Purpose

Welcome to the **Certiifacte of Deposit Origination** user guide for Oracle Banking Originations Cloud Service. This document provides an overview of the Certiifacte of Deposit Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Certiifacte of Deposit Origination.

Audience

This user manual is intended for the Relationship Managers (RMs) and Sales Officers in-charge of sourcing the Savings Account Products from prospect and customer of the bank. The user manual is also intended for the other bank personas such as Bank Operations Manager, Account Opening Officers or Branch Managers who may handle the specific stages of the lifecycle of the Savings Account Origination process based on the bank's internal operation and policies.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
<code>monospace</code>	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that you are likely to find in the manual are as follows:

Table 1 Acronyms table

Abbreviation	Description
DS	Data Segment
System	Oracle Banking Origination Module
OBA	Oracle Banking Accounts
OBOCS	Oracle Banking Originations Cloud Service

Basic Actions

Table 3 Basic Actions

Actions	Functions
Request Clarification	Used to raise a new clarification request. The system allows placing a request for clarification that is needed from the Customer to proceed ahead with the application. The clarification can be for any additional details, confirming specific information, the requirement for any additional document, and so on, from the customer. For more information on Request Clarification, refer to the section Request Clarification.
Back	Used to navigate to the previous data segment within a stage.
Next	Used to navigate to the next data segment, after successfully capturing the data. The system validates all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. Users will not be able to proceed to the next data segment, without capturing the mandatory data.

Table 3 (Cont.) Basic Actions

Actions	Functions
Save & Close	Used to save the data captured, provided all the mandatory fields are captured and will be available in the My Task list for the user to continue later.
Cancel	Used to close the application without saving. This task appears in Free Task, once the transaction is canceled.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

1

Overview

This topic describes about the features of the entire module.

Oracle Banking Originations Cloud Service is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Certificate of Deposit, and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan. It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank persons handling defined functions in the life cycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architectures by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Certificate of Deposit Account is created in the Host. The new work-flow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architectures by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Certificate of Deposit Account is created in the Host. The new work-flow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

This user guide explains the reference work-flow for the Certificate of Deposit Account Origination process and further details the data that needs to be captured in the data segment linked to the specific stages.

This process initiates with the receipt of Certificate of Deposit opening form and related documents from a customer for opening of a Certificate of Deposit. The bank verifies the details and documents submitted for opening of Certificate Deposit to ensure completeness and initiates the Certificate of Deposit Origination process by selecting the desired Certificate of Deposit Product from the Product Catalogue.

2

Term Deposit Origination

This topic provides detailed information on the defined stages through which the Term Deposit application has to flow.

As detailed in the **Operations** user manual, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The **Cart Operation** in Product Catalogue allows to originate single or multiple Product initiation. Once the Term Deposit Account product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Term Deposit Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as **Task** from orchestrator perspective.

The Term Deposit Account Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

- [Application Entry](#)
This topic provides the detailed information about the application entry stage.
- [Application Documents](#)
This topic describes the process of the documents that are uploaded related to application.
- [Account Funding Stage](#)
This topic provides the detailed information about the account funding stage data segments.
- [Account Approval Stage](#)
This topic provides the detailed information about the account approval stage data segments.
- [Global Actions](#)
This topic provides the detailed on the actions that can be performed in all stages.

2.1 Application Entry

This topic provides the detailed information about the application entry stage.

Based on the access configuration, user can view the records in Free Task. In this stage user can capture the details that are required to open a term deposit account. This stage is automatically submitted on below conditions:

- If the bank level configuration for allowing the full application submission is set as **Yes**.
- If the user captures the required details in all the data segments of the Application Entry stage as part of the Application Initiation stage on clicking the Application button in the Product Details data segment.

To acquire and edit respective stage:

1. On **Home** screen, click **Tasks**.
2. Under **Tasks**, click **Free Tasks**.

2. Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 2-2 Small and Medium Business – Field Description

Field	Description
Customer Type	Displays the customer type based on the product selected.
Doing Business As	Displays the business name of the SMB customer.
Registration Number	Displays the registration number of the business.
Date of Registration	Displays the registration date of the business.
Edit	Click Edit to modify the existing customer details and address details. Click Save to save the modified details and click Cancel to cancel the modifications. The Edit appears only for existing customers.
Existing Customer	Select to indicate if customer is existing customer.
CIF Number	Search and select the CIF number.
Advance Search	Click this button to perform party using advance parameters. For more information on advance search, refer the Advanced Serach section below.
Doing Business As	Specify the name of the business.
Registration Number	Specify the registration number of the business.
Date of Registration	Select the registration date of the business.
Country of Registration	Search and select the country code where the business is registered.
SMB Classification	Select the SMB Classification from the dropdown list. Available options are: • Micro • Small • Medium
Customer Category	Search and select the customer category.
SMB Registration Number	Specify the SMB registration number.
Tax Identification Number	Specify the tax identification number of the SMB customer.
Goods and Service Tax ID	Specify the goods and service tax ID.
Business License	Specify the business license.
Preferred Language	Select the preferred language.
Preferred Currency	Select the preferred currency.
Relationship Manager ID	Specify the relationship manager ID.
Upload Logo	Click Upload Logo button to upload the logo for the business.

Table 2-2 (Cont.) Small and Medium Business – Field Description

Field	Description
Address	This section displays the added address of the applicant. It is mandatory to add communication address of the applicant. Click  to add address details. Click  to perform below actions on the added address details, • To view the address details, click View. • To edit the address details, click Edit. • To delete the address details, click Delete.
Address Type	Select the address type for the applicant from the drop-down list. • Residential Address • Communication Address
Location	Select and search the location.
Current Address	Select to indicate if you want to mark entered address as current address type.
Preferred Address	Select to indicate if you want the selected address type as preferred address type.
Address From	Select the date from when you are connected with the given address.
Address To	Select the date till when you were connected with the given address.
Address	Specify the address to search for the already captured address. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State / Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.
Zip Code / Post Code	Specify the zip or post code of the address.
Contact Details	In this section you can provide digital contact details. Click add contact button to add new contact details.
<Communication Mode>	Select the communication mode from the drop-down list. The available options are: • Mobile Phone • Email

Table 2-2 (Cont.) Small and Medium Business – Field Description

Field	Description
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of countrycode, country name and subscriber dialing code. This field appears only if you select the Mobile Phone option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the Email option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.

Advanced Search

You can perform an advanced search for the party by providing additional information.

Refer above **Advanced Search** section for more details.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data. If the **Customer Dedupe** check is enabled, the application will perform the Dedupe check for the new customer details on clicking **Next** button. For more information, refer the **Customer Dedupe Check** section.

Customer Dedupe Check:

Based on the configuration set in the **Origination Preference** screen, the customer dedupe service is enabled.

If the **Customer Dedupe** service check is enabled, upon capturing the New Customer details, the system compares the same with the existing customers records. If there are any matching hits, the list of Duplicate records which matches to the New Customer Details will be displayed.

The customer details are compared based on a set of attributes configured. (Refer to Oracle Banking Party Documentation for Dedupe attributes configuration).

- Click **Next** to perform the dedupe check and display the result.

The **De-Dupe Result** screen is displayed

Communication Channel Preferences	Select the preference of the communication channel. The channel options appears based on the Business Product Configuration. The available options are: EMAIL POST SMS

Table 2-4 (Cont.) Account Details

Field Name	Description
Preferred Communication Channel	Select the preferred communication channel. The options in this drop down appears based on the selected options in the Communcation Channel Preferences fields.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The user is required to provide all mandatory data segments and data fields for the system to validate. If any mandatory details are missing, the system displays an error message for the user to correct the information. Users must capture the mandatory data before they can proceed to the next data segment.

2.1.3 Funding

This topic provides the systematic instructions to capture the funding details of Term Deposit account.

In this data segment you can capture the funding details to fund the Term Deposit account.

- Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The **Funding** screen displays.

Figure 2-9 Funding

- In the **Funding** screen, specify the required details.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-5 Funding

Field Name	Description
Funding Account	Displays the amount to be funded along with the currency.
Fund By	Select the mode from the drop-down list through which fund are collected. The available options are: • Account Transfer • GL Account
Transaction Reference Number	Specify the transaction reference number. This field appears if the Cash or Account Transfer or Other Bank Cheque option is selected from the Fund By drop-down list.
Value Date	Select the date on which the transaction is performed. By default the current business date is populated.
Account	Select the account number from the list. This field appears if the GL Account or Account Transfer option is selected from the Fund By drop-down list. The list populates only the Saving or GL accounts respectively of the existing applicants who are involved in the application.
Cheque Number	Specify the cheque number through which the fund amount is deposited. This field is applicable only if the Other Bank Cheque option is selected from the Fund By drop-down list.
Cheque Date	Select the date on which the cheque is issued. This field is applicable only if the Other Bank Cheque option is selected from the Fund By drop-down list.

 Note:

The **GL Account** and **GL Account Description** will be applicable depending on the following scenarios:

Table 2-6 Fund By

Fund By	Fund By Mode (In the Origination Preferences screen)	Applicability
Cash	Automatic	Applicable
Cash	Manual	Applicable
Account Transfer	Host	Applicable
Account Transfer	Manual	Applicable
Cheque	Host	Non - Applicable
Cheque	Manual	Applicable

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The user is required to provide all mandatory data segments and data fields for the system to validate. If any mandatory details are missing, the system displays an error message for the user to correct the information. Users must capture the mandatory data before they can proceed to the next data segment.

2.1.4 Payout Instructions

This topic provides the systematic instructions to capture the payout instructions details for Term Deposit account.

In this data segment you can capture the payout instructions after the maturity of the Term Deposit account.

To capture the payout instructions:

1. Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The **Payout Instructions** screen appears.

If the **Yes** option is selected from the **Cumulative** field in the **Account Details** data segment.

Figure 2-10 Payout Instructions

The screenshot shows the 'Payout Instruction' screen within the Oracle Application Entry system. The title bar indicates 'Application Entry - 006APP000127742'. The left sidebar contains a navigation menu with options: Applicants, Account Details, Funding, Payout Instruction (selected), Nominee Details, Terms and Conditions, and Review. The main content area is titled 'Payout Instruction' and includes the following fields: 'Cumulative' with a 'Yes' radio button selected, 'Maturity Payout Mode' with radio buttons for 'Account' (selected), 'GL Account', and 'Demand Draft', 'Maturity Instruction' with a dropdown menu showing 'Renew Principle & Redeem In', and 'Account' with a dropdown menu showing '006000000003209 - MR Gr'. At the bottom, there are buttons for 'Cancel', 'Request Clarification', 'Back', 'Save and Close', and 'Next'. The bottom right corner shows 'Screen(4/7)'.

2. In the **Payout Instructions** screen, specify the required details.

 Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-7 Payout Instructions

Field Name	Description
Cumulative	Displays whether the account is cumulative. The value in this field appears based on the option selected in the Account Details data segment. If the Cumulative value is Yes then the user can set the payout instructions based on the selected maturity option in the below fields: • Maturity Instruction • Maturity Payout Mode If the Cumulative value is No then the user can set principal payout instructions based on the selected option in the below fields:. • Principal Payout Instruction • Principal Payout Mode
Interest Payout	Displays the interest payout frequency configured at product level. This field appears if the Cumulative value is No.
Interest Payout Mode	Select the payout mode for the interest amount. The available options are: • Account • GL Account • Demand Draft The options in this drop-down list appears based on the Business Product Configuration screen. Supply Frequency	Specify the supply frequency.
Start Date – End Date	Select the start and end date for the supplier.

- To onboard the New Customers, disable the **Existing Customer** toggle. By Default, the **Existing Customer** is enabled.

The **Customer Onboarding** screen is displayed.

Figure 2-13 Customer Onboarding

- Select the appropriate option from the Customer Category list.

- a. If you select **Individual** option to onboard individual type of customer, refer field description table and procedure from **3.1.1.1 For Individual Customer Type of Customer Information** data segment.
 - b. If you select **Small and Medium Business** option to onboard small and medium business type of customer, refer field description table and procedure from **3.1.1.2 For Small and Medium Business Customer Type of Customer Information** data segment.
6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

On submission of Application Entry stage, Stakeholder Onboarding request gets initiated for the new customers.

The request for New Stakeholder Onboarding is addressed by the underlying API call, which also generates the New Party reference number, thereby circumventing the usual process of generating a Unique Process reference number / Task.

2.1.6 Beneficiary Details

This topic provides the systematic instructions to capture the nominee details related information for the application.

The Beneficiary Details is a non-mandatory data segment. If required, It allows capturing multiple nominees for the account. Beneficiary can be a minor, in that case, it is mandatory to provide details of the guardian. For SMB Customer, Beneficiary Details are allowed only for Proprietary type of Business Accounts.

To add beneficiary details:

1. Click **Next** from the previous screen to proceed with next data segment, after successfully capturing the data.

The **Beneficiary Details** screen displays.

Figure 2-14 Beneficiary Details

The screenshot shows the 'Beneficiary Details' screen within the 'Application Entry - B01APP000075210' window. The left sidebar contains a navigation menu with options: Applicants, Account Details, Funding, Payout Instruction, Beneficiary Details (selected), Terms and Conditions, and Review. The main content area is titled 'Beneficiary Details' and includes a section 'Payable on Death/Transferable on Death' with radio buttons for 'Yes' and 'No'. Below this is an 'Add Beneficiary' button. A modal window is open, displaying details for 'Ethan Smith', including 'MR', 'Birth Date: 2000-03-05', and 'Share Percentage: 100%'. The bottom of the screen features a navigation bar with buttons: Audit, Cancel, Request Clarification, Back, Save and Close, and Next. The top right corner shows 'Screen 5/7'.

- Specify the fields on **Beneficiary Details** screen.

Table 2-10 Details - Field Description

Field	Description
Title	Select the title of the applicant.
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
Relationship Type	Select the relationship type of the beneficiary with the applicant.
Date of Birth	Select the applicant's date of birth.
Minor	Select to indicate if nominee is minor.
Add Guardian	Click the Add Guardian link to add the guardian details. The link appears if the Minor field is enabled. This field is conditional mandatory.
Percentage	Specify the percentage to be considered for distribution of the account balance in case of uneventful death of the applicant.
Address	This section displays the added address of the applicant. It is mandatory to add communication address of the applicant. Click  to add address details. Click  to perform below actions on the added address details, - To view the address details, click View. - To edit the address details, click Edit. - To delete the address details, click Delete.
Address Type	Select the address type for the applicant from the drop-down list. Residential Address Communication Address
Location	Select and search the location.
Current Address	Select to indicate if you want to mark entered address as current address type.
Preferred Address	Select to indicate if you want the selected address type as preferred address type.
Address From	Select the date from when you are connected with the given address.
Address To	Select the date till when you were connected with the given address.
Address	Specify the address to search for the already captured address. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State / Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.
Zip Code / Post Code	Specify the zip or post code of the address.
Addition Info	In this section you can provide addition information.
Sub Department	Specify the sub department.

Table 2-10 (Cont.) Details - Field Description

Field	Description
Department	Specify the department.
Building Number	Specify the building number.
Post Box	Specify the post box code.
District Name	Specify the district name.
Floor	Specify the floor number.
Room	Specify the room number.
Locality	Specify the locality.
Landmark	Specify the landmark.
Contact Name / Narrative	Specify the name of the contact person.
Contact Details	In this section you can provide digital contact details.
<Communication Mode>	Select the communication mode from the drop-down list. The available options are: • Mobile Phone • Email
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of countrycode, country name and subscriber dialing code. This field appears only if you select the Mobile Phone option as communication mode.
Mobile Number	Specify the mobile number.
Preferred	Select to indicate if the given mobile number is the preferred number.
Action	You can edit or delete the added mobile details.
Email Id	Specify the email ID. This field appears only if you select the Email option as communication mode.
Preferred	Select to indicate if the given email ID is the preferred ID.
Action	You can edit or delete the added email details.
Add Beneficiary	Click to add additional nominee for the account.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

Guardian Details

This screen allows to capture details of the guardian of the minor nominee.

To add guardian details:

- Click **Add Guardian Details** on Nominee Details screen.

The **Guardian Details** screen is displayed

Figure 2-15 Guardian Details

The screenshot displays a web form titled "Guardian Details". It is divided into two main sections: "Guardian Address Details" and "Guardian Contact Details".

Guardian Address Details:

- Address Type:** A dropdown menu with "Residential Address" selected.
- Search address:** A text input field.
- Address Line 1:** A text input field containing "09 Flat, Sector12".
- Address Line 2:** A text input field containing "Wall Mark colony".
- Address Line 3:** A text input field containing "Times Square".
- Country:** A dropdown menu with "United States" selected.
- State:** A dropdown menu with "California" selected.
- Zipcode:** A text input field containing "78900".

Guardian Contact Details:

- + Add Contact:** A button to add a new contact.
- Communication Mode:** A dropdown menu with "Mobile Phone" selected.
- Country:** A dropdown menu with "US (+1)" selected.
- Mobile Number:** A text input field containing "566778999".
- Preferred:** A checkbox that is currently checked.
- Icons:** There are icons for deleting (trash) and editing (pencil) the contact.

5. Specify the details in the relevant data fields.

Refer the **Beneficiary Details** field description table for detailed information on each field.

6. Click **Save** to save the guardian details

2.1.7 Terms and Conditions

This topic descriptions the terms and conditions that are mandatory to accept in order to proceed with account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

- **Term and Conditions for all products** - In this section the term and conditions which are applicable for all the products appears in the questionnaire format.
- **Term and Conditions for <Selected Product>** - In this section the term and conditions which are applicable for all the selected product appears in the questionnaire format.
- **Consents and Preferences** - In this section the user capture the consents and preferences of customer as E-Sign, Marketing Communications, and Privacy Information.

To capture terms and conditions:

1. Click **Next** from pervious data segment to proceed with the next data segment, after successfully capturing the data.

The **Term and Conditions** screen appears

3. Select the toggle button to accept the term and conditions.
4. In the **Consents to receive Marketing Promotional and Sales** section, enter the channel and details.
5. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.1.8 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the Application Entry Process.

The **Summary** data segment displays the account service preferences details.

1. Click **Next** from the data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-17 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-11 Summary - Field Description

Data Segment	Description
Applicants	Displays the applicants details.
Stake Holder Details	Displays the stake holder details. This data segment displays only if the Customer Type is selected as Small and Medium Business (SMB) .
Account Details	Displays the account details.
Funding	Displays the funding details.
Payout Instruction	Displays the payout instruction.
Nominee Details	Displays the nominee details.
Terms and Conditions	Displays the term and condition details.

- Click **Submit** to proceed to the **Outcome** stage., where the overrides, checklist and documents for this stage can be validated or verified.
- In the **Override** screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click **Accept Overrides & Proceed** to proceed.

OR

Click **Proceed**. The Checklist screen appears.

4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
5. Select the checkbox to accept the checklist.
6. Click **Save & Proceed**. The **Outcome** screen is displayed.
7. In the **Outcome** screen, select appropriate option from the **Select to Proceed** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the saving application. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
8. Enter the remarks in Remarks.
9. Click **Submit** to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
10. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Term Deposit Account] to the other stages. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

Application De-Dupe:

Based on the configuration set in the **Origination Preference** screen, the application dedupe service is enabled.

If application dedupe service is enabled, System will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

Note:

- If an application is returned back to Application Entry stage from any other subsequent stages, Oracle Banking Originations Cloud Service will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting Application Entry stage. User has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.

2.2 Application Documents

This topic describes the process of the documents that are uploaded related to application.

The Application Documents stage provides the view of the outbound documents that are generated and dispatched to the applicants involved in the application.

To generate and dispatch the outbound documents:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Application Documents stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Document Generation](#)
In this data segment you can generate and dispatch the documents that are configured.
- [Document Acceptance](#)
In this data segment you can capture the acceptance of the documents that are already generated and dispatched.
- [Summary](#)
This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

2.2.1 Document Generation

In this data segment you can generate and dispatch the documents that are configured.

In the Document Generation data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the **Advice Maintenance** screen. Each documents appears separately to generate and dispatch.

To generate and dispatch the document:

1. On acquiring the **Application Document** task, the **Document Generation** stage is displayed.

Figure 2-18 Document Generation

Document Name	Receiving Party	Delivery Mode	Delivery Details	Status	Status Details	Action
☐ RPM-LoanApplicationFormPrinting Generated Document	Sarah S White(Primary)	Delivery Mode: Email	pratik.gadade@oracle.com	Test Fail		

2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select atleast one document

You can perform below actions on the seletced document:

- **Generate:** You can click this button to generate the selected document. On clicking this button the system invokes a call to the report generation service which generates a PDF output for the advice configured in the Advice Maintenance screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the Generate Document link in the Document column.
- **Dispatch:** You can click this button to dispatch the selected generated documents. You can only dispatch those documents which are not already dispatched. On clicking this button the system validates whether the document is already generated. Once the validation is successful the system dispatches the document to the default setting defined in the Advice Maintenance screen.
- **Reset:** You can click this button to reset the action performed on the document.

For more information on fields, refer to the field description table.

Table 2-12 Document Generation – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. • If the delivery mode is Post then the preferred address of every recipient is displayed. • If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. • If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button. Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery. • If the mode of delivery is Email then on the successful trigger the status appears as Email Sent. • If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as E-Signing Initiated. • If the mode of delivery is Post then on the successful trigger the status appears as Dispatched. • If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print. • In case the dispatch process fails due to technical error then the status appears as Failed.

Table 2-12 (Cont.) Document Generation – Field Description

Field	Description
Status Details	Displays the status details of the document. Click the icon to view the generation and dispatched details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. - Click  to edit the delivery mode. - Click  to save the edited delivery mode. This icon appears once you are edit mode.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.2.2 Document Acceptance

In this data segment you can capture the acceptance of the documents that are already generated and dispatched.

The Document Acceptance data segment populates the list of documents that appeared in the **Document Generation** data segment and are mark as **Yes** in the **Acceptance** field in the **Advice Maintenance** screen.

If the document is marked as No in the Acceptance field in the Advice Maintenance screen then the e-sign acceptance process is not required for that document and hence it will not appear in this data segment.

To accept the document:

- Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The **Document Acceptance** screen appears.

For more information on fields, refer to the field description table.

Table 2-13 Document Acceptance – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. Generated Document: This link appears only if the document is generated atleast onces. Accepted Document: This link appears only if the E-Signed document is uploaded.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. - If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. - If the delivery mode is Post then the preferred address of every recipient is displayed. - If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. - If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on the document.
Status Details	Displays the status details of the document. Click the icon to view the generation, dispatched and acceptance details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. View: You can view the documents only if the Delivery Mode is defined as E-Sign Remote or E-Sign In-Person. Upload Document: You can upload documents only if the Delivery Mode is defined as Email, Print or Post. Delete: You can upload documents only if the Delivery Mode is defined as Email, Print or Post.
Customer Response	Select the customer response for the documents. The available options are: Accept: Select to accept the application documents. You can select this option only if the acceptance status of all the document is Accepted. Reject: Select to reject the application documents. If the acceptance status of any one of the document is declined then this option appears auto-selected. Amend: Select to amend the application document status.
Date of Response	Select the date on which the customer response is captured. This date should be greater or equal to current date.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are

not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.2.3 Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system displays the summary of each data segments in tiles.

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary - Application Document** screen displays.

Figure 2-20 Summary - Application Documents

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-14 Summary - Application Documents – Field Description

Data Segment	Description
Document Generation	Displays the document generation.
Documents Acceptance	Displays the document acceptance.

2. Click **Submit** to reach the **OUTCOME**, where the Overrides, Checklist and the Documents for this stage can be validated or verified. The **Overrides** screen is displayed.
3. In the Override screen, click **Accept Overrides & Proceed**. The **Checklist** screen is displayed.
4. In the Checklist screen, click **Save & Proceed**. The **Outcome** screen is displayed.
5. In the Outcome screen, select appropriate option from the **Select to Outcome** field.
6. Click **Submit** to submit the Account Approval stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.

7. Click **Close** to close the window.
- OR
- Click **Go to Free Task**.

2.3 Account Funding Stage

This topic provides the detailed information about the account funding stage data segments.

Users having functional access to the Account Funding Stage will be able to view the record in the Free Task process.

To add funding details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Account Funding stage is displayed.

The Account Funding stage has the following data segments in which the user can only view the data:

- **Account Details:** - For detailed information, refer the Account Details data segment in the Application Entry stage.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- **Funding**
This topic provides the systematic instruction to view the details captured for the Funding in the Account Funding stage.
- **Summary**
This topic provides the systematic instruction to view the tiles for all the data segments in the account funding stage.

2.3.1 Funding

This topic provides the systematic instruction to view the details captured for the Funding in the Account Funding stage.

The **Funding** data segment displays the **Funding** details captured in the **Application Entry** stage. The Transaction Reference Number and the Transaction Status is either auto-populated or has to be manually captured based on the configuration. Using the **Cash** mode, the **Initial Funding** can be done automatically for cash transactions. The Manual process is supported for **Transfer by Account**, **Other Bank Cheque**, and **Cash** of initial funding.

Note:

For more details on the Modes and the Manual/Automatic Process configuration, refer to the **Configurations Guide**.

During the **Application Entry** stage, the initial funding transaction triggers a teller transaction reference number and its status.

1. On acquiring the Account Funding task, the Initial Funding Details stage is displayed.

Figure 2-21 Funding

2. Specify the fields on **Funding** screen.

 Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-15 Funding - Field Description

Field	Description
Fund By	Displays the Fund by option selected in the Account Details data segment in Application Entry stage.
Funding Amount	Displays the amount of the initial funding updated in the Account Details data segment in Application Entry stage.
Value Date	Displays the value date of the initial funding updated in the Account Details data segment in Application Entry stage.
Account	Displays the account number. This field appears if the GL Account or Account Transfer option selected as the funding by mode.
Account Name	Displays the account name. This field displays only if Account Transfer is selected as the funding by mode.
Cheque Number	Displays the cheque number. This field displays if Account Transfer or Other Bank Cheque is selected as the funding mode. The cheque number is displayed if it is captured in the Account Details data segment.
Cheque Date	Displays the cheque date. This field displays if Account Transfer or Other Bank Cheque is selected as the funding by mode. The cheque number is displayed if it is captured in the Account Details data segment.

Table 2-15 (Cont.) Funding - Field Description

Field	Description
Transaction Reference Number	Specify the transaction reference number through which the transaction has been posted for initial funding in the Teller Application. For Automated processing of the Cash funding mode, system displays the transaction reference number for the initial funding transaction that was triggered off in the Application Entry stage for the Teller module.
Transaction Status	Select the transaction status for the transaction posted for initial funding. The available status are: • In progress • Pending • Success For Automated processing of the Cash funding mode, system displays the status of the teller transaction.  Note: The status of the teller transaction should be 'Success' for the submission of the Account Funding stage.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The user is required to provide all mandatory data segments and data fields for the system to validate. If any mandatory details are missing, the system displays an error message for the user to correct the information. Users must capture the mandatory data before they can proceed to the next data segment.

2.3.2 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account funding stage.

The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.

1. Click **Next** from the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-22 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

 Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-16 Summary - Field Description

Data Segment	Description
Account Details	Displays the account details.
Funding	Displays the initial funding details.

- Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified.
- In the **Override** screen, the message appears in case there is any override. During business validations, the system raises warnings as overrides. The user must accept them to continue. Alternatively, user can go back and correct the data to prevent overrides from occurring. In case of override, click **Accept Overrides& Proceed** to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
- Select the checkbox to accept the checklist.
- Click **Save & Proceed**. The **Outcome** screen is displayed.
- In the **Outcome** screen, select appropriate option from the Select to Proceed field.

- Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Account Funding Stage** for the term deposit application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Account Approval Stage**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Return to Application Entry** to return to application entry stage. The system generates the Application Entry task that appears in **Free Task** to acquire and edit.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
8. Enter the remarks in Remarks.
 9. Click **Submit** to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 10. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers [Term Deposit Account] to the other stages. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.4 Account Approval Stage

This topic provides the detailed information about the account approval stage data segments.

Users having functional access to the Account Approval stage will be able to view the record in the Free Task process.

The Account Approval stage comprises of the data segments of the previous stages. Since the data segment are in view only mode and have been completed in the previous stages, the Account Approval stages are launched with the Application Information segment.

To approve an account opening:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Account Approval stage is displayed.

The Account Approval stage has the following data segments in which the user can only view the data:

- **Applicant** – For detailed information, refer the Customer Information data segment in the Application Entry stage.
- **Account Details** - For detailed information, refer the Account Details data segment in the Application Entry stage.
- **Account Funding Details** – For detailed information, refer the Mandate Details data segment in the Application Entry stage.
- **Payout Instruction** – For detailed information, refer the Nominee Details data segment in the Application Entry stage.
- **Beneficiary Details** – For detailed information, refer the data segment in the Application Entry stage.

- **Terms and Conditions** – For detailed information, refer the Terms and Conditions data segment in the Application Entry stage.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- **Account Approval Details**
This topic provides the systematic instruction to view the details captured for the account approval details in the account approval stage.
- **Summary**
This topic provides the systematic instruction to view the tiles for all the data segments in the account approval stage.

2.4.1 Account Approval Details

This topic provides the systematic instruction to view the details captured for the account approval details in the account approval stage.

The **Account Approval Details** data segment displays the application details.

1. On acquiring the TD Account Approval stage, the Account Approval Details stage is displayed.

The **Account Approval Details** screen displays.

Figure 2-23 Approval Details

The screenshot shows the 'Account Approval - 006APP000129061' interface. On the left is a navigation menu with options: Applicants, Account Details, Account Funding Details, Payout Instruction, Nominee Details, Terms and Conditions, **Approval Details** (selected), and Summary. The main area is titled 'Approval Details' and contains the following fields:

- Account Type: Term Deposit Account
- Account Branch: 006
- Product Name: DIGITAL REINVESTMENT TD
- Product Code: OBDRTD
- Account Currency: GBP
- User Recommendation: ☐ Approved ☐ Rejected (with a 'Required' label below)

At the bottom, there is an 'Audit' button on the left and a row of buttons on the right: 'Cancel', 'Request Clarification', 'Back', 'Save and Close', and 'Next'.

2. Specify the fields on **Account Approval Details** screen.

Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-17 Account Approval Details - Field Description

Field	Description
Account Type	Displays the account type.

Table 2-17 (Cont.) Account Approval Details - Field Description

Field	Description
Account Branch	Displays the account branch.
Product Code	Displays the product code.
Product Name	Displays the product name.
Account Currency	Displays the account currency.
User Recommendation	Select the user recommendation from the drop-down list. The available options are: • Approval • Reject

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.4.2 Summary

This topic provides the systematic instruction to view the tiles for all the data segments in the account approval stage.

The **Summary** data segment displays the account service preferences details.

The tiles display the important details captured in the specified data segment. It further allows to click on the specific tile to view the data segment and the details captured. You can additionally click on the data segment from the train on the left hand side to view the details of the data segment.

- Click **Next** in **Account Approval Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-24 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

 Note:

The fields, which mentioned as Required, are mandatory.

For more information on fields, refer to the field description table.

Table 2-18 Summary - Field Description

Data Segment	Description
Applicants	Displays the applicants details.
Stake Holder Details	Displays the stake holder details. Note : This field appears only if the Customer Type is selected as Small and Medium Business (SMB) .
Account Details	Displays the account details.
Account Funding Details	Displays the account funding details.
Payout Instruction	Displays the payout instruction details
Nominee Details	Displays the nominee details.
Term and Conditions	Displays the term and conditions.
Approval Details	Displays the approval details.

Supervisor can verify the KYC Verification status of the Customer from the **Customer 360** in the Header. Only if the KYC Status is 'Success' will the application be allowed to proceed further. Click '**Submit**' to submit the Account Approval stage and proceed to submit the Account Opening request to Host.

- Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified.
- In the **Override** screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise. In case of override, click **Accept Overrides& Proceed** to proceed.

OR

Click **Proceed**. The Checklist screen appears.

- In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed. The **Outcome** screen appears.
- Select the checkbox to accept the checklist.
- Click **Save & Proceed**. The **Outcome** screen is displayed.
- In the **Outcome** screen, select appropriate option from the Select to Proceed field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
 - Select the **Return to Application Entry** Stage to make application entry stage available in free task for edit.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
- Enter the remarks in Remarks.

9. Click **Submit** to submit the Application Entry stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number. The welcome letter is generated.
10. Click **Close** to close the window.

OR

Click **Go to Free Task**.

After the Host creates the Certificate of Deposit Account successfully, the response is sent back to the Oracle Banking Originations Cloud Service with the Certificate of Deposit Account Number.

The details of all the applications which have logically completed all their stage movements, (Rejected / Account Created) will be made available in Completed tasks for query purpose only.

If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.

2.5 Global Actions

This topic provides the detailed on the actions that can be performed in all stages.

This section appears are the top of the right pane and is applicable for all the account opening stage. You can add, edit, view or delete the information from the respective section.

Below are the list of global actions:

- [Application Info](#)
In this section you can view the application number along with its product name.
- [Customer 360](#)
In this section you can view the list of customers involved in the application.
- [Application Details](#)
In this section you can view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.
- [Remarks](#)
In this section you can view or the post the remarks.
- [Documents](#)
In this section you can upload the document and also view the already uploaded documents.
- [Advices](#)
You can view the advices that are shared with customer. Advices are generated post Application Entry stage is submitted.
- [Clarification Details](#)
In this section you can request for clarifications.

2.5.1 Application Info

In this section you can view the application number along with its product name.

- Click the **Application Info** button to view the details.

The **Application Info** screen appears with the Application Number and Business Product fields.

Figure 2-25 Application Info

The screenshot shows a window titled "Application Info" with a close button (X) in the top right corner. Inside the window, there is a light gray box containing the following information:

Application Number
006APP000127742
Business Product
Normal Simple Fixed Deposit US

2.5.2 Customer 360

In this section you can view the list of customers involved in the application.

The separate tiles of all the customers involved in the application appears. You can click on the respective customer tile to view the 360 degree details of that customer.

1. Click **Customer 360** to view the list of customer involved in the application.

The **Customer 360** screen is displayed.

Details	Click the details icon to view below details of the documents: • Uploaded Time: Displays the uploaded date and time of the document in hours and mins. • Uploaded By: Displays the user name who uploaded the document . • Stage Uploaded: Displays the stage name on which the document is uploaded.
Document	Click  to select the document from machine to upload. You can remove the uploaded document before saving the record from the Action column. Post saving the record you must delete the record to remove the document. Below actions are perform on the uploaded document • You can preview already uploaded document. • You can download already uploaded document.
Actions	You can perform below actions on the added record: • Click  to save the record. • Click  to delete the record.

6. Once the details are updated, click **Save**. Clarification Request once raised moves the application to 'Awaiting Customer Clarification' state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the **Awaiting Customer Clarification** sub-menu available under **Task** menu.

Select the Application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu. Click on the **Clarification Details** from the header.

7. Select the specific clarification to take action on it.

Allowed actions are as following:

- Adding New Conversation

- Withdraw Clarification
- Accept Clarification

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

3

Simplified Application

This topic describes the concept and process of single stage application.

What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segments in a single view.

How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

In the process of Simplified Application, the **Initiate** stage is bypassed and the **Application Entry** stage appears for capturing details.

How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

To open an account using simplified application process:

1. From the **Menu**, select the **Retail Origination**. The Retail Origination menu appears.
2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
3. Select the appropriate product and click **Apply**.
The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
 - **Applicant** : In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Multiple applicants are allowed with different roles. Refer **Applicant** data segment from the **Application Entry** stage of this guide.
 - **Account Details**: In this data segment user can capture the product details to configure the account. Refer **Account Details** data segment from the **Application Entry** stage of this guide.
 - **Funding**: In this data segment user can capture the funding details to configure the account. Refer **Funding** data segment from the **Application Entry** stage of this guide.
 - **Payout Instruction**: In this data segment user can capture the payout instructions of the maturity amount to configure the account. Refer **Payout Instruction** data segment from the **Application Entry** stage of this guide.

- **Nominee Details:** In this data segment user can capture the nominee details. Refer the **Nominee Details** data segment from the **Application Entry** stage of this guide.
 - **Term and Conditions:** In this data segment user can capture the term, conditions and consents of the customer. Refer the **Term and Conditions** data segment from the **Application Entry** stage of this guide.
 - **Review:** In this data segment user can review all the details that are captured on clicking on each data segment tile.
4. On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
Below are the stages are autogenerated if the Know Your Customer (KYC) process is not successfully completed:
 - **Debit Assessment:** If the applicants involved in a simplified application have not completed the Know Your Customer (KYC) process, then the **Debit Assessment** stage appears in the application process. The user having the required access rights can pick this task and can retry submission after taking required actions on the KYC non-compliance. Refer the **Debit Assessment** stage of this guide.
 - **Manual Debit Assessment:** If the bureau status of any applicant is marked as **Referred** then this stage appears in an account opening process. Refer the **Manual Debit Assessment** stage of this guide.
 5. After completing the Know Your Customer (KYC) process, the Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the **Approval Details** data segment of the **Account Approval** stage in this guide.
 - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
 - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
 6. An account is created on approving the application in the **Account Approval** stage.
 7. Below tasks are aslo generated in this process:
 - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.
