information about the business product configuration.

The **Business Product Configuration** allows to configure the various products for **Retail Bank** offers. The details captured in the Business Products configuration displays the Product Suite that the bank is offering in the Product Catalogue and Product Details view. The parameters configured are also relevant for the Origination Processes of the respective product origination.

The **Business Product Configuration** created in Oracle Banking Origination is linked with the **Host** product. It is important to note that there is only one Golden Source for Product creation or configuration, which is the **HOST**. The Business Product created in Oracle Banking Origination allows configuring parameters that are customer facing and how the products are sold in Banks. Unlike, the Host Product definition that looks at Product Configuration from processing and transaction aspects. This helps in the product comparison and gauges benefits of what the customer wants to derive from the product. In addition to this, the Business Product configuration in Oracle Banking Origination, allows the flexibility to inherit other pertinent product features, which allows building a stronger and firm origination process flow with the added validations that are done during the defined stages in the origination workflow. Example: Allow Offer Amendment, Offer Acceptance Method, and Assessment Methods etc., are defined in the Business product and further are validated in the origination process of the specific Business Product.

The **Business Product** is linked to the **Business Process**, so that the origination process related to the selected **Business Product** flows as per the **Business Process Definition**. This allows the capability to configure two different **Business Products** within the same

Product Type to have different origination workflows. **Example:** Current Account with or without Overdraft Limit Facility.

The Business Product process allows to create **Business Product** and view the existing **Business Products**. The details of that are explained in the further sections.

This topic contains the following subtopics:

- [Create Business Product](#)
This topic describes the systematic instructions to create business product.
- [View Business Product](#)
This topic describes the systematic instructions to View Business Product.

1.1.1 Create Business Product

This topic describes the systematic instructions to create business product.

The Create Business Product configuration process comprises of the below-mentioned data segments that allow defining the various elements for the products:

- [Business Product Details](#)
This topic describes the systematic instructions to create business product details.
- [Business Product Attributes](#)
This topic describes the systematic instructions to display the business product attributes.
- [Business Product Host Mapping](#)
This topic describes the systematic instructions to map the host product and parameters for Interest and Charges that are linked to the host product.
- [Business Product Preferences](#)
This topic describes the systematic instructions business product preferences.

1.1.1.1 Business Product Details

This topic describes the systematic instructions to create business product details.

The **Business Product Details** is the first data segment to create a Business Product application.

Specify **User ID** and **Password**, and login to **Home** screen.

To configure business product details:

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configurations**.
2. Under **Configurations**, click **Business Product**.
3. Under **Business Product**, click **Create Business Product**.

The **Business Product Details** screen displays.

Figure 1-1 Business Product Details

4. On **Business Product Details** screen, specify the required fields.

Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 1-1 Business Product Details – Field Description

Field	Description
Product Type	Select the product from the drop-down list. The available options are: • Savings Account • Current Account • Loan Account • Term Deposit Account
Product Category	Select the product category. The available options are • Individual • Small and Medium Business

Table 1-1 (Cont.) Business Product Details – Field Description

Field	Description
Product Sub Type	Select the product sub-type from the drop-down list. This field appears and is supported for the below listed Product types and the respective product categories only. a. Loan Account • Home Loan (Individuals) • Vehicle Loan (Individuals) • Education Loan (Individuals) • Personal Loan (Individuals) • Business Loan (Small and Medium Business) • Term Loan (Small and Medium Business) b. Term Deposit • Simple Term Deposit • Reinvestment Term Deposit This field is not applicable for Saving Account and Current Account.
Business Product Code	Specify the business product code. NOTE: Maximum length of business product code should not be more than 6 characters. Alphanumeric and alphabets should be in capital.
Business Product Name	Specify the business product name.
Business Product Date Range	Select the date range as per the business requirement. System displays the logged in application date in Start Date by default. The End date has to be ahead of the Start Date and the Business Product Review Date.
Business Product Review Date	Select the review date as per the business requirement. Review date has to be ahead of the Business Product Start Date and earlier than the Business Product End Date.
First Home Buyer Applicable	Select to indicate whether first home buyer feature is applicable for the specified product. This field appears if the Loan Account option and Home Loan option is selected from the Product Type list and Product Sub Type list respectively.
Channel Allowed	Select the channels which are allowed for the business product from the drop-down list. The available options are: • RPM • OBDX
Fintech Allowed	Select the toggle if the business product is supported for Origination from 'Fintech' Companies.
Fintech Name	Select the Fintech Company name from the drop-down list. System allows selection of multiple companies. This field is displayed only if Fintech Allowed toggle is selected.
IPA Applicable	Select the toggle to indicate whether the In-Principal Approval (IPA) is applicable for loan. By default, this will be disabled. This field is displayed if Product Type is selected as Loan and Product Category is selected as Individuals.

Table 1-1 (Cont.) Business Product Details – Field Description

Field	Description
Application Submission is Mandatory	Select the toggle to make the Application Entry stage as mandatory in Product Details data segment for the business product. This configuration will be possible only if the Application submission configuration is set as 'Y'. Please refer section 2.8 Application Submission Configuration for more details.
Refinance Allowed	Select the toggle to indicate whether the Refinance facility is applicable for loan. By default, this will be disabled.

1.1.1.2 Business Product Attributes

This topic describes the systematic instructions to display the business product attributes.

In the data segment, the details such as business product summary, business product image, feature, eligibility are captured and ultimately used for displaying in the product catalog process and the product details.

1. Click **Next** in the **Business Product Details** screen to proceed the next data segment, after successfully capturing the data.

The **Business Product Attributes** screen displays.

2. Specify the fields on **Business Product Attributes** screen.

Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 1-2 Business Product Attributes – Field Description

Field	Description
Business Product Image	Select the image that user want to display for the business product in the Product Catalogue. Click Upload to upload it.
Business Product Summary	Specify the content for the business product summary.
Feature	Specify the feature details.
Feature Name	Specify the feature name.
Feature Description	Specify the feature description of the business product.
Display On Catalogue	Select this checkbox, if the same information should be displayed in the Product Catalogue.
Add Feature/Remove Feature	Click Add Feature or Remove Feature to add or remove the rows respectively.
Eligibility	Specify the eligibility details.
Eligibility Name	Specify the eligibility name.
Eligibility Description	Specify the eligibility description of the business product.
Display On Catalogue	Select this checkbox, if the same information should be displayed in the product catalogue.
Add Eligibility/Remove Eligibility	Click Add Eligibility or Remove Eligibility to add or remove the rows respectively.
Fees and Charges	Specify the fees and charges details.
Fees and Charges Name	Specify the fees and charges name.
Fees and Charges Description	Specify the fees and charges description of the business product.
Display On Catalogue	Select this checkbox, if the same information should be displayed in the product catalogue.
Add Fees and Charges/Remove Fees and Charges	Click Add Fees and Charges or Remove Fees and Charges to add or remove the rows respectively.
Terms and Conditions	Select the Terms and Condition PDF file and click Upload to upload it.
Product Brochures	Select the Business Product Brochure PDF file and click Upload to upload it.
Comments	Specify the comments, if required.

1.1.1.3 Business Product Host Mapping

This topic describes the systematic instructions to map the host product and parameters for Interest and Charges that are linked to the host product.

In the data segment, the business product is mapped to the host product and parameters for Interest and Charges that are linked to the host product are defined.

To map business product host:

1. Click **Next** in **Business Product Attributes** screen to proceed with next data segment, after successfully capturing the data.

The **Business Product Host Mapping** screen displays.

Figure 1-3 Business Product Host Mapping

2. Specify the fields on **Business Product Host Mapping – Field Description** screen.

Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 1-3 Business Product Host Mapping – Field Description

Field	Description
Business Product Code	Displays the business product code defaulted from Business Product Code entered in the Business Product Details data segment.
Select Host Product	Select the host product from the drop-down list. You can configure the host product based on the mapping. Note: Without Oracle Banking Routing Hub Configuration, Host products will not be displayed. Refer to Oracle FLEXCUBE Universal Banking Integration Guide .
Product Description	Displays the product description once the host product is selected in Select Host Product .
Get Products Details	Click Get Products Details , and the system will display various interest codes and the charge codes linked to the host product in the Interest Details and Charge Details panel.

3. Click **Get Product Details**.

The **Business Product Host Mapping – Interest Details and Charge Details** screen displays.

Figure 1-4 Business Product Host Mapping – Interest Details and Charge Details

4. Specify the fields on **Business Product Host Mapping with Interest Details and Charge Details** screen.

Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 1-4 Business Product Host Mapping with Interest Details and Charge Details – Field Description

Field	Description
Interest Configuration	Specify the required interest details.
Interest Code	Displays the interest code linked to the host product.
Description	Displays the description of the interest code linked to the host product.
User Defined Element ID	Displays the user defined element ID linked to the Interest Code .
Description	Displays the description of the user defined element ID linked to the Interest Code .

Table 1-4 (Cont.) Business Product Host Mapping with Interest Details and Charge Details – Field Description

Field	Description
Display Name	Specify the display name of the interest user defined element. This is the interest name that would be displayed in the Oracle Banking Origination screens such as Interest details data segment for Current and Savings account origination process and Loan Interest Details data segment for loan origination process.
Display	Select to display the specified interest user defined element in the Interest Details data segment.
Margin Allowed	Select if margin can be provided to the Business Product in the Interest Details data segment of product origination process. Note Currently, margin is not supported for Savings and Current Account, hence this switch should be off for Savings Account and Current Account.
Charge Configuration	Specify the required charge details.
Charge Code	Displays the charge code linked to the Host Product.
Description	Displays the description of the charge code linked to the Host Product.
User Defined Element ID	Displays the user defined element ID linked to the charge code.
Description	Displays the description of the user defined element ID linked to the charge code.
Display Name	Enter the display name of the interest user defined element This is the interest name that would be displayed in the Oracle Banking Origination screens such as Interest Data Segment.
Display	Select to display the specified charge code or charge user defined element in the Charge Details data segment.
Waiver Allowed	Select if specified charges can be waived during Product Origination.
Amend Allowed	Select if specified charges can be amended during Product Origination.
Capitalize Allowed	Select if the charges can be capitalized for this product. This option allows you to capitalize the fee charges while submitting an application. This is applicable for all the charges of the product. Currently applicable only for loan products.

The number of panels for interest details and charges details will depend on the number of interest codes and charge codes linked to the Host Product.

1.1.1.4 Business Product Preferences

This topic describes the systematic instructions business product preferences.

The Business Product Preference data segment allows to define preferences based on selected product and Product category.

- [Loan Product Preferences](#)
This topic describes the loan product preferences details.

- [Saving or Current Product Preferences](#)
This topic describes the saving product preferences details.
- [Term Deposit Product Preferences](#)
This topic describes the term deposit product preferences details.

1.1.1.4.1 Loan Product Preferences

This topic describes the loan product preferences details.

The Loan Product Preference screen appears when the user selects the **Product Category** as **Individual** to configure loan preferences.

To add loan preference:

1. Click **Next** in previous data segment to proceed with next data segment, after successfully capturing the data.
2. Specify the details in the relevant data fields. The fields which are marked with Required are mandatory. For more information on fields, refer to the field description table.

Figure 1-5 Business Product Preference – Loan Product

Table 1-5 Business Product Preference – Loan Product- Individual

Field Name	Description
Common Configuration Specify the common configurations for the business product.	

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Residential Status Allowed	Select the option for which the business product is applicable for. The available options are: • Resident • Non-Resident • Both
Customer Status Allowed	Select the option for which the business product is applicable for. The available options are: • Major • Minor • Both • Not Applicable
Currency Allowed	Select the currency that are allowed for the business product. System allows to select multiple currencies, if applicable. The list of currencies appears based on the host configuration.
Minimum Age	Specify the minimum age of the applicant who are eligible to open the account for the business product being created. Select the period from the drop-down box. The available options are: • Days • Month • Year
Maximum Age	Specify the maximum age of the applicant who are eligible to open the account for the business product being created. Select the period from the drop-down box. The available options are: • Days • Month • Year
Inactive Application Expiry Period	Specify the period after which the application must be marked as Expired. Select the period from the drop-down box. The available options are: • Days • Month • Year Once the application has expired, no further lifecycle activity can happen for that application.
Branch	Select one of the following options: • Allowed – Select it to indicate and specify the branches where the account under the specified Business Product are allowed to be opened. • Disallowed – Select it to indicate and specify the branches where the account under the specified Business Product are not allowed to be opened. System allows to select Disallowed and keep it blank so that the Business Product is allowed for all the branches.

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Financial Details Validity Period	Specify the validity period for financial details of the applicant. Select the period from the first drop-down box. The available options are: • Days • Month • Year Select the numeric period from the second drop-down box.
Allow Purpose Types	Select the purpose types that are allowed for business product. The system allows user to select multiple purpose types. The available options are: • Buy a New Home • Construction • Remortgage with US • Home Improvement / Renovation • Motor Vehicle – New • Motor Vehicle – Used • Personal • Education • Other This field appears if the Loan Account option and Home Loan option is selected from the Product Type list and Product Sub Type list respectively. If you configure purpose types for loan product then purpose type list appears while updating Product Details throughout the account opening process.
Lender Mortgage Insurance	Search and select the lender mortgage insurance rule that are defined. This field appears if the Loan Account option and Home Loan option is selected from the Product Type list and Product Sub Type list respectively.
Allowed Applicant Roles	Specify the applicant roles that are allowed to apply this product. The available roles are as below: • Primary • Joint • Guarantor • Custodian • Guardian • Cosigner The option in this list appears for selection based on the configuration. This selected roles gets reflected in the Applicants data segment while capturing an applicant information in an application.
Solicitor Details	Specify whether the solicitor details are allowed to capture while submitting this products account opening application.
Condition &Covenants	Specify whether the conditions and covenants are allowed to capture while submitting this products account opening application.

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Customer Category	Select one of the following options: • Allowed – Select it to indicate and specify the customer category where the account under the specified Business Product are allowed to be opened. • Disallowed – Select it to indicate and specify the customer category where the account under the specified Business Product are not allowed to be opened. The system allows to select Disallowed and keep it blank so that the Business Product is allowed for all the branches.
Early KYC	Specify whether user wants to enable the early KYC feature to speedup KYC process of an applicant. If this option is selected then the KYC call is trigger to Oracle Banking Party Services once the applicant data is captured in the application.
Simplified Application	Specify whether user wants to set simple process of account opening for this product. In this process, the Initiation and the Application Entry stages are combined for submitting the account opening application.
Supported Term Units	Select the term units. The available options are: • Years • Months • Days The option selected as term unit appears to set the tenure in the Loan Details data segment.
Configurations for Loan Products In thi section specify the configurations for the loan products.	
Threshold Preference In this section you can capture the threshold preference of loan product.	
Loan Currencies	Displays the currency based on the Currency Allowed configured in the Common Configuration tab above.
Minimum Term Tenure Basis	Select the minimum term tenure. The available options are: • Days • Month • Year
Minimum Term	Specify the minimum tenure of the loan for the selected currency.
Maximum Term Tenure Basis	Select the maximum term tenure. The available options are: • Days • Month • Year
Maximum Term	Displays the maximum tenure of the loan for the selected currency.
Minimum Amount	Displays the minimum amount of the loan for the selected currency.
Maximum Amount	Displays the maximum amount of the Loan for the selected Currency.
Offer Preferences In this section you can set the offer related preference for loan product.	
Offer Amendment	Select to indicate whether the offer is allowed to amend.

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Offer Expiry Period	Select the expiry period of an offer in days, months and years. Enter the count. OR Select the up and down arrow to increase or decrease the count.
Offer Acceptance Method	Select the method to accept the offer. The available options are: • Manual • Auto
Feature Preference In this section you can capture the features preference for loan product.	
Multiple Disbursement	Select the toggle if multiple disbursement is allowed for the loan accounts.
Interest Tolerance %	Specify the maximum interest margin, the user can provide for the loan account. You can specify the maximum value as 100.00%. Tolerance Percentage = Interest Rate Interest Tolerance Percentage.
Allowed Stage Sequence	Select the rule to set the stage sequence which is allowed for repayment schedule.
Interest Rate Treatment	Select the interest rate treatment from the drop-down list. The available options are: • At Offer Issue Stage • At the Time of Loan Account Creation • Pegged Period If Pegged Period is selected, you need to additionally select the period from Month or Year and enter the numeric value for the Pegged Period definition.
Armed Forces Benefits Applicable	Select to indicate the armed forces benefits are applicable to the loan product.
Customer Contribution	Select to indicate the customer contribution feature is applicable. This field appears only if the Personal Loan option is selected from the Product Sub Type list. This flag has below mentioned impact: • If the user sets the customer contribution as applicable, they can input the value in both the Applied Loan Amount and Customer Contribution fields. The Product Details and Loan Details data segment auto-calculate and display the Requested Loan Amount based on the inputs. • If the customer contribution is set as not applicable then the Applied Loan Amount and Customer Contribution fields are not applicable and will not appear in the Product Details or Loan Details data segment for loan origination. The user can input the Requested Loan Amount value.
LTV%	Specify the percentage for Loan to Value (LTV). LTV = Loan Amount / Collateral Value This field is displayed, if Product Sub Type is selected as Home Loan in Business Product Details segment.

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Eligibility Calculation Method	Select the required option for the eligibility calculation method from the drop-down list. The available options are: • Net Income Method Eligibility Amount = (Net Savings / EMI per Lakh) 100000 • FOIR Method Eligibility Amount = (Gross Income FOIR% - Financial Liability) / EMI per Lakh 100000 Note: Banks will compare the eligible amount as per FOIR and LTV, and the lowest eligible amount will be considered. This field is displayed, if IPA Applicable is selected in Business Product Details segment.
FOIR%	Specify the FOIR percentage. This field is displayed if Eligibility Calculation Method is selected as FOIR Method.
IPA Expiry Period	Select the IPA expiry period. The available options are: • Days • Months • Years This field is displayed if IPA Applicable is selected in Business Product Details segment.
Stage	Select the repayment type allowed for the loan product based on the host product mapped with the business product. The available options are: • EMI • IOPM • POIM • FPI • BULLET • Interest Only Installments • Moratorium
Max Term (<Term Unit>)	Specify the maximum term which is applicable for the loan product. The columns for setting maximum term appears for the respective term units based on the term units select in the Supported Term Units field.
Default Term <Term Unit>	Specify the default term which is applicable for the loan product. The columns for setting maximum term appears for the respective term units based on the term units select in the Supported Term Units field.
Repayment Frequency	Select the repayment frequency for the repayment stage. The available options are: • Monthly • Quarterly • Half Yearly • Yearly • Not Applicable

Table 1-5 (Cont.) Business Product Preference – Loan Product- Individual

Field Name	Description
Default Frequency	Select the default frequency for the repayment stage. The available options are: • Monthly • Quarterly • Half Yearly • Yearly • Not Applicable
Action	Select the actions to perform on the added record. •  : To save the added record. •  : To edit the added record. •  : To delete the added record.
Credit Decision Service Flags In this section capture the Credit Decision Service Flags.	
Risk Based Pricing Applicable	Select the toggle if Risk based pricing is allowed for the loan accounts.
Application Based	Select the toggle if the scorecard calculation should be considered based on the application.
Primary Applicant Based	Select the toggle if the scorecard calculation should be considered based on the Primary applicant.

If the **Product Category** is selected as **Small and Medium Business**:

1.1.2 View Business Product

This topic describes the systematic instructions to View Business Product.

Oracle Banking Origination supports to view the business product created. The View Business Product allows the user to view all of the authorized, un-authorized and closed business product. Authorize option is available for supervisor users for approving unauthorized business product.

Specify **User ID** and **Password**, and login to **Home** screen.

1. From **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Business Product**.
3. Under **Business Product**, click **View Business Product**.

The **View Business Product** screen displays.

Figure 1-11 View Business Product

4. Click

icon on the top right-hand side of the business product tile to perform actions on the add record.

For more information on fields, refer to the field description table below.

Table 1-11 View Business Product – Option Description

Field	Description
Unlock	Click Unlock to edit the business product information in Create Business Product data segment. System will not allow to edit the following fields: • Product Type • Product Sub-Type • Business Product Code. Make the required changes in the other relevant data segment and submit the business product.
Close	Click Close to close the business products that are no more relevant for banking product offering. User can close only authorized business products.
Copy	Click Copy to copy the authorized or unauthorized business products to quickly create new business product.
View	Click View to view the authorized or unauthorized business products.
Authorize	User with supervisor access will be able to authorize the unauthorized business product. Once approved, the business product status changes to 'Authorized' and is available for linking in the Business Process.
Delete	Click Delete to delete the business products that are unauthorized and no more required.

1.2 Business Process Configuration

This topic provides the information about the business process configuration.

The Oracle Banking Origination is equipped with Business Process configuration helping banks to build desired workflow for origination by defining the stages for the product origination and defining the respective data segments, checklists, documents required and advice generation for the stages.

A business process can be defined as a set of activities and tasks that are once completed, will accomplish the distinct origination processes. The business process must involve clearly defined inputs and a single output.

The business process definition determine the different stages which are required for a given combination of the process code, life cycle and business product code. The workflow

management of these stages and the relevant stage movements are defined in workflow Orchestrator to help us orchestrate the micro-services based process-flow and ensure seamless transition of the Account Origination process across various stages in that given order. The Workflow Orchestrator process will drive the workflow from one stage to another based on the process outcomes at the respective stages and subject to fulfilling of the mandatory data capture, confirmation on the mandatory checklist items and submission of mandatory documents at the respective stages. The stages defined in the business process can be dynamically assigned to different user profiles or roles.

During product origination, the system picks the business process run-time and initiates the workflow based on the configuration.

The Prerequisites for configuring the Business Process are enumerated below:

- **Lifecycle**
Lifecycle represents the lifecycle of the process for which the Business Process is created. These are factory shipped codes and currently support 'Origination' lifecycle for products types such as Savings Account, Current Account and Loans.
The list of lifecycle codes is available in Lifecycle Codes.
- **Process Code**
Process Code defines the various stages relevant for the origination workflow. Process Code configuration allows you to define the business process flow that needs to be mapped for the business product and lifecycle code combination in the Business Process configuration.
A set of default process codes are factory-shipped for the reference workflow. User can also create process codes in "CMC_TM_PROCESS_CODE" and "CMC_TM_PROCESS_STAGE" tables. The list of shipped process codes is available in Process Codes.
- **Business Product**
Business Product maintenance allows configuring the various business products in accordance with the product offerings that the bank deals in. Each business product has a unique business process defined for a specific lifecycle code selected.

This topic contains the following subtopics:

- [Create Business Process](#)
This topic describes the systematic instructions to create business process.
- [View Business Process](#)
This topic describes the systematic instructions to View Business Process.

1.2.1 Create Business Process

This topic describes the systematic instructions to create business process.

The Create Business Process aids in configuring the workflow for product origination. As mentioned earlier, this process will allow to define the data segments, checklists, documents and advices for the stages defined in the process code selected for the lifecycle code and business product combination.

Specify **User ID** and **Password**, and login to **Home** screen.

1. From **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Business Process**.
3. Under **Business Process**, click **Create Business Process**.

The **Create Business Process** screen displays.

Figure 1-12 Create Business Process

4. Specify the fields on **Create Business Process** screen.

Note

The fields, which mentioned as Required, are mandatory.

This topic contains the following subtopics:

Table 1-12 Create Business Process – Field Description

Field	Description
Business Process Code	Specify an alphanumeric business process code. Maximum Length allowed is 16.
Business Process Description	Specify the description of the business process code. Maximum Length allowed is 60.
Lifecycle	Search and select the lifecycle code.
Lifecycle Description	Displays the description of the lifecycle selected.
Product Category	Select the product category. Available options are • Individual • Small and Medium Business If Product Type is selected as Loan Account or Credit Card , the system defaults as Individual in read-only mode.
Process Code	Search and select the process code of the business process flow that needs to be mapped for the lifecycle code and business process code combination.
Process Description	Displays the description of the selected process code.
Business Product Code	Specify the business product code for which the business process is being created. Alternatively, system allows to select 'All', in which case the business process will be applicable to all the business products that are associated with the Lifecycle and Process Code.
Business Product Name	Displays the business product name based on the product code selected.

Note

System will allow you to configure only one business process for a combination of **Lifecycle** and **Business Product Code**.

5. Search and select the **Process Code**.

The **Create Business Process** screen with stages displays.

Figure 1-13 Create Business Process screen with stages

6. Click **Save** to save the data captured.
7. Click **Cancel** to close the business process screen.

The Create Business Process configuration allows to configure the below elements for each of the stages of the Product Origination workflow:

- [Data Segment](#)
This topic describes the systematic instructions of data segment.
- [Document](#)
This topic describes the systematic instructions of documents submitted by customer for the product origination process.
- [Checklist](#)
This topic describes about the list of mandatory checkpoints by the bank to its users to adhere to during the Product Origination processes.
- [Advices](#)
This topic describes the systematic instructions of advices action taken by the bank.

1.2.1.1 Data Segment

This topic describes the systematic instructions of data segment.

A data segment, as the name suggests is an individual block of data. Bringing in data segments allows to break down a huge process into smaller units, which makes easier to update, maintain and process. Business Process will consist of such several data segments that makes up the stage.

Business Process Definition enables the user to perform the following:

To configure the Business Process Definition enables the user to perform the following:

1. Select the stage in which to add the data segments.
2. Click

to data segments in the respective stage.

The **Data Segments** screen displays.

Figure 1-14 Data Segments

3. Click **Add** to add the selected data segments.

The **Create Business Process with Date Segments** screen is displayed with data segment added.

Figure 1-15 Create Business Process with added Data Segments

The System allows to re-sequence the data segment by dragging and dropping over the specific data segment.

4. Click

from the added data segment tile to edit the properties.

The edit properties screen is displayed.

Figure 1-16 Edit Data Segment Properties

5. From the **Preview** section, you can preview the appearance of the selected data segment.
6. From the Settings section, select whether the data segment is mandatory.
7. Select whether the data segment is editable.
8. Click **Save**.
9. Drag and Drop the data segment tile to control the sequence order. Based on set position it will appears in the respective stages.
10. Click **Save** to save the changes.

1.2.1.2 Document

This topic describes the systematic instructions of documents submitted by customer for the product origination process.

This section describes about the documents that are to be submitted by the customer for the Product Origination process.

To add documents:

1. Select the stage and click **Document** tab to define the specific documentation requirement for different stage.
2. Click add to documents in the respective stage.

The **Create Business Process – Documents** screen is displayed.

Figure 1-17 Create Business Process – Documents

- Specify the fields on **Create Business Process - Documents** screen.
For more information on fields, refer to the field description table below.

Table 1-13 Create Business Process - Documents

Field	Description
Document Type	Search and select the document type.
Document Description	Displays the corresponding description of the document.
Mandatory	Select if the document submission for the stage is mandatory.
Business Products	Select the required option for the document submission requirement. Available options are: • Single Product • List of Products • All
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.

1.2.1.3 Checklist

This topic describes about the list of mandatory checkpoints by the bank to its users to adhere to during the Product Origination processes.

Checklist are the distinct and this section describes list of mandatory checkpoints by the bank to its users to adhere to during the Product Origination processes.

To add checklist:

- Select the stage and click **Checklist** tab.

The **Create Business Process – Checklist** screen displays.

Figure 1-18 Create Business Process – Checklist

- Specify the fields on **Create Business Process - Checklist** screen.
For more information on fields, refer to the field description table.

Table 1-14 Create Business Process - Checklist

Field	Description
Checklist Data	It is a free-text field that allows to user to enter the checklists that must be validated as part of selected stage.
Mandatory	Select if the document submission for the stage is mandatory.
Business Products	Select the required option for the document submission requirement. Available options are: • Single Product • List of Products • All
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.

1.2.1.4 Advices

This topic describes the systematic instructions of advices action taken by the bank.

Advices are official letter of notices detailing an action taken or to be taken on a stated date by the bank. This is the final configuration for the Business Process creation.

- Select the stage and click **Advices** tab.

The **Create Business Process – Advices** screen displays.

Figure 1-19 Create Business Process – Advices

- Specify the fields on **Create Business Process – Advices** screen.
For more information on fields, refer to the field description table below.

Table 1-15 Create Business Process – Advices

Field	Description
Advice Type	Search and select the required advice type from the displayed list of all the valid advices maintained, and that must be mapped to this stage.
Advice Description	Displays the corresponding description of the advice.
Business Products	Select the required option to restrict the advices. Available options are: • Single Product • List of Products • All
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Business Process screen, the status of this gets updated as 'In-Progress'. The user can work on it later by picking it from the View Business Process screen.

- Click **Save** to create business process. At this point, the status of business process is unauthorized. User with supervisor access has to approve the business process. Once approved, status of the business process changes from unauthorized to authorized and is activated for usage in the Product Origination Process.

1.2.2 View Business Process

This topic describes the systematic instructions to View Business Process.

Oracle Banking Origination supports to view the business process created. The View Business Process allows the user to view all of the authorized, un-authorized and closed business process. Authorize option is also available for supervisor users for approving unauthorized business process.

1. From **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
 2. Under **Configuration**, click **Business Process**.
 3. Under **Business Process**, click **View Business Process**.
- The **View Business Process** screen displays.

Unlock	Click Unlock to edit the business product information in Create Business Product data segment. System will not allow to edit the following fields: • Product Type • Product Sub-Type • Business Product Code. Make the required changes in the other relevant data segment and submit the business product.
Close	Click Close to close the business products that are no more relevant for banking product offering. User can close only authorized business products.
Authorize	User with supervisor access will be able to authorize the unauthorized business product. Once approved, the business product status changes to 'Authorized' and is available for linking in the Business Process.
Close	Click Close to close the business products that are unauthorized and no more required.

1.3 Rule Configuration

This topic provides the information for the user to rule the configuration.

Rule Configuration enables the user to create, view, and modify the facts and rules.

This topic includes following subtopics:

- [Fact](#)
This topic provides the information to fact carrying entity used for creating the rules or features.
- [Rule](#)
This topic provides the information for the user to enable the rule.

1.3.1 Fact

This topic provides the information to fact carrying entity used for creating the rules or features.

Fact is the information carrying entity used for creating the rules or features. The following list of facts are factory shipped product.

Table 1-17 List of Facts – Factory shipped

Fact Code	Description	Type
AGE	Customer Age	Number
PRODUCTCODE	Business Product Code	Text
TOTAL_INCOME	Total Income	Number
TOTAL_EXPENSE	Total Expense	Number
OBS_SCORE	Bureau Score	Number
INSTALMENT	Proposed Loan Instalment	Number

1.3.2 Rule

This topic provides the information for the user to enable the rule.

Rule enables the user to build the expression to perform the calculation with the facts created.

Steps to build the expression is explained with the below example.

The Rule Expression for Loan to Value (LTV) is $\text{Loan to Value (LTV)} = (\text{LOANAMOUNT} / \text{COLLATERAL_VALUE}) * 100$

For now, the above expression is not supported directly, and LTV calculation is achieved by the below steps.

Step 1: Create a Rule1 - LOAN_TO_COLLATERAL

Expression - $\text{LOANAMOUNT} / \text{COLLATERAL_VALUE}$

Create a rule2 - Loan to Value (LTV)

Expression - LOAN_TO_COLLATERAL *100

This topic contains the following subtopics:

1.3.2.5 View Audit Rule

This topic describes the View Audit Rule.

Specify **User ID** and **Password**, and login to **Home** screen.

- 1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
- 2. Under **Configuration**, click **Rule**.
- 3. Under **Rule**, click **Rule**.
- 4. Under **Rule**, click **View Audit Rule**.

The **View Audit Rule** screen displays.

Figure 1-33 View Audit Rule

The screenshot shows a web interface titled "View Audit Rule". At the top, there is a header bar with the title. Below the header, on the left, is a label "Request Id" followed by a text input field. To the right of the input field is a "Submit" button. Further to the right is a "Show Rule Log" button. The central part of the screen is a large, empty rectangular area, likely intended for displaying the audit rule details or logs.

5. Specify the fields on **View Audit Rule** screen.
For more information on fields, refer to the field description table.

Table 1-26 View Audit Rule – Field Description

Field	Description
Request ID	Specify the request ID available from the output of evaluate API.

6. Click **Submit** to view to details.
7. Click **Show Rule log**, to view the log rule for selected request ID.

1.4 Credit Decision Configuration

This topic provides the information about the credit decision configuration.

A credit score is a number that describes a consumers creditworthiness. The higher the score, the better a borrower looks to potential lenders. A credit score is based on the various features linked to the score model. Lenders such as banks and credit card companies use credit scores to evaluate the risk of lending money to the customer.

This topic includes following subtopics:

- [Questionnaire](#)
This topic describes the information about the questionnaire used for credit analysis.
- [Validation Model](#)
This topic describes the information about the Validation model.
- [Borrowing Capacity](#)
This topic describes the information about the total amount the applicant is eligible to borrow.
- [Scoring Feature](#)
This topic describes the information about the scoring feature in Decision service.
- [Quantitative Scoring Model](#)
This topic describes the information about the Quantitative scoring model for the Decision service.

- [Qualitative Scoring Model](#)
This topic describes the information about the Qualitative scoring model for the Decision service.
- [Decision Grade Matrix](#)
This topic describes the information about the decision grade matrix feature.
- [Pricing](#)
This topic describes the information about the pricing feature in Decision service.
- [Strategy Configuration](#)
This topic describes the information about the strategy configuration.

1.4.1 Questionnaire

This topic describes the information about the questionnaire used for credit analysis.

Questionnaire allows you to create the set of questions and answers to evaluate the qualitative score for each applicant. This questionnaire is used in the qualitative scoring model and the response to the questions are sent from the Oracle Banking Origination to Decision Service.

This topic contains the following subtopics:

- [Create Questionnaire](#)
This topic describes the systematic instructions to configure the qualitative questionnaire based on the various parameters.
- [View Questionnaire](#)
This topic describes the systematic instructions to view the list of configured questionnaire.

1.4.1.1 Create Questionnaire

This topic describes the systematic instructions to configure the qualitative questionnaire based on the various parameters.

This questionnaire can be further linked to define qualitative scoring model.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Questionnaire**.
4. Under **Questionnaire**, click **Create Questionnaire**.

The **Create Questionnaire** screen displays.

Figure 1-34 Create Questionnaire

The screenshot shows the 'Create Questionnaire' interface. It includes a 'Basic Details' section with the following fields:

- Questionnaire Code**: A text input field with a 'Required' label.
- Questionnaire Description**: A text input field with a 'Required' label.
- Product Processor**: A dropdown menu with 'Select' as the current value and a 'Required' label.
- Category**: A text input field with a 'Required' label.

At the bottom of the form, there is a 'Create' button with a dropdown arrow, an 'Add Question' button, a 'Preview' button, and 'Cancel' and 'Save' buttons.

5. On **Create Questionnaire** screen, specify the fields.

Note

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 1-27 Create Questionnaire - Field Description

Field	Description
Basic Details	This section has the basic details of questionnaire code.
Questionnaire Code	Specify the questionnaire code.
Questionnaire Description	Specify a short description for the questionnaire.
Product Processor	Specify the product processor for which the questionnaire is being created.
Category	Specify the category of the questionnaire.
Create	Click Create to configure the questions.
Question Code	Specify the unique question code.
Question Description	Specify the description for the question.
Select-Type	Select the type of response option from the drop-down list. The available options is Select-Single-Choice .
Short Name	Specify the short name of the question. This will be displayed in the Execution Summary.
Answer Code	Displays the answer code.
Answer Option	Specify all the expected response for the question configured.
Add	Click Add to add the expected response to the question.
Update	Click Update to edit the response.
Remove	Click remove to remove the response.
Required	By default, this option is enabled. Indicates whether the question is mandatory or optional.
Done	Click Done to save the data.
Preview	Click Preview to view the questions configured for the questionnaire along with the response choice.
	Click this icon to view the responses configured for the questionnaire.
	Click this icon to move the position of the questions.
	Click this icon to expand, copy or remove question.

Table 1-27 (Cont.) Create Questionnaire - Field Description

1.4.2 Validation Model

This topic describes the information about the Validation model.

Validation Model allows you to define Validation model to evaluate the application even before the Credit Assessment, only those application where Validation Model is Pass will be proceeded further. If the Validation Model is Failed, then the application cannot be proceeded further.

This topic contains the following subtopics:

- [Create Validation Model](#)
This topic describes the systematic instructions to create Validation model based on the various input.
- [View Validation Model](#)
This topic describes the systematic instructions to view the list of configured validation model.

1.4.2.1 Create Validation Model

This topic describes the systematic instructions to create Validation model based on the various input.

The **Create Validation Model** screen allows user to create validation model based on the various input. User can configure the strategy as per the requirement.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Validation Model**.

1.4.3 Borrowing Capacity

This topic describes the information about the total amount the applicant is eligible to borrow.

Maximum loan amount are used for loans, credit cards, and line of credit accounts. The maximum credit amount depends on a number of factors including the borrower's credit worthiness, that is, financial profile and debt to income, loan term, loan purpose, whether the loan is supported by a collateral etc.

Using this screen, the user can link a rule for calculating borrowing capacity. The user can calculate the maximum lendable amount based on the various criteria of the lender such as debt to income ratio, credit score, credit history, etc.

A sample rule to calculate borrowing capacity is given below:

Scenario: Based on Income and FICO score

Rule 1:

IF MIN(FICO_SCORE) >= 500 AND MIN(EMPLOYMENT_PERIOD) < 1 YEAR

THEN MULTIPLIER = 5

ELSEIF MIN(FICO_SCORE) < 500 AND MIN(EMPLOYMENT_PERIOD) > 1 YEAR

THEN MULTIPLIER = 4

Rule2: Max Lendable Amount

MIN(Income) * Rule1

This topic contains the following subtopics:

- [Create Borrowing Capacity](#)
This topic describes the systematic instructions to define the borrowing capacity based on the various input.
- [View Borrowing Capacity](#)
This topic describes the systematic instructions to view the borrowing capacity.

1.4.3.1 Create Borrowing Capacity

This topic describes the systematic instructions to define the borrowing capacity based on the various input.

Specify **User ID** and **Password**, and login to **Home** screen.

1.4.4 Scoring Feature

This topic describes the information about the scoring feature in Decision service.

Scoring Feature allows you to define scoring feature for determining the credit score. This score applies to applications during the origination process and based on the information send from the Oracle Banking Origination to Decision Service.

This topic contains the following subtopics:

- [Create Scoring Feature](#)
This topic describes the systematic instructions to configure the scoring feature for determining the credit score.
- [View Scoring Feature](#)
This topic describes the systematic instructions to view the list of scoring feature.

1.4.4.1 Create Scoring Feature

This topic describes the systematic instructions to configure the scoring feature for determining the credit score.

The **Create Scoring Feature** screen allows user to define scoring feature for determining the credit score. This score applies to applications during origination and based on the information received from the product processor.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Scoring Feature**.
4. Under **Scoring Feature**, click **Create Scoring Feature**.

The **Create Scoring Feature** screen displays.

Figure 1-53 Create Scoring Feature

- On **Create Scoring Feature** screen, specify the fields.

Note

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 1-46 Create Scoring Feature - Field Description

Field	Description
Feature Code	Specify the unique feature code.
Feature Description	Specify a short description for the feature.
Product Processor	Specify the product processor for which the feature is being created.
Rule	Select the rule, if it is required to define the feature. This option is used to decide whether the feature is rule based or fact based. The available options are: Yes No
Fact Code	Select the fact code to be mapped to the feature from the drop-down list. This field is enabled if the Rule is selected as No .
Fact Name	Specify the fact name of the feature. This field is enabled if the Rule is selected as No .
Rule Code	Select the rule code to be mapped to the feature from the drop-down list. This field is enabled if the Rule is selected as Yes .
	Click this icon to get the information about the rule.
Rule Name	Specify the rule name for the selected rule. This field is enabled if the Rule is selected as Yes .

- Click **Save** to save the details.

1.4.4.2 View Scoring Feature

This topic describes the systematic instructions to view the list of scoring feature.

The **View Scoring Feature** screen allows the user to view the Scoring Feature created. The status of the uploaded feature is displayed as **Unauthorized** and **Open**. Once the checker authorizes the model, the status is updated to **Authorized** and **Open**.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Scoring Feature**.
4. Under **Scoring Feature**, click **View Scoring Feature**.

The **View Scoring Feature** screen displays.

1.4.5 Quantitative Scoring Model

This topic describes the information about the Quantitative scoring model for the Decision service.

Quantitative Scoring Model allows the user to define quantitative scoring model based on the various features.

This topic contains the following subtopics:

- [Create Quantitative Scoring Model](#)
This topic describes the systematic instructions to configure the quantitative scoring model based on the various scoring parameters.
- [View Quantitative Scoring Model](#)
This topic describes the systematic instructions to view the list of configured quantitative scoring model.

1.4.5.1 Create Quantitative Scoring Model

This topic describes the systematic instructions to configure the quantitative scoring model based on the various scoring parameters.

The **Create Quantitative Scoring Model** screen allows the user to create the quantitative scoring model by linking the various features. The user needs to create quantitative scoring models for both the application and applicant level.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Quantitative Scoring Model**.
4. Under **Quantitative Scoring Model**, click **Create Quantitative Scoring Model**.

The **Create Quantitative Scoring Model** screen displays.

Figure 1-57 Create Quantitative Scoring Model

5. Specify the fields on **Create Quantitative Scoring Model** screen.

Note

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 1-50 Create Quantitative Scoring Model - Field Description

Field	Description
Scoring Model	Select the scoring model from the drop-down list. The available options are: • Application Scoring Model • Applicant Scoring Model • Multi-Applicant Scoring Model
Scoring Model Code	Specify the unique scoring model code.
Scoring Model Description	Specify a short description for the scoring model.
Effective Date	Specify the effective date.
Expiry Date	Specify the expiry date.
Product Processor	Specify the product processor for which the model is being created.
Priority	Specify the priority of the model.

- Click the **Selection Criteria** to define quantitative scoring model.

1.4.6 Qualitative Scoring Model

This topic describes the information about the Qualitative scoring model for the Decision service.

Qualitative Scoring Model allows the user to define qualitative scoring model based on the various scoring parameters.

This topic contains the following subtopics:

- [Create Qualitative Scoring Model](#)
This topic describes the systematic instructions to configure the qualitative scoring model based on the various scoring parameters.
- [View Qualitative Scoring Model](#)
This topic describes the systematic instructions to view the list of configured qualitative scoring model.

1.4.6.1 Create Qualitative Scoring Model

This topic describes the systematic instructions to configure the qualitative scoring model based on the various scoring parameters.

The **Create Qualitative Scoring Model** screen allows the user to create the qualitative scoring model based on the various scoring parameters.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Qualitative Scoring**.
4. Under **Qualitative Scoring**, click **Create Qualitative Scoring Model**.

The **Create Qualitative Scoring Model** screen displays.

Figure 1-67 Create Qualitative Scoring Model

5. Specify fields on **Create Qualitative Scoring Model** screen.

Note

The fields marked as **Required** are mandatory.

For more information on fields, refer to the field description table.

Table 1-60 Create Qualitative Scoring Model - Field Description

Field	Description
Scoring Model	Select the scoring model from the drop-down list. The available options are: • Application Scoring Model • Applicant Scoring Model
Qualitative Scoring Model Code	Specify the unique scoring model code.
Qualitative Scoring Model Description	Specify a short description for the scoring model.
Effective Date	Specify the effective date.
Expiry Date	Specify the expiry date.
Product Processor	Specify the product processor for which the model is being created.
Priority	Specify the priority of the model.

6. Click the **Selection Criteria** to define qualitative scoring model.

1.4.7 Decision Grade Matrix

This topic describes the information about the decision grade matrix feature.

Decision Grade Matrix allows the user to define the decision and grade based on the weighted score calculated by the scoring model.

This topic contains the following subtopics:

- [Create Decision Grade Matrix](#)
This topic describes the systematic instructions to create decision and grade matrix by updating various details.
- [View Decision Grade Matrix](#)
This topic describes the systematic instructions to view the decision grade matrix.

1.4.7.1 Create Decision Grade Matrix

This topic describes the systematic instructions to create decision and grade matrix by updating various details.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Retail Banking**. Under **Retail Banking**, click **Configuration**.
2. Under **Configuration**, click **Credit Decision**.
3. Under **Credit Decision**, click **Decision Grade Matrix**.
4. Under **Decision Grade Matrix**, click **Create Decision Grade Matrix**.

The **Create Decision Grade Matrix** screen displays.

1.4.8 Pricing

This topic describes the information about the pricing feature in Decision service.

Risk-based pricing refers to the offering of different interest rates to different customers depending on their credit worthiness. Thus, not all borrowers for the same product receives the same interest rate and credit terms. This means that high-risk borrowers who are less likely to repay their loans in full and on time will be charged higher rate of interest. While the low risk borrowers, having greater capacity to make payments will be charged lower rate of interest.

This topic contains the following subtopics:

- [Create Pricing Model](#)
This topic describes the systematic instructions to create pricing model based on various pricing parameter by updating various details.
- [View Pricing Model](#)
This topic describes the systematic instructions to view the list of pricing model.

1.4.9 Strategy Configuration

This topic describes the information about the strategy configuration.

Decision service is used for multiple purposes such as borrowing capacity, borrowing capacity plus pricing, only pricing, only decision, logical plus decision etc. System should have an ability to configure the strategy like when the decision service is being called for borrowing capacity, should the request pass through the logical check. In addition, the product processor can configure different strategies for different product types or customer types. Strategy configuration allows the product processor to configure the strategy as per its requirements for all the modes for which decision service can be called. Separate strategy can be defined for origination, servicing or collection. In addition, multiple strategy can be defined for the same module like for origination i.e. multiple strategy can be defined. This maintenance allows the product processor to configure the strategy according to its need for all the modes for which the decision service can be called for.

This topic contains the following subtopics:

- [Create Strategy Configuration](#)
This topic describes the systematic instructions to create strategy configuration as per the requirement.
- [View Strategy Configuration](#)
This topic describes the systematic instructions to view the list of strategy configuration.

1.4.9.1 Create Strategy Configuration

Product Processor	Displays the product processor for the created strategy configuration.
Product Processor Description	Displays the product processor description for the created strategy configuration.
Account Category	Displays the account category for the created strategy configuration.
Module	Displays the module for the created strategy configuration.
Effective Date	Displays the effective date for the created strategy configuration.
Expiry Date	Select the expiry date for the created strategy configuration.
Type	Displays the fact type for the created strategy configuration.
Value	Displays the fact value for the created strategy configuration.
Steps	Specify the steps defined for the created strategy configuration.

11. Click **Save** to update the modified fields.

1.5 Origination Preferences

This topic describes the preferences which are set at origination level.

Using this screen, you can maintain pre-defined origination parameters which enables the bank to define generic parameters which governs the behavior of the application during the process of account opening.

This screen comprises of the following section:

- **Generic Parameters:** The user defines parameters for dashboard widgets, age limits and nominees for minors, funding, incomplete application expiry, dedupe, and resident stability in this section.
- **Credit and Compliance :** The user defines the credit decision threshold limits at the insider and executive officer levels in this section. The annual percentage rate parameters are also defined in this section.
- **Offer:** The user can define downsell offer expiry parameters in this section.
- **Integration:** The user defines the host integration parameter in this section.

To edit origination preferences:

1. From the **Menu** , navigate from **Retail Origination >> Configurations** to **Origination Preference** screen.
2. Click **View Origination Preference** screen to view already defined preferences.

The **View Origination Preference** screen is displayed.

Figure 1-96 View Origination Preference

For more information on fields, refer to the field description table below.

Table 1-96 View Origination Preference - Field Describes

Field Name	Description
Host User	Displays the user ID of logged in user who set this preferences.

Table 1-96 (Cont.) View Origination Preference - Field Describes

Field Name	Description
Year Start Date	Displays the year start date.
Year Start Month	Displays the year start month.
<Footer of Title>	This section displays the status of the record as, - Whether the record is Authorized or Unauthorized - Whether the record is Open or Closed - Number of times the record is edited

3. Click  icon on the top right-hand side of the questionnaire tile and click **Unlock**. The **Origination Preferences** screen is displayed in edit mode.

Audit

4. Specify the details in the relevant data fields. The fields which are marked with **Required** are mandatory. For more information on fields, refer to the field description table below.

Table 1-97 Origination Preference - Edit – Field Description

Field	Description
Generic Parameters	In this section user can capture generic parameters.
Application Entry in the Initiate stage	Specify whether the application entry option is applicable while initiating the account opening application.
Branch Code Required for Batch Processing	Specify the branch code that processes the batch.
Early KYC Rule	Specify the early KYC rule. Based on this rule early KYC process is initiated in the Applicant data segment.
Widget Parameters	In this section user can define dashboard widget preferences.
Start Day for filter	Specify the day of the month from which the application should be displayed in the dashboard widget.
Start Month for filter	Specify the start month count of the year to get the current financial year applications in the dashboard widget.
Loan Offer nearing Expiry-bucket one in days	Specify number of days to highlight the loan offers that are nearing to the expiry. Based on this number of days the system calculates and displays the count of applications under the loan offer in the first bucket of the Loan Offers Near Expiry widget on dashboard.
Loan Offer nearing Expiry-bucket two in days	Specify number of days to highlight the loan offers that are nearing to the expiry. Based on this number of days the system calculates and displays the count of applications under the loan offer in the second bucket of the Loan Offers Near Expiry widget on dashboard.
Loan Offer nearing Expiry - bucket three in days	Specify number of days to highlight the loan offers that are nearing to the expiry. Based on this number of days the system calculates and displays the count of applications under the loan offer in the third bucket of the Loan Offers Near Expiry widget on dashboard.
Application nearing Expiry - bucket one in days	Specify number of days to highlight the applications that are nearing to the expiry. Based on this number of days the system calculates and displays the count of applications in the first bucket of the Product Application Near Expiry widget on dashboard.
Application nearing Expiry - bucket two in days	Specify number of days to highlight the applications that are nearing to the expiry. Based on this number of days the system calculates and displays the count of applications in the second bucket of the Product Application Near Expiry widget on dashboard.
Application nearing Expiry - bucket three in days	Specify number of days to highlight the applications that are nearing to the expiry. Based on this number of days the system calculates and displays the count of applications in the third bucket of the Product Application Near Expiry widget on dashboard.
My Applications - buckets one in days	Specify number of days to highlight the applications that are initiated by the logged in user. This applications are highlighted as they are nearing to expiry within one day. Based on this number of days the system calculates and displays the count of applications in the first bucket of the Product Application Near Expiry widget on dashboard.

Table 1-97 (Cont.) Origination Preference - Edit – Field Description

Field	Description
My Applications - buckets second in days	Specify number of days to highlight the applications that are initiated by the logged in user. This applications are highlighted as they are nearing to expiry within two day. Based on this number of days the system calculates and displays the count of applications in the second bucket of the Product Application Near Expiry widget on dashboard.
My Applications - buckets three in days	Specify number of days to highlight the applications that are initiated by the logged in user. This applications are highlighted as they are nearing to expiry within three day. Based on this number of days the system calculates and displays the count of applications in the third bucket of the Product Application Near Expiry widget on dashboard.
My Applications - buckets four in days	Specify number of days to highlight the applications that are initiated by the logged in user. This applications are highlighted as they are nearing to expiry within four day. Based on this number of days the system calculates and displays the count of applications in the forth bucket of the Product Application Near Expiry widget on dashboard.
Minor Age For Nominees	In this section user can define the age limit of minor in years for opening and account.
Savings Minor Age	Specify the age of the minor to open saving account.
Term Deposit Minor Age	Specify the age of minor to open term deposit account.
Funding Parameters	In this section user can define the funding parameters.
Current and Savings Account Initial Funding by Cheque	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by cheques. The available option is Manual process.
Current and Savings Account Initial Funding by Cash	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by cash. The available options are: • Automatic • Manual
Current and Savings Account Initial Funding by Account	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by account. The available options are: • Host • Manual
TD Account Funding by Cheque	Specify the preferences of initial funding for term deposit and saving accounts. This preferences are specific to funding that are initiate by cheques.
TD Account Funding by Cash	Specify the preferences of initial funding for current and saving accounts. This preferences are specific to funding that are initiate by cash. The available options are: • Automatic • Manual

Table 1-97 (Cont.) Origination Preference - Edit – Field Description

Field	Description
TD Account Funding by Account	Specify the preferences of initial funding for term deposit accounts. This preferences are specific to funding that are initiate by account. The available options are: • Host • Manual
TD Account Funding by GL	Specify the preferences of initial funding for term deposit accounts. This preferences are specific to funding that are initiate by GL. You can select the Host option from the list for initial funding.
Incomplete Application Expiry	In this section user can define the expiry preferences for incomplete applications.
Incomplete Application Expiry Period (in Days)	Specify number of days to highlight the incomplete applications that are nearing to the expiry.
Lead Days for Incomplete Application Expiry Period Alert	Indicates the number of days prior to the application expiry, when an alert is triggered to the banker intimating about the application expiry.
Lag Days for Incomplete Application Expiry Period Alert	Indicates the number of days after the application is expired, an alert is triggered to the banker intimating about the application expiry.
Dedupe Parameters	In this section user can define preferences for dedupe parameters.
Application dedupe	Select to trigger the application dedupe process.
Customer dedupe	Select to trigger the customer dedupe process.
Address Stability	In this section user can set preferences for resident stability.
Applicable Address Types	Select the address types for which the address stability is applicable.
Applicable Stability Applicable Products	Select the products for which the resident stability is validated.
Applicable Stability (Years)	Specify the number of years for which the resident stability is valid.
Credit and Compliance	In this section user can set preferences for credit and compliance.
Insider Credit Threshold	In this section user can define the threshold limits for insider credit.
Insider Credit Threshold CCY	Specify the credit threshold currency for insider.
Insider Credit Threshold	Specify the credit threshold value for insider.
Executive Officer Credit Threshold CCY	Specify the credit threshold currency for executive officer.
Executive Officer Credit Threshold	Specify the credit threshold value for executive officer.
Annual Percentage Rate Parameters	In this section user can define the annual percentage rate parameters.
Armed Forces Maximum APR %	Specify the maximum annual percentage rate value for armed forces.
Service Members Maximum APR %	Specify the maximum annual percentage rate value for service members.
Offers	In this section user can define offers related preferences.
Downsell Offer Expiry Period (in Days)	Specify number of days to highlight the downsell offers that are nearing to the expiry.
Lead Days for Downsell Offer Expiry Alert	Indicates the number of days prior to the downsell offer expiry, when an alert is triggered to the banker intimating about the offer expiry.
Lag Days for Downsell Offer Expiry Alert	Indicates the number of days after the downsell offer expiry, when an alert is triggered to the banker intimating about the offer expiry.

Table 1-97 (Cont.) Origination Preference - Edit – Field Description

Field	Description
Integration	In this section user can define integration preferences.
Host User	Specify the host user for integration.
Direct Banking URL	Specify the direct banking URL.
Finicity Mode	Select the finicity mode for fund transfer. The available options are: • Branch Visit : If this option is selected then it is mandatory for a customer to visit branch for fund transfer. • Customer Email : If this option is selected then finicity URL is sent to the preferred Email ID of customer for completing the fund transfer.
Enable OCR for Document Extraction	Specify whether the user wants to enable OCR for document extraction.
Collateral System Integration	Specify whether the user wants to enable the collateral system integration.
Enable Address Search	In this section user can define the preferences of enabling address search.
Customer Information Data Segment	Select to enable the address search in the Customer Information data segment of account opening application.
Collateral Data Segment	Select to enable the address search in the Collateral data segment of account opening application.
Solicitor Details	Select to enable the address search while capturing solicitor details.
Nominee / Guardian for Current and Saving	Select to enable the address search while capturing nominee or guardian details in the current and saving application.
Nominee / Guardian for Term Deposit	Select to enable the address search while capturing nominee or guardian details in the term deposit application.

1.6 Advice Maintenance

This topic describes the information about advice maintenance.

To edit view advice maintenance:

1. From the **Menu List**, navigate from **Retail Banking >> Configurations >> Advices and Alerts**.
2. Click **View Advices Maintenance**.

The **View Advices Maintenance** screens appears.

Figure 1-98 View Advices Maintenances

For more information on fields, refer to the field description table below.

Table 1-98 View Advices Maintenance - Field Description

Field Name	Description
Name	Displays the name of advice maintenance
<Footer of Title>	This section displays the status of the record as, - Whether the record is Authorized or Unauthorized - Whether the record is Open or Closed - Number of times the record is edited

3. Click  icon on the top right-hand side of the advices tile and click **Unlock**.
The **Advices** screen appears.

Figure 1-99 Advices

Event	Rule Linkage	Template Linkage	Allowed Recipients	Acceptance Required?	Signature Acceptance	Allowed Mode Of Delivery	Default Delivery	Email Template	Action
DOC_GEN	DOC_GEN_OFFER_ISSUE_RW		PRIMARY_JOINT_GUARANTOR_COSIGNER	Yes	Joint	Email_POST_PRINT	Email	DOCUMENT_GENERATION	
DOC_GEN	DOC_GEN_LOAN_APP_FORM		PRIMARY_JOINT_GUARANTOR_COSIGNER	Yes	Joint	Email_POST_PRINT	Email	DOCUMENT_GENERATION	

Table 1-99 Advices – Field Description

Field	Description
Event	Displays the event name.
Rule Linkage	Displays the name of the rule which is linked. Click  to view the rule which is linkage along with output.
Template Linkage	Displays the template which is link to the event.
Allowed Reciepent	Displays the role of the applicants which are allowed for the event.
Acceptance Required	Displays whether the acceptance is required for the event. If the options is Yes then the acceptance is mandatory in the process. If the options is No then the acceptance is optional in the process.
Signature Acceptance	Displays the signature acceptance in the event.
Allowed Mode Of Delivery	Displays the mode of delivery which is allowed for delivering the advices.
Default Delivery	Displays the mode of delivery set as default.
Email Template	Displays the template which is set for email.

Table 1-99 (Cont.) Advices – Field Description

Field	Description
Actions	Select the appropriate action to perform on the added record. The available actions are: - Click  to edit the already added record. - Click  to delete the already added record.

4. Click **Add Advice** button to add the new advice event.

The popup window appears for adding details.

Table 1-100 Add Advice - Field Description

Field	Description
Event	Select the event name from the list for defining the trigger for an outbound document. The list appears based on the seed maintenance.
Linkage	Select the type of linkage. The available options are: - Rule - Template
Rule Name	Select the rule from the list which is linked to event. To view the rule along with output, click  This rule list is maintained in the Rule Maintenance screen.
Template Name	Select the template from the list which is linked to the event. You can select multiple options from the list.
Allowed Recipient	Select the role of the applicants which are allowed for the event. The advices are dispatched to the allowed recipient.
Acceptance Required	Select to indicate whether the acceptance is required for the event. The available options are: Yes : If the option is Yes, then the recipients are required to accept and sign the process. This value indicates the necessity of their acceptance. The user needs to upload the signed copy or wait for the signing process to be completed by the recipient for the documents listed in the Document Acceptance data segment, indicating this value. No: If the options is No then acceptance of the documents is required once they are dispatched.
Signature Acceptance	Displays the signature acceptance in the event. The conditions based on which the value appears in this field are mentioned below: - If the user selects the Yes option in the Acceptance Required field and adds multiple recipients to the Allowed Recipients field, then the Joint value will appear by default. - If a single recipient is added to the Allowed Recipients field and the Yes option is selected in the Acceptance Required field, then the Single value is displayed by default. - If the No option is selected from the Acceptance Required field, then the Not Applicable value is defaulted and appears.

Table 1-100 (Cont.) Add Advice - Field Description

Field	Description
Allowed Mode Of Delivery	Select the mode of delivery which is allowed for delivering the advices. You can select multiple options from the list. The mode of delivery list is defined in the Media Maintenance screen.
Default Delivery	Select the default mode of delivery. All the options selected in the Allowed Mode of Delivery appears for selection in this list. For the Document Generation events, the option selected in this field is defaulted as the Mode of Delivery in the Document Generation data segment of the Application Documents stage.
Email Template	Select the template of the advice which define the format of the advice which is delivered to recipients through email.

- Click **Save** to save the added details. The record is added and appears in the tabular format on the landing page.
- Click **Save** to lock the added record.

1.7 Reason Codes

This topic describes the overview of the reason codes.

Reason codes are used to specify reasons for the actions taken while performing certain tasks. For example, when a transaction on an account is rejected, a reason is provided. Using this screen you can create reason code and assign them to the various tasks where they can be used. Currently they are used for rejecting credit application or incomplete application or counter offer in origination.

This section includes following subsections:

- [Create Reason](#)
This topic describes the systematic instructions to create fact.
- [View Reason](#)
This topic describes the systematic instructions to view the list of fact.

1.7.1 Create Reason

This topic describes the systematic instructions to create fact.

Using this screen you can create reason codes based on the various parameters.

- From the **Menu List**, navigate from **Retail Banking >> Configurations >> Reason Codes**.
- Under **Configuration**, click **Rule**. Under **Rule**, click **Fact**.
- Click **Reason Code** to create new reason code.

The **Create Reason Code** screen displays.

Figure 1-100 Create Reason Code

4. Specify the fields on **Create Reason** screen.

Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 1-101 Create Reason Code - Field Describes

Field Name	Description
Reason Code	Specify the reason code.
Reason Description	Specify the reason code description.
Actions	In this section user can capture the actions. Click Add Row to add list of actions that are applicable for the reason code.
Save	To save the captured details, click Save .
Cancel	Click Cancel to close the Create Reason Code screen.

1.7.2 View Reason

This topic describes the systematic instructions to view the list of fact.

Using this screen you can view the reason codes are already created.

1. From the **Menu List**, navigate from **Retail Banking >> Configurations** to **Reason Code** screen.
2. Click **View Reason Codes** screen to view already defined reason codes.

The **View Reason Codes** screen displays.

Figure 1-101 View Reason Code

For more information on fields, refer to the field description table.

Table 1-102 View Reason Codes – Field Description

Field	Description
Reason Code	Displays the reason code.
Reason Description	Displays the reason code description.

3. Click

to search the reason code based on the following search criteria.

- Reason Code
- Reason Description
- Authorization Status
- Record Status

4. Click

icon on the top right-hand side of the questionnaire tile and click Unlock.
The **Reason Code** screen displays.

Figure 1-102 Reason Codes

5. Specify the details in the relevant data fields. The fields which are marked with Required are mandatory. For more information on fields, refer to Create Reason Code - Field Description.

The **Reason Code** fields is non-editable in **Maintenance** screen.

1.8 Dashboard Configuration

This topic describes the systematic instructions for dashboard configuration.

Information from multiple sub-domain viz., Savings Account, Current Account and Loan is integrated and displayed as dashboard on the home page of the Oracle Banking Origination application.

The pre-configured dashboards available in the system are as follows:

- My Applications
- Application Search
- Conversion Analysis
- Account Opening Trends
- New Savings Account
- New Current Account
- New Loan Account
- New Term Deposits
- Loan Pipeline
- Loan Offer Status
- Loan Exposure to Collateral
- Product Application Near Expiry
- Loan Offers Near Expiry

1.9 Initial Funding Configuration

This topic provides the information about the initial funding configuration.

The different configuration scenarios for initial funding are as follows:

1. **Fund By Cash** – If **Fund By** is specified as **Cash**, user can proceed with configurations, either automatic or manually.
 - Automatic – In automatic process, during submit of the application Entry stage of the Savings Account, Current Account and Term Deposit Account, an automatic request for teller transaction is triggered. The Initial funding data segment makes a call to the external teller module to check the **Transaction Reference Number** and **Teller Transaction Status** auto-populates the screen. The details are not allowed to be modified. more details on the integration can be referred in the oracle banking branch integration guide.
 - Manual – In manual process, it is expected that the teller transactions are being handled separately, and the details of the **Transaction Reference Number** and **Teller Transaction Status** are thereby manually updated in the Initial Funding data segment.
2. **Fund By Account Transfer** - If **Fund By** is specified as **Account Transfer**, user can proceed with configurations, either manually or via Host.
 - Manual - In Manual Process, it is expected that the Teller Transactions are being handled separately, and the details of the **Transaction Reference Number** and **Teller Transaction Status** are thereby manually updated in the initial funding data segment manual.
 - Host – In 'Host' configuration, it is expected that the transaction for debit of the customer account will be handled on the host side. Since the transaction are done as part of the Account Creation in Host, Initial Funding stage will be skipped, and required transaction details will be passed to the Host for funding.
3. **Fund by Other Bank Cheque** - If **Fund By** is specified as **Other Bank Cheque**, user can proceed with Manual configurations.
 - Manual - In Manual Process, it is expected that the teller transaction are being handled separately, and the details of the **Transaction Reference Number** and **Teller Transaction Status** are thereby manually updated in the Initial Funding data segment.

This initial funding configurations are set in the **Origination Preferences** screen.

1.10 Application Submission Configuration

This topic provides the information about the application submission configuration.

Bank-level configuration is to specify whether application entry completion is allowed or not as part of the Application Initiation Stage.

This configurations are set in the **Origination Preferences** screen.

true.

1.11 Machine Learning Configuration for Predicting Account Opening Date

This topic provides the information about the machine learning configuration for predicting account opening date.

Bank-level configuration is required to define the use case and train the Machine Learning model for predicting the account opening date for all the applications. Refer to the **Machine Learning Framework** section in **Oracle Banking Common Core User Guide** for a detailed explanation.

- [Model Definition](#)
This topic describes the systematic instructions for the model definition.
- [Model Training and Scoring](#)
This topic describes the systematic instructions for model training and scoring.

1.11.1 Model Definition

This topic describes the systematic instructions for the model definition.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Machine Learning**. Under **Machine Learning**, click **Model Definition**.
The **Model Definition Summary** screen displays.
2. On **Model Definition Summary** screen, click button to create new use-case definition.
The **Use Case Definition** screen displays.

Figure 1-103 Use Case Definition

3. Specify the below listed parameters and create the use-case definition.
For more information on fields, refer to the field description table below:

Table 1-103 Use Case Definition Parameters - Field Description

Field	Description
Use Case Name	PREDPRCTIME
Description	Predicting Process Completion Time
Use Case Type	REGRESSION
Product Processor	RPM
Training Data Source	RPM_VW_ML_PREDPRCTIME
Prediction Column	PRED_TIME
Target Column	TIME_2_COMPLETE
Unique Case Identifier	PROCESS_ID
Table space	This field should be left Blank.
Partition Column Names	This field should be left Blank.
Selected Algorithm	This field should be left Blank.
Model Error Statistics	RMSE

1.11.2 Model Training and Scoring

This topic describes the systematic instructions for model training and scoring.

1. From **Home** screen, click **Machine Learning**. Under **Machine Learning**, click **Model Training and Scoring**.
The **Model Training and Scoring** screen displays.
2. Specify the use case name as “PREDPRCTIME” and click **Train Model**.

Note

The user will not be able to train the model if the ML table does not meet the minimum required number of rows.

Number of rows $\geq 20 \times$ Number of columns

1.12 Batch Process Configuration

This topic provides the information about batch process configuration.

The batch Process enables the bank users to identify and close the applications which have reached the expiry date. Currently, Oracle Banking Origination supports the following batch process.

- **Application Expiry**
The application will automatically expire when it stays inactive for the specified period as configured in the business product.
- **Loan Offer Expiry**
The Loan Application will automatically expire if the customer has not accepted the Loan Offer for the specified period as configured in the business product.
- **IPA Expiry**
IPA Application will automatically expire if the IPA is not converted into a Loan application for the specified period as configured in the business product.

Batch Process Configuration

The Branch Code and Frequency schedule need to configure, to enable the Batch processes.

The bank user needs to create a user name **SYSTEM** to run the batch process.

Configure the Branch Code

The user needs to update the proper branch code value in the below table.

Schema – PLATO

Table – PROPERTIES

application – obremo-rpm-batch-services

key – rpmBatch.branchCode

Value – Update the proper branch code.

Configure the Frequency Schedule

The user needs to update the required frequency value in the below table.

Schema – PLATOBATCH

Table – PLATO_BATCH_TASK_TRIGGER_DEFINITIONS

Column – DEFINITION

cron Expression – Update the cron Expression to the required frequency.

1.13 FOP for Advices

This topic describes about FOP for advices.

Oracle Banking Origination provides a facility to download the various advices using a template created in Apache FOP.

1. AdverseAction
2. ApprovalLetterAU
3. CAODOfferIssue
4. CASABankReject
5. CasawithODAp
6. CasawithoutODAp
7. CounterOffer
8. CustOfferReject
9. DebitDecline
10. IpaInitReject
11. IpaOffer
12. LoanApplication
13. LoanApproval
14. LoanInitiation
15. LoanRejection
16. LoansBankReject
17. OfferIssueAU
18. OfferIssue
19. OfferSchedule
20. SavingOffer
21. savingoffer_US
22. SBODOfferIssue
23. TDAplication
24. TDOffer
25. termdepositoffer_US
26. IpaRejection

Prerequisites

This topic describes about prerequisites.

1. Create a new schema for PLATO-REPORT-SERVICE in your domain.
2. Ensure that the datasource is created in weblogic server.

Table 1-104 weblogic server

Domain	weblogic	server
PLATOCMC	Jdbc/CMNCORE	Plato Common Core Server
PLATOSMS	jdbc/sms	Plato-SMS-Server
REPORTSERVICE	jdbc/REPORTSERVICE	Plato-Report-Service-Server

3. Enter the below properties in the plato-config-deploy.env file:

```
flyway.domain.placeholders.report-service.hostname= <http://
<REPORT_SERVICE_HOSTNAME>:<REPORT_SERVICE_PORT> flyway.domain.placeholders.report-
service.server.port=<REPORT_SERVICE_PORT> flyway.domain.placeholders.report-service.domain.jndi=jdbc/
REPORTSERVICE flyway.domain.placeholders.report-service.template-metadata directory=/ scratch/OFLO/report-
service/template_metadata flyway.domain.placeholders.reportservice.outputdirectory=/scratch/OFLO/reportservice/
output/ flyway.domain.placeholders.reportservice.fopconfigfile=/scratch/OFLO/reportservice/ fop.xconf
```

For more details on Oracle Banking Microservices Architecture for **Step 2** and **Step 3**, refer to **Oracle Banking Microservices Platform Foundation Installation Guide**.

4. Create the folder structure mentioned in **Step 3**. Place the “fop.xconf” file in the directory: / scratch/OFLO/report-service
5. Restart plato-config-service
6. Deploy plato-report-services

Once the plato-report-service deployed successfully, ensure that the below tables created in the PLATO-REPORT-SERVICE schema

- ERTB_MSGS
- flyway_schema_history
- OBMA_DOCUMENT_STORE
- OBMA_EXTRACTOR_CONFIG
- OBMA_REPORT_LOG
- OBMA_TEMPLATE_IMAGE
- OBMA_TM_REPORT_METADATA
- OBMA_TM_TEMPLATE_IMAGE
- OBMA_TM_TEMPLATE_METADATA
- OBMA_TW_REPORT_METADATA
- OBMA_TW_TEMPLATE_IMAGE
- OBMA_TW_TEMPLATE_METADATA

7. Deploy the following services for the advices
 - a. obremo-rpm-lo-loanapplications
 - b. obremo-rpm-creditcardapplication-services
 - c. obremo-rpm-sav-account-service
 - d. obremo-rpm-cmn-ipaservices
 - e. obremo-rpm-term-deposit-service

Template Upload Process

This topic describes about the template upload process.

For Template Upload process, refer to **Section 3: Report Template** in *Oracle Banking Microservices Platform Foundation User Guide*.

Table 1-105 Parameters for Report Linkage

Naming Convention	XSL Files
AdverseAction	AdverseAction.xsl
ApprovalLetterAU	ApprovalLetter_AU.xsl
CAODOfferIssue	CAODOfferIssue.xsl
CASABankReject	CASABankReject.xsl
CasawithODAp	CasawithODAp.xsl
CasawithoutODAp	CasawithoutODAp.xsl
CounterOffer	CounterOffer.xsl
CustOfferReject	CustOfferReject.xsl
DebitDecline	DebitDecline.xsl
IpainitReject	IpainitReject.xsl
IpaOffer	IpaOffer.xsl
LoanApplication	LoanApplication.xsl
LoanApproval	LoanApproval.xsl
LoanInitiation	LoanInitiation.xsl
LoanRejection	LoanRejection.xsl
LoansBankReject	LoansBankReject.xsl
OfferIssueAU	OfferIssueAU.xsl
OfferIssue	OfferIssue.xsl
OfferSchedule	OfferSchedule.xsl
SavingOffer	SavingOffer.xsl
savingoffer_US	savingoffer_US.xsl
SBODOfferIssue	SBODOfferIssue.xsl
TDApplication	TDApplication.xsl
TDOffer	TDOffer.xsl
termdepositoffer_US	termdepositoffer_US.xsl
IpaRejection	IpaRejection.xsl

Note

Refer to PDF Attachment for downloading the Account Statement template.

Generate Advices

This topic describes about generate advices.

Oracle Banking Origination generates and stores the advices based the configuration of each advices under the respective stages of the origination process.

1.14 Service Level Agreement (SLA) Maintenance

This topic provides the information about the service level agreement maintenance.

Banks requires to have a Service Level Agreement (SLA) with its customers or as an internal policy of the Bank. This User Guide lists the SLA maintenance requirements in Oracle Banking Origination and other Mid-office Applications.

SLA Maintenance is available based on the Business Process-Stage- Priority combination. It has two screens, one screen for Definition of SLA and another for Authorization/Edit/ Delete.

SLA Maintenance screens are used to calculate Service Level Agreement. The user can Create SLA, and View SLA (for Edit, Copy, Delete).

This topic contains the following subtopics:

- [Create SLA](#)
This topic describes the systematic instructions to create create SLA.
- [View SLA](#)
This topic describes the systemetic instructions to view the SLA.

1.14.1 Create SLA

This topic describes the systematic instructions to create create SLA.

The Create SLA screen enables the bank user to create the SLA Checklist at the Process-Stage-Priority Level.

Specify **User ID** and **Password**, and login to **Home** screen.

1. From **Home** screen, click **Core Maintenance**. Under **Core Maintenance**, click **SLA Maintenance**.
2. Under **SLA Maintenance**, click **Create SLA**.

The **Create SLA** screen displays.

Figure 1-104 Create SLA Maintenance

3. Specify the fields on **Create SLA** screen.

For more information on fields, refer to the field description table below.

Table 1-106 Create SLA – Field Description

Field	Description
Product/Application Code	Click Search icon and select the Product or Application Code.
Product/Application Name	Displays the name of the Product/Application.
Business Process Code	Click Search icon and select the Business Process Code for which the SLA maintenance has to be made.
Business Process Name	Displays the Business Process name based on the Business Process code selected.
Branch	Select the branch code for which SLA maintenance has to be done.
Branch Working Hours	Click the icon to view the branch working hours.
Include for SLA Calculation	Select the checkbox to consider the below options for the SLA calculation. The available options are: • Branch Holidays • Currency Holidays • Hold Time • Customer Clarification • Off Branch Time Transactions

4. Click **Calculate** to view data will appear for the selected Business process code
5. Click **Save** to save the details.
6. Click **Cancel** to discard the changes and close the screen.

1.14.2 View SLA

This topic describes the systemetic instructions to view the SLA.

The user can view the summary of SLA's maintained in the form of tiles. The user can view the maintained SLA, if the SLA is already created in the system. The user can also create a new SLA using View SLA screen, by clicking the '+' icon.

Specify **User ID** and **Password**, and login to **Home** screen.

1. On **Home** screen, click **Core Maintenance**. Under **Core Maintenance**, click **SLA Maintenance**.
2. Under **SLA Maintenance**, click **View SLA**.

The **View SLA** screen displays.

Figure 1-105 View SLA Maintenance

3. For more information on fields, refer to the field description table below:

Table 1-107 View SLA – Field Description

Field	Description
Process Code	Displays the process code of the SLA Maintenance configured.
Application	Displays the name of the application
Authorization Status	Displays the authorization status of the record. The options are: • Authorized • Rejected • Unauthorized
Record Status	Displays the status of the record. The options are: • Open • Closed
Modification Number	Displays the number of modification performed on the record.

1.15 Customer Dedupe Check

This topic provides the information about customer dedupe check.

Bank level configuration is possible to specify whether the system should support Customer Dedupe check for any customers. This configurations are set in the **Origination Preferences** screen.

1.16 Application Dedupe Check

This topic provides the information about application dedupe check.

Bank level configuration is possible to specify whether the system should support Application Dedupe check for any applications. This configurations are set in the **Origination Preferences** screen.

1.17 Task Allocation

This topic provides the information about the Task Allocation.

The Dynamic Task Allocation intends to allocate the tasks/stages dynamically to a user based on pre-configured rule and rule groups. This feature will enable allocation of tasks to different users based on attributes like Branch, Currency, Loan Amount etc. for more details refer to **FACT list for Dynamic Task Allocation**.

Task Allocation will use the existing Rules and Rule Group framework. These RULES can be configured using a set of factory-shipped **FACTS**. Additional facts can also be created as required. Rules are defined first with relevant conditions.

In the Rule Group definition, rules are added with priority assigned for each rule. Rule group will be linked to a business process/stage in the backend.

Once the task is created for a business process, if there is any task allocation linked to that stage, system will run the rule and assign the task accordingly. If all the rules are run without meeting any condition, task will remain as unassigned in free task.

For more details on rule and rule group creation refer to [Rule](#)

2

Error Codes and Messages

This topic contains error codes and messages.

Table 2-1 Error Codes and Messages

Error Code	Messages
GCS-AUTH-02	Valid modifications for approval were not sent. Failed to match
GCS-AUTH-03	Maker cannot authorize
GCS-AUTH-04	No Valid unauthroized modifications found for approval.
GCS-CLOS-01	Record Already Closed
GCS-CLOS-03	Unauthorized record cannot be closed, it can be deleted before first authorization
GCS-COM-001	Record does not exist
GCS-COM-002	Invalid version sent, operation can be performed only on latest version
GCS-COM-003	Please Send Proper Modification Number
GCS-COM-004	Please send Maker Id in the request
GCS-COM-005	Request is Null. Please Resend with Proper Values
GCS-COM-006	Unable to parse JSON
GCS-COM-008	Modifications should be consecutive.
GCS-COM-009	Resource ID cannot be blank or "null".
GCS-COM-011	Argghhh, \$1 failed to update.
GCS-DEL-003	Modifications didnt match valid unauthorized modifications that can be deleted for this record
GCS-DEL-004	Send all unauthorized modifications to be deleted for record that is not authorized even once.
GCS-DEL-005	Only Maker of first version of record can delete modifications of record that is not once authorized.
GCS-DEL-006	No valid unauthroized modifications found for deleting
GCS-DEL-007	Failed to delete. Only maker of the modification(s) can delete.
GCS-MOD-001	Closed Record cannot be modified
GCS-MOD-003	Record marked for close, cannot modify.
GCS-MOD-004	Only maker of the record can modify before once auth
GCS-MOD-005	Not amendable field, cannot modify
GCS-MOD-006	Scorecard Id cannot be modified (Natural Key)
GCS-MOD-007	Psssttt, only the maker can modify the pending records.
GCS-REOP-01	Unauthorized Record cannot be Reopened
GCS-REOP-02	Failed to Reopen the Record, cannot reopen Open records

Table 2-1 (Cont.) Error Codes and Messages

Error Code	Messages
GCS-REOP-04	Unauthorized record cannot be reopened, record should be closed and authorized
GCS-SAV-001	Record already exists
RPM_BP_001	Source stage value should be either Y/N not valid
RPM-ATR-001	Invalid Date Format. Expected yyyy-MM-dd.
RPM-BP-002	Cannot have more than one source stage
RPM-BP-003	DatasegmentCode not valid
RPM-BP-004	DocumentType Code not valid
RPM-BP-005	Life cycle not valid
RPM-BP-006	Unable to \$1 Business Process as \$2 datasegment has the following dependencies \$3 in lifecycle \$4 ,which have not been mapped prior to it!
RPM-BP-007	Unable to \$1 Business Process as the mandatory data segments \$2 for the \$3 lifecycle have not been mapped!
RPM-BP-008	In \$1 stage of \$2 Business Process,duplicate datasegements - \$3 are not allowed
RPM-BP-009	Record already exist with same Lifecycle and Business Product
RPM-BP-010	At \$1 in \$2 stage of \$3 Business Process,duplicate record for - \$4 exist
RPM-BP-011	At \$1 in \$2 stage of \$3 Business Process,Business Product List is invalid.
RPM-BP-012	Business Product Code is Invalid
RPM-BP-013	Stage \$1 should have atleast one datasegment attached
RPM-BPA-001	Business Product Image Cannot be Null
RPM-BP-CMN-001	Exception Occurred while Parsing Date
RPM-BPD-001	Expiry date should be greater than Start date
RPM-CMN-000	Illegal State Exception
RPM-CMN-001	Exception Occurred while Executing Query
RPM-CMN-002	Number format exception
RPM-CMN-003	Server Error Occurred during API call
RPM-CMN-004	Illegal State Exception
RPM-CMN-005	JTA Transaction unexpectedly rolled back
RPM-CMN-006	Exception Occurred while creating Bean
RPM-CMN-007	Internal server error occurred
RPM-CM-QUSC-001	Individual Score cannot be greater than 100
RPM-CM-QUSC-002	Please provide a valid value for Score Card Id
RPM-CM-QUSC-003	Please provide a valid value for Score Card Description
RPM-CM-QUSC-004	Atleast one Question is mandatory to save
RPM-CM-QUSC-005	Atleast one Answer is mandatory for each Question
RPM-CM-QUSC-006	Please provide a valid value for Question Id

Table 2-1 (Cont.) Error Codes and Messages

Error Code	Messages
RPM-CM-QUSC-007	Please provide a valid value for Questions
RPM-CM-QUSC-008	Please provide a valid value for Sequence Question Number
RPM-CM-QUSC-009	Please provide a valid value for Sequence Number
RPM-CM-QUSC-010	Please provide a valid value for Possible Answers
RPM-CM-QUSC-011	Please provide a valid value for Score
RPM-CM-QUSC-012	Please provide a valid value for Sequence Answer Number
RPM-CM-QUSC-013	Atleast one Attribute is mandatory to save
RPM-CM-QUSC-014	Please provide a valid value for Attribute Id
RPM-CM-QUSC-015	Please provide a valid value for Attribute Name
RPM-CM-QUSC-016	The Max length of Attribute Name is exceeded (Max: 50 characters)
RPM-CM-QUSC-017	Please provide a valid value for Sequence Attribute Number
RPM-CM-QUSC-018	Please provide a valid value for Attribute Type
RPM-CM-QUSC-019	Atleast one Answer is mandatory for each Attribute
RPM-CM-QUSC-020	Please provide a valid value for Attribute List
RPM-CM-QUSC-021	The Max length of Attribute List is exceeded (Max: 100 characters)
RPM-CM-QUSC-022	Please provide a valid value for Range From
RPM-CM-QUSC-023	Please provide a valid value for Range To
RPM-COM-003	Net interest Rate is incorrect.
RPM-COM-004	Application Number cannot be null
RPM-COM-005	\$1 is not valid.
RPM-COM-006	Currency cannot be null
RPM-COM-007	Branch cannot be null
RPM-COM-012	Fund By Amount can not be null
RPM-INTR-001	Net Interest Rate is invalid
RPM-INTRST-001	Overall percentage should be equal to 100%
RPM-INTRST-002	Guardian details is required for minor \$1
RPM-MNDT-001	Amount_To should not be null if Amount_From is given
RPM-MNDT-002	Amount_From should not be null if Amount_To is given
RPM-MNDT-003	Amount_To should be greater than Amount_From
RPM-SA-INIT-01	Failed to Initialize
RPM-SAV-001	Transaction status is not completed
RPM-SC-CMN-001	Please provide a valid value for Process Reference Number
RPM-SC-CMN-002	Please provide a valid value for Business Product Code
RPM-SC-CMN-003	No Business Product found this Process Reference Number
RPM-SC-CMN-004	No Applicants are found for this Application Number

Table 2-1 (Cont.) Error Codes and Messages

Error Code	Messages
RPM-SC-CMN-005	Qualitative Scorecard Configuration from Business Product is empty
RPM-SC-CMN-006	No Scorecard details found from the Scorecard Configuration
RPM-SC-CMN-007	Quantitative Scorecard Configuration from Business Product is empty
RPM-SC-CMN-008	The Max length of Score Card Id is exceeded (Max: 15 characters)
RPM-SC-CMN-009	The Max length of Score Card Description is exceeded (Max: 50 characters)
RPM-SC-CMN-010	The Max length of Questions is exceeded (Max: 300 characters)
RPM-SC-CMN-011	The Max length of Possible Answers is exceeded (Max: 100 characters)
RPM-SC-CMN-012	The Scorecard - (\$1) configured in Qualitative Configuration is Closed. Please modify the Configuration to Proceed
RPM-SC-CMN-013	The Scorecard - (\$1) configured in Quantitative Configuration is Closed. Please modify the Configuration to Proceed
RPM-SC-QCDS-001	Please select a valid dropdown value for Answer
RPM-CC-CMN-001	Process Reference Number cannot be blank
RPM-CC-CMN-002	Error in parsing date
RPM-CC-CMN-003	Business Product Code cannot be null
RPM-CC-CMN-004	Business Product Details is Empty
RPM-CC-CMN-005	UDE is not found for this component

FACT list for Dynamic Task Allocation

This topic lists all the FACTs for dynamic task.

The facts required to configure the dynamic task allocation are listed below:

- oDLimitAmount
- currencyCode
- branchCode
- businessProductCode
- priority
- applicationDate
- applicationNumber
- processRefNumber
- amount
- branch
- currentBranch
- user
- customerNumber
- processName
- processCode
- stage
- lifecycleCode

Functional Activity Codes

This topic contains functional activity codes of Oracle Banking Origination.

Below mentioned are the functional activity codes of Oracle Banking origination

- [Maintenance](#)
This topic contains functional activity codes of maintenance.
- [Workflow Processing](#)
This topic contains the functional activity codes of work flow processing.
- [Workflow Stage](#)
This topic contains the functional activity codes of work flow stage.

7.1 Maintenance

This topic contains functional activity codes of maintenance.

Table 7-1 Functional Activity Code of Maintenance

ScreenName/Api Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_AUTHORI ZE	Authorize	To authorize the business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_ACTION	Fetch	To fetch already created business product details
Business Product Catalogue	RPM_FA_BUSINESSPR OD_GETPRODUCTCAT ALOGUE	Fetch	To fetch the product catalogue with list of products.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_AGGREG ATE	Fetch	To fetch already created resource aggregate details of the business product.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_HISTORY	Fetch	To fetch history of the business products.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_LOV_VALI DATION	Validate	To validate the list of values that are configured in the business product.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_REM_LOC K	Unlock	To remove resource lock on the already created business product.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_UNAUTH	Fetch	To fetch the unauthorized resource record of the business product.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_VALIDATI ON	Validate	To validate the resource of business product.

Table 7-1 (Cont.) Functional Activity Code of Maintenance

ScreenName/Api Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_SUBMIT	Submit	To submit the added business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_PROD_AG GREGATE	Fetch	To fetch the business product details based on the product code.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_NEW	New	To create the new business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_AMEND	Amend	To modify the business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_DELETE	Delete	To delete the business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_VIEW	Fetch	To view the business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_AUTHORI ZE	Authorize	To authorize the business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_AUTHQUE RY	Authorize	To authorize the query of the business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_REOPEN	Reopen	To reopen the already closed business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_CLOSE	Close	To close the business product details.
Business Product Details	RPM_FA_BUSINESSPR ODDETAILS_VIEWALL	Fetch	To fetch all the business product details.
Business Product	RPM_FA_BUSINESSPR OD_GETBYPRODUCTT YPEWEB	Fetch	To fetch the business product details whose product type is webapi.
Widget Applications	RPM_FA_WD_MY_APP LICATION	Fetch	To fetch the
Widget Trend	RPM_FA_WD_MY_TRE ND	Fetch	To fetch the details in the view trend widget.
Widget Search	RPM_FA_WD_MY_SEA RCH	Fetch	To fetch the search details in the search widget.
Widget Loan Expiry	RPM_FA_WD_MY_LOA N_EXPIRY	Fetch	To fetch the loan expired applications based on the Loan Offer in the dashboard widget.
Widget Conversation	RPM_FA_WD_MY_CON VERSION	Fetch	To fetch the application conversion details in the dashboard widget.
Widget Loan Exposure	RPM_FA_WD_MY_LOA N_EXPOSURE	Fetch	To fetch the loan exposure details in the dashboard widget.
Widget Loan Offer	RPM_FA_WD_MY_LOA N_OFFER	Fetch	To fetch the loan offer details in the dashboard widget.

Table 7-1 (Cont.) Functional Activity Code of Maintenance

ScreenName/Api Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Widget Parked Loan	RPM_FA_WD_MY_PARKED_LOAN	Fetch	To fetch the parked loan applications in the dashboard widget.
Widget Current Account	RPM_FA_WD_MY_CURRENT	Fetch	To fetch the list of current account in the dashboard widget.
Widget Loan	RPM_FA_WD_MY_LOAN	Fetch	To fetch the loan application based on the logged in user in the dashboard widget.
Widget Product Expiry	RPM_FA_WD_MY_PRODUCT_EXPIRY	Fetch	To fetch the list of application that are about to get expired in the dashboard widget.
Widget Term Deposits	RPM_FA_WD_MY_TD	Fetch	To remove resource lock on the already created widget term.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_REOPEN	Fetch	To reopen the already closed business process maintenance.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_VIEW	Fetch	To fetch the maintenance of business process.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_NEW	New	To create a new the business process.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_DELETE	Delete	To delete the already maintained business process.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_CLOSE	Close	To close the already maintained business process.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_AUTHQUERY	Fetch	To authorize the query of the business process details.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_AUTHORIZE	Authorize	To authorize the business process.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_PUT	Unlock	To unlock and modify the business process.
Business Process Maintenance	RPM_FA_GET_DOC_BY_BPCODE	Fetch	To fetch the documents based on the business process code.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_AUTHORIZE	Authorize	To authorize the maintenance of business process.
Business Process Maintenance	RPM_FA_BUSINESSPROCESS_VIEW	Fetch	To fetch the maintenance of business process.
Business Product	RPM_FA_BUSINESSPRODUCT_GETBYPRODUCTTYPE	Fetch	To fetch the product type while maintaining the business process.

Table 7-1 (Cont.) Functional Activity Code of Maintenance

ScreenName/Api Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_GETBYBUSIN ESSPRODUCT	Fetch	To fetch the business product code.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_REOPEN	Fetch	To reopen the business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_AUTHQUERY	Fetch	To authorise the query of the business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_AMEND	Unlock	To modify the business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_VIEW	Fetch	To view the business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_DELETE	Delete	To delete the business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_CLOSE	Close	To close the business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_NEW	New	To create the new business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_VIEWALL	Fetch	To fetch and view all the business product attributes.
Business Product Attributes	RPM_FA_BUSINESSPR ODATTR_AUTHORIZE	Authorize	To authorize the business product attributes.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_GETBYBUSI NESSPRODUCTS	Fetch	To fetch the business process based on the business product codes.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_NEW	New	To create the new business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_VIEWALL	Fetch	To view all the business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_CLOSE	Close	To close the business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_REOPEN	Fetch	To reopen the business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_AUTHQUERY	Fetch	To authorise query of the business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_AUTHORIZE	Authorize	To authorize the business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_AMEND	Unlock	To modify the business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_DELETE	Delete	To delete the business product preferences.
Business Product Preferences	RPM_FA_BUSINESSPR ODPREF_VIEW	Fetch	To view the business product preferences.

Table 7-1 (Cont.) Functional Activity Code of Maintenance

ScreenName/Api Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Business Product Host	RPM_FA_BUSINESSPR ODHOST_DELETE	Delete	To delete the business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_VIEW	Fetch	To fetch the business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_AUTHORIZE	Authorize	To authorize the business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_AUTHQUERY	Fetch	To authorize query of the business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_REOPEN	Fetch	To reopen the business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_CLOSE	Close	To close the business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_VIEWALL	Fetch	To view all the business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_NEW	New	To create the new business product host.
Business Product Host	RPM_FA_BUSINESSPR ODHOST_AMEND	Unlock	To modify the business product host.
Origin Preferences Maintenance Reject	RPM_FA_ORIGINPREF ERENCES_MA_REJECT	Reject	To reject the maintained of origin preferences maintenance.
Origin Preferences	RPM_FA_ORIGINPREF ERENCES_ACTION	Action	To perform actions on the already maintained origination preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_AMND	Unlock	To unlock and modify the maintained origination preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_AUTHORIZE	Authorize	To authorize the maintained origination preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_AUTHQUERY	Fetch	To fetch the authorize query of the maintained origination preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_CLOSE	Close	To close the already maintained origination preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_VIEWCHANGES	Fetch	To fetch the changes made in the existing origination preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_HISTORY	Fetch	To fetch the history of the maintained origination preference.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_LOV	Fetch	To fetch the validation of the list of value of origination preference.
Origin Preferences Maintenance	RPM_FA_ORIGINPREF ERENCES_MA_NEW	New	To new the maintenance of origin preferences.

Table 7-1 (Cont.) Functional Activity Code of Maintenance

ScreenName/Api Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Origin Preferences Maintenance	RPM_FA_ORIGINPREFERENCES_MA_REOPEN	Fetch	To fetch the delete record to reopen the maintained origination preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREFERENCES_MA_VIEW	Fetch	To fetch the maintenance of origin preferences.
Origin Preferences Maintenance	RPM_FA_ORIGINPREFERENCES_MA_VIEWALL	Fetch	To fetch and view all records of origination preference.
Origin Preferences Maintenance	RPM_FA_ORIGINPREFERENCES_MA_DELETE	Delete	To delete the maintained origination preferences.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_REJECT	Reject	To reject the maintained reason codes.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_HISTORY	Fetch	To fetch the history of the maintained reason codes.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_AUTHORIZE	Authorize	To authorize the maintenance of reason code.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_AUTHQUERY	Fetch	To fetch the authorize query of the maintained of reason code.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_CLOSE	Close	To close the maintenance of reason code.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_DELETE	Delete	To delete the maintenance of reason code.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_LOV	Fetch	To fetch the validation of list of value reason codes.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_NEW	New	To create new the maintenance of reason code.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_REOPEN	Fetch	To fetch already delete record of reason code to reopen.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_VIEW	Fetch	To fetch the records to view the maintenance of reason code.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_VIEWALL	Fetch	To fetch the records to view all the maintenance of reason code.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_VIEWCHANGES	Fetch	To fetch the records to view all the maintenance of reason code.

Table 7-1 (Cont.) Functional Activity Code of Maintenance

ScreenName/Api Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Reason Code Maintenance	RPM_FA_REASONCODE_ACTION	Action	To perform actions on the already maintained reason codes.
Reason Get Id	RPM_FA_REASON_GET_ID	Fetch	To fetch the reason code IDs.
Save Reason Description	RPM_FA_SAVE_REASON_DESCRIPTION	Save	To save the description to the already created reason code.
Reason Service API	RPM_FA_FETCH_BANK_REASON_SERVICE_API	Fetch	To fetch the reason service api.
Reason Code Maintenance	RPM_FA_REASONCODE_MA_AMND	Unlock	To unlock t and modify the maintenance of reason code.
WD SLA Summary	RPM_FA_WD_SLA_SUMMARY	Fetch	To fetch the summary
Business Process	RPM_FA_BUSINESSPROCESS_GET	Fetch	To fetch the maintenance of business.
Business Process History	RPM_FA_BUSINESSPROCESS_HISTORY	Fetch	To fetch the history of the business process.
Business Product Preference	RPM_FA_BUSINESSPROCESS_PREF_ACTION	Fetch	To perform actions on already maintained business process preferences.
Business Product Host	RPM_FA_BUSINESSPROCESS_HOST_ACTION	Fetch	To perform actions on already maintained business process host.
Business Process	RPM_FA_BUSINESSPROCESS_POST	Fetch	To save the business process record.
Business Process	RPM_FA_BUSINESSPROCESS_GETBY_ID	Fetch	To fetch the business process record based on ID.
Business Product Attributes	RPM_FA_BUSINESSPROCESS_ATTR_ACTION	Fetch	To view all the business product attributes.

7.2 Workflow Processing

This topic contains the functional activity codes of work flow processing.

Table 7-2 Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Business Product Attributes	RPM_FA_BUSINESSPRODUCT_ACTION	Fetch	View all the business product attributes.
Savings Account	RPM_FA_HO_SAVINGACCOUNT_NEW	New	Create new saving account
Channel Allow	RPM_FA_HO_CHANNEL_ALLOW_FETCH	Fetch	Fetch channel allow list
Collateral Creation	RPM_FA_HO_COLLATERAL_CREATION	New	Create collateral
Collateral Details	RPM_FA_HO_COLLATERAL_DETAILS_FETCH	Fetch	Fetch collateral details
Collateral Summary	RPM_FA_HO_COLLATERAL_SUMMARY_FETCH	Fetch	Fetch collateral summary
Initiate Finicity	RPM_FA_INITIATE_FINICITY_CALL	New	Initiate finicity call
Finicity Audit Details	RPM_FA_GET_ALL_FINICITY_AUDIT_DTLS	Fetch	Get all finicity audit details
Refresh Finicity	RPM_FA_REFRESH_FINICITY	Unlock	Refresh finicity details
Finicity Customer	RPM_FA_DELETE_FINICITY_CUSTOMER	Unlock	Delete finicity customer
Webhook Event	RPM_FA_LOG_WEBHOOK_EVENT	Unlock	Log webhook event
Customer Liability	RPM_FA_HO_LINK_CUSTOMER_LIABILITY	Unlock	Link customer with liability
Customer Liability	RPM_FA_HO_CUSTOMER_LIABILITY_FETCH	Fetch	Fetch customer liability details
Liability	RPM_FA_HO_LIABILITY_CREATE	New	Create liability
Casa Interest	RPM_FA_HO_CASAINTEREST_FETCH	Fetch	Getting interest details
Liability Product Details	RPM_FA_HO_LIABILITYPRODUCT_DETAILS_FETCH	Fetch	Fetch liability product details
Liability Product	RPM_FA_HO_LIABILITYPRODUCT_FETCH	Fetch	Fetch liability products
Pay Operation Instruction	RPM_FA_PAY_OPERATING_INSTRUCTION_CREATE	New	Create operating instruction

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_C ODE	Action	DESCRIPTION
Loan Product Details	RPM_FA_HO_LOANPRODU CT_DETAILS_FETCH	Fetch	Fetch loan product details
Default Product Preferences	RPM_FA_DEFAULT_PRODU CT_PREFERENCES	Fetch	Get default product preferences
Loan Charge Details	RPM_FA_LOAN_CHARGE_D ETAILS	Fetch	Get loan charge details
Loan Interest Details	RPM_FA_LOAN_INTEREST_ DETAILS	Simulate	Get loan interest details
Loan Account	RPM_FA_HO_LOANACCOU NT_SIMULATE	Fetch	Create loan account
Loan Account	RPM_FA_HO_LOANACCOU NT_CREATE	New	Create loan account
Loan Product Details	RPM_FA_HO_LOANPRODU CT_FETCH	Fetch	Fetch loan product
Term Deposit Interest Details	RPM_FA_TD_INTEREST_DE TAILS	Fetch	Get term deposit interest details
Term Deposit GL Account s	RPM_FA_TD_FETCH_GL_A CCOUNTS	Fetch	Get term deposit GL account details
Term Deposit Account	RPM_FA_HO_TDACCOUNT_ SIMULATE	Simulate	Create loan account
Term Deposit Account	RPM_FA_HO_TDACCOUNT_ CREATE	New	Create loan account
Account Opening Date	RPM_FA_ML_ACCPENDAT E	Unlock	Calculate the expected account opening date
Process Time Prediction	RPM_FA_ML_PROCESS_TI ME_PRED_GET	Fetch	Get process time prediction ML usecase data
Process Time Prediction	RPM_FA_ML_PROCESS_TI ME_PRED_SAVE	Save	Save process time prediction ML usecase data from other services
Stage Movement	RPM_FA_ML_STAGE_MOVE MENT	Unlock	Update ML table based on stage movement of a process

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Casa Offer Details	RPM_FA_PD_GET_CASA_OFFER_DETAILS	Fetch	Get CASA offer details from external system
Casa Offer Decision	RPM_FA_PD_CASA_OFFER_DECISION	Fetch	CASA offer decision
Aggregate Details	RPM_FA_PD_AGGREGATE_DETAILS	Fetch	Get application aggregate details
Process Driver Channel	RPM_FA_PROCESS_DRIVE_R_CHANNEL_INITIATE	New	External channel application initiation
Process Driver Channel	RPM_FA_PROCESS_DRIVE_R_CHANNEL_SUBMIT	Save	External channel application initiation stage submit
Loan Offer Details	RPM_FA_PD_GET_LOAN_OFFER_DETAILS	Fetch	Get loan offer details from external system
Loan Offer Decision	RPM_FA_PD_LOAN_OFFER_DECISION	Authorize	Accept Loan Offer Decision from External System
Process Driver Channel	RPM_FA_PROCESS_DRIVE_R_CHANNEL_GET_DOCUMENTLIST	Fetch	Get all document list configured for an Application
Process Driver Channel	RPM_FA_PROCESS_DRIVE_R_CHANNEL_GET_DATA	Fetch	External Channel Application Get Data
Stage Auto	RPM_FA_PD_STAGE_AUTO_SUBMIT	Save	Auto Submit Current Stage
Transaction Details	RPM_FA_PD_TRANSACTION_DETAILS	Fetch	Get Transaction Details
Process Driver Process	RPM_FA_PROCESS_DRIVE_R_PROCESS_SUMMARY	Fetch	Get entire summary for a Process
Process Driver ATM Process	RPM_FA_PROCESS_DRIVE_R_ATM_PROCESS_DETAILS	Fetch	Get Process Details by Process Reference Number
Process Driver App Transaction	RPM_FA_PROCESS_DRIVE_R_APP_TXN_MASTER	Fetch	Get Process Details by Application Number
Process Driver Cart	RPM_FA_PROCESS_DRIVE_R_DELETE_CART	Delete	Delete items from cart
Process Driver Cart	RPM_FA_PROCESS_DRIVE_R_CLEAR_CART	Delete	Clear items from cart

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Process Driver Cart	RPM_FA_PROCESS_DRIVE R_GET_CART_DETAILS	Fetch	Get items from cart
Process Driver Cart	RPM_FA_PROCESS_DRIVE R_ADD_CART	Save	Add items to Individual Products cart
Process Driver Comment	RPM_FA_PROCESS_DRIVE R_COMMENT	Fetch	Get Stage comments
Process Driver Stage	RPM_FA_PROCESS_DRIVE R_STAGE_SUBMIT	Save	Stage Submit button
Process Driver Advice	RPM_FA_PROCESS_DRIVE R_GET_ADVICE_PREVIEW	Fetch	Display preview of advice
Process Driver App Dedupe	RPM_FA_PROCESS_DRIVE R_APP_DEDUPE_CHECKDETAILS	Fetch	Check application dedupe
WF Task Details	RPM_FA_PD_GET_WF_TASK_DETAILS	Fetch	Get workflow task details given a workflowid
Process Driver Stage	RPM_FA_PROCESS_DRIVE R_STAGE_SUMMARY	Fetch	Stage Summary datasegment tile display
Process Driver Initiate	RPM_FA_PROCESS_DRIVE R_INITIATE	New	Initiate Product from Product Catalogue
Handoff Retry	RPM_FA_PD_HANDOFF_RETRY	Unlock	Handoff Retry Automation for Instant Account Creation Workflows
Process Driver Full Init	RPM_FA_PROCESS_DRIVE R_FULLINIT	New	Full Application Initiation
Process Driver Audit	RPM_FA_PROCESS_DRIVE R_AUDIT_DETAILS	Fetch	Datasegment Audit Details display
Process Driver Stage	RPM_FA_PROCESS_DRIVE R_VALIDATESTAGE	Validate	Validate Stage for mandatory datasegments, documents, checklists etc
Process Driver Advice	RPM_FA_PROCESS_DRIVE R_SEND_ADVICE_MAIL	New	Process Driver create and send advice mail
Process Status	RPM_FA_PROCESS_STATUSES	Fetch	Get Process Statuses under same Application Number
Process Driver Product Details	RPM_FA_PROCESS_DRIVE R_PRODDetailLIST	Fetch	Get Business Product details for all selected Products

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Process Driver Product Details	RPM_FA_PROCESS_DRIVER_PRODUCT_DETAILS_DS_STATUS	Unlock	Update Product Details Datasegment TCM Status
Process Driver Product Details	RPM_FA_PROCESS_DRIVER_GET_PRODUCT_DETAILS	Fetch	Get Product Details for Product Details Datasegment
OBDXIPA Inquiry	RPM_FA_OBDXIPA_INQUIRY	Fetch	Inquire about In-Principle Approvals
Inquiry Service	RPM_FA_INQUIRY_SERVICE	Fetch	Process Details Inquiry for External System
Batch Cred App	RPM_FA_BATCH_CREDAPP_ALERT	Fetch	Get Credit Applications for expiry for batch processing
Batch Cred App	RPM_FA_BATCH_CREDAPP_EXP	Fetch	Get Credit Applications for expiry for batch processing
Batch App Offer	RPM_FA_BATCH_APPOFFEREXP	Fetch	Get Applications for which Loan Offer is expiring
IPA Offer Applications	RPM_FA_IPA_OF_EXP_APP	Fetch	Get IPA Offer Applications Near Expiry
Batch App Expiry	RPM_FA_BATCH_APPEXP	Fetch	Get Applications for expiry for batch processing
IPA Application Details	RPM_FA_APP_DETAILS	Fetch	Dashboard Data - Get IPA Application Details
Conversion Analysis	RPM_FA_CONVERSION_DETAILS	Fetch	Dashboard Data - Get Conversion Analysis Details
Loan Offer Details	RPM_FA_LOANOFFER_DETAILS	Fetch	Get Loan offer details
Reportee List	RPM_FA_REPORTTEES_LIST	Fetch	Get Reportee List
Application Expiry Details	RPM_FA_DASHBOARD_APP_EXPIRYDETAILS	Fetch	Dashboard Data - Get data for Applications for expiry for batch processing
Application Expiry	RPM_FA_DASHBOARD_APP_EXPIRY	Fetch	Dashboard Data - Get list of Applications for expiry for batch processing
Loan Expiry Details	RPM_FA_DASHBOARD_LOAN_EXPIRYDETAILS	Fetch	Dashboard Data - Get data for Applications for which Loan Offer is expiring

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Loan Offer Expiry	RPM_FA_DASHBOARD_LOANEXPIRY	Fetch	Dashboard Data - Get list of Applications for which Loan Offer is expiring
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_NEW_MY_APPLICATION	Fetch	Dashboard Widget - List of all Applications associated with the User
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_ALL_APPLICATIONS	Fetch	Dashboard Widget - List of all Applications
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_PARKEDLOAN	Fetch	Dashboard Widget - View list of Loans in progress
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_COLLATERAL	Fetch	Dashboard Data - Collateral Details
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_CONVERSION_ANALYSIS	Fetch	Dashboard Data - Conversion Analysis
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_LOAN_OFFER_STATUS	Fetch	Dashboard Data - Loan offer status
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_ACCOUNT_OPENING_TREND	New	Dashboard Data - Data for Account opening trend
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_DASHBOARD_MY_APPLICATION	Fetch	Dashboard Data - Data for User specific Applications
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_UPDATE_DASHBOARD	Unlock	Update Projection table data
Process Driver Dashboard	RPM_FA_PROCESS_DRIVER_POST_DASHBOARD	Save	Save Projection table data
Process Driver Products	RPM_FA_PROCESS_DRIVER_FREQUENT_ACCESSED_PRODUCTS	Fetch	Fetch frequent accessed products
Process Driver Inquiry	RPM_FA_PROCESS_DRIVER_INQUIRY	Fetch	Process Details Inquiry

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Process Driver Dashboard	RPM_FA_PROCESS_DRIVE R_Dashboard_APPSEARCH	Fetch	Dashboard Widget - Details for Application Search
Process Driver Dashboard	RPM_FA_PROCESS_DRIVE R_Dashboard_PRODDDETAILS	Fetch	Dashboard Widget - Details of all Processes for an Application Number
IPA Application Details	RPM_FA_IPA_APPDETAILS	Fetch	Get IPA Application Details
Process Driver Dashboard	RPM_FA_PROCESS_DRIVE R_Dashboard_STAGEDETAILS	Fetch	Dashboard Widget - Stage Details for a Process
Lifecycle Code View	RPM_FA_LIFE_CYCLE_CODE_VIEW	Fetch	Fetch OFLO maintained drop down lists (types of type)
App Maintenance BIC Codes	RPM_FA_SERV_APP_MAINT T_BIC_CODES	Fetch	Get BIC Codes List
App Maintenance Details	RPM_FA_GET_APP_MAINT _DTLS	Fetch	Get App Maintenance Details
OCR Extract Document	RPM_FA_OCR_EXTRACT_DOCUMENT_CODES	Fetch	Get OCR EXTRACT DOCUMENT Codes List
App Maintenance BIC Codes	RPM_FA_APP_MAINT_BIC_CODES	Fetch	Get BIC Codes List
OCR Extract Document	RPM_FA_OCR_EXTRACT_DOCUMENT_FIELDS	Fetch	Get OCR EXTRACT DOCUMENT FIELDS List
App Maintenance	RPM_FA_APPLICATION_MAINT_LOV	Validate	Validate Application Maintenance List of Values
App Maintenance Core Accounts	RPM_FA_SERV_APP_MAINT T_CORE_ACCOUNTS	Fetch	Get Existing CoreAccounts List

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_C ODE	Action	DESCRIPTION
App Mainte nance Codes	RPM_FA_APP_MAINT_VM_ CODES	Fetch	Get Validation Model Codes
App Paramet ers	OFLO_FA_APP_PARAM	Fetch	Fetch Application Parameters
App Mainte nance Data Segment	RPM_FA_APP_MAINT_DATS EGMENT_DEPENDENCY_VI EW	Fetch	View Datasegment Dependency
App Mainte nance Data Segment	RPM_FA_APP_MAINT_DATS EGMENT_DEPENDENCY_N EW	New	Create new Datasegment Dependency
App Mainte nance Data Segment	RPM_FA_APP_MAINT_DATS EGMENT_MAPPING_NEW	New	Create new Datasegment Dependency Mapping
App Mainte nance Data Segment	RPM_FA_APP_MAINT_DATS EGMENT_MAPPING_VIEW	Fetch	View Datasegment Dependency Mapping
Save Docume nt Linkage	RPM_FA_SAVE_DOCUMEN T_LINKAGE	Save	Linkage a document with process reference number
Clarificat ion Details	OFLO_FA_CLARIF_GET_BY _PROCESSREFNO	Fetch	Get Clarification Details based on Process Reference Number
Clarificat ion Details	OFLO_FA_CLARIF_CREATE	New	Create Clarification Details
Clarificat ion Details	OFLO_FA_CLARIF_GET_BY _ID	Fetch	Get Clarification Details based on ID
Clarificat ion Details	OFLO_FA_CLARIF_NOTIF	Notify Clarificat ion Details raised via Alerts	Notify Clarification Details raised via Alerts
Clarificat ion Details	OFLO_FA_CLARIF_PROCES S_STATUS	Fetch	Fetch the status of clarifications for a Process

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_CODE	Action	DESCRIPTION
Clarification Details	OFLO_FA_CLARIF_MODIFY	Unlock	Modify Clarification Details
Casa DS Account Details	RPM_FA_CASA_DS_ACCOUNT_DETAILS_GETBY_ID	Fetch	Account details get by ID
Casa DS Account Details	RPM_FA_CASA_DS_ACCOUNT_DETAILS_GETALL	Fetch	Account details get all records
Casa DS Account Details	RPM_FA_CASA_DS_ACCOUNT_DETAILS_DELETE_RECORD	Delete	Account details delete record
Casa DS Account Details	RPM_FA_CASA_DS_ACCOUNT_DETAILS_SAVE_RECORD	Save	Account details save record
Casa Initial Funding	RPM_FA_CASA_ISINITIALFUNDING	Fetch	Is Initial Funding Required
Casa Valid Currency	RPM_FA_CASA_VALID_CURRENCY_LIST	Fetch	Get all Valid Currency for business product
Casa DS Account Details	RPM_FA_CASA_DS_ACCOUNT_DETAILS_UPDATE_RECORD	Unlock	Account details update record
Save Branch Allowed	RPM_FA_SAV_BRANCH_ALLOWED	Fetch	Branch Allowed
Casa DS Debit Bureau Info	RPM_FA_CASA_DS_DEBIT_BUREAUINFO_UPDATE	Unlock	Update Debit Bureau Info
Casa DS Debit Bureau Info	RPM_FA_CASA_DS_DEBIT_BUREAUINFO_FETCH	Fetch	Fetch Debit Bureau Info
Casa DS Debit Bureau Info	RPM_FA_CASA_DS_DEBIT_BUREAUINFO_FETCHALL	Fetch	Fetch all Debit Bureau Info
Casa DS Debit Bureau Info	RPM_FA_CASA_DS_DEBIT_BUREAUINFO_CREATE	New	Create Debit Bureau Info
Casa DS Manual Decision	RPM_FA_CASA_DS_MANUALDECISION_UPDATE	Unlock	Update Manual Decision
Casa DS Manual Decision	RPM_FA_CASA_DS_MANUALDECISION_FETCH	Fetch	Fetch Manual Decision

Table 7-2 (Cont.) Functional Activity Code of work flow processing

Screen Name/A pi Name	FUNCTIONAL_ACTIVITY_C ODE	Action	DESCRIPTION
Casa DS Manual Decision	RPM_FA_CASA_DS_MANUA LDECISION_FETCHALL	Fetch	Fetch all Manual Decision
Casa DS Manual Decision	RPM_FA_CASA_DS_MANUA LDECISION_CREATE	New	Create Manual Decision
Add On Card Holder	RPM_FA_CC_ADDONCARD _HOLDER_UPDATEBYID	Unlock	Update addoncard holder
Add On Card Holder	RPM_FA_CC_ADDONCARD _HOLDER_DELETEBYID	Delete	Delete addoncard holder
Add On Card Holder	RPM_FA_CC_ADDONCARD _HOLDER_FETCHBYID	Fetch	Fetch addoncard holder
Add On Card Holder	RPM_FA_CC_ADDONCARD _HOLDER_FETCH	Fetch	Fetch addoncard summary
Add On Card Holder	RPM_FA_CC_ADDONCARD _HOLDER_ADD	New	Add addoncard holder
Approval Details	RPM_FA_CC_APPROVALDE TAILS_VIEW	Fetch	View Approval Details
Approval Details	RPM_FA_CC_APPROVALDE TAILS_NEW	New	Create Approval Details
Approval Details	RPM_FA_CC_APPROVALDE TAILS_DELETE	Delete	Delete Approval Details
Approval Details	RPM_FA_CC_APPROVALDE TAILS_AMEND	Unlock	Amend Approval Details
Approval Details	RPM_FA_CC_APPROVALDE TAILS_VIEW	Fetch	View Approval Details
Assess ment Details	RPM_FA_CC_ASSESSMENT_ DETAILS_UPDATE	Unlock	Update assesment details
Assess ment Details	RPM_FA_CC_ASSESSMENT_ DETAILS_FETCHBYID	Fetch	Fetch assesment details
