Purpose

This manual is designed to help acquaint you with Oracle Banking Originations Cloud Service. This guide provides an overview of the Savings Account Origination process and takes you through the various steps involved in handling all the necessary activities in the life cycle of a Savings Account Origination.

Module Prerequisite

Specify the **User Name** and **Password**, and login to **Home** screen.

Before you begin

Kindly refer to the **Getting Started User Guide** for common elements, including Symbols and Icons, Conventions Definitions, and so forth.

Audience

This guide provides instructions and information about the Saving Account product to help various bank users to deliver quick and efficient service to both customer and prospects.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which user supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that user enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 1 Acronyms and Abbreviations

Acronyms and Abbreviations	Description
AER	Annual Equivalent Rate
API	Application Programming Interface

Module Post requisite

After finishing all the requirements, please log out from the Home screen.

1

Overview

This topic describes the information on the various features of the Savings Account Origination module.

Oracle Banking Originations Cloud Service is the middle office banking solution with a comprehensive coverage of Retail Banking Origination processes for Savings Account, Current Account, Term Deposit, and Loans comprising of Home Loan, Personal Loan, Education Loan and Vehicle Loan for Individual customers, and Term Loan and Business Loan for Small and Medium Business customers.

- Saving Account
- Current Account
- Term Deposit Account
- Retail Loans Account

It is a Host-Agnostic solution.

It enables banks to deliver improved user experience for various bank personas such as Sales Officers, Relationship Manager, Account Opening Officers, Branch Supervisor/Managers, Loan Officers, and Credit Officers and so on, handling defined functions in the lifecycle of the various product origination.

The convenience of configuring appropriate stages and the respective data segments within each of these stages, which can be business driven, is hosted and architected by our new platform solution. The random access navigation between data segments within a given stage with appropriate validations, helps enable the business user to capture apt information anytime during the account open process before the Savings Account is created in the Host. The new workflow also supports capturing of relevant documents, stage wise, and generation of advices and notifications dynamically.

The initiation request for a Savings Account can be originated by authorized branch users or relationship managers or by approved bank agents, either through the traditional branch channel or through dedicated protocol services made available on digital devices like tablets or mobiles. The initiation of Savings Account request can be made for both new and existing customer types. Also, the system supports processing of the savings account request from the customer which are directly received from the Self-Service Banking Channel (Oracle Banking Digital Experience) through the REST based service APIs.

Note

Refer to the detailed setup and operation workflows for both asset and liability products initiation made available in the **Operations User Guide**.

2

Savings Account Origination

This topic describes the information on the defined stages through which the Savings Account Application has to flow before it is ready to be sent to the Host for Account Creation.

As detailed in the **Operations User Guide**, all the Product Originations are initiated in the **Application Initiation** stage from the Product Catalogue. The Cart Operation in Product Catalogue allows to originate single or multiple Product initiation. Once the Savings Account Product origination process is initiated either as a single product origination or as part of the multiple product selection, Process Orchestrator generates the Savings Account Process Reference Number on submit of the **Application Initiation** stage. Process Orchestrator also updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective.

Savings Account Origination Process flow comprises of the following stages and the detailed information of the same is available in the following topics:

- [Application Entry Stage](#)
This topic describes the information on the various data segments to capture the required data in the Application Entry stage.
- [Overdraft Limit Details Stage](#)
This topic describes the information on the various data segments to capture the required data for the Overdraft Limit Details stage.
- [Application Enrichment Stage](#)
This topic describes the information on the various data segments to view and update the required data for the Application Enrichment stage.
- [Account Funding Stage](#)
This topic describes the process of initial funding of an account. In this stage user can provide initial funding details before opening an account.
- [Underwriting Stage](#)
This topic describes the information on the various data segments to access the credit rating and capture the required data for the Underwriting stage.
- [Application Assessment](#)
This topic describes the information on the various data segments to update the required data and assess the application in the Application Assessment stage.
- [Manual Credit Assessment Stage](#)
This topic describes the information on the various data segments to assess the application manually in the Manual Credit Assessment stage.
- [Manual Credit Decision Stage](#)
This topic describes the information on the various data segments to review and approve the application manually in the Manual Credit Decision stage.
- [Account Parameter Setup Stage](#)
This topic describes the information on the various data segments to setup the required account parameters in the Account Parameter Setup stage.
- [Offer Issue Stage](#)
This topic describes the information on the various data segments to generate the offer in the Offer Issue stage.

- [Offer Accept / Reject Stage](#)
This topic describes the information on the various data segments to accept / reject the offer in the Offer Accept / Reject stage.
- [Post Offer Amendment Stage](#)
This topic describes the information on the various data segments to request for amendment of overdraft in the Post Offer Amendment stage.
- [Account Approval Stage](#)
This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage
- [Manual Retry Stage](#)
This topic describes the information on the various data segments on the Manual Retry stage.
- [Account Funding](#)
This topic describes the process of initial funding of an account. This stage appears once the account is opened.
- [Global Actions](#)
This topic provides details on the actions that can be performed in all stages.

2.1 Application Entry Stage

This topic describes the information on the various data segments to capture the required data in the Application Entry stage.

Process Orchestrator updates the record in the **Free Task** process for the **Application Entry** stage also referred as Task from orchestrator perspective. The user can **Acquire and Edit** or **Acquire** the task from the **Action** column and the header respectively as per requirement.

The **Application Entry** stage will be automatically submitted, in case the Bank level configuration for allowing full Application submission is set as **Yes** and the user has updated all the data segment of **Application Entry** stage as part of the **Application Initiation** stage itself by clicking on the **Application** button available in the **Product Details** data segment.

After successful submission of **Application Entry** stage, a request for the initial funding transaction is sent to **Teller Module**, if **Fund By** option is selected as **Cash**. The status of the **Teller Transaction** is then validated in the **Initial Funding Details** data segment of **Account Funding** stage.

The **Application Entry** stage has the following reference data segments:

- [Applicant](#)
This topic provides the systematic instructions to capture the customer-related information for the application.
- [Account Details](#)
This topic provides the systematic instructions to view and modify the account details.
- [Stake Holder Details](#)
This topic provides the systematic instructions to capture the stake holder details related information for the business.
- [Financial Details](#)
This topic provides the systematic instructions to capture the financial details of a single customer or multiple customers in case of joint applicants.

- [Collateral Details](#)
This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for Overdraft limit.
- [Nominee Details](#)
This topic provides the systematic instructions to capture the details of the Nominee for the account.
- [Terms and Conditions](#)
This topic describes the terms and conditions that are mandatory to accept to proceed with the account opening process.
- [Review](#)
This topic provides systematic instruction to view all the data segments in the Application Entry Process.

2.1.1 Applicant

This topic provides the systematic instructions to capture the customer-related information for the application.

The details captured of the customer in the Application Initiate stage appears in this data segment. The user can update further fields for supplementing the customer related information.

- [For Individual Customer Type](#)
The topic describes the process to capture or edit customer information of Individual type of customer.
- [For Small and Medium Business \(SMB\) Customer Type](#)
The topic describes the process to capture or edit customer information of Small and Medium Business type of customers.

2.1.1.1 For Individual Customer Type

The topic describes the process to capture or edit customer information of Individual type of customer.

To capture applicants details:

1. In the Saving Application Entry stage, update the customer details in the Applicants data segment based on the respective customer type.

The **Applicant - Individual** screen displays.

- Specify the relevant details in data fields.

For more information on the fields, refer to the field description table below:

Note

The fields which are marked as **Required** are mandatory.

Table 2-1 Applicant- Individual – Field Description

Field	Description
Applicant Role	Displays the applicant role. By default the Primary role appears in this field. Select the applicant role (Joint, Guardian, Custodian, Guarantor, etc) in case user add multiple applicant in single application.
Add Applicant By	Select the mode from which the user need to add new applicant. The available options are: • Upload ID - Using this option user can upload identification documents of the application to extract the details. • Search Existing Customer - This option is used if the applicant is an existing customer of the bank. On selecting the existing customer, the details appears in the respective sections which are already stored. • Enter Manually - This option is used if user wants to enter all the applicant details manually.
Upload ID	Select the document which is used from extracting applicant details. The available options are: • State Issued Drivers License • Passport This field appears if the Upload ID option is selected.
Country of Issue	Select the country in which the document is issued. This field appears if the Upload ID option is selected.
Select and Drop here	Drag and drop the document file or click on Select or drop files here to browse and upload the document from the local system. PNG and JPEG file formats are supported. 10MB maximum file size is allowed. This field appears if the Upload ID option is selected.
CIF Number	Search and select the CIF number. This field appears if the Search Existing Customer option is selected.
Advanced Search	Click this button to perform party search using advance parameters. For more information on advance search, refer to the Advanced Search section below. This field appears if the Search Existing Customer option is selected.
Basic Details	In this section the user can manually capture the basic details of applicant. This section appears if the Enter Manually option is selected from the Add Applicant By drop down list.
Salutation	Select the salutation of the applicant from the drop-down list.
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
Suffix	Specify the suffix for the applicant. This options in this list appears based on the configured entity code in the Oracle Banking Party product.
Name In Local Language	Specify the applicant's name in their local language.
Gender	Specify the gender of the applicant from the drop-down list.
Date of Birth	Select the date of birth of the applicant.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Field	Description
National ID	Specify the national identification code of the applicant.
Resident Status	Select the residential status of the applicant from the drop-down list. Available options are: • Resident Alien • Non-Resident Alien • Citizen
Country of Residence	Search and select the country code of which the applicant is a resident.
Birth Country	Specify the birth country of the applicant.
Birth Place	Specify the birth place where the applicant has born.
Nationality	Search and select the country code where the applicant has nationality.
Citizenship By	Search and select the country code for which applicant has citizenship.
Marital Status	Select the marital status of the customer from the drop-down list. Available options are: • Married • Unmarried • Legally Separated • Widow This field appears mandatory based on the product configuration.
Customer Segment	Select the segment of the customer. Available options are: • Emerging Affluent • High Net worth Individuals • Mass Affluent • Ultra HNI
Customer Category	Select the category of the customer.
Preferred Language	Select the preferred language.
Preferred Currency	Select the preferred currency.
Details Of Special Need	Select the special need details. Available options are: • Blindness • Cerebral Palsy • Low vision • Locomotor disability • Leprosy-cured • Mental retardation • Mental illness • Hearing Impairment
Remarks For Special Need	Specify the remarks for the special need selected.
Relationship Manager ID	Search and select the Relationship Manager ID for the applicant.
Staff	Select to indicate if the customer is employee of the bank. The available options are: • Yes • No
Profession	Select the profession of the customer.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Field	Description
Politically Exposed Person	Select whether the customer is a politically exposed person. The available options are: • Yes • No
Enable Online Banking	Select whether the customer requires online banking. The available options are: • Yes • No This field displays only to new customers.
Profile Photo	Drag and drop the document file or click on Select or drop files here to browse and upload the document from the local system. PNG and JPEG file formats are supported. 10MB maximum file size is allowed.
Signatures	In this section, user can add new signature and view the already added signature of the customer. Click the Add Signature button to select the file to upload signature. On submission, the signature will be handed off to Oracle Banking Party.
Upload Signature	Drag and drop the signature file or click on Select or drop files here to browse and upload the signature from the local system. PNG and JPEG file formats are supported. 10MB maximum file size is allowed.
Uploaded Signature	Displays the uploaded signature.
Remarks	Specify the remarks related to the signature. Then perform one of the following actions: • Click Save to save the uploaded file. • Click Cancel to cancel the uploaded file.
Signature ID	Displays the Signature ID for the added signature along with the image and remark.
Action	Click Edit to edit the added signatures Click  to delete the added signatures.
Address	This section displays the added address of the applicant. It is mandatory to add communication address of the applicant. Click Add Address to add address details.
Address Type	Select the address type for the applicant from the drop-down list. The options in this drop down appears based on the Common Core maintenance.
Effective Date	Select the date when the applicant start residing at the specified address.
Make this as preferred address	Switch  to prefer the entered address for communication.
Search Address	Specify the address to search for the already captured address. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.

Table 2-1 (Cont.) Applicant- Individual – Field Description

Field	Description
Unstructured Address	- Switch ☒ to display the fields for capturing the unstructured address. - Switch ☐ to hide the unstructured address fields.
Address Line 1/Building Name	Specify the building name. Note: The maximum length is 105 characters.
Address Line 2/Street Name	Specify the street name. Note: The maximum length is 105 characters.
Address Line 3/City/ Town Name	Specify the city or town name. Note: The maximum length is 105 characters.
Address Line 4/Landmark	Specify the landmark. Note: The maximum length is 105 characters.
Country	Select the country from the drop-down list.
State/Country Sub Division	Select the state from the drop-down list. This field appears based on the selected country code.
Zip Code/Pin Code	Specify the zip or post code of the address. Note: The maximum length is 16 characters and allows alphanumeric characters, including spaces.
Structured Address	- Switch ☒ to display the fields for capturing the structured address. - Switch ☐ to hide the structured address fields.
Department	Specify the name of department. Note: The maximum length is 70 characters.
Sub Department	Specify the name of sub department. Note: The maximum length is 70 characters.
Street Name	Specify the street name. Note: The maximum length is 70 characters.
Building Number	Specify the building number. Note: The maximum length is 16 characters.
Building Name	Specify the name of the building. Note: The maximum length is 35 characters.
Floor	Specify the floor number. Note: The maximum length is 70 characters.
Post Box	Specify the post box number. Note: The maximum length is 16 characters.
Room	Specify the room number. Note: The maximum length is 70 characters.
Zip Code/Post Code	Specify the zip or post code of the address. Note: The maximum length is 16 characters and allows alphanumeric characters, including spaces.
Town Name	Specify the name of the city or town where the customer is located. Note: The maximum length is 35 characters.
Town Location Name	Specify the name of sub-location or area within the city or town. Note: The maximum length is 35 characters.
District Name	Select the district from the drop-down list.
Country	Select the country from the drop-down list.
Country Sub Division	Select the country sub-division from the drop-down list.

Table 2-1 (Cont.) Applicant- Individual – Field Description

If the **Collateral Type** is selected as **Term Deposit**, the warning message displays when the Overdraft Limit expiry date is more than the Maturity Date of the term deposit.

3. Specify the details in the relevant data fields.

For more information on fields, refer to the field description table below.

Note

The fields which are marked as Required are mandatory.

Table 2-7 Collateral Details - Field Description

Field	Description
Add	Select the collateral. The available option are: New Collateral Existing Collateral Note: When Oracle Banking Retail Lending Servicing is the host, the system supports secured loan origination using existing collateral. The existing collateral details of the customer are fetched from the collateral product processor. If sufficient unutilized collateral balance is available, it can be used for a new loan for the customer(s).
Applicant	Select the applicant from the drop-down list to fetch existing collateral details. This field appears when the Existing Collateral option is selected.
Primary Collateral	Select the primary collateral. The available option are: Yes No

Table 2-7 (Cont.) Collateral Details - Field Description

Field	Description
Collateral Type	Select the collateral type. Available options are: • Property • Guarantee • Vehicle • Precious Metal • Deposits • Bonds • Stocks • Insurance • Accounts Receivable • Inventory (Stock of Material) The above options displays based on the initial setup.
Category	Select the collateral category from the drop-down list. Available options are: If Collateral type is selected as Property • Residential Property • Vacant Land • Under Construction If Collateral type is selected as Guarantee • Personal Guarantee • Guarantee and Indemnity • Government Guarantee • Family Guarantee If Collateral type is selected as Vehicle • Passenger Vehicle • Commercial Vehicle If Collateral type is selected as Precious Metal • Precious Metal If Collateral type is selected as Deposits • Term Deposit If Collateral type is selected as Bonds • Secured Bonds • Unsecured Bonds • Investment Bonds If Collateral type is selected as Stocks • Domestic Stock If Collateral type is selected as Insurance • Life Insurance If Collateral type is selected as Accounts Receivable • Bill Receivable • Trade Receivable If Collateral type is selected as Inventory (Stock of Material) • Stock of Raw Materials • Finished Goods • Packaging Materials The above options displays based on the initial setup.
Collateral Subcategory	Select the collateral subcategory from the drop-down list. The drop-down options are shown based on the configuration.

Table 2-7 (Cont.) Collateral Details - Field Description

Field	Description
Vehicle Details	This section is used to capture vehicle specific details and appears when the collateral type is selected as Vehicle .
Fetch Vehicle Details	Click this button to open the panel drawer and specify Vehicle Identification Number . Once captured and save the details, the system will populate the details in the respective fields of vehicle details section. This button appears only if the Enable Fetch Vehicle Details field is set as True on the Origination Preferences screen.
Vehicle Identification Number	Specify the vehicle identification number. This field will be defaulted and disabled if the external interface for fetching vehicle details is enabled and data is received.
Vehicle Condition	Select the vehicle condition from drop-down list. The available options are: • Used • New
Make	Specify the vehicle manufacturer name.
Model	Specify the vehicle model.
Trim	Specify the trim of the vehicle that defines its specific version, feature package, and equipment level.
Vehicle Type	Select the vehicle type from the drop-down list.
Year of Manufacture	Specify the year of manufacture for the vehicle.
Kilometers/Miles	Select the kilometers or Miles for the vehicle. The available options are: • Kms • Miles
Distance Traveled	Specify the distance traveled by the vehicle. This field appears only if the vehicle condition is selected as Used .
Engine Type	Select the engine type of the vehicle from the drop-down list. The available options are: • Petrol • Diesel • Electric
Engine Number	Specify the engine number of the vehicle.
Chassis Number	Specify the chassis number of the vehicle.
Registration Date	Select the registration date of the vehicle.
Register Number	Specify the register number for the vehicle.
Registration Authority	Specify the registration authority for the vehicle.
Passenger Vehicle Details	This sub-section appears when the collateral category is selected as Passenger Vehicle . In this section, the user can capture the additional details of passenger vehicle.
Sub-Type	Select the sub type of the passenger vehicle from the drop-down list.
Purpose of Vehicle	Specify the purpose of the passenger vehicle.
Passenger Vehicle Capacity	Specify the capacity of passenger vehicle.
Engine Power	Specify the engine capacity of the passenger vehicle.
Body Type	Select the body type of the passenger vehicle from the drop-down list.

Table 2-7 (Cont.) Collateral Details - Field Description

Field	Description
Commercial Vehicle Details	This sub-section appears when the collateral category is selected as Commercial Vehicle . In this section, the user can capture the additional details of commercial vehicle.
Sub-Type	Select the sub type of the commercial vehicle from the drop-down list.
Purpose of Vehicle	Specify the purpose of the commercial vehicle.
Unit of Capacity	Select the unit of capacity of Vehicle from the drop-down list. The available options are: • Grams • Kilograms • Tonnes • Pounds • Milligrams
Vehicle Classification	Specify the vehicle classification that define vehicles by type, weight, height, number of axles and so on.
Body Type	Select the body type of the commercial vehicle from the drop-down list.
Vehicle Capacity	Specify the capacity of commercial vehicle.
Number of Wheels	Specify the number of wheels for the vehicle.
Collateral Details	In this section, user can capture the collateral details. Based on the collateral type, the below fields are dynamically appears.
Term Deposit Number	Select the Term Deposit Number from the list. The Term Deposit which has crossed the maturity date and the Allow Collateral Linkage disabled, will not appear in the list. This field appears only if the collateral type is Deposits .
Maturity Date	Select the Maturity Date of the term deposit. This field appears only if the collateral type is Deposits .
Purchase Property	Specify whether the collateral property being added is being purchased. This field appears only if the collateral type is Property .
Collateral Value	Specify the collateral value.
Estimated Market Value	Specify the estimated market value for reusing existing collateral for a new loan. This is the current realizable market value of the collateral, which already exists. This field appears only when an existing collateral is reused.
Available Linkage Amount	Displays the available linkage amount. During reuse, the system recalculates as Original available linkage amount + Appreciation (if any) . If Estimated Market Value ≤ Original Collateral Value , no appreciation is applied.
Linked Amount	Specify the linked amount.
Guarantee Type	Select the type of guarantee from the drop-down list. This field appears only if the collateral type is Guarantee .
Hair Cut %	Specify the percentage of Hair Cut.
Collateral Amount To Be Considered	Displays the collateral amount to be considered. Collateral Amount = (Hair Cut % X Collateral Value)
Mark Collateral For Refinance	Specify if an added collateral should be consider for refinance. This field appears when the Refinance is enabled.
Collateral Description	Specify the collateral description.

Table 2-7 (Cont.) Collateral Details - Field Description

Field	Description
Charge Type	Select the charge type from the drop-down list. The available options are: • Assignment • Hypothecation • Lien • Pledge • Mortgage • Registered Mortgage • Equitable Mortgage The above options displays based on the selected valuation rule as configured on the Origination Preferences screen.
Seniority of Charge	Select the seniority of charge from the drop-down list. The available options are: • Primary • Secondary • Pari Pasu • Pledge • Hypothecation The above options displays based on the selected charge type as configured on the Origination Preferences screen.
Applicants	This section displays the applicants name and remarks that are involved in the loan application. These applicants are also related to the added collateral. This field appears only if the collateral type is Guarantee.
Guarantor	This section displays the guarantor name. This field appears only if the collateral type is Guarantee.
Property Location	In this section, user can enter property address which is added as collateral. This section appears only if user select Property from the Collateral Type list.
Address	Specify the address to search already captured address. Based on configuration, on entering few letters, the system fetches the related address that are already captured. Based on the selection, the fields are auto populated in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State/Country Sub Division	Specify the state or country sub division.
Zip Code/Post Code	Specify the zip or post code of the address.
Collateral Ownership Details	In this section, specify the ownership details of the collateral. This section displays all the customers that are involved in the loan application.
Liability ID	Displays the Liability ID.
Liability Description	Displays the Liability description.
Add	Click this button to add the collateral ownership details.

Table 2-7 (Cont.) Collateral Details - Field Description

Field	Description
Customer Name	By default, displays the primary customer name. User can add more customer name to include ownership percentage. Select the customer name from drop-down list if multiple applicants associated with application.
Ownership Percentage	By default, displays the percentage of the ownership of the primary customer. Specify the ownership percentage if multiple applicants associated with application.
Remark	Specify the remark of the customer.
Action	Perform one of the following actions: - Click  to edit the saved ownership details. - Click  to delete the saved ownership details. - Click  to save the added ownership details. - Click  to cancel the added ownership details.
Total Collateral Value	Displays the total value of collateral. This field will be auto updated based on the number of collaterals.
Cover Available	Displays the cover available. This field will be auto updated based on the number of collaterals.
Market LTV	Displays the market loan-to-value.
Bank LTV	Displays the bank loan-to-value.

Note

All the fields are fetched from Oracle Banking Credit Facilities Process Management in read only mode, if integrated with Oracle Banking Credit Facilities Process Management.

- After capturing the details, perform one of the following actions on this screen.
 - Click **Save** to save the collateral details.
 - Click **Cancel** to cancel the collateral details.

Create a new tile with the collateral summary on the **Collateral Details** screen. On saving the collateral details, the system runs the valuation rule maintained on the **Origination Preferences** screen.

Figure 2-12 Collateral Details Tile

- On the collateral summary tile, perform the following valuation actions by clicking action button.

The valuation actions is enabled only if the **Valuation Rule** outcome is set to **True** on the **Origination Preferences** screen.

For more information, refer to the table below.

Table 2-8 Valuation Action

Actions	Description
Initiate Valuation	The Initiate Valuation action appears when Upfront Valuation is enabled for Vehicle collateral and the Valuation Mode is set to External Interface in the Origination Preferences screen. Click the Initiate Valuation action to initiate the collateral valuation request. Upon successful submission in Credit Facility Process Management, the Refresh Valuation Status action is enabled, and the valuation status is updated to Pending on the collateral summary tile.
Refresh Valuation	Click the Refresh Valuation action to fetch the collateral valuation details. Once the valuation details are successfully retrieved from Credit Facility Process Management, the system enables a View Valuation Details action and updates the valuation status to Available on the collateral summary tile.
View Valuation Details	Click the View Valuation action to open the Valuation Details screen in read-only mode. For more information, refer to the Valuation Details table below.

Table 2-8 (Cont.) Valuation Action

Actions	Description
Capture Valuation	The Capture Valuation action appears when Upfront Valuation is enabled for Vehicle collateral and the Valuation Mode is set to Manual as per the valuation rule outcome. Click the Capture Valuation action to open the Valuation Details screen and capture the valuation details for the vehicle collateral. On saving the valuation details, the system will enable the View valuation details action and update the valuation status as Available on the collateral summary tile.

Table 2-9 Valuation Details

Field	Description
Add	Click this button to add the valuation details manually.
Valuation Type	Select the type of valuation from the drop-down list.
Valuation Amount	Specify the valuation amount.
Agency Code	Select the valuation agency code from the drop-down list.
Agency Name	Display the valuation agency name for selected valuation agency code,
Valuation Date	Select the valuation date.
Action	Perform one of the following actions: - Click  to edit the saved ownership details. - Click  to delete the saved ownership details. - Click  to save the added ownership details. - Click  to cancel the added ownership details.

6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The user cannot proceed to the next data segment, without capturing the mandatory data.

2.1.6 Nominee Details

This topic provides the systematic instructions to capture the details of the Nominee for the account.

To add nominee details:

1. Click **Next** in from the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Nominee Details** screen displays.

Figure 2-16 Nominee Details

2. Specify the fields on **Nominee Details** screen.

Table 2-10 Details - Field Description

Field	Description
Title	Select the title of the applicant.
First Name	Specify the first name of the applicant.
Middle Name	Specify the middle name of the applicant.
Last Name	Specify the last name of the applicant.
Suffix	Specify the suffix for the applicant. This options in this list appears based on the configured entity code in the Oracle Banking Party product.
Date of Birth	Select the applicant's date of birth.
Minor	Select to indicate if nominee is minor.
Relationship	Select the relationship of the nominee with the applicant.
Percentage	Specify the percentage to be considered for distribution of the account balance in case of uneventful death of the applicant.

Table 2-10 (Cont.) Details - Field Description

Field	Description
Address Details	In this section user can add address of the nominee . It is mandatory to add communication address of the applicant.
Same as Applicant	Select this checkbox to indicate the nominee shares the same address of the applicant. The system automatically fills the applicant's address into this section.
Address Type	Select the address type for the applicant from the drop-down list. Based on the configuration, the options are shown in the drop-down.
Search Address	Specify the address to search for the already captured address. Based on the configuration, on entering a few letters, the system fetches the related address that is already captured. Based on the selection, the fields are fetched in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State/Country Sub Division	Specify the state or country sub division. This field appears based on the selected country code.
Zip Code/Post Code	Specify the zip or post code of the address.
Contact Details	In this section user can provide digital contact details.
Add Contact	Click Add Contact to add contact details.
Communication Mode	Select the communication mode from the drop-down list. The available options are: • Mobile Phone • Email
Country	Select the country along with international subscriber dialing code of the mobile phone from the drop-down list. The drop-down list option consist of country code, country name and subscriber dialing code. This field appears only if the Mobile Phone option is selected as communication mode.
Mobile Number	Specify the mobile number.
Email Id	Specify the email ID. This field appears only if the Email option is selected as communication mode.
Preferred	Select the checkbox to indicate if the given record is the preferred one.
Action	User can perform one of the following actions. • Click  to save the contact details. • Click  to edit the added contact details. • Click  to delete the contact details.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

Guardian Details

This screen allows to capture details of the guardian of the minor nominee.

To add guardian details:

4. Click **Add Guardian Details** on Nominee Details screen.

The **Guardian Details** screen is displayed

Figure 2-17 Guardian Details

5. Specify the details in the relevant data fields.

Refer to the **Nominee Details** field description table for detailed information on each field.

6. Perform one of the following actions:
 - Click **Save** to save the captured details.
 - Click **Cancel** to cancel the captured details.

2.1.7 Terms and Conditions

This topic describes the terms and conditions that are mandatory to accept to proceed with the account opening process.

In this data segment user can capture term and conditions consents from the applicants. The customer consents are same across products but few term and conditions defer based on the applied products. They appears in questionnaire format based on the configurations. This questionnaire is mapped at product configuration level. It is mandatory to accept all term and condition to proceed with application.

This data segment comprises of below sections:

- **Term and Conditions for all products** - In this section the term and conditions which are applicable for all the products appears in the questionnaire format.
- **Term and Conditions for <Selected Product>** - In this section the term and conditions which are applicable for all the selected product appears in the questionnaire format.

To capture terms and conditions:

1. Click **Next** from previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Term and Conditions** screen appears

Figure 2-18 Terms and Conditions

The screenshot shows the 'Application Entry - 006APP000161118' window. On the left is a sidebar with a tree view containing: Applicants, Account Details, Financial Details, Collateral Details, Nominee Details, Terms and Conditions (selected), and Review. The main content area is titled 'Terms and Conditions' and shows 'Mr. Brett G Dalton Jr.' with a 'Primary' status. Below this, it says 'Terms and Conditions for Premier Checking Account'. There are two items, each with a toggle switch and an eye icon: 'I have read and agreed to the Current Origination Fees and Charges' and 'I have read and agreed to the Current Origination Agreement'. At the bottom of the window are buttons: 'Audit', 'Cancel', 'Request Clarification', 'Back', 'Save and Close', and 'Next'.

2. Click  to view the term and conditions.
3. Select the toggle button to accept the term and conditions.
4. In the **Consents to receive Marketing Promotional and Sales** section, enter the channel and details.
5. Click **Add Channel** to add the relevant details.
The below fields contain channel data:
 - Channel
 - Contact Value
 - Preferred Time
 - Time Zone
 - Actions
6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.1.8 Review

This topic provides systematic instruction to view all the data segments in the Application Entry Process.

The system will display the summary of each of the data segments in as many sections as the number of data segments in the given stage.

To view the summary of all the data segments:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

Table 2-11 Review - Application Entry – Field Description

Data Segment	Description
Applicants	Displays the applicants details
Account Details	Displays the account details.
Stake Holder Details	Displays the Stake Holder details This data segment appears only if the Customer Type is selected as Small and Medium Business (SMB) .
Financial Details	Displays the financial details.
Collateral Details	Displays the collateral details.
Nominee Details	Displays the nominee details.
Term and Conditions	Displays the term and conditions.

- Click **Submit** to reach the **Stage Movement Submission** screen, where the overrides, checklist and documents for this stage are verified.

The **Stage Movement Submission** screen displays.

Figure 2-20 Stage Movement Submission

Stage Movement Submission

Override
No overrides generated for acceptance.

Checklist
No checklists mapped to the current stage.

Outcome

Select an Outcome
Proceed

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **SavingApplication Enrichment**.
 - If the **Collateral Type** is selected as **Term Deposit** in **Collateral Details** data segment and the **Fund the account** toggle is OFF in the **Product Details** data

segment, the submit of the Application Entry stage will move the application into the **Account Parameter Setup** stage.

- If the selected **Collateral Type** is other than Term Deposit in **Collateral Details** data segment, and the **Fund the account** toggle is OFF in the **Product Details** data segment, the submit of the Application Entry stage will move the application into the **Underwriting** stage.
- If the **Fund the Account** toggle is ON in the **Account Details** data segment, the submit of the Application Entry stage, will move the application to **Account Funding** stage.
- If the **Overdraft Requested** toggle is ON in the **Account Details** data segment, the submit of the Application Entry stage, will move the application to **Overdraft Limit Details** stage.

The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the Application Entry stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the application reference number along with the process reference numbers [Saving Account] to the Application Entry stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

Application De-Dupe:

Based on the configuration set in the Origination Preference screen, the application dedupe service is enabled.

If application dedupe service is enabled, the system will check that any application is in progress for same product and customer combination. On Submit, if any duplicate application exists, override will show a message with other in progress application numbers. User can select the override check box and proceed or take appropriate action.

Note

- If an application is returned to the Application Entry-stage from any other subsequent stages, Oracle Banking Originations Cloud Service will not allow amending details in the Customer Information and Financial Details data segment, once a customer onboarding process has been triggered in the Application Entry Stage and CIF creation is still in progress.
- In case the party amendment request is rejected by Oracle Banking Party, the specified error message is shown to the user while submitting the Application Entry stage. The user has an option to go back and resolve the error or proceed with the stage submission by disregarding the amendment request.
- Unique process reference numbers will be generated and made available in the Free Task grid for the respective Customer Onboarding, Collateral Onboarding requests, which need to be picked up by the concerned users in the Oracle Banking Party/Oracle Banking Credit Facilities Process Management modules.

2.2 Overdraft Limit Details Stage

This topic describes the information on the various data segments to capture the required data for the Overdraft Limit Details stage.

Users having functional access to the Overdraft Limit Details stage will be able to view the record in the Free Task process.

Note

This stage is not applicable for **SMB Customers**.

The **Overdraft Limit Details** stage has the following reference data segments:

- [Account Limit Details](#)
This topic provides the systematic instructions to update the overdraft limit requested by the customer.
- [Collateral Details](#)
This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for Overdraft limit.
- [Verification Details](#)
This topic provides the systematic instructions to capture the verification details.
- [Temporary Overdraft Limit](#)
This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.
- [Advance against Uncollected Funds](#)
This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.
- [Review - Overdraft Limit Details](#)
This topic provides the systematic instruction to view all the data segments in the Overdraft Limit Details stage.

2.2.1 Account Limit Details

This topic provides the systematic instructions to update the overdraft limit requested by the customer.

The Account Limit Details allows to update the overdraft limit requested by the customer.

To add account limit details:

1. On acquiring the **Overdraft Limit Details** task, the Account Limit Details data segment appears.

The **Account Limit Details** screen displays.

Figure 2-21 Account Limit Details

2. Click **Add Overdraft** to capture the overdraft limits.
3. Specify the details in the relevant data fields. For more information on fields, refer to the field description table below.

Table 2-12 Account Limit Details – Field Description

Field	Description
Limit Type	Select the limit type from the drop-down list. Note: System defaults the same limit type for the subsequent overdraft details added.
Branch	Specify the branch code where the account limit is configured.
Linkage Reference	Select the linkage reference number from the drop-down list.
OD Limit Amount	Select the currency and specify the overdraft limit amount for the account.
Limit Start Date	Select the limit start date when the account limit is initiated.
Limit End Date	Select the limit end date when the account limit is valid.
Available Linkage Amount	Specify the available linkage amount of the collateral.
Linked Amount	Select the currency and specify the linked amount.
Linkage Currency	Displays the linkage currency.

Table 2-12 (Cont.) Account Limit Details – Field Description

Field	Description
Rate Type	Displays the rate type as per the limit type is selected. The available options are: • Fixed • Floating
Rate Code	Displays the rate code. Note: This field displays if the Rate Type is selected as Floating .
Base Rate (in %)	Displays the base rate. Note: This field displays if the Rate Type is selected as Floating .
Rate of Interest	Displays the rate of interest. Note: This field displays if the Rate Type is selected as Fixed .
Variance	Specify the variance. Note: This field displays if the Rate Type is selected as Fixed .
Margin	Specify the margin. Note: This field displays if the Rate Type is selected as Fixed .
Final Rate (in %)	Displays the effective rate calculated and based on the below parameters: • Rate Value and the Margin for floating rate type. • Rate of Interest and the Variance for fixed rate type.

4. Perform one of the following options:

- Click **Add Overdraft** to capture the multiple overdraft limits.
- Click **Next** to navigate to the next data segment, after successfully capturing the data.

The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.2.2 Collateral Details

This topic provides the systematic instructions to capture the collateral which is offered by the customer as security for Overdraft limit.

Collateral details will be sent to the host to be made available under local collateral. The relevant service APIs will be made available for both Push and Pull details of collaterals.

Capturing of Collateral details in Oracle Banking Originations Cloud Service is also enabled with an option to onboard collateral using the Oracle Banking Credit Facility Process Management integration services. In such cases, the collateral details will be sent to the Collateral onboarding systems for performing the Valuation, obtaining the Legal opinion and recording the perfection details. These details will be made available on Oracle Banking Originations Cloud Service in the respective Data segments in read only mode.

The user can acquire the application from Free Tasks list.

To add collaterals details:

1. Click **Next** in the previous data segment to proceed with next data segment, after successfully capturing the data.
2. Click **Add Collateral** to capture the collateral details.

The **Collateral Details** screen displays.

Figure 2-22 Collateral Details

If the **Collateral Type** is selected as **Term Deposit**, the warning message displays when the Overdraft Limit expiry date is more than the Maturity Date of the term deposit.

3. Specify the details in the relevant data fields.

For more information on fields, refer to the field description table below.

Note

The fields which are marked as Required are mandatory.

Table 2-13 Collateral Details - Field Description

Field	Description
Add	Select the collateral. The available option are: New Collateral Existing Collateral Note: When Oracle Banking Retail Lending Servicing is the host, the system supports secured loan origination using existing collateral. The existing collateral details of the customer are fetched from the collateral product processor. If sufficient unutilized collateral balance is available, it can be used for a new loan for the customer(s).
Applicant	Select the applicant from the drop-down list to fetch existing collateral details. This field appears when the Existing Collateral option is selected.
Primary Collateral	Select the primary collateral. The available option are: Yes No

Table 2-13 (Cont.) Collateral Details - Field Description

Field	Description
Collateral Type	Select the collateral type. Available options are: • Property • Guarantee • Vehicle • Precious Metal • Deposits • Bonds • Stocks • Insurance • Accounts Receivable • Inventory (Stock of Material) The above options displays based on the initial setup.

Table 2-13 (Cont.) Collateral Details - Field Description

Field	Description
Vehicle Details	This section is used to capture vehicle specific details and appears when the collateral type is selected as Vehicle .
Fetch Vehicle Details	Click this button to open the panel drawer and specify Vehicle Identification Number . Once captured and save the details, the system will populate the details in the respective fields of vehicle details section. This button appears only if the Enable Fetch Vehicle Details field is set as True on the Origination Preferences screen.
Vehicle Identification Number	Specify the vehicle identification number. This field will be defaulted and disabled if the external interface for fetching vehicle details is enabled and data is received.
Vehicle Condition	Select the vehicle condition from drop-down list. The available options are: • Used • New
Make	Specify the vehicle manufacturer name.
Model	Specify the vehicle model.
Trim	Specify the trim of the vehicle that defines its specific version, feature package, and equipment level.
Vehicle Type	Select the vehicle type from the drop-down list.
Year of Manufacture	Specify the year of manufacture for the vehicle.
Kilometers/Miles	Select the kilometers or Miles for the vehicle. The available options are: • Kms • Miles
Distance Traveled	Specify the distance traveled by the vehicle. This field appears only if the vehicle condition is selected as Used .
Engine Type	Select the engine type of the vehicle from the drop-down list. The available options are: • Petrol • Diesel • Electric
Engine Number	Specify the engine number of the vehicle.
Chassis Number	Specify the chassis number of the vehicle.
Registration Date	Select the registration date of the vehicle.
Register Number	Specify the register number for the vehicle.
Registration Authority	Specify the registration authority for the vehicle.
Passenger Vehicle Details	This sub-section appears when the collateral category is selected as Passenger Vehicle . In this section, the user can capture the additional details of passenger vehicle.
Sub-Type	Select the sub type of the passenger vehicle from the drop-down list.
Purpose of Vehicle	Specify the purpose of the passenger vehicle.
Passenger Vehicle Capacity	Specify the capacity of passenger vehicle.
Engine Power	Specify the engine capacity of the passenger vehicle.
Body Type	Select the body type of the passenger vehicle from the drop-down list.

Table 2-13 (Cont.) Collateral Details - Field Description

Field	Description
Commercial Vehicle Details	This sub-section appears when the collateral category is selected as Commercial Vehicle . In this section, the user can capture the additional details of commercial vehicle.
Sub-Type	Select the sub type of the commercial vehicle from the drop-down list.
Purpose of Vehicle	Specify the purpose of the commercial vehicle.
Unit of Capacity	Select the unit of capacity of Vehicle from the drop-down list. The available options are: • Grams • Kilograms • Tonnes • Pounds • Milligrams
Vehicle Classification	Specify the vehicle classification that define vehicles by type, weight, height, number of axles and so on.
Body Type	Select the body type of the commercial vehicle from the drop-down list.
Vehicle Capacity	Specify the capacity of commercial vehicle.
Number of Wheels	Specify the number of wheels for the vehicle.
Collateral Details	In this section, user can capture the collateral details. Based on the collateral type, the below fields are dynamically appears.
Term Deposit Number	Select the Term Deposit Number from the list. The Term Deposit which has crossed the maturity date and the Allow Collateral Linkage disabled, will not appear in the list. This field appears only if the collateral type is Deposits .
Maturity Date	Select the Maturity Date of the term deposit. This field appears only if the collateral type is Deposits .
Purchase Property	Specify whether the collateral property being added is being purchased. This field appears only if the collateral type is Property .
Collateral Value	Specify the collateral value.
Estimated Market Value	Specify the estimated market value for reusing existing collateral for a new loan. This is the current realizable market value of the collateral, which already exists. This field appears only when an existing collateral is reused.
Available Linkage Amount	Displays the available linkage amount. During reuse, the system recalculates as Original available linkage amount + Appreciation (if any) . If Estimated Market Value ≤ Original Collateral Value , no appreciation is applied.
Linked Amount	Specify the linked amount.
Guarantee Type	Select the type of guarantee from the drop-down list. This field appears only if the collateral type is Guarantee .
Hair Cut %	Specify the percentage of Hair Cut.
Collateral Amount To Be Considered	Displays the collateral amount to be considered. Collateral Amount = (Hair Cut % X Collateral Value)
Mark Collateral For Refinance	Specify if an added collateral should be consider for refinance. This field appears when the Refinance is enabled.
Collateral Description	Specify the collateral description.

Table 2-13 (Cont.) Collateral Details - Field Description

Field	Description
Charge Type	Select the charge type from the drop-down list. The available options are: • Assignment • Hypothecation • Lien • Pledge • Mortgage • Registered Mortgage • Equitable Mortgage The above options displays based on the selected valuation rule as configured on the Origination Preferences screen.
Seniority of Charge	Select the seniority of charge from the drop-down list. The available options are: • Primary • Secondary • Pari Pasu • Pledge • Hypothecation The above options displays based on the selected charge type as configured on the Origination Preferences screen.
Applicants	This section displays the applicants name and remarks that are involved in the loan application. These applicants are also related to the added collateral. This field appears only if the collateral type is Guarantee.
Guarantor	This section displays the guarantor name. This field appears only if the collateral type is Guarantee.
Property Location	In this section, user can enter property address which is added as collateral. This section appears only if user select Property from the Collateral Type list.
Address	Specify the address to search already captured address. Based on configuration, on entering few letters, the system fetches the related address that are already captured. Based on the selection, the fields are auto populated in the address section.
Address Line 1	Specify the building name.
Address Line 2	Specify the street name.
Address Line 3	Specify the city or town name.
Country	Select and search the country code.
State/Country Sub Division	Specify the state or country sub division.
Zip Code/Post Code	Specify the zip or post code of the address.
Collateral Ownership Details	In this section, specify the ownership details of the collateral. This section displays all the customers that are involved in the loan application.
Liability ID	Displays the Liability ID.
Liability Description	Displays the Liability description.
Add	Click this button to add the collateral ownership details.

Table 2-13 (Cont.) Collateral Details - Field Description

Field	Description
Customer Name	By default, displays the primary customer name. User can add more customer name to include ownership percentage. Select the customer name from drop-down list if multiple applicants associated with application.
Ownership Percentage	By default, displays the percentage of the ownership of the primary customer. Specify the ownership percentage if multiple applicants associated with application.
Remark	Specify the remark of the customer.
Action	Perform one of the following actions: - Click  to edit the saved ownership details. - Click  to delete the saved ownership details. - Click  to save the added ownership details. - Click  to cancel the added ownership details.
Total Collateral Value	Displays the total value of collateral. This field will be auto updated based on the number of collaterals.
Cover Available	Displays the cover available. This field will be auto updated based on the number of collaterals.
Market LTV	Displays the market loan-to-value.
Bank LTV	Displays the bank loan-to-value.

Note

All the fields are fetched from Oracle Banking Credit Facilities Process Management in read only mode, if integrated with Oracle Banking Credit Facilities Process Management.

4. After capturing the details, perform one of the following actions on this screen.
 - Click **Save** to save the collateral details.
 - Click **Cancel** to cancel the collateral details.

Create a new tile with the collateral summary on the **Collateral Details** screen. On saving the collateral details, the system runs the valuation rule maintained on the **Origination Preferences** screen.

Table 2-15 Valuation Details

Field	Description
Add	Click this button to add the valuation details manually.
Valuation Type	Select the type of valuation from the drop-down list.
Valuation Amount	Specify the valuation amount.
Agency Code	Select the valuation agency code from the drop-down list.
Agency Name	Display the valuation agency name for selected valuation agency code,
Valuation Date	Select the valuation date.
Action	Perform one of the following actions: - Click  to edit the saved ownership details. - Click  to delete the saved ownership details. - Click  to save the added ownership details. - Click  to cancel the added ownership details.

6. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates for all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take an action. The user cannot proceed to the next data segment, without capturing the mandatory data.

2.2.3 Verification Details

This topic provides the systematic instructions to capture the verification details.

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Verification Details** screen displays with the list of pre-defined verifications. However, user can add a new verification on this screen.

Figure 2-27 Verification Details

2. Click **Add Verification** to add new verification details.
The **Add Verification** screen displays.

Figure 2-28 Add Verification

3. Specify the relevant details on the **Add Verification** screen.
For more information, refer to the fields description table below.

Note

The fields which are marked as Required are mandatory.

Table 2-16 Add Verification

Field	Description
Entity	Select the entity from the drop-down list. The available options are: • Party • Collateral • Product
Applicants	Select a applicant from the drop-down list. This field appears if the Party is selected as entity.
Collateral Type	Select the collateral type from the drop-down list. The available options are: • Guarantee • Vehicle • Precious Metal • Deposits • Bonds • Stocks • Insurance • Accounts Receivable • Inventory (Stock of Material) • Property This field appears if the Collateral is selected as entity.
Verification Type	Select the verification type from the drop-down list.
Verification Mode	Displays the mode of verification for the selected verification type.
Mandatory	Displays whether the verification type is configured as mandatory or not. The available options are: • Yes • No

4. Perform one of the following actions on the **Add Verification** screen:

- Click **Save** to save the added records.
- Click **Cancel** to cancel the added records.

A new verification is added to the **Verification Details** screen.

5. Displays the relevant details on the **Verification Details** screen.

For more information, refer to the fields description table below.

13. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system validates based on the verification configured.
- If the verification type is configured as **Optional**, the system allows to the next stage without completing the verifications and an override message will display during application submission.
 - If the verification type is configured as **Mandatory**, the system validates all mandatory verifications that are completed before proceeding to next stage. If any mandatory verification is incomplete, the system will raise an override and restrict submission until resolved.

2.2.4 Temporary Overdraft Limit

This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.

The Temporary Overdraft Limit data segment displays the configuration required for temporary overdraft limit to be provided to the account.

To add temporary overdraft limit:

1. Click **Next** in the previous data segment to proceed with next data segment, after successfully capturing the data.
2. Click **Add TOD Details** to capture the Temporary Overdraft Limit Details.

The **Unsecured Temporary Overdraft Limit Details** screen displays.

Note

User can move to the next data segment without capturing the Temporary Overdraft Limit Details.

Figure 2-35 Unsecured Temporary Overdraft Limit Details

Note

The user can move to the next data segment without capturing the Temporary Overdraft Limit Details.

3. Specify the details in the relevant data fields.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Table 2-23 Temporary Overdraft Limit – Field Description

Field	Description
Temporary Overdraft Limit ID	Specify the temporary overdraft limit ID.

Table 2-23 (Cont.) Temporary Overdraft Limit – Field Description

Field	Description
Temporary Overdraft Limit Amount	Select the currency and specify the temporary overdraft limit amount.
Limit Start Date	Select the limit start date.
Limit End Date	Select the limit expiry date.
Renew TOD	Select to indicate if temporary overdraft limit is to be renewed.
Renew Period	In case of TOD renewal is allowed, select the period from the drop-down list. Available options are: • Days • Months • Year
Next Renewal Amount	In case of TOD renewal is allowed, specify the renewal amount.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.2.5 Advance against Uncollected Funds

This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.

The Advance against Uncollected Funds data segment displays the configuration required for advance against uncollected fund to be provided to the account.

To add uncollected funds details:

- Click **Next** in the previous data segment to proceed with next data segment, after successfully capturing the data
- Click **Add AUF Details** to capture the Advance Against Uncollected Funds.

The **Advance Against Uncollected Funds** screen displays.

Figure 2-36 Advance against Uncollected Funds

- Specify the details in the relevant data fields.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.

The **Checklist** screen appears.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Entry** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **SavingApplication Enrichment**. The stage movement is driven by the

business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Enter the remarks in **Remarks**.
 7. Click **Submit** to submit the Overdraft Limit Details stage.

The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 8. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the application reference number along with the process reference numbers [Saving Account] to the Application Enrichment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.3 Application Enrichment Stage

This topic describes the information on the various data segments to view and update the required data for the Application Enrichment stage.

Users having functional access to the Application Enrichment stage will be able to view the record in the Free Task process.

To enrich an application:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Application Enrichment** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Interest and Charges](#)
This topic provides the systematic instructions to view the interest applicable for the account.
- [Advance against Uncollected Funds](#)
This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.
- [Temporary Overdraft Limit](#)
This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.
- [Review](#)
This topic provides instruction to view all the data segments in the Application Enrichment stage.

2.3.1 Interest and Charges

This topic provides the systematic instructions to view the interest applicable for the account.

The **Interest and Charge** data segment displays the interest applicable for the account.

1. On acquiring the Application Enrichment task, the Interest and Charge data segment appears.

The **Interest and Charge Details** screen displays.

Figure 2-39 Interest and Charge

2. Specify the details in the relevant data fields.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Effective Rate (%)	Displays the effective rate calculated based on the Interest Rate and the Margin specified.
APY (in %) or AER (in %)	Displays the annual percentage yield or annual equivalent rate value in percentage. Below is the formula to calculate the APY or AER, Annual Percentage Yield/Annual Equivalent Rate = (1 + Interest Rate ÷ The number of Compounding in a year) ^ (Number of compounding in a year) – 1 This is applicable for the Credit Interest Note: The AER or APY value is shown according to the display preferences selected on the Origination Preferences screen.
APR	Display the annual percentage rate value. This is applicable for debit interest.
Charge Description	Displays the charge description.

Table 2-26 (Cont.) Interest Details - Field Description

Field	Description
Amount/Rate	Displays the charge amount.
Waive	Select the toggle to enable the waiving charges.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.3.2 Advance against Uncollected Funds

This topic provides the systematic instructions to view the configuration required for advance against uncollected fund to be provided to the account.

The Advance against Uncollected Funds data segment displays the configuration required for advance against uncollected fund to be provided to the account.

To add uncollected funds details:

- Click **Next** in the previous data segment to proceed with next data segment, after successfully capturing the data
- Click **Add AUF Details** to capture the Advance Against Uncollected Funds.

The **Advance Against Uncollected Funds** screen displays.

Figure 2-40 Advance against Uncollected Funds

The screenshot shows the 'Advance Against Uncollected Funds Details' screen. The form contains the following fields:

- Limit ID**: Required field.
- Limit Amount**: Required field.
- Limit Start Date**: Required field.
- Limit End Date**: Required field.

Below the fields is a button labeled 'Delete AUF Details'. At the bottom of the screen are navigation buttons: 'Cancel', 'Request Clarification', 'Back', 'Save and Close', and 'Next'.

- Specify the details in the relevant data fields.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Table 2-27 Advance against Uncollected Funds – Field Description

Field	Description
Limit ID	Specify the advance against uncollected funds limit ID.
Limit Amount	Specify the advance against uncollected funds limit amount.
Limit Date Start	Select the limit date start.
Limit Date End	Select the limit date end.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.3.3 Temporary Overdraft Limit

This topic provides the systematic instructions to view the configuration required for temporary overdraft limit to be provided to the account.

The Temporary Overdraft Limit data segment displays the configuration required for temporary overdraft limit to be provided to the account.

To add temporary overdraft limit:

- Click **Next** in the previous data segment to proceed with next data segment, after successfully capturing the data.
- Click **Add TOD Details** to capture the Temporary Overdraft Limit Details.

The **Unsecured Temporary Overdraft Limit Details** screen displays.

Note

User can move to the next data segment without capturing the Temporary Overdraft Limit Details.

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Application Enrichment** stage for the loan application. The Workflow Orchestrator will automatically move this application to the next processing stage, **SavingInitial Funding**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

- Select **Return to Application Entry** to make application entry stage available in free task for edit.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the Application Enrichment stage.
The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
 7. Click **Close** to close the window.
OR
Click **Go to Free Task**.
The system successfully moves the application reference number along with the process reference numbers [Saving Account] to the Application Enrichment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.4 Account Funding Stage

This topic describes the process of initial funding of an account. In this stage user can provide initial funding details before opening an account.

In this stage user can provide initial funding details before opening an account.

This stage appears only if the **Fund Post Account Opening** toggle is not selected in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

To add funding details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Account Funding** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Initial Funding Details](#)
This topic provides the systematic instructions to view and modify the initial funding details captured in the **Application Entry** stage.
- [Review](#)
This topic provides the systematic instructions to view all the data segments in the Initial Funding stage.

2.4.1 Initial Funding Details

This topic provides the systematic instructions to view and modify the initial funding details captured in the **Application Entry** stage.

The Initial Funding Details data segment displays the Initial Funding details captured in the Application Entry stage. The **Transaction Reference Number** and the **Transaction Status** is either auto-populated or has to be manually captured based on the configuration. Automatic option is supported only for the Initial Funding with Cash mode. Manual process is supported for Account Transfer, Other Bank Check, and Cash mode of initial funding.

Note

For more details on the Modes and the Manual/Automatic Process configuration, refer to the **Configurations User Guide**.

To add initial funding details:

1. On acquiring the **Account Funding** task, the **Initial Funding Details** data segment appears.

The **Initial Funding Details** screen displays.

Figure 2-44 Initial Funding Details

The screenshot displays the 'Initial Funding Details' screen within an Oracle application. The title bar indicates 'Initial Funding - 006APP000161169'. The left sidebar shows 'Account Details' and 'Initial Funding Details' (selected). The main area contains a form with the following fields: 'Fund the Account' (Yes), 'Value Date' (March 30, 2018), 'Transaction Reference Number' (BNK34562810), 'Fund By' (Account Transfer), 'Amount' (USD 5,000.00), 'Account Number' (100600000001282), and 'Account Name' (Donna Dalton). The 'Teller Transaction Status' is set to 'Success'. The bottom of the screen has buttons for 'Audit', 'Cancel', 'Request Clarification', 'Back', 'Save and Close', and 'Next'.

2. Specify the fields on **Initial Funding Details** screen.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Table 2-30 Initial Funding Details – Field Description

 - Select the **Return to Application Entry** to return to application entry stage. The system generates the Application Entry task that appears in **Free Task** to acquire and edit.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Enter the remarks in **Remarks**.
 7. Click **Submit** to submit the Initial Funding stage.

The confirmation screen appears with the successful submission status and displays the next stage in which the application has moved along with Application Reference Number and the Process Application Reference Number.
 8. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers to the Underwriting stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.5 Underwriting Stage

This topic describes the information on the various data segments to access the credit rating and capture the required data for the Underwriting stage.

The underwriting process of the lender bank is set to determine if the overdraft application is an acceptable risk. It is a process to assess the borrower's ability to repay the overdraft based on an analysis of their credit, financial capacity, and collateral provided by the borrower.

The Underwriting stage is the next representative stage in the Saving Account Open process. After the Application Enrichment / Account Funding stage is completed successfully, the application can be acquired by the user who has the access rights for the given stage and progress with the data capture.

To add underwriting details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Underwriting** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Credit Rating Details](#)

This topic provides the systematic instructions to view the information on the External Rating Agencies Rating / Scores for the Applicant.

- [Valuation Details](#)
This topic provides the systematic instructions to capture the information on the asset valuation done by the bank approved valuator.
- [Legal Opinion](#)
This topic provides the systematic instructions to capture the legal opinion provided by the bank approved lawyer and decision provided thereon.
- [Review](#)
This topic provides the systematic instructions to view the summary of each of the data segments in the Underwriting Stage.

2.5.1 Credit Rating Details

This topic provides the systematic instructions to view the information on the External Rating Agencies Rating / Scores for the Applicant.

Credit Rating Details is the first data segment of **Underwriting** stage. The user can acquire the application from Free Tasks list. If the applicants are more than one, accordingly the information against each applicant / borrower will be provided. The interface with external rating agencies will be provided.

Oracle Banking Originations Cloud Service is integrated with Bureau Integration Service to fetch the details of the Rating for the given applicant(s). The Bank will have an option to use this integration service or use the manual process of entering the Bureau score in the Credit Rating DS.

1. Click **Acquire and Edit** in the **Free Tasks** for the application for which Underwriting stage has to be acted upon.

The **Credit Rating Details** screen displays.

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

- In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.

The **Checklist** screen appears.

4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. It will logically complete the **Underwriting** stage for the application. The Workflow Orchestrator will automatically move this application to the next processing stage, **Assessment**. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - Select the **Return to Initial Funding Stage** to make Account Funding Stage available in free task for edit.
 - Select the **Return to Overdraft Limit Details** to make Overdraft Limit Details stage available in free task.
 - Select the **Return to Application Entry Stage** to make application entry stage available in free task for edit.
 - Select the **Reject by bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Loan Underwriting** stage.

The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers [Saving Account] to the **Assessment** stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.6 Application Assessment

This topic describes the information on the various data segments to update the required data and assess the application in the Application Assessment stage.

Users having functional access to the Application Enrichment stage will be able to view the record in the Free Task process.

The Assessment stage enables the bank to assess the Overdraft Limit request of the customer and based on the Assessment Score the User can decide on granting the Overdraft Limit for the Saving Account being originated. System derives the recommendation based on the total weightage score. The total weightage score is calculated based on the parameters configured in the Scorecard Model.

Similarly, the Qualitative Score is calculated based on the answers provided to the questionnaire configured in the Qualitative Scorecard ID.

To assess the saving application:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Application Assessment** stage is displayed.

The data segments appears as configured in business process. Refer below chapters for detailed information of each data segment.

- [Qualitative Scorecard](#)
This topic provides the systematic instructions to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.
- [Assessment Details](#)
This topic provides the systematic instructions to view the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Saving Account with Overdraft.
- [Summary](#)
This topic provides the systematic instructions to view the tiles for all the data segments in the Application Assessment stage.

2.6.1 Qualitative Scorecard

This topic provides the systematic instructions to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.

The **Qualitative Scorecard** screen enables the user to capture the relevant evaluation details Applicant wise (if more than one applicant) and the scores are automatically displayed based on the Question / Answer configuration provided for this type of score card.

The relevant qualitative score card ID is attached to the Savings Account Business Product and thereby the Saving Account inherits the score card attributes for evaluation.

1. On acquiring the **Assessment** task from the Free Task, the **Qualitative Scorecard** screen appears.

The **Qualitative Scorecard** screen displays.

Figure 2-53 Qualitative Scorecard

The screenshot displays the 'Qualitative Scorecard' screen for an assessment. The header shows the assessment ID '006APP000160846' and navigation tabs for 'Qualitative Scorecard', 'Assessment Details', and 'Review'. The main content area is titled 'Qualitative Scorecard' and shows the applicant's name 'Mr. Brett G Dalton Jr.' with a 'Primary' status. Below this, the assessment is identified as 'HLQ101 - Questionnaire for Home Loan 101'. The form contains four questions with corresponding answer dropdowns:

Question	Answer
How many years in the current employment?	Less than 3 years
What is the current residence type?	Rented
How many members are dependent on the applicant?	1
How long applicant staying in the current residence?	Less than 3 years

At the bottom of the screen, there are buttons for 'Audit', 'Cancel', 'Request Clarification', 'Save and Close', and 'Next'. The screen number 'Screen(1/3)' is displayed in the top right corner.

2. Specify the fields on **Qualitative Scorecard** screen.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Table 2-37 Qualitative Scorecard – Field Description

Field	Description
Applicant Name	Displays the name of the applicant.
Questionnaire Code	Displays the Questionnaire code.
Questionnaire Description	Displays the description of the Questionnaire code.
Question	Displays the question configured for the Questionnaire code.
Answer	Select the answer from the drop-down values available. The answers are populated based on the Answers configured in the Questionnaire code.

3. Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.6.2 Assessment Details

This topic provides the systematic instructions to view the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Saving Account with Overdraft.

The **Assessment Details** Data Segment displays the total weightage score of the Applicant or Applicants, in case of multiple Applicants in the Saving Account with Overdraft. **Assessment Details** screen enables the user to understand the evaluation and provide the system recommendation based on the following parameters.

- **Validation Model**
- **Borrowing Capacity**
- **Qualitative Score**
- **Quantitative Score**
- **Decision and Grade**
- **Pricing**

1. Click **Next** in the previous data segment to proceed with next data segment, after successfully capturing the data.

The **Assessment Details – Validation Model** screen displays.

2.6.3 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Application Assessment stage.

The Summary displays the tiles for all the data segments in the Application Assessment stage. The tiles display the important details captured in the specified data segment.

To view the captured details:

1. Click **Next in Assessment Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-62 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-39 Summary - Application Assessment – Field Description

Data Segment	Description
Qualitative Scorecard Details	Displays the qualitative scorecard details.
Assessment Details	Displays the assessment details.

- Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified. The Overrides screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

- Click **Proceed Next**. The **Checklist** screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.

- Select the checkbox to accept the checklist. Click **Save & Proceed**. The **Outcome** screen is displayed.
- In the **Outcome** screen, select appropriate option from the **Select to Proceed** field.
 - Select the **Proceed** to proceed with the application. By default this option is selected. If the Proceed option is selected, then the application proceeds based on the assessment decision.
 - It will logically complete the **Application Assessment** stage for the saving application if the system recommendation is **Approved**. The Workflow Orchestrator will automatically move this application to the **Account Parameter Setup** stage.
 - If the system recommendation is **Manual** then, the Manual Credit Assessment stage is generated for this saving application.

- If the system recommendation is **Rejected** then the application is terminated. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.
 - Select the **Return to Application Entry Stage** to make application entry stage available in free task for edit.
 - Select the **Return to Application Enrichment Stage** to make enrichment stage available in free task.
 - Select the **Return to Overdraft Limit Details** to make overdraft limit details stage available in free task.
 - Select the **Return to Initial Funding Details** to make account funding details stage available in free task.
 - Select the **Return to Application Underwriting Stage** to make underwriting stage available in free task.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit**. The **Confirmation** screen is displayed.
- On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed. Click on '**Close**' to close the pop-up screen. Alternatively click on '**Go to FreeTask**' to launch the **Free Task** menu. If you have access to the next stage, you would be able to view the Application number and take action on it.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers to the Manual Credit Assessment stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.7 Manual Credit Assessment Stage

This topic describes the information on the various data segments to assess the application manually in the Manual Credit Assessment stage.

The Manual Credit Assessment stage of the saving account (with overdraft) opening process workflow will enable the bank to manually assess the application and provide the recommendation for the approval / rejection of the application. As a reference, the relevant completed data segments will be made available to the Approver before the application can be moved to the next stage. These completed data segments are from Underwriting Stage. The data segments are displayed in view only mode for the Credit Officer to analyze.

To capture manual assessment details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Manual Assessment** stage is displayed.

The Manual Assessment stage has the following data segments in which the user can only view the data:

- **Credit Rating Details:** - For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.

- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Underwriting stage.

Refer below chapters for detailed information on data segment that are editable.

- [Manual Assessment](#)
This topic provides the systematic instructions to modify the account details and recommend for the approval / reject the saving account application.
- [Summary](#)
This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

2.7.1 Manual Assessment

This topic provides the systematic instructions to modify the account details and recommend for the approval / reject the saving account application.

Manual Assessment is the data segment which enables the bank user to modify the account details and recommend for the approval / reject the saving account application. The user can acquire the application from Free Tasks list and assess all the View Only data segments.

1. On acquiring the **Manual Credit Assessment** task from the **Free Tasks**.

The **Manual Credit Assessment** screen displays.

Figure 2-63 Manual Credit Assessment

The screenshot displays the 'Manual Credit Assessment' interface for application ID 006APP000161212. The left sidebar contains a navigation menu with options: Applicants, Account Details, Financial Details, Credit Rating Details, Collateral Details, Valuation Details, Legal Opinion, Manual Assessment (selected), Account Limit Details, and Review.

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-41 Summary - Manual Credit Assessment – Field Description

Data Segment	Description
Credit Rating Details	Displays the credit rating details.
Valuation Details	Displays the valuation details.
Legal Opinion	Displays the legal opinion.
Manual Assessment	Displays the Manual assessment details.

- Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified. The **Overrides** screen is displayed.
- Click **Accept Overrides & Proceed**. The **Checklist** screen is displayed.
- Click **Save & Proceed**. The **Outcome** screen is displayed.
- In the **Outcome** screen, select appropriate option from the **Select to Outcome** field.

6. Select **Proceed** outcome from the drop-down list.

It will logically complete the **Manual Credit Assessment** stage for the Saving Account (with overdraft) Application. The workflow will automatically move this application to the next processing stage, **Manual Credit Decision** stage.

The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.

7. Enter the remarks in **Remarks**.
8. Click **Submit** to submit the manual credit assessment. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
9. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Saving Account] to the Manual Credit Decision stage. This application will be available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.8 Manual Credit Decision Stage

This topic describes the information on the various data segments to review and approve the application manually in the Manual Credit Decision stage.

Manual Credit Decision stage of the saving account (with overdraft) opening process workflow will enable the bank to make the decision on whether the recommended overdraft limit can be approved to the applicant.

To capture manual credit decision details:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Manual Credit Decision** stage is displayed.

The Manual Credit Decision stage has the following data segments in which the user can only view the data:

- **Account Details** - For detailed information, refer the Account Details data segment in the Application Entry stage.
- **Applicants** – For detailed information, refer the Applicants data segment in the Application Entry stage.
- **Financial Details**: - For detailed information, refer the Financial Details data segment in the Application Entry stage.
- **Credit Rating Details**: - For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Underwriting stage.
- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Underwriting stage.
- **Manual Assessment** – For details information, refer the Assessment Details data segment in the Manual Credit Assessment stage.

Refer below chapters for detailed information on data segment that are editable.

- [Manual Decision](#)
This topic provides the systematic instructions to review and approve the application manually in manual credit decision stage.
- [Review](#)
This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

2.8.1 Manual Decision

This topic provides the systematic instructions to review and approve the application manually in manual credit decision stage.

Manual Decision is the first data segment of Manual Credit Decision stage. The user can acquire the application from Free Tasks list.

1. Click **Acquire and Edit** in the **Free Tasks** screen of the previous stage – Manual Credit Assessment stage.

The **Manual Decision** screen displays.

Remarks

Cancel Submit

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

- In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
- In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
- In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select the **Proceed** to proceed with the application. It will logically complete the Manual Credit Decision stage for the Saving Account (with overdraft) Application. Upon submit, a Pricing call will be made by Oracle Banking Originations Cloud Service

to Decision Service to get the Interest rate. The Workflow Orchestrator will automatically move this application to the next processing stage, Account Parameter Setup stage. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.

- Select the **Return to Application Entry Stage** to make application entry stage available in free task for edit.
 - Select the **Return to Application Enrichment Stage** to make enrichment stage available in free task.
 - Select the **Return to Assessment** to make overdraft limit details stage available in free task.
 - Select the **Return to Initial Funding Details** to make account funding details stage available in free task
 - Select the **Return to Overdraft Limit Details** to make overdraft limit details stage available in free task.
 - Select the **Return to Application Underwriting Stage** to make underwriting stage available in free task.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
 - Select the **Return to Manual Credit Assessment Stage** to make underwriting stage available in free task. It will logically complete the **Manual Credit Assessment** stage for the Saving Account (with overdraft) Application. The workflow will automatically move this application to the next processing stage, **Manual Credit Decision** stage.
6. Click **Submit** to submit the **Manual Credit Decision** stage.
- The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers to the Account Parameter Setup stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.9 Account Parameter Setup Stage

This topic describes the information on the various data segments to setup the required account parameters in the Account Parameter Setup stage.

The Account Parameter Setup stage is the next representative stage in the Saving Account Open process. After the Application Assessment or Manual Credit Decision stage is completed successfully, the user who has the access rights for the given stage, can acquire the application and progress with the data capture. The user can acquire the application from Free Tasks list.

The **Account Parameter Setup** stage has the following reference data segments:

- **Interest and Charge** – This data segment is editable. For detailed information, refer the Interest and Charge data segment in the Application Enrichment stage.
- **Advance against Uncollected Funds** - This data segment is editable. For detailed information, refer the Advance against Uncollected Funds data segment in the Overdraft Limit stage.
- **Temporary Overdraft Limit**- This data segment is editable. For detailed information, refer Temporary Overdraft Limit data segment in the Overdraft Limit stage.
- **Account Limit Details** - This data segment is ready only. For detailed information, refer Account Limit Details data segment in the Overdraft Limit stage.

All the data segments are carried forward from Application Enrichment stage. If the details are captured in Application Enrichment stage, the same will be fetched automatically. The user can modify the captured details and all the data segments are mandatory to capture the details to move the application to the next stage.

- [Review](#)
This topic provides the systematic instruction to view all the data segments in the Account Parameter Setup stage.

 - Select the **Return to Application Underwriting Stage** to make underwriting stage available in free task.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the **Account Parameter Setup** stage.
- The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**.

The system successfully moves the Application Reference Number along with the process reference numbers to the Supervisor Approval or Offer Issue stage.

Note

This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.10 Offer Issue Stage

This topic describes the information on the various data segments to generate the offer in the Offer Issue stage.

After due diligence and Account Parameter setup, the Application will move to the Offer issue stage where the user will generate the offer letter. As a reference, the relevant completed data segments will be made available to the user before the application can be moved to the next stage. These completed data segments are from the Application Underwrite Stage and Application Assessment Stage. The data segments are displayed in view only mode for the user to browse.

In the Offer Issue stage, provide the required details under each data segment.

The **Offer Issue** stage has the following reference data segments:

- **Credit Rating Details:** - For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Underwriting stage.
- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Underwriting stage.

Refer below chapters for detailed information on data segment that are editable.

- [Assessment Summary](#)
This topic provides the systematic instructions to view the assessment summary of the Savings Account application.
- [Document Generation](#)
In this data segment, user can generate and dispatch the documents that are configured.
- [Review - Offer Issue](#)
This topic describes systematic instructions to view all the details of offer issue.

2.10.1 Assessment Summary

This topic provides the systematic instructions to view the assessment summary of the Savings Account application.

Assessment Summary is the view only data segment of Offer Issue stage.

1. Click **Acquire and Edit** in the **Free Tasks** screen for the application for which Account Approval stage has to be acted upon.
The **Assessment Summary** screen displays.

Figure 2-70 Assessment Summary

Offer Issue - 006APP000161169

2. The user can view the details in the relevant data fields.

Note

The fields marked as Required are mandatory.

For more information on fields, refer to the field description table.

Table 2-45 Assessment Summary – Field Description

Field	Description
Requested Amount	Displays the requested overdraft amount.
Tenure	Displays the tenure.
Base Rate	Displays the base rate.
Margin	Displays the variance rate. This field appears only for Floating rate type.
Total Weightage Score	Displays the total weightage score.
Approved Amount	Displays the final approved overdraft amount.
Proposed Margin	Displays the proposed variance. This field appears only for Floating rate type.
Effective Rate	Displays the effective rate of interest.
System Recommendation	Displays the system recommendations.
Grade	Displays the grade of the applicant.
Manual Decision	Displays the manual decision.

Note

Before generating the offer letter, the system fetches the most recent interest rate and updates in the **Interest and Charges** data segment accordingly. This ensures that the offer letter and the overdraft application reflect accurate information.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.10.2 Document Generation

In this data segment, user can generate and dispatch the documents that are configured.

In the Document Generation data segment, the list of documents that are maintained within the document generation event and fulfills the rule criteria are pre-populated in the tabular format. This document generation events are defined in the **Advice Maintenance** screen. Each documents appears separately to generate and dispatch.

To generate and dispatch the document:

- On acquiring the **Offer Issue** task from the **FREE** task.

The **Document Generation** screen displays.

Figure 2-71 Document Generation

2. In the **Document Generation** section, select the check box to select the document from the list. It is mandatory to select at least one document

Perform the below actions on the selected document:

- **Generate:** User can click this button to generate the selected document. On clicking this button the system invokes a call to the report generation service which generates a PDF output for the advice configured in the **Advice Maintenance** screen. Once the output is generated the documents are stored in the document managed service (DMS) along with the reference ID. This reference ID fetches the document on click the Generate Document link in the Document column.
- **Dispatch:** User can click this button to dispatch the selected generated documents. User can only dispatch those documents which are not already dispatched. On clicking this button the system validates whether the document is already generated. Once the validation is successful the system dispatch the document to the default setting defined in the **Advice Maintenance** screen.
- **Reset:** Click this button to reset the action performed on the document.

For more information on fields, refer to the field description table.

Table 2-46 Document Generation – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. This link appears only if the document is generated.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.

Table 2-46 (Cont.) Document Generation – Field Description

Field	Description
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. - If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. - If the delivery mode is Post then the preferred address of every recipient is displayed. - If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. - If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on clicking Generate or Dispatch button. Once the dispatch process is initiated for the generated documents, the status appears based on the selected default mode of delivery. - If the mode of delivery is Email then on the successful trigger the status appears as Email Sent. - If the mode of delivery is E-Sign Remote or E-Sign In-Person then on the successful trigger the status appears as E-Signing Initiated. - If the mode of delivery is Post then on the successful trigger the status appears as Dispatched. - If the mode of delivery is Print then on the successful trigger the status appears as Ready for Print. - In case the dispatch process fails due to technical error then the status appears as Failed.
Status Details	Displays the status details of the document. Click the icon to view the generation and dispatched details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. - Click  to edit the delivery mode. - Click  to save the edited delivery mode. This icon appears once user are edit mode.

Note

The generated offer letter displays the latest interest and charge rates that align with the overdraft application.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.10.3 Review - Offer Issue

This topic describes systematic instructions to view all the details of offer issue.

The system will display the summary of each of the data segments in as many sections as the number of data segments in the given stage.

To view the summary of all data segments:

1. Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review - Offer Issue** screen displays.

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Overdraft] to the Application **Offer Accept / Reject** stage.

Note

This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.11 Offer Accept / Reject Stage

This topic describes the information on the various data segments to accept / reject the offer in the Offer Accept / Reject stage.

After the Offer Issue stage, the offer letter will be sent or communicated to the borrower or applicant. The **Offer Accept / Reject** stage will enable the user to record the customer response – Accept or Reject as the case may be. Also, the offer made can be amended based on Customer request – viz., change in Principal Amount, Interest Rate or Tenure. The post offer amend can be routed back to the relevant previous completed stages like Application Enrichment stage. If the business wants the Underwriting stage or the Application Assessment stage to be redone, they can be configured accordingly, post which the new offer with the revised terms will be issued to the borrower or applicant for acceptance.

To perform actions on issued offer:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The **Offer Accept /Reject** stage is displayed.

In the Offer Accept / Reject stage, provide the required details under each data segment.

The **Offer Accept / Reject** stage has the following reference data segments:

- **Offer Issue:** - For detailed information, refer the Offer Issue data segment in the Offer Issue stage.
- **Assessment Summary** - For detailed information, refer the Assessment Summary data segment in the Offer Issue stage.

Refer below chapters for detailed information on data segment that are editable.

- [Document Acceptance](#)
In this data segment you can capture the acceptance of the documents that are already generated and dispatched.
- [Review](#)
This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

2.11.1 Document Acceptance

In this data segment you can capture the acceptance of the documents that are already generated and dispatched.

The Document Acceptance data segment populates the list of documents that appeared in the **Document Generation** data segment and are mark as **Yes** in the **Acceptance** field in the **Advice Maintenance** screen.

If the document is marked as **No** in the Acceptance field in the **Advice Maintenance** screen then the e-sign acceptance process in not required for that document and hence it will not appear in this data segment.

To accept the document:

1. Click **Next** in previous data segment screen to proceed with the next data segment, after successfully capturing the data.

The **Document Acceptance** screen appears.

For more information on fields, refer to the field description table.

Table 2-48 Document Acceptance – Field Description

Field	Description
Document Name	Displays the name of document. Click the link to fetch the document from the stored service and view the PDF output of the document. • Generated Document: This link appears only if the document is generated atleast onces. • Accepted Document: This link appears only if the E-Signed document is uploaded.
Receiving Party	Displays the name of the applicant along with the role. The document is generated and dispatched to the applicants mentioned in this column. The name appears as captured in the Applicant data segment. If the primary or joint applicant is minor, the guardian or custodian name will display as the receiving party associated with the minor applicant.
Delivery Mode	Displays the default mode of delivery of the documents. This default mode of delivery is defined in the Advice Maintenance screen.
Delivery Details	Displays the delivery details of the generated documents based on the default delivery mode. • If the delivery mode is Email or e-Sign Remote then the preferred email address of every recipient is displayed. • If the delivery mode is Post then the preferred address of every recipient is displayed. • If the delivery mode is e-Sign In-Person then the link is shared with every recipients and in this case the status appears as Pending For Link Generation. Once the dispatch event is executed successfully, the status appears as Link Generated. • If the delivery mode is Print then the Not Applicable text appears.
Status	Displays the status of the documents based on the actions performed on the document.
Status Details	Displays the status details of the document. Click the icon to view the generation, dispatched and acceptance details of document along with the date and time.
Action	Select the appropriate icon to perform respective action. • View: You can view the documents only if the Delivery Mode is defined as E-Sign Remote or E-Sign In-Person. • Upload Document: You can upload documents only if the Delivery Mode is defined as Email, Print or Post. • Delete: You can upload documents only if the Delivery Mode is defined as Email, Print or Post.
Customer Response	Select the customer response for the documents. The available options are: • Accept: Select to accept the application documents. You can select this option only if the acceptance status of all the document is Accepted. • Reject: Select to reject the application documents. If the acceptance status of any one of the document is declined then this option appears auto-selected. • Amend: Select to amend the application document status.
Date of Response	Select the date on which the customer response is captured. This date should be greater or equal to current date.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.11.2 Review

This topic provide the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in the given stage.

To view the summary:

- Click **Next** in the previous data segment to proceed with the next data segment, after successfully capturing the data.

The **Review** screen displays.

In this screen, the message appears in case there is any override. Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, user can go back and correct the data to ensure overrides do not arise.

3. In case of override, click **Accept Overrides & Proceed** to proceed or click **Proceed**.
The **Checklist** screen appears.
4. In the **Checklist** screen the system displays the error message if document checklist is not verified. Click **Proceed Next** to proceed to **Stage Movement Submission** screen.
5. In the **Stage Movement Submission** screen, select appropriate option from the **Select to Outcome** field.
 - Select **Proceed** outcome from the drop-down list. It will logically complete the Offer Accept/Reject stage for the Overdraft Application. The Workflow Orchestrator will automatically move this application to the next processing stage, Account Approval on Host. The stage movement is driven by the business configuration for a given combination of Process Code, Life Cycle and Business Product Code.

- If the **Customer Response** is selected as **Accept** in Offer Accept/Reject screen, then submit of this stage, will move the application into the Account Approval stage.
 - If the **Customer Response** is selected as **Reject** in Offer Accept/Reject screen, then submit of this stage, will terminate the application.
 - If the **Customer Response** is selected as **Amend** in Offer Accept/Reject screen, then submit of this stage, will move the application into the Post Offer Amendment stage.
- Select the **Return to Application Entry** Stage to make application entry stage available in free task for edit.
 - Select the **Return to Application Enrichment** Stage to make enrichment stage available in free task.
 - Select the **Return to Application Underwriting** Stage to make underwriting stage available in free task.
 - Select the **Return to Assessment** stage to make assessment stage available in free task.
 - Select the **Reject Application** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the Offer Accept/ Reject stage.
- The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the sub process reference numbers [Overdraft] to the next processing stage on Host.

Note

This application is available in the FREE TASK list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.12 Post Offer Amendment Stage

This topic describes the information on the various data segments to request for amendment of overdraft in the Post Offer Amendment stage.

Post Offer Amendment stage enables the user to request for amendment of Overdraft components after the Offer is Issued by the bank. This stage will appear only if the **Customer Response** is selected as **Amend** in **Offer Accept/Reject** data segment.

To perform actions on post offer amendment:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Post Offer Amendment stage is displayed

The **Post Offer Amendment** stage has the following data segments: Offer Accept / Reject – View only as available in Offer Accept / Reject stage

- **Account Limit Details** - This data segment is editable. For detailed information, refer Account Limit Details data segment in the Overdraft Limit stage.
- **Offer Issue** – This data segment is read only. For detailed information, refer the Offer Issue data segment in the Offer Issue stage.
- **Offer Accept/ Reject** – This data segment is read only. For detailed information, refer the Offer Accept/ Reject data segment in the Offer Accept/ Reject stage.

Refer below chapters for detailed information on data segment that are editable.

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

2.12.1 Post Offer Amendment

This topic provides the systematic instructions to request for amendment of overdraft components after the offer is issued by the bank.

Post Offer Amendment data segment is the first data segment of Post Offer Amendment stage. The user can acquire the application from Free Tasks list.

1. Click **Acquire and Edit** in the **Free Tasks** screen.

The **Post Offer Amendment** screen displays.

Figure 2-77 Post Offer Ammendment

The screenshot displays the 'Post Offer Amendment' screen for application 006APP000161210. The interface includes a sidebar with navigation options: Assessment Summary, Post Offer Amendment (selected), Account Limit Details, and Review. The main content area is titled 'Post Offer Amendment' and contains a grid of fields for application details. At the top right, there are tabs for Application Details, Application Info, Customer 360, Documents, and a More dropdown menu. The bottom of the screen features buttons for Audit, Cancel, Request Clarification, Back, Save and Close, and Next.

Post Offer Amendment - 006APP000161210			
Applicant Name MRS Donna J Dalton			
Account Type Savings Account	Account Branch 006	Business Product Code SAVING	Business Product Name Regular Savings Account
Offer Issue Date March 30, 2018	Offer Expiry Date March 30, 2018	Offer Amend Date March 30, 2018	Limit Currency GBP
Approved Amount GBP 450,000.00	Limit Type Collateral	Start Date March 30, 2018	End Date October 12, 2025
Rate Type Floating	Base Rate 8.25	Margin 1.25	Effective Rate 9.50

2. Specify the fields on **Post Offer Amendment** screen.

For more information on fields, refer to the field description table.

Table 2-50 Post Offer Amendment – Field Description

Field	Description
Applicant Name	Displays the applicant name.
Account Type	Displays the account type.
Account Branch	Displays the account branch code associate with the application.
Business Product Code	Displays the business product code.
Business Product Name	Displays the business product name.
Offer Issue Date	Displays the date of offer issued.
Offer Expiry Date	Displays the date based on the expiry period configuration done at the Business Product level which is used for this Overdraft.
Offer Amend Date	Displays the date of offer amend.
Limit Currency	Displays the selected currency for the application.
Approved Amount	Specify the approved amount to revise it.
Limit Type	Displays the limit type.
Start Date	Specify the start date to revise it.
End Start	Specify the end date to revise it.
Rate Type	Displays the rate type.
Base Rate	Displays the base rate.
Margin / Variance (%)	Specify the margin or variance in percentage.
Effective Rate	Displays the amended effective rate. Effective Rate = Rate of Interest + Margin/Variance.

- Click **Next** to navigate to the next data segment, after successfully capturing the data. The system will validate all mandatory data segments and data fields. If mandatory details are not provided, the system displays an error message for the user to take action. User will not be able to proceed to the next data segment, without capturing the mandatory data.

2.12.2 Summary

This topic provides the systematic instructions to view the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

The system will display the summary of each of the data segments in as many tiles as the number of data segments in the given stage.

- Click **Next** in **Post Offer Amendment** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-78 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment. For more information on fields, refer to the field description table.

Table 2-51 Summary - Post Offer Amendment – Field Description

Data Segment	Description
Offer Issue	Displays the offer issue details.
Post Offer Amendment	Displays the post offer amendment details.

2. Click **Submit** to reach the **OUTCOME**, where the Overrides, Checklist and the Documents for this stage can be validated or verified. The **Override** screen is displayed.
3. Accept Overrides and click **Proceed Next**. The **Checklist** screen is displayed.
4. Click **Proceed Next**. The **Outcome** screen is displayed.
5. In the **Outcome** screen, select appropriate option from the **Select to Outcome** field.
 - Select **Proceed** outcome from the drop-down list. It will logically complete the **Post Offer Amend** stage for the Overdraft Application. The Workflow Orchestrator will automatically move this application to the next processing stage. The stage movement is driven by the business configuration for a given combination of **Process Code**, **Life Cycle** and **Business Product Code**.
 - If there is any change in **Approved Amount** and/or in **Limit Date Range**, then submit of this stage, will move the application to the **Application Assessment** stage.
 - If the changes are only in the **Rate of Interest** (Pricing), then submit of this stage, will move the application to the **Supervisor Application Approval** stage.
 - Select the **Reject by Bank** to reject the submission of this application. The application is terminated, and an email is sent to the borrower or customer with a rejection advice.
6. Click **Submit** to submit the Post Offer Amendment stage. The confirmation screen appears with the submission status, the Application Reference Number and the Process Application Reference Number.
7. Click **Close** to close the window.

OR

Click **Go to Free Task**. The system successfully moves the Application Reference Number along with the process reference numbers to the stage. This application will be available in the FREE TASKS list. The user who has the access rights will be able to acquire and proceed with the next processing stage of the application.

2.13 Account Approval Stage

This topic describes the information on the various data segments to view the captured details and approve the application in the Account Approval stage

To approve an account opening:

1. Scan the records that appears in the **Free Task** list.
2. Click **Acquire and Edit** or **Acquire** from the **Action** column of the appropriate record. The Account Approval stage is displayed.

The Account Approval stage has the following data segments which user can only view:

- **Applicants** – For detailed information, refer the Customer Information data segment in the Application Entry stage.
- **Account Details** - For detailed information, refer the Account Details data segment in the Application Entry stage.
- **Mandate Details** – For detailed information, refer the Mandate Details data segment in the Application Entry stage.
- **Nominee Details** – For detailed information, refer the Nominee Details data segment in the Application Entry stage.
- **Stake Holder Details** – For detailed information, refer the Stake Holder Details data segment in the Application Entry stage.
- **Financial Details** - For detailed information, refer the Financial Details data segment in the Application Entry stage.
- **Terms and Conditions** – For detailed information, refer the Terms and Conditions data segment in the Application Entry stage.
- **Interest Details**: For details information, refer the Interest Details data segment in the Application Enrichment stage.
- **Charge Details**: For details information, refer the Charge Details data segment in the Application Enrichment stage.
- **Account Limit Details**: For details information, refer the Account Limit Details data segment in the Overdraft Limit Details stage.
- **Temporary OD Limit Details**: For details information, refer the Temporary OD Limit Details data segment in the Overdraft Limit Details stage.
- **Advance against Uncollected Funds**: For details information, refer the Advance against Uncollected Funds data segment in the Overdraft Limit Details stage.
- **Initial Funding Details**: For details information, refer the Initial Funding Details data segment in the Account Funding stage.
- **Credit Rating Details** - For detailed information, refer the Credit Rating Details data segment in the Underwriting stage.
- **Valuation Details** - For detailed information, refer the Valuation Details data segment in the Underwriting stage.

- **Legal Opinion** - For detailed information, refer the Legal Opinion data segment in the Underwriting stage.
- **Assessment Summary**: For details information, refer the Assessment Summary data segment in the Offer Issue stage.

Refer below chapters for detailed information on data segment that are editable.

Table 2-55 Account Funding Details – Field Description

Field	Description
Account	Displays the generated account number for which the initial funding is credited along with the primary account holder name.
Funding Mode	Specify the funding mode from the drop-down list. The available options are: • Own Internal Account • Fund Later • External Account (Finicity) The options in this list appears based on Business Product Configuration screen.
Funding Amount	Specify the amount to be debited from the internal account to fund the newly generated account. The Minimum Amount Value maintained in the Business Product Preference data segment of the Business Product Details screen appears by default. The user can modify the auto populated amount. The modified amount must be within the range set in the Initial Funding Threshold Preferences section of the Business Product Details screen.
Type	Displays the plan type as Contribution by default.
Code	Select the contribution code from the drop-down list.

Table 2-55 (Cont.) Account Funding Details – Field Description

Field	Description
Contribution Year	Select the contribution year from the drop-down list. The available options are: • Current • Previous
Account Number	Specify or select the account number which is debited for transferring the funds to newly opened account. The internal Current Account or Saving Account of the respective customer appears for selection. This field appears if the Own Internal Account option is selected from the Funding Mode list.
Account Name	Displays the primary account holder name of the selected account. This field appears if the Own Internal Account option is selected from the Funding Mode list.
Status	Displays the fund transfer status of the transaction. To view more information on the transaction status, click  .

4. Proceed by clicking **Next** to move to the subsequent data segment once the data has been successfully captured. The system will verify all required data segments and fields. If any essential information is missing, an error message will be shown to prompt the user to address the issue. Users must complete the mandatory data before they can advance to the next segment.

2.15.2 Summary

This topic provides the systematic instructions to view the tiles for all the data segments in the Account Funding stage

The Summary displays the tiles for all the data segments in the Account Funding stage. The tiles display the important details captured in the specified data segment.

To view the summary of each stage and submit:

1. Click **Next** in **Account Funding Details** screen to proceed with the next data segment, after successfully capturing the data.

The **Summary** screen displays.

Figure 2-85 Summary

Each of these summary tiles are clickable and the user will have the option to view all the details captured under the given data segment.

For more information on fields, refer to the field description table.

Table 2-56 Summary

Data Segment	Description
Account Funding Details	Displays the account funding details.

- 2. Click **Submit** to reach the **OUTCOME**, where the overrides, checklist and documents for this stage can be validated or verified. The **Overrides** screen is displayed.

Overrides are basically warnings that are raised during the business validations. User has to accept the overrides to proceed further. Alternatively, the user can go back and correct the data to make ensure overrides do not arise.
- 3. Click **Proceed Next**. The **Checklist** screen is displayed.

Checklist configured in the business process for the business product is displayed here. Checklist are the check points that the user has to accept having confirmed.
- 4. Click **Proceed**. The **Outcome** screen is displayed.
- 5. Click **Submit** to submit the application.

On successful submission the above pop-up appears and displays the next stage in which the application has moved. Application Reference Number and the Process Reference Number is also displayed.

2.16 Global Actions

This topic provides details on the actions that can be performed in all stages.

This section appears at the top of the screen and is applicable for all the account opening stage. User can add, edit, view or delete the information from the respective section.

Below is the list of global actions:

- [Application Details](#)
This topic provide systematic instructions to view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.
- [Application Info](#)
In this section you can view the application number along with its product name.
- [Customer 360](#)
This topic provide systematic instructions to view the list of customers involved in the application.
- [Remarks](#)
This topic provide systematic instructions to view or post the remarks.
- [Documents](#)
This topic provide systematic instructions to view, upload, or modify documents related to the applicant and product required for the application process.
- [Advices](#)
This topic provide systematic instructions to view the generated advices using Advices action.
- [Clarification Details](#)
This topic describes the detailed information to request for clarifications.

2.16.1 Application Details

This topic provide systematic instructions to view the detailed information of an application, such as basic details, application status, applicant details that are involved, clarification details and advices details.

User can also track and launch the respective stage of the application.

To view the application details:

1. Click **Application Details** to view the application details.

The **Application Details** screen displays.

The **Application Details** screen displays separate cards for various products initiated as part of the single application. For more information on fields, refer to the field description table below.

Note

The fields marked as **Required** are mandatory.

Table 2-57 Application Details – Field Description

Field	Description
Application Number	Displays the application number.
Application Date	Displays the date and time on which the application was initiated.
Channel	Displays the channel name.
Source By	Displays the name of the user who has sourced the application.
Priority	Displays the priority of the application. - High - Medium - Low

Table 2-57 (Cont.) Application Details – Field Description

Field	Description
Refresh	Click  to retrieve recent changes or updates made to the application.
Go To	Select an option from the drop-down list to view the application flow. Simulation
<Product Name>	Displays the product name. In case of multiple product, different tabs appear with the respective product name. User can click the product names to view the respective application details.
Stage Details	In this section, all account opening stages appears with the status name and its chronological order of the stage in the process.
Action	To perform below actions on the appeared stages, click the number of specific stage and select an option from the Action drop-down list: Acquire & Edit Task : Select this option to acquire and edit the selected stage. Acquire Task: Select this option to acquire the selected stage and it can be edited later. View Stage Details: Select this option to view the stage details.
User ID Assigned	Displays the User ID of the user currently working on the product process. The label of this field changes dynamically based on whether the selected stage is In Progress or Completed . - When user selects a In Progress stage, the label will display as Assigned To. - When user selects a Completed stage, the label will display as Submitted By. If the task was auto submitted, then the value for such Completed stages will be displayed as Auto Submitted. - For Pending and skipped stages, this field will be hidden. Note: This field appears blank if the product process task is not acquired by any user.
Stage Start Date	Displays the start date of the current stage. It also display time in hours, minutes and seconds.
Time spent	Displays the days, hours and minutes spent on the current selected stage.
<Application Tile>	In this tile, user can view the application specific details. Below field appears in this tile with respective details: <Status of the Application>: Displays the current stage of the application Expected Account Opening Date: Displays the date on which the account is opened. This field appears once the account opening process is completed. Account Number: Displays the account number. This field appears once the account opening process is completed. Expected Account Opening Date: Displays the date on which the account will be opened. <Amount>: Displays the value based on the product. For example: - For the loan account opening application, the label of this field appears as Loan Amount. - For the saving, term deposit and current account opting application. the label of this field appears as Initial Funding Amount. Total Time Spent: Displays the total time spent on the application from the first to last stage.

Table 2-57 (Cont.) Application Details – Field Description

Field	Description
<Applicant Details Tile>	In this tile, user can view the applicant details. Separate tiles appears for all the applicants that are involved in the application. Below field appears with the respective applicant details: • Role of the Applicant • Applicant Image • Applicant Name • Title • Customer 360: Click this link to view the 360 degrees view of the customer information. The Customer 360 screen appears with the details. Based on the customer type, refer to the Retail 360 User Guide and Corporate 360 User Guide from the party section. • Date of Birth • Mobile Number • Email ID • CIF Number
View Clarification Details	In this section, the user can view the clarification history. Below fields appear with the details: • ID • Subject • Raised By • Date • Status: User can view status based on user action done in Clarification screen. – Requested – Responded – Accepted – Withdrawn • Status updated on • Request Subject • Actions: User can View or Download the attached documents. On the click of the respective record the user can view the clarification content.
Advices	In this section, the user view the advices generated in the process of account opening. Below fields appear with the details: • Advice Name • Event: Displays the stage name on which the advice is generated. • Recipients • Mode of Delivery • Delivery Details • Status Details • Actions: User can View or Download the attached advices.

Expiry Date	Select the document expiry date.
Details	Click the details icon to view below details of the documents: Uploaded Time: Displays the uploaded date and time of the document in hours and minutes. Uploaded By: Displays the user name who uploaded the document. Stage Uploaded: Displays the stage name on which the document is uploaded.
Document	Click  to select the document from machine to upload. User can remove the uploaded document before saving the record from the Action column. Post saving the record, user must delete the record to remove the document. Below actions are perform on the uploaded document - Click Preview to view already uploaded document. - Click Download to download already uploaded document.

Table 2-60 (Cont.) Upload Document – Field Description

Field	Description
Actions	User can perform below actions on the added record: - Click  to save the record. - Click  to delete the record.

- Once the details are updated, click **Save**.

Clarification Request once raised moves the application to **Awaiting Customer Clarification** state. The application continues to be assigned to the user who had raised the request. All the applications for which the specified user has requested clarification can be viewed and actioned from the **Awaiting Customer Clarification** sub-menu available under **Task** menu.

- Select the application from the **Awaiting Customer Clarification** sub-menu available under the **Task** menu.
- Click the **Clarification Details** from the header.
- Select the specific clarification to take action on it.

Allowed actions are as following:

- Respond**
- Accept Clarification**
- Withdraw Clarification**

Once the Clarification is either withdrawn or accepted, the application moves back to the **My Task** sub-menu available under **Task** menu, post which the user can edit the application and submit the specified stage. Clarification once raised and actioned are available throughout the application processing by the other users working on the other stages of the application by clicking on **Clarification Details** from the header.

3

Simplified Application

This topic describes the concept and process of single stage application.

What is Simplified Application?

The Simplified Application is introduced to open an account in a smooth single process culminating the long account opening process. In this process the user can directly create and application and update details with multiple data segments in a single view.

How to configure Simplified Application for a product?

To enable a simplified account opening process, select the **Simplified Application** flag in the **Business Product Preference** data segment of the **Business Product Configuration** screen.

Once the product is configured for simplified application, the user can configure the business process such as stages, data segments, document checklist and so on, in the **Business Process Configuration** screen.

How to process the simplified application?

After configuring the product and process, the user can initiate a single-stage application by navigating the menu. Below is the detailed process for opening an account using a simplified application.

To open an account using simplified application process:

1. From the **Menu**, select the **Retail Origination**. The Retail Origination menu appears.
2. From the **Retail Origination**, select the **New Application**. The New Application page appears with list of product types which are configured.
3. Select the appropriate product and click **Apply**.
The Application Entry stage appears. The data segments in this stage appears based on the business process configuration.
 - **Applicant:** In this data segment user can capture applicant details such as basic, address, signature, employment, identification. Multiple applicants are allowed with different roles. Refer to the **Applicant** data segment from the **Application Entry** stage of this guide.
 - **Account Details:** In this data segment user can capture the product details to configure the account. Refer to the **Account Details** data segment from the **Application Entry** stage of this guide.
 - **Nominee Details:** In this data segment user can capture the nominee details. Refer to the **Nominee Details** data segment from the **Application Entry** stage of this guide.
 - **Interest and Charges:** In this data segment user can view the interest and charges that are applicable. Refer the **Interest and Charges** data segment from the **Application Entry** stage of this guide.
 - **Term and Conditions:** In this data segment user can capture the term, conditions and consents of the customer. Refer the **Term and Conditions** data segment from the **Application Entry** stage of this guide.

- **Review:** In this data segment user can review all the details that are captured on clicking on each data segment tile.
4. On submitting the Application Entry stage, next stage is triggered based on the business process configuration.
 5. After completing the Know Your Customer (KYC) process, the account number is generated and application proceed to approval stage. The Account Approval stage is generated. All the data segments of the Application Entry stage appears. The user can only view those stages. The Approval Details data segment is enabled to capture account approval status. For more information refer the **Approval Details** data segment of the **Account Approval** stage in this guide.
 - If the Rejected option is selected in the Approval Details data segment then this application is terminated.
 - If the Approved option is selected in the Approval Details data segment then the application's payload are proceed for account creation.
 6. An account is created on approving the application in the **Account Approval** stage.
 7. Below tasks are also generated in this process:
 - If the system fails, the Free Task generates the **Handoff Retry** task. With the necessary access rights, the user can pick up such tasks, take the necessary action on the Failure reason, and then resubmit to the Host.
 - If the business process is configured to include Account Funding, then the **Account Funding** stage is generated after account creation.

Instant Savings Account Origination Process

This topic describes the information about Instant Savings Account Origination Process.

Additional Instant Business Process is available wherein various stages in the Reference Flow for Savings Account have been automated.

This allows Instantaneous Account origination from Self-Service Channel such as Oracle Banking Digital Experience for existing Customer who are KYC Compliant and New Customers for whom KYC is completed in Oracle Banking Digital Experience. KYC Type supported for the STP is Identification and Address only and the same has to be configured in Oracle Banking Party Module.

Note

Refer the **Retail Onboarding User Guide** for more details.

Based on whether the Application is initiated by self-service channel or by a Branch personnel the automatic submission of the stages or skipping of the stages are done by the system.

This process is not applicable for Small and Medium Business customers.

Prerequisite:

- For the automatic submission to work, it is expected that document and checklist are not configured in any of the stages.
- Initial Funding is either not taken for the Account or taken as Account Transfer for which the mode configured has to be **H** which represents that the selected Account will be debited by the Host as part of the Account Opening Process (Allowed for both Self-Service Channel and Branch Initiated Applications) or Initial Funding is taken via External Bank Account Transfer on self-service channel (This mode is not allowed for Branch Initiated Applications).

Note

For more details, refer to **Initial Funding Configuration** topic in the **Configurations User Guide**.

In the Instant Savings Account Origination Reference Business Process, the stages that are configured are mentioned below.

- **Application Entry Stage:** On successful submission of the Savings Account Application from self-service channel, the system starts the **Application Entry** stage without any manual intervention and completes the data segment level validation. On successful completion of the validation, the system automatically submits the **Application Entry** stage. Similarly, for the Branch initiated Application also this stage is automatically submitted, if the data segment configured for Application Entry stage are updated in the **Application**

Initiate stage itself by clicking the **Application** button in the **Product Details** data segment.

- **Account Funding Stage:** On successful submission of the **Application Entry** stage, system checks if Initial Funding is updated for the Account Opening or not.
 - The initial funding mode allowed for self-service initiated applications are External Bank Account Transfer and Account Transfer.
 - If the Initial Funding has been taken for the Account through the External Bank Account Transfer in the self-service channel, the system starts the **Application Funding** Stage and validates the **Initial Funding Details** data segment and submits the **Application Funding Stage** automatically.
 - For Application where the **Initial Funding** is updated as Account Transfer or where no funding has been taken for the Account, this stage is skipped completely by the system for Application initiated from Self-Service Channel and Branch Initiated Applications.
 - For the Branch Initiated Applications wherein the Initial Funding has been taken in Cash or Other Bank Cheque, this stage has to be manually actioned by the Branch User having access permission for this stage.
- **Handoff Retry:** Application moves to this stage and appears in the Free Task only if the Savings Account creation has been rejected by Product Processor. The user having the required access rights can pick such task and can retry submission to Host after taking required actions on the Failure reason.
