This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Background

Oracle Financial Services Software Limited has developed Oracle® Banking Originations Cloud Service to offer seamless flexibility to financial institutions for easy adaptability to market needs and to enable banks to streamline their operations using Task based workflows and improve their overall operational efficiency while onboarding various Banking products across Savings Accounts, Current Accounts, Term Deposit Accounts and Loan Accounts.

Oracle® Banking Originations Cloud Service is the middle office banking solution with a comprehensive coverage of Retail Banking origination processes. It enables Banks to deliver improved user experience for various Bank personas handling defined functions in the lifecycle of the various product originations.

Purpose

The purpose of this Release Notes is to propagate the enhancements of the current release in the Oracle® Banking Originations Cloud Service.

Acronyms and Abbreviations

OBDX	Oracle Banking Digital Experience

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1

Release Highlights

This topic lists the highlights of release enhancements.

Following are the features included in the release along with forward porting of applicable fixes related to the incidences reported in previous versions and technical qualification to comply with approved Tech Stack.

- Enhancement of Applicant data.
- Relationship pricing related enhancement.
- State Code related enhancement.
- Loan assessment details data segment view for INSTA personal loan.
- Document Generation and Document Acceptance for Current Account, Savings Account and Term Deposit.
- Notices & disclosures for current account, savings account and term deposit.
- Enhancement in search filter for customer category.

Features for US Region

- Enhancement of tax status for applicants.
- Service member functionality related enhancement.
- Document Generation and Document Acceptance for Current Account, Savings Account and Term Deposit.

2

Release Enhancements

This topic describes on the release enhancements.

The following are enhancements developed in this release:

- [Functional Features](#)
This topic explains functional features that are enhanced or added in this release.
- [Features for US Region](#)
This topic lists all the features that are developed for US Region.
- [Integration](#)
This topic explains the integration changes of this release.
- [Deprecated Features](#)
This topic explains the deprecated features of this release.

2.1 Functional Features

This topic explains functional features that are enhanced or added in this release.

Enhancement of Applicant data

- Ability to capture new field for Salutation for applicants.
- Ability to capture different contact sub-type for mobile and email.
- Ability to capture employer address.
- Ability to capture time zone for the different channels for Mobile, SMS, Whatsapp in marketing communication section.

Relationship pricing related enhancement

- Ability to call lending host system and receive Relationship Pricing Benefit margin for loan applications for existing customers.
- Ability to pass the Product Interest Rate, Product Margin, Risk based Margin, Relationship Benefit Margin and the repayment schedule to Oracle Banking Digital Experience.

State Code related enhancement

- Ability to have the same state code for two different countries.
- Ability to search for a state based on a country code.

Loan Assessment details data segment view for Insta Personal Loan

- Oracle Banking Originations Cloud Service users should be able to view the loan assessment details while processing an Insta PL, allowing them to understand the factors behind loan approval or rejection.

Document Generation and Document Acceptance for Current Account, Savings Account and Term Deposit.

- Configuration of Document Generation data segment in Offer Issue stage and Document Acceptance data segment in Offer Accept or Reject stage for current account and savings

account with OD process. The document such as Offer Letter will be generated and dispatched and tracked for acceptance as part of these new data segments.

Notices and disclosures for Current Account, Savings Account and Term Deposit

- New list of Advice added for Loans, Current Account, Savings Account, and Term Deposit process.
- The advice can be configured as part of Advice Generation framework based on pre-defined list of events along with a condition (configured as a rule) if applicable. For Example, Offer Letter advice is sent as part of Offer Issue event.

Enhancement in search filter for customer category

- Ability to fetch only Individual and Small and Medium Business type customer from Party for Account Onboarding.

2.2 Features for US Region

This topic lists all the features that are developed for US Region.

Below features are developed for US region:

Enhancement of Tax Status for applicants

- Ability to capture new fields in the **Tax Declaration** section in Applicant data segment during an application.
 - TIN Type
 - TIN Status
 - Tax Identification Number
 - Foreign Tax Identification Number
 - Certification Date
 - Tax Country Code and Province
 - Backup Withholding Code
- Ability to validate the format of capture of different **Tax Identification Number**.
- Ability to validate capture of **Tax Identification Number** based on **TIN Status**.

Service Member Functionality related enhancement

- Ability to capture new fields of Service Obligation End date, Rank, Pay Rate and Service Status for the applicant.
- Ability to stamp the application for armed forces benefits.
- Ability to check if the application will breach MLA rate and stop the application if breached.
- Ability to display MAPR at Repayment Schedule generation and assessment
- Ability to show the APR and MAPR in the offer letter

Document Generation and Document Acceptance for Current Account, Savings Account and Term Deposit

- Addition of Application Documents stage for US Current Account, Savings Account, and Term Deposit process like Application Form, etc. The new stage consists of Document Generation and Document Acceptance data segments which will generate and dispatch the document to recipients and track the documents that requires signed acceptance.

2.3 Integration

This topic explains the integration changes of this release.

DocuSign Integration for e-Signature

- Addition of DocuSign as a delivery mode for the documents as part of Document Generation and Document Acceptance data segments.
- Integration with DocuSign APIs for sending the documents for e-signing to the desired list of recipients.
- Track the status of documents for e-signing and auto upload the signed documents, once recipients have signed the documents.

OBDX API changes

- Impact for Initial Funding & Finicity Integration
- Push Notification for specific events.
- Schedule generation API

2.4 Deprecated Features

This topic explains the deprecated features of this release.

Parent and Guardian data segment is deprecated from 14.7.5.0.0 release

3

Components of the Software

This topic explains the change in software components.

- [Documents Accompanying the Software](#)
This topic lists the documents that accompany the software.
- [Software Components](#)
This topic lists the software components which are applicable in this release.

3.1 Documents Accompanying the Software

This topic lists the documents that accompany the software.

The various documents accompanying the software are as follows:

- Product Release Note and Installer Kit
- User and Installation manuals

3.2 Software Components

This topic lists the software components which are applicable in this release.

Software Components of Oracle® Banking Originations Cloud Service that forms part of this release are as follows:

- Service and API Components
- UI Components
- Database objects which include tables, sequences and seed data
- Configuration files used for deployment

4

Environment Details

This topic lists the technical compatibility details of this release.

Note:

Oracle Applications are developed and tested on Oracle Linux, which is optimized for performance, stability, and security.

Note:

Browser support is no longer based on Operating Systems but strictly tied to the browser themselves, no matter on which Operating Systems they are installed. Current release is certified on client workstations with Windows 10 and Mac OS.

Note:

For detailed information on Browser Support, please refer to the Oracle Software Web Browser Support Policy at : <https://www.oracle.com/middleware/technologies/browser-policy.html>
