This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

- [Purpose](#)
- [Audience](#)
This manual is intended for the following User/User Roles:
- [Documentation Accessibility](#)
- [Critical Patches](#)
- [Diversity and Inclusion](#)
- [Conventions](#)
- [Related Resources](#)
- [Screenshot Disclaimer](#)
- [Acronyms and Abbreviations](#)
- [Basic Actions](#)
- [Symbols, Definitions and Abbreviations](#)

The following are some of the Symbols you are likely to find in the manual:

Purpose

This guide is designed to help acquaint you with the Oracle Banking Payments application. This guide provides answers to specific features and procedures that the user need to be aware of the module to function successfully.

Audience

This manual is intended for the following User/User Roles:

Table 1 User Roles

Role	Function
Implementation & IT Staff	Implementation & Maintenance of the Software

[Documentation Accessibility](#)

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Related Resources

For more information on any related features, refer to the following documents:

- *Getting Started User Guide*
- *Oracle Banking Security Management System User Guide*
- *Oracle Banking Microservices Platform Foundation User Guide*
- *Routing Hub Configuration User Guide*
- *Oracle Banking Common Core User Guide*
- *Interest and Charges User Guide*
- *Oracle Banking Liquidity Management Configuration Guide*
- *Oracle Banking Liquidity Management File Upload User Guide*

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The list of the acronyms and abbreviations that are used in this guide are as follows:

Table 2 Acronyms and Abbreviations

Abbreviation	Description
DDA	Demand Deposit Accounts
ECA	External Credit Approval
EOD	End of Day
IBAN	International Bank Account Number

Basic Actions

The basic actions performed in the screens are as follows:

Table 3 Basic Actions

Actions	Description
New	Click New to add a new record. The system displays a new record to specify the required data. The fields marked with asterisk are mandatory. - This button is displayed only for the records that are already created.
Save	Click Save to save the details entered or selected in the screen.
Unlock	Click Unlock to update the details of an existing record. The system displays an existing record in editable mode. - This button is displayed only for the records that are already created.
Authorize	Click Authorize to authorize the record created. A maker of the screen is not allowed to authorize the same. Only a checker can authorize a record. - This button is displayed only for the already created records. For more information on the process, refer Authorization Process.
Approve	Click Approve to approve the initiated record. - This button is displayed once the user click Authorize .
Audit	Click Audit to view the maker details, checker details of the particular record. - This button is displayed only for the records that are already created.
Close	Click Close to close a record. This action is available only when a record is created.
Confirm	Click Confirm to confirm the action performed.
Cancel	Click Cancel to cancel the action performed.
Compare	Click Compare to view the comparison through the field values of old record and the current record. - This button is displayed in the widget once the user click Authorize .
View	Click View to view the details in a particular modification stage. - This button is displayed in the widget once the user click Authorize .

Table 3 (Cont.) Basic Actions

Actions	Description
View Difference only	Click View Difference only to view a comparison through the field element values of old record and the current record, which has undergone changes. - This button is displayed once the user click Compare .
Expand All	Click Expand All to expand and view all the details in the sections. - This button is displayed once the user click Compare .
Collapse All	Click Collapse All to hide the details in the sections. - This button is displayed once the user click Compare .
OK	Click OK to confirm the details in the screen.

Symbols, Definitions and Abbreviations

The following are some of the Symbols you are likely to find in the manual:

Table 4 Symbols

Icons	Function
	Exit
	Add row
	Delete row
	Option List

Table 5 Common Icons and its Definitions

Icon Names	Applicable Stages	Operation
Minimize	Initiation, Approval and Hand-off Retry	Users can minimize the transaction input screen. When the screen is minimized, it appears as to a separate tab within the same web page.
Maximize	Initiation, Approval and Hand-off Retry	User can maximize the transaction input screen.
Close	Initiation, Approval and Hand-off Retry	Users can close the transaction input screen. The system displays a warning message to the user that any unsaved data would be lost. User can either choose to ignore the message and close the screen or choose to 'save and close' the transaction.

1

Hong Kong Faster Payment System

- [Introduction](#)
- [Maintenance Screens](#)
- [Outbound Transaction Screens](#)
- [Inbound Transaction Screens](#)

1.1 Introduction

OBPM supports:

- to process HK FPS Credit Transfer in real time mode for HKD, RMB currencies
- to generate/process below messages for outbound Credit Transfers (Real Time):
 - Pacs.008 to FPS (without payee account verification)
 - Pacs.002 from FPS (Payment Status Report from FPS)
- Outbound HKFPS CT transactions is not logged in queue in case of any validation failure and upfront rejected
- Support to process below messages for inbound Credit Transfers (Real Time):
 - Pacs.008 from FPS (without payee account verification)
- Credit/Debit Notifications to payer/payee

1.2 Maintenance Screens

- [HKFPS Outbound Credit Transfer Payment Preferences](#)
- [HKFPS Inbound Credit Transfer Payment Preferences](#)
- [HKFPS Network Currency Details](#)
- [HKFPS Network Directory](#)
- [Branch Identifier for HKFPS Network](#)
- [Network Connectivity Maintenance](#)

1.2.1 HKFPS Outbound Credit Transfer Payment Preferences

1. On Homepage, specify **PKDOCTPF** in the text box, and click next arrow.
HKFPS Outbound Credit Transfer Payment Preferences screen is displayed.

Figure 1-1 HKFPS Outbound Credit Transfer Payment Preferences

2. On **HKFPS Outbound Credit Transfer Payment Preferences** screen, specify the fields. For more information about the fields, refer to field description below:

Table 1-1 HKFPS Outbound Credit Transfer Payment Preferences - Field Description

Field	Description
Host Code	System defaults the host code of transaction branch on clicking 'New'.
Network Code	Specify the Network Code from the list of values. The list of values lists HK FPS network defined in the host (Open/Authorized) - Network code for Payment Type 'Hong Kong FPS' defined in Network Code Maintenance (PMDNWCOD).
Network Code Description	System defaults the Description based on the selected Network Code.
Network Type Description	System defaults the Network Type Description on the Network code selected.
Network Currency	Specify the Network Currency from list of values. Currency codes defined are listed.
Processing Mode	By-default, Real Time is selected as the Processing Mode.
Limit Details	--
Minimum Amount	Specify the Minimum transaction amount.
Maximum Amount	Specify the Maximum transaction amount.
Exchange Rate Preference	--
FX Rate Type	Specify the Currency Rate Type from the list of values.
Rate Override Variance%	Specify the Exchange Rate Variance for override.
Rate Stop Variance%	Specify the Exchange Rate Variance for processing stop.
External FX Applicable	This check box is to indicate whether external exchange rate applicable or not.
FX Cancellation	Select the FX Cancellation from below values: <ul style="list-style-type: none"> FX Unwind Queue Auto Interface
Accounting Codes	--

Table 1-1 (Cont.) HKFPS Outbound Credit Transfer Payment Preferences - Field Description

Field	Description
Debit Liquidation	Specify the Debit Liquidation from the list of values. List of all valid (Open/Authorized) accounting codes defined in the host where Main Transaction Dr/Cr Indicator is 'Debit'.
Credit Liquidation	Specify the Credit Liquidation from the list of values. List of all valid (Open/Authorized) accounting codes defined in the host where Main Transaction Dr/Cr Indicator is 'Credit'.
Network Account Details	--
Network Account	Specify the Network Account from the list of values. List of all valid (Open/Authorized) accounts defined in the host for the selected currency.
Small FX Limit	--
Small FX Limit Currency	Specify the Small FX Limit Currency from the list of values. List of all valid (Open/Authorized) currency codes are defined.
Small FX Limit Amount	Specify the Small FX Limit Amount.
Price Code Details	--
Transaction Price Code	Specify the Transaction Price Code from the list of values.
Processing Preferences	--
Accounting Preferences	Select the Accounting Preferences from below values: <ul style="list-style-type: none"> • Before Messaging (Default) • After Messaging
Dispatch On Us Transfer	This check box is to indicate dispatch outbound message or not for the on-us transfer.

- [HKFPS Outbound Credit Transfer Payment Preferences Summary](#)

1.2.1.1 HKFPS Outbound Credit Transfer Payment Preferences Summary

1. On Homepage, specify **PKSOCTPF** in the text box, and click next arrow.
HKFPS Outbound Credit Transfer Payment Preferences Summary screen is displayed.

Figure 1-2 HKFPS Outbound Credit Transfer Payment Preferences Summary

2. Search using one or more of the following parameters:
 - Authorization Status

- Record Status
 - Network Code
 - Payment Type
 - Network Currency
 - Processing Mode
- Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

1.2.2 HKFPS Inbound Credit Transfer Payment Preferences

- On Homepage, specify **PKDICTPF** in the text box, and click next arrow.
HKFPS Inbound Credit Transfer Payment Preferences screen is displayed.

Figure 1-3 HKFPS Inbound Credit Transfer Payment Preferences

- On **HKFPS Inbound Credit Transfer Payment Preferences** screen, specify the fields.

Table 1-2 HKFPS Inbound Credit Transfer Payment Preferences - Field Description

Field	Description
Host Code	System defaults the host code of transaction branch on clicking 'New'.
Network Code	Specify the Network Code from the list of values. The list of values lists HK FPS network defined in the host (Open/Authorized) - Network code for Payment Type 'Hong Kong FPS' defined in Network Code Maintenance (PMDNWCOD).
Network Code Description	System defaults the Description based on the selected Network Code.
Network Type Description	System defaults the Network Type Description on the Network code selected.
Network Currency	Specify the Network Currency from list of values. Currency codes defined are listed.
Processing Mode	By-default, Real Time is selected as the Processing Mode.
Accounting Codes	--

Table 1-2 (Cont.) HKFPS Inbound Credit Transfer Payment Preferences - Field Description

Field	Description
Debit Liquidation	Specify the Debit Liquidation from the list of values. List of all valid (Open/Authorized) accounting codes defined in the host where Main Transaction Dr/Cr Indicator is 'Debit'.
Credit Liquidation	Specify the Credit Liquidation from the list of values. List of all valid (Open/Authorized) accounting codes defined in the host where Main Transaction Dr/Cr Indicator is 'Credit'.
Exchange Rate Preference	--
FX Rate Type	Specify the Currency Rate Type from the list of values.
Rate Override Variance%	Specify the Exchange Rate Variance for override.
Rate Stop Variance%	Specify the Exchange Rate Variance for processing stop.
External FX Applicable	This check box is to indicate whether external exchange rate applicable or not.
FX Cancellation	Select the FX Cancellation from below values: <ul style="list-style-type: none"> FX Unwind Queue Auto Interface
Network Account Details	--
Network Account	Specify the Network Account from the list of values. List of all valid (Open/Authorized) accounts defined in the host for the selected currency.
Small FX Limit	--
Small FX Limit Currency	Specify the Small FX Limit Currency from the list of values. List of all valid (Open/Authorized) currency codes are defined.
Small FX Limit Amount	Specify the Small FX Limit Amount.
Price Code Details	--
Transaction Price Code	Specify the Transaction Price Code from the list of values.

- [HKFPS Inbound Credit Transfer Payment Preferences Summary](#)

1.2.2.1 HKFPS Inbound Credit Transfer Payment Preferences Summary

1. On Homepage, specify **PKSICTPF** in the text box, and click next arrow.
HKFPS Inbound Credit Transfer Payment Preferences Summary screen is displayed.

Figure 1-4 HKFPS Inbound Credit Transfer Payment Preferences Summary

The screenshot displays the 'HKFPS Inbound Credit Transfer Payment Preferences Summary' interface. At the top, there's a title bar with search and navigation icons. Below it, a search section includes buttons for 'Search', 'Advanced Search', 'Reset', and 'Clear All', along with a 'Records per page' dropdown set to 15. A 'Search (Case Sensitive)' section contains several dropdown menus: 'Authorization Status', 'Record Status', 'Network Code', 'Network Currency', 'Processing Mode', and 'Host Code'. Below these, the 'Search Results' section shows 'No data to display.' and a table with columns: 'Authorization Status', 'Record Status', 'Network Code', 'Network Currency', 'Host Code', and 'Processing Mode'. At the bottom, a pagination bar shows 'Page 1 Of 1' with navigation arrows. An 'Exit' button is located at the bottom right.

2. Search using one or more of the following parameters:
 - Authorization Status
 - Record Status
 - Network Code
 - Payment Type
 - Network Currency
 - Processing Mode
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

1.2.3 HKFPS Network Currency Details

1. On Homepage, specify **PKDHFNC** in the text box, and click next arrow.
HKFPS Network Currency Details screen is displayed.

Figure 1-5 HKFPS Network Currency Details

2. On **HKFPS Network Currency Details** screen, specify the fields.

Table 1-3 HKFPS Network Currency Details - Field Description

Field	Description
Host Code	System defaults the host code of transaction branch on clicking 'New'.
Network Code	Specify the Network Code from the list of values. The list of values lists HK FPS network defined in the host (Open/Authorized) - Network code for Payment Type 'Hong Kong FPS' defined in Network Code Maintenance (PMDNWCOD).
Network Description	System defaults the Description based on the selected Network Code.
Network Type Description	System defaults the Network Type Description on the Network code selected.
Network Currency	Specify the Network Currency from list of values. System allows HKFPS outbound/inbound payments only in the currencies maintained here for the HKFPS network.

Table 1-3 (Cont.) HKFPS Network Currency Details - Field Description

Field	Description
Service ID Details	--
Network Service ID	Specify the Network Service ID from the list of values. The list of values lists of ISO Clearing code- Service ID.
Proprietary Service ID	Specify the Service ID value proprietary. HKF value can be maintained.
Network Identifiers	--
Clearing System Code	Specify the Clearing System Code from the list of values. The list of values lists of ISO Clearing code.
Clearing System Proprietary	Specify the Clearing system Proprietary.
Network Member ID	Specify the Member Id.
Other Details	--
Network Directory Key	Specify the Network Directory Key from the list of values. List of all valid (Open/Authorized) Network Directory Key maintained in the existing screen 'Network Directory Key Maintenance (PMDDRKEY).
Network Participation	Select the Network Participation from the following values: <ul style="list-style-type: none"> • Direct • Indirect
Business Service	Select the Business Service Code from the following values: <ul style="list-style-type: none"> • PAYC01 • PAYC02 • PAYC03
Sender Bank Clearing Code	Specify the Sender Bank Clearing Code from the list of values. List of all valid (Open/ Authorized) Network Clearing code defined in 'HKFPS Network Directory'.
Receiver Bank Clearing Code	Specify the Receiver Bank Clearing Code from the list of values. List of all valid (Open/ Authorized) Network Clearing code defined in 'HKFPS Network Directory'.

- [HKFPS Network Currency Details Summary](#)

1.2.3.1 HKFPS Network Currency Details Summary

1. On Homepage, specify **PKSHKFNC** in the text box, and click next arrow.
HKFPS Network Currency Details Summary screen is displayed.

Figure 1-6 HKFPS Network Currency Details Summary

2. Search using one or more of the following parameters:
 - Authorization Status
 - Record Status
 - Network Code
 - Network Directory Key
 - Payment Type
 - Network Currency
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

1.2.4 HKFPS Network Directory

1. On Homepage, specify **PKDCHKFDR** in the text box, and click next arrow.
HKFPS Network Directory screen is displayed.

Figure 1-7 HKFPS Network Directory

2. On **HKFPS Network Directory** screen, specify the fields.
For more information about the fields, refer to field description below:

Table 1-4 HKFPS Network Directory - Field Description

Field	Description
Network Directory Key	Select the specific Network Code from list of values. The list of values lists Network Directory Key maintained in the existing screen 'Network Directory Key Maintenance (PMDDRKEY)' are linked here.
Clearing Code	Specify the Clearing Code.
Bank Name	Specify the Bank Name.
Clearing System Code	Specify the Clearing System Code from the list of values.
Clearing System Proprietary	Specify the Clearing system Proprietary.
Valid From Date	Specify the Valid From Date.
Valid Till Date	Specify the Valid Till Date.
Address Details	Specify the following fields with appropriate values: <ul style="list-style-type: none"> • Address Line 1, 2, 3, 4, 5, 6, 7 • Department • Sub Department • Street Name • Building Number • Building Name • Floor • Post Box • Room • Post Code • Town Name • Town Location Name • District Name • Country Sub Division • Country

- [HKFPS Network Directory Summary](#)

1.2.5.1 Branch Identifier for HKFPS Network Summary

1. On Homepage, specify **PKSHKFBR** in the text box, and click next arrow.

Branch Identifier for HKFPS Network Summary screen is displayed.

The screenshot shows the 'Branch Identifier for HKFPS Network Summary' screen. At the top, there are search controls: 'Search', 'Advanced Search', 'Reset', and 'Clear All'. A 'Records per page' dropdown is set to 15. Below this is a 'Search (Case Sensitive)' section with four input fields: 'Authorization Status', 'Record Status', 'Host Code', and 'Network Code'. The 'Search Results' section shows a table with columns for these fields, but it contains the message 'No data to display.' and a pagination bar indicating 'Page 1 Of 1'.

Figure 1-10 Branch Identifier for HKFPS Network Summary

This is an identical screenshot to the one above, showing the 'Branch Identifier for HKFPS Network Summary' screen with the same search controls and 'No data to display' results.

2. Search using one or more of the following parameters:
 - Authorization Status
 - Record Status
 - Host Code

- Network Code
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

1.2.6 Network Connectivity Maintenance

1. On Homepage, specify **PKDHKFCT** in the text box, and click next arrow.
Network Connectivity Maintenance screen is displayed.

Figure 1-11 Network Connectivity Maintenance

2. On **Network Connectivity Maintenance** screen, specify the fields.
For more information about the fields, refer to field description below:

Network Code Description	System defaults the Description based on the selected Network Code.
Outgoing Queue Details	--
Outgoing Queue Profile	Specify the Outgoing Queue Profile from the list of values.
Outgoing Queue Name	Specify the Queue name.
Incoming Queue Details	--
Incoming Queue Profile	Specify the Incoming Queue Profile from the list of values.
Incoming Queue Name	Specify the Queue name.

- [Network Connectivity Maintenance Summary](#)

1.2.6.1 Network Connectivity Maintenance Summary

1. On Homepage, specify **PKSHKFCT** in the text box, and click next arrow.
Network Connectivity Maintenance Summary screen is displayed.

Figure 1-12 Network Connectivity Maintenance Summary

2. Search using one or more of the following parameters:
 - Authorization Status
 - Record Status
 - Host Code
 - Network Code
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

1.3 Outbound Transaction Screens

- [HKFPS Outbound Credit Transfer Transaction Input](#)
- [HKFPS Outbound Credit Transfer Transaction View](#)
- [HKFPS Inbound Real Time Credit Transfer Message Browser](#)

1.3.1 HKFPS Outbound Credit Transfer Transaction Input

1. On Homepage, specify **PKDOTONL** in the text box, and click next arrow.
HKFPS Outbound Credit Transfer Transaction Input screen is displayed.

Figure 1-13 HKFPS Outbound Credit Transfer Transaction Input

The screenshot shows the 'HKFPS Outbound Credit Transfer Transaction Input' window. It features a top bar with 'New' and 'Enter Query' buttons. Below this, there are two main columns of input fields. The left column includes 'Transaction Branch', 'Host Code', 'Source Code', and 'Network Code'. The right column includes 'Transaction Reference No.', 'Transaction ID', 'End to End ID', and 'Message ID'. Below these columns is a 'Payee Account Verification' checkbox. The main body of the screen is divided into two tabs: 'Main' and 'Pricing'. The 'Main' tab is active and contains two sub-sections: 'Payer Details' and 'Payee Details'. 'Payer Details' includes fields for 'Payer Account Number', 'Payer Account Currency', 'Payer Account Branch', 'Payer Name', 'Payer ID (Customer Number)', and 'Debit Amount'. 'Payee Details' includes fields for 'Payee Bank Clearing Code', 'Payee Account Number Type', 'Payee Account Number', 'Payee Mobile Number', 'Payee Email ID', 'Payee FPS ID', 'Payee Name', and 'Payee ID'. The 'Pricing' tab contains fields for 'Booking Date', 'Instruction Date', 'Activation Date', 'Instructed Currency Indicator', 'Instructed Currency', 'Instructed Amount', 'Transfer Currency', 'Transfer Amount', 'Exchange Rate', 'FX Reference Number', 'Remarks', 'Payment Details Reference', 'Category Purpose Code', and 'On Us Transfer'. At the bottom of the screen, there are buttons for 'UDF', 'MIS', 'Audit', and 'Exit'.

- On **HKFPS Outbound Credit Transfer Transaction Input** screen, specify the fields.
For more information about the fields, refer to field description below:

Table 1-7 HKFPS Outbound Credit Transfer Transaction Input - Field Description

Field	Description
Transaction Branch	System defaults the Transaction Branch details on clicking the 'New' button.
Host Code	System displays the Host Code of selected branch of the logged in user on clicking 'New' button.
Source Code	For manually input transactions, source code is defaulted as MANL. For transactions received through web services or rest services, the source code is populated as received in the request.
Network Code	If only one Network is maintained for with payment type as 'Faster Payment' ('K') for the host code, the same is defaulted in this field. In case multiple networks are found for the same combination, all applicable networks are listed for the field. You can select the required network.
Transaction Reference Number	System defaults the Transaction Branch Number on clicking the 'New' button, using the current logic.
Transaction ID	This field gets generated on authorization of the outbound HKFPS payment. Transaction ID (PKDOTONL/PKDOVIEW) is generated using the UETR number generation logic (used in Cross Border Module). However, with the 4 hyphens removed, resulting in a total length of 32 characters.
End to End ID	End to End ID is populated as the transaction reference. You can modify the same.

Table 1-7 (Cont.) HKFPS Outbound Credit Transfer Transaction Input - Field Description

Field	Description
Message ID	<p>This field is generated at the time of message generation on authorization of the outbound HKFPS payment.</p> <p>Format: M[Clearing Code][YYYYMMDD][Others]</p> <p>Clearing Code which is part of mask: This is populated as the Sender Bank Clearing Code as maintained in 'HKFPS Network Currency Details' [PKDHFNC].</p> <p>"[YYYYMMDD]" is the activation date in YYYYMMDD format [pick up from PKDOTONL]</p> <p>"[Others]" is transaction reference number generated and defaulted in field 'Payment Details Reference' in the transaction screen.</p> <p>Valid example: M00120160801-A10200/N3001</p>
Payee Account Verification	<p>By default, this field is un-checked. During message generation,</p> <ul style="list-style-type: none"> If Checked: populate 'PERFORM_PYE_VRF' If un-checked: populate 'SKIP_PYE_VRF'

1.3.1.1 Main Tab

- On **Main Tab**, specify the fields.

Figure 1-14 HKFPS Outbound Credit Transfer Transaction Input_Main Tab

The screenshot shows the 'Main Tab' of the HKFPS Outbound Credit Transfer Transaction Input screen. It is divided into two main panels: 'Main' and 'Pricing'.

Main Panel:

- Payer Details:** Includes fields for Payer Account Number, Payer Account Currency, Payer Account Branch, Payer Name, Payer ID (Customer Number), and Debit Amount. There are search icons for Payer Account Number and Payer Name.
- Payee Details:** Includes fields for Payee Bank Clearing Code, Payee Account Number Type, Payee Account Number, Payee Mobile Number, Payee Email ID, Payee FPS ID, Payer Name, and Payee ID. There are search icons for Payee Bank Clearing Code and Payer Name.
- An 'Additional Details' button is located at the bottom of the Payee Details section.

Pricing Panel:

- Payment Details:** Includes fields for Booking Date, Instruction Date, Activation Date, Instructed Currency Indicator, Instructed Currency, Instructed Amount, Transfer Currency, Transfer Amount, Exchange Rate, FX Reference Number, Remarks, Payment Details Reference, Category Purpose Code, and On Us Transfer. There are search icons for Instructed Currency and Remarks.
- An 'Enrich' button is located below the Category Purpose Code field.

At the bottom of the screen, there are buttons for 'UDF', 'MIS', 'Audit', and 'Exit'.

Table 1-8 HKFPS Outbound Credit Transfer Transaction Input_Main Tab - Field Description

Field	Description
Payer Details	--
Payer Account Number	Specify the Payer Account Number from the list of values. The field lists all open and authorized accounts maintained in the External Customer Account maintenance (STDCRACC).
Payer Account Currency	Payer Account Currency is auto-populated based on the debtor account selected.
Payer Account Branch	Payer Account Branch is auto-populated based on the debtor account selected.
Payer Name	Payer Name is auto-populated based on the debtor account selected.
Payer ID (Customer Number)	Specify the Payer ID. The customer number linked to the payer account are populated.
Debit Amount	This field is populated as the transfer amount converted in debtor account currency. Exchange rate pick up is based on network preferences maintained. This field is disabled for user input.
Payee Details	--
Payee Bank Clearing Code	Specify the Payee Bank Clearing Code from the list of values. The field lists all the open/authorized clearing codes maintained in HKFPS Network Directory (PKDCHKFDR).
Payee Account Number Type	Select the Payee Account Number Type from below values provided in the drop down: <ul style="list-style-type: none"> • BBAN - Customer / bank account number • AIIN - Credit card number • SVID - FPS identifier • EMAL - Email address • MOBN - Mobile number • CUST - Customer ID
Specify the fields, as required:	<ul style="list-style-type: none"> • Payee Account number • Payee Mobile number • Payee Email ID • Payee FPS ID • Payee Name • Payee ID (Customer number)
Payment Details	--
Booking Date	This field is defaulted as application server date.
Instruction Date	This field gets defaulted as booking date. Back date / future date is not allowed. It is current dated always for Hong Kong FPS.
Activation Date	Activation date is a derived field based on the instruction date provided. Payment is processed on Activation date. If Instruction date is back-dated, Activation date is moved to Current date. Branch Holidays, Network Holidays are not applicable, if processing mode is Real-Time as maintained in PKDOCTPF.
Instructed Currency Indicator	Select the Instructed Currency Indicator from the following: <ul style="list-style-type: none"> • Debit Currency • Transfer Currency If transfer currency is selected, it is mandatory to provide transfer amount. If debit currency is selected, it is mandatory to input debit amount.
Instructed Currency	Specify the Instructed Currency from the list of values.

Table 1-8 (Cont.) HKFPS Outbound Credit Transfer Transaction Input_Main Tab - Field Description

Field	Description
Instructed Amount	Specify the Instructed Amount.
Transfer Currency	Specify the Transfer Currency. If the network allows only single currency as per HKFPS Network currency preferences (PKDHFNC) maintained, this currency is populated as transfer currency. If multiple currencies (HKD, RMB, CNY, USD as applicable) are allowed, you can select from the list of allowed currencies.
Transfer Amount	Specify the Transfer Amount that is to be sent in the outbound payment.
Exchange Rate	<p>If transfer currency and debtor (payer) account currency are different, then exchange rate can be provided by user. System retains the input value and validates the same against override and stop variances maintained at HKFPS Outbound Credit Transfer Preferences' (PKDOCTPF) level.</p> <p>If exchange rate is not a user input, system picks up exchange rate during 'Enrich' provided the transfer amount is less than small FX limit maintained. If there exchange rate is not available, a proper error message is shown.</p> <p>Based on debit amount/transfer amount input, the other amount is computed by the system.</p> <p>If transfer amount is more than small FX limit and if external exchange rate is applicable, then rate pick up happens during transaction processing.</p>
FX Reference Number	Specify the FX Reference Number.
Remarks	Specify the Remarks, if any.
Payment Details Reference	Specify any payment specific reference this field. This is defaulted to transaction reference number and editable.
Category Purpose Code	Select the Category Purpose Code from the following: <ul style="list-style-type: none"> • CXPSNL - For General Personal Payment (Default) • CXBSNS - For General Business Payment • CXMRCH - For Merchant Payment • CXSALA - For Salary and Benefits Payment
Enrich Button	On enrich, populate exchange rate, debit amount and charge/tax amounts.
On Us Transfer	This field is displayed based on the payee branch clearing code from the following: <ul style="list-style-type: none"> • Yes • No

1.3.1.2 Additional Details

- On **Additional Details** button, specify the fields.

Table 1-9 HKFPS Outbound Credit Transfer Transaction Input_Additional Details - Field Description

Field	Description
Transaction Reference Number	This field displays Transaction Reference Number.
Host Code	This field displays Host Code.
Network Code	Specify the Network Code.
Activation Date	The field displays Activation Date.
Payment Details (Unstructured)	--
Remittance Information 1-6	Specify the payment related information here. For HKFPS, add information details in only one line.
Purpose Details	--
Category Purpose Code	Specify the ISO Category Purpose Code from the list of values.
Purpose Value	Specify any non-ISO purpose codes.

1.3.1.3 Pricing Tab

1. You can view the charge amount computed by the system for each of the Pricing components of the Pricing code linked to the network code of the transaction.
2. For the Transaction initiated, system displays the fees/tax charged in this tab. Click the "Pricing" tab.
3. On **Pricing Tab**, specify the fields.

Figure 1-16 HKFPS Outbound Credit Transfer Transaction Input - Pricing Tab
Table 1-10 HKFPS Outbound Credit Transfer Transaction Input_Pricing Tab - Field Description

Field	Description
Pricing Component	System displays each Pricing component of the Pricing code from the Pricing Code Maintenance.
Pricing Currency	System displays the Pricing currency of each Pricing component of the Pricing code.
Pricing Amount	System displays the calculated Charge amount for each Pricing component of the Pricing code.
Waived	System displays if charges for any Pricing component are waived in the Pricing maintenance.
Debit Currency	System displays the currency of the Charge account to be debited for the charges.
Debit Amount	System displays the Charge amount for each Pricing component debited to the charge account in Debit currency. If the Pricing currency is different from the Debit currency the calculated charges are converted to the Debit currency and populated in this field.

1.3.1.4 UDF Button

1. This sub-screen defaults values of UDF fields that are part of the UDF group specified for the 'Manual' source.
2. Click the **UDF button** to invoke the 'UDF' sub-screen.
3. On **UDF Button**, specify the fields.

Figure 1-17 UDF Button

The screenshot shows a 'Fields' dialog box. It contains a table with two columns: 'Field Label' and 'Field Value'. The table is currently empty, with the text 'No data to display.' below it. The dialog also includes a page indicator 'Page 1 (0 of 0 items)' and navigation buttons. At the bottom right, there are 'Exit' and 'Save' buttons.

Table 1-11 UDF Button - Field Description

Field	Description
Field Label	System displays all fields that are part of the associated UDF group.
Field Value	System displays the default value, where exists for the UDF fields. You can change the default value or specify value for other fields (where default value does not exist).

1.3.1.5 MIS Button

1. You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance.
2. Click the **MIS** button to invoke the 'MIS' sub-screen.
3. On **MIS Button**, specify the fields.

Figure 1-18 MIS Button

The screenshot shows a web application window titled "MIS Details". At the top, there are two input fields: "Transaction Reference Number" with a red asterisk and "MIS Group" with a search icon. Below these, there are two main sections: "Transaction MIS" and "Composite MIS". Each section contains a table with 10 rows, each having two input fields and a search icon. At the bottom right, there are "Exit" and "Save" buttons.

Table 1-12 MIS Button - Field Description

Field	Description
Transaction Reference	System displays the transaction reference number of the transaction.
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.

1.3.1.6 HKFPS Outbound Credit Transfer Transaction Input Summary

1. On Homepage, specify **PKSOTONL** in the text box, and click next arrow.

HKFPS Outbound Credit Transfer Transaction Input Summary screen is displayed.

Figure 1-19 HKFPS Outbound Credit Transfer Transaction Input Summary

2. Search using one or more of the following parameters:
 - Transfer Currency
 - Transaction Reference Number
 - Network Code
 - Authorization Status
 - Payer ID (Customer Number)
 - Payee Account Number
3. Once you specified the parameters, click the **Search** button.
System displays the records that match the search criteria.

1.3.2 HKFPS Outbound Credit Transfer Transaction View

1. On Homepage, specify **PKDOVIEW** in the text box, and click next arrow.
HKFPS Outbound Credit Transfer Transaction View screen is displayed.

Figure 1-20 HKFPS Outbound Credit Transfer Transaction View

2. On **HKFPS Outbound Credit Transfer Transaction View** screen, specify the fields.
For more information about the fields, refer to field description below:

Table 1-13 HKFPS Outbound Credit Transfer Transaction View - Field Description

Field	Description
Transaction Branch	This field displays the Transaction Branch details.
Transaction Reference Number	This field displays the Transaction Branch Number, using the current logic.
Host Code	This field displays the Host Code details.
Transaction ID	This field gets generated on authorization of the outbound HKFPS payment. Transaction ID (PKDOTONL/PKDOVIEW) is generated using the UETR number generation logic (used in Cross Border Module). However, with the 4 hyphens removed, resulting in a total length of 32 characters.
Source Code	For manually input transactions, source code is defaulted as MANL. For transactions received through web services or rest services, the source code is populated as received in the request.
Network Code	If only one Network is maintained for with payment type as 'Faster Payment' ('K') for the host code, the same is displayed in this field. In case multiple networks are found for the same combination, all applicable networks are listed for the field. You can select the required network.
End to End ID	End to End ID is populated as the transaction reference.
Message ID	This field is generated at the time of message generation on authorization of the outbound HKFPS payment. Format: M[Clearing Code][YYYYMMDD][Others] Clearing Code which is part of mask: This is populated as the Sender Bank Clearing Code as maintained in 'HKFPS Network Currency Details' [PKDHFNC]. "[YYYYMMDD]" is the activation date in YYYYMMDD format [pick up from PKDOTONL] "[Others]" is transaction reference number generated and defaulted in field 'Payment Details Reference' in the transaction screen. Valid example: M00120160801-A10200/N3001
Payee Account Verification	By default, this field is un-checked. During message generation, <ul style="list-style-type: none"> • If Checked: populate 'PERFORM_PYE_VRF' • If un-checked: populate 'SKIP_PYE_VRF'

Payment Details Reference	You can specify any payment specific reference this field. This is defaulted to transaction reference number and editable.
Category Purpose Code	<p>Select the Category Purpose Code from the following:</p> <ul style="list-style-type: none"> • CXPSNL - For General Personal Payment (Default) • CXBSNS - For General Business Payment • CXMRCH - For Merchant Payment • CXSALA - For Salary and Benefits Payment
Sanction Seizure	This field displays Sanction Seizure.
On Us Transfer	<p>This field is displayed based on the payee branch clearing code from the following:</p> <ul style="list-style-type: none"> • Yes • No

1.3.2.2 Additional Details

- On **Additional Details** button, specify the fields.

Figure 1-22 HKFPS Outbound Credit Transfer Transaction View - Additional Details

The screenshot displays the 'Additional Details' window for an HKFPS Outbound Credit Transfer Transaction. The window is titled 'HKFPS Outbound Credit Transfer Transaction View - Additional Details' and has a close button (X) in the top right corner. The form is organized into several sections:

- Transaction Reference No** and **Network Code** fields are at the top left.
- Host Code** and **Activation Date** fields are at the top right.
- Payment Details (Unstructured)** section contains six **Remittance Information** fields, numbered 1 through 6.
- Purpose Details** section contains a **Category Purpose Code** field with a search icon (magnifying glass) and a **Purpose Value** field.
- At the bottom right, there are **Cancel** and **Save** buttons.

Table 1-15 HKFPS Outbound Credit Transfer Transaction View_Additional Details - Field Description

Field	Description
Transaction Reference Number	This field displays Transaction Reference Number.
Host Code	This field displays Host Code.
Network Code	This field displays Network Code.
Activation Date	The field displays Activation Date.
Payment Details (Unstructured)	--
Remittance Information 1-6	This field displays the payment related information here.
Purpose Details	--
Category Purpose Code	This field displays Category Purpose Code from the list of values.
Purpose Value	This field displays any non-ISO purpose codes.

1.3.2.3 Processing Status Tab

- This tab provides the Transaction Status Details, External System Requests Status, Dispatch and Error details.

Figure 1-23 HKFPS Outbound Credit Transfer Transaction View - Processing Status Tab

The screenshot displays the 'HKFPS Outbound Credit Transfer Transaction View' with the 'Processing Status' tab selected. The interface includes several sections:

- Top Section:** Fields for Network Code, Message ID, and Payee Account Verification (toggle).
- Navigation Tabs:** Main, Processing Status (active), Pricing, and Exception.
- Status Details:** Fields for Transaction Status, Exception Queue, DRLO Status, CRLQ Status, Settlement Status, and On-Us Credit Transfer. A 'View Queue' button is also present.
- External Communications:** Fields for Sanction Check Status, Sanction Check Reference, Sanction Seizure, External Credit Approval Status, External Credit Approval Reference, External Exchange Rate Status, and External Exchange Rate Reference.
- Dispatch Details:** Fields for Dispatch Reference, File Reference Number, and File Name.
- Error Details:** Fields for Error Code and Error Description.
- Bottom Bar:** Buttons for 'UDF', 'MIS', 'View Queue Action', 'Accounting Entries', 'All Messages', 'Audit', and 'Cancel'.

1.3.2.4 Pricing Tab

- You can view the charge amount computed by the system for each of the Pricing components of the Pricing code linked to the network code of the transaction.
- For the Transaction initiated, system displays the fees/tax charged in this tab. Click the "Pricing" tab.
- On **Pricing Tab**, specify the fields.

Figure 1-24 HKFPS Outbound Credit Transfer Transaction View - Pricing Tab

Table 1-16 HKFPS Outbound Credit Transfer Transaction View_Pricing Tab - Field Description

Field	Description
Pricing Component	System displays each Pricing component of the Pricing code from the Pricing Code Maintenance.
Pricing Currency	System displays the Pricing currency of each Pricing component of the Pricing code.
Pricing Amount	System displays the calculated Charge amount for each Pricing component of the Pricing code.
Waived	System displays if charges for any Pricing component are waived in the Pricing maintenance.
Debit Currency	System displays the currency of the Charge account to be debited for the charges.
Debit Amount	System displays the Charge amount for each Pricing component debited to the charge account in Debit currency. If the Pricing currency is different from the Debit currency the calculated charges are converted to the Debit currency and populated in this field.

1.3.2.5 Exception Tab

- This tab provides the Return and Network Reject Details.

Figure 1-25 HKFPS Outbound Credit Transfer Transaction View - Exception Tab

1.3.2.6 UDF Button

1. This sub-screen defaults values of UDF fields that are part of the UDF group specified for the 'Manual' source.
2. Click the **UDF button** to invoke the 'UDF' sub-screen.

- 3. On **UDF Button**, specify the fields.

Figure 1-26 UDF Button

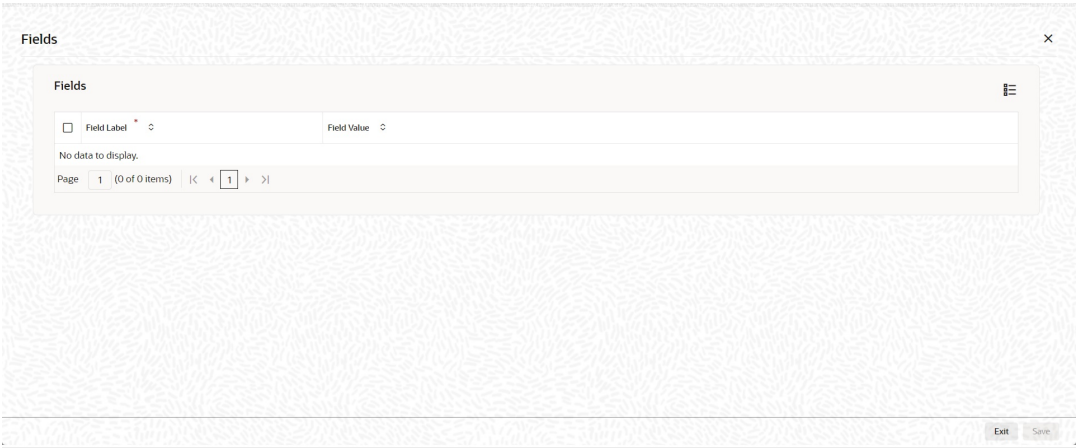

Table 1-17 UDF Button - Field Description

Field	Description
Field Label	System displays all fields that are part of the associated UDF group.
Field Value	System displays the default value, where exists for the UDF fields. You can change the default value or specify value for other fields (where default value does not exist).

1.3.2.7 MIS Button

- 1. You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance.
- 2. Click the **MIS** button to invoke the 'MIS' sub-screen.
- 3. On **MIS Button**, specify the fields.

Figure 1-27 MIS Button

The screenshot shows the 'MIS Details' window. At the top, there are two input fields: 'Transaction Reference Number' and 'MIS Group'. Below these, the window is divided into two main sections: 'Transaction MIS' on the left and 'Composite MIS' on the right. Each section contains a list of input fields with search icons. At the bottom right, there are 'Exit' and 'Save' buttons.

Table 1-18 MIS Button - Field Description

Field	Description
Transaction Reference	System displays the transaction reference number of the transaction.
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.

1.3.2.8 View Queue Action Log

1. You can view all the queue actions for the respective transaction initiated. You can invoke this screen by clicking the **View Queue Action** tab in main screen, where the Transaction Reference Number is auto populated and Queue movement related details are displayed.
2. Click the **View Queue Action Log** button to invoke the sub-screen.

Figure 1-28 View Queue Action Log

3. Following details are displayed:

- Transaction Reference Number
- Network Code
- Action
- Remarks
- Queue Code
- Authorization Status
- Maker ID
- Maker Date Stamp
- Checker ID
- Checker Date Stamp
- Queue Status
- Queue Reference No
- Primary External Status
- Secondary External Status
- External Reference Number

You can view the request sent and the corresponding response received for each row in Queue Action Log.

4. Also, you can view the request sent to and the response received from external systems for the following:

- Sanction System
- External Credit Approval
- External Account Check
- External FX fetch
- External Price Fetch
- Accounting System

1.3.2.9 Accounting Details

1. Click the **Accounting Details** tab and view the accounting entries for the transaction initiated.

Figure 1-29 Accounting Entries

The screenshot displays the 'Accounting Entries' window. At the top, there is a search bar labeled 'Enter Query' and a field for 'Transaction Reference Number'. Below this is a table titled 'Accounting Entries'. The table has a header row with the following columns: Event Code, Transaction Date, Value Date, Account, Account Branch, TRN Code, Dr/Cr, Amount Tag, Account Currency, Transaction Amount, Netting, and Offset Account. The table body is empty, showing 'No data to display.' and a pagination bar indicating 'Page 1 (0 of 0 items)'. At the bottom of the window, there are tabs for 'Accounting Details' and 'Exit'.

2. By default, the following attributes are displayed:

- Event Code
- Transaction Date
- Value Date
- Account
- Account Branch
- TRN Code
- Dr/Cr
- Amount Tag
- Account Currency
- Transaction Amount
- Netting
- Offset Account
- Offset Account Branch
- Offset TRN Code
- Offset Amount Tag
- Offset Currency
- Offset Amount
- Offset Netting
- Handoff Status

1.3.2.10 All Messages

- You can invoke this screen by clicking 'All Messages' tab in the screen. On click of 'All Messages', system displays the below screen, with the outbound pacs.008 message sent, inbound pacs.002 settlement message received.

Figure 1-30 HKFPS Outbound Credit Transfer Transaction View - All Messages

1.3.2.11 HKFPS Outbound Credit Transfer Transaction View Summary

- On Homepage, specify **PKSOVIEW** in the text box, and click next arrow.
HKFPS Outbound Credit Transfer Transaction View Summary screen is displayed.

Figure 1-31 HKFPS Outbound Credit Transfer Transaction View Summary

- Search using one or more of the following parameters:
 - Transaction Reference Number
 - Transaction Status
 - Exception Queue
 - Payer Account Number

- Dispatch Status
 - Booking Date
- Once you specified the parameters, click the **Search** button.
System displays the records that match the search criteria.

1.3.3 HKFPS Inbound Real Time Credit Transfer Message Browser

- On Homepage, specify **PKSINBRW** in the text box, and click next arrow.

HKFPS Inbound Real Time Credit Transfer Message Browser screen is displayed.

The screenshot shows the 'HKFPS Inbound Real Time Credit Transfer Message Browser' interface. At the top, there are search options: 'Search', 'Advanced Search', 'Reset', and 'Clear All'. A 'Records per page' dropdown is set to 15. Below this is a 'Search (Case Sensitive)' section with various input fields: Branch, Message Type, FPS Reference Number, Message Date (MM/DD/YYYY), Original Message ID, Network Code, Message Status, Original Transaction ID, Transaction Reference No, and Settlement Status. Each field has a search icon. Below the search fields is a 'Search Results' section with a table of columns: Branch, Original Message ID, Original Transaction ID, Message Type, Network Code, Transaction Reference No, FPS Reference Number, Message Status, and Settlement Status. The table is currently empty, displaying 'No data to display.' Below the table is a pagination bar showing 'Page 1 Of 1' and navigation arrows. At the bottom of the screen are buttons for 'View Message', 'View Transaction', and 'Exit'.

Figure 1-32 HKFPS Inbound Real Time Credit Transfer Message Browser

This is an identical copy of the screenshot above, showing the 'HKFPS Inbound Real Time Credit Transfer Message Browser' interface with search fields, results table, and navigation buttons.

- Search using one or more of the following parameters:
 - Branch
 - Original Message ID
 - Original Transaction ID
 - Message Type
 - Network code
 - Transaction Reference Number
 - FPS Reference Number
 - Message Status

- Settlement Status
 - Message Date
- Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.
 - Perform the following actions:

Table 1-19 HKFPS Inbound Real Time Credit Transfer Message Browser - Action

Action	Description
View Message	Click View Message button to invoke the sub screen that displays outgoing pacs.008 messages applicable.
View Transaction	Click View Message button to invoke the sub screen that displays the Inbound view screen (PKDIVIEW) for pacs.008 messages.

Field	Description
Pricing Component	System displays each Pricing component of the Pricing code from the Pricing Code Maintenance.
Pricing Currency	System displays Pricing currency of each Pricing component of the Pricing code.
Pricing Amount	System displays calculated Charge amount for each Pricing component of the Pricing code.
Waived	System displays if charges for any Pricing component are waived in the Pricing maintenance.
Credit Currency	System displays currency of the Charge account to be credited for the charges.

Table 1-23 (Cont.) HKFPS Inbound Credit Transfer Transaction View_Pricing Tab - Field Description

Field	Description
Credit Amount	System displays Charge amount for each Pricing component credited to the charge account in Debit currency. If the Pricing currency is different from the Credit currency the calculated charges are converted to the Credit currency and populated in this field.

1.4.1.5 Exception Tab

- This tab provides the Return and Network Reject Details.

Figure 1-38 HKFPS Inbound Credit Transfer Transaction View - Exception

1.4.1.6 UDF Button

- This sub-screen defaults values of UDF fields that are part of the UDF group specified for the 'Manual' source.
- Click the **UDF button** to invoke the 'UDF' sub-screen.
- On **UDF Button**, specify the fields.

Figure 1-39 UDF Button

Table 1-24 UDF Button - Field Description

Field	Description
Field Label	System displays all fields that are part of the associated UDF group.
Field Value	System displays the default value, where exists for the UDF fields. You can change the default value or specify value for other fields (where default value does not exist).

1.4.1.7 MIS Button

1. You can maintain the MIS information for the Transaction. If the MIS details are not entered for the Transaction the same is defaulted from the product maintenance.
2. Click the **MIS** button to invoke the 'MIS' sub-screen.
3. On **MIS Button**, specify the fields.

Figure 1-40 MIS Button
Table 1-25 MIS Button - Field Description

Field	Description
Transaction Reference	System displays the transaction reference number of the transaction.
MIS Group	You can select the MIS group code from the option list, or specify the code for the MIS group in the Source maintenance. The system displays all valid MIS groups for different sources in the MIS group list in the Source maintenance. When booking a transaction from this screen, the MIS group linked to the 'Manual' source is populated by default.

Table 1-25 (Cont.) MIS Button - Field Description

Field	Description
Default button	After selecting a MIS group different from the default MIS Group, click this button to populate any default MIS values and link them to the Transaction MIS and Composite MIS classes.
Transaction MIS	You can populate the default MIS values for Transaction MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.
Composite MIS	You can populate the default MIS values for Composite MIS classes for the MIS group. Alternatively, you can change one or more default MIS values or specify additional MIS values. Or, you can select MIS values from the option list.

1.4.1.8 View Queue Action Log

1. You can view all the queue actions for the respective transaction initiated. You can invoke this screen by clicking the **View Queue Action** tab in main screen, where the Transaction Reference Number is auto populated and Queue movement related details are displayed.
2. Click the **View Queue Action Log** button to invoke the sub-screen.

Figure 1-41 View Queue Action Log

3. Following details are displayed:
 - Transaction Reference Number
 - Network Code
 - Action
 - Remarks
 - Queue Code
 - Authorization Status
 - Maker ID
 - Maker Date Stamp
 - Checker ID

- Checker Date Stamp
- Queue Status
- Queue Reference No
- Primary External Status
- Secondary External Status
- External Reference Number

You can view the request sent and the corresponding response received for each row in Queue Action Log.

- Also, you can view the request sent to and the response received from external systems for the following:
 - Sanction System
 - External Credit Approval
 - External Account Check
 - External FX fetch
 - External Price Fetch
 - Accounting System

1.4.1.9 Accounting Details

- Click the **Accounting Details** tab and view the accounting entries for the transaction initiated.

Figure 1-42 Accounting Entries

The screenshot displays the 'Accounting Entries' window. At the top, there is a search bar labeled 'Enter Query' and a field for 'Transaction Reference Number'. Below this is a table titled 'Accounting Entries'. The table has the following columns: Event Code, Transaction Date, Value Date, Account, Account Branch, TRN Code, Dr/Cr, Amount Tag, Account Currency, Transaction Amount, Netting, and Offset Account. The table is currently empty, with a message 'No data to display.' below the column headers. At the bottom of the table, there is a pagination bar showing 'Page 1 (0 of 0 items)' and navigation controls. At the bottom of the screen, there is a tab labeled 'Accounting Details' and an 'Exit' button.

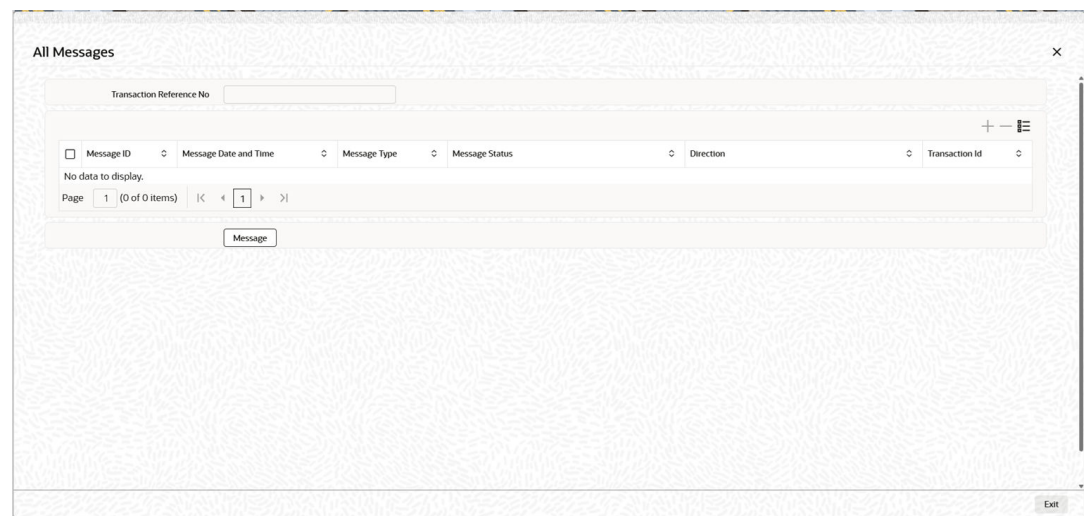

- By default, the following attributes are displayed:
 - Event Code
 - Transaction Date
 - Value Date
 - Account
 - Account Branch

- TRN Code
- Dr/Cr
- Amount Tag
- Account Currency
- Transaction Amount
- Netting
- Offset Account
- Offset Account Branch
- Offset TRN Code
- Offset Amount Tag
- Offset Currency
- Offset Amount
- Offset Netting
- Handoff Status

1.4.1.10 All Messages

- You can invoke this screen by clicking 'All Messages' tab in the screen. On click of 'All Messages', system displays the below new screen, with the incoming pacs.008 message received.

Figure 1-43 HKFPS Inbound Credit Transfer Transaction View - All Messages

1.4.1.11 HKFPS Inbound Credit Transfer Transaction View Summary

1. On Homepage, specify **PKSIVIEW** in the text box, and click next arrow.
HKFPS Inbound Credit Transfer Transaction View Summary screen is displayed.

Figure 1-44 HKFPS Inbound Credit Transfer Transaction View Summary

2. Search using one or more of the following parameters:
 - Transaction Reference Number
 - Transaction Status
 - Authorization Status
 - Checker Date Stamp
 - Checker ID
 - Maker Date Stamp
 - Maker Id
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.

1.4.2 HKFPS Inbound Real Time Credit Transfer Message Browser

1. On Homepage, specify **PKSINBRW** in the text box, and click next arrow.

HKFPS Inbound Real Time Credit Transfer Message Browser screen is displayed.

Figure 1-45 HKFPS Inbound Real Time Credit Transfer Message Browser

2. Search using one or more of the following parameters:
 - Branch
 - Original Message ID
 - Original Transaction ID
 - Message Type
 - Network code
 - Transaction Reference Number
 - FPS Reference Number
 - Message Status
 - Settlement Status
 - Message Date
3. Once you specified the parameters, click the Search button.
System displays the records that match the search criteria.
4. Perform the following actions:

Table 1-26 HKFPS Inbound Real Time Credit Transfer Message Browser - Action

Action	Description
View Message	Click View Message button to invoke the sub screen that displays outgoing pacs.008 messages applicable.
View Transaction	Click View Message button to invoke the sub screen that displays the Inbound view screen (PKDIVIEW) for pacs.008 messages.

- [Accounting Preferences Check](#)
- [Network Cutoff Check](#)
- [Message Generation and Dispatch](#)
- [On-Us Transfer Check](#)
- [Notifications](#)
- [Inbound Pacs.002 Payment Settlement Message Processing](#)

2.1.1 OBPM Internal/External Queues

Exception queues are not applicable.

Transactions are logged in queue in case of any validation failure and upfront rejected with the appropriate error message depending on the stage at which transaction failed.

Below are the validation done on Save of the transaction:

2.1.2 Mandatory Checks

Mandatory checks are done as per current functionality for processing outbound payments,

Below fields are mandatory in the request for HKFPS outbound payments:

- Host Code

- Network Code
- Source Code
- Payer Account Number
- Payee Bank Clearing Code
- Payee Account Number
- Payee Mobile Number
- Payee Email ID
- Payee FPS ID
- Payee Name
- Transfer Currency
- Transfer Amount
- Instruction Date

2.1.3 Referential Integrity Check & Initial Validations

1. Following parameters are validated with the static maintenance available for existence of the values:

Parameter	Description
Network code	Validated against the static maintenance (PMDNWCOD) available.
Currency Codes	In HKFPS Network Currency preferences (PKDHFNC), a record should be available for the Network Code, Network Currency combination. i.e HKD, RMB as required.
Host Code	This field is checked against valid host codes available in Host Code maintenance (STDHSTCD).
Transaction Branch Code	This has to be a valid branch maintained in system.
Debit Customer (Payer)	This is validated to check whether customer number is valid and existing.
Customer Account (Payer)	The customer account is verified to check whether it is valid and existing for the customer.
Transaction Branch - HKFPS Network Directory Check	<p>To identify if the network is allowed for the bank branch clearing code (Transaction Branch), system performs below check:</p> <ul style="list-style-type: none"> • Derive the transaction branch clearing code from 'Branch Identifier for HKFPS Network (PKDHFBR)' based on the transaction branch code. • Check if the Network Directory key is maintained as same in the following screens/ tables: <ul style="list-style-type: none"> - Network Directory Key maintained at 'HKFPS Network Directory (PKDHFDR)' for the derived transaction branch clearing code = Network Directory Key maintained at 'HKFPS Network Currency Details (PKDHFNC)' for the corresponding network code- transfer currency. • If the above condition is not satisfied, a proper error message is given 'Transaction Branch clearing code, Network Directory Key combination does not match the Network Currency - Network Directory combination.

Parameter	Description
On Us Transfer	If the payee account belongs to the same Bank and Host and Dispatch is not applicable, then 'On Us Transfer' flag is checked by the system during processing. This flag indicates that payee account is internal to Bank and dispatch to Network is not applicable.

2. If any of the above validation fails, transaction is rejected with proper error code.

2.1.4 Holiday Check & Date Derivation

Holiday Check i.e., Branch Holidays, Network Holidays are not applicable for outbound HKFPS payments if processing mode is real time as maintained in (PKDOCTPF).

Activation Date is derived as same as Instruction Date.

Future date as Instruction Date is not allowed. Transaction is rejected with proper error code.

If Instruction date is back-dated, Activation date is moved to Current date.

2.1.5 Network Validations & Special Character Replacement

Payer/Payee/Bank/Additional details entered for a payment transaction are validated against valid characters allowed for the network.

- HKFPS Allowed characters set: A-Z, a-z, 0-9
- HKFPS Allowed special characters: !@#\$%^&*()_+{}|:;<>?-='(),./

If fields contain any invalid HKFPS character, then transaction is rejected with proper error code. Following fields are validated:

- Payer Name, Payer ID
- Payee Mobile Number, Payee Email ID, Payee FPS ID, Payee Name, Payee ID
- Remarks

Special characters entered in a payment transaction are validated and replaced with specific characters as defined in Special Characters maintenance.

2.1.6 Duplicate Check

Duplicate checks are done during transaction processing. Payment fields maintained for duplicate check in Source maintenance (PMDSORCE) are matched with all the payments booked within the duplicate period.

Booking date of the payments are considered for checking duplicate payments. Duplicate period is considered based on the number of days maintained for duplicate check for the source (PMDSORCE). If the maintenance is not available, no duplicate check is done.

Transaction is rejected with proper error code in case of duplicate transaction.

The following parameters are available for duplicate check:

- Payer Account : DBTR_ACC
- Payee Account: CRDTR_ACC (Mobile Number, Email ID, FPS ID is mapped to this element)
- Transfer Amount: TFR_AMT
- Instruction Date: VALUE_DATE

- Payee Bank Clearing Code: CRDTR_BANK_CODE (For HKFPS, Clearing Codes are mapped for this element)

Below are the validations done on Authorization of the transaction:

2.1.7 Sanction Check

Sanction check for HKFPS outbound payment transaction is done on payment activation date (current dated).

System verifies whether sanction check is applicable in Network Preferences, for outbound transaction type and initiates sanction check validation. Sanction check reference number is generated by system.

Out queue name for sending the sanction check relevant transaction details and In queue name for the response is fetched from 'Sanction Check System' maintenance.

Sanction Check system provides a response for the request. External system sanction status can be mapped to a system sanction status. This maintenance is available as part of Sanction Check Maintenance.

The system sanction status can be:

- Approved: Sanction check is approved by the external system
- Interim: Interim status or approval with override is received from external system
- Rejected.: This indicates that the contract failed sanction check

If the sanction check response status for a payment transaction is 'Approved', then further processing continues.

If the sanction check response status is 'Interim' or 'Rejected' then transaction is rejected with proper error code.

The seizure functionality of parking the funds to Seizure GL applies if a transaction is rejected and "Seize on Reject" flag is enabled at Sanctions Check System maintenance.

During seizure processing, the customer account (for outbound)/Nostro or Clearing GL (for incoming) is debited and Compliance Suspense GL is credited. Transaction Charges are not computed. Dispatch/Message generation is skipped for outbound transactions. Transaction status is marked as 'Cancelled' and 'SC Seizure' flag at transaction level is marked as 'Yes'.

2.1.8 Small FX Limit Check & Currency Conversion

For a cross currency payment transaction where debit currency and transfer currency are different, exchange rate maintained for the transaction branch in the Core system is considered.

If Small FX limit is defined in HKFPS Outbound Credit Transfer Preferences' (PKDOCTPF), then the auto rate pick up happens only if the transfer amount is within the small FX limit.

Transfer amount is converted limit currency maintained using midrate of FX rate type linked and limit check is done.

Exchange Rate Type is based on HKFPS Outbound Credit Transfer Preferences' (PKDOCTPF), maintained. Buy/Sell indicator is derived by the system based on the currency pair maintenance available.

If the transfer amount is above the small FX limit specified, system checks whether External Exchange Rate is applicable in HKFPS Outbound Credit Transfer Preferences' (PKDOCTPF).

If external system is available the transaction details, then system interfaces with external system for receiving the exchange rate along with FX Reference Number.

Based on the response received, exchange rate is populated and further processing of transaction continues.

If Small FX limit is not maintained auto rate pick up is done for all cross currency payment transactions without any limit check.

Payment is rejected in the following cases with proper error code details:

- Exchange Rate derivation based on core system maintenance fails
- Small FX limit is breached and no external exchange rate system maintenance is available

For transactions received from UI input, exchange rate is already available as part of transaction details and no processing on exchange rate is done again.

2.1.9 Pricing Check

Charge computation for HKFPS payment transaction is made based on the “External Pricing Applicable” flag set at Source Network Preferences level.

If External pricing is not applicable for the Source and Network combination, then Charge and tax for HKFPS Payment transaction is calculated based on the Pricing Code linked in the outbound credit transfer payment preferences (PKDOCTPF).

Pricing components applicable to the price code and the attributes like whether the component is a charge or tax, Pricing currency and the exchange rate type are derived from Pricing Code maintenance (PPDCDMNT).

For the payment source of the transaction and applicable service model of debit customer, pricing values are fetched from Pricing Value Maintenance (PPDVLMNT).

The pricing value record valid for current date only is considered. Any pricing value record maintained with a future effective date is excluded.

Charge components are processed prior to tax components involved. If a charge component is waived, the related tax also is waived automatically.

If “External Pricing Applicable” flag is set as Yes at Source Network Preferences, charge calculation is skipped and system captures the pricing details from External Pricing System.

If the pricing check response status is 'Interim' or 'Rejected', then transaction is rejected with proper error code.

2.1.10 ECA Check

Payments is sending debit accounting entries pertaining to payment amount and charge/tax amounts to external system for credit checks. ECA checks are done on activation date (current dated).

External Credit Approval is done for all the external accounts for which debit entries are getting posted. Debit account entry details are sent in JMS queues to external ECA system.

Transaction ECA status is updated based on the response received from the external system.

The ECA system is expected to validate the following and send the response:

- Existence of the account
- Currency of the account specified is correct

- Account belongs to the customer specified
- Account exists on the specified branch
- Account is authorized, active & open
- Account status is Normal i.e., not Dormant
- Debit is not restricted on the account
- Clear available balance in the account is greater than the transaction amount specified
- Amount block is successfully executed for the specified transaction amount. Expiry date of the transaction is transaction value date

If the ECA response status for a payment transaction is 'Approved', then further processing continues.

If ECA validation fails i.e. the status is 'Interim' or 'Rejected', transaction is rejected with proper error codes.

2.1.11 Accounting Preferences Check

Before Messaging: If the accounting preference chosen for the Network is 'Before Messaging' as maintained in 'HKFPS Outbound Credit Transfer Preferences' (PKDOCTPF), the Message Generation and Handoff of Payment message is subsequent to debit/credit accounting for the outbound payment. However, the payment processor do not wait for the accounting success/failure response from Accounting/DDA system.

- In case of payment rejection as per pacs.002 response from network, Accounting reversal request is sent to DDA system and payment status is reversed.

On Confirmation from CI: If the accounting preference selected is 'On confirmation from ICL', the debit /credit accounting is passed only after the receipt of pacs.002 response from network. If the payment is rejected the balance block (ECA) reversal request is sent to DDA system.

Accounting entries: The following details are sent to accounting system in an xml format to External Accounting System as part of Debit/Credit liquidation:

Details in Accounting hand-off	Debit Liquidation	Credit Liquidation
Accounting Event	DRLQ	CRLQ
Amount Tag	XFER_AMT	XFER_AMT
Transaction Account	Payer Account	Outward Clearing GL maintained in the Accounting code. If Nostro Account (Network Account) is maintained in (PKDOCTPF) that is considered
Offset Account	This is picked from the Debit Liquidation Accounting code maintenance	This is picked from the Credit Liquidation Accounting code maintenance
Transaction Currency	Debit Account Currency	Transfer Currency
Transaction Amount	Debit Amount	Transfer Amount
Transaction Date/ Value Date	Activation Date	Activation Date
Offset Currency	Transfer Currency	Transfer Currency
Offset Amount	Transfer Amount	Transfer Amount

Details in Accounting hand-off	Debit Liquidation	Credit Liquidation
Local Currency Amount	<p>If either transaction currency or offset currency is local currency, corresponding amount is handed off as local currency amount.</p> <p>If not, transfer amount is converted to local currency in mid-rate.</p>	Local currency amount of DRLQ is used.

2.1.12 Network Cutoff Check

Network Cutoff check is not applicable for outbound HKFPS payments if processing mode is real time as maintained in (PKDOCTPF).

2.1.13 Message Generation and Dispatch

Only 'Real Time' processing mode is supported.

System generates real-time dispatch of pacs.008 message with single payment transaction in HKFPS standard ISO 20022 format.

Message dispatch is done on activation date (current dated) for real time payments.

2.1.14 On-Us Transfer Check

Before dispatch of the outbound pacs.008 message, system checks if the outbound payment is On-Us Transfer or not.

If the outbound payment is derived as 'On-Us Transfer' (Yes), then system further checks

- If 'Dispatch On-Us Transfer' flag is 'checked' or 'un-checked' at 'HKFPS Outbound Credit Transfer Payment Preferences screen (PKDOCTPF)
 - If 'Y' (Checked), then system hand-off the outbound pacs.008 message to FPS.
 - If 'N' (Un-checked), then outbound pacs.008 message is not handed off to FPS. Instead system automatically books an inbound credit transfer payment for the same.

On Us Transfer: Payer & Payee Account numbers are within the different branches of the same bank or within the same branch. A record for payee bank clearing code is present in 'Branch Identifier for HKFPS Network (PKDHFBR)'

- If the outbound payment is not a 'On-Us Transfer'
 - Outbound pacs.008 message is handed off to FPS

2.1.15 Notifications

Notifications are posted asynchronously to Notification Queue in a generic xml format for payment status (and is available for consumption to external systems).

Applicable Notification events: PAYMENT_SUCCESS, PAYMENT_CANCEL, PAYMENT_CREDIT_CONFIRMED (on receipt of pacs.002).

The generated notifications can be viewed from Notification Browser (PMSNOTFY).

2.1.16 Inbound Pacs.002 Payment Settlement Message Processing

On receipt of incoming pacs.002, system matches to the original outbound payment based on 'Message ID'.

- Check <Document><pacs.002.001.08">, if <TxInfAndSts> is 'ACSC' or not
- Match based on <OrgnlMsgId> of incoming pacs.002 = <MsgId> of outgoing pacs.008
- and update the outbound CT payment settlement status (New Field in main) 'Settled', 'Rejected' or 'Pending' (i.e. pacs.002 message yet to be received)

Reason Code <TxInfAndSts/ TxSts>	Settlement Status	Transaction Status
If ACSC	Settled	Processed
If Other than ACSC	Rejected	Rejected

2.2.1 OBPM Internal/External Queues

Exception queues are not applicable.

Transactions are logged in queue (except the below) in case of any validation failure and upfront rejected with the appropriate error message depending on the stage at which transaction failed:

- **Sanction Check** - However Payment is auto- rejected (with appropriate reject reason code) in case SC Response is 'Rejected', 'Interim'. None of the queue actions are allowed.
- **EAC Check** - However Payment is auto- rejected (with appropriate reject reason code) in case EAC Response is 'Rejected', 'Interim'. None of the queue actions are allowed.
- **Exchange Rate Queue** - Rate Input, Resend actions are allowed.

2.2.2 Message Upload - Account Branch/Host/Network/Transaction Type Derivation

Background job is available for reading the incoming pacs.008 message and to populate the data into staging table. Source code is derived as 'HKFPS'.(Hard-Coded Value).

System performs branch, network & value date resolutions at this stage.

Transaction Account Branch & Host Resolution:

- System derives the transaction account branch from the below tag in the incoming pacs.008 message.
- <CdtrAgt\FinInstnId\BICFI\ClrSysMmbld\Mmbld>
- Above, transaction branch clearing code is compared with branch codes mapped in 'Branch Identifier for HKFPS Network (PKDHFBR)'.
- Once the branch code is identified, system checks Core maintenance for branches (STDCRBRN) to derive the linked Host code for the branch.

Network & Transaction Type Resolution:

- Network Code is derived based on 'Network Directory Key' (Hard-Coded Value 'HKFPS') maintained in 'HKFPS Network Currency Details (PKDHFNC)'.
- The Transaction type* is derived as 'Incoming' based on the network code maintained in 'HKFPS Inbound Credit Transfer Preferences' (PKDICTPF).
- * This term has been used as reference. There is no corresponding field.

Payment Value Date Resolution:

- Holiday Check i.e., Branch Holidays are not applicable for inbound HKFPS payments if processing mode is real time as maintained in (PKDICTPF).
- Interbank Settlement Date is considered as Instruction date for incoming payment.
- Activation Date is derived as same as Instruction Date.
- If Instruction date is back-dated, Activation date is moved to Current date.

Transaction reference number is generated as per existing logic.

Reference Numbers as received from incoming message are stored in the following fields:

- Transaction Identification stored in Original Transaction ID.
- End to end Identification stored in End to End ID.
- Clearing system reference stored in FPS Reference Number.

Interbank settlement amount/currency is considered as transfer currency for incoming transactions.

System performs mandatory field checks & referential integrity checks during transaction saving.

2.2.3 Payee Account Verification Check

System checks for the following from the incoming pacs.008 message:

- <LclInstrm><Prtry>="SKIP_PYE_VRF"

- If the above condition is satisfied, in case of any subsequent validation failure during processing of inbound payments, system generates pacs.004 payment return message.

2.2.4 Mandatory Checks

Below fields are mandatory for booking HKFPS incoming payment:

- Host Code
- Transaction Branch
- Network Code
- Source Code
- Payer Account Number
- Payer Bank Clearing Code
- Payee Bank Clearing Code
- Payee Account Number
- Transfer Currency
- Transfer Amount
- Instruction Date

2.2.5 Referential Integrity Check & Initial Validations

Following parameters are validated with the static maintenance available for existence of the values:

Network code: Validated against the static maintenance (PMDNWCOD) available.

Currency Codes: In HKFPS Network Currency preferences (PKDHFNC), a record should be available for the Network Code, Network Currency combination. i.e HKD, RMB as required.

Host Code: This field is checked against valid host codes available in Host Code maintenance (STDHSTCD).

Transaction Branch Code: This has to be a valid branch in core maintenance.

Payee Customer Account: This is validated to check whether customer number is valid and existing.

Payee Customer Account: The customer account is verified to check whether it is valid and existing for the customer.

2.2.6 Duplicate Check

Duplicate checks are done during transaction processing. Payment fields maintained for duplicate check in Source maintenance (PMDSORCE) are matched with all the payments booked within the duplicate period.

Transaction is rejected with proper error code in case of duplicate transaction.

The following parameters are available for duplicate check:

- Payer Account : DBTR_ACC
- Payee Account: CRDTR_ACC (Mobile Number, Email ID, FPS ID is mapped to this element.)

- Transfer Amount: TFR_AMT
- Instruction Date: VALUE_DATE
- Payee Bank Clearing Code: CRDTR_BANK_CODE (For HKFPS, Clearing Codes is mapped for this element)

2.2.7 Sanction Check

Sanction check for HKFPS incoming payment transaction is done on payment activation date.

If sanction is approved, the transaction is resumed with the further processing.

In case of seizure, Nostro account is debited, and the Seizure GL is credited. (No response is generated)

If the status is rejected, interim or timed out, the transaction is rejected. If SC status is

- Rejected/Interim- Transaction is returned
 - System do not consider SC Final Response for the 'interim' status
- Pending - OBPM awaits a response from SC system and based on the response received, it processes further as above

2.2.8 FX Limit Check

For a cross currency payment transaction where debit currency and transfer currency are different, exchange rate maintained for the transaction branch in the Core system is considered.

If Small FX limit is defined in HKFPS Inbound Credit Transfer Preferences (PKDICTPF), then the auto rate pick up happens only if the transfer amount is within the small FX limit.

Transfer amount is converted limit currency maintained using midrate of FX rate type linked and limit check is done.

Exchange Rate Type is based on HKFPS Inbound Credit Transfer Preferences' (PKDICTPF), maintained. Buy/Sell indicator is derived by the system based on the currency pair maintenance available.

If the transfer amount is above the small FX limit specified, system checks whether External Exchange Rate is applicable in HKFPS Inbound Credit Transfer Preferences' (PKDICTPF).

If external system is available the transaction details, then system interfaces with external system for receiving the exchange rate along with FX Reference Number.

Based on the response received, exchange rate is populated and further processing of transaction continues.

If Small FX limit is not maintained auto rate pick up is done for all cross currency payment transactions without any limit check.

Payment is moved to Exchange Rate Queue in the following cases with proper error code details:

- Exchange Rate derivation based on core system maintenance fails.
- Small FX limit is breached and no external exchange rate system maintenance is available.
- Only Resend, Rate Input actions are allowed from the queue.

2.2.9 External Account Check

Credit entry details to payee account are sent to external DDA system for validating external account status.

Credit amount net of charges to be credited to customer account is sent in the JMS request header details. Details about transaction amount, transaction code, netting details and component wise charge details are also part of request message.

- If External Account Check is 'Approved', the transaction is marked as 'Processed'.
- If the EAC status is 'Rejected', 'Interim', then the transaction is returned.
- System do not consider EAC/DDA Final Response for the 'interim' status.

If the EAC status is 'Pending', OBPM awaits a response from EAC/DDA system and based on the response received, it processes further as above.

2.2.10 Pricing Check

Charge/Tax computation is similar to HKFPS inbound transactions.

Internal pricing calculations is performed for the inbound payment, if applicable.

2.2.11 Debit/Credit Liquidation

Debit and credit liquidation is done based on the accounting code maintained in HKFPS Inbound Credit Transfer Preferences (PKDICTPF).

The following details are sent to accounting system in an xml format to External Accounting System as part of Debit/Credit liquidation:

Details in Accounting hand-off	Debit Liquidation	Credit Liquidation
Accounting Event	DRLQ	CRLQ
Amount Tag	XFER_AMT	XFER_AMT
Transaction Account	Inward Clearing GL maintained in the Accounting code. If Nostro Account (Network Account) is maintained in (PKDICTPF) that is considered.	Payee Account
Offset Account	This is picked from the Debit Liquidation Accounting code maintenance	This is picked from the Credit Liquidation Accounting code maintenance
Transaction Currency	Transfer Currency	Credit Account Currency
Transaction Amount	Transfer Amount	Credit Amount
Transaction Date/ Value Date	Activation Date	Activation Date
Offset Currency	Transfer Currency	Transfer Currency
Offset Amount	Transfer Amount	Transfer Amount

Details in Accounting hand-off	Debit Liquidation	Credit Liquidation
Local Currency Amount	Local currency amount of DRLQ is used.	If either transaction currency or offset currency is local currency, corresponding amount is handed off as local currency amount. If not, transfer amount is converted to local currency in mid-rate.

2.2.12 Notifications

Notifications are posted asynchronously to Notification Queue in a generic xml format for payment status and is available for consumption to external systems.

Applicable Notification events: PAYMENT_SUCCESS.

The generated notifications can be viewed from Notification Browser (PMSNOTFY).
