Purpose

Welcome to the **Term Deposit Origination** user guide for Oracle Banking Origination. This document provides an overview of the Term Deposit Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Term Deposit Origination.

Audience

This user manual is intended for the Relationship Managers (RMs) and Sales Officers incharge of sourcing the Savings Account Products from prospect and customer of the bank. The user manual is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Savings Account Origination process based on the bank's internal operation and policies.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
italic	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table 1 Acronyms table

Abbreviation	Description
DS	Data Segment

Basic Actions

Table 3 Basic Actions

Actions	Functions
Request Clarification	Used to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.
Back	Used to navigate to the previous data segment within a stage.
Next	Used to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. Users will not be able to proceed to the next data segment, without capturing the mandatory data.

Table 3 (Cont.) Basic Actions

Actions	Functions
Save & Close	Used to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.
Cancel	Used to close the application without saving. This tasks appears in Free Task, once the transaction is canceled.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Overview

This topic desribes about the features of the entire module.

Oracle Banking Origination is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan. It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank persons handling defined functions in the life cycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architectures by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Term Deposit Account is created in the Host. The new work-flow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Term Deposit Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Term Deposit Account request can be made for both new and existing customer types. Also, the system supports processing of the term deposit account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

This user guide explains the reference work-flow for the Term Deposit Account Origination process and further details the data that needs to be captured in the data segment linked to the specific stages.

This process initiates with the receipt of Term Deposit opening form and related documents from a customer for opening of a Term Deposit. The bank verifies the details and documents submitted for opening of Term Deposit to ensure completeness and initiates the Term Deposit Origination process by selecting the desired Term Deposit Product from the Product Catalogue.

Term Deposit Origination

This topic provides detailed information on the defined stages through which the Term Deposit application has to flow.

As detailed in the **Operations** user manual, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The **Cart Operation** in Product Catalogue allows to originate single or multiple Product initiation. Once the Term Deposit Account product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Term Deposit Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as **Task** from orchestrator perspective.

The Term Deposit Account Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

Application Entry

This topic provides the detailed information about the application entery stage.

Account Funding Stage

This topic provides the detailed information about the account funding stage data segments.

Account Approval Stage

This topic provides the detailed information about the account approval stage data segments.

Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

2.1 Application Entry

This topic provides the detailed information about the application entery stage.

2. Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 2-2 Small and Medium Business – Field Description

Field	Description
Customer Type	Displays the customer type based on the product selected.
Doing Business As	Displays the business name of the SMB customer.
Registration Number	Displays the registration number of the business.
Date of Registration	Displays the registration date of the business.
Edit	Click Edit to modify the existing customer details and address details.
	Click Save to save the modified details and click Cancel to cancel the modifications.
	The Edit appears only for existing customers.
Existing Customer	Select to indicate if customer is existing customer.
CIF Number	Search and select the CIF number.
Advance Search	Click this button to perform party using advance parameters. For more information on advance search, refer the Advanced Serach section below.
Doing Business As	Specify the name of the business.
Registration Number	Specify the registration number of the business.
Date of Registration	Select the registration date of the business.
Country of Registration	Search and select the country code where the business is registered.
SMB Classification	Select the SMB Classification from the dropdown list.
	Available options are:
	Micro
	Small
	Medium

Table 2-2 (Cont.) Small and Medium Business - Field Description

Field	Description
Customer Category	Search and select the customer category.
SMB Registration Number	Specify the SMB registration number.
Tax Identification Number	Specify the tax identification number of the SMB customer.
Goods and Service Tax ID	Specify the goods and service tax ID.
Business License	Specify the business license.
Preferred Language	Select the preferred language.
Preferred Currency	Select the preferred currency.
Relationship Manager ID	Specify the relationship manager ID.
Upload Logo	Click Upload Logo button to upload the logo for the business.
Address	This section displays the added address of the applicant. It is mandatory to add communication address of the applicant. Click to add address details. Click to perform below actions on the added address details, To view the address details, click View. To edit the address details, click Edit. To delete the address details, click Delete.
Address Type	Select the address type for the applicant from the drop-down list. Residential Address Communication Address
Location	Select and search the location.
Current Address	Select to indicate if you want to mark entered address as current address type.
Preferred Address	Select to indicate if you want the selected address type as preferred address type.
Address From	Select the date from when you are connected with the given address.
Address To	Select the date till when you were connected with the given address.
Address	Specify the address to search for the already captured address. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State / Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.
Zip Code / Post Code	Specify the zip or post code of the address.

Table 2-2 (Cont.) Small and Medium Business – Field Description

Field	Description
Contact Details	In this section you can provide digital contact details. Click add contact button to add new contact details.
<communication mode=""></communication>	Select the communication mode from the drop-down list. The available options are: Mobile Phone Email
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of countrycode, country name and subscriber dialing code. This field appears only if you select the Mobile Phone option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the Email option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.

Advanced Search

You can perform an advanced search for the party by providing additional information.

Refer above Advanced Search section for more details.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data. If the Customer Dedupe check is enabled, the application will perform the Dedupe check for the new customer details on clicking Next button. For more information, refer the Customer Dedupe Check section.

Customer Dedupe Check:

Based on the configuration set in the **Origination Preference** screen, the customer dedupe serivce is enabled.

If the **Customer Dedupe** service check is enabled, upon capturing the New Customer details, the system compares the same with the existing customers records. If there are any matching hits, the list of Duplicate records which matches to the New Customer Details will be displayed.

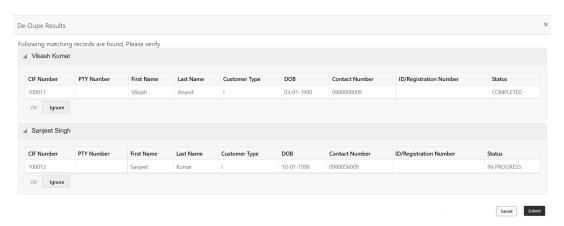

The customer details are compared based on a set of attributes configured. (Refer to Oracle Banking Party Documentation for Dedupe attributes configuration).

Click Next to perform the dedupe check and display the result.

The De-Dupe Result screen is displayed

Figure 2-6 De-dupe Results

For more information on fields, refer to the field description table below.

Table 2-3 De-Dupe Results – Field Description

Field	Description
CIF Number	Displays the CIF Number.
PTY Number	Displays the PTY Number.
First Name	Displays the First Name.
Last Name	Displays the Last Name.
Customer Type	Displays the Customer Type.
DOB	Displays the Date of Birth.
Contact Number	Displays the Contact Number.
ID/Registration Number	Displays the Registration number.
Status	Displays the Status of the De-Dupe check.

2.1.2 Account Details

This topic provides the systematic instructions to capture the account related information for the application.

The **Account Details** data segment displays the account details.

 Click Next in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

Department Specify the department.
Building Number Specify the building number.

Table 2-10 (Cont.) Details - Field Description

Field	Description
Post Box	Specify the post box code.
District Name	Specify the district name.
Floor	Specify the floor number.
Room	Specify the room number.
Locality	Specify the locality.
Landmark	Specify the landmark.
Contact Name / Narrative	Specify the name of the contact person.
Contact Details	In this section you can provide digital contact details.
<communication mode=""></communication>	Select the communication mode from the drop-down list. The available options are: Mobile Phone Email
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of countrycode, country name and subscriber dialing code. This field appears only if you select the Mobile Phone option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the Email option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.
Add Nominee	Click to add additional nominee for the account.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

Guardian Details

This screen allows to capture details of the guardian of the minor nominee.

To add guardian details:

4. Click Add Guardian Details on Nominee Details screen.

The Guardian Details screen is displayed

Figure 2-15 Guardian Details

Specify the details in the relevant data fields.

Refer the Nominee Details field description table for detailed information on each field.

Click Save to save the guardian details

2.1.7 Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept for to proceed with account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

- **Term and Conditions for all products** In this section the term and conditions which are applicable for all the products appears in the questionnaire format.
- **Term and Conditions for <Selected Product>** In this section the term and conditions which are applicable for all the selected product appears in the questionnaire format.

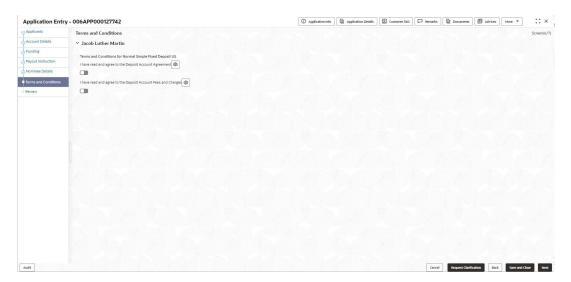

To capture terms and conditions:

 Click Next from pervious data segment to proceed with the next data segment, after successfully capturing the data.

The **Term and Conditions** screen appears

Figure 2-16 Term and Conditions

- 2. Click to view the term and conditions.
- 3. Select the toggle button to accept the term and conditions.
- 4. In the Consents to receive Marketing Promotional and Sales section, enter the channel and details.
- 5. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.1.8 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

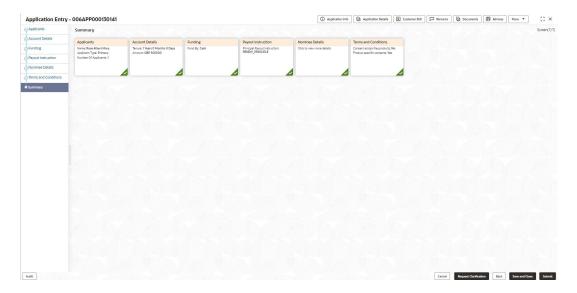

The **Summary** data segment displays the account service preferences details.

 Click Next from the data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-17 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-11 Summary - Field Description

Data Segment	Description
Applicants	Displays the applicants details.
Stake Holder Details	Displays the stake holder details. This data segment displays only if the Customer Type is selected as Small and Medium Business (SMB).
Account Details	Displays the account details.
Funding	Displays the funding details.
Payout Instruction	Displays the payout instruction.
Nominee Details	Displays the nominee details.
Terms and Conditions	Displays the term and condition details.

- Click Submit to proceed to the Outcome stage., where the overrides, checklist and documents for this stage can be validated or verified.
- 3. In the Override screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- In the Checklist screen the system displays the error message if document checklist is not verified. Click Proceed Next to proceed. The Outcome screen appears.
- 5. Select the checkbox to accept the checklist.
- 6. Click Save & Proceed. The Outcome screen is displayed.
- 7. In the Outcome screen, select appropriate option from the Select to Proceed field.
 - Select the Proceed to proceed with the application. By default this option is selected. It
 will logically complete the Application Entry stage for the saving application. The
 stage movement is driven by the business configuration for a given combination of
 Process Code, Life Cycle and Business Product Code.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 8. Enter the remarks in Remarks.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- 10. Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Term Deposit Account] to the other stages. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

Application De-Dupe:

Based on the configuration available at the Bank level / Properties Table, the Dedupe service call can be enabled or disabled for the product Origination.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

Note

- If an application is returned back to Application Entry stage from any other subsequent stages, Oracle Banking Origination will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting Application Entry stage. User has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.

2.2 Account Funding Stage

This topic provides the detailed information about the account funding stage data segments.

Users having functional access to the Account Funding Stage will be able to view the record in the Free Task process.

To add funding details:

- Scan the records that appears in the **Free Task** list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Funding stage is displayed.

The Account Funding stage has the following data segments in which the user can only view the data:

Account Details: - For detailed information, refer the Account Details data segment in the Application Entry stage.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Funding

This topic provides the systematic instruction to view the details captured for the Funding in the Account Funding stage.

Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account funding stage.

2.2.1 Funding

This topic provides the systematic instruction to view the details captured for the Funding in the Account Funding stage.

The Funding data segment displays the Funding details captured in the Application Entry stage. The Transaction Reference Number and the Transaction Status is either auto-populated or has to be manually captured based on the configuration. Using the Cash mode, the Initial Funding can be done automatically for cash transactions. The Manual process is supported for Transfer by Account, Other Bank Cheque, and Cash of initial funding.

(i) Note

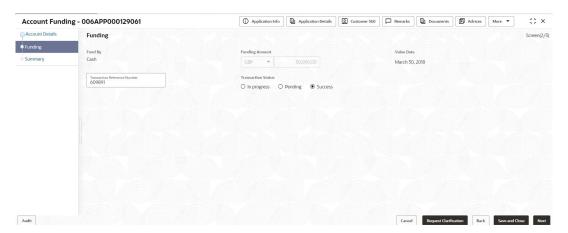

For more details on the Modes and the Manual/Automatic Process configuration, refer to the Configurations Guide.

During the **Application Entry** stage, the initial funding transaction triggers a teller transaction reference number and its status.

On acquiring the Account Funding task, the Initial Funding Details stage is displayed.

Figure 2-18 Funding

2. Specify the fields on **Funding** screen.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-12 Funding - Field Description

Field	Description
Fund By	Displays the Fund by option selected in the Account Details data segment in Application Entry stage.
Funding Amount	Displays the amount of the initial funding updated in the Account Details data segment in Application Entry stage.
Value Date	Displays the value date of the initial funding updated in the Account Details data segment in Application Entry stage.
Account	Displays the account number.
	This field appears if the GL Account or Account Transfer option selected as the funding by mode.
Account Name	Displays the account name. This field displays only if Account Transfer is selected as the funding by mode.
Cheque Number	Displays the cheque number. This field displays if Account Transfer or Other Bank Cheque is selected as the funding mode.
	The cheque number is displayed if it is captured in the Account Details data segment.
Cheque Date	Displays the cheque date. This field displays if Account Transfer or Other Bank Cheque is selected as the funding by mode. The cheque number is displayed if it is captured in the Account Details data segment.

Table 2-12 (Cont.) Funding - Field Description

Field	Description
Transaction Reference Number	Specify the transaction reference number through which the transaction has been posted for initial funding in the Teller Application. For Automated processing of the Cash funding mode, system displays the transaction reference number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
Transaction Status	Select the transaction status for the transaction posted for initial funding. The available status are: In progress Pending Sucess For Automated processing of the Cash funding mode, system displays the status of the teller transaction.
	Note The status of the teller transaction should be 'Success' for the submission of the Account Funding stage.

3. Click Next to navigate to the next data segment, after successfully capturing the data. The user is required to provide all mandatory data segments and data fields for the system to validate. If any mandatory details are missing, the system displays an error message for the user to correct the information. Users must capture the mandatory data before they can proceed to the next data segment.

2.2.2 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account funding stage.

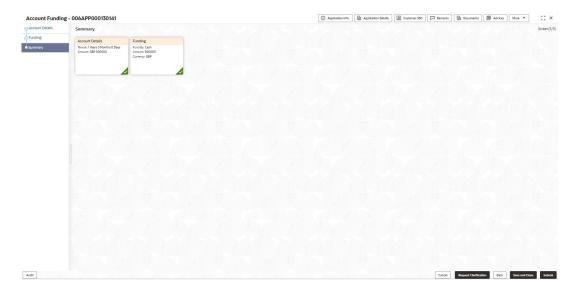

The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.

 Click Next from the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-19 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-13 Summary - Field Description

Data Segment	Description
Account Details	Displays the account details.
Funding	Displays the initial funding details.

- 2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified.
- 3. In the Override screen, the message appears in case there is any override. During business validations, the system raises warnings as overrides. The user must accept them to continue. Alternatively, user can go back and correct the data to prevent overrides from occurring. In case of override, click Accept Overrides& Proceed to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- 4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
- Select the checkbox to accept the checklist.
- Click Save & Proceed. The Outcome screen is displayed.
- 7. In the **Outcome** screen, select appropriate option from the Select to Proceed field.

- Select the Proceed to proceed with the application. By default this option is selected. It
 will logically complete the Account Funding Stage for the term deposit application.
 The Workflow Orchestrator will automatically move this application to the next
 processing stage, Account Approval Stage. The stage movement is driven by the
 business configuration for a given combination of Process Code, Life Cycle and
 Business Product Code.
- Select the **Return to Application Entry** to return to application entry stage. The system generates the Application Entry task that appears in **Free Task** to acquire and edit.
- Select the Reject by Bank to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 8. Enter the remarks in Remarks.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
- 10. Click Close to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Term Deposit Account] to the other stages. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.3 Account Approval Stage

This topic provides the detailed information about the account approval stage data segments.

Users having functional access to the Account Approval stage will be able to view the record in the Free Task process.

The Account Approval stage comprises of the data segments of the previous stages. Since the data segment are in view only mode and have been completed in the previous stages, the Account Approval stages are launched with the Application Information segment.

To approve an account opening:

- 1. Scan the records that appears in the **Free Task** list.
- Click Acquire and Edit or Acquire from the Action column of the appropriate record. The Account Approval stage is displayed.

The Account Approval stage has the following data segments in which the user can only view the data:

- Applicant For detailed information, refer the Customer Information data segment in the Application Entry stage.
- Account Details For detailed information, refer the Account Details data segment in the Application Entry stage.
- **Account Funding Details** For detailed information, refer the Mandate Details data segment in the Application Entry stage.
- **Payout Instruction** For detailed information, refer the Nominee Details data segment in the Application Entry stage.
- Nominee Details For detailed information, refer the data segment in the Application Entry stage.

 Terms and Conditions – For detailed information, refer the Terms and Conditions data segment in the Application Entry stage.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

Account Approval Details

This topic provides the systematic instruction to view the details captured for the account approval details in the account approval stage.

Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account approval stage.

2.3.1 Account Approval Details

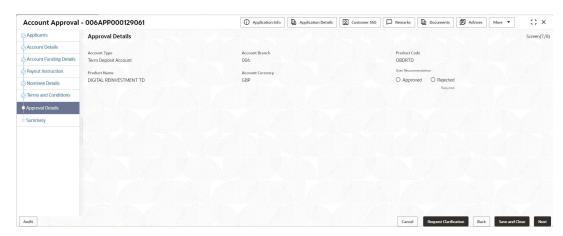

This topic provides the systematic instruction to view the details captured for the account approval details in the account approval stage.

The **Account Approval Details** data segment displays the application details.

 On acquiring the TD Account Approval stage, the Account Approval Details stage is displayed.

The Account Approval Details screen displays.

Figure 2-20 Approval Details

Specify the fields on Account Approval Details screen.

Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-14 Account Approval Details - Field Description

Field	Description

Table 2-14 (Cont.) Account Approval Details - Field Description

Field	Description
Account Branch	Displays the account branch.
Product Code	Displays the product code.
Product Name	Displays the product name.
Account Currency	Displays the account currency.
User Recommendation	Select the user recommendation from the drop-down list. The available options are: Approval Reject

3. Click Next to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.3.2 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account approval stage.

The **Summary** data segment displays the account service preferences details.

The tiles display the important details captured in the specified data segment. It further allows to click on the specific tile to view the data segment and the details captured. You can additionally click on the data segment from the train on the left hand side to view the details of the data segment.

 Click Next in Account Approval Details screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-21 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

(i) Note

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-15 Summary - Field Description

Data Segment	Description
Applicants	Displays the applicants details.
Stake Holder Details	Displays the stake holder details.
	Note This field appears only if the Customer Type is selected as Small and Medium Business (SMB).
Account Details	Displays the account details.
Account Funding Details	Displays the account funding details.
Payout Instruction	Displays the payout instruction details
Nominee Details	Displays the nominee details.
Term and Conditions	Displays the term and conditions.
Approval Details	Displays the approval details.

Supervisor can verify the KYC Verification status of the Customer from the Customer 360 in the Header. Only if the KYC Status is 'Success' will the application be allowed to proceed further. Click 'Submit' to submit the Account Approval stage and proceed to submit the Account Opening request to Host.

- Click Submit to reach the OUTCOME, where the overrides, checklist and documents for this stage can be validated or verified.
- In the **Override** screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click Accept Overrides& Proceed to proceed.

Click **Proceed**. The Checklist screen appears.

- In the Checklist screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
- Select the checkbox to accept the checklist.
- Click **Save & Proceed.** The **Outcome** screen is displayed.
- In the **Outcome** screen, select appropriate option from the Select to Proceed field.
 - Select the Proceed to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.

- Select the Return to Initial Funding Details to make account funding details stage available in free task.
- Select the Return to Application Entry Stage to make application entry stage available in free task for edit.
- Select the Reject by Bank to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- 8. Enter the remarks in Remarks.
- Click Submit to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number. The welcome letter is generated.
- 10. Click Close to close the window.

OR

Click Go to Free Task.

After the Host creates the Term Deposit Account successfully, the response is sent back to the Oracle Banking Origination with the Term Deposit Account Number.

The details of all the applications which have logically completed all their stage movements, (Rejected / Account Created) will be made available in Completed tasks for query purpose only.

If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.

2.4 Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

This section appears are the top of the right pane and is applicable for all the account opening stage. You can add, edit, view or delete the information from the respective section.

Below are the list of global actions:

Application Info

In this section you can view the application number along with its product name.

Customer 360

In this section you can view the list of customers involved in the application.

Application Details

In this section you can view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.

Remarks

In this section you can view or the post the remarks.

Documents

In this section you can upload the document and also view the already uploaded documents.

Advices

You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.

• Clarification Details

In this section you can request for clarifications.

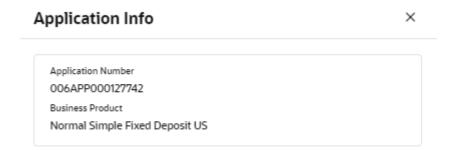

2.4.1 Application Info

In this section you can view the application number along with its product name.

Click the Application Info button to view the details.

The **Application Info** screen appears with the Application Number and Business Product fields.

Figure 2-22 Application Info

2.4.2 Customer 360

In this section you can view the list of customers involved in the application.

The seperate tiles of all the customers involved in the application appears. You can click on the respective customer tile to view the 360 degress details of that customer.

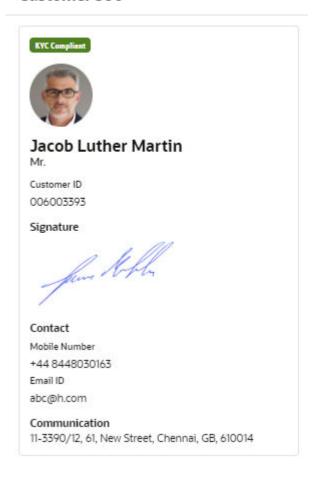

1. Click **Customer 360** to view the list of customer involved in the application.

The Customer 360 screen is displayed.

Figure 2-23 Customer 360

Customer 360

The customer title comprises of below details:

- <Applicant Role>
- <KYC Status>
- <Applicant Image>
- <First Name, Middle Name, Last Name>
- <Title>
- Customer ID
- Signature
- Contact
- Communication
- Select the specific Customer ID to view their Mini Customer 360. The CIF Numbers are populated in the Customer 360 screen only post the CIF number has been keyed in the Applicant data segment.

2.4.3 Application Details

In this section you can view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.

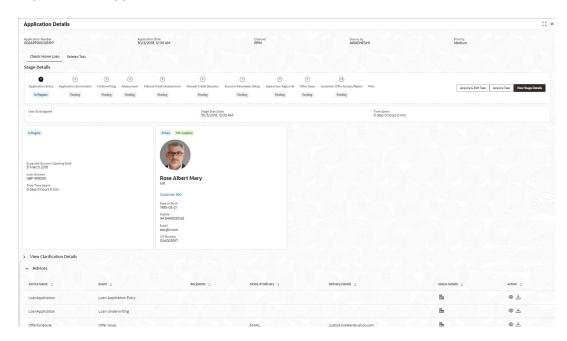

You can also track and launch the respective stage of the application.

To view the application details:

Click **Application Details** to view the application detials .

The Application Details screen is displayed.

Figure 2-24 Application Details

The Application Details screen displays separate cards for various products initiated as part of the single application. For more information on fields, refer to the field description table below.

The fields marked as **Required** are mandatory.

Table 2-16 Application Details - Field Description

Field	Description
Application Number	Displays the application number.
Application Date	Displays the date and time on which the application was initiated.
Source By	Displays the name of the user who has sourced the application.
Channel	Displays the channel name.

Table 2-16 (Cont.) Application Details – Field Description

Field	Description
Priority <product name=""></product>	Displays the priority of the application. High Medium Low Displays the product name. In case on multiple product, different tabs appears with the respective product name. You can click the product names to view
Stage Details	the respective application details. In this section, all account opening stages appears with the status name and it's chronological order of the stage in the process. You can click the number to perform below actions on the appeared stages: • Acquire & Edit Task : Click this button to acquire and edit the selected stage.
	 Acquire TaskClick this button to acquire the selected stage. You can edit it later. View Stage Details: Click this button to view the stage details.
User ID Assigned	Displays the User ID of the user currently working on the product process. (i) Note This field appears blank, in case the product process task is not
	acquired by any user.
Stage Start Date	Displays the start date of the current stage. It also display time in hours, mins and seconds.
Time spent	Displays the days, hours and mins spent on the current selected stage.
<application tile=""></application>	 In this tile you can view the application specific details. Below field appears in this tile with respective details:

Table 2-16 (Cont.) Application Details – Field Description

Field	Description
<applicant details="" tile=""></applicant>	In this tile you can view the applicant details. Seperate tiles appears for all the applicants that are involved in the application. Below field appears with the respective applicant details: Role of the Applicant Applicant Image Applicant Name Title Customer 360 : Click this link to view the 360 degress view of the customer information. The Customer 360 screen appears with the details. Based on the customer type, refer the Retail 360 User Guide and Corporate 360 User Guide from the party section. Date of Birth Mobile Number Email ID CIF Number
View Clarification Details	In this section you can view the clarification history.
	Below fields appear with the details: ID Subject Raised By Date Status Status It is a supdated on On the click of the respective record the user can view the clarifiation content.
Advices	In this section you view the advices generated in the process of account opening. Below fields appear with the details: • Advice Name • Event: Displays the stage name on which the advice is generated. • Recipients • Mode of Delivery • Delivery Details • Status Details • Actions: You can View or Download the advices.
Related Task	In this section you can view the stages involved in process of application. The below fields are appear with details: Product Processor: Displays the product which integrated with OBPY. Process Name Process Reference Number Stage Status

2. Click × to close window.

2.4.4 Remarks

In this section you can view or the post the remarks.

 Click Remarks to update any remarks that you want to post for the application that you are working on.

The **Remarks** screen is displayed.

Figure 2-25 Remarks

Remarks posted are updated with your User ID, Date, and are available to view in the next stages for the users working on that application.

2.4.5 Documents

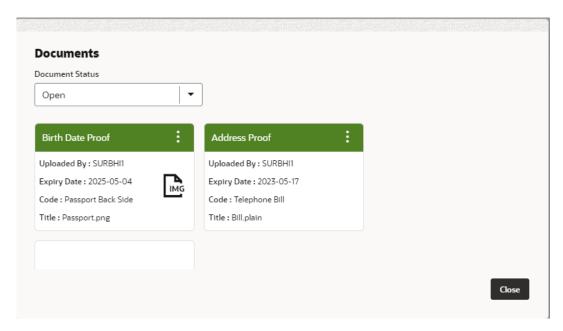

In this section you can upload the document and also view the already uploaded documents.

1. Click **Documents** button to upload the documents linked for the stage.

The **Documents** screen is displayed.

Figure 2-26 Documents

2. Specify the details in the relevant data fields. For more information on fields, refer to the field description table.

Actions	You can perfrom below actions on the added record:
	Click to save the record.
	Click to delete the record.

6. Once the details are updated, click Save. Clarification Request once raised moves the application to 'Awaiting Customer Clarification' state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the Awaiting Customer Clarification sub-menu available under Task menu.

Select the Application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu. Click on the **Clarification Details** from the header.

7. Select the specific clarification to take action on it.

Allowed actions are as following:

- Adding New Conversation
- Withdraw Clarification
- Accept Clarification

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

Simplified Application

This topic describes the concept and process of single stage application.

What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segmenst in a single view.

How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

In the process of Simplified Application, the **Initiate** stage is bypassed and the **Application Entry** stage appears for capturing details.

How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

To open an account using simplified application process:

- 1. From the Menu, select the Retail Origination. The Retail Origination menu appears.
- 2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
- Select the appropriate product and click Apply.
 The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
 - Applicant: In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Mutiple applicants are allowed with different roles. Refer Applicant data segment from the Application Entry stage of this guide.
 - Account Details: In this data segment user can capture the product details to configure the account. Refer Account Details data segment from the Application Entry stage of this guide.
 - Funding: In this data segment user can capture the funding details to configure the
 account. Refer Funding data segment from the Application Entry stage of this guide.
 - Payout Instruction: In this data segment user can capture the payout instructions of the maturity amount to configure the account. Refer Payout Instruction data segment from the Application Entry stage of this guide

- Nominee Details: In this data segment user can capture the nominee details. Refer the Nominee Details data segment from the Application Entry stage of this guide.
- Term and Conditions: In this data segment user can capture the term, conditions and consents of the customer. Refer the Term and Conditions data segment from the Application Entry stage of this guide.
- Review: In this data segment user can review all the details that are captured on clicking on each data segment tile.
- **4.** On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
- 5. After completing the Know Your Customer (KYC) process, the Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the Approval Details data segment of the Account Approval stage in this guide.
 - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
 - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
- An account is created on approving the application in the Account Approval stage.
- 7. Below tasks are aslo generated in this process:
 - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.

Error Codes and Messages

This topic contains error codes and messages.
