This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle®, Java, MySQL, and NetSuite are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Inside are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Epyc, and the AMD logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Background

Oracle® Banking Supply Chain Finance Cloud Service is a comprehensive, digitized, end-to-end solution that supports the full lifecycle of supply chain finance across receivables and payables, providing both supplier-centric and buyer-centric financing. The solution addresses each of the supply chain processes from design through execution, thereby enabling the banks to optimize the working capital and supply chain operations of their corporate customers. Its unique value lies in its ability to provide the business with predefined processes and a world-class framework that takes care of business risk and compliance needs.

Purpose

This guide provides the details of the new enhancements in the Oracle® Banking Supply Chain Finance Cloud Service.

Audience

This guide is intended for the following audience:

- Customers
- Partners

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

- *Oracle® Banking Supply Chain Finance Cloud Service User Guides*

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Acronyms and Abbreviations

The list of acronyms and abbreviations that are used in this guide are as follows:

Abbreviation	Description
API	Application Programming Interface
UI	User Interface
OBDX	Oracle Banking Digital Experience
PO	Purchase Order
EOD	End of Day
FIFO	First In First Out
OBSCF	Oracle Banking Supply Chain Finance
OBCM	Oracle Banking Cash Management
OBSCFCM	Oracle Banking Supply Chain Finance and Cash Management
OBCL	Oracle Banking Corporate Lending
OBDX	Oracle Banking Digital Experience
OBPM	Oracle Banking Payments
IOPK	Full Screen Request and Full Screen Response

Abbreviation	Description
FSFS	Input Only Request and Primary Key Response
RFR	Risk Free Rate
RBAC	Role-based Access Control
SMS	Security Management System
LIBOR	London Interbank Offered Rate
IBOR	Interbank Offered Rate
FCUBS	Oracle FLEXCUBE Universal Banking Solutions
OJET	Oracle JavaScript Extension Toolkit
SWIFT	Society for Worldwide Interbank Financial Telecommunications

Release Notes

This topics provides the information about the release notes added to the product in this release.

This topic contains the following subtopics:

- [Release Highlights](#)
This topic provides the information on the release highlights added to the product in this release.
- [Release Enhancements](#)
This topic provides the information about the Release Enhancements for the current release.

1.1 Release Highlights

This topic provides the information on the release highlights added to the product in this release.

The scope of the current Oracle® Banking Supply Chain Finance Cloud Service release is to deliver the following enhancements:

Functional features

- [Structured/Hybrid Address](#)
- [Waiving and Overriding Penalty Components](#)
- [Deferring Charges](#)
- [Online Charges for Instrument Lifecycle Events](#)
- [Advices in Oracle Banking Supply Chain Finance](#)
- [Message 15 - Dispute Resolution](#)
- [Manage Dispute Functionality](#)
- [Message 11 – Payment](#)
- [Reversal Account Posting During Reconciliation, Post Assignment](#)
- [Dashboard Alerts](#)
- [Multilingual Regex Validations Support](#)
- [Charge Inquiry Service API Enhancements](#)

Non-Functional features

- [Plato Batch Framework Adoption](#)
- [Plato Migration Adoption](#)
- [Plato Config Transport Adoption](#)
- [Plato Archival Adoption](#)

- [Plato Field Configuration](#)
- [Customer Address Length Correction](#)
- [New Business Process Maintenance Adoption](#)
- [Common Core Enhancements](#)

Technical Changes

- [SQLcL Adoption](#)

Deprecated Features

- [Resolve Dispute Menu](#)

1.2 Release Enhancements

This topic provides the information about the Release Enhancements for the current release.

This topic contains the following subtopics:

- [Functional Features](#)
This topic provides the information about the various functional features added to the product in this release.
- [Non-Functional Features](#)
This topic provides the information about the non-functional features added to the product in this release.
- [Technical Changes](#)
This topic provides the information about the technical changes added in this release.
- [Integrations](#)
This topic provides the information on the integration enhancements added to the product in this release.
- [Deprecated Features](#)
This topic provides the information on the features deprecated from the product in this release.

1.2.1 Functional Features

This topic provides the information about the various functional features added to the product in this release.

Structured/Hybrid Address

The process of capturing addresses for cross-border accounts has been enhanced to accommodate structured address formats. It also permits the addition of hybrid or unstructured fields for extra details.

Waiving and Overriding Penalty Components

The Waiver and Override feature, which was only for charges before, now also covers the waiver and override of penalty components for both interest and principal.

Deferring Charges

A new feature has been added to postpone the collection of charges. This allows banks to delay the collection of charges until a later point in the invoice and financing process.

Online Charges for Instruments Lifecycle Events

Charges can now be levied on certain relevant invoice lifecycle events. The charges can be configured to be collected during the transaction or can be deferred to be collected at next stage.

Advices in Transactions

A new feature is introduced to show relevant advice in the transaction processing UI, giving bank users timely information when certain finance or instrument events happen. This advice can also be sent as email alerts with attachments to customers.

Message 15 - Dispute Resolution

Oracle Banking Supply Chain Finance now includes support for FCI Message 15, which helps import and export factors communicate about disputed receivables. Message 15 can be utilized to address disputes, send reminders about disputes, or resolve disputes.

Manage Dispute Functionality

The Manage Dispute functionality is now available for handling disputed invoices, enabling the triggering of FCI Message 15, where applicable.

Message 11 – Payment

Support for FCI Message 11 has been introduced, allowing the import factor to notify the export factor of payments made against invoices.

Reversal Account Posting During Reconciliation, Post Assignment

A new feature allows for reversing account postings when an assigned invoice is reconciled, whether partially or completely.

The reversal posting matches the payment amount, which cannot exceed the assignment amount.

Dashboard Alerts

Dashboard alerts are now supported within Oracle Banking Supply Chain Finance, providing timely notifications of key events.

Multilingual Regex/Special Characters Validations Support

Validation support for Regex/Special Characters in text fields is now available for the following languages in addition to English – Arabic, French, Portuguese, Spanish, and Traditional Chinese.

Charge Inquiry Service API Enhancements

The querying charges API has been enhanced for handling deferred charges feature.

1.2.2 Non-Functional Features

This topic provides the information about the non-functional features added to the product in this release.

Plato Batch Framework Adoption

The Plato Batch framework is used for specific tasks, including future dated disbursements, auto-debit transactions, invoice and purchase order acceptance, retrying finance transactions, reconciliation transactions, and processing refunds. This framework offers extra configuration options for running batch jobs, such as commit frequency, stream size, and skip policy.

Plato Migration Adoption

The Plato Migration framework is used to implement configuration migration. A separate service has been created for migration, which currently supports the migration of program parameters.

Plato Config Transport Adoption

The Plato Transport framework is introduced to the Master Maintenance service for transport of maintenance data from one environment to another.

Plato Archival Adoption

The Plato Archival framework has been implemented for event logs in Finance service for archiving and purging the logs based on configuration.

Plato Field Configuration

A new service is introduced to provide the capability to make user interface extensible. This includes the ability to hide/show fields, enable/disable switches, set default values, or make non-mandatory fields as mandatory.

Customer Address Length Correction

Customer addresses have been enhanced to incorporate structured and unstructured fields. Shipment addresses for invoice and purchase orders have also been enhanced in line with address fields across the application.

New Business Process Maintenance Adoption

The new business process maintenance user interface is adopted to create and define Domain Specific Language workflow.

Common Core Enhancements

Additional fields have been brought into common core for OBMA based products inline with ODT common core.

1.2.3 Technical Changes

This topic provides the information about the technical changes added in this release.

SQLcL Adoption

SQLCL has been adopted instead of Flyway for execution of product DDL & DML.

1.2.4 Integrations

This topic provides the information on the integration enhancements added to the product in this release.

There are no integrations as part of this release.

1.2.5 Deprecated Features

This topic provides the information on the features deprecated from the product in this release.

Resolve Dispute Menu

The Resolve Dispute option has been deprecated, and its settlement functionality has been incorporated in the Manage Dispute action.

2

Components of the Software

This topic provides the information on the components of the software.

Documents accompanying the software

The various documents accompanying the software are as follows:

- Product Release Notes
- User Guides

Software Components

Software Components of Oracle® Banking Supply Chain Finance Cloud Service that are part of this release are as follows:

- Service and API Components
- UI Components
- Database objects which include tables, sequences, and static data
- Configuration files for the services

3

System Requirements and Tech Stack

This topic provides the information on the environment details of Oracle® Banking Supply Chain Finance Cloud Service.

Client Machines

For detailed information on Browser Support, please refer to [Oracle Software Web Browser Support Policy](#).

Note

Browser support is no longer based on Operating Systems but strictly tied to the browser themselves, no matter on which Operating Systems they are installed. Current release is certified on client workstations with Windows 10 and Mac OS.
